**MOODY S INVESTOR SERVICE BANK RATING ANNOUNCEMENT FOR AUSTRALIA**

Attached is a statement released by Moody s Investor Service.

MJ HEALEY

Group Company Secretary

National Australia Bank Limited

---

**Rating Action:**

**Moody's announces bank rating actions for Australia resulting from implementation of JDA and BFSR methodologies**

New York, May 04, 2007 Moody's Investors Service today published the rating results for banks in Australia as part of the application of its refined joint default analysis (JDA) and updated bank financial strength rating (BFSR) methodologies.

BFSRs evaluate the stand-alone or intrinsic financial strength of banks without reference to external support factors. BFSRs are the starting point of Moody's bank credit analysis, and are an important determinant of Moody's bank deposit and debt ratings.

Moody's then uses its JDA methodology to incorporate the potential for external support into a bank's local currency deposit rating. The potential for external support can reduce the riskiness of a bank's deposit and debt obligations; however, such support is often uncertain. Moody's uses conservative support assumptions and a limited number of support levels to ensure that sufficient weight is given to a bank's intrinsic financial strength in its bank deposit and debt ratings.

Moody's uses deposit ratings to determine bank debt ratings based on its notching guidelines for bank securities. Ratings for foreign currency obligations are determined after considering Moody's country ceilings for foreign currency ratings.

The methodologies are being implemented country by country, with results being announced on a weekly basis. Results for those banks with a parent bank located in another country where the methodologies have not yet been implemented will be concluded at the same time as the parent.

The updated BFSR methodology led to one notch upgrades of the BFSRs for ten Australian banks, reflecting the solid franchises and good financial fundamentals many of these banks possess relative to global peers.

Moody's assesses systemic support levels for Australian banks using its high country support guideline. This guideline takes into consideration the historic evidence of support for banks, as well as the size, strength, and degree of fragmentation of the banking system. Based on this framework, the deposit ratings of the four largest banks, Australia and New Zealand Banking Group, Commonwealth Bank of Australia, National Australia Bank, and Westpac Banking Corporation, were raised by 2 notches, to Aa1. This reflected the banks' unchanged BFSRs of B as well as Moody's assessment of their very high probability of systemic support given the banks' importance to the Australian financial system. The ratings of five other Australian banks were also raised by two notches, although in those cases the 2 notches reflected both a higher BFSR as well as Moody's assessment of the likelihood of systemic or parental support for those banks. And the ratings of five Australian banks were raised by one notch, in most cases due solely to a higher BFSR.

This press release lists the names of issuers in Australia whose ratings have been changed, affirmed, or put on review. Deposit ratings are listed for those banks whose deposit ratings have changed. To view all ratings changes and other documents explaining Moody's bank rating methodologies, please go to [www.moody.com/JDABanks](http://www.moody.com/JDABanks).

The specific ratings changes are as follows:

Adelaide Bank Limited

- BSFR has been upgraded to C from C-.

- Foreign Currency Deposit Ratings have been upgraded to A2/Prime-1 from Baa1/Prime-2.

## Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to A2 from Baa2.
- Foreign Currency Debt Ratings for senior debt obligations have been upgraded to A2/Prime-1 from Baa2/Prime-2.
- Local Currency Deposit Ratings of A2/Prime-1 have been assigned.
- All ratings are assigned stable outlooks.

### AMP Bank Limited

- BSFR has been upgraded to D+ from D.
- Foreign Currency Deposit Ratings remain unchanged at A2/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations remains unchanged at A2.
- Local Currency Deposit Ratings of A2/Prime-1 have been assigned.
- All ratings are assigned stable outlooks.

### Arab Bank Australia Limited

- BSFR has been upgraded to D+ from D.
- Foreign Currency Deposit Ratings have been upgraded to A3/Prime-1 from Baa1/Prime-2.
- Local Currency Deposit Ratings of A3/Prime-1 have been assigned.
- All ratings are assigned stable outlooks.

### Australia and New Zealand Banking Group Limited

- BSFR remains unchanged at B.
- Foreign Currency Deposit Ratings have been upgraded to Aa1/Prime-1 from Aa3/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to Aa1 from Aa3.
- Foreign Currency Debt Ratings for senior debt obligations have been upgraded to Aa1/Prime-1 from Aa3/Prime-1.
- Local Currency Deposit Ratings of Aa1/Prime-1 have been assigned.
- All ratings are assigned stable outlooks.

### Bank of Queensland Limited

- BSFR has been upgraded to C from C-.
- Local Currency Deposit Ratings have been upgraded to A2/Prime-1 from Baa1/Prime-2.
- Foreign Currency Deposit Ratings have been upgraded to A2/Prime-1 from Baa1/Prime-2.
- The Long Term Foreign Currency Debt Rating for senior debt obligations has been upgraded to A2 from

## Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

Baa2.

- All ratings are assigned stable outlooks.

Bank of Western Australia Limited

- BSFR remains unchanged at C.
- The Long Term Foreign Currency Debt Rating for senior debt obligations has been upgraded to Aa3 from A1.
- Local Currency Deposit Ratings of Aa3/Prime-1 have been assigned.
- Foreign Currency Deposit Ratings of Aa3/Prime-1 have been assigned.
- A positive outlook has been assigned to the BFSR while all other ratings (which would require a two notch BFSR upgrade to move) are assigned a stable outlook.

Commonwealth Bank of Australia

- BSFR remains unchanged at B.
- Foreign Currency Deposit Ratings have been upgraded to Aa1/Prime-1 from Aa3/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to Aa1 from Aa3.
- Foreign Currency Debt Ratings for senior debt obligations have been upgraded to Aa1/Prime-1 from Aa3/Prime-1.
- Local Currency Deposit Ratings of Aa1/Prime-1 have been assigned.
- All ratings are assigned stable outlooks.

Heritage Building Society

- BSFR has been upgraded to C+ from C.
- Foreign Currency Deposit Ratings have been upgraded to A2/Prime-1 from A3/Prime-2.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to A2 from Baa1.
- Local Currency Deposit Ratings of A2/Prime-1 have been assigned.
- All ratings are assigned stable outlooks.

HSBC Bank Australia Limited

- BSFR has been upgraded to C- from D+.
- Foreign Currency Deposit Ratings remain unchanged at Aa3/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations remains unchanged at Aa3.
- Foreign Currency Debt Ratings for senior debt obligations remain unchanged at Aa3/Prime-1.

## Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

- Local Currency Deposit Ratings of Aa3/Prime-1 have been assigned.
- A positive outlook has been assigned to the BFSR while all other ratings (which would require a two notch BFSR upgrade to move) are assigned a stable outlook.

### Investec Bank (Australia) Limited

- BSFR has been upgraded to C- from D+.
- Foreign Currency Deposit Ratings have been upgraded to A3/Prime-1 from Baa2/Prime-2.
- Local Currency Deposit Ratings of A3/Prime-1 have been assigned.
- All ratings are assigned stable outlooks.

### Macquarie Bank Limited

- BSFR remains unchanged at C+.
- Local Currency Deposit Ratings have been upgraded to A1/Prime-1 from A2/Prime-1.
- Foreign Currency Deposit Ratings have been upgraded to A1/Prime-1 from A2/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to A1 from A2.
- Foreign Currency Debt Ratings for senior debt obligations have been upgraded to A1/Prime-1 from A2/Prime-1.
- All ratings are assigned stable outlooks.

### National Australia Bank Limited

- BSFR remains unchanged at B.
- Foreign Currency Deposit Ratings have been upgraded to Aa1/Prime-1 from Aa3/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to Aa1 from Aa3.
- Foreign Currency Debt Ratings for senior debt obligations have been upgraded to Aa1/Prime-1 from Aa3/Prime-1.
- Local Currency Deposit Ratings of Aa1/Prime-1 have been assigned.
- All ratings are assigned stable outlooks.

### Newcastle Permanent Building Society

- BSFR has been upgraded to C+ from C.
- Local Currency Deposit Ratings have been upgraded to A2/Prime-1 from A3/Prime-2.
- Foreign Currency Deposit Ratings have been upgraded to A2/Prime-1 from A3/Prime-2.
- All ratings are assigned stable outlooks.

### St.George Bank Limited

## Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

- BSFR has been upgraded to B from B-.
- Foreign Currency Deposit Ratings have been upgraded to Aa2/Prime-1 from A1/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to Aa2 from A1.
- Foreign Currency Debt Ratings for senior debt obligations have been upgraded to Aa2/Prime-1 from A1/Prime-1.
- Local Currency Deposit Ratings of Aa2/Prime-1 have been assigned.
- All ratings are assigned stable outlooks.

### Suncorp-Metway Limited

- BSFR has been upgraded to B- from C+.
- The Long Term Local Currency Deposit Rating has been upgraded to Aa3 from A2.
- Foreign Currency Deposit Ratings have been upgraded to Aa3/Prime-1 from A2/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to Aa3 from A2.
- The Long Term Foreign Currency Debt Rating for senior debt obligations has been upgraded to Aa3 from A2.
- A Short Term Local Currency Deposit Rating of Prime-1 has been assigned.
- All ratings are assigned stable outlooks.

### Westpac Banking Corporation

- BSFR remains unchanged at B.
- Foreign Currency Deposit Ratings have been upgraded to Aa1/Prime-1 from Aa3/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to Aa1 from Aa3.
- Foreign Currency Debt Ratings for senior debt obligations have been upgraded to Aa1/Prime-1 from Aa3/Prime-1.
- Local Currency Deposit Ratings of Aa1/Prime-1 have been assigned.
- All ratings are assigned stable outlooks.

## ABOUT MOODY'S BANK RATINGS

### Bank Financial Strength Rating

Moody's Bank Financial Strength Ratings (BFSRs) represent Moody's opinion of a bank's intrinsic safety and soundness and, as such, exclude certain external credit risks and credit support elements that are addressed by Moody's Bank Deposit Ratings. Bank Financial Strength Ratings do not take into account the probability that the bank will receive such external support, nor do they address risks arising from sovereign actions that may interfere with a bank's ability to honor its domestic or foreign currency obligations. Factors considered in the assignment of Bank Financial Strength Ratings include bank-specific elements such as financial fundamentals, franchise value, and business and asset diversification. Although Bank Financial Strength Ratings exclude the external factors specified above, they do take into account other risk factors in the bank's

operating environment, including the strength and prospective performance of the economy, as well as the structure and relative fragility of the financial system, and the quality of banking regulation and supervision.

#### Global Local Currency Deposit Rating

A deposit rating, as an opinion of relative credit risk, incorporates the Bank Financial Strength Rating as well as Moody's opinion of any external support. Specifically, Moody's Bank Deposit Ratings are opinions of a bank's ability to repay punctually its deposit obligations. As such, Moody's Global Local Currency Bank Deposit Ratings are intended to incorporate those aspects of credit risk relevant to the prospective payment performance of rated banks with respect to local currency deposit obligations, and includes: intrinsic financial strength and both implicit and explicit external support elements. Moody's Bank Deposit Ratings do not take into account the benefit of deposit insurance schemes which make payments to depositors, but they do recognize the potential support from schemes that may provide assistance to banks directly.

#### Foreign Currency Deposit Rating

Moody's ratings on foreign currency bank obligations derive from the bank's local currency rating for the same class of obligation. The implementation of JDA for banks can lead to a high local currency ratings for certain banks, which could also produce high foreign currency ratings. Nevertheless, it should be reminded that foreign currency deposit ratings are in all cases constrained by the country ceiling for foreign currency bank deposits. This may result in the assignment of a different, and typically lower, rating for the foreign currency deposits relative to the bank's rating for local currency obligations.

#### Foreign Currency Debt Rating

Foreign currency debt ratings are derived from the bank's local currency debt rating for the same class of obligation. In a similar way to foreign currency deposit ratings, foreign currency debt obligations may also be constrained by the country ceiling for foreign currency bonds and notes, however, in some cases the ratings on foreign currency debt obligations may be allowed to pierce the foreign currency ceiling. A particular mix of rating factors are taken into consideration in order to assess whether a foreign currency bond rating pierces the country ceiling. They include the issuer's global local currency rating, the foreign currency government bond rating, the country ceiling for bonds and the debt's eligibility to pierce that ceiling.

#### National Scale Rating

National scale ratings are intended primarily for use by domestic investors and are not comparable to Moody's globally applicable ratings; rather they address relative credit risk within a given country. An Aaa rating on Moody's National Scale indicates an issuer or issue with the strongest creditworthiness and the lowest likelihood of credit loss relative to other domestic issuers. National Scale Ratings, therefore, rank domestic issuers relative to each other and not relative to absolute default risks. National ratings isolate systemic risks; they do not address loss expectation associated with systemic events that could affect all issuers, even those that receive the highest ratings on the National Scale.

**MOODY S INVESTOR SERVICE BANK RATING ANNOUNCEMENT FOR NEW ZEALAND**

Attached is a statement released by Moody s Investor Service.

MJ HEALEY

Group Company Secretary

National Australia Bank Limited

---

**Rating Action:**

**Moody's Announces Bank Rating Actions for New Zealand resulting from implementation of JDA and BFSR methodologies**

New York, May 04, 2007 Moody's Investors Service today published the rating results for banks in New Zealand as part of the application of its refined joint default analysis (JDA) and updated bank financial strength rating (BFSR) methodologies.

BFSRs evaluate the stand-alone or intrinsic financial strength of banks without reference to external support factors. BFSRs are the starting point of Moody's bank credit analysis, and are an important determinant of Moody's bank deposit and debt ratings.

Moody's then uses its JDA methodology to incorporate the potential for external support into a bank's local currency deposit rating. The potential for external support can reduce the riskiness of a bank's deposit and debt obligations; however, such support is often uncertain. Moody's uses conservative support assumptions and a limited number of support levels to ensure that sufficient weight is given to a bank's intrinsic financial strength in its bank deposit and debt ratings.

Moody's uses deposit ratings to determine bank debt ratings based on its notching guidelines for bank securities. Ratings for foreign currency obligations are determined after considering Moody's country ceilings for foreign currency ratings.

The methodologies are being implemented country by country, with results being announced on a weekly basis. Results for New Zealand banks also incorporate the results of the implementation in Australia, where the parents of all four rated New Zealand banks are located. Moody's has incorporated parental support from their respective parent banks, together with systemic support from New Zealand, into the ratings of all four rated banks.

The updated BFSR methodology led to one notch upgrades the BFSRs of three of the rated New Zealand banks, and a positive outlook being placed on the fourth. These actions reflect the entrenched franchises and good financial resilience that these banks possess relative to their global peers.

Moody's assesses systemic support levels for New Zealand banks using its medium country support guideline. This guideline takes into consideration the historic evidence of support for banks, regulatory policy, as well as the size, strength, and degree of fragmentation of the banking system. In addition, Moody's also factors in the potential for support from the banks' Australian parents, and the significant degree of coordination between Australia and New Zealand at both the regulatory and political levels. Based on this framework, the deposit ratings of the four largest banks, ANZ National Bank, ASB Bank, Bank of New Zealand and Westpac New Zealand Limited, were raised by 1 notch, to Aa2.

This press release lists the names of issuers in New Zealand whose ratings have been changed, affirmed, or put on review. Deposit ratings are listed for those banks whose deposit ratings have changed. To view all ratings changes and other documents explaining Moody's bank rating methodologies, please go to <http://www.moodys.com/JDABanks>.

**ANZ National Bank Limited**

The BFSR of ANZ National Bank Limited remains unchanged at C+, but the rating outlook was revised to Positive.

Based on very high parental support from its parent, the Australia and New Zealand Banking Group Limited, and very high systemic support in New Zealand, Moody's has changed the following ratings:

## Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

- Local Currency Deposit Ratings have been upgraded to Aa2/Prime-1 from Aa3/Prime-1.
- Foreign Currency Deposit Ratings have been upgraded to Aa2/Prime-1 from Aa3/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to Aa2 from Aa3.
- The Long Term Foreign Currency Debt Rating for senior debt obligations has been upgraded to Aa2 from Aa3.
- A positive outlook has been assigned to the BFSR, while all other ratings (which would require a two notch BFSR upgrade to move) are assigned a stable outlook.

### ASB Bank Limited

The BFSR of ASB Bank Limited has been upgraded to B- from C+.

Based on very high parental support from its parent, Commonwealth Bank of Australia Limited, and very high systemic support in New Zealand, Moody's has changed the following ratings:

- Local Currency Deposit Ratings have been upgraded to Aa2/Prime-1 from Aa3/Prime-1.
- Foreign Currency Deposit Ratings have been upgraded to Aa2/Prime-1 from Aa3/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to Aa2 from Aa3.
- Foreign Currency Debt Ratings for senior debt obligations have been upgraded to Aa2/Prime-1 from Aa3/Prime-1.
- All ratings are assigned stable outlooks.

### Bank of New Zealand

The BFSR of Bank of New Zealand has been upgraded to C+ from C.

Based on very high parental support from its parent, National Australia Bank Limited, and very high systemic support in New Zealand, Moody's has changed the following ratings:

- Foreign Currency Deposit Ratings have been upgraded to Aa2/Prime-1 from Aa3/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to Aa2 from Aa3.
- The Short Term Foreign Currency Debt Rating for senior debt obligations remains unchanged at Prime-1.
- Local Currency Deposit Ratings of Aa2/Prime-1 have been assigned.
- All ratings are assigned stable outlooks.

### Westpac New Zealand Limited

The BFSR of Westpac New Zealand Limited has been upgraded to C+ from C.

Based on very high parental support from its parent, Westpac Banking Corporation, and very high systemic support in New Zealand, Moody's has changed the following ratings:

- Local Currency Deposit Ratings have been upgraded to Aa2/Prime-1 from Aa3/Prime-1.

## Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

- Foreign Currency Deposit Ratings have been upgraded to Aa2/Prime-1 from Aa3/Prime-1.
- The Long Term Local Currency Debt Rating for senior debt obligations has been upgraded to Aa2 from Aa3.
- All ratings are assigned stable outlooks.

### ABOUT MOODY'S BANK RATINGS

#### Bank Financial Strength Rating

Moody's Bank Financial Strength Ratings (BFSRs) represent Moody's opinion of a bank's intrinsic safety and soundness and, as such, exclude certain external credit risks and credit support elements that are addressed by Moody's Bank Deposit Ratings. Bank Financial Strength Ratings do not take into account the probability that the bank will receive such external support, nor do they address risks arising from sovereign actions that may interfere with a bank's ability to honor its domestic or foreign currency obligations. Factors considered in the assignment of Bank Financial Strength Ratings include bank-specific elements such as financial fundamentals, franchise value, and business and asset diversification. Although Bank Financial Strength Ratings exclude the external factors specified above, they do take into account other risk factors in the bank's operating environment, including the strength and prospective performance of the economy, as well as the structure and relative fragility of the financial system, and the quality of banking regulation and supervision.

#### Global Local Currency Deposit Rating

A deposit rating, as an opinion of relative credit risk, incorporates the Bank Financial Strength Rating as well as Moody's opinion of any external support. Specifically, Moody's Bank Deposit Ratings are opinions of a bank's ability to repay punctually its deposit obligations. As such, Moody's Global Local Currency Bank Deposit Ratings are intended to incorporate those aspects of credit risk relevant to the prospective payment performance of rated banks with respect to local currency deposit obligations, and includes: intrinsic financial strength and both implicit and explicit external support elements. Moody's Bank Deposit Ratings do not take into account the benefit of deposit insurance schemes which make payments to depositors, but they do recognize the potential support from schemes that may provide assistance to banks directly.

#### Foreign Currency Deposit Rating

Moody's ratings on foreign currency bank obligations derive from the bank's local currency rating for the same class of obligation. The implementation of JDA for banks can lead to a high local currency ratings for certain banks, which could also produce high foreign currency ratings. Nevertheless, it should be reminded that foreign currency deposit ratings are in all cases constrained by the country ceiling for foreign currency bank deposits. This may result in the assignment of a different, and typically lower, rating for the foreign currency deposits relative to the bank's rating for local currency obligations.

#### Foreign Currency Debt Rating

Foreign currency debt ratings are derived from the bank's local currency debt rating for the same class of obligation. In a similar way to foreign currency deposit ratings, foreign currency debt obligations may also be constrained by the country ceiling for foreign currency bonds and notes, however, in some cases the ratings on foreign currency debt obligations may be allowed to pierce the foreign currency ceiling. A particular mix of rating factors are taken into consideration in order to assess whether a foreign currency bond rating pierces the country ceiling. They include the issuer's global local currency rating, the foreign currency government bond rating, the country ceiling for bonds and the debt's eligibility to pierce that ceiling.

#### National Scale Rating

National scale ratings are intended primarily for use by domestic investors and are not comparable to Moody's globally applicable ratings; rather they address relative credit risk within a given country. An Aaa rating on Moody's National Scale indicates an issuer or issue with the strongest creditworthiness and the lowest likelihood of credit loss relative to other domestic issuers. National Scale Ratings, therefore, rank domestic issuers relative to each other and not relative to absolute default risks. National ratings isolate systemic risks; they do not address loss expectation associated with systemic events that could affect all issuers, even those that receive the highest ratings on the National Scale.

**Moody's Announces Bank Rating Actions in the United Kingdom Resulting from Implementation of JDA Methodology in Australia and Russia**

New York, May 04, 2007 Following application of its joint default analysis (JDA) methodology and its updated bank financial strength rating (BFSR) methodology to its bank ratings in Australia and Russia, Moody's published today bank rating results for subsidiaries of those banks located in the United Kingdom.

BFSRs evaluate the stand-alone or intrinsic financial strength of banks without reference to external support factors. BFSRs are the starting point of Moody's bank credit analysis, and are an important determinant of Moody's bank deposit and debt ratings.

Moody's then uses its JDA methodology to incorporate the potential for external support into a bank's local currency deposit rating. The potential for external support can reduce the riskiness of a bank's deposit and debt obligations; however, such support is often uncertain. Moody's uses conservative support assumptions and a limited number of support levels to ensure that sufficient weight is given to a bank's intrinsic financial strength in its bank deposit and debt ratings.

Moody's uses deposit ratings to determine bank debt ratings based on its notching guidelines for bank securities. Ratings for foreign currency obligations are determined after considering Moody's country ceilings for foreign currency ratings.

The methodologies are being implemented country by country, with results being announced on a weekly basis. Results for those banks with a parent bank located in another country where the methodologies have not yet been implemented are concluded at the same time as the parent.

The following banks are subsidiaries of banking groups located in Australia and in Russia. With the implementation of the JDA and BFSR methodologies for banks in those countries, Moody's has now incorporated parental support from the parent bank, along with any other support elements, into the ratings for each of these banks using the JDA methodology.

**Clydesdale Bank plc (United Kingdom)**

The Bank Financial Strength Rating of Clydesdale Bank plc has been affirmed at B-. Based on high support from its parent, Australia's National Australia Bank, and moderate systemic support from the United Kingdom, Moody's has upgraded the bank's long-term foreign currency deposit rating to Aa3 from A1, its senior unsecured debt ratings to Aa3 from A1, and its subordinated debt ratings to A1 from A2. The short-term foreign currency deposit and commercial paper ratings are affirmed at Prime-1. Moody's has also assigned local currency bank deposit ratings of Aa3/Prime-1.

**VTB Bank Europe plc (United Kingdom)**

The Bank Financial Strength Rating of VTB Bank Europe plc has been affirmed at D+. Based on very high support from its parent, Bank VTB JSC of the Russian Federation, and no systemic support from the United Kingdom, Moody's has affirmed the bank's foreign currency deposit ratings at Baa2/Prime-2. Moody's also affirmed the backed senior unsecured debt ratings of VTB Europe Finance BV at Baa2 and the backed subordinated debt rating of VTB Europe Finance BV at Baa3. Moody's has also assigned local currency bank deposit ratings of Baa2/Prime-2.

**ABOUT MOODY'S BANK RATINGS**

**Bank Financial Strength Rating**

## Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

Moody's Bank Financial Strength Ratings (BFSRs) represent Moody's opinion of a bank's intrinsic safety and soundness and, as such, exclude certain external credit risks and credit support elements that are addressed by Moody's Bank Deposit Ratings. Bank Financial Strength Ratings do not take into account the probability that the bank will receive such external support, nor do they address risks arising from sovereign actions that may interfere with a bank's ability to honor its domestic or foreign currency obligations. Factors considered in the assignment of Bank Financial Strength Ratings include bank-specific elements such as financial

---

fundamentals, franchise value, and business and asset diversification. Although Bank Financial Strength Ratings exclude the external factors specified above, they do take into account other risk factors in the bank's operating environment, including the strength and prospective performance of the economy, as well as the structure and relative fragility of the financial system, and the quality of banking regulation and supervision.

#### Global Local Currency Deposit Rating

A deposit rating, as an opinion of relative credit risk, incorporates the Bank Financial Strength Rating as well as Moody's opinion of any external support. Specifically, Moody's Bank Deposit Ratings are opinions of a bank's ability to repay punctually its deposit obligations. As such, Moody's Global Local Currency Bank Deposit Ratings are intended to incorporate those aspects of credit risk relevant to the prospective payment performance of rated banks with respect to local currency deposit obligations, and includes: intrinsic financial strength and both implicit and explicit external support elements. Moody's Bank Deposit Ratings do not take into account the benefit of deposit insurance schemes which make payments to depositors, but they do recognize the potential support from schemes that may provide assistance to banks directly.

#### Foreign Currency Deposit Rating

Moody's ratings on foreign currency bank obligations derive from the bank's local currency rating for the same class of obligation. The implementation of JDA for banks can lead to a high local currency ratings for certain banks, which could also produce high foreign currency ratings. Nevertheless, it should be reminded that foreign currency deposit ratings are in all cases constrained by the country ceiling for foreign currency bank deposits. This may result in the assignment of a different, and typically lower, rating for the foreign currency deposits relative to the bank's rating for local currency obligations.

#### Foreign Currency Debt Rating

Foreign currency debt ratings are derived from the bank's local currency debt rating for the same class of obligation. In a similar way to foreign currency deposit ratings, foreign currency debt obligations may also be constrained by the country ceiling for foreign currency bonds and notes, however, in some cases the ratings on foreign currency debt obligations may be allowed to pierce the foreign currency ceiling. A particular mix of rating factors are taken into consideration in order to assess whether a foreign currency bond rating pierces the country ceiling. They include the issuer's global local currency rating, the foreign currency government bond rating, the country ceiling for bonds and the debt's eligibility to pierce that ceiling.

#### National Scale Rating

National scale ratings are intended primarily for use by domestic investors and are not comparable to Moody's globally applicable ratings; rather they address relative credit risk within a given country. An Aaa rating on Moody's National Scale indicates an issuer or issue with the strongest creditworthiness and the lowest likelihood of credit loss relative to other domestic issuers. National Scale Ratings, therefore, rank domestic issuers relative to each other and not relative to absolute default risks. National ratings isolate systemic risks; they do not address loss expectation associated with systemic events that could affect all issuers, even those that receive the highest ratings on the National Scale.
