

WIDEPOINT CORP
Form 424B5
February 26, 2014

Filed Pursuant to Rule 424(b)(5)
Registration No. 333-193250

PROSPECTUS SUPPLEMENT

(To Prospectus dated February 5, 2014)

WIDEPOINT CORPORATION

7,876,497 Shares

Common Stock

\$1.38 per share

We are offering shares of our common stock, \$0.001 par value, pursuant to this prospectus supplement and the accompanying prospectus. Our common stock is listed on the NYSE MKT under the symbol "WYY." The last reported sale price of our common stock on the NYSE MKT on February 24, 2014 was \$1.51 per share.

Investing in our common stock involves certain risks. See "Risk Factors" beginning on page S-5 of this prospectus supplement, the risk factors beginning on page 1 of the accompanying prospectus and the risk factors contained in the documents incorporated by reference in this prospectus supplement and the accompanying prospectus. You should carefully consider the risk factors described in this prospectus supplement, the accompanying prospectus and the documents incorporated by reference in this prospectus supplement and the accompanying prospectus before you decide to purchase our common stock.

Total

Edgar Filing: WIDEPOINT CORP - Form 424B5

	Per Share	
Public offering price	\$ 1.38	\$ 10,869,566
Underwriting discounts and commissions	\$ 0.0828	\$ 652,174
Proceeds, before expenses, to us	\$ 1.2972	\$ 10,217,392

We estimate the total expenses of this offering, excluding the underwriting discounts and commissions, will be approximately \$170,000. Delivery of the shares of common stock will be made through the facilities of the Depository Trust Company. We have granted the underwriter a 30-day option to purchase up to an additional 1,181,475 shares from us on the same terms and conditions as set forth above, to cover over-allotments, if any. If the underwriter exercises the option in full, the total underwriting discount payable by us will be \$750,000 and the total proceeds to us, before the payment of expenses, will be \$11,750,001.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined that this prospectus supplement or the accompanying prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriter expects to deliver the shares against payment on or about February 28, 2014.

B. RILEY & CO., LLC

The date of this prospectus supplement is February 26, 2014.

ABOUT THIS PROSPECTUS SUPPLEMENT

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of this offering. The second part, the accompanying prospectus, gives more general information, some of which may not apply to this offering. Generally, when we refer only to the “prospectus”, we are referring to both parts combined.

If information in this prospectus supplement is inconsistent with the accompanying prospectus, you should rely on this prospectus supplement. This prospectus supplement, the accompanying prospectus, any other offering material and the documents incorporated into each by reference include important information about us, the shares of our common stock being offered and other information you should know before investing. You should read this prospectus supplement and the accompanying prospectus as well as additional information described under “Where You Can Find More Information” in this prospectus supplement and the accompanying prospectus before investing in shares of our common stock.

In making your investment decision, you should rely only on the information contained in or incorporated by reference in this prospectus supplement, the accompanying prospectus and any free writing prospectus filed by us with the Securities and Exchange Commission (“SEC”) and any other offering material we or the underwriter provide. We have not, and the underwriter has not, authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. Neither we nor the underwriter are making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information contained or incorporated by reference in this prospectus supplement and the accompanying prospectus is accurate only as of the date of this prospectus supplement or the accompanying prospectus, as the case maybe, or in the case of the documents incorporated by reference, the date of such documents, regardless of the time of delivery of this prospectus supplement and the accompanying prospectus or any sales of our common stock. Our business, financial condition, results of operations and prospects may have changed since those dates.

Unless the context otherwise requires, in this prospectus supplement, “WidePoint,” “company,” “we,” “us,” “our” and “ours” refer to WidePoint Corporation and its subsidiaries.

FORWARD-LOOKING STATEMENTS

This prospectus supplement, the accompanying prospectus, the documents that are incorporated by reference in this prospectus supplement and the accompanying prospectus and any free writing prospectuses filed by us with the SEC may contain statements that constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements generally relate to our plans, intentions, objectives, estimates and expectations for future events and include statements about our plans, intentions, objectives, estimates and expectations, assumptions and other statements that are not historical facts. Such forward-looking statements, including those concerning our expectations and estimates, are subject to known and unknown risks and uncertainties, which could cause actual results to differ materially from the results, projected, expected or implied by the forward-looking statements, some of which are beyond our control, that may cause our actual results, performance or achievements, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. These risks and uncertainties include but are not limited to (i) our financing plans; (ii) trends affecting our financial condition or results of operations; (iii) our growth strategy and operating strategy; (iv) the declaration and payment of dividends; (v) decreased government spending, (vi) changes in government regulations, (vii) our focus on selling higher margin services and (viii) the risk factors described in the prospectus.

We urge you to consider these factors before investing in our common stock. The forward-looking statements included in this prospectus supplement, the accompanying prospectus and any other offering material, or in the documents incorporated by reference into this prospectus supplement, the accompanying prospectus and any other offering material, are made only as of the date of the prospectus supplement, the accompanying prospectus, any other offering material or the incorporated document. We undertake no obligation to publicly revise any forward-looking statements or cautionary factors except as required by law. For more detail on these and other risks, please see “Risk Factors” in this prospectus supplement and the accompanying prospectus.

PROSPECTUS SUPPLEMENT SUMMARY

The following information below is only a summary of more detailed information included elsewhere in, or incorporated by reference in, this prospectus supplement and the accompanying prospectus, and should be read together with the information contained or incorporated by reference in other parts of this prospectus supplement and the accompanying prospectus. This summary highlights selected information about us and this offering. This summary may not contain all of the information that may be important to you. Before making a decision to invest in our common stock, you should read carefully all of the information contained in or incorporated by reference into this prospectus supplement and the accompanying prospectus, including the information set forth under the caption “Risk Factors” in this prospectus supplement and the accompanying prospectus as well as the documents incorporated by reference, which are described under “Where you can Find More Information” and “Documents Incorporated by Reference” in this prospectus supplement.

Our Company

We are a provider of information technology (IT) based products, services, and solutions. We offer secure, cloud-based, enterprise-wide information technology-based solutions that enable commercial markets, and federal and state government organizations, to deploy fully compliant IT services in accordance with government-mandated regulations and advanced system requirements. Our managed mobility enterprise solutions offer a portfolio of information technology based services and products with a set of streamlined mobile communications management, identity management, and consulting solutions that provide our customers with the ability to manage and protect their valuable communications assets and deploy compliant identity management solutions that provide secured virtual and physical access to restricted environments. Many of our solutions are accessible on-demand through cloud computing and provide customers with the ability to remotely manage their workforce mobility and identity management requirements in accordance with internal policies, the marketplace and the demands of our customers.

Our objective is to grow our business profitably as a premier technology-based provider of product and service solutions to both the public and private sectors. Our strategies for achieving our objective to grow our business profitably include the following:

Retain and Cross-Sell Existing Customer Base. Many of our professional staff work on-site or work in close proximity with our customers and we develop close customer relationships and are often able to enhance our customers’ operations by rapidly identifying and developing solutions for customer-specific requirements. We intend to continue to deliver product and service solutions to meet or exceed customer expectations and recommend complementary product and service solutions that will meet the business objectives of our customers.

2. *Attract New Customers by Referral and Expertise.* We intend to leverage our long-term relationships with our existing customers to reach new customers in our target market. We also intend to use our reputation within the federal, state and local government agencies and corporate customers to attract new customers.

3. *Growth Opportunities in Target Markets.* We believe that the increased focus on efficient use of financial resources in the public and private sectors creates an opportunity for continued growth in identity management services and communications based management services. Our ability to deliver savings may present additional opportunities to provide management and delivery of secure and advanced technology solutions for enterprise applications and information systems. We will continue to develop our sales and marketing infrastructure and channels to drive new customer growth opportunities in our target market.

4. *Preparing our Infrastructure for Growth.* We continue to develop our operational competencies and disciplines to allow us to both support existing and growth opportunities. We will continue to strengthen our financial infrastructure to support the general and administrative requirements attributable to our growth strategies.

5. *Attracting, Training and Retaining Highly Skilled Professionals.* We continue to attract, train and retain highly skilled professionals, including engineers, scientists, analysts, technicians and support specialists, to ensure that we have the capabilities to fulfill our customers' requirements. We target candidates who have served in the military or as civilian experts, as well as those who are leading specialists in their technology disciplines. We believe we can continue to retain our employees by offering competitive compensation and benefit plans, opportunities for career growth through company-supported education programs and diverse and challenging assignments.

Pursuing Strategic Acquisitions. We are focused primarily on acquiring businesses that provide value-added solutions for our present service offerings and customer base. We will also selectively pursue strategic acquisitions⁶ of businesses that can cost-effectively further broaden our domain expertise and service solutions to our customers and allow us to establish relationships with new customers or enter new target markets.

Recent Developments

Blanket Purchase Agreement for Cellular Wireless Managed Services.

During the second quarter of 2013, we were awarded by the Department of Homeland Security (DHS) a Blanket Purchase Agreement (“BPA”) HSHQDC-13-A-00024 for Cellular Wireless Managed Services with a ceiling of \$600 million. The Cellular Wireless Managed Services program includes DHS and all DHS components, including Transportation Security Administration (TSA), U.S. Customs and Border Protection (CBP), U.S. and Citizenship and Immigration Services, U.S. Immigration and Customs Enforcement, the U.S. Coast Guard, the Federal Emergency Management Agency, and the U.S. Secret Service. The BPA period of performance is for a base period of one year and four option years. The BPA had been protested by a third-party bidder and, as a result of such protest, DHS had issued a stop work order for expanded services under the BPA.

On December 16, 2013, we learned that the U.S. Government Accountability Office (GAO) posted on its bid protest docket on the GAO website that the protest had been denied, effective December 13, 2013. Also on December 16, 2013, we were notified by DHS that the stop work order had been lifted, and that we had been authorized to resume performance under the BPA. The one year base period for performance under the BPA was stayed during the stop work order and commenced on December 17, 2013.

We currently do not expect to begin generating material revenue from the BPA with the DHS until at least the second quarter of 2014. We believe that the BPA has the opportunity to contribute more than \$75 million in incremental annual revenue once fully ramped.

Waiver of Credit Facility Covenants

Historically, we have had access to a credit facility, which consists of a variable line of credit and a fixed term note to fund acquisition growth and working capital. Our credit facility agreement requires us to maintain certain financial covenants on a quarterly and annual basis. As of December 31, 2013, we were not in compliance with our (i) debt

service coverage ratio, (ii) minimum tangible net worth requirement and (iii) ratio of current assets to current liabilities. On February 21, 2014, we obtained a waiver from our lender for compliance with the covenants as of December 31, 2013. However, our inability to comply with such ratios in any future period could result in our lender accelerating in part or in full payment of all unpaid principal and interest which could have a material adverse effect on our business and financial condition.

Estimated Results of Operations for the Quarter and Year Ended December 31, 2013

Based on information currently available, we estimate that our revenue for the fiscal year ended December 31, 2013 will be in the range of \$46.6 million to \$46.8 million. We estimate loss before provision for income taxes for the fiscal year ended December 31, 2013 will be in the range of \$1.2 million to \$1.4 million. **These estimates represent the most current information available to management. Our normal financial closing and financial statement preparation process is in its preliminary stages. As a result, our actual financial results could be different and those differences could be material. The audit of the fiscal year 2013 consolidated financial statements by our independent registered public accounting firm has just commenced. As such, the estimates above are subject to change, including, without limitation, year-end adjustments.**

Corporate Information

We are a Delaware corporation and our corporate headquarters are located at 7926 Jones Branch Drive, Suite 520, McLean, Virginia 22102. Our telephone number is (703) 349-2577. Our Internet website address is www.widepoint.com. We do not incorporate the information on our website into this prospectus, and you should not consider it part of this prospectus.

The Offering

The following summary contains basic information about this offering. The summary is not intended to be complete. You should read the full text and more specific details contained elsewhere in this prospectus supplement.

Issuer

WidePoint Corporation.

Common stock offered by us

7,876,497 shares.

Option to purchase additional shares of common stock

We have granted the underwriter an option exercisable for a period of 30 days from the date of this prospectus supplement to purchase up to an additional 1,181,475 shares of common stock at the public offering price to cover over-allotments, if any.

Common stock to be outstanding after this offering⁽¹⁾

71,783,854 shares (or 72,965,329 shares if the over-allotment option is exercised in full)

NYSE MKT symbol

“WYY”

We estimate that the net proceeds from this offering will be approximately \$10.0 million after payment of underwriting discounts, commissions and our estimated offering expenses.

Use of proceeds

We intend to use the net proceeds from the sale of the securities for general corporate purposes including the repayment of debt, acquiring businesses and investing in other businesses. Pending such use, we may temporarily invest the net proceeds in short-term investments. See “Use of Proceeds.”

Risk factors

See “Risk Factors” and the other information included in this prospectus supplement and the accompanying prospectus for a discussion of certain factors you should carefully consider before deciding to invest in shares of our common stock.

(1) The number of shares outstanding after this offering is based on 63,907,357 shares of common stock outstanding as of February 24, 2014. The number of shares of common stock to be outstanding after this offering excludes the following: (i) 1,624,000 shares of common stock issuable upon the exercise of outstanding stock options at a weighted

average exercise price of \$0.72 per share as of January 3, 2014 and \$0.71 per share as of February 24, 2014, (ii) 500,000 shares of common stock issuable upon vesting of outstanding restricted common stock and (iii) 1,851,849 shares of common stock available for future grants under our 2008 Stock Incentive Plan.

RISK FACTORS

Investing in our common stock involves risk. Before you invest in our common stock you should carefully consider the following risk factors, as well as the other information in this prospectus supplement and the accompanying prospectus. Any of these risks could cause our actual results to vary materially from recent results or from anticipated future results or could materially and adversely affect our business, financial condition and results of operations. This effect could be compounded if multiple risks were to occur. The occurrence of any of these risks might cause you to lose all or part of your investment. Please also refer to the section above entitled “Forward-Looking Statements” regarding forward-looking statements included herein.

Risks Related to the Offering

Fluctuations in the price of our common stock, including as a result of actual or anticipated sales of shares by stockholders, may make our common stock more difficult to resell.

The market price and trading volume of our common stock have been and may continue to be subject to significant fluctuations due not only to general stock market conditions, but also to a change in sentiment in the market regarding the industries in which we operate, our operations, business prospects or liquidity or this offering. During the period from January 1, 2012 to February 10, 2014, our common stock has fluctuated from a high of \$1.95 per share to a low of \$0.30 per share. In addition to the risk factors discussed in our periodic reports, in the accompanying prospectus and elsewhere in this prospectus supplement, the price and volume volatility of our common stock may be affected by actual or anticipated sales of common stock by existing stockholders, including of shares purchased in this offering, whether in the market or in subsequent public offerings.

As a result, these fluctuations in the market price and trading volume of our common stock may make it difficult to predict the market price of our common stock in the future, cause the value of your investment to decline and make it more difficult to resell our common stock.

We have broad discretion as to the use of the net proceeds we receive from this offering and may not use them effectively.

We retain broad discretion to use the net proceeds from this offering and may use the net proceeds for future potential acquisitions as part of our strategy to pursue growth opportunities, to repay debt and/or for other general corporate purposes. Accordingly, you will have to rely upon the judgment of our management with respect to the use of those

net proceeds. Our management may spend a portion or all of the net proceeds we receive from this offering in ways that our stockholders may not desire or that may not yield a favorable return. The failure by our management to apply these funds effectively could harm our business.

Purchasers will suffer immediate and substantial dilution as a result of this offering.

Purchasers of shares of our common stock offered by this prospectus will suffer immediate and substantial dilution of their investment. Based on the sale of 7,876,497 shares of our common stock at a public offering price of \$1.38 per share in this offering, purchasers in this offering will suffer immediate dilution of approximately \$1.18 per share in the net tangible book value of the common stock. See “Dilution” on page S-8 of this prospectus supplement for a more detailed discussion of the dilution purchasers will incur in this offering.

Our stockholders may experience further dilution if we issue additional shares of common stock in the future.

Any additional future issuances of common stock will reduce the percentage of our common stock owned by investors purchasing shares in this offering who do not participate in future issuances. In most circumstances stockholders will not be entitled to vote on whether or not we issue additional common stock. In addition, depending on the terms and pricing of an additional offering of our common stock and the value of our properties, our stockholders may experience dilution in both the book value and fair value of their shares.

There may be future sales or other dilution of our equity, including issuances related to acquisitions or earn outs related to acquisitions, which may adversely affect the market price of our common stock.

Except as described under “Underwriting,” we are not restricted from issuing additional common stock, including securities that are convertible into or exchangeable for, or that represent the right to receive, common stock. We are offering up to shares of common stock, and potentially an additional shares of common stock if the over-allotment option is exercised in full. The issuance of additional shares of our common stock in this offering or other issuances of our common stock or convertible or other equity linked securities, including options and warrants, or otherwise, in connection with capital raising transactions, as payment of the consideration for acquisitions or for employee compensation or other purposes will dilute the ownership interest of our common stockholders. As of February 24, 2014, we had 63,907,357 outstanding shares of common stock, which excludes: (i) 1,624,000 shares of common stock issuable upon the exercise of outstanding stock options, (ii) 500,000 shares of common stock issuable upon vesting of outstanding restricted common stock and (iii) 1,851,849 shares of common stock available for future grants under our 2008 Stock Incentive Plan.

Sales of a substantial number of shares of our common stock or other equity-related securities in the public market could depress the market price of our common stock and impair our ability to raise capital through the sale of additional equity securities. We cannot predict the effect that future sales of our common stock or other equity-related securities would have on the market price of our common stock.

We are not currently paying dividends and will likely continue not paying dividends for the foreseeable future.

We have never paid or declared any cash dividends on our common stock. We currently intend to retain all available funds and any future earnings to fund the development and expansion of our business, and we do not anticipate paying any cash dividends in the foreseeable future. In addition, the terms of our existing credit agreement restrict the payment of cash dividends on our common stock. Any future determination to pay dividends will be at the discretion of our board of directors and will depend on our financial condition, results of operations, capital requirements, contractual restrictions (including those under our loan agreements) and other factors that our board of directors deems relevant.

USE OF PROCEEDS

We estimate that the net proceeds from the sale of our common stock in this offering will be approximately \$10.0 million, or approximately \$11.6 million if the underwriter exercises in full the option to purchase additional shares of common stock to cover over-allotments, in each case, after deducting underwriting discounts and commissions and our estimated expenses related to the offering. We intend to use the net proceeds from the sale of our common stock for general corporate purposes, including the repayment of debt, acquiring businesses and investing in other businesses. Pending such use, we may temporarily invest the net proceeds in short-term investments.

S-7

DILUTION

Purchasers of shares of our common stock offered by this prospectus supplement and the accompanying prospectus will experience an immediate dilution in the net tangible book value of their common stock from the public offering price of the shares of common stock. The net tangible book value of our common stock as of September 30, 2013 was approximately \$3,995,000, or \$0.06 per share. Net tangible book value per share of our common stock is equal to our net tangible assets (stockholders' equity less goodwill and intangible assets) divided by the number of shares of our common stock issued and outstanding as of September 30, 2013.

Dilution per share represents the difference between the public offering price per share of our common stock and the adjusted net tangible book value per share of our common stock after giving effect to this offering. After reflecting the sale in this offering of 7,876,497 shares of our common stock offered by us at an offering price of \$1.38 per share, less underwriting discount and estimated offering expenses, our adjusted net tangible book value per share of our common stock as of September 30, 2013 would have been approximately \$14,042,194 or \$0.20 per share. The change represents an immediate increase in net tangible book value per share of our common stock of \$0.14 per share to existing stockholders and an immediate dilution of \$1.18 per share to new investors purchasing the shares of our common stock in this offering. The following table illustrates this per share dilution:

Public offering price per share of common stock	\$1.38
Net tangible book value per share as of September 30, 2013	\$0.06
Increase per share attributable to this offering	\$0.14
Adjusted net tangible book value per share as of September 30, 2013	\$0.20
Dilution per share attributable to this offering	\$1.18

The foregoing calculations are based on 63,857,357 shares of our common stock outstanding as of September 30, 2013, the last day of our most recently completed fiscal quarter, and do not take into account any of the following:

- 1,486,500 shares of common stock issuable upon the exercise of outstanding stock options;
- 500,000 shares of common stock issuable upon vesting of outstanding restricted common stock; and
- 1,201,849 shares of common stock available for future grants under our 2008 Stock Incentive Plan.

COMMON STOCK PRICE RANGE AND DIVIDENDS

Price of Our Common Stock

Our common stock is listed on the NYSE MKT under the symbol “WYY”. The following table sets forth, for the periods indicated, the intraday high and low sales prices per share of our common stock as reported on the NYSE MKT.

	High	Low
Year Ended December 31, 2012		
First Quarter	\$0.95	\$0.33
Second Quarter	\$0.94	\$0.37
Third Quarter	\$0.63	\$0.57
Fourth Quarter	\$0.59	\$0.69
Year Ended December 31, 2013		
First Quarter	\$0.73	\$0.30
Second Quarter	\$0.86	\$0.45
Third Quarter	\$1.14	\$0.65
Fourth Quarter	\$1.79	\$0.68
Year Ended December 31, 2014		
First Quarter (through February 24, 2014)	\$1.95	\$1.29

The last reported sale price of our common stock on the NYSE MKT on February 24, 2014 was \$1.51 per share. As of February 24, 2014, there were 63,907,357 shares of our common stock outstanding.

Dividend Payments and Policy

We have never paid cash dividends on our common stock and intend to continue this policy for the foreseeable future. We plan to retain earnings for use in growing our business base. Any future determination to pay cash dividends will be at the discretion of our Board of Directors and will be dependent on our results of operations, financial condition, contractual and legal restrictions and any other factors deemed by the management and the Board to be a priority requirement of the business

S-9

CAPITALIZATION

The following table sets forth our cash and cash equivalents and capitalization as of September 30, 2013 on (i) an actual basis, and (ii) an as adjusted basis to give effect to the sale of the shares of common stock offered hereby (assuming net proceeds of approximately \$10.0 million and assuming no exercise of the over-allotment option).

You should read this table in conjunction with “Use of Proceeds” and our consolidated financial statements and related notes incorporated herein by reference.

	At September 30, 2013	
	Actual	As Adjusted
	(in thousands, except share and per share amounts)	
	(unaudited)	
Cash and cash equivalents	\$2,409,230	\$12,456,622
Long-term debt	\$3,658,929	\$3,658,929
Stockholders' equity:		
Common stock, \$0.001 par value: Shares authorized: 110,000,000; shares issued: 63,857,357 on an actual basis and 71,733,854 shares issued on an as adjusted basis	63,857	71,733
Additional paid-in capital	69,814,932	79,854,448
Accumulated deficit	(45,321,972)	(45,321,972)
Total stockholders' equity	24,556,817	34,604,208
Total capitalization	\$28,215,746	\$38,263,138

UNDERWRITING

Under the terms and subject to the conditions contained in an underwriting agreement entered into with B. Riley & Co., LLC, B. Riley & Co., LLC has agreed to purchase, and we have agreed to sell to them, the number of shares of our common stock set forth opposite their name below:

Underwriter	Number of Shares
B. Riley & Co., LLC	7,876,497
Total	7,876,497

The underwriter is offering the shares subject to its acceptance of the shares from us and subject to prior sale. The underwriting agreement provides that the obligations of the underwriter to pay for and accept delivery of the shares offered by this prospectus supplement are subject to the approval of certain legal matters by its counsel and to other conditions, including the absence of any material adverse change in our business and the receipt of customary legal opinions, letters and certificates. The underwriter is committed to take and pay for all of the shares being offered, if any are taken, other than the shares covered by the option described below unless and until this option is exercised.

Option to Purchase Additional Shares

If the underwriter sells more shares than the total number set forth in the table above, the underwriter has an option to buy up to an additional 1,181,475 shares from us. The underwriter may exercise that option at any time and from time to time during the 30-day period from the date of this prospectus supplement.

Commissions and Discounts

The underwriter proposes to offer the common stock directly to the public at the public offering price indicated on the cover page of this prospectus supplement and to various dealers at that price less a concession not to exceed \$1.38 per share. After this offering, the public offering price, concession and reallowance to dealers may be reduced by the underwriter. No reduction will change the amount of proceeds to be received by us as indicated on the cover page of this prospectus supplement. The shares of common stock are offered by the underwriter as stated in this prospectus supplement, subject to receipt and acceptance and subject to their right to reject any order in whole or in part.

The following table summarizes the public offering price, underwriting discounts and commissions and proceeds before payment of other expenses by us assuming both no exercise and full exercise of the underwriter's option to purchase additional shares:

	Per Share	Total Without Over- Allotment	With Over- Allotment
Public offering price	\$1.38	\$10,869,566	\$12,500,001
Underwriting discounts and commissions	\$0.0828	\$652,174	\$750,000
Proceeds, before payment of other expenses, to us	\$1.2972	\$10,217,392	\$11,750,001

We have agreed to reimburse the underwriters for their expenses, including the fees and expenses of their counsel. We estimate that the total expenses payable by us in connection with this offering, other than the underwriting discounts and commissions referred to in the table above, will be approximately \$170,000, which includes approximately \$50,000 in expenses incurred by the underwriter (including the fees and expenses of their counsel) and approximately \$120,000 in expenses incurred by us (including the fees and expenses of our counsel, independent registered public accountants and other miscellaneous expenses).

Indemnification

We have agreed to indemnify the underwriter against various liabilities, including certain liabilities under the Securities Act of 1933, as amended (the “Securities Act”), and the Exchange Act of 1934, as amended (the “Exchange Act”), or to contribute to payments the underwriter may be required to make because of any of those liabilities.

Lock-up Agreements

We and each of our executive officers and directors have agreed with the underwriter, subject to certain exceptions, not to sell or transfer any common stock or securities convertible into, exchangeable for, exercisable for, or repayable with common stock, during the period from the date of this prospectus supplement 90 days after the date of this prospectus supplement, except with the prior written consent of B. Riley & Co., LLC. Specifically, we and these other persons have agreed, with certain limited exceptions, not to directly or indirectly:

offer, pledge, sell, assign or contract to sell any common stock or securities convertible into common stock or exercisable or exchangeable for common stock;

engage in any short selling of common stock or securities convertible into common stock or exercisable or exchangeable for common stock;

otherwise dispose of or transfer any common stock; or

enter into any swap, hedge or other agreement or arrangement that transfers, in whole or in part, the economic consequence of ownership of any common stock or securities convertible into common stock or exercisable or exchangeable for common stock whether any such swap or transaction is to be settled by delivery of shares or other securities, in cash or otherwise.

The foregoing restrictions do not apply to transactions relating to our common stock acquired in open market transactions after the date of this prospectus supplement, the exercise of any stock option to purchase common stock pursuant to any of our benefit plans, shares of common stock delivered by the director or executive officer to us or sold for the purpose of paying the exercise price on the exercise by the director or executive officer of options to purchase common stock granted to the director or executive officer by us and taxes imposed on such exercise of options or transfers of common stock by will or intestate succession. Our executive officers and directors, are further permitted to transfer common stock by gift, or to any trust for the direct or indirect benefit of such director or executive officer or the immediate family of the director or officer, *provided* the transferee agrees to hold the shares of

common stock subject to the restrictions applicable to the transferor described above.

Price Stabilization, Short Positions and Penalty Bids

Until this offering is completed, rules of the SEC may limit the ability of the underwriter and certain selling group members to bid for and purchase shares of our common stock. As an exception to these rules, the underwriter may engage in certain transactions that stabilize the price of our common stock. These transactions may include short sales, stabilizing transactions, purchases to cover positions created by short sales and passive market making. A short sale is covered if the short position is no greater than the number of shares available for purchase by the underwriter under the option to purchase additional shares. The underwriter can close out a covered short sale by exercising the option to purchase additional shares or purchasing shares in the open market. In determining the source of shares to close out a covered short sale, the underwriter will consider, among other things, the open market price of shares compared to the price available under the option to purchase additional shares. The underwriter may also sell shares in excess of the option to purchase additional shares, creating a naked short position. The underwriter must close out any naked short position by purchasing shares in the open market. A naked short position is more likely to be created if the underwriter is concerned that there may be downward pressure on the price of the common stock in the open market after pricing that could adversely affect investors who purchase in the offering. As an additional means of facilitating the offering, the underwriter may bid for, and purchase, shares of common stock in the open market to stabilize the price of the common stock.

S-12

In connection with this transaction, the underwriter may engage in passive market making transactions in the common stock on the NYSE MKT, prior to the pricing and completion of this offering. Passive market making is permitted by SEC Regulation M and consists of displaying bids on the NYSE MKT no higher than the bid prices of independent market makers and making purchases at prices no higher than these independent bids and effected in response to order flow. Net purchases by a passive market maker on each day are limited to a specified percentage of the passive market maker's average daily trading volume in the common stock during a specified period and must be discontinued when such limit is reached. Passive market making may cause the price of the common stock to be higher than the price that otherwise would exist in the open market in the absence of such transactions.

These activities by the underwriter may stabilize, maintain or otherwise affect the market price of our common stock. As a result the price of our common stock may be higher than the price that otherwise might exist in the open market. The underwriter is not required to engage in these activities. If these activities are commenced, they may be discontinued by the underwriter without notice at any time. These transactions may be effected on the NYSE MKT or otherwise.

Electronic Distribution

A prospectus supplement in electronic format may be made available on websites or through other online services maintained by the underwriter of the offering, or by its affiliates. Other than the prospectus supplement in electronic format, the information on the underwriter's website and any information contained in any other website maintained by the underwriter is not part of this prospectus supplement or the registration statement of which this prospectus supplement forms a part, has not been approved and/or endorsed by us or the underwriter in the capacity as an underwriter and should not be relied upon by investors.

Listing

Our common stock is listed on the NYSE MKT under the symbol "WYY."

Selling Restrictions

No action has been taken in any jurisdiction (except in the United States) that would permit a public offering of our common stock, or the possession, circulation or distribution of this prospectus supplement, the accompanying

prospectus or any other material relating to us or our common stock in any jurisdiction where action for that purpose is required. Accordingly, our common stock may not be offered or sold, directly or indirectly, and none of this prospectus supplement, the accompanying prospectus or any other offering material or advertisements in connection with our common stock may be distributed or published, in or from any country or jurisdiction, except in compliance with any applicable rules and regulations of any such country or jurisdiction.

Affiliations

The underwriter and its affiliates may in the future provide various investment banking, financial advisory and other financial services to us and our affiliates for which they may receive advisory or transaction fees, as applicable, plus out-of-pocket expenses of the nature and in amounts customary in the industry for these financial services. We expect to continue to use B. Riley & Co., LLC and its affiliates for various services in the future.

LEGAL MATTERS

The validity of the securities offered by this prospectus supplement will be passed on for us by Foley & Lardner LLP, Jacksonville, Florida. Certain legal matters in connection with this offering will be passed on for the underwriter by Troutman Sanders LLP, Irvine, California.

EXPERTS

The consolidated financial statements of WidePoint Corporation as of December 31, 2012 and 2011, and for the years then ended, have been incorporated by reference herein in reliance upon the report of Moss Adams LLP, independent registered public accounting firm, incorporated by reference herein, and upon the authority of said firm as experts in accounting and auditing. To the extent that Moss Adams LLP audits and reports on consolidated financial statements of WidePoint Corporation at future dates and consents to the use of their reports thereon, such consolidated financial statements also will be incorporated by reference in the registration statement in reliance upon their reports and said authority

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. We also filed a registration statement on Form S-3, including exhibits, under the Securities Act of 1933, as amended, or the Securities Act, with respect to the securities offered by this prospectus supplement. This prospectus supplement and the accompanying prospectus is a part of the registration statement, but does not contain all of the information included in the registration statement or the exhibits. You may read and copy the registration statement and any other document that we file at the SEC's public reference room at 100 F Street, N.E., Washington D.C. 20549. You can call the SEC at 1-800-SEC-0330 for further information on the operation of the public reference room. You can also find our public filings with the SEC on the internet at a web site maintained by the SEC located at <http://www.sec.gov>.

We are "incorporating by reference" specified documents that we file with the SEC, which means:

· incorporated documents are considered part of this prospectus supplement;

we are disclosing important information to you by referring you to those documents; and

information we file with the SEC will automatically update and supersede information contained in this prospectus supplement.

DOCUMENTS INCORPORATED BY REFERENCE

We incorporate by reference the documents listed below and any future filings we make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Exchange Act after the date of this prospectus supplement and prior to the termination of the offering under this prospectus supplement:

our Annual Report on Form 10-K for the year ended December 31, 2012;

our Definitive Proxy Statement on Schedule 14A filed November 1, 2013;

our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2013, June 30, 2013 and September 30, 2013;

our Current Reports on Form 8-K filed August 28, 2013, December 16, 2013, December 27, 2013 and February 20, 2014, February 25, 2014 (other than Items 2.02 and 7.01) and February 26, 2014 (other than Item 7.01 and the exhibits related thereto); and

the description of our common stock contained in or incorporated into our Registration Statement on Form 8-A, filed September 19, 2006, and any amendment or report updating that description.

Information in this prospectus supplement supersedes related information in the documents listed above, and information in subsequently filed documents supersedes related information in both this prospectus supplement and the incorporated documents.

We will promptly provide, without charge to you, upon written or oral request, a copy of any or all of the documents incorporated by reference in this prospectus supplement, other than exhibits to those documents, unless the exhibits are specifically incorporated by reference in those documents. Requests should be directed to:

WidePoint Corporation

7926 Jones Branch Drive, Suite 520

McLean, Virginia 22102

Stock Purchase Units

We may offer and sell from time to time up to \$25.0 million of any combination of the securities described in this prospectus, in one or more classes or series and in amounts, at prices and on terms that we will determine at the times of the offerings.

This prospectus describes the general manner in which our securities may be offered using this prospectus. We will provide specific terms of the securities, including the offering prices, in one or more supplements to this prospectus. The supplements may also add, update or change information contained in this prospectus. You should read this prospectus and the prospectus supplement relating to the specific issue of securities carefully before you invest.

We may offer the securities independently or together in any combination for sale directly to purchasers or through underwriters, dealers or agents to be designated at a future date. The supplements to this prospectus will provide the specific terms of the plan of distribution.

Our common stock is listed on the NYSE MKT under the symbol "WYY."

Investment in our securities involves risks. Please read carefully the section entitled “Risk Factors” beginning on page 1 of this prospectus and in any applicable prospectus supplement and/or other offering material for a discussion of certain factors which should be considered in an investment of the securities which may be offered hereby.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is February 5, 2014

About This Prospectus

Unless the context otherwise requires, in this prospectus, “WidePoint,” “company,” “we,” “us,” “our” and “ours” refer to WidePoint Corporation and its subsidiaries on a combined basis.

This prospectus is part of a registration statement that we filed with the Securities and Exchange Commission, or SEC, using a “shelf” registration process. Under this shelf registration process, we may, from time to time, sell the securities or combinations of the securities described in this prospectus in one or more offerings. This prospectus provides you with a general description of the securities that we may offer. Each time we offer securities, we will provide a prospectus supplement and/or other offering material that will contain specific information about the terms of that offering. The prospectus supplement and/or other offering material may also add, update or change information contained in this prospectus. You should read this prospectus, any prospectus supplement and any other offering material together with additional information described under the heading “Where You Can Find More Information.”

You should rely only on the information contained or incorporated by reference in this prospectus and in any prospectus supplement or other offering material. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not making offers to sell or solicitations to buy the securities in any jurisdiction in which an offer or solicitation is not authorized or in which the person making that offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make an offer or solicitation. You should not assume that the information in this prospectus, any prospectus supplement or any other offering material, or the information we previously filed with the SEC that we incorporate by reference in this prospectus or any prospectus supplement, is accurate as of any date other than its respective date. Our business, financial condition, results of operations and prospects may have changed since those dates.

“Forward-Looking” Information

The information included or incorporation by reference into this prospectus contains statements that the company believes to be “forward-looking statements” within the meaning of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, without limitation, any statement that is not a statement of historical fact, including, without limitation, statements regarding the company’s business strategy and plans and objectives of management for future operations or that may predict, forecast, indicate or imply future results, performance or achievements. The words “estimate,” “project,” “intend,” “forecast,” “anticipate,” “plan,” “planning,” “believe,” “will,” “will likely,” “should,” “could,” “would,” “may” or the negative of such words or words or expressions of similar meaning are intended to identify forward-looking statements. These forward-looking statements are not guarantees of future performance, and all such forward-looking statements involve risks and uncertainties, many of which are beyond the company’s ability to control. Actual results may differ materially from those expressed or implied by such forward-looking statements as a result of various factors. We do not undertake, and we disclaim, any obligation to update any forward-looking statements or to announce revisions to any of the forward-looking statements. Certain factors that could cause results to differ materially from those projected in the forward-looking statements, including, among other things: (i) the Company's financing plans; (ii) trends affecting the company's financial condition or results of operations; (iii) the company's growth strategy and operating strategy; (iv) the declaration and payment of dividends; (v) decreased government spending, (vi) changes in government regulations, (vii) our focus on selling higher margin services and (viii) the risk factors described in this prospectus.

Widepoint Corporation

We are a provider of information technology (IT) based products, services, and solutions. We offer secure, cloud-based, enterprise-wide information technology-based solutions that enable commercial markets, and federal and state government organizations, to deploy fully compliant IT services in accordance with government-mandated regulations and advanced system requirements. Our managed mobility enterprise solutions offer a portfolio of information technology based services and products with a set of streamlined mobile communications management, identity management, and consulting solutions that provide our customers with the ability to manage and protect their valuable communications assets and deploy compliant identity management solutions that provide secured virtual and physical access to restricted environments. Many of our solutions are accessible on-demand through cloud computing and provide customers with the ability to remotely manage their workforce mobility and identity management requirements in accordance with internal policies, the marketplace and the demands of our customers.

We are a Delaware corporation and our corporate headquarters are located at 7926 Jones Branch Drive, Suite 520, McLean, Virginia 22102. Our telephone number is (703) 349-2577. Our Internet website address is www.widepoint.com. We do not incorporate the information on our website into this prospectus, and you should not consider it part of this prospectus.

Risk Factors

Investing in our securities involves a high degree of risk. You should carefully consider the risks and uncertainties described below before purchasing our securities. Many factors, including the risks described below, could result in a significant or material adverse effect on our business, financial condition and results of operations. As a result, the value of our securities could decline and you could lose part or all of your investment.

Risks Related to our Business and our Industry

We may not be able to respond to rapid technological changes with new software products and services, which could harm our sales and profitability.

The information technology-based services offered through our managed mobility portfolio of products, services, and solutions is characterized by rapid technological change and frequent new product and service introductions, driven in part by periodic introductions of new technologies and devices in the mobile cyber security and communications industries, frequent changes in, and resulting inconsistencies between, the billing platforms utilized by major

communications carriers and the changing demands of customers regarding the means of delivery of communications management solutions. To achieve and maintain market acceptance for our solution, we must effectively anticipate these changes and offer software products and services that respond to them in a timely manner. Customers may require features and capabilities that our current solution does not have. If we fail to develop software products and services that satisfy customer preferences in a timely and cost-effective manner, our ability to renew our agreements with existing customers and our ability to create or increase demand for our solution will be harmed.

We may be unable to successfully implement our acquisition program.

Our business strategy includes the potential future acquisition of, or investment in, complementary businesses, services or technologies. Demand for businesses with credible business relationships and capabilities to provide services to large commercial enterprises and/or governmental agencies at the federal, state and local level is very competitive. To the extent that the price of such acquisitions may rise beyond reasonable levels where funding for such acquisitions is no longer available, we may not be able to implement our acquisition strategy. Further, these acquisitions, investments or new business relationships may result in unforeseen difficulties and expenditures. We may encounter difficulties assimilating or integrating the businesses, technologies, products, services, personnel or operations of companies we have acquired or companies that we may in the future acquire. These difficulties may arise if the key personnel of the acquired company choose not to work for us, the company's technology or services do not easily integrate with ours or we have difficulty retaining the acquired company's customers due to changes in its management or for other reasons. These acquisitions may also disrupt our business, divert our resources and require significant management attention that would otherwise be available for development of our business. Moreover, the anticipated benefits of any acquisition, investment or business relationship may not be realized or we may be exposed to unknown liabilities. In addition, any future acquisition may require us to:

- issue additional equity securities that would dilute our stockholders;
- use cash that we may need in the future to operate our business;
- incur debt on terms unfavorable to us or that we are unable to repay;
- incur large charges or substantial liabilities; or
- become subject to adverse tax consequences, substantial depreciation or deferred compensation charges.

If any of these risks materializes, our business and operating results would be harmed.

We have identified ineffective disclosure controls and procedures and material weaknesses in the design of our internal control over financial reporting.

If we are unable to maintain adequate internal control over financial reporting, we may be unable to report our financial information on a timely basis, may suffer adverse regulatory consequences or violations of applicable stock exchange listing rules. Furthermore, failure to achieve and maintain an effective internal control environment could have a material adverse effect on our business and share price due to a lack of investor confidence.

In addition, we will incur additional costs in order to improve our internal control over financial reporting and comply with Section 404, including increased auditing and legal fees and costs associated with hiring additional accounting and administrative staff.

Our management has previously determined that our internal control over financial reporting is not effective due to the existence of certain material weaknesses. A material weakness is a control deficiency, or a combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. Our management reported material weaknesses in the following areas:

Inadequate segregation of duties within an account or process. Our management has determined that it continued to not have appropriate segregation of duties within our internal controls that would ensure the consistent application of procedures in our financial reporting process by existing personnel. This control deficiency could result in a misstatement of substantially all of our financial statement accounts and disclosures that would result in a material misstatement to the annual or interim financial statements.

Inadequate policies & procedures. Our management has determined that its existing policies and procedures continued to be limited and/or inadequate in scope to provide staff with guidance or framework for accounting and disclosing financial transactions. This deficiency could result in unintended, misleading entries being made in the financial system and precluding sufficient disclosure of complex transactions.

Lack of sufficient subject matter expertise. Our management has determined that it lacks certain subject matter expertise related to accounting for income taxes and related complex disclosures. This control deficiency could result

in a misstatement of our deferred income tax accounts and disclosures that would result in a material misstatement to the annual or interim financial statements.

Our market is highly competitive and we may not be able to continue to compete effectively.

The markets for the services we provide are highly competitive. We currently compete with companies from a variety of market segments, including publicly and privately held firms, large accounting and consulting firms, systems consulting and implementation firms, application software firms, service groups of computer equipment companies and other general management consulting firms. We also compete regularly with offshore outsourcing companies, and we expect competition from these companies to increase in the future, especially on development, application management services and outsourcing engagements. In addition, we and other technology and outsourced service providers compete with internally developed communications management solutions. We compete frequently for client engagements against companies with far higher revenues and larger numbers of consultants than we have. Recent consolidations of large competitors within our market have further increased the size and resources of some of these competitors. These competitors are often able to offer more scale, which in some instances has enabled them to significantly discount their services in exchange for revenues in other areas or at later dates. Additionally, in an effort to maintain market share, many of our competitors are heavily discounting their services to unprofitable levels. If we cannot keep pace with the intense competition in our marketplace, our business, financial condition and results of operations will suffer.

The intensity of competition in our information technology based managed mobility solutions market could result in pricing pressure as the market continues to develop. We expect the intensity of competition to increase in the future as existing competitors develop their capabilities and as new companies, which could include mobile communications technology, cyber security technology, and solution providers and one or more large communications carriers, enter our market. Some of these competitors, such as large communications carriers, may offer similar and or expanded solutions as part of a broad outsource offering for mobile communications services. Increased competition could result in additional pricing pressure, reduced sales, shorter term lengths for customer contracts, lower margins or the failure of our solution to achieve or maintain broad market acceptance. If we are unable to compete effectively, it will be difficult for us to maintain our pricing rates and add and retain customers, and our business, financial condition and results of operations will be harmed.

We have significant fixed operating costs, which may be difficult to adjust in response to unanticipated fluctuations in revenues.

A high percentage of our operating expenses, particularly personnel, rent and depreciation, are fixed in advance of any particular quarter. As a result, an unanticipated decrease in the number or average size of, or an unanticipated delay in the scheduling for, our projects may cause significant variations in operating results in any particular quarter and could have a material adverse effect on operations for that quarter.

An unanticipated termination or decrease in size or scope of a major project, a client's decision not to proceed with a project we anticipated or the completion during a quarter of several major client projects could require us to maintain

underutilized employees and could have a material adverse effect on our business, financial condition and results of operations. Our revenues and earnings may also fluctuate from quarter to quarter because of such factors as:

- the contractual terms and timing of completion of projects, including achievement of certain business results;
 - any delays incurred in connection with projects;
 - the adequacy of provisions for losses and bad debts;
- the accuracy of our estimates of resources required to complete ongoing projects;
- loss of key highly skilled personnel necessary to complete projects; and
- general economic conditions.

We may lose money if we do not accurately estimate the costs of fixed-price engagements.

Some of our projects may be based on fixed-price, fixed-time contracts, rather than contracts in which payment to us is determined on a time and materials basis. Our failure to accurately estimate the resources required for a project, or our failure to complete our contractual obligations in a manner consistent with the project plan upon which our fixed-price, fixed-time contract was based, could adversely affect our overall profitability and could have a material adverse effect on our business, financial condition and results of operations. In addition, we may fix the price for some projects at an early stage of the process, which could result in a fixed price that turns out to be too low and, therefore, could adversely affect our business, financial condition and results of operations.

Our clients could unexpectedly terminate their contracts for our services.

Some of our contracts can be canceled by the client with limited advance notice and without significant penalty. Termination by any client of a contract for our services could result in a loss of expected revenues and additional expenses for staff that were allocated to that client's project. We could be required to maintain underutilized employees who were assigned to the terminated contract. The unexpected cancellation or significant reduction in the scope of any of our large projects could have a material adverse effect on our business, financial condition and results of operations.

We may be liable to our clients for damages caused by our services or by our failure to remedy system failures.

Many of our projects involve technology applications or systems that are critical to the operations of our clients' businesses. If we fail to perform our services correctly, we may be unable to deliver applications or systems to our clients with the promised functionality or within the promised time frame, or to satisfy the required service levels for support and maintenance. While we have created redundancy and back-up systems, any such failures by us could result in claims by our clients for substantial damages against us. Although we attempt to limit the amount and type of our contractual liability for defects in the applications or systems we provide, and carry insurance coverage that mitigates this liability in certain instances, we cannot be assured that these limitations and insurance coverages will be applicable and enforceable in all cases. Even if these limitations and insurance coverages are found to be applicable and enforceable, our liability to our clients for these types of claims could still exceed our insurance coverage and be material in amount and affect our business, financial condition and results of operations.

We may be unable to protect our proprietary software and methodology.

Our success depends, in part, upon our proprietary software, methodology and other intellectual property rights. We rely upon a combination of trade secrets, nondisclosure and other contractual arrangements, and copyright and trademark laws to protect our proprietary rights. We generally enter into nondisclosure and confidentiality agreements with our employees, partners, consultants, independent sales agents and clients, and limit access to and distribution of our proprietary information. We cannot be certain that the steps we take in this regard will be adequate to deter misappropriation of our proprietary information or that we will be able to detect unauthorized use and take appropriate steps to enforce our intellectual property rights. Furthermore, statutory contracting regulations protect the rights of federal agencies to retain access to, and utilization of, proprietary intellectual property utilized in the delivery of contracted services to such agencies. If we are unable to protect our proprietary software and methodology, the value of our business may decrease and we may face increased competition.

Assertions by a third party that our software products or technology infringes its intellectual property, whether or not correct, could subject us to costly and time-consuming litigation or expensive licenses.

Although we believe that our services and products do not infringe on the intellectual property rights of others, infringement claims may be asserted against us in the future. There is frequent litigation in the communications and technology industries based on allegations of infringement or other violations of intellectual property rights. As we face increasing competition, the possibility of intellectual property rights claims against us may increase. These claims, whether or not successful, could:

- divert management's attention;
- result in costly and time-consuming litigation;
- require us to enter into royalty or licensing agreements, which may not be available on acceptable terms, or at all; or
- require us to redesign our software products to avoid infringement.

As a result, any third-party intellectual property claims against us could increase our expenses and impair our business.

In addition, although we have licensed proprietary technology, we cannot be certain that the owners' rights in such technology will not be challenged, invalidated or circumvented. Furthermore, many of our customer agreements require us to indemnify our customers for certain third-party intellectual property infringement claims, which could increase our costs as a result of defending such claims and may require that we pay damages if there were an adverse ruling related to any such claims. These types of claims could harm our relationships with our customers, may deter future customers from purchasing our software products or could expose us to litigation for these claims. Even if we are not a party to any litigation between a customer and a third party, an adverse outcome in any such litigation could make it more difficult for us to defend our intellectual property in any subsequent litigation in which we are a named party.

Our net operating loss carry-forwards may be subject to a valuation adjustment if we do not maintain and increase our profitability.

As of September 30, 2013, we had aggregate federal net operating loss carry-forwards of approximately \$19.8 million and state net operating loss carry-forwards of approximately \$12.1 million. Our ability to utilize our net operating loss carry-forwards and related deferred tax assets is based upon our ability to generate future taxable income. Our ability to generate future taxable income can be impacted by many circumstances. If we fail to maintain or increase our recent profitability, our net operating loss carry-forwards and related deferred tax assets may be subject to a valuation adjustment that would reduce their potential value. In addition, net operating loss carry-forwards may become subject to an annual limitation if there is a cumulative change in the ownership interest of significant stockholders (or certain stockholder groups) over a three-year period in excess of 50%, in accordance with rules established under Section 382 of the Internal Revenue Code of 1986, as amended, or the Code, and similar state rules (we refer to each as an ownership change). Such an ownership change could limit the amount of historic net operating loss carry-forwards that can be utilized annually to offset future taxable income.

The loss of key personnel or an inability to attract and retain additional personnel may impair our ability to grow our business.

We are highly dependent upon the continued service and performance of our senior management team and key technical and sales personnel, including our Chief Executive Officer, Chief Financial Officer, and our key senior managers. The replacement of these individuals likely would involve expenditure of significant time and financial resources, and their loss might significantly delay or prevent the achievement of our business objectives. We do not maintain key man life insurance with respect to any of our executives.

We plan to continue to expand our work force both domestically and internationally to increase our customer base and revenue. We face intense competition for qualified individuals from numerous consulting, technology, software and communications companies. Our ability to achieve significant revenue growth will depend, in large part, on our success in recruiting, training and retaining sufficient numbers of personnel to support our growth. New hires may

require significant training and may take significant time before they achieve full productivity. If our recruiting, training and retention efforts are not successful or do not generate a corresponding increase in revenue, our business will be harmed.

In addition, if our key employees resign from us or our subsidiaries to join a competitor or to form a competing company, the loss of such personnel and any resulting loss of existing or potential clients to any such competitor could have a material adverse effect on our business, financial condition and results of operations. Although we require certain of our employees to sign agreements prohibiting them from joining a competitor, forming a competing company or soliciting our clients or employees for certain periods of time, we cannot be certain that these agreements will be effective in preventing our key employees from engaging in these actions or that courts or other adjudicative entities will substantially enforce these agreements.

We may need to obtain additional funding to meet our future capital needs. If we are unable to obtain such financings, we may be required to significantly cut back our operations, sell assets or cease operations.

We may require additional funding to support our operations. Additional funding may be unavailable on favorable terms, if at all. If we are unable to obtain sufficient additional funding when needed, we may have to significantly cut back our operations, defer potentially favorable acquisitions, and/or sell some or all of our assets.

We have a credit facility agreement, which requires us to maintain certain financial covenants and failure to maintain such covenants could limit our access to debt capital and simultaneously require immediate payment of borrowings by our lender.

Historically, we have had access to a credit facility, which consists of a variable line of credit and a fixed term note to fund acquisition growth and working capital. Our credit facility agreement requires us to maintain certain financial covenants on a quarterly and annual basis. We anticipate that we will not be in compliance with our debt service coverage ratio as of December 31, 2013. Our debt service coverage ratio is computed as our average rolling four quarter earnings before interest, taxes, depreciation and amortization to current maturities due within the next fiscal year. We are working with our lender to obtain a waiver of our debt service coverage ratio requirement as of December 31, 2013, but there can be no assurances that we will be able to obtain such waiver now or in the future. Our inability to obtain a waiver of our debt service coverage ratio or any other financial covenant requirement as of December 31, 2013 or any future period could result in our lender accelerating in part or in full payment of all unpaid principal and interest which could have an adverse our ability to fund acquisition initiatives using debt and fund operational short falls.

The loss of one or more significant customers could have an adverse impact on our results of operations.

Historically, we have derived, and may in the future derive, a significant percentage of our total revenues from a relatively small number of clients. For the nine months ended September 30, 2013, the Transportation Security Administration and the Department of Homeland Security represented 19% and 17%, respectively, of our revenues. In December 2013, we began performing work under a new blanket purchase agreement from the Department of Homeland Security for cellular wireless management services that will significantly increase the percentage of our revenues that are derived from the Department of Homeland Security. Due to the nature of our business and the relative size of certain contracts, which are entered into in the ordinary course of business, the loss of any single significant customer, including the above customers, could have a material adverse effect on results.

We may incur substantial costs in connection with contracts awarded through a competitive procurement process, which could negatively impact our operating results.

Many federal government contracts are awarded through a competitive procurement process. We expect that much of the government business we seek in the foreseeable future will be awarded through competitive procedures. Competitive procurements impose substantial costs and present a number of risks, including:

- the substantial cost and managerial time and effort that we spend to prepare bids and proposals for contracts that may not be awarded to us; and
- the expense and delay that we may face if our competitors protest or challenge contract awards made to us pursuant to competitive procedures, and the risk that any such protest or challenge could result in the resubmission of offers, or in termination, reduction, or modification of the awarded contract.

The costs we incur in the competitive procurement process may be substantial and, to the extent we participate in competitive procurements and are unable to win particular contracts, these costs could negatively affect our operating results. In addition, the General Services Administration multiple award schedule contracts, government-wide acquisitions contracts, blanket purchase agreements, and other indefinite delivery/indefinite quantity contracts do not guarantee more than a minimal amount of work for us, but instead provide us access to work generally through further competitive procedures. This competitive process may result in increased competition and pricing pressure, requiring that we make sustained post-award efforts to realize revenues under the relevant contract.

Unfavorable government audit results could subject us to a variety of penalties and sanctions, and could harm our reputation and relationships with our clients.

The federal government audits and reviews our performance on contracts, pricing practices, cost structure, and compliance with applicable laws, regulations, and standards. Like most large government contractors, our contracts are audited and reviewed on a continual basis by federal agencies, including the Defense Contract Audit Agency. An unfavorable audit of us, or of our subcontractors, could have a substantial adverse effect on our operating results. For example, any costs that were originally reimbursed could subsequently be disallowed. In this case, cash we have already collected may need to be refunded.

If a government audit uncovers improper or illegal activities, we may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines, and suspension or debarment from doing business with U.S. government agencies. In addition, we could suffer serious harm to our reputation if allegations of impropriety were made against us, whether or not true.

Security breaches in sensitive government systems could result in the loss of clients and negative publicity.

Many of the services we provide involve managing and protecting information involved in intelligence, national security, and other sensitive or classified government functions. A security breach in one of these systems could cause serious harm to our business, damage our reputation, and prevent us from being eligible for further work on sensitive or classified systems for federal government clients. We could incur losses from such a security breach that could exceed the policy limits under our errors and omissions and product liability insurance. Damage to our reputation or limitations on our eligibility for additional work resulting from a security breach in one of the systems we develop, install, and maintain could materially reduce our revenues.

Our failure to obtain and maintain necessary security clearances may limit our ability to perform classified work for government clients, which could cause us to lose business.

Some government contracts require us to maintain facility security clearances, and require some of our employees to maintain individual security clearances. If our employees lose or are unable to timely obtain security clearances, or we lose a facility clearance, the government client can terminate the contract or decide not to renew it upon its expiration. As a result, to the extent we cannot obtain or maintain the required security clearances for a particular contract, or we fail to obtain them on a timely basis, we may not derive the revenues anticipated from the contract, which, if not replaced with revenues from other contracts, could harm our operating results. To the extent we are not able to obtain facility security clearances or engage employees with the required security clearances for a particular contract, we will be unable to perform that contract and we may not be able to compete for or win new contracts for similar work.

Changes in the spending policies or budget priorities of the federal government could cause us to lose revenues.

We derive a significant amount of our revenues from contracts funded by federal government agencies. We believe that contracts with federal government agencies and defense agencies in particular, will be a significant source of our revenues for the foreseeable future. Accordingly, changes in federal government fiscal or spending policies or the U.S. defense budget could directly affect our financial performance. Among the factors that could harm our business are:

- Curtailment of the federal government's use of technology services firms;
- a significant decline in spending by the federal government, in general, or by specific agencies such as the Department of Defense;
- budget cuts intended to avoid sequestration;

- reductions in federal government programs or requirements, including reductions in connection with sequestration; any failure to raise the debt ceiling;
- a shift in spending to federal programs and agencies that we do not support or where we currently do not have contracts;
- delays in the payment of our invoices by government payment offices;
- federal governmental shutdowns, such as the shutdown that occurred during the government's 2013 fiscal year, and other potential delays in the government appropriations process; and
- general economic and political conditions, including any event that results in a change in spending priorities of the federal government.

These or other factors could cause federal government agencies and departments to delay payments owed for our services, to reduce their purchases under contracts, to exercise their right to terminate contracts, or not to exercise options to renew contracts, any of which could cause us to lose revenues. In addition, any limitations imposed on spending by U.S. government agencies that result from efforts to reduce the federal deficit, including as a result of sequestration or otherwise, may limit both the continued funding of our existing contracts and our ability to obtain additional contracts.

Federal government contracts contain provisions giving government clients a variety of rights that are unfavorable to us, including the ability to terminate a contract at any time for convenience.

Federal government contracts contain provisions and are subject to laws and regulations that provide government clients with rights and remedies not typically found in commercial contracts. These rights and remedies allow government clients, among other things, to:

- terminate existing contracts, with short notice, for convenience, as well as for default;
- reduce orders under or otherwise modify contracts;
- for larger contracts subject to the Truth in Negotiations Act, reduce the contract price or cost where it was increased because a contractor or subcontractor during negotiations furnished cost or pricing data that was not complete, accurate, and current;
- for GSA multiple award schedule contracts, government-wide acquisition agreements, and blanket purchase agreements, demand a refund, make a forward price adjustment, or terminate a contract for default if a contractor provided inaccurate or incomplete data during the contract negotiation process, or reduce the contract price under certain triggering circumstances, including the revision of pricelists or other documents upon which the contract award was predicated, the granting of more favorable discounts or terms and conditions than those contained in such documents, and the granting of certain special discounts to certain clients;
- terminate our facility security clearances and thereby prevent us from receiving classified contracts;
- cancel multi-year contracts and related orders if funds for contract performance for any subsequent year become unavailable;
- decline to exercise an option to renew a multi-year contract or issue task orders in connection with indefinite delivery/indefinite quantity contracts;
- claim rights in solutions, systems, and technology produced by us;
- prohibit future procurement awards with a particular agency due to a finding of organizational conflict of interest based upon prior related work performed for the agency that would give a contractor an unfair advantage over

competing contractors or the existence of conflicting roles that might bias a contractor's judgment; subject the award of contracts to protest by competitors, which may require the contracting federal agency or department to suspend our performance pending the outcome of the protest and may also result in a requirement to resubmit offers for the contract or in the termination, reduction, or modification of the awarded contract; and

suspend or debar us from doing business with the federal government.

If a federal government client terminates one of our contracts for convenience, we may recover only our incurred or committed costs, settlement expenses, and profit on work completed prior to the termination. If a federal government client were to unexpectedly terminate, cancel, or decline to exercise an option to renew with respect to one or more of our significant contracts or suspend or debar us from doing business with the federal government, our revenues and operating results would be materially harmed.

Our failure to comply with complex procurement laws and regulations could cause us to lose business and subject us to a variety of penalties.

We must comply with laws and regulations relating to the formation, administration, and performance of federal government contracts, which affect how we do business with our federal government clients and may impose added costs on our business. Among the most significant laws and regulations are:

- the Federal Acquisition Regulation, and agency regulations analogous or supplemental to the Federal Acquisition Regulation, which comprehensively regulate the formation, administration, and performance of government contracts;
- the Truth in Negotiations Act, which requires certification and disclosure of all cost or pricing data in connection with some contract negotiations;
- the Cost Accounting Standards, which impose cost accounting requirements that govern our right to reimbursement under some cost-based government contracts; and
- laws, regulations, and executive orders restricting the use and dissemination of information classified for national security purposes and the exportation of specified solutions and technical data.

If a government review or investigation uncovers improper or illegal activities, we may be subject to civil and criminal penalties and administrative sanctions, including the termination of our contracts, the forfeiture of profits, the suspension of payments owed to us, fines, and our suspension or debarment from doing business with federal government agencies. In particular, the civil False Claims Act provides for treble damages and potentially substantial civil penalties where, for example, a contractor presents a false or fraudulent claim to the government for payment or approval, or makes a false statement in order to get a false or fraudulent claim paid or approved by the government. Actions under the civil False Claims Act may be brought by the government or by other persons on behalf of the government. These provisions of the civil False Claims Act permit parties, such as our employees, to sue us on behalf of the government and share a portion of any recovery. Any failure to comply with applicable laws and regulations could result in contract termination, price or fee reductions, or suspension or debarment from contracting with the government, each of which could lead to a material reduction in our revenues.

The adoption of new procurement laws or regulations could reduce the amount of services that are outsourced by the federal government and cause us to experience reduced revenues.

New legislation, procurement regulations, or labor organization pressure could cause federal agencies to adopt restrictive procurement practices regarding the use of outside service providers. The American Federation of Government Employees, the largest federal employee union, strongly endorses legislation that may restrict the procedure by which services are outsourced to government contractors. One such proposal, the Truthfulness, Responsibility, and Accountability in Contracting Act, would have effectively reduced the volume of services that is outsourced by the federal government by requiring agencies to give in-house government employees expanded opportunities to compete against contractors for work that could be outsourced. If such legislation, or similar legislation, were to be enacted, it would likely reduce the amount of IT services that could be outsourced by the federal government, which could materially reduce our revenues.

If the market for our information technology based managed mobility solutions does not grow as we expect, our business will be harmed.

The markets for our information technology based managed mobility solutions are developing, and it is not certain whether these services will achieve market acceptance and sustain high demand. Some potential customers have invested substantial personnel and financial resources into developing internal solutions for communications management, so they may not perceive the benefit of our external solution. If potential customers do not perceive the benefits of our products, services and solutions, then the markets may not continue to develop or may develop more slowly than we expect, either of which would reduce our revenue and profitability.

If we are unable to retain our existing customers, our revenue and results of operations would grow more slowly than expected or decline and our results of operations would be impaired.

We sell our information technology based managed mobility solutions software products and related services pursuant to agreements that are generally one to five years in duration. Many times they are in the form of a one year agreement with one to four year option periods. Our customers have no obligation to renew their agreements after their terms expire and some of our customers may terminate their agreements for convenience. These agreements may not be maintained or renewed on the same or on more profitable terms. As a result, our ability to both maintain and grow our revenue depends in part on customer renewals. We may not be able to accurately predict future trends in customer renewals, and our customers' renewal rates may decline or fluctuate because of several factors, including their satisfaction or dissatisfaction with our products, services, and or solutions, the prices of our managed mobility solutions software products, the prices of products and services offered by our competitors or reductions in our customers' spending levels. In addition, customers that are acquired by companies using competing service offerings may be required to begin using those competing service offerings, rather than renew their license arrangements with us. If our customers do not renew their agreements for our communications management solutions software products, renew on less favorable terms, or do not purchase additional functionality, our revenue may grow more slowly than expected or decline.

Our sales cycles can be long, unpredictable and require considerable time and expense, which may cause our operating results to fluctuate.

Our sales cycle, which is the time between initial contact with a potential customer and the ultimate sale, is often lengthy and unpredictable. Some of our potential customers may already have partial managed mobility solutions in place under fixed-term contracts, which may limit their ability to commit to purchase our solution in a timely fashion. In addition, our potential customers typically undertake a significant evaluation process that can last six to nine months or more, and which requires us to expend substantial time, effort and money educating them about the capabilities of our offerings and the potential cost savings they can bring to an organization. Furthermore, the purchase of our solution typically also requires coordination and agreement across many departments within a

potential customer's organization, which further contributes to our lengthy sales cycle. As a result, we have limited ability to forecast the timing and size of specific sales. Any delay in completing, or failure to complete, sales in a particular quarter or year could harm our business and could cause our operating results to vary significantly.

If a communications carrier prohibits customer disclosure of communications billing and usage data to us, the value of our solution to customers of that carrier would be impaired, which may limit our ability to compete for their business.

Certain of our information technology based managed mobility solutions software functionality and services that we offer depend on our ability to access a customer's communications billing and usage data. For example, our ability to offer outsourced or automated communications bill auditing, billing dispute resolution, bill payment, cost allocation and expense optimization depends on our ability to access this data. If a communications carrier were to prohibit its customers from disclosing this information to us, those enterprises would only be able to use these billing-related aspects of our solution on a self-serve basis, which would impair some of the value of our solution to those enterprises. This in turn could limit our ability to compete with the internally developed communications management solutions of those enterprises, require us to incur additional expenses to license access to that billing and usage data from the communications carrier, if such a license is made available to us at all, or put us at a competitive disadvantage against any third-party communications management solutions service provider that licenses access to that data.

Our long-term success in the managed mobility solutions industry depends, in part, on our ability to expand the sales of our solutions to customers located outside of the United States, and thus our business is susceptible to risks associated with international sales and operations.

We are currently seeking to expand the international sales and operations of our portfolio of solutions. This international expansion will subject us to new risks that we have not faced in the United States. These risks include:

- geographic localization of our software products, including translation into foreign languages and adaptation for local practices and regulatory requirements;
- lack of familiarity with and unexpected changes in foreign regulatory requirements;
- longer accounts receivable payment cycles and difficulties in collecting accounts receivable;
- difficulties in managing, staffing and overseeing international implementations and operations, including increased reliance on foreign subcontractors;
- challenges in integrating our software with multiple country-specific billing or communications support systems for international customers;
- challenges in providing procurement, help desk and fulfillment capabilities for our international customers;
- fluctuations in currency exchange rates;
- potentially adverse tax consequences, including the complexities of foreign value added or other tax systems and restrictions on the repatriation of earnings;
- the burdens of complying with a wide variety of foreign laws and legal standards;
- increased financial accounting and reporting burdens and complexities;
- potentially slower adoption rates of communications management solutions services internationally;
- political, social and economic instability abroad, terrorist attacks and security concerns in general; and
- reduced or varied protection for intellectual property rights in some countries.

Operating in international markets also requires significant management attention and financial resources. The investment and additional resources required to establish operations and manage growth in other countries may not produce desired levels of revenue or profitability.

Expansion into international markets could require us to comply with additional billing, invoicing, communications, data privacy and similar regulations, which could make it costly or difficult to operate in these markets.

We recently entered into a Global Master Services Agreement with Compass Group PLC to provide managed mobility solutions to Compass locations worldwide, which will require us to comply with various international laws and regulations. Many international regulatory agencies have adopted regulations related to where and how communications bills may be sent and how the data on such bills must be handled and protected. For instance, certain countries restrict communications bills from being sent outside of the country, either physically or electronically, while other countries require that certain information be encrypted or redacted before bills may be transmitted electronically. These regulations vary from jurisdiction to jurisdiction and international expansion of our business could subject us to additional similar regulations. Failure to comply with these regulations could result in significant

monetary penalties and compliance with these regulations could require expenditure of significant financial and administrative resources.

In addition, personally identifiable information is increasingly subject to legislation and regulations in numerous jurisdictions around the world, the intent of which is to protect the privacy of personal information that is collected, processed and transmitted in or from the governing jurisdiction. Our failure to comply with applicable privacy laws and regulations or any security breakdown that results in the unauthorized release of personally identifiable information or other customer data could result in fines or proceedings by governmental agencies or private individuals, which could harm our results of operations.

If we fail to effectively manage and develop our strategic relationships with our channel partners, or if those third parties choose not to market and sell our communications management solutions, our operating results would suffer.

The successful implementation of our strategic goals is dependent in part on strategic relationships with our channel partners to offer our communications management solutions to a larger customer base than we can reach through our current direct sales and marketing efforts. Some of our strategic relationships are relatively new and, therefore, it is uncertain whether these third parties will be able to market and sell our solution successfully or provide the volume and quality of customers that we currently desire.

Our success depends in part on the ultimate success of our channel partners and their ability to market and sell our communications management solutions. Some of these third parties may have previously entered, and may in the future enter, into strategic relationships with our competitors. Further, many of our channel partners have multiple strategic relationships and they may not regard us as significant to their businesses. Our channel partners may terminate their respective relationships with us, pursue other partnerships or relationships, or attempt to develop or acquire products or services that compete with our communications management solutions. Our channel partners also may interfere with our ability to enter into other desirable strategic relationships.

If we are unable to manage and develop our strategic relationships, the growth of our customer base may be harmed and we may have to devote substantially more resources to the distribution, sales and marketing of our solution, which would increase our costs and decrease our earnings.

The emergence of one or more widely used, standardized communications devices or billing or operational support systems could limit the value and operability of our solution and our ability to compete with the manufacturers of such devices or the carriers using such systems in providing managed mobility solutions services.

Our solution derives its value in significant part from our communications management software's ability to interface with and support the interoperation of diverse communications devices, billing systems and operational support systems. The emergence of a single or a small number of widely used communications devices, billing systems or operational support systems using consolidated, consistent sets of standardized interfaces for the interaction between communications service providers and their enterprise customers could significantly reduce the value of our solution to our customers and potential customers. Furthermore, any such communications device, billing system or operational support system could make use of proprietary software or technology standards that our software might not be able to support. In addition, the manufacturer of such device, or the carrier using such billing system or operational support system, might actively seek to limit the interoperability of such device, billing system or operational support system with our software products for competitive or other reasons. The resulting lack of compatibility of our software products would put us at a significant competitive disadvantage, or entirely prevent us from competing, in that segment of the potential managed mobility solutions market if such manufacturer or carrier, or

its authorized licensees, were to develop one or more communications management solutions competitive with our solution.

A continued proliferation and diversification of communications technologies or devices could increase the costs of providing our software products or limit our ability to provide our software products to potential customers.

Our ability to provide our software products is dependent on the technological compatibility of our products with the communications infrastructures and devices of our customers and their communications service providers. The development and introduction of new communications technologies and devices requires us to expend significant personnel and financial resources to develop and maintain interoperability of our software products with these technologies and devices. The communications industry has recently been characterized by rapid change and diversification in both product and service offerings. Continued proliferation of communications products and services could significantly increase our research and development costs and increase the lag time between the initial release of new technologies and products and our ability to provide support for them in our software products, which would limit the potential market of customers that we have the ability to serve.

Actual or perceived breaches of our security measures, or governmental required disclosure of customer information could diminish demand for our solution and subject us to substantial liability.

In the processing of communications transactions, we receive, transmit and store a large volume of sensitive customer information, including call records, billing records, contractual terms, and financial and payment information, including credit card information, and we have entered into contractual obligations to maintain the confidentiality of certain of this information. Any person who circumvents our security measures could steal proprietary or confidential customer information or cause interruptions in our operations and any such lapse in security could expose us to litigation, substantial contractual liabilities, loss of customers or damage to our reputation or could otherwise harm our business. We incur significant costs to protect against security breaches and may incur significant additional costs to alleviate problems caused by any breaches. In addition, if we are required to disclose any of this sensitive customer information to governmental authorities, that disclosure could expose us to a risk of losing customers or could otherwise harm our business.

If customers believe that we may be subject to requirements to disclose sensitive customer information to governmental authorities, or that our systems and software products do not provide adequate security for the storage of confidential information or its transmission over the Internet or corporate extranets, or are otherwise inadequate for Internet or extranet use, our business will be harmed. Customers' concerns about security could deter them from using the Internet to conduct transactions that involve confidential information, including transactions of the types included in our solution, so our failure to prevent security breaches, or the occurrence of well-publicized security breaches affecting the Internet in general, could significantly harm our business and financial results.

Defects or errors in our software products could harm our reputation, impair our ability to sell our products and result in significant costs to us.

Our software products are highly complex and may contain undetected defects or errors, that may result in product failures or otherwise cause our software products to fail to perform in accordance with customer expectations. Because our customers use our software products for important aspects of their businesses, any defects or errors in, or other performance problems with, our software products could hurt our reputation and may damage our customers' businesses. If that occurs, we could lose future sales or our existing customers could elect to not renew their customer agreements with us. Product performance problems could result in loss of market share, failure to achieve market acceptance and the diversion of development resources from software enhancements. If our software products fail to perform or contain a technical defect, a customer might assert a claim against us for damages. Whether or not we are responsible for our software's failure or defect, we could be required to spend significant time and money in litigation, arbitration or other dispute resolution, and potentially pay significant settlements or damages.

We provide minimum service-level commitments to many of our customers, and our inability to meet those commitments could result in significant loss of customers, harm to our reputation and costs to us.

Many of our customer agreements currently, and may in the future, require that we meet minimum service level commitments regarding items such as platform availability, invoice processing speed and order processing speed. If we are unable to meet the stated service level commitments under these agreements many of our customers will have the right to terminate their agreements with us and we may be contractually obligated to provide our customers with credits or pay other penalties. If our software products are unavailable for significant periods of time we may lose a substantial number of our customers as a result of these contractual rights, we may suffer harm to our reputation and we may be required to provide our customers with significant credits or pay our customers significant contractual penalties, any of which could harm our business, financial condition, results of operations.

Risks Related To Our Common Stock

Our common stock price could be volatile.

The stock market has, from time to time, experienced extreme price and volume fluctuations. The market prices of the securities of companies in our industry have been especially volatile. Broad market fluctuations of this type may adversely affect the market price of our common stock.

The market price of our common stock has experienced, and may continue to be subject to volatility due to a variety of factors, including:

- public announcements concerning us, our competitors or our industry;
- fluctuations in operating results;
- introductions of new products or services by us or our competitors;
- changes in analysts' earnings estimates; and
- announcements of technological innovations.

In the past, some companies that have experienced volatility in the market price of their stock have been the object of securities class action litigation. If we were the object of securities class action litigation, we could incur substantial costs and experience a diversion of our management's attention and resources and such securities class action litigation could have a material adverse effect on our business, financial condition and results of operations.

A third party could be prevented from acquiring shares of our common stock at a premium to the market price because of our anti-takeover provisions.

Various provisions of our certificate of incorporation, by-laws and Delaware law could make it more difficult for a third party to acquire us, even if doing so might be beneficial to you and our other stockholders. See "Description of Capital Stock – Delaware Law and Certain Charter and Bylaw Provisions" elsewhere in this prospectus for a description of such provisions.

The future sale of shares of our common stock may negatively affect our common stock price.

If our stockholders sell substantial amounts of our common stock, the market price of our common stock could fall. These sales also might make it more difficult for us to sell equity securities in the future at a time and price that we deem appropriate.

We could issue additional shares of common stock, which might dilute the book value of our common stock.

We have a total of 110,000,000 authorized shares of common stock, of which 63,907,357 shares were issued and outstanding as of January 3, 2014. In addition, we had options outstanding as of that date with respect to which 3,361,500 shares of common stock were reserved for issuance. Our board of directors has the authority, without action or vote of our stockholders in most cases, to issue all or a part of any authorized but unissued shares of our common stock. Such stock issuances may be made at a price that reflects a discount from the then-current trading price of our common stock. In addition, in order to raise capital for acquisitions or other general corporate purposes, we would likely need to issue securities that are convertible into or exercisable for a significant number of shares of our common stock. These issuances would dilute our stockholders percentage ownership interest, which would have the effect of reducing our stockholders influence on matters on which our stockholders vote, and might dilute the book value of our common stock. You may incur additional dilution of net tangible book value if holders of stock options or warrants, whether currently outstanding or subsequently granted, exercise their options or warrants to purchase shares of our common stock.

Our quarterly operating results may fluctuate in the future. As a result, we may fail to meet or exceed the expectations of research analysts or investors, which could cause our stock price to decline.

Our quarterly operating results may fluctuate as a result of a variety of factors, many of which are outside of our control. If our quarterly operating results or guidance fall below the expectations of research analysts or investors, the price of our common stock could decline substantially. Fluctuations in our quarterly operating results or guidance may be due to a number of factors, including, but not limited to:

our ability to attract new customers, obtain renewals from existing customers and increase sales to existing customers;

the purchasing and budgeting cycles of our customers;

changes in our pricing policies or those of our competitors;

the amount and timing of operating costs and capital expenditures related to the operation, maintenance and expansion of our business;

service outages or security breaches;

the timing and success of new service introductions and upgrades by us or our competitors;

the timing of costs related to the development or acquisition of technologies, services or businesses;

the timing of collection of payments from channel partners;

the financial condition of our customers; and

general economic, industry and market conditions.

We do not expect to declare any dividends in the foreseeable future.

We do not anticipate declaring any cash dividends to holders of our common stock in the foreseeable future. Consequently, investors must rely on sales of their common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investment. Investors seeking cash dividends should not purchase our common stock.

Use of Proceeds

Unless otherwise described in the applicable prospectus supplement, we intend to use the net proceeds from the sale of the securities for general corporate purposes, including the repayment of debt, acquiring businesses and investing in other businesses. Pending such use, we may temporarily invest the net proceeds in short-term investments.

Description of Debt Securities

The following description of the terms of the debt securities sets forth general terms that may apply to the debt securities and provisions of the indenture that will govern the debt securities, and is not complete. We will describe the particular terms of any debt securities in the prospectus supplement relating to those debt securities.

The debt securities will be our senior debt securities and will be issued under an indenture between us and a trustee, a form of which is incorporated by reference into this prospectus and attached as an exhibit to the registration statement of which this prospectus is a part. See “Where You Can Find More Information.” We refer to this indenture as the “indenture.”

The following is a summary of some provisions of the indenture. The following summary does not purport to be complete, and is subject to, and qualified in its entirety by reference to, all of the provisions of the indenture, including the definitions of specified terms used in the indenture, and the debt securities. We encourage you to read the indenture and the debt securities because they, and not this description, set forth your rights as a holder of our debt securities. We will describe the particular terms of any debt securities in the prospectus supplement relating to those debt securities. Parenthetical section references under this heading are references to sections in the indenture unless we indicate otherwise.

General Terms

The indenture does not limit the amount of debt securities that we may issue. (Section 301). The indenture provides that debt securities may be issued up to the principal amount authorized by us from time to time. The debt securities will be unsecured and will have the same rank as all of our other unsecured debt. None of our subsidiaries, if any, will have any obligations with respect to the debt securities. Therefore, our rights and the rights of our creditors, including holders of senior debt securities and subordinated debt securities, to participate in the assets of any subsidiary will be subject to the prior claims of the creditors of any such subsidiaries.

We may issue the debt securities in one or more separate series of senior debt securities. (Section 301). The prospectus supplement relating to the particular series of debt securities being offered will specify the particular amounts, prices and terms of those debt securities. These terms may include:

- the title of the debt securities and the series in which the debt securities will be included;
- the authorized denominations and aggregate principal amount of the debt securities;
- the date or dates on which the principal and premium, if any, are payable;
- the rate or rates per annum at which the debt securities will bear interest, if there is any interest, or the method or methods of calculating interest and the date from which interest will accrue;
- the place or places where the principal of and any premium and interest on the debt securities will be payable;
- the dates on which the interest will be payable and the corresponding record dates;
- the period or periods within which, the price or prices at which, and the terms and conditions on which, the debt securities may be redeemed, in whole or in part, at our option;
- whether the debt securities of the series will be issued in whole or in part;
- whether the debt securities of the series will be issued in the form of a global security and, if so, the name of the applicable depository and global exchange agent;

any obligation to redeem, repay or purchase debt securities pursuant to any sinking fund or analogous provisions or at the option of a holder;

the portion of the principal amount of the debt securities payable upon declaration of the acceleration of the maturity of the debt securities;

the person to whom any interest on any debt security will be payable if other than the person in whose name the debt security is registered on the applicable record date;

- any events of default, covenants or warranties applicable to the debt securities;

- the currency, currencies or composite currency of denomination of the debt securities;

the currency, currencies or composite currencies in which payments on the debt securities will be payable and whether the holder may elect payment to be made in a different currency;

- whether and under what conditions we will pay additional amounts to holders of the debt securities;

- the terms and conditions of any conversion or exchange provisions in respect of the debt securities;
- the terms pursuant to which our obligation under the indenture may be terminated through the deposit of money or government obligations;
- whether the debt securities of the series will be subordinated in right of payment to senior indebtedness; and
- any other specific terms of the debt securities not inconsistent with the indenture. (Section 301).

Unless otherwise specified in the applicable prospectus supplement, the debt securities will not be listed on any securities exchange.

Unless the applicable prospectus supplement specifies otherwise, we will issue the debt securities in fully registered form without coupons. If we issue debt securities of any series in bearer form, the applicable prospectus supplement will describe the special restrictions and considerations, including special offering restrictions and special federal income tax considerations, applicable to those debt securities and to payment on and transfer and exchange of those debt securities.

U.S. Federal Income Tax Considerations

We may issue the debt securities as original issue discount securities, bearing no interest or bearing interest at a rate, which, at the time of issuance, is below market rates, to be sold at a substantial discount below their principal amount. We will describe some special U.S. federal income tax and other considerations applicable to any debt securities that are issued as original issue discount securities in the applicable prospectus supplement. We encourage you to consult with your own tax and financial advisors on these important matters.

Payment, Registration, Transfer and Exchange

Subject to any applicable laws or regulations, we will make payments on the debt securities at a designated office or agency, unless the applicable prospectus supplement otherwise sets forth. At our option, however, we may also make interest payments on the debt securities in registered form:

· by checks mailed to the persons entitled to interest payments at their registered addresses; or

by wire transfer to an account maintained by the person entitled to interest payments as specified in the security register.

Unless the applicable prospectus supplement otherwise indicates, we will pay any installment of interest on debt securities in registered form to the person in whose name the debt security is registered at the close of business on the regular record date for that installment of interest. (Section 307). If a holder wishes to receive payment by wire transfer, the holder should provide the paying agent with written wire transfer instructions at least 15 days prior to the payment date.

Unless the applicable prospectus supplement otherwise sets forth, debt securities issued in registered form will be transferable or exchangeable at the agency we may designate from time to time. Debt securities may be transferred or exchanged without service charge, other than any tax or other governmental charge imposed in connection with the transfer or exchange. (Section 305).

Book-Entry Procedures

The applicable prospectus supplement for each series of debt securities will state whether those debt securities will be subject to the following provisions.

Unless debt securities in physical form are issued, the debt securities will be represented by one or more fully-registered global certificates, in denominations of \$1,000 or any integral multiple of \$1,000. Each global certificate will be deposited with, or on behalf of, The Depository Trust Company, which we refer to in this prospectus as DTC, and registered in its name or in the name of Cede & Co. or other nominee of DTC. No holder of debt securities initially issued as a global certificate will be entitled to receive a certificate in physical form, except as set forth below.

DTC has advised us that:

DTC is:

a “banking organization” within the meaning of the New York banking law;

a limited purpose trust company organized under the New York banking law;

a member of the Federal Reserve System;

a “clearing corporation” within the meaning of the New York Uniform Commercial Code; and

a “clearing agency” registered pursuant to Section 17A of the Securities Exchange Act of 1934, as amended, or the Exchange Act.

DTC holds securities for DTC participants and facilitates the settlement of securities transactions between DTC participants through electronic book-entry transfers and pledges, thereby eliminating the need for physical movement of certificates.

DTC participants include securities brokers and dealers, banks, trust companies, clearing corporations and other organizations.

Access to DTC’s book-entry system is also available to others, such as banks, brokers, dealers, trust companies and clearing corporations that clear through or maintain a custodial relationship with a DTC participant, either directly or indirectly.

Holders that are not DTC participants but desire to purchase, sell or otherwise transfer ownership of, or other interests in, the debt securities may do so only through DTC participants. In addition, holders of the debt securities will receive all distributions of principal and interest from the trustee through DTC participants. Under the rules, regulations and procedures creating and affecting DTC and its operation, DTC is required to make book-entry transfers of debt securities among DTC participants on whose behalf it acts and to receive and transmit distributions of principal of, and interest on, the debt securities. Under the book-entry system, holders of debt securities may experience some delay in receipt of payments, since the trustee will forward such payments to Cede & Co., as nominee for DTC, and DTC, in turn, will forward the payments to the appropriate DTC participants.

DTC participants will be responsible for distributions to holders of debt securities, which distributions will be made in accordance with customary industry practices. Although holders of debt securities will not have possession of the debt securities, the DTC rules provide a mechanism by which those holders will receive payments and will be able to transfer their interests. Although the DTC participants are expected to convey the rights represented by their interests in any global security to the related holders, because DTC can act only on behalf of DTC participants, the ability of holders of debt securities to pledge the debt securities to persons or entities that are not DTC participants or to otherwise act with respect to the debt securities may be limited due to the lack of physical certificates for the debt securities.

Neither we nor the trustee will be responsible or liable for any aspect of the records relating to, or payments made on account of, beneficial ownership interests in the debt securities or for supervising or reviewing any records relating to such beneficial ownership interests. Since the only “holder of debt securities,” for purposes of the indenture, will be DTC or its nominee, the trustee will not recognize beneficial holders of debt securities as “holders of debt securities,” and beneficial holders of debt securities will be permitted to exercise the rights of holders only indirectly through DTC and DTC participants. DTC has advised us that it will take any action permitted to be taken by a holder of debt securities under the indenture only at the direction of one or more DTC participants to whose accounts with DTC the related debt securities are credited.

All payments we make to the trustee will be in immediately available funds and will be passed through to DTC in immediately available funds.

Physical certificates will be issued to holders of a global security, or their nominees, if:

- DTC advises the trustee in writing that DTC is no longer willing, able or eligible to discharge properly its responsibilities as depository and we are unable to locate a qualified successor; or

- we decide in our sole discretion to terminate the book-entry system through DTC. (Section 305).

In such event, the trustee will notify all holders of debt securities through DTC participants of the availability of such physical debt securities. Upon surrender by DTC of a definitive global note representing the debt securities and receipt of instructions for reregistration, the trustee will reissue the debt securities in physical form to holders or their nominees. (Section 305).

Debt securities in physical form will be freely transferable and exchangeable at the office of the trustee upon compliance with the requirements set forth in the indenture.

No service charge will be imposed for any registration of transfer or exchange, but payment of a sum sufficient to cover any tax or other governmental charge may be required. (Section 305).

Consolidation, Merger or Sale by the Company

The indenture generally permits a consolidation or merger between us and another U.S. legal entity. It also permits the sale or transfer by us of all or substantially all of our property and assets to another legal entity. These transactions are permitted if:

(A) we are the continuing or surviving legal entity, or (B) the resulting or acquiring legal entity, if other than us, assumes all of our responsibilities and liabilities under the indenture, including the payment of all amounts due on the debt securities and performance of the covenants in the indenture;

immediately after the transaction, no event of default exists. (Section 801); and

the trustee shall have received an officer's certificate and an opinion stating such consolidation, merger, conveyance, transfer or lease and, if applicable, the corresponding supplemental indenture, are in compliance with the base indenture.

Even though the indenture contains the provisions described above, we are not required by the indenture to comply with those provisions if we sell all of our property and assets to another U.S. legal entity if, immediately after the sale, that legal entity is one of our wholly-owned subsidiaries. (Section 801).

If we consolidate or merge with or into any other legal entity or sell all or substantially all of our assets according to the terms and conditions of the indenture, the resulting or acquiring legal entity will be substituted for us in the indenture with the same effect as if it had been an original party to the indenture. As a result, the successor legal entity may exercise our rights and powers under the indenture, in our name or in its own name and we will be released from all our liabilities and obligations under the indenture and under the debt securities. (Section 801).

Events of Default, Notice and Certain Rights on Default

Unless otherwise stated in the applicable prospectus supplement, an “event of default,” when used with respect to any series of debt securities, means any of the following:

- failure to pay interest on any debt security of that series for 30 days after the payment is due;
- failure to pay the principal of or any premium on any debt security of that series when due;
- failure to deposit any sinking fund payment on debt securities of that series when due;

failure to perform any other covenant in the indenture that applies to debt securities of that series for 90 days after we have received written notice of the failure to perform in the manner specified in the indenture;

an event of default under any debt by the company or any significant subsidiary of the company (including a default with respect to any series of debt securities) that results in debt of an outstanding principal amount greater than \$50,000,000 becoming or being declared due and payable;

- certain events in bankruptcy, insolvency or reorganization; or

any other event of default that may be specified for the debt securities of that series when that series is created. (Section 502).

If an event of default for any series of debt securities occurs and continues, the trustee or the holders of at least 25% in aggregate principal amount of the outstanding debt securities of the series may declare the entire principal of all the debt securities of that series to be due and payable immediately. If a declaration occurs, the holders of a majority of the aggregate principal amount of the outstanding debt securities of that series can, subject to certain conditions, rescind the declaration. (Section 502).

The prospectus supplement relating to each series of debt securities which are original issue discount securities will describe the particular provisions that relate to the acceleration of maturity of a portion of the principal amount of that series when an event of default occurs and continues.

An event of default for a particular series of debt securities does not necessarily constitute an event of default for any other series of debt securities issued under the indenture.

The indenture requires us to furnish an officer's certificate to the trustee each year as to the knowledge of our principal executive, financial or accounting officer of our compliance with all conditions and covenants under the indenture. (Section 1008). The trustee will transmit by mail to the holders of debt securities of a series notice of any default.

Other than its duties in the case of a default, the trustee will not be obligated to exercise any of its rights or powers under an indenture at the request, order or direction of any holders, unless the holders offer the trustee indemnification satisfactory to the trustee. (Section 603). If indemnification satisfactory to the trustee is provided, then, subject to certain other rights of the trustee, the holders of a majority in principal amount of the outstanding debt securities of any series may, with respect to the debt securities of that series, direct the time, method and place of:

- conducting any proceeding for any remedy available to the trustee; or
- exercising any trust or power conferred upon the trustee. (Section 512).

The holder of a debt security of any series will have the right to begin any proceeding with respect to the indenture or for any remedy only if:

- the holder has previously given the trustee written notice of a continuing event of default with respect to that series;
- the holders of at least 25% in aggregate principal amount of the outstanding debt securities of that series have made a written request of, and offered reasonable indemnification to, the trustee to begin the proceeding;
- the trustee has not started the proceeding within 60 days after receiving the request; and
- the trustee has not received directions inconsistent with the request from the holders of a majority in aggregate principal amount of the outstanding debt securities of that series during those 60 days. (Section 507).

The holders of not less than a majority in aggregate principal amount of any series of debt securities, by notice to the trustee for that series, may waive, on behalf of the holders of all debt securities of that series, any past default or event of default with respect to that series and its consequences. (Section 513). A default or event of default in the payment of the principal of, or premium or interest on, any debt security and certain other defaults may not, however, be waived. (Sections 508 and 513).

Modification of the Indenture

We, as well as the trustee for a series of debt securities, may enter into one or more supplemental indentures, without the consent of, or notice to, the holders of any of the debt securities, in order to:

- evidence the succession of another corporation to us and the assumption of our covenants by a successor;
- add to our covenants or surrender any of our rights or powers;
- add additional events of default for any series;
- change or eliminate any restrictions on the payment of principal of (or premium, if any, on) debt securities, provided such action will not adversely affect the interest of holders of any series of debt securities in any material respect;

permit or facilitate the issuance of debt securities in uncertificated form, provided such action will not adversely affect the interests of holders of any series of debt securities in any material respect;

secure the debt securities;

establish the form or terms of debt securities not yet issued;

evidence and provide for successor trustees;

add, change or eliminate any provision affecting registration as to principal of debt securities;

change or eliminate provisions or add any other provisions that are required or desirable in accordance with any amendments to the Trust Indenture Act of 1939, which we refer to in this prospectus as the Trust Indenture Act, on the condition that this action does not adversely affect the interests of any holder of debt securities of any series issued under the indenture in any material respect;

· comply with requirements of the SEC in order to maintain the qualification of the indenture under the Trust Indenture Act;

· provide for uncertificated debt securities in addition to or in place of certificated debt securities;

· make any change that would provide additional rights or benefits to holders of debt securities or any series, or that does not adversely affect the legal rights of such holders under the indenture;

· supplement any provisions of the indenture to facilitate defeasance and discharge of any series of debt securities, provided such action will not adversely affect the interest of the holders of debt securities of such series or any other series;

· conform text of the indenture or any debt securities to the description thereof in any prospectus supplement;

· cure any ambiguity or correct any mistake; or

· to make any other provision with respect to the indenture, provided that such actions will not adversely affect the interests of the holders, as determined in good faith by the board of directors of the company (Section 901).

In addition, with the consent of the holders of not less than a majority in aggregate principal amount of the outstanding debt securities of all series affected by the supplemental indenture, we and the trustee may execute supplemental indentures adding any provisions to or changing or eliminating any of the provisions of the indenture or any supplemental indenture or modifying the rights of the holders of debt securities of that series. No such supplemental indenture may, however, without the consent of the holder of each debt security that is affected:

· change the time for payment of principal or interest on any debt security;

· reduce the principal of, or any installment of principal of, or interest on, any debt security;

· reduce the amount of premium, if any, payable upon the redemption of any debt security;

· change any obligation of the company to pay additional amounts;

· reduce the amount of principal payable upon acceleration of the maturity of an original issue discount debt security;

- impair the right to institute suit for the enforcement of any payment on or for any debt security;

reduce the percentage in principal amount of the outstanding debt securities of any series the consent of whose holders is required for modification or amendment of the indenture or for waiver of compliance with certain provisions of the indenture or for waiver of certain defaults;

- modify the provisions relating to waiver of some defaults or any of the foregoing provisions;

- change the currency of payment;

adversely affect the right to repayment of debt securities of any series at the option of the holders of those debt securities; or

change the place of payment. (Section 902).

Any supplemental indenture will be filed with the SEC as an exhibit to:

a post-effective amendment to the registration statement of which this prospectus is a part;

an annual report on Form 10-K;

a quarterly report on Form 10-Q; or

a current report on Form 8-K.

Defeasance and Covenant Defeasance

When we use the term defeasance, we mean discharge from some or all of our obligations under the indenture. If we deposit with the trustee sufficient cash or government obligations to pay the principal, interest, any premium and any mandatory sinking fund or analogous payments due to the stated maturity or a redemption date of the debt securities of a particular series, then at our option:

we will be discharged from our obligations for the debt securities of that series, the holders of the debt securities of the affected series will no longer be entitled to the benefits of the indenture, except for registration of transfer and exchange of debt securities and replacement of lost, stolen or mutilated debt securities, and those holders may look only to the deposited funds or obligations for payment, which is referred to as “defeasance”; or

we will no longer be under any obligation to comply with certain covenants under the indenture as it relates to that series, and some events of default will no longer apply to us, which is referred to as “covenant defeasance.” (Sections 403 and 1501).

Unless the applicable prospectus supplement specifies otherwise and except as described below, the conditions to both defeasance and covenant defeasance are as follows:

it must not result in a breach or violation of, or constitute a default or event of default under, the indenture, or result in a breach or violation of, or constitute a default under, any other of our material agreements or instruments;

certain bankruptcy-related defaults or events of default with respect to us must not have occurred and be occurring during the period commencing on the date of the deposit of the trust funds to defease the debt securities and ending on the 91st day after that date;

we must deliver to the trustee an officer's certificate and an opinion of counsel addressing compliance with the conditions of the defeasance or covenant defeasance; and

we must comply with any additional conditions to the defeasance or covenant defeasance that the indenture may impose on us. (Sections 403 and 1501).

In the event that government obligations deposited with the trustee for the defeasance of such debt securities decrease in value or default subsequent to their being deposited, we will have no further obligation, and the holders of the debt securities will have no additional recourse against us, for any decrease in value or default. If indicated in the prospectus supplement, in addition to obligations of the United States or an agency or instrumentality of the United States, government obligations may include obligations of the government or an agency or instrumentality of the government issuing the currency in which debt securities of such series are payable.

We may exercise our defeasance option for the debt securities even if we have already exercised our covenant defeasance option. If we exercise our defeasance option, payment of the debt securities may not be accelerated because of default or an event of default. If we exercise our covenant defeasance option, payment of the debt securities may not be accelerated because of default or an event of default with respect to the covenants to which the covenant defeasance is applicable. If, however, acceleration occurs, the realizable value at the acceleration date of the money and government obligations in the defeasance trust could be less than the principal and interest then due on the debt securities, because the required deposit in the defeasance trust is based on scheduled cash flow rather than market value, which will vary depending on interest rates and other factors.

Conversion and Exchange Rights

The debt securities of any series may be convertible into or exchangeable for other securities of our company or another issuer or property or cash on the terms and subject to the conditions set forth in the applicable prospectus supplement. (Section 301).

Governing Law

The indenture and the debt securities will be governed by, and construed under, the laws of the State of New York without regard to conflicts of laws principles thereof.

Regarding the Trustee

We may from time to time maintain lines of credit, and have other customary banking relationships, with the trustee under the indenture.

The indenture and provisions of the Trust Indenture Act that are incorporated by reference therein contain limitations on the rights of the trustee, should it become one of our creditors, to obtain payment of claims in certain cases or to realize on certain property received by it in respect of any such claim as security or otherwise. The trustee is permitted to engage in other transactions with us or any of our affiliates; provided, however, that if it acquires any conflicting interest (as defined under the Trust Indenture Act), it must eliminate such conflict or resign.

Description of Capital Stock

Our authorized capital stock consists of 110,000,000 shares of common stock, \$.001 par value per share, and 7,954,286 shares of preferred stock, \$.001 par value per share. As of January 3, 2014, 63,907,357 shares of our common stock were outstanding. As of the date of this prospectus, no shares of our preferred stock were outstanding.

The description below summarizes the material terms of our common stock, preferred stock and options and warrants to purchase our common stock and provisions of our certificate of incorporation and bylaws. This description is only a summary. For more detailed information, you should refer to our certificate of incorporation and bylaws filed as exhibits to the registration statement of which this prospectus is a part and incorporated by reference into this prospectus. See “Where You Can Find More Information.”

Common Stock

Our common stock is traded on the NYSE MKT under the symbol “WYY.” Holders of our common stock are entitled to one vote for each share held on all matters submitted to a vote of stockholders and do not have cumulative voting rights. Holders of common stock are entitled to receive ratably such dividends, if any, as may be declared by the board of directors out of funds legally available therefore, subject to a preferential dividend right of outstanding preferred stock. Upon the liquidation, dissolution or our winding up, the holders of common stock are entitled to receive ratably our net assets available after the payment of all debts and other liabilities and subject to the prior rights of any outstanding preferred stock. The rights, preferences and privileges of holders of common stock are subject to, and may be adversely affected by the rights of the holders any series of preferred stock that we may designate and issue in the future.

Preferred Stock

Under the terms of our certificate of incorporation, the board of directors is authorized, subject to any limitations prescribed by law, without stockholder approval, to issue such shares of preferred stock in one or more series. Each such series of preferred stock shall have such rights, preferences, privileges and restrictions, including voting rights, dividend rights, conversion rights, redemption privileges and liquidation preferences, as shall be determined by the board of directors.

The purpose of authorizing the board of directors to issue preferred stock and determine its rights and preferences is to eliminate delays associated with a stockholder vote on specific issuances. The issuance of preferred stock, while

providing desirable flexibility in connection with possible acquisitions and other corporate purposes, could have the effect of making it more difficult for a third party to acquire, or of discouraging a third party from acquiring, a majority of our outstanding voting stock. We have no present plans to issue any additional shares of preferred stock.

The effects of issuing preferred stock could include one or more of the following:

- decreasing the amount of earnings and assets available for distribution to holders of common stock;
- restricting dividends on the common stock;
- diluting the voting power of the common stock;
- impairing the liquidation rights of the common stock; or
- delaying, deferring or preventing changes in our control or management.

As of the date of this prospectus, there were no shares of preferred stock outstanding.

Stock Options and Restricted Stock

As of January 3, 2014, we had outstanding options to purchase a total of 3,361,500 shares of common stock at a weighted average exercise price of \$1.63 per share. Of this total, options to purchase 1,436,500 were vested and 1,925,000 remain unvested.

As of January 3, 2014, we had outstanding 500,000 shares of restricted common stock subject to vesting conditions.

As of January 3, 2014, an additional 3,216,549 shares of common stock were available for future award grants under our stock incentive plan.

Delaware Law and Certain Charter and Bylaw Provisions

We are subject to the provisions of Section 203 of the General Corporation Law of Delaware. Section 203 prohibits a publicly held Delaware corporation from engaging in a “business combination” with any interested stockholder for a period of three years after the date of the transaction in which the person became an interested stockholder, unless the business combination is approved in a prescribed manner. A “business combination” includes mergers, asset sales and other transactions resulting in a financial benefit to the interested stockholder. Subject to certain exceptions, an “interested stockholder” is (i) a person who, together with affiliates and associates, owns 15% or more of our voting stock or (ii) an affiliate or associate of ours who was the owner, together with affiliates and associates, of 15% or more of our outstanding voting stock at any time within the 3-year period prior to the date for determining whether such person is “interested.”

Our certificate of incorporation also provides that any action required or permitted to be taken by our stockholders at an annual meeting or special meeting of stockholders may be taken without such meeting only by the unanimous consent of all stockholders entitled to vote on the particular action. In order for any matter to be considered properly brought before a meeting, a stockholder must comply with certain requirements regarding advance notice to us. The foregoing provisions could have the effect of delaying until the next stockholders’ meeting stockholder actions, which are favored by the holders of a majority of our outstanding voting securities. These provisions may also discourage another person or entity from making a tender offer for our common stock, because such person or entity, even if it acquired a majority of our outstanding voting securities, would be able to take action as a stockholder (such as electing new directors or approving a merger) only at a duly called stockholders’ meeting, and not by written consent.

The General Corporation Law of Delaware provides generally that the affirmative vote of a majority of the shares entitled to vote on any matter is required to amend a corporation's certificate of incorporation or bylaws, unless a corporation's certificate of incorporation or bylaws, as the case may be, requires a greater percentage. Our certificate of incorporation and bylaws do not require a greater percentage vote. Our board of directors is classified into three classes of directors, with approximately one-third of the directors serving in each such class of directors and with one class of directors being elected at each annual meeting of stockholders to serve for a term of three years or until their successors are elected and take office. Our bylaws provide that the board of directors will determine the number of directors to serve on the board. Our board of directors presently consists of six members.

Our certificate of incorporation and bylaws contain certain provisions permitted under the General Corporation Law of Delaware relating to the liability of directors. The provisions eliminate, to the fullest extent permitted by the General Corporation Law of Delaware, a director's personal liability to us or our stockholders with respect to any act or omission in the performance of his or her duties as a director. Our certificate of incorporation and bylaws also allow us to indemnify our directors, to the fullest extent permitted by the General Corporation Law of Delaware. Our bylaws also provide that we may grant indemnification to any officer, employee, agent or other individual as our Board may approve from time to time. We believe that these provisions will assist us in attracting and retaining qualified individuals to serve as directors.

Our respective Employment Agreements with Steve L. Komar and James T. McCubbin, which each expired on December 31, 2013, provide that we shall indemnify the executive and hold such executives harmless from and against all claims, losses, damages, expense or liabilities (including expenses of defense and settlement) based upon or in any way arising from or connected with their employment by us, to the maximum extent permitted by law. We expect that we will enter into new employment agreements with each of Messrs. Komar and McCubbin that will provide for similar indemnification obligations.

NYSE MKT Listing

Our common stock is listed on the NYSE MKT under the symbol “WYY.”

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is American Stock Transfer & Trust Company.

Description of Warrants

We may issue other warrants in the future for the purchase of debt securities, common stock or other securities. Warrants may be issued independently or together with debt securities or common stock offered by any prospectus supplement and/or other offering material and may be attached to or separate from any such offered securities. Each series of warrants will be issued under a separate warrant agreement to be entered into between us and a bank or trust company, as warrant agent, all as will be set forth in the prospectus supplement and/or other offering material relating to the particular issue of warrants. The warrant agent will act solely as our agent in connection with the warrants and will not assume any obligation or relationship of agency or trust for or with any holders of warrants or beneficial owners of warrants.

The following summary of certain provisions of the warrants we may issue in the future does not purport to be complete and is subject to, and is qualified in its entirety by reference to, all provisions of the warrant agreements.

Reference is made to the prospectus supplement and/or other offering material relating to the particular issue of warrants offered pursuant to such prospectus supplement and/or other offering material for the terms of and information relating to such warrants, including, where applicable:

the designation, aggregate principal amount, currencies, denominations and terms of the series of debt securities purchasable upon exercise of warrants to purchase debt securities and the price at which such debt securities may be purchased upon such exercise;

the number of shares of common stock purchasable upon the exercise of warrants to purchase common stock and the price at which such number of shares of common stock may be purchased upon such exercise;

the designation and number of units of other securities purchasable upon the exercise of warrants to purchase other securities and the price at which such number of units of such other securities may be purchased upon such exercise;

the date on which the right to exercise such warrants shall commence and the date on which such right shall expire;

U.S. federal income tax consequences applicable to such warrants;

the amount of warrants outstanding as of the most recent practicable date; and

any other terms of such warrants.

Warrants will be issued in registered form only. The exercise price for warrants will be subject to adjustment in accordance with the applicable prospectus supplement and/or other offering material.

Each warrant will entitle the holder thereof to purchase such principal amount of debt securities or such number of shares of common stock or other securities at such exercise price as shall in each case be set forth in, or calculable from, the prospectus supplement and/or other offering material relating to the warrants, which exercise price may be subject to adjustment upon the occurrence of certain events as set forth in such prospectus supplement and/or other offering material. After the close of business on the expiration date, or such later date to which such expiration date may be extended by us, unexercised warrants will become void. The place or places where, and the manner in which, warrants may be exercised shall be specified in the prospectus supplement and/or other offering material relating to such warrants.

Prior to the exercise of any warrants to purchase debt securities, common stock or other securities, holders of such warrants will not have any of the rights of holders of debt securities, common stock or other securities, as the case may be, purchasable upon such exercise, including the right to receive payments of principal of, premium, if any, or interest, if any, on the debt securities purchasable upon such exercise or to enforce covenants in the applicable indenture, or to receive payments of dividends, if any, on the common stock purchasable upon such exercise, or to exercise any applicable right to vote.

Description of Stock Purchase Contracts and Stock Purchase Units

We may issue stock purchase contracts, including contracts obligating holders to purchase from us, and obligating us to sell to the holders, a specified number of shares of common stock or other securities at a future date or dates, which we refer to in this prospectus as “stock purchase contracts.” The price per share of the securities and the number of shares of the securities may be fixed at the time the stock purchase contracts are issued or may be determined by reference to a specific formula set forth in the stock purchase contracts. The stock purchase contracts may be issued separately or as part of units consisting of a stock purchase contract and debt securities, warrants, other securities or debt obligations of third parties, including U.S. treasury securities, which we refer to herein as “stock purchase units.” The stock purchase contracts may require holders to secure their obligations under the stock purchase contracts in a specified manner. The stock purchase contracts also may require us to make periodic payments to the holders of the stock purchase units or vice versa, and those payments may be unsecured or refunded on some basis.

The stock purchase contracts, and, if applicable, collateral or depositary arrangements, relating to the stock purchase contracts or stock purchase units, will be filed with the SEC in connection with the offering of stock purchase contracts or stock purchase units. The prospectus supplement and/or other offering material relating to a particular issue of stock purchase contracts or stock purchase units will describe the terms of those stock purchase contracts or stock purchase units, including the following:

- if applicable, a discussion of material U.S. federal income tax considerations; and
- any other information we think is important about the stock purchase contracts or the stock purchase units.

Where You Can Find More Information

We file annual, quarterly and current reports, proxy statements and other information with the SEC. We also filed a registration statement on Form S-3, including exhibits, under the Securities Act of 1933, as amended, or the Securities Act, with respect to the securities offered by this prospectus. This prospectus is a part of the registration statement, but does not contain all of the information included in the registration statement or the exhibits. You may read and copy the registration statement and any other document that we file at the SEC's public reference room at 100 F Street, N.E., Washington D.C. 20549. You can call the SEC at 1-800-SEC-0330 for further information on the operation of the public reference room. You can also find our public filings with the SEC on the internet at a web site maintained by the SEC located at <http://www.sec.gov>.

Incorporation of Certain Documents by Reference

We are "incorporating by reference" specified documents that we file with the SEC, which means:

- incorporated documents are considered part of this prospectus;
- we are disclosing important information to you by referring you to those documents; and
- information we file with the SEC will automatically update and supersede information contained in this prospectus.

We incorporate by reference the documents listed below and any future filings we make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Exchange Act (i) after the date of the registration statement on Form S-3 filed under the Securities Act with respect to securities offered by this prospectus and prior to the effectiveness of such registration statement and (ii) after the date of this prospectus and before the end of the offering of the securities pursuant to this prospectus:

- our Annual Report on Form 10-K for the year ended December 31, 2012;
- our Definitive Proxy Statement on Schedule 14A filed November 1, 2013;
- our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2013, June 30, 2013 and September 30, 2013;

Edgar Filing: WIDEPOINT CORP - Form 424B5

· our Current Reports on Form 8-K filed August 28, 2013, December 16, 2013 and December 27, 2013; and

the description of our common stock contained in or incorporated into our Registration Statement on Form 8-A, filed September 19, 2006, and any amendment or report updating that description.

Information in this prospectus supersedes related information in the documents listed above, and information in subsequently filed documents supersedes related information in both this prospectus and the incorporated documents.

We will promptly provide, without charge to you, upon written or oral request, a copy of any or all of the documents incorporated by reference in this prospectus, other than exhibits to those documents, unless the exhibits are specifically incorporated by reference in those documents. Requests should be directed to:

WidePoint Corporation

7926 Jones Branch Drive, Suite 520

McLean, Virginia 22102

Plan of Distribution

We may sell securities in any one or more of the following ways from time to time: (i) through agents; (ii) to or through underwriters; (iii) through brokers or dealers; (iv) directly by us to purchasers, including through a specific bidding, auction or other process; or (v) through a combination of any of these methods of sale. The applicable prospectus supplement and/or other offering material will contain the terms of the transaction, name or names of any underwriters, dealers, agents and the respective amounts of securities underwritten or purchased by them, the initial public offering price of the securities, and the applicable agent's commission, dealer's purchase price or underwriter's discount. Any dealers and agents participating in the distribution of the securities may be deemed to be underwriters, and compensation received by them on resale of the securities may be deemed to be underwriting discounts.

Any initial offering price, dealer purchase price, discount or commission may be changed from time to time.

The securities may be distributed from time to time in one or more transactions, at negotiated prices, at a fixed price or fixed prices (that may be subject to change), at market prices prevailing at the time of sale, at various prices determined at the time of sale or at prices related to prevailing market prices.

Offers to purchase securities may be solicited directly by us or by agents designated by us from time to time. Any such agent may be deemed to be an underwriter, as that term is defined in the Securities Act of 1933, of the securities so offered and sold.

If underwriters are utilized in the sale of any securities in respect of which this prospectus is being delivered, such securities will be acquired by the underwriters for their own account and may be resold from time to time in one or more transactions, including negotiated transactions, at fixed public offering prices or at varying prices determined by the underwriters at the time of sale. Securities may be offered to the public either through underwriting syndicates represented by managing underwriters or directly by one or more underwriters. If any underwriter or underwriters are utilized in the sale of securities, unless otherwise indicated in the applicable prospectus supplement and/or other offering material, the obligations of the underwriters are subject to certain conditions precedent, and that the underwriters will be obligated to purchase all such securities if any are purchased.

If a dealer is utilized in the sale of the securities in respect of which this prospectus is delivered, we will sell such securities to the dealer, as principal. The dealer may then resell such securities to the public at varying prices to be determined by such dealer at the time of resale. Transactions through brokers or dealers may include block trades in which brokers or dealers will attempt to sell shares as agent but may position and resell as principal to facilitate the transaction or in crosses, in which the same broker or dealer acts as agent on both sides of the trade. Any such dealer may be deemed to be an underwriter, as such term is defined in the Securities Act of 1933, of the securities so offered and sold.

Offers to purchase securities may be solicited directly by us and the sale thereof may be made by us directly to institutional investors or others, who may be deemed to be underwriters within the meaning of the Securities Act of 1933 with respect to any resale thereof.

If so indicated in the applicable prospectus supplement and/or other offering material, we may authorize agents and underwriters to solicit offers by certain institutions to purchase securities from us at the public offering price set forth in the applicable prospectus supplement and/or other offering material pursuant to delayed delivery contracts providing for payment and delivery on the date or dates stated in the applicable prospectus supplement and/or other offering material. Such delayed delivery contracts will be subject only to those conditions set forth in the applicable prospectus supplement and/or other offering material.

Agents, underwriters and dealers may be entitled under relevant agreements with us to indemnification by us against certain liabilities, including liabilities under the Securities Act of 1933, or to contribution with respect to payments which such agents, underwriters and dealers may be required to make in respect thereof. The terms and conditions of any indemnification or contribution will be described in the applicable prospectus supplement and/or other offering material.

We may also sell shares of our common stock through various arrangements involving mandatorily or optionally exchangeable securities, and this prospectus may be delivered in connection with those sales.

We may enter into derivative, sale or forward sale transactions with third parties, or sell securities not covered by this prospectus to third parties in privately negotiated transactions. If the applicable prospectus supplement and/or other offering material indicates, in connection with those transactions, the third parties may sell securities covered by this prospectus and the applicable prospectus supplement and/or other offering material, including in short sale transactions and by issuing securities not covered by this prospectus but convertible into, or exchangeable for or representing beneficial interests in such securities covered by this prospectus, or the return of which is derived in whole or in part from the value of such securities. The third parties may use securities received under derivative, sale or forward sale transactions, or securities pledged by us or borrowed from us or others to settle those sales or to close out any related open borrowings of stock, and may use securities received from us in settlement of those transactions to close out any related open borrowings of stock. The third party in such sale transactions will be an underwriter and will be identified in the applicable prospectus supplement (or a post-effective amendment) and/or other offering material.

Underwriters, broker-dealers or agents may receive compensation in the form of commissions, discounts or concessions from us. Underwriters, broker-dealers or agents may also receive compensation from the purchasers of shares for whom they act as agents or to whom they sell as principals, or both. Compensation as to a particular underwriter, broker-dealer or agent might be in excess of customary commissions and will be in amounts to be negotiated in connection with transactions involving shares. In effecting sales, broker-dealers engaged by us may arrange for other broker-dealers to participate in the resales.

Each series of securities will be a new issue and, other than the common stock, which is listed on the New York Stock Exchange MKT, will have no established trading market. We may elect to list any series of securities on an exchange, and in the case of the common stock, on any additional exchange, but, unless otherwise specified in the applicable prospectus supplement and/or other offering material, we shall not be obligated to do so. No assurance can be given as to the liquidity of the trading market for any of the securities.

Agents, underwriters and dealers may engage in transactions with, or perform services for us and our respective subsidiaries in the ordinary course of business.

Any underwriter may engage in overallotment, stabilizing transactions, short covering transactions and penalty bids in accordance with Regulation M under the Securities Exchange Act of 1934. Overallotment involves sales in excess of the offering size, which create a short position. Stabilizing transactions permit bids to purchase the underlying security so long as the stabilizing bids do not exceed a specified maximum. Short covering transactions involve purchases of the securities in the open market after the distribution is completed to cover short positions. Penalty bids permit the underwriters to reclaim a selling concession from a dealer when the securities originally sold by the dealer are purchased in a covering transaction to cover short positions. Those activities may cause the price of the securities to be higher than it would otherwise be. If commenced, the underwriters may discontinue any of the activities at any time. An underwriter may carry out these transactions on the New York Stock Exchange MKT, in the over-the-counter market or otherwise.

The place and time of delivery for securities will be set forth in the accompanying prospectus supplement and/or other offering material for such securities.

Legal Matters

The validity of the securities offered by this prospectus will be passed upon for us by Foley & Lardner LLP. The validity of the securities offered by this prospectus will be passed upon for any underwriters or agents by counsel named in the applicable prospectus supplement.

EXPERTS

The consolidated financial statements of WidePoint Corporation as of December 31, 2012 and 2011, and for the years then ended, have been incorporated by reference herein in reliance upon the report of Moss Adams LLP, independent registered public accounting firm, incorporated by reference herein, and upon the authority of said firm as experts in accounting and auditing. To the extent that Moss Adams LLP audits and reports on consolidated financial statements of WidePoint Corporation at future dates and consents to the use of their reports thereon, such consolidated financial statements also will be incorporated by reference in the registration statement in reliance upon their reports and said authority.
