Annual supermarket square footage growth -

Labor:

We have negotiations this year covering store associates in Las Vegas, Phoenix, and Portland. Negotiations this year will be challenging as we must have competitive cost structures in each market while meeting our associates' needs for good wages and affordable health care.

2009 Guidance

Annual identical supermarket sales growth  
(excluding fuel sales)

3 5%, assuming product cost inflation of 2 3%

Our ability to achieve sales and earnings per share goals may be affected by: labor disputes, particularly as the Company seeks to manage health care and pension costs; industry consolidation; pricing and promotional activities of existing and new competitors, including non-traditional competitors; our response to these actions; the state of the economy, including interest rates and the inflationary and deflationary trends in certain commodities; weather conditions; stock repurchases; the success of our future growth plans; goodwill impairment; and our ability to generate sales at desirable margins, as well as the success of our programs designed to increase our identical sales without fuel. In addition, any delays in opening new stores, or changes in the economic climate, could cause us to fall short of our sales and earnings targets. Our ability to increase identical supermarket sales could be adversely affected by increased competition and sales shifts to other stores that we operate, as well as increases in sales of our corporate brand products. Our capital expenditures, and the number of projects that we complete, could vary from our expectations if we are unsuccessful in acquiring suitable sites for new stores; development costs exceed those budgeted; or our logistics and technology or store projects are not completed on budget or in the time frame expected. Square footage growth during the year is dependent upon our ability to acquire desirable sites for construction of new facilities, as well as the timing of completion of projects. Any change in tax laws, the regulations related thereto, the applicable accounting rules or standards, or the interpretation thereof by federal, state or local authorities could affect our expected tax rate.
