In addition, Constellation Energy Group, Inc. owns 100% of the stock of 46 shell, inactive subsidiaries incorporated in each state except Maryland, Ohio, Pennsylvania and Hawaii under the name Constellation Energy Group, Inc.

2. A brief description of the properties of claimant and each of its subsidiary public utility companies used for the generation, transmission, and distribution of electric energy for sale, or for the production, transmission, and distribution of natural or manufactured gas, indicating the location of principal generating plants, transmission lines, producing fields, gas manufacturing plants, and electric and gas distribution facilities, including all such properties which are outside the State in which claimant and its subsidiaries are organized and all transmission or pipelines which deliver or receive electric energy or gas at the borders of such State.

Electric

Baltimore Gas and Electric Company (BGE), a subsidiary public utility of claimant, owns 1,268 miles of transmission consisting of 215 circuit miles of 500 kV lines; 320 circuit miles of 230 kV lines; 54 circuit miles of 138 kV lines, and 679 circuit miles of 115kV lines, located throughout Central Maryland.

BGE's 500 kV transmission consists of two circuits which connect to the Calvert Cliffs plant to BGE load center as well as five circuits which interconnect with and are part of the Pennsylvania - New Jersey - Maryland (PJM) 500 kV system. These circuits form a partial 500 kV transmission ring around the Baltimore metropolitan area. Additionally, the Calvert Cliffs-Chalk Point, Calvert Cliffs-Waugh Chapel, and Waugh Chapel-High Ridge circuits are part of the "500 kV Loop", a full 500 kV transmission ring around the Washington metropolitan area with several transformation points to 230 kV.

19

BGE's 230 kV transmission connects at two locations via transformation with the 500 kV system and at ten locations via transformation with our 115 kV network, throughout Central Maryland.

BGE owns approximately 40,715 conductor miles of distribution lines, including 19,915 conductor miles of overhead lines and 20,800 conductor miles of underground lines, throughout Central Maryland. These figures only include circuits operating at 34.5, 13.8 and 4 kV.

BGE's transmission and distribution systems are comprised of 211 company owned locations with 427 installed transformers. Total transformer capacity is approximately 28,252 MVA throughout Central Maryland. These figures do not include BGE-owned facilities located on customer premises. In addition, generator step-up and other customer-owned transformers are not included in these figures.

Edgar Filing: CONSTELLATION ENERGY GROUP INC - Form U-3A-2

BGE's transmission system is connected to other systems via the following transmission tie lines:

(1) two connections at the Maryland-Pennsylvania state line near Delta, PA with PECO Energy Company transmission lines.

(2) four connections with the Pennsylvania Power and Light Co. at the Maryland-Pennsylvania state line, three connections near Graceton, Md., and one near Norrisville, Md.

(3) one connection with the Metropolitan Edison Co. at the Maryland-Pennsylvania state line near Twin Farms, Md.

(4) six active connections with Potomac Electric Power Company, two near Burtonsville, Md., two near Bowie, Md., one near Mt Airy, Md., and one near Eagle Harbor, Md.

Gas

BGE owns 9 gate stations located at various points in its service territory where natural gas is received from suppliers. Natural gas is delivered to customers through approximately 6,120 miles of mains and 6,920 miles of service lines covering 743 square miles of territory.

BGE has

- . a liquefied natural gas facility for the liquefaction and storage of natural gas with a total storage capacity of 1,092,977 Dth and a daily capacity of 311,500 Dth located at Spring Gardens, MD, and
- . a propane air facility with a total storage capacity equivalent to 554,200 Dth and a daily capacity of 85,000 Dth located at Notch Cliff, MD.

BGE's current pipeline firm transportation entitlements to serve our firm loads are 284,053 Dth per day during the winter period and 259,053 Dth during the summer period.

BGE has 235,080 Dth per day of pipeline natural gas storage entitlements.

(1) Safe Harbor Water Power Corporation (Safe Harbor)

1 Powerhouse Road
Conestoga, PA

Safe Harbor is a hydroelectric plant located on the Susquehanna River at Safe Harbor, Pennsylvania, jointly owned by Constellation Power Source Generation, Inc. (CPSG) and Pennsylvania Power & Light Holtwood ("Holtwood"). CPSG owns two-thirds of the outstanding capital stock, including one-half of the voting stock of Safe Harbor. It includes 14 generating units. At maximum output, the plant can generate approximately 10 million kWh of electrical energy in one

Edgar Filing: CONSTELLATION ENERGY GROUP INC - Form U-3A-2

day. The average yearly generation is 1,078,073,000 kWh. The total varies depending upon yearly average river flow.

The total output of Safe Harbor is supplied to co-owners Holtwood and CPSG in accordance with their ownership interest to supplement the power flow into the Pennsylvania-New Jersey-Maryland interconnection (PJM). Safe Harbor power is used primarily to meet peak demands for electricity. Continuous operation occurs when river flow equals or exceeds the plant's maximum water handling capacity of 110,000 cubic feet per second.

Elektra Noreste, S.A.
Edificio Hatillo, Torre A, Piso 7
Avenida Cuba y Avenida Justo Arosemena
Apartado 5285
Panama 5, Panama City
Republic of Panama

Elektra Noreste, S.A. ("Noreste") is the second largest distribution company in the Republic of Panama. Noreste's service territory is 2,600 square miles, and includes the entire Eastern half of the country, a portion of the capital, Panama City and all of the second largest city, Colon. A portion of Noreste's service territory will also include parts of the Eastern half of the Panama Canal Zone reclaimed by the Republic of Panama.

Noreste serves approximately 206,477 customers that consume a total of 2,248 GWH of energy annually, and is one of the three electric distribution companies formed out of the restructuring and privatization of the government owned utility, Instituto de Recursos Hidraulicos y Electrificacion. Noreste currently has approximately 503 employees, and its assets consist largely of all the distribution lines and substations within its 2,600 square mile service territory. Noreste purchases the bulk of its electricity needs from the now privatized generation companies under power purchase contracts negotiated with the oversight of the regulator. Elektra is able to self-generate up to 15% of its energy needs.
