ITEM 1. DESCRIPTION OF BUSINESS

History of Business

Yasheng Eco-Trade Corporation (formerly known as (“f/k/a”) Vortex Resources Corp., Euroweb International Corp. and Emvelco Corp.) (“we”, “us”, “Vortex” or the “Company”), is a Delaware corporation and was organized on November 9, 1992. We were a development stage company through December 1993.”. On January 8, 2007, the Company changed its name from “Euroweb International Corp.” to “Emvelco Corp.”. On August 19, 2008, the Company changed its name from “Emvelco Corp.” to “Vortex Resources Corp”.

The Company’s holdings in its subsidiaries at December 31, 2008 was as follows:

100% of DCG – discontinued operations

50% of Vortex Ocean One, LLC

Approximately 7% of Micrologic, (held by EA Emerging Ventures Corp, a 100% owned subsidiary of the Company)

The above subsidiaries are presently dormant and the Company is presently conducting its business, the development of the logistics center, through Yasheng Eco-Trade Corporation.

Going Concern

The accompanying consolidated financial statements included in this Annual Report on Form 10-K/A include an opinion from Robinson, Hill & Co., the Company’s independent auditors, that there is substantial doubt as to our ability to continue as a going concern. As discussed in Note 13 to the financial statements, the financing of the Company’s projects is dependent on the future effect of the so called sub-prime mortgage crisis on financial institutions. This sub-prime crisis may affect the availability and terms of financing of the completion of the projects as well as the availability and terms of financing may affect the Company’s ability to obtain relevant financing, if required. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

General Business Strategy

Our business plan since 1993 has been identifying, developing and operating companies within emerging industries for the purpose of consolidation and sale if favorable market conditions exist. Although the Company primarily focuses on the operation and development of its core businesses, the Company pursues consolidations and sale opportunities in a variety of different industries, as such opportunities may present themselves, in order to develop its core businesses as well as outside of its core business. The Company may invest in other unidentified industries that the Company deems profitable. If the opportunity presents itself, the Company will consider implementing its consolidation strategy with its subsidiaries and any other business that it enters into a transaction. In January 2009, the Company commenced the development of a logistics center.

Yasheng Group Logistics Center

On January 20, 2009, the Company entered into a non-binding Term Sheet (the “Term Sheet”) with Yasheng Group, Inc., a California corporation (“Yasheng”). Yasheng is an agriculture conglomerate which has subsidiaries located in the Peoples Republic of China who are engaged in the production and distribution of agricultural, chemical and biotechnological products to the United States, Canada, Australia, Pakistan and various European Union countries as well as in China. Pursuant to the Term Sheet, Yasheng agreed to transfer 100% ownership of 80 acres of property located in Victorville, California for use as a logistics center and eco-trade cooperation zone (the “Project”). Vortex has

also agreed that it will change its name from “Vortex Resources Corp.” to “Yasheng EcoTrade Corporation”. As consideration for contributing the property, the Company agreed to issue Yasheng 130,000,000 shares of the Company’s common stock and Capitol Properties (“Capitol”), an advisor on the transaction, 100,000,000 shares of the Company’s common stock. On March 5, 2009, the Company and Yasheng implemented an amendment to the Term Sheet pursuant to which the parties agreed to explore further business opportunities including the potential lease of an existing logistics center, and/or alliance with other major groups complimenting and/or synergetic to the development of a logistics center. Further, in accordance with the amendment, the Company has issued 50,000,000 shares to Yasheng and 38,461,538 shares to Capitol in consideration for exploring the business opportunities and their efforts associated with the development of the logistics center. The issuance of the shares of common stock to Yasheng and Capital Properties resulted in substantial dilution to the interests of other stockholders of the Company but did not represent a change of control in the Company in light of the number of shares of common stock and Super Voting Series B Preferred Stock that were outstanding on the date of issuance. The Company and Yasheng have also evaluated several properties throughout California with the goal of leasing the property to be used for the logistics center. Management believes that leasing the property with an option to buy will have significant cost savings in comparison to acquiring such property. In June 2009, the Company has narrowed in search down to a few potential properties and has subsequently identified a specific site in the San Bernardino, California vicinity that it intends to move forward on.

On August 26, 2009, the Company entered into an agreement with Yasheng pursuant to which the Company agreed to acquire 49% of the outstanding securities (the “Yasheng Logistic Securities”) of Yasheng (the United States) Logistic Service Company Incorporated (“Yasheng Logistic”), a California corporation and a wholly owned subsidiary of Yasheng. In consideration of the Yasheng Logistic Securities, the Company will issue Yasheng 100,000,000 restricted shares of common stock of the Company. Further, Yasheng has agreed to cancel the 50,000,000 shares of the Company that were previously issued to Yasheng. The sole asset of Yasheng Logistic is the certificate of approval for Chinese enterprises investing in foreign countries granted by the Ministry of Commerce of the People’s Republic of China.

Our mission will be to develop an Asian Pacific Cooperation Zone in Southern California to enhance and enable increased trade between the United States and China. Our facility will provide a “Gateway to China” through a centralized location for the marketing, sales, customer service, product completion for “Made in the USA” products and distribution of goods imported from China. It will also promote Joint Ventures and exporting opportunities for US companies.

The importing or sourcing materials from China has been the solution for creating significant margins for goods sold in the United States. While many large multi-national companies have been able to navigate and capitalize on the opportunities the Chinese industrial complex has created, most US companies simply do not have the resources to manage the complexities of working with companies in China. Some of the complexities for US companies importing from China include selecting the right manufacturer or vendor for your company, addressing transportation, tax and customs issues and quality control and delivery issues..

Due to the complexities and uncertainties US companies have found trying to import goods and services from China, our goal is to establish a centralized US based trade center. The goal is to create a “Gateway to China” with warehouse and office space. The warehouse will be centrally located in Southern California with easy access to the ports of Long Beach and Los Angeles, and railways. The warehouse will have the ability to handle both 20 and 40 foot containers including wet, dry and cold storage. The office space will be designed to provide US headquarters for the Chinese companies involved. One of the keys to success for the Asian Pacific Cooperation Zone is the ability to leverage a common infrastructure of technology, administration and transportation to sell goods and services in the United States. We anticipate the Cooperative zone will be utilized for distribution, sales, marketing, warehousing, administration, customer service, showroom display, pick and pack services as well as other value added services that prepares products for delivery to customers.

The goal is for the Asian Pacific Cooperation Zone to initially house 50 companies. We expect to initially to retain these companies through our relationship with Yasheng Group which will include their subsidiaries as well as other companies from the Gansu region of Northwest China.

The business model is to facilitate the importing and exporting of goods and services. The primary regions for import/export are Gansu China and the western United States. Imports and Exports will be promoted and managed through the Asian Pacific Cooperation Zone. Revenue will be generated through a number of offerings including the lease of office space, storage space, distribution services, and administration services along with other value added services.

We have recently placed bids for lease/purchase option on three potential locations for the logistics center. After we have selected the site for our facility, the first phase will be preconstruction including design and obtaining required permits. The second phase will be construction and the third phase will be commencing operations focused on facilitating the sale of Chinese goods in the US and identifying opportunities for the completion of products within the US and also for export opportunities to China.

Our successful development of the logistics center includes many risks including raising adequate funds to pay for the lease of the facility and development of the facility of which there is no guarantee that such funds will be available, the general state of the economy in both the United States and China and concerns over whether the recession will continue or even possibly deepen. Further, if we fail to enter into a definitive agreement with Yasheng Group, we will lose a significant source of our potential clients for the logistics center. As such, we would be required to develop additional sources of clients and develop a significant sales force to achieve such result.

Yasheng Group Option

Pursuant to the Term Sheet, the Company granted Yasheng an irrevocable option to merge all or part of its assets into the Company (the "Yasheng Option"). If Yasheng exercises the Yasheng Option, as consideration for the transaction to be completed between the parties, Vortex will issue Yasheng such number of shares of the Company's common stock calculated by dividing the value of the assets which will be included in the transaction with the Company by the volume weighted average price of the Company's common stock as quoted on a national securities exchange or the Over-the-Counter Bulletin Board for the ten days preceding the closing date of such transaction. The value of the assets contributed by Yasheng will be based upon the asset value set forth in Yasheng's audited financial statements provided to the Company prior to the closing of any such transaction.. Furthermore, if a substantial portion of Yasheng is merged into the Company upon the exercise of the Yasheng Option, the Company agreed to change its name to "The Yasheng Group, Inc."

On August 26, 2009, the Company entered into a Stock Exchange Agreement (the “Exchange Agreement”) with Yasheng Group (BVI), a British Virgin Island corporation (“Yasheng-BVI”), pursuant to which Yasheng-BVI agreed to sell the Company 75,000,000 shares (the “Group Shares”) of common stock of Yasheng Group in consideration of 396,668,000 shares (the “Company Shares”) of common stock of the Company (the “Exchange”). The parties agreed to close the Exchange as soon as possible, but a closing date has not been set.

As the Company does not presently have the authorized amount of shares of common stock to provide for the issuance of the Company Shares, the parties agreed that the Company will issue the amount of shares of common stock presently available at the closing and will issue the balance of such Company Shares upon increasing the authorized shares of common stock. The Company has agreed that the Company Shares held by Yasheng-BVI are non-dilutive in that Yasheng-BVI shall never own less than 55% of the issued and outstanding shares of the Company. Yasheng-BVI may appoint a number of directors to the Board of Directors to provide voting control of the Board of Directors to Yasheng -BVI. Capitol Properties agreed to restructure its holdings in order to expedite the closing.

As part of the closing procedure, the Company requested that Yasheng-BVI provide a current legal opinion from a reputable Chinese law firm attesting to the fact that no further regulatory approval from the Chinese government is required as well as other closing conditions to close the Exchange. On November 3, 2009, the Company sent Group and Yasheng-BVI a letter demanding various closing items. Group and Yasheng-BVI did not deliver the requested items and, on November 9, 2009, after verbally consulting management of the Company with respect to the hardship and delays expected consolidating both companies audits, Group and Yasheng-BVI sent a termination notice to the Company advising that the Exchange Agreement has been terminated.

The Company is presently evaluating its options in moving forward with respect to Group based on various letters of intent and agreements with Group regarding various matters and is presently determining whether it should cease all activities with Group.

Real Estate Development and Financial Services Industries

Until December 31, 2007, the Company’s primary focus was on the business of real estate development and financial services industries through its wholly-owned subsidiary, Emvelco RE Corp, a Delaware corporation. (“ERC”) and ERC’s subsidiaries in the United States and Europe. The Company has resolved to discontinue its real estate operations.

The Company formed and organized 610 N Crescent Heights LLC and 13059 Dickens LLC, for the purpose of developing two separate single family homes for future sales.. The Company owned 100% of subsidiary 610 N. Crescent Heights, LLC, which is located in Los Angeles, CA. On April 2008, the Company obtained Certificate of Occupancy from the City of Los Angeles, and listed the property for sale at selling price of \$2,000,000. At September 30, 2008, the Company sold the property for the gross sale price of \$1,990,000.

We formed and organized 13059 Dickens LLC, a California limited liability company (the “Dickens LLC”) on November 20, 2007 to purchase and develop that certain property located at 13059 Dickens Street, Studio City, California 91604 (the “Dickens Property”). On December 5, 2007, the Dickens LLC entered into an All Inclusive Deed of Trust, All Inclusive Promissory Note in the principal amount of \$1,065,652.39, Escrow Instructions and Grant Deed in connection with the purchase of the Dickens Property. Pursuant to the All Inclusive Deed of Trust and All Inclusive Promissory Note, the Dickens LLC purchased the Dickens Property for the total consideration of \$1,065,652.39 from an unrelated third party (“Seller”) and fifty percent (50%) owner of the Dickens LLC. The Company and Seller formed the Dickens LLC to own and operate the Dickens Property and to develop a single family residence at the location. As a result of the change in the Company’s business focus, the Company entered advanced negotiations with regards to selling its interest to the other party at no cost to the Company, by conveying back title of

said property, and releasing the Company from any associated liability. As of September 30, 2008, the project was sold back to the third party, by reversing the transaction, at no cost to the Company.

Mineral Resources Industry

In 2008, the Company's primary focus shifted from real estate development and financial services industries to the mineral resources industry, specifically within the gas and oil sub-industry. On May 1, 2008, the Company entered into an Agreement and Plan of Exchange (the "DCG Agreement") with Davy Crockett Gas Company, LLC ("DCG") and its members ("DCG Members"). Pursuant to the DCG Agreement, the Company acquired and the DCG Members sold, 100% of the outstanding membership in DCG in exchange for 50,000,000 shares of preferred stock of the Company. The sales price was \$50 million, as calculated by the 50 million shares at an agreed price of \$1.00.

On June 30, 2008, the Company formed Vortex Ocean One LLC (“Vortex One”) with Tiran Ibgui, an individual (“Ibgui”). In addition, we assigned the four leases in Crockett County, Texas to Vortex One. As a condition precedent to Ibgui contributing the required funding, Vortex One pledged all of its assets to Ibgui including the leases. On October 29, 2008, the Company entered into a settlement arrangement with Mr. Ibgui, whereby the Company agreed to transfer the 525,000 common shares previously owned by Vortex One to Mr. Ibgui.

Due to current issues in the development of the oil and gas project in Crockett County, Texas, the board obtained a current reserve report for the Company’s interest in DCG and Vortex One, which report indicated that the DCG properties as being negative in value. As a result of such report, the world and US recessions and the depressed oil and gas prices, the board of directors elected to dispose of the DCG property and/or desert the project in its entirety.

Further, in February 28, 2009, Ibgui, as the secured lender to Vortex One, directed Vortex One to assign the term assignments with 80% of the proceeds being delivered to Ibgui, as secured lender, and 20% of the proceeds being delivered to the Company – as per the original agreement. The transaction closed on February 28, 2009 in consideration of a cash payment in the amount of \$225,000, a 12 month promissory note in the amount of \$600,000 and a 60 month promissory note in the amount of \$1,500,000. Mr. Ibgui paid \$25,000 fee, and from the net consideration of \$200,000 Mr. Ibgui paid the Company its 20% portion of \$40,000 on March 3, 2009. No relationship exists between Ibgui, the assignee of the leases and the Company and/or its affiliates, directors, officers or any associate of an officer or director.

On January 13, 2009, the Company entered into a Non Binding Term Sheet (the “Grand Term Sheet”) to enter into a definitive asset purchase agreement with Grand Pacaraima Gold Corp. (“Grand”), which owns 80% of the issued and outstanding securities of International Treasure Finders Incorporated to acquire certain oil and gas rights on approximately 481 acres located in Woodward County, Oklahoma (the “Woodward County Rights”). In consideration for the Woodward County Rights, the Company will pay Grand an amount equal to 50% of the current reserves. The consideration shall be paid half in shares of common stock of the Company and half in the form of a note. The number of shares to be delivered by the Company will be calculated based upon the volume weighted average price (“VWAP”) for the ten days preceding the closing date. The note will mature on December 31, 2009 and carry interest of 9% per annum payable monthly. In addition, the note will be convertible into shares of common stock of the Company at a 10% discount to the VWAP for the ten days preceding conversion. At the Company election, the Company may enter into this transaction utilizing a subsidiary to be traded on the Swiss Stock Exchange. The above transaction is subject to the receipt of a reserve report, drafting and negotiation of a final definitive agreement, performing due diligence as well as board approval of the Company. As such, there is no guarantee that the Company will be able to successfully close the above transaction. Dr. Gregory Rubin, a director of the Company, is an affiliate of ITFI and, as a result, has recused himself from any discussions regarding this matter. Due to the drastic decline in gas and oil prices, the Company has shelved this transaction and may in the future again attempt to commence discussions with Grand in the future.

Micrologic, Inc.

On October 11, 2006, the Company, through EA Emerging Ventures Inc. (“EVC”) entered into a Term Sheet (the “Micro Term Sheet”) with Dr. Danny Rittman in connection with the formation and initial funding of Micrologic, Inc. (“Micrologic”), a Nevada corporation, for the design and production of EDA applications and Integrated Circuit (“IC”) design processes; specifically, the development and production of the NanoToolBox™ tools suite which shortens the time to market factor. NanoToolBox™ is a smart platform that is designed to accelerate IC’s design time and shrink time to market factor. Pursuant to the Micro Term Sheet, the Company was obligated to fund Micrologic \$1 million and only funded \$400,000 to date.

On November 15, 2007, the parties entered into a Settlement and Release Agreement and Amendment No. 1 (the "Micro Amendment") to that certain Micro Term Sheet. Pursuant to the Micro Amendment, the Company was required to fund an additional \$50,000 for a total investment of \$450,000 and received 100,000 shares of Micrologic (vested via EVC) representing about ten percent (10%) equity ownership in Micrologic, prior to further dilution. The Micro Amendment also contains a settlement and release clause releasing the parties from any further obligations to each other. Micrologic subsequently issued additional securities diluting our interest to approximately 7% of the issued and outstanding of Micrologic, Inc.

As a smaller reporting company, as defined in Rule 12b-2 of the Exchange Act, we are not required to provide the information required by this Item.

ITEM 7 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of the results of our operations and financial condition should be read in conjunction with our financial statements and the related notes, which appear elsewhere in this annual report.

Operations

Our business plan since 1993 has been identifying, developing and operating companies within emerging industries for the purpose of consolidation and sale if favorable market conditions exist. Although the Company primarily focuses on the operation and development of its core businesses, the Company pursues consolidations and sale opportunities in a variety of different industries, as such opportunities may present themselves, in order to develop its core businesses as well as outside of its core business. The Company may invest in other unidentified industries that the Company deems profitable. If the opportunity presents itself, the Company will consider implementing its consolidation strategy with its subsidiaries and any other business that it enters into a transaction. In January 2009, the Company commenced the development of a logistics center.

On January 20, 2009, the Company entered into a non-binding Term Sheet (the "Term Sheet") with Yasheng Group, Inc., a California corporation ("Yasheng"). Yasheng is an agriculture conglomerate which has subsidiaries located in the Peoples Republic of China who are engaged in the production and distribution of agricultural, chemical and biotechnological products to the United States, Canada, Australia, Pakistan and various European Union countries as well as in China. Pursuant to the Term Sheet, Yasheng agreed to transfer 100% ownership of 80 acres of property located in Victorville, California for use as a logistics center and eco-trade cooperation zone (the "Project"). Vortex has also agreed that it will change its name from "Vortex Resources Corp." to "Yasheng EcoTrade Corporation". As consideration for contributing the property, the Company agreed to issue Yasheng 130,000,000 shares of the Company's common stock and Capitol Properties ("Capitol"), an advisor on the transaction, 100,000,000 shares of the Company's common stock. On March 5, 2009, the Company and Yasheng implemented an amendment to the Term Sheet pursuant to which the parties agreed to explore further business opportunities including the potential lease of an existing logistics center, and/or alliance with other major groups complimenting and/or synergetic to the development of a logistics center. Further, in accordance with the amendment, the Company has issued 50,000,000 shares to Yasheng and 38,461,538 shares to Capitol in consideration for exploring the business opportunities and their efforts associated with the development of the logistics center. The issuance of the shares of common stock to Yasheng and Capital Properties resulted in substantial dilution to the interests of other stockholders of the Company but did not represent a change of control in the Company in light of the number of shares of common stock and Super Voting Series B Preferred Stock that were outstanding on the date of issuance.

The Company and Yasheng have also evaluated several properties throughout California with the goal of leasing the property to be used for the logistics center. Management believes that leasing the property with an option to buy will have significant cost savings in comparison to acquiring such property. In June 2009, the Company has narrowed in search down to a few potential properties and has subsequently identified a specific site in the San Bernardino, California vicinity that it intends to move forward on.

On August 26, 2009, the Company entered into an agreement with Yasheng pursuant to which the Company agreed to acquire 49% of the outstanding securities (the "Yasheng Logistic Securities") of Yasheng (the United States) Logistic

Service Company Incorporated (“Yasheng Logistic”), a California corporation and a wholly owned subsidiary of Yasheng. In consideration of the Yasheng Logistic Securities, the Company will issue Yasheng 100,000,000 restricted shares of common stock of the Company. Further, Yasheng has agreed to cancel the 50,000,000 shares of the Company that were previously issued to Yasheng. The sole asset of Yasheng Logistic is the certificate of approval for Chinese enterprises investing in foreign countries granted by the Ministry of Commerce of the People’s Republic of China.

Pursuant to the Term Sheet, the Company granted Yasheng an irrevocable option to merge all or part of its assets into the Company (the “Yasheng Option”). If Yasheng exercises the Yasheng Option, as consideration for the transaction to be completed between the parties, Vortex will issue Yasheng such number of shares of the Company’s common stock calculated by dividing the value of the assets which will be included in the transaction with the Company by the volume weighted average price of the Company’s common stock as quoted on a national securities exchange or the Over-the-Counter Bulletin Board for the ten days preceding the closing date of such transaction. The value of the assets contributed by Yasheng will be based upon the asset value set forth in Yasheng’s audited financial statements provided to the Company prior to the closing of any such transaction.. Furthermore, if a substantial portion of Yasheng is merged into the Company upon the exercise of the Yasheng Option, the Company agreed to change its name to “The Yasheng Group, Inc.”

On August 26, 2009, the Company entered into a Stock Exchange Agreement (the “Exchange Agreement”) with Yasheng Group (BVI), a British Virgin Island corporation (“Yasheng-BVI”), pursuant to which Yasheng-BVI agreed to sell the Company 75,000,000 shares (the “Group Shares”) of common stock of Yasheng Group in consideration of 396,668,000 shares (the “Company Shares”) of common stock of the Company (the “Exchange”). The parties agreed to close the Exchange as soon as possible, but a closing date has not been set.

As the Company does not presently have the authorized amount of shares of common stock to provide for the issuance of the Company Shares, the parties agreed that the Company will issue the amount of shares of common stock presently available at the closing and will issue the balance of such Company Shares upon increasing the authorized shares of common stock. The Company has agreed that the Company Shares held by Yasheng-BVI are non-dilutive in that Yasheng-BVI shall never own less than 55% of the issued and outstanding shares of the Company. Yasheng-BVI may appoint a number of directors to the Board of Directors to provide voting control of the Board of Directors to Yasheng -BVI. Capitol Properties agreed to restructure its holdings in order to expedite the closing. Further, both parties have agreed to restructure the Exchange Agreement for tax or other purposes as needed and the Company has agreed to enter into the required financing arrangements that are acceptable to Yasheng-BVI prior to Closing.

As part of the closing procedure, the Company requested that Yasheng-BVI provide a current legal opinion from a reputable Chinese law firm attesting to the fact that no further regulatory approval from the Chinese government is required as well as other closing conditions to close the Exchange. On November 3, 2009, the Company sent Group and Yasheng-BVI a letter demanding various closing items. Group and Yasheng-BVI did not deliver the requested items and, on November 9, 2009, after verbally consulting management of the Company with respect to the hardship and delays expected consolidating both companies audits, Group and Yasheng-BVI sent a termination notice to the Company advising that the Exchange Agreement has been terminated.

The Company is presently evaluating its options in moving forward with respect to Group based on various letters of intent and agreements with Group regarding various matters and is presently determining whether it should cease all activities with Group.

As of December 31, 2008, the Company and its subsidiaries’ major assets were in the industry of Resources and Energy – oil and gas segment.

The CH Property was acquired for \$900,000 not including closing costs. On November 13, 2007 the CH LLC finalized a construction loan with East West Bank of \$1,440,000. The CH Property was completed and sold on August 15, 2008, as the LLC entered into a Sale and Escrow Instruction Agreements with third parties for \$1,990,000 in gross proceeds, which was closed on September 30, 2008.

On December 5, 2007, the Dickens LLC entered into an All Inclusive Deed of Trust, All Inclusive Promissory Note in the principal amount of \$1,065,652, Escrow Instructions and Grant Deed in connection with the purchase of the Dickens Property. Pursuant to the All Inclusive

Deed of Trust and All Inclusive Promissory Note, the Dickens LLC purchased the Dickens Property for the total consideration of \$1,065,652 from an unrelated third party (“Seller”), and fifty percent (50%) owner of the Dickens LLC. The Company and Seller formed the Dickens LLC to own and operate the Dickens Property and to develop a single family residence at the location. The Dickens LLC is owned 50/50 by the Company and Seller. Escrow closed on December 18, 2007. The Dickens Property is under construction. The Company reversed the transaction on August 19, 2008 with its partner to be released from the project at no cost or liability to the Company.

Disposal of AGL shares: On August 19, 2008 the Company entered into final fee agreement with Consultant, where the Company had to pay Consultant certain fees in accordance with the agreement entered with the Consultant, the Consultant had agreed that, in lieu of cash payment, it would receive an aggregate of up to 734,060,505 shares of stock of the AGL, which represent disposal of all the Company holdings with AGFL and its subsidiaries. Said transaction is detailed in Item 1 of this report, under the sub-title: “History of Acquisitions and Dispositions - Financial Investment and Real Estate Industry”.

As of December 31, 2008 the Company does not have any interests in real estate development.

Mineral Resources

On June 30, 2008, the Company formed Vortex Ocean One LLC ("Vortex One") with Tiran Ibgui, an individual ("Ibgui"). In addition, we assigned the four leases in Crockett County, Texas to Vortex One. As a condition precedent to Ibgui contributing the required funding, Vortex One pledged all of its assets to Ibgui including the leases. On October 29, 2008, the Company entered into a settlement arrangement with Mr. Ibgui, whereby the Company agreed to transfer the 525,000 common shares previously owned by Vortex One to Mr. Ibgui.

Due to current issues in the development of the oil and gas project in Crockett County, Texas, the board obtained a current reserve report for the Company's interest in DCG and Vortex One, which report indicated that the DCG properties as being negative in value. As a result of such report, the world and US recessions and the depressed oil and gas prices, the board of directors elected to dispose of the DCG property and/or desert the project in its entirety.

Further, in February 28, 2009, Ibgui, as the secured lender to Vortex One, directed Vortex One to assign the term assignments with 80% of the proceeds being delivered to Ibgui, as secured lender, and 20% of the proceeds being delivered to the Company – as per the original agreement. The transaction closed on February 28, 2009 in consideration of a cash payment in the amount of \$225,000, a 12 month promissory note in the amount of \$600,000 and a 60 month promissory note in the amount of \$1,500,000. Mr. Ibgui paid \$25,000 fee, and from the net consideration of \$200,000 Mr. Ibgui paid the Company its 20% portion of \$40,000 on March 3, 2009. No relationship exists between Ibgui, the assignee of the leases and the Company and/or its affiliates, directors, officers or any associate of an officer or director.

Plan of operation

The Company intends to continue to develop its logistics center with the continued support and involvement of Yasheng. Its efforts will be focused on obtaining the required financing to develop the center, selecting the appropriate facility for lease and commencing sales. Secondly, the Company will pursue options provided by Yasheng if it elects to contribute any of its assets to the Company as well as closing the agreement with Yasheng-BVI. The issuance of the shares of common stock to Yasheng upon completion of the transaction(s) to be completed subsequent to the exercise of the Yasheng Option will potentially result in substantial dilution to the interests of other stockholders of the Company and could result in a change of control of the Company on the date of issuance. The transaction to be completed upon the exercise of the Yasheng Option is subject to the drafting and negotiation of a final definitive agreement, performing due diligence as well as board approval from both parties. As such, there is no guarantee that the Company will be able to successfully close the above transaction.

The above efforts are subject to obtaining adequate financing on acceptable terms. The Company anticipates that it will be spending approximately \$2,000,000 over the next 12 month period pursuing its stated plan. The Company's present cash reserves and monetary assets are not sufficient to carry out its plan of operation without substantial additional financing. The Company is currently attempting to arrange for financing through mezzanine arrangements, debt or equity that would enable it to proceed with its plan of investment operation. However, there is no guarantee that we will be able to close such financing transaction or, if financing is available, that the terms will be acceptable to the Company.

Critical Accounting Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements that have been prepared in accordance with generally accepted accounting principles in the United States of America ("US GAAP"). This preparation requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and

liabilities. US GAAP provides the framework from which to make these estimates, assumptions and disclosures. We choose accounting policies within US GAAP that management believes are appropriate to accurately and fairly report our operating results and financial position in a consistent manner. Management regularly assesses these policies in light of current and forecasted economic conditions. Although we believe that our estimates, assumptions and judgments are reasonable, they are based upon information presently available. Actual results may differ significantly from these estimates under different assumptions, judgments or conditions for a number of reasons. Our accounting policies are stated in details in Note 2 to the Consolidated Financial Statements. We identified the following accounting policies as critical to understanding the results of operations and representative of the more significant judgments and estimates used in the preparation of the consolidated financial statements: impairment of goodwill, allowance for doubtful accounts, acquisition related assets and liabilities, accounting of income taxes and analysis of FIN46R as well as FASB 67.

Investment in Real Estate and Commercial Leasing Assets. Real estate held for sale and construction in progress is stated at the lower of cost or fair value less costs to sell and includes acreage, development, construction and carrying costs and other related costs through the development stage. Commercial leasing assets, which are held for use, are stated at cost. When events or circumstances indicate that an asset's carrying amount may not be recoverable, an impairment test is performed in accordance with the provisions of SFAS 144. For properties held for sale, if estimated fair value less costs to sell is less than the related carrying amount, then a reduction of the assets carrying value to fair value less costs to sell is required. For properties held for use, if the projected undiscounted cash flow from the asset is less than the related carrying amount, then a reduction of the carrying amount of the asset to fair value is required. Measurement of the impairment loss is based on the fair value of the asset. Generally, we determine fair value using valuation techniques such as discounted expected future cash flows. Based on said GAAP, the Company made a provision to doubtful debts, on all ERC and Verge balances.

Our expected future cash flows are affected by many factors including:

- a) The economic condition of the US and Worldwide markets – especially during these current times of worldwide financial crisis.
- b) The performance of the underline assets in the markets where our properties are located;
- c) Our financial condition, which may influence our ability to develop our properties; and
- d) Governmental regulations.

Because any one of these factors could substantially affect our estimate of future cash flows, this is a critical accounting policy because these estimates could result in us either recording or not recording an impairment loss based on different assumptions. Impairment losses are generally substantial charges.

The estimate of our future revenues is also important because it is the basis of our development plans and also a factor in our ability to obtain the financing necessary to complete our development plans. If our estimates of future cash flows from our properties differ from expectations, then our financial and liquidity position may be compromised, which could result in our default under certain debt instruments or result in our suspending some or all of our development activities.

Allocation of Overhead Costs. We periodically capitalize a portion of our overhead costs and also allocate a portion of these overhead costs to cost of sales based on the activities of our employees that are directly engaged in these activities. In order to accomplish this procedure, we periodically evaluate our “corporate” personnel activities to see what, if any, time is associated with activities that would normally be capitalized or considered part of cost of sales. After determining the appropriate aggregate allocation rates, we apply these factors to our overhead costs to determine the appropriate allocations. This is a critical accounting policy because it affects our net results of operations for that portion which is capitalized. In accordance with paragraph 7 of SFAS No. 67, we only capitalize direct and indirect project costs associated with the acquisition, development and construction of a real estate project. Indirect costs include allocated costs associated with certain pooled resources (such as office supplies, telephone and postage) which are used to support our development projects, as well as general and administrative functions. Allocations of pooled resources are based only on those employees directly responsible for development (i.e. project manager and subordinates). We charge to expense indirect costs that do not clearly relate to a real estate project such as salaries and allocated expenses related to the Chief Executive Officer and Chief Financial Officer.

We recognize our rental income based on the terms of our signed leases with tenants on a straight-line basis. We recognize sales commissions and management and development fees when earned, as lots or acreages are sold or when the services are performed.

Accounting for Income Taxes: We recognize deferred tax assets and liabilities for the expected future tax consequences of transactions and events. Under this method, deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. If necessary, deferred tax assets are reduced by a valuation allowance to an amount that is determined to be more likely than not recoverable. We must make significant estimates and assumptions about future taxable income and future tax consequences when determining the amount of the valuation allowance. In addition, tax reserves are based on significant estimates and assumptions as to the relative filing positions and potential audit and litigation exposures related thereto. To the extent the Company establishes a valuation allowance or increases this allowance in a period, the impact will be included in the tax provision in the statement of operations.

The disclosed information presents the Company's natural gas producing activities as required by Statement of Financial Accounting Standards No. 69, "Disclosures about Oil and Gas Producing Activities."

Commitments and contingencies

Our Commitments and contingencies are stated in details in Notes to the Consolidated Financial Statements, which include as mandatory required supplemental information about gas and oil. On this section management give a more detailed disclosures to specific commitments and contingencies that were in place (for disposed properties) prior of completion of the DCG acquisition which changed the Company strategic substantially.

Effective July 1, 2006, the Company entered into a five-year employment agreement with Yossi Attia as the President of ERC which commenced on July 1, 2006 and provides for annual compensation of \$240,000 and an annual bonus of not less than \$120,000 per year, as well as an annual car allowance for the same period. In addition, on August 14, 2006, the Company amended the Agreement to provide that Mr. Attia shall serve as the Chief Executive Officer of the Company for a term of two years commencing August 14, 2006 and granting annual compensation of \$250,000 to be paid in the form of Company shares of common stock.

Mr. Attia will be entitled to a special bonus equal to 10% of the earnings before interest, depreciation and amortization (“EBITDA”) of ERC, which such bonus is payable in shares of common stock of the Company; provided, however, the special bonus is only payable in the event that Mr. Attia remains continuously employed by ERC and Mr. Attia shall not have sold shares of common stock of the Company on or before the payment date of the Special Bonus unless such shares were received in connection with the exercise of an option that was scheduled to expire within one year of the date of exercise. Mr. Attia has waived his rights to the receipt of the shares.

Based upon a swap agreement dated August 19, 2008, which was executed between C. Properties Ltd. (“C. Properties”) and KSD Pacific, LLC (“KSD”), which is controlled by Mr. Yossi Attia Family Trust, where KSD will sell to C. Properties, and C. Properties will purchase from KSD, all its holdings of the Company which amount to 1,505,644 shares of common stock of the Company for a purchase price of 734,060,505 shares of common stock of AGL.

On September 1, 2008 Star Equity Investment LLC a third party acquired from Mr. Attia, a \$1 million note due by the Company since January 1, 2008. Said note is bearing 12% interest commencing October 1st, 2008 and can be converted (including interest) into common shares of the Company at a fixed price of \$0.75 per share. Equity Investment LLC noticed the Company that due to the Company default on said note, it willing to enter negotiations to modify its instrument. The parties agreed to settle by converting the note including interest into 8.5 million common shares of the Company. Said agreements are being drafted by the Company attorney.

As of the date of closing this filing, the Company via its sub, completed the drilling of all 4 wells at the estimated cost of \$2,100,000 for four wells (not including option payments). The Company also exercised its fifth well option (by paying per the master agreement \$50,000 option fee on November 5, 2008). In lieu of the world financial markets crisis, the Company approached the land owners on DCG mineral rights, requesting an amendment to allow DCG an additional six (6) months before it is required to exercise another option to secure a Term Assignment of Oil and Gas Lease pursuant to the terms of the original Agreement dated March 5, 2008. The land owner’s representative has answered the Company’s request with discrepancies about the date as effective date.

The Company refers the reader to its Notes to the Consolidated Financial Statements which include material disclosing of all the Company’s Commitments and contingencies, as well as prior items which disclose Legal Proceeding.

Year ended December 31,	2008	2007
Interest income	\$ 729,097	\$ 1,665,379
Interest expense	\$ (1,922,983)	\$ —
Net interest income (expense)	\$ (1,193,886)	\$ 1,665,379

The decrease in interest income is attributable to the Company investing strategy pending establishment of the real estate development business, as well as loans to Verge, together with capitalized 10 million dollars into Verge equity as part of the AGL transaction, which reduced materially the amounts entitled to interest income. Since the board resolved to discontinue real estate operations during 2008, interest expense of \$0 and \$386,108 for the real estate

properties are included as part of discontinued operations for the years ended December 31, 2008 and 2007, respectively. (Note 10)

Additionally, the increase in interest expense is primarily due to interest expense recognized for a debt discounts relating to a convertible notes payable in the amount of \$966,261. The remaining increase is due to the interest accrued due to former DCG members as well as the increase line of credits and short time borrowing outstanding during the year.

Liquidity and Capital Resources

As of December 31, 2008, our cash, cash equivalents and marketable securities were \$123,903, a decrease of approximately \$245,000 from the end of fiscal year 2007. The decrease in our cash, cash equivalents and marketable securities is primarily the result of pay-off bank loans and conversion of notes payable.

Cash flow provided from operating activities for the year ended December 31, 2008 was \$(230,983) and cash flow used in operating activities was \$87,636 for the year ended December 31, 2007. The change is primarily due a larger net loss in 2008.

Cash flow used in investing activities for the year ended December 31, 2008 and 2007 was \$327,102 and \$3,832,323, respectively. The change was primarily due to the significant reduction in loan advances to ERC and Verge of approximately \$8,600,000 offset slightly by the cash received from the sale of discontinued operations of Navigator of \$3,200,000 in 2007.

Cash used in financing activities was approximately \$341,792 for the year ended December 31, 2008 and cash provided by financing activities was \$1,261,643 for the year ended December 30 2007. This change is due to the repayment of a bank loan in 2008, which was provided in 2007.

The Company held restricted Certificate of Deposits (CD) with the Bank to access a revolving line of credit. These deposits are interest bearing and approximated \$4.196 million as of September 30, 2008. On November 8, 2007, the lines of credits were increased and extended as the following: \$4,180,000 until October 16, 2008 and \$4,229,000 until September 1, 2008. Both lines bear interest of 5.87% and are secured by restricted cash deposited in CD's with the bank. On August 2008, the company notified the bank, not to extend the deposits, and pay it off from the CD.

In the event the Company makes future acquisitions or investments, additional bank loans or fund raising may be used to finance such future acquisitions. The Company may consider the sale of non-strategic assets. The Company currently anticipates that its available cash resources will not be sufficient to meet its prior anticipated working capital requirements, though it will be sufficient manage the existing business of the Company without further development.

Inflation and Foreign Currency

The Company maintains its books in local currency: on sold assets - Kuna for Sitnica, N.I.S for AGL and US Dollars for the Parent Company registered in the State of Delaware. The Company's operations are primarily in the United States through its wholly owned subsidiaries. Some of the Company's customers were in Croatia. As a result, fluctuations in currency exchange rates may significantly affect the Company's sales, profitability and financial position when the foreign currencies, primarily the Croatian Kuna, of its international operations are translated into U.S. dollars for financial reporting. In additional, we are also subject to currency fluctuation risk with respect to certain foreign currency denominated receivables and payables. Although the Company cannot predict the extent to which currency fluctuations may, or will, affect the Company's business and financial position, there is a risk that such fluctuations will have an adverse impact on the Company's sales, profits and financial position. Because differing portions of our revenues and costs are denominated in foreign currency, movements could impact our margins by, for example, decreasing our foreign revenues when the dollar strengthens and not correspondingly decreasing our expenses. The Company does not currently hedge its currency exposure. In the future, we may engage in hedging transactions to mitigate foreign exchange risk.

Effect of Recent Accounting Pronouncements

In December 2007, the Securities and Exchange Commission ("SEC") issued Staff Accounting Bulletin No. 110 ("SAB 110"). SAB 110 amends and replaces Question 6 of Section D.2 of Topic 14, "Share-Based Payment," of the Staff Accounting Bulletin series. Question 6 of Section D.2 of Topic 14 expresses the views of the staff regarding the use of the "simplified" method in developing an estimate of the expected term of "plain vanilla" share options and allows usage of the "simplified" method for share option grants prior to December 31, 2007. SAB 110 allows public companies which do not have historically sufficient experience to provide a reasonable estimate to continue to use the "simplified" method for estimating the expected term of "plain vanilla" share option grants after December 31, 2007. The Company will

continue to use the “simplified” method until it has enough historical experience to provide a reasonable estimate of expected term in accordance with SAB 110.

In December 2007, the FASB issued Statement of Financial Accounting Standards (“SFAS”) 141-R, “Business Combinations.” SFAS 141-R retains the fundamental requirements in SFAS 141 that the acquisition method of accounting (referred to as the purchase method) be used for all business combinations and for an acquirer to be identified for each business combination. It also establishes principles and requirements for how the acquirer: (a) recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree; (b) recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase and (c) determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141-R will apply prospectively to business combinations for which the acquisition date is on or after the Company’s fiscal year beginning October 1, 2009. While the Company has not yet evaluated the impact, if any, that SFAS 141-R will have on its consolidated financial statements, the Company will be required to expense costs related to any acquisitions after September 30, 2009.

In December 2007, the FASB issued SFAS 160, “Non-controlling Interests in Consolidated Financial Statements.” This Statement amends Accounting Research Bulletin 51 to establish accounting and reporting standards for the non-controlling (minority) interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a non-controlling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. The Company has not yet determined the impact, if any, that SFAS 160 will have on its consolidated financial statements. SFAS 160 is effective for the Company’s fiscal year beginning October 1, 2009.

In September 2006, the FASB issued SFAS No. 157, “Fair Value Measurements” (“SFAS 157”). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements, the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this Statement does not require any new fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. In February 2008, the FASB issued FASB Staff Position No. FAS 157-2, “Effective Date of FASB Statement No. 157”, which provides a one year deferral of the effective date of SFAS 157 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed in the financial statements at fair value at least annually. Therefore, effective January 1, 2008, we adopted the provisions of SFAS No. 157 with respect to our financial assets and liabilities only. Since the Company has no investments available for sale, the adoption of this pronouncement has no material impact to the financial statements.

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities — including an amendment of FASB Statement No. 115” (“SFAS 159”). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. This statement provides entities the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This Statement is effective as of the beginning of an entity’s first fiscal year that begins after November 15, 2007. Effective January 1, 2008, we adopted SFAS No. 159 and have chosen not to elect the fair value option for any items that are not already required to be measured at fair value in accordance with accounting principles generally accepted in the United States .

DELOITTE RESIGNATION -

As the Company disclosed in its Form 8-K filed April 30, 2007, on April 25, 2007 (the "Resignation Date"), Deloitte Kft. (the "Former Auditor") advised the Company that it has resigned as the Company's independent auditor. The Former Auditor performed the audit for the one year period ended December 31, 2005, which report did not contain any adverse opinion or a disclaimer of opinion, nor was it qualified as to audit scope or accounting principles. During the Company's two most recent fiscal years and during any subsequent interim period prior to the Resignation Date, there were no disagreements with the Former Auditor, with respect to accounting or auditing issues of the type discussed in Item 304(a)(iv) of Regulation S-B.

Prior to the Resignation Date, the Former Auditor advised the Company that it had raised certain issues relating to the accounting of ERC. As of December 31, 2006, the Company owned 43.33% of the outstanding securities of ERC. The Former Auditor believed that this communication was a disclosable event pursuant to Item 304(a)(v). The issues raised by the Former Auditor related to the recording of the cost of real estate purchased by Verge (a wholly owned subsidiary of ERC), the production of records relating to loans made to VLC and the valuation of land in connection with Lorraine Properties, LLC (a wholly owned subsidiary of ERC). Management of the Company disagrees with the aforementioned statements and believes that it has adequately explained each of the above inquires made by the Former Auditor. Further, prior to being advised of the above issues, the Company maintained that ERC and its subsidiaries do not need to be consolidated in the Company's financial statements, which such position was subsequently confirmed by a detailed analysis by management and an independent third party consultant of the accounting pronouncements governing consolidation.

The Former Auditor advised the Company that it intended to furnish a letter to the Company, addressed to the Staff, stating that it agreed with the statements made herein or the reasons why it disagreed. The letter from the Former Auditor was filed as an amendment to Form 8-K on May 14, 2007.

Appointment of New Auditors - Robison, Hill & Co. ("RHC") -

On April 26, 2007, the Company engaged Robison, Hill & Co. ("RHC") as its independent registered public accounting firm for the Company's fiscal years ended December 31, 2007 and 2006. The decision to engage RHC as the Company's independent registered public accounting firm was approved by the Company's Board of Directors, and ratify the selection of Robison Hill & Co. as our independent auditors for the fiscal year ending December 31, 2007, by our shareholders meeting that took place on December 7, 2007.

During the two most recent fiscal years and through April 26, 2007, the Company has not consulted with RHC regarding either:

1. the application of accounting principles to any specified transaction, either completed or proposed, or the type of audit opinion that might be rendered on the Company's financial statements, and neither a written report was provided to the Company nor oral advice was provided that RHC concluded was an important factor considered by the Company in reaching a decision as to the accounting, auditing or financial reporting issue; or
2. any matter that was either subject of disagreement or event, as defined in Item 304(a)(1)(iv)(A) of Regulation S-B and the related instruction to Item 304 of Regulation S-B, or a reportable event, as that term is explained in Item 304(a)(1)(iv)(A) of Regulation S-B.

ITEM 9A. CONTROLS AND PROCEDURES

The term disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act (15 U.S.C. 78a, et seq.) is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

The term internal control over financial reporting is defined as a process designed by, or under the supervision of, the issuer's principal executive and principal financial officers, or persons performing similar functions, and effected by the issuer's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the issuer;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the issuer are being made only in accordance with authorizations of management and directors of the issuer; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the issuer's assets that could have a material effect on the financial statements.

Our management, including our chief executive officer and principal financial officer, does not expect that our disclosure controls and procedures or our internal controls over financial reporting will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of inherent limitations in all control systems, internal control over financial reporting may not prevent or detect misstatements, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the registrant have been detected. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Evaluation of Disclosure and Controls and Procedures. Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States. We carried out an evaluation, under the supervision and with the participation of our management, including our chief executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. The evaluation was undertaken in consultation with our accounting personnel. Based on that evaluation and for the reasons set forth below, our chief executive officer and principal financial officer concluded that our disclosure controls and procedures are currently not effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting of the Company. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Management, with the participation of our principal executive officer, financial and accounting officer, has evaluated the effectiveness of our internal control over financial reporting as of December 31, 2008 based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations. Based on this evaluation, because of the Company's limited resources and limited number of employees, management concluded that, as of December 31, 2008, our internal control over financial reporting is not effective in providing reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. The ineffectiveness of our disclosure

controls and procedures is the result of certain deficiencies in internal controls that constitute material weaknesses as discussed below. Except for the restatement of the consolidated financial statements for the year ended December 31, 2009, material weaknesses identified did not result in the restatement of any previously reported financial statements or any other related financial disclosure, nor does management believe that it had any effect on the accuracy of the Company's financial statements for the current reporting period. We lack segregation of duties in the period-end financial reporting process. The Company has historically had limited accounting and minimal operating revenue and, as such, all accounting and financial reporting operations have been and are currently performed by one individual. The party that performs the accounting and financial reporting operations is the only individual with any significant knowledge of generally accepted accounting principles. The person is also in charge of the general ledger (including the preparation of routine and non-routine journal entries and journal entries involving accounting estimates), the selection of accounting principles, and the preparation of interim and annual financial statements (including report combinations, consolidation entries and footnote disclosures) in accordance with generally accepted accounting principles. In addition, the lack of additional staff with significant knowledge of generally accepted accounting principles has resulted in ineffective oversight and monitoring. The company intends to add accounting staff, subject to adequate financing, in order to assist in reducing its risk in these areas and plans to add additional personnel in accounting and internal auditing in the near future, which is subject to obtaining the required financing.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the SEC that permit the Company to provide only management's report in this annual report.

Changes in internal controls

There have been no changes in our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 or 15d-15 under the Exchange Act that occurred during the quarter ended December 31, 2008 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

Trafalgar:

The Company entered into a Securities Purchase Agreement (the "Agreement") with Trafalgar Capital Specialized Investment Fund, Luxembourg ("Buyer") on September 25, 2008 for the sale of up to \$2,750,000 in convertible notes (the "Notes"). Pursuant to the terms of the Agreement, the Company and the Buyer closed on the sale and purchase of \$1,600,000 in Notes on September 25, 2008, with escrow instruction to be closed on October 1, 2008. The Buyer, at its sole discretion, has the option to close on a second financing for \$400,000 in Notes (which has been exercised as discussed below) and a third financing for \$750,000 in Notes. Pursuant to the terms of the Agreement, the Company agreed to pay to the Buyer a commitment fee of 4% of the commitment amount, a structuring fee of \$15,000, a facility draw down fee of 4%, issue the Buyer 150,000 shares of common stock, pay a due diligence fee to the Buyer of \$15,000 and pay an advisory fee of \$100,000 to TAS Holdings Limited. The Notes bear interest at 8.5% with such interest payable on a monthly basis with the first two payments due at closing. The Notes are due in full in September 2010. In the event of default, the Buyer may elect to convert the interest payable in cash or in shares of common stock at a conversion price using the closing bid price of when the interest is due or paid. The Notes are convertible into common stock, at the Buyer's option, at a conversion price equal to 85% of the volume weighted average price for the ten days immediately preceding the conversion but in no event below a price of \$2.00 per share. If on the conversion or redemption of the Notes, the Euro to US dollar spot exchange rate (the "Exchange Rate") is higher than the Exchange Rate on the closing date, then the number of shares shall be increased by the same percentage determined by dividing the Exchange Rate on the date of conversion or redemption by the Exchange Rate on the closing date. The Company is required to redeem the Notes starting on the fourth month in equal installments of \$56,000 with a final payment of \$480,000 with respect to the initial funding of \$1,600,000. We are also required to pay a redemption premium of 7% on the first redemption payment, which will increase 1% per month. The Company may prepay the Notes in advance, which such prepayment will include a redemption premium of 15%. In the event the Company closes on a funding in excess of \$4,000,000, the Buyer, in its sole election, may require that the Company redeem the Notes in full. On any principal or interest repayment date, in the event that the Euro to US dollar spot exchange rate is lower than the Euro to US dollar spot exchange rate at closing, then we will be required to pay additional funds to compensate for such adjustment.

Pursuant to the terms of the Notes, the Company shall default if (i) the Company fails to pay amounts due within 15 days of maturity, (ii) failure of the Company to comply with any provision of the Notes upon ten days written notice; (iii) bankruptcy or insolvency or (iv) any breach of the Agreement and such breach is not cured upon ten days written notice. Upon default by the Company, the Buyer may accelerate full repayment of all Notes outstanding and all accrued interest thereon, or may convert all Notes outstanding (and accrued interest thereon) into shares of common stock (notwithstanding any limitations contained in the Agreement and the Notes). The Buyer has a secured lien on three of our wells and would be entitled to foreclose on such wells in the event an event of default is entered. In the event that the foregoing was to occur, significant adverse consequences to the Company would be reasonably anticipated.

So long as any of the principal or interest on the Notes remains unpaid and unconverted, the Company shall not, without the prior written consent of the Buyer, (i) issue or sell any common stock or preferred stock, (ii) issue or sell any Company preferred stock, warrant, option, right, contract, call, or other security or instrument granting the holder thereof the right to acquire Common Stock, (iii) incur debt or enter into any security instrument granting the holder a security interest in any of the assets of the Company or (iv) file any registration statement on Form S-8.

The Buyer has contractually agreed to restrict their ability to convert the Notes and receive shares of our common stock such that the number of shares of the Company common stock held by a Buyer and its affiliates after such conversion or exercise does not exceed 9.9% of the Company's then issued and outstanding shares of common stock.

The Buyer exercised its option to close on a second financing for \$400,000 in Notes on October 28, 2008 and still holds an option to close on additional financing for \$750,000 in Notes. The terms of the second financing for \$400,000 are identical to the terms of the \$1,600,000 Note, as disclosed in detail on the Company filing on October 2, 2008 on Form 8-K - Unregistered Sale of Equity Securities, Financial Statements and Exhibits. The Notes are convertible into our common stock, at the Buyer's option, at a conversion price equal to 85% of the volume weighed average price for the ten days immediately preceding the conversion but in no event below a price of \$2.00 per share. As of the date hereof, the Company is obligated on the Notes issued to the Buyer in connection with this offering. The Notes are a debt obligation arising other than in the ordinary course of business, which constitute a direct financial obligation of the Company.

The Notes were offered and sold to the Buyer in a private placement transaction made in reliance upon exemptions from registration pursuant to Section 4(2) under the Securities Act of 1933 and Rule 506 promulgated there under. The Buyer is an accredited investor as defined in Rule 501 of Regulation D promulgated under the Securities Act of 1933.

The estimated value of the conversion feature was approximately \$210,000 and will be reported as interest expense over the anticipated repayment period of the debt.

As reported under Legal proceedings, the Company notified Trafalgar that Trafalgar is in breach with regard to the services to be performed in accordance with the \$2,000,000 loan agreement. Pursuant to FASB 5, the \$2,000,000 is recorded as a liability on the balance sheet, and interest is being accrued on the note, since the outcome of the legal actions is undeterminable at this time. On April 14, 2009 the Company filed a complaint against Trafalgar and its affiliates.

Star

On September 1, 2008, the Company entered into a note payable with Star Equity Investments LLC (“STAR”), a third party, for \$1 million was effective January 1, 2008. The proceeds from this note were used to pay off the Company’s debt to Mr. Attia, a related party. The note bears 12% interest commencing October 1st, 2008 and can be converted (including interest) into common shares of the Company at an established conversion price of \$0.75 per share. Per Star’s position the Company is default under said note, and the parties in negotiation to resolve adversaries’ procedure among them, based on issuing 8.5 million common shares of the Company for conversion the note and interest into equity. On March 11, 2009, the Company entered and closed an agreement with Star pursuant to which Star agreed to convert all principal and interest associated with the Debt into 8,500,000 shares of common stock and released the Company from any further claims. The shares of common stock were issued in connection with this transaction in a private placement transaction made in reliance upon exemptions from registration pursuant to Section 4(2) under the Securities Act of 1933 and/or Rule 506 promulgated thereunder. Each of the parties are accredited investors as defined in Rule 501 of Regulation D promulgated under the Securities Act of 1933.

Short Term Loan – by Investor

On September 5, 2008 the Company entered a short term loan memorandum, with Mehmet Haluk Undes, for a short term loan (“bridge”) of \$220,000 to bridge the drilling program of the Company. As a consideration for said facility, the Company grants the investor with 100% cashless warrants coverage for two years at exercise price of \$1.50 per share. The investor made a loan of \$220,000 to the company on September 15, 2008 (where said funds were wired to the company drilling contractor), that was paid in full on October 8, 2008. Accordingly the investor is entitled to 200,000 cashless warrants from September 15, 2008 at exercise price of \$1.50 for a period of 2 years. The Company contest said warrants entitlements to the investor, based on a cause.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTANTS

To the Board of Directors and Shareholders
Yasheng Eco-Trade Corporation and subsidiaries

We have audited the accompanying consolidated balance sheets of Yasheng Eco-Trade Corporation (f/k/a Vortex Resources Corp. and f/k/a Emvelco Corp.) and Subsidiaries as of December 31, 2008 and 2007 and the related consolidated statements of operations, comprehensive income, stockholder's equity and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financials statements of Atia Group Ltd., a 58.3% owned subsidiary, which statements reflect total assets of \$11,748,000 as of December 31, 2007 and total revenues of \$-0- for the period from November 2, 2007 (date of acquisition) to December 31, 2007. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for Atia Group Ltd., is based solely on the report of the other auditors.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, based on our audit and the report of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Yasheng Eco-Trade Corporation, and Subsidiaries as of December 31, 2008 and 2007 and the results of its operations and its cash flows for the years ended December 31, 2008 and 2007 in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 13 to the financial statements, the financing of the Company's projects is dependent on the future effect of the so called sub-prime mortgage crisis on financial institutions. This sub-prime crisis may affect the availability and terms of financing of the completion of the projects as well as the availability and terms of financing may affect the Company's ability to obtain relevant financing, if required. The sub-prime mortgage crisis has raised substantial doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

As discussed in Note 21 to the financial statements, the Company has restated their balance sheet, statement of income, stockholders' equity and cash flows for the year ended December 31, 2008.

Vortex Resources Corp.
Notes to Audited Consolidated Financial Statements

1. Organization and Business

Vortex Resources Corp, formerly known as (“f/k/a”) Euroweb International Corp. and Emvelco Corp., is a Delaware corporation and was organized on November 9, 1992. It was a development stage company through December 1993. Effective August 19, 2008, the Company changed its name to Vortex Resources Corp. which was accomplished by merger of a wholly owned subsidiary into the Company with the Company being the survivor entity. Vortex Resources Corp. and its consolidated subsidiaries are collectively referred to herein as “Vortex” or the “Company”. Vortex’s business that was first implemented in 1997 was identifying, developing and operating companies within emerging industries for the purpose of consolidation and sale if favorable market conditions exist. Through December 31, 2007, the Company invested in the real estate development, and in the financing business through Emvelco RE Corp. (“ERC”) and its subsidiaries in the United States of America (“USA”) and in Europe. The Company commenced operations in the investment real estate industry through the acquisition of an empty, non-operational, wholly-owned subsidiary ERC, which was acquired in June 2006. Primary activity of ERC includes investment, development and subsequent sale of real estate, as well as investment in the form of loans provided to, or ownership acquired in, property development companies, directly or via majority or minority owned affiliates. The Company’s headquarters are located in Beverly Hills, California, and its operational offices located in West Hollywood, California.

Through its subsidiaries and series of agreements with ERC, the Company developed and sold in 2007 three properties in the Los Angeles vicinity. The balance of the Company real estate interests were sold during 2008. The Company does not have currently any further properties in the real estate industry.

In 2008, the Company changed or amended its business model to focus on the mineral resources industry, commencing gas and oil sub-industry, which was approved by its shareholders. Based on series of agreements, the Company entered into an Agreement and Plan of Exchange (the "DCG Agreement") with Davy Crockett Gas Company, LLC ("DCG") and its members ("DCG Members"). Pursuant to the DCG Agreement, the Company acquired and the DCG Members sold, 100% of the outstanding membership in DCG. DCG is a limited liability company organized under the laws of the State of Nevada and headquartered in Bel Air, California. As a newly formed designated LLC, DCG holds certain development rights for gas drilling in Crockett County, Texas. DCG has entered into the final DCG Agreement with the Company, which provided that the members sold all of their membership units to the Company in exchange for 50 million preferred shares of the Company. The sales price was \$50 million, as calculated by the 50 million shares at an agreed price of \$1.00

The Company elected to move from The NASDAQ Stock Market to the OTCBB to reduce, and more effectively manage, its regulatory and administrative costs, and to enable Company’s management to better focus on its business of developing the natural gas drilling rights recently acquired in connection with the acquisition of DCG.

DCG, a wholly owned subsidiary is a limited liability company and was organized in Nevada on February 22, 2008. The Company's members’ capital accounts consist of 10,000 units. As of December 31, 2008, 10,000 member’s units are issued and outstanding. DCG has obtained drilling rights from a third party in Wolfcamp Canyon Sandstone Field in West Texas and entering the natural gas production & exploration, drilling, and extraction business. DCG has the option to purchase rights on up to 180 in-fill drilling locations on about specific 3,600 acres, based on a 20 acres spacing. The field was first developed in the 1970s on a 160 acre well spacing and was later reduced based on a small radius of the wells drainage. The spacing has subsequently been reduced to 40 acres, 20 acres, and 10 acres accordingly. DCG’s drilling program is based on 20 acres spacing.

Due to current issues in the development of the oil and gas project in Crockett County, Texas, the board obtained a current reserve report for the Company's interest in DCG and Vortex One, which report indicated that the DCG properties as being negative in value. As a result of such report, the world and US recessions and the depressed oil and gas prices, the board of directors elected to dispose of the DCG property and/or desert the project in its entirety.

F-8

As a result of the series of transactions described above, the Company's ownership structure at December 31, 2008 is as follows (designated for sale – see subsequent events):

- 100% of DCG – discontinued operations
- 50% of Vortex Ocean One, LLC
- 7% of Micrologic, (Via EA Emerging Ventures Corp)
- 100% of 610 N. Crescent Heights, LLC and 50% of 13059 Dickens, LLC – both properties divested

On May 14, 2007, the Company entered into a Stock Transfer and Assignment of Contract Rights Agreement (the "Agreement") with ERC, ERC's principal shareholder TIHG and ERC's wholly owned subsidiary Verge. Pursuant to the Agreement, the Company transferred and conveyed its 1,000 Shares (representing a 43.33% interest) (the "Shares") in ERC to TIHG to submit to ERC for cancellation and return to Treasury (see Note 16).

Based on series of agreements commencing June 5, 2007 and following by July 23, 2007 (as reported on the Company's Form 8-K filed June 11, 2007), the Company, the Company's chief executive officer Yossi Attia, and Darren Dunckel - CEO of ERC (collectively, the "Investors") entered into an Agreement (the "Upswing Agreement") with a third party, Upswing, Ltd. (also known as Appswing Ltd., hereinafter referred to as "Upswing"). Pursuant to the Upswing Agreement, the Investors invested in an entity listed on the Tel Aviv Stock Exchange – the Atia Group Limited, f/k/a Kidron Industrial Holdings Ltd (herein referred to as AGL). In addition, the Investors transferred rights and control of various real estate projects to AGL. The Investors and AGL then effected a transaction, pursuant to which the Investors and/or the Investors' affiliates acquired about 76% of the AGL in consideration of the transfer of the rights to the various real estate projects (including Verge) to AGL (the "Transaction"). Upswing, among other items, advised the Investors on the steps necessary to effectuate the contemplated transfer of real estate project rights to AGL.

Pursuant to the Notice, the Company, subject to performance under the Upswing Agreement, exercised its option (the "Sitnica Option") to purchase ERC's derivative rights and interest in Sitnica d.o.o. through ERC's holdings (one-third (1/3) interest) in AP Holdings Limited ("AP Holdings"), a company organized under the Companies (Jersey) Law 1991, which equates to a one-third interest in Sitnica d.o.o. (excluding ERC's interest in AP Holdings). The Sitnica Option was exercised in the amount of \$4,250,000, payable by reducing the outstanding loan amount owing to the Company under the Investment Agreement by \$3,550,000 and reducing the Company's deposit with Shalom Atia, Trustee of AP Holdings, by \$450,000.

On October 15, 2007, Emvelco delivered that certain Notice of Exercise of Options ("Notice") to ERC, TIHG, Verge and Darren C. Dunckel, individual, President of ERC and/or representative of the foregoing parties. Pursuant to the Notice, Emvelco, subject to performance under the Upswing Agreement, exercised its option (the "Verge Option") to purchase a multi-use condominium and commercial property in Las Vegas, Nevada, via the purchase and acquisition of all outstanding shares of common stock of Verge. The Verge Option was exercised in the amount of \$5,000,000 payable in cash, but in no event is the option exercisable prior to Verge breaking ground, plus conversion of \$10,000,000 loans given to Verge into Equity as consideration for 75,000 shares of Verge.

The transaction was closed on November 2, 2007. Upon closing, Verge and Sitnica became fully owned subsidiaries of AGL. The Company owned 58.3% of AGL and consolidates AGL's results in these financial statements.

As a result of the transactions above, the Company's ownership structure at December 31, 2007 was as follows:

- 58.3% of Atia Group Limited

10% of Micrologic

Atia Group Limited owns:

100% of Verge Living Corporation

100% of Sitnica

The accompanying financial statements have been prepared on the basis of accounting principles applicable to a “going concern”, which assumes that the Company will continue in operation for at least one year and will be able to realize its assets and discharge its liabilities in the normal course of operations.

In January 2009, the company entered a material term sheet with the Yasheng Group – see subsequent events.

2. Summary of Significant Accounting Policies

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“US GAAP”).

Basis of consolidation

The consolidated financial statements include the accounts of the Company, its majority-owned subsidiaries and all variable interest entities for which the Company is the primary beneficiary. All intercompany balances and transactions have been eliminated upon consolidation. Control is determined based on ownership rights or, when applicable, whether the Company is considered the primary beneficiary of a variable interest entity.

Variable Interest Entities

Under Financial Accounting Standards Board (“FASB”) Interpretation No. 46 (revised December 2003) “Consolidation of Variable Interest Entities” (“FIN 46R”), the Company is required to consolidate variable interest entities (“VIE’s”), where it is the entity’s primary beneficiary. VIE’s are entities in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. The primary beneficiary is the party that has exposure to a majority of the expected losses and/or expected residual returns of the VIE.

Based on the transactions, which were closed on November 2, 2007, the Company owned 58.3% of Atia Group Limited (AGL) as of December 31, 2007. This interest was divested as of effective January 1st, 2008 upon completion of the DCG reverse merger transaction. Since the company is the primary beneficiary through December 31, 2007, the financial statements of AGL are consolidated into these 2007 financial statements. However, as of January 1, 2008, the balance sheet and results of operations of AGL are not consolidated into these financial statements. The Company previously issued interim financial statements dated as of March 31, 2008 and for the three month period ending March 31, 2008. Those financial statements included the consolidation of the AGL. In accordance with Financial Accounting Standards, FAS 154, Accounting Changes and Error Corrections, the Company disclosed the accounting change results in financial statements that are, in effect, the statements of a different reporting entity. The change shall be retrospectively applied to the financial statements of all prior periods presented to show financial information for the new reporting entity for those periods (see Note 17). As of and for the year ending December 31, 2008, the balance sheets and results of operations of DCG, 610 Crescent Heights, LLC, Dickens LLC and Vortex Ocean One, LLC are consolidated into these financial statements.

Use of estimates

The preparation of consolidated financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Fair value of financial instruments

The carrying values of cash equivalents, notes and loans receivable, accounts payable, loans payable and accrued expenses approximate fair values.

Revenue recognition

The Company applies the provisions of Securities and Exchange Commission's ("SEC") Staff Accounting Bulletin ("SAB") No. 104, "Revenue Recognition in Financial Statements" ("SAB 104"), which provides guidance on the recognition, presentation and disclosure of revenue in financial statements filed with the SEC. SAB 104 outlines the basic criteria that must be met to recognize revenue and provides guidance for disclosure related to revenue recognition policies. The Company recognizes revenue when persuasive evidence of an arrangement exists, the product or service has been delivered, fees are fixed or determinable, collection is probable and all other significant obligations have been fulfilled.

F-10

Revenues from property sales are recognized in accordance with Statement of Financial Accounting Standards (“SFAS”) No. 66, “Accounting for Sales of Real Estate,” when the risks and rewards of ownership are transferred to the buyer, when the consideration received can be reasonably determined and when Emvelco has completed its obligations to perform certain supplementary development activities, if any exist, at the time of the sale. Consideration is reasonably determined and considered likely of collection when Emvelco has signed sales agreements and has determined that the buyer has demonstrated a commitment to pay. The buyer’s commitment to pay is supported by the level of their initial investment, Emvelco’s assessment of the buyer’s credit standing and Emvelco’s assessment of whether the buyer’s stake in the property is sufficient to motivate the buyer to honor their obligation to it.

Revenue from fixed price contracts is recognized on the percentage of completion method. The percentage of completion method is also used for condominium projects in which the Company is a real estate developer and all units have been sold prior to the completion of the preliminary stage and at least 25% of the project has been carried out. Percentage of completion is measured by the percentage of costs incurred to balance sheet date to estimated total costs. Selling, general, and administrative costs are charged to expense as incurred. Profit incentives are included in revenues, when their realization is reasonably assured. Provisions for estimated losses on uncompleted projects are made in the period in which such losses are first determined, in the amount of the estimated loss of the full contract. Differences between estimates and actual costs and revenues are recognized in the year in which such differences are determined. The provision for warranties is provided at certain percentage of revenues, based on the preliminary calculations and best estimates of the Company's management.

Cost of revenues

Cost of revenues includes the cost of real estate sold and rented as well as costs directly attributable to the properties sold such as marketing, selling and depreciation.

Real estate

Real estate held for development is stated at the lower of cost or market. All direct and indirect costs relating to the Company's development project are capitalized in accordance with SFAS No. 67 "Accounting for Costs and Initial Rental Operations of Real Estate Projects". Such standard requires costs associated with the acquisition, development and construction of real estate and real estate-related projects to be capitalized as part of that project. The realization of these costs is predicated on the ability of the Company to successfully complete and subsequently sell or rent the property.

Treasury Stock

Treasury stock is recorded at cost. Issuance of treasury shares is accounted for on a first-in, first-out basis. Differences between the cost of treasury shares and the re-issuance proceeds are charged to additional paid-in capital.

Foreign currency translation

The Company considers the United States Dollar (“US Dollar” or "\$") to be the functional currency of the Company and its subsidiaries, the prior owned subsidiary, AGL, which reports its financial statements in New Israeli Shekel. (“N.I.S”) The reporting currency of the Company is the US Dollar and accordingly, all amounts included in the consolidated financial statements have been presented or translated into US Dollars. For non-US subsidiaries that do not utilize the US Dollar as its functional currency, assets and liabilities are translated to US Dollars at period-end exchange rates, and income and expense items are translated at weighted-average rates of exchange prevailing during the period. Translation adjustments are recorded in “Accumulated other comprehensive income” within stockholders’ equity. Foreign currency transaction gains and losses are included in the consolidated results of operations for the periods

presented.

Cash and cash equivalents

Cash and cash equivalents include cash at bank and money market funds with maturities of three months or less at the date of acquisition by the Company.

F-11

Marketable securities

The Company determines the appropriate classification of all marketable securities as held-to-maturity, available-for-sale or trading at the time of purchase, and re-evaluates such classification as of each balance sheet date in accordance with SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities" ("SFAS 115"). In accordance with Emerging Issues Task Force ("EITF") No. 03-01, "The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investment" ("EITF 03-01"), the Company assesses whether temporary or other-than-temporary gains or losses on its marketable securities have occurred due to increases or declines in fair value or other market conditions.

The Company did not have any marketable securities within continuing operations for the year ended December 31, 2008 (other than Treasury Stocks as disclosed).

Property and equipment

Property and equipment are stated at cost, less accumulated depreciation. The Company provides for depreciation of property and equipment using the straight-line method over the following estimated useful lives:

Software	3 years
Computer equipment	3-5 years
Other furniture equipment and fixtures	5-7 years

The Company's policy is to evaluate the appropriateness of the carrying value of long-lived assets. If such evaluation were to indicate an impairment of assets, such impairment would be recognized by a write-down of the applicable assets to the fair value. Based on the evaluation, no impairment was indicated in accordance with SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS 144").

Equipment purchased under capital leases is stated at the lower of fair value and the present value of minimum lease payments at the inception of the lease, less accumulated depreciation. The Company provides for depreciation of leased equipment using the straight-line method over the shorter of estimated useful life and the lease term. During the year ended December 31, 2008 and the year ended December 31, 2007, the Company did not enter into any capital leases.

Recurring maintenance on property and equipment is expensed as incurred.

Any gain or loss on retirements and disposals is included in the results of operations in the period of the retirement or disposal. No retirements and disposals occurred for the years ended December 31, 2008 and 2007 for the Company's continuing operations.

Goodwill and intangible assets

Goodwill results from business acquisitions and represents the excess of purchase price over the fair value of identifiable net assets acquired at the acquisition date. There was goodwill recorded in the transaction with AGL totaling \$1.2 million as of December 31, 2007. Since this subsidiary was divested as of January 1, 2008 in compliance with the C Properties Agreement, this goodwill was impaired during the first quarter of 2008 and presented as a consulting, director and professional fees in the P&L. As a result of the acquisition of DCG, the Company recorded Goodwill for a total of \$49,990,000 as the former members of DCG were given conversion rights under the preferred stock arrangement for 50,000,000 common shares at a \$1.00 price per share less the contribution of \$10,000.

In accordance with SFAS No. 142, "Goodwill and Other Intangible Assets", goodwill is tested for impairment annually and whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Management evaluates the recoverability of goodwill by comparing the carrying value of the Company's reporting units to their fair value. Fair value is determined based a market approach. For the year ended December 31, 2008, an analysis was performed on the goodwill associated with the investment in DCG, and impairment was charged against the P&L for approximately \$35.0 million.

For the year ended December 31, 2007, an analysis was performed on the goodwill associated with the investment in AGL, and impairment was charged against the P&L for approximately \$10.2 million.

F-12

Intangible assets that have finite useful lives, whether or not acquired in a business combination, are amortized over their estimated useful lives, and also reviewed for impairment in accordance with SFAS 144. On July 22, 2007, the Company entered into a \$2 million note payable agreement with third party, which included an option to convert the debt into equity. Accordingly, the Company recorded the discount on the issuance of debt as an offset to the note payable. The estimated value of the conversion feature is approximately \$976,334, and will be reported as interest expense over the anticipated repayment period of the debt. Said note was converted during August 2008 – as such all value of the conversion feature is approximately \$976,334 was recorded as interest expense.

The Company entered into a Securities Purchase Agreement (the "Agreement") with Trafalgar Capital Specialized Investment Fund, Luxembourg ("Buyer") on September 25, 2008 for the sale of up to \$2,750,000 in convertible notes (the "Notes"). Pursuant to the terms of the Agreement, the Company and the Buyer closed on the sale and purchase of \$1,600,000 in Notes on September 25, 2008, with escrow instruction to be closed on October 1, 2008.

The Buyer, at its sole discretion, has the option to close on a second financing for \$400,000 in Notes (which has been exercised as discussed below) and a third financing for \$750,000 in Notes. Pursuant to the terms of the Agreement, the Company agreed to pay to the Buyer a commitment fee of 4% of the commitment amount, a structuring fee of \$15,000, a facility draw down fee of 4%, issue the Buyer 150,000 shares of common stock, pay a due diligence fee to the Buyer of \$15,000 and pay an advisory fee of \$100,000 to TAS Holdings Limited. The Company recorded as an offset to the note payable the discount on the issuance of debt for the conversion feature. The estimated intrinsic value of the conversion feature was approximately \$210,000 and will be reported as interest expense over the anticipated repayment period of the debt.

Earnings (loss) per share

Basic earnings (loss) per share are computed by dividing income (loss) attributable to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted earnings (loss) per share reflect the effect of dilutive potential common shares issuable upon exercise of stock options and warrants and convertible preferred stock.

Comprehensive income (loss)

Comprehensive income includes all changes in equity except those resulting from investments by and distributions to shareholders.

Income taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry-forwards. Deferred tax assets are reduced by a valuation allowance if it is more likely than not that some portion or all of the deferred tax asset will not be realized. Deferred tax assets and liabilities, are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Stock-based compensation

Effective January 1, 2006, the Company adopted SFAS No. 123R, "Share-Based Payment" ("SFAS 123R"). Under SFAS 123R, the Company is required to measure the cost of employee services received in exchange for an award of

equity instruments based on the grant-date fair value of the award. The measured cost is recognized in the statement of operations over the period during which an employee is required to provide service in exchange for the award. Additionally, if an award of an equity instrument involves a performance condition, the related compensation cost is recognized only if it is probable that the performance condition will be achieved.

F-13

Prior to the adoption of SFAS 123R, the Company accounted for stock-based employee compensation using the intrinsic value method prescribed in Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25") and related interpretations, and chose to adopt the disclosure-only provisions of Statement of Financial Accounting Standards ("SFAS") No. 123, "Accounting for Stock-based Compensation" ("SFAS 123"), as amended by SFAS No. 148, "Accounting for Stock-Based Compensation — Transition and Disclosure" ("SFAS 148"). Under APB 25, the Company did not recognize expense related to employee stock options because the exercise price of such options was equal to the quoted market price of the underlying stock at the grant date.

The Company adopted SFAS 123R using the modified prospective method, which requires the application of the accounting standard as of January 1, 2006, the first day of the Company's fiscal year 2006. Under this method, compensation cost recognized during the year ended December 31, 2006 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested, as of January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of SFAS 123 and amortized on a straight-line basis over the requisite service period, and (b) compensation cost for all share-based payments granted subsequent to January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of SFAS 123R amortized on a straight-line basis over the requisite service period. Results for prior periods have not been restated.

The Company estimates the fair value of each option award on the date of the grant using the Black-Scholes option valuation model. Expected volatilities are based on the historical volatility of the Company's common stock over a period commensurate with the options' expected term. The expected term represents the period of time that options granted are expected to be outstanding and is calculated in accordance with SEC guidance provided in the SAB 107, using a "simplified" method. The risk-free interest rate assumption is based upon observed interest rates appropriate for the expected term of the Company's stock options.

The following table shows total non-cash stock-based employee compensation expense included in the consolidated statement of operations for the year ended December 31, 2008 and the year ended December 31, 2007:

Categories of cost and expenses	Year ended December 31, 2008	Year ended December 31, 2007
Compensation and related costs	\$ —	\$ 36,817
Consulting, professional and directors fees	2,018,161	43,416
Total stock-based compensation expense	\$ 2,018,161	\$ 80,233

Recently Issued but Not Yet Adopted Accounting Standards

In December 2007, the Securities and Exchange Commission ("SEC") issued Staff Accounting Bulletin No. 110 ("SAB 110"). SAB 110 amends and replaces Question 6 of Section D.2 of Topic 14, "Share-Based Payment," of the Staff Accounting Bulletin series. Question 6 of Section D.2 of Topic 14 expresses the views of the staff regarding the use of the "simplified" method in developing an estimate of the expected term of "plain vanilla" share options and allows usage of the "simplified" method for share option grants prior to December 31, 2007. SAB 110 allows public companies which do not have historically sufficient experience to provide a reasonable estimate to continue to use the "simplified" method for estimating the expected term of "plain vanilla" share option grants after December 31, 2007. The Company will continue to use the "simplified" method until it has enough historical experience to provide a reasonable estimate of expected term in accordance with SAB 110.

In December 2007, the FASB issued Statement of Financial Accounting Standards ("SFAS") 141-R, "Business Combinations." SFAS 141-R retains the fundamental requirements in SFAS 141 that the acquisition method of

accounting (referred to as the purchase method) be used for all business combinations and for an acquirer to be identified for each business combination. It also establishes principles and requirements for how the acquirer: (a) recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree; (b) recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase and (c) determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141-R will apply prospectively to business combinations for which the acquisition date is on or after the Company's fiscal year beginning October 1, 2009. While the Company has not yet evaluated the impact, if any, that SFAS 141-R will have on its consolidated financial statements, the Company will be required to expense costs related to any acquisitions after September 30, 2009.

In December 2007, the FASB issued SFAS 160, “Non-controlling Interests in Consolidated Financial Statements.” This Statement amends Accounting Research Bulletin 51 to establish accounting and reporting standards for the non-controlling (minority) interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a non-controlling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. The Company has not yet determined the impact, if any, that SFAS 160 will have on its consolidated financial statements. SFAS 160 is effective for the Company’s fiscal year beginning October 1, 2009.

In September 2006, the FASB issued SFAS No. 157, “Fair Value Measurements” (“SFAS 157”). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements, the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this Statement does not require any new fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. In February 2008, the FASB issued FASB Staff Position No. FAS 157-2, “Effective Date of FASB Statement No. 157”, which provides a one year deferral of the effective date of SFAS 157 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed in the financial statements at fair value at least annually. Therefore, effective January 1, 2008, we adopted the provisions of SFAS No. 157 with respect to our financial assets and liabilities only. Since the Company has no investments available for sale, the adoption of this pronouncement has no material impact to the financial statements.

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities — including an amendment of FASB Statement No. 115” (“SFAS 159”). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. This statement provides entities the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This Statement is effective as of the beginning of an entity’s first fiscal year that begins after November 15, 2007. Effective January 1, 2008, we adopted SFAS No. 159 and have chosen not to elect the fair value option for any items that are not already required to be measured at fair value in accordance with accounting principles generally accepted in the United States.

Gas Rights on Real Property, plant, and equipment

Depreciation, depletion and amortization, based on cost less estimated salvage value of the asset, are primarily determined under either the unit-of-production method or the straight-line method, which is based on estimated asset service life taking obsolescence into consideration. Maintenance and repairs, including planned major maintenance, are expensed as incurred. Major renewals and improvements are capitalized and the assets replaced are retired. Interest costs incurred to finance expenditures during the construction phase of multiyear projects are capitalized as part of the historical cost of acquiring the constructed assets. The project construction phase commences with the development of the detailed engineering design and ends when the constructed assets are ready for their intended use. Capitalized interest costs are included in property, plant and equipment and are depreciated over the service life of the related assets.

The Company uses the “successful efforts” method to account for its exploration and production activities. Under this method, costs are accumulated on a field-by-field basis with certain exploratory expenditures and exploratory dry holes being expensed as incurred. Costs of productive wells and development dry holes are capitalized and amortized on the unit-of-production method. The Company records an asset for exploratory well costs when the well has found a sufficient quantity of reserves to justify its completion as a producing well and where the Company is making sufficient progress assessing the reserves and the economic and operating viability of the project. Exploratory well costs not meeting these criteria are charged to expense.

Acquisition costs of proved properties are amortized using a unit-of-production method, computed on the basis of total proved natural gas reserves. Significant unproved properties are assessed for impairment individually and valuation allowances against the capitalized costs are recorded based on the estimated economic chance of success and the length of time that the Company expects to hold the properties. The valuation allowances are reviewed at least annually. Other exploratory expenditures, including geophysical costs, other dry hole costs and annual lease rentals, are expensed as incurred.

Unit-of-production depreciation is applied to property, plant and equipment, including capitalized exploratory drilling and development costs, associated with productive depletable extractive properties. Unit-of-production rates are based on the amount of proved developed reserves of natural gas and other minerals that are estimated to be recoverable from existing facilities using current operating methods. Under the unit-of-production method, natural gas volumes are considered produced once they have been measured through meters at custody transfer or sales transaction points at the outlet valve on the lease or field storage tank.

F-15

Gains on sales of proved and unproved properties are only recognized when there is no uncertainty about the recovery of costs applicable to any interest retained or where there is no substantial obligation for future performance by the Company's. Losses on properties sold are recognized when incurred or when the properties are held for sale and the fair value of the properties is less than the carrying value. Proved oil and gas properties held and used by the Company are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. Assets are grouped at the lowest levels for which there are identifiable cash flows that are largely independent of the cash flows of other groups of assets. The Company estimates the future undiscounted cash flows of the affected properties to judge the recoverability of carrying amounts. Cash flows used in impairment evaluations are developed using annually updated corporate plan investment evaluation assumptions for natural gas commodity prices. Annual volumes are based on individual field production profiles, which are also updated annually. Cash flow estimates for impairment testing exclude derivative instruments. Impairment analyses are generally based on proved reserves. Where probable reserves exist, an appropriately risk-adjusted amount of these reserves may be included in the impairment evaluation. Impairments are measured by the amount the carrying value exceeds the fair value.

Restoration, Removal and Environmental Liabilities

The Company is subject to extensive federal, state and local environmental laws and regulations. These laws regulate the discharge of materials into the environment and may require the Company to remove or mitigate the environmental effects of the disposal or release of natural gas substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefit are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessments and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component is fixed or reliably determinable.

The Company accounts for asset retirement obligations in accordance with SFAS No. 143, "Accounting for Asset Retirement Obligations" (SFAS 143). SFAS 143 addresses accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. SFAS 143 requires that the fair value of a liability for an asset's retirement obligation be recorded in the period in which it is incurred and the corresponding cost capitalized by increasing the carrying amount of the related long-lived asset. The liability is accreted to its then present value each period, and the capitalized cost is depreciated over the useful life of the related asset. The Company will include estimated future costs of abandonment and dismantlement in the full cost amortization base and amortize these costs as a component of our depletion expense in the accompanying financial statements.

Business segment reporting

Though the company had minor holdings of real estate properties which have been sold as of December 31, 2008, the Company manages its operations in one business segment, the Resources and Mineral - natural gas production, exploration, drilling, and extraction business.

3. Line of Credit and Restricted Cash

The Company's real estate investment operations required substantial up-front expenditures for land development contracts and construction. Accordingly, the Company required a substantial amount of cash on hand, as well as funds accessible through lines of credit with banks or third parties, to conduct its business. The Company had financed its working capital needs on a project-by-project basis, primarily with loans from banks and debt via the All Inclusive Trust Deed Agreement (AITDA), and with the existing cash of the Company. On August 28, 2006, the Company entered into a \$4,000,000 Revolving Line of Credit ("line of credit") with a commercial bank. As security for this credit

facility, the Company deposited \$4,000,000 into a certificate of deposit (“CD”) as collateral for a two year period. The CD earns interest at a rate of 5.25% annually, and any interest earned on the CD is restricted from withdrawal and must remain in the account for the entire term. On November 21, 2006, the Company deposited an additional \$4,000,000 into another CD with the same restrictions on withdrawal. This CD matured on November 21, 2008 and the deposit bears an interest rate of 5.12% annually. The interest rate on the line of credit is 5.87% annually.

As of December 31, 2007, the outstanding balance on the line of credit including interest was \$8,401,154 and the balance of the related certificate of deposit including interest was \$8,518,985.

As of December 31, 2008, the Company paid off the lines of credit in full – See Breakdown in Note 10.

4. Investment (and loans) in Affiliates, at equity

On June 14, 2006, Emvelco issued a \$10 million line of credit to ERC. Outstanding balances bore interest at an annual rate of 12% and the line of credit had a maximum borrowing limit of \$10 million. Initially on October 26, 2006 and then again ratified on December 29, 2006, the Board of Directors of Emvelco approved an increase in the borrowing limit of the line of credit to \$20 million. The Board also restricted use of the funds to real estate development. On November 2, 2007, the Company exercised the Verge option to purchase a multi-use condominium and commercial property in Las Vegas, Nevada, thereby reducing the amount outstanding by \$10 million. Additionally, the Verge option required that the Company pay The International Holdings Group (TIHG), the then parent of ERC, and another \$5 million when construction began on the Verge Project. At the time of these transactions, Verge and ERC were related entities as both had Darren Dunckel as their CEO (see Note 15). As of December 31, 2008, the outstanding loan receivable balances by ERC and Verge (related parties) were charged to equity, due to the Company change of strategy, turmoil in the real estate industry including the sub-prime crisis and the world financial crisis, which among other factors led Verge to file for Bankruptcy protection.

The Company owned 50% of 13059 Dickens, LLC, as reported by the Company on Form 8-K on December 21, 2007, through a joint venture with a third party at no cost to the Company. As of September 30, 2008, the project was sold back to the third party, by reversing the transaction, at no cost to the Company.

7. Convertible Notes Payable and Debt Discount

Trafalgar:

The Company entered into a Securities Purchase Agreement (the "Agreement") with Trafalgar Capital Specialized Investment Fund, Luxembourg ("Buyer") on September 25, 2008 for the sale of up to \$2,750,000 in convertible notes (the "Notes"). Pursuant to the terms of the Agreement, the Company and the Buyer closed on the sale and purchase of \$1,600,000 in Notes on September 25, 2008, with escrow instruction to be closed on October 1, 2008. The Buyer, at its sole discretion, has the option to close on a second financing for \$400,000 in Notes (which has been exercised as discussed below) and a third financing for \$750,000 in Notes. Pursuant to the terms of the Agreement, the Company agreed to pay to the Buyer a commitment fee of 4% of the commitment amount, a structuring fee of \$15,000, a facility draw down fee of 4%, issue the Buyer 150,000 shares of common stock, pay a due diligence fee to the Buyer of \$15,000 and pay an advisory fee of \$100,000 to TAS Holdings Limited.

The Notes bear interest at 8.5% with such interest payable on a monthly basis with the first two payments due at closing. The Notes are due in full in September 2010. In the event of default, the Buyer may elect to convert the interest payable in cash or in shares of common stock at a conversion price using the closing bid price of when the interest is due or paid. The Notes are convertible into common stock, at the Buyer's option, at a conversion price equal to 85% of the volume weighted average price for the ten days immediately preceding the conversion but in no event below a price of \$2.00 per share. If on the conversion or redemption of the Notes, the Euro to US dollar spot exchange rate (the "Exchange Rate") is higher than the Exchange Rate on the closing date, then the number of shares shall be increased by the same percentage determined by dividing the Exchange Rate on the date of conversion or redemption by the Exchange Rate on the closing date (\$0.68 per Euro). The Company is required to redeem the Notes starting on the fourth month in equal installments of \$56,000 with a final payment of \$480,000 with respect to the initial funding of \$1,600,000. We are also required to pay a redemption premium of 7% on the first redemption payment, which will increase 1% per month. The Company may prepay the Notes in advance, which such prepayment will include a redemption premium of 15%. In the event the Company closes on a funding in excess of \$4,000,000, the Buyer, in its sole election, may require that the Company redeem the Notes in full. On any principal or interest repayment date, in the event that the Euro to US dollar spot exchange rate is lower than the Euro to US dollar spot exchange rate at closing, then we will be required to pay additional funds to compensate for such adjustment.

Pursuant to the terms of the Notes, the Company shall default if (i) the Company fails to pay amounts due within 15 days of maturity, (ii) failure of the Company to comply with any provision of the Notes upon ten days written notice;

(iii) bankruptcy or insolvency or (iv) any breach of the Agreement and such breach is not cured upon ten days written notice. Upon default by the Company, the Buyer may accelerate full repayment of all Notes outstanding and all accrued interest thereon, or may convert all Notes outstanding (and accrued interest thereon) into shares of common stock (notwithstanding any limitations contained in the Agreement and the Notes). The Buyer has a secured lien on three of our wells and would be entitled to foreclose on such wells in the event an event of default is entered. In the event that the foregoing was to occur, significant adverse consequences to the Company would be reasonably anticipated.

F-19

So long as any of the principal or interest on the Notes remains unpaid and unconverted, the Company shall not, without the prior written consent of the Buyer, (i) issue or sell any common stock or preferred stock, (ii) issue or sell any Company preferred stock, warrant, option, right, contract, call, or other security or instrument granting the holder thereof the right to acquire Common Stock, (iii) incur debt or enter into any security instrument granting the holder a security interest in any of the assets of the Company or (iv) file any registration statement on Form S-8.

The Buyer has contractually agreed to restrict their ability to convert the Notes and receive shares of our common stock such that the number of shares of the Company common stock held by a Buyer and its affiliates after such conversion or exercise does not exceed 9.9% of the Company's then issued and outstanding shares of common stock.

The Buyer exercised its option to close on a second financing for \$400,000 in Notes on October 28, 2008 and still holds an option to close on additional financing for \$750,000 in Notes. The terms of the second financing for \$400,000 are identical to the terms of the \$1,600,000 Note, as disclosed in detail on the Company filing on October 2, 2008 on Form 8-K - Unregistered Sale of Equity Securities, Financial Statements and Exhibits. The Notes are convertible into our common stock, at the Buyer's option, at a conversion price equal to 85% of the volume weighted average price for the ten days immediately preceding the conversion but in no event below a price of \$2.00 per share.

As of the date hereof, the Company is obligated on the Notes issued to the Buyer in connection with this offering. The Notes are a debt obligation arising other than in the ordinary course of business, which constitute a direct financial obligation of the Company.

The Notes were offered and sold to the Buyer in a private placement transaction made in reliance upon exemptions from registration pursuant to Section 4(2) under the Securities Act of 1933 and Rule 506 promulgated there under. The Buyer is an accredited investor as defined in Rule 501 of Regulation D promulgated under the Securities Act of 1933.

The Company recorded a discount on the issuance of debt for the conversion feature, which decreased the note payable by the same amount. The estimated value of the conversion feature was approximately \$210,000 and will be reported as interest expense over the anticipated repayment period of the debt.

As reported under Legal proceedings, the Company notified Trafalgar that Trafalgar is in breach with regard to the services to be performed in accordance with the \$2,000,000 loan agreement. Pursuant to FASB 5, the \$2,000,000 is recorded as a liability on the balance sheet, and interest is being accrued on the note, since the outcome of the legal actions is undeterminable at this time.

Accordingly, the Company recognized amortization of the discount in the aggregate amount of \$232,581 from inception as interest expense and the remaining \$743,752 of the discount on the issuance of debt was expensed.

11. Income taxes

The net income before income taxes by tax jurisdiction for the years ended December 31, 2008 and 2007 was as follows:

	2008	2007
Net income before income taxes:		
Domestic	\$(57,167,417)	\$(10,658,187)
Foreign		— (241,603)
Total	\$(57,167,417)	\$(10,899,790)

The provision for income taxes from continuing operations reflected in the consolidated statements of operations is zero; as such, there are no separate components.

The provision for income taxes differs from the amount computed by applying the statutory federal income tax rate to the loss from continuing operations before income taxes. The sources and tax effects of the differences for the years ended December 31, 2008 and 2007 is summarized as follows:

	2008		2007	
	Amount	%	Amount	%
Computed expected tax				
Expense/(Benefit)	\$(19,833,596)	(35.00)	\$(3,814,926)	(35.00)
Change in Valuation Allowance	19,833,596	(35.00)	3,814,926	(35.00)
Total expense/(benefit)	\$ 0	0%	\$ 0	0%

For U.S. Federal income tax purposes, the Company had unused net operating loss carry forwards at December 31, 2007 of approximately \$16 million available to offset future taxable income. From the \$16 million of losses, \$1 million expire in various years from 2008-2010, \$2 million expires in 2011, and the remaining \$13 million expire in various years from 2017 through 2027. The Company has no capital loss carryover for US income tax purposes.

In May 2006, the Company sold Euroweb Hungary and Euroweb Romania, which resulted in the utilization of approximately \$10M of the capital loss carry forwards and net operating loss carry forwards. The Tax Acts of some jurisdictions contain provisions which may limit the net operating loss and capital loss carry forwards available to be used in any given year if certain events occur, including significant changes in ownership interests. As a result of various equity transactions, management believes the Company experienced an “ownership change” in the second half of 2006, as defined by Section 382 of the Internal Revenue Code, which limits the annual utilization of net operating loss carry forwards incurred prior to the ownership change. As calculated, the Section 382 limitation does not necessarily impact the ultimate recovery of the U.S. net operating loss; although it will defer the realization of the tax benefit associated with certain of the net operating loss carry forwards.

The Company recorded a full valuation allowance against the net deferred tax assets. In assessing deferred tax assets, management considers whether it is more likely than some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences and tax loss carry forwards become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes that it is more likely than not that the Company will not realize the benefit of these deductible differences, net of existing valuation allowances at December 31, 2008. Undistributed earnings of the Company's indirect investment into foreign subsidiaries are currently not material. Those earnings are considered to be indefinitely reinvested; accordingly, no provision for US federal and state income tax has been provided thereon. Upon repatriation of those earnings, in the form of dividends or otherwise, the Company would be subject to both U.S. income taxes (subject to an adjustment for foreign tax credits) and withholding taxes payable to the various foreign countries. Determination of the amount of unrecognized deferred U.S. income tax liability is not practicable due to the complexities associated with its hypothetical calculation.

Taxation of companies in Israel (AGL-Year 2007):

The Company's subsidiary AGL is taxed in Israel under the provisions of the Israel Tax Ordinance (New Version) 1961 (hereinafter – the "Ordinance"). Until 31 December 2007, AGL was subject to the Income Tax Law (Inflationary Adjustments) – 1985, whereby the results of operations for tax purposes are measured on a "real" basis" by adjusting the income for changes in the ICPI. Commencing on 1 January 2008, this law has been cancelled and transition provisions were set out. Accordingly, the results of operations will be measured for tax purposes on a nominal basis. Tax rates applicable to the income of the Company: On July 25, the Israeli parliament passed an amendment to the Income Tax Ordinance (No. 147) – 2005 (hereinafter – the "Amendment") which stipulates, among other things, that the corporate tax rate will be gradually reduced to the following tax rates: 2006 – 31%; 2007 – 29%; 2008 – 27%; 2009 – 26%; 2010 and thereafter – 25%.

On 10 February 2008, the Israeli Tax Authority issued a notification (hereinafter the – "Notification") of the setting up of a joint forum together with professional organizations, the goal of which is to work out various standard related issues that arose as part of the implementation of IFRS in Israel and the practical application thereof in tax returns. It was also decided by the Tax Authority that taxable income will continue to be computed pursuant to the guidelines that were in effect in Israel prior to the adoption of IFRS (except for Accounting Standard No. 29, Adoption of IFRS). The calculation of taxable income, as above, will be carried out during an interim period until it is decided how to apply IFRS to Israeli tax laws.

Taxation in Croatia (Sitnica –Year 2007)

Corporate tax - Regular income is taxed in Croatia (hereinafter – "Croatian Corporate Tax") at a rate of 20%. Therefore, income from construction, sale or rental of real estate in Croatia is liable for Croatian Corporate Tax at this rate. Tax losses may be carried forward over a five-year period but they cannot be carried back to prior periods. There is no limit to the amount of the loss that can be carried forward. Recognition of financing expenses for tax purposes - Financing expenses are tax deductible in Croatia. However, a distinction is made between loans from third parties and loans granted or guaranteed by related parties. According to the thin financing rules in Croatia, the company may not take into account for tax purposes interest charges on loans received from foreign shareholders holding at least 25% of the share capital or voting rights in the Company, if the amount of the loan is four times the share of the shareholder in the capital of the borrower at any given point in time during the tax period. This law applied to loans granted by a third party but guaranteed by a shareholder.

VAT and purchase tax - The sale of apartments and commercial properties is subject to VAT of 22%. However, the part of the purchase price attributed to land is exempt from VAT, but is subject to purchase tax of 5%. According to Croatian law, the purchaser is required to pay the purchase tax and the VAT. This law is also applicable to the sale of buildings for business purposes.

We may become involved in material legal proceedings in the future.

On April 26, 2006, a lawsuit was filed in the Delaware Court of Chancery (the "Court") by a stockholder of the Company against the Company, each of the Company's Directors and certain stockholder of the Company that beneficially owned 39.81% of the Company's outstanding common stock at the date of the lawsuit. The parties entered into a stipulation of settlement on April 3, 2007. The settlement will provide for dismissal of the litigation with prejudice and is subject to Court approval. As part of the settlement, the Company has agreed to attorneys' fees and expenses to plaintiff's counsel in the amount of \$151,000. Pursuant to the stipulation of settlement, the Company sent out notices to the members of the class on May 3, 2007. A fairness hearing took place on June 8, 2007, and, as stated above, the Order was entered on June 8, 2007.

The Company filed a complaint in the Superior Court for the County of Los Angeles, against a foreign attorney. The case was filed on February 14, 2007, and service of process has been done. In the complaint the Company is seeking judgment against this attorney in the amount of approximately 250,000 Euros (approximately \$316,000 as of the date of actual transferring the funds), plus interest, costs and fees. Defendant has not yet appeared in the action. The Company believes that it has a meritorious claim for the return of monies deposited with defendant in a trust capacity, and, from the documents in the Company's possession, there is no reason to doubt the validity of the claim. During April 2007 defendant returned \$92,694 (70,000 Euros at the relevant time) which netted to \$72,694 post legal expenses; the Company has granted him a 15-day extension to file his defense. Post the extension and in lieu of not filing a defense, the Company filed for a default judgment. On October 25, 2007 the Company obtained a California Judgment by court after default against the attorney for the sum of \$249,340.65. However, management does not have any information on the collectibles of said judgment that entered in court.

Verge which was a wholly owned subsidiary of AGL, where AGL is a majority owned subsidiary of the Company filed for bankruptcy in Chapter 11 proceedings during the first quarter of 2009. As of today, the Company does not believe it will have a material liability in relation to these proceeding, yet the Company advised that in lieu of its past holdings and current in-direct involvement (via Ocean One, and/or Trafalgar – see below) it may be named as defendants.

A consultant that was terminated by an ex-affiliate of the Company, named the Company as a defendant in litigation that the Company has neither any interest nor liability. The Company position is that naming the Company in said litigation is malicious. The Company filed an answer to said complaint requesting dismissal. In lieu of Verge bankruptcy proceedings an automatic stay was announced by Verge on the main complaint.

F-31

On November 21, 2007 Construction Company filed a demand for arbitration proceeding against Verge in connection with amounts due for general contracting services provided by them during the construction of the Company Sales Center. A judgment was given against Verge in said procedure.

The Company also agreed to have such registration statement declared effective within 150 days from the filing thereof. In the event that Company failed to meet its obligations to register the shares, it may have been required to pay a penalty equal to 1% of the value of the shares per month. The Company obtained a written waiver from the seller stating that the seller would not raise any claims in connection with the filing of registration statement through May 30, 2006. The Company since received another waiver extending the registration deadline through May 30, 2007 without penalty. As of June 30, 2008 (effective March 31, 2008), the Company was in default of the Registration Rights Agreement and therefore made a provision for compensation for \$150,000 to represent agreed final compensation (the "Penalty"). The Company via series of agreements (directly or via affiliates) with European based alternative investment fund - Trafalgar Capital Specialized Investment Fund, Luxembourg ("Trafalgar") established financial relationship which should create source of funding to the Company and its subsidiaries (see detailed description of said series of agreements in this filing). The Company position is that the DCG transactions (among others) would not have been closed by the Company, unless Trafalgar will provide the needed financing needed for the drilling program.

On December 4, 2008 in lieu of the world economy crisis, the company addressed Trafalgar formally to summarize the amendment to exiting business practice and modification of terms for existing as well as future financing. On January 16, 2009 based on the Trafalgar default, the Company sent to Trafalgar notice of default together with off-set existing alleged notes due to Trafalgar to mitigate the Company losses.

Since said cash investment was done in July 2008, the Company defaulted on terms, period and presentations (based on third parties presentations). Based on series of defaults of third parties, Vortex One entered into a sale agreement with third parties regarding specific 4 wells assignments – see subsequent events. As Mr. Ibgui via Vortex One entered into future proceeds sale agreement with Verge, and since Verge is under Bankruptcy, the company was advised verbally that a complaint to establish the rights of Verge will be filled where the Company will be named as a party to said lawsuit.

On July 1, 2008, DCG entered into a Drilling Contract (Model Turnkey Contract) ("Drilling Contract") with Ozona Natural Gas Company LLC ("Ozona"). The drilling of the first well commenced immediately at the cost of \$525,000 and the drilling of the subsequent three wells scheduled for as later phase, by Ozona and Mr. Mustafoglu, as well as the wells locations. Based on Mr. Mustafoglu negligence and executed un-authorized agreements with third parties, the

In the case of Clause 8.1.6 (Taxes) or Clause 9.2.4 of SPA, the time period is five years from the last day of the calendar year in which the closing date occurs. No claims have been made to date.

(g) Sub-Prime Crisis and Financials Markets Crisis

The mortgage credit markets in the U.S. have been experiencing difficulties as a result of the fact that many debtors are finding it difficult to obtain financing (hereinafter – the "Sub-prime crisis"). The sub-prime crisis resulted from a number of factors, as follows: an increase in the volume of repossessions of houses and apartments, an increase in the volume of bankruptcies of mortgage companies, a significant decrease in the available resources for purposes of financing through mortgages, and in the prices of apartments.

The financing of the project on the Verge subsidiary is contingent upon the future impact of the sub-prime crisis on the financial institutions operating in the U.S. Said crisis put ERC as well as Verge in a fragile none – cash situation, which brought management to make provision for doubtful debts on all monitories balances associated with real estate of ERC and Verge.

The Sub-prime crisis has also lead the USA (and the world) economy into a significant negative impact on the pricing of most commodities, in our case natural gas and oil. The Company anticipates that the drop in the commodities prices will present difficulties in obtaining financing for the drilling of wells and there is no assurance that the Company will be able to implement its business plan in a timely manner, or at all.

In order to reduce the Company risks and more effectively manage its business and to enable Company management to better focus on its business on developing the natural gas drilling rights, the board of directors had a discussion and resolution vacating the DCG project entirely.

effectively manage its regulatory and administrative costs, and to enable Company management to better focus on its business on developing the natural gas drilling rights recently acquired in connection with the acquisition of Davy Crockett Gas Company, LLC, which was announced on May 9, 2008. The Company requested that its shares be suspended from trading on NASDAQ at the open of the market on June 16, 2008, which was done. Following clearance by the Financial Industry Regulatory Authority ("FINRA") of a Form 211 application was filed by a market maker in the Company's stock.

The investor made a loan of \$220,000 to the company on September 15, 2008 (where said funds were wired to the company drilling contractor), that was paid in full on October 8, 2008. Accordingly the investor is entitled to 200,000 cashless warrants from September 15, 2008 at exercise price of \$1.50 for a period of 2 years. The balance of the offered shares, a quantity of up to 25,277,273 shares, will be allotted immediately after receipt of the approval of the Israel Securities Authority for the issuance of a shelf prospectus. Notwithstanding, if the approval of the shelf prospectus will not be granted by the Israel Securities Authority by the beginning of May 2008, only 12,613,636 shares will be allotted to Trafalgar at that same date

Despite assurances from Trafalgar to both AGL and Verge that the Share Exchange Agreement ("SEA") was legally permitted in Israel, AGL and Trafalgar could not implement the above transaction because of objections of the Israeli Securities Authority to the SEA, and, therefore, AGL caused Verge to pay off the \$500,000 loan transaction that AGL had entered into.

Trafalgar is an unrelated third party comprised of a European Euro Fund registered in Luxembourg. The Company, its subsidiaries, officers and directors are not affiliates of Trafalgar.

a) Stock option plans

In 2004, the Board of Directors established the "2004 Incentive Plan" ("the Plan"), with an aggregate of 800,000 shares of common stock authorized for issuance under the Plan. The Plan was approved by the Company's Annual Meeting of Stockholders in May 2004. In 2005, the Plan was adjusted to increase the number of shares of common stock issuable under such plan from 800,000 shares to 1,200,000 shares. The adjustment was approved at the Company's Annual Meeting of Stockholders in June 2005. The Plan provides that incentive and nonqualified options may be granted to key employees, officers, directors and consultants of the Company for the purpose of providing an incentive to those persons. The Plan may be administered by either the Board of Directors or a committee of two directors appointed by the Board of Directors (the "Committee"). The Board of Directors or Committee determines, among other things, the persons to whom stock options are granted, the number of shares subject to each option, the date or dates upon which each option may be exercised and the exercise price per share. Options granted under the Plan are generally exercisable for a period of up to ten years from the date of grant. Incentive options granted to stockholders that hold in excess of 10% of the total combined voting power or value of all classes of stock of the Company must have an exercise price of not less than 110% of the fair market value of the underlying stock on the date of the grant. The Company will not grant a nonqualified option with an exercise price less than 85% of the fair market value of the underlying common stock on the date of the grant.

Due to current issues in the development of the oil and gas project in Crockett County, Texas, the board obtained a current reserve report for the Company's interest in DCG and Vortex One, which report indicated that the DCG properties as being negative in value. As a result of such report, the world and US recessions and the depressed oil and gas prices, the board of directors elected to dispose of the DCG property and/or desert the project in its entirety. On June 30, 2008, the Company formed Vortex One, a limited liability company, with Tiran Ibgui, an individual ("Ibgui") as reported on the Company's 8-K. Said agreements, in addition, included the assignment of its four leases in Crockett County, Texas to Vortex One. As a condition precedent to Ibgui contributing the required funding, Vortex One pledged all of its assets to Ibgui including the leases. On October 29, 2008, the Company entered into a settlement arrangement with Mr. Ibgui, whereby the Company agreed to transfer the 525,000 common shares previously owned by Vortex One to Mr. Ibgui. Further, in February 28, 2009, Ibgui, as the secured lender to Vortex One, directed Vortex One to assign the term assignments with 80% of the proceeds being delivered to Ibgui, as secured lender, and 20% of the proceeds being delivered to the Company - as per the original agreement.

The transaction closed on February 28, 2009 in consideration of a cash payment in the amount of \$225,000, a 12 month promissory note in the amount of \$600,000 and a 60 month promissory note in the amount of \$1,500,000. Mr. Ibgui paid \$25,000 fee, and from the net consideration of \$200,000 Mr. Ibgui paid the Company its 20% portion of \$40,000 on March 3, 2009. On April 2009, the Company filed a complaint against Trafalgar and its affiliates, for breaching of agreement and damages.

19. Supplemental Oil and Gas Disclosures

The accompanying table presents information concerning the Company's natural gas producing activities as required by Statement of Financial Accounting Standards No. 69, "Disclosures about Oil and Gas Producing Activities." Capitalized costs relating to oil and gas producing activities from continuing operations are as follows:

	As of December 31, 2008
Proved undeveloped natural properties – Direct investment	\$ 2,300,000
Unproved properties – option exercised	50,000
Total	2,350,000
Accumulated depreciation, depletion, amortization , and impairment	—
Net capitalized costs	\$ 2,350,000

All of these reserves are located in DCG field located in the USA.

Estimated Quantities of Proved Oil and Gas Reserves

The following table presents the Company's estimate of its net proved crude oil and natural gas reserves as of September 30, 2008 related to continuing operations. The Company's management emphasizes that reserve estimates are inherently imprecise and that estimates of new discoveries are more imprecise than those of producing oil and gas properties. Accordingly, the estimates are expected to change as future information becomes available. The estimates have been prepared by independent natural gas reserve engineers.

	MMCF (thousand cubic feet)
Proved undeveloped natural gas reserves at February 22, 2008	—
Purchases of drilling rights for minerals in place for period February 22, 2008 (inception of DCG) to December 31, 2008 – 4 wells at 355 MCF each	1,420
Revisions of previous estimates *)	(180)
Extensions and discoveries**)	—
Sales of minerals in place	—
Proved undeveloped natural gas reserves at December 31, 2008	1,420

*) the current reserve report revised to include revision by decreasing the MMCF from 1,600 to 1,420 based on 355 MCF compare to 400 MCF in prior report.

*) – the 4 wells that the Company drilled were not connected to the main pipe yet, so its potential reserves were included above.

Standardized Measure of Discounted Future Net Cash Flows Relating to Proved Oil and Gas Reserves

The following disclosures concerning the standardized measure of future cash flows from proved crude oil and natural gas are presented in accordance with SFAS No. 69. The standardized measure does not purport to represent the fair market value of the Company's proved crude oil and natural gas reserves. An estimate of fair market value would also take into account, among other factors, the recovery of reserves not classified as proved, anticipated future changes in prices and costs, and a discount factor more representative of the time value of money and the risks inherent in reserve estimates.

Under the standardized measure, future cash inflows were estimated by applying period-end prices at December 31, 2008 adjusted for fixed and determinable escalations, to the estimated future production of year-end proved reserves. Future cash inflows were reduced by estimated future production and development costs based on year-end costs to determine pre-tax cash inflows. Future income taxes were computed by applying the statutory tax rate to the excess of pre-tax cash inflows over the tax basis of the properties. Operating loss carry forwards, tax credits, and permanent differences to the extent estimated to be available in the future were also considered in the future income tax calculations, thereby reducing the expected tax expense. Future net cash inflows after income taxes were discounted using a 10% annual discount rate to arrive at the Standardized Measure.

Set forth below is the Standardized Measure relating to proved undeveloped natural gas reserves for the period ending December 31, 2008:

	Period ending December 31, 2008 (in thousands of \$)	Period ending March 30, 2008 (in thousands of \$)
Future cash inflows, net of royalties	109,890	231,230
Future production costs	(32,964)	(38,702)
Future development costs	(43,050)	(25,800)
Future income tax expense		—
Net future cash flows	33,876	166,728
Discount	(33,296)	(117,475)
Standardized Measure of discounted future net cash relating to proved reserves	580	49,253

Changes in Standardized Measure of Discounted Future Net Cash Flows Relating to Proved Natural Gas Reserves. The table above shows the second standardized measure of discounted future net cash flows for the Company since inception. Accordingly, there are material changes to disclose, which in essence were contributed by substantial decline in gas prices in lieu of the financial turmoil that the USA (and the world) is facing.

Drilling Contract:

On July 1, 2008, DC Gas entered into a Drilling Contract (Model Turnkey Contract) ("Drilling Contract") with Ozona Natural Gas Company LLC ("Ozona"). Pursuant to the Drilling Contract, Ozona has been engaged to drill four wells in Crockett County, Texas. The drilling of the first well commenced immediately at the cost of \$525,000 and the drilling of the subsequent three wells shall take place in secession. The drilling operations on the first well are due to funding provided by Vortex One. Such drilling took place, and the Vortex One well has successfully hit natural gas at a depth of 4,783 feet. Due to this success with the first well, the Company commenced drilling on its second well on August 18, 2008, and it's remaining 2 other locations parallel. As disclosed on this report Vortex one entered into sale agreements of said four assignments.
