ITEM 1: BUSINESS

GENERAL

Employees of Telemed who organized the buyout of Telemed's pulmonary and respiratory care information services business incorporated the Company on February 24, 1984. In March 1984, the Company purchased that business for cash and a promissory note.

By 1988, annual revenue had grown to $2.4 million and the Company completed an initial public offering of its common stock through Schneider Securities in 1989. By September 15, 1989, 23 hospitals were using the Company's respiratory care management systems (then referred to as "RCMS") and the Company employed 23 full and part-time employees.

Over time, with improvements in computer hardware and performance, the mini-computer based RCMS product became dated. The last RCMS sale was made in January 1991. In 1994 a new senior management team was put in place. In 1999, based on Y2K issues, a business decision was made to discontinue the RCMS product line.

In the 1995, the Company acquired two complimentary companies; a healthcare consulting company and software to facilitate emergency department patient tracking.

During the fiscal year ended 2003 the Company sold the consulting division and entertained discussions on selling the EdNet product line. Subsequent to June 30, 2003, the company entered into an agreement with Clinical Ventures LLC to sell the EDNet product line pending shareholder approval, which is expected on October 22, 2003.

Due to stagnant market performance over the past several years, the company began reevaluating its strategic alternatives. In May 2003 the company accepted an offer by certain management to re-acquire the healthcare consulting operations.

In July 2003 the company accepted an offer by another software vendor to purchase the companies remaining product line (EDNet) pending shareholder approval.

TENET INFORMATION SERVICES, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1--NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

ORGANIZATION - Tenet Information Services, Inc. ("Tenet"), a Utah corporation, designs and markets a computer-based medical and health information system related primarily to emergency departments (the "EDNet System"). During fiscal 1996, Tenet expanded its operations by merging with National Microcomputer Corporation ("NMC") and acquiring certain assets of The International Healthcare Consulting Group, Inc. ("HCG"). NMC designed and marketed the integrated information management/patient tracking system for use in emergency departments of hospitals and urgent care centers (the "EDNet System"). HCG has provided healthcare institutions, mainly hospitals, with consulting services to assist the institutions in achieving a more efficient, lower cost care delivery model while maintaining the highest quality of care standards.
Tenet and its wholly owned subsidiary, NMC, (collectively, "the Company") sell and lease computer software license rights to hospitals throughout the United States. In addition, the Company sells maintenance contracts for these information systems. Substantially all of the Company's revenues are generated from hospitals and therefore, the Company's financial performance is partially dependent upon the viability of the healthcare economic sector.

On May 23, 2003, Tenet sold the consulting division. Additionally, on July 29, 2003, Tenet executed an Asset Purchase Agreement to sell all assets and operations related to the Company's remaining operations, pending shareholder approval at a special shareholder meeting scheduled for October 22, 2003.

PRINCIPLES OF CONSOLIDATION - The accompanying consolidated financial statements include the accounts of Tenet and its wholly owned subsidiary, NMC. All significant intercompany transactions and account balances have been eliminated in consolidation.

USE OF ESTIMATES IN THE PREPARATION OF FINANCIAL STATEMENTS - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

BASIS OF PRESENTATION - As noted above, the Company has sold or will sell all of its operating assets, pending shareholder approval, and will become a shell company. Once the asset sale is finalized, the Company will pursue potential acquisitions or business opportunities. The Company has not identified any targets and has not estimated a timetable for completing any such transaction, and cannot provide assurance that it will be able to complete such a transaction. Until the Company completes a transaction, it will generate cash flow primarily by the collection of its notes and accounts receivable and receipt of certain software license fees. The Company anticipates having cash to meet its operational needs for the upcoming year.

REVENUE RECOGNITION - The Company recognizes revenue in accordance with the provisions of Statement of Position No. 91-1 Software Revenue Recognition as follows:

Revenues related to the EDNet System consist of sales of software licenses, installation of information systems and related software customization and enhancements. In addition, revenues are generated from annual software support and maintenance. Installation revenues are recognized on the percentage completion method measured by completion and acceptance of contracted milestones. The asset "work performed in excess of billings" represent costs incurred and revenues earned in excess of billings on uncompleted contracts. The liability "billings in excess of work performed" represents billings in excess of costs incurred and revenue recognized.

Revenues from annual software and maintenance are recognized ratably over the term of each contract. Amounts billed in advance of revenue recognition for software and maintenance are recorded as deferred revenue.

Revenues from consulting services are recognized when the services have been provided.

FURNITURE, FIXTURES AND EQUIPMENT - Furniture, fixtures and equipment are stated at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets, generally 3 to 10 years. Depreciation expense was $9,462 and $10,145 for the periods ended June 30, 2003 and 2002, respectively. Maintenance and repairs are charged to expense as incurred and major improvements or betterments are capitalized. Gains or losses on sales or retirements are included in the statement of operations in the year of disposition. Furniture, fixtures and equipment include $21,036 of computer equipment used in operations and $1,356 of other equipment at June 30, 2003.

SOFTWARE DEVELOPMENT COSTS - Costs incurred in creating computer software products are charged to operations as software development expense prior to the development of a detailed program design or a working model. After the detailed program design or working model is established, costs of producing product masters are capitalized as software development costs. The Company had no capitalized software costs at June 30, 2003.

Costs of maintenance and customer support are recognized as expense when the related revenue is recognized or when those costs are incurred, whichever occurs first.

IMPAIRMENT - The Company records impairment losses on property and equipment when indicators of impairment are present and undiscounted cash flows estimated to be generated by those assets are less than the assets' carrying amount. The Company had no impaired assets at June 30, 2003.

CASH EQUIVALENTS, FAIR VALUE OF FINANCIAL INSTRUMENTS AND CONCENTRATION OF CREDIT RISK - Cash Equivalents include highly liquid investments with original maturities of three months or less readily convertible to known amounts of cash.

The estimated fair value of financial instruments is not presented because, in Management's opinion, there is no material difference between carrying amounts and estimated fair values of financial instruments as presented in the accompanying balance sheet.

In the normal course of business, the Company extends credit to its customers. The Company regularly reviews its accounts receivable and makes provisions for potentially uncollectible balances. At June 30, 2003, the Company considered all of their outstanding accounts receivable to be fully collectible, thus no allowance for uncollectible balances was recorded.

INCOME TAXES - The Company recognizes the amount of income taxes payable or refundable for the current year and recognizes deferred tax assets and liabilities for the future tax consequences attributable to differences between the financial statement amounts of certain assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years those temporary differences are expected to be recovered or settled. Deferred tax assets are reduced by a valuation allowance to the extent that uncertainty exists as to whether the deferred tax assets will ultimately be realized.

STOCK-BASED COMPENSATION - The Company accounts for its stock options issued to directors, officers and employees under Accounting Principles Board Opinion No. 25 and related interpretations ("APB 25"). Under APB 25, compensation expense is recognized if an option's exercise price on the measurement date is below the fair value of the Company's common stock. The Company accounts for options and warrants issued to non-employees in accordance with SFAS No. 123, "Accounting for Stock-Based Compensation" (SFAS 123) which requires these options and warrants to be accounted for at their fair value.

No stock-based employee compensation cost is reflected in net income, as all options had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates the effect on net income and basic and diluted loss per common share if the Company had applied the fair value recognition provisions of FASB Statement No. 123, Accounting for Stock Based Compensation, to stock-based employee compensation:

	For the Year Ended June 30, 2003	2002
Net income, as reported	$ 77,474	$ 70,890
Adjust: Total stock-based employee compensation expense determined under fair value based method for all awards, including adjustment for forfeited options	8,353	(2,845)
Pro forma net income	$ 85,827	$ 68,045
Basic and diluted earnings per common share as reported	$ -	$ -
Basic and diluted loss per common share pro forma	$ -	$ -

WARRANTY COSTS - A one-year limited warranty from date of first use is provided on sales of software licenses. The terms of the warranty are extended to all periods where the System is covered by an applicable Support Agreement. Warranty costs have not been material in any year presented; accordingly, these costs are expensed when incurred.

BASIC AND DILUTED EARNINGS PER SHARE -Basic earnings per common share is computed by dividing net income available to common stockholders by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflects the potential dilution which could occur if all contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock. Potentially issuable common shares which consist of stock options are excluded from the calculation of diluted loss per common share because the effects are anti-dilutive.

NOTE 2 - CONSULTING DIVISION

On May 23, 2003, the Company sold all the assets of the Company's consulting division to a shareholder and former employee of the Company. The sale included all office and computer equipment associated with the consulting division, which had a net book value of $4,926, and the right to pursue work with the Company's consulting division clients. In exchange for the purchase of the consulting division, the Company received a note receivable for $25,700, to be paid quarterly at eight percent interest for the next three years and nine months or fifteen payments and assumed liabilities totaling $54,030. The sale resulted in the recognition of a $74,804 gain. The financial statements present the results from the consulting division as discontinued operations. During the year ended June 30, 2003 and 2002 the consulting division had revenues of $353,899 and 249,463, respectively and income from operations of $24,305 and $50,336, respectively.

On November 1, 2001, the Company paid $5,000 to a creditor as payment in full of all obligations on an unsecured note for $25,000. After deducting $1,625 for payment of outstanding interest, $3,375 was applied to the outstanding principal and the creditor forgave the balance due on the note resulting in a one-time gain of $21,625. In accordance with SFAS 145, the gain from debt forgiveness did not meet the conditions for being classified as extraordinary and therefore was included in continuing operations. On June 30, 2002, the Company issued 270,313 shares of common stock to a director for services in negotiating the debt settlement. The shares were valued at $2,703 or $0.01 per share and were expensed.

As part of the agreement, the Company and Clinical Ventures entered into a Transition Management Services Agreement whereby Clinical Ventures will manage the day-to-day operations of Tenet and the conduct of its business, pending shareholder approval of the above mentioned agreement.

In conjunction with the above agreement, the Company and Clinical Ventures executed a software license agreement pursuant to which Clinical Ventures obtained a non-exclusive right and license to use the Company's EDNet and ARCNet tracking software products. STOCK OPTION PLANS

On October 15, 1984, the Company adopted an Incentive Stock Option Plan (the

"ISO Plan"), pursuant to which only "incentive stock options" ("ISO's"), as defined in the Internal Revenue Code (the "Code"), may be granted. On the same date, the Company adopted a Nonqualified Stock Option Plan ("NQSO Plan"), pursuant to which only "nonqualified stock options" ("NQSOs"), as defined in the Code, may be granted. Stock options for an aggregate of 600,000 shares of common stock may be granted under both Plans. ISOs may be granted under the

ISO Plan to employees owning less that 10% of the Company's voting stock (as defined by Sections 422A and 425 of the Code). NQSOs may be granted under the NQSO Plan to employees who are ineligible to receive options under the ISO Plan.

Stock options may be granted under the Plans at a price per share not less than 100% of the "fair market value" (as defined by the Plans) of the common stock on the date of grant.

The Plans limit grants of stock options to any one employee to 60,000 shares of stock per plan year, with an aggregate option price ceiling of $100,000 under the ISO Plan in any year. Each stock option, unless sooner terminated, expires five years from the "date of effectiveness", which is three years from the date of grant.

ISOs are exercisable until three months following termination of employment (twelve months if termination is due to death or disability). Termination of employment for any reason does not affect the exercisability of NQSOs, regardless of whether the option's effective date has been reached. Under both Plans, options are exercisable during an optionee's lifetime only by such optionee and are transferable only upon death by the laws of decent or distribution.

The Board of Directors has the right to modify or amend the Plans at any time, provided, however, that, unless ratified by the Company's shareholders, no amendment will be effective which (i) changes the number of shares which may be issued under the Plans, (ii) changes the option price, other than the manner of determining the fair market value of the shares, (iii) changes the periods during which options may be granted or exercised, (iv) changes the provisions relating to the determination of employees to whom options may be granted and the number of shares to be covered by such options, or (v) changes the provisions relating to adjustments to be made upon changes in capitalization. Shareholder action is also required to terminate the Plans.

As of June 30, 2002 there were 605,000 options outstanding. During the year ended 2003 180,000 of these were forfeited leaving 425,000 options outstanding and 363,000 exercisable at year end. These options were issued outside of the Incentive Stock Option Plan and authorized by the Board of Directors.

Overfelt).

The Company believes that all transactions between the Company and related parties have been on terms and conditions no less favorable to the Company than those available from third parties. Each transaction was entered into to provide operating capital for the Company. All future transactions between the Company and any related party will be on terms and conditions no less favorable to the Company than those available from third parties and will be approved by a majority of the Company's disinterested directors.

Section 16(a) of the Securities Exchange Act of 1934 required the Company's directors and executive officers, and persons who own more than ten percent of a registered class of the Company's equity securities, to file with the Securities and Exchange Commission initial reports of ownership and reports of changes in ownership of Common Stock and other equity securities of the Company. Executive officers, directors and holders of ten percent or more of the Company's equity securities are required to furnish the Company with copies of all Section 16(a) reports they file.
