(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Securities Exchange Act of 1934:

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Title of each class	Name of each exchange on which registered
Ordinary Shares of 12 204/473 pence each	The New York Stock Exchange*
American Depositary Shares, each representing five Ordinary Shares of 12 204/473 pence each	The New York Stock Exchange
6.625% Guaranteed Notes due 2018	The New York Stock Exchange
Preferred Stock (\$100 par value-cumulative):	
3.90% Series	The New York Stock Exchange
3.60% Series	The New York Stock Exchange

* Not for trading, but only in connection with the registration of American Depositary Shares representing Ordinary Shares pursuant to the requirements of the Securities and Exchange Commission.

Securities registered or to be registered pursuant to Section 12(g) of the Securities Exchange Act of 1934: None.

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Securities Exchange Act of 1934: None.

The number of outstanding shares of each of the issuer's classes of capital or common stock as of 31 March 2018 was Ordinary Shares of 11 17/43 pence each 3,637,747,827

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act: Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Note — Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days: Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files): Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or an emerging growth company. See definition of "large accelerated filer" "accelerated filer" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Emerging growth company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards[†] provided pursuant to Section 13(a) of the Exchange Act.

[†]The term "new or revised financial accounting standard" refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP
International Financial Reporting Standards as issued by the International Accounting Standards Board
Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

Edgar Filing: NATIONAL GRID PLC - Form 20-F

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

This constitutes the annual report on Form 20-F of National Grid plc (the “Company”) in accordance with the requirements of the US Securities and Exchange Commission (the “SEC”) for the year ended 31 March 2018 and is dated 4 June 2018. Details of events occurring subsequent to the approval of the annual report on 16 May 2018 are summarised in section “Further Information” which forms a part of this Form 20-F. The content of the Group’s website (www.nationalgrid.com/uk) should not be considered to form part of this annual report on Form 20-F.

Our business environment Our environment is shaped by four themes: the impact on consumer bills, energy security, environmental sustainability and technology. As the energy ecosystem evolves, so do the needs of our stakeholders. Impact on consumer bills Commentary Consumers expect a reliable energy system that delivers gas and electricity when and where it is needed. They pay for the cost of this infrastructure and improvements to it through the part of their energy bills that covers network costs. These costs are subject to regulatory approval. 2017/18 developments Our response £35.48 UK •• Our US and UK regulated businesses continue In the UK, affordability of energy is a critical topic, to strive for greater efficiency, seeking innovative UK transmission network costs as highlighted in the 2017 General Election campaign. ways to reduce both the time and cost to repair per average annual household dual Price caps featured in both the Conservative and or replace assets. This approach minimises the fuel bill – representing around 3% Labour manifestos and an energy price cap bill costs to consumers. of the total bill is currently progressing through Parliament. The •• In the UK, we have been able to generate • Electricity transmission: £26.16 Labour Party also indicated in its manifesto that £540 million of savings for consumers in the first it was considering renationalising utility networks. five years of the RIIO arrangements. We have also • Gas transmission: £9.32 The Government commissioned the Cost of Energy volunteered that £480 million of RIIO T1 allowances • These costs cover the transport of Review in the summer of 2017. Its main findings were for electricity transmission investments should energy and maintaining very high that the cost of energy is too high, and that the energy be deferred, which will help ease the impact on levels of reliability policy, regulation and market design are not fit for the consumer bills. purposes of the emerging low-carbon energy market. •• We do not believe that renationalisation of National Grid would be in the best interests of UK US consumers, and we have communicated externally The cost of energy remains a concern for consumers the ways in which we have created and driven and regulators who expect affordable, reliable and value for customers and society since privatisation. cleaner energy at a low price. Costs of energy as a •• In the US, approval of new electricity and gas percentage of total spending have declined, mainly delivery rates in upstate New York allows us to as a result of low natural gas prices and household continue our new Energy Affordability Program, energy efficiency improvements. Additionally, costs which provides a bill decrease for most of low-carbon technologies such as solar, batteries income-eligible customers. New energy efficiency and energy management systems have fallen, solutions will result in bill decreases for our so they are increasingly being adopted. moderate income customers. Energy security Commentary The energy system is in a phase of transition from high to low carbon. Coal plants are closing down and being replaced with nuclear, renewables and gas, as well as emerging battery storage. Electricity margins need to be monitored and actively managed as we move to a generation mix with greater volumes of intermittent and distributed generation. 46% 2017/18 developments Our response UK •• National Grid Ventures has made significant (UK capacity) Over the summer of 2017, the majority of the progress in the construction of three new UK's energy supply came from renewable sources. electricity interconnectors from the UK to The UK also saw its first day free of generation from Belgium, France and Norway. coal in April 2017. As the region shifts towards an •• The Grain LNG import terminal received the 32% increasingly decarbonised generation mix, baseload first ever UK LNG cargos from the US and Peru, electricity prices are expected to increase. UK highlighting our ability to help deliver a more (UK production) wholesale gas prices have been trending upwards diverse gas supply for the UK. as sources of gas storage have decreased with the •• In the UK, we published our System Needs and closure of the Rough gas field and general global Product Strategy report, which sets the scene shifts in preferences from coal to gas. for future requirements, and consults on the 21% future of balancing services products. US •• In the US, approval of new electricity and gas (US capacity) The reliability of energy infrastructure remains delivery rates in upstate New York means we can a concern for consumers, regulators and policy invest \$2.5 billion over three years to modernise makers. Regulators are seeking investment to our electricity and natural gas networks. improve the security and resilience of energy 15 % networks. Natural gas supply has outpaced demand due to technological improvements in shale gas (US production) extraction, and wholesale gas prices have remained at historic low levels. Wholesale electricity prices Electricity generation supply have largely mirrored natural gas pricing due to from renewable sources in 2017 the increasing reliance of the energy industry on natural gas as a fuel. 4 National Grid Annual Report and Accounts 2017/18 Strategic Report | Our Business Environment

Our purpose, vision, values and strategy To make sure National Grid is well positioned to respond to changes in our business environment and within the energy industry, we continue to adhere to and promote our purpose, vision, values and strategy. Our purpose Our purpose Our values Having a clear sense of what we stand for as a We know that how we deliver is as important 'Bring Energy to Life'. company and what it is that binds us all together as what we deliver. If our purpose is the 'why', is vitally important. This is what we call our our values are the 'how'. They help shape our purpose. In simple terms it's what drives our spirit, attitude and what guides us. We have to Our vision desire to serve our customers and makes us adapt and develop our values to align with the 'We will exceed the expectations proud about the work we do. expectations of our customers and communities, without losing sight of the things that make us of our customers, shareholders Essentially, 'Bring Energy to Life' means getting strong today. and communities today and the heat, light and power that customers rely make possible the energy on to their homes and businesses. But 'Life' Our values build on and protect our strong also means supporting the communities that foundations while looking to the future. systems of tomorrow'. we are a part of and live among to support They are aligned to our purpose and help the economic growth and sustainability of our people understand how we expect Our values wider society. to achieve our purpose and vision for our customers and each other. 'Every day we do the right Our vision thing and find a better way'. Our vision describes how we create value – 'Do the right thing' pulls together our not just today, but in the future too. foundational values – keeping each other and the public safe; complying with all the relevant Our strategy The needs of our customers, shareholders and rules, regulations and policies; respecting communities are at the heart of everything we our colleagues, customers and communities; 'We have three strategic do. So, our vision statement clearly describes and saying what we think and challenging priorities for our business the ambitious challenge we have set ourselves constructively. 'Find a better way' challenges – to make sure we deliver value for them us to focus on performance and continuous that will help us achieve every day. improvement for our customers, our our vision: find new ways of shareholders and communities. optimising our operational Our vision also looks to the future, reminding us of the critical role we will play for future performance, look for generations. We continue to see changes in opportunities to grow our our energy system as more renewable and core business, and make decentralised generation is introduced. To be Finding a better way to connect gas relevant in this future, we have to play an active sure National Grid is better It currently takes around three years and role in helping shape the energy landscape, £2 million to connect new gas customers equipped for the future'. and benefiting from what it provides. to the National Transmission System (NTS). For smaller connections, we're working to halve the cost, and reduce the time to under one year through Project CLoCC (Customer Low Cost Connections). We will deliver these savings in three main ways. Firstly, we're developing an online gas connections portal to replace the current paper-based process. Customers will be able to generate indicative quotes within seconds, and will benefit from greater transparency on the status of their applications which they will be able to track from start to finish. Secondly, we've developed a suite of pre-approved and pre-appraised standardised connection designs, ready to order off the shelf. This will save our customers significant time and money. Finally, we're looking at ways to optimise commercial arrangements through changes to relevant gas regime governance. An example of this is the work we have done towards removing the absolute requirement for every new NTS exit connection to include a remotely operable valve (ROV) installation. This governance change, which became effective in January 2018, will reduce costs for customers. The project is running under budget and on schedule to complete later in 2018. 12 National Grid Annual Report and Accounts 2017/18 Strategic Report | Our purpose, vision, values and strategy

Strategic Report Our principal risks and uncertainties operations in our industry, and financial risks, which exist Accepting that it is not possible to identify, anticipate or because of our financing activities. Our principal risks, and eliminate every risk that may arise, and that risk is an inherent a summary of actions taken by management, are provided part of doing business, our risk management process in the table below. We have provided an overview of the aims to provide reasonable assurance that we understand, key inherent risks we face on pages 193-196, as well monitor and manage the main uncertainties that we face in as our key financial risks, which are incorporated within delivering our objectives. This includes considering inherent note 30 to our consolidated financial statements on risks, which exist because of the nature of day-to-day pages 158-164. Operational risks Operational risks relate to the risk of losses resulting from inadequate or failed internal processes, people and systems, or due to external events. These risks normally fall within our low risk appetite level as there is no strategic benefit from accepting the risk and accepting the risk is not in line with our vision and values. Our operational principal risks have a low likelihood of occurring, but have a high level of impact should the event occur without effective prevention and mitigation controls. The risk owners, executive leaders, and their teams develop and monitor actions to control the risks. Operational risks are managed through policy, standards, and procedure-based controls, active prevention and monitoring. The operational risks link to our strategic priority of 'Find new ways of optimising our operational performance'. Principal risk assessment included reasonable worst case scenario testing – i.e. gas transmission pipeline failure, loss of licence to operate, cyber security attack – and the financial and reputation impact should a single risk or multiple risks materialise. External events over this past year – the extreme weather events, the WannaCry cyber security attack, new data privacy legislation – were considered in the assessment and testing, as well as in the development of mitigation actions. Please also refer to page 192 for the discussion of climate-related influences on risk management. Risks Actions taken by management Catastrophic asset failure results in a significant safety and/or We continue to commit significant resources and financial environmental event. investment to maintain the integrity and security of our assets Risk trend: and data. This year, we have continued to focus on risk mitigation actions designed to reduce the risk and help meet our business objectives. Monitoring action status has been incorporated into Major cyber security breach of business, operational technology various business processes and senior leadership meetings. and/or critical national infrastructure (CNI) systems/data. Examples of actions include: Risk trend: •• Our Group-wide process safety management system is in place to make sure a robust and consistent framework of risk Failure to predict and respond to a significant disruption of energy management exists across our higher hazard asset portfolio. that adversely affects our customers and/or the public. •• We have implemented asset management and data management standards with supporting guidelines to provide Risk trend: clarity around what is expected, with a strong focus on what we need in place to keep us safe, secure and legally compliant. Failure to adequately identify, collect, use and keep private the In support of this, we developed a capability framework to make physical and digital data required to support Company operations sure our people have the appropriate skills and expertise to and future growth. meet the performance requirements in these standards. Risk trend: •• We continually invest in strategies that are commensurate with the changing nature of the security landscape. This includes collaborative working with the Department for Business, Energy and Industrial Strategy (BEIS) and the Centre for Protection of National Infrastructure (CPNI) on key cyber risks, as well as development of an enhanced CNI security strategy; and our involvement in the US with developing the National Institute of Standards and Technology Cyberspace Security Framework. •• Business continuity and emergency plans are in place and practised to ensure we quickly and effectively respond to a variety of incidents – storms, physical and cyber-related attacks, environmental incidents and asset failures. •• We have a mature insurance strategy that uses a mix of self-insurance, captives and direct (re)insurance placements. This provides some financial protection in respect of property damage, business interruption and liability risks. Strategic Report | Internal control and risk management National Grid Annual Report and Accounts 2017/18 19

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Internal control and risk management continued Strategic and Strategic risk is the risk of failing to achieve the Company's overall strategic business plans and objectives, as well as failing to have the regulatory risks 'right' strategic plan. We voluntarily accept some risk so we can generate the desired returns from our strategy. Management of strategic risks focuses on reducing the probability that the assumed risk would materialise, and improving the Company's ability to effectively respond to the risk should it occur. The risk owners, executive leaders, and their teams develop and monitor actions to control the risks. These risks link to our strategic priorities of 'look for opportunities to grow our core business' and 'make sure National Grid is better equipped for the future'. The political climate and policy decisions of our regulators this past year were key considerations in assessing our risks. Risks Actions taken by management Failure to influence future energy policy and secure satisfactory In both the UK and the US, we strive to maintain a good regulatory agreements. understanding of the regulatory agenda and emerging issues, Risk trend: so that robust, public interest aligned responses can be selected and developed in good time. Our reputation as a competent operator of important national infrastructure is critical to our ability Failure to deliver our customer, stakeholder and investor proposition to do this. We have plans and governance structures in place to due to increased political and economic uncertainty. address specific issues such as RIIO-T2 and US rate case filings Risk trend: and continuously work to foster open and effective relationships with our regulators and other stakeholders. Failure to adequately anticipate and minimise the adverse impact from disruptive forces such as technology and innovation on our Processes and resources are in place to review, undertake business model. due diligence and progress new investment opportunities, dispose of existing businesses, and identify and execute on opportunities Risk trend: that provide organic growth. These processes, along with twice-yearly National Grid Board strategy offsite discussions, are reviewed regularly to ensure they continue to support our short and long-term strategy. We regularly monitor and analyse market conditions, competitors and their potential strategies, the advancement and proliferation of new energy technologies, and the performance of our Group portfolio. We created the Group Technology and Innovation team to develop our strategy with regards to new technology, to monitor disruptive technology and business model trends, and to act as a bridge for emerging technology into the core regulated businesses and business development teams. In addition, the partnership with Energy Impact Partners was established in 2015 to gain exposure to emerging start-up companies. The new National Grid Ventures function will further the focus on new strategies, business development and technology and innovation. People It is through the high-quality work of our employees that we will achieve our vision, respond to the changing needs of our stakeholders and create a competitive advantage. Obtaining and fostering an engaged and talented team that has the knowledge, training, skills and experience to deliver our strategic objectives is vital to our success. We must attract, integrate and retain the talent we need at all levels of the business. Risks Actions taken by management Failure to build sufficient capability and leadership capacity Strategic workforce planning has been embedded in our US and (including effective succession planning) required to deliver UK organisations. This process helps to effectively inform financial our vision and strategy. and business planning, as well as human resourcing needs. Risk trend: Our entry-level talent development schemes (graduate training and apprenticeships) are a potential source of competitive advantage in the market place. We are involved in a number of initiatives to help secure the future engineering talent required, including the UK annual residential work experience week and the US Pipeline and Graduate Development Programmes. The rigour of our succession planning and development planning process has been improved over the year, particularly at senior levels, and is now being applied deeper into the organisation. Our Strategic Talent Acquisition team now includes internal executive search capability and market mapping of critical roles. Ongoing attention is required in relation to the ethnic diversity of our management population. There are multiple activities under way to drive this agenda, including 'blind' talent and selection processes, development interventions and a global review of our inclusion and diversity strategy and resources. Financial risks While all risks have a financial liability, financial risks are those which directly relate to financial controls and performance. Financial risk management is a critical process used to make investment decisions and aims to maximise investment returns and earnings for a given level of risk. Our key financial risks, which are incorporated within the notes to our consolidated financial statements, are described in note 30 to our financial statements on pages 159-164. 20 National Grid Annual Report and Accounts 2017/18 Strategic Report | Internal control and risk management

Borrowings: page 141. customer satisfaction. Commentary on UK and US regulation: pages 186-191. In addition to our regulated operations we own a UK metering business generating income primarily through meter rentals. We also own a diverse and growing portfolio of commercial energy Commentary on our financial performance and position for the year businesses operating in competitive markets across the UK and US. These include our Grain LNG ended 31 March 2017 compared with terminal and electricity interconnectors between the UK and continental Europe, and between the 31 March 2016: pages 215-216. US and Canada. These are generally electricity and gas infrastructure assets with a low risk profile and stable cash flows, underpinned by long-term contracts or regulatory arrangements. We also own a property business, developing and selling surplus land in our portfolio. Capital investment: In order to deliver this value, we: Additions to property, plant and • aim to operate within our regulatory frameworks as efficiently and compliantly as possible; equipment, plus contributions to JVs • perform well against our regulatory incentives, in order to deliver customer benefits and and associates, other than the St good returns; William property JV (contributions to St William are linked to property • manage our cashflow requirements and secure low cost funding; and site transfers). • maintain a disciplined approach to investment in our networks. Our financial performance explained Regulated asset base: In addition to our statutory reporting under IFRS, we believe it is helpful to report a range of alternative performance measures (or non-IFRS measures), and regulatory performance When considering the size of our asset measures, as summarised below. base, we reference our regulated asset base. This represents a measure by our regulators of the invested capital Profitability and earnings from the continuing business on which we are authorised to earn Adjusted results, also referred to as 'headline' results: These exclude the impact of a cash return, and includes our exceptional items and remeasurements that are treated as discrete transactions under IFRS and regulatory asset value in the UK, can accordingly be classified as such. This is a measure used by management that forms part plus our rate base in the US. of the incentive target set annually for remunerating certain Executive Directors. Further details of these items are included in Note 4 to the financial statements. Underlying results: Further adapts our adjusted results to take account of volumetric and other revenue timing differences arising due to the in-year difference between allowed and collected revenues, including revenue incentives, as governed by our rate plans in the US or regulatory price controls in the UK (but excluding totex-related allowances and adjustments). For 2017/18, our underlying results exclude £104 million of timing differences, as well as £142 million of storm costs (which are significant in aggregate this year) where we expect to recover the bulk of the costs incurred through regulatory mechanisms in the US. Prior period pro forma including Cadent overlay: To aid comparability with prior years, we show an estimate of adjusted and underlying results and earnings for the continuing business in 2016/17 and 2015/16, including an estimated contribution from our 39% interest in UK Gas Distribution (now Cadent). 22 National Grid Annual Report and Accounts 2017/18 Strategic Report | Financial review

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Strategic Report Profitability and earnings The table below shows our Group profit after tax and earnings per share for the year to 31 March 2018. Results from continuing operations – at actual exchange rates Group profit after tax from Earnings per share from continuing operations continuing operations 2017/18 2016/17

	2017/18	2016/17	%	£m	£m	change	pence	pence	change	Statutory profit after tax	3,592	1,810	98%	103.8	48.1	116%				
adjust for: exceptional items and remeasurements	(1,531)	331	(44.3)	8.8	Adjusted profit after tax	2,061	2,141	(4)	59.5	56.9	5%	adjust for: timing	(62)	(279)	(1.7)	(7.4)				
adjust for: major storms	91	– 2.6	–	Underlying profit after tax	2,090	1,862	12%	60.4	49.5	22%	adjust for: Cadent overlay	– 167	– 9.1	Underlying profit after tax (pro forma)	2,090	2,029	3%	60.4	58.6	3%

On a statutory basis, Group profit after tax from continuing operations was £3,592 million and EPS was 103.8p. Exceptional items and remeasurements principally reflected a £1,510 million tax credit arising from the reduction in the US tax rate, financial derivative remeasurement gains of £119 million pre-tax, and a net £103 million charge arising from our retained investment in Quadgas HoldCo Limited. Adjusted profit after tax (excluding exceptional items and remeasurements) of £2,061 million included £62 million, relating to timing offset by £(91) million as a result of major storms. On an underlying basis, Group profit after tax was £2,090 million, up £61 million (3%) and earnings per share were 60.4p up 1.8p (3%) compared to prior year pro forma (including Cadent overlay). Revenues increased as a result of new US rate plans in New York and Massachusetts, partly offset by lower UK transmission income, reflecting the return of efficiencies and lower delivered outputs. Costs (excluding pass-through costs) were higher, partly as a result of increased workload and additional depreciation related to asset growth. The weaker dollar in 2017/18 reduced operating profit compared to last year. Net financing costs were lower, with higher interest on inflation-linked debt, offset by gains on disposals of financial investments. Tax was lower compared to 2016/17 partly as a result of decreases in both UK and US tax rates. Financial position and capital investment During 2017/18 our net assets under IFRS decreased from £20.4 billion to £18.8 billion, reflecting the £4.0 billion distribution to shareholders, relating to last year's disposal of our UK Gas Distribution business and the impact of the weaker dollar. This was partly offset by pension gains, and the reduction in deferred tax liabilities due to the reduction in the US federal tax rate, and retained profits in the year, further details of which can be found on page 115. The Group's net assets under IFRS, excluding net debt of £23 billion, were £41.9 billion (2017: £39.7 billion excluding net debt of £19 billion). To help readers' assessment of the financial position of the Group, the table below shows an aggregated position for Group, as viewed through a regulatory perspective. The measures included in the table below are calculated in part from financial information used to derive measures sent to and used by our regulators in the UK and US, and accordingly inform certain of the Group's regulatory performance measures, but are not derived from, and cannot be reconciled to, IFRS. There are certain significant assets and liabilities included in our IFRS balance sheet, but which are treated differently in the analysis below, and to which we draw readers' attention. These include the £1.5 billion reduction in IFRS deferred tax liabilities we have recognised in relation to US tax reform this year, which, from a regulatory perspective remains as a future obligation. In addition, under IFRS we recognise liabilities in respect of US environmental remediation costs, and pension and OPEB costs. For regulatory purposes, these are not shown as obligations because we are entitled to full recovery of costs through our existing rate plans. Regulatory IOUs which reflect refunds due to customers in future periods are treated within this table as obligations but do not qualify for recognition as liabilities under IFRS. Asset growth: rate base, RAV and other invested capital At actual exchange rates At constant currency 2018 2017* % 2017/18 2016/17* % Year ended 31 March £m £m change £m £m change UK Electricity Transmission RAV 13,045 12,479 5% 13,045 12,479 5% UK Gas Transmission RAV 6,014 5,755 5% 6,014 5,755 5% US rate base 14,762 15,398 -4% 14,762 13,751 7% National Grid Ventures and Other business invested capital 2,167 2,055 5% 2,167 1,984 9% Total 35,988 35,687 1% 35,988 33,969 6% UK other regulated assets/liabilities (519) (479) (519) (479) US other regulated assets/liabilities 1,921 1,665 1,921 1,487 Other assets and liabilities (343) (241) (343) (260) Total Group regulated and other assets 37,047 36,632 37,047 34,717 * Re-presented for opening balance adjustments following the completion of the UK regulatory reporting pack process in 2017. The UK RAV increased by £0.8 billion, reflecting significant capital expenditure, together with inflation. RPI inflation at 3.3% (April to March) was slightly above our 3% long-term expectation. UK RAV growth also included capitalised efficiencies or 'performance RAV' of £67 million this year. Other UK regulated assets and liabilities principally comprise regulatory IOUs, arising from timing (including totex timing adjustments) and output-related allowance changes, which are expected to be recovered from or refunded to customers in future periods. Excluding foreign exchange impact, Strategic Report | Financial review National Grid Annual Report and Accounts 2017/18 23

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Financial review continued US rate base increased by £1.0 billion (7%) reflecting the step up in US investment, which was 15% higher than in 2016/17. In total, our UK RAV and US rate base increased by £0.2 billion, net of a £1.6 billion reduction due to foreign exchange movements decreasing the rate base reported in sterling. Excluding foreign exchange our UK RAV and US rate base increased by £1.8 billion (6%) in the year to £33.8 billion. The increase reflects the continued high levels of investment in our networks in both the UK and US. US other regulated assets and liabilities principally comprise assets in the course of construction

Net debt: (which will transfer to rate base once commissioned), timing balances and other cost or revenue deferrals, which are expected to be recovered or refunded in future periods. National Grid Net debt is the aggregate of cash Ventures and other business-invested capital comprises the assets and liabilities of the operating and cash equivalents, current financial businesses within National Grid Ventures and Other activities. Other assets and liabilities includes and other investments, and derivatives our interest in the RAV of Cadent after taking account of debt within the holding structure. (excluding commodity contract derivatives and the fair value of a put option to dispose of a 14% interest in Capital investment Cadent) as defined in note 27 to the For the year ended 31 March 2018, investment of £4,251 million was £389 million higher than last financial statements. year, principally driven by increased investment in our US regulated businesses including higher levels of gas mains replacement. Investment in National Grid Ventures also increased as we Adjusted net debt is principally adjusted continue to construct the Nemo Link, our second French interconnector and the North Sea Link. for pension deficits and hybrid debt instruments. For a full reconciliation Net debt, cash flow and credit metrics see page 211. During the year we continued to borrow to fund growth in the business. The level of net debt remains appropriate for the size of our business. RCF/adjusted net debt: Net debt and RCF to adjusted net debt metrics A key measure we use to monitor financial discipline is retained cash 2018 2017 % change flow divided by adjusted net debt. Net debt (£m) 23,002 19,274 (19)% We monitor this metric carefully as Adjusted net debt (£m) 22,777 20,290 (12)% it is a key element of the information used by rating agencies to assess Retained cash flow (£m) 2,199 3,020 (27)% our creditworthiness. See page 211. RCF/adjusted net debt* 9.7% 14.9% (520) bps * RCF/net debt calculated including scrip share buyback costs. Value Added: During 2017/18, net debt increased by £3.7 billion. This was driven by the return of capital related Our dividend is an important part of returns to shareholders along with to the UK Gas Distribution disposal (£4.0 billion), outflows from interest, ordinary dividends, tax and growth in the value of the asset base other financing flows of £2.2 billion and payments related to discontinued operations of £0.2 billion. attributable to equity investors, net of These were partly offset by cash inflows from operations (net of cash capital investment) of the overall growth in debt. These are £0.8 billion and other non-cash movements such as foreign exchange and accretion of interest reflected in the Value Added metric reducing net debt by £1.9 billion. used to measure our performance, and that underpins our approach RCF/adjusted net debt (after deducting scrip buyback costs) was 9.7% for the year (2016/17: to sustainable decision-making and 14.9%; 2015/16: 10.5%). The RCF/adjusted net debt metric in 2016/17 was significantly improved long-term incentive arrangements. by the disposal of our UK Gas Distribution business on 31 March 2017, which reduced closing net debt by £10 billion. Our long-term target for RCF/adjusted net debt is to exceed 9.0%, which is consistent with the A3 rating threshold used by Moody's, the rating agency. We additionally monitor interest cover, which is a measure of the cash flows we generate compared with the net interest cost of servicing our borrowings. Interest cover for the year was 4.4 times (2016/17: 5.0 times; 2015/16: 5.5 times). Our long-term target is to maintain interest cover in excess of 3.0 times. Other regulatory performance measures Value Added Value Added in the year was £2.0 billion or 57.9 pence per share as set out below: Year ended 31 March 2018 2017 change £bn £bn £bn Total Group regulated and other assets 1 37.0 34.7 +2.3 Net debt 1.2 (23.0) (21.2) -1.8 Dividend paid 3 +1.3 Share buyback 3 +0.2 Value Added - 2017/18 +2.0 1. 2016/17 values presented on a constant currency basis using a closing exchange rate of \$1.40:£1. 2. Net debt at 31 March 2017 adjusted to reflect £4 billion relating to the return of capital following the disposal of our UK Gas Distribution business. 3. Excludes special dividend and share buy back associated with return of capital post UK Gas Distribution sale. Year ended 31 March (pence) 2018 2017 change % change Value Added per share 57.9 51.6 6.3 12% Value Added in the year was higher than 2016/17 principally as a result of improved underlying profits in our US business and higher inflation on our UK regulated assets. Of the £2.0 billion Value Added in 2017/18, £1,316 million was paid to shareholders as cash dividends and £178 million as scrip repurchases (offsetting the scrip issuance during the year), with £510 million retained in the business. 24 National Grid Annual Report and Accounts 2017/18 Strategic Report | Financial review

Principal operations – UK This year our UK business has made progress on plans to create a legally separate Electricity System Operator, achieved major project milestones and is finding smarter ways to balance the system. As new sources of energy connect to the network, we need to find smarter ways to balance the system. To help us do this, the System Operator launched its first System Needs and Product Strategy consultation. This consultation gave us a better understanding of the services we will need to procure in future. We had 128 stakeholder responses and used this feedback to shape the Product Roadmap for frequency response and reserve services, which we published in December. Delivering our strategy Highlights We are reducing the number of balancing Our UK business performed well in 2017/18 and services products, simplifying their procurement UK highlights we maintained our focus on safe, customer-led, and improving the products themselves. Edgar Filing: NATIONAL GRID PLC - Form 20-F

Strategic Report This year we marked the completion of phase one of the London Power Tunnels project which will ensure we can meet London's growing electricity demand. In late February adverse weather affected the UK, leading to high demand for energy on the system. Our networks performed strongly, maintaining secure supplies of electricity and gas. As part of our response we issued a Gas Deficit Warning. This signalled to the market that we required more gas to keep the system running safely and reliably. This is part of our standard approach to balancing supply and demand, and worked effectively. Shaping the future of energy 2017 underlined the speed of change in the energy sector. In April, Great Britain experienced a day without any coal generation, while between June and September low-carbon sources met more than 51% of the nation's electricity generation needs. In focus The changes that we have already introduced Looking ahead in the System Operator including the operation Ahead of the new regulatory framework of a new scheduling algorithm for balancing (RIIO T2) which begins in 2021 we will continue the system have all ensured that we have to engage with stakeholders and work with continued to deliver energy where and when Ofgem to clarify the parameters of T2. Since January 2017 we have raised our customers require it. We continue to £270,000 for Alzheimer's Society, our develop our balancing tools. Next year we will also be working closely with chosen employee charity in the UK. Ofgem on two further landmark developments. This figure exceeded the fundraising We are also finding ways to ensure that target we set ourselves. National Grid is better equipped for the future, We will create a legally separate Electricity We are committed to playing a particularly through innovation. For example, System Operator (ESO) within the National active role in the communities we are investing to ensure we can bring new Grid Group by April 2019. As part of this, where we work. This began with a consultation on its longer-term goals and its plan In July 2017 the UK Government announced for 2018/19, demonstrating how the ESO will take Statutory operating profit plans to ban the sale of new petrol and diesel an enhanced role in facilitating the transition to cars and vans from 2040. Meanwhile, our own a low-carbon energy system. 'Future Energy Scenarios' analysis suggests the potential for rapid growth in electric vehicles (EVs) We will also begin detailed work on our HSB £1,528m through to 2050. This year we have developed project to connect EDF's new Hinkley Point C a proposal for a strategic charging network nuclear power station onto the network from (2016/17: £1,868m) to enable a backbone of charging points at 2024. Ofgem confirmed this year that the motorway service areas and other strategic project is required and proposed a model for locations. This would support the installation delivery, which it has called the Competition of rapid high-capacity chargers and help Proxy Model (CPM). Adjusted operating profit to tackle anxieties people have about the perceived range of EVs. We are engaging We do not believe that this model is in the best with Government and UK car manufacturers interests of consumers and have responded on the way ahead for EVs. robustly to Ofgem's proposal. In our view, CPM, £1,528m as currently proposed, does not replicate the (2016/17: £1,883m) In last year's Annual Report and Accounts outcome of a competitive process, as it does we reported on the launch of Power Potential, not reflect either the actual cost of financing this a joint project between National Grid and project or the risk being taken with construction UK Power Networks. It aims to create a new work of this complexity and scale. We believe Capital investment reactive power market for distributed energy that Ofgem has under-estimated the costs of resources and generate extra capacity on the delivering HSB under the proposed model, network. We are now calling for organisations and as such has come to an unfounded view to participate in the project, which is initially of consumer benefit. being trialled in the south east of the UK. £1,309 m This year we are also building a novel We are committed to working with Ofgem to (2016/17: £1,241m) distributed energy resources management find a solution. However, we are considering all system (DERMS) as a platform to manage options open to us should the regulator decide these resources at scale. to proceed with this model in its current form. Meanwhile, the Power Responsive programme Next year we will continue to focus on safe, continues to encourage growth in demand customer-led, reliable, innovative and efficient side response and storage. The programme is operations. Achieving greater efficiency in facilitated by National Grid and 650 members our businesses will be a priority for us — have joined since April 2017. There are now 2,150 particularly important considering the price Picture top right stakeholders from more than 1,000 organisations cap for supply to consumers that the His Royal Highness The Prince of Wales with John Pettigrew, taking part. Principal operations – US A look at our US business’s operational performance, core business growth, and how we are shaping the future of energy. priorities: find new ways of optimising our operational performance; look for opportunities to grow our core business; and make sure National Grid is better equipped for the future. Below are some examples of what we have done this year under each priority: One way we have been able to optimise our core business performance is through our gas business enablement initiative. This involves standardising and simplifying processes that will help us better manage our assets, deliver our work, and serve our customers. An example of this is a new ability to capture field data and complete work orders via mobile technology. Delivering our strategy

Highlights The US business has performed well during Our new Customer Response Center (CRC) A focus on growth, customer value, 2017/18, focusing on growth, customer value, is also designed to improve our operational and the clean energy transition and the clean energy transition. performance. The CRC opened in May 2017 with the goal of establishing two-way Performance optimisation Overall, our revenue increased by 10% and we communications with customers so we can • rate cases. are growing our rate base by 7%. Our energy better anticipate and respond to customer • customer experience infrastructure spend across our footprint during needs in everyday interactions. transformation. 2017/18 was \$3 billion. And we added around • new energy infrastructure. 65,000 new customer accounts – gas, electric, One example of growing our core business is and distributed generation, combined. the new South Street substation in Providence, • gas mains replacement. We filed two rate cases during the year – new Rhode Island. In late March, we began the base gas distribution rates in Massachusetts first phase of energisation at the \$70 million, Growth and new base electricity and gas distribution state-of-the-art substation that is providing • large-scale renewables. rates in Rhode Island – where rates had reliable energy to downtown Providence. • electric vehicle charging. remained the same for eight and five years, Safety was our fundamental priority for the respectively. And in upstate New York, we new substation. Employees are not in danger • renewable gas. reached agreement with the NY Public Service of high arc flash incidents, as arcs are • smarter grid. Commission (PSC) for a three-year rate plan. extinguished under vacuum. Although the United States decided in June to Revitalisation of the former power station, Statutory operating profit pull out of the Paris Climate Agreement, we a historic riverfront building, is generating continue to support the Paris climate deal and educational and economic development in align ourselves with state and local leaders the city and across the state. It has been who share our climate and environmental transformed into space for Brown University goals. One example is the appointment of administration and both Rhode Island College £1,734 m Dean Seavers, National Grid Executive and University of Rhode Island nursing students. (2016/17: £1,278m) Director, US, to co-chair the national Alliance Commission on US Transportation Sector The Metropolitan Natural Gas Reliability Efficiency, convened by the Alliance to Save Project in Brooklyn, New York, is another way Energy. The commission has said it will develop we are growing our core business. Through Adjusted operating profit recommendations to reduce energy use this project, which started in May 2017, in the US transportation sector by 50% by we are installing approximately 1.7 miles 2050 while meeting future mobility needs. (2.7 kilometres) of 30-inch transmission pipeline operating at 350 psi. £1,698m Operational performance The US business saw a 6% reduction in the Our rate case filings allow us to make sure (2016/17: £1,713m) number of injuries requiring medical attention we are better equipped for the future, as does beyond first aid and a 19% reduction in the our continued work with Grid Modernization number of preventable road traffic collisions in Massachusetts, with Reforming the Energy Capital investment during 2017/18. We implemented safety, health Vision (REV) in New York, and with the Power and environment (SHE) plans at local levels to Sector Transformation in Rhode Island. address current risks and injury trends. We also established our guiding principles of safety Approval this past winter of new electricity which sets out how our people can play a role and gas delivery rates in upstate New York £2,424m in promoting a safer environment for everyone. means we can invest \$2.5 billion over three (2016/17: £2,247m)

We will continue to focus on improving our years to modernise our electricity and natural safety culture to address key risk and gas networks, and promote economic growth hazard mitigation strategies in 2018/19. across upstate and improve customer service. Our key performance indicators are reported in The plan allows us to continue our new Energy detail on pages 14-17. We have worked hard to Affordability Program, which provides a bill find ways of operating more efficiently and with decrease for most income-eligible customers, innovative technology. The work we have done and to introduce new energy efficiency has supported National Grid’s three strategic solutions for our moderate-income customers. Letter from the Chairman I believe that strong corporate governance supports long-term value creation for shareholders and is key to balancing the interests of our shareholders with those of our wider stakeholders. Your Board recognises the importance of our wider stakeholders and takes its responsibility and duty to them under section 172 of the Companies Act 2006 very seriously. On page 6, we set out who our key stakeholders are, why they are important to us and how we create value for them over the long term. Engagement with our stakeholders continues to be an important priority for us. This year, the Board has reviewed who the Company's key stakeholders are; our current stakeholder engagement activities; the appropriateness Sir Peter Gershon of this engagement; how this engagement is Chairman reported to the Board; the mechanisms used to feedback to our stakeholders; and whether there is a need for greater engagement at Board level. Dear shareholders, You can read about this on page 48. Corporate Governance Matters considered by the Board Examples of Board focus during the year included: Key areas of activity Matters considered Outcome Business The Board has received regular updates on how our operational businesses have performed •• Board review and challenge of business performance and progressed against our strategic priorities, as we find new ways of optimising our performance against the Company's oversight operational performance, look for opportunities to grow our core business and make sure performance targets and strategic priorities. we are better equipped for the future. This included performance updates from our UK and US businesses as well as the inaugural update from our newly created division, National Grid Ventures, as it focuses on the development of new growth opportunities and strengthening our commercial and partnership capabilities. Our strategic focus is predicated on our customers, and the Board was kept up to date with business performance relative to customer expectations and against our customer ambitions throughout the year. As part of this, the Board considered how we could learn from industry leaders to support our US customer transformation initiative and position the US business for future success, while capturing appropriate value for the Company and its shareholders. Strategy The Board has participated in two interactive sessions this year in addition to the time allocated •• Board approval of the Company's strategy. during Board meetings. These strategy sessions focused on ensuring the Board remains up to •• Board endorsement of the strategic priority date on the changing energy landscape and the implications on the Company's portfolio and areas for management focus for 2018/19. strategy, and the entry and growth strategies for National Grid Ventures so it can help us deliver against our strategic priorities and deliver shareholder value. At its April 2018 meeting the Board considered the external energy landscape further and endorsed the strategic priority areas for management focus for 2018/19. Risk The Board is responsible for determining the nature and extent of the principal risks it is willing •• Agreed risk appetite profile and principal to take in achieving the Company's strategic priorities. It reviews the Company's principal risks, including two new principal risks. risks and the management of significant risks as part of its risk management and monitoring •• Agreed enhancements to Board reporting, process through bi-annual review and challenge sessions. This year, the Board and Executive utilising risk appetite. Committee, with the assistance of an external risk advisor, have undertaken a risk management •• Approved a new risk appetite framework review to revalidate our principal risks and rethink our risk appetite framework. for implementation across the business. •• Board approval of the Group risk profile The Board discussed the Group risk profile in September and March and considered any changes and confirmation that a five-year viability to existing risks, any emerging risks, and whether the agreed principal risks were consistent period was appropriate. with the Company's risk appetite levels. The Board also reviewed the testing of the Company's •• Approved the Company's viability statement. principal risks and the impact on the Company's viability over a five-year viability period. Political and This year, the Board continued to focus on how to promote the success of the Company •• Board input on, support for and monitoring regulatory during further developments in our external environment. Following the UK General Election of the UK and US regulatory strategy. environment in June 2017, the Board discussed the impact of its outcome on the Company and its business •• Political sub-group of Executive environment. During the year, the Board also had regular updates on risks and opportunities Committee established to take a more posed by Brexit and our continued engagement activities with our stakeholders on this issue. hands-on approach. The Board also reviewed the impact of US tax reform on the Company, including on our regulatory strategy, and on our US customers. Ahead of our next UK regulatory price control, the Board considered the key elements of Ofgem's RIIO T2 framework review consultation, published in March 2018, and scrutinised the Company's UK regulatory strategy, providing feedback, guidance and support for its ongoing development. The Board also discussed Ofgem's 'minded-to' consultation on the delivery model for the Hinkley-Seabank project and our response to the consultation. At its March 2018 meeting, the Board received an update on the key political, policy and regulatory issues in the UK and US to which the Company was responding. Culture The Board has spent much time this year on how it shapes, monitors and assesses culture •• Board endorsement of a culture of the Company, which you can read more about on page 47. This included reviewing and 'scorecard' to support the Board in approving a proposed culture 'scorecard' which could be considered regularly by the Board. shaping, monitoring and assessing culture. The Board reviewed the first culture 'scorecard' at its April 2018 meeting, which showed trends and gave an assessment of areas of strength and areas for further focus. Cyber security The Board continued to focus on the evolving cyber security landscape during the year, with •• Board review of and input on cyber security a regular cadence of Board reporting and review in place, supported by engagement with the measurement and reporting, including a Company's Chief Information and Digital Officer. This included review of the external and internal cyber 'scorecard'. cyber threat environment, our key cyber risks and the Company's cyber strategy. The Board was also updated on the activities of the Company's Cyber Operational Research Establishment (CORE), a joint initiative between our UK business and Digital Risk & Security function. The Board has also considered how the Company measures its approach to cyber security and how this is used to manage cyber security risk, and how cyber risk is reported to the Board and Executive Committee. Technology To support our response to the threat and opportunities presented by emerging technology, •• Board review and endorsement of the and innovation this year the Board reviewed the organisation and governance of our Technology and Innovation organisation and governance for the Group function. This included how we learn from and leverage innovation that is occurring externally; Technology and Innovation function. how we enhance the effectiveness of internally generated innovation; and how we measure the •• Board review of and input on the Company's success of our efforts in this area. Our focus has been on enabling an innovative culture with rapid technology and innovation strategy. decision-making and the acceleration of internally sourced ideas. At its April 2018 meeting, the Board considered, and provided input on, the Company's technology and innovation strategy. Looking forward. The Board's focus for next year is expected to include: • continued regular reviews of safety activities; • technology and innovation; • UK, US and National Grid Ventures operational business overviews; • cyber security updates; • continued detailed review of our strategy for growth and its financing; • results of the 2018 employee engagement survey; • the implications of regulatory and political changes in our business • monitoring and assessing the Company's culture, supported environment on our activities, including Brexit; by our culture 'scorecard'; • our UK and US regulatory strategy and preparation for RIIO T2; • our stakeholder engagement model; and • Ofgem's recommendations and decisions regarding the delivery model • addressing changes to the UK Corporate Governance Code for the Hinkley-Seabank project; and other corporate governance policy developments. Corporate Governance Progress against actions from 2016/17 – culture Company Secretary and the Chairman. A commentary Last year’s internally facilitated evaluation focused on regarding the Board’s work in this area and reviewing the Company’s culture, as well as the role of the Board in progress against each action from last year’s review is set shaping, monitoring and overseeing the culture and a clear out below. Progress against actions arising from last year’s action plan was agreed. Throughout the year, the Board has Board Committee evaluation has also been monitored discussed the progress of the actions identified, which have throughout the year. also been monitored by the Group General Counsel and Actions Commentary Develop a common definition of ‘culture’ for the The Board discussed and agreed a common definition of ‘culture’ for the Board and Executive Committee. Company, which reflects that culture results from the purpose, values, beliefs and behaviours that characterise our Company and guide our practices. Responsibility: Culture is evidenced and promoted by behaviours and actions of employees Chief Executive/Group General Counsel and at all levels. Company Secretary/Human Resources. As a purpose-led organisation, we are guided by our purpose and vision, which set out why we exist and how we create value for our shareholders, customers and wider society, and by our values, which shape how we expect to achieve our purpose and vision. Additionally, our leadership qualities build upon our values and are the common expected behaviours of our leaders. Ensuring clarity of these expectations and that the behaviours and actions of our employees are aligned to these expectations is a continuous focus for us. Determine the Board’s role in guiding the culture The Board considered the importance of the leadership role it plays in of the Company. influencing and monitoring the Company’s culture, setting the standards of good behaviour that align with our values, reinforcing these formally in Responsibility: the Boardroom and supporting management to embed our values, beliefs Chairman/Chief Executive/Group General Counsel and behaviours throughout the organisation. and Company Secretary/Human Resources/ Corporate Affairs. The Board also reviewed the work that had already been undertaken during the current and previous financial year in relation to culture, including embedding the articulation of our purpose and the evolution of our vision and values across the Company. The Board discussed and agreed areas of focus for how it could specifically help to set the right tone from the top and support our culture, both within and outside the Boardroom, including how our Chairman’s Awards and other formal and informal engagement events could be used to achieve this. The Board discussed the areas where the Board plays a key role in shaping and overseeing our culture and agreed an action plan to target these areas (set out below). The Board also considered the importance of remuneration strategy and diversity in supporting the desired culture, being areas where the Board has a clear role. Develop a method for the Board to track culture The Board reviewed and endorsed a scorecard that would be used to monitor within National Grid. and assess culture and which would be regularly reviewed by the Board. The measurement system will highlight where our culture is currently, using both Responsibility: internal and external data, and generate insights that can lead to action. Executive Directors/Human Resources. Assist with the establishment of a desired culture Following agreement of the role and areas of focus for the Board to influence throughout the National Grid businesses. and monitor culture, the Board has targeted these actions to set the tone at the top: Responsibility: Executive Directors/Group General Counsel Visible leadership on culture and open communication about the and Company Secretary. Board’s priorities, activities and the tone set from the top •• continue with Board dinners to informally engage with the business leaders; •• actively promote the Chairman’s Awards as the values-based recognition system; and •• conduct on-site employee interactions aligned to Board meeting agendas and more informal engagement as appropriate. Alignment of the recruitment and appointment of Board and Executive Committee members with the desired culture •• evaluate and recommend candidates for Board and Executive Committee roles on cultural fit, based on values and leadership qualities (balanced with technical qualifications and diversity). In addition, the Board considered how specific business areas, such as the core businesses and National Grid Ventures, should be encouraging our culture in a consistent and targeted way to achieve strategic priorities. Corporate Governance continued Areas of focus Matters considered Outcome and action Significant issues The most significant issues The Committee considered in relation to the financial statements are set out in the table below. In addition to commentary in these areas, the independent auditor's report (pages 83-91) also includes other areas of focus, including net pension obligations, environmental provisions, revenue recognition, classification of capital costs and treasury derivative transactions which were also considered by the Committee during the year. Internal controls The Committee received reports at the May 2017, September 2017 The Committee asked management to explain the incremental relating to financial and March 2018 meetings on the key findings and observations arising increases in the number of processes and IT systems considered reporting, including from the SOX refresh programme. The most significant findings related to be in scope for SOX purposes. the year-end SOX to IT access controls across the Group and specific observations in attestation respect of certain business controls in UK Finance. Further details The Committee challenged management on its progress on are provided below. mitigating control observations as they arose and requested additional insight into areas which were subject to shorter-term The Committee has continued to receive updates from management fixes. The Committee sought additional context from management on the progress to remediate the control deficiencies identified in the on its assessment of the severity of the matters identified (in US financial controls environment (building on previous years). The particular the IT control matters noted below), the identification Committee noted that good progress had been made in the US Finance of mitigating controls and the impact on the year-end aggregation team to recruit new talent to add further strength and depth to the team. exercise for SOX purposes. At year end the Committee was pleased to note the historical US control deficiencies had been remediated. Following the update in September, the Committee asked management to look to lessons learned from the US finance The SOX refresh programme had resulted in observations across transformation plan and improvements in the US financial control a number of key UK processes and included a focus on the reliance environment and how these could be applied to the UK financial placed on the data used in controls and on third-party reports, and control environment. the precision of key review controls. The Committee noted the outcome of management's exercise In response, the UK Executive leadership defined a comprehensive to assess the impact of the control matters identified individually multi-year control programme to identify and implement solutions to and in aggregate, and the conclusions of the relevance of these optimise the UK business control environment while continuing to focus to the year-end SOX attestation (as described further on page 52). on the real-time need of addressing the findings of the SOX refresh programme in the short term. The Committee was pleased to note in May 2018 that there were no business control findings. After careful consideration the In September 2017, the UK CFO presented an update to the Committee Committee concurred with management's overall assessment on key developments in the UK Finance team, with a particular focus that the Group's internal control over financial reporting is effective. on financial controls. The Committee considered all the above matters as part of its final SOX conclusions. IT controls A number of improvements were identified as necessary by management At its November meeting the Committee challenged management and Deloitte in respect of access to the Group's financial systems. on the number of outstanding control improvement actions in the The Committee was provided with a specific update by the Group Chief IT control environment. Information & Digital Officer in January 2018 which focused on the key themes arising and management's action plans. Further updates were The Committee noted that to ensure appropriate and immediate provided to the Committee in March and May. focus on the matters identified, management had established governance mechanisms across the IS and Finance leadership. The extent of improvements required was more pronounced in the UK, primarily as a result of the UK's complex legacy IT infrastructure At its March meeting the Committee requested that a short and coupled with the US having benefited from a focus on the financial longer-term remediation plan to deliver sustainable IT-related control environment in recent years. controls, in particular user access, be presented to the Committee in May. The IT control findings related primarily to six key focus areas: privileged access, segregation of duties, user access management, user access Recognising the risk and criticality of executing the outstanding reviews, third-party general IT controls, and the quality of the information actions, the Committee continues to monitor progress closely used in the control. This year, in conjunction with testing performed by and has requested regular updates from management. Deloitte, the Company observed access control improvements required in the infrastructure layer relating to our finance administrative systems which are administered by outsourced service providers. US tax reform On 22 December 2017 the Tax Cuts and Jobs Act (US tax reform) The Committee noted the report received from management was signed into law, taking effect from 1 January 2018. The Committee on the impact of this change on the Company. received an update in March on the main impact on the Company's IFRS financial results: The Committee challenged the appropriateness of the recognition of a \$2 billion exceptional credit to income, in view of the fact that Exceptional gain from rate reduction: The principal impact under IFRS the Company will, over time, be required to return this benefit concerned the impact of the reduction in the headline federal tax rate to customers. from 35% to 21%. The change in the tax rate has given rise to a circa \$2 billion exceptional gain as deferred tax assets and liabilities are The Committee was satisfied that the treatment applied was remeasured downwards accordingly. in line with IFRS and requested that management ensure that adequate disclosures of the Company's commercial and Reduction in US effective tax rate: The reduction in the federal tax rate regulatory arrangements be included in the Annual Report and has also resulted in a reduction in the statutory, adjusted and underlying Accounts to allow users of the financial statements to understand effective tax rates this year, as a blended headline federal tax rate is the economic impact of tax reform on the Company. applied to the US business's IFRS earnings. Carrying value On 30 April 2018, the Group signed an agreement with Quadgas Bidco The Committee reviewed and concurred with the accounting of interests Holdings Limited (the vehicle through which the Consortium hold their undertaken by management, noting that after accounting for our in Quadgas 61% interest in Quadgas HoldCo Limited) in relation to the potential sale share of profits, and all other movements, the aggregate carrying HoldCo Limited of our remaining 25% interest (the Remaining Acquisition Agreement). value of our interests was £2.1 billion at 31 March 2018, consistent with management's initial determination of the fair value of the At its May 2018 meeting the Committee considered the implications of interests as at 31 March 2017. this arrangement on the 2017/18 financial statements and, in particular, the £110 million derivative fair value gain recognised in relation to the Further Acquisition Agreement, and the £213 million impairment charged against the carrying value of the Group's equity interests in Quadgas HoldCo Limited. 50 National Grid

Corporate Governance | Finance Committee

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Corporate Governance Corporate Governance Safety, Environment and Health Committee of risk for major hazard assets, including key US LNG plants and the Company's US gas pipeline safety compliance programme. In relation to the environment, the Committee continues to review the Company's strategy and approach to sustainability, as well as its external reporting of environmental performance, including greenhouse gas emissions (GHG). The Committee has been pleased to see progress against the Company's continued ambition to reduce GHG while also challenging the businesses on GHG reduction activities. The Committee approved a Group target of a 70% reduction in GHG emissions by 2030, including those from electricity system energy losses, to provide a clear milestone between the 2020 and 2050 Company targets. The Company continues to drive this reduction through mains replacement programmes, reductions in SF6 leakage and energy efficiency measures and the Paul Golby Committee will continue to monitor progress. Committee Chairman In terms of health, the Committee has seen a continued focus by the Company in this area, particularly around mental health Review of the year health where the Committee noted that 12% of the workforce During the year, the Committee has seen the Company are now trained in mental health first aid. Interest and support make progress in improving its safety culture throughout in this area remains strong throughout the Company. the businesses, with specific focus on two key areas. Firstly, the simplification of key procedures, where we have Examples of other matters the Committee reviewed during encouraged the proposed development of new Business the year included: Management Systems (BMS) Standards to provide simple • compliance and risk reporting for safety, environment and fit for purpose procedures in relation to safety, process and health matters; safety, environmental sustainability and wellbeing and • consideration of the introduction of new EU legislation health. Secondly, the Company has undertaken work to on EU Security of Gas supply regulations which came develop and encourage key safety leadership behaviours into force in September 2017; across the Group. We have ensured that time and attention • Engineering Assurance Committee Reports on is being focused on incidents with high potential for harm Electricity and Gas; and and the Committee will continue to monitor the progress • review of the Company's environmental strategy. in this area. (You can read about the Company's response to the recommendations of the Financial Stability Board's Task The Group employee lost time injury frequency rate at Force on Climate-related Financial Disclosures on page 192.) 0.10 remains in line with last year. However, November marked a year since the death of an employee working in our UK Electricity Transmission business. Since my report last year, the Committee has spent considerable time with the business to understand the cause of this fatality, to consider the findings of investigations and to monitor the implementation across the Company of the lessons learnt Paul Golby from this incident. The Committee received a closeout Committee Chairman report on the progress at its April 2018 meeting. The Committee has reviewed the impact of culture on safety and the behaviours underpinning this. For example, 2017/18 key areas of focus whether employees feel able to speak out where there • US Gas Pipeline Safety: might be safety concerns. Corporate Governance Annual statement from the Remuneration Committee Chairman salary. Other UK-based Executive Directors must hold at least four times their pre-tax salary in National Grid's shares, which is equivalent to around seven times their post-tax salary. For the US-based Executive Director, the minimum shareholding requirement is also four times his pre-tax salary, which is equivalent to around six times his post-tax salary. This requirement ensures that executives have a longer-term view in their decision-making, are rewarded for achieving success over the long term, and have interests aligned to our private and institutional shareholders – gaining if the share price increases, and sharing in the consequences of share price falls. The largest element of our incentive pay, the LTTP, is measured against the two components through which National Grid earns returns for our shareholders. These are RoE, which measures management's ability to grow the business profitably; and Value Growth, which comprises growth in assets, less net debt plus dividends paid. The two measures are designed to provide a balance, deterring excessive debt-financed asset growth, while incentivising management to maintain an efficient balance sheet. Jonathan Dawson Remuneration Committee Chairman Consistent with our approach for aligning executive interests to the long term, LTTP awards are determined after a three-year performance period. Furthermore, the shares Introduction that are then allocated to Executive Directors have to be Last year, our shareholders approved National Grid's held for at least a further two years. remuneration policy for the period 2017 to 2020, with over 97% in favour. At the same time, more than 87% 2. Achievement of short-term (APP) and long-term approved the annual Remuneration Report. The (LTTP) incentive opportunities are linked to National Remuneration Committee and the whole Board are Grid financial performance grateful to shareholders for their support for our policy We focus largely on visible financial measures to assess and our implementation of it. This year, through the the level against which incentive payouts are determined. annual advisory shareholder vote, we are seeking Over 90% of John Pettigrew's potential incentive pay is shareholder support for the implementation of the calculated on that basis. approved remuneration policy during 2017/18. 3. Discretion and independent judgement is applied National Grid has had another successful year, delivering As a committee, we are willing to exercise discretion when on all our key measures. Underlying operating profit was approving remuneration outcomes for Executive Directors. up by around 6% in constant currency terms to around We reflect on whether the Company's overall performance £3.5 billion and underlying EPS was up by more than 3% is correctly represented by the financial measures we to 60.4p despite adverse movements in exchange rates. have set, and we shall take account of the performance Strong Return on Equity (RoE) was achieved at 12.3% and of non-financial measures, and the demonstration of dividends were increased in line with policy. Value Added leadership qualities and living our values, before of £2 billion was achieved in the year and contributed agreeing APP awards. to the three-year measure of Value Growth of 11.8%. Value Growth is an internal equivalent to Total Shareholder Last year, for example, we reduced senior executives' Return (TSR). We also invested £4.3 billion into the APP awards to acknowledge the importance of maintaining business this year, growing our asset base by 6%. a strong safety culture following the tragic fatality of one of National Grid's employees in the UK. Also last year, What is our remuneration policy seeking to achieve? we included within the LTTP a portion of the Value Our objective in developing our remuneration policy Added from the sale of a majority interest in the UK Gas is to ensure we pay our senior executives in a way that Distribution business to reflect the Executive Directors' incentivises stretching performance, is fully aligned to role in crystallising shareholder value from the Gas the way National Grid earns its returns for shareholders, Distribution sale. and actively supports our strategy and values. This year, the Committee has not exercised discretion either The main features of our remuneration policy are as follows: positively or negatively. I also wish to confirm that the LTTP and APP plans both state that the Committee has absolute 1. Significant weighting towards business discretion to determine whether exceptional circumstances performance over the long term exist which justify whether any or all of an award should Nearly three quarters of John Pettigrew's variable pay be forfeited, even if already paid. Examples of exceptional opportunity is represented by the Long Term Performance circumstances include, but are not limited to, material Plan (LTTP). We emphasise this over the Annual Performance misstatement, misconduct of the participant, a significant Plan (APP) because National Grid is a long-term business. environmental or health and safety issue, failure of risk We want to make sure investment decisions are made, and management, and if certain other facts emerge after operating efficiencies achieved, against this background. termination of employment. We would not hesitate to use this ability to clawback incentive awards paid to Most of senior executives' variable pay is settled in National executives where we determine that the payment Grid's shares. For Executive Directors, some 85% of their levels were unjustified given new information. variable pay opportunity is delivered in shares. To summarise, in setting Executive Director pay, we take We also require senior executives to maintain very high account of a wide range of factors to inform decisions that shareholdings in National Grid. As CEO, John Pettigrew has are fair given each executive's accountabilities, individual to hold at least five times his pre-tax salary in National Grid's contribution, business performance, and the wider shares, which is equivalent to around nine times his post-tax workforce pay outcomes. We illustrate this overleaf. Corporate Governance | Directors' Remuneration Report National Grid Annual Report and Accounts 2017/18

Directors' Remuneration Report How our variable pay is determined Financial measures + Individual objectives + Committee discretion + Malus/clawback

Specific financial performance Other performance considered measures considered Objectives are set on Return on Equity APP an individual basis, 1-year dependent on role Value Added performance period remit and requirements. Committee considers wider (up to 125% of salary) Includes wider business Adjusted EPS business performance Committee has absolute measures as appropriate as well as individual discretion to apply malus/ demonstration of leadership clawback in exceptional qualities and values, and will circumstances adjust as appropriate LTPP Return on Equity 3-year performance period n/a (up to 350% of salary for Value Growth CEO, 300% for other EDs) How do we report on Directors' remuneration? Executive Director alignment Our aim is to be highly transparent so shareholders As I stated above, a key element in our remuneration can assess whether remuneration paid to executives strategy is to require senior executives to have a substantial is appropriate, given both the financial and operational shareholding in the Company. The purpose of this is to performance of the Company and executives' individual make sure executives share the benefit of any growth in the performance. We have reviewed feedback from last year's share price and the effects of any fall. The last year has seen report and have further enhanced how we analyse and a decline in our share price. We have examined carefully describe executives' individual performance. whether this was a consequence of executives' performance or the result of other factors. We concluded that the decline in A particular focus has been to provide further detail of the share price over the period was driven by a combination their individual objectives, as set out on pages 71-73. This of factors, including rises in bond yields and negative includes an explanation both on positive aspects and on sentiment around political and regulatory uncertainty in the areas where we consider performance fell short of stretch UK. Additionally, we noted the continued strong operational targets. We continue to include full retrospective disclosure and financial performance of the Company. This includes of performance against the financial targets we set last year Group RoE and Value Growth, which are key performance in respect of the APP, as set out on page 71. indicators for the Company and key measures of value creation for shareholders. Review of performance for the year APP We also noted that during the year, the value of John APP payouts for Executive Directors comprise 70% based Pettigrew's shareholding, taking account of the value of on the achievement of Company financial measures and shares after the share consolidation exercise and shares 30% based on the achievement of individual objectives. As vested in the year, fell by some £750,000 – equivalent to in prior years, technical adjustments are made to the EPS around 160% of his post-tax salary. This serves to illustrate outturn to account for the impact of timing and storms, and powerfully what we mean by alignment of interest with to target to reflect the net effect of currency adjustments, shareholders and why we regard it as a central feature certain actuarial assumptions on pensions, scrip dividend of our remuneration strategy. uptake, and to ensure consistency of accounting treatment. Thus, the reported figure was adjusted down from 59.5p Annual salary review to 58.0p and the target was reduced from 57.7p to 57.0p. As I have stated in the last two remuneration reports, the Technical adjustments have also been made to Group RoE Committee decided not to award John Pettigrew and Nicola which has resulted in an increase to target of 0.2% primarily Shaw salaries at our assessment of the appropriate levels to reflect the net effect of currency adjustments and to for their roles when they were initially appointed. Instead, ensure consistency of accounting treatment. This year I wrote that over time we would make increases in excess there have been no discretionary adjustments made by of the managerial salary increase budget, subject to their the Committee to any of the APP financial results. individual performance. This approach is consistent with that for the wider employee population, where employees The performance of the respective financial measures has may begin a role at up to 20% below our assessment of resulted in outturns ranging from 58.7% to 85.0% of the market levels, but subsequently may receive significantly maximum for the financial portion. The performance against larger salary increases than budget when justified by individual objectives has resulted in outturns ranging from individual performance. 74.0% to 81.0% of the maximum for the individual portion. Taking both financial and individual performance together, Last year, following a review of both John Pettigrew's and the overall APP awards to Executive Directors on the Board Nicola Shaw's performance in their respective roles, the at 31 March 2018 range from 63% to 83% of the maximum Committee increased their base salaries by 9% (comprising award which amounts to payments of between 79% and the UK budget of 2.6% and a further 6.4%). I indicated that 104% of salary. Details of the APP payouts are presented on we would follow a similar approach this year, and we have pages 71-73, including the full range of performance levels therefore considered John Pettigrew's and Nicola Shaw's for each of the financial measures and also commentary individual performance during the year to assess whether on each of the Executive Directors' performance against this approach continues to be justified. individual objectives. In John Pettigrew's case, the Committee concluded that in LTPP his second year as CEO he had continued to build on his The 2015 LTPP awards vest in July 2018. The three-year strong first year in the role. We considered, taking account performance period ended on 31 March 2018 and vesting also of the employee opinion survey, that he had made outcomes ranged from 66.3% to 86.0%. As with last year, robust progress in developing National Grid as both a this year's LTPP vesting also benefitted from the inclusion purpose and performance-led organisation. He has focused of a portion of the value arising from the sale of a majority the US business on advancing its strategy, with successful interest in the UK Gas Distribution business in 2016/17 in new rate case filings and new capital delivery and gas the Value Growth measure, as this event occurred within enablement capabilities. the 2015-2018 performance period measured. 64 National Grid Annual Report and Accounts 2017/18

Key features of remuneration policy Annual report on remuneration for 2017/18

- Target broadly mid-market against FTSE 11-40 for UK Directors
- Salary increases of 2.6% for Andrew Bonfield and 2.5% for and general industry and energy services companies with similar Dean Seavers. These increases (June 2017) being in line with Salary revenue for US Directors the respective budgets for UK and US managerial employees
- Salary increases of 9.0% for each of John Pettigrew and Nicola Shaw (June 2017). These higher increases were awarded to help reduce the gap and bring their pay closer to appropriate levels for their roles and based on assessment of strong individual performance
- Maximum opportunity is 125% of salary
- 70% based on financial measures and 30% based on Annual
- 50% paid in cash, 50% paid in shares which must be retained individual objectives Performance until later of two years and meeting shareholding requirement
- Financial metrics for CEO and Finance Director comprise Plan (APP)
- Subject to both clawback and malus 35% adjusted EPS and 35% Group RoE
- Financial metrics for Executive Director, US and Executive Director, UK comprise 35% US/UK Value Added respectively and 35% US/UK RoE respectively
- Individual objectives cover putting our customers first, optimising the performance of our core business, seeking out growth opportunities in a disciplined way and evolving the business for the future
- Maximum award level is 350% of salary for CEO and 300% for other Executive Directors
- 2017 LTTP award, 50% Group RoE and 50% Value Growth Long Term for other Executive Directors
- 2015 LTTP vesting in 2018, 50% RoE and 50% Value Growth Performance
- Vesting subject to long-term performance conditions over -- 50% Group RoE for CEO and Finance Director Plan (LTTP) a three-year performance period -- 25% Group RoE and 25% US/UK RoE for Executive Director
- Shares must be retained until later of two years from vesting US and Executive Director, UK respectively and meeting shareholding requirement
- Subject to both clawback and malus
- Eligible to participate in defined contribution (or defined) UK cash allowance (Andrew Bonfield, John Pettigrew Pension and benefit if already a member) and Nicola Shaw): 30% of pensionable pay other benefits
- Pensionable pay is salary only in UK and salary and APP
- US defined contribution (Dean Seavers): 9% of pensionable in US in alignment with market pay with additional match of up to 4%
- Other benefits as appropriate
- Other benefits include private medical insurance, life assurance, and for UK-based Executive Directors either a fully expensed car or a cash alternative, and a car and driver when required
- 500% of salary for CEO
- Andrew Bonfield has a shareholding of 632% and has met Shareholding
- 400% of salary for other Executive Directors his shareholding requirement requirement
- John Pettigrew, Dean Seavers and Nicola Shaw have not yet met their shareholding requirement due to their relatively short time in role; their shareholdings are 326%, 144% and 13% respectively

Corporate Governance Directors' remuneration policy – approved by shareholders in 2017 Key aspects of the Directors' remuneration policy, along with elements particularly applicable to the 2017/18 financial year are shown on pages 67 to 69 for ease of reference only. This policy was approved for three years from the date of the 2017 AGM, held on 31 July 2017. A shareholder vote on the remuneration policy is not required in 2018. A copy of the full remuneration policy is available within the 2016/17 Annual Report and Accounts on the Company's investor website (investors.nationalgrid.com). From time to time, the Committee may consider it appropriate to apply some judgement and discretion in respect of the approved policy. This is highlighted where relevant in the policy, and the use of discretion will always be in the spirit of the approved policy. Our peer group The Committee reviews its remuneration policy against appropriate peer groups annually to make sure we remain competitive in the relevant markets. The primary focus for reward market comparisons is the FTSE 11-40 for UK-based Executive Directors and general industry and energy services companies with similar levels of revenue for US-based Executive Directors. These peer groups are considered appropriate for a large, complex, international and predominantly regulated business. Approved policy table – Executive Directors Salary Purpose and link to strategy: to attract, motivate and retain high-calibre individuals, while not overpaying. Performance metrics, weighting and time Operation Maximum levels period applicable Salaries are targeted broadly at mid-market level. No prescribed maximum annual increase. Not applicable. Corporate Governance Approved policy table – Non-executive Directors (NEDs) Fees for NEDs Purpose and link to strategy: to attract NEDs who have a broad range of experience and skills to oversee the implementation of our strategy. Performance metrics, weighting and time Operation Maximum levels period applicable NED fees (excluding those of the Chairman) are There are no maximum fee levels. Not applicable. set by the Executive Committee in conjunction with the Chairman; the Chairman's fees are set The benefits provided to the Chairman are not by the Committee. subject to a predetermined maximum cost, as the cost of providing these varies from year to year. Fee structure: •• Chairman fee; •• basic fee, which differs for UK- and US- based NEDs; •• committee membership fee; •• committee chair fee; and •• Senior Independent Director fee. Fees are reviewed every year taking into account those in companies of similar scale and complexity. NEDs do not participate in incentive, pension or benefit plans. However, they are eligible for reimbursement for all Company-related travel expenses. In instances where these costs are treated by HMRC as taxable benefits, the Company also meets the associated tax cost to the Non-executive Directors through a PAYE settlement agreement with HMRC. Additionally, the Chairman is covered by the Company's private medical and personal accident insurance plans and receives a fully expensed car or cash alternative to a car, and the use of a car and driver, when required. NEDs who also sit on National Grid subsidiary boards may receive additional fees related to service on those boards. There is no provision for termination payments. NEDs stand for re-election every year. Shareholding requirement The requirement of Executive Directors to build up and hold a relatively high value of National Grid shares ensures they share a significant level of risk with shareholders and aims to align their interests. Executive Directors are required to build up and retain shares in the Company. The level of holding required is 500% of salary for the CEO and 400% of salary for the other Executive Directors. Unless the shareholding requirement is met, Executive Directors will not be permitted to sell shares, other than to pay income tax liabilities on shares just vested or in exceptional circumstances approved by the Remuneration Committee. Directors' Remuneration Report continued Annual report on remuneration Statement of implementation of remuneration policy in 2017/18 Role of Remuneration Committee The Committee is responsible for recommending to the Board the remuneration policy for Executive Directors, the other members of the Executive Committee and the Chairman, and for implementing this policy. The aim is to align remuneration policy to Company strategy and key business objectives, and ensure it reflects our shareholders', customers' and regulators' interests. The members of the Remuneration Committee in 2017/18 were Nora Mead Brownell,

Jonathan Dawson (chair), Pierre Dufour, and Mark Williamson. The Committee's activities during the year Meeting Main areas of discussion April 2016/17 individual objectives scoring for Executive Committee Approval of 2017/18 objectives for Executive Committee Discussion on 2016/17 expected incentive plan outturns May 2016/17 APP financial outturns and confirmation of awards for Executive Committee Approval of 2017/18 objectives for new Executive Committee appointment Annual salary review and LTPP proposals for Executive Committee Review of Chairman's fees June Items related to new Executive Committee appointment January Review of 2018/19 APP financial measures March Market data review for Executive Committee remuneration Discussion of measures and targets for 2018 LTPP First review of 2018/19 individual objectives of Executive Committee Review first draft of Committee Chairman's Annual Statement and Directors' Remuneration Report Service Contracts In line with our policy, all Executive Directors have service contracts which are terminable by either party with 12 months' notice. Appointment of Non-executive Directors are subject to letters of appointment. The Chairman's appointment is subject to six months' notice by either party; for other Non-executive Directors, notice is one month. Both Executive Directors and Non-executive Directors are required to be re-elected at each

AGM. Single Total Figure of Remuneration – Executive Directors The following table shows a single total figure in respect of qualifying service for 2017/18, together with comparative figures for 2016/17: Salary Benefits in kind APP LTPP Pension Other Total £'000 £'000 £'000 £'000 £'000 £'000 £'000 17/18 16/17 17/18 16/17 17/18 16/17 17/18 16/17 17/18 16/17 17/18 16/17 Andrew Bonfield 768 749 69 60 787 684 1,993 4,154 230 225 – – 3,847 5,872 John Pettigrew 887 825 85 497 919 762 1,362 2,291 266 248 – – 3,519 4,623 Dean Seavers 771 800 24 25 740 694 1,361 1,553 142 145 – – 3,038 3,217 Nicola Shaw 484 338 14 23 383 315 – – 145 101 – 485 1,026 1,262 Total 2,910 2,712 192 605 2,829 2,455 4,716 7,998 783 719 – 485 11,430 14,974

Notes: Salary: Base salaries were last increased on 1 June 2017. The decrease in Dean Seavers' salary is due to exchange rate fluctuations (\$1.3578:£1 for 2017/18 and \$1.2767:£1 for 2016/17). Benefits in kind: Benefits in kind include private medical insurance, life assurance and for UK-based Executive Directors, either a fully expensed car or a cash alternative to a car and the use of a car and a driver when required. For John Pettigrew the 2016/17 figure (as disclosed last year) includes reimbursement for costs relating to his relocation to London on appointment as CEO. Nicola Shaw's 2016/17 benefits in kind figure has been restated to include a Sharesave option award granted on 22 December 2016. There were no Sharesave options granted to any of the Executive Directors during 2017/18. LTPP: The 2015 LTPP is due to vest in July 2018.

The average share price over the three months from 1 January 2018 to 31 March 2018 of 787.8 pence (\$55.16 per ADS) has been applied. The 2016/17 LTPP figure includes both the 2013 LTPP award and the 2014 LTPP award due to a change in the vesting period of four years to three years between the 2013 LTPP and 2014 LTPP awards. The 2016/17 LTPP figures have been restated because last year they were estimated using the average share price (January-March 2017) and they now include the actual share price on vesting at 1 July 2017 and all dividend equivalent shares. Due to a lower share price at vesting of 954.0 pence versus the

estimate of 963.0 pence, the actual value at vesting was £18,911 and £13,146 lower than the estimate (last year) for Andrew Bonfield and John Pettigrew, respectively. Due to a higher ADS price at vesting of \$62.40 versus the estimate of \$59.84, the actual value at vesting was £52,065 higher than the estimate (last year) for Dean Seavers. Other: The 2016/17 'Other' figure for Nicola Shaw of £485,000 was disclosed last year and is a cash payment to compensate her for the forfeiture of short-term and long-term incentive cash awards at her former employer that were due to vest in June 2016. Nicola Shaw: Nicola Shaw joined on 1 July 2016 and therefore the 2016/17 figures stated for salary, benefits in kind, APP and pension are all prorated based on her start date. Additionally, Nicola did not receive a 2015 LTPP award. 70 National Grid Annual Report and Accounts 2017/18 Corporate Governance | Directors' Remuneration Report

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Corporate Governance Performance against targets for APP 2017/18 APP awards are earned by reference to the financial year and paid in June. Financial measures determine 70% of the APP and individual objectives determine 30% of the APP. Payment of the APP award is made in shares (50% of the award) and cash (50%). Shares (after any sales to pay income tax) must be retained until the shareholding requirement is met, and in any event for two years after receipt.

Threshold, target and stretch performance levels for the financial measures are pre-determined by the Committee and pay out at 0%, 50% and 100% of the maximum potential for each part and on a straight-line basis in between threshold and target performance and target and stretch performance. Target and stretch performance levels for the individual objectives are also pre-determined by the Committee and an assessment of the performance relative to the target and stretch performance levels and outturns is made at the end of the performance year on each objective. The outcomes of APP awards earned for financial and individual performance in 2017/18 are summarised in the table below: Proportion of Proportion of Performance measure max opportunity Threshold Target Stretch Actual max achieved

CEO and Finance Director	Adjusted EPS (p/share)	35%	54.5	57.0	59.5	58.0	70.0%	Group RoE (%)	35%	11.2	11.6	12.0	12.32	100.0%	
Executive Director, UK	UK Value Added (£m)	35%	1,566	1,619	1,672	1,629	59.4%	UK RoE (%)	(Percentage points above average allowed regulatory return)	35%	1.75	2.00	2.25	2.04	58.0%
Executive Director, US	US Value Added (\$m)	35%	1,463	1,513	1,562	1,513	50.0%	US RoE (%)	35%	8.5	8.7	8.9	8.92	100.0%	

All Executive Directors Individual objectives (%) 30% Detail expanded in tables below 74%-81% Notes: Adjusted EPS: Technical adjustments have been made reducing adjusted EPS actual by 1.5 pence to account for the impact of timing and storms, and reducing the target by 0.7p to reflect the net effect of currency adjustments, certain actuarial assumptions on pensions, scrip dividend uptake, and to ensure consistency of accounting treatment. Group RoE: Technical adjustments have been made to increase the target by 0.2% primarily to reflect the net effect of currency adjustments and to ensure consistency of accounting treatment. UK RoE and Value Added: No adjustments have been made. US RoE and Value Added: No adjustments have been made to US RoE. The target for US Value Added has been increased by \$109m to ensure consistency of accounting treatment. For 2017/18, the individual objectives of the Executive Directors when taken together were designed to deliver against each of our business priorities. Performance against these objectives is set out in the tables below and overleaf. As

with the financial measures, the achievement of 'stretch' performance and 'target' performance results in 100% and 50% respectively of the maximum payout.

Andrew Bonfield Individual objective & performance commentary Weighting Optimising the performance of our core UK business 30% • Financing workstream has been a key input to RIIO-T2 regulatory framework development • UK Business Services launched during the year • £4 billion of capital was returned to investors following the partial sale of UK Gas Distribution Evolving the business for the future 25% • Operating model successfully revised and new Business Excellence function and communities of practice developed and implemented, resulting in third party cost reductions • New Business Management System (BMS) and business reporting process implemented to ensure effective and efficient controls across the company • Improvement on identification and development of high potential talent. Further strides yet to be made in relation to employee enablement Optimising the performance of our core US business 20% • Facilitated successful rate case filings for Massachusetts Gas and Rhode Island Gas during the year • Financing successfully executed with cost savings against budget • Responded quickly to US tax reform, updating rates for jurisdictions with rate filings underway Optimising the performance of the Group 15% • Sarbanes-Oxley refresh has been completed • Further work is required on delivering more efficient controls and in improving employee enablement Seeking out growth opportunities in a disciplined way 10% • Board approved a finance strategy for growth with stakeholder communication plan developed Summary Andrew Bonfield has provided excellent support to the US and UK businesses on regulatory agreements this year. Strong management of the balance sheet has been exhibited, as has a focus on driving efficiency. Additionally, Andrew has delivered on business initiatives key to delivering on National Grid's business strategy for the future. Further work is required on ensuring controls are efficient and in improving employee enablement. As a result, the proportion of maximum achieved is 75%. Directors' Remuneration Report continued John Pettigrew Individual objective & performance commentary Weighting Evolving the business for the future 30% •• Clear articulation of long-term drivers of success for leadership teams and external stakeholders: Customer first; Performance Optimisation; Growth; Evolve for the Future •• Clear succession plans in place, improvement in identification and development of high potential talent •• Implemented revised operating model and new Business Excellence function •• Further work remains on strengthening employee enablement and to implement outcomes of a talent strategy review that was conducted Optimising the performance of our core US business 25% •• Guided on the development of new regulatory strategy. NIMO rate filing completed with allowed RoE of 9% and capex allowance of \$2.5 billion over three years •• Established new Capital Delivery function taking learnings from UK, to deliver construction projects more efficiently •• Developed organisation structure and processes that benefit from synergies of scale. US jurisdictions reinforced with stronger and more focused operational support Optimising the performance of our core UK business 25% •• Drove strong focus on performance optimisation, a key theme for all senior leadership engagement •• Supported UK with positive management of key stakeholder engagement and debate on regulatory frameworks, e.g. SO legal separation, RHO-T2, though there is more work to be done to achieve an acceptable position on Hinkley-Seabank •• Ensured recognition of the Group's significant customer-led investment and strong operational performance Seeking out growth opportunities in a disciplined way 20% •• New National Grid Ventures team set up to support evolution of National Grid and drive incremental growth opportunities with similar risk/ reward profile •• Established National Grid's voice as a leader in the energy industry, with National Grid Ventures now fully recognised internally and externally giving National Grid more visibility and leadership on the energy transition agenda •• Further progress to be made in emerging technologies Summary John Pettigrew has had a strong year, cementing himself as a leader to the Company and in the industry, developing National Grid as both a purpose and performance led organisation, successfully engaging with regulatory and political change, and achieving significant milestones across the individual businesses, including the creation of a new business in National Grid Ventures. Further work is to be done on Hinkley-Seabank arrangements, implementing our talent strategy and emerging technologies. As a result, the proportion of maximum achieved is 78%. Dean Seavers Individual objective & performance commentary Weighting Optimising the performance of our core US business 40% •• Achieved new rates for 80% of the core US business, including Niagara Mohawk, Massachusetts Gas, and Rhode Island Gas •• Capital Delivery function implemented •• Improvements have been made in relation to safety, with a reduction in switching errors year on year, although there remains more to do on injury rates •• Material work order issues were addressed during the year, although further process efficiencies are still to be implemented Evolving the business for the future 35% •• An advanced analytics team has been set up and a refreshed US strategy was developed and agreed •• Filings made on Electric Vehicles in all jurisdictions •• New agile reporting process has improved ability to assess and manage performance against key indicators •• Employees' understanding of the Company's purpose, vision and values has been embedded, as evidenced by results from employee surveys •• Succession plans were delivered; however, further improvements are needed in relation to employee enablement and driving a performance culture through continuous feedback Putting our customers first 25% •• In-year milestones for the Gas Enablement programme met to improve customer service •• Implementation of a pilot programme to significantly improve end-to-end customer experience •• While operational model changes have been introduced, more needs to be done to fully embed them Summary Dean Seavers has delivered strong results in the execution of a sustainable improvement plan, driven by the advancement of the regulatory strategy and successful rate filings. In addition to achievement of his objectives, Dean led a strong response to major winter storms with good restoration times for the vast majority of our customers. Further work is needed on process efficiency implementation and in embedding the operational model changes. As a result, the proportion of maximum achieved is 81%. 72 National Grid Annual Report and Accounts 2017/18 Corporate Governance | Directors' Remuneration Report

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Corporate Governance Nicola Shaw Individual objective & performance commentary Weighting Optimising the performance of our core UK business 50% • A continued focus on efficiency and removing unnecessary processes contributed to savings in the year • New electricity balancing system delivered, though some implementation aspects have taken time to resolve • The safety action plan was implemented in line with the agreed milestones and focus on a 'generative' safety culture was good during the year; however, there remains more to do in this area • Cadent performing in line with expectation and risk managed appropriately

Putting our customers first 20% • Customer satisfaction scores have been strong and customer journeys have been mapped, albeit slightly behind planned timescales • There has been a constructive approach to RIIO-T2 with Ofgem, with our focus of putting consumers at the centre of the process in line with Ofgem's proposals. There is more work to be done to achieve an acceptable position on Hinkley-Seabank, despite the work of the UK regulation team • The new regime for

System Operator incentives has been agreed with Ofgem and work on the legal separation of the electricity System Operator has progressed in line with expectation Evolving the business for the future 20% • Strategic initiatives are on track, employees' understanding of the Company's purpose, vision and values is strong based on employee survey results, and strides have been made in the identification and development of high potential talent in the organisation • Further work remains in relation to realising the potential of emerging technologies to enhance the effectiveness of our operations and strengthening employee engagement and enablement Seeking out growth opportunities in a disciplined way 10% • Gas Transmission published the 'Future of Gas' as well as developing an asset health

plan to the agreed timescales, with implementation on track Summary Nicola Shaw has led the UK business strongly this year. There has been strong progress on key initiatives relating to safety and focus on our customers, with good progress too on regulatory topics other than Hinkley-Seabank. Further work is to be done in certain areas, e.g. improving employee engagement and enablement. As a result, the proportion of maximum achieved is 74%. 2017/18 APP as a proportion of

base salary The overall APP award and its composition based on financial performance and individual performance for each Executive Director is shown as a proportion of salary.

	Actual	Actual	Actual	Actual																
US	£1,108,594	£919,069	£963,281	£739,877	£604,688	£382,695	£308,794	£198,223	£146,113	£107,110	£75,110	£53,110	£37,110	£26,110	£18,110	£12,110	£8,110	£5,110	£3,110	£2,110

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Directors' Remuneration Report continued 2017/18 LTPP performance The LTPP value included in the 2017/18 single total figure relates to vesting of the conditional LTPP awards granted in 2015. 2015 LTPP The 2015 award is determined by performance over the three years ending 31 March 2018 of RoE (50% weighting) and Value Growth (50% weighting), which will vest on 1 July 2018. LTPP vesting is based upon the position held at the award date. For the UK and US Executive Directors in position at the award date, the RoE component is split equally between Group RoE and UK and US RoE respectively. For the Chief Executive Officer and the Finance Director in position at the award date, the entire RoE component is based on Group RoE. The performance achieved against the 2015 LTPP award performance targets was: Threshold – Maximum – Actual/expected Actual/expected proportion of Performance measure 20% vesting 100% vesting vesting maximum achieved Group RoE (50% weighting for the 11.0% 12.5% or more 12.1% 78.7% CEO and Finance Director, 25% weighting for the Executive Director, UK and the Executive Director, US) UK RoE (25% weighting for the RoE is 1 percentage point RoE is 3.5 percentage points 2.7 percentage points above 75.5% Executive Director, UK) above the average allowed or more above the average the average allowed regulatory return allowed regulatory return regulatory return US RoE (25% weighting for the 90% of the average 105% of the average 88% of the average 0.0% Executive Director, US) allowed regulatory return allowed regulatory return allowed regulatory return Value Growth (50% weighting) 10.0% 12.0% or more 11.83% 93.3% The Value Growth outturn includes an amount to reflect the value added from the sale of a majority interest in the UK Gas Distribution business in 2016/17 as this event occurred within the 2015-2018 performance period measured. The amounts expected to vest under the 2015 LTPP for the performance period ended on 31 March 2018 and included in the 2017/18 single total figure are shown in the table below. The valuation is based on the average share price over the three months from 1 January 2018 to 31 March 2018 of 787.80 pence (\$55.16 per ADS). Total value of awards Original number vesting and dividend of share awards Overall vesting Number of Number of dividend equivalent shares in 2015 LTPP percentage awards vesting equivalent shares (£'000) Andrew Bonfield 259,668 86.0% 223,314 29,697 1,993 John Pettigrew 179,072 85.2% 152,569 20,289 1,362 Dean Seavers (ADSs) 44,801 66.3% 29,714 3,786 1,361 Note: Nicola Shaw was appointed in July 2016 and therefore did not receive any share awards under the 2015 LTPP. Total pension benefits Andrew Bonfield, John Pettigrew and Nicola Shaw received a cash allowance in lieu of participation in a pension arrangement. Dean Seavers participated in a defined contribution pension arrangement in the US. There are no additional benefits on early retirement. The values of these benefits, received during this year, are shown in the single total figure of remuneration table. In addition, John Pettigrew has accrued defined benefit (DB) entitlements. He opted out of the DB arrangement on 31 March 2016 with a deferred pension and lump sum payable from the normal retirement date. At 31 March 2018, John Pettigrew's accrued DB pension was £153,761 per annum and his accrued lump sum was £461,285 payable at the normal retirement date of 26 October 2031. There have been no increases to these benefits over the period, other than an increase for inflation due under the Scheme rules and legislation. Under the terms of the Scheme, were he to satisfy the Scheme's ill health requirements, an unreduced pension would be payable or he may receive an unreduced pension from age 50 if made redundant. A lump sum death in service benefit may also be payable. 74 National Grid Annual Report and Accounts 2017/18 Corporate Governance | Directors' Remuneration Report

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Corporate Governance Single total figure of remuneration – Non-executive Directors The following table shows a single total figure in respect of qualifying service for 2017/18, together with comparative figures for 2016/17: Fees Other emoluments Total £'000 £'000 £'000 2017/18 2016/17 2017/18 2016/17 2017/18 2016/17

Sir Peter Gershon: Other emoluments comprise private medical insurance, cash in lieu of a car and the use of a car and driver when required. Ruth Kelly: Ruth Kelly stepped down at the 2017 AGM.

Other emoluments: In accordance with the Company's expenses policies, Non-executive Directors receive reimbursement for their reasonable expenses for attending Board meetings. In instances where these costs are treated by HMRC as taxable benefits, the Company also meets the associated tax cost to the Non-executive Directors through a PAYE settlement agreement with HMRC. Amounts for travel expenses relating to both 2017/18 and 2016/17 have been provided in the table above (the figures for 2016/17 have been restated to include these). Nora Mead Brownell, Pierre Dufour and Therese Esperdy are US-based Non-executive Directors. The total emoluments paid to Executive and Non-executive Directors in the year was £12.8 million (2016/17: £19.5 million). The 2016/17 figure includes both the 2013 and 2014 LTPP award for Executive Directors. 2017 LTPP (conditional award) granted during the financial year The face value of the awards is calculated using the volume weighted average share price at the date of grant (28 June 2017) (£9.738 per share and \$63.94 per ADS) and is used to determine the value of the awards granted. Proportion vesting at Performance period Basis of award Face value '000 threshold performance Number of shares end date Andrew Bonfield 300% of salary £2,314 20% 237,610 31 March 2020 John Pettigrew 350% of salary £3,147 20% 323,205 31 March 2020 Dean Seavers (ADSs) 300% of salary \$3,152 20% 49,294 (ADSs) 31 March 2020 Nicola Shaw 300% of salary £1,471 20% 151,109 31 March 2020 Note: The 2017

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Directors' Remuneration Report continued Payments to past Directors Steve Holliday stepped down from the Board and retired from the Company on 22 July 2016. Mr Holliday held awards over shares that were prorated for time served. Nick Winser stepped down from the Board at the 2014 AGM and left the Company on 31 July 2015. Tom King stepped down from the Board and left the Company on 31 March 2015. Both Mr Winser and Mr King held awards over shares and ADSs, respectively, that were prorated according to their departure. The vesting of all these awards will occur at the normal vesting dates subject to satisfaction of their specified performance conditions at that time. Total value of awards vesting and dividend Prorated number of Overall vesting Number of Number of dividend equivalent shares Past Director share awards percentage awards vesting equivalent shares (£'000) Steve Holliday 2013 LTTP (RoE portion) 57,711 50.00% 28,855 5,553 328 2014 LTTP 271,425 84.89% 230,412 33,066 2,514 Tom King (ADSs) 2014 LTTP 11,917 67.44% 8,036 1,206 452 Nick Winser 2013 LTTP (RoE portion) 19,451 50.00% 9,725 1,871 111 Note: The 2013 LTTP (RoE portion) is the remaining 25% of the 2013 LTTP award which vested on 1 July 2017. The 2014 LTTP fully vested on 1 July 2017. Shareholder dilution Where shares may be issued or treasury shares reissued to satisfy incentives, the aggregate dilution resulting from executive share-based incentives will not exceed 5% in any 10-year period. Dilution resulting from all incentives, including all-employee incentives, will not exceed 10% in any 10-year period. The Committee reviews dilution against these limits regularly and under these limits the Company, as at 31 March 2018, had headroom of 3.95% and 7.73% respectively. Statement of Directors' shareholdings and share interests The Executive Directors are required to build up and hold a shareholding from vested share plan awards. The following table shows how each Executive Director complies with the shareholding requirement and also the number of shares owned by the Non-executive Directors, including connected persons (as Non-executive Directors do not have a shareholding requirement). The shareholding is as at 31 March 2018 and the salary used to calculate the value of the shareholding is the gross annual salary as at 31 March 2018. Andrew Bonfield has met his shareholding requirement of 400% of base salary. As John Pettigrew, Dean Seavers and Nicola Shaw are relatively new in post, they have not yet met the requirement, but are expected to do so in 2021, 2021 and 2023 respectively. They will not be allowed to sell shares until this requirement is met. The normal vesting dates for the conditional share awards subject to performance conditions are 1 July 2018, 1 July 2019 and 1 July 2020 for the 2015 LTTP, 2016 LTTP and 2017 LTTP respectively. In April 2018, a further 18 shares were purchased on behalf of each of Andrew Bonfield, John Pettigrew and Nicola Shaw and again in May 2018. These shares were purchased via the Share Incentive Plan (an HMRC approved all-employee share plan), thereby increasing their beneficial interests. There have been no other changes in Directors' shareholdings between 1 April 2018 and 16 May 2018. Conditional share awards subject to Number of shares performance Share ownership owned outright Value of shares held Number of options conditions requirements (including connected as a multiple of granted under the (LTTP 2015, 2016 Directors (multiple of salary) persons) current salary Sharesave Plan & 2017) Executive Directors Andrew Bonfield 400% 6,078,810 632% 3,230 718,161 John Pettigrew 500% 358,897 320% 4,286 785,087 Dean Seavers (ADSs) 400% 26,764 144% - 138,542 Nicola Shaw 400% 8,270 13% 4,070 273,273 Non-executive Directors Nora Mead Brownell (ADSs) - 4,583 n/a - - Jonathan Dawson - 36,705 n/a - - Pierre Dufour (ADSs) - 3,700 n/a - - Therese Esperdy (ADSs) - 1,508 n/a - - Sir Peter Gershon - 90,128 n/a - - Paul Golby - 2,291 n/a - - Mark Williamson - 47,460 n/a - - Notes: Andrew Bonfield: On 31 March 2018 Andrew Bonfield held 3,230 options granted under the Sharesave Plan. 1,208 options were granted at a value of 745 pence per share and they can be exercised at 745 pence per share between April 2019 and September 2019. 2,022 options were granted at a value of 749 pence and they can be exercised at 749 pence per share between April 2020 and September 2020. For Andrew Bonfield, the number of conditional share awards subject to performance conditions is as follows: 2015 LTTP: 259,668; 2016 LTTP: 220,883; 2017 LTTP: 237,610. However, in consequence of his resignation only the 2015 LTTP is now eligible for vesting in July 2018. John Pettigrew: On 31 March 2018 John Pettigrew held 4,286 options granted under the Sharesave Plan. 1,252 options were granted at a value of 599 pence per share and they can be exercised at 599 pence per share between April 2019 and September 2019. 3,034 options were granted at a value of 749 pence per share and they can be exercised at 749 pence per share between April 2020 and September 2020. The number of conditional share awards subject to performance conditions is as follows: 2015 LTTP: 179,072; 2016 LTTP: 282,810; 2017 LTTP: 323,205. Dean Seavers: The number of conditional share awards subject to performance conditions is as follows: 2015 LTTP: 44,801; 2016 LTTP: 44,447; 2017 LTTP: 49,294. Nicola Shaw: On 31 March 2018 Nicola Shaw held 4,070 options granted under the Sharesave Plan. 4,070 options were granted at a value of 737 pence per share and they can be exercised at 737 pence per share between April 2022 and September 2022. The number of conditional share awards subject to performance conditions is as follows: 2016 LTTP: 122,164; 2017 LTTP: 151,109. Dean Seavers, Nora Mead Brownell, Pierre Dufour and Therese Esperdy: Holdings and, for Dean Seavers, awards are shown as ADSs and each ADS represents five ordinary shares. 76 National Grid Annual Report and Accounts 2017/18 Corporate Governance | Directors' Remuneration Report

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Directors' Remuneration Report continued Chief Executive's pay in the last nine financial years Steve Holliday was CEO throughout the seven-year period from 2009/10 to 2015/16. John Pettigrew became CEO on 1 April 2016. Steve Holliday John Pettigrew 2009/10 2010/11 2011/12 2012/13 2013/14 2014/15 2015/16 2016/17 2017/18 Total single figure of remuneration (£'000) 3,931 3,738 3,539 3,170 4,801 4,845 5,151 4,623 3,519 APP (proportion of maximum awarded) 95.33% 81.33% 68.67% 55.65% 77.94% 94.80% 94.60% 73.86% 82.90% PSP/LTPP (proportion of maximum vesting) 100.00% 65.15% 49.50% 25.15% 76.20% 55.81% 63.45% 90.41% 85.20% Notes: Total single figure 2017/18: The figure for 2017/18 for John Pettigrew is explained in the single total figure table for Executive Directors. Total single figure 2016/17: The 2016/17 single figure includes both the 2013 LTPP and the 2014 LTPP and has been restated to reflect actual share price at 1 July 2017, consistent with comparative figures shown in this year's single total figure of remuneration table. Vesting: The vesting outcome for 2016/17 of 90.41% reflects the combined (actual) vesting performance outcomes for the 2013 LTPP (90.00%) and the 2014 LTPP (90.58%) as stated last year.

PSP/LTPP plans: Prior to 2014, LTPP awards were made under a different LTI framework which incorporated a four-year performance period for the RoE element of the awards. The last award under this framework was made in 2013 and was fully vested in 2017. Awards made from 2014 are subject to a three-year performance period, the first of these awards vested in 2017. Percentage change in CEO's remuneration The table below shows how the percentage change in the CEO's salary, benefits and APP between 2016/17 and 2017/18 compares with the percentage change in the average of each of those components of remuneration for non-union employees in the UK and the US. The Committee views this group as the most appropriate comparator group, as this group excludes employees represented by trade unions whose pay and benefits are negotiated with each individual union. Salary Taxable benefits APP £'000 £'000 £'000 £'000 £'000 £'000 2017/18 2016/17 Change 2017/18 2016/17 Change 2017/18 2016/17 Change John Pettigrew 887 825 7.5% 85 497 -82.9% 919 762 20.6% Non-union employees (average increase) 2.8% 3.9% 1.9% Notes: Chief Executive Officer: Taxable benefits for John Pettigrew in 2016/17 include a one-time relocation benefit.

Non-union employees: Pay data for US employees have been converted at \$1.3578:£1. Statement of implementation of remuneration policy in 2018/19 The remuneration policy adopted at the 2017 AGM will be implemented during 2018/19 as described below. Salary Salary increases, subject to individual performance, will normally be in line with the increase awarded to other employees in the UK and US, unless there is a change in role or responsibility. In line with the policy on recruitment remuneration, salaries for new directors may be set below market level initially and aligned to market level over time (provided the increase is merited by the individual's contribution and performance). From 1 June 2018 From 1 June 2017 Increase Andrew Bonfield £771,285 £771,285 n/a John Pettigrew £953,205 £899,250 6.0% Dean Seavers \$1,082,144 \$1,050,625 3.0% Nicola Shaw £519,930 £490,500 6.0% Note: Andrew Bonfield: Andrew will be leaving at the end of July 2018 and therefore is not eligible to receive a 1 June 2018 salary increase. APP measures for 2018/19 The APP targets are considered commercially sensitive and consequently will be disclosed in the 2018/19 Directors' Remuneration Report. Willis Towers Watson is a member of the Remuneration Consultants Group and have signed up to that group's code of conduct. The Committee is satisfied that any potential conflicts were appropriately managed. Work undertaken by NBS and Willis Towers Watson in their role as independent advisors to the Committee included providing market information for the Executive Directors and other senior employees and governance matters. This work has incurred fees of £14,063 for NBS, and of £136,283 for Willis Towers Watson. The Committee also received legal advice from Linklaters LLP and this has incurred fees of approximately £15,000. The Committee reviews the objectivity and independence of the advice it receives from its advisors each year. It is satisfied that they all provided credible and professional advice. The Committee considers the views of the Chairman on the performance and remuneration of the CEO, and of the CEO on the performance and remuneration of the other members of the Executive Committee. The Committee is also supported by the Group General Counsel and Company Secretary who acts as Secretary to the Committee, the Group HR Director, the Group Head of Reward, and as required the Group Head of Pensions and Group Financial Controller. No other advisors have provided significant services to the Committee in the year.

Statement of Directors' responsibilities The Directors are responsible for preparing the Annual Report and on an individual basis, and to enable them to ensure that the consolidated Accounts, including the consolidated financial statements and the financial statements comply with the Companies Act 2006. They are also

Company financial statements in accordance with applicable law responsible for safeguarding the assets of the Parent Company and its subsidiaries and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. Company law requires the Directors to prepare financial statements for each financial year. Under that law the directors are required to prepare the financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union and preparation and dissemination of financial statements may differ from Article 4 of the IAS Regulation and have elected to prepare the Parent financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law), including

FRS 101 'Reduced Disclosure Framework'. Under company law the directors must not approve the audit information of which the auditors are unaware and each Director accounts unless they are satisfied that they give a true and fair view of the state of affairs of the Group and Parent Company and of the profit or loss of the Group and Parent Company for that period. In preparing the Group financial statements, the directors are aware of the requirements of the Companies Act 2006 and the UK Listing Authority's Listing Rules, and are required to:

International Accounting Each of the Directors, whose names and functions are listed on pages 42 and 43, confirms that:

- properly select and apply accounting policies;
- to the best of their knowledge, the consolidated financial statements present information, including accounting policies, in a manner and the parent company financial statements, which have been that provides relevant, reliable, comparable and understandable prepared in accordance with IFRSs as issued by the IASB and IFRS as information; adopted by the European Union and UK GAAP FRS 101 respectively;
- provide additional disclosures when compliance with the specific give a true and fair view of the assets, liabilities, financial position and requirements in IFRSs are insufficient to enable users to understand profit of the Company on a consolidated and individual basis; the impact of particular transactions, other events and conditions

- to the best of their knowledge, the Strategic Report contained in on the entity's financial position and financial performance; and the Annual Report and Accounts includes a fair review of the
- make an assessment of the Group's ability to continue as a development and performance of the business and the position of going concern. the Company on a consolidated and individual basis, together with a description of the principal risks and uncertainties that it faces; and In preparing the Parent Company financial statements, the Directors

Consolidated income statement continued

Unaudited commentary on the consolidated income statement

The consolidated income statement shows income earned and expenditure for the year, with the difference being the overall profit for the year.

The commentary below relates to continuing operations only.

Revenue

Revenue for the year ended 31 March 2018 increased by £215 million to £15,250 million. This increase was driven by higher revenues in our US Regulated and NGV and Other businesses, partially offset by lower revenues in our UK Electricity Transmission business. US Regulated revenues were £341 million higher year-on-year including increased pass-through costs, the impact of new rate plans and the benefit of capital trackers, partially offset by an unfavourable impact from foreign exchange. UK Electricity Transmission revenues decreased by £285 million, including a reduction in pass-through costs, the absence of last year's recovery of outstanding timing balances and higher adjustments this year to return the benefits of efficiencies and lower required outputs to customers. Revenue from NGV and Other businesses increased by £63 million, primarily driven by support services provided to Cadent.

Operating costs

Operating costs for the year ended 31 March 2018 of £11,757 million were £70 million lower than the prior year. This decrease in costs included a £601 million decrease in exceptional items and remeasurements, which is discussed below. Excluding exceptional items and remeasurements, operating costs were £531 million higher, principally due to higher pass-through costs in the US, £142 million of major storm costs incurred in the US and higher depreciation as a result of continued asset investment, partially offset by the impact of movement in exchange rates.

Net finance costs

For the year ended 31 March 2018, net finance costs before exceptional items and remeasurements were £55 million lower than 2016/17 at £974 million, mainly as a result of the impact of the weaker US dollar, higher gains on the sale of financial assets and lower pension interest expense due to a reduction in pension deficits, partially offset by the impact of higher UK RPI inflation. Net finance costs in 2017/18 included remeasurement gains of £119 million on derivative financial instruments used to hedge our borrowings, compared to £58 million of remeasurement losses in 2016/17. In addition, during 2017/18 we had a £110 million remeasurement gain on a derivative financial instrument relating to the put/call option over a 14% interest in Quadgas HoldCo Limited.

Share of post-tax results of joint ventures and associates

Share of post-tax results of joint ventures and associates before exceptional items and remeasurements was £104 million higher at £167 million, primarily due to the inclusion of our 39% share of the results of Cadent this year.

Tax

The tax charge on profits before exceptional items and remeasurements of £589 million was £77 million lower than 2016/17. This was primarily due to lower UK and US corporate tax rates partially offset by lower tax credits in respect of prior years.

Exceptional items and remeasurements

Operating costs for the year ended 31 March 2018 included a £26 million gain on settlement of outstanding balances related to the LIPA Management Services Agreement, together with a net £10 million gain on remeasurement of commodity contracts. In the previous year, operating costs included £565 million of exceptional costs primarily associated with environmental charges and gas holder decommissioning.

Finance costs for the year ended 31 March 2018 included a gain of £229 million on financial remeasurements of derivative financial instruments, including a £110 million gain on the put option to dispose of a 14% interest in Cadent. For the previous year ended 31 March 2017, we incurred a loss of £58 million on financial remeasurements.

Share of post-tax results of joint ventures and associates for the year ended 31 March 2018 included a £207 million exceptional loss, principally relating to an impairment of the carrying value of our investment in Cadent following the agreement to potentially dispose of our remaining 25% holding.

Exceptional items and remeasurements relating to taxation for 2017/18 comprised a credit of £1,473 million, which primarily related to a decrease in net deferred tax liabilities due to the reduction in the US corporate tax rate.

Adjusted earnings and adjusted EPS from continuing operations

Adjusted earnings and adjusted EPS, which exclude exceptional items and remeasurements, are provided to reflect results of the Group on a 'business performance' basis, described further in note 4. The following chart shows the five-year trend in adjusted profit attributable to equity shareholders of the parent (adjusted earnings) and adjusted earnings per share. See note 7 for a reconciliation of adjusted basic EPS to EPS.

Adjusted earnings and adjusted EPS from continuing operations¹

1. Adjusted earnings and adjusted EPS are attributable to equity shareholders of the parent.

The above earnings performance translated into adjusted EPS growth in 2017/18 of 2.6p (5%).

Exchange rates

Our financial results are reported in sterling. Transactions for our US operations are denominated in dollars, so the related amounts that are reported in sterling depend on the dollar to sterling exchange rate. The table below shows the average and closing exchange rates of sterling to US dollars.

	2017/18	2016/17	% change	
Weighted average (income statement)	1.36	1.28	6	%
Year-end (statement of financial position)	1.40	1.25	12	%

The movement in foreign exchange during 2017/18 has resulted in a £536 million reduction in revenue, a £98 million reduction in adjusted operating profit, and a £73 million reduction in operating profit.

The share of other comprehensive income of associates relates to items of other comprehensive income of Cadent (investment through Quadgas HoldCo Limited), comprising £142 million (2017: £nil; 2016: £nil) remeasurement gains on pension assets and post-retirement benefit obligations and a £5 million (2017: £nil; 2016: £nil) net gain in respect of cash flow hedges. Both items are shown net of tax.

Unaudited commentary on consolidated statement of comprehensive income

The consolidated statement of comprehensive income records certain items as prescribed by the accounting rules. For us, the majority of the income or expense included here relates to movements in actuarial assumptions on defined benefit pension schemes and the associated tax impact. These items are not part of profit for the year, yet are important to allow the reader to gain a more comprehensive picture of our performance as a whole.

Remeasurement gains of pension assets and post-retirement benefit obligations

We had a net gain after tax of £925 million (2016/17: £146 million; 2015/16: £315 million) on our pension assets and other post-retirement benefit obligations which is due to changes in key assumptions made in the valuation calculation of pension liabilities and differences between the expected and actual pension asset returns.

Exchange adjustments

Adjustments are made when we translate the results and net assets of our companies operating outside the UK, as well as debt and derivative transactions designated as a net investment hedge of our foreign currency operations. The net movement for the year resulted in a loss of £505 million (2016/17: £346 million gain; 2015/16: £69 million gain).

Net gains in respect of cash flow hedges

The value of derivatives held to hedge cash flows is impacted by changes in expected interest rates and exchange rates. The net gain for the year was £19 million (2016/17: £70 million; 2015/16: £88 million).

2. Included within the share premium account are costs associated with scrip dividends.

3. Refer to note 7 for the effect of the share consolidation and the special dividend.

Unaudited commentary on consolidated statement of changes in equity

The consolidated statement of changes in equity shows additions and reductions to equity. For us, the main items are profit earned and dividends paid in the year.

Dividends

The Directors are proposing a final dividend of 30.44 pence per share, bringing the total dividend for the year to 45.93 pence per share, a 3.7% increase on 2016/17. The Directors intend to target increasing the annual dividend per share by at least the rate of RPI inflation for the foreseeable future.

Special dividend

Following completion of the sale of the majority interest in UK Gas Distribution, the Company paid a special interim dividend on 2 June 2017 of 84.375 pence per existing ordinary share (\$5.4224 per existing American Depositary Share). This returned approximately £3,170 million to shareholders.

assets and derivative financial liabilities (see note 16).

The consolidated financial statements set out on pages 94 to 177 were approved by the Board of Directors on 16 May 2018 and were signed on its behalf by:

Sir Peter Gershon Chairman
Andrew Bonfield Finance Director

National Grid plc
Registered number: 4031152

Financial Statements | Consolidated statement of financial position National Grid Annual Report and Accounts
2017/18 99

Consolidated statement of financial position continued

Unaudited commentary on consolidated statement of financial position

The consolidated statement of financial position shows all the Group's assets and liabilities at the year end. As a capital-intensive business, we have significant amounts of physical assets and corresponding borrowings.

Goodwill and other intangible assets

Goodwill and other intangibles decreased by £676 million to £6,343 million as at 31 March 2018. This decrease primarily relates to foreign exchange movements of £707 million with software additions of £173 million mostly offset by software amortisation of £138 million.

Property, plant and equipment

Property, plant and equipment remained steady, showing a £28 million increase to £39,853 million as at 31 March 2018. This was principally due to additions of £3,901 million primarily related to capital expenditure on the renewal and extension of our regulated networks less depreciation of £1,392 million in the year, disposals of £45 million and the impact of foreign exchange movements of £2,428 million. See note 2 for further details of our capital expenditure.

Investments and other non-current assets

Investments in joint ventures and associates, financial and other investments and other non-current assets (including the non-current corporate tax asset) have decreased by £70 million to £3,182 million. This is primarily due to the net effect of the sale of our shares in Dominion driving a decrease of £173 million in the year; additions to our joint ventures and associates of £129 million partially offset by a net reduction in our investment in Quadgas HoldCo Limited of £17 million as a result of the impairment recorded, the actuarial gains in the pension scheme and dividends received largely offsetting profits; and the recognition of a non-current corporation tax asset of £51 million in respect of tax repayments due in the US.

Inventories and current intangible assets and trade and other receivables

Inventories and current intangible assets and trade and other receivables have increased by £286 million, excluding £278 million of foreign exchange, to £3,139 million as at 31 March 2018. The increase in trade receivables reflects the colder winter, higher gas costs and Balancing Services Incentives Scheme cost recoveries. This is partly offset by a decrease in inventories following lower levels of gas on hand held at 31 March 2018 due to the increased demand at that time and to lower current intangible assets of £30 million following the settlement of outstanding emissions credits.

Current tax balances

The net current tax liability of £9 million as at 31 March 2018 has changed by £219 million from a net current tax asset of £210 million as at 31 March 2017. This is primarily due to the current tax charge in the year.

Deferred tax balances

Deferred tax balances have decreased by £843 million to £3,636 million as at 31 March 2018. This is primarily due to the deferred tax credit arising on the reduction in the US corporate tax rate partially offset by the deferred tax charge on actuarial gains in reserves.

Trade and other payables

Trade and other payables have increased by £313 million, excluding foreign exchange of £209 million, to £3,453 million. This is principally due to an increase in storm accruals in the US.

Provisions and other non-current liabilities

Provisions and other non-current liabilities decreased by £324 million, excluding foreign exchange of £265 million, to £3,369 million as at 31 March 2018.

This primarily relates to provisions, which decreased by £341 million in the year excluding the impact of foreign exchange. The underlying movements included £93 million utilisation and reversal of unused provisions for costs associated with the sale of UK Gas Distribution and £75 million utilisation of the environmental provision. In 2016/17 we recognised a provision of £150 million relating to a voluntary distribution to be made for the benefit of energy customers from the proceeds arising from the sale of UK Gas Distribution. During the year we paid out £33 million, and the remaining balance of £117 million is now classified within trade and other payables, reflecting our Funding Agreement with Affordable Warmth Solutions.

Net debt

Net debt is the aggregate of cash and cash equivalents, current financial and other investments, borrowings, and all derivative financial assets and liabilities excluding commodity contract derivatives and excluding the Further Acquisition Agreement derivative. See further analysis with the consolidated cash flow statement on page 101 and further breakdowns and analysis within note 27.

Net pension and other post-retirement obligations

A summary of the total UK and US assets and liabilities and the overall net IAS 19 (revised) accounting deficit is shown below:

Net plan surplus/(deficit)	UK £m	US £m	Total £m
As at 1 April 2017	(156)	(1,777)	(1,933)
Exchange movements	—	175	175
Current service cost	(49)	(144)	(193)
Net interest cost	(3)	(62)	(65)
Curtailments and other	(15)	(20)	(35)
Actuarial gains/(losses)			
– on plan assets	103	465	568
– on plan liabilities	1,074	(329)	745
Employer contributions	150	325	475
As at 31 March 2018	1,104	(1,367)	(263)
Represented by:			
Plan assets	15,330	8,528	23,858
Plan liabilities	(14,226)	(9,895)	(24,121)
	1,104	(1,367)	(263)

The principal movements in net obligations during the year include net actuarial gains of £1,313 million and employer contributions of £475 million. Actuarial gains include gains of £568 million arising on plan assets resulting from actual asset returns being greater than assumed returns which are based upon the discount rate at the start of the year. Actuarial gains on plan liabilities of £745 million arose primarily as a consequence of an increase in the real UK discount rates giving an actuarial gain of £604 million combined with updated UK demographic assumptions reducing liabilities by £565 million and a decrease in the US nominal discount rate resulting in actuarial losses of £430 million.

Further information on our pension and other post-retirement obligations can be found in note 23 to the consolidated financial statements.

Off balance sheet items

There were no significant off balance sheet items other than the commitments and contingencies detailed in note 28.

Through the ordinary course of our operations, we are party to various litigation, claims and investigations. We do not expect the ultimate resolution of any of these proceedings to have a material adverse effect on our results of operations, cash flows or financial position.

Consolidated cash flow statement continued

Unaudited commentary on the consolidated cash flow statement

The consolidated cash flow statement shows how the cash balance has moved during the year. Cash inflows and outflows are presented to allow users to understand how they relate to the day-to-day operations of the business (Operating activities); the money that has been spent or earned on assets in the year, including acquisitions of physical assets or other businesses and the disposal of UK Gas Distribution (Investing activities); and the cash raised from debt, share issues or share buybacks, restructuring of borrowings for the disposal of UK Gas Distribution and other loan borrowings or repayments (Financing activities).

Cash generated from continuing operations

Cash generated from continuing operations (£m)

Cash flows from our operations are largely stable when viewed over the longer term. Our electricity and gas transmission operations in the UK are subject to multi-year rate agreements with regulators. In the UK, we have largely stable cash flows. However, in the US our short-term cash flows are dependent on the price of gas and electricity and the timing of customer payments. The regulatory mechanisms for recovering costs from customers can result in significant cash flow swings from year to year. Changes in volumes in the US, for example as a consequence of abnormally mild or extreme weather can affect revenues, and hence cash flows, particularly in the winter months.

For the year ended 31 March 2018, cash flows from continuing operations increased by £250 million to £4,702 million. The outflow of £239 million from changes in pensions and other post-retirement obligations was £529 million lower than 2016/17 due to higher levels of contributions into the UK and US schemes in the prior year.

Cash flows from discontinued operations decreased by £1,194 million to a £207 million outflow in 2017/18. Discontinued operations in 2016/17 included the cash flows of the UK Gas Distribution business. In 2017/18, discontinued operations included cash outflows for residual transaction costs related to the disposal.

Unaudited commentary on the consolidated cash flow statement continued

Net capital investment

Net cash capital investment for continuing operations in the year of £4,098 million comprising investments and loans to joint ventures and associates of £197 million (including St William) and purchases of intangibles and property, plant and equipment (net of disposals) of £3,901 million was £460 million higher than the prior year. This was a result of higher spend in our US Regulated and UK Gas Transmission businesses, along with increased levels of investment in interconnectors, offset by exchange movements of £133 million and lower spend in UK Electricity Transmission.

Net interest paid (including exceptional interest)

Net interest paid for continuing operations was £796 million, £8 million higher than 2016/17 with increased payments at constant currency mostly offset by the impact of exchange rates on our US dollar denominated finance costs. Net interest paid and exceptional finance costs for discontinued operations in 2016/17 were £1,167 million, primarily due to £1,052 million of debt buyback costs incurred as part of the Group's liability management programme in relation to the disposal of the UK Gas Distribution business.

Tax recovered/paid

Tax recovered for continuing operations in the year to 31 March 2018 was £8 million. This was primarily due to refunds in the US and UK of tax previously overpaid of £46 million and £67 million respectively, offset by UK tax payments which were lower than 2016/17 as a result of tax deductible costs incurred in respect of the disposal of UK Gas Distribution.

Dividends paid and scrip buybacks

Ordinary dividends paid in the year ended 31 March 2018 amounted to £1,316 million. This was £147 million lower than 2016/17 reflecting the decrease in the number of shares following the share consolidation, offset by an increase in the final dividend paid in August 2017. Share buybacks of £178 million, related to the repurchase of the scrip uptake, were £11 million lower than 2016/17.

Return of capital

A total cash outflow of £4,010 million related to the return to shareholders of proceeds from the disposal of the UK Gas Distribution business. This comprised a £3,171 million outflow related to the special dividend on 2 June 2018 (accompanied by an 11 for 12 share consolidation) and £839 million of share buybacks.

Disposal of UK Gas Distribution

The inflow in 2016/17 reflects the cash proceeds received of £5,454 million and the £5,890 million of net debt deconsolidated on disposal of UK Gas Distribution (see note 27). The outflow of £20 million in 2017/18 relates to the completion account settlement in November 2017.

Other cash movements

Other cash flows principally arise from the disposal of a financial investment in Dominion for £126 million and dividends from joint ventures and associates of £213 million (£114 million higher than 2016/17), partly offset by movements in treasury shares.

Non-cash movements

The non-cash movements are predominantly due to the weakening of the US dollar against sterling, resulting in movements in foreign exchange arising on net debt held in US dollars. In the year, the dollar weakened from \$1.25 at 31 March 2017 to \$1.40 at 31 March 2018. Other non-cash movements primarily arise from changes in fair values of financial assets and liabilities and interest accretions and accruals.

Net debt

Net debt at 31 March (£m)

Financial Statements | Consolidated cash flow statement National Grid Annual Report and Accounts 2017/18 103

Notes to the consolidated financial statements
– analysis of items in the primary statements

1. Basis of preparation and recent accounting developments

Accounting policies describe our approach to recognising and measuring transactions and balances in the year. Accounting policies applicable across the financial statements are shown below. Accounting policies that are specific to a component of the financial statements have been incorporated into the relevant note.

This section also shows areas of judgement and key sources of estimation uncertainty in these financial statements. In addition, we summarise new IASB and EU endorsed accounting standards, amendments and interpretations and whether these are effective in 2019 or later years, explaining how significant changes are expected to affect our reported results.

National Grid's principal activities involve the transmission and distribution of electricity and gas in Great Britain and northeastern US. The Company is a public limited liability company incorporated and domiciled in England and Wales, with its registered office at 1–3 Strand, London WC2N 5EH.

The Company, National Grid plc, which is the ultimate parent of the Group, has its primary listing on the London Stock Exchange and is also quoted on the New York Stock Exchange.

These consolidated financial statements were approved for issue by the Board on 16 May 2018.

These consolidated financial statements have been prepared in accordance with International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS) and related interpretations as issued by the IASB and IFRS as adopted by the EU. They are prepared on the basis of all IFRS accounting standards and interpretations that are mandatory for periods ended 31 March 2018 and in accordance with the Companies Act 2006 applicable to companies reporting under IFRS and Article 4 of the EU IAS Regulation. The comparative financial information has also been prepared on this basis.

The consolidated financial statements have been prepared on a historical cost basis, except for the recording of pension assets and liabilities, the revaluation of derivative financial instruments and certain commodity contracts and investments classified as available-for-sale.

These consolidated financial statements are presented in pounds sterling, which is also the functional currency of the Company.

The notes to the financial statements have been prepared on a continuing basis unless otherwise stated.

Our income statement and segmental analysis separately identify financial results before and after exceptional items and remeasurements. The Directors believe that presentation of the results in this way is relevant to an understanding of the Group's financial performance. Presenting financial results before exceptional items and remeasurements is consistent with the way that financial performance is measured by management and reported to the Board and Executive Committee and aids the comparability of reported financial performance from year to year in this context.

Further, this year we have adopted a columnar presentation as we consider it improves the clarity of the presentation, and is consistent with the way that financial performance is measured by management and reported to the Board and Executive Committee, and better enables users of the financial statements to understand the results. The inclusion of total profit for the period from continuing operations before exceptional items and remeasurements forms part of the incentive target set annually for remunerating certain Executive Directors. Accordingly we believe it is important for users of the financial statements to understand how this compares to our results on a statutory basis and year-on-year.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities and the reported amounts of revenue and expenses during the reporting period (see accounting policy E).

A. Going concern

The Directors considered it appropriate to prepare the financial statements on a going concern basis, having considered the Company's cash flow forecasts with respect to business planning and treasury management activities. The going concern basis presumes that the Group has adequate resources to remain in operation, and that the Directors intend it to do so, for at least one year from the date the financial statements are signed.

B. Basis of consolidation

The consolidated financial statements incorporate the results, assets and liabilities of the Company and its subsidiaries, together with a share of the results, assets and liabilities of joint operations. The Group accounts for joint ventures and associates using the equity method of accounting, where the investment is carried at cost plus post-acquisition changes in the share of net assets of the joint venture or associate, less any provision for impairment.

A subsidiary is defined as an entity controlled by the Group. Control is achieved where the Group is exposed to, or has the rights to, variable returns from its involvement with the entity and has the power to affect those returns through its power over the entity.

Losses in excess of the consolidated interest in joint ventures and associates are not recognised, except where the Company or its subsidiaries have made a commitment to make good those losses.

Where necessary, adjustments are made to bring the accounting policies used in the individual financial statements of the Company, subsidiaries, joint operations, joint ventures and associates into line with those used by the Group in its consolidated financial statements under IFRS. Intercompany transactions are eliminated.

The results of subsidiaries (other than relating to UK Gas Distribution as described in C below), joint operations, joint ventures and associates acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

Acquisitions are accounted for using the acquisition method, where the purchase price is allocated to the identifiable assets acquired and liabilities assumed on a fair value basis and the remainder recognised as goodwill.

C. Disposal of UK Gas Distribution

As described further in note 9, on 8 December 2016 the Group entered into a sale and purchase agreement to dispose of a 61% controlling stake in the UK Gas Distribution business. The disposal completed on 31 March 2017 and the Group has retained a 39% interest in the business. As a result, all assets and liabilities of UK Gas Distribution were deemed to be disposed of and a 39% interest reacquired. The 39% retained interest is classified as an associate on the basis that the Group retains significant influence over the business through its retained stake. The Group has the ability to appoint 4 of the 12 directors on the board of Quadgas HoldCo Limited.

In addition, the Group entered into a Further Acquisition Agreement (FAA) over a further 14% interest. Refer to note 15 for further details.

The Group classified UK Gas Distribution as held for sale as of 8 December 2016, when it became highly probable that the value of the business to the Group would be recovered through sale rather than continuing ownership. As UK Gas Distribution represents a separate major line of business, the business was classified as a discontinued operation in the 2016/17 consolidated income statement. This continues to be reflected in the consolidated income statement and

the consolidated statement of comprehensive income, as well as earnings per share (EPS) split between continuing and discontinued operations.

In the current year, any true-ups relating to the disposal of the controlling stake are recorded within discontinued operations.

104 National Grid Annual Report and Accounts 2017/18 Financial Statements | Notes to the consolidated financial statements

1. Basis of preparation and recent accounting developments continued

D. Foreign currencies

Transactions in currencies other than the functional currency of the Company or subsidiary concerned are recorded at the rates of exchange prevailing on the dates of the transactions. At each reporting date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at closing exchange rates. Non-monetary assets are not retranslated unless they are carried at fair value.

Gains and losses arising on the retranslation of monetary assets and liabilities are included in the income statement, except where the application of hedge accounting requires inclusion in other comprehensive income see note 16.

On consolidation, the assets and liabilities of operations that have a functional currency different from the Company's functional currency of pounds sterling, principally our US operations that have a functional currency of US dollars, are translated at exchange rates prevailing at the reporting date. Income and expense items are translated at the average exchange rates for the period where these do not differ materially from rates at the date of the transaction. Exchange differences arising are recognised in other comprehensive income and transferred to the consolidated translation reserve within other equity reserves see note 26.

E. Areas of judgement and key sources of estimation uncertainty

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities, and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates. Information about such judgements and estimations is contained in the notes to the financial statements, and the key areas are summarised below.

Areas of judgement that have the most significant effect on the amounts recognised in the financial statements are as follows:

- categorisation of certain items as exceptional items and the definition of adjusted earnings see notes 4 and 7.

Key sources of estimation uncertainty that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are as follows:

- valuation of liabilities for pensions and other post-retirement benefits see note 23; and
- the discount rate and cash flows applied in determining the environmental provisions see note 24.

In order to illustrate the impact that changes in assumptions could have on our results and financial position, we have included sensitivity analyses in note 33.

F. Accounting policy choices

IFRS provides certain options available within accounting standards. Choices we have made, and continue to make, include the following:

Presentational formats: we use the nature of expense method for our income statement and aggregate our statement of financial position to net assets and total equity. In the income statement, we present subtotals of total operating profit, profit before tax and profit after tax from continuing operations, together with additional subtotals excluding exceptional items and remeasurements as a result of the three columnar layout described earlier. Exceptional items and remeasurements are presented in a separate column on the face of the income statement.

-

Customer contributions: contributions received prior to 1 July 2009 towards capital expenditure are recorded as deferred income and amortised in line with the depreciation on the associated asset.

Financial instruments: we normally opt to apply hedge accounting in most circumstances where this is permitted. For net investment hedges, we have chosen to use the spot rate method, rather than the alternative forward rate method.

New IFRS accounting standards effective for the year ended 31 March 2018

The Group has adopted the following amendments to standards:

- annual improvements to IFRSs 2014-2016 Cycle;
- amendments to IAS 7 'Statement of cash flows'; and
- amendments to IAS 12 'Income taxes'.

The adoption of these amendments has had no material impact on the Group's results or financial statement disclosures.

Financial Statements | Notes to the consolidated financial statements National Grid Annual Report and Accounts 2017/18 105

Notes to the consolidated financial statements
– analysis of items in the primary statements continued

1. Basis of preparation and recent accounting developments continued

New IFRS accounting standards and interpretations not yet adopted

The Group enters into a significant number of transactions that fall within the scope of IFRS 9 'Financial Instruments', IFRS 15 'Revenue from Contracts with Customers' and IFRS 16 'Leases'. We are assessing the likely impact of these standards on the Group's financial statements.

i) IFRS 9 'Financial Instruments'

IFRS 9 'Financial Instruments' is effective for National Grid for the year ending 31 March 2019. The change to IFRS 9 principally impacts the accounting for the classification and measurement of financial instruments, impairment of financial assets and hedge accounting.

The Group has elected not to restate comparatives on initial application of IFRS 9. The full impact of adopting IFRS 9 will depend on the financial instruments that the Group has during the year ending 31 March 2019 as well as on economic conditions and judgements made as at the year end. The Group has performed an assessment of the potential impact of adopting IFRS 9 based on the financial instruments and hedging relationships as at the date of adoption of IFRS 9 (1 April 2018). It is not expected that the adoption of IFRS 9 will materially impact our profits or net assets on transition or prospectively.

Classification and measurement: financial assets

The number of categories of financial assets has been reduced under IFRS 9 compared to IAS 39. Under IFRS 9 the classification of financial assets is based on the business model within which the asset is held and the contractual terms of the asset. There are three principal classification categories for financial assets that are debt instruments: (i) amortised cost, (ii) fair value through other comprehensive income (FVOCI), and (iii) fair value through profit or loss (FVTPL). Equity investments are either classified as (i) FVTPL or (ii) FVOCI. Where assets or liabilities are measured at FVTPL, any fair value movements will be reported as remeasurements. If measured at FVOCI, realised gains on equity investments are not recycled to the income statement but instead are transferred directly to retained profits.

The largest reallocation of financial assets will be from available-for-sale investments to FVTPL and relates to over £2 billion Group investments in money market funds and insurance company investments in mutual funds, where the contractual terms are such that they do not qualify for any other category. All other available-for-sale investments will be categorised as FVOCI under IFRS 9.

The change to the asset classification rules will have no impact on reported Group net assets, although there will be some changes to reserves at transition.

Classification and measurement: financial liabilities

Under IFRS 9 financial liabilities can be designated at FVTPL to eliminate an accounting mismatch. Where financial liabilities are designated at FVTPL, changes in their fair value due to credit risk are presented in other comprehensive income. Remaining changes in fair value are presented in the income statement.

With effect from 1 April 2018 the Group will take the fair value option for one issued zero coupon liability to reduce the measurement mismatch against some derivatives. This change will result in a reduction of reported net assets of less than £50 million.

Impairment

The impairment model under IFRS 9 reflects expected credit losses, as opposed to only incurred losses under IAS 39. The new impairment model will apply to the Group's financial assets that are debt instruments measured at amortised cost or FVOCI as well as the Group's trade receivables.

The Group expects to apply the simplified approach, recognising lifetime expected losses for its trade receivables. The Group's preliminary calculation of the loss allowance for these assets as at 31 March 2018 results in an immaterial impact compared to under IAS 39.

The Group's other investments in debt instruments that are subject to the IFRS 9 impairment model are determined to be low credit risk at 31 March 2018. The Group intends to apply the low credit risk simplification in IFRS 9, which allows the Group to assume that there has not been a significant increase in credit risk since initial recognition of these assets, and therefore recognise a loss allowance for only 12-month expected credit losses as at 1 April 2018. The adjustment to the opening reserves in respect of this is not expected to be significant.

Hedge accounting

On initial application of IFRS 9, an entity may choose to continue to apply the hedge accounting requirements of IAS 39 instead of those of IFRS 9. The Group has elected to apply the IFRS 9 hedge accounting requirements because they more closely align with the Group's risk management policies.

An assessment of the Group's designated hedging relationships under IAS 39 has been performed and it has been determined that all would qualify as continuing hedge relationships under IFRS 9. However, in order to apply elective changes to the treatment of costs of hedging, certain relationships will be formally redesignated from the date of adoption. The Group is considering additional opportunities to apply hedge accounting under IFRS 9.

The Group does not anticipate the application of IFRS 9 hedge accounting requirements will have a material impact on the Group's consolidated financial statements.

1. Basis of preparation and recent accounting developments continued

ii) IFRS 15 'Revenue from Contracts with Customers'

IFRS 15 'Revenue from Contracts with Customers' is effective for National Grid for the year ending 31 March 2019. The new standard provides enhanced detail and a five-step revenue recognition approach to reflect the transfer of goods and services to customers.

The core principle of IFRS 15 is that an entity recognises revenue related to the transfer of promised goods or services when control of the goods or services passes to customers. The amount of revenue recognised should reflect the consideration to which the entity expects to be entitled in exchange for those goods or services.

This differs from the principle under the current revenue standard that requires an assessment of when risks and rewards of goods and services are transferred rather than control of those goods or services.

Detailed reviews of revenue arrangements in the UK and US have been undertaken prior to our transition to IFRS 15 on 1 April 2018. We will adopt the modified retrospective approach whereby the historical cumulative transition adjustment is reflected through retained earnings.

There are two types of revenue arrangements that will be impacted on transition to IFRS 15. The financial impacts and the transition adjustment to retained earnings are described further:

There are certain pass-through revenues (principally revenues collected on behalf of the Scottish and Offshore transmission operators) where the principal/agency assessment changes on transition to IFRS 15. In moving from a risk and reward model to a control model, we will no longer record our revenues collected on behalf of the Scottish and Offshore transmission operators as principal as we do not control the Scottish or Offshore transmission networks. If we had adopted IFRS 15 in 2017/18, both revenues and operating costs would have been £1,056 million lower, with no impact to profit as a result of this change. There will be no transition adjustment as a result of this change; and Across our subsidiaries in the UK and the US, our customers provide contributions for certain capital works (e.g. connections) which we continue to own on completion of the works. In our electricity business in the UK, we currently recognise customer contributions for connections over time as we have an ongoing contractual condition to maintain connections over their lives. In our UK Gas Transmission business, we recognise customer contributions when the connection is completed (the contractual conditions of the connection agreement do not explicitly require connections to be maintained over the life of the connection). In the US, revenue is also recognised when the connection is completed.

Under IFRS 15, connection contributions in our subsidiaries will be deferred and released into the income statement as revenue over the life of the network. We have reached this conclusion because our customers cannot benefit from a connection without the use of our utility network; access to our network through the connection is satisfied over time.

In the UK, we also have arrangements where our customers make contributions for diversions. These are currently deferred over the life of our network. Under IFRS 15, these revenues are recognised on completion of the diversion as there are no ongoing performance obligations to satisfy.

Had we adopted IFRS 15 in 2017/18, revenues would have been approximately £83 million lower, as revenues from connections in the US and in UK Gas Transmission that were recognised up-front would have been deferred over the life of the network. The decrease in profit after tax in our subsidiaries would have been £56 million.

The transition adjustment through retained earnings of £167 million will result in an increase to deferred revenues of approximately £240 million and a corresponding deferred tax impact of £73 million.

iii) IFRS 16 'Leases'

IFRS 16 'Leases' is effective for National Grid for the year ending 31 March 2020. The Group enters into a significant number of operating lease transactions. Under IFRS 16, our operating leases will be accounted for on the balance sheet as 'right-of-use' assets. This treatment will increase both our assets and liabilities and subsequently, will result in an increase in finance costs and depreciation and a reduction in operating costs. The outcome of our conclusions will have an impact on how we account for our operating leases. We are also performing an assessment of our revenue, service contracts and power purchase contracts to determine whether we have the right to use assets under those contracts and whether they fall within the scope of IFRS 16. We plan to apply IFRS 16 using the modified retrospective approach, whereby comparatives will not be restated on adoption of the new standard but instead a cumulative adjustment will be reflected in retained earnings.

iv) Other

In addition, the following new accounting standards and amendments to existing standards have been issued but are not yet effective or have not yet been endorsed by the EU:

- ✦ Amendments to IFRS 2 'Share-based payment';
- ✦ IFRIC 22 'Foreign Currency Transactions and Advance Consideration';
- ✦ IFRIC 23 'Uncertainty over Income Tax Treatments';
- ✦ Amendments to IAS 40 'Investment Property';
- ✦ Amendments to IAS 28: 'Investments in associates' – Long-term interests in associates and joint ventures;
- ✦ Annual Improvements to IFRS Standards 2015-2017 Cycle;
- ✦ IFRS 17 'Insurance Contracts'; and
- ✦ Amendments to IAS 19 'Employee Benefits'.

Effective dates remain subject to the EU endorsement process.

The Group is currently assessing the impact of the above standards, but they are not expected to have a material impact. The Group has not early adopted any other standard, amendment or interpretation that was issued but is not yet effective.

Notes to the consolidated financial statements
– analysis of items in the primary statements continued

2. Segmental analysis

This note sets out the financial performance for the year split into the different parts of the business (operating segments). The performance of these operating segments is monitored and managed on a day-to-day basis. Revenue and the results of the business are analysed by operating segment, based on the information the Board of Directors uses internally for the purposes of evaluating the performance of operating segments and determining resource allocation between operating segments. The Board is National Grid's chief operating decision maker (as defined by IFRS 8 'Operating Segments') and assesses the profitability of operations principally on the basis of operating profit before exceptional items and remeasurements (see note 4). As a matter of course, the Board also considers profitability by segment, excluding the effect of timing. However, the measure of profit disclosed in this note is operating profit before exceptional items and remeasurements as this is the measure that is most consistent with the IFRS results reported within these financial statements.

Our strategy in action

The Group owns a portfolio of businesses that range from businesses with high levels of investment and growth to cash generative developed assets with lower investment requirements (such as National Grid Metering, included within NGV and Other). The majority of revenue is generated from regulated operating segments in the UK and US. The Group works with its regulators to obtain agreements that balance the risks faced with the opportunity to deliver reasonable returns for investors. When investing in NGV and Other, the Group aims to leverage its core capabilities to deliver higher returns for investors. The regulated businesses earn revenue for the transmission, distribution and generation services they have provided during the year. In any one year, the revenue recognised may differ from that allowed under the Group's regulatory agreements and any such timing differences are adjusted through future prices. NGV and Other businesses earn revenue in line with their contractual terms.

The following table describes the main activities for each reportable operating segment:

UK Electricity Transmission	High-voltage electricity transmission networks in England and Wales
UK Gas Transmission	High-pressure gas transmission networks in Great Britain and LNG storage activities
US Regulated	Gas distribution networks, electricity distribution networks and high-voltage electricity transmission networks in New York and New England and electricity generation facilities in New York

NGV was formed on 1 April 2017 and brought together our businesses that are adjacent to our core regulated operations to create a new division with its own leadership. NGV is led by a member of the Group Executive Committee and its results are reported separately to the Board of Directors. This operating segment represents our key strategic growth area outside our regulated core business in competitive markets across the US and the UK. The business comprises all commercial operations in metering, LNG at the Isle of Grain in the UK and electricity interconnectors, with a focus on investment and future activities in emerging growth areas. NGV does not meet the thresholds set out in IFRS 8 to be identified as a separate reportable segment and therefore its results have not been disaggregated. The results of the businesses that now form NGV were previously reported in the Other activities segment and therefore, although the segment has been renamed NGV and Other, the results of previous periods have not been affected.

Other activities that do not form part of any of the segments in the above table or NGV primarily relate to UK property development together with insurance and corporate activities in the UK and US.

Discontinued operations in 2017 and 2016 comprise the profits and losses associated with the UK Gas Distribution business, up to and including the point at which it was sold to Quadgas HoldCo Limited (see note 9). In the current

year, transactions within discontinued operations relate solely to the business prior to the sale and the sale transaction itself.

Revenue primarily represents the sales value derived from the generation, transmission and distribution of energy, together with the sales value derived from the provision of other services to customers. It excludes value added (sales) tax and intra-group sales. Revenue includes an assessment of unbilled energy and transportation services supplied to customers between the date of the last meter reading and the year end. This is estimated based on historical consumption and weather patterns.

Where revenue exceeds the maximum amount permitted by a regulatory agreement, adjustments will be made to future prices to reflect this over-recovery. No liability is recognised, as such an adjustment relates to the provision of future services. Similarly, no asset is recognised where a regulatory agreement permits adjustments to be made to future prices in respect of an under-recovery. As part of our regulatory agreements we are entitled to recover certain costs directly from customers (pass-through costs). These amounts are included in the overall calculation of allowed revenue as stipulated by regulatory agreements and explained further in the unaudited commentary on pages 186–191.

Sales between operating segments are priced considering the regulatory and legal requirements to which the businesses are subject. The analysis of revenue by geographical area is on the basis of destination. There are no material sales between the UK and US geographical areas.

¹ Represents additions to property, plant and equipment and non-current intangibles but excludes additional investments in and loans to joint ventures and associates.

Included within NGV and Other are assets with a net book value of £1,454 million (2017: £1,432 million; 2016: £1,482 million), capital expenditure of £186 million (2017: £98 million; 2016: £93 million) and depreciation and amortisation of £143 million (2017: £143 million; 2016: £144 million) relating to NGV.

Total non-current assets other than financial instruments and pension assets located in the UK and US were £20,816 million and £27,663 million respectively as at 31 March 2018 (31 March 2017: UK £20,045 million, US £28,951 million; 31 March 2016: UK £26,261 million, US £23,774 million).

Unaudited commentary on the results of our principal operations by segment – continuing operations

Commentary on segmental adjusted operating profit results

Below we summarise the results of our operating segments. This analysis has been prepared based on adjusted operating profit (operating profit before exceptional items and remeasurements) as set out in note 2(b).

UK Electricity Transmission

For the year ended 31 March 2018, revenue in the UK Electricity Transmission segment decreased by £285 million to £4,154 million and adjusted operating profit decreased by £331 million to £1,041 million.

The revenue reduction of £285 million included a reduction in pass-through costs such as system balancing costs charged on to customers. Excluding pass-through costs, net revenue was £235 million lower, reflecting the absence of last year's recovery of outstanding timing balances along with higher adjustments this year to return the benefits of efficiencies and lower required outputs to customers. Regulated controllable costs were £35 million higher reflecting inflation, increased headcount and workload and initiative spend. Depreciation and amortisation was £54 million higher, reflecting the continued capital investment programme. Other costs were in line with the prior year.

Capital expenditure decreased by £28 million compared with last year to £999 million.

UK Gas Transmission

Revenue in the UK Gas Transmission segment increased by £11 million to £1,091 million and adjusted operating profit decreased by £24 million to £487 million.

After deducting pass-through costs, net revenue was £23 million lower than prior year. Increases in allowed revenues this year were more than offset by the end of certain legacy revenue allowances and the refund of prior year over-recoveries to customers. Regulated controllable costs were £9 million higher than last year, mainly as a result of higher employee numbers to deliver additional outputs. Depreciation and amortisation costs were £8 million higher, reflecting ongoing investment. Other operating costs were £16 million lower than last year, including the release of unused provisions relating to LNG plant closures.

Capital expenditure increased to £310 million, £96 million higher than last year, with increases in asset health spend and higher investment on compressor projects.

US Regulated

Revenue in our US Regulated business increased by £341 million to £9,272 million and adjusted operating profit decreased by £15 million to £1,698 million.

The weaker US dollar decreased revenue and operating profit in the year by £534 million and £102 million respectively. Excluding the impact of foreign exchange rate movements, revenue increased by £875 million. Of this increase, £597 million was due to increases in pass-through costs charged on to customers. Excluding pass-through costs, net revenue increased by £278 million at constant currency, reflecting increased revenue allowances under new rate plans in downstate New York and Massachusetts Electric, and the benefit of capital trackers.

We have incurred £142 million of major storm costs in 2017/18 including a sequence of heavy storms this winter causing substantial damage to our electricity networks. Separate from these costs, regulated controllable costs were broadly in line with last year at constant currency, and bad debt costs were £13 million lower. Depreciation and amortisation was £31 million higher this year at constant currency as a result of ongoing investment in our networks. Other operating costs were £34 million higher at constant currency, reflecting higher property taxes.

Capital expenditure in the US Regulated business increased to £2,424 million this year, £177 million more than in 2016/17. At constant currency, this represented a £311 million increase in investment driven by higher investment in new and replacement gas mains.

NGV and Other

Revenue in NGV and Other increased by £63 million to £776 million and adjusted operating profit increased by £54 million to £231 million. This reflects higher revenues and profit on disposal of property sites in the UK and lower levels of business change costs incurred, partially offset by lower auction revenues in the French Interconnector.

Capital expenditure in NGV and Other was £94 million higher than last year at £341 million, including the start of construction of a second French Interconnector and increases in smart meter installations in the UK.

Notes to the consolidated financial statements

3. Operating costs

Below we have presented separately certain items included in our operating costs from continuing operations. These include a breakdown of payroll costs (including disclosure of amounts paid to key management personnel) and fees paid to our auditors.

Rentals under operating leases are charged to the income statement on a straight-line basis over the term of the relevant lease.

	Before exceptional items and remeasurements			Exceptional items and remeasurements			Total

Services relating to corporate finance transactions not covered above ⁶	—	5.9	1.6
Other non-audit services not covered above ⁷	0.9	6.3	2.5
	1.9	17.3	8.9
Total auditors' remuneration	16.0	37.1	23.0

¹ Deloitte LLP became the Group's principal auditor for the year ended 31 March 2018. PricewaterhouseCoopers LLP (PwC) was the principal auditor for the years ended 31 March 2017 and 31 March 2016.

² Audit fees in each year represent fees for the audit of the Company's financial statements and regulatory reporting for the years ended 31 March 2018, 2017 and 2016.

Other services supplied represent fees payable for services in relation to other statutory filings or engagements that are required to be carried out by the auditors. In particular, this includes fees for reports under section 404 of the US Public Company Accounting Reform and Investor Protection Act of 2002 (Sarbanes-Oxley), audit reports on regulatory returns and the review of interim financial statements for the six-month periods ended 30 September 2017, 2016 and 2015 respectively.

⁴ There were no audit related fees as described in Item 16C(b) of Form 20-F.

Principally amounts relating to assurance services provided in relation to comfort letters for debt issuances. In 2016/17, amounts represented assurance services undertaken by PwC in relation to the sale of UK Gas Distribution and data assurance work in respect of financial information included in US rate filings.

⁶ Vendor due diligence and other transaction services in relation to the sale of UK Gas Distribution.

Fees for other non-audit services – projects including services provided to the UK Property business, relating to 7. evaluating possible options for the use of property assets. In 2016/17, services related principally to PwC assisting the Company with separation activities in relation to the sale of UK Gas Distribution.

For the year ended 31 March 2017, PwC contracted with Ofgem to assess the UK gas industry's readiness for the introduction of new settlement processes and systems. Fees for these services were paid by Xoserve Limited, a subsidiary of National Grid (until 31 March 2017), on behalf of the industry, under instruction from Ofgem. As PwC had no contract with or duty of care to Xoserve Limited, these amounts were not included above.

The Audit Committee considers and makes recommendations to the Board, to be put to shareholders for approval at each AGM, in relation to the appointment, re-appointment, removal and oversight of the Company's independent auditors. The Board of Directors, in accordance with a resolution approved at the 2016 AGM, is authorised to agree the auditors' remuneration. The Audit Committee considers and approves the audit fees on behalf of the Board in accordance with the Competition and Market Authority Audit Order 2014. The Board of Directors will seek to renew this authority at the 2018 AGM. Details of our policies and procedures in relation to non-audit services to be provided by the independent auditors are set out within page 55 of the Corporate Governance Report.

Certain services are prohibited from being performed by the external auditors under the Sarbanes-Oxley Act. Of the above services, none were prohibited.

Notes to the consolidated financial statements
– analysis of items in the primary statements continued

4. Exceptional items and remeasurements

To monitor our financial performance, we use a profit measure that excludes certain income and expenses. We call that measure ‘business performance’ or ‘adjusted profit’. We exclude items from business performance because, if included, these items could distort understanding of our performance for the year and the comparability between periods. This note analyses these items, which are included in our results for the year but are excluded from business performance.

Our financial performance is analysed into two components: business performance, which excludes exceptional items and remeasurements; and exceptional items and remeasurements. Business performance is used by management to monitor financial performance as it is considered that it improves the comparability of our reported financial performance from year to year. Business performance sub-totals are presented on the face of the income statement or in the notes to the financial statements.

Management utilises an exceptional items framework that has been discussed and approved by the Audit Committee. This follows a three-step process which considers the nature of the event, the financial materiality involved and any particular facts and circumstances. In considering the nature of the event, management focuses on whether the event is within the Group’s control and how frequently such an event typically occurs. In determining the facts and circumstances management considers factors such as ensuring consistent treatment between favourable and unfavourable transactions, precedent for similar items, number of periods over which costs will be spread or gains earned and the commercial context for the particular transaction.

Items of income or expense that are considered by management for designation as exceptional items include significant restructurings, write-downs or impairments of non-current assets, significant changes in environmental or decommissioning provisions, integration of acquired businesses, gains or losses on disposals of businesses or investments and significant debt redemption costs as a consequence of transactions such as significant disposals or issues of equity, and the related tax as well as deferred tax arising on changes to corporation tax rates.

Costs arising from restructuring programmes include redundancy costs. Redundancy costs are charged to the income statement in the year in which a commitment is made to incur the costs and the main features of the restructuring plan have been announced to affected employees.

Remeasurements comprise gains or losses recorded in the income statement arising from changes in the fair value of commodity contract derivatives and of derivative financial instruments to the extent that hedge accounting is not achieved or is not effective. These fair values increase or decrease because of changes in commodity and financial indices and prices over which we have no control.

4. Exceptional items and remeasurements continued

Operating exceptional items

2017/18

During the year, the Group reached an agreement with LIPA on an amount in final settlement of receivables and payables that arose following the cessation of the Management Services Agreement with LIPA in December 2013. The settlement has resulted in a gain of £26 million, which has been recorded as exceptional, consistent with the treatment of gains and losses on the original transaction.

In assessing the value of the Group's interests in Quadgas HoldCo Limited (the holding company for Cadent Gas) at 31 March 2018, the Company has considered the fair market value of its interests as implied by the agreement relating to the potential sale of a 25% interest in Quadgas HoldCo Limited (equity and shareholder loans), announced on 1 May 2018 and described in note 15.

The associated accounting implications are the recognition of a £110 million fair value gain on the Further Acquisition Agreement (FAA) which is detailed in the remeasurements section below and a £213 million impairment against the equity carrying value of investment in Quadgas HoldCo Limited. We have assessed the carrying value of all our interests in Quadgas HoldCo Limited (including the FAA derivative asset noted above) against the cash flows we expect to receive under the agreement for the 25% (comprising future dividends, shareholder loan interest income and the proceeds on exercise of the option arrangement plus a cost of carry), discounted to present value using an estimate of Quadgas Investments BidCo Limited's marginal cost of borrowing. Following the recognition of this charge, the total carrying value of our interests in Quadgas HoldCo Limited is £2.1 billion. Neither of these two accounting entries are taxable.

2016/17

In the US, the Group's most significant environmental liabilities relate to former manufacturing gas plant (MGP) facilities formerly owned or operated by the Group. The sites are subject to both state and federal law in the US. Environmental reserves are re-evaluated at each reporting period. The expenditure is expected to be largely recoverable from rate payers but, under IFRS, no asset can be recorded for this. During the second half of 2016/17, the Group updated its assessment of the gross remediation costs at three key sites in New York, resulting in an increase of £481 million on an undiscounted basis.

The charge booked reflects the Group's best estimate of future cash outflow, based on notices received from state and federal authorities, and plans developed in response, supported by external consultants where appropriate. In some cases, judgement is also required regarding the Group's share of the estimated cost, principally at sites where other parties are also potentially liable but where no cost sharing agreement exists.

Also included within the above are charges relating to the impact of a change in the real discount rate from 2% to 1% on our provisions.

A provision of £107 million was made for the demolition of certain non-operational gas holders in the UK. Following the disposal of UK Gas Distribution, the land on which the gas holders are sited was transferred to the Group's UK property division. The Group's property division maximises our return from our land portfolio and therefore a constructive obligation exists to demolish the gas holders.

Remeasurements

As described further in note 30(f), the FAA signed on 31 March 2017 relating to a 14% interest in the equity and shareholder loans of Quadgas HoldCo Limited is treated as a derivative at fair value through profit and loss. In assessing the fair value of this derivative at 31 March 2018, we have compared the pricing mechanism within the FAA against that of the agreement concerning our remaining 25% interest. The £110 million gain reflects the pricing

differential between the two contracts. At 31 March 2017, being the date on which the FAA was signed, the fair value was taken to be zero.

Commodity contract derivatives represent mark-to-market movements on certain physical and financial commodity contract obligations in the US. These contracts primarily relate to the forward purchase of energy for supply to customers, or to the economic hedging thereof, that are required to be measured at fair value and that do not qualify for hedge accounting. Under the existing rate plans in the US, commodity costs are recoverable from customers although the timing of recovery may differ from the pattern of costs incurred.

Net losses or gains on derivative financial instruments comprise losses or gains arising on derivative financial instruments reported in the income statement. These exclude gains and losses for which hedge accounting has been effective, which have been recognised directly in other comprehensive income or which are offset by adjustments to the carrying value of debt. Therefore, these are always excluded from business performance.

Net gains on financial instruments comprise the gains on financial instruments of Quadgas HoldCo Limited reported through their income statement.

Items included within tax

The Tax Cuts and Jobs Act (Tax Reform) which was enacted on 22 December 2017 reduced the US corporate rate from 35% to 21% with effect from 1 January 2018. Deferred taxes at the reporting date have been measured using these enacted tax rates. Since we are in a net deferred tax liability position in the US, this results in a deferred tax credit in the year. As described further in note 10, however, we expect the overall impact of Tax Reform to be economically neutral for the Group.

The Finance Act 2016 which was enacted on 15 September 2016 reduced the main rate of UK corporation tax to 17% with effect from 1 April 2020. Deferred tax balances have been calculated at this rate for the years ended 31 March 2017 and 31 March 2018.

The Finance Act 2015 (No. 2) was enacted on 18 November 2015 which reduced the main rate of UK corporation tax to 19% with effect from 1 April 2017 and 18% from 1 April 2020. Deferred tax balances were calculated at 18% for the year ended 31 March 2016.

Notes to the consolidated financial statements
– analysis of items in the primary statements continued

5. Finance income and costs

This note details the interest income generated by our financial assets and interest expense incurred on our financial liabilities. It also includes the net interest on our pensions and other post-retirement assets. In reporting business performance, we adjust net financing costs to exclude any net gains or losses on derivative financial instruments included in remeasurements. In addition, significant debt redemption costs are typically treated as exceptional (see note 4).

	Notes	2018 £m	2017 £m	2016 £m
Finance income				
Interest income on financial instruments:				
Bank deposits and other financial assets		81	28	22
Gains on disposal of available-for-sale investments		73	25	—
		154	53	22
Finance costs

Interest expense on financial liabilities held at amortised cost:				
Bank loans and overdrafts		(87)	(59)	(28)
Other borrowings		(1,030)	(927)	(792)
Derivatives		12	(8)	37
Unwinding of discount on provisions	24	(75)	(73)	(69)
Other interest		(11)	(17)	(27)
Less: interest capitalised ¹		128	109	112
		(1,128)	(1,082)	(878)
Remeasurements				
Net gains/(losses) on derivative financial instruments included in remeasurements²:				
Ineffectiveness on derivatives designated as:				
Fair value hedges ³		34	33	39
Cash flow hedges		10	(12)	(15)
Net investment hedges – undesignated forward rate risk		5	60	(34)
Derivatives not designated as hedges or ineligible for hedge accounting ⁴		180	(139)	(89)
		229	(58)	(99)
		(899)	(1,140)	(977)
Net finance costs from continuing operations		(745)	(1,087)	(955)

Interest on funding attributable to assets in the course of construction in the current year was capitalised at a rate of 4.1% (2017: 3.4%; 2016: 3.3%). In the UK, capitalised interest qualifies for a current year tax deduction with tax relief claimed of £20 million (2017: £18 million; 2016: £19 million). In the US, capitalised interest is added to the cost of plant and qualifies for tax depreciation allowances.

² Includes a net foreign exchange loss on financing activities of £314 million (2017: £264 million loss; 2016: £407 million loss) offset by foreign exchange gains and losses on derivative financial instruments measured at fair value.

³ Includes a net loss on instruments designated as fair value hedges of £90 million (2017: £27 million loss; 2016: £34 million gain) and a net gain of £124 million (2017: £60 million gain; 2016: £5 million gain) arising from fair value adjustments to the carrying value of debt.

⁴ Includes £110 million gain on the Further Acquisition Agreement (FAA) derivative financial instrument relating to the put/call option over a 14% interest in Quadgas HoldCo Limited. Further details can be found in note 15.

6. Tax

Tax is payable in the territories where we operate, mainly the UK and the US. This note gives further details of the total tax charge and tax liabilities, including current and deferred tax. The current tax charge is the tax payable on this year's taxable profits. Deferred tax is an accounting adjustment to provide for tax that is expected to arise in the future due to differences in the accounting and tax bases.

The tax charge for the period is recognised in the income statement, the statement of comprehensive income or directly in equity, according to the accounting treatment of the related transaction. The tax charge comprises both current and deferred tax.

Current tax assets and liabilities are measured at the amounts expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amounts are those that have been enacted or substantively enacted by the reporting date.

The Group operates internationally in territories with different and complex tax codes. Management exercises judgement in relation to the level of provision required for uncertain tax outcomes. There are a number of tax positions not yet agreed with the tax authorities where different interpretations of legislation could lead to a range of outcomes. Judgements are made for each position having regard to particular circumstances and advice obtained.

Deferred tax is provided for using the balance sheet liability method and is recognised on temporary differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases.

Deferred tax liabilities are generally recognised on all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. However, deferred tax assets and liabilities are not recognised if the temporary differences arise from the initial recognition of goodwill or from the initial recognition of other assets and liabilities in a transaction (other than a business combination) that affects neither the accounting nor the taxable profit or loss.

Deferred tax liabilities are recognised on taxable temporary differences arising on investments in subsidiaries and joint arrangements except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised, based on the tax rates and tax laws that have been enacted or substantively enacted by the reporting date.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be recovered. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company and its subsidiaries intend to settle their current tax assets and liabilities on a net basis.

Adjustment in respect of foreign tax rates	153	157	180	104	124	129
Deferred tax impact of change in UK tax rate	(7))(7))—	(94))—	(162)
Deferred tax impact of change in US tax rate due to Tax Reform	—	(1,510))—	—	—	—
Other ³	(42))1	(19))(23))(5))(8)
Total tax charge/(credit) from continuing operations	589	(884))666	374	604	427
	%	%	%	%	%	%
Effective tax rate – continuing operations	22.2	(32.6))23.7	17.1	25.0	18.3

1. Prior year adjustment is primarily due to agreement of prior period tax returns.
2. For the years ended 31 March 2017 and prior, the adjustments after exceptional items and remeasurements primarily represent the impact of the Group's net investment hedging following significant US dollar currency fluctuations.
3. Other primarily comprises tax on joint ventures and associates.

Factors that may affect future tax charges

The Finance Act 2016 which was enacted on 15 September 2016 reduced the main rate of UK corporation tax to 17% with effect from 1 April 2020. Deferred tax balances have been calculated at this rate.

We will continue to monitor the developments driven by Brexit, the OECD's Base Erosion and Profit Shifting (BEPS) project and European Commission initiatives including fiscal state aid investigations. At this time we do not expect this to cause any material impact on our future tax charges.

On 22 December 2017, the Tax Cuts and Jobs Act (Tax Reform) was signed into law in the US. The Tax Reform includes significant changes to various federal tax provisions applicable to National Grid. The most significant changes include the reduction in the corporate federal income tax rate from 35% to 21% effective 1 January 2018 and the elimination of bonus depreciation deduction on utility property, plant and equipment acquired after 27 September 2017 but allowance for the 100% expensing of non-utility property, plant and equipment. The reduction in the US corporate tax rate is the only item we would expect to materially impact our future effective tax rate.

6. Tax continued

Tax included within the statement of financial position

The following are the major deferred tax assets and liabilities recognised, and the movements thereon, during the current and prior reporting periods:

	Accelerated tax depreciation	Share- based payments	Pensions and other post- retirement benefits	Financial instruments	Other net temporary differences ¹	Total
	£m	£m	£m	£m	£m	£m
Deferred tax liabilities/(assets)						
At 1 April 2016	7,063	(14)(1,038)(53)(1,324)(4,634
Exchange adjustments and other ²	681	1	(144)(7)(50)(481
Charged/(credited) to income statement	402	—	177	23	(481)(121
Charged to other comprehensive income and equity	—	1	264	46	5	316
Disposal of UK Gas Distribution	(1,072)—	(6)—	5	(1,073)
At 1 April 2017	7,074	(12)(747)9	(1,845)(4,479
Exchange adjustments and other ²	(559)—	69	1	221	(268
(Credited)/charged to income statement	(1,641)2	(55)12	598	(1,084)
Charged/(credited) to other comprehensive income and equity	—	1	530	(1)(21)(509
At 31 March 2018	4,874	(9)(203)21	(1,047)(3,636

1. The deferred tax asset of £1,047 million as at 31 March 2018 in respect of other net temporary differences primarily relates to US net operating losses (£390 million) and environmental provisions (£378 million).

2. Exchange adjustments and other comprises of foreign exchange arising on translation of the US dollar deferred tax balances together with a reclassification of £43 million (2017: £143 million) being the opening deferred tax balance in respect of US net operating losses to offset against US current tax liabilities.

Deferred tax assets and liabilities are only offset where there is a legally enforceable right of offset and there is an intention to settle the balances net. The deferred tax balances (after offset) for statement of financial position purposes consist solely of deferred tax liabilities of £3,636 million (2017: £4,479 million). This balance is after offset of a deferred tax asset of £390 million (2017: £798 million) which has been recognised in respect of net operating losses. The deferred tax credited to the income statement of £1,084 million is after offset of a £293 million deferred tax charge in respect of net operating losses.

Deferred tax assets in respect of capital losses, trading losses and non-trade deficits have not been recognised as their future recovery is uncertain or not currently anticipated. The deferred tax assets not recognised are as follows:

	2018	2017
	£m	£m
Capital losses	510	362
Non-trade deficits	4	4
Trading losses	4	9

The capital losses arise in the UK and are available to carry forward indefinitely. However, the capital losses can only be offset against future capital gains. The UK non-trade deficits arose prior to 1 April 2017 and therefore can only be offset against future non-trade profits.

At 31 March 2018 there was no recognised deferred tax liability for taxes that would be payable on the unremitted earnings of the Group's subsidiaries or its associates as there are no significant corporation tax consequences of the Group's UK, US or overseas subsidiaries or associates paying dividends to their parent companies. There are also no significant income tax consequences for the Group attaching to the payment of dividends by the Group to its shareholders.

Unaudited commentary on tax

Tax strategy

National Grid is a responsible tax payer. Our approach to tax is consistent with the Group's broader commitments to doing business responsibly and upholding the highest ethical standards. This includes managing our tax affairs, as we recognise that our tax contribution supports public services and the wider economy. We endeavour to manage our tax affairs so that we pay and collect the right amount of tax, at the right time, in accordance with the tax laws in all the territories in which we operate. We will claim valid tax reliefs and incentives where these are applicable to our business operations, but only where they are widely accepted through the relevant tax legislation such as those established by government to promote investment, employment and economic growth.

We have a strong governance framework and our internal control and risk management framework helps us manage risks, including tax risk, appropriately. We take a conservative approach to tax risk. However, there is no prescriptive level or pre-defined limit to the amount of acceptable tax risk.

We act with openness and honesty when engaging with relevant tax authorities and seek to work with tax authorities on a real time basis. We engage proactively in developments on external tax policy and engage with relevant bodies where appropriate.

Ultimate responsibility and oversight of our tax strategy and governance rests with the Finance Committee, with executive management delegated to our Finance Director.

For more detailed information, please refer to our published global tax strategy on our website.

Total UK tax contribution (continuing and discontinued operations combined)

This year we have again disclosed additional information in respect of our total UK tax contribution for consistency and to aid transparency in an area in which there remains significant public interest. As was the case in prior years, the total amount of taxes we pay and collect in the UK year-on-year is significantly more than just the corporation tax which we pay on our UK profits. Within the total, we again include other taxes paid such as business rates and taxes on employment together with employee taxes and other indirect taxes.

The most significant amounts making up the 2017/18 total tax contribution are shown in the charts below:

For 2017/18 our total tax contribution to the UK Exchequer was £0.9 billion (2016/17: £1.5 billion), taxes borne in 2017/18 were £336 million (2016/17: £644 million) and taxes collected were £603 million (2016/17: £887 million). The fall in our total tax contribution against prior year is primarily due to the sale of the UK Gas Distribution business in the previous year, which reduced the overall size of the UK business. This reduction was expected and as such forecasted in the total UK tax contribution commentary included in our prior year accounts.

Our 2016/17 total tax contribution of £1.5 billion meant that National Grid was the 15th highest contributor of UK taxes (2015/16: 15th) based on the results of the 100 Group's 2017 Total Tax Contribution Survey (being the most recent available), a position commensurate with the size of our business and capitalisation during that year relative to other contributors to the survey. In 2016/17 we ranked 9th in respect of taxes borne (2015/16: 9th). Due to the sale of the UK Gas Distribution business on 31 March 2017, our ranking in future 100 Group surveys is expected to fall, commensurate with the ongoing size of the business.

National Grid's contribution to the UK economy is again broader than just the taxes it pays over to and collects on behalf of HMRC. The 100 Group's 2017 Total Tax Contribution Survey ranks National Grid in 3rd place in respect of UK capital expenditure on fixed assets, retaining 3rd place from 2016. National Grid's economic contribution also supports a significant number of UK jobs in our supply chain.

Unaudited commentary on tax continued

Tax transparency

The UK tax charge for the year disclosed in the financial statements in accordance with accounting standards and the UK corporation tax paid during the year will differ. To aid transparency we have included a reconciliation below of the tax charge per the income statement to the UK corporation tax paid in 2017/18.

The tax credit for the Group from continuing operations as reported in the income statement is £884 million (2016/17: £374 million charge). The UK tax charge is £250 million (2016/17: £151 million) and UK corporation tax paid was £37 million (2016/17: £129 million), with the principal differences between these two measures as follows:

	Year ended	
	31 March	
	2018	2017
	£m	£m
Reconciliation on continuing operations of UK total tax charge to UK corporation tax paid		
Total UK tax charge (current tax £187m (2017: £178m) and deferred tax charge £63m (2017: credit £27m))	250	151
Adjustment for non-cash deferred tax (charge)/credit	(63))27
Adjustments for current tax credit in respect of prior years	18	47
UK current tax charge	205	225
UK corporation tax instalment payments not payable until the following year	(101))216)
UK corporation tax instalment (refunds)/payments in respect of prior years paid in current year	(67))120
UK corporation tax paid	37	129

Tax losses

We have total unrecognised deferred tax assets in respect of losses of £518 million (2016/17: £375 million) of which £510 million (2016/17: £362 million) are capital losses in the UK as set out on page 120. These losses arose as a result of the disposal of certain businesses or assets and may be available to offset against future capital gains in the UK.

Development of future tax policy

We believe that the continued development of a coherent and transparent tax policy in the UK is critical to help drive growth in the economy.

We continue to contribute to research into the structure of business tax and its economic impact by contributing to the funding of the Oxford University Centre for Business Tax at the Saïd Business School.

We are a member of a number of industry groups which participate in the development of future tax policy, including the 100 Group, which represents the views of Finance Directors of FTSE 100 companies and several other large UK companies. Our Finance Director is Chairman of the 100 Group. This helps to ensure that we are engaged at the earliest opportunity on tax issues which affect our business. In the current year we have reviewed and responded to a number of HMRC consultations, the subject matter of which directly impacts taxes borne or collected by our business, with the aim of openly contributing to the debate and development of UK tax legislation. We undertake similar activities in the US, where the Company is an active member in the Edison Electric Institute, the American Gas Association and the Organization for International Investment.

7. Earnings per share (EPS)

EPS is the amount of post-tax profit attributable to each ordinary share. Basic EPS is calculated on profit for the year attributable to equity shareholders divided by the weighted average number of shares in issue during the year. Diluted EPS shows what the impact would be if all outstanding share options were exercised and treated as ordinary shares at year end. The weighted average number of shares is increased by additional shares issued as scrip dividends and reduced by shares repurchased by the Company during the year. The earnings per share calculations are based on profit after tax attributable to equity shareholders of the Company which excludes non-controlling interests.

Adjusted earnings and EPS, which exclude exceptional items and remeasurements, are provided to reflect the business performance sub-totals used by the Company. We have included reconciliations from this additional EPS measure to earnings for both basic and diluted EPS to provide additional detail for these items. For further details of exceptional items and remeasurements, see note 4.

Following the sale of the UK Gas Distribution business on 31 March 2017, National Grid plc returned approximately £3,170 million of proceeds to shareholders through a special dividend, paid on 2 June 2017. In order to maintain the comparability of the Company's share price before and after the special dividend, this was preceded by a share consolidation undertaken on 22 May 2017, replacing every 12 existing ordinary shares with 11 new ordinary shares. The weighted average number of ordinary shares outstanding for the period includes the effect of both the share consolidation and the special dividend from the date that the special dividend was paid. The associated share buyback programme which commenced on 2 June 2017 is now complete. Purchased shares are held as treasury shares.

8. Dividends

Dividends represent the return of profits to shareholders. Dividends are paid as an amount per ordinary share held. We retain part of the profits generated in the year to meet future growth plans and pay out the remainder in accordance with our dividend policy.

Interim dividends are recognised when they become payable to the Company's shareholders. Final dividends are recognised when they are approved by shareholders.

	2018			2017			2016		
	Pence per share	Cash dividend paid £m	Scrip dividend £m	Pence per share	Cash dividend paid £m	Scrip dividend £m	Pence per share	Cash dividend paid £m	Scrip dividend £m
Interim dividend in respect of the current year	15.49	346	176	15.17	540	32	15.00	532	31
Special dividend	84.375	3,171	—	—	—	—	—	—	—
Final dividend in respect of the prior year	29.10	970	33	28.34	923	151	28.16	805	248
	128.965	4,487	209	43.51	1,463	183	43.16	1,337	279

The Directors are proposing a final dividend for the year ended 31 March 2018 of 30.44p per share that will absorb approximately £1.0 billion of shareholders' equity (assuming all amounts are settled in cash). It will be paid on 15 August 2018 to shareholders who are on the register of members at 1 June 2018 (subject to shareholders' approval at the AGM). A scrip dividend will be offered as an alternative.

Following completion of the sale of the majority interest in UK Gas Distribution, the Company paid a special dividend on 2 June 2017 of 84.375p per existing ordinary share (\$5.4224 per existing American Depositary Share). This returned approximately £3,170 million to shareholders. No scrip dividend was offered as an alternative.

Unaudited commentary on dividends

Following the announcement of our dividend policy in March 2013, the Board remains confident that National Grid is able to support a dividend per share growing at least in line with RPI inflation for the foreseeable future, while continuing to invest as required in our regulated assets.

In August 2014 we began a share buyback programme that will allow us to offer the scrip dividend option for both the full year and interim dividend. The buyback programme is designed to balance shareholders' appetite for the scrip dividend option with our desire to operate an efficient balance sheet with appropriate leverage. At this stage we do not expect to buyback scrip issuances in 2019 and 2020, unless we have higher than anticipated balance sheet capacity.

9. Discontinued operations

Our results and cash flows of significant assets or businesses sold during the year are shown separately from our continuing operations. Assets and businesses are classified as held for sale when their carrying amounts are recovered through sale rather than through continuing use. It only meets the held for sale condition when the assets are ready for immediate sale in their present condition, management is committed to the sale and it is highly probable that the sale will complete within one year. Depreciation ceases on assets and businesses when they are classified as held for sale and the assets and businesses are impaired if the proceeds less sale costs fall short of the carrying value.

As a result of the sale of a 61% controlling interest in UK Gas Distribution on 31 March 2017, we are required to report our earnings for the Group excluding UK Gas Distribution ('continuing operations') separately from the results of that business, which we report within 'discontinued operations'. The gain recognised by the Group on sale is analysed in the detail of the note below. All costs associated with the transaction, including those associated with separation and setting up UK Gas Distribution are shown as a deduction from the proceeds received. Any adjustments arising as part of the completion adjustments finalised within the measurement period would result in a further gain or loss on disposal to be reported within discontinued operations in the current period.

Disposal of UK Gas Distribution

On 31 March 2017 the Group completed the disposal of a 61% equity interest in the UK Gas Distribution business, principally comprising the Group's equity and debt interests in National Grid Gas Distribution Limited together with certain other assets (principally property and a 45% interest in Xoserve Limited). Further details are included in the Annual Report and Accounts 2016/17.

The Group sold its 100% equity interest in UK Gas Distribution to Quadgas HoldCo Limited, a newly incorporated UK limited company 61% owned by Quadgas Investments BidCo Limited and 39% by the Group's subsidiary National Grid Holdings One plc. In exchange, the Group received cash consideration of £3,679 million, loan proceeds of £1,775 million and recognised a shareholder loan receivable of £429 million and a 39% equity interest in Quadgas HoldCo Limited.

The UK Gas Distribution business met the criteria to be classified as held for sale at 8 December 2016, the date that the Group initially entered into the sale agreement, and depreciation and amortisation (circa £25 million per month) on tangible and intangible fixed assets ceased from this date. The disposal of UK Gas Distribution resulted in a £5.3 billion gain on disposal. The provisional purchase price allocation reported in the Annual Report and Accounts 2016/17 has been finalised and there were no significant adjustments arising on finalisation of this exercise in the current year.

The business represented a reportable segment and a separate major line of business and accordingly was presented as a discontinued operation in the consolidated income statement, consolidated statement of comprehensive income and the consolidated cash flow statement in 2016/17.

In 2017/18 a loss of £41 million is reported in discontinued operations, with £33 million relating to the completion accounts settlement in November 2017. In addition, this reflects a net charge of £8 million representing further transaction costs and gains principally relating to the reversal of provisions.

In addition, there was a cash outflow from operating activities of £207 million related to the utilisation of provisions, principally relating to payments of professional fees in respect of the disposal of the UK Gas Distribution business. Net cash flows used in financing activities were £231 million for the settlement of RPI swaps relating to the final stages of the Group-wide liability management programme executed as part of the sale process (2017: cash flows comprising £4.8 billion of debt issued and term debt raised, offset by £3.2 billion in respect of bond buybacks).

On 1 May 2018, the Group announced that it had entered into an agreement with Quadgas Investments BidCo Limited regarding the potential sale of its remaining 25% interest in Quadgas HoldCo Limited. Further details are given in notes 4, 15 and 35.

9. Discontinued operations continued

Summary income statement – discontinued operations

The summary income statement for discontinued operations for the years ended 31 March 2017 and 2016 are as follows:

	2017	2016
	£m	£m
Revenue	1,887	1,903
Operating costs	(993)	(1,043)
Operating profit ¹	894	860
Finance costs	(152)	(157)
Profit before tax from discontinued operations	742	703
Tax from discontinued operations	(79)	(11)
Profit after tax from discontinued operations	663	692
Gain on disposal of UK Gas Distribution	5,009	—
Tax on gain on disposal of UK Gas Distribution	312	—
Gain on disposal of UK Gas Distribution after tax	5,321	—
Total profit after tax from discontinued operations	5,984	692

¹ 2016 includes sale preparation costs of £22 million in respect of the disposal of the UK Gas Distribution business.

¹ 2017 costs have been included as part of transaction costs in determining the gain on disposal.

The total gain on the disposal after tax of £5,321 million was comprised of total consideration of £7,494 million before transaction costs of £1,837 million and a tax credit of £312 million compared to net assets on disposal of £648 million.

Statement of comprehensive income – discontinued operations for the years ended 31 March

		2017	2016

Other comprehensive income/(loss) for the year, net of tax from discontinued operations		42	71
Total comprehensive income for the year from discontinued operations		6,026	763

10. Goodwill

Goodwill represents the excess of what we paid to acquire businesses over the fair value of their net assets at the acquisition date. We assess whether goodwill is recoverable each year by performing an impairment review.

Goodwill is recognised as an asset and is not amortised, but is tested for impairment annually or more frequently if events or changes in circumstances indicate a potential impairment. Any impairment is recognised immediately in the income statement and is not subsequently reversed.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing exchange rate.

Goodwill is allocated to cash-generating units and this allocation is made to those cash-generating units that are expected to benefit from the business combination in which the goodwill arose.

Impairment is recognised where there is a difference between the carrying value of the cash-generating unit and the estimated recoverable amount of the cash-generating unit to which that goodwill has been allocated. Any impairment loss is first allocated to the carrying value of the goodwill and then to the other assets within the cash-generating unit. Recoverable amount is defined as the higher of fair value less costs to sell and estimated value-in-use at the date the impairment review is undertaken.

Value-in-use represents the present value of expected future cash flows, discounted using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

Impairments are recognised in the income statement and are disclosed separately.

	Total £m
Net book value at 1 April 2016	5,315
Exchange adjustments	781
Net book value at 31 March 2017	6,096
Exchange adjustments	(652)
Net book value at 31 March 2018	5,444

The cost of goodwill at 31 March 2018 was £5,458 million (2017: £6,112 million) with an accumulated impairment charge of £14 million (2017: £16 million).

The amounts disclosed above as at 31 March 2018 include balances relating to the following cash-generating units: New York £3,137 million (2017: £3,512 million); Massachusetts £1,173 million (2017: £1,313 million); Rhode Island £436 million (2017: £488 million); and Federal £699 million (2017: £783 million).

Goodwill is reviewed annually for impairment and the recoverability of goodwill has been assessed by comparing the carrying amount of our operations described above (our cash-generating units) with the expected recoverable amount on a value-in-use basis. In each assessment, the value-in-use has been calculated based on five-year plan projections that incorporate our best estimates of future cash flows, customer rates, costs (including changes in commodity prices), future prices and growth. Such projections reflect our current regulatory rate plans taking into account regulatory arrangements to allow for future rate plan filings and recovery of investment. Our plans have proved to be reliable guides in the past and the Directors believe the estimates are appropriate.

The future economic growth rate used to extrapolate projections beyond five years is 2.3% (2017: 2.0%). The growth rate has been determined having regard to data on projected growth in US real gross domestic product (GDP). Based

on our business' place in the underlying US economy, it is appropriate for the terminal growth rate to be based upon the overall growth in real GDP and, given the nature of our operations, to extend over a long period of time. Cash flow projections have been discounted to reflect the time value of money, using a post-tax discount rate of 5.3% (2017: 5.4%). The equivalent pre-tax discount rate is 5.3% (2017: 5.4%) as no cash tax is payable in our five-year plan projections. The discount rate represents the estimated weighted average cost of capital of these operations.

In reaching this conclusion, the Directors have considered the potential future consequences regarding the manner in which Tax Reform will impact the Group and its future cash flows. The full implications of the new legislation on earnings and cash flows are still being reviewed, and will depend on the outcome of discussions with regulators.

In our US business, we are subject to federal and state taxes, however our regulatory arrangements require us to pass this cost back to our customers. The reduction in the corporation tax rate from 35% to 21% will be reflected through lower bills to customers, reducing our revenues (and tax costs) in future periods. For the purposes of the goodwill impairment exercise, we have reflected the lower billing levels through lower revenue forecasts as well as lower tax charges.

Historically, as a result of tax losses arising from claiming accelerated depreciation allowances, we have not paid substantial amounts of tax in the US. Accordingly, for IFRS purposes, we have recognised significant deferred tax liabilities in respect of these accelerated allowances. In accounting terms, Tax Reform triggers the remeasurement of our deferred tax liabilities from 35% to 21% which has resulted in the exceptional gain under IFRS (as disclosed in notes 4 and 6). However, the impact for our US business is that the amounts we have previously received from customers assuming a 35% federal tax rate must now be returned to customers. The precise manner and timing over which this occurs remains subject to agreement with our regulators. We are currently in discussions with regulators as to how best to adjust the customer bills for this purpose, and over what time period.

Offsetting this change will be the additional income we earn, since the rate base will grow faster. (Our rate base is net of deferred tax liabilities, which, as a result of Tax Reform, will now be smaller.) In overall terms we expect the outcome to be economically neutral.

In assessing the carrying value of goodwill, we have sensitised our forecasts to factor in a reduction in revenues and lower tax costs into our cash flow forecasts, but not reflected the impact of additional rate base growth on future earnings. While it is possible that a key assumption in the calculation could change, the Directors believe that no reasonably foreseeable change would result in an impairment of goodwill, in view of the long-term nature of the key assumptions and the margin by which the estimated value-in-use exceeds the carrying amount.

Notes to the consolidated financial statements
– analysis of items in the primary statements continued

11. Other intangible assets

Other intangible assets include software which is written down (amortised) over the length of period we expect to receive a benefit from the asset.

Identifiable intangible assets are recorded at cost less accumulated amortisation and any provision for impairment. Other intangible assets are tested for impairment only if there is an indication that the carrying value of the assets may have been impaired. Impairments of assets are calculated as the difference between the carrying value of the asset and the recoverable amount, if lower. Where such an asset does not generate cash flows that are independent from other assets, the recoverable amount of the cash-generating unit to which that asset belongs is estimated. Impairments are recognised in the income statement and are disclosed separately. Any assets which suffered impairment in a previous period are reviewed for possible reversal of the impairment at each reporting date.

Internally generated intangible assets, such as software, are recognised only if: an asset is created that can be identified; it is probable that the asset created will generate future economic benefits; and the development cost of the asset can be measured reliably. Where no internally generated intangible asset can be recognised, development expenditure is recorded as an expense in the period in which it is incurred.

Other intangible assets are amortised on a straight-line basis over their estimated useful economic lives. Amortisation periods for categories of intangible assets are:

	Years
Software	3 to 10

	Software £m
Cost at 1 April 2016	1,744
Exchange adjustments	105
Additions	234

Accumulated amortisation at 31 March 2018	(898)
Net book value at 31 March 2018 ²	899

Net book value at 31 March 2017 923

1. Reclassifications includes amounts transferred (to)/from property, plant and equipment (see note 12).

2. Included in software is £160 million relating to the US ERP system, which still has a remaining amortisation period of six years.

128 National Grid Annual Report and Accounts 2017/18 Financial Statements | Notes to the consolidated financial statements

12. Property, plant and equipment

The following note shows the physical assets controlled by us. The cost of these assets primarily represents the amount initially paid for them. This includes both their purchase price and the construction and other costs associated with getting them ready for operation. A depreciation expense is charged to the income statement to reflect annual wear and tear and the reduced value of the asset over time. Depreciation is calculated by estimating the number of years we expect the asset to be used (useful economic life) and charging the cost of the asset to the income statement equally over this period.

Our strategy in action

We operate an energy networks business and therefore have a significant physical asset base. We continue to invest in our networks to maintain reliability, create new customer connections and ensure our networks are flexible and resilient. Our business plan envisages these additional investments will be funded through a mixture of cash generated from operations and the issue of new debt.

Property, plant and equipment is recorded at cost, less accumulated depreciation and any impairment losses.

Cost includes the purchase price of the asset, any payroll and finance costs incurred which are directly attributable to the construction of property, plant and equipment as well as the cost of any associated asset retirement obligations.

Property, plant and equipment includes assets in which the Group's interest comprises legally protected statutory or contractual rights of use. Additions represent the purchase or construction of new assets, including capital expenditure for safety and environmental assets, and extensions to, enhancements to, or replacement of existing assets. All costs associated with projects or activities which have not been fully commissioned at the period end are classified within assets in the course of construction.

Contributions received prior to 1 July 2009 towards the cost of property, plant and equipment are included in trade and other payables as deferred income and credited on a straight-line basis to the income statement over the estimated useful economic lives of the assets to which they relate.

Contributions received post 1 July 2009 are recognised in revenue immediately, except where the contributions are consideration for a future service, in which case they are recognised initially as deferred income and revenue is subsequently recognised over the period in which the service is provided.

No depreciation is provided on freehold land or assets in the course of construction.

Other items of property, plant and equipment are depreciated, on a straight-line basis, at rates estimated to write off their book values over their estimated useful economic lives. In assessing estimated useful economic lives, consideration is given to any contractual arrangements and operational requirements relating to particular assets. The assessments of estimated useful economic lives and residual values of assets are performed annually. Unless otherwise determined by operational requirements, the depreciation periods for the principal categories of property, plant and equipment are, in general, as shown in the table below:

	Years
Freehold and leasehold buildings	up to 101
Plant and machinery:	
Electricity transmission plant and wires	15 to 100
Electricity distribution plant	29 to 75
Electricity generation plant	20 to 93
Interconnector plant and other	5 to 60
Gas plant – mains, services and regulating equipment	10 to 95
Gas plant – storage	5 to 65

Gas plant – meters 7 to 65
Motor vehicles and office equipment up to 29

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within operating profit in the income statement.

Items within property, plant and equipment are tested for impairment only if there is some indication that the carrying value of the assets may have been impaired.

Impairments of assets are calculated as the difference between the carrying value of the asset and the recoverable amount, if lower. Where such an asset does not generate cash flows that are independent from other assets, the recoverable amount of the cash-generating unit to which that asset belongs is estimated.

Impairments are recognised in the income statement and if immaterial are included within depreciation charge for the year.

Any assets which suffered impairment in a previous period are reviewed for possible reversal of the impairment at each reporting date.

Prepayments and accrued income	28	24
	115	69

¹ Comparative amounts have been represented to reflect the reclassification of commodity derivative contracts from other non-current assets to derivatives (see note 16).

14. Financial and other investments

Financial and other investments include three main categories. Assets classified as available-for-sale typically represent investments in short-term money funds and quoted investments in equities or bonds of other companies. The second category comprises long-term loans to our associates and joint ventures. The third category is other loans and receivables which includes bank deposits with a maturity of greater than three months, and cash balances that cannot be readily used in operations, principally collateral pledged against derivative holdings.

Financial assets, liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into, and recognised on trade date. Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any other categories.

Available-for-sale financial investments are recognised at fair value plus directly related incremental transaction costs, and are subsequently carried at fair value in the statement of financial position. Changes in the fair value of available-for-sale investments are recognised directly in other comprehensive income, until the investment is disposed of or is determined to be impaired. At this time the cumulative gain or loss previously recognised in equity is included in the income statement for the period. Investment income is recognised using the effective interest method and taken through interest income in the income statement.

Loans receivable and other receivables are initially recognised at fair value plus transaction costs and subsequently held at amortised cost using the effective interest method. Interest income, together with gains and losses when the loans and receivables are derecognised or impaired, are recognised in the income statement.

Subsequent to initial recognition, the fair values of financial assets measured at fair value that are quoted in active markets are based on bid prices. When independent prices are not available, fair values are determined by using valuation techniques that are consistent with techniques commonly used by the relevant market. The techniques use observable market data.

	2018	2017

Collateral ⁴	335	1,262
Other	49	44
	3,593	9,841

¹ Comprises £352 million (2017: £434 million) relating to a shareholder loan to Quadgas HoldCo Limited, and the remainder is a loan to a joint venture.

² Includes £69 million (2017: £14 million) held by insurance captives and therefore restricted.

³

Includes restricted amounts of £301 million (2017: £434 million) held by insurance captives and £214 million (2017: £225 million) relating to US non-qualified plan investments.

4. Refers to collateral placed with counterparties with whom we have entered into a credit support annex to the ISDA (International Swaps and Derivatives Association) Master Agreement.

Available-for-sale investments are recorded at fair value. The carrying value of current loans and receivables is approximate to their fair values, due to short-dated maturities. The carrying value of the non-current loans to joint ventures and associates approximates their fair values as at 31 March 2018 and 31 March 2017. The exposure to credit risk at the reporting date is the fair value of the financial investments. For further information on our credit risk, refer to note 30(a). None of the financial investments are impaired.

Unaudited commentary on financial and other investments

Current available-for-sale investments at 31 March 2018 were £5,128 million lower than the prior year. The balance at 31 March 2017 included the proceeds received from the sale of the UK Gas Distribution business. £4,010 million of these proceeds were distributed in the current year through the special dividend and share buyback.

Notes to the consolidated financial statements
– analysis of items in the primary statements continued

15. Investments in joint ventures and associates

Investments in joint ventures and associates represent businesses we do not control, but instead exercise joint control or significant influence.

A joint venture is an arrangement established to engage in economic activity, which the Group jointly controls with other parties and has rights to the net assets of the arrangement. An associate is an entity which is neither a subsidiary nor a joint venture, but over which the Group has significant influence.

	2018			2017

A list of joint ventures and associates including the name and proportion of ownership is provided in note 32.

Further information on the Group's acquisition of an associate interest in Quadgas HoldCo Limited is provided in note 9 and opposite.

On 1 May 2018, the Group announced that it had entered into the Remaining Acquisition Agreement (RAA) with Quadgas Investments BidCo Limited (the Consortium) regarding the potential sale of its remaining 25% interest in Quadgas HoldCo Limited, the holding company for Cadent Gas Limited. The RAA contains both put and call options for both the Group and the Consortium that can be exercised in the period between 1 March 2019 and 31 October 2019 (subject to giving six months' notice) for cash proceeds of approximately £1.2 billion.

The nature of the contractual arrangements in the RAA are substantially the same as those within the Further Acquisition Agreement (FAA), which also contains put and call options that can be exercised by either party during the same time-frame.

The carrying value of the Group's equity interest in Quadgas HoldCo Limited at 31 March 2017 was £1.6 billion, reflecting our best estimate of the fair value of that stake, as it was treated as an asset acquired at fair value following the disposal of a controlling interest in the UK Gas Distribution business.

As set out in note 16, at 31 March 2018 we recognised a derivative financial asset of £110 million relating to the FAA agreement. In addition, an impairment review of the Group's interests in Quadgas HoldCo Limited, (comprising the FAA derivative, a 39% equity interest and £352 million in shareholder loans), was undertaken, comparing the

aggregated carrying value of these interests against the future dividend income and proceeds we would expect to receive under the FAA and RAA. This resulted in a charge of £213 million, recorded as impairment against the carrying value of the equity. The impairment largely offsets pension accounting gains, and the recognition of the FAA derivative asset.

Following recognition of the FAA derivative asset and the impairment charge, the aggregate carrying value of Group's interests associated with Quadgas HoldCo Limited is £2.1 billion, which is close to our original assessment of fair market value as determined at 31 March 2017. Of this, £1.6 billion relates to our equity interest.

In 2017 the Group first entered into an arrangement with San Francisco-based Sunrun Neptune Investor 2016 LLC, a leading US provider of residential solar energy systems to provide investment capital. In the period to 31 March 2018, the Group invested £38 million (2017: £41 million) alongside Sunrun into a newly incorporated partnership vehicle. The investment is classified as an associate as the Group has significant influence over the activities of the partnership vehicle. The fair value gain on this investment of £7 million has been reflected within the share of post-tax results for the year.

The joint ventures and associates have no significant contingent liabilities to which the Group is exposed, and the Group has no significant contingent liabilities in relation to its interests in the joint ventures and associates. The Group has capital commitments of £120 million (2017: £235 million) in relation to joint ventures.

Outstanding balances with joint ventures and associates are shown in note 29.

At 31 March 2018, the Group had one material joint venture, being its 50% equity stake in BritNed Development Limited, and one material associate being its 39% equity stake in Quadgas HoldCo Limited.

15. Investments in joint ventures and associates continued

BritNed Development Limited (joint venture)

BritNed Development Limited is a joint venture with transmission system operator TenneT and operates the subsea electricity link between Great Britain and the Netherlands, commissioned in 2011.

BritNed Development Limited has a reporting period end of 31 December with monthly management reporting information provided to National Grid. Summarised financial information of this joint venture, as at 31 March, together with the carrying amount of the investment in the consolidated financial statements is as follows:

	2018	2017
	£m	£m
Statement of financial position – BritNed Development Limited		
Non-current assets	390	392
Cash and cash equivalents	50	45

Profit for the year	72	106
Group's share of profit (National Grid ownership 50%)	36	53

Quadgas HoldCo Limited (associate)

As set out in note 9, on disposal of the Group's interest in the UK Gas Distribution business, the Group retained an equity interest in UK Gas Distribution through its parent, Quadgas HoldCo Limited, and a shareholder loan asset of £0.4 billion (see note 14).

The Group has the power to appoint 4 of the 12 members of the board of Quadgas HoldCo Limited, which confers significant influence, but not joint control. In general, the key strategic, operational and financial decisions can be effected by a simple majority of votes. However, in limited circumstances, certain decisions require the consent of both parties. While these circumstances are not expected to occur regularly, given the rights conferred, and in view of the Group's equity stake, the investment has been accounted for as an equity investment in an associate.

The Group initially recognised its 39% interest in Quadgas HoldCo Limited at fair value, being the market price of the investment as at 31 March 2017. The FAA was signed concerning a 14% interest in Quadgas HoldCo Limited, which contains put and call options for both the Group and the Consortium that can be exercised in the period between 1 March 2019 and 31 October 2019. The FAA is accounted for as a derivative financial instrument (see notes 16 and 30(f)).

Quadgas HoldCo Limited is an unlisted entity, and so no quoted price exists. The fair value on initial recognition was determined with reference to the equity value of the business implicit in the sale transaction, adjusted to reflect a deduction for the estimated premium paid for control by the Consortium. In assigning value to the retained interests,

the Group valued 14% of its 39% interest based on the price implied by the FAA. The deduction for control premium was applied to the residual 25% interest.

15. Investments in joint ventures and associates continued

The Group has completed a purchase price allocation exercise for its interest in Quadgas HoldCo Limited. There were adjustments arising from the finalisation of the purchase price allocation. A £33 million loss was recognised relating to the completion accounts settlement, resulting in a £20 million payment being made to Quadgas BidCo Limited.

The fair values of the assets and liabilities of Quadgas HoldCo Limited as at 31 March 2017, as previously reported, are set out below, along with the reconciliation to the carrying value of the investment in the associate at that date:

	2017
	£m
Statement of financial position – Quadgas HoldCo Limited (as previously reported)	
Non-current assets	15,559
Current assets	299
Non-current liabilities	(10,408)
Current liabilities	(519)
Equity	4,931
Proportion of the Group's ownership interest in associate	1,923
Discount for non-controlling interest	(312)
Carrying amount of the Group's interest in associate (National Grid ownership 39%)	1,611
Summarised financial information of this associate (incorporating the purchase price allocation completion adjustments), as at 31 March, together with the carrying amount of the investment in the consolidated financial statements is as follows:	

	2018	2017

16. Derivative financial instruments

Derivatives are financial instruments that derive their value from the price of an underlying item such as interest rates, foreign exchange rates, credit spreads, commodities, equity or other indices. In accordance with Board approved policies, derivatives are transacted generally to manage our exposure to fluctuations in interest rate, foreign exchange and our operational market risks from our commodity activities. Our derivatives are split into the broad categories analysed below:

- derivatives managing risks to interest rate and foreign exchange rate. Specifically we use these derivatives to manage risks from the financing portfolio, to optimise the overall cost of accessing the debt capital markets, managing the exposure to holdings in foreign operations and other contractual operational cash flows; and
- derivatives managing our price and supply risks from our commodity activity.

Derivative financial instruments are initially recognised at fair value and subsequently remeasured to fair value at each reporting date. Changes in fair values are recorded in the period they arise, in either the income statement or other comprehensive income as required by IAS 39. Where the gains or losses recorded in the income statement arise from changes in the fair value of commodity contract derivatives and of derivative financial instruments to the extent that hedge accounting is not achieved or is not effective, these are recorded as remeasurements, detailed in notes 4 and 5. Where the fair value of a derivative is positive it is carried as a derivative asset, and where negative as a derivative liability.

The total fair value of derivatives split by category is as follows:

	2018			2017		
	Assets £m	Liabilities £m	Total £m	Assets £m	Liabilities £m	Total £m
Financing derivatives	1,545	(945))600	1,707	(2,223))(516)
Commodity derivatives ¹	69	(116))(47)	106	(170))(64)
Further Acquisition Agreement derivative ²	110	—	110	—	—	—
	1,724	(1,061))663	1,813	(2,393))(580)

Comparative amounts have been re-presented to reflect the reclassification of commodity derivative contracts from trade and other receivables (31 March 2017: £54 million), trade and other payables (31 March 2017: £93 million), other non-current assets (31 March 2017: £52 million) and other non-current liabilities (31 March 2017: £77 million), to current and non-current derivative financial assets and derivative financial liabilities.

This year a further derivative category has been added for the Further Acquisition Agreement (FAA) derivative.
2. This relates to the put/call option over a 14% interest in Quadgas HoldCo Limited. Refer to note 15 for further details.

(a) Financing derivatives

We calculate fair value of the financial derivatives by discounting all future cash flows using the market yield curve at the reporting date. The market yield curve for each currency is obtained from external sources for interest and foreign exchange rates. In the absence of sufficient market data, fair values would be based on the quoted market price of similar derivatives. Analysis of these derivatives and the various methods used to calculate their respective fair values is detailed below and in note 30.

For each class of financing derivative instrument type the fair value amounts are as follows:

	2018			2017		
	Assets £m	Liabilities £m	Total £m	Assets £m	Liabilities £m	Total £m
Interest rate swaps	678	(457))221	849	(657))192
Cross-currency interest rate swaps	687	(207))480	676	(909))(233)
Foreign exchange forward contracts ¹	174	(2))172	160	(113))47

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Inflation linked swaps	5	(278)	(273)	7	(529)	(522)
Equity options	1	(1)	—		15	(15)	—	
	1,545	(945)	600		1,707	(2,223)	(516)

1. Included within the foreign exchange forward contracts balance is £67 million (2017: £69 million) of derivatives in relation to hedging of capital expenditure.

The maturity profile of financing derivative instruments is as follows:

	2018			2017						
	Assets £m	Liabilities £m	Total £m	Assets £m	Liabilities £m	Total £m				
Current										
Less than 1 year	375	(325)	50	192	(1,054)	(862)

Financial Statements | Notes to the consolidated financial statements National Grid Annual Report and Accounts 2017/18 135

Notes to the consolidated financial statements
– analysis of items in the primary statements continued

16. Derivative financial instruments continued

(a) Financing derivatives continued

For each class of financing derivative the notional contract¹ amounts are as follows:

	2018	2017
	£m	£m
Interest rate swaps	(8,390)	(9,469)
Cross-currency interest rate swaps	(6,925)	(8,631)
Foreign exchange forward contracts	(5,793)	(8,253)
Inflation linked swaps	(1,191)	(1,423)
Equity options	(800)	(800)
	(23,099)	(28,576)

1. The notional contract amounts of derivatives indicate the gross nominal value of transactions outstanding at the reporting date.

(b) Commodity risk

We purchase electricity and gas to supply our customers in the US and to meet our own energy needs. Substantially all our costs of purchasing electricity and gas for supply to customers are recoverable at an amount equal to cost. The timing of recovery of these costs can vary between financial periods leading to an under- or over-recovery within any particular year that can lead to large fluctuations in the income statement. We follow approved policies to manage price and supply risks for our commodity activities.

Our energy procurement risk management policy and delegations of authority govern our US commodity trading activities for energy transactions. The purpose of this policy is to ensure we transact within pre-defined risk parameters and only in the physical and financial markets where we or our customers have a physical market requirement. In addition, state regulators require National Grid to manage commodity risk and cost volatility prudently through diversified pricing strategies. In some jurisdictions we are required to file a plan outlining our strategy to be approved by regulators. In certain cases we might receive guidance with regard to specific hedging limits.

Energy purchase contracts for the forward purchase of electricity or gas that are used to satisfy physical delivery requirements to customers, or for energy that the Group uses itself, meet the expected purchase or usage requirements of IAS 39. They are, therefore, not recognised in the financial statements until they are realised. Disclosure of commitments under such contracts is made in note 28.

US states have introduced a variety of legislative requirements with the aim of increasing the proportion of our electricity that is derived from renewable or other forms of clean energy. Annual compliance filings regarding the level of Renewable Energy Certificates (and other similar environmental certificates) are required by the relevant department of utilities. In response to the legislative requirements, National Grid has entered into long-term, typically fixed-price, energy supply contracts to purchase both renewable energy and environmental certificates. We are entitled to recover all costs incurred under these contracts through customer billing.

Under IFRS, where these supply contracts are not accounted for as finance leases, they are considered to comprise two components, being a forward purchase of power at spot prices, and a forward purchase of environmental certificates at a variable price (being the contract price less the spot power price). With respect to our current contracts, neither of these components meets the requirement to be accounted for as a derivative. The environmental certificates are currently required for compliance purposes, and at present there are no liquid markets for these attributes.

Accordingly, this component meets the expected purchase or usage requirements of IAS 39. We expect to enter into an increasing number of these contracts, in order to meet our compliance requirements in the short to medium term. It is possible that in future, if and when liquid markets develop, and to the extent that we are in receipt of environmental certificates in excess of our required levels, this exemption may cease to apply and we may be required to account for forward purchase commitments for environmental certificates as derivatives at fair value through profit and loss.

Some forward contracts for the purchase of commodities do not meet the exemption for accounting purposes and hence are accounted for as derivatives. We also enter into derivative financial instruments linked to commodity prices, including index-linked futures, swaps, and option contracts. These derivative financial instruments are used to manage market price volatility and are carried at fair value on the statement of financial position, with the mark-to-market changes reflected through remeasurements.

For each class of commodity contract derivative type, the fair value amounts are as follows:

	2018			2017		
	Assets £m	Liabilities £m	Total £m	Assets £m	Liabilities £m	Total £m
Commodity purchase contracts accounted for as derivative contracts						
Forward purchases of electricity	—	—	—	—	(10)	(10)
Forward purchases of gas	60	(64)	(4)	82	(97)	(15)
Derivative financial instruments linked to commodity prices						
Electricity capacity	1	—	1	2	—	2
Electricity swaps	7	(46)	(39)	11	(61)	(50)
Electricity options	—	(1)	(1)	—	—	—
Gas swaps	1	(4)	(3)	11	(2)	9
Gas options	—	(1)	(1)	—	—	—
	69	(116)	(47)	106	(170)	(64)

16. Derivative financial instruments continued

(b) Commodity risk continued

The maturity profile of commodity contracts is as follows:

	2018			2017		
	Assets £m	Liabilities £m	Total £m	Assets £m	Liabilities £m	Total £m
Current						
Less than one year	30	(76))(46)	54	(93)	(39)
	30	(76))(46)	54	(93)	(39)
Non-current						
In 1 to 2 years	6	(17))(11)	8	(36)	(28)
In 2 to 3 years	6	(11))(5)	7	(9)	(2)
In 3 to 4 years	6	(3))(3)	6	(7)	(1)
In 4 to 5 years	5	(2))(3)	6	(5)	1
More than 5 years	16	(7))(9)	25	(20)	5
	39	(40))(1)	52	(77)	(25)
	69	(116))(47)	106	(170)	(64)

For each class of commodity contract derivative, our exposure based on the notional quantities is as follows:

	2018	2017
Forward purchases of electricity ¹	0 GWh	159 GWh
Forward purchases of gas ²	54m Dth	54m Dth
Electricity swaps	12,839 GWh	12,776 GWh
Electricity options	13,897 GWh	17,793 GWh
Electricity capacity	0.6 GWm	0.7 GWm
Gas swaps	100m Dth	83m Dth
Gas options	7m Dth	9m Dth
NYMEX gas futures ³	0 Dth	3m Dth

¹ Forward electricity purchases expired on 30 September 2017. The contractual obligations under these contracts are £nil (2017: £15 million).

² Forward gas purchases have terms up to three years. The contractual obligations under these contracts are £96 million (2017: £131 million).

³ NYMEX gas futures have been offset with related margin accounts (see note 30(a)).

(c) Further Acquisition Agreement derivative

The Group signed a Further Acquisition Agreement (FAA) concerning a 14% interest in Quadgas HoldCo Limited, which contains put and call options. The fair value of these derivatives is £110 million asset at 31 March 2018 (2017: £nil). The derivative notional was £739 million (2017: £690 million). The options can be exercised in the period between 1 March 2019 and 31 October 2019. The fair value of the option has been disclosed as a non-current derivative asset.

(d) Hedge accounting

Where possible, derivatives held as hedging instruments are formally designated as hedges as defined in IAS 39. Derivatives may qualify as hedges for accounting purposes if they are fair value hedges, cash flow hedges or net investment hedges. Our use of derivatives may entail a derivative transaction qualifying for one or more hedge type designations under IAS 39.

Hedge accounting allows derivatives to be designated as a hedge of another non-derivative financial instrument, to mitigate the impact of potential volatility in the income statement of changes in the fair value of the derivative

instruments. To qualify for hedge accounting, documentation is prepared specifying the hedging strategy, the component transactions and methodology used for effectiveness measurement. National Grid uses three hedge accounting methods, which are described as follows:

Fair value hedges

Fair value hedges principally consist of interest rate and cross-currency swaps that are used to protect against changes in the fair value of fixed-rate, long-term financial instruments due to movements in market interest rates and foreign exchange rates. For qualifying fair value hedges, all changes in the fair value of the derivative and changes in the fair value of the item in relation to the risk being hedged are offset in the income statement to the extent the fair value hedge is effective. Adjustments made to the carrying amount of the hedged item for fair value hedges will be amortised over the remaining life, in line with the hedged item.

	2018	2017
	£m	£m
Cross-currency interest rate/interest rate swaps	496	548

Notes to the consolidated financial statements
– analysis of items in the primary statements continued

16. Derivative financial instruments continued

(d) Hedge accounting continued

Cash flow hedges

Exposure arises from the variability in future interest and currency cash flows on assets and liabilities which bear interest at variable rates or are in a foreign currency. Interest rate and cross-currency swaps are maintained, and designated as cash flow hedges, where they qualify, to manage this exposure. Fair value changes on designated cash flow hedges are initially recognised in other comprehensive income as gains or losses recognised in equity and transferred to the cash flow hedge reserve, and any ineffective portion is recognised immediately in the income statement. Amounts are transferred from equity and recognised in the income statement as the income or expense is recognised on the hedged item.

Forward foreign currency contracts are used to hedge anticipated and committed future currency cash flows. Where these contracts qualify for hedge accounting they are designated as cash flow hedges. On recognition of the underlying transaction in the financial statements, the associated hedge gains and losses, deferred in equity, are transferred and included with the recognition of the underlying transaction.

When a forecast transaction is no longer expected to occur, the cumulative gain or loss previously reported in equity is transferred to the income statement.

Where a non-financial asset or a non-financial liability results from a forecast transaction or firm commitment being hedged, the amounts deferred in equity are included in the initial measurement of that non-monetary asset or liability.

	2018	2017
	£m	£m
Cross-currency interest rate/interest rate swaps	138	(180)
Foreign exchange forward contracts	66	69
	204	(111)

Net investment hedges

Borrowings, cross-currency swaps and forward currency contracts are used in the management of the foreign exchange exposure arising from the investment in non-sterling denominated subsidiaries. Where these contracts qualify for hedge accounting they are designated as net investment hedges.

	2018	2017
	£m	£m
Cross-currency interest rate/interest rate swaps	(104)	(544)
Foreign exchange forward contracts	87	(56)
	(17)	(600)

The cross-currency swaps and forward foreign currency contracts are hedge accounted using the spot to spot method. The foreign exchange gain or loss on retranslation of the borrowings and the spot to spot movements on the cross-currency swaps and forward currency contracts are transferred to equity to offset gains or losses on translation of the net investment in the non-sterling denominated subsidiaries, with any ineffective portion recognised immediately in the income statement.

Derivatives not in a formal hedge relationship

Our policy is not to use derivatives for trading purposes. However, due to the complex nature of hedge accounting under IAS 39 some derivatives may not qualify for hedge accounting, or are specifically not designated as a hedge where natural offset is more appropriate. Changes in the fair value of any derivative instruments that do not qualify for

hedge accounting are recognised in remeasurements within the income statement.

	2018	2017
	£m	£m
Cross-currency interest rate/interest rate swaps	171	135
Foreign exchange forward contracts	19	34
Inflation linked swaps	(273)	(522)
Equity options	—	—
Commodity derivatives (all categories)	(47)	(64)
Further Acquisition Agreement derivative	110	—
	(20)	(417)

Discontinuation of hedge accounting

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, exercised or no longer qualifies for hedge accounting. At that time, any cumulative gains or losses relating to cash flow hedges recognised in equity are initially retained in equity and subsequently recognised in the income statement in the same periods in which the previously hedged item affects profit or loss, unless the hedged item is no longer expected to occur and then the amounts would be recognised immediately. Amounts deferred in equity with respect to net investment hedges are subsequently recognised in the income statement in the event of the disposal of the overseas operations concerned. For fair value hedges, the cumulative adjustment recorded to the carrying value of the hedged item at the date hedge accounting is discontinued is amortised to the income statement using the effective interest method.

Embedded derivatives

No adjustment is made with respect to derivative clauses embedded in financial instruments or other host contracts that are defined as closely related to those instruments or contracts. Consequently these embedded derivatives are not accounted for separately from the debt instrument. Where there are embedded derivatives in host contracts that are not closely related, the embedded derivative is separately accounted for as a derivative financial instrument.

17. Inventories and current intangible assets

Inventories represent assets that we intend to use in order to generate revenue in the short-term, either by selling the asset itself (for example, fuel stocks) or by using it to fulfil a service to a customer or to maintain our network (consumables).

Inventories are stated at the lower of weighted average cost and net realisable value.

Where applicable, cost comprises direct materials and direct labour costs as well as those overheads that have been incurred in bringing the inventories to their present location and condition.

Emission allowances, principally relating to the emissions of carbon dioxide in the UK and sulphur and nitrous oxides in the US, are recorded as intangible assets within current assets, and are initially recorded at cost and subsequently at the lower of cost and net realisable value. A liability is recorded in respect of the obligation to deliver emission allowances, and emission charges are recognised in the income statement in the period in which emissions are made.

	2018	2017
	£m	£m
Fuel stocks	78	101
Raw materials and consumables	190	191
Work in progress	—	8
Current intangible assets – emission allowances	73	103
	341	403

There is a provision for obsolescence of £18 million against inventories as at 31 March 2018 (2017: £26 million).

18. Trade and other receivables

Trade and other receivables are amounts which are due from our customers for services we have provided. Other receivables also include prepayments made by us, for example, property lease rentals paid in advance.

Trade and other receivables are initially recognised at fair value and subsequently measured at amortised cost, less any appropriate allowances for estimated irrecoverable amounts. A provision is established for irrecoverable amounts when there is objective evidence that amounts due under the original payment terms will not be collected.

	2018	2017 ¹
	£m	£m
Trade receivables	1,674	1,591
Accrued income	817	811
Prepayments	229	228
Other receivables	78	98
	2,798	2,728

- Comparative amounts have been represented to reflect the reclassification of commodity contract derivatives from trade and other receivables to derivatives (see note 16).

Trade receivables are non-interest-bearing and generally have a 30 to 90 days term. Due to their short maturities, the fair value of trade and other receivables approximates their book value.

Provision for impairment of receivables

	2018	2017
	£m	£m
At 1 April	424	349
Exchange adjustments	(42)	51
Charge for the year, net of recoveries	36	147

Disposal of UK Gas Distribution	—	(2)
At 31 March	309	424

Trade receivables past due but not impaired

	2018	2017
	£m	£m
Up to 3 months past due	271	238
3 to 6 months past due	73	67
Over 6 months past due	131	143
	475	448

For further information on our wholesale and retail credit risk, refer to note 30(a).

Notes to the consolidated financial statements
– analysis of items in the primary statements continued

19. Cash and cash equivalents

Cash and cash equivalents include cash balances, together with short-term investments with an original maturity of less than three months that are readily convertible to cash.

Net cash and cash equivalents reflected in the cash flow statement are net of bank overdrafts, which are reported in borrowings. The carrying amounts of cash and cash equivalents and bank overdrafts approximate their fair values.

Cash at bank earns interest at floating rates based on daily bank deposit rates. Short-term deposits are made for periods varying between one day and three months, depending on the immediate cash requirements, and earn interest at the respective short-term deposit rates.

Net cash and cash equivalents held in currencies other than sterling have been converted into sterling at year-end exchange rates. For further information on currency exposures, refer to note 30(d).

	2018	2017
	£m	£m
Cash at bank	54	199
Short-term deposits	275	940
Cash and cash equivalents	329	1,139

20. Borrowings

We borrow money primarily in the form of bonds and bank loans. These are for a fixed term and may have fixed or floating interest rates or are linked to RPI. As indicated in note 16, we use derivatives to manage risks associated with interest rates and foreign exchange. Further details on our net debt can be found in note 27.

Our strategy in action

Our price controls and rate plans require us to fund our networks within a certain ratio of debt to equity and, as a result, we have issued a significant amount of debt. As we continue to invest in our networks, the value of debt is expected to increase over time. To maintain a strong balance sheet and to allow us to access capital markets at commercially acceptable interest rates, we balance the amount of debt we issue with the value of our assets, and take account of certain other metrics used by credit rating agencies.

Borrowings, which include interest-bearing and inflation-linked debt and overdrafts, are recorded at their initial fair values which normally reflect the proceeds received, net of direct issue costs less any repayments. Subsequently these are stated at amortised cost, using the effective interest method. Any difference between the proceeds after direct issue costs and the redemption value is recognised over the term of the borrowing in the income statement using the effective interest method.

	2018	2017
	£m	£m
Current

140 National Grid Annual Report and Accounts 2017/18 Financial Statements | Notes to the consolidated financial statements

20. Borrowings continued

Total borrowings are repayable as follows:

	2018	2017
	£m	£m
Less than 1 year	4,447	5,496
In 1 to 2 years	1,694	1,941
In 2 to 3 years	2,347	1,821
In 3 to 4 years	1,873	2,453
In 4 to 5 years	1,469	1,921
More than 5 years:		
By instalments	1,010	1,043
Other than by instalments	13,785	13,963
	26,625	28,638

The fair value of borrowings at 31 March 2018 was £30,164 million (2017: £32,239 million). Where market values were available, fair value of borrowings (Level 1) was £13,018 million (2017: £12,547 million). Where market values were not available, fair value of borrowings (Level 2) was £17,146 million (2017: £19,692 million), calculated by discounting cash flows at prevailing interest rates. The notional amount outstanding of the debt portfolio at 31 March 2018 was £26,363 million (2017: £28,310 million).

The assets of the Colonial Gas Company and the Niagara Mohawk Power Corporation and certain gas distribution assets of the Narragansett Electric Company are subject to liens and other charges and are provided as collateral over borrowings totalling £392 million at 31 March 2018 (2017: £440 million).

Collateral is placed with or received from any counterparty where we have entered into a credit support annex to the ISDA Master Agreement once the current mark-to-market valuation of the trades between the parties exceeds an agreed threshold. Included in current bank loans is £878 million (2017: £709 million) in respect of cash received under collateral agreements. For further details of our borrowing facilities, refer to note 31. For further details of our bonds in issue, please refer to the debt investor section of our website. Unless included herein, the information on our website is unaudited.

Assets held under finance leases are recognised at their fair value or, if lower, the present value of the minimum lease payments on inception. The corresponding liability is recognised as a finance lease obligation within borrowings. Rental payments are apportioned between finance costs and reduction in the finance lease obligation, so as to achieve a constant rate of interest.

Assets held under finance leases are depreciated over the shorter of their useful life and the lease term.

Finance lease obligations

	2018	2017
	£m	£m
Gross finance lease liabilities are repayable as follows:		
Less than 1 year	64	66
1 to 5 years	177	213
More than 5 years	72	89
	313	368
Less: finance charges allocated to future periods	(42)	(60)
	271	308
The present value of finance lease liabilities is as follows:		
Less than 1 year	64	66

1 to 5 years	144	174
More than 5 years	63	68
	271	308

Unaudited commentary on borrowings

As at 31 March 2018, total borrowings of £26,625 million (2017: £28,638 million) including bonds, bank loans, commercial paper, collateral, finance leases and other debt had decreased by £2,013 million. We expect to repay £4,447 million of our total borrowings in the next 12 months including commercial paper, collateral and interest, and to fund this repayment through the capital and money markets and surplus cash. The average long-term debt maturity of the portfolio is 11 years (2017: 11 years). Further information on our bonds can be found in the debt investor section of our website. Unless included herein, the information on our website is unaudited.

Financial Statements | Notes to the consolidated financial statements National Grid Annual Report and Accounts 2017/18 141

Notes to the consolidated financial statements
– analysis of items in the primary statements continued

21. Trade and other payables

Trade and other payables include amounts owed to suppliers, tax authorities and other parties which are due to be settled within 12 months. The total also includes deferred income, which represents monies received from customers but for which we have not yet delivered the associated service. These amounts are recognised as revenue when the service is provided.

Trade and other payables are initially recognised at fair value and subsequently measured at amortised cost.

	2018	2017 ¹
	£m	£m
Trade payables	1,977	2,135
Deferred income ²	440	298
Social security and other taxes	173	136
Other payables	863	776
	3,453	3,345

¹ Comparative amounts have been represented to reflect the reclassification of commodity derivative contracts from trade and other payables to derivatives (see note 16).

² Included within deferred income is £85 million (2017: £89 million) relating to customer contributions.

Due to their short maturities, the fair value of trade payables approximates their book value.

22. Other non-current liabilities

Other non-current liabilities include deferred income which will not be recognised as income until after 31 March 2019. It also includes payables that are not due until after that date.

Non-current liabilities are initially recognised at fair value and subsequently measured at amortised cost.

	2018	2017 ¹
	£m	£m
Deferred income ²	958	1,032
Other payables	359	338
	1,317	1,370

¹ Comparative amounts have been represented to reflect the reclassification of commodity derivative contracts from other non-current liabilities to derivatives (see note 16).

² Included within deferred income is £844 million (2017: £839 million) relating to customer contributions.

There is no material difference between the fair value and the carrying value of other payables.

23. Pensions and other post-retirement benefits

The majority of employees are either members of a DB (defined benefit) or a DC (defined contribution) pension scheme. In the US we also provide healthcare and life insurance benefits to eligible retired US employees.

The fair value of associated scheme assets and present value of DB obligations are updated annually in accordance with IAS 19 (revised).

We separately present our UK and US pension schemes to show geographical split. Below we provide a more detailed analysis of the amounts recorded in the primary financial statements and the actuarial assumptions used to value the DB obligations.

Defined contribution plans

Most new hires are able to join DC plans in the UK or US. These plans are designed to provide members with a pension pot for their retirement. The risks associated with these plans are assumed by the member.

Payments to these DC plans are charged as an expense as they fall due. There is no legal or constructive obligation on National Grid to pay additional contributions into a DC plan if the fund has insufficient assets to pay all employees' benefits relating to employee service in the current and prior periods.

Defined benefit schemes

The principal UK schemes are the National Grid UK Pension Scheme (NGUKPS) and the National Grid Electricity Group of the Electricity Supply Pension Scheme (NGEG of the ESPS). In the US, we have four plans and a number of healthcare and life insurance plans.

For DB pension schemes, members receive benefits on retirement, the value of which is dependent on factors such as salary and length of pensionable service. National Grid underwrites both financial and demographic risks associated with this type of scheme.

National Grid's obligation in respect of DB pension schemes is calculated separately for each DB scheme by projecting the estimated amount of future benefit payments that employees have earned for their pensionable service in the current and prior periods. These future benefit payments are discounted to determine the present value of the liabilities. Current service cost and any unrecognised past service cost are recognised immediately. The discount rate used is the yield at the valuation date on high-quality corporate bonds.

Advice is taken from independent actuaries relating to the appropriateness of the key assumptions applied, including life expectancy, expected salary and pension increases, and inflation. Comparatively small changes in the assumptions used may have a significant effect on the amounts recognised in the income statement, the statement of other comprehensive income and the net liability recognised in the statement of financial position.

Remeasurements of pension assets and post-retirement benefit obligations are recognised in full in the period in which they occur in the statement of other comprehensive income.

23. Pensions and other post-retirement benefits continued

UK pension plans

Defined Contribution

The National Grid YouPlan

National Grid pays contributions into YouPlan to provide DC benefits on behalf of employees. National Grid provides a double match of member contributions, up to a maximum of 6% of member salary.

YouPlan was established in 2013 and is the qualifying scheme used for automatic enrolment of new hires. Prior to its establishment, DC benefits were provided through the NGUKPS, which transferred all historical DC benefits to YouPlan in 2013.

Defined Benefit

National Grid's DB pension arrangements are held in separate trustee administered funds. The arrangements are managed by trustee companies with boards consisting of company and member appointed directors.

The arrangements are subject to independent actuarial funding valuations at least every three years and following consultation and agreement with us, the qualified actuary certifies the employers' contributions, which, together with the specified contributions payable by the employees and proceeds from the plans' assets, are expected to be sufficient to fund the benefits payable.

The results of the most recent actuarial valuations are shown below. See page 145 for the assumptions used for IAS 19 purposes.

	Section A of NGUKPS	Section B of NGUKPS	NGEG of ESPS
Latest full actuarial valuation	31 March 2017	31 March 2017	31 March 2016
Actuary	Willis Towers Watson	Willis Towers Watson	Aon Hewitt
Market value of scheme assets at latest valuation	£6,716	m£5,849	m£2,553 m
Actuarial value of benefits due to members	£6,627	m£6,057	m£3,053 m
Market value as percentage of benefits	101%	97%	84%
Funding surplus/(deficit)	£89	m(£208m)	(£500m)
Funding surplus/(deficit) net of tax	£74	m(£173m)	(£415m)

National Grid UK Pension Scheme

With effect from 1 January 2017 the scheme was split into three sections, each of which is legally and actuarially separate. Sections A and B are supported by companies within the National Grid Group, and National Grid makes payments to Sections A and B to cover administration costs and the Pension Protection Fund levy. The scheme closed to new hires on 1 April 2002.

Section C is supported by Cadent Gas Limited which is no longer part of the National Grid Group following the disposal of UK Gas Distribution which completed on 31 March 2017. The disclosures for the current year do not include Section C data. However, the actuarial assumptions adopted will influence our equity accounting for Quadgas HoldCo Limited (the ultimate parent of Cadent Gas Limited).

Section A

Following the actuarial valuation at 31 March 2017, Section A was in surplus. As such, no deficit funding contributions are being made to the section. National Grid and the Trustees have agreed a schedule of contributions whereby the employers will contribute 51.8% of pensionable salary, less member contributions, in respect of ongoing service cost. This rate is deemed to be sufficient to meet the statutory funding objective during the period for which it is in force.

The next actuarial valuation will be performed at 31 March 2019.

Section B

The actuarial valuation as at 31 March 2017 determined that Section B was in deficit. National Grid and the Trustee agreed on a schedule of contributions, whereby deficit funding contributions of approximately £32 million payable by 30 September each year from 2017 onwards until 30 September 2022, with an additional £8 million payable by 30 September 2023. All deficit funding amounts due will be adjusted for the change in the Retail Price Index (RPI) from 31 December 2016 up to three months prior to the date of payment. As a result, the funding shortfall is expected to be eliminated by 30 September 2023.

The employers will also contribute 51.4% of pensionable salary, less member contributions, in respect of ongoing service cost.

The next actuarial valuation will be performed as at 31 March 2019.

Notes to the consolidated financial statements
– analysis of items in the primary statements continued

23. Pensions and other post-retirement benefits continued

National Grid Electricity Group of the Electricity Supply Pension Scheme
The scheme closed to new hires from 1 April 2006.

The last full actuarial valuation for the NGEG of the ESPS was carried out at 31 March 2016 and determined that the scheme was in deficit. National Grid and the Trustee agreed on a schedule of contribution, whereby deficit funding contributions of £48 million are payable each year from 2016 onwards until 31 March 2027. All deficit funding amounts due will be adjusted for the change in the Retail Price Index (RPI). The funding shortfall is expected to be eliminated by 31 March 2027.

The employer will also contribute 40.7% of pensionable earnings (less member contributions).

The next actuarial valuation is required with an effective date of no later than 31 March 2019.

Security arrangements

National Grid has also established security arrangements with charges in favour of the Trustees. As at 31 March 2018 the required value of these arrangements and principal supporting employers were:

Section A of NGUKPS: £315 million, National Grid plc and National Grid UK Limited;
Section B of NGUKPS: £179 million, National Grid Gas plc (NGG); and
NGEG of ESPS: £250 million, National Grid Electricity Transmission plc (NGET).

The majority of the security is provided in the form of letters of credit with the remainder in surety bonds. The assets held in security will be paid to the respective section or scheme in the event that the relevant supporting employer is subject to an insolvency event or fails to make the required contributions. In addition, counter indemnities have also been taken out to ensure the obligations will be fulfilled.

The following specific conditions apply to the security arrangements:

Section B of NGUKPS: The assets will be paid to Section B if NGG is given notice of less than 12 months that Ofgem intends to revoke its licence under the Gas Act 1986, or if NGG grants any charges over its assets other than where agreed with the Trustee.
NGEG of ESPS: The asset and an amount in respect of the deficit (to a maximum of £500 million) will be paid to the scheme if NGET ceases to hold a licence granted under the Electricity Act 1989.

In addition to the above, if the credit rating of the supporting employer, as determined by two out of three specified agencies, falls below certain agreed levels for 40 days, the following amounts will be payable:

Section A of NGUKPS: £72 million (increased in line with RPI).
Section B of NGUKPS: £65 million (increased in line with RPI).
NGEG of ESPS: A maximum of £500 million in respect of the deficit.

US pension plans

National Grid has multiple DC pension plans, primarily comprised of employee savings and Company matching contributions. Non-union employees hired after 1 January 2011, as well as new hires in the majority of represented union employees, receive a core contribution into the DC plan, irrespective of the employee's contribution into the

plan.

National Grid also sponsors numerous non-contributory DB pension plans. The DB plans provide retirement benefits to vested union employees, as well as vested non-union employees hired before 1 January 2011. Benefits under these plans generally reflect age, years of service and compensation and are paid in the form of an annuity or lump sum. An independent actuary performs valuations annually. The Company funds the DB plans by contributing no less than the minimum amount required, but no more than the maximum tax deductible amount allowed under US Internal Revenue Service regulations. The range of contributions determined under these regulations can vary significantly depending upon the funded status of the plans. At present, there is some flexibility in the amount that is contributed on an annual basis. In general, the Company's policy for funding the US pension plans is to contribute the amounts collected in rates and capitalised in the rate base during the year, to the extent that the funding is no less than the minimum amount required. The assets of the plans are held in trusts and administered by fiduciary committees comprised of appointed employees of the Company.

US retiree healthcare and life insurance plans

National Grid provides healthcare and life insurance benefits to eligible retired US employees. Eligibility is based on certain age and length of service requirements and in most cases retirees contribute to the cost of their healthcare coverage. In the US, there is no governmental requirement to pre-fund post-retirement healthcare and life insurance plans. However, in general, the Company's policy for funding the US retiree healthcare and life insurance plans is to contribute amounts collected in rates and capitalised in the rate base during the year.

23. Pensions and other post-retirement benefits continued

Risks

National Grid underwrites the financial and demographic risks associated with DB plans, the most significant of which are:

Asset volatility: The schemes invest in a variety of asset classes, principally: equities, government securities, corporate bonds and property. Consequently actual returns will differ from the underlying discount rate adopted, impacting on the net balance sheet asset or liability. Each scheme seeks to balance the level of investment return sought with the aim of reducing volatility and risk by means of liability matching asset strategies, diversification of asset portfolios, interest rate hedging and management of foreign exchange exposure. In taking this approach, reference is made to both the maturity of liabilities and the funding level of that scheme.

Changes in bond yields: Liabilities are calculated using discount rates set with reference to yields on high-quality corporate bonds prevailing in the US and UK debt markets and will fluctuate as yields change.

Inflation risk: Changes in inflation will affect current and future pensions, but are partially mitigated through investing in inflation matching assets and hedging instruments.

Member longevity: Longevity is a key driver of liabilities and changes in expected mortality will have a direct impact on liabilities. In aggregate, the liabilities are relatively mature which mitigates the risk to a certain extent. The NREG of ESPS holds a longevity insurance contract which covers exposure to improvements in longevity, providing long-term protection and income to the scheme in the event that members live longer than currently expected.

Actuarial assumptions

The Company has applied the following financial assumptions in assessing DB liabilities.

	UK pensions		
	2018	2017	2016
	%	%	%
Discount rate ¹ – past service ²	2.60	2.40	3.30
Discount rate ¹ – future service ²	2.65	2.65	3.30
Rate of increase in salaries ³	3.40	3.50	3.20
Rate of increase in RPI – past service ⁴	3.15	3.20	2.90
Rate of increase in RPI – future service ⁴	3.10	3.15	2.90

1. The discount rates for pension liabilities have been determined by reference to appropriate yields on high-quality corporate bonds prevailing in the UK debt markets at the reporting date.

In the UK for 2018, National Grid has adopted a different discount rate assumption by increasing the duration of the scheme liabilities to 25 years for future service obligations. This has led to a future service discount rate in the UK of 2.65% for both the 2017 and 2018 year-ends. The 2017 discount rate was 2.40% based on an expected duration of scheme liabilities of 17 years.

A promotional scale has also been used where appropriate. The UK assumption stated is that relating to service prior to 1 April 2013. The UK assumption for the rate of increase in salaries for past service after this date is 2.20% (2017: 2.20%; 2016: 2.10%) and for future service 2.15% (2017: 2.20%; 2016: 2.10%). The rates of increase stated are not indicative of historical increases awarded or a guarantee of future increases, but merely an appropriate assumption utilised in assessing DB liabilities.

This is the key assumption that determines assumed increases in pensions in payment and deferment in the UK only. Consistent with the derivation of the discount rate, the RPI assumption reflects the duration of the active liabilities to be adopted in the calculation of the future service obligations. This approach leads to a RPI assumption for the future service rate of 3.10% p.a. at reporting date (2017: 3.15%; 2016: 2.90%), as compared to the 2017 published assumption of 3.20% for both past service and future service.

US pensions	US other
	post-retirement

	benefits					
	2018	2017	2016	2018	2017	2016
	%	%	%	%	%	%
Discount rate ¹	4.00	4.25	4.25	4.00	4.25	4.25
Rate of increase in salaries	3.50	3.50	3.50	3.50	3.50	3.50
Initial healthcare cost trend rate	n/a	n/a	n/a	7.50	7.00	7.50
Ultimate healthcare cost trend rate ²	n/a	n/a	n/a	4.50	4.50	4.50

The discount rates for pension liabilities have been determined by reference to appropriate yields on high-quality 1. corporate bonds prevailing in the US debt markets at the reporting date with an expected duration of plan liabilities of 17 years.

2. The ultimate healthcare cost trend rate will reach the ultimate trend in 2026/28 (2017 and 2016: 2024/25).

For sensitivity analysis see note 33.

Liabilities	(74)	(536)	(300)	(783)	(951)	(1,134)	(815)	(1,049)	(1,561)
Assets	1,178	380	285	231	223	125	—	—	—
	1,104	(156)	(15)	(552)	(728)	(1,009)	(815)	(1,049)	(1,561)

1. Present value of funded obligations split approximately as follows:

- UK pensions at 31 March 2018: 10% active members (2017: 12%; 2016: 12%); 18% deferred members (2017: 19%; 2016: 18%); 72% pensioner members (2017: 69%; 2016: 70%)
- US pensions at 31 March 2018: 38% active members (2017: 38%; 2016: 39%); 8% deferred members (2017: 9%; 2016: 9%); 54% pensioner members (2017: 53%; 2016: 52%)
- US other post-retirement benefits at 31 March 2018: 38% active members (2017: 39%; 2016: 41%); 0% deferred members (2017: 0%; 2016: 0%); 62% pensioner members (2017: 61%; 2016: 59%)

The recognition of the pension assets in both the UK in relation to the National Grid UK Pension Scheme (NGUKPS) and the Niagara Mohawk Plan in the US reflect legal and actuarial advice that we have taken regarding recognition of surpluses under IFRIC 14. In both cases we have concluded that the Group has an unconditional right to a refund from the individual plans, including from each Section of the NGUKPS, in the event of a winding up. In the UK, the Trustees must seek the agreement of the Company to any benefit augmentation beyond the provisions set out in the Scheme Rules. In the US, the surplus assets may be used to pay benefits under other Plans, thereby allowing the Company to settle other liabilities under other Plans.

23. Pensions and other post-retirement benefits continued

Investment strategy continued

In the UK, the Trustees as governing body of each scheme are solely responsible for setting the investment strategy and managing risk. The Trustees' responsibilities are set out in the Trust Deeds and Rules. In the US, the fiduciary committee for each respective retirement plan is the Retirement Plan Committee (RPC). The RPC is solely responsible for setting the investment strategy and managing the risk of each plan. The RPC is structured in accordance with US laws governing retirement plans under the Employee Retirement Income Security Act (ERISA).

The Trustees or the RPC where applicable, will perform the following duties:

After taking advice from professional investment advisers and consultation with the sponsoring employers, set the key principles, including expected returns, risk and liquidity requirements, after taking into account expected contributions, maturity of the pension liabilities and in the UK, the strength of the covenant.

Formulate an investment strategy to manage risk through diversification, including the use of liability matching assets, which move in line with long-term liabilities of the scheme, return seeking assets, some of which are designed to mitigate downside risk and exposure. Where appropriate, the strategies may include interest rate and inflation hedging instruments, and currency hedging to hedge foreign holdings.

Review the investment strategies' performance and risk regularly and amend the portfolios if required.

Appoint investment managers with the necessary skills, expertise and credit worthiness to manage the investments.

On a regular basis, the performance of the asset managers and their adherence to the investment strategies will be reviewed.

Investments are made predominantly in regulated markets and investments outside of these markets are kept to prudent levels and subject to agreed control ranges.

Asset allocations

Within the asset allocations below there is significant diversification across regions, asset managers, currencies and bond categories.

24. Provisions

We make provisions when an obligation exists, resulting from a past event and it is probable that cash will be paid to settle it, but the exact amount of cash required can only be estimated.

The main estimates relate to environmental remediation and decommissioning costs for various sites we own or have owned and other provisions, including restructuring plans and lease contracts we have entered into that are now loss making. The evaluation of the likelihood of the contingent events has required best judgement by management regarding the probability of exposure to potential loss. Should circumstances change following unforeseeable developments, the likelihood could alter.

Our strategy in action

We are committed to the protection and enhancement of the environment. However, we have acquired, owned and operated a number of businesses which have, during the course of their operations, created an environmental impact. Therefore we have a provision that reflects the expected cost to remediate these sites. Current operations will seldom result in new sites with significant expected costs being added to the provision.

Provisions are recognised where a legal or constructive obligation exists at the reporting date, as a result of a past event, where the amount of the obligation can be reliably estimated and where the outflow of economic benefit is probable.

Provision is made for decommissioning and environmental costs, based on future estimated expenditures, discounted to present values. An initial estimate of decommissioning and environmental costs attributable to property, plant and equipment is recorded as part of the original cost of the related property, plant and equipment.

Changes in the provision arising from revised estimates or discount rates or changes in the expected timing of expenditures that relate to property, plant and equipment are recorded as adjustments to their carrying value and depreciated prospectively over their remaining estimated useful economic lives; otherwise such changes are recognised in the income statement.

The unwinding of the discount is included within the income statement as finance costs.

24. Provisions continued

Environmental provision

The environmental provision represents the estimated restoration and remediation costs relating to a number of sites owned and managed by subsidiary undertakings, together with certain US sites that National Grid no longer owns.

The environmental provision is as follows:

2018			2017				
Discounted £m	Undiscounted £m	Real discount rate	Discounted £m	Undiscounted £m	Real discount rate		
UK sites	213	235	1	% 242	270	1	%
US sites	1,318	1,410	1	% 1,479	1,619	1	%
	1,531	1,645		1,721	1,889		

The remediation expenditure in the UK relates to old gas manufacturing sites and also to electricity transmission sites. Cash flows are expected to be incurred until 2075 although the weighted average duration of the cash flows is 11 years. A number of estimation uncertainties affect the calculation of the provision, including the impact of regulation, accuracy of the site surveys, unexpected contaminants, transportation costs, the impact of alternative technologies and changes in the real discount rate. This provision incorporates our best estimate of the financial effect of these uncertainties, but future changes in any of the assumptions could materially impact the calculation of the provision. The undiscounted amount is the undiscounted best estimate of the liability having regard to these uncertainties.

The remediation expenditure in the US is expected to be incurred until 2069. The weighted average duration of the cash flows is nine years. The increase in the US provision last year principally related to the reduction in real discount rate and expected expenditure in relation to three industrial sites located on or near waterways in New York that are subject to both state and federal law in the US. The uncertainties regarding the calculation of this provision are similar to those considered in respect of UK sites. This expenditure is expected to be largely recoverable from ratepayers under the terms of various rate agreements in the US.

Decommissioning provision

The decommissioning provision represents £71 million (2017: £78 million) of expenditure relating to asset retirement obligations estimated to be incurred until 2115, and £104 million (2017: £107 million) of expenditure relating to the demolition of gas holders estimated to be incurred until 2023. It also includes the net present value of the estimated expenditure (discounted at a real rate of 1%) expected to be incurred until 2033 in respect of the decommissioning of certain US nuclear generating units that National Grid no longer owns. A pre-existing decommissioning provision formed part of the net assets sold as part of the UK Gas Distribution transaction.

Other provisions

Included within other provisions at 31 March 2018 are the following amounts in respect of the disposal of UK Gas Distribution:

£50 million (2017: £143 million) in respect of business restructuring costs following the sale of UK Gas Distribution.

We expect the majority of this provision to be utilised within one year; and

Last year, other provisions included £150 million voluntary distribution to be made for the benefit of energy customers on the successful sale of UK Gas Distribution. During the year, this was transferred to trade and other payables and has a closing balance of £117 million.

Other provisions also include:

- Amounts provided in respect of onerous lease commitments and rates payable on surplus properties of £48 million (2017: £84 million) with expenditure expected to be incurred until 2043;
- £152 million (2017: £166 million) of estimated liabilities in respect of past events insured by insurance subsidiary undertakings, including employer liability claims. In accordance with insurance industry practice, these estimates are based on experience from previous years and there is, therefore, no identifiable payment date; and
- £13 million (2017: £13 million) in respect of obligations associated with investments in joint ventures and associates.

25. Share capital

Ordinary share capital represents the total number of shares issued which are publicly traded. We also disclose the number of treasury shares the Company holds, which are shares that the Company has bought itself, predominately to actively manage scrip issuances and employee share option plan liabilities.

Share capital is accounted for as an equity instrument. An equity instrument is any contract that includes a residual interest in the consolidated assets of the Company after deducting all its liabilities and is recorded at the proceeds received, net of direct issue costs, with an amount equal to the nominal amount of the shares issued included in the share capital account and the balance recorded in the share premium account.

	Allotted, called up and fully paid	million	£m
At 1 April 2016		3,924	447
Issued during the year in lieu of dividends ¹		19	2
At 31 March 2017		3,943	449
Effect of share consolidation ²	(328)	—	
Issued during the year in lieu of dividends ¹	23	3	
At 31 March 2018		3,638	452

¹ The issue of shares under the scrip dividend programme is considered to be a bonus issue under the terms of the Companies Act 2006 and the nominal value of the shares is charged to the share premium account.

On 22 May 2017 the ordinary share capital was consolidated with 11 new ordinary shares of 12²⁰⁴/₄₇₃ pence nominal value issued for every 12 existing ordinary shares of 11¹⁷/₄₃ pence nominal value. This consolidation was completed to maintain the comparability of the Company's share price before and after the special dividend.

The share capital of the Company consists of ordinary shares of 12²⁰⁴/₄₇₃ pence nominal value each including ADSs. The ordinary shares and ADSs allow holders to receive dividends and vote at general meetings of the Company. The Company holds treasury shares but may not exercise any rights over these shares including the entitlement to vote or receive dividends. There are no restrictions on the transfer or sale of ordinary shares.

In line with the provisions of the Companies Act 2006, the Company has amended its Articles of Association and ceased to have authorised share capital.

Treasury shares

At 31 March 2018, the Company held 283 million (2017: 193 million) of its own shares. The market value of these shares as at 31 March 2018 was £2,270 million (2017: £1,958 million).

The Company made the following transactions in respect of its own shares during the year ended 31 March 2018:

During the year, the Company completed a share repurchase programme as part of the return of cash to shareholders following the sale of UK Gas Distribution in addition to the management of the dilutive effect of share issuances under the scrip dividend programme. As a result the Company repurchased 114 million (2017: 20 million) ordinary shares for aggregate consideration of £1,017 million (2017: £189 million), including transaction costs. The shares repurchased had a nominal value of £14 million (2017: £2 million) and represented approximately 3.1% (2017: 0.5%) of the ordinary shares in issue as at 31 March 2018.

2. During the year, 3 million (2017: 3 million) treasury shares were gifted to National Grid Employee Share Trusts and 5 million (2017: 3 million) treasury shares were re-issued in relation to employee share schemes, in total

representing approximately 0.2% (2017: 0.2%) of the ordinary shares in issue as at 31 March 2018. The nominal value of these shares was £1 million (2017: £1 million) and the total proceeds received were £33 million (2017: £18 million).

During the year, the Company made payments totalling £5 million (2017: £6 million) to National Grid Employee 3. Share Trusts, outside its share repurchase programme, to enable the trustees to make purchases of National Grid plc shares in order to satisfy the requirements of employee share option and reward plans.

The maximum number of ordinary shares held in treasury during the year was 283 million (2017: 194 million) representing approximately 7.8% (2017: 4.9%) of the ordinary shares in issue as at 31 March 2018 and having a nominal value of £35 million (2017: £22 million).

Notes to the consolidated financial statements

26. Other equity reserves

Other equity reserves are different categories of equity as required by accounting standards and represent the impact of a number of our historical transactions.

Other equity reserves comprise the translation reserve (see accounting policy D in note 1), cash flow hedge reserve (see note 16), available-for-sale reserve (see note 14), the capital redemption reserve and the merger reserve. The merger reserve arose as a result of the application of merger accounting principles under the then prevailing UK GAAP, which under IFRS 1 was retained for mergers that occurred prior to the IFRS transition date. Under merger accounting principles, the difference between the carrying amount of the capital structure of the acquiring vehicle and that of the acquired business was treated as a merger difference and included within reserves.

As the amounts included in other equity reserves are not attributable to any of the other classes of equity presented, they have been disclosed as a separate classification of equity.

	Translation £m	Cash flow hedge £m	Available- for-sale £m	Capital redemption £m	Merger £m	Total £m

Tax	—	4	29	—	—	33
At 31 March 2018	390	128	88	19	(5,165)(4,540)

The exchange adjustments recorded in the translation reserve comprise a loss of £1,304 million (2017: gain of £1,364 million; 2016: gain of £275 million) relating to the translation of foreign operations offset by a gain of 1. £800 million (2017: loss of £1,018 million; 2016: loss of £206 million) relating to borrowings, cross-currency swaps and foreign exchange forward contracts used to hedge the net investment in the non-sterling denominated subsidiaries.

The merger reserve represents the difference between the carrying value of subsidiary undertaking investments and their respective capital structures following the Lattice demerger from BG Group plc and the 1999 Lattice refinancing.

The cash flow hedge reserve will amortise as the committed future cash flows from borrowings are paid or capitalised in fixed assets (as described in note 16). The amount due to be released from reserves next year is a gain of £23 million (pre-tax) of which £20 million relates to capital expenditure. The majority of the remaining reserve will be released over the next four years as forecast capital expenditure is incurred and over a similar maturity profile as the hedged borrowings.

27. Net debt

Net debt represents the amount of borrowings and overdrafts less cash, financial investments and related financing derivatives.

Funding and liquidity risk management is carried out by the treasury function under policies and guidelines approved by the Finance Committee of the Board. The Finance Committee is responsible for the regular review and monitoring of treasury activity and for the approval of specific transactions, the authority for which fall outside the delegation of authority to management.

The primary objective of the treasury function is to manage our funding and liquidity requirements. A secondary objective is to manage the associated financial risks, in the form of interest rate risk and foreign exchange risk, to within pre-authorised parameters. Details of the main risks arising from our financing and commodity hedging activities can be found in the risk factors discussion starting on page 193 and in note 30 to the consolidated financial statements on pages 158 to 164.

Investment of surplus funds, usually in short-term fixed deposits or placements with money market funds that invest in highly liquid instruments of high credit quality, is subject to our counterparty risk management policy.

Net debt (net of related derivative financial instruments) at start of year	(19,274)	(25,325)	(23,915)
Net debt (net of related derivative financial instruments) at end of year	(23,002)	(19,274)	(25,325)

Composition of net debt

Net debt is made up as follows:

	2018	2017	2016
	£m	£m	£m
Cash, cash equivalents and financial investments	3,023	9,880	3,125
Borrowings and bank overdrafts	(26,625)	(28,638)	(28,344)
Financing derivatives ¹	600	(516))(106)
	(23,002)	(19,274)	(25,325)

The financing derivatives balance included in net debt excludes the commodity derivatives and the Further Acquisition Agreement (FAA) derivative (see note 16). Included within the financing derivatives balance is ¹ £12 million (2017: £18 million; 2016: £(16) million) of derivative cash flows in relation to capital expenditure. This is included within investing activities and not financing activities in the cash flow statement.

² Excludes £27 million (2017: £nil; 2016: £nil) cash interest from the Quadgas HoldCo Limited shareholder loan included within interest received in the cash flow statement.

1. Includes accrued interest at 31 March 2018 of £197 million (2017: £210 million; 2016: £243 million).

An exceptional income of £3 million (2017: £1,313 million expense; 2016: £nil) is included in net interest charge on
2. the components of net debt and an exceptional cash outflow of £231 million (2017: £1,052 million; 2016: £nil) is
included in cash flow on the components of net debt.

Notes to the consolidated financial statements
– supplementary information

This section includes information that is important to enable a full understanding of our financial position, particularly areas of potential uncertainty that could affect us in the future.

We also include specific disclosures for British Transco Finance Inc., Niagara Mohawk Power Corporation and National Grid Gas plc in accordance with various rules including Rule 3-10 of Regulation S-X (a US SEC requirement), as they have issued public debt securities which have been guaranteed by National Grid plc and one of its subsidiary companies, National Grid Gas plc. Additional disclosures have also been included in respect of the two guarantor companies. These disclosures are in lieu of publishing separate financial statements for these companies. See note 34 for further information.

28. Commitments and contingencies

Commitments are those amounts that we are contractually required to pay in the future as long as the other party meets its obligations. These commitments primarily relate to operating lease rentals, energy purchase agreements and contracts for the purchase of assets which, in many cases, extend over a long period of time. We also disclose any contingencies, which include guarantees that companies have given, where we pledge assets against current obligations that will remain for a specific period.

Other guarantees and letters of credit (various expiry dates)	333	474
	2,669	2,780

1. Following a review in the year, the basis on which we disclose capital commitments has been refined.

Energy purchase commitments relate to contractual commitments to purchase electricity or gas that are used to satisfy physical delivery requirements to our customers or for energy that we use ourselves (i.e. normal purchase, sale or usage) and hence are accounted for as ordinary purchase contracts. Details of commodity contract derivatives that do not meet the normal purchase, sale or usage criteria, and hence are accounted for as derivative contracts, are shown in note 16(b).

3. Included within total guarantees are guarantees to both joint ventures and EPC contractors regarding the construction of interconnectors of £739 million (2017: £555 million).

4. Includes guarantees to related parties.

The total of future minimum sublease payments expected to be received under non-cancellable subleases is £42 million (2017: £15 million).

Through the ordinary course of our operations, we are party to various litigation, claims and investigations. We do not expect the ultimate resolution of any of these proceedings to have a material adverse effect on our results of operations, cash flows or financial position.

Notes to the consolidated financial statements
– supplementary information continued

29. Related party transactions

Related parties include joint ventures, associates, investments and key management personnel.

The following significant transactions with related parties were in the normal course of business. Amounts receivable from and payable to related parties are due on normal commercial terms:

	2018	2017	2016
	£m	£m	£m
Sales: Goods and services supplied to a pension plan	3	3	3
Sales: Goods and services supplied to joint ventures ¹	14	78	9
Sales: Goods and services supplied to associates ²	220	—	4
Purchases: Goods and services received from joint ventures ³	135	168	183
Purchases: Goods and services received from associates ³	160	169	83
Receivable from joint ventures ⁴	160	64	7
Receivable from associates ⁴	376	457	—
Payable to joint ventures ⁵	—	84	96
Payable to associates	17	27	7
Interest income from joint ventures	4	—	—
Interest income from associates	27	—	—
Dividends received from joint ventures ⁶	43	75	48
Dividends received from associates ⁷	170	24	24

1. In 2018 £5 million (2017: £68 million) of property sites were sold to joint venture St William Homes LLP.

Sales in the year relate to transactions with Quadgas HoldCo Limited. Within this is other income of £54 million

2. relating to a Transitional Service Agreement following the sale of the UK Gas Distribution business to Quadgas HoldCo Limited.

During the year the Group received goods and services from a number of US associates, both for the transportation

3. of gas and for pipeline services in the US. Additionally, goods and services were received from UK joint ventures for the construction of a transmission link in the UK.

Amounts receivable from associates includes a loan receivable balance from Quadgas HoldCo Limited of £352 million (2017: £434 million) and a loan receivable balance of £130 million (2017: £61 million) from Nemo Link Limited (a joint venture).

5. In previous years the amounts payable to joint ventures include deposits received for National Grid property sites from St William Homes LLP which have been settled during the year.

6. Dividends in respect of joint ventures were received from BritNed Development Limited.

7. Within dividends received from associates in 2018, £144 million (2017: £nil) was from Quadgas HoldCo Limited.

Details of investments in principal subsidiary undertakings, joint ventures and associates are disclosed in note 32 and information relating to pension fund arrangements is disclosed in note 23. For details of Directors' and key management remuneration, refer to the Remuneration Report and note 3(c).

As a result of an overpayment due to a payroll processing error in September 2017, the Company was owed \$70,767 by Dean Seavers (Executive Director, US and a Director of National Grid plc), which was repaid in full in early October 2017.

30. Financial risk management

Our activities expose us to a variety of financial risks including currency risk, interest rate risk, commodity price risk, credit risk, capital risk and liquidity risk. Our risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential volatility of financial performance from these risks. We use financial instruments, including derivative financial instruments, to manage risks of this type.

This note describes our approach to managing risk, including an analysis of assets and liabilities by currency type and an analysis of interest rate category for our net debt. We are required by accounting standards to also include a number of specific disclosures (such as a maturity analysis of contractual undiscounted cash flows) and have included these requirements below.

Risk management related to financing activities is carried out by a central treasury department under policies approved by the Finance Committee of the Board. The objective of the treasury department is to manage funding and liquidity requirements, including managing associated financial risks, to within acceptable boundaries. The Finance Committee provides written principles for overall risk management, as well as written policies covering specific areas such as foreign exchange risk, interest rate risk, credit risk, liquidity risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

We have exposure to the following risks, which are described in more detail below:

- credit risk;
- liquidity risk;
- interest rate risk;
- currency risk; and
- capital risk.

158 National Grid Annual Report and Accounts 2017/18 Financial Statements | Notes to the consolidated financial statements

30. Financial risk management continued

(a) Credit risk

We are exposed to the risk of loss resulting from counterparties' default on their commitments including failure to pay or make a delivery on a contract. This risk is inherent in our commercial business activities. We are exposed to credit risk on our cash and cash equivalents, derivative financial instruments, deposits with banks and financial institutions, as well as credit exposures to wholesale and retail customers, including outstanding receivables and committed transactions.

Treasury credit risk

Counterparty risk arises from the investment of surplus funds and from the use of derivative financial instruments. As at 31 March 2018, the following limits were in place for investments held with banks and financial institutions:

	Maximum limit	Long-term limit
	£m	£m
Triple 'A' G7 sovereign entities (AAA)	1,853	927
Triple 'A' vehicles (AAA)	500	—
Triple 'A' range institutions and non G7 sovereign entities (AAA)	1,011	506
Double 'A+' G7 sovereign entities (AA+)	1,685	843
Double 'A' range institutions (AA)	674 to 843	337 to 421
Single 'A' range institutions (A)	236 to 337	118 to 169

The maximum limit applies to all transactions, including long-term transactions. The long-term limit applies to transactions which mature in more than 12 months' time.

As at 31 March 2017 and 2018, we had a number of exposures to individual counterparties. In accordance with our treasury policies, counterparty credit exposure utilisations are monitored daily against the counterparty credit limits. Counterparty credit ratings and market conditions are reviewed continually with limits being revised and utilisation adjusted, if appropriate. Management does not expect any significant losses from non performance by these counterparties.

Commodity credit risk

The credit policy for US-based commodity transactions is owned by the Finance Committee to the Board, which establishes controls and procedures to determine, monitor and minimise the credit exposure to counterparties. Authority to administer the policy has been delegated to the Energy Procurement Risk Management Committee by the Board and the Executive Committee.

Wholesale and retail credit risk

Our principal commercial exposure in the UK is governed by the credit rules within the regulated codes: Uniform Network Code and Connection and Use of System Code. These set out the level of credit relative to the RAV for each credit rating. In the US, we are required to supply electricity and gas under state regulations. Our credit policies and practices are designed to limit credit exposure by collecting security deposits prior to providing utility services, or after utility service has commenced if certain applicable regulatory requirements are met. Collection activities are managed on a daily basis. Sales to retail customers are usually settled in cash, cheques, electronic bank payments or by using major credit cards. We are committed to measuring, monitoring, minimising and recording counterparty credit risk in our wholesale business. The utilisation of credit limits is regularly monitored and collateral is collected against these accounts when necessary. Management does not expect any significant losses of receivables that have not been provided for as shown in note 18.

Offsetting financial assets and liabilities

The following tables set out our financial assets and liabilities which are subject to offset and to enforceable master netting arrangements or similar agreements. The tables show the amounts which are offset and reported net in the statement of financial position. Amounts which cannot be offset under IFRS, but which could be settled net under terms of master netting agreements if certain conditions arise, and with collateral received or pledged, are shown to present National Grid's net exposure.

Financial assets and liabilities on different transactions are only reported net if the transactions are with the same counterparty, a currently enforceable legal right of offset exists and the cash flows are intended to be settled on a net basis.

Amounts which do not meet the criteria for offsetting on the statement of financial position, but could be settled net in certain circumstances, principally relate to derivative transactions under ISDA agreements where each party has the option to settle amounts on a net basis in the event of default of the other party.

Commodity contract derivatives that have not been offset on the balance sheet may be settled net in certain circumstances under ISDA or NAESB (North American Energy Standards Board) agreements.

National Grid has similar arrangements in relation to bank account balances and bank overdrafts, and trade payables and trade receivables which are subject to general terms and conditions. However, these balances are immaterial.

160 National Grid Annual Report and Accounts 2017/18 Financial Statements | Notes to the consolidated financial statements

30. Financial risk management continued

(b) Liquidity risk

Our policy is to determine our liquidity requirements by the use of both short-term and long-term cash flow forecasts. These forecasts are supplemented by a financial headroom analysis which is used to assess funding requirements for at least a 24-month period and maintain adequate liquidity for a continuous 12-month period.

We believe our contractual obligations, including those shown in commitments and contingencies in note 28 can be met from existing cash and investments, operating cash flows and other financings that we reasonably expect to be able to secure in the future, together with the use of committed facilities if required.

Our debt agreements and banking facilities contain covenants, including those relating to the periodic and timely provision of financial information by the issuing entity and financial covenants such as restrictions on the level of subsidiary indebtedness. Failure to comply with these covenants, or to obtain waivers of those requirements, could in some cases trigger a right, at the lender's discretion, to require repayment of some of our debt and may restrict our ability to draw upon our facilities or access the capital markets.

The following is an analysis of the contractual undiscounted cash flows payable under financial liabilities and derivative assets and liabilities as at the reporting date:

	Less than 1 year £m	1 to 2 years £m	2 to 3 years £m	More than 3 years £m	Total £m
At 31 March 2018					
Non-derivative financial liabilities					
Borrowings, excluding finance lease liabilities	(4,099)(1,642)	(2,325)	(18,023)(26,089)
Interest payments on borrowings ¹	(730)(692)(629)(12,897)(14,948)
Finance lease liabilities	(60)(60)(45)(148)(313
Other non interest-bearing liabilities	(2,840)(359)—	—	(3,199)
Derivative financial liabilities					
Derivative contracts – receipts	1,069	601	130	250	2,050
Derivative contracts – payments	(890)(263)(188)(529)(1,870)
Commodity contract derivatives	(80)(33)(26)1	(138)
	(7,630)(2,448)	(3,083)	(31,346)(44,507)
At 31 March 2017					
Non-derivative financial liabilities					
Borrowings, excluding finance lease liabilities	(5,142)(1,864)	(1,750)	(19,245)(28,001)
Interest payments on borrowings ¹	(767)(707)(670)(12,975)(15,119)
Finance lease liabilities	(66)(58)(61)(183)(368)
Other non interest-bearing liabilities	(2,989)(260)—	—	(3,249)
Derivative financial liabilities					
Derivative contracts – receipts	571	961	572	234	2,338
Derivative contracts – payments	(1,551)(959)(304)(610)(3,424)
Commodity contract derivatives	(15)(18)(8)—	(41)
	(9,959)(2,905)	(2,221)	(32,779)(47,864)

The interest on borrowings is calculated based on borrowings held at 31 March without taking account of future 1. issues. Floating rate interest is estimated using a forward interest rate curve as at 31 March. Payments are included on the basis of the earliest date on which the Company can be required to settle.

(c) Interest rate risk

National Grid's interest rate risk arises from our long-term borrowings. Borrowings issued at variable rates expose National Grid to cash flow interest rate risk, partially offset by cash held at variable rates. Borrowings issued at fixed rates expose National Grid to fair value interest rate risk.

Our interest rate risk management policy is to seek to minimise total financing costs (being interest costs and changes in the market value of debt) subject to constraints. We do this by using fixed and floating rate debt and derivative financial instruments including interest rate swaps, swaptions and forward rate agreements.

We hold some borrowings on issue that are inflation linked. We believe that these provide a partial economic offset to the inflation risk associated with our UK inflation linked revenues.

The table in note 20 sets out the carrying amount, by contractual maturity, of borrowings that are exposed to interest rate risk before taking into account interest rate swaps.

Financial investments	31	2,625	—	38	2,694	44	8,691	—	6	8,741
Borrowings	(16,144)	(3,191)	(7,290)	—	(26,625)	(17,681)	(3,917)	(7,040)	—	(28,638)
Pre-derivative position	(16,113)	(264)	(7,290)	65	(23,602)	(16,697)	4,973	(7,040)	6	(18,758)
Derivative effect	1,735	(1,237)	102	—	600	1,424	(1,785)	(155)	—	(516)
Net debt position	(14,378)	(1,501)	(7,188)	65	(23,002)	(15,273)	3,188	(7,195)	6	(19,274)

¹ Represents financial instruments which are not directly affected by interest rate risk, such as investments in equity or other similar financial instruments.

(d) Currency risk

National Grid operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities, and investments in foreign operations.

Our policy for managing foreign exchange transaction risk is to hedge contractually committed foreign currency cash flows over a prescribed minimum size. Where foreign currency cash flow forecasts are less certain, our policy is to hedge a proportion of such cash flows. Instruments used to manage foreign exchange transaction risk include foreign exchange forward contracts and foreign exchange swaps.

Our policy for managing foreign exchange translation risk relating to our net investment in foreign operations is to maintain cross-currency swaps and foreign exchange forwards so as to provide an economic offset. The primary managed foreign exchange exposure arises from the dollar denominated assets and liabilities held by our US operations, with a further small euro exposure in respect of joint venture investments.

During 2018 and 2017, derivative financial instruments were used to manage foreign currency risk as follows:

	2018					2017				
	Sterling £m	Euro £m	Dollar £m	Other £m	Total £m	Sterling £m	Euro £m	Dollar £m	Other £m	Total £m
Cash and cash equivalents	294	2	33	—	329	1,110	—	29	—	1,139
Financial investments	1,471	69	1,125	29	2,694	6,824	98	1,753	66	8,741
Borrowings	(10,912)	(3,794)	(11,068)	(851)	(26,625)	(11,099)	(5,373)	(10,729)	(1,437)	(28,638)
Pre-derivative position	(9,147)	(3,723)	(9,910)	(822)	(23,602)	(3,165)	(5,275)	(8,947)	(1,371)	(18,758)
Derivative effect	3,748	3,793	(7,992)	1,051	600	2,310	6,241	(10,708)	1,641	(516)
Net debt position	(5,399)	70	(17,902)	229	(23,002)	(855)	966	(19,655)	270	(19,274)

The exposure to dollars largely relates to our net investment hedge activities; exposure to euros largely relates to hedges for our future non-sterling capital expenditure as described in note 16.

The currency exposure on other financial instruments is as follows:

	2018				2017					
	Sterling £m	Euro £m	Dollar £m	Other £m	Total £m	Sterling £m	Euro £m	Dollar £m	Other £m	Total £m
Trade and other receivables	253	—	1,528	—	1,781	83	—	1,660	—	1,743
Trade and other payables	(1,124)	—	(1,793)	—	(2,917)	(1,209)	—	(1,795)	—	(3,004)
Other non-current liabilities	(144)	—	(254)	—	(398)	(100)	—	(315)	—	(415)

The carrying amounts of other financial instruments are denominated in the above currencies, which in most instances are the functional currency of the respective subsidiaries. Our exposure to dollars is due to activities in our US subsidiaries. We do not have any other significant exposure to currency risk on these balances.

30. Financial risk management continued

(e) Capital risk management

The capital structure of the Group consists of shareholders' equity, as disclosed in the consolidated statement of changes in equity, and net debt (note 27). National Grid's objectives when managing capital are: to safeguard our ability to continue as a going concern; to remain within regulatory constraints of our regulated operating companies; and to maintain an efficient mix of debt and equity funding thus achieving an optimal capital structure and cost of capital. We regularly review and manage the capital structure as appropriate in order to achieve these objectives.

Maintaining appropriate credit ratings for our operating and holding companies is an important aspect of our capital risk management strategy and balance sheet efficiency. As noted on page 24, we monitor our balance sheet efficiency using several metrics including retained cash flow/net debt (RCF), interest cover and gearing. Retained cash flow/net debt and interest cover for the Group for the year ended 31 March 2018 were 9.7% (2017: 14.9%) and 4.4 (2017: 5.0) respectively. We believe these are consistent with the current credit ratings for National Grid plc and the main operating companies within the Group, based on guidance from the rating agencies.

We monitor the RAV gearing within each of NGET and the regulated transmission businesses within NGG. This is calculated as net debt expressed as a percentage of RAV, and indicates the level of debt employed to fund our UK regulated businesses. It is compared with the level of RAV gearing indicated by Ofgem as being appropriate for these businesses, at around 60% to 62.5%. We also monitor net debt as a percentage of rate base for our US operating companies, comparing this with the allowed rate base gearing inherent within each of our agreed rate plans.

The majority of our regulated operating companies in the US and the UK are subject to certain restrictions on the payment of dividends by administrative order, contract and/or licence. The types of restrictions that a company may have that would prevent a dividend being declared or paid unless they are met include:

- dividends must be approved in advance by the relevant US state regulatory commission;
- the subsidiary must have at least two recognised rating agency credit ratings of at least investment grade;
- dividends must be limited to cumulative retained earnings, including pre-acquisition retained earnings;
- National Grid plc must maintain an investment grade credit rating and if that rating is the lowest investment grade bond rating it cannot have a negative watch/review for downgrade notice by a credit rating agency;
- the subsidiary must not carry on any activities other than those permitted by the licences;
- the subsidiary must not create any cross-default obligations or give or receive any intra-group cross-subsidies; and
- the percentage of equity compared with total capital of the subsidiary must remain above certain levels.

There is a further restriction relating only to the Narragansett Electric Company, which is required to maintain its consolidated net worth above certain levels.

These restrictions are subject to alteration in the US as and when a new rate case or rate plan is agreed with the relevant regulatory bodies for each operating company and in the UK through the normal licence review process.

As most of our business is regulated, at 31 March 2018 the majority of our net assets are subject to some of the restrictions noted above. These restrictions are not considered to be significantly onerous, nor do we currently expect they will prevent the planned payment of dividends in future in line with our dividend policy.

Some of our regulatory and bank loan agreements additionally impose lower limits for the long-term credit ratings that certain companies within the Group must hold. All the above requirements are monitored on a regular basis in order to ensure compliance. The Group has complied with all externally imposed capital requirements to which it is subject.

(f) Fair value analysis

Included in the statement of financial position are financial instruments which have been measured at fair value. These fair values can be categorised into hierarchy levels that are representative of the inputs used in measuring the fair value. The best evidence of fair value is a quoted price in an actively traded market. In the event that the market for a financial instrument is not active, a valuation technique is used.

	2018				2017			
	Level 1 £m	Level 2 £m	Level 3 £m	Total £m	Level 1 £m	Level 2 £m	Level 3 £m	Total £m

Notes to the consolidated financial statements
– supplementary information continued

30. Financial risk management continued

(f) Fair value analysis continued

Our level 3 derivative financial instruments include cross-currency swaps, inflation linked swaps and equity options, all of which are traded on illiquid markets. In valuing these instruments we use in-house valuation models and obtain external valuations to support each reported fair value.

Our level 3 commodity contract derivatives primarily consist of our forward purchases of electricity and gas where pricing inputs are unobservable, as well as other complex transactions. Complex transactions can introduce the need for internally developed models based on reasonable assumptions. Industry standard valuation techniques such as the Black-Scholes pricing model and Monte Carlo simulation are used for valuing such instruments. Level 3 is also applied in cases when optionality is present or where an extrapolated forward curve is considered unobservable. We consider forward curves to be unobservable if observed market transactions differ from the curve by more than 5%.

Our level 3 investments include investments in associates relating to Sunrun Neptune Investor 2016 LLC, accounted at fair value (see note 15), and £5 million Series B preferred stocks in Enbala Holdings, Inc., accounted for as an available-for-sale investment. The Group is also party to the Further Acquisition Agreement (FAA) which contains a put/call option over 14% of the loan and equity it holds in Cadent (through its investment in Quadgas HoldCo Limited). The FAA is a derivative, which is accounted for at fair value, and the assumptions which are used to determine fair value are specific to the contract and not readily observable in active markets. The fair value of the option is £110 million (2017: £nil).

The changes in value of our level 3 derivative financial instruments are as follows:

	Financing derivatives/ Further Acquisition Agreement derivative		Commodity contract derivatives		Investments in associates and available-for-sale investments		Total	
	2018	2017	2018	2017	2018	2017	2018	2017
	£m	£m	£m	£m	£m	£m	£m	£m
At 1 April	(465)	(196)	(16)	(27)	46	—	(435)	(223)
Net gains/(losses) for the year ^{1,2}	125	(35)	8	(2)	—	—	133	(37)
Purchases	—	—	27	15	41	46	68	61
Settlements	231	—	(20)	(2)	(3)	—	208	(2)
Reclassification into level 3	—	(234)	—	—	—	—	—	(234)
At 31 March	(109)	(465)	(1)	(16)	84	46	(26)	(435)

¹ Gain of £125 million (2017: £35 million loss) is attributable to derivative financial instruments held at the end of the reporting period and has been recognised in finance costs in the income statement.

² Gain of £35 million (2017: £21 million loss) is attributable to commodity contract derivative financial instruments held at the end of the reporting period.

The impacts on a post-tax basis of reasonably possible changes in significant level 3 assumptions are as follows:

Financing derivatives		Commodity contract derivatives	
2018	2017	2018	2017
£m	£m	£m	£m

Edgar Filing: NATIONAL GRID PLC - Form 20-F

10% increase in commodity prices ¹	—	—	(1)1
10% decrease in commodity prices ¹	—	—	3	—
Volume forecast uplift ²	—	—	—	(1)
Volume forecast reduction ²	—	—	—	1
+10% market area price change	—	—	(6)(13)
-10% market area price change	—	—	5	9
+20 basis points change in Limited Price Inflation (LPI) market curve ³	(84)(93)	—
-20 basis points change in LPI market curve ³	82	88	—	—

1. Level 3 commodity price sensitivity is included within the sensitivity analysis disclosed in note 33.

2. Volumes were flexed using maximum and minimum historical averages, or by >10% where historical averages were not available.

3. A reasonably possible change in assumption of other level 3 derivative financial instruments is unlikely to result in a material change in fair values.

The impacts disclosed above were considered on a contract by contract basis with the most significant unobservable inputs identified. The level 3 investments were acquired in the period on market terms and sensitivity is considered insignificant at 31 March 2018. A 50 basis point change in the discount rate is used to determine the sensitivity of the fair value of our investment in Sunrun Neptune 2016 LLC. A 50 basis point increase/(decrease) would (decrease)/increase the fair value by £(5) million/£6 million (2017: £(8) million/£8 million) respectively.

A 5 percentage point decrease in the offer price received from Quadgas Investments BidCo Limited on 30 April 2018 applied in valuing the FAA would increase the fair value by approximately £39 million.

31. Borrowing facilities

To support our long-term liquidity requirements and provide backup to commercial paper and other borrowings, we agree loan facilities with financial institutions over and above the value of borrowings that may be required. These facilities have never been drawn, and our undrawn amounts are listed below.

At 31 March 2018, we had bilateral committed credit facilities of £5,438 million (2017: £4,938 million). In addition, we had committed credit facilities from syndicates of banks of £245 million at 31 March 2018 (2017: £338 million). All committed credit facilities were undrawn in 2018 and 2017. An analysis of the maturity of these undrawn committed facilities is shown below:

	2018	2017
	£m	£m
Undrawn committed borrowing facilities expiring:		
Less than 1 year	—	—
In 1 to 2 years	3,910	1,115
In 2 to 3 years	—	2,388
In 3 to 4 years	—	—
In 4 to 5 years	1,773	1,773
More than 5 years	—	—
	5,683	5,276

Of the unused facilities at 31 March 2018, £5,438 million (2017: £4,938 million) is available for liquidity purposes, while £245 million (2017: £338 million) is available as backup to specific US borrowings.

In addition to the above, the Group has Export Credit Agreements (ECAs) totalling £797 million (2017: £600 million), of which £704 million (2017: £562 million) is undrawn. During the year, two new ECAs totalling £261 million were made available, of which £239 million is undrawn. Of the £3,910 million of undrawn committed borrowing facilities due to expire within 1 to 2 years, £1,255 million was renegotiated before 31 March 2018, with effect from 1 June 2018. This amount has increased to £1,380 million with the expiry extended to more than 5 years.

Further information on our bonds can be found on the debt investor section of our website. Unless included in these financial statements the information on our website is unaudited.

Notes to the consolidated financial statements
– supplementary information continued

32. Subsidiary undertakings, joint ventures and associates

While we present consolidated results in these financial statements as if we were one company, our legal structure is such that there are a number of different operating and holding companies that contribute to the overall result. This structure has evolved through acquisitions as well as regulatory requirements to have certain activities within separate legal entities.

Subsidiary undertakings

A list of the Group's subsidiaries as at 31 March 2018 is given below. The entire share capital of subsidiaries is held within the Group except where the Group's ownership percentages are shown. These percentages give the Group's ultimate interest and therefore allow for the situation where subsidiaries are owned by partly-owned intermediate subsidiaries. Where subsidiaries have different classes of shares, this is largely for historical reasons and the effective percentage holdings given represent both the Group's voting rights and equity holding. Shares in National Grid (US) Holdings Limited, National Grid Holdings One plc and NGG Finance plc are held directly by National Grid plc. All other holdings in subsidiaries are owned by other subsidiaries within the Group. All subsidiaries are consolidated in the Group's financial statements.

Principal Group companies are identified in bold. These companies are incorporated and principally operate in the countries under which they are shown.

33. Sensitivities

In order to give a clearer picture of the impact on our results or financial position of potential changes in significant estimates and assumptions, the following sensitivities are presented. These sensitivities are hypothetical, as they are based on assumptions and conditions prevailing at the year-end, and should be used with caution. The effects provided are not necessarily indicative of the actual effects that would be experienced because our actual exposures are constantly changing.

The sensitivities in the tables below show the potential impact in the income statement (and consequential impact on net assets) for a reasonably possible range of different variables each of which have been considered in isolation (i.e. with all other variables remaining constant). There are a number of these sensitivities which are mutually exclusive and therefore if one were to happen, another would not, meaning a total showing how sensitive our results are to these external factors is not meaningful.

The sensitivities included in the tables below broadly have an equal and opposite effect if the sensitivity increases or decreases by the same amount unless otherwise stated.

(a) Sensitivities on areas of estimation uncertainty

The table below sets out the sensitivity analysis for each of the areas of estimation uncertainty set out in note 1E. These estimates are those that have a significant risk of resulting in a material adjustment to the carrying values of assets and liabilities in the next year.

	2018		2017	
	Income statement	Net assets	Income statement	Net assets
	£m	£m	£m	£m
Pensions and other post-retirement benefits ¹ (pre-tax):				
UK discount rate change of 0.5% ²	8	1,075	9	1,305
US discount rate change of 0.5% ²	15	623	17	669
UK RPI rate change of 0.5% ³	5	965	8	1,114
UK long-term rate of increase in salaries change of 0.5% ⁴	—	61	2	80
US long-term rate of increase in salaries change of 0.5%	3	44	3	51
UK change of one year to life expectancy at age 65	2	588	2	673
US change of one year to life expectancy at age 65	4	359	4	365
Assumed US healthcare cost trend rates change of 1%	31	448	37	510
Environmental provision:				
10% change in estimated future cash flows	154	154	175	175
0.5% change in discount rate	56	56	67	67

¹ The changes shown are a change in the annual pension or other post-retirement benefit service charge and change in the defined benefit obligations.

² A change in the discount rate is likely to occur as a result of changes in bond yields and as such would be expected to be offset to a significant degree by a change in the value of the bond assets held by the plans.

³ The projected impact resulting from a change in RPI reflects the underlying effect on pensions in payment, pensions in deferment and resultant increases in salary assumptions.

⁴ This change has been applied to both the pre 1 April 2014 and post 1 April 2014 rate of increase in salary assumption.

Pensions and other post-retirement benefits assumptions

Sensitivities have been prepared to show how the defined benefit obligations and annual service costs could potentially be impacted by changes in the relevant actuarial assumption that were reasonably possible as at 31 March 2018. In preparing sensitivities the potential impact has been calculated by applying the change to each assumption in

isolation and assuming all other assumptions remain unchanged. This is with the exception of RPI in the UK where the corresponding change to increases to pensions in payment, increases to pensions in deferment and increases in salary is recognised.

33. Sensitivities continued

(b) Sensitivities on financial instruments

We are further required to show additional sensitivity analysis under IFRS 7 and these are shown separately in the subsequent table due to the additional assumptions that are made in order to produce meaningful sensitivity disclosures.

Our financial instruments are sensitive to changes in market variables, being UK and US interest rates, the UK RPI and the dollar to sterling exchange rate. The changes in market variables impact the valuation of our borrowings, deposits, derivative financial instruments and commodity contract derivatives. The analysis illustrates the sensitivity of our financial instruments to reasonably possible changes in market variables.

The following main assumptions were made in calculating the sensitivity analysis for continuing operations:

the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives portfolio, and the proportion of financial instruments in foreign currencies are all constant and on the basis of the hedge designations in place at 31 March 2018 and 2017 respectively;

the statement of financial position sensitivity to interest rates relates only to derivative financial instruments and available-for-sale investments, as debt and other deposits are carried at amortised cost and so their carrying value does not change as interest rates move;

the sensitivity of accrued interest to movements in interest rates is calculated on net floating rate exposures on debt, deposits and derivative instruments;

changes in the carrying value of derivatives from movements in interest rates of designated cash flow hedges are assumed to be recorded fully within equity; and

changes in the carrying value of derivative financial instruments designated as net investment hedges from movements in interest rates are recorded in the income statement as they are designated using the spot rather than the forward translation method. The impact of movements in the dollar to sterling exchange rate are recorded directly in equity.

	2018		2017	
	Income statement £m	Other equity reserves £m	Income statement £m	Other equity reserves £m
Financial risk (post-tax) ¹ :				
UK RPI change of 0.5% ²	30	—	28	—
UK interest rates change of 0.5%	43	26	64	35
US interest rates change of 0.5%	39	17	61	22
US dollar exchange rate change of 10% ³	48	479	46	604

1. Excludes sensitivities to the Further Acquisition Agreement derivative. Further details on sensitivities are provided in note 30(f).

2. Excludes sensitivities to LPI curve. Further details on sensitivities are provided in note 30(f).

The other equity reserves impact does not reflect the exchange translation in our US subsidiaries' net assets. It is estimated this would change by £1,040 million (2017: £988 million) in the opposite direction if the dollar exchange rate changed by 10%.

Additional sensitivities in respect to commodity price risk and to our derivative fair values are as follows:

2018		2017	
Income statement	Net assets	Income statement	Net assets

Edgar Filing: NATIONAL GRID PLC - Form 20-F

	£m	£m	£m	£m
Commodity risk ¹ (post-tax):				
10% increase in commodity prices	23	23	28	28
10% decrease in commodity prices	(23)	(23)	(29)	(29)
Assets and liabilities carried at fair value (pre-tax) ² :				
10% fair value change in derivative financial instruments ³	60	60	(52)	(52)
10% fair value change in commodity contract derivative liabilities	(5)	(5)	(6)	(6)

1. Represents potential impact on fair values of commodity contract derivatives only.

2. Excludes sensitivities to the Further Acquisition Agreement derivative. Further details on sensitivities are provided in note 30(f).

3. The effect of a 10% change in fair value assumes no hedge accounting.

170 National Grid Annual Report and Accounts 2017/18 Financial Statements | Notes to the consolidated financial statements

34. Additional disclosures in respect of guaranteed securities

We have three debt issuances (including preferred shares) that are listed on a US national securities exchange and are guaranteed by other companies in the Group. These guarantors commit to honour any liabilities should the company issuing the debt have any financial difficulties. In order to provide debt holders with information on the financial stability of the companies providing the guarantees, we are required to disclose individual financial information for these companies. We have chosen to include this information in the Group financial statements rather than submitting separate stand-alone financial statements.

The following condensed consolidating financial information, comprising statements of comprehensive income, statements of financial position and cash flow statements, is given in respect of National Grid Gas plc (subsidiary guarantor), which became joint full and unconditional guarantor on 11 May 2004 with National Grid plc (parent guarantor) of the 6.625% Guaranteed Notes due 2018 issued in June 1998 by British Transco Finance Inc., then known as British Gas Finance Inc. (issuer of notes). These Guaranteed Notes will be repaid on 1 June 2018.

Condensed consolidating financial information is also provided in respect of Niagara Mohawk Power Corporation as a result of National Grid plc's guarantee, dated 29 October 2007, of Niagara Mohawk's 3.6% and 3.9% issued preferred shares. National Grid Gas plc, British Transco Finance Inc., and Niagara Mohawk Power Corporation are 100% owned and National Grid plc's guarantee of Niagara Mohawk Power Corporation's preferred shares is full and unconditional pursuant to Rule 3-10(i)(8) (i) and (ii) of Regulation S-X. The guarantees of National Grid Gas plc and National Grid plc are joint and several.

The following financial information for National Grid plc, National Grid Gas plc, British Transco Finance Inc., and Niagara Mohawk Power Corporation on a condensed consolidating basis is intended to provide investors with meaningful and comparable financial information, and is provided pursuant to various rules including Rule 3-10 of Regulation S-X in lieu of the separate financial statements of each subsidiary issuer of public debt securities.

This financial information should be read in conjunction with the other disclosures in these financial statements.

Summary statements of comprehensive income are presented, on a consolidated basis, for the three years ended 31 March 2018. Summary statements of comprehensive income of National Grid plc and National Grid Gas plc are presented under IFRS measurement principles, as modified by the inclusion of the results of subsidiary undertakings on the basis of equity accounting principles.

The summary statements of financial position of National Grid plc and National Grid Gas plc include the investments in subsidiaries recorded on the basis of equity accounting principles for the purposes of presenting condensed consolidating financial information under IFRS. The summary statements of financial position present these investments within non-current financial and other investments.

The consolidation adjustments column includes the necessary amounts to eliminate the intercompany balances and transactions between National Grid plc, National Grid Gas plc, British Transco Finance Inc., Niagara Mohawk Power Corporation and other subsidiaries.

35. Post balance sheet events

As set out in note 15, on 1 May 2018, the Group announced that it had entered into an agreement with Quadgas Investments BidCo Limited regarding the potential sale of its remaining 25% equity interest in Quadgas HoldCo Limited, the holding company for Cadent Gas Limited. Refer to notes 4 and 15 for details on the accounting implications on the results for the year ended 31 March 2018 in relation to this agreement.

Company accounting policies

We are required to include the stand-alone balance sheet of our ultimate parent Company, National Grid plc, under the Companies Act 2006. This is because the publicly traded shares are actually those of National Grid plc (the Company) and the following disclosures provide additional information to shareholders.

A. Basis of preparation

National Grid plc is the Parent Company of the National Grid Group which is engaged in the transmission and distribution of electricity and gas in Great Britain and northeastern US. The Company is a public limited company, limited by shares. The Company is incorporated and domiciled in England, with its registered office at 1–3 Strand, London, WC2N 5EH.

The financial statements of National Grid plc for the year ended 31 March 2018 were approved by the Board of Directors on 16 May 2018. The Company meets the definition of a qualifying entity under Financial Reporting Standard 100 (FRS 100) issued by the Financial Reporting Council. Accordingly these individual financial statements of the Company have been prepared in accordance with Financial Reporting Standard 101 'Reduced Disclosure Framework' (FRS 101). In preparing these financial statements the Company applies the recognition and measurement requirements of International Financial Reporting Standards (IFRS) as adopted by the EU, but makes amendments where necessary in order to comply with the provisions of the Companies Act 2006 and sets out below where advantage of the FRS 101 disclosure exemptions has been taken.

These individual financial statements of the Company have been prepared in accordance with applicable UK accounting and financial reporting standards and the Companies Act 2006. They have been prepared on an historical cost basis, except for the revaluation of financial instruments, and are presented in pounds sterling, which is the currency of the primary economic environment in which the Company operates. The 2017 comparative financial information has also been prepared on this basis.

These individual financial statements have been prepared on a going concern basis, which presumes that the Company has adequate resources to remain in operation, and that the Directors intend it to do so, for at least one year from the date the financial statements are signed. As the Company is part of a larger group it participates in the Group's centralised treasury arrangements and so shares banking arrangements with its subsidiaries. The Company is expected to continue to generate positive cash flows or be in a position to obtain finance via intercompany loans to continue to operate for the foreseeable future.

The Directors are not aware of any material uncertainties related to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern. Thus they continue to adopt the going concern basis of accounting in preparing the annual financial statements.

In accordance with the exemption permitted by section 408 of the Companies Act 2006, the Company has not presented its own profit and loss account or statement of comprehensive income.

The following exemptions from the requirements of IFRS have been applied in the preparation of these financial statements of the Company in accordance with FRS 101:

- 1 cash flow statement and related notes;
- 2 disclosures in respect of transactions with wholly-owned subsidiaries;
- 3 disclosures in respect of capital management; and
- 4 the effects of new but not yet effective IFRSs.

The exemption from disclosing key management personnel compensation has not been taken as there are no costs borne by the Company in respect of employees, and no related costs are recharged to the Company.

As the consolidated financial statements of National Grid plc, which are available from the registered office, include the equivalent disclosures, the Company has also taken the exemptions under FRS 101 in respect of certain disclosures required by IFRS 13 'Fair value measurement' and the disclosures required by IFRS 7 'Financial instruments: Disclosures'. The Company intends to apply the above exemptions in the financial statements for the year ending 31 March 2018.

There are no critical areas of judgement that are considered to have a significant effect on the amounts recognised in the financial statements. Key sources of estimation uncertainty that have significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are the valuation of financial instruments and derivatives.

The balance sheet has been prepared in accordance with the Company's accounting policies approved by the Board and described below:

B. Fixed asset investments

Investments held as fixed assets are stated at cost less any provisions for impairment. Investments are reviewed for impairment if events or changes in circumstances indicate that the carrying amount may not be recoverable. Impairments are calculated such that the carrying value of the fixed asset investment is the lower of its cost or recoverable amount. Recoverable amount is the higher of its net realisable value and its value-in-use.

C. Tax

Current tax for the current and prior periods is provided at the amount expected to be paid or recovered using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is provided in full on temporary differences which result in an obligation at the balance sheet date to pay more tax, or the right to pay less tax, at a future date, at tax rates expected to apply when the temporary differences reverse based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is provided for using the balance sheet liability method and is recognised on temporary differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.

D. Foreign currencies

Transactions in currencies other than the functional currency of the Company are recorded at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at closing exchange rates. Gains and losses arising on retranslation of monetary assets and liabilities are included in the profit and loss account.

E. Financial instruments

The Company's accounting policies are the same as the Group's accounting policies under IFRS, namely IAS 32 'Financial Instruments: Presentation', IAS 39 'Financial Instruments: Recognition and Measurement' and IFRS 7 'Financial Instruments: Disclosures'. The Company applies these policies only in respect of the financial instruments that it has, namely investments, derivative financial instruments, debtors, cash at bank and in hand, borrowings and creditors.

The policies are set out in notes 14, 16, 18, 19, 20 and 21 to the consolidated financial statements. The Company is taking the exemption for financial instruments disclosures, because IFRS 7 disclosures are given in notes 30 and 33 to the consolidated financial statements.

F. Hedge accounting

The Company applies the same accounting policy as the Group in respect of fair value hedges and cash flow hedges. This policy is set out in note 16 to the consolidated financial statements.

G. Parent Company guarantees

The Company has guaranteed the repayment of the principal sum, any associated premium and interest on specific loans due by certain subsidiary undertakings primarily to third parties. Such guarantees are accounted for by the Company as insurance contracts. In the event of default or non performance by the subsidiary, a liability is recorded in accordance with IAS 37 with a corresponding increase in the carrying value of the investment.

H. Share awards to employees of subsidiary undertakings

The issuance by the Company to employees of its subsidiaries of a grant over the Company's options represents additional capital contributions by the Company to its subsidiaries. An additional investment in subsidiaries results in a corresponding increase in shareholders' equity. The additional capital contribution is based on the fair value of the option at the date of grant, allocated over the underlying grant's vesting period. Where payments are subsequently received from subsidiaries, these are accounted for as a return of a capital contribution and credited against the Company's investments in subsidiaries. The Company has no employees.

I. Dividends

Interim dividends are recognised when they are paid to the Company's shareholders. Final dividends are recognised when they are approved by shareholders.

J. Directors' remuneration

Full details of Directors' remuneration are disclosed on pages 63 to 79.

Notes to the Company financial statements

1. Fixed asset investments

	Shares in subsidiary undertakings £m
At 1 April 2016	8,845
Additions	35
At 31 March 2017	8,880
Additions	1,016
At 31 March 2018	9,896

During the year there was a capital contribution of £16 million (2017: £35 million) which represents the fair value of equity instruments granted to subsidiaries' employees arising from equity-settled employee share schemes. In addition on 12 July 2017, the Company acquired a further 180,868 ordinary shares of £1 each in National Grid (US) Holdings Limited for a total consideration of £1,000 million.

The Company's direct subsidiary undertakings as at 31 March 2018 were as follows: National Grid Holdings One plc; National Grid (US) Holdings Limited; and NGG Finance plc.

The names of indirect subsidiary undertakings, joint ventures and associates are included in note 32 to the consolidated financial statements.

The Directors believe that the carrying value of the investments is supported by the fair value of their underlying net assets.

2. Debtors

	2018 £m	2017 £m
Amounts falling due within one year		
Derivative financial instruments (see note 4)	308	202
Amounts owed by subsidiary undertakings	11,254	12,734

In 2 to 3 years	1,095	—
In 3 to 4 years	—	1,062
More than 5 years	996	996
	2,091	2,058

The carrying values stated above are considered to represent the fair values of the liabilities. A reconciliation of the movement in deferred tax in the year is shown below:

	Deferred tax	
	£m	
At 1 April 2016	4	
Credited to equity (1))
At 31 March 2017	3	
Credited to equity (2))
At 31 March 2018	1	

4. Derivative financial instruments

The fair values of derivative financial instruments are:

	2018			2017		
	Assets £m	Liabilities £m	Total £m	Assets £m	Liabilities £m	Total £m
Amounts falling due within one year	308	(187))121	202	(533))(331)
Amounts falling due after more than one year	18	(41))(23)	149	(272))(123)
	326	(228))98	351	(805))(454)

For each class of derivative the notional contract¹ amounts are as follows:

	2018	2017
	£m	£m
Interest rate swaps	(2,501)	(2,801)
Cross-currency interest rate swaps	(3,613)	(3,995)
Foreign exchange forward contracts	(13,929)	(17,134)
	(20,043)	(23,930)

¹ The notional contract amounts of derivatives indicate the gross nominal value of transactions outstanding at the balance sheet date.

5. Investments

	2018	2017
	£m	£m
Investments in short-term money funds	919	4,981
Managed investments in bonds	10	100
Restricted balances – collateral	9	390
	938	5,471

6. Borrowings

The following table analyses the Company's total borrowings:

	2018	2017
	£m	£m
Amounts falling due within one year		
Bank overdrafts	—	1
Bank loans	230	—
Bonds	551	22
Commercial paper	—	1,097
	781	1,120
Amounts falling due after more than one year		
Bonds	773	1,262
	1,554	2,382

The maturity of total borrowings is disclosed in note 34 to the consolidated financial statements. There are no differences in the maturities as calculated under IFRS or FRS 101 'Reduced Disclosure Framework'.

The notional amount of borrowings outstanding as at 31 March 2018 was £1,531 million (2017: £2,357 million). Further information on significant borrowings can be found on the debt investors section of our website.

7. Share capital

The called-up share capital amounting to £452 million (2017: £449 million) consists of 3,637,747,827 ordinary shares of 12²⁰⁴/₄₇₃ pence each (2017: 3,942,983,447 ordinary shares of 11¹⁷/₄₃ pence each). For further information on share capital, refer to note 25 to the consolidated financial statements.

8. Shareholders' equity and reserves

At 31 March 2018 the profit and loss account reserve stood at £4,892 million (2017: £9,438 million) of which £86 million (2017: £86 million) related to gains on intra-group transactions which was not distributable to shareholders. The Company bore no employee costs in either the current or prior year.

For further details of dividends paid and payable to shareholders, refer to note 8 to the consolidated financial statements.

9. Parent Company guarantees

The Company has guaranteed the repayment of the principal sum, any associated premium and interest on specific loans due by certain subsidiary undertakings primarily to third parties. At 31 March 2018, the sterling equivalent amounted to £2,398 million (2017: £2,404 million). The guarantees are for varying terms from less than one year to open-ended.

In addition, as part of the sectionalisation of the National Grid UK Pension Scheme on 1 January 2017, a guarantee of £1 billion has been provided to Section A. This payment is contingent on insolvency or on failure to pay pensions obligations to Section A and can be claimed against National Grid plc, National Grid Holdings One plc or Lattice Group Limited (up to £1 billion in total). Refer to note 23 of the consolidated financial statements.

10. Audit fees

The audit fee in respect of the parent Company was £25,000 (2017: £29,230). Fees payable to Deloitte for non-audit services to the Company are not required to be disclosed as they are included within note 3 to the consolidated financial statements.

The business in detail continued UK Regulation There is a range of different regulatory models available for Our licences to participate in transmission and interconnection activities interconnector projects. These involve various levels of regulatory are established under the Gas Act 1986 and Electricity Act 1989, as intervention, ranging from fully merchant (the project is fully reliant on amended (the Acts). They require us to develop, maintain and operate sales of interconnector capacity) to cap and floor (where sales revenues economic and efficient networks and to facilitate competition in the above the cap are returned to transmission system users and revenues supply of gas and electricity in Great Britain (GB). They also give us below the floor are topped up by transmission system users, thus statutory powers, including the right to bury our pipes or cables under reducing the overall project risk). public highways and the ability to use compulsory powers to purchase land so we can conduct our business. The cap and floor regime is now the regulated route for interconnector investment in GB and may be sought by project developers who do not Our networks are regulated by Ofgem, which has a statutory duty qualify or do not wish to apply for exemptions from European legislation under the Acts to protect the interests of consumers. As part of our which would facilitate a merchant development. licences, Ofgem established price controls that limit the amount of revenue our regulated businesses can earn. This gives us a specified RIIO price controls level of revenue for the duration of the price control that is sufficient The building blocks of the RIIO price control are broadly similar to the to meet our statutory duties and licence obligations, and make a historical price controls used in the UK. However, there are some reasonable return on our investments. significant differences in the mechanics of the calculations. The price controls include a number of mechanisms designed to How is revenue calculated? help achieve its objectives. These include financial incentives that Under RIIO, the outputs we deliver are explicitly articulated and our encourage us to: allowed revenues are linked to their delivery. These outputs have been • efficiently deliver by investment and maintenance the network outputs determined through an extensive consultation process, which has given that customers and stakeholders require, including reliable supplies, stakeholders a greater opportunity to influence the decisions. new connections and infrastructure capacity; • innovate in order to continuously improve the services we give There are five output categories for transmission: our customers, stakeholders and communities; and • efficiently balance the transmission networks to support the Safety: ensuring the provision of a safe energy network. wholesale markets. Reliability (and availability): promoting networks capable of delivering The main price controls for electricity and gas transmission networks long-term reliability, as well as minimising the number and duration of came into effect on 1 April 2013 for the eight-year period until 31 March interruptions experienced over the price control period, and ensuring 2021. They follow the RIIO (revenue = incentives + innovation + outputs) adaptation to climate change. framework established by Ofgem. Environmental impact: encouraging companies to play their role in Following the sale of a majority interest in the National Grid UK Gas achieving broader environmental objectives – specifically, facilitating Distribution business (now known as Cadent) on 31 March 2017, the reduction of carbon emissions – as well as minimising their own Cadent now has responsibility for operating within the price controls carbon footprint. relating to its four gas distribution networks. Customer and stakeholder satisfaction: maintaining high levels Our UK Electricity Transmission (UK ET) and UK Gas Transmission of customer satisfaction and stakeholder engagement, and improving (UK GT) businesses operate under four separate price controls. These service levels. comprise two for our UK ET operations, one covering our role as transmission owner (TO) and the other for our role as System Operator Customer connections: encouraging networks to connect customers (SO); and two for our UK GT operations, again one as TO and one as SO. quickly and efficiently. In addition to the four regulated network price controls, there is also a tariff cap price control applied to certain elements of domestic sized Within each of these output categories are a number of primary and metering activities carried out by National Grid Metering. secondary deliverables, reflecting what our stakeholders want us to deliver over the remaining price control period. The nature and number Interconnectors derive their revenues from sales of capacity to users of these deliverables varies according to the output category, with some who wish to move power between market areas with different prices. being linked directly to our allowed revenue, some linked to legislation, Under European legislation, these capacity sales are classified as and others having only a reputational impact. congestion revenues because the market price differences result from congestion on the established interconnector capacity which limits Ofgem, using information we have submitted, along with independent full price convergence. European legislation governs how congestion assessments, determines the efficient level of expected costs necessary revenues may be used and how interconnection capacity is allocated. to deliver them. Under RIIO this is known as totex, which is a component It requires all interconnection capacity to be allocated to the market of total allowable expenditure, and is broadly the sum of what was through auctions. Under UK legislation, interconnection businesses defined in previous price controls as operating expenditure (opex) must be separate from transmission businesses. and capital expenditure (capex). A number of assumptions are necessary in setting allowances for these outputs, including the volumes of work that will be needed and the price of the various external inputs to achieve them. Consequently, there are a number of uncertainty mechanisms within the RIIO framework that can result in adjustments to totex allowances if actual input prices or work volumes differ from the assumptions. These mechanisms protect us and our customers from windfall gains and losses. 186 National Grid Annual Report and Accounts 2017/18 Additional Information | The business in detail

Vanilla WACC = cost of debt x gearing + cost of equity x (1-gearing). a provision for a mid-period review, with scope driven by: The sharing factor means that any over- and under-spend is shared • changes to outputs that can be justified by clear changes in between the businesses and customers. The shared figures displayed government policy; and in the table below are the sharing factors that apply to UK ET and UK GT. • the introduction of new outputs that are needed to meet the needs of consumers and other network users. Sharing factors under our current RIIO price controls are as follows: The mid-period review of the electricity and gas transmission controls Gas Transmission Electricity Transmission focused on three specific areas, as follows: Transmission System Transmission System 1) a revised need for certain electricity transmission asset renewal Operator Operator Operator Operator Operator outputs with associated reduction of allowances of £38.1 million Baseline3 35.6% (in 2009/2010 prices); Fast1 Uncertainty 10% 62.60% 15.00% 72.10% 2) a

removal of the need for the Avonmouth pipeline and associated Baseline3 64.4% reduction in allowances of £168.8 million (in 2009/2010 prices); and 2 3) a need for extra Electricity System Operator activities to meet the Slow Uncertainty 90% 37.40% 85.00% 27.9 0% demands of consumers and network users with an associated Sharing 44.36% 46.89% increase in allowances of £21.5 million (in 2009/2010 prices). 1. Fast money allows network companies to recover a percentage of totex within a one-year period. Ofgem also separately reviewed the obligation to provide additional gas 2. Slow money is where costs are added to RAV and, therefore, revenues are recovered entry capacity at Fleetwood. It concluded that this additional capacity was slowly (e.g. over 45 years) from both current and future consumers. not required, so no incremental revenues would be payable. National Grid 3. The baseline is the expenditure that is funded through ex-ante allowances, whereas the uncertainty adjusts the allowed expenditure where the level of outputs delivered differ had incurred no incremental costs in anticipation of this obligation. from the baseline level, or if triggered by an event. Further to the mid-period review, National Grid volunteered that £480 million (in 2009/2010 prices) of allowances for electricity transmission investments should be deferred and in August 2017 Ofgem determined how the RIIO allowances would be correspondingly adjusted. Competition in onshore transmission Ofgem stated in its final decision on the RIIO control for electricity transmission that it would consider holding a competition to appoint the constructor and owner of suitably large and separable new transmission projects, rather than including these new outputs and allowances in existing transmission licensee price controls. On 23 January 2018, Ofgem proposed that, in the absence of required legislation to support a competition, it would set allowances for National Grid to undertake the transmission works associated with connecting the Hinkley Point C power station but with reduced allowances reflecting prices it has observed in other competitions. The consultation closed on 20 March 2018 and said that Ofgem expected to make a decision on this treatment in the spring of 2018. The business in detail continued US Regulation customer participation in energy efficiency programmes that lower Regulators energy end use and thus distribution volumes. In the US, public utilities' retail transactions are regulated by state utility commissions. The commissions serve as economic regulators. Our rate plans are designed to a specific allowed RoE, by reference to an approving cost recovery and authorised rates of return. The state allowed operating expense level and rate base. Some rate plans include commissions establish the retail rates to recover the cost of transmission earnings sharing mechanisms that allow us to retain a proportion of the and distribution services, and focus on services and costs within earnings above our allowed RoE, achieved through improving efficiency, their jurisdictions. They also serve the public interest by making sure with the balance benefiting customers. utilities provide safe and reliable service at just and reasonable prices. The commissions establish service standards and approve public In addition, our performance under certain rate plans is subject to service utility mergers and acquisitions. performance targets. We may be subject to monetary penalties in cases where we do not meet those targets. Utilities are regulated at the federal level (FERC) for wholesale transactions, such as interstate transmission and wholesale electricity One measure used to monitor the performance of our regulated sales, including rates for these services. FERC also regulates public businesses is a comparison of achieved RoE to allowed RoE. However, utility holding companies and centralised service companies, including this measure cannot be used in isolation, as there are a number of those of our US businesses. factors that may prevent us from achieving the allowed RoE. These factors include financial market conditions, regulatory lag, and decisions Regulatory process by the regulator preventing cost recovery in rates from customers. The US regulatory regime is premised on allowing the utility the opportunity to recover its cost of service and earn a reasonable return on We work to increase achieved RoE through: productivity improvements; its investments as determined by the commission. Utilities submit formal positive performance against incentives or earned savings mechanisms rate filings ('rate cases') to the relevant state regulator when additional such as energy efficiency programmes, where available; and filing a new revenues are necessary to provide safe, reliable service to customers. rate case when achieved returns are lower than the Company could Utilities can be compelled to file a rate case due to complaints filed reasonably expect to attain through a new rate case. with the commission or at the commission's own discretion. Features of our rate plans The rate case is typically litigated with parties representing customers We bill our customers for their use of electricity and gas services. and other interests. In the states in which we operate, it can take nine Customer bills typically comprise a commodity charge, covering the to thirteen months for the commission to render a final decision. The cost of the electricity or gas delivered, and charges covering our delivery utility is required to prove that the requested rate change is prudent service. With the exception of residential gas customers in Rhode Island, and reasonable, and the requested rate plan can span multiple years. our customers are allowed to select an unregulated competitive supplier Unlike the state processes, the federal regulator has not specified for the commodity component of electricity and gas utility services. timeline for adjudicating a rate case, but typically makes a final decision retroactive when the case is completed. A substantial proportion of our costs, in particular electricity and gas commodity purchases, are pass-through costs, which means they are Gas and electricity rates are established from a revenue requirement, fully recoverable from our customers. These pass-through costs are or cost of service, equal to the utility's total cost of providing distribution recovered through separate charges to customers that are designed to or delivery service to its customers, as approved by the commission in recover those costs with no profit. Rates are adjusted from time to time the rate case. This revenue requirement includes operating expenses, to make sure that any over- or under-recovery of these costs is returned depreciation, taxes and a fair and reasonable return on shareholder to, or recovered from, our customers. capital invested in certain components of the utility's regulated asset base, typically referred to as its rate base. Our FERC-regulated transmission companies use formula rates (instead of rate cases) to set rates annually to recover their cost of service. The final revenue requirement and rates for service are approved in Through the use of annual true-ups, formula rates recover our actual the rate case decision. The revenue requirement is derived from a costs incurred and the allowed RoE based on the actual transmission comprehensive study of the utility's total costs during a recent 12-month rate base each year. The Company must make annual formula rate period of operations, referred to as a test year. Each commission has filings documenting the revenue requirement, which customers can its own rules and standards for adjustments to the test year and may review and challenge. include forecast capital investments and operating costs. Revenue for our wholesale transmission businesses in New England US regulatory revenue requirement and New York is collected from wholesale transmission customers, who are typically other utilities and include our own New England electricity �a��� and �o� �o�t of ��r�i�� distribution businesses. With the exception of upstate New York, which continues to combine retail transmission and distribution rates to end-use customers, these wholesale transmission costs are incurred by distribution utilities on behalf of their customers and are fully recovered as a pass-through from end-use customers, as approved by each �allo�ed state commission. Our rate plans In order to achieve these objectives and to reduce regulatory lag, we Each operating company has a set of rates for service. We have three have been requesting structural changes, such as revenue decoupling electric distribution operations (upstate New York, Massachusetts and mechanisms, capital trackers, commodity-related bad debt true-ups, Rhode Island) and six gas distribution networks (upstate New York, and pension and other post-employment benefit true-ups, separately New York City, Long Island, Massachusetts (two) and Rhode Island). from base rates. These terms are explained below the table on page 191. Our operating companies have revenue decoupling mechanisms that Below, we summarise significant developments in rate filings and the de-link the companies' revenues from the quantity of energy delivered regulatory environment during the year. Following the final stabilisation and billed to customers. These mechanisms remove the natural upgrade to our new financial systems and the availability of 12 months of disincentive utility companies have for promoting and encouraging historical test year data from those financial systems, we concluded a 188 National Grid Annual Report and Accounts 2017/18 Additional Information | The business in detail

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Additional Information first round of full rate case filings in fiscal year 2017, with a final rate case Grid modernisation and smart energy solutions decision for Massachusetts Electric in September 2016, and followed in response to a 2014 regulatory requirement, we filed a Massachusetts by approval of three-year rate plans for KEDNY and KEDLI in December electricity grid modernisation plan on 19 August 2015 that proposed 2016. In fiscal year 2017/18, we made a second round of full rate case multiple investment options. These options would further MADPU's filings with Niagara Mohawk (electric and gas) in April 2017, Boston Gas goals of reducing the effect of outages, optimising demand, integrating and Colonial Gas in November 2017, and Narragansett Electric also in distributed resources, and improving workforce and asset management. November 2017. A Joint Proposal, setting forth a three-year rate plan for We presented a range of investment options for MADPU to consider, Niagara Mohawk was approved by the New York State Public Service with investment levels over five years ranging from \$238.6 million to Commission (NYPSC) in March 2018. These filings are expected to \$792.9 million. MADPU established criteria that, if met, would allow the capture the benefit of recent increased investments in asset replacement capital costs from the plan to be recovered through a separate capital and network reliability, and reflect long-term growth in costs, including recovery mechanism. MADPU initiated its review of our plan in April property tax and healthcare costs. Along with a clear focus on 2016 and hearings were held in May 2017. An order from MADPU productivity, the filings are key to improving achieved returns in approving some of the proposed investment was received on 10 May the Company's US distribution activities. 2018. We have also been operating a Smart Energy Solutions pilot with approximately 15,000 customers in Worcester, Massachusetts, Impact of US Tax Reform since 1 January 2015. The pilot has allowed the Company to deploy, Tax is a pass through for utilities in the US. The reduction in the test and learn from technologies similar to those proposed in the corporation tax rate from 35% to 21% will therefore be significantly grid modernisation plan, including smart meters, demand response, beneficial to customers as the lower tax rate will be reflected in an integrated communication system, and advanced distribution collection of a lower tax allowance from customers. automation. The pilot was scheduled to end on 31 December 2016, but we have received approval to continue operating the pilot until Our upstate New York, Massachusetts Gas and Rhode Island utilities were 31 December 2018. all undergoing rate negotiations at the time the legislation was enacted. We have updated our revenue requests for the prospective portion of the New York tax collection in each of these businesses. These companies represent Upstate New York 2017 rate cases 48% of the rate base with a total revenue impact of approximately On 28 April 2017, the Company filed a one-year rate plan (but submitted \$130 million. Our FERC businesses operate under formula rates, and two additional years of data to facilitate a multi-year settlement) for our we expect an approximately \$50 million reduction in the year related upstate New York electricity and gas businesses. to these companies, with the full impact being felt in 2018/19. On 19 January 2018, we filed a joint proposal setting out a comprehensive There are open generic proceedings in New York and Massachusetts three-year rate plan (fiscal years 2019-2021) for our electric and gas currently underway that will address the treatment of any tax savings businesses. The rate plan includes: a 9.0% RoE and 48% equity ratio; for our Massachusetts Electric, KEDNY and KEDLI customers until cumulative combined electric and gas revenue increases of \$206 million, base rates are reset through rate case filings. We are working with \$242 million, and \$302 million in fiscal year 2019, 2020 and 2021 the regulators to develop case by case solutions for these Operating respectively; funding for a three-year capital plan of approximately Companies. Solutions could include refunds in full prospectively of the \$2.4 billion; annual reconciliation mechanisms for certain non-controllable tax savings starting as early as this fall, retention of all or a portion of costs (e.g. property taxes, pension/OPEBs, and site investigation the savings to address rate stability concerns, and use of funds to remediation costs); a gas safety and reliability surcharge to recover the net against current regulatory assets. We expect the New York and costs of incremental leak-prone pipe replacement and leak repairs; Massachusetts Commission decisions by late summer or early fall this and a number of incentive mechanisms, including earning adjustment year. The lower collections in revenue offset the lower tax charge, so mechanisms (EAMs), which provide a potential incentive of approximately there is no material impact to earnings under IFRS or under US GAAP. \$20 million annually. The revenue increases reflect an estimate of Our cash flows will reduce as we are currently in a net operating loss the impact of changes to the federal corporate tax rate and bonus position for the purposes of calculating taxable profits in our US Group. depreciation that is subject to true-up at the end of fiscal year 2019. This means that there is no offsetting reduction in cash tax payments. The New York State Public Service Commission (NYPSC) approved the terms of the joint proposal in March 2018. Massachusetts Boston and Colonial rate cases Reforming the Energy Vision (REV) The Company filed a rate case for Boston Gas and Colonial Gas In April 2014, NYPSC instituted the REV proceeding, which envisions with MADPU on 15 November 2017 with new rates to be effective on a new role for utilities as distributed system platform (DSP) providers 1 October 2018. The Massachusetts gas rate case, the first rate case for who create markets for distributed energy resources (DER) and more Boston Gas and Colonial Gas since 2010, updates the gas companies' fully integrate DER in distribution system operations and planning. rates to more closely align revenues with the cost of service and bring The REV proceeding's objectives include: enhanced customer energy their earned RoEs closer to the allowed RoE. The Company's filing was choices and control; improved electricity system efficiency, reliability made prior to the passage of the Tax Cuts and Jobs Act of 2017 (Tax and resiliency; and cleaner, more diverse electricity generation. Reform), which lowered the US corporate income tax rate from 35% to 21%. The Company's proposed revenue increase prior to the Tax Reform NYPSC issued an order on 19 May 2016 addressing rate-making and was \$178 million for Boston Gas and \$36 million for Colonial Gas. The utility revenue model policy framework issues under REV, including: change in the corporate income tax rate will reduce these amounts by rate-making reform; earnings opportunities (platform service revenues approximately \$29 million and \$7 million for Boston Gas and Colonial and earning adjustment mechanisms or EAMs); competitive market- Gas, respectively. In addition, significant tax liabilities to National Grid's based earnings; customer data access; non-wires alternative solutions US Treasury organisation that have been recorded at the 35% tax rate to displace traditional capital investment; standby service tariff will now be paid at the lower 21% tax rate creating a significant benefit enhancements; opt-in rate design (time-of-use rates, smart home rate that will be returned to customers. The Company will be proposing pilots); enhancements to large customer demand charges; scorecard to return this benefit to customers over a similar time period that the metrics; and mass market rate design. The Company's initial Distributed actual benefits are to be earned, however this time period and resulting System Implementation Plan (DSIP) was filed with NYPSC on 30 June additional rate reductions will not be determined until late spring or 2016 and identified incremental investments in utility infrastructure early summer 2018. necessary for developing DSP capabilities, market enablement and operations, advanced metering functionality, grid modernisation, and Gas system enhancement programmes (GSEP) cyber security and privacy measures within the first five years. The DSIP On the gas side, on 5 May 2017, MADPU approved our recovery is required to be updated and filed with NYPSC every two years, with of approximately \$50.6 million, related to \$241 million of anticipated the next update to be filed by 30 June 2018. The joint proposal approved investments in 2017 under an accelerated pipe replacement program, by the NYPSC in March 2018 includes investments related to grid through rates effective from May 2016 to April 2018. However, due to modernisation, cyber security, and new electricity and gas products the application of the GSEP revenue cap, we are required to defer and services. It also sets out a process to progress advanced metering recovery of an additional \$5.5 million of the 2017 revenue requirement, infrastructure (AMI) in Upstate New York. The joint proposal also includes until we have room under the GSEP revenue cap to recover the deferred outcome-based EAMs to target energy and system efficiency, carbon amount, or in the next rate case that covers the period of investment. reductions, and customer engagement. Edgar Filing: NATIONAL GRID PLC - Form 20-F

The business in detail continued Clean Energy Standard (CES) Power Sector Transformation Initiative NYPSC issued an order on 1 August 2016 adopting a CES, consistent In December 2016, the National Governors Association selected Rhode with the State Energy Plan, that 50% of New York's electricity is to be Island as one of four states to participate in a 16-month collaborative generated by renewable sources by 2030 as part of a strategy to reduce effort with state agencies and key stakeholders, including the Company, greenhouse gas emissions by 40% by 2030. In particular, the CES to develop a state action plan for modernising the electric power sector established: obligations on load serving entities (LSEs) to financially and integrating clean energy. This effort, referred to as the Power Sector support new renewable generation resources that serve their retail Transformation Initiative, builds off of the SIRI collaborative effort that customers through Renewable Energy Credits (RECs); and to financially began in 2014 and resulted in a vision document released in January support existing at-risk nuclear generators through the purchase of 2016. Following months of stakeholder meetings, the Phase One zero emissions credits (ZECs). The first REC and ZEC compliance years Report was delivered to Governor Raimondo in November 2017 with under the CES began 1 January 2017 and 1 April 2017, respectively. recommendations to modernise the utility business model, deploy On 16 March 2018, the NYPSC approved the New York State Energy advance meters to build a connected distribution grid, leverage Research and Development Authority's (NYSERDA) 2018 compliance distribution system information to increase system efficiency, and period programme budgets and authorised reallocation of previously advance electrification beneficial to system efficiency and greenhouse approved, but unspent, funds from the 2017 compliance period and gas emissions. the further reallocation of funds from uncommitted System Benefits Charge, Energy Efficiency Portfolio Standard, and/or Renewable FERC Portfolio Standard funds to pay for 2018 CES administrative costs with Complaints on New England transmission allowed RoE all unspent compliance funds to be reallocated rather than returned In September 2011, December 2012, July 2014, and April 2016, a series to LSEs during the annual reconciliation process as proposed by of four complaints were filed with FERC against certain transmission NYSEDA.

As a result of this reallocation, there is no need to collect owners, including our New England electricity transmission business, additional funds for the 2018 compliance period. to lower the base RoE, which FERC had authorised at 11.14% prior to the first complaint. FERC issued orders resolving only the first complaint, Rhode Island with the last order in March 2015, lowering the base RoE to 10.57%. Rhode Island electric and gas infrastructure, safety and A number of parties, including the Company, appealed FERC's order reliability (ISR) plans on the first complaint to US federal court. On 14 April 2017, the court State law provides our Rhode Island electric and gas operating vacated FERC's order and remanded the first complaint back to FERC, divisions with rate mechanisms that allow us to recover capital requiring FERC to reconsider the methodology it adopted in its order. It investment, including a return, and certain expenses outside is too early to determine when or how FERC will decide the four pending base rate proceedings through the submission of annual electric RoE complaints against the Company in light of the court's decision. and gas ISR plans. Formula Rate 206 Proceeding RIPUC approved the fiscal year 2019 gas and electric ISR plans on

On 28 December 2015, FERC initiated a proceeding under Section 206 7 March 2018 and 20 March 2018, respectively. The electric ISR plan of the Federal Power Act. The Commission found that ISO-New England encompasses a \$106.86 million spending programme for capital Transmission, Markets, and Services Tariff is unjust, unreasonable, investment and \$10.9 million for operating and maintenance expenses and unduly discriminatory or preferential. The Commission found that for vegetation management and inspection and maintenance. The ISO-NE's Tariff lacks adequate transparency and challenge procedures gas ISR plan encompasses \$106.7 million for capital investment with regard to the formula rates for ISO-NE Participating Transmission and incremental operation and maintenance expense. Owners ('NETOs'). In addition, the Commission found that the ISO-NE PTOs' current RNS ('Regional Network Service') and LNS ('Local Rhode Island combined gas and electric rate case Network Service') formula rates appear to be unjust, unreasonable, On 27 November 2017, we filed a rate plan for our Rhode Island electric unduly discriminatory or preferential, or otherwise unlawful. The distribution and gas businesses to take effect from 1 September 2018. Commission explained that the formula rates appear to lack sufficient The rate case provides an opportunity to recalibrate base rates to detail in order to determine how certain costs are derived and recovered reflect changes in costs since the last rate case, which was effective in the formula rates. Accordingly, the Commission established hearing in February 2013. Rhode Island regulation also allows for proforma and settlement judge procedures. Several parties are active in the and normalising adjustments to test year data that include forecasts proceeding including FERC staff, various consumer interested consumer for costs expected in a future rate year. parties, NESCOE ('New England States Committee on Electricity'), and several municipal light departments. The parties have negotiated Our rate plan included forecast data for the two twelve-month periods a set of formula rate protocols and are currently engaged in settlement ending 31 August 2020 and 2021 for informational purposes, providing negotiations and have conducted several settlement conferences the RIPUC with an option for a multi-year rate plan. The rate plan was at FERC relative to RNS and LNS rates. filed prior to the passage of the Tax Cuts and Jobs Act of 2017 (Tax Act), which lowered the federal income tax rate from 35% to 21%. The revenue request prior to the Tax Act was increases of \$41.3 million for electric and \$30.3 million for gas. The change in the corporate income tax rate on revenues to be collected during the rate year will reduce these amounts by approximately \$9.7 million and \$9.6 million for electric and gas, respectively. In addition, significant tax liabilities to the US Treasury that have been recorded at the 35% tax rate will now be paid at the lower 21% tax rate, creating a significant benefit that will be returned to customers. We will be proposing to return this benefit to customers over a similar period that the actual benefits are to be earned. However, this period and resulting additional rate reductions will not be determined until late spring or early summer. The filing includes increases for IT investment and other cost increases, as well as staffing level increases of 68 and 71 electric and gas employees to meet our work plans over the next three years. The electric request includes funding for projects and programmes to support the Rhode Island Power Sector Transformation Initiative, including investments in advanced metering, grid modernisation, electric vehicle infrastructure, and a solar and storage demonstration project. The gas request includes funding to modernise the IT infrastructure that supports our core gas distribution operating capabilities. The filing is based on an RoE of 10.1% and a capital structure of 51% equity and 49% debt. 190 National Grid Annual Report and Accounts 2017/18 Additional Information | The business in detail

Task force on Climate-related Financial Disclosures In June 2017, the Financial Stability Board released its final report on Below we include our first disclosures in response, across the four the recommendations of the Task force on Climate-related Financial themes. We have embarked on a longer term process to determine how Disclosures (TCFD). The voluntary framework for disclosure of climate- we most clearly articulate our assessment of financial impacts of climate related information in financial filings is structured around four themes: change and climate-related scenarios, including a 2°C scenario. This is governance, strategy, risk management, and metrics and targets. There a scenario that limits the global average temperature increase to 2°C are eleven specific recommended disclosures across these areas that above the pre-industrial average, against the specific recommendations. are applicable to companies in all sectors, and further supplemental guidance for energy utilities in particular, relating to strategy, and metrics and targets. TCFD Recommendations 1. Governance Our long-term investment plans are determined with reference to forecasts Our stakeholders fully expect National Grid to operate sustainably. We are also consistent with the outputs from our Future Energy Scenarios publication committed to minimising our environmental impact, both now and in the longer (available on our website), which provide credible pathways for the future term. We constantly balance this with the need to provide secure and affordable of energy supply in Great Britain out to 2050. energy for our customers and consumers both, and to help society to decarbonise its energy requirements. The scenarios are used as a basis for a range of further National Grid activities, and are the starting point for our regulated long-term investment. They are also Our principal businesses build and invest for the long term. Ensuring that we a reference point for other National Grid reports, such as the Gas Ten Year develop networks that are robust to withstand extreme weather events is a critical Statement, the Electricity Ten Year Statement, and the System Operability part of our investment strategy. Our customers and our regulators expect this Framework. Reports concerning our UK operations under the 2008 Climate to be the case. Change Act were released in 2010 and updated in 2016. Responsibility for asset investment and maintenance planning is delegated In the US, our long-term investment decisions are informed by internal views under the

Group's Delegation of Authority statement to the businesses. on the impact of changing environmental conditions. In addition to our views on changing environmental conditions, we also consider the range of possible For the Group as a whole, the Safety, Environmental and Health Committee regulatory and policy responses. Our regulators in New York are encouraging (SEH Committee) operates as a sub-committee of the Board. Under its terms new incentive opportunities as part of their Reforming the Energy Vision (REV) of reference, it is responsible for assessing how the Company adapts its business proceedings and prepared an Electric and Gas Grid Resiliency Plan in 2016. in light of climate change, which includes: i) At least twice a year, consideration of reports on the Company's environmental The existence of significant transition opportunities is one of the primary reasons performance, including carbon emissions; and why we established National Grid Ventures. Our partnership with Sunrun in 2017 ii) At least once a year, a review of the Company's environmental strategy. The serves as an example of an opportunity of which we have taken advantage to SEH Committee does not have a remit to consider the financial implications of respond to these opportunities. climate change on the Company. 3. Risk management In terms of applying TCFD to the Company, in 2017/18, summary papers setting Our approach to identifying and managing the risks in our business is set out the implications of the recommendations on the Company were presented out on page 18,

with our principal risks set out on page 19. to the Audit Committee in September 2017 and March 2018. Management is currently formally evaluating the governance processes and the role and The most significant climate-related exposure we face in the short term is responsibilities of the Audit and SEH Committees in this area. in relation to winter storms in the US, see page 31 for more information on our storm response. 2. Strategy The sustainability and climate change landscape is fundamentally changing In the long term, the risk of flooding is of primary concern and we have learned a our industry and the way we operate. As part of our regular portfolio evaluation great deal over the last 10 years as flooding events have become more frequent activity, we consider the attractiveness of each of our key businesses under and intense. a range of future environmental scenarios. In addition, and as described further on pages 193-196 in our disclosures around The Principal Operations section of the Annual Report on pages 28-33 include risk factors, we are increasingly subject to regulation in relation to climate change examples of opportunities and plans to respond to the risk of climate change, and there are requirements for us to reduce our own carbon emissions, as well such as the move towards low carbon and the deployment of the charging as enabling reduction in energy use by our customers. infrastructure for electric vehicles.

4. Metrics and targets Our updated global environmental sustainability strategy (Our Contribution) We have included a number of relevant metrics from Our Contribution in the was launched in June 2017 and is available on our website. It sets out our Responsible Business section (see page 35). ambition to transform the way we do business and provide a sustainable legacy from our operations. We include disclosure of our Scope 1, Scope 2, and Scope 3 greenhouse gas (GHG) emissions on page 16. The strategy sets out our targets to reduce greenhouse gas emissions by 45% by 2020, 70% by 2030 and 80% by 2050. We have been awarded a position The Company continues to evaluate the most appropriate metrics and targets to on the Climate A List by CDP in recognition of our work to mitigate climate benchmark, measure and report, in order to facilitate compliance with the TCFD change, an accolade given to the top 5% of companies worldwide. Further recommendations. We are speaking to our peers, investors, credit rating agencies details about Our Contribution are set out on page 35. and advisors in these areas and will take their feedback into consideration as we further develop our metrics as well as subsequent discussions. Transition risks and opportunities are similar for both the UK and the north- eastern United States as both regions have set targets to reduce greenhouse gas emissions economy-wide 80% by 2050. In the UK our regulated business has incentives related to carbon emission reductions. There are technical and commercial risks and opportunities arising from the increased connection of low carbon generation to our networks, and from the delivery of infrastructure to deliver low carbon energy. 192 National

Shareholder information continued UK stamp duty and stamp duty reserve tax (SDRT) UK inheritance tax Transfers of ordinary shares – SDRT at the rate of 0.5% of the An individual who is domiciled in the US for the purposes of the Estate amount or value of the consideration will generally be payable on any Tax Convention and who is not a UK national for the purposes of the agreement to transfer ordinary shares that is not completed using a Estate Tax Convention will generally not be subject to UK inheritance tax duly stamped instrument of transfer (such as a stock transfer form). in respect of (i) the ADSs or ordinary shares on the individual's death or (ii) a gift of the ADSs or ordinary shares during the individual's lifetime. Where an instrument of transfer is executed and duly stamped before This is not the case where the ADSs or ordinary shares are part of the the expiry of the six year period beginning with the date on which the business property of the individual's permanent establishment in the agreement is made, the SDRT liability will be cancelled. If a claim is UK or relate to a fixed base in the UK of an individual who performs made within the specified period, any SDRT which has been paid will independent personal services. be refunded. SDRT is due whether or not the agreement or transfer is made or carried out in the UK and whether or not any party to that Special rules apply to ADSs or ordinary shares held in trust. In the agreement or transfer is a UK resident. exceptional case where the ADSs or shares are subject both to UK inheritance tax and to US federal gift or estate tax, the Estate Tax Purchases of ordinary shares completed using a stock transfer Convention generally provides for the tax paid in the UK to be credited form will generally result in a UK stamp duty liability at the rate of against tax paid in the US. 0.5% (rounded up to the nearest £5) of the amount or value of the consideration. Paperless transfers under the CREST paperless Capital gains tax (CGT) for UK resident shareholders settlement system will generally be liable to SDRT at the rate of 0.5%, You can find CGT information relating to National Grid shares for and not stamp duty. SDRT is generally the liability of the purchaser UK resident shareholders on the investor section of our website. and UK stamp duty is usually paid by the purchaser or transferee. Share prices on specific dates are also available on our website. Transfers of ADSs – No UK stamp duty will be payable on the acquisition or transfer of existing ADSs or beneficial ownership of ADSs, provided that any instrument of transfer or written agreement to transfer is executed outside the UK and remains at all times outside the UK. An agreement for the transfer of ADSs in the form of ADRs will not result in a SDRT liability. A charge to stamp duty or SDRT may arise on the transfer of ordinary shares to the Depository or The Bank of New York Mellon as agent of the Depository (the Custodian). The rate of stamp duty or SDRT will generally be 1.5% of the value of the consideration or, in some circumstances, the value of the ordinary shares concerned. However, there is no 1.5% SDRT charge on the issue of ordinary shares (or, where it is integral to the raising of new capital, the transfer of ordinary shares) to the Depository or the Custodian. The Depository will generally be liable for the stamp duty or SDRT. Under the terms of the Deposit Agreement, the Depository will charge any tax payable by the Depository or the Custodian (or their nominees) on the deposit of ordinary shares to the party to whom the ADSs are delivered against such deposits. If the stamp duty is not a multiple of £5, the duty will be rounded up to the nearest multiple of £5. US information reporting and backup withholding tax Dividend payments made to US Holders and proceeds paid from the sale, exchange, redemption or disposal of ADSs or ordinary shares to US Holders may be subject to information reporting to the US Internal Revenue Service (IRS). Such payments may be subject to backup withholding taxes if the US Holder fails to provide an accurate taxpayer identification number or certification of exempt status or fails to comply with applicable certification requirements. US Holders should consult their tax advisors about these rules and any other reporting obligations that may apply to the ownership or disposition of ADSs or ordinary shares, including reporting requirements related to the holding of certain foreign financial assets. 202 National Grid Annual Report and Accounts 2017/18 Additional Information | Shareholder information

Timing impacts Under the Group’s regulatory frameworks, the majority of the revenues that National Grid is allowed to collect each year are governed by a regulatory price control or rate plan. If a company collects more than this allowed level of revenue, the balance must be returned to customers in subsequent years, and if it collects less than this level of revenue it may recover the balance from customers in subsequent years. These variances between allowed and collected revenues give rise to ‘over and under recoveries’. Opening balances of over and under recoveries have been restated where appropriate to correspond with regulatory filings and calculations. Adjustment to reclassify operating lease commitments as debt. For March 2018 this was calculated as four times the 2017/18 operating lease rental charge.

Regulatory Performance Measures Regulated financial performance Regulatory financial performance is a pre interest and tax measure, starting at segmental operating profit and making adjustments (such as the elimination of all pass-through items included in revenue allowances and timing) to approximate regulatory profit for the UK regulated activities. This measure provides a bridge for investors between a well understood and comparable IFRS starting point through the key adjustments required to approximate regulatory profit. This measure also provides the foundation to calculate profit driven regulatory returns i.e. Return on Capital Employed (RoCE) and Group Return on Equity (RoE). For the reasons noted above, the table below shows the principal differences between the IFRS operating profit and the regulated financial performance, but is not a formal reconciliation to an equivalent IFRS measure. UK Electricity Transmission 2018 2017 2016 Year ended 31 March £m £m £m Reported operating profit 1,041 1,372 1,173 Movement in regulatory 'IOUs' 51 (288) (147) Deferred taxation adjustment 70 62 80 RAV indexation (average 3% long-run inflation) 374 356 339 Regulatory vs IFRS depreciation difference (377) (379) (368) Fast/slow money adjustment 69 34 92 Pensions (49) (47) (54) Performance RAV created 83 74 80 Regulated financial performance 1,262 1,184 1,195 UK Gas Transmission 2018 2017 2016 Year ended 31 March £m £m £m Reported operating profit 487 511 486 Movement in regulatory 'IOUs' (91) (120) (80) Deferred taxation adjustment 18 39 45 RAV indexation (average 3% long-run inflation) 173 168 166 Regulatory vs IFRS depreciation difference (29) (21) (18) Fast/slow money adjustment (11) (14) 18 Pensions (32) (53) (77) Performance RAV created (16) (11) (5) Regulated financial performance 499 499 535 Additional Information | Other unaudited financial information National Grid Annual Report and Accounts 2017/18 211

Other unaudited financial information continued Regulated asset base The regulated asset base is a regulatory construct, based on pre-determined principles not based on IFRS. It effectively represents the invested capital on which we are authorised to earn a cash return. By investing efficiently in our networks, we add to our regulated asset base over the long-term and this in turn contributes to delivering shareholder value. Our regulated asset base is comprised of our regulatory asset value in the UK, plus our rate base in the US. Maintaining efficient investment in our regulated asset base ensures we are well positioned to provide consistently high levels of service to our customers and increases our revenue allowances in future years. While we have no specific target, our overall aim is to achieve between 5% and 7% growth in regulated asset base each year through continued investment in our networks in both the UK and US. In the UK, the way in which our transactions impact RAV is driven by principles set out by Ofgem. In a number of key areas these principles differ from the requirements of IFRS, including areas such as additions and the basis for depreciation. Further, our UK RAV is adjusted annually for inflation. RAV in each of our retained UK businesses has evolved over the period since privatisation in 1990 and as a result, historical differences between the initial determination of RAV and balances reported under UK GAAP at that time still persist. Due to the above, substantial differences exist in the measurement bases between RAV and an IFRS balance metric and, therefore, it is not possible to provide a meaningful reconciliation between the two. In the US, rate base is a regulatory measure determined for each of our main US operating companies. It represents the value of property and other assets or liabilities on which we are permitted to earn a rate of return, as set out by the regulatory authorities for each jurisdiction. The calculations are based on the applicable regulatory agreements for each jurisdiction and include the allowable elements of assets and liabilities from our US companies. For this reason, it is not practical to provide a meaningful reconciliation from the US rate base to an equivalent IFRS measure. However, we include the calculation below. RAV, rate base or Total Regulated other business assets and other assets Years ended 31 March (£m at constant currency) 2018 2017 2018 2017 1. UK Electricity Transmission 13,045 12,479 12,651 12,034 UK Gas Transmission 6,014 5,755 5,889 5,721 US Regulated 14,762 13,751 16,683 15,238 Total Regulated 33,821 31,985 35,223 32,993 Other assets/invested capital 2,167 1,984 1,824 1,724 Total Group Regulated and other assets 35,988 33,969 37,047 34,717

1. Represented to include opening balance adjustments following the completion of the regulatory reporting pack process in 2017. US rate base and total regulated assets for 31 March 2017 have been restated in the table above at constant currency. At actual currency the values were £15,398 million and £17,063 million respectively. Other business assets and other assets/invested capital for 31 March 2017 have been restated in the table above at constant currency. At actual currency the values were £2,055 million and £1,814 million respectively. Group return on equity (RoE) Group RoE provides investors with a view of the performance of the Group as a whole compared with the amounts invested by the Group in assets attributable to equity shareholders. It is the ratio of our regulatory financial performance to our measure of equity investment in assets. It therefore reflects the regulated activities as well as the contribution from our non-regulated businesses together with joint ventures and non-controlling interests. We use Group RoE to measure our performance in generating value for our shareholders and a target for Group RoE is included in the incentive mechanisms for executive remuneration within both the APP and LTPP schemes. Group RoE is underpinned by our regulated asset base. For the reasons noted above, no reconciliation to IFRS has been presented as we do not believe it would be practical. However, we do include the calculations below. Calculation: Regulatory financial performance including a long-run assumption of 3.0% RPI inflation, less adjusted interest and adjusted taxation divided by equity investment in assets. • Adjusted interest removes interest on pensions, capitalised interest and release of provisions. • Adjusted taxation adjusts the Group taxation charge for differences between IFRS profit before tax and regulated financial performance less adjusted interest. • Equity investment in assets is calculated as the total opening UK regulatory asset value, the total opening US rate base plus goodwill plus opening net book value of National Grid Ventures and Other activities and our share of joint ventures and associates, minus opening net debt as reported under IFRS restated to the weighted average £/\$ exchange rate for the year. 212 National Grid Annual Report and Accounts 2017/18

These returns are calculated using the assumption that the businesses are financed in line with the regulatory adjudicated capital structure, at the cost of debt assumed by the regulator and that RPI inflation is equal to a long-run assumption of 3.0%. They are calculated by dividing elements of out- or under-performance versus the regulatory contract by the average equity RAV in line with the regulatory assumed capital structure and adding to the base allowed RoE. This is an important measure of UK regulated business performance and our operational strategy continues to focus on this metric. This measure can be used to determine how we are performing under the RIIO framework and also helps investors to compare our performance with similarly regulated UK entities. Reflecting the importance of this metric, it is also a key component of both the APP and LTPP schemes. The UK RoE is underpinned by the UK RAV. For the reasons noted above, no reconciliation to IFRS has been presented as we do not believe it would be practical. US regulated Return on Equity US regulated RoE is a measure of how a business is performing against the assumptions used by the regulator. This US operational return measure is calculated using the assumption that the businesses are financed in line with the regulatory adjudicated capital structure. The returns are divided by the average rate base (or where a reported rate base is not available, an estimate based on rate base calculations used in previous rate filings) multiplied by the adjudicated equity portion in the regulatory adjudicated capital structure. This is an important measure of our US regulated business performance and our operational strategy continues to focus on this metric. This measure can be used to determine how we are performing and also helps investors compare our performance with similarly regulated US entities. Reflecting the importance of this metric, it is also a key component of both the APP and LTPP schemes. The US return is based on a calculation which gives proportionately more weighting to those jurisdictions which have a greater rate base. For the reasons noted above, no reconciliation to IFRS has been presented as we do not believe it would be practical. However we do include the calculations below.

Other unaudited financial information continued Value Added and Value Added per share Value Added is a measure that reflects the value to shareholders of our dividend and the growth in National Grid's regulated and non-regulated assets (as measured in our rate base, for regulated entities), net of the growth in overall debt. It is a key metric used to measure our performance and underpins our approach to sustainable decision-making and long-term management incentive arrangements. Value Added is derived using our regulated asset base and, as such, it is not practical to provide a meaningful reconciliation from this measure to an equivalent IFRS measure due to the reasons set out for our regulated asset base. However, the calculation is set out in the Financial Review on page 24. Value Added per share is calculated by dividing Value Added by the weighted average number of shares set out in note 7 on page 123. Regulatory gearing Regulatory gearing is a measure of how much of our investment in RAV and rate base and other elements of our invested capital (including our investments in National Grid Ventures, UK property and other assets and US other assets) is funded through debt. 2018 2017 1 Year ended 31 March £m £m % change UK RAV 19,059 18,219 5 US rate base 14,762 15,398 (4) Other invested capital included in gearing calculation 2,167 2,055 5 Total assets included in gearing calculation 35,988 35,672 1 Net debt (including 100% of hybrid debt) 23,002 23,284 (1) Group gearing (based on 100% of net debt) 64% 65% (2) Group gearing (excluding 50% of hybrid debt from net debt) 61% 62% (2) 1. Net debt for 2017 adjusted to include impact of future £4.01 billion return of capital relating to the sale of a stake in UK Gas Distribution. Regulatory financial performance Timing and regulated revenue adjustments As described on pages 186-191, our allowed revenues are set in accordance with our regulatory price controls or rate plans. We calculate the tariffs we charge our customers based on the estimated volume of energy we expect will be delivered during the coming period. The actual volumes delivered will differ from the estimate. Therefore, our total actual revenue will be different from our total allowed revenue. These differences are commonly referred to as timing differences. If we collect more than the allowed revenue, the balance must be returned to customers in subsequent periods, and if we collect less than the allowed level of revenue we may recover the balance from customers in subsequent periods. In the US, a substantial portion of our costs are pass-through costs (including commodity and energy efficiency costs) and are fully recoverable from our customers. Timing differences between costs of this type being incurred and their recovery through revenue are also included in timing. The amounts calculated as timing differences are estimates and subject to change until the variables that determine allowed revenue are final. Our continuing operating profit for the year includes a total estimated in-year over-collection of £104 million (2016/17: £398 million over-collection). Our closing balance at 31 March 2018 was £279 million over-recovered. In the UK, there was cumulative over-recovery of £49 million at 31 March 2018 (2017: over-recovery of £82 million for continuing operations). In the US, cumulative timing over-recoveries at 31 March 2018 were £230 million (2017: £332 million over-recovery). A sizeable part of that balance is expected to be returned to customers next year. The total estimated in-year over-or under-collection excludes opening balance adjustments related to estimates or finalisation of balances as part of regulatory submissions. In addition to the timing adjustments described above, as part of the RIIIO price controls in the UK, out-performance against allowances as a result of the totex incentive mechanism, together with changes in output-related allowances included in the original price control, will almost always be adjusted in future revenue recoveries, typically starting in two years' time. We are also recovering revenues in relation to certain costs incurred (for example pension contributions made) in prior years. As required under accounting standards, our current IFRS revenues and earnings include these amounts that relate to certain costs incurred in prior years or that will need to be repaid or recovered in future periods. Such adjustments will form an important part of the continuing difference between reported IFRS results and underlying economic performance based on our regulatory obligations. For our UK Regulated businesses as a whole (excluding the UK Gas Distribution business), timing and regulated revenue adjustments totalled £40 million in the year (2016/17: £408 million). In the US, accumulated regulatory entitlements cover a range of different areas, with the most significant being environmental remediation and pension assets, as well as deferred storm costs. All regulatory entitlements are recoverable (or repayable) over different periods, which are agreed with the regulators to match the expected payment profile for the liabilities. As at 31 March 2018, these extend until 2069. 214 National Grid Annual Report and Accounts 2017/18 Additional Information | Other unaudited financial information

Additional Information Commentary on consolidated financial statements for the year ended 31 March 2017 In compliance with SEC rules, we present a summarised analysis of movements in the income statement and an analysis of movements in adjusted operating profit (for the continuing group) by operating segment. This should be read in conjunction with the 31 March 2018 unaudited commentary included on pages 96 and 111. Analysis of the income statement for the year ended Adjusted earnings and EPS from continuing operations 31 March 2017 Adjusted earnings and EPS, which exclude exceptional items and Revenue remeasurements, are provided to reflect results of the Group on a Revenue for the year ended 31 March 2017 increased by £1,823 million 'business performance' basis, described further in note 4. The following to £15,035 million. This increase was driven by higher revenues in both chart shows the five-year trend in adjusted profit attributable to equity our UK and US Regulated businesses. US Regulated revenues were shareholders of the parent (adjusted earnings) and adjusted earnings £1,438 million higher year-on-year including favourable impact from per share. See page 209 for a reconciliation of adjusted basic EPS foreign exchange, increased regulatory revenue allowances and to EPS. favourable timing of recoveries. UK regulated revenues increased by £495 million, including increased regulatory allowances, timing over- Ad���t�d �amin�� and ad���t�d ��� from �ontin�in�o��ration�� recoveries and increased system balancing revenues. Revenue from Other activities decreased, including lower interconnector �����m ����� and metering income. �����m ������� Operating costs ����� Operating costs for the year ended 31 March 2017 of £11,827 million ����� were £1,840 million higher than 2015/16. This increase in costs included ����� a £576 million increase in exceptional items and remeasurements, which is discussed below. Excluding exceptional items and remeasurements, operating costs were £1,264 million higher, principally due to the 2012/13 2013/14 2014/15 2015/16 2016/17 impact of foreign exchange rates alongside increased balancing Ad�usted earnin�s services costs in the UK and higher depreciation as a result of Ad�usted ��� newly commissioned assets. 1. Adjusted earnings and adjusted EPS are attributable to equity shareholders of the parent. Net finance costs The above earnings performance translated into adjusted EPS growth For the year ended 31 March 2017, net finance costs before exceptional in 2016/17 of 8.9p (19%). items and remeasurements were £173 million higher than 2015/16 at £1,029 million, mainly as a result of the impact of the stronger US dollar, Exchange rates higher UK RPI inflation and increased levels of average net debt in Our financial results are reported in sterling. Transactions for our US continuing operations. operations are denominated in dollars, so the related amounts that are reported in sterling depend on the dollar to sterling exchange rate. Tax The table below shows the average and closing exchange rates of The tax charge on profits before exceptional items and remeasurements sterling to US dollars. was £62 million higher than 2015/16. This was mainly a result of increased taxable profits in the year. The effective tax rate for the year 2016/2017 2015/2016 % change decreased to 23.7% (2015/16: 25.0%) reflecting settlements relating to prior years partially offset by an increased proportion of profits before Weighted average (income statement) 1.28 1.47 (13)% tax being generated in the US. Year-end (statement of financial position) 1.25 1.44 (13)% Exceptional items and remeasurements Operating costs for the year ended 31 March 2017 included a £68 million The movement in foreign exchange during 2016/17 has resulted in a gain on remeasurements of commodity contracts, together with £1,175 million increase in revenue, a £187 million increase in adjusted £633 million exceptional costs associated with environmental charges operating profit and a £189 million increase in operating profit. and gas holder decommissioning. In 2015/16, operating costs included a net £11 million gain on remeasurements of commodity contracts. Finance costs for the year ended 31 March 2017 included a loss of £58 million on financial remeasurements, relating to net losses on derivative financial instruments. Exceptional tax for 2016/17 was a credit of £292 million which represents tax credits on the exceptional items and remeasurements above, together with a deferred tax credit on the recalculation of deferred tax liabilities as a result of the reduction in the UK tax rate applicable from April 2020 from 18% to 17%. Edgar Filing: NATIONAL GRID PLC - Form 20-F

Commentary on consolidated financial statements for the year ended 31 March 2017 continued Analysis of the adjusted operating profit by segment for the year US Regulated ended 31 March 2017 Revenue in our US Regulated business increased by £1,438 million to UK Electricity Transmission £8,931 million and adjusted operating profit increased by £528 million to For the year ended 31 March 2017, revenue in the UK Electricity £1,713 million. Transmission segment increased by £462 million to £4,439 million and adjusted operating profit increased by £199 million to £1,372 million. The stronger US dollar increased revenue and operating profit in 2016/17 by £1,160 million and £184 million respectively. Excluding the impact of The revenue growth of £462 million principally reflected the recovery of foreign exchange rate movements, revenue increased by £278 million. higher pass-through costs such as system balancing costs, increased Increased revenue allowances under new rate cases, the benefit of regulated revenue allowances and the impact of higher volumes. Net capex trackers and over-recovery of allowed revenues due to cold revenue after deducting pass-through costs was £199 million higher. weather were partly offset by lower commodity cost recoveries. Overall Regulated controllable costs were £25 million lower reflecting reduced pass-through costs reduced by £231 million (excluding the impact of environmental costs. Depreciation and amortisation was £31 million foreign exchange) resulting in an increase in net regulated revenue of higher, reflecting the continued capital investment programme. Other £509 million at constant currency. Regulated controllable costs costs were £6 million lower than 2015/16 including lower asset disposal increased by £152 million at constant currency, partly as a result of costs. Capital expenditure decreased by £57 million compared with last increased information systems costs, write-offs of prior years' capital year to £1,027 million. costs and higher costs of health care and other benefits. These were partly offset by a £32 million decrease in bad debt costs. Depreciation UK Gas Transmission and amortisation was £24 million higher at constant currency as a result Revenue in the UK Gas Transmission segment increased by £33 million of ongoing investment in our networks. Other operating costs were to £1,080 million and adjusted operating profit increased by £25 million £21 million higher at constant currency, reflecting increased operating to £511 million. taxes and cost of removal of existing assets. After deducting pass-through costs, net revenue was £31 million higher Our capital expenditure in the US continued to increase with £2,247 than 2015/16, including increased regulated revenue allowances in the million of expenditure in 2016/17, £391 million more than in 2015/16. At year and higher volumes than expected, partly offset by lower LNG constant currency, this represented a £104 million increase in investment storage revenues following a site closure. Regulated controllable costs driven by higher investment in new and replacement gas mains. were £2 million higher than 2015/16, with lower LNG storage costs offset by costs resulting from an increase in the number of employees Other activities to support higher levels of asset health investment. Depreciation and Revenue in Other activities decreased by £111 million to £713 million amortisation costs were £8 million higher, reflecting ongoing investment. and adjusted operating profit decreased by £193 million to £177 million. Other operating costs were £4 million lower than 2015/16. In the US, adjusted operating profit was £80 million lower (including Capital expenditure increased to £214 million, £28 million higher £3 million of foreign exchange benefit) partly reflecting higher US project than last year. development costs. In addition, 2015/16 included a £49 million gain on disposal of the Iroquois pipeline. In the UK, adjusted operating profit was £113 million lower including lower auction revenues from the French Interconnector and increased business change costs. Capital expenditure in our Other activities was £46 million higher than 2015/16 at £247 million. 216 National Grid Annual Report and Accounts 2017/18

Edgar Filing: NATIONAL GRID PLC - Form 20-F

Definitions and glossary of terms continued US regulated return on equity (US RoE) US regulated return on equity is a measure of how a business is performing operationally against the assumptions used by the relevant regulator. This US operational return measure is calculated using the assumption that the businesses are financed in line with the regulatory adjudicated capital structure. This is a post-tax US GAAP metric and is calculated annually. For 2016/17 and 2017/18, it is calculated on a fiscal year basis. For 2015/16 and prior years, it is calculated on a calendar year basis. US state regulators (state utility commissions) In the US, public utilities' retail transactions are regulated by state utility commissions, including the New York Public Service Commission (NYPSC), the Massachusetts Department of Public Utilities (MADPU) and the Rhode Island Public Utilities Commission (RIPUC). V Value Added Value Added is a measure to capture the value created through investment attributable to equity holders, being the change in total regulated and non-regulated assets including goodwill (both at constant currency) plus the cash dividend paid in the year plus share repurchase costs less the growth in net debt (at constant currency). This is then presented on an absolute and a per share basis. Value Growth Value Growth is the growth in the value of our regulated and non-regulated assets including goodwill plus dividend plus share repurchase costs less growth in net debt, as a percentage. 222 National Grid Annual Report and Accounts 2017/18 Additional Information | Definitions and glossary of terms

Further Information

Exchange Rates

The following table sets forth the history of the exchange rates of one pound sterling to US dollars for the periods indicated and as at the latest practicable date, 31 May 2018.

	High	Low
May 2018*	1.3599	1.3269

*For the period to 31 May 2018.

Share ownership

At 31 May 2018, the latest practicable date, none of the directors had an individual beneficial interest amounting to greater than 1% of the Company's shares.

Material interests in shares

The following summarizes the significant changes in the percentage ownership held by our major shareholders during the past three years:

Black Rock, Inc. has held 5.21% of our outstanding share capital as 5 June 2015, which holdings increased to 5.88% as at 31 March 2016, decreased to 3.92% as at 3 June 2016, and further increased to 6.01% of our outstanding share capital as at 31 March 2017. As noted on page 199 of the 2017/2018 Annual Report and Accounts, we have been notified that Black Rock, Inc. held 6.7% as at 31 March 2018, and such holdings increased as at 31 May 2018 to 6.86% .

Capital Group Companies, Inc. held 4.98% of our outstanding share capital as at 31 March 2015, which holdings decreased to 3.88% as at 31 March 2016. As noted on page 199 of the 2017/2018 Annual Report and Accounts, we have been notified that Capital Group Companies, Inc. held 3.88% of our outstanding share capital as at 31 March 2018, and such holdings remain unchanged as at 31 May 2018.

Competrol International Investments Limited held 3.65% of our outstanding share capital as at 31 March 2017. As noted on page 199 of the 2017/2018 Annual Report and Accounts, we have been notified that Competrol International Investments Limited held 3.72% of our outstanding share capital as at 31 March 2018, and such holdings remain unchanged as at 31 May 2018.

Since 31 March 2018, we have not been notified of any other subsequent significant change in the percentage of shares held by the shareholders, listed on page 199 of the 2017/2018 Annual Report and Accounts.

Material interest in American Depositary Shares

As at 31 May 2018, we had 13,179 registered holders of our American Depositary Shares (ADSs) representing ownership of 11.30 % of our issued and outstanding share capital, excluding ordinary shares held in treasury. As at 31 May 2018, based on information available to us, we believe that approximately 11.32 % of our issued and outstanding share capital (whether in the form of shares or ADSs), excluding shares held in treasury, was held beneficially in the United States.

Price history

The following table sets forth the highest and lowest intraday market prices for our ordinary shares and ADSs for the periods indicated.

	Ordinary Share		ADS (\$)	
	(Pence)			
	High	Low	High	Low
May 2018*	895.01	824.01	59.82	56.25

*For the period to 31 May 2018, the latest practicable date.

Subsequent Events

NONE APPLICABLE

Pursuant to the rules and regulations of the SEC, National Grid has filed certain agreements as exhibits to this Annual Report on Form 20-F. These agreements may contain representations and warranties by the parties to them. These representations and warranties have been made solely for the benefit of the other party or parties to such agreement and (i) may be intended not as statements of fact, but rather as a way of allocating the risk to one of the parties to such agreements if those statements turn out to be inaccurate, (ii) may have been qualified by disclosures that were made to such other party or parties and that either have been reflected in the company’s filings or are not required to be disclosed in those filings, (iii) may apply materiality standards different from what may be viewed as material to investors and (iv) were made only as of the date of such agreements or such other date or dates as may be specified in such agreements.

In accordance with the instructions to Item 2(b)(i) of the Instructions to Exhibits to the Form 20-F, National Grid agrees to furnish to the SEC, upon request, a copy of any instrument relating to long-term debt that does not exceed 10 percent of the total assets of National Grid and its subsidiaries on a consolidated basis.

Reports of Independent Registered Public Accounting Firms—Audit opinions for Form 20-F

In addition to the financial information set forth on the pages referenced under Item 18 in the Form 20-F Cross Reference Table on page i, the reports of Deloitte LLP and PricewaterhouseCoopers LLP, Independent Registered Public Accounting Firms, are presented below:

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of National Grid plc

Opinion on the Financial Statements

We have audited the accompanying consolidated statement of financial position of National Grid plc and subsidiaries (the "Company") as at 31 March 2018, the related consolidated statements of income, comprehensive income, changes in equity, and cash flows for the year ended 31 March 2018, and the related notes (collectively referred to as the "financial statements"). We have not audited the unaudited commentaries on: the consolidated income statement, the statement of comprehensive income, the consolidated statement of changes in equity, the consolidated statement of financial position, the cash flow statement, the results of our principal operations by segment - continuing operations (accompanying note 2), tax (accompanying note 6), dividends (accompanying note 8), financial and other investments (accompanying note 14), and borrowings (accompanying note 20), which are not part of the financial statements. In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as at 31 March 2018, and the results of its operations and its cash flows for the year ended 31 March 2018, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as at 31 March 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated 16 May 2018, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

London, United Kingdom

16 May 2018

The first accounting period we audited was 31 March 2018. In 2017, we began preparing for audit firm transition.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of National Grid plc

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of National Grid plc and subsidiaries (the “Company”) as at 31 March 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as at 31 March 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as at and for the year ended 31 March 2018, of the Company and our report dated 16 May 2018, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Internal control over financing reporting section appearing on page 193 of the Additional Information section. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ Deloitte LLP

London, United Kingdom

16 May 2018

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of National Grid plc

In our opinion, the consolidated statement of financial position as of 31 March 2017 and the related consolidated income statement, consolidated statement of comprehensive income, consolidated cash flow statement and consolidated statement of changes in equity for each of the two years in the period ended 31 March 2017 present fairly, in all material respects, the financial position of National Grid plc and its subsidiaries as of 31 March 2017 and the results of their operations and their cash flows for each of the two years in the period ended 31 March 2017, in conformity International Financial Reporting Standards as issued by the International Accounting Standards Board and in conformity with International Financial Reporting Standards as adopted by the European Union.

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.
