**Item Results of Operations and Financial Condition.**  
**2.02.**

On May 10, 2007, Anthracite Capital, Inc. (the "Company") issued a press release announcing its earnings for the quarterly period ended March 31, 2007, a copy of which it is furnishing under this Item 2.02 as Exhibit 99.1.

**Item Other Events.**  
**8.01.**

The Company reported the following results on May 10, 2007:

The Company today reported net income available to common stockholders for the first quarter of 2007 of \$0.41 per share, versus \$0.33 per share for the same three-month period in 2006. (All currency amounts discussed herein are in thousands, except share and per share amounts. All per share info is presented on a diluted basis.)

Based on the \$0.29 per share dividend declared on March 6, 2007, and the May 9, 2007 closing price of \$11.63, Anthracite's annualized dividend yield is 10.0%.

Chris Milner, Chief Executive Officer of the Company, stated, "During the past year the U.S. real estate debt markets have become increasingly competitive resulting in higher levels of leverage and fewer structural protections for lenders. In response to these changes, the Company has looked to non-U.S. markets for nearly 50% of its new investments. These relatively new structured finance markets have substantially fewer competitors and provide greater lender protection. Through April 30, 2007, our year-to-date volume of non-U.S. investments is up over 430% versus the prior year. The global reach of our Manager provides the Company with the ability to choose the commercial real estate markets that we feel provide the best value for our stockholders. The very positive results we are reporting today demonstrate the benefits of this approach as well as the Company's ability to grow its business while managing risk."

Mr. Milner also commented, "Subsequent to quarter-end however, the U.S. CMBS markets experienced significant volatility following announcements by the rating agencies that they are revising their approach to analyzing credit. We welcome this as a positive development and expect to see more conservative underwriting and more attractive pricing, creating greater opportunities for the Company to prudently grow the U.S. investment portfolio."

**Commercial Real Estate Investment Activity**

During the first quarter of 2007, the Company purchased a total of \$315,980 of commercial real estate assets, which included \$136,878 of non-U.S. dollar denominated assets. Commercial real estate assets purchased consisted of \$127,288 of commercial mortgage-backed securities ("CMBS"), \$181,298 of commercial real estate loans, and \$7,397 of real estate equity. Carbon Capital II, Inc. ("Carbon II") added over \$95,168 of additional U.S. dollar denominated investments during the first quarter and BlackRock Diamond Property Fund, Inc. ("BlackRock Diamond") added over \$388,400 of real estate equity investments. The Company sold residential mortgage-backed securities ("RMBS") with an adjusted purchase price of \$128,135. In addition, the Company sold a previously retained CDO bond with an adjusted purchase price of \$43,022. The bond, originally priced at a yield of 9.1%, was sold at a yield of 8.4%, resulting in a gain of \$6,630.

## Capital Markets Activity

### *Long-Term Liabilities:*

During April 2007, the Company also issued €50,000 junior subordinated notes due in 2022. The notes bear interest at a rate equal to 3-month Euribor plus 2.6%. The notes can be redeemed in whole by the Company subject to certain provisions. The proceeds from this issuance will be used to provide currency-matched capital to fund the Company's continued growth in the European markets.

During the first quarter of 2007, the Company issued an additional CDO bond, which had previously been retained, for \$11,476 at a cost of funds equal to 7.02%. The bond had been upgraded to BBB- from BB.

### *Equity Issuances:*

During the first quarter of 2007, the Company issued 127,063 shares of common stock under a sales agency agreement and its Dividend Reinvestment and Stock Purchase Plan. Net proceeds to the Company were approximately \$1,548.

On February 12, 2007, the Company issued \$86,250 of Series D Cumulative Redeemable Preferred Stock ("Series D Preferred Stock"), including \$11,250 of Series D Preferred Stock sold to underwriters pursuant to an over-allotment option. The Series D Preferred Stock will pay an annual dividend of 8.25%. Net proceeds to the Company were approximately \$83,306.

Richard Shea, President and Chief Operating Officer of the Company, stated, "The Company's increased pace of investment has required the issuance of over \$150,000 in debt and equity so far this year. We also sold two CDO bonds retained from prior CDO transactions which raised over \$61,000. Over the years, we have established a dynamic capital issuance platform, and we are an active issuer in a wide variety of securities, this includes borrowing in multiple currencies. This provides us with the ability to raise capital in the most cost-effective market and deploy it where we see the best risk adjusted returns. We recognize that the credit rating agencies' new analytical approach will affect our liabilities as well as present asset opportunities. Overall, we believe that a more balanced credit environment is positive for the Company's growth prospects and remain confident that the spread between our assets and liabilities will continue to provide strong returns for our stockholders."

### Commercial Real Estate Loans

During the first quarter of 2007, the Company purchased \$181,298 of commercial real estate loans. These purchases were comprised of two U.S. dollar denominated commercial real estate loans with a total cost of \$52,663 and a principal balance of \$52,725, three Euro denominated commercial real estate loans with a total cost of €75,502 (\$98,296) and a principal balance totaling €76,727, one Swiss Franc denominated loan with a cost of 23,804 CHF (\$14,724) and a principal balance of 23,923 CHF, and an additional investment in Carbon II of \$15,615. The Company's exposure to Swiss Francs was hedged with a standard currency swap contract. During the quarter ended March 31, 2007, the Company received repayments of commercial real estate loans in the aggregate amount of \$9,478.

Also included in commercial real estate loans are the Company's investments in Carbon Capital, Inc. ("Carbon I") and Carbon II (and collectively with Carbon I, the "Carbon Capital Funds"). For the quarters ended March 31, 2007 and 2006, the Company recorded income from the Carbon Capital Funds of \$3,986 and \$3,800, respectively. Carbon II increased its investment in U.S. commercial real estate loans by originating three loans for a total investment of \$95,168 during the first quarter of 2007. Paydowns in Carbon Capital Funds during the quarter totaled \$130,545 and Carbon II sold one loan with a carrying value of \$24,500. As loans are repaid or sold, Carbon II has redeployed capital into acquisitions of additional loans for the portfolio. The Carbon I investment period has expired and no new portfolio additions will occur.

The Company's investments in the Carbon Capital Funds were as follows:

	March 31, 2007	December 31, 2006
Carbon I	\$ 3,984	\$ 3,144
Carbon II	88,017	69,259
	\$ 92,001	\$ 72,403

### Commercial Real Estate Credit Risk

At March 31, 2007, all commercial real estate loans owned directly by the Company were performing in line with expectations. As previously reported, investments held by Carbon II, of which the Company owns 26%, include a \$24,546 commercial real estate mezzanine loan which defaulted during July 2006 and was subsequently cured. The underlying property is a hotel located in the South Beach area of Miami, Florida. In the first quarter, Carbon II purchased the controlling class position of the senior loan. This position is senior in the capital structure to Carbon's

existing investment and provides Carbon II with the ability to direct the workout process. Both loans matured in March 2007, and the borrower failed to repay triggering a maturity default. The borrower is in advanced discussions with a lender regarding a refinancing. Based on the credit analysis performed for this property, the loan to value of this loan is less than 60% and Carbon II believes a loan loss reserve is not necessary at this time.

---

As previously reported, two other loans held by Carbon II have defaulted. The aggregate carrying value of the two loans on Carbon II's consolidated financial statements is \$24,000 (\$12,000 per loan). The underlying properties, located in Orlando and Boynton Beach, Florida, are multi-family assets being converted to condominiums. Regarding the 336-unit property in Orlando, Carbon II is negotiating a workout arrangement with the borrower, whereby Carbon II will forebear from taking title and will make all advances necessary to operate the property and service the first mortgage. The borrower will continue to hold title and implement its new sales strategy. Since its implementation in March, 15 units have been sold and closed. An additional 65 units are under contract with deposits and 75 contracts are being prepared. Based on credit analysis performed for this property, Carbon II believes a loan loss reserve is not necessary at this time.

Regarding the 216-unit property in Boynton Beach, the borrower was not able to achieve sufficient condominium sales to complete the condominium conversion. The borrower defaulted on its loan. Carbon II has taken title to the property, hired an independent managing agent and intends to operate it as a rental property while preparing the property for sale. Based on the credit analysis performed for this property, at December 31, 2006, Carbon II established a loan loss reserve of \$5,180 for the loan, of which the Company's share is \$1,361. Carbon II determined that no change to the loan loss reserve was necessary at March 31, 2007. The Carbon Capital Funds are managed by Anthracite's Manager and all financial information utilized in this press release with respect to the Carbon Capital Funds was reported by the Carbon Capital Funds.

The Company considers CMBS where it maintains the right to control the foreclosure/workout process on the underlying loans as controlling class CMBS ("Controlling Class CMBS"). The Company acquired four Controlling Class CMBS transactions during the first quarter of 2007 and owns 33 Controlling Class CMBS transactions at March 31, 2007. Two of the Controlling Class CMBS transactions acquired during the quarter were denominated in Canadian dollars. At March 31, 2007, the principal balance of the loans underlying the Company's 33 Controlling Class CMBS transactions was \$49,811,289. Delinquencies of 30 days or more on these loans as a percent of current loan balances were 0.24% at March 31, 2007, compared with 0.39% at December 31, 2006.

At March 31, 2007, fifteen CMBS required an impairment charge totaling \$1,198. The updated yields in the first quarter 2007 that resulted in impairment charges were not related to an increase in losses but rather accelerated prepayments and changes in the timing of expected credit losses. During the quarter ended March 31, 2007, 42 of the Company's Controlling Class CMBS with an aggregate adjusted purchase price of \$318,701 experienced a weighted average yield increase of 34 basis points and 36 Controlling Class CMBS with an aggregate adjusted purchase price of \$161,066 experienced a weighted average yield decrease of ten basis points.

During the three months ended March 31, 2007, three of the Company's Controlling Class CMBS were upgraded by at least one rating agency. Additionally, at least one rating agency upgraded 26 of the Company's non-Controlling Class commercial real estate securities during the three months ended March 31, 2007. None of the Company's securities were downgraded during the three months ended March 31, 2007.

Changes in currency rates can adversely impact the estimated fair value and earnings of the Company's non-U.S. holdings. The Company mitigates this impact by utilizing local currency-denominated financing for its foreign investments and foreign currency forward commitments and currency swaps to hedge its net foreign currency exposure. For the three months ended March 31, 2007 and 2006, the Company recorded net foreign currency gains of \$1,484 and \$44, respectively.

**Book Value**

Net book value per share at March 31, 2007 was \$10.38. This was an increase of 0.3% from \$10.35 at December 31, 2006, and an increase of 5.1% from \$9.88 at March 31, 2006. This represented a total return, including dividends paid, of 2.7% and 15.2%, respectively, for the three and twelve months ended March 31, 2007. While the Company's recent vintage CMBS did experience some spread widening in the current market environment, the effect was more than offset by the performance of the Company's seasoned vintages.
