UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF
1934

For the quarterly period ended March 31, 2014

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____

Commission File Number: 2-88927

FIRST KEYSTONE CORPORATION
(Exact name of registrant as specified in its charter)

Pennsylvania

23-2249083

Edgar Filing: FIRST KEYSTONE CORP - Form 10-Q

(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

111 West Front Street, Berwick, PA 18603
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (570) 752-3671

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No "

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes x No "

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "small reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer " Accelerated filer x
Non-accelerated filer "Smaller reporting company "

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes " No x

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practical date:

Common Stock, \$2 Par Value, 5,532,120 shares as of May 2, 2014.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

NOTE 1 BASIS OF PRESENTATION AND ACCOUNTING POLICIES

The consolidated financial statements include the accounts of First Keystone Corporation (the “Corporation”) and its wholly owned subsidiary, First Keystone Community Bank (the “Bank”). All significant intercompany accounts and transactions have been eliminated.

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”) for interim financial information. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete consolidated financial statements. In the opinion of management, all adjustments considered necessary for fair presentation have been included. Operating results for the three month period ended March 31, 2014, are not necessarily indicative of the results for the year ending December 31, 2014. For further information, refer to the consolidated financial statements and notes thereto included in First Keystone Corporation’s Annual Report on Form 10-K for the year ended December 31, 2013.

For comparative purposes, the March 31, 2013 and December 31, 2013 balances have been reclassified to conform to the 2014 presentation. Such reclassifications had no impact on net income.

The Corporation has evaluated events and transactions occurring subsequent to the consolidated balance sheet date of March 31, 2014 for items that should potentially be recognized or disclosed in these consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were issued.

NOTE 2 RECENT ACCOUNTING STANDARDS UPDATES (“ASU”)

Except as disclosed below, there were no new accounting pronouncements affecting the Corporation during the three months ended March 31, 2014 that were not already adopted by the Corporation in previous periods.

In January 2014, the Financial Accounting Standards Board (“FASB”) issued ASU 2014-01, *Investments – Equity Method and Joint Ventures (Topic 323)*. The ASU provides guidance on accounting for investments by a reporting entity in flow-through limited liability entities that manage or invest in affordable housing projects that qualify for the low-income housing tax credit. This ASU is effective for annual periods and interim reporting periods within those annual periods beginning after December 15, 2014, and will be applied retrospectively to all periods presented. The Corporation is currently evaluating the impact of this ASU on its consolidated financial statements.

NOTE 3 — INVESTMENT SECURITIES

The Corporation classifies its investment securities as either “Held-to-Maturity” or “Available-for-Sale” at the time of purchase. Investment securities are accounted for on a trade date basis. Debt securities are classified as Held-to-Maturity when the Corporation has the ability and positive intent to hold the securities to maturity. Investment securities classified as Held-to-Maturity are carried at cost adjusted for amortization of premium and accretion of discount to maturity.

Debt securities not classified as Held-to-Maturity and equity securities are included in the Available-for-Sale category and are carried at fair value. The amount of any unrealized gain or loss, net of the effect of deferred income taxes, is reported as accumulated other comprehensive income (loss) in the Consolidated Balance Sheets and Consolidated Statements of Changes in Stockholders’ Equity. Management’s decision to sell Available-for-Sale securities is based on changes in economic conditions controlling the sources and applications of funds, terms, availability of and yield of alternative investments, interest rate risk and the need for liquidity.

The cost of debt securities classified as Held-to-Maturity or Available-for-Sale is adjusted for amortization of premiums and accretion of discounts to expected maturity. Such amortization and accretion, as well as interest and dividends, are included in interest and dividend income from investment securities. Realized gains and losses are included in net investment securities gains and losses. The cost of investment securities sold, redeemed or matured is based on the specific identification method.

Edgar Filing: FIRST KEYSTONE CORP - Form 10-Q

The amortized cost, related estimated fair value, and unrealized gains and losses for investment securities classified as “Available-For-Sale” or “Held-to-Maturity” were as follows at March 31, 2014 and December 31, 2013:

Weighted average yield	2.20 %	5.11 %	2.28 %	2.87 %	0.85 %			

¹Mortgage-backed securities are allocated for maturity reporting at their original maturity date.

²Average yields on tax-exempt obligations of state and political subdivisions have been computed on a tax-equivalent basis using a 34% tax rate.

³Marketable equity securities are not considered to have defined maturities and are included in the after ten year category.

There were no aggregate investments with a single issuer (excluding the U.S. Government and its agencies) which exceeded ten percent of consolidated stockholders' equity at March 31, 2014. The quality rating of the obligations of state and political subdivisions are generally investment grade, as rated by Moody's, Standard and Poor's or Fitch. The typical exceptions are local issues which are not rated, but are secured by the full faith and credit obligations of the communities that issued these securities.

Proceeds from sales of investments in Available-for-Sale debt and equity securities during the first quarter of 2014 and 2013 were \$80,165,000 and \$4,205,000, respectively. Gross gains realized on these sales were \$808,000 and \$290,000, respectively. Gross losses on these sales were \$211,000 and \$22,000, respectively. There were no other-than-temporary impairment losses in 2014 and 2013.

There were no proceeds from sales of investments in Held-to-Maturity debt and equity securities during the first quarter of 2014 and 2013. Therefore, there were no gains or losses realized during these periods.

Management evaluates securities for other-than-temporary impairment (“OTTI”) at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. Investment securities classified as available-for-sale or held-to-maturity are generally evaluated for OTTI under FASB ASC 320, *Investments - Debt and Equity Securities*. In determining OTTI under the FASB ASC 320 model, management considers many factors, including (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary decline exists involves a high degree of subjectivity and judgment and is based on the information available to management at a point in time.

When other-than-temporary impairment occurs on debt securities, the amount of the other-than-temporary impairment recognized in earnings depends on whether an entity intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss. If an entity intends to sell or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss, the other-than-temporary impairment shall be recognized in earnings equal to the entire difference between the investment’s amortized cost basis and its fair value at the balance sheet date. If an entity does not intend to sell the security and it is not more likely than not that the entity will be required to sell the security before recovery of its amortized cost basis less any current-period loss, the other-than-temporary impairment shall be separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is determined based on the present value of cash flows expected to be collected, and the realized loss is recognized in net investment securities gains on the consolidated statements of income. The amount of the total other-than-temporary impairment related to the other factors shall be recognized in other comprehensive income, net of applicable taxes. The previous amortized cost basis less the other-than-temporary impairment recognized in earnings shall become the new amortized cost basis of the investment.

The fair market value of the equity securities tends to fluctuate with the overall equity markets as well as the trends specific to each institution. The equity securities portfolio is reviewed in a similar manner as that of the debt securities with greater emphasis placed on the length of time the market value has been less than the carrying value and the financial sector outlook. The Corporation also reviews dividend payment activities, levels of non-performing assets and loan loss reserves. The starting point for the equity analysis is the length and severity of market value decline. The realized loss is recognized in net investment securities gains on the consolidated statements of income. The amount of the total other-than-temporary impairment is recognized in other comprehensive income, net of applicable taxes.

The Corporation and its investment advisors monitor the entire portfolio monthly with particular attention given to securities in a continuous loss position of at least ten percent for over twelve months. Based on the factors described above, management did not consider any securities to be other-than-temporarily impaired at March 31, 2014 and December 31, 2013.

Edgar Filing: FIRST KEYSTONE CORP - Form 10-Q

In accordance with disclosures required by FASB ASC 320-10-50, *Investments - Debt and Equity Securities*, the summary below shows the gross unrealized losses and fair value of the Corporation's investments, aggregated by investment category, that individual securities have been in a continuous unrealized loss position for less than 12 months or 12 months or more as of March 31, 2014 and December 31, 2013:

March 31, 2014

(Dollars in thousands)	Less Than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
Available-for-Sale:

	\$178,689	\$ (6,373)	\$	\$	\$178,689	\$ (6,373)

The Corporation invests in various forms of agency debt including mortgage backed securities and callable debt. The mortgage-backed securities are issued by FHLMC (“Federal Home Loan Mortgage Corporation”), FNMA (“Federal National Mortgage Association”) or GNMA (“Government National Mortgage Association”). The municipal securities consist of general obligations and revenue bonds. The marketable equity securities consist of stocks in other bank holding companies. The fair market value of the above securities is influenced by market interest rates, prepayment speeds on mortgage securities, bid offer spreads in the market place and credit premiums for various types of agency debt. These factors change continuously and therefore the market value of these securities may be higher or lower than the Corporation’s carrying value at any measurement date. Management does not believe any of their 78 debt securities in an unrealized loss position as of March 31, 2014 represents an other-than-temporary impairment, as these unrealized losses relate principally to changes in interest rates subsequent to the acquisition of the specific securities.

NOTE 4 — LOANS AND ALLOWANCE FOR LOAN LOSSES

Loans are stated at their outstanding unpaid principal balances, net of deferred fees or costs, unearned income and the allowance for loan losses. Interest on loans is recognized as income over the term of each loan, generally, by the accrual method. Loan origination fees and certain direct loan origination costs have been deferred with the net amount amortized using the straight line method or the interest method over the contractual life of the related loans as an interest yield adjustment.

Residential mortgage loans held for resale are carried at the lower of cost or market on an aggregate basis determined by independent pricing from appropriate federal or state agency investors. These loans are sold without recourse.

Past-Due Loans — Generally, a loan is considered to be past-due when scheduled loan payments are in arrears 15 days or more. Delinquent notices are generated automatically when a loan is 15 days past-due. Collection efforts continue on past-due loans that have not been brought current, when it is believed that some chance exists for improvement in the status of the loan. Past-due loans are continually evaluated with the determination for charge-off being made when no reasonable chance remains that the status of the loan can be improved.

Charge-Offs — Commercial real estate loans are charged off in whole or in part when they become sufficiently delinquent based upon the terms of the underlying loan contract and when a collateral deficiency exists. Because all or part of the contractual cash flows are not expected to be collected, the loan is considered to be impaired, and the Bank estimates the impairment based on its analysis of the cash flows and/or collateral estimated at fair value less cost to sell.

Consumer loans are charged off when they become non-performing assets, or when the value of the underlying collateral is not sufficient to support the loan balance and a loss is expected. At that time, the amount of estimated collateral deficiency, if any, is charged off for loans secured by collateral, and all other loans are charged off in full. Loans in which the borrower is in bankruptcy are considered on a case by case basis and are either charged off by the Bank or reaffirmed by the borrower. Loans with collateral are charged down to the estimated fair value of the collateral less cost to sell.

Non-Accrual Loans — Generally, a loan is classified as non-accrual and the accrual of interest on such a loan is discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectability of principal or interest, even though the loan may currently be performing. A loan may remain on accrual status if it is in the process of collection and is either guaranteed or well secured. When a loan is placed on non-accrual status, unpaid interest credited to income in the current year is reversed and unpaid interest accrued in prior years is charged against interest income. Certain non-accrual loans may continue to perform, that is, payments are still being received. Generally, the payments are applied to principal. These loans remain under constant scrutiny and if performance continues, interest income may be recorded on a cash basis based on management's judgment as to collectability of principal.

Impaired Loans — A loan is considered impaired when, based on current information and events, it is probable that the Corporation will be unable to collect all amounts due according to the contractual terms of the original loan agreement. Under current accounting standards, the allowance for loan losses related to impaired loans is based on discounted cash flows using the loan's effective interest rate or the fair value of the collateral for certain collateral dependent loans.

Troubled Debt Restructurings ("TDRs") — The restructuring of a loan is considered a "troubled debt restructuring" if both the following conditions are met: (i) the borrower is experiencing financial difficulties, and (ii) the Bank has granted a concession. The most common concessions granted include one or more modifications to the terms of the debt, such as (a) a reduction in the interest rate for the remaining life of the debt, (b) an extension of the maturity date at an interest rate lower than the current market rate for new debt with similar risk, (c) a temporary period of interest-only payments, and (d) a reduction in the contractual payment amount for either a short period or remaining term of the loan. A less common concession is the forgiveness of a portion of the principal.

The determination of whether a borrower is experiencing financial difficulties takes into account not only the current financial condition of the borrower, but also the potential financial condition of the borrower were a concession not granted. Similarly, the determination of whether a concession has been granted is very subjective in nature. For example, simply extending the term of a loan at its original interest rate or even at a higher interest rate could be interpreted as a concession unless the borrower could readily obtain similar credit terms from a different lender.

Loans modified in a troubled debt restructuring may or may not be placed on non-accrual status until the Bank determines the future collection of principal and interest is reasonably assured, which generally requires that the borrower demonstrates a period of performance according to the restructured terms of six months. Loans classified as troubled debt restructurings are designated as impaired.

Allowance for Loan Losses — The allowance for loan losses is established through provisions for loan losses charged against income. Loans deemed to be uncollectible are charged against the allowance for loan losses and subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is maintained at a level estimated by management to be adequate to absorb potential loan losses. Management's periodic evaluation of the adequacy of the allowance for loan losses is based on the Corporation's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay (including the timing of future payments), the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions, and other relevant factors. This evaluation is inherently subjective as it requires material estimates including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change.

The Corporation is subject to periodic examination by its federal and state examiners, and may be required by such regulators to recognize additions to the allowance for loan losses based on their assessment of credit information available to them at the time of their examinations.

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are individually classified as impaired. Select loans are not aggregated for collective impairment evaluation, as such; all loans are subject to individual impairment evaluation should the facts and circumstances pertinent to a particular loan suggest that such evaluation is necessary. Factors considered by management in determining impairment include payment status and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from collateral. Troubled debt restructurings are separately identified for impairment disclosures and are measured at the present value of estimated future cash flows using the loan's effective rate at inception. If a troubled debt restructuring is considered to be a collateral dependent loan, the loans may be reported, net, at the fair value of the collateral. For troubled debt restructurings that subsequently default, the Corporation determines the amount of reserve in accordance with the accounting policy for the allowance for loan losses.

The general component covers all other loans not identified as impaired and is based on historical losses adjusted for current factors. The historical loss component of the allowance is determined by losses recognized by portfolio segment over the preceding eight quarters. In calculating the historical component of our allowance, we aggregate loans into one of four portfolio segments: Commercial and Industrial, Commercial real estate, Residential real estate and Consumer. Risk factors impacting loans in each of the portfolio segments include broad deterioration of property values, reduced consumer and business spending as a result of continued high unemployment and reduced credit availability and lack of confidence in a sustainable recovery. Actual loss experience is supplemented with other economic factors based on the risks present for each portfolio segment. These economic factors include consideration of the following: the concentration of special mention, substandard and doubtful loans as a percentage of total loans, levels of loan concentration within the portfolio segment or division of a portfolio segment, broad economic conditions, delinquency trends, volume trends and terms, and policy and management changes.

The unallocated component of the allowance is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

The Bank utilizes a risk grading matrix as a tool for managing credit risk in the loan portfolio and assigns an Asset Quality Rating (risk grade) to all retail (Residential Real Estate and Consumer), Commercial and Industrial, and Commercial Real Estate borrowings. An asset quality rating is assigned using the guidance provided in the Bank's loan policy. Primary responsibility for assigning the asset quality rating rests with the lender. The asset quality rating is validated periodically by both an internal and external loan review process.

The commercial loan grading system focuses on a borrower's financial strength and performance, experience and depth of management, primary and secondary sources of repayment, the nature of the business and the outlook for the particular industry. Primary emphasis will be on the financial condition and trends. The grade also reflects current economic and industry conditions; as well as other variables such as liquidity, cash flow, revenue/earnings trends, management strengths or weaknesses, quality of financial information, and credit history. The retail loan grading system focuses on the borrower's credit score and credit history, debt-to-income ratio and income sources, collateral position and loan-to-value ratio, as well as other variables such as current economic conditions, and individual strengths and weaknesses.

Risk grade characteristics are as follows:

Risk Grade 1 – MINIMAL RISK through Risk Grade 6 – MANAGEMENT ATTENTION (Pass Grade Categories)

Risk is evaluated via examination of several attributes including but not limited to financial trends, strengths and weaknesses, likelihood of repayment when considering both cash flow and collateral, sources of repayment, leverage position, management expertise, and repayment history.

At the low-risk end of the rating scale, a risk grade of 1 - Minimal Risk is the grade reserved for loans with exceptional credit fundamentals and virtually no risk of default or loss. Loan grades then progress through escalating ratings of 2 through 6 based upon risk. Risk Grade 2 - Modest Risk are loans with sufficient cash flows; Risk Grade 3 - Average Risk are loans with key balance sheet ratios slightly above the borrower's peers; Risk Grade 4 - Acceptable Risk are loans with key balance sheet ratios usually near the borrower's peers, but one or more ratios may be higher; and Risk Grade 5 - Marginally Acceptable are loans with strained cash flow, increasing leverage and/or weakening markets. Risk Grade 6 - Management Attention are loans with weaknesses resulting from declining performance trends and the borrower's cash flows may be temporarily strained. Loans in this category are performing according to terms, but present some type of potential concern.

Risk Grade 7 – SPECIAL MENTION (Non-Pass Category)

Generally, these loans or assets are currently protected, but are "Potentially Weak". They constitute an undue and unwarranted credit risk but not to the point of justifying a classification of substandard.

Assets in this category are currently protected but have potential weakness which may, if not checked or corrected, weaken the asset or inadequately protect the Bank's credit position at some future date. No loss of principal or interest is envisioned, however they constitute an undue credit risk that may be minor but is unwarranted in light of the circumstances surrounding a specific asset. Risk is increasing beyond that at which the loan originally would have been granted. Historically, cash flows are inconsistent; financial trends show some deterioration. Liquidity and leverage are above industry averages. Financial information could be incomplete or inadequate. A Special Mention asset has potential weaknesses that deserve management's close attention.

Risk Grade 8 – SUBSTANDARD (Non-Pass Category)

Generally, these assets are inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have "well-defined" weaknesses that jeopardize the full liquidation of the debt.

They are characterized by the distinct possibility that the Bank will sustain some loss if in the aggregate amount of substandard assets, is not fully covered by the liquidation of the collateral used as security. Substandard loans are inadequately protected by current sound net worth, paying capacity of the borrower, or pledged collateral, and have a high probability of payment default, or they have other well-defined weaknesses. Such assets require more intensive supervision by Bank Management.

Risk Grade 9 – DOUBTFUL (Non-Pass Category)

Generally, loans graded doubtful have all the weaknesses inherent in a substandard loan with the added factor that the weaknesses are pronounced to a point where the basis of current information, conditions, and values, collection or liquidation in full is highly improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors that may work to strengthen the asset, its classification is deferred until, for example, a proposed merger, acquisition, liquidation procedures, capital injection, perfection of liens on additional collateral and/or refinancing plans are completed. Loans are graded doubtful if they contain weaknesses so serious that collection or liquidation in full is questionable.

The credit quality indicators by loan segment are summarized below at March 31, 2014 and December 31, 2013:

From time to time, the Bank may agree to modify the contractual terms of a borrower's loan. In cases where the modifications represent a concession to a borrower experiencing financial difficulty, the modification is considered a troubled debt restructuring ("TDR").

The outstanding balance of TDRs as of March 31, 2014 and December 31, 2013 was \$4,001,000 and \$3,961,000, respectively. The increase in TDRs was attributable to deterioration in the respective borrowers' financial position, and in some cases a declining collateral value, along with the Bank's proactive monitoring of the loan portfolio. As of March 31, 2014 and December 31, 2013, there were no unfunded commitments on any TDRs.

During the three months ended March 31, 2014, three loans with a combined post modification balance of \$57,000 were classified as TDRs, as compared to the three months ended March 31, 2013, when eight loans with a combined post modification balance of \$3,613,000 were classified as TDRs. The loan modifications for the three months ended March 31, 2014 consisted of one term modification and two payment modifications. The loan modifications for the three months ended March 31, 2013 consisted of two interest rate modifications and six payment modifications.

The following table presents the unpaid balance of TDRs at the dates indicated:

(Dollars in thousands)

	March 31, 2014	December 31, 2013
Non-accrual TDRs	\$ 1,537	\$ 1,538
Accruing TDRs	2,464	2,423
Total	\$ 4,001	\$ 3,961

At March 31, 2014, six Commercial Real Estate loans classified as TDRs with a combined recorded investment of \$2,153,000 were not in compliance with the terms of their restructure, compared to March 31, 2013 when four Commercial Real Estate loans classified as TDRs with a combined recorded investment of \$432,000 were not in compliance with the terms of their restructure.

The following table presents information regarding the loan modifications categorized as TDRs during the three months ended March 31, 2014 and March 31, 2013:

(Dollars in thousands, except number of contracts)

	Three Months Ended March 31, 2014

The following tables present the classes of the loan portfolio summarized by the past-due status at March 31, 2014 and December 31, 2013:

(Dollars in thousands)

	30-59 Days Past Due	60-89 Days Past Due	90 Days or Greater Past Due	Total Past Due	Current	Total Financing Receivables	90 Days Or Greater Past Due and Still Accruing
March 31, 2014:							
Commercial and Industrial	\$ 135	\$	\$ 18	\$ 153	\$64,588	\$ 64,741	\$
Commercial Real Estate	1,107	550	3,073	4,730	224,555	229,285	282
Residential Real Estate	1,444	839	920	3,203	153,247	156,450	3
Consumer	11			11	5,424	5,435	
Total	\$ 2,697	\$ 1,389	\$ 4,011	\$ 8,097	\$447,814	\$ 455,911	\$ 285

(Dollars in thousands)

	30-59 Days Past Due	60-89 Days Past Due	90 Days or Greater Past Due	Total Past Due	Current	Total Financing Receivables	90 Days Or Greater Past Due and Still Accruing
December 31, 2013:							
Commercial and Industrial	\$ 7	\$ 7	\$ 40	\$ 54	\$60,768	\$ 60,822	\$ 19
Commercial Real Estate	875	653	1,367	2,895	222,510	225,405	180
Residential Real Estate	1,751	248	926	2,925	151,750	154,675	119
Consumer	30	12		42	5,574	5,616	
Total	\$ 2,663	\$ 920	\$ 2,333	\$ 5,916	\$440,602	\$ 446,518	\$ 318

At March 31, 2014 and December 31, 2013, there were no commitments to lend additional funds with respect to impaired loans.

NOTE 5 — BORROWINGS

Short-term borrowings include federal funds purchased, securities sold under agreements to repurchase, Federal Discount Window, and Federal Home Loan Bank (“FHLB”) advances, which generally represent overnight or less than 30-day borrowings.

Securities Sold Under Agreements to Repurchase (“Repurchase Agreements”)

The Corporation enters into agreements under which it sells securities subject to an obligation to repurchase the same or similar securities. Under these arrangements, the Corporation may transfer legal control over the assets but still retain effective control through an agreement that both entitles and obligates the Corporation to repurchase the assets.

As a result, these repurchase agreements are accounted for as collateralized financing agreements (i.e., secured borrowings) and not as a sale and subsequent repurchase of securities. The obligation to repurchase the securities is reflected as a liability on the Corporation’s Consolidated Balance Sheets, while the securities underlying the repurchase agreements remain in the respective investment securities asset accounts. In other words, there is not offsetting or netting of the investment securities assets with the repurchase agreement liabilities. In addition, as the Corporation does not enter into reverse repurchase agreements, there is no such offsetting to be done with the repurchase agreements.

The right of setoff for a repurchase agreement resembles a secured borrowing, whereby the collateral would be used to settle the fair value of the repurchase agreement should the Corporation be in default (e.g., fails to make an interest payment to the counterparty). The collateral is held by a correspondent bank in the counterparty’s custodial account. The counterparty has the right to sell or pledge the investment securities.

The following table presents the short-term borrowings subject to an enforceable master netting arrangement or repurchase agreements as of March 31, 2014 and December 31, 2013.

(Dollars in thousands)

	Gross Amounts Offset in the Consolidated	Net Amounts of Liabilities Presented in the Consolidated	Cash
Gross Amounts of			

Edgar Filing: FIRST KEYSTONE CORP - Form 10-Q

	Recognized Liabilities	Balance Sheet	Balance Sheet	Financial Instruments	Collateral Pledge	Net Amount
March 31, 2014						
Repurchase agreements (a)	\$ 16,565	\$	\$ 16,565	\$ (16,565)	\$	\$
December 31, 2013						
Repurchase agreements (a)	\$ 16,261	\$	\$ 16,261	\$ (16,261)	\$	\$

(a) As of March 31, 2014 and December 31, 2013, the fair value of securities pledged in connection with repurchase agreements was \$25,842,000 and \$26,575,000, respectively.

Long-term borrowings are comprised of advances from FHLB and a capital lease assumed as a result of the acquisition of Pocono Community Bank in the amount of \$811,000. Under terms of a blanket agreement, collateral for the FHLB loans is certain qualifying assets of the Corporation's banking subsidiary. The principal assets are real estate mortgages and certain investment securities.

NOTE 6 — COMMITMENTS AND CONTINGENCIES

In the normal course of business, there are various pending legal actions and proceedings that are not reflected in the consolidated financial statements. Management does not believe the outcome of these actions and proceedings will have a material effect on the consolidated financial position or results of operations of the Corporation.

NOTE 7 — FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK AND CONCENTRATIONS OF CREDIT RISK

The Corporation is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets. The contract or notional amounts of those instruments reflect the extent of involvement the Corporation has in particular classes of financial instruments. The Corporation does not engage in trading activities with respect to any of its financial instruments with off-balance sheet risk.

The Corporation's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments.

The Corporation uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

The Corporation may require collateral or other security to support financial instruments with off-balance sheet credit risk.

The contract or notional amounts at March 31, 2014 and December 31, 2013, were as follows:

(Dollars in thousands)

	March 31, 2014	December 31, 2013
Financial instruments whose contract amounts represent credit risk:		
Commitments to extend credit	\$ 62,684	\$ 64,064
Financial standby letters of credit	\$ 661	\$ 418
Performance standby letters of credit	\$ 4,402	\$ 4,449

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses that may require payment of a fee. Since some of the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Corporation evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the

Corporation upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, owner-occupied income-producing commercial properties, and residential real estate.

Standby letters of credit are conditional commitments issued by the Corporation to guarantee payment to a third party when a customer either fails to repay an obligation or fails to perform some non-financial obligation. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Corporation may hold collateral to support standby letters of credit for which collateral is deemed necessary.

The Corporation grants commercial, agricultural, real estate mortgage and consumer loans to customers primarily in the counties of Columbia, Luzerne, Montour and Monroe, Pennsylvania. The concentrations of credit by type of loan are set forth in Note 4 – Loans and Allowance for Loan Losses. It is management's opinion that the loan portfolio was well balanced and diversified at March 31, 2014, to the extent necessary to avoid any significant concentration of credit risk. However, its debtor's ability to honor their contracts may be influenced by the region's economy.

NOTE 8 — FAIR VALUE MEASUREMENTS

Fair value measurement and disclosure guidance defines fair value as the price that would be received to sell the asset or transfer the liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. This guidance provides additional information on determining when the volume and level of activity for the asset or liability has significantly decreased. The guidance also includes information on identifying circumstances when a transaction may not be considered orderly.

Fair value measurement and disclosure guidance provides a list of factors that a reporting entity should evaluate to determine whether there has been a significant decrease in the volume and level of activity for the asset or liability in relation to normal market activity for the asset or liability. When the reporting entity concludes there has been a significant decrease in the volume and level of activity for the asset or liability, further analysis of the information from that market is needed and significant adjustments to the related prices may be necessary to estimate fair value in accordance with the fair value measurement and disclosure guidance.

This guidance clarifies that when there has been a significant decrease in the volume and level of activity for the asset or liability, some transactions may not be orderly. In those situations, the entity must evaluate the weight of the evidence to determine whether the transaction is orderly. The guidance provides a list of circumstances that may indicate that a transaction is not orderly. A transaction price that is not associated with an orderly transaction is given little, if any, weight when estimating fair value.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own belief about the assumptions market participants would use in pricing the asset or liability based upon the best information available in the circumstances. Fair value measurement and disclosure guidance establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 Inputs: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability;

Level 3 Input: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth as follows.

Financial Assets Measured at Fair Value on a Recurring Basis

At March 31, 2014 and December 31, 2013, investments measured at fair value on a recurring basis and the valuation methods used are as follows:

(Dollars in thousands)

March 31, 2014

	Level 1	Level 2	Level 3	Total
Available-for-Sale Securities:				
Obligations of U.S. Government Corporations and Agencies:				
Mortgaged-backed	\$	\$146,397	\$	\$146,397
Other		27,000		27,000
Obligations of state and political subdivisions		140,971		140,971
Corporate securities		39,438		39,438
Marketable equity securities	2,518			2,518
Total	\$2,518	\$353,806	\$	\$356,324

(Dollars in thousands)

December 31, 2013

	Level 1	Level 2	Level 3	Total
Available-for-Sale Securities:				
Obligations of U.S. Government Corporations and Agencies:				
Mortgaged-backed	\$	\$119,776	\$	\$119,776
Other		33,733		33,733
Obligations of state and political subdivisions		148,389		148,389
Corporate securities		49,265		49,265
Marketable equity securities	2,535			2,535
Total	\$2,535	\$351,163	\$	\$353,698

The estimated fair values of equity securities classified as Level 1 are derived from quoted market prices in active markets; these assets consist mainly of stocks held in other banks. The estimated fair values of all debt securities classified as Level 2 are obtained from nationally-recognized third-party pricing agencies. The estimated fair values are derived primarily from cash flow models, which include assumptions for interest rates, credit losses, and prepayment speeds. The significant inputs utilized in the cash flow models are based on market data obtained from sources independent of the Corporation (observable inputs), and are therefore classified as Level 2 within the fair value hierarchy. The Corporation does not have any Level 3 inputs for investments. There were no transfers between Level 1 and Level 2 during the first quarter of 2014 or 2013.

Financial Assets Measured at Fair Value on a Nonrecurring Basis

At March 31, 2014 and December 31, 2013, impaired loans measured at fair value on a non-recurring basis and the valuation methods used are as follows:

(Dollars in thousands)

	Level 1	Level 2	Level 3	Total
Assets at March 31, 2014				
Impaired loans:				
Commercial and Industrial	\$	\$	\$18	\$18
Commercial Real Estate			640	640
Residential Real Estate			619	619
Total impaired loans	\$	\$	\$1,277	\$1,277

(Dollars in thousands)

Edgar Filing: FIRST KEYSTONE CORP - Form 10-Q

	Level 1	Level 2	Level 3	Total
Assets at December 31, 2013				
Impaired loans:				
Commercial and Industrial	\$	\$	\$21	\$21
Commercial Real Estate			656	656
Residential Real Estate			621	621
Total impaired loans	\$	\$	\$1,298	\$1,298

The Bank's impaired loan valuation procedure for any loans greater than \$250,000 requires an appraisal to be obtained and reviewed annually at year end. A quarterly collateral evaluation is performed which may include a site visit, property pictures and discussions with realtors and other similar business professionals to ascertain current values. For impaired loans less than \$250,000 upon classification and annually at year end, the Bank completes a Certificate of Inspection, which includes an onsite inspection, insured values, tax assessed values, recent sales comparisons and a review of the previous evaluations. These assets are included as Level 3 fair values, based upon the lowest level that is significant to the fair value measurements. The fair value consists of the impaired loan balances less the valuation allowance and/or charge-offs. There were no transfers between valuation levels in 2014 and 2013.

Nonfinancial Assets Measured at Fair Value on a Nonrecurring Basis

At March 31, 2014 and December 31, 2013, foreclosed assets held for resale measured at fair value on a non-recurring basis and the valuation methods used are as follows:

(Dollars in thousands)

	Level 1	Level 2	Level 3	Total
Assets at March 31, 2014				
Other foreclosed assets held for resale:				
Commercial Real Estate	\$	\$	\$ 395	\$ 395
Total foreclosed assets held for resale	\$	\$	\$ 395	\$ 395

(Dollars in thousands)

	Level 1	Level 2	Level 3	Total
Assets at December 31, 2013				
Other foreclosed assets held for resale:				
Commercial Real Estate	\$	\$	\$	\$
Total foreclosed assets held for resale	\$	\$	\$	\$

The Bank's foreclosed asset valuation procedure requires an appraisal, which considers the sales prices of similar properties in the proximate vicinity, to be completed periodically with the exception of those cases which the Bank has obtained a sales agreement. These assets are included as Level 3 fair values, based upon the lowest level that is significant to the fair value measurements. There were no transfers between valuation levels in 2014 and 2013.

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which the Bank has utilized Level 3 inputs to determine the fair value:

(Dollars in thousands)

	Quantitative Information about Level 3 Fair Value Measurements				
	Fair Value	Estimate Valuation Technique	Unobservable Input	Range	Weighted Average
Assets at March 31, 2014					
Impaired loans	\$1,277	Appraisal of collateral ^{1,3}	Appraisal adjustments ²	(10%) – (35%)	(17%)
Foreclosed assets held for resale	395	Appraisal of collateral ^{1,3}	Appraisal adjustments ²	(10%) – (35%)	(10%)

(Dollars in thousands)

	Quantitative Information about Level 3 Fair Value Measurements				
	Fair Value	Estimate Valuation Technique	Unobservable Input	Range	Weighted Average
Assets at December 31, 2013					
Impaired loans	\$1,298	Appraisal of collateral ^{1,3}	Appraisal adjustments ²	(10%) – (35%)	(23%)
Foreclosed assets held for resale		Appraisal of collateral ^{1,3}	Appraisal adjustments ²	(0%) – (0%)	(0%)

¹Fair value is generally determined through independent appraisals of the underlying collateral, as defined by Bank regulators.

²Appraisals may be adjusted downward by management for qualitative factors such as economic conditions and estimated liquidation expenses. The typical range of appraisal adjustments are presented as a percent of the appraisal value.

³Includes qualitative adjustments by management and estimated liquidation expenses.

Fair Value of Financial Instruments*(Dollars in thousands)*

	Carrying Amount	Fair Value Measurements at March 31, 2014			Total

OFF-BALANCE SHEET FINANCIAL INSTRUMENTS

The preceding information should not be interpreted as an estimate of the fair value of the entire Corporation since a fair value calculation is only provided for a limited portion of the Corporation's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Corporation's disclosures and those of other companies may not be meaningful. The following methods and assumptions were used to estimate the fair values of the Corporation's financial instruments at March 31, 2014 and December 31, 2013:

Cash and Due From Banks, Interest-Bearing Deposits in Other Banks, Restricted Investment in Bank Stocks, Accrued Interest Receivable and Accrued Interest Payable

The fair values are equal to the current carrying values.

Investment Securities

The fair value of investment securities are determined by obtaining quoted market prices on nationally recognized securities exchanges (Level 1) or matrix pricing (Level 2), which is a mathematical technique used widely in the industry to value debt securities without relying on the securities' relationship to other benchmark quoted prices.

Loans

Fair values are estimated for categories of loans with similar financial characteristics. Loans were segregated by type such as Commercial and Industrial, Commercial and Residential Real Estate mortgages and Consumer. For estimation purposes, each loan category was further segmented into fixed and adjustable rate interest terms.

The fair value of each category of performing loans is calculated by discounting future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Fair value for impaired loans is based on management's estimate of future cash flows discounted using a rate commensurate with the risk associated with the estimated future cash flows or based on the value of the collateral if repayment is expected solely from collateral. The assumptions used by management are judgmentally determined using specific borrower information.

Mortgage Servicing Rights

The fair value of servicing rights is based on the present value of estimated future cash flows on pools of mortgages stratified by rate and maturity date.

Deposits

The fair value of deposits with no stated maturity, such as demand deposits, savings accounts and money market accounts, is equal to the amount payable on demand at March 31, 2014 and December 31, 2013.

Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on similar term borrowings, to a schedule of aggregated expected monthly maturities on time deposits.

Short-Term and Long-Term Borrowings

The fair values of short-term borrowings are equal to the current carrying values, and long-term borrowings are estimated using discounted cash flow analyses based on the Corporation's incremental borrowing rate for similar instruments.

Off-Balance Sheet Financial Instruments

The fair values for the Corporation's off-balance sheet financial instruments (lending commitments and letters of credit) are based on fees currently charged in the market to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

NOTE 9 — EARNINGS PER SHARE

Basic earnings per share (“EPS”) is computed by dividing net income by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Corporation. Potential common shares that may be issued by the Corporation relate solely to outstanding stock options and are determined using the treasury stock method. The following table sets forth the computation of basic and diluted earnings per share.

(In thousands, except earnings per share)

	Three Months Ended March 31, 2014	Three Months Ended March 31, 2013
Net income	\$ 2,298	\$ 2,526
Weighted-average common shares outstanding	5,521	5,419
Basic earnings per share	\$ 0.42	\$ 0.47
Weighted-average common shares outstanding	5,521	5,419
Common stock equivalents due to effect of stock options	5	12
Total weighted-average common shares and equivalents	5,526	5,431
Diluted earnings per share	\$ 0.42	\$ 0.47

Item 2. First Keystone Corporation Management's Discussion and Analysis of Financial Condition and Results of Operation as of March 31, 2014

This quarterly report contains certain forward-looking statements, which are included pursuant to the "safeharbor" provisions of the Private Securities Litigation Reform Act of 1995, and reflect management's beliefs and expectations based on information currently available. These forward-looking statements are inherently subject to significant risks and uncertainties, including changes in general economic and financial market conditions, the Corporation's ability to effectively carry out its business plans and changes in regulatory or legislative requirements. Other factors that could cause or contribute to such differences are changes in competitive conditions, and pending or threatened litigation. Although management believes the expectations reflected in such forward-looking statements are reasonable, actual results may differ materially.

CRITICAL ACCOUNTING ESTIMATES

The Corporation has chosen accounting policies that it believes are appropriate to accurately and fairly report its operating results and financial position, and the Corporation applies those accounting policies in a consistent manner. The Significant Accounting Policies are summarized in Note 1 to the consolidated financial statements included in the 2013 Annual Report on Form 10-K. There have been no changes to the Critical Accounting Estimates since the Corporation filed its Annual Report on Form 10-K for the year ended December 31, 2013.

RESULTS OF OPERATIONS

First Keystone Corporation realized earnings for the first quarter of 2014 of \$2,298,000, a decrease of \$228,000, or 9.0% from the first quarter of 2013. The decrease in net income for the first quarter of 2014 was due to several factors, including a decrease in net interest income and an increase in non-interest expense. While net interest income was lower in the three months ended March 31, 2014, the provision for loan losses declined and non-interest income increased over the same period one year ago.

On a per share basis, for the three months ended March 31, 2014, net income was \$0.42 versus \$0.47 in the first three months of 2013. Cash dividends amounted to \$0.26 per share in the first quarter of 2014 and 2013.

Year-to-date net income annualized as of March 31, 2014, amounted to a return on average common equity of 9.25%, a return on tangible equity net of goodwill of 11.46% and a return on assets of 1.04%. For the three months ended March 31, 2013, these measures were 9.66%, 11.82%, and 1.26%, respectively, on an annualized basis.

NET INTEREST INCOME

The major source of operating income for the Corporation is net interest income, defined as interest income less interest expense. In the first quarter of 2014, interest income amounted to \$7,633,000, a decrease of \$211,000 or 2.7% from the first quarter of 2013, while interest expense amounted to \$1,125,000 in the first quarter of 2014, a decrease of \$121,000, or 9.7% from the first quarter of 2013. As a result, net interest income decreased \$90,000 or 1.4% in the first quarter of 2014 to \$6,508,000 from \$6,598,000 in the first quarter of 2013.

Our net interest margin for the three months ended March 31, 2014 was 3.43% compared to 3.95% for the three months ended March 31, 2013.

PROVISION FOR LOAN LOSSES

The provision for loan losses for the quarter ended March 31, 2014 was \$133,000 as compared to \$400,000 for the quarter ended March 31, 2013. The decrease in the provision for loan losses resulted from the Corporation's analysis of the current loan portfolio, including historic losses, past-due trends, current economic conditions, and other relevant factors. Net charge-offs for the three months ended March 31, 2014 and 2013 were \$175,000 and \$270,000, respectively. See Allowance for Loan Losses on Page 31 for further discussion.

NON-INTEREST INCOME

Total non-interest income was \$1,715,000 for the quarter ended March 31, 2014, as compared to \$1,452,000 for the quarter ended March 31, 2013, an increase of \$263,000, or 18.1%. Gains on sales of mortgage loans decreased \$186,000 over the first quarter of 2013 to \$24,000. Mortgage originations fell as rates continued to rise during the first quarter of 2014. Net gains on sales of investment securities increased \$329,000 to \$597,000 as compared to the first quarter of 2013. The Bank has taken gains and losses in the portfolio to reduce market risk and protect from further changes in value in the face of increases in long-term interest rates.

Excluding net investment securities gains, non-interest income was \$1,118,000 for the first quarter of 2014, a decrease of \$66,000, or 5.6% from the first quarter of 2013.

While Trust Department income and service charges and fees both increased, they were not large enough to offset the \$186,000 reduction in gains on sales of mortgage loans.

NON-INTEREST EXPENSE

Total non-interest expense was \$5,252,000 for the quarter ended March 31, 2014, as compared to \$4,681,000 for the quarter ended March 31, 2013. Non-interest expense increased \$571,000, or 12.2%.

Expenses associated with employees (salaries and employee benefits) continue to be the largest category of non-interest expense. Salaries and benefits amounted to \$2,817,000, or 53.6% of total non-interest expense for the three months ended March 31, 2014, as compared to 58.1% for the three months of 2013. Net occupancy, furniture and equipment, and computer expense amounted to \$873,000 for the three months ended March 31, 2014, an increase of \$151,000, or 20.9%. Other non-interest expense, including ATM and debit card fees, FDIC insurance, professional services, Pennsylvania shares tax, foreclosed real estate expenses and advertising amounted to \$1,562,000 for the three months ended March 31, 2014, an increase of \$323,000, or 26.1% as compared to the three months of 2013.

The overall increase in non-interest expense related primarily to expenses associated with our new Dallas and Shickshinny offices along with the opening of our new administrative facility in Berwick. In addition, the Corporation experienced increased costs related to collections and foreclosed real estate expenses. Advertising expenses were also higher due to the rollout of the Bank's new suite of rewards checking products called Kasasa in the first quarter of 2014.

INCOME TAXES

Effective tax planning has helped produce favorable net income. Income tax expense amounted to \$540,000 for the three months ended March 31, 2014, as compared to \$443,000 for the three months ended March 31, 2013, an increase of \$97,000. The effective total income tax rate was 19.0% for the first quarter of 2014 as compared to 14.9% for the first quarter of 2013. The increase in the effective tax rate was due to the sales of tax-free municipal securities during the past year and the impact of the tax credits from the low-income housing partnerships. The Corporation looks to maximize its tax-exempt income derived from both tax-free loans and tax-free municipal securities.

FINANCIAL CONDITION

SUMMARY

Total assets decreased to \$891,946,000 as of March 31, 2014, a decrease of \$9,568,000, or 1.1% from year-end 2013. As of March 31, 2014, total deposits amounted to \$669,525,000, a decrease of 3.0% from year-end 2013.

Net loans increased by \$9,435,000 or 2.1%. Loan demand appears to be increasing as the Bank has seen an increase in loan originations.

Total cash and cash equivalents decreased compared to year-end 2013 due to reductions in balances held at correspondent banks.

The Corporation continues to maintain and manage its asset growth. The Corporation's strong equity capital position provides an opportunity to further leverage its asset growth. Total borrowings increased in the first three months of 2014 by \$10,399,000 to \$119,061,000 from \$108,662,000 as of December 31, 2013. Borrowings increased to support increasing loan and investment balances.

SEGMENT REPORTING

Currently, management measures the performance and allocates the resources of the Corporation as a single segment.

EARNING ASSETS

Earning assets are defined as those assets that produce interest income. By maintaining a healthy asset utilization rate, i.e., the volume of earning assets as a percentage of total assets, the Corporation maximizes income. The earning asset ratio (average interest earning assets divided by average total assets) equaled 91.5% at March 31, 2014, compared to 91.4% at March 31, 2013. This indicates that the management of earning assets is a priority and non-earning assets, primarily cash and due from banks, fixed assets and other assets, are maintained at minimal levels. The primary earning assets are loans and investment securities.

Our primary earning asset, total loans, increased to \$455,911,000 as of March 31, 2014, up \$9,393,000, or 2.1% since year-end 2013. The loan portfolio continues to be diversified. Overall asset quality has remained consistent with non-performing assets increasing slightly since year-end 2013. Total non-performing assets were \$4,525,000 as of March 31, 2014, an increase of \$176,000, or 4.1% from \$4,349,000 reported in non-performing assets as of December 31, 2013. Total allowance for loan losses to total non-performing assets was 143.1% as of March 31, 2014 and 149.9% at December 31, 2013.

In addition to loans, another primary earning asset is our overall investment portfolio, which increased in size from December 31, 2013, to March 31, 2014. Available-for-sale securities amounted to \$356,324,000 as of March 31, 2014, an increase of \$2,626,000 from year-end 2013. Interest-bearing deposits in other banks decreased as of March 31, 2014, to \$1,511,000 from \$22,366,000 at year-end 2013.

LOANS

Total loans increased to \$455,911,000 as of March 31, 2014 as compared to \$446,518,000 as of December 31, 2013. The table on page 13 provides data relating to the composition of the Corporation's loan portfolio on the dates indicated. Total loans increased by \$9,393,000 or 2.1%.

Increasing demand for borrowing by both individuals and businesses accounted for the 2.1% increase in the loan portfolio from December 31, 2013 to March 31, 2014. The Commercial and Industrial portfolio increased \$3,919,000 to \$64,741,000 as of March 31, 2014 as compared to \$60,822,000 as of December 31, 2013. The increase in the Commercial and Industrial portfolio (which includes tax-free commercial and industrial loans) was attributed to fourteen new loan originations totaling \$8,150,000, combined with four payoffs totaling \$1,043,000, as well as regular principal payments. The Commercial Real Estate portfolio increased \$3,880,000 to \$229,285,000 as of March 31, 2014 as compared to \$225,405,000 at December 31, 2013. The increase was mainly attributed to twelve loan originations totaling \$6,408,000, which were offset by loan payoffs of \$2,475,000, combined with typical amortizations in the loan portfolio. The Residential Real Estate portfolio increased \$1,775,000 to \$156,450,000 as of March 31, 2014, as compared to \$154,675,000 as of December 31, 2013. The increase was the result of new originations, and to a lesser extent, refinances held in the Bank's portfolio. The Corporation continued to originate and sell certain long-term fixed rate residential mortgage loans which conform to secondary market requirements. The Corporation derives ongoing income from the servicing of mortgages sold in the secondary market. The Corporation continues its efforts to lend to creditworthy borrowers despite the continued slow economic conditions.

Management believes that the loan portfolio is well diversified. The total commercial portfolio was \$294,026,000 of which \$229,285,000 or 50.3% of total loans is secured by commercial real estate.

The largest relationship is a manufacturing/fabrication company and its related entities. The company has a long history of successful operations dating back to 1980. The relationship had outstanding loan balances and unused commitments of \$8,741,000 at March 31, 2014. The debt consists of approximately \$6,246,000 in term debt secured by various real estate holdings, and approximately \$2,495,000 in operating lines of credit secured by business assets and guaranties.

The second largest relationship consists of \$8,387,000 in a tax free loan and an unused commitment to a municipality founded in 1816 consisting of 35 square miles. According to township officials, the population has been increasing steadily since 2001 and is currently in excess of 11,000 people. In 2012, the township completed its \$74,000,000 sewer expansion project. The Bank's loan is secured by project receivables and the full faith, credit, and taxing power of the township.

The third largest relationship is a real estate development company and its related entities, specializing in the design, construction, and management of multi-tenant residential housing. The company was established in the late 1980s with its primary market being the Corporation's immediate central market area. The relationship had outstanding loan balances and unused commitments of \$8,299,000 at March 31, 2014. The debt consists of approximately \$5,337,000 in term debt secured by various real estate holdings, and approximately \$2,962,000 in lines of credit secured by various real estate holdings. The loans are secured primarily by income producing multi-tenant real estate.

The fourth largest relationship consists of outstanding loan balances and unused commitments of \$7,972,000 after participation shares sold of \$2,518,000. This relationship is comprised of several first lien mortgages relating to office and professional rental properties and a \$5,000,000 line of credit to a planned residential community. The principal and related companies have been involved in real estate development since 1974, and have successfully developed residential communities, medical office facilities, and professional office facilities. The entire relationship is secured by a combination of first lien mortgages and marketable securities.

The fifth largest relationship is comprised of various real estate entities, which are owned by an individual who began real estate investment and development activities in 1989. The relationship had outstanding loan balances and unused commitments of \$7,742,000 at March 31, 2014. This individual owns a diverse mix of real estate entities which specialize in construction/development projects, leasing of commercial office space, and rental of multi-tenant residential units. The relationship is comprised of \$4,582,000 in long term debt, a \$2,160,000 construction mortgage, and a \$1,000,000 line of credit. The relationship is well secured by first lien mortgages on income producing commercial and residential real estate, plus the collateral pledge of cash accounts and marketable securities.

Each of the aforementioned relationships is located within the Corporation's market area.

Each of the aforementioned loans are paying as agreed and none of the loans are considered criticized or classified. The property securing each of the loans was appraised at the time the loan was originated. Appraisals are ordered independently of the loan approval process from appraisers on an approved list. All appraisals are reviewed internally for conformity with accepted standards of the Bank.

All loan relationships in excess of \$1,500,000 are reviewed internally and through an external loan review process on an annual basis. Such review is based upon analysis of current financial statements of the borrower, co-borrowers/guarantors, payment history, and economic conditions.

Overall, the portfolio risk profile as measured by loan grade is considered low risk, as \$448,733,000 or 98.5% of total loans are graded Pass; \$1,321,000 or 0.3% are graded Special Mention; \$5,437,000 or 1.2% are graded Substandard; and \$0 are graded Doubtful. The rating is intended to represent the best assessment of risk available at a given point in time, based upon a review of the borrower's financial statements, credit analysis, payment history with the Bank, credit history and lender knowledge of the borrower. See Note 4 — Loans and Allowance for Loan Losses for risk grading tables.

Overall, non-pass grades increased slightly at March 31, 2014 to \$6,758,000 as compared to \$6,698,000 at December 31, 2013. Commercial and Industrial non-pass grades increased to \$156,000 as of March 31, 2014 as compared to \$86,000 as of December 31, 2013. Commercial Real Estate non-pass grades decreased to \$5,355,000 as of March 31, 2014 as compared to \$5,499,000 as of December 31, 2013. The Residential Real Estate and Consumer Loans non-pass grades increased to \$1,247,000 as of March 31, 2014 as compared to \$1,113,000 as of December 31, 2013.

The Corporation continues to internally underwrite each of its loans to comply with prescribed policies and approval levels established by its Board of Directors.

Total Loans

(Dollars in thousands)	March 31, 2014	December 31, 2013
Commercial and Industrial	\$ 64,741	\$ 60,822
Commercial Real Estate	229,285	225,405
Residential Real Estate	156,450	154,675
Consumer	5,435	5,616
Total loans	\$ 455,911	\$ 446,518

ALLOWANCE FOR LOAN LOSSES

The allowance for loan losses constitutes the amount available to absorb losses within the loan portfolio. As of March 31, 2014, the allowance for loan losses was \$6,477,000 as compared to \$6,519,000 as of December 31, 2013. The allowance for loan losses is established through a provision for loan losses charged to expenses. Loans are charged against the allowance for possible loan losses when management believes that the collectability of the principal is unlikely. The risk characteristics of the loan portfolio are managed through the various control processes, including credit evaluations of individual borrowers, periodic reviews, and diversification by industry. Risk is further mitigated through the application of lending procedures such as the holding of adequate collateral and the establishment of contractual guarantees.

Management performs a quarterly analysis to determine the adequacy of the allowance for loan losses. The methodology in determining adequacy incorporates specific and general allocations together with a risk/loss analysis on various segments of the portfolio according to an internal loan review process. This assessment results in an allocated allowance. Management maintains its loan review and loan classification standards consistent with those of its regulatory supervisory authority.

Management considers, based upon its methodology, that the allowance for loan losses is adequate to cover foreseeable future losses. However, there can be no assurance that the allowance for loan losses will be adequate to cover significant losses, if any, that might be incurred in the future.

The Analysis of Allowance for Loan Losses table contains an analysis of the allowance for loan losses indicating charge-offs and recoveries for the three month periods ended March 31, 2014 and 2013. For the first three months of 2014, net charge-offs as a percentage of average loans was 0.04% as compared to 0.06% for the three month period ended March 31, 2013. Net charge-offs amounted to \$175,000 for the first three months of 2014 as compared to \$270,000 for the first three months of 2013. The decrease in net charge-offs in the first three months of 2014 as compared to the first three months of 2013 related primarily to decreased losses in Commercial and Residential Real

Estate loans. During the first three months of 2014, \$171,000 in Commercial and Residential Real Estate loans were charged off as compared to \$277,000 for the first three months of 2013.

For the first three months of 2014, the provision for loan losses was \$133,000 as compared to \$400,000 for the first three months of 2013. The provision, net of charge-offs and recoveries, increased the quarter end Allowance for Loan Losses to \$6,477,000 of which 12.7% was attributed to the Commercial and Industrial component; 50.9% attributed to the Commercial Real Estate component; 24.2% attributed to the Residential Real Estate component (primarily residential mortgages); 0.8% attributed to the Consumer component; and 11.4% being the unallocated component (refer to the activity in the allowance for loan losses table in Note 4 – Loans and Allowance for Loan Losses on page 14). The Corporation determined that the provision for loan losses made during the current quarter was sufficient to maintain the allowance for loan losses at a level necessary for the probable losses inherent in the loan portfolio as of March 31, 2014.

Analysis of Allowance for Loan Losses*(Dollars in thousands)*

	March 31, 2014	March 31, 2013		
Balance at beginning of period	\$ 6,519	\$ 5,772		
Charge-offs:				
Commercial and Industrial	7			
Real Estate – Commercial and Residential	171	277		
Consumer	8	5		
	186	282		
Recoveries:				
Commercial and Industrial	2	11		
Real Estate – Commercial and Residential	9			
Consumer		1		
	11	12		
Net charge-offs	175	270		
Additions charged to operations	133	400		
Balance at end of period	\$ 6,477	\$ 5,902		
Ratio of net charge-offs during the period to average loans outstanding during the period	0.04	%	0.06	%
Allowance for loan losses to average loans outstanding during the period	1.43	%	1.37	%

It is the policy of management and the Corporation's Board of Directors to make a provision for both identified and unidentified losses inherent in its loan portfolio. A provision for loan losses is charged to operations based upon an evaluation of the potential losses in the loan portfolio. This evaluation takes into account such factors as portfolio concentrations, delinquency trends, trends of non-accrual and classified loans, economic conditions, and other relevant factors.

The loan review process, which is conducted quarterly, is an integral part of the Bank's evaluation of the loan portfolio. A detailed quarterly analysis to determine the adequacy of the Corporation's allowance for loan losses is reviewed by the Board of Directors.

With the Bank's manageable level of net charge-offs and the additions to the reserve from the provision out of operations, the allowance for loan losses as a percentage of average loans amounted to 1.43% at March 31, 2014 and 1.37% at March 31, 2013.

NON-PERFORMING ASSETS

The tables on page 34 detail the Corporation's non-performing assets and impaired loans as of the dates indicated. Generally, a loan is classified as non-accrual and the accrual of interest on such a loan is discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectability of principal or interest, even though the loan currently is performing. A loan may remain on accrual status if it is in the process of collection and is either guaranteed or well secured. When a loan is placed on non-accrual status, unpaid interest credited to income in the current year is reversed and unpaid interest accrued in prior years is charged against current period income. A modification of a loan constitutes a troubled debt restructuring ("TDR") when a borrower is experiencing financial difficulty and the modification constitutes a concession that the Corporation would not otherwise consider. Modifications to loans classified as TDRs generally include reductions in contractual interest rates, principal deferments and extensions of maturity dates at a stated interest rate lower than the current market for a new loan with similar risk characteristics. While unusual, there may be instances of loan principal forgiveness. Foreclosed assets held for resale represent property acquired through foreclosure, or considered to be an in-substance foreclosure.

Total non-performing assets amounted to \$4,525,000 as of March 31, 2014 as compared to \$4,349,000 as of December 31, 2013. The economy, in particular, high unemployment, weak job markets, unsettled fuel prices, rising energy costs, and the continued slowness in the housing industry had a direct effect on the Corporation's non-performing assets. The Corporation is closely monitoring its Commercial Real Estate portfolio because of the current economic environment. In particular, vacancy rates are rising and rents and property values in some markets have fallen. Non-accrual loans totaled \$3,800,000 as of March 31, 2014 as compared to \$3,551,000 as of December 31, 2013. Foreclosed assets held for resale decreased to \$440,000 as of March 31, 2014 from \$480,000 as of December 31, 2013. Loans past-due 90 days or more and still accruing interest amounted to \$285,000 as of March 31, 2014 as compared to \$318,000 as of December 31, 2013. These loans are deemed to be well secured and in the process of collection and consist of three commercial loans and one residential mortgage loan, all well secured by various forms of collateral. Non-performing assets to total loans was 1.0% as of March 31, 2014 and December 31, 2013. Non-performing assets to total assets was 0.5% as of March 31, 2014 and December 31, 2013. The allowance for loan losses to total non-performing assets was 143.1% as of March 31, 2014 as compared to 149.9% as of December 31, 2013. Additional detail can be found on Page 34 in the Non-Performing Assets and Impaired Loans tables and Page 18 in the Financing Receivables on Non-Accrual Status table. Asset quality is a priority and the Corporation retains a full-time loan review officer to closely track and monitor overall loan quality, along with a full-time workout specialist to manage collection and liquidation efforts.

Impaired loans were \$6,264,000 at March 31, 2014 and \$5,974,000 at December 31, 2013. The largest impaired loan is a purchased participation loan which is secured by commercial real estate. The Corporation's participation share of the loan balance is \$1,413,000. The year-end collateral evaluation carried a value of \$5,813,000, after considering an estimated cost to sell of 40% and considering the total participation outstanding note balance, resulting in the Corporation's specific allocation of \$0. The second largest impaired loan relationship, which is a performing loan, is represented by one loan carrying a balance of \$912,000 secured by commercial real estate. The year-end valuation carried a value of \$1,012,000, after an estimated cost to sell of 56%, resulting in a specific allocation of \$0. The third largest impaired loan relationship, which is a performing loan, is represented by two loans carrying a balance of \$604,000 secured by commercial real estate. The year-end valuation carried a value of \$1,011,000, after an estimated cost to sell of 10%, resulting in a specific allocation of \$0. The estimated cost to sell percentage is determined based upon the market area in which the real estate securing the loan is located, among other factors, and therefore can differ from one loan to another. Of the \$6,264,000 impaired loans, none are located outside our primary market area.

Loans categorized as TDRs carried an unpaid balance of \$4,001,000 as of March 31, 2014 as compared to \$3,961,000 as of December 31, 2013. The increase was attributable to deterioration in the respective borrowers' financial position, and in some cases a declining collateral value, along with the Bank's proactive monitoring of the loan portfolio resulting in the identification of additional loans classified as TDRs. Of the thirteen restructured loans at March 31, 2014, one loan is classified in the Commercial and Industrial portfolio, eleven loans are classified in the Commercial Real Estate portfolio, and one loan is classified in the Consumer portfolio. At March 31, 2014, six Commercial Real Estate loans classified as TDRs with a combined recorded investment of \$2,153,000 were not in compliance with the terms of their restructure, compared to March 31, 2013 when four Commercial Real Estate loans classified as TDRs with a combined recorded investment of \$432,000 were not in compliance with the terms of their restructure. The troubled debt restructurings at March 31, 2014 consisted of three term modifications beyond the original stated term, four interest rate modifications, and six payment modifications. TDRs are separately identified for impairment disclosures, and if necessary, a specific allocation is established. As of March 31, 2014, no specific allocations were attributable to the TDRs.

The Corporation's non-accrual loan valuation procedure for any loans greater than \$250,000 requires an appraisal to be obtained and reviewed annually at year end. A quarterly collateral evaluation is performed which may include a site visit, property pictures and discussions with realtors and other similar business professionals to ascertain current values.

For non-accrual loans less than \$250,000 upon classification and typically at year end, the Corporation completes a Certificate of Inspection, which includes the results of an onsite inspection, insured values, tax assessed values, recent sales comparisons and a review of the previous evaluations.

Improving loan quality is a priority. The Corporation actively works with borrowers to resolve credit problems and will continue its close monitoring efforts in 2014. Excluding the assets disclosed in the Non-Performing Assets and Impaired Loans tables on page 34 and the Troubled Debt Restructurings section in Note 4 — Loans and Allowance for Loan Losses, management is not aware of any information about borrowers' possible credit problems which cause serious doubt as to their ability to comply with present loan repayment terms.

Should the economic climate no longer continue to be stable or deteriorate further, borrowers may experience difficulty, and the level of impaired loans and non-performing assets, charge-offs and delinquencies could rise and possibly require additional increases in the Corporation's allowance for loan losses.

In addition, regulatory authorities, as an integral part of their examinations, periodically review the allowance for possible loan losses. They may require additions to allowances based upon their judgments about information available to them at the time of examination.

A concentration of credit exists when the total amount of loans to borrowers, who are engaged in similar activities that are similarly impacted by economic or other conditions, exceed 10% of total loans. As of March 31, 2014 and December 31, 2013, management is of the opinion that there were no loan concentrations exceeding 10% of total loans.

(Dollars in thousands)	March 31, 2014	December 31, 2013		
Non-performing assets				
Non-accrual loans	\$ 3,800	\$ 3,551		
Foreclosed assets held for resale	440	480		
Loans past-due 90 days or more and still accruing interest	285	318		
Total non-performing assets	\$ 4,525	\$ 4,349		
Impaired loans				
Non-accrual loans	\$ 3,800	\$ 3,551		
Accruing TDRs	2,464	2,423		
Total impaired loans	6,264	5,974		
Allocated allowance for loan losses		(140)

Impaired loans with a valuation allowance	\$	\$ 275		
Impaired loans without a valuation allowance	6,264	5,699		
Total impaired loans	\$ 6,264	\$ 5,974		
Valuation allowance related to impaired loans	\$	\$ 140		
Allocated valuation allowance as a percent of impaired loans	0.0	%	2.3	%
Impaired loans to total loans	1.4	%	1.3	%
Non-performing assets to total loans	1.0	%	1.0	%
Non-performing assets to total assets	0.5	%	0.5	%
Allowance for loan losses to impaired loans	103.4	%	109.1	%
Allowance for loan losses to total non-performing assets	143.1	%	149.9	%

Real estate mortgages comprise 84.6% of the loan portfolio as of March 31, 2014, as compared to 85.1% as of December 31, 2013. Real estate mortgages consist of both residential and commercial real estate loans. The real estate loan portfolio is well diversified in terms of borrowers, collateral, interest rates, and maturities. Also, the residential real estate loan portfolio is largely fixed rate mortgages. The real estate loans are concentrated primarily in our market area and are subject to risks associated with the local economy. The commercial real estate loans typically reprice approximately every three to five years and are also concentrated in our market area. The Corporation's loss exposure

on its impaired loans continues to be mitigated by collateral positions on these loans. The allocated allowance for loan losses associated with impaired loans is generally computed based upon the related collateral value of the loans. The collateral values are determined by recent appraisals, but are generally discounted by management based on historical dispositions, changes in market conditions since the last valuation and management's expertise and knowledge of the borrower and the borrower's business.

DEPOSITS AND OTHER BORROWED FUNDS

Consumer and commercial retail deposits are attracted primarily by the Bank's eighteen full service office locations. The Bank offers a broad selection of deposit products and continually evaluates its interest rates and fees on deposit products. The Bank regularly reviews competing financial institutions interest rates, especially when establishing interest rates on certificates of deposit.

Total deposits decreased \$20,550,000 to \$669,525,000 as of March 31, 2014 as non-interest bearing deposits increased by \$4,494,000 and interest bearing deposits decreased by \$25,044,000 from year-end 2013. Total deposits decreased due to the withdrawal of funds by a municipal depositor through normal, seasonal use of funds. In addition, certain national market jumbo certificates of deposit matured and were not renewed. Total short-term and long-term borrowings increased to \$119,061,000 as of March 31, 2014, from \$108,662,000 at year-end 2013, an increase of \$10,399,000, or 9.6%. Total borrowings increased due to fund growth in the loan portfolio and to support a small increase in the investment portfolio.

Other liabilities decreased from \$3.4 million as of December 31, 2013 to \$495,000 as of March 31, 2014. At December 31, 2013, the Corporation committed to purchase \$2.9 million in investment securities, which settled in January of 2014.

CAPITAL STRENGTH

Normal increases in capital are generated by net income, less dividends paid out. During the first three months of the year, net income less dividends paid increased capital by \$863,000. Accumulated other comprehensive income (loss) derived from net unrealized gains (losses) on investment securities available-for-sale also impacts capital. At December 31, 2013, accumulated other comprehensive income (loss) was \$(54,000). Accumulated other comprehensive income stood at \$2,260,000 at March 31, 2014, an increase of \$2,314,000. Fluctuations in interest rates have regularly impacted the gain/loss position in the Bank's investment portfolio, as well as its decision to sell securities at a gain or loss. In order to protect the Bank from market risk in the event of further interest rate increases, the Bank chose to sell a portion of its securities during the first quarter of 2014 at an overall net gain of \$597,000. These fluctuations from net unrealized gains (losses) on investment securities available-for-sale do not affect regulatory capital.

The Corporation held 235,149 shares of common stock at March 31, 2014 and December 31, 2013, as treasury stock. This had an effect of reducing our total stockholders' equity by \$5,823,000 as of March 31, 2014 and December 31, 2013. Beginning in June 2012, the Corporation began issuing common stock for new shares purchased by participants in the Corporation's Dividend Reinvestment Program ("DRIP"). Prior to that, shares needed to fill purchase orders through the DRIP were acquired on the open market. This change was made to reduce the volatility in stock price, which occurred because of large quarterly purchases and to augment capital formation.

Total stockholders' equity was \$99,804,000 as of March 31, 2014, and \$96,351,000 as of December 31, 2013. Leverage ratio and risk based capital ratios remain very strong. As of March 31, 2014, our leverage ratio was 8.99% compared to 8.87% as of December 31, 2013. In addition, Tier I risk based capital and total risk based capital ratio as of March 31, 2014, were 13.98% and 15.22%, respectively. The same ratios as of December 31, 2013 were 13.68% and 14.92%, respectively.

LIQUIDITY

The Corporation's objective is to maintain adequate liquidity to meet funding needs at a reasonable cost and to provide contingency plans to meet unanticipated funding needs or a loss of funding sources, while minimizing interest rate risk. Adequate liquidity provides resources for credit needs of borrowers, for depositor withdrawals and for funding corporate operations.

Sources of liquidity are as follows:

- Growth in the core deposit base;
- Proceeds from sales or maturities of investment securities;
- Payments received on loans and mortgage-backed securities;
- Overnight correspondent bank borrowings on various credit lines; and,
- Borrowing capacity available from the FHLB.

Managing liquidity remains an important segment of asset/liability management. The overall liquidity position of the Corporation is maintained by an active asset/liability management committee. The Corporation believes that its core deposits are stable even in periods of changing interest rates. Liquidity and funds management are governed by policies and are measured on a monthly basis. These measurements indicate that liquidity generally remains stable and exceeds the Corporation's minimum defined levels of adequacy. Other than the trends of continued competitive pressures and volatile interest rates, there are no known demands, commitments, events or uncertainties that will result in, or that are reasonably likely to result in, liquidity increasing or decreasing in any material way.

MARKET RISK

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, exchange rates and equity prices. The Corporation's market risk is composed primarily of interest rate risk. The Corporation's interest rate risk results from timing differences in the repricing of assets, liabilities, off-balance sheet instruments, and changes in relationships between rate indices and the potential exercise of explicit or embedded options.

Increases in the level of interest rates also may adversely affect the fair value of the Corporation's securities and other earning assets. Generally, the fair value of fixed-rate instruments fluctuates inversely with changes in interest rates. As a result, increases in interest rates could result in decreases in the fair value of the Corporation's interest-earning assets, which could adversely affect the Corporation's results of operations if sold, or, in the case of interest-earning assets classified as available-for-sale, the Corporation's stockholders' equity, if retained. Under FASB ASC 320-10, *Investment Debt and Equity Securities*, changes in the unrealized gains and losses, net of taxes, on securities classified as available-for-sale are reflected in the Corporation's stockholders' equity. The Corporation does not own any trading assets.

Asset/Liability Management

The principal objective of asset/liability management is to manage the sensitivity of the net interest margin to potential movements in interest rates and to enhance profitability through returns from managed levels of interest rate risk. The Corporation actively manages the interest rate sensitivity of its assets and liabilities. Several techniques are used for measuring interest rate sensitivity. Interest rate risk arises from the mismatches in the repricing of assets and liabilities within a given time period, referred to as a rate sensitivity gap. If more assets than liabilities mature or reprice within the time frame, the Corporation is asset sensitive. This position would contribute positively to net interest income in a rising rate environment. Conversely, if more liabilities mature or reprice, the Corporation is liability sensitive. This position would contribute positively to net interest income in a falling rate environment. The Corporation's cumulative gap at one year indicates the Corporation is liability sensitive.

Earnings at Risk

The Bank's Asset/Liability Committee ("ALCO") is responsible for reviewing the interest rate sensitivity position and establishing policies to monitor and limit exposure to interest rate risk. The guidelines established by ALCO are reviewed by the Corporation's Board of Directors. The Corporation recognizes that more sophisticated tools exist for measuring the interest rate risk in the balance sheet beyond interest rate sensitivity gap. Although the Corporation continues to measure its interest rate sensitivity gap, the Corporation utilizes additional modeling for interest rate risk

in the overall balance sheet. Earnings at risk and economic values at risk are analyzed.

Earnings simulation modeling addresses earnings at risk and net present value estimation addresses economic value at risk. While each of these interest rate risk measurements has limitations, taken together they represent a reasonably comprehensive view of the magnitude of interest rate risk in the Corporation.

Earnings Simulation Modeling

The Corporation's net income is affected by changes in the level of interest rates. Net income is also subject to changes in the shape of the yield curve. For example, a flattening of the yield curve would result in a decline in earnings due to the compression of earning asset yields and increased liability rates, while a steepening would result in increased earnings as earning asset yields widen.

Earnings simulation modeling is the primary mechanism used in assessing the impact of changes in interest rates on net interest income. The model reflects management's assumptions related to asset yields and rates paid on liabilities, deposit sensitivity, size and composition of the balance sheet. The assumptions are based on what management believes at that time to be the most likely interest rate environment. Earnings at risk is the change in net interest income from a base case scenario under various scenarios of rate shock increases and decreases in the interest rate earnings simulation model.

The table on page 37 presents an analysis of the changes in net interest income and net present value of the balance sheet resulting from various increases or decreases in the level of interest rates, such as two percentage points (200 basis points) in the level of interest rates. The calculated estimates of change in net interest income and net present value of the balance sheet are compared to current limits approved by ALCO and the Board of Directors. The earnings simulation model projects net interest income would decrease 7.9%, 16.2% and 25.0% in the 100, 200 and 300 basis point increasing rate scenarios presented. In addition, the earnings simulation model projects net interest income would decrease 3.8% and 9.4% in the 100 and 200 basis point decreasing rate scenarios presented. All of these forecasts are within the Corporation's one year policy guidelines.

The analysis and model used to quantify the sensitivity of net interest income becomes less reliable in a decreasing rate scenario given the current unprecedented low interest rate environment with federal funds trading in the 0 – 25 basis point range. Results of the decreasing basis point declining scenarios are affected by the fact that many of the Corporation's interest-bearing liabilities are at rates below 1% and therefore cannot decline 100 or more basis points. However, the Corporation's interest-sensitive assets are able to decline by these amounts. For the three months ended March 31, 2014, the cost of interest-bearing liabilities averaged 0.59%, and the yield on average interest-earning assets, on a fully taxable equivalent basis, averaged 3.99%.

Net Present Value Estimation

The net present value measures economic value at risk and is used for helping to determine levels of risk at a point in time present in the balance sheet that might not be taken into account in the earnings simulation model. The net present value of the balance sheet is defined as the discounted present value of asset cash flows minus the discounted present value of liability cash flows. At March 31, 2014, the 100 and 200 basis point immediate decreases in rates are estimated to affect net present value with a decrease of 2.0% and 10.0%, respectively. Additionally, net present value is projected to decrease 12.0%, 27.0% and 47.0% in the 100, 200 and 300 basis point immediate increase scenarios, respectively. All scenarios presented are below the Corporation's policy limits, with an exception in the 300 basis point immediate increase scenario which exceeds the policy of 40.0% by 7.0%.

The computation of the effects of hypothetical interest rate changes are based on many assumptions. They should not be relied upon solely as being indicative of actual results, since the computations do not contemplate actions management could undertake in response to changes in interest rates.

Effect of Change in Interest Rates

	Projected Change	
Effect on Net Interest Income		
1-Year Net Income Simulation Projection		
+300 bp Shock vs. Stable Rate	(25.0)%
+200 bp Shock vs. Stable Rate	(16.2)%
+100 bp Shock vs. Stable Rate	(7.9)%
Flat rate		
-100 bp Shock vs. Stable Rate	(3.8)%
-200 bp Shock vs. Stable Rate	(9.4)%
Effect on Net Present Value of Balance Sheet		
Static Net Present Value Change		
+300 bp Shock vs. Stable Rate	(47.0)%

Edgar Filing: FIRST KEYSTONE CORP - Form 10-Q

+200 bp Shock vs. Stable Rate	(27.0)%
+100 bp Shock vs. Stable Rate	(12.0)%
Flat rate		
-100 bp Shock vs. Stable Rate	(2.0)%
-200 bp Shock vs. Stable Rate	(10.0)%

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Information with respect to quantitative and qualitative disclosures about market risk is included in the information under Management's Discussion and Analysis in Item 2.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. First Keystone Corporation maintains disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended) designed to ensure that information required to be disclosed in the reports that the Corporation files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified a) in the rules and forms of the Securities and Exchange Commission. Based upon their evaluation of those disclosure controls and procedures performed as of the end of the period covered by this report, the Chief Executive Officer and Chief Financial Officer of the Corporation concluded that the Corporation's disclosure controls and procedures were effective as of March 31, 2014.

Changes in internal control over financial reporting. There were no changes in the Corporation's internal control b) over financial reporting during the fiscal quarter ended March 31, 2014, that materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

Although the Corporation is subject to various claims and legal actions that occur from time to time in the ordinary course of business, the Corporation is not party to any pending legal proceedings that management believes could have a material adverse effect on its business, results of operations, financial condition or cash flows.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in Item 1A “Risk Factors” in the Corporation’s Annual Report on Form 10-K for the year ended December 31, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
Jan. 1 — Jan. 31, 2014				120,000
Feb. 1 — Feb. 28, 2014				120,000
March 1 — March 31, 2014				120,000
Total				120,000

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.
