If the stock price is between two stock price amounts on the table or the effective date is between two dates on the table, the number of additional shares will be determined by straight-line interpolation between the number of additional shares set forth for the higher and lower stock price amounts and the two dates, as applicable, based on a 365 day year. In addition, if the stock price is more than \$300.00 per share (subject to adjustment), the number of additional shares will be zero. If the stock price is less than \$42.32 (subject to adjustment), the number of additional shares will be zero. Notwithstanding the foregoing, in no event will the total number of common shares issuable upon conversion in connection with a make-whole fundamental change exceed 23.6295 shares per \$1,000 principal amount of convertible debentures, subject to adjustment in the same manner as WST must adjust the conversion rate.
