Chipotle Mexican Grill, Inc.

Notes to Condensed Consolidated Financial Statements

(unaudited)

(dollar and share amounts in thousands, unless otherwise specified)

1. Basis of Presentation

Chipotle Mexican Grill, Inc., a Delaware corporation, together with its subsidiaries (collectively the “Company”), develops and operates fast-casual, fresh Mexican food restaurants. As of March 31, 2015, the Company operated 1,800 Chipotle restaurants throughout the United States. The Company also had nine Chipotle restaurants in Canada, six in England, three in France, and one in Germany. Further, the Company operated ten ShopHouse Southeast Asian Kitchen restaurants, serving fast-casual, Asian inspired cuisine, as well as is an investor in a consolidated entity that owned and operated two Pizzeria Locale restaurants, a fast-casual pizza concept. The Company operated eight regions during the first quarter 2015 and has aggregated its operations to one reportable segment.

The accompanying unaudited condensed consolidated financial statements of the Company have been prepared in accordance with U.S. generally accepted accounting principles for interim financial statements and pursuant to the rules and regulations of the Securities and Exchange Commission. In the opinion of management, the accompanying unaudited condensed consolidated financial statements reflect all adjustments consisting of normal recurring adjustments necessary for a fair presentation of its financial position and results of operations. Interim results of operations are not necessarily indicative of the results that may be achieved for the full year. The financial statements and related notes do not include all information and footnotes required by U.S. generally accepted accounting principles for annual reports. This quarterly report should be read in conjunction with the consolidated financial statements included in the Company’s annual report on Form 10-K for the year ended December 31, 2014.

2. Recently Issued Accounting Standards

In April 2014, the Financial Accounting Standards Board (“FASB”) issued ASU No. 2014-08, “Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360).” The pronouncement was issued to clarify the reporting for discontinued operations and disclosures for disposals of components of an entity. The pronouncement is effective for reporting periods beginning after December 15, 2014. The adoption of ASU 2014-08 did not have a significant impact on the Company’s consolidated financial position or results of operations.

In May 2014, the FASB issued ASU No. 2014-09, “Revenue from Contracts with Customers (Topic 606).” The pronouncement was issued to clarify the principles for recognizing revenue and to develop a common revenue standard and disclosure requirements for U.S. GAAP and IFRS. The pronouncement is effective for reporting periods beginning after December 15, 2016. The expected adoption method of ASU 2014-09 is being evaluated by the Company and the adoption is not expected to have a significant impact on the Company’s consolidated financial position or results of operations.

In June 2014, the FASB issued ASU No. 2014-12, “Compensation – Stock Compensation (Topic 718).” The pronouncement was issued to clarify the accounting for share-based payments when the terms of an award provide that a performance target could be achieved after the requisite service period. The pronouncement is effective for reporting periods beginning after December 15, 2015. The adoption of ASU 2014-12 is not expected to have a

significant impact on the Company's consolidated financial position or results of operations.

3. Fair Value of Financial Instruments

The carrying value of the Company's cash and cash equivalents, accounts receivable and accounts payable approximate fair value because of their short-term nature. Investments, all of which are classified as held-to-maturity, are carried at amortized cost, which approximates fair value. Investments consist of U.S. treasury notes and CDARS, certificates of deposit placed through an account registry service, with maturities up to approximately two years. Fair market value of U.S. treasury notes is measured using level 1 inputs (quoted prices for identical assets in active markets) and fair market value of CDARS is measured based on level 2 inputs (quoted prices for identical assets in markets that are not active).

The Company also maintains a rabbi trust to fund obligations under a deferred compensation plan. Amounts in the rabbi trust are invested in mutual funds, which are designated as trading securities and carried at fair value, and are included in other assets in the consolidated balance sheet. Fair market value of mutual funds is measured using level 1 inputs (quoted prices for identical assets in active markets). The fair value of the investments in the rabbi trust was \$18,211 and \$16,147 as of March 31, 2015 and December 31, 2014, respectively. The Company records trading gains and losses in general and administrative expenses in the consolidated statement of income, along with the offsetting amount related to the increase or decrease in deferred compensation to reflect its exposure to liabilities for payment under the deferred plan. For the three months ended March 31, 2015, and 2014, the Company recorded \$139 and \$144, respectively, of unrealized gains on investments held in the rabbi trust.

Table of Contents

4. Shareholders' Equity

The Company has announced authorizations by its Board of Directors of repurchases of shares of common stock, which in the aggregate authorized expenditures of up to \$900,000. Under the remaining repurchase authorization, shares may be purchased from time to time in open market transactions, subject to market conditions.

During the three months ended March 31, 2015, the Company repurchased 34 shares of common stock under authorized programs, for a total cost of \$23,249. The cumulative shares repurchased under authorized programs as of March 31, 2015 are 4,247 for a total cost of \$721,335. As of March 31, 2015, \$178,963 was available to repurchase shares under the current repurchase authorizations. The shares are being held in treasury stock until such time as they are reissued or retired at the discretion of the Board of Directors.

5. Stock-based Compensation

During the three months ended March 31, 2015, the Company granted stock only stock appreciation rights ("SOSARs") on 322 shares of its common stock to eligible employees. The weighted average grant date fair value of the SOSARs was \$158.19 per share with a weighted average exercise price of \$667.93 per share based on the closing price of common stock on the date of grant. The SOSARs vest in two equal installments on the second and third anniversary of the grant date. During the three months ended March 31, 2015, 119 SOSARs were exercised, and 9 SOSARs were forfeited.

During the three months ended March 31, 2015, the Company awarded performance shares that were subject to service, performance, and market vesting conditions. The quantity of shares that will ultimately vest is determined based on Chipotle's relative performance versus a restaurant industry peer group, in average revenue growth, net income growth, and total shareholder return, with each performance measure to be weighted equally. Performance will be calculated over a three year period beginning January 1, 2015 through December 31, 2017. If minimum targets are not met, then no shares will vest.

Total stock-based compensation expense was \$16,561 (\$10,213 net of tax) for the three months ended March 31, 2015, and was \$27,657 (\$17,012 net of tax) for the three months ended March 31, 2014. A portion of stock-based compensation totaling \$425 for the three months ended March 31, 2015, and \$298 for the three months ended March 31, 2014, respectively, was recognized as capitalized development and is included in leasehold improvements, property and equipment in the consolidated balance sheet.

6. Earnings Per Share

Basic earnings per share is calculated by dividing income available to common shareholders by the weighted-average number of shares of common stock outstanding during each period. Diluted earnings per share ("diluted EPS") is calculated using income available to common shareholders divided by diluted weighted-average shares of common stock outstanding during each period. Potentially dilutive securities include common shares related to SOSARs and non-vested stock awards (collectively "stock awards"). For the three months ended March 31, 2015 and 2014, 131 and 326 stock awards, respectively, were excluded from the calculation of diluted EPS because they were anti-dilutive. In addition, 304 and 394 stock awards for the three months ended March 31, 2015 and 2014, respectively, were excluded from the calculation of diluted EPS because they were subject to performance conditions.

The following table sets forth the computations of basic and diluted earnings per share:

	Three months ended March 31	
	2015	2014
Net income	\$ 122,641	\$ 83,069
Shares:		
Weighted average number of common shares outstanding	31,036	31,061
Dilutive stock awards	556	425
Diluted weighted average number of common shares outstanding	31,592	31,486
Basic earnings per share	\$ 3.95	\$ 2.67
Diluted earnings per share	\$ 3.88	\$ 2.64

7. Commitments and Contingencies

Notices of Inspection of Work Authorization Documents and Related Civil and Criminal Investigations

Following an inspection during 2010 by the U.S. Department of Homeland Security, or DHS, of the work authorization documents of the Company's restaurant employees in Minnesota, the Immigration and Customs Enforcement arm of DHS, or ICE, issued to the Company a Notice of Suspect Documents identifying a large number of employees who, according to ICE and notwithstanding the Company's review of work authorization documents for each employee at the time they were hired, appeared not to be authorized to work in the U.S. The Company

Table of Contents

approached each of the named employees to explain ICE's determination and afforded each employee an opportunity to confirm the validity of their original work eligibility documents, or provide valid work eligibility documents. Employees who were unable to provide valid work eligibility documents were terminated in accordance with the law. In December 2010, the Company was also requested by DHS to provide the work authorization documents of restaurant employees in the District of Columbia and Virginia, and the Company provided the requested documents in January 2011. The Company subsequently received requests from the office of the U.S. Attorney for the District of Columbia for work authorization documents covering all of the Company's employees since 2007, plus employee lists and other documents concerning work authorization. The Company believes its practices with regard to the work authorization of its employees, including the review and retention of work authorization documents, are in compliance with applicable law. However, the termination of large numbers of employees in a short period of time does disrupt restaurant operations and results in a temporary increase in labor costs as new employees are trained.

In May 2012, the U.S. Securities and Exchange Commission notified the Company that it is conducting a civil investigation of the Company's compliance with employee work authorization verification requirements and its related disclosures and statements, and the office of the U.S. Attorney for the District of Columbia advised the Company that its investigation has broadened to include a parallel criminal and civil investigation of the Company's compliance with federal securities laws. The Company intends to continue to fully cooperate in the government's investigations. It is not possible at this time to determine whether the Company will incur, or to reasonably estimate the amount of, any fines, penalties or further liabilities in connection with these matters.

Miscellaneous

The Company is involved in various other claims and legal actions that arise in the ordinary course of business. The Company does not believe that the ultimate resolution of these actions will have a material adverse effect on the Company's financial position, results of operations, liquidity or capital resources. However, a significant increase in the number of these claims, or one or more successful claims under which the Company incurs greater liabilities than the Company currently anticipates, could materially and adversely affect the Company's business, financial condition, results of operations and cash flows.

Table of Contents

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary Note Regarding Forward-Looking Statements

Certain statements in this report, including projections of our number and type of new restaurant openings, comparable restaurant sales increases, food cost trends, and labor, marketing, other operating, and general and administrative expenses, as well as discussion of possible stock repurchases and estimates of our effective tax rates, are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. We use words such as “anticipate”, “believe”, “could”, “should”, “estimate”, “expect”, “intend”, “may”, “predict”, “project”, “target”, and similar phrases, including references to assumptions, to identify forward-looking statements. These forward-looking statements are based on information available to us as of the date any such statements are made, and we assume no obligation to update these forward-looking statements. These statements are subject to risks and uncertainties that could cause actual results to differ materially from those described in the statements. These risks and uncertainties include, but are not limited to, the risk factors described in our annual report on Form 10-K for the year ended December 31, 2014, as updated in Part II, Item 1.A of this report.

Overview

Chipotle operates fresh Mexican food restaurants serving burritos, tacos, burrito bowls (a burrito without the tortilla) and salads. We began with a simple philosophy: demonstrate that food served fast doesn’t have to be a traditional “fast-food” experience. We do this by avoiding a formulaic approach when creating our restaurant experience, looking to fine dining restaurants for inspiration. We use high-quality raw ingredients, classic cooking methods and distinctive interior design, and have friendly people to take care of each customer—features that are more frequently found in the world of fine dining. Our approach is also guided by our belief in an idea we call “Food With Integrity.” Our objective is to find the highest quality ingredients we can—ingredients that are grown or raised with respect for the environment, animals and people who grow or raise the food. A similarly focused people culture, with an emphasis on identifying and empowering top performing employees, enables us to develop future leaders from within.

2015 Highlights

Restaurant Development. As of March 31, 2015, we had 1,831 restaurants in operation, including 1,800 Chipotle restaurants throughout the United States, with an additional nine in Canada, six in England, three in France, and one in Germany. Our restaurants also included ten ShopHouse Southeast Asian Kitchen restaurants, serving fast-casual, Asian inspired cuisine, and two Pizzeria Locale restaurants, a fast-casual pizza concept in which we are an investor through a consolidated entity. New restaurants have contributed substantially to our revenue growth and we opened 49 restaurants during the three months ended March 31, 2015. We expect to open between 190 and 205 new restaurants for the full year 2015, including a small number of international, ShopHouse and Pizzeria Locale restaurants.

Sales Growth. Average restaurant sales were \$2.516 million as of March 31, 2015. We define average restaurant sales as the average trailing 12-month sales for restaurants in operation for at least 12 full calendar months. Our comparable restaurant sales increased 10.4% for the first three months of 2015. Comparable restaurant sales represent the change in period-over-period sales for restaurants beginning in their 13th full month of operation. Comparable restaurant sales increases in the first three months of 2015 were driven primarily by an increase in average check, including a 6.1% impact from the nationwide menu price increase taken during the second quarter of 2014, and to a lesser extent from increases in customer visits. We believe that weather, combined with the pork supply shortage discussed in the section below, resulted in a reduction of comparable restaurant sales increases of approximately 1-2% during the first

quarter of 2015. We expect our 2015 full year comparable restaurant sales increases to be in the low to mid-single digits, including a continued negative impact in the range of up to 2% until we have enough pork to supply all of our restaurants.

Catering service is available in Chipotle restaurants throughout the U.S, except New York City. Catering represented slightly more than 1% of company sales in the first three months of 2015.

Food With Integrity. In all of our restaurants, we endeavor to serve only meats that were raised without the use of non-therapeutic antibiotics or added hormones, and in accordance with criteria we've established in an effort to improve sustainability and promote animal welfare. We brand these meats as "Responsibly Raised®." In addition, a portion of some of the produce items we serve is organically grown, and/or sourced locally when in season (by which we mean within 350 miles of the restaurant where it is served), and a portion of the beans we serve is organically grown and a portion is grown using conservation tillage methods that improve soil conditions, reduce erosion and help preserve the environment in which they are grown. The sour cream and cheese we buy is made with milk that comes from cows that are not given rBGH. Milk used to make much of our cheese and all of our sour cream is sourced from pasture-based dairies that provide an even higher standard of animal welfare by providing outdoor access for their cows. Further, we disclose on our website which ingredients contain genetically modified organisms, or GMOs, and we are working to replace ingredients containing GMOs in our food (not including beverages) with non-GMO ingredients. While the meat and poultry we serve is not genetically modified, the animals are likely fed a diet containing GMOs. We will continue to search for quality ingredients that not only taste delicious, but also benefit local farmers or the environment, or otherwise benefit or improve the sustainability of our supply chain.

Table of Contents

One of our primary goals is for all of our restaurants to continue serving meats that are raised to meet our standards, but we have and will continue to face challenges in doing so. In January 2015, through an ongoing audit of our suppliers, we identified a pork supplier that was not meeting our standards related to the size and condition of the housing offered to some of the pigs, so we suspended our purchases from this supplier. Without this supply, we cannot get enough pork that meets our standards for all of our restaurants and we will not be able to serve carnitas in many of our U.S. restaurants (with more than one-third of our restaurants not serving carnitas) until we can find additional sources meeting our standards to make up the shortfall. Some of our restaurants may also periodically serve conventionally raised beef or chicken in the future due to supply constraints. When we become aware that one or more of our restaurants will serve conventionally raised meat, we clearly and specifically disclose this temporary change on signage in each affected restaurant, so customers can avoid those meats if they choose to do so.

Our food costs decreased as a percentage of revenue for the first three months of 2015 as compared to 2014 due to the impact of the menu price increase implemented in the second quarter of 2014, as well as relief in dairy prices, partially offset by higher beef and tortilla costs. We expect food costs as a percentage of revenue for the full year 2015 will increase slightly.

Stock-Based Compensation Expense. For the full year 2015, we expect non-cash stock-based compensation expense will be approximately \$80 million, a decrease of \$18 million from 2014. We restructured our executive officer equity compensation program, contributing to an expected decrease of \$33 million. We expect this benefit will be partially offset by an increase of \$15 million for increased grants to staff and restaurant employees and a higher estimated grant date fair value. The majority of the stock-based compensation expense is recognized in general and administrative expense with a smaller portion impacting labor costs.

Stock Repurchases. In accordance with stock repurchases authorized by our Board of Directors, we purchased stock with an aggregate total repurchase price of \$23.2 million during the first three months of 2015. As of March 31, 2015, \$179.0 million was available to be repurchased under the current repurchase authorizations announced on April 17, 2014 and February 3, 2015. We have entered into an agreement with a broker under SEC rule 10b5-1(c), authorizing the broker to make open market purchases of common stock from time to time, subject to market conditions. The existing repurchase agreement and the Board's authorization of the repurchases may be modified, suspended, or discontinued at any time.

Restaurant Activity

The following table details restaurant unit data for the periods indicated.

	For the three months ended March 31	
	2015	2014
Beginning of period	1,783	1,595
Openings	49	44
Relocations	(1)	(2)
Total restaurants at end of period	1,831	1,637
Results of Operations		

Our results of operations as a percentage of revenue and period-over-period changes are discussed in the following section. As our business grows and we open more restaurants and hire more employees, our aggregate restaurant operating costs increase.

Revenue

	For the three months ended March 31		%
	2015	2014	increase
	(dollars in millions)		
Revenue	\$ 1,089.0	\$ 904.2	20.4%
Average restaurant sales	\$ 2.516	\$ 2.226	13.0%
Comparable restaurant sales increases	10.4%	13.4%	
Number of restaurants as of the end of the period	1,831	1,637	11.9%
Number of restaurants opened in the period, net of relocations	48	42	

The significant factors contributing to our increase in revenue were new restaurant openings and comparable restaurant sales increases. For the three months ended March 31, 2015, revenue from restaurants not yet in the comparable restaurant base contributed \$93.9 million of the increase in sales, of which \$11.8 million was attributable to restaurants opened in 2015. Comparable restaurant sales increases contributed \$90.9

Table of Contents

million of the increase in revenue for the first quarter of 2015. Comparable restaurant sales increases were driven primarily by an increase in average check, including the impact of the menu price increase implemented in the second quarter of 2014, and to a lesser extent an increase in customer visits.

Food, Beverage and Packaging Costs

	For the three months ended March 31			%
	2015	2014		increase
	(dollars in millions)			
Food, beverage and packaging	\$ 369.0	\$ 311.8		18.4%
As a percentage of revenue	33.9%	34.5%		

Food, beverage and packaging costs decreased as a percentage of revenue for the three months ended March 31, 2015 as a result of the impact of the menu price increase implemented in the second quarter of 2014, as well as relief in dairy prices, offset by increased beef and tortilla costs. We expect food costs as a percentage of revenue for the full year 2015 will increase slightly compared to the first quarter of 2015.

Labor Costs

	For the three months ended March 31			%
	2015	2014		increase
	(dollars in millions)			
Labor costs	\$ 244.2	\$ 208.2		17.3%
As a percentage of revenue	22.4%	23.0%		

Labor costs as a percentage of revenue decreased in the three months ended March 31, 2015 primarily due to the benefit of higher average restaurant sales, including the impact of menu price increases, partially offset by wage inflation and increased number of managers and crew in each of our restaurants.

Occupancy Costs

For the three
months
ended March 31 %
2015 2014 increase

(dollars in
millions)

Occupancy costs	\$ 63.2	\$ 54.8	15.2%
As a percentage of revenue	5.8%	6.1%	

Occupancy costs as a percentage of revenue decreased in the three months ended March 31, 2015 primarily due to the benefit of higher average restaurant sales on a partially fixed-cost base.

Other Operating Costs

For the three
months
ended March 31 %
2015 2014 increase

(dollars in millions)

Other operating costs	\$ 113.5	\$ 95.1	19.3%
As a percentage of revenue	10.4%	10.5%	

Other operating costs include, among other items, marketing and promotional costs, bank and credit card fees, and restaurant utilities and maintenance costs. Other operating costs as a percentage of revenue decreased for the three months ended March 31, 2015 due primarily to lower marketing spend as a percentage of revenue. While marketing costs fluctuate significantly each quarter during the year, for the full year 2015, we expect other operating costs as a percentage of revenue to increase compared to the first quarter of 2015.

Table of Contents

General and Administrative Expenses

	For the three months ended March 31			%
	2015	2014		decrease
	(dollars in millions)			
General and administrative expense	\$ 63.1	\$ 66.9		(5.8%)
As a percentage of revenue	5.8%	7.4%		

The decrease in general and administrative expenses in dollar terms in the three months ended March 31, 2015 primarily resulted from decreased non-cash stock-based compensation expense due to a change in the structure of our executive compensation, partially offset by increased wages and benefits as we grew. We expect general and administrative expenses in dollar terms for the full year 2015 to remain generally consistent with \$273.9 million recognized in the full year 2014, due primarily to decreased non-cash stock-based compensation expense and costs associated with our biennial All Managers' Conference held in the 2014 comparable period, offset by higher expenses as we grow.

Depreciation and Amortization

	For the three months ended March 31			%
	2015	2014		increase
	(dollars in millions)			
Depreciation and amortization	\$ 30.6	\$ 25.8		19.0%
As a percentage of revenue	2.8%	2.8%		

The increase in depreciation and amortization in dollar terms was primarily due to restaurants opened in 2015 and 2014. Depreciation and amortization remained consistent as a percent of revenue.

Loss on Disposal of Assets

%

	For the three months ended March 31		
	2015	2014	increase
	(dollars in millions)		
Loss on disposal of assets	\$ 4.2	\$ 1.6	169.4%
As a percentage of revenue	0.4%	0.2%	

The increase in loss on disposal of assets in dollar terms was primarily due to a write-off of \$2.8 million that was recognized during the first quarter, related to an internally developed software program that we chose not to implement.

Provision for Income Taxes

	For the three months ended March 31		
	2015	2014	% increase
	(dollars in millions)		
Provision for income taxes	\$ 76.4	\$ 53.3	43.4%
Effective tax rate	38.4%	39.1%	

For the full year 2015, we estimate our effective tax rate will be 38.7% compared to 37.6% in 2014. The 2014 rate benefitted 1.0% from federal and state credits that we recognized from filing 2013 tax returns and also from certain federal tax credits that have not been renewed for 2015. The increase in the estimated rate is partially offset by a decrease in the estimated state tax rate for 2015.

Table of Contents

Seasonality

Seasonal factors cause our profitability to fluctuate from quarter to quarter. Historically, our average daily restaurant sales are lower, and our net income is generally lower in the first and fourth quarters due, in part, to the holiday season and because fewer people eat out during periods of inclement weather (the winter months) than during periods of mild or warm weather (the spring, summer and fall months). Other factors also have a seasonal effect on our results. For example, restaurants located near colleges and universities generally do more business during the academic year. Seasonal factors, however, might be moderated or outweighed by other factors that may influence our quarterly results, such as fluctuations in food or packaging costs or the timing of menu price increases. The number of trading days can also affect our quarterly results. Overall, on an annual basis, changes in trading days do not have a significant impact on our results.

Our quarterly results are also affected by other factors such as the amount and timing of non-cash stock-based compensation expense, the number of new restaurants opened in a quarter, timing of marketing and promotional spend and planned events, such as our biennial All Managers' Conference. New restaurants typically have lower margins following opening as a result of the expenses associated with opening new restaurants and their operating inefficiencies in the months immediately following opening. Accordingly, results for a particular quarter are not necessarily indicative of results to be expected for any other quarter or for any year.

Liquidity and Capital Resources

Our primary liquidity and capital requirements are for new restaurant construction, working capital and general corporate needs. We have a cash and short-term investment balance of \$890.5 million that we expect to utilize, along with cash flow from operations, to provide capital to support the growth of our business (primarily through opening restaurants), to repurchase additional shares of our common stock subject to market conditions (including up to \$179.0 million in repurchases under programs authorized as of March 31, 2015), to maintain our existing restaurants, and for general corporate purposes. We also have a long term investments balance of \$531.1 million, which consists of U.S. treasury notes and certificate of deposit products with maturities up to approximately 2 years. We believe that cash from operations, together with our cash and investment balances, will be enough to meet ongoing capital expenditures, working capital requirements and other cash needs for the foreseeable future.

We haven't required significant working capital because customers pay using cash or credit cards and because our operations do not require significant receivables, nor do they require significant inventories due, in part, to our use of various fresh ingredients. In addition, we generally have the right to pay for the purchase of food, beverage and supplies sometime after the receipt of those items, generally within ten days, thereby reducing the need for incremental working capital to support growth.

Off-Balance Sheet Arrangements

As of March 31, 2015 we had no off-balance sheet arrangements or obligations.

Critical Accounting Estimates

Critical accounting estimates are those that we believe are both significant and that require us to make difficult, subjective or complex judgments, often because we need to estimate the effect of inherently uncertain matters. We base our estimates and judgments on historical experiences and various other factors that we believe to be appropriate under the circumstances. Actual results may differ from these estimates, and we might obtain different estimates if we

used different assumptions or conditions. We had no significant changes in our critical accounting estimates since our last annual report. Our critical accounting estimates are identified and described in our annual report on Form 10-K for the year ended December 31, 2014.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Commodity Price Risks

We are exposed to commodity price risks. Many of the ingredients we use to prepare our food, as well as our packaging materials, are commodities or ingredients that are affected by the price of other commodities, exchange rates, foreign demand, weather, seasonality, production, availability and other factors outside our control. We work closely with our suppliers and use a mix of forward pricing protocols under which we agree with our supplier on fixed prices for deliveries at some time in the future, fixed pricing protocols under which we agree on a fixed price with our supplier for the duration of that protocol, and formula pricing protocols under which the prices we pay are based on a specified formula related to the prices of the goods, such as spot prices. However, a majority of the dollar value of goods purchased by us is effectively at spot prices. Generally our pricing protocols with suppliers can remain in effect for periods ranging from one to 18 months, depending on the outlook for prices of the particular ingredient. In several cases, we have minimum purchase obligations. We've tried to increase, where necessary, the number of suppliers for our ingredients, which we believe can help mitigate pricing volatility, and we follow industry news, trade issues, exchange rates, foreign demand, weather, crises and other world events that may affect our ingredient prices. Increases in ingredient prices could adversely affect our results if we choose not to increase menu prices at the same pace for competitive or other reasons.

Table of Contents

Changing Interest Rates

We are also exposed to interest rate risk through fluctuations of interest rates on our investments. Changes in interest rates affect the interest income we earn, and therefore impact our cash flows and results of operations. As of March 31, 2015, we had \$1.0 billion in investments and interest-bearing cash accounts, including insurance related restricted trust accounts classified in other assets, and \$380.1million in accounts with an earnings credit we classify as interest income, which combined bear a weighted-average interest rate of 0.45%.

Foreign Currency Exchange Risk

A portion of our operations consists of activities outside of the U.S. and we have currency risk on the transactions in other currencies and translation adjustments resulting from the conversion of our international financial results into the U.S. dollar. However, a substantial majority of our operations and investment activities are transacted in the U.S. and therefore our foreign currency risk is limited at this date.

ITEM 4.CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) that are designed to ensure that information required to be disclosed in Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms, and that such information is accumulated and communicated to our management, including our Co-Chief Executive Officers and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

As of March 31, 2015, we carried out an evaluation, under the supervision and with the participation of our management, including our Co-Chief Executive Officers and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our Co-Chief Executive Officers and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

During the quarter ended March 31, 2015, we implemented a new human resource information and payroll management system. We will continue to integrate the software with our processes, systems, and controls in future periods. There were no other changes during the three months ended March 31, 2015 in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

PART II

ITEM 1.LEGAL PROCEEDINGS

For information regarding legal proceedings, see Note 7 “Commitments and Contingencies” in our notes to condensed consolidated financial statements included in Item 1. “Financial Statements and Supplementary Data.”

ITEM 1A.RISK FACTORS

There have been no material changes in our risk factors since our annual report on Form 10-K for the year ended December 31, 2014.

Table of Contents

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Purchases of Equity Securities by the Issuer

The table below reflects shares of common stock we repurchased during the first quarter of 2015.

	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
January	6,019	\$ 703.30	6,019	\$ 97,977,234
Purchased 1/1 through 1/31				
February	10,959	\$ 672.95	10,959	190,602,396 \$ (2)
Purchased 2/1 through 2/28				
March	17,450	\$ 667.02	17,450	178,962,840 \$ (2)
Purchased 3/1 through 3/31				
Total	34,428	\$ 675.25	34,428	178,962,840 \$ (2)

(1) Shares were repurchased pursuant to a repurchase program announced on April 17, 2014. Repurchases under the program are limited to \$100 million in total repurchase price, and there is no expiration date. Authorization of the ongoing repurchase program may be modified, suspended, or discontinued at any time.

(2) This column includes \$100 million in authorized repurchases announced on February 03, 2015.

ITEM 3.DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4.MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5.OTHER INFORMATION

None.

ITEM 6.EXHIBITS

The exhibits listed in the exhibit index following the signature page are filed or furnished as part of this report.
