The following is a description of the Company's business after giving effect to the transaction described in this Item 2.01.

Freestone Resources, Inc. ("Freestone" or the "Company") is an oil and gas technology development company. The Company's primary business is the development of new technologies that allow for the utilization of oil and gas resources in an environmentally responsible and cost effective way, as well as the development of technologies that can be used in the environmental cleanup of oil-based contaminant byproducts.

Enviro Serv owns certain proprietary technology that is a chemical solvent that can separate, extract and recycle hydrocarbon contaminants from ground soils, tar sands, vessels and other materials (the "Technology"). In this connection, Enviro Serv has engaged a fabricator to build a prototype machine (the "Prototype") designed to be used in conjunction with the Technology. Enviro Serv has granted licenses to EOSI to use the Technology. The licenses are EOSI's principal assets. Copies of the License Agreements between Enviro Serv and EOSI are attached to the Agreement as Exhibit A thereto.

Item 9.01. Financial Statements and Exhibits.
