Ball Corporation

Notes to Unaudited Condensed Consolidated Financial Statements

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements include the accounts of Ball Corporation and its controlled affiliates, including its consolidated variable interest entities (collectively Ball, the company, we or our) and have been prepared by the company. Certain information and footnote disclosures, including critical and significant accounting policies normally included in financial statements prepared in accordance with generally accepted accounting principles, have been condensed or omitted for this presentation.

Results of operations for the periods shown are not necessarily indicative of results for the year, particularly in view of the seasonality in the packaging segments and the irregularity of contract revenues in the aerospace and technologies segment. These unaudited condensed consolidated financial statements and accompanying notes should be read in conjunction with the consolidated financial statements and the notes thereto included in the company's Annual Report on Form 10-K filed on February 28, 2011, pursuant to Section 13 of the Securities Exchange Act of 1934 for the fiscal year ended December 31, 2010 (annual report).

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting periods. These estimates are based on historical experience and various assumptions believed to be reasonable under the circumstances. Actual results could differ from these estimates under different assumptions and conditions. However, we believe that the financial statements reflect all adjustments which are of a normal recurring nature and are necessary to fairly state the results of the interim periods.

Certain prior period amounts have been reclassified in order to conform to the current period presentation. On January 26, 2011, the company's board of directors declared a two-for-one split of Ball's common stock, which was effective on February 15, 2011, for all shareholders of record on February 4, 2011. As a result of the stock split, all 2010 amounts related to shares, share prices and earnings per share have been retrospectively adjusted throughout this report.

2. Accounting Pronouncements

Recently Adopted Accounting Standards

In April 2010, accounting guidance was issued to outline the criteria that should be met for determining when the milestone method of revenue recognition is appropriate in research or development transactions. The new guidance was effective as of January 1, 2011, and did not have a significant impact on Ball's financial statements.

In January 2010, the FASB issued additional guidance regarding fair value measurements, specifically requiring the disclosure of transfers in and out of Level 1 and 2 assets and liabilities (previously only required for those in Level 3) and more specific detailed disclosure of the activity in Level 3 fair value measurements (on a gross basis rather than a net basis). The new guidance also clarifies existing disclosure requirements regarding the level of disaggregation of asset and liability classes, as well as the valuation techniques and inputs used to measure fair value for Level 2 and Level 3 fair value measurements. The disclosure requirement for transfers in and out of Level 1 and 2 assets and liabilities was effective for Ball on January 1, 2010, and had no impact on the unaudited condensed consolidated financial statements. The reporting of Level 3 activity on a gross basis was effective for Ball as of January 1, 2011, and affects only the Level 3 pension plan assets, which do not represent a significant component of the total pension assets.

Table of Contents

Ball Corporation

Notes to Unaudited Condensed Consolidated Financial Statements

2. Accounting Pronouncements (continued)

New Accounting Guidance

In June 2011, accounting guidance was issued requiring that all nonowner changes in stockholders' equity be presented either in a single continuous statement of comprehensive earnings or in two separate but consecutive statements. The guidance also requires the company to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive earnings to net earnings. Ball has historically presented comprehensive earnings within the statement of changes in shareholders' equity and is evaluating which acceptable method of presentation included in the guidance it will adopt once the statement becomes effective for the company on January 1, 2012.

In May 2011, amendments to existing accounting guidance were issued that result in a more consistent definition of fair value and common requirements for measurement of, and disclosure about, fair value between U.S. GAAP and IFRS. The amendments in the new guidance provide explanations on how to measure fair value but do not require additional fair value measurements. The new fair value guidance will be effective for Ball as of January 1, 2012, and is not expected to have a material effect on the company's financial statements or disclosures.

3. Business Segment Information

Ball's operations are organized and reviewed by management along its product lines and presented in the following four reportable segments.

Metal beverage packaging, Americas and Asia: Consists of the metal beverage packaging, Americas, operations in the U.S., Canada and Brazil (see Note 4), and the metal beverage packaging, Asia, operations in the People's Republic of China (PRC). The Americas and Asia segments have been aggregated based on similar economic and qualitative characteristics. The operations in this reporting segment manufacture and sell metal beverage containers, and also manufacture and sell non-beverage plastic containers in the PRC.

Metal beverage packaging, Europe: Consists of operations in several countries in Europe, which manufacture and sell metal beverage containers, extruded aluminum aerosol containers and aluminum slugs.

Edgar Filing: BALL CORP - Form 10-Q

Metal food and household products packaging, Americas: Consists of operations in the U.S., Canada and Argentina, which manufacture and sell metal food, aerosol, paint and general line containers, as well as decorative specialty containers and aluminum slugs.

Aerospace and technologies: Consists of the manufacture and sale of aerospace and other related products and the providing of services used in the defense, civil space and commercial space industries.

The accounting policies of the segments are the same as those in the unaudited condensed consolidated financial statements. A discussion of the company's critical and significant accounting policies can be found in Ball's annual report. The company also has investments in companies in the U.S. and the PRC, which are accounted for under the equity method of accounting and, accordingly, those results are not included in segment sales or earnings. The company's investment in a Brazilian joint venture was previously accounted for using the equity method of accounting. However, during August 2010, Ball acquired an additional economic interest in the joint venture partner and its results are now consolidated.

Total assets	\$ 7,850.4	\$ 6,927.7

4. Acquisitions*Aerocan S.A.S. (Aerocan)*

In January 2011, the company acquired Aerocan for 221.7 million (\$295.2 million) in cash and assumed debt, net of \$26.2 million of cash acquired. Aerocan is a leading European manufacturer of extruded aluminum aerosol containers, and the aluminum slugs used to make them, for customers in the personal care, pharmaceutical, beverage and food industries. It operates three aerosol container manufacturing plants – one each in the Czech Republic, France and the United Kingdom – and is a 51 percent owner of a joint venture aluminum slug plant in France. The four plants employ approximately 560 people. The acquisition of Aerocan allows Ball to enter a growing part of the metal packaging industry and to broaden the company's market development efforts into a new customer base. The acquired operations have been included in the metal beverage packaging, Europe, segment since the acquisition date.

Management's preliminary fair market valuation of acquired assets and liabilities is summarized below. The preliminary valuation was based on market and income approaches.

(\$ in millions)	
Other assets and liabilities, net	\$ 8.3
Property, plant and equipment	95.8
Goodwill	157.7
Other intangible assets	53.9
Deferred taxes	(14.5)

Edgar Filing: BALL CORP - Form 10-Q

Noncontrolling interest		(6.0)
Net assets acquired	\$	295.2

Certain customer contracts, customer relationships, developed technology and assembled workforce were identified as intangible assets by the company and assigned estimated useful lives between 5 and 12 years. The intangible assets are being amortized on a straight-line basis.

Latapack-Ball Embalagens, Ltda. (Latapack-Ball)

In August 2010, the company paid \$46.2 million to acquire an additional 10.1 percent economic interest in its Brazilian beverage packaging joint venture, Latapack-Ball, through a transaction with the joint venture partner, Latapack S.A. This transaction increased the company's overall economic interest in the joint venture to 60.1 percent and expands and strengthens Ball's presence in the growing Brazilian market. As a result of the transaction, Latapack-Ball became a variable interest entity (VIE) under consolidation accounting guidelines with Ball being identified as the primary beneficiary of the VIE and consolidating the joint venture. Latapack-Ball operates two metal beverage can manufacturing plants in Tres Rios, Rio de Janeiro; and Jacarei, Sao Paulo; as well as a can end manufacturing plant in Simoes Filho (Salvador), Bahia. Latapack-Ball has been included in the metal beverage packaging, Americas and Asia, reporting segment.

Table of Contents**Ball Corporation****Notes to Unaudited Condensed Consolidated Financial Statements****4. Acquisitions (continued)**

The following table summarizes the final fair values of the Latapack-Ball assets acquired, liabilities assumed and non-controlling interest recognized, as well as the related investment in Latapack S.A., as of the acquisition date. The valuation was based on market and income approaches.

Cash	\$	69.3
Current assets		84.7
Property, plant and equipment		265.9
Goodwill		100.2
Intangible asset		52.8
Current liabilities		(53.2)
Long-term liabilities		(174.1)
Net assets acquired	\$	345.6
Noncontrolling interest	\$	(132.9)

The customer relationships were identified as an intangible asset by the company and assigned an estimated life of 13.4 years. The intangible asset is being amortized on a straight-line basis.

Neuman Aluminum (Neuman)

In July 2010, the company acquired Neuman for approximately \$62 million in cash and became the leading North American manufacturer of aluminum slugs used to make extruded aerosol cans, beverage bottles, collapsible tubes and technical impact extrusions. Neuman operates two plants, one in the United States and one in Canada, that employ approximately 180 people. The acquisition of Neuman is not material to the metal food and household products packaging, Americas, segment, in which its results of operations have been included since the acquisition date.

Guangdong Jianlibao Group Co., Ltd (Jianlibao)

In June 2010, the company acquired Jianlibao's 65 percent interest in a joint venture metal beverage can and end plant in Sanshui (Foshan), PRC, for \$86.9 million in cash (net of cash acquired) and assumed debt, and also entered into a long-term supply agreement. The company recorded equity earnings of \$22.1 million, which was composed of equity earnings and a gain realized on the fair value of Ball's equity investment as a result of the required purchase accounting. The acquisition of the remaining interest is not material to the metal beverage packaging, Americas and Asia, segment.

5. Dispositions

Plastics Packaging, Americas

In August 2010, the company completed the sale of its plastics packaging, Americas, business to Amcor Limited and received gross proceeds of \$258.7 million, which included \$15 million of contingent consideration recognized at closing and is net of post-closing adjustments of \$21.3 million. The sale of Ball's plastics packaging business included five U.S. plants that manufacture polyethylene terephthalate (PET) bottles and preforms and polypropylene bottles, as well as associated customer contracts and other related assets.

Table of Contents**Ball Corporation****Notes to Unaudited Condensed Consolidated Financial Statements****5. Dispositions (continued)**

The following tables summarize the operating results for the discontinued operations:

(\$ in millions)	Three months ended		Six months ended	
	July 3, 2011	June 27, 2010	July 3, 2011	June 27, 2010
Net sales	\$	\$ 149.3	\$	\$ 263.2
Earnings from operations	\$	\$ 3.4	\$	\$ 1.4
Impairment loss		(107.1)		(107.1)
Loss on sale of business			(0.8)	
Business consolidation activities	(0.5)	(4.4)	(1.8)	(7.3)
Tax benefit	0.2	32.5	1.0	34.3
Discontinued operations, net of tax	\$ (0.3)	\$ (75.6)	\$ (1.6)	\$ (78.7)

6. Business Consolidation Activities**2011***Metal Beverage Packaging, Americas and Asia*

In January 2011, Ball announced plans to close its Torrance, California, beverage can manufacturing plant; relocate a 12-ounce can line from the Torrance plant to its Whitby, Ontario, plant; and expand specialty can production in its Fort Worth, Texas, plant. The company recorded charges of \$10.5 million and \$2.2 million during the first and second quarters of 2011, respectively, in connection with these activities. Of the total \$12.7 million recorded in the first six months, \$8.5 million represented severance, pension and other employee benefits; \$2.3 million represented the impairment of the plant facility to its net realizable value and \$1.9 million represented accelerated depreciation.

An additional \$0.7 million of net charges were recorded in the first six months of 2011, primarily to reflect individually insignificant charges related to previously announced plant closures.

Metal Beverage Packaging, Europe

In connection with the acquisition of Aerocan discussed in Note 4, the company recorded charges totaling \$2.9 million for transaction costs, which are required to be expensed as incurred.

2010

The second quarter of 2010 included a charge of \$3.1 million to establish a reserve associated with an environmental matter at a previously owned facility. Earnings of \$0.5 million and \$0.8 million were recorded in the first and second quarters, respectively, to reflect individually insignificant costs and gains related to previously announced plant closures.

Following is a summary of activity by segment related to business consolidation activities:

(\$ in millions)	Metal Beverage Packaging, Americas & Asia	Metal Food & Household Products Packaging, Americas	Corporate and Other Costs	Total
Balance at December 31, 2010	\$ 7.5	\$ 9.5	\$ 11.0	\$ 28.0
Charges (gains) in continuing operations	13.4			13.4

Net cash surrender value of company and trust-owned life insurance	151.5	131.1
Other	141.7	188.3
	\$ 490.8	\$ 468.5

Total amortization expense of intangible assets amounted to \$5.1 million and \$10.7 million for the three and six months ended July 3, 2011, respectively, and \$2.7 million and \$5.4 million for the comparable periods in 2010, respectively.

Table of Contents**Ball Corporation****Notes to Unaudited Condensed Consolidated Financial Statements****12. Debt**

Long-term debt consisted of the following:

(\$ in millions)	July 3, 2011		December 31, 2010	
	In Local Currency	In U.S. \$	In Local Currency	In U.S. \$
Notes Payable				
7.125% Senior Notes, due September 2016	\$ 375.0	\$ 375.0	\$ 375.0	\$ 375.0
6.625% Senior Notes, due March 2018	\$ 450.0	450.0	\$ 450.0	450.0
7.375% Senior Notes, due September 2019	\$ 325.0	325.0	\$ 325.0	325.0
6.75% Senior Notes, due September 2020	\$ 500.0	500.0	\$ 500.0	500.0
5.75% Senior Notes, due May 2021	\$ 500.0	500.0	\$ 500.0	500.0
Senior Credit Facilities, due December 2015 (at variable rates)				
Term A Loan, U.S. dollar denominated	\$ 200.0	200.0	\$ 200.0	200.0
Term B Loan, British sterling denominated	£ 51.0	82.0	£ 51.0	78.9
Term C Loan, euro denominated	100.0	145.3	100.0	132.5
Euro multi-currency revolver borrowings	292.0	424.2		
Latapack-Ball Notes Payable (at variable rates, due in October 2017)	\$ 135.0	135.0	\$ 135.0	135.0
Industrial Development Revenue Bonds				
Floating rates due through 2011	\$ 5.4	5.4	\$ 5.4	5.4
Other (including discounts and premiums)	Various	43.3	Various	34.3
		3,185.2		2,736.1
Less: Current portion of long-term debt		(60.3)		(34.5)
		\$ 3,124.9		\$ 2,701.6

The senior credit facilities bear interest at variable rates and include the term loans described in the table above, as well as (1) a multi-currency, long-term revolving credit facility that provides the company with up to the U.S. dollar equivalent of \$850 million and (2) a French multi-currency revolving credit facility that provides the company with up to the U.S. dollar equivalent of \$150 million. The revolving credit facilities expire in December 2015. The Latapack-Ball debt facilities contain various covenants and restrictions but are non-recourse to Ball Corporation and its wholly owned subsidiaries.

At July 3, 2011, taking into account outstanding letters of credit, approximately \$553 million was available under the company's committed multi-currency revolving credit facilities, which are available until December 2015. In addition to the long-term committed credit facilities, the company had approximately \$465 million of short-term uncommitted credit facilities available at the end of the quarter, of which \$174.2 million was outstanding and due on demand.

Edgar Filing: BALL CORP - Form 10-Q

A receivables sales agreement provides for the ongoing, revolving sale of a designated pool of trade accounts receivable of Ball's North American packaging operations varying from a maximum of \$125 million for settlement dates in January through April to a maximum of \$175 million for settlement dates in the remaining months. At July 3, 2011, the amount of accounts receivable sold under the securitization program was \$115 million. There were no accounts receivable sold under the securitization program at December 31, 2010.

On August 1, 2011, the company entered into a replacement accounts receivable securitization agreement for a term of three years. The maximum the company can borrow under the new agreement can vary between \$150 million and \$275 million depending on the seasonality of the company's business.

Ball Corporation

Notes to Unaudited Condensed Consolidated Financial Statements

12. Debt (continued)

The fair value of the long-term debt at July 3, 2011, and at December 31, 2010, approximated its carrying value. The fair value reflects the market rates at each period end for debt with credit ratings similar to the company's ratings. Rates currently available to the company for loans with similar terms and maturities are used to estimate the fair value of long-term debt based on discounted cash flows.

On March 22, 2010, Ball issued \$500 million of new 6.75 percent senior notes due in September 2020. On April 21, 2010, the company redeemed \$509 million of its 6.875 percent senior notes due December 2012 at a redemption price of 101.146 percent of the outstanding principal amount plus accrued interest. The redemption resulted in a charge of \$8.1 million for the call premium and the write off of unamortized financing costs and unamortized premiums. The charge is included as a component of interest expense in the consolidated financial statements.

The senior notes and senior credit facilities are guaranteed on a full, unconditional and joint and several basis by certain of the company's wholly owned domestic subsidiaries. Certain foreign denominated tranches of the senior credit facilities are similarly guaranteed by certain of the company's wholly owned foreign subsidiaries. The unaudited condensed consolidating financial information for the guarantor and non-guarantor subsidiaries is presented in Exhibit 20 to this Form 10-Q. Separate financial statements for the guarantor subsidiaries and the non-guarantor subsidiaries are not presented because management has determined that such financial statements are not required by the current regulations.

The U.S. note agreements, bank credit agreement, industrial development revenue bond agreements and the new accounts receivable securitization agreement contain certain restrictions relating to dividend payments, share repurchases, investments, financial ratios, guarantees and the incurrence of additional indebtedness. The most restrictive of the company's debt covenants require the company to maintain an interest coverage ratio (as defined in the agreements) of no less than 3.50 and a leverage ratio (as defined) of no greater than 4.00. The company was in compliance with all loan agreements and debt covenants at July 3, 2011, and December 31, 2010, and has met all debt payment obligations.

Edgar Filing: BALL CORP - Form 10-Q

Contributions to the company's defined global benefit pension plans, not including the unfunded German plans, were \$8.9 million in the first six months of 2011 (\$7.9 million in 2010). The total contributions to these funded plans are expected to be approximately \$30 million for the full year. This estimate may change based on changes in the Pension Protection Act and actual plan asset performance, among other factors. Payments to participants in the unfunded German plans were \$12.6 million (9.0 million) in the first six months of 2011 and are expected to be approximately \$25 million (approximately 18 million) for the full year.

On August 2, 2011, in a privately negotiated transaction, Ball entered into an accelerated share repurchase agreement to buy \$125 million of its common shares using cash on hand and available borrowings. The company advanced the \$125 million on August 5, 2011, and received 3.1 million shares, which represented 90 percent of the total shares as calculated using the previous day's closing share price. The final number of shares will be determined before the end of 2011 based on the volume-weighted average trading price of the company's shares over an agreed upon period of time.

Table of Contents**Ball Corporation****Notes to Unaudited Condensed Consolidated Financial Statements****15. Stock-Based Compensation Programs**

The company has shareholder-approved stock option plans under which options to purchase shares of Ball common stock have been granted to officers and employees at the market value of the stock at the date of grant. Payment must be made at the time of exercise in cash or with shares of stock owned by the option holder, which are valued at fair market value on the date exercised. In general, options vest in four equal one-year installments commencing one year from the date of grant and terminating 10 years from the date of grant. A summary of stock option activity for the six months ended July 3, 2011, follows:

	Outstanding Options (a)		Nonvested Options (a)	
	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Grant Date Fair Value
Beginning of year	10,766,646	\$ 21.39	3,918,684	\$ 6.13
Granted	1,367,460	35.85	1,367,460	9.78
Vested			(1,539,558)	6.04
Exercised	(792,228)	17.51		
Canceled/forfeited	(37,700)	23.36	(37,700)	6.03
End of period	11,304,178	23.40	3,708,886	7.51
Vested and exercisable, end of period	7,595,292	21.24		
Reserved for future grants	6,247,215			

(a) Amounts have been retrospectively adjusted for the two-for-one stock split that was effective on February 15, 2011.

The options granted in January 2011 included 679,310 stock-settled stock appreciation rights, which have the same terms as the stock options. The weighted average remaining contractual term for all options outstanding at July 3, 2011, was 6.5 years and the aggregate intrinsic value (difference in exercise price and closing price at that date) was \$177.9 million. The weighted average remaining contractual term for options vested and exercisable at July 3, 2011, was 5.4 years and the aggregate intrinsic value was \$136.0 million.

The company received \$3.2 million from options exercised during the three months ended July 3, 2011. The intrinsic value associated with these exercises was \$4.7 million, and the associated tax benefit of \$1.5 million was reported as other financing activities in the unaudited condensed consolidated statement of cash flows. During the six months ended July 3, 2011, the company received \$11.8 million from options exercised. The intrinsic value associated with exercises for that period was \$14.7 million, and the associated tax benefit of \$3.8 million was reported as other financing activities in the unaudited condensed consolidated statement of cash flows.

Edgar Filing: BALL CORP - Form 10-Q

Based on the Black-Scholes option pricing model, options granted in January and April 2011 have an estimated weighted average fair value at the date of grant of \$9.78 per share. The actual value an employee may realize will depend on the excess of the stock price over the exercise price on the date the option is exercised. Consequently, there is no assurance that the value realized by an employee will be at or near the value estimated. The fair values were estimated using the following weighted average assumptions:

Expected dividend yield	0.78%
Expected stock price volatility	30.04%
Risk-free interest rate	1.97%
Expected life of options	5.0 years

In addition to stock options, the company may issue to officers and certain employees restricted shares and restricted stock units, which vest over various periods. Other than the performance-contingent grants discussed below, such restricted shares and restricted stock units generally vest in equal installments over five years. Compensation cost is recorded based upon the fair value of the shares at the grant date.

Table of Contents**Ball Corporation****Notes to Unaudited Condensed Consolidated Financial Statements****15. Stock-Based Compensation Programs (continued)**

A summary of restricted stock activity for the six months ended July 3, 2011, follows:

	Number of Shares/Units	Weighted Average Grant Price
Beginning of year	1,856,202	\$ 21.96
Granted	476,426	35.52
Vested	(498,500)	24.93
Canceled/forfeited	(4,600)	24.39
End of period	1,829,528	24.68

In January 2011 and 2010, the company's board of directors granted 210,330 and 362,300 performance-contingent restricted stock units, respectively, to key employees, which will cliff-vest if the company's return on average invested capital during a 36-month performance period is equal to or exceeds the company's cost of capital. If the performance goals are not met, the shares will be forfeited. Current assumptions are that the performance targets will be met and, accordingly, grants under the plan are being accounted for as equity awards and compensation expense is recorded based upon the closing market price of the shares at the grant date. On a quarterly basis, the company reassesses the probability of the goals being met and adjusts compensation expense as appropriate. No such adjustment was considered necessary during the first six months of 2011 for either grant.

For the three and six months ended July 3, 2011, the company recognized in selling, general and administrative expenses pretax expense of \$5.9 million (\$3.6 million after tax) and \$12.3 million (\$7.5 million after tax) for share-based compensation arrangements, respectively. For the three and six months ended June 27, 2010, the company recognized pretax expense of \$6.5 million (\$4.0 million after tax) and \$13.8 million (\$8.4 million after tax), respectively, for such arrangements. At July 3, 2011, there was \$53.1 million of total unrecognized compensation costs related to nonvested share-based compensation arrangements. This cost is expected to be recognized in earnings over a weighted average period of 2.6 years.

16. Earnings and Dividends Per Share

(\$ in millions, except per share amounts)	Three months ended		Six months ended	
	July 3, 2011	June 27, 2010	July 3, 2011	June 27, 2010
Net earnings attributable to Ball Corporation, \$	143.1	\$ 69.0	\$ 234.4	\$ 148.3
Basic weighted average common shares (a)	167,197	184,200	168,204	185,132

Edgar Filing: BALL CORP - Form 10-Q

Effect of dilutive securities (a)	3,487	2,718	3,337	2,700
Weighted average shares applicable to diluted earnings per share (a)	170,684	186,918	171,541	187,832
Per basic share (a)	\$ 0.86	\$ 0.37	\$ 1.39	\$ 0.80
Per diluted share (a)	\$ 0.84	\$ 0.37	\$ 1.37	\$ 0.79

(a) Amounts in 2010 have been retrospectively adjusted for the two-for-one stock split that was effective on February 15, 2011.

Certain outstanding options were excluded from the diluted earnings per share calculation because they were anti-dilutive (i.e., the sum of the proceeds, including the unrecognized compensation and windfall tax benefits, exceeded the average closing stock price for the period). The options excluded totaled 1,331,310 in both the three and six months ended July 3, 2011, respectively, and 3,285,040 in both the three and six months ended June 27, 2010.

The company declared and paid dividends of \$0.07 per share in each of the first two quarters of 2011 and \$0.05 per share in each of the first two quarters of 2010.

Table of Contents

Ball Corporation

Notes to Unaudited Condensed Consolidated Financial Statements

17. Financial Instruments and Risk Management

In the ordinary course of business, Ball employs established risk management policies and procedures, which seek to reduce Ball's exposure to fluctuations in commodity prices, interest rates, foreign currencies and prices of the company's common stock with regard to common share repurchases and the company's deferred compensation stock plan. However, there can be no assurance that these policies and procedures will be successful. Although the instruments utilized involve varying degrees of credit, market and interest risk, the counterparties to the agreements are expected to perform fully under the terms of the agreements. The company monitors counterparty credit risk, including lenders, on a regular basis, but Ball cannot be certain that all risks will be discerned or that its risk management policies and procedures will always be effective.

Commodity Price Risk

Aluminum

Ball manages commodity price risk in connection with market price fluctuations of aluminum ingot through two different methods. First, the company enters into container sales contracts that include aluminum ingot-based pricing terms that generally reflect the same price fluctuations under commercial supply contracts for aluminum sheet purchases. The terms include fixed, floating or pass-through aluminum ingot component pricing. Second, Ball uses certain derivative instruments such as option and forward contracts as economic and cash flow hedges of commodity price risk where there is not an arrangement in the sales contract to match underlying purchase volumes and pricing with sales volumes and pricing.

The company had aluminum contracts limiting its aluminum exposure with notional amounts of approximately \$0.9 billion at July 3, 2011, and \$1 billion at December 31, 2010. The aluminum contracts include economic derivative instruments that are undesignated and receive mark-to-market accounting treatment, as well as cash flow hedges that offset sales contracts of various terms and lengths. Cash flow hedges relate to forecasted transactions that expire within the next four years. Included in shareholders' equity at July 3, 2011, within accumulated other comprehensive earnings (loss) is a net after-tax gain of \$39.8 million associated with these contracts. A net gain of \$29.6 million is expected to be recognized in the consolidated statement of earnings during the next 12 months, the majority of which will be offset by pricing changes in sales and purchase contracts, thus resulting in little or no earnings impact to Ball.

Steel

Most sales contracts involving our steel products either include provisions permitting Ball to pass through some or all steel cost changes incurred, or they incorporate annually negotiated steel prices.

Interest Rate Risk

Ball's objective in managing exposure to interest rate changes is to minimize the impact of interest rate changes on earnings and cash flows and to lower our overall borrowing costs. To achieve these objectives, Ball may use a variety of interest rate swaps, collars and options to manage our mix of floating and fixed-rate debt. Interest rate instruments held by the company at July 3, 2011, included pay-fixed interest rate swaps. Pay-fixed swaps effectively convert variable rate obligations to fixed-rate instruments.

At July 3, 2011, the company had outstanding interest rate swap agreements with notional amounts of \$230 million paying fixed rates expiring within the next year. The amount included in accumulated other comprehensive earnings related to these contracts at July 3, 2011, was insignificant.

Inflation Risk

Ball also uses inflation option contracts in Europe to limit the impacts from spikes in inflation against certain multi-year contracts. At July 3, 2011, the company had inflation options in Europe with notional amounts of \$167 million (€115 million). These options are undesignated for hedge accounting purposes and receive mark-to-market accounting. The fair value at July 3, 2011, was insignificant, and the option contracts expire at various times within the next two years.

Ball Corporation

Notes to Unaudited Condensed Consolidated Financial Statements

17. Financial Instruments and Risk Management (continued)

Foreign Currency Exchange Rate Risk

Ball's objective in managing exposure to foreign currency fluctuations is to limit the exposure of foreign cash flows and earnings from changes associated with foreign currency exchange rate changes through the use of various derivative contracts. In addition, at times Ball manages foreign earnings translation volatility through the use of foreign currency option strategies, and the change in the fair value of those options is recorded in the company's net earnings. Ball's foreign currency translation risk results from the currencies in which we transact business. Ball faces currency exposures in our global operations as a result of purchasing raw materials in U.S. dollars and, to a lesser extent, in other currencies. Sales contracts are negotiated with customers to reflect cost changes and, where there is not a foreign exchange pass-through arrangement, the company uses forward and option contracts to manage foreign currency exposures. At July 3, 2011, the company had outstanding foreign exchange forward contracts and option collar contracts with notional amounts totaling \$374 million. Approximately \$5.6 million of net gain related to these contracts is included in accumulated other comprehensive earnings at July 3, 2011, of which \$5.0 million of net gain is expected to be recognized in the consolidated statement of earnings during the next 12 months. The contracts outstanding at July 3, 2011, expire within the next two years.

Common Stock Price Risk

The company's deferred compensation stock program is subject to variable plan accounting and, accordingly, is marked to market using the company's closing stock price at the end of a reporting period. Based on current share levels in the program, each \$1 change in the company's stock price has an impact of \$1.8 million on pretax earnings. During March 2011, the company entered into a total return swap (the Swap) to mitigate the company's exposure to these mark-to-market fluctuations. The Swap will be outstanding for a period of 12 months and has a notional value of one million shares and a fair value at July 3, 2011, of \$1.6 million. All gains and losses on the Swap will be recorded in the consolidated income statement within the selling, general and administrative line item.

Collateral Calls

The company's agreements with its financial counterparties require Ball to post collateral in certain circumstances when the negative mark-to-market value of the contracts exceeds specified levels. Additionally, Ball has collateral posting arrangements with certain customers on these derivative contracts. The cash flows of the margin calls are shown within the investing section of the company's consolidated statements of cash flows. As of July 3, 2011, the aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a net liability position was \$17.6 million and no collateral was required to be posted. As of December 31, 2010, the aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a net liability position was \$26.3 million and no collateral was required to be posted. If the company's public credit rating was downgraded, there would be a net increase of \$5.1 million to our net cash collateral postings as of July 3, 2011.

Table of Contents**Ball Corporation****Notes to Unaudited Condensed Consolidated Financial Statements****17. Financial Instruments and Risk Management (continued)****Fair Value Measurements**

The company has classified all applicable financial derivative assets and liabilities as Level 2 within the fair value hierarchy and presented those values in the tables below. The company's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels.

The company uses closing spot and forward market prices as published by the London Metal Exchange, the New York Mercantile Exchange, Reuters and Bloomberg to determine the fair value of its aluminum, currency, energy, inflation and interest rate spot and forward contracts. Option contracts are valued using a Black-Scholes model with observable market inputs for aluminum, currency and interest rates. We value each of our financial instruments either internally using a single valuation technique or from a reliable observable market source. The company does not adjust the value of its financial instruments except in determining the fair value of a trade that settles in the future by discounting the value to its present value using 12-month LIBOR as the discount factor. Ball performs validations of our internally derived fair values reported for our financial instruments on a quarterly basis utilizing counterparty valuation statements. The company additionally evaluates counterparty creditworthiness and, as of July 3, 2011, has not identified any circumstances requiring that the reported values of our financial instruments be adjusted.

The company's investment in shares of DigitalGlobe was measured using Level 1 inputs at December 31, 2010, and amounted to \$22.1 million. These shares were disposed of during March 2011. Additionally, net receivables related to the European scrap metal program totaling \$18.4 million at July 3, 2011, and \$11.7 million at December 31, 2010, were classified as Level 2 within the fair value hierarchy.

Ball Corporation

Notes to Unaudited Condensed Consolidated Financial Statements

18. Contingencies

Ball is subject to numerous lawsuits, claims or proceedings arising out of the ordinary course of business, including actions related to product liability; personal injury; the use and performance of company products; warranty matters; patent, trademark or other intellectual property infringement; contractual liability; the conduct of the company's business; tax reporting in domestic and foreign jurisdictions; workplace safety; and environmental and other matters. The company has also been identified as a potentially responsible party (PRP) at several waste disposal sites under U.S. federal and related state environmental statutes and regulations and may have joint and several liability for any investigation and remediation costs incurred with respect to such sites. Some of these lawsuits, claims and proceedings involve substantial amounts, including as described below, and some of the environmental proceedings involve potential monetary costs or sanctions that may be material. Ball has denied liability with respect to many of these lawsuits, claims and proceedings and is vigorously defending such lawsuits, claims and proceedings. The company carries various forms of commercial, property and casualty, and other forms of insurance; however, such insurance may not be applicable or adequate to cover the costs associated with a judgment against Ball with respect to these lawsuits, claims and proceedings. The company does not believe that these lawsuits, claims and proceedings are material individually or in the aggregate. While management believes the company has established adequate accruals for expected future liability with respect to pending lawsuits, claims and proceedings, where the nature and extent of any such liability can be reasonably estimated based upon then presently available information, there can be no assurance that the final resolution of any existing or future lawsuits, claims or proceedings will not have a material adverse effect on the liquidity, results of operations or financial condition of the company.

As previously reported in 2010, the company was served with a claim by Hess Corporation (Hess) in the U.S. District Court for the Northern District of New York. Hess alleges that the company and certain affiliates breached an agreement to purchase electricity from Hess related to Ball Plastic Container Corp.'s former Baldwinsville, New York, plant and claims damages in the range of up to \$5 million. Based on the information available to the company at the present time, the company does not believe that this matter will have a material adverse effect upon the liquidity, results of operations or financial condition of the company.

As previously reported, in 2010 Ball Corporation's Canadian subsidiary, Ball Packaging Products Canada Corp. (Ball Canada), was advised by the Ontario Ministry of the Environment (the Ministry) that the Ministry would post, for public comment, a proposed Order under the Environmental Protection Act. The proposed Order would require Ball Canada to remediate areas that were allegedly contaminated by its predecessor company, Marathon Paper Mills of Canada Limited, including the mill site and the adjacent harbor. That company operated a pulp mill on the north shore of Lake Superior for many years until it was sold to James River Company in 1983. Ball Canada continues to investigate whether the allegations in the proposed Order are correct and, if so, whether or not it has any liability or any recourse against other parties, including any former or subsequent owners or other parties associated with the pulp mill. Ball Canada has also engaged in discussions with the Ministry and two successor owners and/or operators of the pulp mill with a view to Ball Canada and such owners and/or operators settling all known outstanding claims of the Ministry and against one another and other interested parties. Subject to the results of such discussions, the company does not believe this matter will have a material adverse effect upon the liquidity, results of operations or financial condition of the company. In September 2010, the three companies and the Ministry reached a mediated agreement to retain an environmental consultant to risk assess the mill site with emphasis on the potential for containment of contamination, if any is found. Further mediation is ongoing during 2011 in order to determine the scope and cost split of any potential site containment and/or harbor remediation that may be recommended as part of an overall settlement among all parties, including the Ministry.

Ball Corporation

Notes to Unaudited Condensed Consolidated Financial Statements

18. Contingencies (continued)

As previously reported, in 2005 Ball Metal Beverage Container Corp. (BMBCC), a wholly owned subsidiary of the company, was served with an amended complaint filed by Crown Packaging Technology, Inc. et. al. (Crown), in the U.S. District Court for the Southern District of Ohio, Western Division at Dayton, Ohio. The complaint alleges that the manufacture, sale and use of certain ends by BMBCC and its customers infringes certain claims of Crown's U.S. patents. The complaint seeks unspecified monetary damages, fees, and declaratory and injunctive relief. BMBCC has formally denied the allegations of the complaint. In September 2009, the District Court granted Ball's motion for summary judgment holding that the asserted patent claims were invalid for failure to comply with the written description requirement and because they were anticipated by prior art. Crown appealed to the U.S. Circuit Court of Appeals for the Federal Circuit seeking to overturn the trial court's decision. The appellate court reversed that decision by a two-to-one majority in April 2011. BMBCC's petition to the appellate court for a rehearing of the case was denied in June 2011. The case has been remanded to the district court where BMBCC has renewed its motion for summary judgment of non-infringement, which the court had previously elected not to decide. A decision on this motion is expected over the next several months. Based on the information available to the company at the present time, the company does not believe that this matter will have a material adverse effect upon the liquidity, results of operations or financial condition of the company.

As previously reported, the U.S. Environmental Protection Agency (USEPA) considers the company a PRP with respect to the Lowry Landfill site located east of Denver, Colorado. In 1992, the company was served with a lawsuit filed by the City and County of Denver (Denver) and Waste Management of Colorado, Inc., seeking contributions from the company and approximately 38 other companies. The company filed its answer denying the allegations of the complaint. Subsequently in 1992, the company was served with a third-party complaint filed by S.W. Shattuck Chemical Company, Inc., seeking contribution from the company and other companies for the costs associated with cleaning up the Lowry Landfill. The company denied the allegations of the complaint.

Also in 1992, the company entered into a settlement and indemnification agreement with Chemical Waste Management, Inc., and Waste Management of Colorado, Inc. (collectively Waste Management) and Denver pursuant to which Waste Management and Denver dismissed their lawsuit against the company, and Waste Management agreed to defend, indemnify and hold harmless the company from claims and lawsuits brought by governmental agencies and other parties relating to actions seeking contributions or remedial costs from the company for the cleanup of the site. Waste Management, Inc., has agreed to guarantee the obligations of Waste Management. Waste Management and Denver may seek additional payments from the company if the response costs related to the site exceed \$319 million. In 2003 Waste Management, Inc., indicated that the cost of the site might exceed \$319 million in 2030, approximately three years before the projected completion of the project. The company might also be responsible for payments (based on 1992 dollars) for any additional wastes that may have been disposed of by the company at the site but which are identified after the execution of the settlement agreement. While remediating the site, contaminants were encountered, which could add an additional cleanup cost of approximately \$10 million. This additional cleanup cost could, in turn, add approximately \$1 million to total site costs for the PRP group.

At this time, there are no Lowry Landfill actions in which the company is actively involved. Based on the information available to the company at this time, we do not believe that this matter will have a material adverse effect upon the liquidity, results of operations or financial condition of the company.

Ball Corporation

Notes to Unaudited Condensed Consolidated Financial Statements

19. Indemnifications and Guarantees

General Guarantees

During the normal course of business, the company or its appropriate consolidated direct or indirect subsidiaries have made certain indemnities, commitments and guarantees under which the specified entity may be required to make payments in relation to certain transactions. These indemnities, commitments and guarantees include indemnities to the customers of the subsidiaries in connection with the sales of their packaging and aerospace products and services; guarantees to suppliers of subsidiaries of the company guaranteeing the performance of the respective entity under a purchase agreement, construction contract or other commitment; guarantees in respect of certain foreign subsidiaries pension plans; indemnities for liabilities associated with the infringement of third party patents, trademarks or copyrights under various types of agreements; indemnities to various lessors in connection with facility, equipment, furniture and other personal property leases for certain claims arising from such leases; indemnities to governmental agencies in connection with the issuance of a permit or license to the company or a subsidiary; indemnities pursuant to agreements relating to certain joint ventures; indemnities in connection with the sale of businesses or substantially all of the assets and specified liabilities of businesses; and indemnities to directors, officers and employees of the company to the extent permitted under the laws of the State of Indiana and the United States of America. The duration of these indemnities, commitments and guarantees varies and, in certain cases, is indefinite. In addition many of these indemnities, commitments and guarantees do not provide for any limitation on the maximum potential future payments the company could be obligated to make. As such, the company is unable to reasonably estimate its potential exposure under these items.

The company has not recorded any liability for these indemnities, commitments and guarantees in the accompanying consolidated balance sheets. The company does, however, accrue for payments under promissory notes and other evidences of incurred indebtedness and for losses for any known contingent liability, including those that may arise from indemnifications, commitments and guarantees, when future payment is both reasonably estimable and probable. Finally, the company carries specific and general liability insurance policies and has obtained indemnities, commitments and guarantees from third party purchasers, sellers and other contracting parties, which the company believes would, in certain circumstances, provide recourse to any claims arising from these indemnifications, commitments and guarantees.

Debt Guarantees

The company's senior notes and senior credit facilities are guaranteed on a full, unconditional and joint and several basis by certain of the company's material domestic subsidiaries and the domestic subsidiary borrowers, and obligations of the subsidiary borrowers under the senior credit facilities are guaranteed by the company. Loans borrowed under the senior credit facilities by foreign subsidiary borrowers are also effectively guaranteed by certain of the company's foreign subsidiaries by pledges of stock of the foreign subsidiary borrowers and stock of material foreign subsidiaries. These guarantees are required in support of the notes and credit facilities referred to above, are co-terminous with the terms of the respective note indentures and credit agreements and would require performance upon certain events of default referred to in the respective guarantees. The maximum potential amounts which could be required to be paid under the domestic guarantees are essentially equal to the then outstanding principal and interest under the respective notes and credit agreements, or under the applicable tranche, and the maximum potential amounts that could be required to be paid under the foreign stock pledges by foreign subsidiaries are essentially equal to the value of the stock pledged. The company is not in default under the above notes or credit facilities. The unaudited condensed consolidating

Edgar Filing: BALL CORP - Form 10-Q

financial information for the guarantor and non-guarantor subsidiaries is presented in Exhibit 20 to this Form 10-Q. Separate financial statements for the guarantor subsidiaries and the non-guarantor subsidiaries are not presented because management has determined that such financial statements are not required by the current regulations.

Accounts Receivable Securitization

Ball Capital Corp. II is a separate, wholly owned corporate entity created for the purchase of accounts receivable from certain of the company's wholly owned subsidiaries. Ball Capital Corp. II's assets will be available first to satisfy the claims of its creditors. The company has been designated as the servicer pursuant to an agreement whereby Ball Capital Corp. II may sell and assign the accounts receivable to a commercial lender or lenders. As the servicer, the company is responsible for the servicing, administration and collection of the receivables and is primarily liable for the performance of such obligations. The company, the relevant subsidiaries and Ball Capital Corp. II are not in default under the above credit arrangement.

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements and accompanying notes included in Item 1 of this report, which include additional information about our accounting policies, practices and the transactions underlying our financial results. The preparation of our unaudited condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires us to make estimates and assumptions that affect the reported amounts in our unaudited condensed consolidated financial statements and the accompanying notes including various claims and contingencies related to lawsuits, taxes, environmental and other matters arising during the normal course of business. We apply our best judgment, our knowledge of existing facts and circumstances and our knowledge of actions that we may undertake in the future in determining the estimates that will affect our unaudited condensed consolidated financial statements. We evaluate our estimates on an ongoing basis using our historical experience, as well as other factors we believe appropriate under the circumstances, such as current economic conditions, and adjust or revise our estimates as circumstances change. As future events and their effects cannot be determined with precision, actual results may differ from these estimates. Ball Corporation and its controlled affiliates are referred to collectively as Ball Corporation, Ball, the company or we or our in the following discussion and analysis.

BUSINESS OVERVIEW

Business Overview

Ball Corporation is one of the world's leading suppliers of metal packaging to the beverage, food and household products industries. Our packaging products are produced for a variety of end uses and are manufactured in plants around the world. We also provide aerospace and other technologies and services to governmental and commercial customers.

We sell our packaging products mainly to major beverage, food and household products companies with which we have developed long-term customer relationships. This is evidenced by our high customer retention and our large number of long-term supply contracts. While we have a diversified customer base, we sell a majority of our packaging products to relatively few major companies in North America, Europe, the People's Republic of China (PRC), Brazil and Argentina, as do our equity joint ventures in the U.S. and the PRC. The primary customers for the products and services provided by our aerospace and technologies segment are U.S. government agencies or their prime contractors. Federal budget reductions and priorities, or changes in agency budgets, could limit future funding and new contract awards or delay or prolong contract performance.

Industry Trends and Corporate Strategy

In the rigid packaging industry, sales and earnings can be improved by reducing costs, increasing prices, developing new products, expanding volumes and making strategic acquisitions. Over the past few years, we have closed a number of packaging facilities in support of our ongoing objective of matching our supply with market demand. We have also identified and implemented plans to improve our return on invested capital through the redeployment of assets within our operations. To better realign capacity, in January 2011 we announced that we will close our Torrance, California, plant, have relocated a line from the Torrance plant to our Whitby, Ontario, plant, and have plans to redeploy surplus equipment to other locations.

As part of our packaging strategy, we are focused on developing and marketing new and existing products that meet the needs of our customers and the ultimate consumer. We will be placing additional emphasis on technology and innovation throughout our businesses during 2011 and beyond. These innovations include new shapes, sizes, opening features and other functional benefits. This ongoing packaging development activity helps us maintain and expand our supply positions with major beverage, food and household products customers.

While the North American metal beverage container manufacturing market is relatively mature, the metal beverage container markets in other parts of the world are growing and are expected to continue to grow in the medium to long term. We have been able to capitalize on growth by adding a plant, as well as additional capacity, in our consolidated Brazilian joint venture and by increasing capacity in some of our European metal beverage container manufacturing facilities by speeding up certain lines and by expansion. In October 2010, we announced that we are expanding production of our lightweight Alumi-Tek® bottle to our Golden, Colorado, facility, and in January 2011, we announced that we will commence specialty can production in our Fort Worth, Texas, plant. In February 2011, we announced the plans of our Latapack-Ball joint venture to construct a new metal beverage container manufacturing plant in northeast Brazil, which is

Table of Contents

one of the fastest growing regions of the country. The new plant will be located in Alagoinhas, Bahia, and is expected to start up in early 2012. The output from the first line has been contracted for sale under a long-term agreement. We also announced in March 2011 that we entered into a joint venture agreement with Thai Beverage Can Limited to build a beverage container manufacturing plant in Vietnam that will be completed in early 2012. Additionally, we have begun construction of a new metal beverage container manufacturing plant in Qingdao, PRC, which is expected to be operational by the end of 2011.

We have also made recent strategic acquisitions. In July 2010, we entered the aluminum slug market by acquiring the leading North American manufacturer of aluminum slugs used to make extruded aerosol cans, beverage bottles, collapsible tubes and technical impact extrusions. To further expand this new product line and broaden our market development efforts into a new customer base, in January 2011, we completed the acquisition of a leading European supplier of aluminum aerosol cans and bottles and the slugs used to make them. Further details of recent acquisitions are included in Note 4 to the unaudited condensed consolidated financial statements within Item 1 of this report.

We recognize sales under long-term contracts in the aerospace and technologies segment using the cost-to-cost, percentage of completion method of accounting. The contract mix in the first six months of 2011 consisted of 59 percent cost-type contracts, which are billed at our costs plus an agreed upon and/or earned profit component, and 33 percent fixed-price contracts. The remainder represents time and material contracts, which typically provide for the sale of engineering labor at fixed hourly rates. The contracted backlog at July 3, 2011, of \$903 million consisted of 47 percent fixed price contracts indicating a trend towards more fixed price business.

Throughout the period of contract performance, we regularly reevaluate and, if necessary, revise our estimates of aerospace and technologies total contract revenue, total contract cost and progress toward completion. Because of contract payment schedules, limitations on funding and other contract terms, our sales and accounts receivable for this segment include amounts that have been earned but not yet billed.

Management Performance Measures

Management uses various measures to evaluate company performance such as earnings before interest and taxes (EBIT); earnings before interest, taxes, depreciation and amortization (EBITDA); diluted earnings per share; cash flow from operating activities; free cash flow (generally defined by the company as cash flow from operating activities less additions to property, plant and equipment); return on average invested capital (net operating earnings after tax over a relevant performance period divided by averaged invested capital over the same period) and economic value added (net operating earnings after tax less a capital charge on net operating assets employed). These financial measures may be adjusted at times for items that affect comparability between periods such as business consolidation costs and gains or losses on acquisitions and dispositions. Nonfinancial measures in the packaging businesses include production efficiency and spoilage rates; quality control figures; environmental, health and safety statistics; production and sales volumes; asset utilization rates; and measures of sustainability. Additional measures used to evaluate financial performance in the aerospace and technologies segment include contract revenue realization, award and incentive fees realized, proposal win rates and backlog (including awarded, contracted and funded backlog).

We recognize that attracting, developing and retaining highly talented employees are essential to the success of Ball and, because of that, we strive to pay employees competitively and encourage their ownership of the company's common stock as part of a diversified portfolio. For most management employees, a meaningful portion of compensation is at risk as an incentive, dependent upon economic value added operating performance. For more senior positions, more compensation is at risk through economic value added performance and various long-term cash and stock compensation plans. Through our employee stock purchase plan and 401(k) plan, which matches employee contributions with Ball common stock, employees, regardless of organizational level, have opportunities to own Ball stock.

Table of Contents**RESULTS OF OPERATIONS****Consolidated Sales and Earnings**

(\$ in millions)	Three months ended		Six months ended	
	July 3, 2011	June 27, 2010	July 3, 2011	June 27, 2010
Net sales	\$ 2,309.7	\$ 2,007.5	\$ 4,320.9	\$ 3,599.8
Net earnings attributable to Ball Corporation	143.1	69.0	234.4	148.3

The increases in net sales were driven largely by the increase in demand for metal packaging in the PRC and Europe, the consolidation of Latapack-Ball and the acquisitions of JFP and the extruded aluminum businesses. In addition to the business segment performance analyzed in the business segment discussions below, net earnings attributable to Ball Corporation included discontinued operations related to the sale of the plastics business in August 2010, business consolidation costs, the gain and equity earnings in the second quarter of 2010 related to the acquisition of the remaining interest in JFP and debt refinancing costs. These items are detailed in the Management Performance Measures section below.

Business Segment Discussions*Metal Beverage Packaging, Americas and Asia*

(\$ in millions)	Three months ended		Six months ended	
	July 3, 2011	June 27, 2010	July 3, 2011	June 27, 2010
Net sales	\$ 1,164.1	\$ 1,036.0	\$ 2,196.4	\$ 1,810.4
Segment earnings	\$ 126.1	\$ 114.5	\$ 241.7	\$ 188.5
Business consolidation activities (a)	(2.5)	0.8	(13.4)	1.3
Total segment earnings	\$ 123.6	\$ 115.3	\$ 228.3	\$ 189.8

(a) Further details of these items are included in Note 6 to the unaudited condensed consolidated financial statements within Item 1 of this report.

The metal beverage packaging, Americas and Asia, segment consists of operations located in the U.S., Canada, Brazil (since August 2010) and the PRC, which manufacture metal container products used in beverage packaging, as well as non-beverage plastic containers manufactured and sold mainly in the PRC. Ball's acquisition of the remaining 65 percent interest in a joint venture metal beverage can and end plant in Sanshui (Foshan), PRC, (JFP) was completed in June 2010. In August 2010, we acquired an additional economic interest in our Brazilian joint venture (Latapack-Ball), and its results since the date of acquisition are consolidated and included in the metal beverage packaging, Americas, segment.

Edgar Filing: BALL CORP - Form 10-Q

Segment sales in the second quarter and first six months of 2011 were \$128.1 million and \$386.0 million higher compared to the same periods in 2010, respectively. The increase in the second quarter was attributable to the consolidation of Latapack-Ball and the acquisition of JFP of \$102 million, as well as higher commodity input prices. The higher sales in the first six months were due to the consolidation of Latapack-Ball and JFP, higher volumes in North America and the PRC and higher commodity input prices.

Segment earnings in the second quarter and six months of 2011 were \$11.6 million and \$53.2 million higher than in the same periods of 2010, respectively. The higher earnings in the second quarter were attributable to the consolidation of Latapack-Ball, the acquisition of JFP, improved manufacturing performance in North America and the PRC and improved price/mix, partially offset by higher manufacturing costs. Higher earnings in the first six months were due to volume increases, the consolidation of Latapack-Ball, the acquisition of JFP and improved manufacturing performance, partially offset by higher manufacturing costs.

Segment earnings	\$ 84.7	\$ 72.5	\$ 137.8	\$ 107.5
Business consolidation activities (a)	(0.3)		(2.9)	
Total segment earnings	\$ 84.4	\$ 72.5	\$ 134.9	\$ 107.5

(a) Further details of these items are included in Note 6 to the unaudited condensed consolidated financial statements within Item 1 of this report.

The metal beverage packaging, Europe, segment includes the manufacture and sale of metal beverage containers, extruded aluminum aerosol containers and aluminum slugs. Ball Packaging Europe has manufacturing plants located in Germany, the United Kingdom, France, the Netherlands, Poland, Serbia and the Czech Republic.

In January 2011, Ball acquired Aerocan S.A.S. (Aerocan), a leading European supplier of aluminum aerosol cans and bottles, for 221.7 million (\$295.2 million) in cash and assumed debt, which is net of \$26.2 million of cash acquired. Aerocan manufactures extruded aluminum aerosol cans and bottles, and the aluminum slugs used to make them, for customers in the personal care, pharmaceutical, beverage and food industries. It operates three aerosol can manufacturing plants one each in the Czech Republic, France and the United Kingdom and is a 51 percent owner of a joint venture aluminum slug plant in France. The four plants employ approximately 560 people. The acquisition of Aerocan has enabled Ball to enter a growing part of the metal packaging industry and to broaden the company's market development efforts into a new customer base.

Segment sales in the second quarter and six months of 2011 increased \$128.6 million and \$204.1 million compared to the same periods in 2010, respectively. The increase in the second quarter included the effect of foreign exchange rates of \$62 million, the inclusion of Aerocan sales of \$50 million and higher beverage can sales volumes. The increase in the first six months was due to the Aerocan acquisition, the effect of foreign exchange rates and higher sales volumes.

Segment earnings in the second quarter and first six months of 2011 increased \$12.2 million and \$30.3 million compared to the same periods in 2010, respectively. The increase in the quarter was due to earnings contribution from the Aerocan acquisition, higher volumes and the effect of foreign exchange rates, offset by higher inventory and other costs. The higher earnings in the first six months were due to higher volumes, earnings contribution from the Aerocan acquisition and the effect of foreign exchange rates, partially offset by higher inventory and other costs.

Metal Food and Household Products Packaging, Americas

Three months ended

Six months ended

Table of Contents

Segment earnings in the second quarter and first six months of 2011 increased \$7.9 million and \$26.0 million compared to the same periods of 2010, respectively. Higher earnings in the second quarter were due to improved pricing and customer mix, improved manufacturing and cost performance, partially offset by lower volumes. The higher earnings in the first six months were due to inventory holding gains in 2011, contributions from the Neuman acquisition, improved sales mix and improved manufacturing and cost performance.

Aerospace and Technologies

(\$ in millions)	Three months ended		Six months ended	
	July 3, 2011	June 27, 2010	July 3, 2011	June 27, 2010
Net sales	\$ 199.9	\$ 180.2	\$ 391.1	\$ 345.2
Segment earnings	21.7	18.6	40.4	32.1

The aerospace and technologies segment consists of the manufacture and sale of aerospace and other related products and the providing of services used in the defense, civil space and commercial space industries.

Segment sales in the second quarter and six months of 2011 increased \$19.7 million and \$45.9 million, respectively, compared to the same periods in 2010 due to higher sales from U.S. national defense contracts and existing commercial programs, partially offset by lower sales from civil space programs.

Segment earnings in the second quarter and six months of 2011 increased \$3.1 million and \$8.3 million, respectively, compared to the same periods of 2010 due to improved performance on fixed-price contracts and earnings on the sales increase discussed above.

Contracted backlog in the aerospace and technologies segment was \$903 million at July 3, 2011, compared to \$989 million at December 31, 2010. Comparisons of backlog are not necessarily indicative of the trend of future operations.

Discontinued Operations - Plastics Packaging, Americas

In August 2010, the company completed the sale of its plastics packaging, Americas, business to Amcor Limited and received proceeds of \$258.7 million, which included \$15 million of contingent consideration recognized at closing and is net of post-closing adjustments of \$21.3 million. The sale of Ball's plastics packaging business included five U.S. plants that manufacture polyethylene terephthalate (PET) bottles and preforms and polypropylene bottles, as well as associated customer contracts and other related assets.

The following table summarizes the operating results for the discontinued operations:

Edgar Filing: BALL CORP - Form 10-Q

(\$ in millions)	Three months ended		Six months ended	
	July 3, 2011	June 27, 2010	July 3, 2011	June 27, 2010

Discontinued operations, net of tax	\$ (0.3)	\$ (75.6)	\$ (1.6)	\$ (78.7)

Table of Contents

Additional Segment Information

For additional information regarding our segments, see the business segment information in Note 3 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report. The charges recorded for business consolidation activities were based on estimates by management and were developed from available information. If actual outcomes vary from the estimates, the differences will be reflected in current period earnings in the statement of earnings and identified as business consolidation gains and losses. Additional details about our business consolidation activities and associated costs are provided in Note 6 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

Selling, General and Administrative

Selling, general and administrative (SG&A) expenses were \$93.1 million in the second quarter of 2011 compared to \$77.6 million for the second quarter of 2010 and \$192.5 million in the first six months of 2011 compared to \$156.9 million for the first six months of 2010. The increase in SG&A expenses in the second quarter of 2011 was due to the consolidation of Latapack-Ball and our acquisitions, unfavorable foreign exchange effects and other higher costs that were individually insignificant. The increase in SG&A expenses in the first six months of 2011 was due to the consolidation of our acquisitions, higher employee compensation costs, including incentive and stock compensation and mark-to-market adjustments for the company's deferred compensation stock plan, unfavorable foreign exchange effects and other higher costs that were individually insignificant.

Interest and Taxes

Consolidated interest expense was \$45.2 million and \$91.7 million for the second quarter and first six months of 2011, respectively, compared to \$44.7 million and \$78.6 million for the same periods in 2010, respectively. The second quarter and first six months of 2010 included \$8.1 million for the call premium and write off of unamortized financing costs and unamortized issuance premiums related to the redemption of Ball's senior notes due December 2012. The higher interest expense in 2011 compared to the 2010 amounts excluding the debt refinancing costs was due to higher levels of debt related to the acquisitions of Aerocan, JFP and Neuman, the consolidation of Latapack-Ball and higher share repurchases, as well as the refinancing of the company's bank credit facility in December 2010.

The effective income tax rate for earnings from continuing operations was 31.6 percent for the first six months of 2011 compared to 29.6 percent for the same period in 2010. The lower effective tax rate in 2010 included the release of a tax reserve of \$4 million and the accrual of a net \$8 million tax benefit due to a change in the tax status of a foreign investment. The 2011 full-year effective income tax rate on continuing operations is expected to be approximately 32 percent.

Equity in Results of Affiliates

In June 2010, we acquired the remaining 65 percent interest in a joint venture metal beverage can and end plant in Sanshui (Foshan), PRC, for \$86.9 million in cash (net of cash acquired) and assumed debt, and also entered into a long-term supply agreement. In connection with the

Edgar Filing: BALL CORP - Form 10-Q

acquisition, we recorded equity earnings of \$22.1 million, which was composed of equity earnings, gains on the forgiveness of debt and guarantees and a gain realized on the fair value of Ball's equity investment as a result of the required purchase accounting.

Equity earnings were also lower in 2011 due to the August 2010 acquisition of an additional 10.1 percent economic interest in our Brazilian beverage packaging joint venture, Latapack-Ball, which increased our overall economic ownership interest to 60.1 percent and required the consolidation of the joint venture as of the acquisition date.

NEW ACCOUNTING PRONOUNCEMENTS

For information regarding recent accounting pronouncements, see Note 2 to the unaudited condensed consolidated financial statements within Item 1 of this report on Form 10-Q.

Table of Contents**FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES**

Our primary sources of liquidity are cash provided by operating activities and external committed borrowings. We believe that cash flows from operations and cash provided by short-term and committed revolver borrowings, when necessary, will be sufficient to meet our ongoing operating requirements, scheduled principal and interest payments on debt, dividend payments and anticipated capital expenditures. The following summarizes our cash flows:

(\$ in millions)	Six months ended	
	July 3, 2011	June 27, 2010
Cash flows provided by (used in) operating activities (including discontinued operations)	\$ 161.2	\$ 30.7
Cash flows provided by (used in) investing activities (including discontinued operations)	(509.3)	(175.9)
Cash flows provided by (used in) financing activities	339.7	12.0

The cash flows from operations for the six months ended June 27, 2010, included \$250 million related to a change in accounting for our accounts receivable securitization program. At December 31, 2009, the amount of accounts receivable sold under the securitization program was \$250 million and, under the previous accounting guidance, this amount was presented in the consolidated balance sheet as a reduction of accounts receivable as a result of the true sale of receivables. However, upon the adoption of prospective accounting guidance effective January 1, 2010, the amount of accounts receivable sold is not reflected as a reduction of accounts receivable, resulting in a \$250 million working capital outflow from operating activities in the statement of cash flows.

Excluding the \$250 million impact from the change in accounting discussed above, cash flows from operations were \$161.2 million in the first six months of 2011 compared to \$280.7 million in the first six months of 2010 due primarily to working capital changes. We expect 2011 capital expenditures for property, plant and equipment to be approximately \$500 million, of which \$213.5 million occurred during the first six months of 2011 and an additional \$220 million was contractually committed as of July 3, 2011. Capital expenditures are generally funded by cash flows from operations.

Contributions to the company's defined benefit plans, not including the unfunded German plans, are expected to be approximately \$30 million in 2011. This estimate may change based on changes in the Pension Protection Act and actual plan asset performance, among other factors. Payments to participants in the unfunded German plans are expected to be approximately \$25 million for the full year.

Debt Facilities and Refinancing

Given our cash flow projections and unused credit facilities that are available until December 2015, the company's liquidity is expected to be sufficient to meet its ongoing operating cash flow and debt service requirements. Interest-bearing debt of \$3.5 billion at July 3, 2011, was higher than the amount outstanding at December 31, 2010, of \$2.8 billion. The increase in debt included approximately \$300 million of long-term borrowings under our multi-currency revolver for the Aerocan acquisition, as well as higher borrowings for normal seasonal working capital requirements.

At July 3, 2011, \$553 million was available under the company's committed multi-currency revolving credit facilities. In addition to the long-term committed credit facilities, the company had \$465 million of short-term uncommitted credit facilities available at July 3, 2011, of which \$174.2 million was outstanding and due on demand.

A receivables sales agreement provides for the ongoing, revolving sale of a designated pool of trade accounts receivable of Ball's North American packaging operations varying from a maximum of \$125 million for settlement dates in January through April to a maximum of \$175 million for settlement dates in the remaining months. At July 3, 2011, the amount of accounts receivable sold under the securitization program was \$115 million, and there were approximately \$60 million of available borrowings. On August 1, 2011, the company entered into a replacement accounts receivable securitization agreement for a term of three years. The maximum the company can borrow under the new agreement is between \$150 million and \$275 million and varies based on the seasonality of the company's business.

Table of Contents

The U.S. note agreements, bank credit agreement, industrial development revenue bond agreements and the new accounts receivable securitization agreement contain certain restrictions relating to dividends, investments, financial ratios, guarantees and the incurrence of additional indebtedness. The company's bank credit agreement debt covenants require the company to maintain an interest coverage ratio (as defined in the credit agreement) of no less than 3.50 and a leverage ratio (as defined) of no greater than 4.00. The company was in compliance with all loan agreements and debt covenants at July 3, 2011, and December 31, 2010, and has met all debt payment obligations. Additional details about our debt and receivables sales agreements are available in Notes 12 and 7, respectively, accompanying the unaudited condensed consolidated financial statements within Item 1 of this report.

Share Repurchases

Our share repurchases, net of issuances, totaled \$241.1 million in the first six months of 2011 compared to \$141.1 million in the first six months of 2010. For the full year of 2011, we expect to repurchase approximately \$400 million of our common shares, net of issuances, compared to \$506.7 million in 2010.

On August 2, 2011, in a privately negotiated transaction, Ball entered into an accelerated share repurchase agreement to buy \$125 million of its common shares using cash on hand and available borrowings. The company advanced the \$125 million on August 5, 2011, and received 3.1 million shares, which represented 90 percent of the total shares as calculated using the previous day's closing price share. The final number of shares will be determined before the end of 2011 based on the volume-weighted average trading price of the company's shares over an agreed upon period of time.

Management Performance Measures

The following financial measurements are on a non-U.S. GAAP basis and should be considered in connection with the unaudited condensed consolidated financial statements within Item 1 of this report. Non-U.S. GAAP measures should not be considered in isolation and should not be considered superior to, or a substitute for, financial measures calculated in accordance with U.S. GAAP. A presentation of earnings in accordance with U.S. GAAP is available in Item 1 of this report.

Management internally uses comparable earnings before interest and taxes (comparable EBIT), comparable earnings before interest, taxes, depreciation and amortization (comparable EBITDA) and comparable earnings to evaluate the company's performance and to evaluate strategic investments. We believe this information is also useful to investors as it provides insight into the earnings and cash flow criteria management uses to make strategic decisions. EBIT, EBITDA and net earnings are typically derived directly from the company's statements of earnings; however, they may be adjusted for items that affect comparability between periods.

Based on the above definitions, our calculation of comparable EBIT is summarized below:

(\$ in millions)	Three months ended		Six months ended	
	July 3, 2011	June 27, 2010	July 3, 2011	June 27, 2010

Edgar Filing: BALL CORP - Form 10-Q

Earnings before taxes, as reported	\$	208.9	\$	177.4	\$	356.4	\$	276.1
Add interest expense		45.2		44.7		91.7		78.6
Earnings before interest and taxes (EBIT)		254.1		222.1		448.1		354.7
Business consolidation activities		2.9		2.3		16.4		1.8
EBIT before above transaccctions (Comparable EBIT)	\$	257.0	\$	224.4	\$	464.5	\$	356.5

Edgar Filing: BALL CORP - Form 10-Q

Table of Contents

Our calculation of comparable net earnings is summarized below:

(\$ in millions, except per share amounts)	Three months ended		Six months ended	
	July 3, 2011	June 27, 2010	July 3, 2011	June 27, 2010
Net earnings attributable to Ball Corporation, as reported	\$ 143.1	\$ 69.0	\$ 234.4	\$ 148.3
Discontinued operations, net of tax	0.3	75.6	1.6	78.7
Business consolidation activities, net of tax	1.7	1.4	10.1	1.1
Gain and equity earnings related to acquisition, net of tax		(22.1)		(22.1)
Debt refinancing costs, net of tax		4.9		4.9
Net earnings attributable to Ball Corporation before above transactions (Comparable Earnings)	\$ 145.1	\$ 128.8	\$ 246.1	\$ 210.9
Per diluted share, as reported (a)	\$ 0.84	\$ 0.37	\$ 1.37	\$ 0.79
Per diluted share, as adjusted (a)	\$ 0.85	\$ 0.69	\$ 1.43	\$ 1.12

(a) Amounts in 2010 have been retrospectively adjusted for the two-for-one stock split that was effective on February 15, 2011.

Our calculations of comparable EBITDA, the comparable EBIT to interest ratio and the net debt to comparable EBITDA ratio for the 12 months ended July 3, 2011, are summarized below:

(\$ in millions, except ratios)

Net earnings from continuing operations	\$ 566.4
Add interest expense	171.3
Add tax provision	206.7
Less equity in results of affiliates	(86.4)
Earnings before interest and taxes (EBIT)	858.0
Add business consolidation and other activities	3.6
Comparable EBIT	861.6
Add depreciation and amortization	288.1
Comparable EBITDA	\$ 1,149.7
Interest expense, excluding debt refinancing costs of \$0.7 million	\$ (170.6)
Total debt at July 3, 2011	\$ 3,474.4
Less cash	(144.8)
Net debt	\$ 3,329.6
Comparable EBIT/Interest coverage	5.1x
Net debt/Comparable EBITDA	2.9x

CONTINGENCIES, INDEMNIFICATIONS AND GUARANTEES

Details about the company's contingencies, indemnifications and guarantees are available in Notes 18 and 19 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

Table of Contents

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the ordinary course of business, the company employs established risk management policies and procedures, which seek to reduce our exposure to fluctuations in commodity prices, interest rates, foreign currencies and prices of the company's common stock in regard to common share repurchases, although there can be no assurance that these policies and procedures will be successful. The company mitigates its exposure by spreading the risk among various counterparties, thus limiting exposure with any one party. The company also monitors the credit ratings of its suppliers, customers, lenders and counterparties on a regular basis. Further details are available in Item 7A within Ball's 2010 annual report filed on February 28, 2011, and in Note 17 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

Item 4. CONTROLS AND PROCEDURES

Our chief executive officer and chief financial officer participated in management's evaluation of our disclosure controls and procedures, as defined by the Securities and Exchange Commission (SEC), as of the end of the period covered by this report and concluded that our controls and procedures were effective. During the quarter, there were no changes in the company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

As permitted by SEC guidance, management has excluded the operations of Latapack-Ball Embalagens Ltda. (consolidated by the company as of August 2010), Guangdong Jianlibao Group Co., Ltd (consolidated by the company as of June 2010), and Neuman Aluminum (acquired by the company in July 2010) from its 2010 assessment of internal control over financial reporting. (Additional details regarding the acquisitions are available in Note 4 to the unaudited condensed consolidated financial statements within Item 1 of this report on Form 10-Q.) The acquired operations had combined assets and combined net sales representing 9 percent and 3 percent, respectively, of the related unaudited condensed consolidated financial statement amounts as of and for the year ended December 31, 2010. The controls for the 2010 acquisitions will be evaluated for inclusion in management's assessment of internal control over financial reporting by the end of 2011.

Management has excluded the operations of Aerocan S.A.S. (acquired by the company in January 2011) from its assessment of internal control over financial reporting. The controls for Aerocan S.A.S. will be evaluated for inclusion in management's assessment of internal control over financial reporting in 2012.

FORWARD-LOOKING STATEMENT

The company has made or implied certain forward-looking statements in this report which are made as of the end of the time frame covered by this report. These forward-looking statements represent the company's goals, and results could vary materially from those expressed or implied. From time to time we also provide oral or written forward-looking statements in other materials we release to the public. As time passes, the relevance and accuracy of forward-looking statements may change. Some factors that could cause the company's actual results or outcomes to differ materially from those discussed in the forward-looking statements include, but are not limited to: fluctuation in customer and consumer growth, demand and preferences; loss of one or more major customers or changes to contracts with one or more customers; insufficient production capacity; changes in senior management; the recent global recession and its effects on liquidity, credit risk, asset values and the economy; overcapacity in foreign and domestic metal container industry production facilities and its impact on pricing; failure to achieve anticipated productivity improvements or production cost reductions, including those associated with capital expenditures; changes in climate and weather; fruit, vegetable and fishing yields; power and natural resource costs; difficulty in obtaining supplies and energy, such as gas and electric power; availability and cost of raw materials, as well as the increases in steel, aluminum and energy costs, and the ability or inability to include or pass on to customers changes in raw material costs; changes in the pricing of the company's products and services; competition in pricing and the possible decrease in, or loss of, sales resulting therefrom; insufficient or reduced cash flow; the number and timing of the purchases of the company's common shares; the effects of other restrictive legislation, including with respect to packaging, such as recycling laws; interest rates affecting our debt; labor strikes; increases and trends in various employee benefits and labor costs, including pension, medical and health care costs; rates of return projected and earned on assets and discount rates used to measure future obligations and expenses of the company's defined benefit retirement plans; antitrust, intellectual property, consumer and other litigation; maintenance and capital expenditures; goodwill impairment; changes in generally accepted accounting principles or their interpretation; the authorization, funding, availability and returns of contracts for the aerospace and technologies segment and the nature and continuation of those contracts and related services provided thereunder; delays, extensions and technical uncertainties, as well as schedules of performance associated with such segment contracts; political and economic instability, including the recent sell-off on global equity markets, sanctions and the devaluation or revaluation of certain currencies; business risks with respect to changes in currency exchange rates; terrorist activity or war that disrupts the company's production or supply; regulatory action or laws affecting the company or its customers or suppliers, or any of their respective products, including tax, environmental, health and workplace safety, including in respect of climate change, or chemicals or substances used in raw materials or in the manufacturing process, particularly publicity concerning Bisphenol-A, or BPA, a chemical used in the manufacture of epoxy coatings applied to many types of containers (including certain of those produced by the company); technological developments and innovations; successful or unsuccessful acquisitions, joint ventures or divestitures and the integration activities associated therewith, including the recent disposition of our plastics business and the recent Aerocan S.A.S. acquisition; changes to unaudited results due to statutory audits of our financial statements or management's evaluation of the company's internal control over financial reporting; uncertainties surrounding the U.S. government budget and debt limit; recent uncertainties surrounding sovereign debt of various European countries, including Greece, Portugal, Spain and Italy, as well as Standard & Poor's recent ratings downgrade of United States government debt; and loss contingencies related to income and other tax matters, including those arising from audits performed by national and local tax authorities. If the company is unable to achieve its goals, then the company's actual performance could vary materially from those goals expressed or implied in the forward-looking statements. The company currently does not intend to publicly update forward-looking statements except as it deems necessary in quarterly or annual earnings reports. You are advised, however, to consult any further disclosures we make on related subjects in our 10-K, 10-Q and 8-K reports to the SEC.

Table of Contents**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

There were no events required to be reported under Item 1 for the quarter ended July 3, 2011, except as discussed in Note 18 to the unaudited condensed consolidated financial statements within Part I, Item 1 within this report.

Item 1A. Risk Factors

Risk factors affecting the company can be found within Item 1A of the company's annual report on Form 10-K.

Item 2. Changes in Securities

The following table summarizes the company's repurchases of its common stock during the quarter ended July 3, 2011.

Purchases of Securities

(\$ in millions)	Total Number of Shares Purchased	Weighted Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (b)
April 4 to May 1, 2011	850,231	\$ 36.59	850,231	17,385,737
May 2 to May 29, 2011	740,319	\$ 38.53	740,319	16,645,418
May 30 to July 3, 2011	1,053,517	\$ 37.98	1,053,517	15,591,901
Total	2,644,067(a)	\$ 37.69	2,644,067	

(a) Includes open market purchases (on a trade-date basis) and/or shares retained by the company to settle employee withholding tax liabilities.

(b) The company has an ongoing repurchase program for which shares are authorized from time to time by Ball's board of directors. On January 26, 2011, the Board authorized the repurchase by the company of up to a total of 20 million post-split shares. This repurchase authorization also replaced all previous authorizations.

Item 3. Defaults Upon Senior Securities

There were no events required to be reported under Item 3 for the quarter ended July 3, 2011.

Item 4. (Reserved)

Item 5. Other Information

There were no events required to be reported under Item 5 for the quarter ended July 3, 2011.
