**Anglo Swiss Resources Inc. Completes \$1,500,000 Private Placement**

**IMMEDIATE RELEASE**

**Vancouver, British Columbia.**

**March 8, 2010**

**TSX Venture: ASW**

**OTCBB: ASWRF**

**Frankfurt: AMO**

**Anglo Swiss Resources Inc.** (the Company) has completed the brokered private placement equity offering announced on February 26, 2010 issuing 4,285,715 units ("Units") at a price of \$0.35 per Unit for total gross proceeds of \$1.5 million. Each Unit consists of one common share (a Share) and one-half of one common share purchase warrant (a Warrant) of the Company. Each full Warrant shall be exercisable for a period of one year from the closing date at an exercise price of \$0.50 per Share.

Kingsdale Capital Markets Inc. of Toronto (Kingsdale) was the agent for the Company for this offering. The Company paid to Kingsdale a fee equal to 5% of the gross proceeds in cash and the Company granted to Kingsdale agent warrants (Agent Warrants) to acquire Units equal to 5% of the number of Units sold. The Agent Warrants will be exercisable for a period of one year, expiring on March 4, 2011 at \$0.35 per Unit.

All of the securities issued by Anglo Swiss pursuant to the private placements are subject to a four-month hold period under Canadian securities laws and are subject to restrictions on resale prior to July 5, 2010.

Anglo Swiss Resources Inc. is a mineral exploration company with its current focus on gold, silver and base metals at its 15,000 hectare Nelson Mining Camp located to the south west of Nelson, British Columbia.

The funds raised from this offering will be used for further exploration on the Nelson Mining Camp and the Company's 100% owned Kenville Gold Mine property where recent results have generated high grade gold assay results and for general corporate and working capital. Please visit the Company's website at [www.anglo-swiss.com](http://www.anglo-swiss.com) for more information on the Company and its projects.

**March 30, 2010**

**Anglo Swiss Resources Inc. Initiates 2010**

**Nelson Mining Camp Exploration**

**IMMEDIATE RELEASE**

**Vancouver, British Columbia.**

**March 30, 2010**

**TSX Venture: ASW**

**OTCBB: ASWRF**

**Frankfurt: AMO**

**Anglo Swiss Resources Inc.** ( Anglo Swiss ) has provided its 2010 exploration program on the 150 square kilometer Nelson Mining Camp which is expected to exceed \$3,000,000. Anglo Swiss geotechnical team has reviewed results of the initial Geotech VTEM airborne study interpreted in February of 2010; and has identified two large anomalies

within the Nelson Mining Camp.

A new Aeroquest MAG/EM geophysical airborne survey is scheduled to commence and will cover the entire property group and assist in the further targeting of potential mineralized bodies and in delineating the extent of the known mineralized systems. Anglo Swiss has selected the first 6 surface drill sites for their proximity within the two anomalies identified by the earlier Geotech VTEM survey.

The larger Aeroquest MAG/EM airborne survey is designed to substantially increase the further identification of drill targets throughout the entire property suite within the Nelson Mining Camp. The surface diamond drill program is scheduled to begin by the end of April, 2010.

The Nelson Camp provides a large footprint of highly prospective land as Anglo Swiss works towards meeting its goal of defining a gold enriched poly-metallic discovery extending to the south of the Kenville Mine property boundary. The Nelson Camp hosts the Company's 100% owned Kenville Gold Mine plus numerous historical gold, silver and copper producing mines, numerous surface adits and old workings. Anglo Swiss' exploration hypothesis, expanded onto the Nelson Camp, is that the possible conduits or source(s) for precious and base metals has never been tested by modern geophysics, surface drilling or computer modeling.

#### **About Anglo Swiss**

Anglo Swiss Resources is focused on the 15,000 hectare Nelson Mining Camp, the host to the Company's 100% owned Kenville Gold Mine plus numerous, historical producing gold, silver and copper mines, numerous surface adits and old workings. The exploration hypothesis is that the possible conduits or source(s) for precious and base metals has never been tested by modern geophysics, surface drilling or computer modeling.
