Edgar Filing: SIMTEK CORP - Form 8-K

Item 1.01 Entry into a Material Definitive Agreement.

On March 24, 2006, Simtek Corporation (the "Company") entered into a License and Development Agreement with Cypress Semiconductor Corporation ("Cypress") pursuant to which, among other things, Cypress agreed to license certain intellectual property from the Company to develop and manufacture standard, custom and embedded nvSRAM products, Cypress and the Company agreed to co-develop certain nvSRAM products and Cypress has agreed to pay to the Company \$4 million in pre-paid royalties. Under the License and Development Agreement, the Company has issued (or will issue upon certain payments by Cypress at June 30, 2006 and December 31, 2006) three separate warrants to Cypress granting Cypress the right to purchase a total of 20 million shares of the Company's common stock, at an exercise price per share of \$0.75 with a term of 10 years each. The Company and Cypress amended and restated that certain Registration Rights Agreement, dated May 4, 2005, between such parties in order to grant Cypress certain registration rights with respect to the shares issuable upon exercise of the warrants. A copy of the press release announcing the transaction is included herewith and attached as Exhibit 99.1. A copy of the License and Development Agreement and the Amended and Restated Registration Rights Agreement are included herewith and attached as Exhibit 99.2 and Exhibit 99.3, respectively.

As previously disclosed, the Company and Cypress are currently jointly developing a 0.13-micron Silicon-Oxide-Nitride-Oxide-Silicon (SONOS) nonvolatile memory process pursuant to that certain Development and Production Agreement, dated May 4, 2005, between such parties. Incident to the Development and Production Agreement, Cypress previously purchased, for \$4 million, 6,740,816 shares of the Company's common stock, and the Company granted a warrant to Cypress to purchase 5,055,612 shares of the Company's common stock at an exercise price of \$0.7772 per share with a term of 10 years. As previously disclosed, the Company deposited \$3 million of the \$4 million purchase price into an escrow account in order to support and make certain payments for the 0.13-micron SONOS process and developments. In addition, the Company previously granted to Cypress certain registration rights with respect to the 6,740,816 shares and the 5,055,612 warrants.

Item 3.02 Unregistered Sales of Equity Securities.

On March 24, 2006, the Company issued (or entered into an agreement to issue upon certain payments by Cypress at June 30, 2006 and December 31, 2006) three separate warrants to Cypress granting Cypress the right to purchase a total of 20 million shares of the Company's common stock, at an exercise price per share of \$0.75 with a term of 10 years each. The aggregate amount of consideration received by the Company for the warrants was certain pre-paid royalties and certain of Cypress' obligations under the License and Development Agreement. The issuance of the warrants is exempt from registration pursuant to Rule 506 promulgated under, and Section 4(2) of, the Securities Act of 1933, as amended, as Cypress is an accredited investor, there was no general solicitation and Cypress had access to material information of the Company.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits.

Revenue for each segment is recognized based on the customer location within a designated geographic region. Property and equipment are attributed to the geographic region in which the assets are located. Revenues from unaffiliated customers excludes intersegment revenues and represents revenue with parties unaffiliated with Travelzoo Inc. and its wholly owned subsidiaries.

For the three months ended September 30, 2016 and 2015, the Company did not have any customers that accounted for 10% or more of revenue. As of September 30, 2016 and December 31, 2015, the Company had one Search customer that accounted for 17% and 15%, respectively, of accounts receivable.

The following table sets forth the breakdown of revenues (in thousands) by category and segment. Travel revenue includes travel publications (Top 20, Website, Newsflash, Travelzoo Network), Getaways vouchers and hotel platform. Search revenue includes SuperSearch and Fly.com. Local revenue includes Local Deals vouchers and entertainment offers (vouchers and direct bookings).

| | Three Months Ended September 30, 2016 | | Nine Months Ended September 30, 2015 | |
|------------------------------|--|----------|---|-----------|

Revenue by geography is based on the billing address of the advertiser. Long-lived assets attributed to the U.S. and international geographies are based upon the country in which the asset is located or owned. The following table sets forth revenue for countries that exceed 10% of total revenue (in thousands):

| | Three Months Ended September 30, 2016 | | Nine Months Ended September 30, 2015 | |
|-------------------|--|----------|---|-----------|
| Revenue | | | | |
| United States | \$18,035 | \$19,465 | \$59,224 | \$65,391 |
| United Kingdom | 5,705 | 6,686 | 19,373 | 21,413 |
| Rest of the world | 6,700 | 7,577 | 20,693 | 22,861 |
| Total revenues | \$30,440 | \$33,728 | \$99,290 | \$109,665 |

The following table sets forth long lived asset by geographic area (in thousands):

| | As of September 30, 2016 | As of December 31, 2015 |
|-------------------------|--------------------------------|-------------------------------|
| United States | \$ 5,124 | \$ 6,167 |
| Rest of the world | 1,606 | 1,753 |
| Total long lived assets | \$ 6,730 | \$ 7,920 |

Note 10: Related Party Transactions

On August 20, 2015, Travelzoo acquired the Travelzoo Asia Pacific business (“Travelzoo Asia Pacific”), which includes the Travelzoo businesses in Australia, China, Hong Kong, Japan, Taiwan, and Southeast Asia. This business was independently operated by Azzurro Capital Inc. (“Azzurro”) under a licensing agreement with Travelzoo Inc. The Company held an option right to acquire Travelzoo Asia Pacific at fair market value as determined by a third party valuation expert. Under the terms of the definitive acquisition agreement, Travelzoo (Europe) Limited, a United Kingdom subsidiary of the Company, was authorized by the Company to exercise the option right to acquire Travelzoo Asia Pacific for a fair market transaction value of \$22.6 million, subject to a working capital adjustment, using available cash of \$17.0 million and a promissory note of \$5.7 million with a maturity date of three years. In January 2016, Travelzoo (Europe) Limited paid off the promissory note of \$5.7 million using available cash in Europe.

The Company’s board of directors established a special committee (the “Special Committee”), consisting of independent and disinterested directors and provided it with the exclusive power and authority to determine whether any potential transaction to acquire Travelzoo Asia Pacific was advisable, fair to and in the best interests of the Company's stockholders other than Azzurro, the principal stockholder of Travelzoo Inc. The Special Committee engaged independent legal counsel and an independent financial advisor, Stout Risius Ross, Inc. (“SRR”). The Special Committee obtained the right to select its own independent financial advisor, SRR, to independently determine the fair market value of Travelzoo Asia Pacific to be used as the option exercise price and received an opinion from SRR regarding the fairness of the Travelzoo Asia Pacific transaction from a financial point of view. SRR determined that \$22.6 million represented the fair market value of Travelzoo Asia Pacific to be used as the option exercise price based upon the use of established valuation methodologies. The Special Committee, which was composed solely of independent and disinterested directors, unanimously approved the acquisition of Travelzoo Asia Pacific at the fair market value option exercise price with the assistance of its independent legal and financial advisors.

Ralph Bartel, who founded Travelzoo and who is a Director of the Company is the sole beneficiary of the Ralph Bartel 2005 Trust, which is the controlling shareholder of Azzurro. As of September 30, 2016, Azzurro is the Company's largest stockholder, holding approximately 53.7% of the Company’s outstanding shares.

Since Azzurro had a controlling interest in both Travelzoo Inc. and Travelzoo Asia Pacific at the time of the transaction and in prior periods, this transaction is accounted for as a common control transaction and a change in reporting entity for the Company. The financial results for Travelzoo Inc. have been retrospectively adjusted to include the financial results of Travelzoo Asia Pacific for prior periods as though the transaction occurred at the beginning of each period presented, including the following adjustments:

| | Three Months Ended September 30, 2015 | Nine Months Ended September 30, 2015 |
|----------------------------------|--|---|
| Revenue | \$ 2,718 | \$ 8,079 |
| Operating loss | \$ (414) | \$ (1,515) |
| Net Loss | \$ (480) | \$ (2,148) |
| Other Comprehensive income | \$ 115 | \$ 303 |
| Basic and diluted loss per share | \$ (0.03) | \$ (0.15) |

The Travelzoo Asia Pacific assets and liabilities have been combined with Travelzoo Inc. at their carrying values as though the transaction occurred at the beginning of each period presented. At September 30, 2016, and December 31, 2015, Travelzoo Asia Pacific net liabilities, total assets minus total liabilities, were \$9.9 million, and \$6.8 million, respectively.

The Travelzoo Asia Pacific transaction proceeds of \$22.6 million were reflected as an equity transaction, included in retained earnings, during the period the transaction occurred, which was in the year ended December 31, 2015.

Travelzoo (Europe) Limited, a United Kingdom subsidiary of the Company, acquired the Asia Pacific business, which includes certain customary seller indemnifications, through the acquisition of Travelzoo (Asia) Limited, including its wholly owned subsidiaries, and Travelzoo Japan KK. All significant intercompany accounts and transactions between Travelzoo Inc. and the acquired Travelzoo Asia Pacific entities have been eliminated for all periods presented.

In November 2014, Azzurro provided a loan to Travelzoo Asia Pacific of \$1.0 million with a stated interest rate of 8%. There was a \$1.0 million loan and \$5,000 accrued interest due to Azzurro as of December 31, 2014. From January 1, 2015 to August 20, 2015, Azzurro provided loans to Travelzoo Asia Pacific amounting to \$2.2 million with a stated interest rate of 10%. In September 2015, the Company paid the due and outstanding principal loan amount of \$3.3 million and accrued interest of \$128,000.

On August 20, 2015, as part of the transaction proceeds Travelzoo (Europe) Limited issued a promissory note to Azzurro with a principal amount of \$5.7 million, with a maturity date of August 20, 2018 and the ability to pay off principal prior to this maturity date with no prepayment penalty and a stated interest rate of 7%, which is due and payable on a quarterly basis. There were \$5.7 million loans due to Azzurro as of December 31, 2015. In January 2016, Travelzoo (Europe) Limited paid off the full amount of the loan of \$5.7 million and interest of \$110,000.

On September 28, 2015, Holger Bartel, Executive Chairman and Chairman of the Board of Directors, was granted 400,000 stock options that vest through December 31, 2017 in connection with his appointment to the role of Global Chief Executive Officer. See Note 7 to the accompanying unaudited condensed consolidated financial statements for further information.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The information in this report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such statements are based upon current expectations, assumptions, estimates and projections about Travelzoo and our industry. These forward-looking statements are subject to the many risks and uncertainties that exist in our operations and business environment that may cause actual results, performance or achievements of Travelzoo to be different from those expected or anticipated in the forward-looking statements. Any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. For example, words such as “may”, “will”, “should”, “estimates”, “predicts”, “potential”, “continue”, “strategy”, “believes”, “anticipates”, “plans”, “expects”, “intends”, and other expressions are intended to identify forward-looking statements. Travelzoo’s actual results and the timing of certain events could differ significantly from those anticipated in such forward-looking statements. Factors that might cause or contribute to such a discrepancy include, but are not limited to, those discussed elsewhere in this report in the section entitled “Risk Factors” and the risks discussed in our other SEC filings. The forward-looking statements included in this report reflect the beliefs of our management on the date of this report. Travelzoo undertakes no obligation to update publicly any forward-looking statements for any reason, even if new information becomes available or other circumstances occur in the future.

Overview

Travelzoo Inc. (the “Company” or “Travelzoo”) is a global media commerce company. We inform over 29 million members in Asia Pacific, Europe and North America, as well as millions of website users, about the best travel and entertainment deals available from thousands of companies. Our deal experts source, research and test-book offers, recommending only those that meet Travelzoo’s rigorous quality standards. We provide travel, entertainment and local businesses with a fast, flexible, and cost-effective way to reach millions of consumers. Our revenues are generated primarily from advertising fees.

Our publications and products include the Travelzoo websites (www.travelzoo.com, www.travelzoo.ca, www.travelzoo.co.uk, www.travelzoo.de, www.travelzoo.es, www.travelzoo.fr, cn.travelzoo.com, www.travelzoo.co.jp, www.travelzoo.com.au, www.travelzoo.com.hk, www.travelzoo.com.tw, among others), the Travelzoo Top 20 e-mail newsletter, and the Newsflash e-mail alert service. We operate SuperSearch, a pay-per-click travel search tool, and the Travelzoo Network, a network of third-party websites that list deals published by Travelzoo. Our Travelzoo websites include Local Deals and Getaways listings that allow our members to purchase vouchers for deals from local businesses such as spas, hotels and restaurants. We receive a percentage of the face value of the voucher from the local businesses. We also operate Fly.com, a travel search engine that allows users to quickly and easily find the best prices on flights from hundreds of airlines and online travel agencies.

On August 20, 2015 we acquired the Travelzoo Asia Pacific business (“Travelzoo Asia Pacific”), which includes the Travelzoo businesses in Australia, China, Hong Kong, Japan, Taiwan, and Southeast Asia. This business was independently operated by Azzurro under a licensing agreement with Travelzoo Inc. Azzurro was the majority stockholder of Travelzoo Asia Pacific. Travelzoo Inc. accounted for this transaction as a common control transaction and change in reporting entity. The financial results for Travelzoo Inc. have been retrospectively adjusted to include the financial results of Asia Pacific in the current and prior periods as though the transaction occurred at the beginning of the each period presented. The Asia Pacific assets and liabilities have been combined with Travelzoo Inc. at their carrying values as though the transaction occurred at the beginning of each period presented. The Travelzoo Asia Pacific transaction proceeds were reflected as an equity transaction, included in retained earnings, during the period the transaction occurred, which was in the year ended December 31, 2015. See Note 10 to the accompanying unaudited condensed consolidated financial statements for further information on the acquisition of Travelzoo Asia Pacific.

More than 2,000 companies use our services, including Air New Zealand, Apple Vacations, British Airways, Cathay Pacific Airways, Expedia, Fairmont Hotels and Resorts, Hawaiian Airlines, Iceland Air, InterContinental Hotels Group, Interstate Hotels & Resorts, Lufthansa, Key Tours International, Liberty Travel, Princess Cruises, Singapore Airlines, Solar Tours, Starwood Hotels & Resorts Worldwide, Travelocity, United Airlines, Vacation Express and Virgin Atlantic.

We have three reportable segments based on geographic regions: Asia Pacific, Europe and North America. Asia Pacific consists of our operations in Australia, China, Hong Kong, Japan, Taiwan, and Southeast Asia. Europe consists of our operations in France, Germany, Spain, and the U.K. North America consists of our operations in Canada and the U.S.

18

When evaluating the financial condition and operating performance of the Company, management focuses on financial and non-financial indicators such as growth in the number of members to the Company's newsletters, operating margin, growth in revenues in the absolute and relative to the growth in reach of the Company's publications measured as revenue per member and revenue per employee as a measure of productivity.

How We Generate Revenues

Our revenues are advertising revenues, consisting primarily of listing fees paid by travel companies, entertainment companies and local businesses to advertise their offers on Travelzoo's media properties. Listing fees are based on audience reach, placement, number of listings, number of impressions, number of clicks, number of referrals, or percentage of the face value of vouchers sold. Insertion orders are typically for periods between one month and twelve months and are not automatically renewed. Merchant agreements for Local Deals and Getaways advertisers are typically for twelve months and are not automatically renewed. We have three separate groups of our advertising products: Travel, Search and Local.

Our Travel category of revenue includes the publishing revenue for negotiated high-quality deals from travel companies, such as hotels, airlines, cruises or car rentals and includes products such as Top 20, Website, Newsflash, Travelzoo Network, as well as Getaways vouchers and commission revenues from hotel booking reservations. The revenues generated from these products are based upon a fee for number of e-mails sent to our audience, a fee for clicks delivered to the advertisers, a fee for placement of the advertising on our website or a fee based on a percentage of the face value of vouchers sold, hotel booking stays or other items sold. We recognize revenue upon delivery of the e-mails, delivery of the clicks, over the period of placement of the advertising, upon hotel booking stays and upon the sale of the vouchers or other items sold.

Our Search category of revenue includes comparison shopping tools for consumers to quickly and easily compare airfares, hotel and car rental prices and includes SuperSearch and Fly.com products. The revenues generated from these products are based upon a fee for clicks delivered to the advertisers or a fee for clicks delivered to advertisers that resulted in revenue for advertisers (i.e., successful clicks). We recognize revenue upon delivery of the clicks or successful clicks.

Our Local category of revenue includes the publishing revenue for negotiated high-quality deals from local businesses, such as restaurants, spas, shows, and other activities and includes Local Deals vouchers and entertainment offers (vouchers and direct bookings). The revenues generated from these products are based upon a percentage of the face value of vouchers or items sold or a fee for clicks delivered to the advertisers. We recognize revenue upon the sale of the vouchers, when we receive notification of the direct bookings or upon delivery of the clicks. The Company earns a fee for acting as an agent in these transactions, which is recorded on a net basis and is included in revenue upon completion of the voucher sale. Certain merchant contracts in foreign locations allow us to retain fees related to vouchers sold that are not redeemed by purchasers upon expiration, which we recognize as revenue after the expiration of the redemption period and after there are no further obligations to provide funds to merchants, members or others.

Trends in Our Business

Our ability to generate revenues in the future depends on numerous factors such as our ability to sell more advertising to existing and new advertisers, our ability to increase our audience reach and advertising rates, our ability to have sufficient supply of hotels offered at competitive rates and our ability to develop and launch new products. Our current revenue model primarily depends on advertising fees paid primarily by travel, entertainment and local businesses. A number of factors can influence whether current and new advertisers decide to advertise their offers with us. We have been impacted and expect to continue to be impacted by external factors such as the shift from offline to online advertising, the relative condition of the economy and recent terrorist attacks, competition and the introduction of new methods of advertising, and the decline in consumer demand for vouchers. The introduction of competing services and changing search algorithms by search engines such as Google, Yahoo! and Microsoft which may reduce the level or quality of Internet traffic to our services, in particular our Search products, SuperSearch and Fly.com, and the competitive market pricing of voucher-based offerings may lead to us reducing our take rate (i.e., our commission) in order to maintain or grow the number of quality deals and merchants we are seeking. For example, the consolidation of the airline industry reduced our revenues generated from this sector, the reduction of capacity in the airline industry reduced demand to advertise for excess capacity, and the introduction of new voucher-based products offered by competitors impacted our ability to sell our existing advertising products. A number of factors will have an impact on our revenue, such as the reduction in spending by travel intermediaries due to their focus on improving profitability, the trend towards mobile usage by consumers, the willingness of consumers to purchase the deals we advertise, and the willingness of certain competitors to grow their business unprofitably. In addition, we have been impacted and expect to continue to be impacted by internal factors such as the introduction of new web and mobile products, hiring and relying on key employees for the continued maintenance and growth of our business and ensuring our advertising products continue to attract the audience that advertisers desire. In response to declining Search product revenue, which includes SuperSearch and Fly.com products, the Company is continuously reviewing the performance of these products, which has and will result in reduced traffic acquisition spend for these products and may result in merging the products, discontinuing or replacing one or both of them. Challenges with traffic acquisition from search engines and poor monetization on mobile devices have led to declines in Search revenue. Given these factors impacting our Search products, revenue from our Search products are expected to decline.

Existing advertisers may shift from one advertising service (e.g. Top 20) to another (e.g. Local Deals and Getaways). These shifts between advertising services by advertisers could result in no incremental revenue or less revenue than in previous periods depending on the amount purchased by the advertisers, and in particular with Local Deals and Getaways, depending on how many vouchers are purchased by members. In addition, we are anticipating a shift from our existing hotel revenue to commission-based hotel revenue as we expand the use of our hotel platform, which may result in lower revenue depending on volume of hotel bookings.

Local revenues have been and may continue to decline over time due to market conditions driven by competition and declines in consumer demand. In the last several years, we have seen a decline in the number of vouchers sold and a decrease in the average take rate earned by us from the merchants for voucher sold.

Our ability to continue to generate advertising revenue depends heavily upon our ability to maintain and grow an attractive audience for our publications. We monitor our members to assess our efforts to maintain and grow our audience reach. We obtain additional members and activity on our websites by acquiring traffic from Internet search companies. The costs to grow our audience have had, and we expect will to continue to have, a significant impact on our financial results and can vary from period to period. We may have to increase our expenditures on acquiring traffic to continue to grow or maintain our reach of our publications due to competition. We continue to see a shift in the audience accessing our services through mobile devices and social media. We are starting to address this growing channel of our audience through development of our mobile applications and through marketing on social media channels. However, we will have to keep pace with technological change and trends to further address this shift in the audience behavior in order to offset any related declines in revenue.

We believe that we can increase our advertising rates only if the reach of our publications increases. We do not know if we will be able to increase the reach of our publications. If we are able to increase the reach of our publications, we still may not be able to or want to increase rates given market conditions such as intense competition in our industry. We have not had any significant rate increase in recent years due to intense competition in our industry. Even if we increase our rates, the increased price may reduce the amount of advertisers willing to advertise with us and, therefore, decrease our revenue. We may need to decrease our rates based on competitive market conditions and the performance of our audience in order to maintain or grow our revenue.

We do not know what our cost of revenues as a percentage of revenues will be in future periods. Our cost of revenues will increase if the number of searches performed on Fly.com increases because we pay a fee based on the number of searches performed on Fly.com. Our cost of revenues will increase if the face value of vouchers that we sell for Local Deals and Getaways increases or the total number of vouchers sold increases because we have credit card fees based upon face value of vouchers sold, due to customer service costs related to vouchers sold and due to member refunds on vouchers sold. Our cost of revenues are expected to increase due to our effort to develop our hotel booking platform as well. We expect fluctuations in cost of revenues as a percentage of revenues from quarter to quarter. Some of the fluctuations may be significant and have a material impact on our results of operations.

We do not know what our sales and marketing expenses as a percentage of revenue will be in future periods. Increased competition in our industry may require us to increase advertising for our brand and for our products. In order to increase the reach of our publications, we have to acquire a significant number of new members in every quarter and continue to promote our brand. One significant factor that impacts our advertising expenses is the average cost per acquisition of a new member. Increases in the average cost of acquiring new members may result in an increase of sales and marketing expenses as a percentage of revenue. We believe that the average cost per acquisition depends mainly on the advertising rates which we pay for media buys, our ability to manage our member acquisition efforts successfully, the regions we choose to acquire new members and the relative costs for that region, and the degree of competition in our industry. We may decide to accelerate our member acquisition for various strategic and tactical reasons and, as a result, increase our marketing expenses. We expect the average cost per acquisition to increase with our increased expectations for the quality of the members we acquire. We may see a unique opportunity for a brand marketing campaign that will result in an increase of marketing expenses. In addition, there may be a significant number of members that cancel or we may cancel their subscription for various reasons, which may drive us to spend more on member acquisition in order to replace the lost members. Further, we expect to continue our strategy over time to replicate our business model in selected foreign markets to result in a significant increase in our sales and marketing expenses and have a material adverse impact on our results of operations. For example, we recently acquired our Asia Pacific business, and we intend on increasing our investment in audience in this region. Due to the continued desire to grow our business in Asia Pacific, Europe and North America, we expect relatively high level of sales and marketing expenses in the foreseeable future. We expect fluctuations in sales and marketing expenses as a percentage of revenue from year to year and from quarter to quarter. Some of the fluctuations may be significant and have a material impact on our results of operations. We expect increased marketing expense to spur continued growth in members and revenue in future periods; however, we cannot be assured of this due to the many factors that impact our growth in members and revenue. We expect to adjust the level of such incremental spending during any given quarter based upon market conditions, as well as our performance in each quarter. We have increased and may continue to increase our spending on sales and marketing to increase the number of our members and address the growing audience from mobile and social media channels, as well as to increase our analytic capabilities to continuously improve the presentation of our offerings to our audience.

We do not know what our product development expenses as a percentage of revenue will be in future periods. There may be fluctuations that have a material impact on our results of operations. Product development changes may lead to reductions of revenue based on changes in the way that we present our deals to our audience. For example, we recently launched our fully responsive website that adjusts to different screen sizes and allows our members to more readily search our deals, which we believe will improve the user experience on our site; however, this may lead to unforeseen issues that could adversely affect our revenue and business. In addition, our new website will no longer feature our SuperSearch product in order to simplify the overall search experience and this is expected to result in lower revenue for SuperSearch in the future. We expect our efforts on developing our product and services will continue to be a focus in the future, which may lead to increased product development expenses. This increase in expense may be the result of an increase in headcount, the compensation related to existing headcount and the increased use of professional services. We expect our continued expansion into foreign markets and development of new advertising formats to result in a significant additional increase in our product development expenses. We expect to incur additional costs related to the development of our hotel platform capabilities, which we are developing, in part, to address the shift to mobile devices. We also may increase our investment in product development to ensure

our products are suited for different regions such as Asia Pacific. In addition, we expect to incur additional costs related to the development of our search capabilities of our website and mobile applications.

21

We do not know what our general and administrative expenses as a percentage of revenue will be in future periods. There may be fluctuations that have a material impact on our results of operations. We expect our headcount to continue to fluctuate in the future. The Company's headcount is one of the main drivers of general and administrative expenses. Therefore, we expect our absolute general and administrative expenses to continue to fluctuate. We expect our continued expansion into foreign markets to result in an increase in our general and administrative expenses. Our general and administrative expenses as a percentage of revenue may also fluctuate depending on the number of requests received related to a program under which the Company intends to make cash payments to people who establish that they were former stockholders of Travelzoo.com Corporation, whose claims were not escheated to states and who failed to submit requests to convert shares into Travelzoo Inc. within the required time period. We expect an increase in professional fees for various initiatives.

We do not know what our income taxes will be in future periods. There may be fluctuations that have a material impact on our results of operations. Our income taxes are dependent on numerous factors such as the geographic mix of our taxable income, federal and state and foreign country tax law and regulations and changes thereto, the determination of whether valuation allowances for certain tax assets are required or not, audits of prior years' tax returns resulting in adjustments, resolution of uncertain tax positions and different treatment for certain items for tax versus books, such as the disposition of our Asia Pacific business in 2009 and the acquisition of our Asia Pacific business in 2015. We expect fluctuations in our income taxes from year to year and from quarter to quarter. Some of the fluctuations may be significant and have a material impact on our results of operations.

The key elements of our growth strategy include building a travel and lifestyle brand with a large, high-quality user base and offering our users products that keep pace with consumer preference and technology, such as the trend toward mobile usage by consumers. We expect to continue our efforts to grow our revenues; however, we may not grow or we may experience slower growth. Some examples of our efforts to expand our business internationally since our inception in the U.S. have been expansion to the U.K. in 2005, Canada in 2006, Germany in 2006, France in 2007, and Spain in 2008. In addition, from 2007 through 2009 we began operations in Asia Pacific, including in Australia, China, Hong Kong, Japan, Taiwan, and Southeast Asia. We also have launched new products to grow our revenue, such as the introduction of Fly.com in 2009, Local Deals in 2010, Getaways in 2011, as well as our mobile application launches in 2011 and 2012. In late 2012, we bought an online hotel platform to assist in our development of a product to better serve hotels and to facilitate the development of our hotel platform. We have also increased our spending on addressing the shift of our audience to mobile devices and social media.

We believe that we can sell more advertising if the market for online advertising continues to grow and if we can maintain or increase our market share. We believe that the market for advertising continues to shift from offline to online. We do not know if we will be able to maintain or increase our market share. We do not know if we will be able to increase the number of our advertisers in the future. We do not know if we will have market acceptance of our new products or whether the market will continue to accept our existing products.

Results of Operations

The following table sets forth, as a percentage of total revenues, the results from our operations for the periods indicated.

| | Three Months Ended | | Nine Months Ended | |
|----------------------------|--------------------|---------|-------------------|---------|
| | September 30, | | September 30, | |
| | 2016 | 2015 | 2016 | 2015 |
| Revenues | 100.0 % | 100.0 % | 100.0 % | 100.0 % |
| Cost of revenues | 11.0 | 14.1 | 11.1 | 13.2 % |
| Gross profit | 89.0 | 85.9 | 88.9 | 86.8 |
| Operating expenses: | | | | |
| Sales and marketing | 56.5 | 56.6 | 55.7 | 56.5 |
| Product development | 7.6 | 8.6 | 7.3 | 8.4 |

| Income taxes | 2.7 | (24.3) | 3.8 | (4.7) |
| Net income | 5.3 % | 26.3 % | 5.7 % | 9.5 % |

Operating Metrics

The following table sets forth selected operating metrics for Asia Pacific, Europe and North America:

| | Three Months Ended September 30, | |
|--|-------------------------------------|------------|
| | 2016 | 2015 |
| Asia Pacific | | |
| Total members (1) | 3,603,000 | 3,420,000 |
| Average cost per acquisition of a new member | \$2.98 | \$ 2.25 |
| Revenue per member (2) | \$2.94 | \$ 2.99 |
| Revenue per employee (3) | \$118,000 | \$ 112,000 |
| Mobile application downloads | 635,000 | 548,000 |
| Social media followers | 483,000 | 382,000 |
| Europe | | |
| Total members (1) | 8,203,000 | 7,795,000 |
| Average cost per acquisition of a new member | \$2.31 | \$ 3.20 |
| Revenue per member (2) | \$4.49 | \$ 5.83 |
| Revenue per employee (3) | \$230,000 | \$ 273,000 |
| Mobile application downloads | 1,567,000 | 1,391,000 |
| Social media followers | 637,000 | 585,000 |
| North America | | |
| Total members (1) | 17,391,000 | 17,231,000 |
| Average cost per acquisition of a new member | \$2.10 | \$ 2.31 |
| Revenue per member (2) | \$4.44 | \$ 5.47 |
| Revenue per employee (3) | \$365,000 | \$ 358,000 |
| Mobile application downloads | 2,986,000 | 2,685,000 |
| Social media followers | 2,507,000 | 2,219,000 |
| Consolidated | | |
| Total members (1) | 29,059,000 | 28,307,000 |
| Average cost per acquisition of a new member | \$2.25 | \$ 2.30 |
| Revenue per member (2) | \$4.27 | \$ 5.29 |
| Revenue per employee (3) | \$271,000 | \$ 282,000 |
| Mobile application downloads | 5,188,000 | 4,076,000 |
| Social media followers | 3,627,000 | 2,804,000 |

(1) Members represent individuals who are signed up to receive one or more of our free email publications that present our travel, entertainment and local deals.

(2) Annualized revenue divided by number of members at the beginning of the year.

(3) Annualized revenue divided by number of employees at the end of the quarter.

Revenues

The following table sets forth the breakdown of revenues (in thousands) by category and segment. Travel revenue includes travel publications (Top 20, Website, Newsflash, Travelzoo Network), Getaways vouchers and hotel platform. Search revenue includes SuperSearch and Fly.com. Local revenue includes Local Deals vouchers and entertainment offers (vouchers and direct bookings).

| | Three Months Ended September 30, 2016 | | Nine Months Ended September 30, 2016 | |
|------------------------------|--|----------|---|-----------|
| | 2015 | 2016 | 2015 | 2016 |
| Asia Pacific | | | | |
| Travel | \$2,335 | \$2,426 | \$6,582 | \$7,029 |

| Search | 3,617 | 4,544 | 11,841 | 14,547 |
| Local | 4,638 | 5,582 | 14,938 | 18,580 |
| Total revenues | \$30,440 | \$33,728 | \$99,290 | \$109,665 |

Asia Pacific

Asia Pacific revenues decreased \$152,000 for the three months ended September 30, 2016 from the three months ended September 30, 2015. This decrease was primarily due to a \$242,000 decrease in Travel revenues, an \$81,000 decrease in Local revenues, offset by a \$130,000 positive impact from foreign currency movements relative to the U.S. dollar. The decrease in Travel revenue of \$242,000 was primarily due to the decreased number of emails sent and paid clicks. The decrease in Local revenues of \$81,000 was primarily due to the decreased number of Local Deals vouchers sold.

Asia Pacific revenues decreased \$806,000 for the nine months ended September 30, 2016 from the nine months ended September 30, 2015. This decrease was primarily due to a \$429,000 decrease in Local revenues, a \$531,000 decrease in Travel revenues, offset by a \$63,000 positive impact from foreign currency movements relative to the U.S. dollar. The decrease in Local revenues of \$429,000 was primarily due to the decreased number of Local Deals vouchers sold. The decrease in Travel revenue of \$531,000 was primarily due to the decreased number of emails sent and paid clicks.

Europe

Europe revenues decreased \$1.5 million for the three months ended September 30, 2016 from the three months ended September 30, 2015. This decrease was primarily due to a \$947,000 negative impact from foreign currency movements relative to the U.S. dollar and a \$331,000 decrease in Search revenues. The decrease in Search revenue of \$331,000 was primarily due to the decreased number of clicks that generate revenue as a result of decreased spending on traffic acquisition.

Europe revenues decreased \$2.7 million for the nine months ended September 30, 2016 from the nine months ended September 30, 2015. This decrease was primarily due to a \$1.8 million negative impact from foreign currency

movements relative to the U.S. dollar, and a \$1.0 million decrease in Search revenues. The decrease in Search revenue of \$1.0 million was primarily due to the decreased number of clicks that generate revenue as a result of decreased spending on traffic acquisition.

North America

North America revenues decreased \$1.6 million for the three months ended September 30, 2016 from the three months ended September 30, 2015. This decrease was primarily due to the decrease in Local, Search and Travel revenues. The decrease in Local revenues of \$593,000 was primarily due to the decreased number of Local Deals vouchers sold. The decrease in Search revenue of \$549,000 was primarily due to the decreased number of clicks that generate revenue as a result of decreased spending on traffic acquisition. The decrease in Travel revenue of \$482,000 was primarily due to the decreased number of Getaways vouchers sold and paid clicks. The North America revenue decrease includes a \$2,000 positive impact from foreign currency movement relative to the U.S. dollar.

North America revenues decreased \$6.8 million for the nine months ended September 30, 2016 from the nine months ended September 30, 2015. This decrease was primarily due to the decrease in Local, Travel and Search revenues. The decrease in Local revenues of \$3.1 million was primarily due to the decreased number of Local Deals vouchers sold. The decrease in Travel revenue of \$2.2 million was primarily due to the decreased number of Getaways vouchers sold and paid clicks. The decrease in Search revenue of \$1.5 million was primarily due to the decreased number of clicks that generate revenue as a result of decreased spending on traffic acquisition. The North America revenue decrease includes a \$215,000 negative impact from foreign currency movement relative to the U.S. dollar

For the three and nine months ended September 30, 2016 and 2015, none of our customers accounted for 10% or more of our revenue.

Cost of Revenues

Cost of revenues consists primarily of network expenses, including fees we pay for co-location services and depreciation and maintenance of network equipment, payments made to third-party partners of the Travelzoo Network, fees we pay related to user searches on Fly.com, amortization of capitalized website development costs, credit card fees, certain estimated member refunds and customer service costs associated with vouchers we sell, and salary expenses associated with network operations and customer service staff and facilities costs. Cost of revenues was \$3.4 million and \$4.7 million for the three months ended September 30, 2016 and September 30, 2015, respectively. Cost of revenues was \$11.0 million and \$14.5 million for the nine months ended September 30, 2016 and September 30, 2015, respectively.

Cost of revenue decreased \$1.3 million for the three months ended September 30, 2016 from the three months ended September 30, 2015. This decrease was primarily due to a \$1.0 million decrease in payments made to third-party partners of the Travelzoo Network, and a \$161,000 decrease in salary and employee related expenses due in part to a decrease in headcount.

Cost of revenue decreased \$3.5 million for the nine months ended September 30, 2016 from the nine months ended September 30, 2015. This decrease was primarily due to a \$2.5 million decrease in payments made to third-party partners of the Travelzoo Network, a \$534,000 decrease in Local Deals and Getaways costs including a \$202,000 decrease in member refunds and a \$413,000 decrease in salary and employee related expenses due in part to a decrease in headcount.

Operating Expenses

Sales and Marketing

Sales and marketing expenses consist primarily of advertising and promotional expenses, salary expenses associated with sales, marketing and production staff, expenses related to our participation in industry conferences, public relations expenses and facilities costs. Sales and marketing expenses were \$17.2 million and \$19.1 million for the three months ended September 30, 2016 and 2015, respectively. For the three months ended September 30, 2016 and 2015, advertising expenses accounted for 31% and 38%, respectively, of the total sales and marketing expenses and consisted primarily of online advertising referred to as traffic acquisition cost and member acquisition costs. The goal of our advertising was to acquire new members to our e-mail products, increase the traffic to our websites, increase brand awareness and increase our audience through mobile and social media channels.

Sales and marketing expenses were \$55.3 million and \$61.9 million for the nine months ended September 30, 2016 and 2015, respectively. For the nine months ended September 30, 2016 and 2015, advertising expenses accounted for 33% and 34%, respectively, of the total sales and marketing expenses.

Sales and marketing expenses decreased \$1.9 million for the three months ended September 30, 2016 from the three months ended September 30, 2015. The decrease was primarily due to a \$697,000 increase in Search traffic acquisition and member acquisition costs, a \$694,000 decrease in brand marketing costs, a \$643,000 decrease in salary and employee related expenses due in part to a decrease in headcount.

Sales and marketing expenses decreased \$6.6 million for the nine months ended September 30, 2016 from the nine months ended September 30, 2015. The decrease was primarily due to a \$3.7 million decrease in salary and employee related expenses due in part to a decrease in headcount, and a \$1.9 million decrease in brand marketing costs.

Product Development

Product development expenses consist primarily of compensation for software development staff, fees for professional services, software maintenance and amortization, and facilities costs. Product development expenses were \$2.3 million and \$2.9 million for the three months ended September 30, 2016 and 2015, respectively. Product development expenses were \$7.3 million and \$9.2 million for the nine months ended September 30, 2016 and 2015, respectively.

Product development expenses decreased \$600,000 for three months ended September 30, 2016 from the three months ended September 30, 2015. The decrease was primarily due to \$288,000 decrease in salary and employee related expenses due in part to a decrease in headcount and a \$132,000 decrease in professional service expenses

Product development expenses decreased \$1.9 million for nine months ended September 30, 2016 from the nine months ended September 30, 2015. The decrease was primarily due to a \$959,000 decrease in salary and employee related expenses due in part to a decrease in headcount.

General and Administrative

General and administrative expenses consist primarily of compensation for administrative, executive, bad debt expense, amortization of intangible assets, general office expense and facilities costs. General and administrative expenses were \$5.4 million and \$6.1 million for the three months ended September 30, 2016 and 2015, respectively.

General and administrative expenses were \$16.6 million and \$17.9 million for the three months ended September 30, 2016 and 2015, respectively.

General and administrative expenses decreased \$747,000 for the three months ended September 30, 2016 from the three months ended September 30, 2015. The decrease was primarily due to \$597,000 decrease in salary, stock based compensation and employee related expenses due in part to a decrease in headcount.

General and administrative expenses decreased \$1.3 million for the nine months ended September 30, 2016 from the nine months ended September 30, 2015. The decrease was primarily due to a \$1.6 million decrease in salary, stock based compensation and employee related expenses due in part to a decrease in headcount.

Income Taxes

Our income is generally taxed in the U.S., Canada, and U.K. Our income tax provisions reflect federal, state and country statutory rates applicable to our levels of worldwide income, adjusted to take into account expenses that are treated as having no recognizable tax benefit. Income tax expense and benefit was \$837,000 and \$8.2 million for the three months ended September 30, 2016 and 2015, respectively. Our effective tax rate was 34% and (1,246)% for the three months ended September 30, 2016 and 2015, respectively. Income tax expense and benefit was \$3.7 million and \$5.1 million for the nine months ended September 30, 2016 and 2015, respectively. Our effective tax rate was 40% and (97)% for the nine months ended September 30, 2016 and 2015, respectively.

Our effective tax rate increased for the three and nine months ended September 30, 2016 from the three and nine months ended September 30, 2015, due primarily to the recognition of an \$8.4 million tax benefit related to the unexchanged promotional shares after a lapse of certain statute of limitations for the three and nine months ended September 30, 2015. We expect our effective tax rate to fluctuate in future periods depending on the geographic mix of our worldwide taxable income, losses or gains incurred by our operations in Asia Pacific, Canada and Europe, statutory tax rate changes that may occur, existing or new uncertain tax matters that may arise and require changes in tax reserves, the use of accumulated losses to offset current taxable income in Asia Pacific and the need for valuation allowances on certain tax assets, if any.

U.S. income and foreign withholding taxes have not been provided on undistributed earnings for certain non-U.S. subsidiaries. The undistributed earnings on a book basis for those non-U.S. subsidiaries are approximately \$11.7 million. The Company intends to reinvest these earnings indefinitely in its operations outside the U.S. If the undistributed earnings are remitted to the U.S., these amounts would be taxable in the U.S. at the current federal and state tax rates net of foreign tax credits. Also, depending on the jurisdiction any distribution may be subject to withholding taxes at rates applicable for that jurisdiction.

We file income tax returns in the U.S. federal jurisdiction and various states and foreign jurisdictions. We are subject to U.S. federal and certain state tax examinations for years after 2008 and are subject to California tax examinations for years after 2005. The material foreign jurisdictions where the Company is subject to potential examinations by tax authorities are the France, Germany, Spain and United Kingdom for tax years after 2009. These examinations may lead to ordinary course adjustments or proposed adjustments to our taxes or our net operating income. Our 2009 and 2010 federal income tax returns are currently under examination, including a review of the impact of the sale of Asia Pacific business segment in 2009. In connection with this examination, the Company received a Revenue Agent's Report (RAR) from the IRS, generally issued at the conclusion of an IRS examination. The RAR proposes an increase to our U.S. taxable income, which would result in additional federal tax, federal penalty and state tax expense totaling approximately \$31.0 million, excluding interest and state penalties, if any. See Note 5 to the accompanying unaudited condensed consolidated financial statements for further information.

Segment Information

Asia Pacific

| | Three Months Ended | | Nine Months Ended | |
|---|--------------------|--------------------|--------------------|--------------------|
| | September 30, 2016 | September 30, 2015 | September 30, 2016 | September 30, 2015 |
| | (In thousands) | | (In thousands) | |
| Revenues | \$2,566 | \$2,718 | \$7,273 | \$8,079 |
| Loss from operations | \$(790) | \$(414) | \$(3,058) | \$(1,515) |
| Loss from operations as a % of revenues | (30.8)% | (15.2)% | (42.0)% | (18.8)% |

Asia Pacific net revenues decreased \$152,000 for the three months ended September 30, 2016 from the three months ended September 30, 2015 (see "Revenues" above). Asia Pacific expenses increased \$224,000 for the three months ended September 30, 2016 from the three months ended September 30, 2015. This increase was primarily due to an increase in member acquisition and marketing costs.

Asia Pacific net revenues decreased \$806,000 for the nine months ended September 30, 2016 from the nine months ended September 30, 2015 (see "Revenues" above). Asia Pacific expenses increased \$737,000 for the nine months ended September 30, 2016 from the nine months ended September 30, 2015. This increase was primarily due to a \$986,000 increase in member acquisition and marketing costs, a \$281,000 increase in Local Deals and Getaways costs, including a \$116,000 increase in member refunds, offset by a \$450,000 decrease in salary and employee related expense due in part to a decrease in headcount.

Foreign currency movements relative to the U.S. dollar positively impacted our local currency loss from our operations in Asia Pacific by approximately \$60,000 for the three months ended September 30, 2016. Foreign currency movements relative to the U.S. dollar negatively impacted our loss from our operations in Asia Pacific by approximately \$9,000 for the three months ended September 30, 2015.

Foreign currency movements relative to the U.S. dollar positively impacted our local currency loss from our operations in Asia Pacific by approximately \$157,000 for the nine months ended September 30, 2016. Foreign currency movements relative to the U.S. dollar negatively impacted our loss from our operations in Asia Pacific by approximately \$78,000 for the nine months ended September 30, 2015.

Europe

| | Three Months Ended | | Nine Months Ended | |
|---|--------------------|--------------------|--------------------|--------------------|
| | September 30, 2016 | September 30, 2015 | September 30, 2016 | September 30, 2015 |
| | (In thousands) | | (In thousands) | |
| Revenues | \$8,815 | \$10,317 | \$29,406 | \$32,138 |
| Income from operations | \$1,626 | \$587 | \$5,511 | \$2,363 |
| Income from operations as a % of revenues | 18.4 % | 5.7 % | 18.7 % | 7.4 % |

Europe net revenues decreased \$1.5 million for the three months ended September 30, 2016 from the three months ended September 30, 2015 (see “Revenues” above). Europe expenses decreased \$2.5 million for the three months ended September 30, 2016 from the three months ended September 30, 2015. This decrease was primarily due to a \$1.0 million decrease in search traffic acquisition, member acquisition and marketing costs and a \$645,000 decrease in salary and employee related expense due in part to a decrease in headcount.

Europe net revenues decreased \$2.7 million for the nine months ended September 30, 2016 from the nine months ended September 30, 2015 (see “Revenues” above). Europe expenses decreased \$5.9 million for the nine months ended September 30, 2016 from the nine months ended September 30, 2015. This decrease was primarily due to a \$3.0 million decrease in search traffic acquisition, member acquisition and marketing costs and a \$1.5 million decrease in salary and employee related expense due in part to a decrease in headcount.

Foreign currency movements relative to the U.S. dollar negatively impacted our local currency income from our operations in Europe by approximately \$122,000 for the three months ended September 30, 2016. Foreign currency movements relative to the U.S. dollar positively impacted our income from our operations in Europe by approximately \$60,000 for the three months ended September 30, 2015.

Foreign currency movements relative to the U.S. dollar negatively impacted our local currency income from our operations in Europe by approximately \$379,000 for the nine months ended September 30, 2016. Foreign currency movements relative to the U.S. dollar positively impacted our income from our operations in Europe by approximately \$15,000 for the nine months ended September 30, 2015.

North America

| | Three Months Ended | | Nine Months Ended | |
|---|--------------------|----------|-------------------|----------|
| | September 30, | | September 30, | |
| | 2016 | 2015 | 2016 | 2015 |
| | (In thousands) | | (In thousands) | |
| Revenues | \$19,059 | \$20,693 | \$62,611 | \$69,448 |
| Income from operations | \$1,369 | \$687 | \$6,676 | \$5,322 |
| Income from operations as a % of revenues | 7.2 | % 3.3 | % 10.7 | % 7.7 |

North America net revenues decreased \$1.6 million for the three months ended September 30, 2016 from the three months ended September 30, 2015 (see “Revenues” above). North America expenses decreased \$2.3 million for the three months ended September 30, 2016 from the three months ended September 30, 2015. This decrease was primarily due to a \$1.2 million decrease in salary, stock based compensation and employee related expenses due in part to a decrease in headcount, and a \$989,000 decrease in payments made to third-party partners of the Travelzoo Network.

North America net revenues decreased \$6.8 million for the nine months ended September 30, 2016 from the nine months ended September 30, 2015 (see “Revenues” above). North America expenses decreased \$8.2 million for the nine months ended September 30, 2016 from the nine months ended September 30, 2015. This decrease was primarily due to a \$4.8 million decrease in salary, stock based compensation and employee related expenses due in part to a decrease in headcount, and a \$2.4 million decrease in payments made to third-party partners of the Travelzoo Network.

Liquidity and Capital Resources

As of September 30, 2016, we had \$24.8 million in cash and cash equivalents, of which \$13.5 million was held outside the U.S. in certain of our foreign operations. If these assets are distributed to the U.S., we may be subject to additional U.S. taxes in certain circumstances. Cash and cash equivalents decreased from \$35.1 million as of December 31, 2015 primarily as a result of cash used in financing activities, offset by cash provided by operating activities as explained below. We expect that cash on hand will be sufficient to provide for working capital needs for at least the next twelve months.

| | Nine Months Ended | |
|--|-------------------|------------|
| | September 30, | |
| | 2016 | 2015 |
| | (In thousands) | |
| Net cash provided by operating activities | \$1,916 | \$1,075 |
| Net cash used in investing activities | (802) | (819) |
| Net cash used in financing activities | (11,327) | (18,443) |
| Effect of exchange rate changes on cash and cash equivalents | (76) | (2,660) |
| Net decrease in cash and cash equivalents | \$(10,289) | \$(20,847) |

Net cash provided by operating activities is net income adjusted for certain non-cash items and changes in assets and liabilities. Net cash provided by operating activities for the nine months ended September 30, 2016 was \$1.9 million which consisted of a net income of \$5.7 million, adjustments for non-cash items of \$2.0 million and a \$5.8 million decrease in cash from changes in operating assets and liabilities. Adjustments for non-cash items primarily consisted of \$1.9 million of depreciation and amortization expense on property and equipment, \$224,000 of deferred taxes and \$692,000 of stock-based compensation expense. In addition, the decrease in cash from changes in operating assets and liabilities primarily consisted of \$4.4 million in accounts payable, \$2.1 million in accrued expenses and other, offset by \$1.5 million in income tax receivable and payable. Net cash provided by operating activities for the nine months ended September 30, 2015 was \$1.1 million which consisted of a net income of \$10.4 million, adjustments for non-cash items of \$2.6 million and a \$11.9 million decrease in cash from changes in operating assets and liabilities. Adjustments for non-cash items primarily consisted of \$2.2 million of depreciation and amortization expense on property and equipment. In addition, the decrease in cash from changes in operating assets and liabilities primarily consisted of \$7.8 million in other non-current liabilities, \$2.0 million in accounts receivable, \$1.4 million in accrued expenses for unexchanged promotional shares, \$3.2 million in accounts payable and accrued expenses, offset by \$2.1 million in income tax receivable.

Cash paid for income tax net of refunds received during the nine months ended September 30, 2016 and September 30, 2015 was \$2.2 million and \$742,000, respectively.

Net cash used in investing activities for the nine months ended September 30, 2016 and 2015, was \$802,000 and \$819,000, respectively. The cash used in investing activities for the nine months ended September 30, 2016 was primarily due to \$802,000 in purchases of property and equipment. The cash used in investing activities for the nine months ended September 30, 2015 was due to \$885,000 purchases of property and equipment, offset by \$202,000 release of restricted cash.

Net cash used in financing activities for the nine months ended September 30, 2016 and 2015 were \$11.3 million and \$18.4 million, respectively. Net cash used in financing activities for the nine months ended September 30, 2016 was primarily due to \$5.7 million payment of related party loan and \$5.7 million cash used in repurchases of our common stock. Net cash used in financing activities for the nine months ended September 30, 2015 was primarily due to cash used in acquiring the Travelzoo Asia Pacific business.

See Note 4 to the accompanying unaudited condensed consolidated financial statements for information on the unexchanged promotional share settlements and related cash program.

Although the Company has settled the states unclaimed property claims with all states, the Company may still receive inquiries from certain potential Netsurfer promotional stockholders that had not provided their state of residence to the Company by April 25, 2004. Therefore, the Company is continuing its voluntary program under which it makes cash payments to individuals related to the promotional shares for individuals whose residence was unknown by the Company and who establish that they satisfied the conditions to receive shares of Travelzoo.com Corporation, and who failed to submit requests to convert their shares into shares of Travelzoo Inc. within the required time period. This voluntary program is not available for individuals whose promotional shares have been escheated to a state by the Company.

Our capital requirements depend on a number of factors, including market acceptance of our products and services, the amount of our resources we devote to the development of new products, cash payments related to former

stockholders of Travelzoo.com Corporation, expansion of our operations, and the amount of resources we devote to promoting awareness of the Travelzoo and Fly.com brands. Since the inception of the program under which we make cash payments to people who establish that they were former stockholders of Travelzoo.com Corporation, and who failed to submit requests to convert their shares into shares of Travelzoo Inc. within the required time period, we have incurred expenses of \$2.9 million. While future payments for this program are expected to decrease, the total cost of this program is still undeterminable because it is dependent on our stock price and on the number of valid requests ultimately received.

Consistent with our growth, we have experienced fluctuations in our cost of revenues, sales and marketing expenses and our general and administrative expenses, including increases in product development costs, and we anticipate that these increases will continue for the foreseeable future. We believe cash on hand will be sufficient to pay such costs for at least the next twelve months. In addition, we will continue to evaluate possible investments in businesses, products and technologies, the consummation of any of which would increase our capital requirements.

Although we currently believe that we have sufficient capital resources to meet our anticipated working capital and capital expenditure requirements for at least the next twelve months, unanticipated events and opportunities or a less favorable than expected development of our business with one or more of our advertising formats may require us to sell additional equity or debt securities or establish new credit facilities to raise capital in order to meet our capital requirements.

If we sell additional equity or convertible debt securities, the sale could dilute the ownership of our existing stockholders. If we issue debt securities or establish a new credit facility, our fixed obligations could increase, and we may be required to agree to operating covenants that would restrict our operations. We cannot be sure that any such financing will be available in amounts or on terms acceptable to us.

If the development of our business is less favorable than expected, we may decide to significantly reduce the size of our operations and marketing expenses in certain markets with the objective of reducing cash outflow.

The information set forth under “Note 4 — Commitments and Contingencies” to the accompanying unaudited condensed consolidated financial statements included in Part I, Item 1 of this report is incorporated herein by reference.

The following summarizes our principal contractual commitments as of September 30, 2016 (in thousands):

| | 2016 | 2017 | 2018 | 2019 | 2020 | Thereafter | Total |
|----------------------|---------|---------|---------|---------|---------|------------|----------|
| Operating leases | \$1,385 | \$5,448 | \$4,595 | \$4,072 | \$3,617 | \$ 8,518 | \$27,635 |
| Purchase obligations | 448 | 1,034 | 365 | — | — | — | 1,847 |
| Total commitments | \$1,833 | \$6,482 | \$4,960 | \$4,072 | \$3,617 | \$ 8,518 | \$29,482 |

We also have contingencies related to net unrecognized tax benefits, including interest, of approximately \$3.1 million as of September 30, 2016. In addition, the Company received a Revenue Agents' Report from the IRS for the 2009 calendar year related to the sale of our Asia Pacific business segment, which would result in additional federal and state tax expense totaling approximately \$31.0 million, excluding interest and penalties, if any. We are unable to make reasonably reliable estimates on the timing of the cash settlements with the respective taxing authorities, if any. See Note 5 to the accompanying unaudited condensed consolidated financial statements for further information.

Critical Accounting Policies

We believe that there are a number of accounting policies that are critical to understanding our historical and future performance, as these policies affect the reported amounts of revenue and the more significant areas involving management's judgments and estimates. These significant accounting policies relate to revenue recognition, reserve for member refunds, allowance for doubtful accounts, income tax and loss contingencies. These policies, and our procedures related to these policies, are described in detail below.

Revenue Recognition

We recognize advertising revenues in the period in which the advertisement is displayed or the voucher sale has been completed, provided that evidence of an arrangement exists, the fees are fixed or determinable and collection of the resulting receivable is reasonably assured. If fixed-fee advertising is displayed over a term greater than one month, revenues are recognized ratably over the period as described below. The majority of insertion orders have terms that begin and end in a quarterly reporting period. In the cases where at the end of a quarterly reporting period the term of an insertion order is not complete, the Company allocates the total arrangement fee to each element based on the relative estimated selling price of each element. The Company uses prices stated on its internal rate card, which represents stand-alone sales prices, to establish estimated selling prices. The stand-alone price is the price that would be charged if the advertiser purchased only the individual insertion. Fees for variable-fee advertising arrangements are recognized based on the number of impressions displayed, number of clicks delivered, or number of referrals generated during the period.

Under these policies, the Company evaluates each of these criteria as follows:

31

Evidence of an arrangement. We consider an insertion order signed by the advertiser or its agency to be evidence of an arrangement.

Delivery. Delivery is considered to occur when the advertising has been displayed, the click-throughs have been delivered, the voucher sale has been completed, cancelable hotel booking reservation stays have occurred or non-cancelable hotel booking reservations have been booked, as applicable.

Fixed or determinable fee. We consider the fee to be fixed or determinable if the fee is not subject to refund or adjustment and payment terms are standard.

Collection is deemed reasonably assured. We conduct a credit review for all advertising transactions at the time of the arrangement to determine the creditworthiness of the advertiser. Collection is deemed reasonably assured if we expect that the advertiser will be able to pay amounts under the arrangement as payments become due. Collection is deemed not reasonably assured when an advertiser is perceived to be in financial distress, which may be evidenced by weak industry conditions, a bankruptcy filing, or previously billed amounts that are past due. If we determine that collection is not reasonably assured, then we defer the revenue and recognize the revenue upon cash collection. Collection is deemed reasonably assured for our voucher sales to consumers as these transactions require the use of credit cards subject to authorization.

Revenues from advertising sold to advertisers through agencies are reported at the amount billed to the agency.

For Local Deals and Getaways products, the Company earns a fee for acting as an agent in these transactions which is recorded on a net basis and is included in revenue upon completion of the voucher sale. Certain merchant contracts in foreign locations allow us to retain fees related to vouchers sold that are not redeemed by purchasers upon expiration, which we recognize as revenue after the expiration of the redemption period and after there are no further obligations to provide funds to merchants, members or others.

Commission revenues generated through provision of hotel booking reservations to hotels are recognized upon the estimated date the stay occurs at the hotel, which includes estimates of cancellations of the hotel bookings based upon historical patterns. If the hotel booking cannot be canceled or the hotel advertiser has agreed to pay for booking regardless of potential future cancellations then revenue is recognized upon booking.

Reserve for Member Refunds

We record an estimated reserve for member refunds based on our historical experience at the time revenue is recorded for Local Deals and Getaways voucher sales. We accrue costs associated with refunds in accrued expenses on the consolidated balance sheets. We consider many key factors such as the historical refunds based upon the time lag since the sale, historical reasons for refunds, time period that remains until the deal expiration date, any changes in refund procedures and estimates of redemptions and breakage. Should any of these factors change, the estimates made by management will also change, which could impact the level of our future reserves for member refunds. Specifically, if the financial condition of our advertisers, the businesses that are providing the vouchered services, were to deteriorate, affecting their ability to provide the services to our members, additional reserves for member refunds may be required.

Estimated member refunds that are determined to be recoverable from the merchant and the portion of which represents our fee from the merchant are recorded in the consolidated statements of operations as a reduction to revenue. Estimated member refunds that are determined not to be recoverable from the merchant are presented as a cost of revenue. If our judgments regarding estimated member refunds are inaccurate, reported results of operations could differ from the amount we previously accrued.

Allowance for Doubtful Accounts

We record a provision for doubtful accounts based on our historical experience of write-offs and a detailed assessment of our accounts receivable and allowance for doubtful accounts. In estimating the provision for doubtful accounts, management considers the age of the accounts receivable, our historical write-offs, the creditworthiness of the advertiser, the economic conditions of the advertiser's industry, and general economic conditions, among other factors. Should any of these factors change, the estimates made by management will also change, which could impact the level of our future provision for doubtful accounts. Specifically, if the financial condition of our advertisers were to deteriorate, affecting their ability to make payments, additional provision for doubtful accounts may be required.

Income Taxes

We are subject to income taxes in the U.S. and numerous foreign jurisdictions. Significant judgment is required in evaluating our uncertain tax positions and determining our provision for income taxes. Although we believe we have adequately reserved for our uncertain tax positions, no assurance can be given that the final tax outcome of these matters will not be different. We adjust these reserves in light of changing facts and circumstances, such as the progress or closing of a tax audit or the refinement of an estimate. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact the provision for income taxes in the period in which such determination is made. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate, as well as the related net interest.

Our effective tax rates have differed from the statutory rate primarily due to the tax impact of foreign operations, state taxes, certain benefits realized related to stock option activities, credits, the extent that our earnings are indefinitely reinvested outside the U.S. and tax asset valuation allowance determinations including on certain loss carryforwards. For the nine months ended September 30, 2016 and 2015, our effective tax rates were 40% and (97)%, respectively. Our future effective tax rates could be materially impacted by earnings being lower than anticipated in countries where we have lower statutory rates and higher than anticipated in countries where we have higher statutory rates, changes in the deferred tax assets or liabilities, existing or new uncertain tax matters that may arise and require changes in tax reserves, changes in tax asset valuation allowance determinations, changes in our judgment about whether certain foreign earnings are indefinitely reinvested outside the U.S., or changes in tax laws, regulations, and accounting principles. In addition, we are subject to the continuous examination of our income tax returns by the IRS and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. See Note 5 to the accompanying unaudited condensed consolidated financial statements for further information.

Loss Contingencies

We are involved in claims, suits, and proceedings arising from the ordinary course of our business. We record a provision for a liability when we believe that it is both probable that a liability has been incurred, and the amount can be reasonably estimated. Significant judgment is required to determine both probability and the estimated amount. Such claim proceedings are inherently unpredictable and subject to significant uncertainties, some of which are beyond our control. Should any of these estimates and assumptions change or prove to have been incorrect, it could have a material impact on our results of operations, financial position and cash flows. We have several known loss contingencies such as our liability to former stockholders of Travelzoo.com Corporation that may be realized as a result of our cash program for these claimants, and the 2009 IRS audit claims. Please refer to Note 4 to the accompanying unaudited condensed consolidated financial statements for further information regarding our loss contingencies.

Recent Accounting Pronouncements

See "Note 1 - The Company and Basis of Presentation" to the accompanying unaudited condensed consolidated financial statements included in this report, regarding the impact of certain recent accounting pronouncements on our consolidated financial statements.

RISK FACTORS

Investing in our common stock involves a high degree of risk. Any or all of the risks listed below as well as other variables affecting our operating results could have a material adverse effect on our business, our quarterly and annual operating results or financial condition, which could cause the market price of our stock to decline or cause substantial volatility in our stock price, in which event the value of your common stock could decline. You should also keep these risk factors in mind when you read forward-looking statements.

Risks Related to Our Financial Condition and Business Model

We cannot assure you that we will be profitable.

For the nine months ended September 30, 2016 and September 30, 2015, we generated a profit of \$5.7 million and \$10.4 million, respectively. In the year ended December 31, 2015 and 2014, we generated a net income of \$10.9 million and \$13.1 million, respectively. Although we were profitable in 2015 and during the three and nine months ended September 30, 2016, there is no assurance that we will be profitable in the future. We forecast our future expense levels based on our operating plans and our estimates of future revenues. We may find it necessary to significantly accelerate expenditures relating to our sales and marketing efforts or otherwise increase our financial commitment to creating and maintaining brand awareness among Internet users and advertisers. We may also make investments in our products as well as develop new products that may impact our profitability. If our revenues grow at a slower rate than we anticipate or decline, or if our spending levels exceed our expectations or cannot be adjusted to reflect slower revenue growth, we may not generate sufficient revenues to be profitable. Any of these developments could result in a significant decrease in the trading price of our common stock.

Fluctuations in our operating results may negatively impact our stock price.

Our quarterly and annual operating results may fluctuate significantly in the future due to a variety of factors that could affect our revenues or our expenses in any particular period. You should not rely on quarter-to-quarter comparisons of our results of operations as an indication of future performance. Factors that may affect our quarterly results include:

- mismatches between resource allocation and client demand due to difficulties in predicting client demand in a new market;
- changes in general economic conditions that could affect marketing efforts generally and online marketing efforts in particular;
- the magnitude and timing of marketing initiatives, including our acquisition of new members and our expansion efforts in other regions;
- the introduction, development, timing, competitive pricing and market acceptance of our products and services and those of our competitors;
- our ability to attract and retain key personnel;
- our ability to manage our planned growth;
- our ability to attract users to our websites, which may be adversely affected by the audience shift to mobile devices;
- technical difficulties or system downtime affecting the Internet generally or the operation of our products and services specifically; and
- volatility of our operating results in new markets.

We may significantly increase our operating expenses related to advertising campaigns for the Travelzoo and Fly.com brands, as well as our hotel booking platform, for a certain period if we see a unique opportunity for a brand marketing campaign, if we find it necessary to respond to increased brand marketing by a competitor, or if we decide to accelerate our acquisition of new members.

If revenues fall below our expectations in any quarter and we are unable to quickly reduce our operating expenses in response, our operating results would be lower than expected and our stock price may fall.

Our expansion of our product offering to include Local Deals and Getaways formats and the addition of a hotel booking platform may result in additional costs that exceed revenue and may trigger additional stock volatility. Our Local Deals and Getaway formats of advertising include the sale of vouchers directly to consumers to advertise promotional deals provided by merchants.

For example, a consumer could buy a voucher for \$99 for a dinner for two at a merchant's restaurant that would normally be valued at \$199, representing a promotional value of \$100 to the consumer. This format may require investments to maintain and grow the business including additional sales force hiring, building a customer service organization, marketing, technology tracking systems and payment processing. This format, introduced to the market in recent years, has resulted in many competitors entering the marketplace, thereby creating a very competitive marketplace. This competitive landscape along with the required investments to start, maintain and grow this format create a risk that our costs may exceed our revenues in the short and long term, which may materially impact our results of operation and financial condition. Operating this format may introduce additional volatility to our stock price due to the performance of this format by the Company and/or the overall market valuations that are being determined by the market for companies operating this format of advertising. Moreover, the rate at which our existing customers purchase vouchers has declined, and may continue to decline, given, among other things, increased competition in the marketplace and the decrease in demand of consumers for voucher deals. Historically, our customers often purchased a voucher when they received our emails, even though they may not have intended to use the voucher in the near term. The growth in recent periods of competition and the marketplaces of deals has enabled customers to wait until they are ready to use the related vouchers before making purchases. This shift in purchasing behavior may adversely impact revenues. While we are continuing to evolve our strategy to address the changing market dynamics, we may not always be successful in doing so.

In addition, we have been in the process of expanding our hotel booking platform which may result in an increase in costs to further develop the platform in the near-term and an increase in cost structure in the long-term, which may be in excess of incremental revenue. If our hotel booking platform is not embraced by our users or our advertising partners, our business and financial results could be adversely affected. To the extent that our room rates on our hotel booking platform are not competitive (i.e., versus the websites of other online travel companies or hotel company websites), we may not be able to attract members. If we cannot attract members to the hotel booking platform to make bookings, our financial results could be adversely affected. In addition, the hotel booking platform will be sensitive to fluctuations in hotel supply, occupancy and average daily rates and a fluctuation in any of these factors could negatively impact our hotel booking revenue. We can give no assurances that the hotel booking platform will yield the benefits we expect and will not result in additional costs or have adverse impacts on our business.

Our business could be negatively affected by changes in search engine algorithms and dynamics or other traffic-generating arrangements.

We utilize Internet search engines such as Google, principally through the purchase of travel-related keywords, to generate additional traffic to our websites. Search engines, including Google, frequently update and change the logic that determines the placement and display of results of a user's search, such that the purchased or algorithmic placement of links to our websites can be negatively affected. In addition, a significant amount of traffic is directed to our websites through our participation in pay-per-click and display advertising campaigns on search engines, including Google, travel metasearch engines, including Kayak, and Internet media properties, including TripAdvisor. Pricing and operating dynamics for these traffic sources can experience rapid change, both technically and competitively. Moreover, a search or metasearch engine could, for competitive or other purposes, alter its search algorithms or results causing a website to place lower in search query results. If a major search engine changes its algorithms or results in a manner that negatively affects the search engine ranking, paid or unpaid, of our websites or that of our third-party distribution partners, or if competitive dynamics impact the costs or effectiveness of search engine optimization, search engine marketing or other traffic-generating arrangements in a negative manner, our business and financial performance would be adversely affected, potentially to a material extent.

Recent trends in consumer adoption and use of mobile devices create new challenges.

Widespread adoption of mobile devices, such as the iPhone, Android-enabled smart phones, and tablets such as the iPad, coupled with the improved web browsing functionality and development of thousands of useful “apps” available on these devices, is driving substantial traffic and commerce activity to mobile platforms. We have experienced a significant shift of business to mobile platforms and our advertising partners are also seeing a rapid shift of traffic to mobile platforms. Our major competitors and certain new market entrants are offering mobile applications for travel products and other functionality, including proprietary last-minute discounts for hotel bookings. Advertising and distribution opportunities may be more limited on mobile devices given their smaller screen sizes. The gross profit earned on a mobile transaction may be less than that earned from a typical desktop transaction due to different consumer purchasing patterns. For example, hotel reservations made on a mobile device typically are for shorter lengths of stay and are not made as far in advance as hotel reservations made on a desktop. Further, given the device sizes and technical limitations of tablets and smartphones, mobile consumers may not be willing to download multiple applications from multiple travel service providers and instead prefer to use one or a limited number of applications for their mobile travel activity. As a result, the consumer experience with mobile applications, as well as brand recognition and loyalty, are likely to become increasingly important. We have made progress creating mobile offerings which have received strong reviews and have shown solid download trends. We believe that mobile bookings present an opportunity for growth. Further development of our mobile offerings is necessary to maintain and grow our business as consumers increasingly turn to mobile devices instead of a personal computer and to mobile applications instead of a web browser. Further, many consumers use a mobile device based web browser instead of an application. As a result, it is increasingly important for us to develop and maintain effective mobile websites optimized for mobile devices to provide customers with appealing easy-to-use mobile website functionality. We do not have a mobile offering for our SuperSearch product and believe this has negatively impacted our Search revenue and will continue to negatively impact our Search revenue as long as SuperSearch is not offered on mobile. If we are unable to continue to rapidly innovate and create new, user-friendly and differentiated mobile offerings and efficiently and effectively advertise and distribute on these platforms, or if our mobile applications are not downloaded and used by travel consumers, we could lose market share to existing competitors or new entrants and our future growth and results of operations could be adversely affected.

We may have exposure to additional tax liabilities.

As a global company, we are subject to income taxes as well as non-income based tax, in both the U.S. and various foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes and other tax liabilities. Although we believe that our tax estimates are reasonable, there is no assurance that the final determination of tax audits or tax disputes will not be different from what is reflected in our historical income tax provisions and accruals. Changes in tax laws or tax rulings may have a significantly adverse impact on our effective tax rate. We are also subject to non-income based taxes, such as value-added, payroll, sales, use, net worth, property and goods and services taxes, in both the U.S. and various foreign jurisdictions.

From time to time, we are under audit by tax authorities with respect to these non-income based taxes and may have exposure to additional non-income based tax liabilities. These examinations may lead to ordinary course adjustments or proposed adjustments to our taxes or our net operating income. The Company's 2009 federal income tax returns is currently under examination, including a review of the impact of the sale of Asia Pacific business segment in 2009. These examinations may lead to ordinary course adjustments or proposed adjustments to our taxes or our net operating income. In connection with this examination, we have received a Revenue Agent's Report (RAR) generally issued at the conclusion of an IRS examination, which was consistent with the Notice of Proposed Adjustment we received earlier from the IRS for the 2009 calendar year related to the sale of our Asia Pacific business segment with the addition of penalties. The RAR proposes an increase to our U.S. taxable income which would result in additional federal tax expense, federal penalty and state tax expense totaling approximately \$31 million, excluding interest and state penalties, if any. The proposed adjustment is primarily driven by IRS's view that the Asia Pacific business segment assets sold by the Company had a significantly higher valuation than the sales proceeds the Company received upon the sale. The Company disagrees with the proposed adjustments and intends to vigorously contest them.

The Company did not make any adjustments to its liabilities for uncertain tax positions related to the RAR as of September 30, 2016 because the Company does not believe the IRS's valuation of Asia Pacific business segment assets is appropriate. If we are not able to resolve these proposed adjustments at the IRS examination level, we plan to pursue all available administrative and, if necessary, judicial remedies. The Company is not able to predict the ultimate amount or outcome of this tax audit and we may incur additional costs in defending any claims that may arise, even if we ultimately are not liable for any additional taxes.

Adverse application of state and local tax laws could have an adverse effect on our business and results of operation. Our expansion of our product offering to include a hotel booking platform may subject us to state and local tax laws and result in additional tax liabilities. A number of jurisdictions in the U.S. have initiated lawsuits against other online travel companies, related to, among other things, the payment of hotel occupancy and other taxes (i.e., state and local sales tax). In addition, a number of municipalities have initiated audit proceedings, issued proposed tax assessments or started inquiries relating to the payment of hotel occupancy and other taxes.

Given that we intend for our hotel booking platform to consist of an agency model whereby we will facilitate reservations on behalf of a hotel, the payment of hotel occupancy taxes and other taxes should be the responsibility of the merchant. The intended business practice for our hotel booking platform will primarily be for the merchant to be responsible for remitting applicable taxes to the various tax authorities. Nevertheless, to the extent that any tax authority succeeds in asserting that we have a tax collection responsibility, or we determine that we have one, with respect to future transactions, we may collect any such additional tax obligation from our customers, which would have the effect of increasing the cost of hotel room reservations to our customers and, consequently, could make our hotel service less competitive (i.e., versus the websites of other online travel companies or hotel company websites) and reduce hotel reservation transactions. Either step could have a material adverse effect on our business and results of operations. We will continue to assess the risks of the potential financial impact of additional tax exposure.

Our business model may not be adaptable to a changing market.

Our current revenue model depends primarily on advertising fees paid by travel and entertainment companies. If current clients decide not to continue advertising their offers with us and we are unable to replace them with new clients, our business may be adversely affected. To be successful, we must provide online marketing solutions that achieve broad market acceptance by travel and entertainment companies. In addition, we must attract sufficient Internet users with attractive demographic characteristics to our products. It is possible that we will be required to further adapt our business model and products in response to changes in the online advertising market or if our current business model is not successful. For example, the trend toward mobile online traffic will require us to adapt our product offering to facilitate consumers' use of our products. If we do not adapt to this trend fully or quickly enough, we may lose advertising revenue as consumer usage may decline from our non-mobile traffic. If we are not able to anticipate changes in the online advertising market or if our business model is not successful, our business could be materially adversely affected.

If we fail to retain existing advertisers or add new advertisers, our revenue and business will be harmed.

We depend on our ability to attract and retain advertisers (hotels, spas, restaurants, vacation packagers, airlines, etc.) that are prepared to offer products or services on compelling terms to our members. We do not have long-term arrangements to guarantee the availability of deals that offer attractive quality, value and variety to consumers or favorable payment terms to us. We must continue to attract and retain advertisers in order to increase revenue and maintain profitability. If new advertisers do not find our marketing and promotional services effective, or if existing advertisers do not believe that utilizing our products provides them with a long-term increase in customers, revenue or profit, they may stop making offers through our marketplace. In addition, we may experience attrition in our advertisers in the ordinary course of business resulting from several factors, including losses to competitors and advertiser closures or bankruptcies. If we are unable to attract new advertisers in numbers sufficient to grow our business, or if too many advertisers are unwilling to offer products or services with compelling terms to our members or offer favorable payment terms to us, we may sell less advertising, and our operating results will be adversely affected. For example, we may lose advertisers due to market conditions or performance, such as our recent loss of revenue from certain online booking engines, airlines and vacation packagers. We may not add enough additional revenue, such as hotel revenue from Getaways or the hotel booking platform, in order to replace the lost revenue. Furthermore, the new revenue may cost more to generate compared to the costs that the lost revenue required to generate, thereby adversely impacting our operating results.

Our existing advertisers may shift from one advertising service to another, which may adversely affect our revenue.

Existing advertisers may shift from one advertising service (e.g. Top 20) to another (e.g. Local Deals, Getaways or the hotel booking platform). These shifts between advertising services by advertisers could result in no incremental revenue or less revenue than in previous periods depending on the amount purchased by the advertisers, and in particular with Local Deals, Getaways, and hotel platform, depending on how many vouchers are purchased by members and how many hotel bookings are made. In addition, we are anticipating a shift from our existing hotel revenue to commission-based revenue in connection with the continued expansion of our hotel platform, which may result in lower revenue depending on volume of hotel bookings.

An increase in our refund rates related to our Local Deals and Getaways could reduce our liquidity and profitability. We provide refunds related to our Local Deals and Getaways voucher sales. As we increase our revenue, our refund rates may exceed our historical levels. A downturn in general economic conditions may also increase our refund rates. An increase in our refund rates could significantly reduce our liquidity and profitability.

As we do not have control over our merchants and the quality of products or services they deliver, we rely on a combination of our historical experience with our merchants over time and the type of refunds provided for development of our estimate for refund claims. Our actual level of refund claims could prove to be greater than the level of refund claims we estimate. If our refund reserves are not adequate to cover future refund claims, this inadequacy could have a material adverse effect on our liquidity and profitability.

Our standard agreements with our merchants generally limit the time period during which we may seek reimbursement for member refunds or claims. Our members may make claims for refunds with respect to which we are unable to seek reimbursement from our merchants. Our members could also make false or fraudulent refund claims. Our inability to seek reimbursement from our merchants for refund claims could have an adverse effect on our liquidity and profitability.

If our advertisers do not meet the needs and expectations of our members, our business could suffer.

Our business depends on our reputation for providing high-quality deals, and our brand and reputation may be harmed by actions taken by advertisers or merchants that are outside our control. For our Local Deals and Getaways merchants, since we are selling vouchers on behalf of the merchants directly to our members, we face exposures should merchants not fully honor the deals. As for our travel business, we are only collecting an advertising fee from the advertiser and the members are booking the deal directly with the advertiser. Although the advertiser is responsible to the consumer to provide the consumer the deal it advertised, our business can be adversely affected should an advertiser fail to comply with the terms of the advertised deal. Any shortcomings of one or more of our merchants, particularly with respect to an issue affecting the quality of the deal offered or the products or services sold, may be attributed by our members to us, thus damaging our reputation and brand value and potentially affecting our results of operations. In addition, negative publicity and member sentiment generated as a result of fraudulent or deceptive conduct by our merchants could damage our reputation, reduce our ability to attract new members or retain our current members, and diminish the value of our brand.

Our business relies heavily on e-mail and other messaging services, and any restrictions on the sending of e-mails or messages or a decrease in member willingness to receive messages could adversely affect our revenue and business. Our business is highly dependent upon e-mail and other messaging services. Deals offered through e-mails and other messages sent by us, or on our behalf by our affiliates, generate a substantial portion of our revenue. Because of the importance of e-mail and other messaging services to our businesses, if we are unable to successfully deliver e-mails or messages to our members or potential members, or if members decline to open our e-mails or messages, our revenue and profitability would be adversely affected. New laws and regulations regulating the sending of commercial e-mails, including those enacted in foreign jurisdictions (such as Canada), may affect our ability to deliver e-mails or messages to our members or potential members and may also result in increased compliance costs. Further, actions by third parties to block, impose restrictions on, or charge for the delivery of e-mails or other messages could also materially and adversely impact our business. From time to time, Internet service providers block bulk e-mail transmissions or otherwise experience technical difficulties that result in our inability to successfully deliver e-mails or other messages to third parties. In addition, our use of e-mail and other messaging services to send communications about our website or other matters may result in legal claims against us, which if successful might limit or prohibit our ability to send e-mails or other messages. Any disruption or restriction on the distribution of e-mails or other messages or any increase in the associated costs would materially and adversely affect our revenue and profitability. In addition, the shift in our website traffic originating from mobile devices accessing our services may decrease our members' willingness to use our services if they are not satisfied with our mobile user experience and could decrease their willingness to be an e-mail member, which could adversely affect our revenue and profitability.

Changes to our technology and user interface for our website and mobile applications used to present our deals could adversely affect our revenue and business.

Our business depends on website and mobile technology interface in order to present deals to our members and generate revenue from our advertisers. Changes to our website and mobile technology and user interface intended to enhance the user experience may have an adverse impact on our member activity and may reduce revenue from advertisers. In October 2016, we recently launched our fully responsive website that adjusts to different screen sizes and allows our members to more readily search our deals, which we believe will improve the user experience on our site; however, this may lead to unforeseen issues that could adversely affect our revenue and business. In addition, our new website will no longer feature our SuperSearch product in order to simplify the overall search experience and this is expected to result in lower revenue for SuperSearch in the future.

Our reported total number of members may be higher than the number of our actual individual members and may not be representative of the number of persons who are active potential customers.

The total number of members we report may be higher than the number of our actual individual members because some members have multiple registrations, other members have died or become incapacitated and others may have registered under fictitious names. Given the challenges inherent in identifying these members, we do not have a reliable system to accurately identify the number of actual individual members, and thus we rely on the number of total members shown on our records as our measure of the size of our member base. In addition, the number of members we report includes the total number of individuals that have completed registration through a specific date, less individuals who have unsubscribed. Those numbers of members may include individuals who do not receive our e-mails because our e-mails have been blocked or are otherwise undeliverable. As a result, the reported number of members should not be considered as representative of the number of persons who continue to actively consider our deals by reviewing our e-mail offers.

We may not be able to obtain sufficient funds to grow our business and any additional financing may be on terms adverse to your interests.

For the nine months ended September 30, 2016, our cash and cash equivalents decreased by \$10.3 million to \$24.8 million, of which \$13.5 million was held outside the U.S. in certain of our foreign operations. We intend to continue to grow our business and fund our current operations using cash on hand. However, this may not be sufficient to meet our needs, including the payments required to settle various commitments and contingencies, as described under Notes 4 and 5 to the accompanying unaudited condensed consolidated financial statements. We may not be able to obtain financing on commercially reasonable terms, or at all.

If additional financing is not available when required or is not available on acceptable terms, we may be unable to fund our expansion, successfully promote our brand name, develop or enhance our products and services, take advantage of business opportunities, or respond to competitive pressures, any of which could have a material adverse effect on our business.

If we choose to raise additional funds through the issuance of equity securities, existing stockholders may experience significant dilution of their ownership interest and holders of the additional equity securities may have rights senior to existing stockholders of our common stock. If we obtain additional financing by issuing debt securities or bank borrowings, the terms of these arrangements could restrict or prevent us from paying dividends and could limit our flexibility in making business decisions.

Our business may be sensitive to recessions.

The demand for online advertising may be linked to the level of economic activity and employment in the U.S. and abroad. Specifically, our business is primarily dependent on the demand for online advertising from travel and entertainment companies. The most recent recession decreased consumer travel and caused travel and entertainment companies to reduce or postpone their marketing spending generally, and their online marketing spending in particular. Continued or future recessions could have a material adverse effect on our business and financial condition. Moreover, declines or disruptions in the travel industry could adversely affect the hotel booking platform and financial performance.

Our operations could be significantly hindered by the occurrence of a natural disaster or other catastrophic event. Our operations are susceptible to outages due to fire, floods, power loss, telecommunications failures, unexpected technical problems in the systems that power our websites and distribute our e-mail newsletters, break-ins and similar events. In addition, a significant portion of our network infrastructure is located in Northern California, an area susceptible to earthquakes. We do not have multiple site capacity to protect us against any such occurrence. Outages could cause significant interruptions of our service. In addition, despite our implementation of network security measures, our servers are vulnerable to computer viruses, physical and electronic break-ins, and similar disruptions from unauthorized tampering with our computer systems. We do not carry business interruption insurance to compensate us for losses that may occur as a result of any of these events.

Technological or other assaults on our service could harm our business.

We are vulnerable to coordinated attempts to overload our systems with data, which could result in denial or reduction of service to some or all of our users for a period of time. We have experienced denial of service attacks in the past, and may experience such attempts in the future. Any such event could reduce our revenue and harm our operating results and financial condition. We do not carry business interruption insurance to compensate us for losses that may occur as a result of any of these events.

We are subject to payments-related risks.

We accept payments for the sale of vouchers using a variety of methods, including credit cards and debit cards. We pay interchange and other fees, which may increase over time and raise our operating expenses and lower profitability. We rely on third parties to provide payment processing services, including the processing of credit cards and debit cards, and it could disrupt our business if these companies become unwilling or unable to provide these services to us. We are also subject to payment card association operating rules, certification requirements and rules governing electronic funds transfers, which could change or be reinterpreted to make it difficult or impossible for us to comply. In addition, our results can be negatively impacted by purchases made using fraudulent credit cards. Because we act as the merchant of record for certain hotel booking and voucher transactions, we may be held liable for accepting fraudulent credit cards on our websites as well as other payment disputes with our customers. If we have an increase of charge-backs due to the use of fraudulent credit cards on our websites, our business, results of operations and financial condition could be adversely affected. Moreover, under payment card rules and our contracts with our card processors, if there is a security breach of payment card information that we store, we could be liable to the payment card issuing banks for their cost of issuing new cards and related expenses. If we fail to comply with these rules or requirements, we may be subject to fines and higher transaction fees and lose our ability to accept credit and debit card payments, process electronic funds transfers, or facilitate other types of online payments, and our business and results of operations could be adversely affected. If one or more of these contracts are terminated and we are unable to replace them on similar terms, or at all, it could adversely affect our results of operations.

Our reported financial results may be adversely affected by changes in United States generally accepted accounting principles, and we may incur significant costs to adjust our accounting systems and processes to comply with significant changes.

United States generally accepted accounting principles are subject to interpretation by the Financial Accounting Standards Board, or FASB, the American Institute of Certified Public Accountants, the SEC and various bodies formed to promulgate and interpret appropriate accounting principles. In 2014, the FASB issued a new accounting standard related to revenue recognition which could change the way we account for certain of our sales transactions. The adoption of this standard and changes in other principles or interpretations could have a significant effect on our

reported financial results and could affect the reporting of transactions completed before the effective dates of the standard. Such change could have a significant effect on our reported financial results. In addition, we may need to significantly change our accounting systems and processes if we are required to adopt future or proposed changes in accounting principles noted above. The cost of these changes may negatively impact our results of operations during the periods of transition.

Risks Related to Our Markets and Strategy

Our international expansion may result in operating losses, and is subject to other material risks.

In May 2005, we began operations in the U.K. In 2006, we began operations in Canada, Germany, and Spain. In 2007, we began operations in France. In addition, from 2007 through 2009, we began operations in Asia Pacific, including in Australia, China, Hong Kong, Japan, Taiwan, and Southeast Asia.

Our revenues in Asia Pacific decreased 10.0% in the nine months ended September 30, 2016 from the same period last year. Our operations in Asia Pacific incurred an operating loss of \$3.1 million and \$1.5 million for the nine months ended September 30, 2016 and 2015, respectively. Our revenues in Europe decreased 9.0% in the nine months ended September 30, 2016 from the same period last year. Our operations in Europe generated an operating income of \$5.5 million and \$2.4 million for the nine months ended September 30, 2016 and 2015, respectively. We intend to continue adding a significant number of members in selected countries in which we operate as we believe this is one of the factors that will allow us to increase our advertising rates and increase our revenues in Europe.

If we incur losses from our operations in the future, these losses may not have any recognizable tax benefit, which is the case for Asia Pacific business. We expect that this would have a material negative impact on our net income and cash flows. Any of these developments could result in a significant decrease in the trading price of our common stock.

In addition to uncertainty about our ability to generate net income from our foreign operations and expand our international market position, there are certain risks inherent in doing business internationally, including:

- uncertainties and instability in economic and market conditions caused by the United Kingdom's vote to exit the European Union;

- uncertainty regarding how the United Kingdom's access to the European Union Single Market and the wider trading, legal, regulatory and labor environments, especially in the United Kingdom and European Union, will be impacted by the United Kingdom's vote to exit the European Union, including the resulting impact on our business and that of our clients;

- trade barriers and changes in trade regulations;

- difficulties in developing, staffing and simultaneously managing foreign operations as a result of distance, language and cultural differences;

- stringent local labor laws and regulations;

- risks related to government regulation; and

- potentially adverse tax consequences.

Moreover, fluctuations in currency exchange rates can impact our revenues. For example, foreign currency movements relative to the U.S. dollar have negatively impacted our revenues from our operations in Europe. The uncertainty and volatility in foreign exchange rates, which may differ across regions, makes it more difficult to forecast industry and consumer trends and the timing and degree of their impact on our markets and business, which in turn could adversely affect our ability to effectively manage our business and adversely affect our results of operations.

In addition, we face risks related to the growth rate and expansion of our international business, including our recent expansion in Asia Pacific. A decline in the growth rates of our international businesses could have a negative impact on our gross profit and earnings per share growth rates and, as a consequence, our stock price. Many of these regions have different customs, currencies, levels of consumer acceptance and use of the Internet for commerce, legislation, regulatory environments, tax laws and levels of political stability. International markets may have strong local competitors with an established brand that may make expansion in that market difficult and costly and take more time than anticipated. In addition, compliance with legal, regulatory or tax requirements in multiple jurisdictions places demands on our time and resources, and we may nonetheless experience unforeseen and potentially adverse legal, regulatory or tax consequences.

Investment in new business strategies and acquisitions could disrupt our ongoing business and present risks not originally contemplated.

We have invested, and in the future may invest, in new business strategies and acquisitions. For example, we recently acquired businesses in Asia Pacific, including Australia, China, Hong Kong, Japan, Taiwan, and Southeast Asia. If the businesses we have acquired do not perform as expected or we are unable to effectively integrate acquired businesses, our operating results and prospects could be harmed. Expansions into foreign markets involve risks and uncertainties, including, among other things, potential distraction of management from operations in North America and Europe, greater than expected liabilities and expenses, inadequate return on capital, and unidentified issues not discovered in our investigations and evaluations of those strategies and acquisitions. It may take us longer than expected to fully realize the anticipated benefits of the Asia Pacific transaction, and those benefits may ultimately be smaller than anticipated, which could adversely affect our business. If we are unsuccessful in expanding in new and existing international markets and effectively managing the increased costs of the expansion, our business, results of operations and financial condition will be adversely affected. We are also subject to risks typical of international businesses, including differing economic conditions, differing customs, languages and consumer expectations, changes in political climate, differing tax structures and other regulations and restrictions, including labor laws, and foreign exchange rate volatility.

We may not be able to continue developing awareness of our brand names.

We believe that continuing to build awareness of the Travelzoo brand name is critical to achieving widespread acceptance of our business. Brand recognition is a key differentiating factor among providers of online advertising opportunities, and we believe it could become more important as competition in our industry increases. In order to maintain and build brand awareness, we must succeed in our marketing efforts. If we fail to successfully promote and maintain our brands, incur significant expenses in promoting our brands and fail to generate a corresponding increase in revenue as a result of our branding efforts, or encounter legal obstacles which prevent our continued use of our brand names, our business could be materially adversely affected.

If we fail to retain our existing members or acquire new members, our revenue and business will be harmed.

We spent \$7.0 million and \$7.9 million on marketing initiatives relating to member acquisition and marketing for the nine months ended September 30, 2016 and 2015, respectively, and expect to continue to spend significant amounts to acquire additional members. We must continue to retain and acquire members in order to maintain or increase revenue. We cannot assure you that the revenue from members we acquire will ultimately exceed the cost of acquiring new members. If members do not perceive our offers to be of high value and quality or if we fail to introduce new and more relevant deals, we may not be able to acquire or retain members. If we reduce our member acquisition costs, we cannot assure you that this will not adversely impact our ability to acquire new members. If we are unable to acquire new members who purchase our deals directly or indirectly in numbers sufficient to grow our business, or if members cease to purchase our deals directly or indirectly through our advertisers, the revenue we generate may decrease and our operating results will be adversely affected. If the level of usage by our member base declines or does not grow as expected, we may suffer a decline in member growth or revenue. A significant decrease in the level of usage or member growth would have an adverse effect on our business, financial condition and results of operations. In addition, a shift of our audience to mobile devices and social media channels without corresponding updates of our offerings or marketing activities to address this audience could result in lower revenues.

Our business may be sensitive to events affecting the travel industry in general.

Events like the Middle East conflicts, the global financial crisis that began in 2008 or the recent terrorist attacks in France, Turkey, Belgium and Germany have a negative impact on the travel industry and affect travelers' behavior. In addition, advertisers may choose to limit advertising spend on certain destinations given the recent terror attacks, which can adversely impact our business. We are not in a position to evaluate the net effect of these circumstances on our business; however, we believe there has been negative impact to our business by such events. Furthermore, in the longer term, our business might be negatively affected by financial pressures on the travel industry. If such events result in a long-term negative impact on the travel industry, such impact could have a material adverse effect on our business.

In addition, the United Kingdom's vote to exit from the European Union could lead to economic uncertainty and have a negative impact on the travel industry and our European business. The United Kingdom could lose access to the single European Union market, travel between the United Kingdom and European Union countries could be restricted, and we could face new regulatory costs and challenges, the scope of which are presently unknown.

We may not be able to attract travel and entertainment companies or Internet users if we do not continually enhance and develop the content and features of our products and services.

To remain competitive, we must continually improve the responsiveness, functionality, and features of our products and services. We may not succeed in developing features, functions, products, or services that travel and entertainment companies and Internet users find attractive. This could reduce the number of travel and entertainment companies and Internet users using our products and materially adversely affect our business. We also recently launched a new and simpler design for our website. We cannot guarantee that our recently launched products will be embraced by our members. While we are striving to improve functionality, usability and design in our products, the recent enhancements on web and mobile may not achieve the desired results we anticipate, and if unsuccessful, could result in a decline in revenues and a negative impact on our business.

We may lose business if we fail to keep pace with rapidly changing technologies and client needs.

Our success is dependent on our ability to develop new and enhanced software, services, and related products to meet rapidly evolving technological requirements for online advertising. Our current technology may not meet the future technical requirements of travel and entertainment companies. Trends that could have a critical impact on our success include:

- rapidly changing technology in online advertising, including a significant shift of business to mobile platforms;
- evolving industry standards, including both formal and de facto standards relating to online advertising;
- developments and changes relating to the Internet;
- competing products and services that offer increased functionality; and
- changes in travel company, entertainment company, and Internet user requirements.

If we are unable to timely and successfully develop and introduce new products and enhancements to existing products in response to our industry's changing technological requirements, our business could be materially adversely affected.

Our business and growth will suffer if we are unable to hire and retain highly skilled personnel.

Our future success depends on our ability to attract, train, motivate, and retain highly skilled employees. We may be unable to retain our skilled employees, or attract, assimilate, and retain other highly skilled employees in the future. We have from time to time in the past experienced, and we expect to continue to experience in the future, difficulty in hiring and retaining highly skilled employees with appropriate qualifications. If we are unable to hire and retain skilled personnel, our growth may be restricted, which could adversely affect our future success.

We may not be able to effectively manage our expanding operations.

Since the commencement of our operations, we have experienced periods of rapid growth. In order to execute our business plan, we must continue to grow significantly. This growth has placed, and our anticipated future growth will continue to place, a significant strain on our management, systems, and resources. We expect that we will need to continue to improve our financial and managerial controls and reporting systems and procedures. We will also need to continue to expand and maintain close coordination among our sales, production, marketing, IT, and finance departments. We may not succeed in these efforts. Our inability to expand our operations in an efficient manner could cause our expenses to grow disproportionately to revenues, our revenues to decline or grow more slowly than expected and could otherwise have a material adverse effect on our business.

Intense competition may adversely affect our ability to achieve or maintain market share and operate profitably. We compete for advertising dollars with large Internet portal sites, such as MSN and Yahoo!, that offer listings or other advertising opportunities to travel, entertainment and local businesses. These companies have significantly greater financial, technical, marketing and other resources and larger advertiser bases. We compete with search engines like Google and Bing that offer pay-per-click listings. We compete with travel metasearch engines like Kayak Software Corp. and online travel and entertainment deal publishers. We compete with large online travel agencies like Expedia, TripAdvisor, and Priceline that also offer advertising placements and hotel booking platforms to capture consumer interest. As a result of our acquisition of Travelzoo Asia Pacific, we now compete or may compete in the future with large online travel service providers, like Ctrip and eLong. We compete with companies like Groupon and LivingSocial that sell vouchers for deals from local businesses such as spas, hotels and restaurants. Recently, Groupon announced that it is purchasing LivingSocial. It is difficult to predict at this time what affect the business combination will have on the Local Deals and Getaways market. We expect to face increased competition from other Internet and technology-based businesses such as Google and Microsoft, each of which has launched initiatives which are directly competitive to our Local Deals and Getaways products. Google has introduced its hotel search product, which negatively impacted our ability to efficiently purchase Google hotel search traffic to drive our Search product revenues. In addition, we compete for traffic acquisition with many companies and we are subject to higher prices to acquire this traffic, which drives our Search revenue in particular. We regularly reduce our traffic acquisition for our Search products if we believe the acquisition costs are too high for us to remain profitable. When we reduce our traffic acquisition spending it negatively impacts our Search revenue. To the extent that Google, or other leading search or metasearch engines that have a significant presence in our key markets, offer comprehensive travel planning or shopping capabilities, or refer those leads to suppliers directly, or to other favored partners, there could be an adverse impact on our business and financial performance. We also have seen that some competitors will accept lower margins, or negative margins, to attract attention and acquire new members. If competitors engage in group buying initiatives in which merchants receive a higher percentage of the face value than we currently offer, we may be forced to pay a higher percentage of the face value than we currently offer, which may reduce our revenue. In addition, we compete with newspapers, magazines and other traditional media companies that operate websites which provide online advertising opportunities. We expect to face additional competition as other established and emerging companies, including print media companies, enter the online advertising market. Competition could result in reduced margins on our services, loss of market share or less use of Travelzoo by advertisers and consumers. If we are not able to compete effectively with current or future competitors as a result of these and other factors, our business could be materially adversely affected.

Loss of any of our key management personnel could negatively impact our business.

Our future success depends to a significant extent on the continued service and coordination of our management team. The loss or departure of any of our officers or key employees could materially adversely affect our ability to implement our business plan. We do not maintain key person life insurance for any member of our management team. In addition, we expect new members to join our management team in the future. These individuals will not previously have worked together and will be required to become integrated into our management team. If our key management personnel are not able to work together effectively or successfully, our business could be materially adversely affected. During 2015, there were several changes in executive management, as further described in previously filed 2015 Form 8-Ks, including the resignation of our CEO, Mr. Christopher Loughlin, who was replaced in January 2016 by Mr. Holger Bartel as Chairman and Global CEO, the departure of Simon Talling-Smith who served as President, Products and Emerging Businesses and the promotion of Mr. Michael Stitt to the position of President, North America.

We may not be able to access third party technology upon which we depend.

We use data technology and software products from third parties including Microsoft and ITA Software. Technology from our current or other vendors may not continue to be available to us on commercially reasonable terms, or at all. Moreover, to the extent an airline does not provide content to ITA Software or third party data providers, or to us, and we cannot obtain the content, we may face additional costs (including legal costs) and the financial results of Fly.com could be negatively affected. If we are unable to continue to display travel data from multiple airline carriers, it would reduce the breadth of our query results on Fly.com and the number of travelers using our services could decline, resulting in a loss of revenues and a decline in our operating results. Fly.com depends on access to information related to airline schedules and fares and, to the extent our travel service providers no longer provide such information, Fly.com's business and results of operations could be harmed. Our business will suffer if we are unable to access this technology, to gain access to additional products or to integrate new technology with our existing systems. This could cause delays in our development and introduction of new services and related products or enhancements of existing products until equivalent or replacement technology can be accessed, if available, or developed internally, if feasible. If we experience these delays, our business could be materially adversely affected. We also rely on certain third party computer systems and third party service providers, including GDSs and computerized central reservation systems, in connection with providing certain of our hotel booking services. Any interruption in these third party services and systems or deterioration in their performance could prevent us from utilizing certain booking services and have an adverse effect on our business, brands and results of operations. Our agreements with some third party service providers are terminable upon short notice and often do not provide recourse for service interruptions. Acquisitions, investments and joint ventures could result in operating difficulties, dilution, and other harmful consequences that may adversely impact our business and results of operations.

We may evaluate and consider a wide array of potential strategic transactions as part of our overall business strategy, including business combinations, acquisitions and dispositions of businesses, technologies, services, and other assets, as well as strategic investments and joint ventures. At any given time we may be engaged in discussions or negotiations with respect to one or more of these types of transactions. Any of these transactions could be material to our financial condition and results of operations.

These transactions involve significant challenges and risks. Some of the areas where we may face risks or difficulties include:

• Diversion of management time and focus from operating our business to acquisition integration challenges.

• Implementation or remediation of controls, procedures, and policies at the acquired company.

• Integration of the acquired company's accounting, human resource, and other administrative systems, and coordination of product, engineering, and sales and marketing functions.

• Transition of operations, users, and customers onto our existing platforms.

• Failure to obtain required approvals on a timely basis, if at all, from governmental authorities, or conditions placed upon approval, under competition and antitrust laws which could, among other things, delay or prevent us from completing a transaction, or otherwise restrict our ability to realize the expected financial or strategic goals of an acquisition.

• In the case of foreign acquisitions, the need to integrate operations across different cultures and languages and to address the particular economic, currency, political, and regulatory risks associated with specific countries.

• Failure to successfully further develop the acquired business or technology.

• Cultural challenges associated with integrating employees from the acquired company into our organization, and retention of employees from the businesses we acquire.

Liability for activities of the acquired company before the acquisition, including patent and trademark infringement claims, violations of laws, commercial disputes, tax liabilities, and other known and unknown liabilities.

Litigation or other claims in connection with the acquired company, including claims from terminated employees, customers, former stockholders, or other third parties.

- Challenges relating to the structure of an investment, such as governance, accountability and decision-making conflicts that may arise in the context of a joint venture.

Expected and unexpected costs incurred in pursuing acquisitions, including identifying and performing due diligence on potential acquisition targets that may or may not be successful.

Entrance into markets in which we have no direct prior experience and increased complexity in our business.

Inability to sell disposed assets.

Impairment of goodwill and other assets acquired or divested.

Our failure to address these risks or other problems encountered in connection with our past or future acquisitions and investments could cause us to fail to realize the anticipated benefits of such acquisitions or investments, incur unanticipated liabilities, and harm our business generally.

Future acquisitions may also require us to issue additional equity securities, spend our cash, or incur debt (and increased interest expense), liabilities and amortization expenses related to intangible assets or write-offs of goodwill, which could adversely affect our results of operations and dilute the economic and voting rights of our stockholders. Also, the anticipated benefit of many of our acquisitions may not materialize.

Risks Related to the Market for our Shares

Our stock price has been volatile historically and may continue to be volatile.

The trading price of our common stock has been and may continue to be subject to wide fluctuations. During the twelve months ended November 3, 2016, the closing price of our common stock on the NASDAQ Global Select Market ranged from \$6.71 to \$13.16. Our stock price may fluctuate in response to a number of events and factors, such as quarterly variations in operating results; announcements of technological innovations or new products by us or our competitors; changes in financial estimates and recommendations by securities analysts; the operating and stock price performance of other companies that investors may deem comparable to us; and news reports relating to trends in our markets or general economic conditions. Our stock price may be volatile given that operating results may vary from the expectations of securities analysts and investors, which are beyond our control. In the event that our operating results fall below the expectations of securities analysts or investors, the trading price of our common shares may decline significantly. Moreover, fluctuations in our stock price and our price-to-earnings multiple may have made our stock attractive to hedge or day-trading investors who often shift funds into and out of stocks rapidly, exacerbating price fluctuations in either direction, particularly when viewed on a quarterly basis.

In addition, the stock market in general, and the market prices for Internet-related companies in particular, have experienced volatility that often has been unrelated to the operating performance of such companies. These broad market and industry fluctuations may adversely affect the price of our stock, regardless of our operating performance. We have a principal stockholder.

Ralph Bartel, who founded Travelzoo and who is a Director of the Company is the sole beneficiary of the Ralph Bartel 2005 Trust, which is the controlling shareholder of Azzurro. As of September 30, 2016, Azzurro is the Company's largest stockholder, holding approximately 53.7% of the Company's outstanding shares.

Risks Related to Legal Uncertainty

We may become subject to shareholder lawsuits over securities violations due to volatile stock price and this can be burdensome to management and costly to defend.

Shareholder lawsuits for securities violations are often launched against companies whose stock price is volatile. Such lawsuits involving the Company would require management's attention to defend, which may distract attention from operating the Company. In addition, even if the lawsuit is meritless, the Company may incur substantial costs to defend itself and/or settle such claims, to minimize the distraction and costs of defense. Such lawsuits could result in judgments against the Company requiring substantial payments to claimants. Such costs may materially impact our results of operations and financial condition.

We may become subject to burdensome government regulations and legal uncertainties affecting the Internet which could adversely affect our business.

To date, governmental regulations have not materially restricted use of the Internet in our markets. However, the legal and regulatory environment that pertains to the Internet is uncertain and may change. Uncertainty and new regulations, including those enacted in foreign jurisdictions, could increase our costs of doing business, prevent us from delivering our products and services over the Internet, or slow the growth of the Internet. For example, new laws and regulations regulating online advertisements, including those enacted in foreign jurisdictions, may affect our advertising revenue and may also result in decreased traffic to our websites. In addition to new laws and regulations being adopted, existing laws may be applied to the Internet. New and existing laws may cover issues which include:

- user privacy;
- anti-spam legislation;
- consumer protection;
- copyright, trademark and patent infringement;
- pricing controls;
- characteristics and quality of products and services;
- sales and other taxes; and
- other claims based on the nature and content of Internet materials.

We are subject to laws and regulations worldwide, changes to which could increase the Company's costs and individually or in the aggregate adversely affect the Company's business.

The Company is subject to laws and regulations affecting its domestic and international operations in a number of areas. These U.S. and foreign laws and regulations affect the Company's activities including, but not limited to, in areas of employment related laws and regulations, advertising, digital content, consumer protection, real estate, billing, e-commerce, promotions, intellectual property ownership and infringement, tax, anti-corruption, foreign exchange controls and cash repatriation restrictions, data privacy requirements, anti-competition, health, and safety. Compliance with these laws, regulations and similar requirements may be onerous and expensive, and they may be inconsistent from jurisdiction to jurisdiction, further increasing the cost of compliance and doing business. Any such costs, which may rise in the future as a result of changes in these laws and regulations or in their interpretation, could individually or in the aggregate make the Company's services less attractive to the Company's customers, delay the introduction of new products in one or more regions, or cause the Company to change or limit its business practices or incur more costs to comply or defend itself. The Company has implemented policies and procedures designed to ensure compliance with applicable laws and regulations, but there can be no assurance that the Company's employees, contractors, or agents will not violate such laws and regulations or the Company's policies and procedures.

The implementation of the CARD Act and similar state and foreign laws may harm our Local Deals business. Vouchers which are issued under our Local Deals and Getaways may be considered gift cards, gift certificates, stored value cards or prepaid cards and therefore governed by, among other laws, the Credit CARD Act of 2009 (the "CARD Act"), and state laws governing gift cards, stored value cards and coupons. Other foreign jurisdictions have similar laws in place, in particular European jurisdictions where the European E-Money Directive regulates the business of electronic money institutions. Many of these laws contain provisions governing the use of gift cards, gift certificates, stored value cards or prepaid cards, including specific disclosure requirements and prohibitions or limitations on the use of expiration dates and the imposition of certain fees. For example, if the vouchers are subject to the CARD Act and are not included in the exemption for promotional programs, it is possible that the purchase value, which is the amount equal to the price paid for the voucher, or the promotional value, which is the add-on value of the voucher in excess of the price paid, or both, may not expire before the later of (i) five years after the date on which the voucher was issued; (ii) the voucher's stated expiration date (if any); or (iii) a later date provided by applicable state law. Purported class actions against other companies have been filed in federal and state court claiming that coupons similar to the vouchers are subject to the CARD Act and various state laws governing gift cards and that the defendants have violated these laws by issuing the coupons with expiration dates and other restrictions. In addition, investigations by certain state attorney general offices have been launched against other companies with regards to similar issues. If similar claims are asserted against the Company in respect of the Local Deals and Getaways vouchers and are successful, we may become subject to fines and penalties and incur additional costs. In addition, if federal or state laws require that the face value of our vouchers have a minimum expiration period beyond the period desired by a merchant for its promotional program, or no expiration period, this may affect the willingness of merchants to issue vouchers in jurisdictions where these laws apply. For unredeemed vouchers, similar laws in other jurisdictions require us or merchants to honor the face value of vouchers sold, after the redemption period. For example, in Germany, certain consumer protection laws require us to refund consumers for approximately four years after the purchase date for the amount of the face value of purchased vouchers which remains unredeemed at the end of the redemption period. Therefore, we do not recognize the unredeemed amounts as revenue until after we are not subject to these laws. There may be similar laws in other countries or provinces that require similar practices. Such developments may materially and adversely affect the profitability or viability of our Local Deals and Getaways. If we are required to materially increase the estimated liability recorded in our financial statements with respect to unredeemed Local Deals and Getaways vouchers due to application of certain gift card laws, our net income could be materially and adversely affected.

In certain states and foreign jurisdictions, our Local Deals and Getaways vouchers may be considered a gift card. Some of these states and foreign jurisdictions include gift cards under their unclaimed and abandoned property laws which require companies to remit to the government the value of the unredeemed balance on the gift cards after a specified period of time (generally between one and five years) and impose certain reporting and recordkeeping obligations. The analysis of the potential application of the unclaimed and abandoned property laws to our vouchers is complex, involving an analysis of constitutional and statutory provisions and factual issues, including our relationship with members and merchants and our role as it relates to the issuance and delivery of a voucher. In the event that one or more states or foreign jurisdictions successfully challenges our position on the application of its unclaimed and abandoned property laws to vouchers, or if the estimates that we use in projecting the likelihood of vouchers being redeemed prove to be inaccurate, our liabilities with respect to unredeemed vouchers may be materially higher than the amounts shown in our financial statements. If we are required to materially increase the estimated liability recorded in our financial statements with respect to unredeemed gift cards, our net income could be materially and adversely affected. Moreover, a successful challenge to our position could subject us to penalties or interest on unreported and unremitted sums, and any such penalties or interest would have a further material adverse impact on our net income.

New tax treatment of companies engaged in Internet commerce may adversely affect the commercial use of our services and our financial results.

Due to the global nature of the Internet, it is possible that various states or foreign countries might attempt to regulate our transmissions or levy sales, income or other taxes relating to our activities. Tax authorities at the international,

federal, state and local levels are currently reviewing the appropriate treatment of companies engaged in Internet commerce. New or revised international, federal, state or local tax regulations may subject us or our members to additional sales, income and other taxes. We cannot predict the effect of current attempts to impose sales, income or other taxes on commerce over the Internet. New or revised taxes and, in particular, sales taxes, VAT and similar taxes would likely increase the cost of doing business online and decrease the attractiveness of advertising and selling goods and services over the Internet. New taxes could also create significant increases in internal costs necessary to capture data, and collect and remit taxes. Any of these events could have an adverse effect on our business and results of operations.

We may suffer liability as a result of information retrieved from or transmitted over the Internet and claims related to our service offerings.

We may be sued for defamation, civil rights infringement, negligence, patent, copyright or trademark infringement, invasion of privacy, personal injury, product liability, breach of contract, unfair competition, discrimination, antitrust or other legal claims relating to information that is published or made available on our websites or service offerings we make available (including provision of an application programming interface platform for third parties to access our website, mobile device services and geolocation applications). These types of claims have been brought, sometimes successfully, against online services in the past. The fact that we distribute information via e-mail or text message may subject us to potential risks, such as liabilities or claims resulting from unsolicited e-mail or spamming, lost or misdirected messages, security breaches, illegal or fraudulent use of e-mail or interruptions or delays in e-mail or mobile service. These risks are enhanced in certain jurisdictions outside the U.S., where our liability for such third-party actions may be less clear and we may be less protected. In addition, we could incur significant costs in investigating and defending such claims, even if we ultimately are not found liable. If any of these events occurs, our business could be materially and adversely affected.

We are subject to risks associated with information disseminated through our websites and applications, including consumer data, content that is produced by our editorial staff and errors or omissions related to our product offerings. Such information, whether accurate or inaccurate, may result in our being sued by our advertisers, merchants, members or third parties and as a result our revenue and reputation could be materially and adversely affected.

In addition, we may acquire personal or confidential information, including credit card information, from users of our websites and mobile applications, related to our Local Deals and hotel booking platform. Our existing security measures may not be successful in preventing security breaches. For example, outside parties may attempt to fraudulently induce employees, merchants or customers to disclose sensitive information in order to gain access to our secure systems and networks. A party (whether internal, external, an affiliate or unrelated third party) that is able to circumvent our security systems could steal consumer information or transaction data or other proprietary information. In the last few years, several major companies, such as Target, Home Depot, Zappos, LinkedIn and Sony, have experienced high-profile security breaches that exposed their customers' personal information. While we strive to use commercially acceptable means to protect customer personal information, no method of transmission over the Internet, or method of electronic storage, is 100% secure. Further, because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently and often are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. These issues are likely to become more difficult to manage as we expand the number of places where we operate and as the tools and techniques used in such attacks become more advanced. Security breaches or the unauthorized disclosure of customer personal information could result in negative publicity, damage our reputation, expose us to risk of loss or litigation and possible liability and subject us to regulatory penalties and sanctions. Any failure or perceived failure by us, or our service providers, to comply with the privacy policies, privacy-related obligations to users or other third parties, or privacy related legal obligations, or any compromise of security that results in the unauthorized release or transfer of personally identifiable information or other user data, may result in governmental enforcement actions, litigation or public statements against the company by consumer advocacy groups or others and could cause our customers and members to lose trust in the company, which could have an adverse effect on our business. If our security measures are breached, or if our services are subject to attacks that degrade or deny the ability of users to access our products and services, our products and services may be perceived as not being secure, users and customers may curtail or stop using our products and services, and we may incur significant legal and financial exposure.

We could also be adversely affected if legislation or regulations are expanded to require changes in our business practices or if governing jurisdictions interpret or implement their legislation or regulations in ways that negatively affect our business, results of operations or financial condition. For example, we, like many online companies, have

been utilizing the U.S.- E.U. Safe Harbor framework and relying on this method to ensure the appropriate transfer of data between the U.S. and Europe. However, on October 6, 2015, the European Court of Justice ruled that this 15-year old Safe Harbor pact is no longer valid. While we are evaluating and implementing alternatives, it is difficult at this point to know whether this ruling will have an impact on our business. To the extent that European regulatory authorities impose fines on the Company or require changes to the Company's business practices, the Company's business and results of operations could be materially and adversely affected. We also could be adversely affected if legislation or regulations are expanded to require changes in our business practices or if governing jurisdictions interpret or implement their legislation or regulations in ways that negatively affect our business, results of operations or financial condition.

Claims have been asserted against us relating to shares not issued in our 2002 merger.

The Company was formed as a result of a combination and merger of entities founded by the Company's principal stockholder, Ralph Bartel. In 2002, Travelzoo.com Corporation was merged into Travelzoo Inc. Under and subject to the terms of the merger agreement, holders of promotional shares of Travelzoo.com Corporation ("Netsurfers") who established that they had satisfied certain prerequisite qualifications were allowed a period of 2 years following the effective date of the merger to receive one share of Travelzoo Inc. in exchange for each share of common stock of Travelzoo.com Corporation. In 2004, two years following the effective date of the merger, certain promotional shares remained unexchanged. As the right to exchange these promotional shares expired, no additional shares were reserved for issuance. Thereafter, the Company began to offer a voluntary cash program for those who established that they had satisfied certain prerequisite qualifications for Netsurfer promotional shares as further described below.

Beginning in 2010, the Company became subject to unclaimed property audits of various states in the United States related to the above unexchanged promotional shares. The Company recorded charges for the estimated settlements with these states of \$20.0 million, \$3.0 million and \$22.0 million in 2011, 2012 and 2013, respectively. In 2014, the Company released \$7.6 million of the reserve related to the completion of settlements with the states.

Although the Company has settled the states' unclaimed property claims with all states, the Company may still receive inquiries from certain potential Netsurfer promotional stockholders that had not provided their state of residence to the Company by April 25, 2004. Therefore, the Company is continuing its voluntary program under which it makes cash payments to individuals related to the promotional shares for individuals whose residence was unknown by the Company and who establish that they satisfy the original conditions required for them to receive shares of Travelzoo.com Corporation, and who failed to submit requests to convert their shares into shares of Travelzoo Inc. within the required time period. This voluntary program is not available for individuals whose promotional shares have been escheated to a state by the Company, except those individuals for which their residence was unknown to the Company. The accompanying consolidated financial statements include a charge for payments under this voluntary program in general and administrative expenses of \$1,000 for the nine months ended September 30, 2016.

The total cost of this voluntary program is not reliably estimable because it is based on the ultimate number of valid requests received and future levels of the Company's common stock price. The Company's common stock price affects the potential liability because the amount of cash payments under the program is based in part on the recent level of the stock price at the date valid requests are received. The Company does not know how many of the requests for shares originally received by Travelzoo.com Corporation in 1998 were valid, but the Company believes that only a portion of such requests were valid. In order to receive payment under this voluntary program, a person is required to establish that such person validly held shares in Travelzoo.com Corporation.

Federal laws and regulations, such as the Bank Secrecy Act and the USA PATRIOT Act and similar foreign laws, could be expanded to include Local Deals and Getaways vouchers.

Various federal laws, such as the Bank Secrecy Act and the USA PATRIOT Act and foreign laws and regulations, such as the European Directive on the prevention of the use of the financial system for the purpose of money laundering and terrorist financing, impose certain anti-money laundering requirements on companies that are financial institutions or that provide financial products and services. For these purposes, financial institutions are broadly defined to include money services businesses such as money transmitters, check cashers and providers of prepaid access cards. Examples of anti-money laundering requirements imposed on financial institutions include customer identification and verification programs, suspicious activity monitoring and reporting, record retention policies and procedures and transaction reporting. We do not believe that we are a financial institution subject to these laws and regulations based, in part, upon the closed loop nature and other characteristics of vouchers and our role with respect to the distribution of vouchers to members. However, the Financial Crimes Enforcement Network, a division of the U.S. Department of the Treasury tasked with implementing the requirements of the Bank Secrecy Act, recently issued final rules regarding the scope and requirements for non-bank parties involved in stored value or prepaid access cards, including obligations on sellers or providers of “prepaid access”. Under the final rule, providers or sellers of closed loop vouchers, such as those offered through the Local Deals and Getaways programs, would only be subject to registration if the voucher exceed \$2,000 in total value or if they are sold in aggregate amounts exceeding \$10,000 to any single person in one day. Should the \$2,000 limit be exceeded or should more than \$10,000 in aggregate vouchers be sold to any individual person (sales to businesses for resale or distribution are excluded) then we may be deemed either a seller or provider of prepaid access subject to regulation. In the event that we become subject to the requirements of the Bank Secrecy Act or any other anti-money laundering law or regulation imposing obligations on us as a money services business, our regulatory compliance costs to meet these obligations would likely increase which could reduce our net income. In addition, the costs for third parties to sell vouchers would increase, which may restrict our ability to enlist third parties to issue vouchers.

Our internal control over financial reporting may not be effective, and our independent registered public accounting firm may not be able to attest as to the effectiveness of such internal controls, which could have a significant and adverse effect on our business.

We are obligated to evaluate our internal control over financial reporting in order to allow management to report on, and our independent auditors to opine on, our internal control over financial reporting, as required by Section 404 of the Sarbanes-Oxley Act of 2002 and the rules and regulations of the SEC, which we collectively refer to as Section 404. In our Section 404 evaluation, we have identified areas of internal control that may need improvement and have instituted remediation efforts where necessary. In addition, the changes in our internal controls related to the Asia Pacific business, which we acquired in August 2015, were subject to an allowed first-year exemption for acquired businesses in 2015. Currently, none of our identified areas that need improvement has been categorized as material weaknesses. We may identify conditions that may result in significant deficiencies or material weaknesses in the future.

We may be unable to protect our registered trademark or other proprietary intellectual property rights.

Our success depends to a significant degree upon the protection of the Travelzoo brand name. We rely upon a combination of copyright, trade secret and trademark laws, as well as non-disclosure and other contractual arrangements to protect our intellectual property rights. The steps we have taken to protect our proprietary rights, however, may not always succeed in deterring misappropriation of proprietary information.

We have registered the Travelzoo trademark in the U.S., Australia, Canada, China, Hong Kong, Japan, South Korea, Taiwan, the European Union and the U.K. If we are unable to protect our rights in the mark in North America, Europe, and Asia Pacific, where we have licensed the trademark as described above under “overview”, a key element of our strategy of promoting Travelzoo as a brand could be disrupted and our business could be adversely affected. We may not always be able to detect unauthorized use of our proprietary information or take appropriate steps to enforce our intellectual property rights. In addition, the validity, enforceability, and scope of protection of intellectual property in Internet-related industries are uncertain and still evolving. The laws of countries in which we may market our services in the future are uncertain and may afford little or no effective protection of our intellectual property. The

unauthorized reproduction or other misappropriation of our proprietary technology could enable third parties to benefit from our technology and brand name without paying us for them. If this were to occur, our business could be materially adversely affected.

We may face liability from intellectual property litigation that could be costly to prosecute or defend and distract management's attention with no assurance of success.

We cannot be certain that our products, content and brand names do not or will not infringe valid patents, copyrights or other intellectual property rights held by third parties. We expect that infringement claims in our markets will increase in number as more participants enter the markets. We may be subject to legal proceedings and claims from time to time relating to the intellectual property of others in the ordinary course of our business. We may incur substantial expenses in defending against these third party infringement claims, regardless of their merit, and such claims could result in a significant diversion of the efforts of our management personnel. Successful infringement claims against us may result in monetary liability or a material disruption in the conduct of our business. We endeavor to defend our intellectual property rights diligently, but intellectual property litigation is extremely expensive and time consuming, and has and is likely to continue to divert managerial attention and resources from our business objectives. Successful infringement claims against us could result in monetary liability and resolution of claims may require us to obtain licenses to use intellectual property rights belonging to third parties, which may be expensive to procure.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We believe that our potential exposure to changes in market interest rates is not material. The Company is not a party to any derivative transactions. We invest in highly liquid investments with short maturities. Accordingly, we do not expect any material loss from these investments.

Our operations in Canada expose us to foreign currency risk associated with agreements being denominated in Canadian dollars. Our operations in Europe expose us to foreign currency risk associated with agreements being denominated in British Pound Sterling and Euros. Our operations in Asia Pacific expose us to foreign currency risk associated with agreements being denominated in Australian dollars, Chinese Yuan, Hong Kong dollar and Japanese Yen. We are exposed to foreign currency risk associated with fluctuations of these currencies as the financial position and operating results of our operations in Asia Pacific, Canada and Europe are translated into U.S. dollars for consolidation purposes. We do not use derivative instruments to hedge these exposures. We are a net receiver of U.S. dollars from our foreign subsidiaries and therefore benefit from a weaker U.S. dollar and are adversely affected by a stronger U.S. dollar relative to the foreign currency used by the foreign subsidiary as its functional currency. We have performed a sensitivity analysis as of September 30, 2016, using a modeling technique that measures the change in the fair values arising from a hypothetical 10% adverse movement in the levels of foreign currency exchange rates relative to the U.S. dollar with all other variables held constant. The foreign currency exchange rates we used were based on market rates in effect at September 30, 2016. The sensitivity analysis indicated that a hypothetical 10% adverse movement in foreign currency exchange rates would result in an incremental \$29,000 foreign exchange gain for the nine month ended September 30, 2016.

Item 4. Controls and Procedures

For the period ended September 30, 2016, we carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer along with the Company's Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(e) and 15d-15(e). Based upon that evaluation, the Company's Chief Executive Officer along with the Company's Chief Financial Officer concluded that our disclosure controls and procedures were effective as of September 30, 2016 to ensure that the information required to be disclosed by us in this quarterly report was recorded, processed, summarized and reported within the time periods specified in the SEC's rules and regulations and were also effective to ensure that information required to be disclosed by us in this quarterly report was accumulated and communicated to our management including the Company's Chief Executive Officer and the Company's Chief Financial Officer to allow timely decisions regarding its disclosure.

During the three months ended September 30, 2016, there were no changes in our internal control over financial reporting (as defined in Exchange Act Rule 13a-15 and 15d-15 under the Securities Exchange Act of 1934) that materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings

The information set forth under “Note 4 — Commitments and Contingencies” to the accompanying unaudited condensed consolidated financial statements included in Part I, Item 1 of this report is incorporated herein by reference.

Item 1A. Risk Factors

An updated description of the risk factors associated with our business is included under “Risk Factors” in “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” contained in Item 2 of Part I of this report. This description includes any material changes to and supersedes the description of the risk factors associated with our business previously disclosed in Item 1A of our 2015 Annual Report on Form 10-K and is incorporated herein by reference.

Item 2: Unregistered Sales of Equity Securities and Use of Proceeds

Repurchases of Equity Securities

We repurchased 64,000 shares of our equity securities during the three months ended September 30, 2016.

| Period | Total Number of Shares Purchased | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Programs | Maximum Shares that May Yet be Purchased Under the Programs (1) |
|--|--|------------------------------------|---|--|
| July 1, 2016 - July 31, 2016 | 44,000 | \$ 7.97 | 44,000 | 383,000 |
| August 1, 2016 - August 31, 2016 | 20,000 | \$ 11.63 | 64,000 | 363,000 |
| September 1, 2016 - September 30, 2016 | — | \$ — | 64,000 | 363,000 |
| | 64,000 | | | |

(1) In July 2012, the Company announced a stock repurchase program authorizing the repurchase of up to 1,000,000 shares of the Company's outstanding common stock. As of December 31, 2013, 971,000 shares were repurchased and therefore there were 29,000 shares remaining to be repurchased under this program. In January 2014, the Company announced a stock repurchase program authorizing the repurchase of up to 500,000 shares of the Company's outstanding common stock. During the year ended December 31, 2014, the Company repurchased 261,000 shares of common stock, and therefore there were 268,000 shares remaining to be repurchased under this program as of December 31, 2014. During the three months ended December 31, 2015, the Company repurchased 212,000 shares of common stock and therefore there were 56,000 shares remaining to be repurchased under this program as of December 31, 2015. In February 2016, the Company announced a stock repurchase program authorizing the repurchase of up to 1,000,000 shares of the Company's outstanding common stock.

Item 6. Exhibits

The following table sets forth a list of exhibits:

| Exhibit Number | Description |
|----------------|--|
| 3.1 | Certificate of Incorporation of Travelzoo Inc. (Incorporated by reference to our Pre-Effective Amendment No. 6 to our Registration Statement on Form S-4 (File No. 333-55026), filed February 14, 2002) |
| 3.2 | Certificate of Incorporation of Travelzoo Inc. and Certificates of Amendment To the Certificate of Incorporation to Effect a Reverse Stock Split Followed by a Forward Stock Split Of Travelzoo's Common Stock. |
| 3.3 | By-laws of Travelzoo Inc. (Incorporated by reference to our Pre-Effective Amendment No. 6 to our Registration Statement on Form S-4 (File No. 333-55026), filed February 14, 2002). |
| 10.1 | Form of Director and Officer Indemnification Agreement (Incorporated by reference to Exhibit 10.1 on Form 10-Q (File No. 000-50171), filed November 9, 2007) |
| 31.1‡ | Certification of Chief Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 |
| 31.2‡ | Certification of Chief Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 |
| 32.1† | Certification of Chief Executive Officer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 |
| 32.2† | Certification of Chief Financial Officer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 |
| 101.INS† | XBRL Instance Document |
| 101.SCH† | XBRL Taxonomy Extension Schema Document |
| 101.CAL† | XBRL Taxonomy Extension Calculation Linkbase Document |
| 101.DEF† | XBRL Taxonomy Extension Definition Linkbase Document |
| 101.LAB† | XBRL Taxonomy Extension Label Linkbase Document |
| 101.PRE† | XBRL Taxonomy Extension Presentation Linkbase Document |
