## INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders  
Taiwan Semiconductor Manufacturing Company Ltd.

We have audited the accompanying balance sheets of Taiwan Semiconductor Manufacturing Company Ltd. as of December 31, 2004 and 2003, and the related statements of income, changes in shareholders' equity and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the Rules Governing the Audit of Financial Statements by Certified Public Accountants, and auditing standards generally accepted in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Taiwan Semiconductor Manufacturing Company Ltd. as of December 31, 2004 and 2003, and the results of its operations and its cash flows for the years then ended in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China.

We have also audited the consolidated financial statements of Taiwan Semiconductor Manufacturing Company Ltd. as of and for the years ended December 31, 2004 and 2003, and have expressed an unqualified opinion on such financial statements.

(January 13, 2005 (January 30, 2005 as to Note 20m))

### Notice to Readers

*The accompanying financial statements are intended only to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdiction. The standards, procedures and practices to audit such financial statements are those generally accepted and applied in the Republic of China.*

*For the convenience of readers, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.*

**1. ORGANIZATION AND OPERATIONS**

Taiwan Semiconductor Manufacturing Company Ltd. (the Company or TSMC), a Republic of China (R.O.C.) corporation, was incorporated as a venture among the Government of the R.O.C., acting through the Development Fund of the Executive Yuan; Philips Electronics N.V. and certain of its affiliates (Philips); and certain other private investors. On September 5, 1994, its shares were listed on the Taiwan Stock Exchange (TSE). On October 8, 1997, TSMC listed some of its shares of stock on the New York Stock Exchange (NYSE) in the form of American Depositary Shares (ADSs).

The Company is engaged mainly in the manufacturing, selling, packaging, testing and computer-aided designing of integrated circuits and other semiconductor devices and the manufacturing of masks.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The financial statements are presented in conformity with Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the R.O.C.

For the convenience of readers, the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the R.O.C. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language financial statements shall prevail.

Significant accounting policies are summarized as follows:

**Use of Estimates**

The preparation of financial statements in conformity with the aforementioned guidelines and principles requires management to make reasonable assumptions and estimates of matters that are inherently uncertain. The actual results may differ from management's estimates.

**Classification of Current and Noncurrent Assets and Liabilities**

Current assets are those expected to be converted to cash, sold or consumed within one year from the balance sheet date. Current liabilities are obligations due on demand within one year from the balance sheet date. Assets and liabilities that are not classified as current are noncurrent assets and liabilities, respectively.

**Cash Equivalents**

Government bonds under repurchase agreements and notes acquired with maturities less than three months from the date of purchase are classified as cash equivalents.

**Short-term Investments**

Short-term investments primarily consist of corporate bonds, asset-backed securities, bond funds, agency bonds, government bonds and others.

- 8 -

---

Short-term investments are recorded at historical cost and are carried at the lower of cost or market value as of the balance sheet date. An allowance for decline in value is provided and is charged to current earnings when the aggregate carrying value of the investments exceeds the aggregate market value. A reversal of the allowance is recorded for a subsequent recovery of the market value.

The cost of funds and listed stocks sold are counted for using the weighted-average method; whereas the other securities are accounted for using the specific identification method.

The market value of funds is determined using the net asset value of the funds at the end of the year, and the market value of listed stocks is determined using the average-closing price of the listed stocks for the last month of the year. The others are determined using the average of bid and ask prices as of the balance sheet date.

Cash dividends are recorded as investment income in the current year.

### **Allowance for Doubtful Receivables**

An allowance for doubtful receivables is provided based on a review of the collectibility of accounts receivables. The Company determines the amount of allowance for doubtful accounts by examining the historical collection experience and current trends in the credit quality of its customers as well as its internal credit policies.

### **Revenue Recognition and Allowance for Sales Returns and Others**

The Company recognizes net sales when the earnings process is complete, as evidenced by an agreement with the customer, transfer of title and acceptance, if applicable, have occurred, as well as the price is fixed or determinable price and the collectibility is reasonably assured. Allowance for sales returns and pricing discounts is estimated based on historical experience and any known factors that would affect the allowance. Such provisions are deducted from sales in the year the products are sold and the estimated related costs are deducted from cost of sales.

Sales are determined using the fair value taking into account related sales discounts agreed to by the Company and its customers. Sales agreements typically provide that payment is due 30 days from invoice date for a majority of the customers and 30 to 45 days after the end of the month in which the sales occur for some customers. Since the receivables from sales are collectible within one year and such transactions are frequent, the fair value of receivables is equivalent to the nominal amount of cash received.

### **Inventories**

Inventories are stated at the lower of cost or market value. Inventories are recorded at standard cost and adjusted to the approximate weighted-average cost at the end of the year. Market value represents replacement cost for raw materials, supplies and spare parts. Market value represents net realizable value for finished goods and work in process. The Company assesses the impact of changing technology on its inventory on hand and writes off inventories that are considered obsolete. Ending inventories are evaluated for estimated excess quantities and obsolescence based on demand forecast within a specific time horizon, generally 180 days or less, and the estimated losses on scrap and slow-moving items are recognized in the allowance for losses.

## Long-term Investments

Investments in companies wherein the Company exercises significant influence on the operating and financial policy decisions are accounted for using the equity method of accounting. The Company's proportionate share in the net income or net loss of investee companies is recognized in the investment income/loss recognized by equity method, net account. When equity investments are made, the difference, if any, between the cost of investment and the Company's proportionate share of the investee's net equity is amortized using the straight-line method over five years and is also recorded in the investment income/loss recognized by equity method, net account.

When the Company subscribes to additional investee shares at a percentage different from its existing equity interest, the resulting carrying amount of the investment in the investee differs from the amount of Company's proportionate share in the investee's net equity. The Company records such difference as an adjustment to long-term investments with the corresponding amount charged or credited to capital surplus.

Investments in companies wherein the Company does not exercise significant influence are recorded at historical cost. Cash dividends are recognized as dividend income in the year received but are accounted for as reductions in the carrying amount of the long-term investments if the dividends are received in the same year that the related investments are acquired. Stock dividends are recorded as an increase in the number of shares held and do not affect investment income or the carrying amount of the investment. An allowance is recognized for any decline in the market value of investments with readily ascertainable fair market value with the corresponding amount recorded as an unrealized loss, a component of shareholders' equity. A reversal of the allowance will result from a subsequent recovery of the market value of such investments. The carrying amounts of investments whose fair market values are not readily ascertainable are reduced to reflect an other-than-temporary decline in their values, with the related impairment loss charged to income.

Investments in foreign mutual funds are stated at the lower of aggregate cost or net asset value. An allowance is recognized when the net asset value of the funds is lower than their cost, with the corresponding amount recorded as a reduction to shareholders' equity. A reversal of the allowance will result from a subsequent recovery of the net asset value.

The costs of stocks and mutual funds sold are determined using the weighted-average method.

Investments in long-term bonds are stated at amortized cost. The discount or premium is amortized over the duration period using the interest method, and recorded as an adjustment to interest income.

When investments in publicly-traded stocks are reclassified from short-term investments to long-term investments or from long-term investments to short-term investments, the Company recognizes a loss to the extent, if any, that the market value of such investments is lower than the carrying amount, and the market value becomes the new basis.

If an investee company recognizes an unrealized loss on its long-term investment using the lower-of-cost-or-market method, the Company also recognizes a corresponding unrealized loss in proportion to its ownership percentage in the investee company and records the amount as a component of its shareholders' equity.

Gains or losses on sales from the Company to investee companies accounted for using the equity method are deferred in proportion to the Company's ownership percentage in the investee companies until realized through transactions with third parties. The entire amount of the gains or losses on sales to majority-owned subsidiaries is deferred until such gains or losses are realized through the subsequent sales of the related products to third parties.

Gains or losses on sales from investee companies to the Company are deferred in proportion to the Company's ownership percentages in the investee companies until realized through transactions with third parties.

- 10 -

---

If an investee's functional currency is a foreign currency, translation adjustments will result from the process of translating the investee's financial statements into the reporting currency of the Company. Such adjustments are accumulated and reported as a separate component of shareholders' equity.

### **Property, Plant and Equipment, Assets Leased to Others and Idle Assets**

Property, plant and equipment and assets leased to others are stated at cost less accumulated depreciation. When an impairment is determined, the related assets are stated at the lower of fair value or book value. Idle assets are stated at the lower of net realizable value or book value. Significant additions, renewals and betterments incurred during the construction period are capitalized. Maintenance and repairs are expensed in the year incurred. Interest expense incurred during the purchase and construction period is also capitalized.

Depreciation is computed using the straight-line method over the following estimated service lives: buildings 10 to 20 years; machinery and equipment 5 years; and office equipment 3 to 5 years.

Upon sale or disposal of property, plant and equipment, the related cost and accumulated depreciation are removed from the corresponding accounts, with any gain or loss credited or charged to non-operating income or expenses in the year of sale or disposal.

### **Goodwill**

Goodwill represents the excess of the consideration paid for acquisition over the fair market value of identifiable net assets acquired and acquisition costs. Goodwill is amortized using the straight-line method over the estimated life of 10 years.

### **Deferred Charges**

Deferred charges consist of technology license fees, software and system design costs and other charges. The amounts are amortized as follows: technology license fees the shorter of the estimated life of the technology or the term of the technology transfer contract; software and system design costs and other charges 3 or 5 years.

### **Pension Costs**

The Company records net periodic pension costs on the basis of actuarial calculations. Unrecognized net transition obligation and unrecognized net gains or losses are amortized over 25 years.

### **Income Tax**

The Company uses an inter-period tax allocation method for income tax. Deferred income tax assets and liabilities are recognized for the tax effects of temporary differences and unused tax credits. Valuation allowances are provided to the extent, if any, that it is more likely than not that deferred income tax assets will not be realized. A deferred tax asset or liability is classified as current or noncurrent in accordance with the classification of its related asset or liability. However, if a deferred tax asset or liability does not relate to an asset or liability in the financial statements, then it is classified as either current or noncurrent based on the expected length of time before it is realized or settled.

Any tax credit arising from the purchases of machinery, equipment and technology, research and development expenditures, personnel training, and investments in important technology-based enterprises are recognized using the flow-through method.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.  
- 11 -

---

Income taxes on unappropriated earnings of 10% are expensed in the year of shareholder approval which is the year subsequent to the year the earnings are generated.

### **Stock-based Compensation**

Employee stock option plans that are amended or have options granted on or after January 1, 2004 must be accounted for by the interpretations issued by the Accounting Research and Development Foundation. The Company adopted the intrinsic value method and any compensation cost determined using this method is charged to expense over the employee vesting period.

### **Treasury Stock**

When the Company repurchases its outstanding common stock, the cost of the reacquired stock is recorded as treasury stock as a reduction to shareholders' equity. When the Company retires treasury stock, the treasury stock account is reduced and the common stock as well as the capital surplus—additional paid-in capital are reversed in proportionate to the equity percentage of the retirement. When the book value of the treasury stock exceeds the sum of the par value and additional paid-in capital, the difference is charged to capital surplus—treasury stock and to retained earnings for any remaining amount. The Company's stock held by its subsidiaries is also treated as treasury stock and reclassified from long-term investments to treasury stock. The cash dividends received by the subsidiaries from the Company are recorded under capital surplus—treasury stock.

### **Foreign Currency Transactions**

Foreign currency transactions are recorded in New Taiwan dollars at the rates of exchange in effect when the transactions occur. Exchange gains or losses derived from foreign currency transactions or monetary assets and liabilities denominated in foreign currencies are recognized in current income. At the end of each year, assets and liabilities denominated in foreign currencies are revalued at the prevailing exchange rates with the resulting gains or losses recognized in current income.

### **Derivative Financial Instruments**

The Company enters into foreign currency forward contracts to manage currency exposures in cash flow and in foreign-currency-denominated assets and liabilities. The contracts are recorded in New Taiwan dollars at the current rate of exchange of the contract date. The differences in the New Taiwan dollar amounts translated using the spot rates and the amounts translated using the contracted forward rates on the contract date are amortized over the terms of the forward contracts using the straight-line method. At the end of each year, the receivables or payables arising from forward contracts are restated using the prevailing spot rates at the balance sheet date with the resulting differences charged to income. In addition, the receivables and payables related to the forward contracts of the same counter party are netted with the resulting amount presented as either an asset or a liability. Any resulting gain or loss upon settlement is credited or charged to income in the year of settlement.

The Company enters into cross-currency swap contracts to manage currencies exposures on foreign currency denominated assets and liabilities. The principal amount is recorded using the spot rates at the contract date. The differences in the New Taiwan dollar amounts translated using the spot rates and the amounts translated using the contracted rates on the contract date are amortized over the terms of the contracts using the straight-line method. At the end of each year, the receivables or payables arising from cross-currency swap contracts are restated using the prevailing spot rate with the resulting differences charged to income. In addition, the receivables and payables related to the contracts are netted with the resulting amount presented as either an asset or a liability. The difference in interest computed pursuant to the contracts on each settlement date or the balance sheet date is recorded as an

adjustment to the interest income or expense associated with the hedged items. Any resulting gain or loss upon settlement is credited or charged to income in the year of settlement.

- 12 -

---

The Company enters into interest rate swap contracts to manage exposures to changes in interest rates on existing assets or liabilities. These transactions are accounted for on an accrual basis, in which the cash settlement receivable or payable is recorded as an adjustment to interest income or expense associated with the hedged items.

The premiums paid for the foreign currency option contracts entered into for hedging purposes are amortized and charged to income on a straight-line basis over the term of the related contract. Any resulting gain upon exercise settlement is credited or charged to income in the year of exercise.

The Company entered into investment management agreements with three well-known financial institutions (fund managers) to manage investment portfolios for the Company. In accordance with the investment guidelines and terms in these agreements, the securities invested by the fund managers cannot be below a pre-defined credit rating. As of December 31, 2004, the Company had investment portfolios with these fund managers that aggregated to an

original amount of US\$1,200,000 thousand. The investment portfolios included securities such as corporate bonds, asset-backed securities, agency bonds, government bonds and others. Securities acquired with maturities less than three months from the date of purchase were reclassified as cash equivalents.

On January 8, 2003, the Company's investee, VIS, issued 600,000 thousand shares of common stock at a price of NT\$7 per share of which the Company purchased a total of 230,882 thousand shares. VIS reduced its capital on August 11, 2004 in order to decrease its accumulated deficit. The number of shares of VIS held by the Company after the capital reduction declined from 787,016 thousand shares to 409,532 thousand shares. The Company's ownership percentage remained the same.

For the years ended December 31, 2004 and 2003, net investment income recognized from the equity method investees was NT\$4,040,319 thousand and NT\$791,424 thousand, respectively. The carrying amounts of investments accounted for under the equity method and the related investment income or losses were determined based on the audited financial statements of the investees as of and for the same periods as the Company.

As of December 31, 2004, other investments consist of the following:

During the year ended December 31, 2004, the Company deposited funds into structured-time deposits with the following terms:

The interest rate of the step-up callable deposits is determined by the Company and the related banks.

The amount of interest earned by the Company for the callable range accrual deposits is based on a pre-defined range as determined by the 3-month or 6-month LIBOR rate plus an agreed upon rate ranging between 2.1% and 3.45%. Based on the terms of the deposits, if the 3-month or 6-month LIBOR rate moves outside of the pre-defined range, the interest paid to the Company is at minimum of 1.5%. Under the term of contracts, the bank has the right to cancel the contracts before the maturity date.

Deposits that reside in Hong Kong and Singapore amounted to NT\$2,553,360 thousand and NT\$638,340 thousand, respectively.

**14. SHAREHOLDERS EQUITY****Common Stock, Capital Surplus and Earnings**

The Company has issued a total of 668,351 thousand ADSs which are traded on the NYSE as of December 31, 2004. The number of common shares represented by the ADSs is 3,341,754 thousand shares (one ADS represents five common shares).

Capital surplus can only be used to offset a deficit under the Company Law of the R.O.C. However, the capital surplus generated from donations and the excess of the issue price over the par value of capital stock (including the stock issued for new capital, mergers, convertible bonds and the surplus arising from treasury stock transactions) may be appropriated as stock dividends restricted to a certain percentage based on shareholders ownership.

As of December 31, 2004 and 2003, the capital surplus consisted of the following:

	<b>2004</b>	<b>2003</b>
From merger	\$ 24,003,546	\$ 24,132,297
Additional paid-in capital	23,051,675	23,172,550
From long-term investments	121,354	87,295
From convertible bonds	9,360,424	9,410,632
Donations	55	55
Treasury stock	205	53,056
	<b>\$ 56,537,259</b>	<b>\$ 56,855,885</b>

The Company's Articles of Incorporation as revised on December 21, 2004, provide that the following shall be appropriated from annual earnings to the extent that the annual earnings exceed any cumulative deficit:

- a. 10% legal reserve; until the amount of total legal reserve equals the Company's paid-in capital;
- b. Special reserve in accordance with relevant laws or regulations;
- c. Remuneration to directors and supervisors and bonuses to employees at 0.3% and at least 1% of the remainder, respectively. Individuals eligible for the employee bonuses may include employees of affiliated companies as approved by the board of directors or a representative of the board of directors;
- d. The appropriation of any remaining balance shall be approved by the shareholders.

Dividends may be distributed by way of cash dividend or stock dividend at the discretion of the Company. As the operation of the Company is at a steady growth stage, distribution of profits shall be made preferably by way of cash dividend. Distribution of profits may also be made by way of stock

dividend; provided however, the ratio for stock dividend shall not exceed 50% of total distribution.

Any appropriations of net income are recorded in the financial statements in the year of shareholder approval.

An appropriation for legal reserve is required until the reserve equals the aggregate par value of the Company's issued capital stock. The reserve can only be used to offset a deficit or be distributed as a stock dividend up to 50% of the reserve balance when the reserve balance has reached 50% of the aggregate par value of the issued capital stock of the Company.

A special reserve equivalent to the net debit balance of the other components of shareholder's equity (for example, unrealized loss on long-term investments and cumulative translation adjustments, but excluding treasury stock), shall be made from unappropriated earnings pursuant to existing regulations promulgated by the R.O.C. Securities and Futures Bureau (SFB). Any special reserve appropriated may be reversed to the extent that the net debit balance of the related account reverses.

The appropriations of the earnings of 2003 and 2002 were approved in the shareholders' meeting on May 11, 2004 and June 3, 2003, respectively. The appropriations and dividend per share are as follows:

	Appropriation of Earnings		Dividend Per Share	
			(NT\$)	
	For Fiscal Year 2003	For Fiscal Year 2002	For Fiscal Year 2003	For Fiscal Year 2002
Legal reserve	\$ 4,725,870	\$ 2,161,029		
Special reserve	(68,945)	68,945		
Bonus paid to employees in cash	681,628			
Bonus paid to employees in stock	2,726,514	1,539,013		
Preferred stock dividend in cash	184,493	455,000	\$ 0.35	\$ 0.35
Common stock dividend in cash	12,159,971		0.60	
Common stock dividend in stock	28,373,267	14,898,309	1.41	0.80
Remuneration to directors and supervisors in cash	127,805	58,485		
	\$ 48,910,603	\$ 19,180,781		

The amount of the above appropriation of earnings for 2003 and 2002 is consistent with the resolution of the meetings of board of directors on February 17, 2004 and March 4, 2003, respectively. However, the Company Law of the R.O.C. states TSMC, as a holder of treasury stock shall not participate in the appropriations of earnings. Therefore, the actual cash dividend per share and stock dividend per share are slightly more than those in the aforementioned resolution. If the above employee bonus paid in stock had been paid in cash and all of the bonus to employees and remuneration to directors and supervisors had been charged against income for 2003 and 2002, the after income tax basic earnings per share for the years ended December 31, 2003 and 2002 would have decreased from NT\$2.33 to NT\$2.15 and NT\$ 1.14 to NT\$1.05, respectively. The shares distributed as a bonus to employees represented 1.35% and 0.83% of the Company's total outstanding common shares as of December 31, 2003 and 2002, respectively.

As of January 13, 2005, the board of directors have not resolved the appropriation for earnings of 2004.

The above information about the appropriations of bonus to employees and remuneration to directors and supervisors is available at Market Observation System website.

Under the Integrated Income Tax System that became effective on January 1, 1998, the R.O.C. resident shareholders are allowed a tax credit for their proportionate share of the income tax paid by the Company on earnings generated since January 1, 1998.

### Preferred Stock

The Company issued 1,300,000 thousand shares of unlisted Series A preferred stock to certain investors on November 29, 2000. All of the preferred stock was redeemed at par value and retired on May 29, 2003. Under the Company's Articles of Incorporation, the Company is no longer authorized to issue preferred stock.

- 22 -

---

The preferred shareholders had the following rights and the related terms and conditions prior to redemption:

Preferred shareholders

- a. Are entitled to receive cumulative cash dividends at an annual rate of 3.5%.
- b. Are not entitled to receive any common stock dividends (whether declared out of unappropriated earnings or capital surplus).
- c. Have priority over the holders of common shares to the assets of TSMC available for distribution to shareholders upon liquidation or dissolution; however, the pre-emptive rights to the assets shall not exceed the issue price of the shares.
- d. Have voting rights similar to that of the holders of common shares.
- e. Have no right to convert their shares into common shares. The preferred shares are to be redeemed within thirty months from their issuance. The preferred shareholders have the aforementioned rights and the Company's related obligations remain the same until the preferred shares are redeemed by the Company.

## 15. STOCK-BASED COMPENSATION PLANS

The Company's Employee Stock Option Plans, the 2003 Plan and the 2002 Plan, were approved on October 29, 2003 and June 25, 2002, respectively. The maximum number of units authorized to be granted under 2003 Plan and the 2002 Plan is 120,000 thousand and 100,000 thousand, respectively, with each unit representing one common share of stock. The option rights may be granted to qualified employees of the Company or any of its domestic or foreign subsidiaries, in which the Company's shareholding with voting rights, directly or indirectly, is more than fifty percent (50%). The option rights of both plans are valid for ten years and exercisable at certain percentages subsequent to the second anniversary of the grant date. Under the terms of the plans, stock option rights are granted at an exercise price equal to the closing price of the Company's common shares listed on the TSE on the date of grant. Under the 2003 Plan and the 2002 Plan, units that were never granted, or had been granted and subsequently cancelled were expired as of December 31, 2004.

On November 2, 2004, the board of directors approved the 2004 Plan, in which the maximum number of units authorized to be granted is 11,000 thousand, with each unit representing one common share of stock. The option rights may be granted to qualified employees of the Company or any of its domestic or foreign subsidiaries, in which the Company's shareholding with voting rights, directly or indirectly, is more than fifty percent (50%). The option rights of the plans are valid for ten years and exercisable at certain percentages subsequent to the second anniversary of the grant date. Under the terms of the plan, stock option rights are granted at an exercise price equal to the closing price of the Company's common shares listed on the TSE on the date of grant. The 2004 plan was approved by Bureau of Monetary Affairs, Financial Supervisory Commission of the R.O.C. on January 6, 2005.

Information on outstanding stock options for the years ended December 31, 2004 and 2003 is as follows:

## 20. SIGNIFICANT COMMITMENTS AND CONTINGENCIES

The significant commitments and contingencies as of December 31, 2004 are as follows:

- a. On June 20, 2004, the Company and Philips revised the Technical Cooperation Agreement, which was originally signed on May 12, 1997, with an effective date from January 1, 2004 for five years. Upon expiration, this amended Technical Cooperation Agreement will be terminated at the expiration date and will not be automatically renewed. Under this amended Technical Cooperation Agreement, the Company will pay Philips royalties based on a fixed amounts mutually agreed-on, rather than under certain percentage of the Company's annual net sales. The Company and Philips agree to cross license the patents owned by each party. The Company also obtained through Philips a number of patent cross licenses.
- b. Under a technical cooperation agreement with ITRI, the Company shall reserve and allocate up to 35% of certain of its production capacity for use by the Ministry of Economic Affairs (MOEA) or any other party designated by the MOEA.

- c. Under several foundry agreements, the Company shall reserve a portion of its production capacity for certain major customers that have guarantee deposits with the Company. As of December 31, 2004, the Company had a total of US\$12,802 thousand of guarantee deposits.
  
- d. Under a Shareholders Agreement entered into with Philips and EDB Investments Pte Ltd. on March 30, 1999, the parties formed a joint venture company, SSMC, for the purpose of constructing an integrated circuit foundry in Singapore. As of December 31, 2004, the Company's equity interest in SSMC was 32%. The Company and Philips committed to buy specific percentages of the production capacity of SSMC. If any party defaults on the commitment and the capacity utilization of SSMC falls below a specific percentage of its total capacity, the defaulting party is required to compensate SSMC for all related unavoidable costs.
  
- e. The Company provides technical services to SSMC under a Technical Cooperation Agreement (the Agreement) entered into on May 12, 1999. The Company receives compensation for such services computed at a specific percentage of net selling price of certain products sold by SSMC. The Agreement shall remain in force for ten years and may be automatically renewed for successive periods of five years each unless pre-terminated by either party under certain conditions.
  
- f. Under a Technology Transfer Agreement (TTA) with National

Semiconductor Corporation (National) entered into on June 27, 2000, the Company shall receive payments for the licensing of certain technology to National. The agreement was to remain in force for ten years and could be automatically renewed for successive periods of two years thereafter unless either party gives notice for early termination under certain conditions. In January 2003, the Company and National entered into a Termination Agreement whereby the TTA was terminated for convenience. Under the Termination Agreement, the Company will be relieved of any further obligation to transfer any additional

technology. In addition, the Company granted National an option to request the transfer of certain technologies under the same terms and conditions as the terminated TTA. The option will expire in January 2008.

- g. Beginning in 2001, the Company entered into several licensing arrangements for certain semiconductor patents. The terms of the contracts range from five to ten years with payments to be made in the form of royalties over the term of the related contracts. The Company has recorded the related amounts as a liability with the corresponding amounts recorded as deferred charges which are amortized and charged to cost of sales on a straight-line basis over the estimated life of the technology or the term of the contract, whichever is shorter.
- h. In November 2002, the Company entered into an Amended and Restated Joint Technology Cooperation Agreement with Philips, Motorola, Inc. and STMicroelectronics to jointly develop 90-nm to 65-nm advanced CMOS Logic and e-DRAM technologies. The Company also agreed to align 0.12 micron CMOS Logic technology to enhance its foundry business opportunities. The Company will contribute process technologies and share a portion of the costs associated with this joint development project.
- i. In December 2003, the Company entered into a Technology Development and License Agreement with Motorola, Inc. to jointly develop 65-nm SOI (silicon on insulator) technology. The Company will also license related 90-nm SOI technology from Motorola, Inc. Any intellectual properties arising out of the co-development project shall be jointly owned by the parties. In accordance with the agreement, the Company will pay royalties to Motorola, Inc. and will share a portion of the costs associated with the joint development project.
- j. The Company provides a technology transfer to VIS under a Manufacturing License and Technology Transfer Agreement entered into in August 2004. The Company receives compensation for such technology transfer in the form of royalty payments from VIS computed at specific percentages of net selling price of certain products sold by VIS. VIS agreed to reserve its certain capacity to manufacture for the Company certain products at prior as agreed by the parties.
- k. Amounts available under unused letters of credit as of December 31, 2004 were NT\$6,480 thousand, US\$204 thousand and SG\$85 thousand.
- l. The Company provided guarantees on loans amounting to US\$60,000 thousand and US\$40,000 thousand for TSMC Development, Inc. (TSMC Development) and TSMC North America, respectively.
- m. TSMC, TSMC North America and WaferTech filed a series of lawsuits in late 2003 and 2004 in both state and federal courts in California and with the U.S. International Trade Commission against Semiconductor Manufacturing International Corporation (SMIC), SMIC (Shanghai) and SMIC Americas. The lawsuits alleged that SMIC companies infringed multiple TSMC patents and misappropriated TSMC's trade secrets. These suits have been settled out of court on January 30, 2005. As part of the agreement, SMIC will pay TSMC US\$175 million over six years to resolve TSMC's patent infringement and trade secret claims.

1) Derivative financial instruments

The Company entered into derivative financial instrument transactions for the years ended December 31, 2004 and 2003 to manage exposures related to foreign exchange rate and interest rate fluctuations. Certain information on these contracts is as follows:

- a) Outstanding forward exchange contracts as of December 31, 2004 and 2003 are as follows:

<b>Financial Instruments</b>	<b>Currency</b>	<b>Maturity Date</b>	<b>Contract Amount (in Thousands)</b>	
<u>2004</u>				
Sell	US\$/NT\$	January 2005 to March 2005	US\$	733,000
Sell	US\$/EUR	January 2005	US\$	159,081
<u>2003</u>				
Sell	US\$/NT\$	January 2004 to July 2004	US\$	1,805,000
Buy	EUR/US\$	January 2004	EUR	7,500
Buy	JPY/US\$	January 2004	JPY	748,405

As of December 31, 2004 and 2003, receivables from forward exchange contracts (included in the other financial assets account) aggregate approximately NT\$392,534 thousand, and NT\$76,385 thousand; payables from forward exchange contracts (included in the other current liabilities account) aggregate approximately NT\$559 thousand and NT\$174,018 thousand.

## b) Cross currency swaps

Outstanding cross currency swap contracts as of December 31, 2004 are as follows:

<b>Maturity Date</b>	<b>Contract Amount (in Thousands)</b>	<b>Range of Interest Rate Paid</b>	<b>Range of Interest Rate Received</b>
January 2005 to June 2005	US\$ 1,420,000	1.28%-2.72%	0.49%-1.17%

As of December 31, 2004, receivables from the cross currency swap contracts (included in the other financial assets account) was approximately NT\$761,030 thousand.

Net exchange gain or loss arising from forward exchange contracts and cross currency swap contracts was recognized in the foreign exchange loss, net account and the difference in interest was recorded in interest income or expense.

## c) Interest rate swaps

Outstanding contracts as of December 31, 2004 and 2003 were as follows:

<b>Contract Date</b>	<b>Period</b>	<b>Contract Amount (in Thousands)</b>
<u>2004</u>		
September 2003	September 2003 to December 2005	NT\$ 500,000
October 2003	October 2003 to December 2005	NT\$ 500,000
October 2003	October 2003 to December 2005	NT\$ 500,000
October 2003	October 2003 to December 2005	NT\$ 500,000
October 2003	October 2003 to December 2005	NT\$ 500,000
November 2003	November 2003 to December 2005	NT\$ 500,000
<u>2003</u>		
September 2003	September 2003 to December 2005	NT\$ 500,000
October 2003	October 2003 to December 2005	NT\$ 500,000
October 2003	October 2003 to December 2005	NT\$ 500,000
October 2003	October 2003 to December 2005	NT\$ 500,000
October 2003	October 2003 to December 2005	NT\$ 500,000
November 2003	November 2003 to December 2005	NT\$ 500,000
July 1999	July 1999 to June 2004	US\$ 2,857

## d) Option contracts

During 2004, the Company did not enter into any foreign currency option contracts.

There were no outstanding option contracts as of December 31, 2003. The Company entered into

foreign currency option contracts for hedging purposes; therefore, the related premiums and the foreign exchange gain or loss are recognized in the foreign exchange loss, net account.

- 32 -

---

## e) Transaction risk

- i) Credit risk. Credit risk represents the positive net settlement amount of those contracts with positive fair values at the balance sheet date. The positive net settlement amount represents the loss incurred by the Company if the counter-parties breached the contracts. The banks, which are the counter-parties to the foregoing derivative financial instruments, are reputable financial institutions. Management believes its exposure related to the potential default by those counter-parties is low.
- ii) Market price risk. All derivative financial instruments are intended as hedges for fluctuations in foreign exchange rates and interest rates. Gains or losses from these hedging instruments are likely to be offset by gains or losses from the hedged items. Interest rate risks are also controlled as the expected cost of capital is fixed. Thus, market price risks are believed to be low.
- iii) Cash flow risk and the amount and period of future cash needs.

As of December 31, 2004, the Company's future cash needs for outstanding forward exchange contracts and cross currency swap contracts are as follows:

<b>Term</b>	<b>Inflow (In Thousands)</b>	<b>Outflow (In Thousands)</b>
Within one year	NT\$ 69,761,484	US\$ 2,312,081
	EUR 118,500	

The Company has sufficient operating capital to meet the above cash needs. In addition, there will be corresponding cash inflow for the cash outflow. Therefore, the cash flow risk is low.

## 2) Fair values of financial instruments were as follows:

	<b>2004</b>		<b>2003</b>	
	<b>Carrying Amount (In Thousands)</b>	<b>Fair Value</b>	<b>Carrying Amount (In Thousands)</b>	<b>Fair Value</b>
<u>Non-derivative financial instruments</u>				
Assets				
Short-term investments, net	\$ 52,979,095	\$ 52,979,095	\$ 12,559,019	\$ 12,703,444

Edgar Filing: TAIWAN SEMICONDUCTOR MANUFACTURING CO LTD - Form 6-K

Cross currency swap contracts	761,030	760,012	
Interest rate swap contracts	4,361	(22,714)	2,093
	- 33 -		

---

The above financial instruments do not include cash and cash equivalents, receivables, other financial assets, payables, and payable to contractors and equipment suppliers. The carrying amounts of the aforementioned instruments reported in the balance sheet approximate their fair values.

The above financial instruments also exclude refundable deposits, guarantee deposits, long-term investments that do not have quoted market prices as well as other long-term payables. The future cash inflow and outflow of the deposits approximate their fair values. Some of long-term investments do not have quoted market prices; therefore, fair values for those long-term investments are not shown above. The fair value of other long-term payables is determined using the discounted value of expected cash flows, which approximates the carrying value.

Fair values of financial instruments were determined as follows:

- a) Fair value of short-term and publicly traded long-term investments is based on quoted market prices.
- b) The fair value of bonds payable is the quoted market value.
- c) Fair value of derivative financial instruments is the amount receivable from or payable to the counter-party if the contracts were terminated on the balance sheet date.

k. Information on investment in Mainland China

- 1) The name of the investee company in mainland China, the main businesses and products, its issued capital, method of investment, information on inflow or outflow of capital, ratio of ownership, equity in the net gain or net loss, ending balance, amount received as earnings distributions from the investment, and the limitation on investment: Please see Table 9 attached.
- 2) Significant direct or indirect transactions with the investee company, its prices and terms of payment, unrealized gain or loss, and other related information which is helpful to understand the impact of investment in mainland China on financial reports: Please see Note 18.

**22. SEGMENT FINANCIAL INFORMATION**

a. Gross export sales

<b>Area</b>	<b>2004</b>	<b>2003</b>
Americas	\$ 113,948,320	\$ 103,600,081

## INDEPENDENT AUDITORS' REPORT

The Board of Directors and the Shareholders  
Taiwan Semiconductor Manufacturing Company Ltd.

We have audited the accompanying consolidated balance sheets of Taiwan Semiconductor Manufacturing Company Ltd. and subsidiaries (the Company) as of December 31, 2004 and 2003, and the related consolidated statements of income, changes in shareholders' equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the Rules Governing the Audit of Financial Statements by Certified Public Accountants, and auditing standards generally accepted in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Taiwan Semiconductor Manufacturing Company Ltd. and subsidiaries as of December 31, 2004 and 2003, and the results of their operations and their cash flows for the years then ended, in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and generally accepted accounting principles in the Republic of China.

January 13, 2005 (January 30, 2005 as to Note 22m)

### Notice to Readers

*The accompanying consolidated financial statements are intended only to present the consolidated financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdiction. The standards, procedures and practices to audit such consolidated financial statements are those generally accepted and applied in the Republic of China.*

*For the convenience of readers, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.*

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in Thousands of New Taiwan Dollars, Unless Specified Otherwise)

---

#### 1. GENERAL

Taiwan Semiconductor Manufacturing Company Ltd. (TSMC), a Republic of China (R.O.C.) corporation, was incorporated as a venture among the Government of the R.O.C., acting through the Development Fund of the Executive Yuan; Philips Electronics N.V. and certain of its affiliates (Philips); and certain other private investors. On September 5, 1994, its shares were listed on the Taiwan Stock Exchange (TSE). On October 8, 1997, TSMC listed some of its shares of stock on the New York Stock Exchange (NYSE) in the form of American Depositary Shares (ADSs).

TSMC is engaged mainly in the manufacturing, selling, packaging, testing and computer-aided designing of integrated circuits and other semiconductor devices, and the manufacturing of masks.

TSMC has six direct wholly-owned subsidiaries: TSMC International Investment Ltd. (TSMC International), TSMC North America (TSMC North America), Taiwan Semiconductor Manufacturing Company Europe B.V. (TSMC Europe), TSMC Japan K. K. (TSMC Japan), TSMC (Shanghai) Company Limited (TSMC Shanghai) and TSMC Partners, Ltd. (TSMC Partners). In addition, TSMC has the following consolidating subsidiaries: a 99.5% owned subsidiary, Emerging Alliance Fund, L.P. (Emerging Alliance), a 98% owned subsidiary, VentureTech Alliance Fund II, L.P. (VTAF II, a newly established entity in 2004) and two 36% owned affiliates Chi Cherng Investment Co., Ltd. (Chi Cherng, which is 36% owned by TSMC and 64% owned by Hsin Ruey Investment Co., Ltd.) and Hsin Ruey Investment Co., Ltd. (Hsin Ruey, which is 36% owned by TSMC and 64% owned by Chi Cherng). TSMC International has two wholly-owned subsidiaries - TSMC Development, Inc. (TSMC Development) and TSMC Technology, Inc. (TSMC Technology), and two 97% owned subsidiaries - InveStar Semiconductor Development Fund, Inc. (InveStar) and InveStar Semiconductor Development Fund, Inc. (II) LDC (InveStar II). TSMC Development has a 99.996% owned subsidiary, WaferTech, LLC (WaferTech).

The following diagram presents information regarding the relationship and ownership percentages among TSMC and its consolidated subsidiaries as of December 31, 2004:

TSMC North America is engaged in the sales and marketing of integrated circuits and semiconductor devices. TSMC Europe and TSMC Japan are engaged mainly in marketing activities. TSMC Technology is engaged mainly in engineering support activities. TSMC Shanghai is engaged in the manufacturing and marketing of integrated circuits and other semiconductor devices. TSMC Partners, TSMC Development, Chi Cherng and Hsin Ruey are engaged in investing activities. TSMC International is engaged in providing investment in companies involved in the design, manufacture, and other related business in the semiconductor industry. Emerging Alliance, VTAF II, InveStar and InveStar II are engaged in investing in new start-up technology companies. WaferTech is engaged in the manufacturing, selling, testing and computer-aided designing of integrated circuits and other semiconductor devices.

## **2. SIGNIFICANT ACCOUNTING POLICIES**

The consolidated financial statements are presented in conformity with Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the R.O.C.

For the convenience of readers, the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the R.O.C. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language financial statements shall prevail.

Significant accounting policies are summarized as follows:

### **Consolidation**

TSMC consolidates the accounts of all majority (directly and indirectly) owned subsidiaries. All significant intercompany balances and transactions have been eliminated.

The consolidated financial statements include, as of and for the years ended December 31, 2004 and 2003, the accounts of TSMC, TSMC North America, TSMC Europe, TSMC Japan, TSMC Shanghai, TSMC Partners, Emerging Alliance, VTAF II, Chi Cherng, Hsin Ruey and TSMC International and its subsidiaries, InveStar, InveStar II, TSMC Development (including WaferTech) and TSMC Technology.

TSMC and the foregoing subsidiaries are hereinafter referred to collectively as the Company .

Minority interests in WaferTech (0.004%), Emerging Alliance (0.5%), VTAF II (2%), InveStar (3%) and InveStar II (3%) are presented separately in the consolidated financial statements.

### **Use of Estimates**

The preparation of financial statements in conformity with the aforementioned guidelines and principles requires management to make reasonable assumptions and estimates of matters that are inherently uncertain. The actual results may differ from management's estimates.

### **Classification of Current and Noncurrent Assets and Liabilities**

Current assets are those expected to be converted to cash, sold or consumed within one year from the balance sheet date. Current liabilities are obligations due on demand within one year from the balance sheet date. Assets and liabilities that are not classified as current are noncurrent assets and liabilities, respectively.

**Cash Equivalents**

Government bonds under repurchase agreements and notes acquired with maturities less than three months from the date of purchase are classified as cash equivalents.

- 10 -

---

### **Short-term Investments**

Short-term investments primarily consist of corporate bonds, asset-backed securities, bond funds, agency bonds, government bonds and others.

Short-term investments are recorded at historical cost and are carried at the lower of cost or market value as of the balance sheet date. An allowance for decline in value is provided and is charged to current earnings when the aggregate carrying value of the investments exceeds the aggregate market value. A reversal of the allowance is recorded for a subsequent recovery of the market value.

The cost of funds and listed stocks sold are counted for using the weighted-average method; whereas the other securities are accounted for using the specific identification method.

The market value of funds is determined using the net asset value of the funds at the end of the year, and the market value of listed stocks is determined using the average-closing price of the listed stocks for the last month of the year. The others are determined using the average of bid and ask prices as of the balance sheet date.

Cash dividends are recorded as investment income in the current year.

### **Allowance for Doubtful Receivables**

An allowance for doubtful receivable is provided based on a review of the collectibility of accounts receivables. The Company determines the amount of allowance for doubtful accounts by examining the historical collection experience and current trends in the credit quality of its customers as well as its internal credit policies.

### **Revenue Recognition and Allowance for Sales Returns and Others**

The Company recognizes net sales when the earnings process is complete, as evidenced by an agreement with the customer, transfer of title and acceptance have occurred, if applicable, a fixed or determinable price and the collectibility is reasonably assured. Allowance for sales returns and pricing discounts is estimated based on historical experience and any known factors that would affect the allowance. Such provisions are deducted from sales in the year the products are sold and the estimated related costs are deducted from cost of sales.

Sales are determined using the fair value taking into account related sales discounts agreed to by the Company and its customers. Sales agreements typically provide that payment is due 30 days from invoice date for a majority of the customers and 30 to 45 days after the end of the month in which the sales occur for some customers. Since the receivables from sales are collectible within one year and such transactions are frequent, the fair value of receivables is equivalent to the nominal amount of cash received.

### **Inventories**

Inventories are stated at the lower of cost or market value. Inventories are recorded at standard cost and adjusted to the approximate weighted-average cost at the end of the year. Market value represents net replacement cost for raw materials, supplies and spare parts. Market value represents net realizable value for finished goods and work in process. The Company assesses the impact of changing technology on its inventory on hand and writes off inventories that are considered obsolete. Ending inventories are evaluated for estimated excess quantities and obsolescence based on demand forecast within a specific time horizon, generally 180 days or less, and the estimated losses on scrap and slow-moving items are recognized in the allowance for losses.

## Long-term Investments

Investments in companies wherein the Company exercises significant influence on the operating and financial policy decisions are accounted for using the equity method of accounting. The Company's proportionate share in the net income or net loss of investee companies is recognized in the investment income/loss recognized by equity method, net account. When equity investments are made, the difference, if any, between the cost of investment and the Company's proportionate share of investee's net equity is amortized using the straight-line method over five years and is recorded in the investment income/loss recognized by equity method, net account.

When the Company subscribes to additional investee shares at a percentage different from its existing equity interest, the resulting carrying amount of the investment in the investee differs from the amount of Company's proportionate share in the investee's net equity. The Company records such difference as an adjustment to long-term investments with the corresponding amount charged or credited to capital surplus.

Investments in companies wherein the Company does not exercise significant influence are recorded at historical cost. Cash dividends are recognized as investment income in the year received but are accounted for as reductions in the carrying amount of the long-term investments if the dividends are received in the same year that the related investments are acquired. Stock dividends are recorded as an increase in the number of shares held and do not affect investment income or the carrying amount of the investment. An allowance is recognized for any decline in the market value of investments with readily ascertainable fair market value with the corresponding amount recorded as an unrealized loss, a component of shareholders' equity. A reversal of the allowance will result from a subsequent recovery of the market value of such investments. The carrying amounts of investments whose fair market values are not readily ascertainable are reduced to reflect an other-than-temporary decline in their values, with the related impairment loss charged to income.

Investments in foreign mutual funds are stated at the lower of aggregate cost or net asset value. An allowance is recognized when the net assets value of the funds is lower than their cost, with the corresponding amount recorded as a reduction to shareholders' equity. A reversal of the allowance will result from a subsequent recovery of the net asset value.

The costs of stocks and mutual funds sold are determined using the weighted-average method.

Investments in long-term bonds are stated at amortized cost. The discount or premium is amortized over the duration period using the interest method, and recorded as an adjustment to interest income.

When investments in publicly-traded stocks are reclassified from short-term investments to long-term investments or from long-term investments to short-term investments, the Company recognizes a loss to the extent, if any, that the market value of such investments is lower than the carrying amount, and the market value becomes the new basis.

If an investee company recognizes an unrealized loss on its long-term investments using the lower-of-cost-or-market method, the Company also recognizes a corresponding unrealized loss in proportion to its ownership percentage in the investee company and records the amount as a component of its shareholders' equity.

Gains or losses on sales from the Company to investee companies accounted for using the equity method are deferred in proportion to the Company's ownership percentage in the investee companies until realized through transactions with third parties. The entire amount of the gains or losses on sales to majority-owned subsidiaries is deferred until such gains or losses are realized through the subsequent sales of the related products to third parties.

Gains or losses on sales from investee companies to the Company are deferred in proportion to the Company's ownership percentages in the investee companies until realized through transactions with third parties.

If an investee's functional currency is a foreign currency, translation adjustments will result from the process of translating the investee's financial statements into the reporting currency of the Company. Such adjustments are accumulated and reported as a separate component of shareholders' equity.

### **Property, Plant and Equipment, Assets Leased to Others, Leased Assets and Idle Assets**

Property, plant and equipment and assets leased to others are stated at cost less accumulated depreciation. When impairment is determined, the related assets are stated at the lower of fair value or book value. Idle assets are stated at the lower of net realizable value or book value. Significant additions, renewals and betterments incurred during the construction period are capitalized. Maintenance and repairs are expensed in the year incurred. Interest expense incurred for the project during the purchase and construction period is also capitalized. Properties covered by agreements qualifying as capital leases are carried at the lower of the leased equipment's market value or the present value of the minimum lease payments at the inception date of the lease.

Depreciation is computed using the straight-line method over the following estimated service lives: land improvements 20 years; buildings 10 to 20 years; machinery and equipment 5 to 10 years; office equipment 3 to 15 years; and leased assets 20 years.

Upon sale or disposal of property, plant and equipment, the related cost and accumulated depreciation are removed from the corresponding accounts, with any gain or loss credited or charged to non-operating income or expenses in the year of sale or disposal.

### **Goodwill**

Goodwill represents the excess of the consideration paid for acquisition over the fair market value of identifiable net assets acquired and acquisition costs. Goodwill is amortized using the straight-line method over the estimated life of 10 years.

### **Deferred Charges**

Deferred charges consist of technology license fees, software and system design costs and other charges. The amounts are amortized as follows: technology license fees the shorter of the estimated life of the technology or the term of the technology transfer contract, software and system design costs and other charges 3 or 5 years.

### **Pension Costs**

TSMC records net periodic pension costs on the basis of actuarial calculations. Unrecognized net transition obligation and unrecognized net gains or losses are amortized over 25 years.

### **Income Tax**

The Company uses an inter-period tax allocation method for income tax. Deferred income tax assets and liabilities are recognized for the tax effects of temporary differences, unused tax credits, and net operating loss carryforwards. Valuation allowances are provided to the extent, if any, that it is more likely than not that deferred income tax assets will not be realized. A deferred tax asset or liability is classified as current or non-current in accordance with the classification of its related asset or liability. However, if a deferred tax asset or liability does not relate to an asset or

liability in the financial statements, then it is classified as either current or noncurrent based on the expected length of time before it is realized or settled.

- 13 -

---

Any tax credits arising from the purchases of machinery, equipment and technology, research and development expenditures, personnel training, and investments in important technology-based enterprises are recognized using the flow-through method.

Adjustments to prior years' tax liabilities are added to or deducted from the current year's tax provision.

Income taxes on unappropriated earnings (excluding earnings from foreign consolidating subsidiaries) of 10% are expensed in the year of shareholder approval which is the year subsequent to the year the earnings are generated.

### **Stock-based Compensation**

Employee stock option plans that are amended or have options granted on or after January 1, 2004 must be accounted for by the interpretations issued by the Accounting Research and Development Foundation. The Company adopted the intrinsic value method and any compensation cost determined using this method is charged to expense over the employee vesting period.

### **Treasury Stock**

When the Company repurchases its outstanding common stock, the cost of the reacquired stock is recorded as treasury stock as a reduction to shareholders' equity. When the Company retires treasury stock, the treasury stock account is reduced and the common stock as well as the capital surplus—additional paid-in capital are reversed in proportionate to the equity percentage of the retirement. When the book value of the treasury stock exceeds the sum of the par value and additional paid-in capital, the difference is charged to capital surplus—treasury stock and to retained earnings for any remaining amount. The Company's stock held by its subsidiaries is also treated as treasury stock and reclassified from long-term investments to treasury stock. The cash dividends received by the subsidiaries from the Company are recorded under capital surplus—treasury stock.

### **Foreign-Currency Transactions**

Foreign currency transactions are recorded in New Taiwan dollars at the rates of exchange in effect when the transactions occur. Exchange gains or losses derived from foreign currency transactions or monetary assets and liabilities denominated in foreign currencies are recognized in current income. At the end of each year, assets and liabilities denominated in foreign currencies are revalued at the prevailing exchange rates with the resulting gains or losses recognized in current income.

### **Derivative Financial Instruments**

The Company enters into foreign currency forward contracts to manage currency exposures in cash flow and in foreign-currency-denominated assets and liabilities. The contracts are recorded in New Taiwan dollars at the current rate of exchange of the contract date. The differences in the New Taiwan dollar amounts translated using the spot rates and the amounts translated using the contracted forward rates on the contract date are amortized over the terms of the forward contracts using the straight-line method. At the end of each year, the receivables or payables arising from forward contracts are restated using the prevailing spot rates at the balance sheet date with the resulting differences charged to income. In addition, the receivables and payables related to the forward contracts of the same counter party are netted with the resulting amount presented as either an asset or a liability. Any resulting gain or loss upon settlement is credited or charged to income in the year of settlement.

The Company enters into cross-currency swap contracts to manage currencies exposures on foreign currency denominated assets and liabilities. The principal amount is recorded using the spot rates at the contract date. The differences in the New Taiwan dollar amounts translated using the spot rates and the amounts translated using the contracted rates on the contract date are amortized over the terms of the contracts using the straight-line method. At the end of each year, the receivables or payables arising from cross-currency swap contracts are restated using the prevailing spot rate with the resulting differences charged to income. In addition, the receivables and payables related to the contracts are netted with the resulting amount presented as either an asset or a liability. The difference in interest computed pursuant to the contracts on each settlement date or the balance sheet date is recorded as an adjustment to the interest income or expense associated with the hedged items. Any resulting gain or loss upon settlement is credited or charged to income in the year of settlement.

The Company enters into interest rate swap contracts to manage exposures to changes in interest rates on existing assets or liabilities. These transactions are accounted for on an accrual basis, in which the cash settlement receivable or payable is recorded as an adjustment to interest income or expense associated with the hedged items.

The premiums paid for the foreign currency option contracts entered into for hedging purposes are amortized and charged to income on a straight-line basis over the term of the related contract. Any resulting gain upon exercise settlement is credited or charged to income in the year of exercise.

### Translation of Foreign-currency Financial Statements

R.O.C. SFAS No. 14, Accounting for Foreign-Currency Transactions, applies to foreign subsidiaries that use the local foreign currency as their functional currency. The financial statements of foreign subsidiaries are translated into New Taiwan dollars at the following exchange rates: Assets and liabilities current rate on balance sheet date; shareholders equity historical rate; income and expenses average rate during the year. The resulting translation adjustment is recorded as a separate component of shareholders equity.

On January 8, 2003, TSMC's investee, VIS, issued 600,000 thousand shares of common stock at a price of NT\$7 per share of which TSMC purchased a total of 230,882 thousand shares. VIS reduced its capital on August 11, 2004 in order to decrease its accumulated deficit. The number of shares of VIS held by TSMC after the capital reduction declined from 787,016 thousand shares to 409,532 thousand shares. TSMC's ownership percentage remained the same.

For the years ended December 31, 2004 and 2003, net investment income and loss recognized from the equity method investees was NT\$2,094,137 thousand and NT\$294,244 thousand, respectively. The carrying amounts of investments accounted for under the equity method and the related investment income or losses were determined

based on the audited financial statements of the investees as of and for the same periods as the Company.

As of December 31, 2004, other investments consist of the following:

	<b>Nominal Amount</b>	<b>Carrying Amount</b>	<b>Range of Interest Rates</b>	<b>Maturity Date</b>
<u>Step-up callable deposits</u>				
Domestic bank	\$ 2,000,000	\$ 2,007,681	2.05%-2.20%	July 2007 to August 2007

	\$ 10,521,740	\$ 10,574,226		

During the year ended December 31, 2004, the Company deposited funds into structured-time deposits with the following terms:

The interest rate of the step-up callable deposits is determined by the Company and the related banks.

The amount of interest earned by the Company for the callable range accrual deposits is based on a pre-defined range as determined by the 3-month or 6-month LIBOR rate plus an agreed upon rate ranging between 2.1% and 3.45%. Based on the terms of the deposits, if the 3-month or 6-month LIBOR rate moves outside of the pre-defined range, the interest paid to the Company is at a minimum rate of 1.5%. Under the term of the contracts, the bank has the right to cancel the contracts prior to the maturity date.

Deposits that reside in banks located in Hong Kong and Singapore amounted to NT\$2,553,360 thousand and NT\$638,340 thousand, respectively.

- i. The tax authorities have examined income tax returns of TSMC through 2000. However, TSMC is contesting the assessment of the tax authority for 1992 and 1998. TSMC believes that any additional assessment will not have a material adverse effect on TSMC.

**16. SHAREHOLDERS EQUITY****Common Stock, Capital Surplus and Earnings**

TSMC has issued a total of 668,351 thousand ADSs which are traded on the NYSE as of December 31, 2004. The number of common shares represented by the ADSs is 3,341,754 thousand shares (one ADS represents five common shares).

Capital surplus can only be used to offset a deficit under the Company Law of the R.O.C. However, the capital surplus generated from donations and the excess of the issue price over the par value of capital stock (including the stock issued for new capital, mergers, convertible bonds and the surplus arising from treasury stock transactions) may be appropriated as stock dividends restricted to a certain percentage based on shareholders ownership.

As of December 31, 2004 and 2003, the capital surplus consisted of the following:

	2004	2003
From merger	\$ 24,003,546	\$ 24,132,297
Additional paid-in capital	23,051,675	23,172,550
From long-term investments	121,354	87,295
From convertible bonds	9,360,424	9,410,632
Donations	55	55
Treasury stock	205	53,056
Total	\$ 56,537,259	\$ 56,855,885

TSMC's Articles of Incorporation, as revised on December 21, 2004, provide that the following shall be appropriated from annual earnings to the extent that the annual earnings exceed any cumulative deficit:

- a. 10% legal reserve; until the amount of total legal reserve equals the TSMC's paid-in capital;
- b. Special reserve in accordance with relevant laws or regulations;
- c. Remuneration to directors and supervisors and bonuses to employees at 0.3% and at least 1% of the remainder, respectively. Individuals eligible for the employee bonuses may include employees of affiliated companies as approved by the board of directors or a representative of the board of directors;
- d. The appropriation of any remaining balance shall be approved by the shareholders.

-24-

---

Dividends may be distributed by way of cash dividend or stock dividend at the discretion of TSMC. As the operation of TSMC is at a steady growth stage, distribution of profits shall be made preferably by way of cash dividend. Distribution of profits may also be made by way of stock dividend; provided however, the ratio for stock dividend shall not exceed 50% of total distribution.

Any appropriations of net income are recorded in the financial statements in the year of shareholder approval.

An appropriation for legal reserve is required until the reserve equals the aggregate par value of TSMC's issued capital stock. The reserve can only be used to offset a deficit or be distributed as a stock dividend up to 50% of the reserve balance when the reserve balance has reached 50% of the aggregate par value of the issued capital stock of TSMC.

A special reserve equivalent to the net debit balance of the other components of shareholder's equity (for example, unrealized loss on long-term investments and cumulative translation adjustments, but excluding treasury stock), shall be made from unappropriated earnings pursuant to existing regulations promulgated by the R.O.C. Securities and Futures Bureau (SFB). Any special reserve appropriated may be reversed to the extent that the net debit balance of the related account reverses.

The appropriations of the earnings of 2003 and 2002 were approved in the shareholders' meeting on May 11, 2004 and June 3, 2003, respectively. The appropriations and dividend per share are as follows:

	Appropriation of Earnings		Dividend Per Share (NT\$)	
	For Fiscal	For Fiscal	For	For
	Year 2003	Year 2002	Fiscal Year 2003	Fiscal Year 2002
Legal reserve	\$ 4,725,870	\$ 2,161,029		
Special reserve	(68,945)	68,945		
Bonus paid to employees in cash	681,628			
Bonus paid to employees in stock	2,726,514	1,539,013		
Preferred stock dividend in cash	184,493	455,000	\$ 0.35	\$ 0.35
Common stock dividend in cash	12,159,971		0.60	
Common stock dividend in stock	28,373,267	14,898,309	1.41	0.80
Remuneration to directors and supervisors in cash	127,805	58,485		
	\$ 48,910,603	\$ 19,180,781		

The amount of the above appropriation of earnings for 2003 and 2002 is consistent with the resolution of the meetings of board of directors on February 17, 2004 and March 4, 2003, respectively. However, the Company Law of the R.O.C. states TSMC, as a holder of treasury stock shall not participate in the appropriations of earnings. Therefore, the actual cash dividend per share and stock dividend per share are slightly more than those in the aforementioned resolution. If the above employee bonus paid in stock had been paid in cash and all of the bonus to employees and remuneration to directors and supervisors had been charged against income for 2003 and 2002, the after income tax basic earnings per share for the years ended December 31, 2003 and 2002 would have decreased from NT\$2.33 to NT\$2.15 and NT\$ 1.14 to NT\$1.05, respectively. The shares distributed as a bonus to employees represented 1.35% and 0.83% of TSMC's total outstanding common shares as of December 31, 2003 and 2002, respectively.

As of January 13, 2005, the board of directors of TSMC has not resolved the appropriation for earnings of 2004.

The above information about the appropriations of bonus to employees and remuneration to directors and supervisors is available at Market Observation System website.

Under the Integrated Income Tax System that became effective on January 1, 1998, the R.O.C. resident shareholders are allowed a tax credit for their proportionate share of the income tax paid by TSMC on earnings generated since January 1, 1998.

### **Preferred Stock**

TSMC issued 1,300,000 thousand shares of unlisted Series A preferred stock to certain investors on November 29, 2000. All of the preferred stock was redeemed at par value and retired on May 29, 2003. Under TSMC's Articles of Incorporation, TSMC is no longer authorized to issue preferred stock.

The preferred shareholders had the following rights and the related terms and conditions prior to redemption:

Preferred shareholders

- a. Are entitled to receive cumulative cash dividends at an annual rate of 3.5%.
- b. Are not entitled to receive any common stock dividends (whether declared out of unappropriated earnings or capital surplus).
- c. Have priority over the holders of common shares to the assets of TSMC available for distribution to shareholders upon liquidation or dissolution; however, the pre-emptive rights to the assets shall not exceed the issue price of the shares.
- d. Have voting rights similar to that of the holders of common shares.
- e. Have no right to convert their shares into common shares. The preferred shares are to be redeemed within thirty months from their issuance. The preferred shareholders have the aforementioned rights and TSMC's related obligations remain the same until the preferred shares are redeemed by TSMC.

## **17. STOCK-BASED COMPENSATION PLANS**

### **Stock Option Plans**

TSMC's Employee Stock Option Plans, the 2003 Plan and the 2002 Plan, were approved on October 29, 2003 and June 25, 2002, respectively. The maximum number of units authorized to be granted under 2003 Plan and the 2002 Plan is 120,000 thousand and 100,000 thousand, respectively, with each unit representing one common share of stock. The option rights may be granted to qualified employees of TSMC or any of its domestic or foreign subsidiaries, in which TSMC's shareholding with voting rights, directly or indirectly, is more than fifty percent (50%). The option rights of both plans are valid for ten years and exercisable at certain percentages subsequent to the second anniversary of the grant date. Under the terms of the plans, stock option rights are granted at an exercise price equal to the closing price of TSMC's common shares listed on the TSE on the date of grant. Under the 2003 Plan and the 2002 Plan, units that were never granted, or had been granted and subsequently cancelled were expired as of December 31, 2004.

On November 2, 2004, the board of directors of TSMC approved the 2004 Plan, in which the maximum number of units authorized to be granted is 11,000 thousand, with each unit representing one common share of stock. The option rights may be granted to qualified employees of TSMC or any of its domestic or foreign subsidiaries, in which TSMC's shareholding with voting rights, directly or indirectly, is more than fifty percent (50%). The option rights of the plans are valid for ten years and exercisable at certain percentages subsequent to the second anniversary of the grant date. Under the terms of the plan, stock option rights are granted at an exercise price equal to the closing price of TSMC's common shares listed on the TSE on the date of grant. The 2004 plan was approved by Bureau of Monetary Affairs, Financial Supervisory Commission of the R.O.C. on January 6, 2005.

Information on outstanding stock options for the years ended December 31, 2004 and 2003 is as follows:

The estimated weighted average fair value for the options granted during the year ended December 31, 2004 was NT\$19.73 per option.

In 1996, WaferTech adopted an Executive Incentive Plan, which was amended in 1997. According to the 1997 amendment, the Board of Directors of WaferTech approved the Senior Executive Incentive Plan and the Employee Incentive Plan (the WaferTech Plans) under which officers, key employees and non-employee directors may be granted stock option rights. The WaferTech Plans provide for 15,150 thousand option rights available for grant. For option rights granted to date, the option purchase price was equal to or exceeded the fair market value at the date of grant. The options will expire if not exercised at specified dates ranging from May 2006 and June 2011. In December 2000, WaferTech implemented a Stock Option Buyback Program (Buyback). The Buyback program provides employees with the right to sell back to WaferTech all vested stock options and outstanding ownership interests granted under the WaferTech Plans. As of December 31, 2004, the outstanding and exercisable stock options were 134 thousand and 133 thousand, respectively, and US\$616 thousand was accrued in connection with the Buyback program.

### **Stock Appreciation Rights**

In December 2000, WaferTech and TSMC North America implemented a stock appreciation rights program (Appreciation). The Appreciation plan is designed to provide employees with a long-term incentive plan that tracks the appreciation of TSMC common stock through Stock Appreciation Rights (SARs). SARs provide each participant the right to receive, upon exercise, an amount in cash from WaferTech and TSMC North America that is the excess of the market price of TSMC common stock on TSE on the date of exercise over the exercise price. As of December 31, 2004, WaferTech and TSMC North America accrued US\$381 thousand and US\$1,360 thousand, respectively, in connection with the Appreciation. During 2002, benefits under the Appreciation plan for TSMC North America were replaced by the stock option plans aforementioned.

Proceeds from the sale of treasury stock for the years ended December 31, 2004 and 2003 were NT\$39,906 thousand and NT\$331,945 thousand, respectively. TSMC's capital stock held by a subsidiary as an investment is recorded as treasury stock, with the holder having the same rights as other common shareholders. As of December 31, 2004 and 2003, the book value of the treasury stock was NT\$1,595,186 thousand and NT\$1,633,228 thousand, respectively; the market value was NT\$2,241,009 thousand and NT\$2,548,788 thousand, respectively.

TSMC held a special meeting of the board of directors and approved a share buyback plan to repurchase TSMC's common shares listed on the TSE during the period from March 24, 2004 to May 23, 2004. TSMC repurchased 124,720 thousand common shares for a total of NT\$7,059,798 thousand. All the treasury stock repurchased under the buyback plan was retired on August 16, 2004.

## 21. SIGNIFICANT LONG-TERM OPERATING LEASES

TSMC leases land from the Science-Based Industrial Park Administration. These agreements expire on various dates from March 2008 to December 2020. The agreements can be renewed upon their expiration.

TSMC North America leases its office premises and certain equipment under non-cancelable operating agreements. TSMC - Europe and TSMC Japan entered into lease agreements for their office premises. The leases will expire between 2005 and 2010. The agreements can be renewed upon their expiration.

As of December 31, 2004, future remaining lease payments are as follows:

<b>Year</b>	<b>Amount</b>

## 22. SIGNIFICANT COMMITMENTS AND CONTINGENCIES

The significant commitments and contingencies of the Company as of December 31, 2004 are as follows:

- a. On June 20, 2004, TSMC and Philips revised the Technical Cooperation Agreement, which was originally signed on May 12, 1997, with an effective date from January 1, 2004 for five years. Upon expiration, this amended Technical Cooperation Agreement will be terminated at the expiration date and will not be automatically renewed. Under this amended Technical Cooperation Agreement, TSMC will pay Philips royalties based on fixed amounts mutually agreed-on, rather than under certain percentage of TSMC's annual net sales. TSMC and Philips also agree to cross license the patents owned by each party. TSMC also obtained through Philips a number of patent cross licenses.
- b. Under a technical cooperation agreement with ITRI, TSMC shall reserve and allocate up to 35% of certain of its production capacity for use by the Ministry of Economic Affairs (MOEA) or any other party designated by the MOEA.
- c. Under several foundry agreements, TSMC shall reserve a portion of its production capacity for certain major customers that have guarantee deposits with TSMC. As of December 31, 2004, TSMC had a total of US\$12,802 thousand of guarantee deposits.
- d. Under a Shareholders Agreement entered into with Philips and EDB Investments Pte Ltd. on March 30, 1999, the parties formed a joint venture company, SSMC, for the purpose of constructing an integrated circuit foundry in Singapore. As of December 31, 2004, TSMC's equity interest in SSMC was 32%. TSMC and Philips

committed to buy specific percentages of the production capacity of SSMC. If any party defaults on the commitment and the capacity utilization of SSMC falls below a specific percentage of its total capacity, the defaulting party is required to compensate SSMC for all related unavoidable costs.

-32-

---

- e. TSMC provides technical services to SSMC under a Technical Cooperation Agreement (the Agreement) entered into on May 12, 1999. TSMC receives compensation for such services computed at a specific percentage of net selling price of certain products sold by SSMC. The Agreement shall remain in force for ten years and may be automatically renewed for successive periods of five years each unless pre-terminated by either party under certain conditions.
- f. Under a Technology Transfer Agreement (TTA) with National Semiconductor Corporation (National) entered into on June 27, 2000, TSMC shall receive payments for the licensing of certain technology to National. The agreement was to remain in force for ten years and could be automatically renewed for successive periods of two years thereafter unless either party gives notice for early termination under certain conditions. In January 2003, TSMC and National entered into a Termination Agreement whereby the TTA was terminated for convenience. Under the Termination Agreement, TSMC will be relieved of any further obligation to transfer any additional technology. In addition, TSMC granted National an option to request the transfer of certain technologies under the same terms and conditions as the terminated TTA. The option will expire in January 2008.
- g. Beginning in 2001, TSMC entered into several licensing arrangements for certain semiconductor patents. The terms of the contracts range from five to ten years with payments to be made in the form of royalties over the term of the related contracts. TSMC has recorded the related amounts as a liability with the corresponding amounts recorded as deferred charges which are amortized and charged to cost of sales on a straight-line basis over the estimated life of the technology or the term of the contract, whichever is shorter.
- h. In November 2002, TSMC entered into an Amended and Restated Joint Technology Cooperation Agreement with Philips, Motorola, Inc. and STMicroelectronics to jointly develop 90-nm to 65-nm advanced CMOS Logic and e-DRAM technologies. TSMC also agreed to align 0.12 micron CMOS Logic technology to enhance its foundry business opportunities. TSMC will contribute process technologies and share a portion of the costs associated with this joint development project.
- i. In December 2003, TSMC entered into a Technology Development and License Agreement with Motorola, Inc. to jointly develop 65-nm SOI (silicon on insulator) technology. TSMC will also license related 90-nm SOI technology from Motorola, Inc. Any intellectual properties arising out of the co-development project shall be jointly owned by the parties. In accordance with the agreement, TSMC will pay royalties to Motorola, Inc. and will share a portion of the costs associated with the joint development project.
- j. TSMC provides a technology transfer to VIS under a Manufacturing License and Technology Transfer Agreement entered into in August 2004. TSMC receives compensation for such technology transfer in the form of royalty payments from VIS computed at specific percentages of net selling price of certain products sold by VIS. VIS agreed to reserve its certain capacity to manufacture for TSMC certain products at prior as agreed by the parties.
- k. Under an agreement signed with a certain company, TSMC Shanghai has the obligation to purchase certain assets within a specified period at the price agreed upon by both parties. TSMC Shanghai will compensate the other party in case of a breach of the agreement.
- l. Amounts available under unused letters of credit as of December 31, 2004 were NT\$6,480 thousand, US\$1,282 thousand and SG\$85 thousand. Among the unused letters of credit, TSMC North America has an outstanding irrevocable standby letter of credit for US\$1,078 thousand. The standby letter of credit was entered into as security to the landlord of TSMC North America's office spaces in San Jose, California. The standby letter of credit will expire in October, 2005.

- m. The Company filed a series of lawsuits in late 2003 and 2004 in both state and federal courts in California and with the U.S. International Trade Commission against Semiconductor Manufacturing International Corporation (SMIC), SMIC (Shanghai), and SMIC Americas. The lawsuits alleged that SMIC companies infringed multiple patents of the Company and misappropriated the Company's trade secrets. These suits have been settled out of court on January 30, 2005. As part of the agreement, SMIC will pay TSMC US\$175 million over six years to resolve the Company's patent infringement and trade secret claims.

- j. Financial instrument transactions:
  - 1) Derivative financial instruments

The Company entered into derivative financial instrument transactions for the years ended December 31, 2004 and 2003 to manage exposures related to foreign exchange rate and interest rate fluctuations. Certain information on these contracts is as follows:

- a) Outstanding forward exchange contracts as of December 31, 2004 and 2003 are as follows:

<b>Financial Instruments</b>	<b>Currency</b>	<b>Maturity Date</b>	<b>Contract Amount (in Thousands)</b>
<u>2004</u>			

Sell	US\$/NT\$	January 2005 to March 2005	US\$	733,000
Sell	US\$/EUR	January 2005	US\$	159,081

(Continued)

<b>Financial Instruments</b>	<b>Currency</b>	<b>Maturity Date</b>	<b>Contract Amount</b> <b>(in Thousands)</b>
<u>2003</u>			
Sell	US\$/NT\$	January 2004 to July 2004	US\$ 1,805,000
Buy	EUR/US\$	January 2004	EUR 7,500
Buy	JPY/US\$	January 2004	JPY 748,405

As of December 31, 2004 and 2003, receivables from forward exchange contracts (included in the other financial assets account) aggregate to approximately NT\$392,534 thousand, and NT\$76,385 thousand, respectively; payables from forward exchange contracts (included in the other current liabilities account) aggregate to approximately NT\$559 thousand and NT\$174,018 thousand, respectively.

b) Cross currency swaps

Outstanding cross currency swap contracts as of December 31, 2004 are as follows:

<b>Maturity Date</b>	<b>Contract Amount</b> <b>(in Thousands)</b>	<b>Range of Interest Rate Paid</b>	<b>Range of Interest Rate Received</b>
January 2005 to June 2005	US\$ 1,420,000	1.28%-2.72%	0.49%-1.17%

As of December 31, 2004, receivables from the cross currency swap contracts (included in the other financial assets account) were approximately NT\$761,030 thousand.

Net exchange gain or loss arising from forward exchange contracts and cross currency swap contracts was recognized in the foreign exchange loss, net account and the difference in interest was recorded in interest income or expense.

c) Interest rate swaps

Outstanding contracts as of December 31, 2004 and 2003 were as follows:

<b>Contract Date</b>	<b>Period</b>	<b>Contract Amount</b> <b>(in Thousands)</b>
<u>2004</u>		
September 2003	September 2003 to December 2005	\$ 500,000

October 2003	October 2003 to December 2005	500,000
October 2003	October 2003 to December 2005	500,000
October 2003	October 2003 to December 2005	500,000
October 2003	October 2003 to December 2005	500,000
November 2003	November 2003 to December 2005	500,000
July 1999	July 1999 to June 2004	US\$ 2,857

## d) Option contracts

During 2004, the Company did not enter into any foreign currency option contracts.

There were no outstanding option contracts as of December 31, 2003. The Company entered into foreign currency option contracts for hedging purposes; therefore, the related premiums and the foreign exchange gain or loss are recognized in the foreign exchange loss, net account.

## e) Transaction risk

- i) Credit risk. Credit risk represents the positive net settlement amount of those contracts with positive fair values at the balance sheet date. The positive net settlement amount represents the loss incurred by the Company if the counter-parties breached the contracts. The banks, which are the counter-parties to the foregoing derivative financial instruments, are reputable financial institutions. Management believes its exposure related to the potential default by those counter-parties is low.
- ii) Market price risk. All derivative financial instruments are intended as hedges for fluctuations in foreign exchange rates and interest rates. Gains or losses from these hedging instruments are likely to be offset by gains or losses from the hedged items. Interest rate risks are also controlled as the expected cost of capital is fixed. Thus, market price risks are believed to be low.
- iii) Cash flow risk and the amount and period of future cash needs.

As of December 31, 2004, the Company's future cash needs for outstanding forward exchange contracts and cross currency swap contracts are as follows:

<b>Term</b>	<b>Inflow (In Thousands)</b>	<b>Outflow (In Thousands)</b>
Within one year	\$ 69,761,484 EUR 118,500	US\$ 2,312,081

The Company has sufficient operating capital to meet the above cash needs. In addition, there will be corresponding cash inflow for the cash outflow. Therefore, the cash flow risk is low.

2) Fair values of financial instruments were as follows:

	2004		2003	
	Carrying Amount (In Thousands)	Fair Value	Carrying Amount (In Thousands)	Fair Value
<u>Non-derivative financial instruments</u>				
Assets				
Short-term investments, net	\$ 54,107,951	\$ 54,990,545	\$ 13,611,536	\$ 14,054,511
Long-term investments (securities with market price)	31,165,721	34,265,072	4,103,926	10,976,671
Liabilities				
Bonds payable (including current portion)	30,000,000	30,607,341	35,000,000	35,850,377
<u>Derivative financial instruments</u>				
Forward exchange contracts (buy)			2,351	3,037
Forward exchange contracts (sell)	391,975	317,090	(99,984)	40,638
Cross currency swap contracts	761,030	760,012		
Interest rate swap contracts	4,361	(22,714)		2,093

The above financial instruments do not include cash and cash equivalents, receivables, other financial assets, payables, and payable to contractors and equipment suppliers. The carrying amounts of the aforementioned instruments reported in the balance sheet approximate their fair values.

The above financial instruments also exclude refundable deposits, guarantee deposits, long-term investments that do not have quoted market prices as well as other long-term payables. The future cash inflow and outflow of the deposits approximate their fair values. Some of long-term investments do not have quoted market prices; therefore, fair values for those long-term investments are not shown above. The fair value of other long-term payables is determined using the discounted value of expected cash flows, which approximates the carrying value.

Fair values of financial instruments were determined as follows:

- a) Fair value of short-term and publicly traded long-term investments is based on quoted market prices.
- b) The fair value of bonds payable is the quoted market value.
- c) Fair value of derivative financial instruments is the amount receivable from or payable to the counter-party if the contracts were terminated on the balance sheet date.

k. Information on investment in Mainland China

- 1) The name of the investee company in mainland China, the main businesses and products, its issued capital, method of investment, information on inflow or outflow of capital, ratio of ownership, equity in the net gain or net loss, ending balance, amount received as earnings distributions from the investment, and the limitation on investment: Please see Table 9 attached.

- 2) Significant direct or indirect transactions with the investee company, its prices and terms of payment, unrealized gain or loss, and other related information which is helpful to understand the impact of investment in mainland China on financial reports: Please see Note 20.

## INDEPENDENT ACCOUNTANTS REVIEW REPORT

The Board of Directors and Shareholders  
Taiwan Semiconductor Manufacturing Company Ltd.

We have reviewed the combined balance sheet as of December 31, 2004 and the related combined statement of income for the year then ended of Taiwan Semiconductor Manufacturing Company Ltd. and affiliates. Our review was made in accordance with the Guidelines for the Review of Combined Financial Statements of Affiliates. It is substantially less in scope than an examination in accordance with auditing standards generally accepted in the Republic of China (R.O.C.), the objective of which is the expression of an opinion regarding the combined balance sheet and the combined statement of income taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the combined balance sheet and the combined statement of income referred to above in order for them to be in conformity with the Criteria Governing Preparation of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises in the R.O.C., and the R.O.C. regulations governing the preparation of financial statements of public company and generally accepted accounting principles in the R.O.C.

January 13, 2005 (January 30, 2005 as to Note 23o)

### Notice to Readers

*The accompanying combined financial statements are intended only to present the combined financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdiction. The standards, procedures and practices to audit such combined financial statements are those generally accepted and applied in the Republic of China.*

*For the convenience of readers, the accountants' review report and the accompanying combined financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language accountants' review report and combined financial statements shall prevail.*

**1. GENERAL**

Taiwan Semiconductor Manufacturing Company Ltd. (TSMC), a Republic of China (R.O.C.) corporation, was incorporated as a venture among the Government of the R.O.C., acting through the Development Fund of the Executive Yuan; Philips Electronics N.V. and certain of its affiliates (Philips); and certain other private investors. On September 5, 1994, its shares were listed on the Taiwan Stock Exchange (TSE). On October 8, 1997, TSMC listed some of its shares of stock on the New York Stock Exchange (NYSE) in the form of American Depositary Shares (ADSs).

TSMC is engaged mainly in the manufacturing, selling, packaging, testing and computer-aided designing of integrated circuits and other semiconductor devices, and the manufacturing of masks.

TSMC has six direct wholly-owned subsidiaries: TSMC International Investment Ltd. (TSMC International), TSMC North America (TSMC North America), Taiwan Semiconductor Manufacturing Company Europe B.V. (TSMC Europe), TSMC Japan K. K. (TSMC Japan), TSMC (Shanghai) Company Limited (TSMC Shanghai) and TSMC Partners, Ltd. (TSMC Partners). In addition, TSMC has the following consolidating subsidiaries: a 99.5% owned subsidiary, Emerging Alliance Fund, L.P. (Emerging Alliance), a 98% owned subsidiary, VentureTech Alliance Fund II, L.P. (VTAF II) and two 36% owned affiliates Chi Cherng Investment Co., Ltd. (Chi Cherng, which is 36% owned by TSMC and 64% owned by Hsin Ruey Investment Co., Ltd.) and Hsin Ruey Investment Co., Ltd. (Hsin Ruey, which is 36% owned by TSMC and 64% owned by Chi Cherng). TSMC International has two wholly-owned subsidiaries TSMC Development, Inc. (TSMC Development) and TSMC Technology, Inc. (TSMC Technology), and two 97% owned subsidiaries InveStar Semiconductor Development Fund, Inc. (InveStar) and InveStar Semiconductor Development Fund, Inc. (II) LDC (InveStar II). TSMC Development has a 99.996% owned subsidiary, WaferTech, LLC (WaferTech). TSMC has two affiliates over which TSMC exercises significant influence: a 47% owned affiliate, Global UniChip Corporation (GUC), and a 25% owned affiliate, VisEra Technologies Co., Ltd. (VisEra). GUC has a wholly-owned subsidiary, Global Unichip Corp. NA (GUC NA).

The following diagram presents information regarding the relationship and ownership percentages among TSMC and its affiliates as of December 31, 2004:

TSMC North America is engaged in the sales and marketing of integrated circuits and semiconductor devices. TSMC Europe and TSMC Japan are engaged mainly in marketing activities. TSMC Technology is engaged mainly in engineering support activities. TSMC Shanghai is engaged in the manufacturing and marketing of integrated circuits and other semiconductor devices. TSMC Partners, TSMC Development, Chi Cherng and Hsin Ruy are engaged in investing activities. TSMC International is engaged in providing investment in companies involved in the design, manufacture, and other related business in the semiconductor industry. Emerging Alliance, VTAF II, InveStar and InveStar II are engaged in investing in new start-up technology companies. WaferTech is engaged in the manufacturing, selling, testing and computer-aided designing of integrated circuits and other semiconductor devices. GUC is engaged in the researching, developing, manufacturing, testing and marketing of integrated circuits. VisEra is engaged in the manufacturing, material wholesaling and retailing of electronic spare parts. GUC NA is engaged in providing consulting services for products in the North America region.

## **2. SIGNIFICANT ACCOUNTING POLICIES**

The combined financial statements are presented in conformity with Criteria Governing Preparation of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises in the R.O.C. and regulations governing the preparation of financial statements of public companies and generally accepted accounting principles in the R.O.C.

For the convenience of readers, the accompanying combined financial statements have been translated into English from the original Chinese version prepared and used in the R.O.C. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language financial statements shall prevail.

Significant accounting policies are summarized as follows:

### **Combination**

All significant intercompany balances and transactions have been eliminated in the combined financial statements. The combined financial statements include, as of and for the year ended December 31, 2004, the accounts of all directly and indirectly majority owned subsidiaries of TSMC, and the accounts of GUC, GUC NA and VisEra that TSMC exercises significant influence on. TSMC and the foregoing affiliates are hereinafter referred to collectively as the Company .

Minority interests in the aforementioned affiliates are presented separately in the combined financial statements.

### **Use of Estimates**

The preparation of financial statements in conformity with the aforementioned regulations and principles requires management to make reasonable assumptions and estimates of matters that are inherently uncertain. The actual results may differ from management's estimates.

### **Classification of Current and Noncurrent Assets and Liabilities**

Current assets are those expected to be converted to cash, sold or consumed within one year from the balance sheet date. Current liabilities are obligations due on demand within one year from the balance sheet date. Assets and liabilities that are not classified as current are noncurrent assets and liabilities, respectively.

### **Cash Equivalents**

Government bonds under repurchase agreements and notes acquired with maturities less than three months from the date of purchase are classified as cash equivalents.

-6-

---

### **Short-term Investments**

Short-term investments primarily consist of corporate bonds, asset-backed securities, bond and stock funds, agency bonds, government bonds and others.

Short-term investments are recorded at historical cost and are carried at the lower of cost or market value as of the balance sheet date. An allowance for decline in value is provided and is charged to current earnings when the aggregate carrying value of the investments exceeds the aggregate market value. A reversal of the allowance is recorded for a subsequent recovery of the market value.

The cost of funds and listed stocks sold are accounted for using the weighted-average method; whereas the other securities are accounted for using the specific identification method.

The market value of funds is determined using the net asset value of the funds at the end of the year, and the market value of listed stocks is determined using the average-closing price of the listed stocks for the last month of the year. The others are determined using the average of bid and ask prices as of the balance sheet date.

Cash dividends are recorded as investment income in the current year.

### **Allowance for Doubtful Receivables**

Allowances for doubtful receivables are provided based on a review of the collectibility of accounts receivables. The Company determines the amount of allowance for doubtful accounts by examining the historical collection experience and current trends in the credit quality of its customers as well as its internal credit policies.

### **Revenue Recognition and Allowance for Sales Returns and Others**

The Company recognizes net sales when the earnings process is complete, as evidenced by an agreement with the customer, transfer of title and acceptance have occurred or services provided, if applicable, a fixed or determinable price and the collectibility is reasonably assured. Allowance for sales returns and pricing discounts is estimated based on historical experience and any known factors that would affect the allowance. Such provisions are deducted from sales in the year the products are sold and the estimated related costs are deducted from cost of sales.

Sales are determined using the fair value taking into account related sales discounts agreed to by the Company and its customers. Sales agreements typically provide that payment is due 30 days from invoice date for a majority of the customers and 30 to 45 days after the end of the month in which the sales occur for some customers. Since the receivables from sales are collectible within one year and such transactions are frequent, the fair value of receivables is equivalent to the nominal amount of cash received.

### **Inventories**

Inventories are stated at the lower of cost or market value. Inventories are recorded using the weighted-average cost method, or recorded at standard cost and adjusted to the approximate weighted-average cost at the end of the year. Market value represents net replacement cost for raw materials, supplies and spare parts. Market value represents net realizable value for finished goods and work in process. The Company assesses the impact of changing technology on its inventory on hand and writes off inventories that are considered obsolete. Ending inventories are evaluated for estimated excess quantities and obsolescence based on demand forecast within a specific time horizon, generally 180 days or less, and the estimated losses on scrap and slow-moving items are

recognized in the allowance for losses.

---

### **Long-term Investments**

Investments in companies wherein the Company exercises significant influence on the operating and financial policy decisions are accounted for using the equity method of accounting. The Company's proportionate share in the net income or net loss of investee companies is recognized in the investment income/loss recognized by equity method, net account. When equity investments are made, the difference, if any, between the cost of investment and the Company's proportionate share of investee's net equity is amortized using the straight-line method over five years and is recorded in the investment income/loss recognized by equity method, net account.

When the Company subscribes to additional investee shares at a percentage different from its existing equity interest, the resulting carrying amount of the investment in the investee differs from the amount of Company's proportionate share in the investee's net equity. The Company records such difference as an adjustment to long-term investments with the corresponding amount charged or credited to capital surplus.

Investments in companies wherein the Company does not exercise significant influence are recorded at historical cost. Cash dividends are recognized as investment income in the year received but are accounted for as reductions in the carrying amount of the long-term investments if the dividends are received in the same year that the related investments are acquired. Stock dividends are recorded as an increase in the number of shares held and do not affect investment income or the carrying amount of the investment. An allowance is recognized for any decline in the market value of investments with readily ascertainable fair market value with the corresponding amount recorded as an unrealized loss, a component of shareholders' equity. A reversal of the allowance will result from a subsequent recovery of the market value of such investments. The carrying amounts of investments whose fair market values are not readily ascertainable are reduced to reflect an other-than-temporary decline in their values, with the related impairment loss charged to income.

Investments in foreign mutual funds are stated at the lower of aggregate cost or net asset value. An allowance is recognized when the net assets value of the funds is lower than their cost, with the corresponding amount recorded as a reduction to shareholders' equity. A reversal of the allowance will result from a subsequent recovery of the net asset value.

The costs of stocks and mutual funds sold are determined using the weighted-average method.

Investments in long-term bonds are stated at amortized cost. The discount or premium is amortized over the duration period using the interest method, and recorded as an adjustment to interest income.

When investments in publicly-traded stocks are reclassified from short-term investments to long-term investments or from long-term investments to short-term investments, the Company recognizes a loss to the extent, if any, that the market value of such investments is lower than the carrying amount, and the market value becomes the new basis.

If an investee company recognizes an unrealized loss on its long-term investments using the lower-of-cost-or-market method, the Company also recognizes a corresponding unrealized loss in proportion to its ownership percentage in the investee company and records the amount as a component of its shareholders' equity.

Gains or losses on sales from the Company to investee companies accounted for using the equity method are deferred in proportion to the Company's ownership percentage in the investee companies until realized through transactions with third parties. The entire amount of the gains or losses on sales to majority-owned subsidiaries is deferred until such gains or losses are realized through the subsequent sales of the related products to third parties.

Gains or losses on sales from investee companies to the Company are deferred in proportion to the Company's ownership percentages in the investee companies until realized through transactions with third parties.

---

If an investee's functional currency is a foreign currency, translation adjustments will result from the process of translating the investee's financial statements into the reporting currency of the Company. Such adjustments are accumulated and reported as a separate component of shareholders' equity.

**Property, Plant and Equipment,  
Assets Leased to Others, Leased  
Assets and Idle Assets**

Property, plant and equipment and assets leased to others are stated at cost less accumulated depreciation. When impairment is determined, the related assets are stated at the lower of fair value or book value. Idle assets are stated at the lower of net realizable value or book value. Significant additions, renewals and betterments incurred during the construction period are capitalized. Maintenance and repairs are expensed in the year incurred. Interest expense incurred for the project during the purchase and construction period is also capitalized. Properties covered by agreements qualifying as capital leases are carried at the lower of the leased equipment's market value or the present value of the minimum lease payments at the inception date of the lease.

Depreciation is computed using the straight-line method over the following estimated service lives: land improvements 20 years; buildings 10 to 50 years; machinery and equipment 3 to 10 years; office equipment 3 to 15 years; leased assets 20 years and other equipment 3 to 10 years.

Upon sale or disposal of property, plant and equipment, the related cost and accumulated depreciation are removed from the corresponding accounts, with any gain or loss credited or charged to non-operating income or expenses in the year of sale or disposal.

### **Goodwill**

Goodwill represents the excess of the consideration paid for acquisition over the fair market value of identifiable net assets acquired and acquisition costs. Goodwill is amortized using the straight-line method over the estimated life of 10 years.

### **Deferred Charges**

Deferred charges consist of technology license fees, software and system design costs and other charges. The amounts are amortized as follows: technology license fees the shorter of the estimated life of the technology or the term of the technology transfer contract, software and system design costs and other charges 2 or 5 years.

### **Pension Costs**

Net periodic pension costs are recorded based on actuarial calculations. The unrecognized net gains or losses and unrecognized net transition obligation are amortized over 25 years or over the remaining service period of the employees.

### **Income Tax**

The Company uses an inter-period tax allocation method for income tax. Deferred income tax assets and liabilities are recognized for the tax effects of temporary differences, unused tax credits, and net operating

loss carryforwards. Valuation allowances are provided to the extent, if any, that it is more likely than not that deferred income tax assets will not be realized. A deferred tax asset or liability is classified as current or non-current in accordance with the classification of its related asset or liability. However, if a deferred tax asset or liability does not relate to an asset or liability in the financial statements, then it is classified as either current or noncurrent based on the expected length of time before it is realized or settled.

Any tax credits arising from the purchases of machinery, equipment and technology, research and development expenditures, personnel training, and investments in important technology-based enterprises are recognized using the flow-through method.

Adjustments to prior years' tax liabilities are added to or deducted from the current year's tax provision.

Income taxes on unappropriated earnings (excluding earnings from foreign combined affiliates) of 10% are expensed in the year of shareholder approval which is the year subsequent to the year the earnings are generated.

### **Stock-based Compensation**

Employee stock option plans that are amended or have options granted on or after January 1, 2004 must be accounted for by the interpretations issued by the Accounting Research and Development Foundation. The Company adopted the intrinsic value method and any compensation cost determined using this method is charged to expense over the employee vesting period.

### **Treasury Stock**

When the Company repurchases its outstanding common stock, the cost of the reacquired stock is recorded as treasury stock as a reduction to shareholders' equity. When the Company retires treasury stock, the treasury stock account is reduced and the common stock as well as the capital surplus-additional paid-in capital are reversed in proportionate to the equity percentage of the retirement. When the book value of the treasury stock exceeds the sum of the par value and additional paid-in capital, the difference is charged to capital surplus - treasury stock and to retained earnings for any remaining amount. The Company's stock held by its subsidiaries is also treated as treasury stock and reclassified from long-term investments to treasury stock. The cash dividends received by the subsidiaries from the Company are recorded under capital surplus - treasury stock.

### **Foreign-currency Transactions**

Foreign currency transactions are recorded in New Taiwan dollars at the rates of exchange in effect when the transactions occur. Exchange gains or losses derived from foreign currency transactions or monetary assets and liabilities denominated in foreign currencies are recognized in current income. At the end of each year, assets and liabilities denominated in foreign currencies are revalued at the prevailing exchange rates with the resulting gains or losses recognized in current income.

### **Derivative Financial Instruments**

The Company enters into foreign currency forward contracts to manage currency exposures in cash flow and in foreign-currency-denominated assets and liabilities. The contracts are recorded in New Taiwan dollars at the current rate of exchange of the contract date. The differences in the New Taiwan dollar amounts translated using the spot rates and the amounts translated using the contracted forward rates on the contract date are amortized over the terms of the forward contracts using the straight-line method. At the end of each year, the receivables or payables arising from forward contracts are restated using the prevailing spot rates at the balance sheet date with the resulting differences charged to income. In addition, the receivables and payables related to the forward contracts of the same counter party are netted with the resulting amount presented as either an asset or a liability. Any resulting gain or loss upon settlement is credited or charged to income in the year of settlement.

The Company enters into cross-currency swap contracts to manage currencies exposures on foreign currency denominated assets and liabilities. The principal amount is recorded using the spot rates at the contract date. The differences in the New Taiwan dollar amounts translated using the spot rates and the amounts translated using the contracted rates on the contract date are amortized over the terms of the contracts using the straight-line method. At the end of each year, the receivables or payables arising from cross-currency swap contracts are restated using the prevailing spot rate with the resulting differences charged to income. In addition, the receivables and payables

related to the contracts are netted with the resulting amount presented as either an asset or a liability. The difference in interest computed pursuant to the contracts on each settlement date or the balance sheet date is recorded as an adjustment to the interest

-10-

---

income or expense associated with the hedged items. Any resulting gain or loss upon settlement is credited or charged to income in the year of settlement.

The Company enters into interest rate swap contracts to manage exposures to changes in interest rates on existing assets or liabilities. These transactions are accounted for on an accrual basis, in which the cash settlement receivable or payable is recorded as an adjustment to interest income or expense associated with the hedged items.

### Translation of Foreign-currency Financial Statements

R.O.C. SFAS No. 14, Accounting for Foreign-currency Transactions, applies to foreign subsidiaries that use the local foreign currency as their functional currency. The financial statements of foreign subsidiaries are translated into New Taiwan dollars at the following exchange rates: Assets and liabilities current rate on balance sheet date; shareholders equity historical rate; income and expenses average rate during the year. The resulting translation adjustment is recorded as a separate component of shareholders equity.

During the year ended December 31, 2004, the Company deposited funds into structured-time deposits with the following terms:

The interest rate of the step-up callable deposits is determined by the Company and the related banks.

The amount of interest earned by the Company for the callable range accrual deposits is based on a pre-defined range as determined by the 3-month or 6-month LIBOR rate plus an agreed upon rate ranging between 2.1% and 3.45%. Based on the terms of the deposits, if the 3-month or 6-month LIBOR rate moves outside of the pre-defined range, the interest paid to the Company is at a minimum rate of 1.5%. Under the term of the contracts, the bank has the right to cancel the contracts prior to the maturity date.

Deposits that reside in banks located in Hong Kong and Singapore amounted to NT\$2,553,360 thousand and NT\$638,340 thousand, respectively.

## 17. SHAREHOLDERS EQUITY

TSMC has issued a total of 668,351 thousand ADSs which are traded on the NYSE as of December 31, 2004. The number of common shares represented by the ADSs is 3,341,754 thousand shares (one ADS represents five common shares).

-20-

---

Capital surplus can only be used to offset a deficit under the Company Law of the R.O.C. However, the capital surplus generated from donations and the excess of the issue price over the par value of capital stock (including the stock issued for new capital, mergers, convertible bonds and the surplus arising from treasury stock transactions) may be appropriated as stock dividends restricted to a certain percentage based on shareholders' ownership.

As of December 31, 2004, the capital surplus consisted of the following:

	<b>2004</b>
From merger	\$ 24,003,546
Additional paid-in capital	23,051,675
From long-term investments	121,354
From convertible bonds	9,360,424
Donations	55
Treasury stock	205
Total	 \$ 56,537,259

TSMC's Articles of Incorporation, as revised on December 21, 2004, provide that the following shall be appropriated from annual earnings to the extent that the annual earnings exceed any cumulative deficit:

- a. 10% legal reserve; until the amount of total legal reserve equals the TSMC's paid-in capital;
- b. Special reserve in accordance with relevant laws or regulations;
- c. Remuneration to directors and supervisors and bonuses to employees at 0.3% and at least 1% of the remainder, respectively. Individuals eligible for the employee bonuses may include employees of affiliated companies as approved by the board of directors or a representative of the board of directors;
- d. The appropriation of any remaining balance shall be approved by the shareholders.

Dividends may be distributed by way of cash dividend or stock dividend at the discretion of TSMC. As the operation of TSMC is at a steady growth stage, distribution of profits shall be made preferably by way of cash dividend. Distribution of profits may also be made by way of stock dividend; provided however, the ratio for stock dividend shall not exceed 50% of total distribution.

Any appropriations of net income are recorded in the financial statements in the year of shareholder approval.

An appropriation for legal reserve is required until the reserve equals the aggregate par value of TSMC's issued capital stock. The reserve can only be used to offset a deficit or be distributed as a stock dividend up to 50% of the reserve balance when the reserve balance has reached 50% of the aggregate par value of the issued capital stock of TSMC.

A special reserve equivalent to the net debit balance of the other components of shareholder's equity (for example, unrealized loss on long-term investments and cumulative translation adjustments, but excluding treasury stock), shall be made from unappropriated earnings pursuant to existing regulations promulgated by the R.O.C. Securities and Futures Bureau (SFB). Any special reserve appropriated may be reversed to the extent that the net debit balance of the related account reverses.

The appropriation of the earnings of 2003 was approved in the shareholders meeting on May 11, 2004. The appropriations and dividend per share are as follows:

	<b>Appropriation of Earnings</b>	<b>Dividend Per Share (NT\$)</b>
Legal reserve	\$ 4,725,870	
Special reserve	(68,945)	
Bonus paid to employees in cash	681,628	
Bonus paid to employees in stock	2,726,514	
Preferred stock dividend in cash	184,493	\$ 0.35
Common stock dividend in cash	12,159,971	0.60
Common stock dividend in stock	28,373,267	1.41
Remuneration to directors and supervisors in cash	127,805	
	<b>\$ 48,910,603</b>	

The amount of the above appropriation of earnings for 2003 is consistent with the resolution of the meeting of board of directors on February 17, 2004. However, the Company Law of the R.O.C. states TSMC, as a holder of treasury stock shall not participate in the appropriations of earnings. Therefore, the actual cash dividend per share and stock dividend per share are slightly more than those in the aforementioned resolution. If the above employee bonus paid in stock had been paid in cash and all of the bonus to employees and remuneration to directors and supervisors had been charged against income for 2003, the after income tax basic earnings per share for the year ended December 31, 2003 would have decreased from NT\$2.33 to NT\$2.15. The shares distributed as a bonus to employees represented 1.35% of TSMC's total outstanding common shares as of December 31, 2003.

As of January 13, 2005, the board of directors of TSMC has not resolved the appropriation for earnings of 2004.

The above information about the appropriations of bonus to employees and remuneration to directors and supervisors is available at Market Observation System website.

Under the Integrated Income Tax System that became effective on January 1, 1998, the R.O.C. resident shareholders are allowed a tax credit for their proportionate share of the income tax paid by TSMC on earnings generated since January 1, 1998.

## 18. STOCK-BASED COMPENSATION PLANS

### Stock Option Plans

TSMC's Employee Stock Option Plans, the TSMC 2003 Plan and the TSMC 2002 Plan, were approved on October 29, 2003 and June 25, 2002, respectively. The maximum number of units authorized to be granted under the TSMC 2003 Plan and the TSMC 2002 Plan is 120,000 thousand and 100,000 thousand, respectively, with each unit representing one common share of stock. The option rights may be granted to qualified employees of TSMC or any of its domestic or foreign subsidiaries, in which TSMC's shareholding with voting rights, directly or indirectly, is more than fifty percent (50%). The option rights of both plans are valid for ten years and exercisable at certain percentages subsequent to the second anniversary of the grant date. Under the terms of the plans, stock

option rights are granted at an exercise price equal to the closing price of TSMC's common shares listed on the TSE on the date of grant. Under the TSMC 2003 Plan and the TSMC 2002 Plan, units that were never granted, or had been granted and subsequently cancelled were expired as of December 31, 2004.

---

GUC's Employee Stock Option Plans, the GUC 2003 Plan and the GUC 2002 Plan, were approved on January 23, 2003 and July 1, 2002, respectively. The maximum number of units authorized to be granted under the GUC 2003 Plan and the GUC 2002 Plan is 7,535 units and 5,000 units, respectively, with each unit representing one thousand common shares of stock. The option rights may be granted to qualified employees of GUC. The option rights of both plans are valid for six years and exercisable at certain percentages subsequent to the second anniversary of the grant date. Under the GUC 2002 Plan and the GUC 2003 Plan, units that were never granted, or had been granted and subsequently cancelled were expired as of December 31, 2004.

On August 16, 2004, GUC's 2004 stock option plan (the GUC 2004 Plan) was approved by the Bureau of Monetary Affairs, Financial Supervisory Commission of the R.O.C. The maximum number of units authorized to be granted is 2,500 units, with each unit representing one thousand common shares of stock. The option rights may be granted to qualified employees of GUC and its subsidiary. The option rights of GUC 2004 plan are valid for six years and exercisable at certain percentages subsequent to the second anniversary of the grant date. As of December 31, 2004, no option rights under the GUC 2004 Plan have been granted.

On November 2, 2004, the board of directors of TSMC approved the 2004 stock option plan (the TSMC 2004 Plan), in which the maximum number of units authorized to be granted is 11,000 thousand, with each unit representing one common share of stock. The option rights may be granted to qualified employees of TSMC or any of its domestic or foreign subsidiaries, in which TSMC's shareholding with voting rights, directly or indirectly, is more than fifty percent (50%). The option rights of the plans are valid for ten years and exercisable at certain percentages subsequent to the second anniversary of the grant date. Under the terms of the plan, stock option rights are granted at an exercise price equal to the closing price of TSMC's common shares listed on the TSE on the date of grant. The TSMC 2004 plan was approved by the Bureau of Monetary Affairs, Financial Supervisory Commission of the R.O.C. on January 6, 2005.

In 1996, WaferTech adopted an Executive Incentive Plan, which was amended in 1997. According to the 1997 amendment, the Board of Directors of WaferTech approved the Senior Executive Incentive Plan and the Employee Incentive Plan (the WaferTech Plans) under which officers, key employees and non-employee directors may be granted stock option rights. The WaferTech Plans provide for 15,150 thousand option rights available for grant. For option rights granted to date, the option purchase price was equal to or exceeded the fair market value at the date of grant. The options will expire if not exercised at specified dates ranging from May 2006 and June 2011. In December 2000, WaferTech implemented a Stock Option Buyback Program (Buyback). The Buyback program provides employees with the right to sell back to WaferTech all vested stock options and outstanding ownership interests granted under the WaferTech Plans. As of December 31, 2004, the outstanding and exercisable stock options were 134 thousand and 133 thousand, respectively, and US\$616 thousand was accrued in connection with the Buyback program.

### Stock Appreciation Rights

In December 2000, WaferTech and TSMC North America implemented a stock appreciation rights program (Appreciation). The Appreciation plan is designed to provide employees with a long-term incentive plan that tracks the appreciation of TSMC common stock through Stock Appreciation Rights (SARs). SARs provide each participant the right to receive, upon exercise, an amount in cash from WaferTech and TSMC North America that is the excess of the market price of TSMC common stock on TSE on the date of exercise over the exercise price. As of December 31, 2004, WaferTech and TSMC North America accrued US\$381 thousand and US\$1,360 thousand, respectively, in connection with the Appreciation. During 2002, benefits under the Appreciation plan for TSMC North America were replaced by the TSMC stock option plans aforementioned.

## 23. SIGNIFICANT COMMITMENTS AND CONTINGENCIES

The significant commitments and contingencies of the Company as of December 31, 2004 are as follows:

- a. On June 20, 2004, TSMC and Philips revised the Technical Cooperation Agreement, which was originally signed on May 12, 1997, with an effective date from January 1, 2004 for five years. Upon expiration, this amended Technical Cooperation Agreement will be terminated at the expiration date and will not be automatically renewed. Under this amended Technical Cooperation Agreement, TSMC will pay Philips royalties based on fixed amounts mutually agreed-on, rather than under certain percentage of TSMC's annual net sales. TSMC and Philips also agree to cross license the patents owned by each party. TSMC also obtained through Philips a number of patent cross licenses.
- b. Under a technical cooperation agreement with ITRI, TSMC shall reserve and allocate up to 35% of certain of its production capacity for use by the Ministry of Economic Affairs (MOEA) or any other party designated by the MOEA.
- c. Under several foundry agreements, TSMC shall reserve a portion of its production capacity for certain major customers that have guarantee deposits with TSMC. As of December 31, 2004, TSMC had a total of US\$12,802 thousand of guarantee deposits.

- d. Under a Shareholders Agreement entered into with Philips and EDB Investments Pte Ltd. on March 30, 1999, the parties formed a joint venture company, SSMC, for the purpose of constructing an integrated circuit foundry in Singapore. As of December 31, 2004, TSMC's equity interest in SSMC was 32%. TSMC and Philips committed to buy specific percentages of the production capacity of SSMC. If any party defaults on the commitment and the capacity utilization of SSMC falls below a specific percentage of its total capacity, the defaulting party is required to compensate SSMC for all related unavoidable costs.
- e. TSMC provides technical services to SSMC under a Technical Cooperation Agreement (the Agreement) entered into on May 12, 1999. TSMC receives compensation for such services computed at a specific percentage of net selling price of certain products sold by SSMC. The Agreement shall remain in force for ten years and may be automatically renewed for successive periods of five years each unless pre-terminated by either party under certain conditions.
- f. Under a Technology Transfer Agreement (TTA) with National Semiconductor Corporation (National) entered into on June 27, 2000, TSMC shall receive payments for the licensing of certain technology to National. The agreement was to remain in force for ten years and could be automatically renewed for successive periods of two years thereafter unless either party gives notice for early termination under certain conditions. In January 2003, TSMC and National entered into a Termination Agreement whereby the TTA was terminated for convenience. Under the Termination Agreement, TSMC will be relieved of any further obligation to transfer any additional technology. In addition, TSMC granted National an option to request the transfer of certain technologies under the same terms and conditions as the terminated TTA. The option will expire in January 2008.
- g. Beginning in 2001, TSMC entered into several licensing arrangements for certain semiconductor patents. The terms of the contracts range from five to ten years with payments to be made in the form of royalties over the term of the related contracts. TSMC has recorded the related amounts as a liability with the corresponding amounts recorded as deferred charges which are amortized and charged to cost of sales on a straight-line basis over the estimated life of the technology or the term of the contract, whichever is shorter.
- h. In November 2002, TSMC entered into an Amended and Restated Joint Technology Cooperation Agreement with Philips, Motorola, Inc. and STMicroelectronics to jointly develop 90-nm to 65-nm advanced CMOS Logic and e-DRAM technologies. TSMC also agreed to align 0.12 micron CMOS Logic technology to enhance its foundry business opportunities. TSMC will contribute process technologies and share a portion of the costs associated with this joint development project.
- i. In December 2003, TSMC entered into a Technology Development and License Agreement with Motorola, Inc. to jointly develop 65-nm SOI (silicon on insulator) technology. TSMC will also license related 90-nm SOI technology from Motorola, Inc. Any intellectual properties arising out of the co-development project shall be jointly owned by the parties. In accordance with the agreement, TSMC will pay royalties to Motorola, Inc. and will share a portion of the costs associated with the joint development project.
- j. TSMC provides a technology transfer to VIS under a Manufacturing License and Technology Transfer Agreement entered into in August 2004. TSMC receives compensation for such technology transfer in the form of royalty payments from VIS computed at specific percentages of net selling price of certain products sold by VIS. VIS agreed to reserve its certain capacity to manufacture for TSMC certain products at prior as agreed by the parties.
- k. Under an agreement signed with a certain company, TSMC Shanghai has the obligation to purchase certain assets within a specified period at the price agreed upon by both parties. TSMC Shanghai will compensate the

other party in case of a breach of the agreement.

- l. GUC entered into a research and development project (DSP core) with the SPA. In accordance with the contract, the SPA provided a NT\$13,522 thousand grant (DSP grants) to GUC during the period of January 2000 to June 2001 for the development of new products. GUC should repay the loan after the accomplishment of the project. In addition, GUC should also pay the SPA a 2% royalty fee based on the sales of the developed products every three months for the subsequent three years, starting from the first date of the product sale. The total royalty should not exceed 60% of the DSP grants.
- m. GUC entered into a research and development project (Platform Development for System-On-a-Chip Integration, Verification and Testing) with the SPA. In accordance with the contract, the SPA provided a NT\$13,923 thousand grant (SOC grants) to GUC during the period of April 2001 to September 2002 for the development of new products. GUC should repay the loan after the accomplishment of the project. In addition, GUC should also pay the SPA a 2% royalty fee based on the sales of the developed products every three months for the subsequent three years, starting from the first date of the product sale. The total royalty should not exceed the 60% of the SOC grants.
- n. Amounts available under unused letters of credit as of December 31, 2004 were NT\$6,480 thousand, US\$1,282 thousand and SG\$85 thousand. Among the unused letters of credit, TSMC - North America has an outstanding irrevocable standby letter of credit for US\$1,078 thousand. The standby letter of credit was entered into as security to the landlord of TSMC North America's office spaces in San Jose, California. The standby letter of credit will expire in October, 2005.
- o. The Company filed a series of lawsuits in late 2003 and 2004 in both state and federal courts in California and with the U.S. International Trade Commission against Semiconductor Manufacturing International Corporation (SMIC), SMIC (Shanghai), and SMIC Americas. The lawsuits alleged that SMIC companies infringed multiple patents of the Company and misappropriated the Company's trade secrets. These suits have been settled out of court on January 30, 2005. As part of the agreement, SMIC will pay TSMC US\$175 million over six years to resolve the Company's patent infringement and trade secret claims.

j. Financial instrument transactions:

1) Derivative financial instruments

The Company entered into derivative financial instrument transactions for the year ended December 31, 2004 to manage exposures related to foreign exchange rate and interest rate fluctuations. Certain information on these contracts is as follows:

a) Outstanding forward exchange contracts as of December 31, 2004 are as follows:

<b>Financial Instruments</b>	<b>Currency</b>	<b>Maturity Date</b>	<b>Contract Amount (in Thousands)</b>	
		January 2005 to		
Sell	US\$/NT\$	March 2005	US\$	733,000
Sell	US\$/EUR	January 2005	US\$	159,081

As of December 31, 2004, receivables from forward exchange contracts (included in the other financial assets account) aggregate to approximately NT\$392,534 thousand; payables from forward exchange contracts (included in the other current liabilities account) aggregate to approximately NT\$559 thousand.

b) Cross currency swaps

Outstanding cross currency swap contracts as of December 31, 2004 are as follows:

<b>Maturity Date</b>	<b>Contract Amount (in Thousands)</b>	<b>Range of Interest Rate Paid</b>	<b>Range of Interest Rate Received</b>
January 2005 to June 2005	US\$1,420,000	1.28%-2.72%	0.49%-1.17%

As of December 31, 2004, receivables from the cross currency swap contracts (included in the other financial assets account) were approximately NT\$761,030 thousand.

Net exchange gain or loss arising from forward exchange contracts and cross currency swap contracts was recognized in the foreign exchange loss, net account and the difference in interest was recorded in interest income or expense.

c) Interest rate swaps

Outstanding contracts as of December 31, 2004 were as follows:

<b>Contract Date</b>	<b>Period</b>	<b>Contract Amount</b>
September 2003	September 2003 to December 2005	\$ 500,000
October 2003	October 2003 to December 2005	500,000

## d) Transaction risk

- i) Credit risk. Credit risk represents the positive net settlement amount of those contracts with positive fair values at the balance sheet date. The positive net settlement amount represents the loss incurred by the Company if the counter-parties breached the contracts. The banks, which are the counter-parties to the foregoing derivative financial instruments, are reputable financial institutions. Management believes its exposure related to the potential default by those counter-parties is low.
- ii) Market price risk. All derivative financial instruments are intended as hedges for fluctuations in foreign exchange rates and interest rates. Gains or losses from these hedging instruments are likely to be offset by gains or losses from the hedged items. Interest rate risks are also controlled as the expected cost of capital is fixed. Thus, market price risks are believed to be low.
- iii) Cash flow risk and the amount and period of future cash needs.

As of December 31, 2004, the Company's future cash needs for outstanding forward exchange contracts and cross currency swap contracts are as follows:

<b>Term</b>	<b>Inflow (In Thousands)</b>	<b>Outflow (In Thousands)</b>
Within one year	\$ 69,761,484	US\$ 2,312,081
	EUR 118,500	

The Company has sufficient operating capital to meet the above cash needs. In addition, there will be corresponding cash inflow for the cash outflow. Therefore, the cash flow risk is low.

## 2) Fair values of financial instruments were as follows:

	<b>2004</b>	
	<b>Carrying Amount</b>	<b>Fair Value</b>
<u>Non-derivative financial instruments</u>		
Assets		
Short-term investments, net	\$ 54,303,642	\$ 55,186,236
Long-term investments (securities with market price)	31,165,721	34,265,072
Liabilities		
Bonds payable (including current portion)	30,000,000	30,607,341
<u>Derivative financial instruments</u>		
Forward exchange contracts (sell)	391,975	317,090
Cross currency swap contracts	761,030	760,012
Interest rate swap contracts	4,361	(22,714)

The above financial instruments do not include cash and cash equivalents, receivables, other financial assets, payables, and payable to contractors and equipment suppliers. The carrying amounts of the aforementioned instruments reported in the balance sheet approximate their fair values.

The above financial instruments also exclude refundable deposits, guarantee deposits, long-term investments that do not have quoted market prices as well as other long-term payables. The future cash inflow and outflow of the deposits approximate their fair values. Some of long-term investments do not have quoted market prices; therefore, fair values for those long-term investments are not shown above. The fair value of other long-term payables is determined using the discounted value of expected cash flows, which approximates the carrying value.

Fair values of financial instruments were determined as follows:

- a) Fair value of short-term and publicly traded long-term investments is based on quoted market prices.
- b) The fair value of bonds payable is the quoted market value.
- c) Fair value of derivative financial instruments is the amount receivable from or payable to the counter-party if the contracts were terminated on the balance sheet date.

k. Information on investment in Mainland China

- 1) The name of the investee company in mainland China, the main businesses and products, its issued capital, method of investment, information on inflow or outflow of capital, ratio of ownership, equity in the net gain or net loss, ending balance, amount received as earnings distributions from the investment, and the limitation on investment: Please see Table 9 attached.
- 2) Significant direct or indirect transactions with the investee company, its prices and terms of payment, unrealized gain or loss, and other related information which is helpful to understand the impact of investment in mainland China on financial reports: Please see Note 21.
