SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 20-F/A

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended: **30 June 2003**

Commission file number: **1-10691**

DIAGEO plc

(Exact name of Registrant as specified in its charter)

England

(Jurisdiction of incorporation or organisation)

8 Henrietta Place, London W1G 0NB, England

(Address of principal executive offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
American Depositary Shares	New York Stock Exchange
Ordinary shares of 28 ^{101/108} pence each	New York Stock Exchange*
9.42% Cumulative guaranteed preferred securities, series A**	New York Stock Exchange

* Not for trading, but only in connection with the registration of American Depositary Shares representing such ordinary shares, pursuant to the requirements of the Securities and Exchange Commission.

** Issued by Grand Metropolitan Delaware, LP, of which the Registrant is the sole general partner, and guaranteed as to certain payments by the Registrant.

Securities registered or to be registered pursuant to Section 12(g) of the Act: None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the Annual Report: 3,099,593,537 ordinary shares of 28 ^{101/108} pence each.

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark which financial statement item the Registrant has elected to follow.

Item 17 Item 18

Edgar Filing: DIAGEO PLC - Form 20-F/A

This document comprises the annual report on Form 20-F and the annual report to shareholders for the year ended 30 June 2003 of Diageo plc (the 2003 Form 20-F). Reference is made to the cross reference to Form 20-F table on page 144 hereof (the Form 20-F Cross reference table). Only (i) the information in this document that is referenced in the Form 20-F Cross reference table, (ii) the cautionary statement concerning forward-looking statements on page 18 and (iii) the Exhibits, shall be deemed to be filed with the Securities and Exchange Commission for any purpose, including incorporation by reference into the Registration Statements on Form F-3 (File Nos. 333-10410, 333-14100 and 333-110804) and Registration Statements on Form S-8 (File Nos. 333-08090, 333-08092, 333-08094, 333-08096, 333-08098, 333-08100, 333-08102, 333-08104, 333-08106, 333-09770, 333-11460 and 333-11462), and any other documents, including documents filed by Diageo plc pursuant to the Securities Act of 1933, as amended, which purport to incorporate by reference the 2003 Form 20-F. Any information herein which is not referenced in the Form 20-F Cross reference table, or the Exhibits themselves, shall not be deemed to be so incorporated by reference.

This is the annual report on Form 20-F of Diageo plc for the year ended 30 June 2003.

The market data contained in this document is taken from independent industry sources in the markets in which Diageo operates.

Edgar Filing: DIAGEO PLC - Form 20-F/A

The reporting format has been revised to separate goodwill amortisation from exceptional items. Goodwill amortisation is now included in the before exceptional items column of the profit and loss account.

This document contains forward-looking statements that involve risk and uncertainty. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements, including factors beyond Diageo's control. For more details, please refer to the cautionary statement concerning forward-looking statements on page 18.

This report includes names of Diageo's products, which constitute trademarks or trade names which Diageo owns or which others own and licence to Diageo for use. In this report, the term company refers to Diageo plc and the terms group and Diageo refer to the company and its consolidated subsidiaries, except as the context otherwise requires. A glossary of terms used in this report is included at the end of the document.

Diageo's consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United Kingdom (UK GAAP), which is the group's primary reporting framework. Unless otherwise indicated all other financial information contained in this document has been prepared in accordance with UK GAAP. The principal differences between UK and US GAAP are discussed in the operating and financial review and set out in the consolidated financial statements.

Table of Contents

Explanatory Note

The purpose of this amendment is to amend Diageo's US GAAP treatment for deferred tax associated with minimum pension liabilities as of and for the year ended 30 June 2003. The amendment results in a deferred tax charge of £53 million being reclassified from other comprehensive deficit to net income and a reversal of deferred tax of £118 million previously charged to other comprehensive deficit. The overall effect is therefore a reduction of £53 million in net income, a reduction in the comprehensive deficit of £118 million and an increase in shareholders equity of £118 million. The amendment does not affect operating income or cash flow under US GAAP nor does it affect Diageo's principal financial information prepared under UK GAAP.

Diageo is including certain certifications of the chief executive officer and the chief financial officer.

This amendment amends Item 3 Key Information, Item 5 Operating and Financial Review and Prospects, Item 18 Financial Statements and Item 19 Exhibits.

Other than as expressly set forth above, this Form 20-F/A does not, and does not purport to, amend, update or restate the information in any other Item of the Form 20-F filed on 26 November 2003 or reflect any events that have occurred after the Form 20-F was filed.

Diageo intends to announce its results for the six months ended 31 December 2003 on 19 February 2004.

Annual Report 2003

Five year information

The following table presents selected consolidated financial data for Diageo for the five years ended 30 June 2003 and as at the respective year ends. The UK GAAP data for the five years ended 30 June 2003 and the US GAAP data for the three years ended 30 June 2003 have been derived from Diageo's consolidated financial statements, which have been audited by Diageo's independent auditor. The US GAAP data for the two years ended 30 June 2000 has been extracted from Diageo's US GAAP audited consolidated financial statements.

	million	million	million	million	million
Number of ordinary shares ⁽⁸⁾	3,100	3,215	3,411	3,422	3,428

Notes to the selected consolidated financial data

1 Seagram The results and balance sheets for the two years ended 30 June 2003 have been affected by the acquisition of the Seagram spirits and wine businesses on 21 December 2001. See Operating and financial review Operating results .

2 Discontinued operations Included within UK GAAP discontinued operations are the quick service restaurants business (Burger King sold 13 December 2002) and the packaged food businesses (Pillsbury sold 31 October 2001). The quick service restaurants and packaged food businesses have been included in continuing operations under US GAAP. There are no discontinued operations under US GAAP.

3 Brands and goodwill amortisation An analysis of goodwill amortisation charged to UK GAAP operating profit is as follows:

	2003	2002	2001	Year ended 30 June	
				2000	1999
	£ million	£ million	£ million	£ million	£ million
Continuing operations – premium drinks	(2)	(2)	(2)	(1)	
Discontinued operations	(2)	(10)	(24)	(16)	(4)
	(4)	(12)	(26)	(17)	(4)

An analysis of brands and goodwill amortisation charged to US GAAP operating income is as follows:

	2003	2002	2001	Year ended 30 June	
				2000	1999
	£ million	£ million	£ million	£ million	£ million
Premium drinks			(220)	(222)	(230)
Quick service restaurants			(70)	(40)	(39)
Packaged food			(145)	(130)	(123)
			(435)	(392)	(392)

The group adopted the requirements of SFAS No. 141 and SFAS No. 142 for the first time on 1 July 2001. Accordingly amortisation of intangible assets with indefinite useful lives ceased from that date. In addition, in the year ended 30 June 2002 an impairment in the carrying value of goodwill attributable to the group's quick service restaurants business of £135 million was recognised.

Table of Contents

4 Diageo

Annual Report 2003
Five year information**4 Exceptional items** An analysis of exceptional items before taxation under UK GAAP is as follows:

	2003	2002	2001	Year ended 30 June	
	£	£ million	£ million	2000	1999
	million	£ million	£ million	£ million	£ million
Exceptional items charged to operating profit					
Continuing operations premium drinks:					
Seagram integration costs	(177)	(164)			
Guinness/UDV integration costs	(48)	(48)	(74)		
GrandMet/Guinness merger integration costs				(83)	(262)
Other integration and restructuring costs			(79)		
Bass distribution rights	57				
José Cuervo settlement		(220)			
Share option funding costs					(43)
	(168)	(432)	(153)	(83)	(305)
Discontinued operations:					
Restructuring, reorganisation and other net costs		(21)	(75)	(98)	(77)
	(168)	(453)	(228)	(181)	(382)
Other exceptional items					
Charged to associates	(21)	(41)		(3)	(8)
(Losses)/gains on disposal of fixed assets	(43)	(22)	19	5	(10)
(Losses)/gains on disposal and termination of businesses	(1,270)	821	(23)	(168)	104
	(1,334)	758	(4)	(166)	86

Exceptional items under UK GAAP do not represent extraordinary items under US GAAP.

5 Unusual items An analysis of unusual (charges)/income, excluding gains/(losses) on disposal of businesses and (losses)/gains on disposal of fixed assets, included in, and affecting the comparability of, US GAAP operating income, is as follows:

	2003	2002	2001	Year ended 30 June	
	£	£ million	£ million	2000	1999
	million	£ million	£ million	£ million	£ million
Seagram integration costs	(154)	(82)			
Other integration and restructuring costs	(48)	(48)	(169)	(115)	(272)
Bass distribution rights	57				
José Cuervo settlement		(194)			
Derivative instruments in respect of General Mills shares	(4)	166			
Burger King impairment charges and transaction costs	(750)	(135)			
Other impairment charges					(74)
	(899)	(293)	(169)	(115)	(346)

Table of Contents

5 Diageo

Annual Report 2003

6 Dividends The Diageo plc board expects that Diageo will pay an interim dividend in April and a final dividend in October of each year. Approximately 40% of the total dividend in respect of any financial year is expected to be paid as an interim dividend and approximately 60% as a final dividend. The payment of any future dividends, subject to shareholder approval, will depend upon Diageo's earnings, financial condition and such other factors as the Diageo plc board deems relevant.

The table below sets out the amounts of interim, final and total cash dividends paid by Diageo plc on each ordinary share. The dividends are translated into US dollars per ADS (each ADS representing four ordinary shares) at the noon buying rate on each of the respective dividend payment dates.

		Year ended 30 June				
		2003	2002	2001	2000	1999
		pence	pence	pence	pence	pence
Per ordinary share	Interim	9.9	9.3	8.9	8.4	7.8
	Final	15.7	14.5	13.4	12.6	11.7
	Total	25.6	23.8	22.3	21.0	19.5
		\$	\$	\$	\$	\$
Per ADS	Interim	0.61	0.54	0.51	0.53	0.50
	Final	1.06	0.90	0.78	0.72	0.76
	Total	1.67	1.44	1.29	1.25	1.26

7 Definitions Net current (liabilities)/assets is defined as current assets less current liabilities. Net borrowings is defined as total borrowings (i.e. short term borrowings and long term borrowings plus finance lease obligations) less cash at bank and liquid resources, interest rate and foreign currency swaps and current asset investments. Long term obligations is defined as long term borrowings and capital lease obligations which fall due after more than one year.

8 Share capital The called up share capital represents the number of ordinary shares in issue. During the year ended 30 June 2003 the group repurchased for cancellation 116 million ordinary shares at a cost of £852 million (2002 198 million ordinary shares, cost of £1,658 million; 2001 18 million ordinary shares, cost of £108 million; 2000 10 million ordinary shares, cost of £54 million; 1999 175 million shares, cost of £1,211 million (including £15 million for B shares)).

9 Burger King Under UK GAAP, the sale of Burger King has been accounted for as a disposal and the results prior to disposal are presented within discontinued operations. Under US GAAP, the transaction is not accounted for as a disposal due to the size of the investment made by the buyer and Diageo's continuing involvement through the guarantee provided by Diageo in respect of the acquisition finance. Under US GAAP, the results of Burger King prior to 13 December 2002 (the completion date) are presented as continuing operations in the income statement and, on the completion of the transaction, a charge for impairment has been recognised rather than a loss on disposal. Following the completion date, Diageo does not recognise profits of Burger King in its income statement but will, generally, reflect losses as an impairment charge against the assets retained on the balance sheet. In the US GAAP balance sheet, the total assets and total liabilities of Burger King at 30 June 2003 (including consideration deferred under US GAAP) classified within other long term assets and other long term liabilities were each £1.3 billion. The transaction will be accounted for as a disposal when the uncertainties related to the guarantee provided in respect of the acquisition finance have been substantially resolved and/or the buyer's cumulative investment meets or exceeds minimum levels.

6 Diageo Annual Report 2003
Five year information

10 Exchange rates A substantial portion of the group's assets, liabilities, revenues and expenses is denominated in currencies other than pound sterling, principally US dollars. For a discussion of the impact of exchange rate fluctuations on the company's financial condition and results of operations, see Operating and financial review Risk management .

The following table shows, for the periods indicated, information regarding the US dollar/pound sterling exchange rate, based on the noon buying rate, expressed in US dollars per £1.

	2003	2002	2001	Year ended 30 June	
Period end	1.65	1.52	1.41	2000	1999
Average rate (a)	1.59	1.45	1.45	1.59	1.64

(a) The average of the noon buying rates on the last business day of each month during the year. These rates have been provided for your convenience. They are not necessarily the rates that have been used in this document for currency translations or in the preparation of the financial statements. See note 2 (i)(c) to the consolidated financial statements for the actual rates used.

The following table shows period end and average US dollar/pound sterling noon buying exchange rates by month, for the period to 31 October 2003, expressed in US dollars per £1.

	October	September	August	July	June	May	2003 April
Period end	1.70	1.66	1.58	1.61	1.65	1.64	1.60
Average rate	1.68	1.62	1.59	1.62	1.66	1.62	1.57

The average rate for the period 1 to 14 November 2003 was £1=\$1.68 and the noon buying rate on 14 November 2003 was £1=\$1.68.

11 Restatement The US GAAP selected consolidated financial information for the year ended 30 June 2003 has been restated to reflect an adjustment to deferred tax associated with minimum pension liabilities. The restatement results in a reduction in net income of £53 million, a reduction in basic and diluted earnings per share of 1.7p for the year ended 30 June 2003 and an increase in shareholders' equity at 30 June 2003 of £118 million. The adjustment does not affect Diageo's financial information prepared under UK GAAP or any other reported period. See note 32 of the consolidated financial statements.

Table of Contents

15 Diageo

Annual Report 2003

Discontinued operations

Quick service restaurants Diageo completed the disposal of Burger King on 13 December 2002. See Operating and financial review Off-balance sheet arrangements . Burger King is a leading company in the worldwide quick service restaurant industry. In the year ended 30 June 2003, Burger King contributed turnover of £479 million and operating profit of £53 million to Diageo.

Packaged food Diageo completed the disposal of Pillsbury to General Mills on 31 October 2001. Pillsbury contributed turnover of £1,455 million and operating profit before exceptional items of £184 million in the year ended 30 June 2002. As a division of Diageo, Pillsbury produced and distributed leading food brands including Pillsbury's refrigerated dough and other dough based goods, Old El Paso Mexican foods, Progresso soups, Green Giant vegetables and Häagen-Dazs ice cream, and, in addition, operated a foodservice business.

In connection with the disposal of Pillsbury Diageo has guaranteed the debt of a third party up to an amount of \$200 million (£121 million).

Risk factors

Diageo faces competition that may reduce its market share and margins Diageo faces competition from several international companies as well as local and regional companies in the countries in which it operates. Diageo competes with drinks companies across a wide range of consumer drinking occasions. Within a number of categories, consolidation or realignment is taking place. Consolidation is also taking place amongst Diageo's customers in many countries. Increased competition and unanticipated actions by competitors or customers could lead to downward pressure on prices and/or a decline in Diageo's market share in any of these categories, which would adversely affect Diageo's results and hinder its growth potential.

Diageo may not be able to derive the expected benefits from its strategy to focus on premium drinks or its change and cost-saving programmes designed to enhance earnings On 17 July 2000, Diageo announced the integration of its spirits, wine and beer businesses to create a premium drinks business as part of an integrated strategy to be a focused premium drinks company. In line with this strategy, Diageo acquired on 21 December 2001 certain of the Seagram spirits and wine businesses. There can be no assurance that Diageo's strategic focus on premium drinks will result in better opportunities for growth and improved margins.

Following the acquisition of the Seagram spirits and wine businesses, Diageo has been consolidating the Diageo and former Seagram brands into a single distributor in each US state. This consolidation has given rise and could continue to give rise to legal actions. See Business description Premium drinks Marketing and distribution North America .

It is possible that the pursuit of this strategic focus on premium drinks could give rise to further acquisitions. There can be no guarantee that any such acquisition would deliver the benefits intended.

Certain change programmes have been initiated (especially in the United States, Ireland and Great Britain) designed to improve the effectiveness and efficiency of end-to-end operating, administrative and financial systems and processes. This includes moving transaction processing from a number of markets to shared service centres. There can be no certainty that these programmes will deliver the expected benefits. There is likely to be disruption caused to production processes and possibly to administrative and financial systems as these changes are effected. They could also lead to adverse customer or consumer reaction. Any failure of information systems could adversely impact Diageo's ability to operate.

Regulatory decisions and changes in the legal and regulatory environment could increase Diageo's costs and liabilities or limit its business activities Diageo's operations are subject to extensive regulatory requirements regarding production, product liability, distribution, marketing, labelling, advertising and labour and environmental issues. Changes in laws, regulations or governmental policy, could cause Diageo to incur material additional costs or liabilities that could adversely affect its business. In particular, governmental bodies in countries where Diageo operates may impose new labelling, product or production requirements, limitations on the advertising activities used to market beverage alcohol, restrictions on retail outlets or other restrictions on marketing and distribution. Regulatory authorities under whose laws Diageo operates may also have enforcement power that can subject the group to actions such as product recall, seizure of products or other sanctions, which could have an adverse effect on its sales or damage its reputation.

In addition, beverage alcohol products are the subject of national import and excise duties in many countries around the world. An increase in import or excise duties could have a significant adverse effect on Diageo's sales revenue or margin, both through

Edgar Filing: DIAGEO PLC - Form 20-F/A

reducing overall consumption and by encouraging consumers to switch to lower-taxed categories of beverage alcohol.

Companies in the beverage alcohol industry may also be exposed to class action or other litigation relating to alcohol abuse problems or health consequences from the misuse of alcohol. If the industry were to be involved in such litigation, Diageo's business could be materially adversely affected.

US regulatory authorities are considering possible changes to the regulation of flavored malt beverages. Discussions are taking place in respect of possible rule changes related to the alcohol content in flavored malt beverages. Revised rules could result in changes in the methods by which Diageo currently produces flavored malt beverages and therefore increase the costs of production and/or distribution of these products. In addition, possible regulatory changes could impose adverse federal tax consequences on the import and sale of flavored malt beverages. Flavored malt beverages form a component of Diageo's growth strategy within the United States and it is possible that the implementation of any regulatory changes by the US authorities could have an adverse effect on Diageo's future profitability.

Diageo's reported after tax income is calculated based on extensive tax and accounting requirements in each of its relevant jurisdictions of operation. Changes in tax law (including tax rates), accounting policies and accounting standards could materially reduce Diageo's reported after tax income.

16 Diageo	Annual Report 2003 Business description
-----------	--

Demand for Diageo's products may be adversely affected by changes in consumer preferences and tastes Diageo's portfolio includes certain of the world's leading beverage alcohol brands as well as brands of local prominence. Maintaining Diageo's competitive position depends on its continued ability to offer products that have a strong appeal to consumers. Consumer preferences may shift due to a variety of factors, including changes in demographic and social trends, changes in travel, vacation or leisure activity patterns and a downturn in economic conditions, which may reduce consumers' willingness to purchase premium branded products. In addition, concerns about health effects due to negative publicity regarding alcohol consumption, negative dietary effects, regulatory action or any litigation or customer complaints against companies in the industry may have an adverse effect on Diageo's profitability.

The competitive position of Diageo's brands could also be affected adversely by any failure to achieve consistent, reliable quality in the product or service levels to customers.

In addition, both the launch and ongoing success of new products is inherently uncertain especially as to their appeal to consumers; the failure to launch a new product successfully can give rise to inventory write offs and other costs and can affect consumer perception of an existing brand. Growth in Diageo's business has been based on both the launch of new products and the growth of existing products. Product innovation remains a significant aspect of Diageo's plans for growth. There can be no assurance as to Diageo's continuing ability to develop and launch successful new products or variants of existing products or as to the profitable lifespan of newly or recently developed products.

Any significant changes in consumer preferences and failure to anticipate and react to such changes could result in reduced demand for Diageo's products and erosion of its competitive and financial position.

If the social acceptability of Diageo's products declines, or if litigation is directed at the beverage alcohol industry, Diageo's sales volume could decrease and the business could be materially adversely affected In recent years, there has been increased social and political attention directed to the beverage alcohol industry. Diageo believes that this attention is the result of public concern over problems related to alcohol abuse, including drink driving, underage drinking and health consequences from the misuse of alcohol. If the social acceptability of beverage alcohol were to decline significantly, sales of Diageo's products could materially decrease. Similarly, recent litigation against the tobacco industry has directed increased attention to other industries, including the beverage alcohol industry. If the drinks industry were to become involved in litigation of the type brought against other industries, such as tobacco, Diageo's business could be materially adversely affected.

Diageo learned on 20 November 2003 that a purported class action lawsuit, *Hakki v. Adolph Coors Company et al.*, was commenced against a number of alcohol beverage companies on 14 November 2003, including Diageo, in the Superior Court of Washington, D.C. Diageo has not been served with a lawsuit. The complaint asserts claims under the District of Columbia Consumer Protection Procedures Act (DCCPPA) and the common law of the District of Columbia that the defendants specifically targeted the US advertising and marketing of certain of their products to individuals below the 21 year-old legal purchase age. The complaint alleges that at least 15-20% of all alcoholic beverages sold in the United States are consumed by underage drinkers. The complaint further alleges that profits earned by the defendants from the alleged illegal sales to underage drinkers greatly exceed \$1 billion per year.

The lawsuit seeks certification as a class action on behalf of (a) parents and guardians whose funds were used by their children under 21 from 1982 to the present without their knowledge to purchase alcohol beverages marketed by the defendants, on whose behalf monetary recovery is sought and (b) the parents and guardians of all children under 21, on whose behalf the complaint requests that the Court enter an injunction prohibiting the defendants from marketing alcohol beverages to underage persons.

The prayer for relief in the complaint seeks, among other matters, (i) that defendants each disgorge to the purported class all amounts by which they have been allegedly unjustly enriched, plus costs and interest; (ii) rescission of the alleged transactions whereby defendants allegedly obtained revenues from the illegal sale of alcoholic beverages to underage consumers and ordered to pay such monies to the purported class; and (iii) to assess all defendants jointly and severally for all alleged actual damages sustained by the purported plaintiff class plus treble damages or \$1,500 per violation, whichever is greater, punitive damages, attorneys fees, costs of suit, and interest.

Diageo intends to strenuously defend this purported action.

See Additional information for shareholders Legal proceedings for further detail.

Diageo's operating results may be adversely affected by increased costs or shortages of raw materials or labour or disruption to production facilities The raw materials which Diageo uses for the production of its food and beverage products are largely commodities that are subject to price volatility caused by changes in global supply and demand, weather conditions, agricultural uncertainty or governmental controls. If commodity price changes result in unexpected increases in raw materials cost

or the cost of packaging materials, Diageo may not be able to increase its prices to offset these increased costs without suffering reduced volume, revenue and operating income. Diageo may be adversely affected by shortages of such raw materials or packaging materials.

Similarly, Diageo's operating results could be adversely affected by labour or skill shortages or increased labour costs due to increased competition for employees, higher employee turnover or increased employee benefit costs. Diageo's success is dependent on the capability of its employees. There is no guarantee that Diageo will continue to be able to recruit, retain and develop the capabilities that it requires to deliver its strategy, for example in relation to sales and marketing capability within markets or in its senior management.

Diageo would be affected if there were a catastrophic failure of its major production facilities. See Business description Premium drinks Production for a listing of Diageo's principal production sites. In addition, the maintenance and development of information systems may result in systems failures which may adversely affect business operations.

Diageo has a substantial inventory of aged product categories, principally Scotch whisky and Canadian whisky, which mature over periods of up to 30 years. As at 30 June 2003, the historical cost of Diageo's maturing inventory amounted to £1,409 million. The maturing inventory is stored primarily in Scotland, and the loss through contamination, fire or other natural disaster of all or a portion of the stock of any one of those aged product categories could result in a significant reduction in supply of those products, and consequently, Diageo would not be able to meet consumer demand for these products as it arises. In addition, there can be no assurance that insurance proceeds would cover the replacement value of Diageo's maturing inventory or other assets were such assets to be lost due to contamination, fire or natural disasters or destruction resulting from negligence or the acts of third parties.

Diageo's business may be adversely impacted by unfavourable economic conditions or political or other developments and risks in the countries in which it operates Diageo's business is dependent on general economic conditions in the United States, Great Britain and other important markets. A significant deterioration in these conditions, including a reduction in consumer spending levels, could have a material adverse effect on Diageo's business and results of operations. In addition, Diageo may be adversely affected by political and economic developments in any of the countries where Diageo has distribution networks, production facilities or marketing companies. Diageo's operations are also subject to a variety of other risks and uncertainties related to trading in numerous foreign countries, including political or economic upheaval and the imposition of any import, investment or currency restrictions, including tariffs and import quotas or any restrictions on the repatriation of earnings and capital. Current examples of such potential upheaval are currency restrictions and potential further disruption to movement of goods into and out of Venezuela, affecting both imports of goods (principally Scotch whisky into Venezuela) and export of rum (Cacique, especially to Spain), unrest in the Middle East, and the impact on tourism and travel of both terrorist threats and ongoing fears of global pandemics, such as SARS. These disruptions can affect Diageo's ability to import or export products and ability to repatriate funds as well as the levels of consumer demand (for example in duty free outlets at airports or in on trade premises in affected regions) and therefore on Diageo's levels of sales or profitability.

Diageo may also be adversely affected by movements in the value of, and returns from, the investments held by its pension funds.

Diageo may be adversely affected by fluctuations in exchange rates. The results of operations of Diageo are accounted for in pounds sterling. Approximately 35% of sales in the year ended 30 June 2003 were in US dollars, approximately 21% were in sterling and approximately 22% were in euros. Movements in exchange rates used to translate foreign currencies into pounds sterling may have a significant impact on Diageo's reported results of operations from year to year.

Diageo may also be adversely impacted by fluctuations in interest rates, mainly through an increased interest expense. To partly delay any adverse impact from interest rate movements, Diageo maintains approximately 50% of its debt at fixed interest rates. See Operating and financial review Risk management .

Table of Contents

17 Diageo

Annual Report 2003

Diageo's premium drinks operations may be adversely affected by failure to renegotiate distribution and manufacturing rights on favourable terms Diageo's premium drinks business has a number of distribution agreements for brands owned by it or by other companies. These agreements vary depending on the particular brand, but tend to be for a fixed number of years. There can be no assurance that Diageo will be able to renegotiate distribution rights on favourable terms when they expire or that agreements will not be terminated. Failure to renew distribution agreements on favourable terms could have an adverse impact on its revenues and operating income. In addition, Diageo's sales may be adversely affected by any disputes with distributors of its products.

Diageo may not be able to protect its intellectual property rights Given the importance of brand recognition to its business, Diageo has invested considerable effort in protecting its intellectual property rights, including trademark registration and domain names. Diageo's patents cover some of its process technology, including some aspects of its bottle marking technology. Diageo also uses security measures and agreements to protect its confidential information. However, Diageo cannot be certain that the steps it has taken will be sufficient or that third parties will not infringe on or misappropriate its intellectual property rights. Moreover, some of the countries in which Diageo operates offer less intellectual property protection than Europe or North America. Given the attractiveness of Diageo's brands to consumers, it is not uncommon for counterfeit products to be manufactured. Diageo cannot be certain that the steps it takes to prevent, detect and eliminate counterfeit products will be effective in preventing material loss of profits or erosion of brand equity resulting from lower quality or even dangerous counterfeit product reaching the market. If Diageo is unable to protect its intellectual property rights against infringement or misappropriation, this could materially harm its future financial results and ability to develop its business.

Diageo remains exposed to factors affecting the US food industry While Diageo's strategy is to focus on premium drinks, it remains exposed to factors affecting the US food industry through its equity interest in General Mills and its residual exposure to Burger King. Following the disposal of Pillsbury to General Mills, Diageo now holds approximately 21% of General Mills' outstanding share capital. The market value of this interest may be affected adversely by a variety of factors, including the performance of General Mills and the extent to which that performance meets investors' expectations, economic conditions in the United States, including the US financial markets, and the dilution of our holding as a result of future issues of shares by General Mills. On 15 October 2003, General Mills announced that it had received a formal request from the US Securities and Exchange Commission (the SEC) concerning its sales practices and related accounting. General Mills stated that the SEC had advised the company that it had not reached any conclusions related to the information request.

In connection with the disposal of Burger King, Diageo has retained \$212 million (£129 million) of subordinated debt, with a 10 year maturity, from the entity owning Burger King. In addition, Diageo has guaranteed up to \$850 million (£515 million) of borrowings of the Burger King company. These loans have a term of five years although Diageo and Burger King have structured their arrangements to encourage refinancing by Burger King on a non-guaranteed basis prior to the end of the five years. There are no assurances, however, that such refinancing will occur or that no liability will arise with respect to the financing of the Burger King disposal. Both General Mills and Burger King may also be subject to factors affecting the food industry generally, including increased competition, changes in consumer preferences and concerns over obesity and the potential for related litigation or regulation. These factors could also affect Diageo's ability over time to reduce its equity interest in, or affect the price it receives for, General Mills shares. They could also result in Diageo not fully recovering the book value of its subordinated debt due from Burger King and/or having to make payments under the guarantee of Burger King's debt.

It may be difficult to effect service of US process and enforce US legal process against the directors of Diageo Diageo is a public limited company incorporated under the laws of England and Wales. The majority of Diageo's directors and officers, and some of the experts named in this document, reside outside of the United States, principally in the United Kingdom. A substantial portion of Diageo's assets, and the assets of such persons are located outside of the United States. Therefore, it may not be possible to effect service of process within the United States upon Diageo or these persons in order to enforce judgements of US courts against Diageo or these persons based on the civil liability provisions of the US Federal Securities laws. There is doubt as to the enforceability in England and Wales, in original actions or in actions for enforcement of judgements of US courts, of civil liabilities solely based on the US Federal Securities laws.

Cautionary statement concerning forward-looking statements

This document contains statements with respect to the financial condition, results of operations and business of Diageo and certain of the plans and objectives of Diageo with respect to these items. These forward-looking statements are made pursuant to the Safe Harbor provisions of the United States Private Securities Litigation Reform Act of 1995. In particular, all statements that express forecasts, expectations and projections with respect to future matters, including trends in results of operations, margins, growth rates, overall market trends, the impact of interest or exchange rates, the availability of financing to Diageo and parties or consortia who have purchased Diageo's assets, actions of parties or consortia who have purchased Diageo's assets, anticipated cost savings or synergy and the completion of Diageo's strategic transactions, are forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements, including factors that are outside Diageo's control.

These factors include, but are not limited to:

increased competitive product and pricing pressures and unanticipated actions by competitors that could impact Diageo's market share, increase expenses and hinder growth potential;

the effects of business combinations, partnerships, acquisitions or disposals, existing or future, and the ability to realise expected synergy and/or costs savings;

Diageo's ability to complete future acquisitions and disposals;

legal and regulatory developments, including changes in regulations regarding consumption of, or advertising for, beverage alcohol, changes in accounting standards, taxation requirements, such as the impact of excise tax increases with respect to the premium drinks business and environmental laws;

changes in the food industry in the United States, including increased competition and changes in consumer preferences;

changes in consumer preferences and tastes, demographic trends or perceptions about health related issues;

changes in the cost of raw materials and labour costs;

changes in economic conditions in countries in which Diageo operates, including changes in levels of consumer spending;

levels of marketing and promotional expenditure by Diageo and its competitors;

renewal of distribution rights on favourable terms when they expire;

termination of existing distribution rights in respect of agency brands;

technological developments that may affect the distribution of products or impede Diageo's ability to protect its intellectual property rights; and

changes in financial and equity markets, including significant interest rate and foreign currency rate fluctuations, which may affect Diageo's access to or increase the cost of financing.

All oral and written forward-looking statements made on or after the date of this document and attributable to Diageo are expressly qualified in their entirety by the above factors and the Risk factors contained in this document for the year ended 30 June 2003.

Past performance cannot be relied upon as a guide to future performance.

Table of Contents**Operating and financial review****Introduction**

Information presented Diageo's strategy is to focus on its branded drinks businesses with international potential. Diageo completed the disposal of its quick service restaurants business on 13 December 2002 and the combination of its packaged food business with General Mills on 31 October 2001.

The consolidated information for the year ended 30 June 2003 presented in this annual report includes the results of the quick service restaurants business for the five and a half months ended 13 December 2002. In accordance with UK GAAP, the results of the quick service restaurants and, in the comparative periods, the packaged food businesses have been included within discontinued operations.

The following discussion is based on Diageo's UK GAAP results for the year ended 30 June 2003 compared with the year ended 30 June 2002, and the year ended 30 June 2002 compared with the year ended 30 June 2001.

There are a number of accounting differences between UK and US GAAP. A reconciliation of net income from UK to US GAAP and an explanation of the differences between UK and US GAAP are set out in the US GAAP information in note 32 of the consolidated financial statements, with a further explanation of significant reconciling items between UK and US GAAP net income which is included in Discussion of US GAAP differences below.

The US GAAP financial information for the year ended 30 June 2003 has been restated to reflect an adjustment to deferred tax associated with minimum pension liabilities. The effects of this restatement are set out in Discussion of US GAAP differences below and in note 32 to the consolidated financial statements.

Presentation of information in relation to the premium drinks business In addition to describing the significant factors impacting on the profit and loss account compared to the prior year for both of the years ended 30 June 2003 and 30 June 2002, additional information is also presented on the operating performance of the premium drinks segment.

Volume Volume has been measured on an equivalent units basis to nine litre cases of spirits. Equivalent units are calculated as follows: beer in hectolitres divide by 0.9, wine in nine litre cases divide by five, ready to drink in nine litre cases divide by 10. An equivalent unit represents approximately 272 servings. A serving comprises 33ml of spirits, 165ml of wine, or 330ml of ready to drink or beer.

Reference is made to information regarding the premium distilled spirits market segments from Impact and other independent industry sources in the markets in which Diageo operates. Impact collects information on the premium distilled spirits market from a variety of sources, including brand owners, import and export enterprises, trade associations and government agencies such as the US Commerce Department. Impact is aware of, and has consented to, being named in this document. Market data information is taken from industry sources in the markets in which Diageo operates. Diageo believes that all of the information in this document that is based on statements from Impact and other industry sources is reliable.

Non-GAAP measures Organic movement in volume, net sales (after deducting excise duties) and operating profit before exceptional items are measures not specifically used in the consolidated financial statements themselves (non-GAAP measures). The performance of the premium drinks segment is discussed using these measures.

Since overall performance is the result of a number of factors, breaking these down into broad categories and discussing each of these categories assists management and the reader in understanding the overall picture. Once factors such as the effect of currency movements, excise duties and acquisitions and disposals have been discussed, the above measures enable the reader to focus on the performance of the premium drinks brand portfolio which is common to both periods. Organic movement measures also most closely reflect the way in which the business is managed, for the same reasons of achieving comparability between periods. Diageo's strategic planning and budgeting process is based on organic movement in volume, net sales (after deducting excise duties) and operating profit before exceptional items, and these measures closely reflect the way in which operating targets are defined and performance is monitored by the group's management. These measures are chosen for planning, budgeting and reporting purposes since, as explained further below, they represent those measures which local managers are most directly able to influence and they enable consideration of the underlying business performance without the distortion caused by fluctuating exchange rates, excise duties, acquisitions and disposals. In addition, management bonus targets are set based on the performance of the business as measured by organic operating profit growth before exceptional items.

Edgar Filing: DIAGEO PLC - Form 20-F/A

The group's management believe these measures provide valuable additional information for users of the financial statements in understanding the group's performance since they provide information on those elements of performance which local managers are most directly able to influence and focus on that element of the core brand portfolio which is common to both periods. However, whilst these measures are important in the management of the business, they should not be viewed as replacements for, but rather as complementary to, the comparable GAAP measures such as turnover and reported (rather than organic) movements in individual profit and loss account captions. These GAAP measures reflect all of the factors which impact the business and the discussion in relation to premium drinks should be read in the context of the discussion of the overall group performance.

In the discussion of the performance of the premium drinks segment, net sales (after deducting excise duties) is presented in addition to turnover, since turnover reflects significant components of excise duties which are set by external regulators and over which Diageo has no control. Diageo incurs excise duties throughout the world. In some countries, such as the United States and Canada, excise duties are based on sales and are separately identified on the face of the invoice to the external customer. In others, such as the United Kingdom and Ireland, it is effectively a production tax, which is incurred when the spirit is removed from bonded warehouses. In these countries it is part of the cost of goods sold and is not separately identified on the sales invoice. Changes in the level of excise duties can significantly effect the level of reported turnover and cost of sales, without directly reflecting changes in volume, mix or profitability that are the variables that impact on the element of turnover retained by the group.

Also in the discussion of the performance of the premium drinks segment, certain information is presented using sterling amounts on a constant currency basis. This strips out the translation effect of foreign exchange and enables an understanding of the underlying performance of the market that is most closely influenced by the actions of the group's management. The risk from foreign exchange translation is managed centrally and is not a factor over which local managers have any control.

During the last two years the group has undergone a major restructuring which has resulted in the disposal of its food businesses (Pillsbury and Burger King) and its Malibu rum brand and the acquisition of the Seagram spirits and wine businesses. As a consequence results are not comparable from period to period and require additional explanation. For this reason it is necessary to separate the effects of acquisitions and disposals on the sales and profit of brands acquired or disposed of in order to provide information on the underlying performance of individual markets.

Table of Contents

20 Diageo

Annual Report 2003
Operating and financial review

Adjusting for these items enables group management to monitor performance over factors which local managers are most directly able to influence in relation to the core ongoing brand portfolio. The underlying performance on a constant currency basis and excluding the impact of acquisitions and disposals is referred to as organic performance, and further information on the calculation of organic measures as used in the discussion of the premium drinks segment is included below.

In order to assist the reader of the financial statements, the comparisons of both 2003 with 2002 and 2002 with 2001 include tables which present the exchange, disposal, acquisition and organic components of the year on year movement for each of turnover, net sales (after deducting excise duties) and operating profit before exceptional items.

Calculation of organic movement Where a business, brand distribution right or agency agreement was disposed of, or terminated, in the current year, the group, under organic movement calculations, adjusts the results for the prior year to exclude the amount the group earned in that period that it could not have earned in the current period (i.e. the period between the date in the prior period, equivalent to the date of the disposal in the current period, and the end of the prior period). As a result, the organic movement numbers reflect only comparable performance. Similarly, if a business was disposed of part way through the equivalent prior period then its results would also be completely excluded from that prior period's performance in the organic movement calculation, since the group recognised no contribution from that business in the current year.

For acquisitions, a similar adjustment is made in the organic movement calculations. For acquisitions in the current period, the post acquisition results are excluded from the organic movement calculations. For acquisitions in the prior period, post acquisition results are included in the prior period but are only included from the anniversary of the acquisition date in the current period.

A further adjustment in organic movement is made to exclude the effect of exchange rate movements by recalculating the prior period's results as if they had been generated at the current period's exchange rates.

Organic movement percentages are calculated as the organic movement amount in £ million, expressed as the percentage of the prior period results at current year exchange rates and after adjusting for disposals. The basis of calculation means that the results used to measure organic growth for a given year will be adjusted when used to measure organic growth in the subsequent year.

Operating results 2003 compared with 2002**Summary consolidated profit and loss account**

	2003			2002		
	Before exceptional items £ million	Exceptional items £ million	Total £ million	Before exceptional items £ million	Exceptional items £ million	Total £ million
Turnover	9,440		9,440	11,282		11,282
Operating costs	(7,411)	(168)	(7,579)	(9,176)	(453)	(9,629)
Operating profit	2,029	(168)	1,861	2,106	(453)	1,653
Share of profits of associates	478	(21)	457	324	(41)	283
Disposal of fixed assets and businesses		(1,313)	(1,313)		799	799
Interest payable (net)	(351)		(351)	(399)		(399)
Profit/(loss) before taxation	2,156	(1,502)	654	2,031	305	2,336
Taxation	(539)	52	(487)	(511)	(121)	(632)
Profit/(loss) after taxation	1,617	(1,450)	167	1,520	184	1,704
Minority interests	(91)		(91)	(87)		(87)
Profit/(loss) for the year	1,526	(1,450)	76	1,433	184	1,617

Note: Exceptional items under UK GAAP represent items which, in management's judgement, are material items that arise from events or transactions that fall within the ordinary activities of the group and, by virtue of their size or incidence, should be separately disclosed if the financial statements are to properly reflect the results for the period. Exceptional items under UK GAAP do not represent extraordinary items under US GAAP.

Turnover

Overall Turnover decreased by £1,842 million (16%) from £11,282 million in the prior year to £9,440 million in the year ended 30 June 2003, following the disposals of Pillsbury in October 2001 and Burger King in December 2002, both of which are accounted for as discontinued operations and which contributed £479 million to turnover in the year ended 30 June 2003 compared with £2,578 million in the prior year.

Continuing operations premium drinks For continuing operations, which now represents Diageo's premium drinks business, turnover increased by £257 million (3%) from £8,704 million in the year ended 30 June 2002 to £8,961 million in the year ended 30 June 2003. The Seagram spirits and wine businesses, which were acquired on 21 December 2001, contributed £1,214 million to turnover during the year, compared with £573 million in the six month period ended 30 June 2002. This increase attributable to the acquired Seagram business was partly offset by the impact of brands which were disposed of during the two year period ended 30 June 2003 of £327 million, principally due to Malibu (impact of £107 million), North American wine brands (£42 million) which were sold in May and April 2002 respectively, and the loss of the distribution rights of Jack Daniels and Southern Comfort in Great Britain effective August 2002 (£108 million). Turnover was also adversely impacted by the effect of exchange rate movements, primarily the US dollar, which reduced turnover by an estimated £329 million. The remaining £272 million increase in turnover reflects the underlying performance of the ongoing brand portfolio which saw volume increase by 1%.

Discontinued operations Burger King contributed £479 million to turnover in the year ended 30 June 2003 compared with £1,123 million, in the year ended 30 June 2002 following the disposal of Burger King in December 2002. Turnover in the year ended 30 June 2002 also included £1,455 million from Pillsbury which was sold on 31 October 2001.

Table of Contents

21 Diageo

Annual Report 2003

Operating costs

Overall Operating costs decreased by £2,050 million (21% on a reported basis) from £9,629 million in the year ended 30 June 2002 to £7,579 million in the year ended 30 June 2003. This decrease was caused by the disposals of Pillsbury in October 2001, which had £1,271 million operating costs in the prior year, and Burger King in December 2002, whose operating costs fell by £562 million reflecting the reduction in the period of ownership by the group. Operating costs of premium drinks decreased by £217 million.

Continuing operations premium drinks For continuing operations, which now represents Diageo's premium drinks business, operating costs decreased by £217 million (3% on a reported basis) from £7,370 million in the year ended 30 June 2002 to £7,153 million in the year ended 30 June 2003. Operating exceptional costs for continuing operations decreased by £264 million from £432 million in the prior year to £168 million (these are discussed under exceptional operating costs below).

Excluding the exceptional operating costs, continuing operating costs increased by £47 million (1%) from £6,938 million in the year ended 30 June 2002 to £6,985 million in the year ended 30 June 2003. There were increases in operating costs compared with the prior period arising from the acquisition of the Seagram spirits and wine businesses in December 2001 and from organic increases in marketing and other costs. These were almost fully offset by reductions in costs from the movements in exchange rates (£291 million), principally the US dollar, and from disposals (£254 million), principally the loss of the distribution rights for Jack Daniels and Southern Comfort in Great Britain (£99 million) and Malibu (£67 million).

Marketing investment for premium drinks increased by £58 million (5%) to £1,185 million. Marketing investment on the global priority brands grew 5%, to £803 million. The major drivers of the increase were higher spend on the Johnnie Walker, Baileys and Smirnoff brands and behind the launch of Smirnoff Ice in key and venture markets. Marketing spend on J B declined and spend on Guinness was down as a result of a reduction in spend in Great Britain and in Ireland.

Operating profit before exceptional items

Overall Operating profit before exceptional items decreased by £77 million from £2,106 million to £2,029 million. The decrease reflects an increase attributable to premium drinks of £210 million, offset by a reduced contribution of £287 million from discontinued operations.

Continuing operations premium drinks Operating profit before exceptional items for premium drinks increased by £210 million (12%) from £1,766 million to £1,976 million. The Seagram businesses, in the six months ended 31 December 2002, contributed £211 million, but this was offset by a £73 million impact of businesses disposed, primarily Malibu (impact of £40 million) and North American wine brands (£5 million) which were sold in May and April 2002 respectively, and the loss of the distribution rights of Jack Daniels and Southern Comfort in Great Britain effective August 2002 (£9 million). £110 million of the increase in operating profit before exceptional items is attributable to the organic performance of the brand portfolio, discussed in more detail below. Exchange rate movements, net of the effect of currency hedging, had an adverse impact on operating profit before exceptional items of £38 million.

Discontinued operations The results for the year included an operating profit contribution of £53 million from discontinued operations (Burger King only), compared with £340 million in the year ended 30 June 2002 (Burger King and Pillsbury).

Exceptional operating costs

Overall The operating profit for the year ended 30 June 2003 is after exceptional operating charges of £168 million compared to £453 million (including £21 million in respect of discontinued operations) for the year ended 30 June 2002. This comprised integration and restructuring costs of £225 million, offset by £57 million received on the termination of Bass distribution rights in the United States.

Continuing operations premium drinks In the year ended 30 June 2003, £177 million was incurred in respect of the integration of the Seagram spirits and wine businesses, acquired in December 2001 (year ended 30 June 2002 £164 million). Approximately £43 million of these costs were employee related, £7 million were in respect of write downs of tangible fixed assets, £57 million were incurred in putting in place new distributor and broker agreements as part of the Next Generation Growth programme in the United States, and the balance included consultancy and systems costs. The majority of these costs were incurred in North America and the United Kingdom. It is expected that the total programme cost of restructuring and integrating the business will be approximately \$700 million (£460 million) of which \$590 million (£390 million) is expected to be cash. The majority of the balance of the cost will be incurred in the year ending 30 June 2004 as an operating exceptional item. As a result of the amount charged to the profit and loss account in the two years ended 30 June 2003, it is anticipated that approximately 2,200 jobs will be lost of which

Edgar Filing: DIAGEO PLC - Form 20-F/A

some 1,800 had been terminated by 30 June 2003. On completion of the programme it is anticipated that some 2,500 jobs will be lost and that integration synergy will reduce Diageo's annual cost base by approximately £115 million in the year ending 30 June 2005. The above merger synergy represents the latest management estimate and, as a forward-looking statement, involves risk and uncertainty. The expected level of synergy is based on a number of assumptions, including certain expectations concerning: the integration of back offices and sales forces in subsidiary regional offices resulting in headcount reductions and rationalisation of facilities; headcount reductions in central and regional offices; and procurement savings through improvement of supplier terms.

£48 million (2002 £48 million; 2001 £74 million) was incurred in respect of the restructuring of the UDV (spirits and wine) and the Guinness (beer) businesses. Approximately £28 million of the costs were employee related and the balance included legal and professional costs. Total costs of this integration totalled £170 million charged to the profit and loss account over the three years ended 30 June 2003, and no further costs are expected. As a result of the restructuring charge in the three years ended 30 June 2003, it is anticipated that approximately 750 jobs will be lost, of which approximately 600 had been terminated at 30 June 2003.

Effective 30 June 2003, Diageo relinquished its distribution rights for Bass Ale in the United States. Under the distribution agreement, Diageo had the right to continue selling and marketing the brand in the United States until July 2016. Consideration of £57 million received has been accounted for as an exceptional operating item.

In the year ended 30 June 2002, exceptional operating costs in relation to the premium drinks business included £164 million in respect of the integration of the Seagram spirits and wine businesses, £48 million in respect of the restructuring of the UDV and Guinness businesses and £220 million in respect of a settlement with José Cuervo following the termination of litigation and the formalisation of new arrangements for the distribution by Diageo of José Cuervo brands in the United States.

Discontinued operations There were no exceptional operating costs in relation to discontinued operations in the year ended 30 June 2003. In the prior year, exceptional operating costs for discontinued operations comprised £21 million in relation to the restructuring of franchisee loan financing arrangements in anticipation of the disposal of the Burger King business.

Table of Contents

22 Diageo Annual Report 2003
Operating and financial review

Associates

The group's share of profits of associates before exceptional items was £478 million for the year compared with £324 million for last year. The 21% equity interest in General Mills contributed £287 million (£143 million in the eight months ended 30 June 2002). Exceptional items for associates comprise £18 million for Diageo's share of General Mills' exceptional costs incurred on its restructuring of the acquired Pillsbury business, and £3 million in respect of restructuring within Moët Hennessy.

Interest

The net interest charge decreased by 12% from £399 million in the prior year to £351 million in the year ended 30 June 2003. The net benefits of £76 million in respect of the disposal of businesses, of £27 million from exchange rate related movements, and of £44 million from the reduction in interest rates were offset by other factors. These factors included an increase of £14 million in the amount relating to the share of General Mills' interest charge, the effect of business acquisitions, principally the Seagram spirits and wine businesses, of £60 million and the funding of the share repurchases which increased the interest charge by £43 million.

Non operating exceptional items

Non operating exceptional items before taxation comprise losses of £43 million on disposal of fixed assets and losses of £1,270 million on disposal of businesses in the year ended 30 June 2003 compared with losses of £22 million and gains of £821 million respectively in the prior year.

Burger King was sold on 13 December 2002 for \$1.5 billion (£0.9 billion). The sale resulted in a pre tax charge of £1,457 million, after writing back goodwill previously written off to reserves of £673 million. Diageo retained \$212 million (£129 million) of subordinated debt, with a ten year maturity (2013), from the Burger King Company. In addition, Diageo has guaranteed up to \$850 million (£515 million) of borrowings of the Burger King Company. These loans have a term of five years from December 2002, although Diageo and Burger King have structured their arrangements to encourage refinancing by Burger King on a non-guaranteed basis prior to December 2007. The loss on disposal of Burger King was partially offset by the receipt of £171 million additional consideration on the disposal of Pillsbury. Gains on disposals of businesses in the year ended 30 June 2002 principally related to the disposal of Malibu (£532 million) and Pillsbury (£322 million).

Taxation

The effective rate of taxation on profit before exceptional items for the year ended 30 June 2003 was 25.0% compared with 25.2% for the year ended 30 June 2002. After exceptional items the effective rate of taxation was 74.5% for the year ended 30 June 2003 compared with 27.1% for the year ended 30 June 2002. The effective rate of taxation for the year ended 30 June 2003 reflected the fact that the pre tax loss on the disposal of Burger King was £1,457 million reduced by tax relief of £80 million.

Premium drinks The following discussion provides additional commentary on the trading performance of the premium drinks business with the equivalent period in the prior year.

In the discussion movements are segregated between reported or organic performance. Reported means that the measure reflects movement in the number disclosed in the financial statements. Organic represents the movement excluding the impact of exchange, acquisitions and disposals. In the discussion under organic brand performance for each market, movements given for volume, turnover, net sales (after deducting excise duties) and marketing expenditure are organic movements. A further description of organic movement, how it is calculated and why it is considered useful for the reader is set out on pages 19 and 20.

The organic movement calculations for turnover, net sales (after deducting excise duties) and operating profit before exceptional items for the year ended 30 June 2003 were as follows:

	2002 Reported £ million	Exchange £ million	Disposals £ million	Acquisitions £ million	Organic movement £ million	2003 Reported £ million	Organic movement %

Notes

(1) The exchange adjustments for turnover, net sales (after deducting excise duties) and operating profit before exceptional items are principally in respect of the US dollar.

(2) Disposal adjustments for turnover, net sales (after deducting excise duties) and operating profit before exceptional items respectively were in relation to the disposal of Malibu rum (£107 million, £93 million, £40 million); the termination of the distribution rights for Jack Daniels and Southern Comfort (£113 million, £70 million, £10 million) in the United Kingdom; the sale of Glen Ellen/MG Vallejo wines (£42 million, £38 million, £5 million); the transfer of distribution rights of Cuervo 1800 (£27 million, £22 million, £10 million); the sale of Croft Inns (£10 million, £10 million, nil); the sale of Gilbey's Green and White Label whiskies in India (£9 million, £8 million, £1 million); the termination of distribution rights for Drambuie (£7 million, £4 million, £1 million); the sale of Croft and Delaforce port and sherry brands (£5 million, £4 million, £2 million); and other disposals (£7 million, £6 million, £4 million).

(3) Acquisition adjustments for turnover, net sales (after deducting excise duties) and operating profit before exceptional items respectively were in respect of the purchase of the Seagram spirits and wine businesses (£650 million, £518 million, £211 million).

(4) In the calculation of operating profit before exceptional items the overheads included in disposals and acquisitions were directly attributable to those businesses and do not result from subjective judgements of management.

(5) The organic movement percentage is the amount in the column headed organic movement in the table above expressed as a percentage of the aggregate of the first three columns. The basis of the calculation of the organic movement is explained on page 20.

Analysis by individual market**North America****Key measures:**

	2003 £ million	2002 £ million	Reported movement %	Organic movement %
Volume			15	1
Turnover	2,795	2,669	5	1
Net sales (after deducting excise duties)	2,335	2,230	5	1
Marketing	405	408	(1)	(3)
Operating profit before exceptional items	729	550	33	11

Reported performance Turnover in North America increased 5% from £2,669 million in the year ended 30 June 2002 to £2,795 million in the year ended 30 June 2003. Operating profit before exceptional items increased 33% from £550 million in the year ended 30 June 2002 to £729 million in the year ended 30 June 2003.

Organic performance The increase in turnover was primarily due to the turnover derived from the Seagram brands, acquired in the joint acquisition of the Seagram spirits and wine businesses in December 2001, which contributed £444 million in the six months ended 31 December 2002. The effect of brand disposals and of exchange rate movements in the US dollar reduced turnover in the year ended 30 June 2003 by £105 million and £238 million, respectively. The disposal impact is primarily attributable to the disposal of Malibu in May 2002 (£37 million), the Glen Ellen wine business in May 2002 (£37 million) and Cuervo 1800 in September 2002 (£24 million).

The acquired Seagram brands were the main factor in growing operating profit before exceptional items in North America from £550 million last year to £729 million in the year ended 30 June 2003 contributing £154 million in the six months ended 31 December 2002.

Captain Morgan	(6)	(17)
J B	(6)	(6)
Total global priority brands	4	2
Local priority brands	1	4
Category brands	(7)	(3)
Total	1	1

Smirnoff volume excluding ready to drink was up 9% and net sales (after deducting excise duties) were up 11%

Excluding Captain Morgan Gold, volume of Captain Morgan was up 8% and net sales (after deducting excise duties) were up 10%

Excluding ready to drink, total volume was up 3% and net sales (after deducting excise duties) were up 5%. Volume growth in North America was driven by the strong performance of the priority spirits brands. Global priority brand volume excluding ready to drink grew 7%. Ready to drink volume, which includes flavored malt beverages and ready to drink in the United States and ready to drink in Canada, was down 17%, representing a decline in Smirnoff ready to drink of 11% and the withdrawal of Captain Morgan Gold.

Smirnoff had another strong year despite weakness in Smirnoff ready to drink. Excluding ready to drink, volume was up 9%, driven by strong growth in Smirnoff Red and the continued success of the Smirnoff Twist flavoured vodka range. Smirnoff Red increased its share to 23.1%. The brand's volume growth was driven by the success of the 'What's your mix' advertising campaign. In addition, Smirnoff Red continues to benefit from spend behind Smirnoff ready to drink and Smirnoff Twist.

Smirnoff ready to drink volume was down 11%. The launch of Smirnoff Ice Triple Black in January 2003 partially offset softness in Smirnoff Ice.

Volume of Johnnie Walker Red Label improved in the second half of the year. Johnnie Walker Black Label also gained share although volume growth slowed from the first half. Net sales (after deducting excise duties) for the total brand were up 7% due to volume growth of 2% and favourable price/mix variances of 5%, driven by a 3% price increase in certain markets.

Baileys continued its impressive growth driven by national advertising around a very successful holiday programme, and the continued success of initiatives to broaden the appeal of the brand to new occasions. The launch of Baileys Minis in May also contributed incremental volume and revenue, as well as generating momentum for the brand.

The strategy for J B in North America is to maximise value and in the year operating profit from the brand increased as marketing expenditure was reduced.

José Cuervo continues to be the leader in US tequila sales. The key drivers of its growth were high consumer visibility, the success of national advertising and an increased trial programme.

The success of the 'Distinctive Since' campaign was a key driver of the growth in Tanqueray. Both Tanqueray and Tanqueray No. TEN increased their share of the category.

Excluding Captain Morgan Gold ready to drink, Captain Morgan volume was up 8% and net sales (after deducting excise duties)

Edgar Filing: DIAGEO PLC - Form 20-F/A

were up 10% driven by increased advertising and media spending for Captain Morgan Original Spiced Rum.

Guinness volume grew slightly in the year driven by strong performance by bottled Guinness Extra Stout and Guinness Draught in Bottles.

Local priority brand volume was up 1% for the year, with net sales (after deducting excise duties) up 4%. Crown Royal showed strong gains, as did Sterling Vineyards, however these were partially offset by volume decline in Gordon's Gin, Beaulieu Vineyard, and other smaller brands. Volume of category brands was down 7% for the year, with net sales (after deducting excise duties) down 3%. The decrease in volume was due to declines in Gordon's vodka and other smaller category brands. Bass volume was down versus the prior year; distribution of the brand was returned to Interbrew as of 30 June 2003. There has been a mix improvement due to inclusion of the former Seagram brands and the launch of Ciroc.

Table of Contents

26 Diageo Annual Report 2003
Operating and financial review

Other business performance drivers:

Almost 80% of Diageo's volume now distributed through dedicated sales teams

Ready to drink segment under pressure

Efficiencies generated savings of over 10% in media planning and buying

Share of US spirits brands increased by 0.3 percentage points to 27.3%

Diageo North America continued to progress its strategic initiatives. In particular its Next Generation Growth programme has made excellent further progress. In the second half of the year, new distribution and brokerage agreements were reached in nine more states and additional distributors established dedicated sales forces. Distributors and brokers in 34 states and Washington DC, representing nearly 80% of Diageo's volume, are now supporting Diageo's brands with just under 2,000 sales personnel working in teams solely dedicated to Diageo and S&S brands.

Following two years of rapid growth, flavored malt beverages in the United States have slowed considerably and volume in the segment was broadly level for the year. Of the new launches this year, Smirnoff Ice Triple Black was the most successful and it is now the second best selling flavored malt beverage in the United States behind Smirnoff Ice. Flavored malt beverages currently represent 2% of the beer category, of which Smirnoff ready to drink is estimated to constitute about a third.

Diageo's share of US spirits increased in the year to 27.3% as a result of share gains in most priority brands.

Diageo has now consolidated to one media planning and buying agency resulting in a 10% reduction in media spend against prior year cost levels. In addition a 15% reduction versus prior year was achieved in media production costs. Marketing spend at £405 million was 3% below prior year while share of voice in the combined beer and spirits category increased.

Great Britain**Key measures:**

	2003 £ million	2002 £ million	Reported movement %	Organic movement %
Volume			(2)	5
Turnover	1,429	1,467	(3)	6
Net sales (after deducting excise duties)	839	896	(6)	2
Marketing	188	188		2
Operating profit before exceptional items	219	204	7	15

Reported performance Turnover in Great Britain was down 3% on a reported basis from £1,467 million last year to £1,429 million in the year ended 30 June 2003. Operating profit before exceptional items was up £15 million from £204 million in the year ended 30 June 2002 to £219 million in the year ended 30 June 2003.

Organic performance The principal reason for the decrease in turnover was the termination of the distribution rights for Jack Daniels and Southern Comfort in Great Britain in August 2002 which reduced turnover by £108 million. The acquired Seagram brands contributed £17 million to turnover in the six months ended 31 December 2002. The organic increase in the year was £80 million (6%).

Increase in operating profit before exceptional items was due to organic growth of £28 million, partly offset by a net negative impact resulting from acquisitions and disposals of £13 million.

Organic brand performance:

Net sales
(after
deducting

Edgar Filing: DIAGEO PLC - Form 20-F/A

	Volume movement %	excise duties) movement %
Smirnoff	7	(1)
Guinness	(1)	(1)
Baileys	29	30
Total global priority brands	6	2
Local priority brands	(3)	(11)
Category brands	14	14
Total	5	2

Smirnoff volume excluding ready to drink was up 11% and net sales (after deducting excise duties) up 16%

Excluding ready to drink total volume was up 6% and net sales (after deducting excise duties) up 7%

Great Britain has achieved solid volume growth in the year and again increased share driven by growth of the global priority spirits brands. Growth in the spirits brands offset the decline in volume in ready to drink and beer.

Smirnoff Red retained its leadership position in terms of share. Excluding ready to drink, volume grew 11%. In addition, a 6% price increase was achieved in September 2002 against strong competition from the value end of the category.

Smirnoff ready to drink volume fell 3% in the year and net sales (after deducting excise duties) declined by 11%. However, the brand grew share by 2 percentage points. The ready to drink segment has been significantly impacted by the duty increase in April 2002, with volume declining by 4% in the year ended 30 June 2003. Diageo absorbed the duty increase and as a result

Table of Contents

27 Diageo

Annual Report 2003

net sales (after deducting excise duties) value per equivalent unit reduced by 9%. In addition, the duty impact has been exacerbated by a move towards value offerings and by shifts in consumer drinking habits away from the on trade and city centre venues, which are the primary outlets for ready to drink occasions.

Baileys continued its very strong growth. Share increased to 41% in the face of the introduction of two competing products into the category. The launch of Baileys Minis and continued media awareness contributed to this growth as did brand building activity focused on broadening consumer enjoyment of the brand into new occasions.

Guinness performed well in a difficult beer market, with net sales (after deducting excise duties) down only 1%, compared with a 3% net sales (after deducting excise duties) decline in the beer category.

Local priority brand volume declined 3%. Despite volume growth, net sales (after deducting excise duties) of Gordon's, excluding ready to drink, declined by 2%, due to increased competitive pressure in the off trade.

The blended whisky segment continues to be driven by aggressive pricing but Bell's has maintained its lead in the segment.

Archers had a disappointing year with both its schnapps and ready to drink products showing volume decline. Archers volume declined by 6%. Archers Aqua volume fell by 27% driven by the ready to drink segment downturn which was more pronounced in the fruit flavoured ready to drink segment.

Diageo's category brands performance has been driven by excellent growth from Pimm's, Piat d'Or and Blossom Hill.

Other business performance drivers:

Increased resources behind sales execution

A comprehensive restructuring of the customer sales force drove growth in Great Britain. The new structure both increased frequency of contact with customers and generated more effective sales promotions.

Ireland**Key measures:**

	2003 £ million	2002 £ million	Reported movement %	Organic movement %
Volume			(6)	(5)
Turnover	953	937	2	(1)
Net sales (after deducting excise duties)	638	625	2	
Marketing	67	65	3	
Operating profit before exceptional items	141	151	(7)	(9)

Reported performance In Ireland, turnover increased £16 million from £937 million in the prior year to £953 million in the year ended 30 June 2003. Operating profit before exceptional items was £10 million lower than the previous year at £141 million.

Organic performance Exchange rate movements increased turnover by £40 million, partially offset by an organic decline in turnover of £10 million. Operating profit before exceptional items was £10 million lower than the previous year at £141 million. Favourable exchange rate movements on the euro of £6 million were more than offset by the weaker performance of the brands compared to last year.

Organic brand performance:

	Volume movement %	Net sales (after deducting excise duties) movement %
Guinness	(4)	

Edgar Filing: DIAGEO PLC - Form 20-F/A

Smirnoff	(5)	(7)
Baileys	(2)	(1)
Total global priority brands	(4)	(1)
Local priority brands	(5)	(1)
Category brands	(7)	1
Total	(5)	

In a weakening market in Ireland, Diageo volume declined by 5% and Diageo Ireland lost some share. The loss of share is mainly driven by the shift to at home consumption where Guinness and spirits are under represented. In addition, over 50% of Diageo's off trade volume is in premium beer which has been impacted by aggressive price discounting by competitors. There has also been a shift in consumption towards wine and away from spirits and ready to drink since the duty increase.

Guinness held share in the year for the first time in 10 years despite volume decline of 4%. Net sales (after deducting excise duties) were level, benefiting from a price increase.

The decline in spirits and ready to drink volume in the second part of the year reflects the impact of the duty increase of over 40% in spirits and nearly 100% in ready to drink implemented in December 2002. Smirnoff Red and Baileys both gained share. Smirnoff ready to drink volume declined 6%, however Diageo's share of ready to drink was maintained.

Volume in each of the local priority brands, Budweiser, Smithwicks and Carlsberg, all declined. The duty increase also impacted volume growth of the category brands, 45% of the volume of which is spirits. Volume of Diageo's wine brands declined by 7%.

Table of Contents

28 Diageo Annual Report 2003
Operating and financial review

Other business performance drivers:

Continued decline in beverage alcohol market driven by a weakening economic environment

Implementing a reorganisation to reduce costs and improve effectiveness

As previously described the beverage alcohol market in Ireland deteriorated further as a result of declining consumer confidence, the continuing slowdown in economic growth and the excise duty increase on spirits and ready to drink which led to retail price increases of around 20%. The social aspects of drinking are a significant issue in Ireland. As part of its ongoing social responsibility programme, Diageo has participated fully in the establishment of MEAS – a new independent association established as part of the social responsibility programme undertaken by the industry.

In response to the changes in the beverage alcohol market in Ireland, Diageo is in the process of implementing a reorganisation which is expected to result in a less complex and lower cost operating model. The cost of achieving this is not expected to give rise to a charge to exceptional items.

Spain**Key measures:**

	2003 £ million	2002 £ million	Reported movement %	Organic movement %
Volume			5	(1)
Turnover	424	380	12	1
Net sales (after deducting excise duties)	322	298	8	(1)
Marketing	70	71	(1)	(9)
Operating profit before exceptional items	99	94	5	(5)

Reported performance Turnover in the Spanish market increased £44 million to £424 million in the year ended 30 June 2003 compared with the prior year. Operating profit before exceptional items was up £5 million to £99 million in the year ended 30 June 2003.

Organic performance The reasons for the increase in turnover are the favourable impact of exchange rate movements in the year (£15 million) and the benefit of the acquired Seagram brands, principally Cacique, which contributed £35 million to turnover in the six months ended 31 December 2002.

Operating profit before exceptional items benefited from a £11 million contribution from the acquired Seagram brands, partially offset by an organic decline of £5 million.

Organic brand performance:

	Volume movement %	Net sales (after deducting excise duties) movement %
J B	(3)	(7)
Baileys	(2)	1
Johnnie Walker	(4)	(14)
Smirnoff	(8)	(2)
Total global priority brands	(4)	(7)
Local priority brands	25	16
Category brands	3	13
Total	(1)	(1)

Edgar Filing: DIAGEO PLC - Form 20-F/A

Organic operating profit was down 5% as the volume increase in dark rum was partially offset by declines in Scotch. Marketing investment declined by 9% mainly due to the decision to reschedule the J B advertising campaign originally planned for April to September 2003.

The performance in the six months ended 30 June 2003 is in contrast to that of the first half of the year with volume up 14% having been 11% down in the first half. This was primarily driven by 9% growth in the volume of J B in the second half and the inclusion of Cacique for the first time in organic growth in the second half.

The decline in global priority brands in the first half was mainly driven by the poor economic environment and by the tough prior year comparison driven by the duty increase in January 2002. Volume declined by 4% in the full year against a 13% decline in the first half. Net sales (after deducting excise duties) decreased by 7% for the full year against a 11% decline in the first half.

J B volume was down 3% for the full year following a decline of 11% in the first half as volume in the second half grew 9%. Johnnie Walker volume was down 4% for the full year having been down 13% in the first half, an increase of 10% in the second half.

The other major global priority brands in Spain, Smirnoff Red and Baileys, saw volume decline in the difficult environment of the first six months. Volume and net sales (after deducting excise duties) increased in the second half.

Cacique continued to make share gains partially through increased distribution and, benefiting from its leading position in a growing category, volume was up 40%. In addition a price increase was implemented in May 2003. Cardhu volume grew 2%.

Table of Contents

29 Diageo

Annual Report 2003

Other business performance drivers:

Market share gains on J B, Baileys, Johnnie Walker Red Label and Cacique
In the Scotch segment Diageo's brands gained share slightly with gains by J B and Johnnie Walker Red Label partially offset by share decline in VAT69.

Key markets**Key measures:**

	2003 £ million	2002 £ million	Reported movement %	Organic movement %
Volume				(2)
Turnover	2,129	2,078	2	3
Net sales (after deducting excise duties)	1,686	1,631	3	5
Marketing	269	239	13	12
Operating profit before exceptional items	522	524		3

Reported performance In key markets, turnover increased £51 million from £2,078 million in the year ended 30 June 2002 to £2,129 million in the year ended 30 June 2003. Operating profit before exceptional items was down £2 million at £522 million for the year ended 30 June 2003.

Organic performance Turnover was boosted by the acquired Seagram brands which contributed £141 million in the six months ended 31 December 2002, and by an organic increase of £53 million. However, unfavourable exchange variances of £113 million (principally in respect of the Venezuelan Bolivar), and the impact of disposals of £30 million (principally Malibu £24 million) reduced turnover.

Operating profit before exceptional items was down £2 million at £522 million for the year ended 30 June 2003. Exchange losses on the Venezuelan Bolivar of £30 million were more than offset by the impact of acquired Seagram brands which contributed £39 million to operating profit before exceptional items in the six months ended 31 December 2002.

Organic brand performance:

	Volume movement %	Net sales (after deducting excise duties) movement %
Johnnie Walker	(1)	(3)
Guinness	9	29
J B	(10)	(9)
Smirnoff	2	11
Baileys	(2)	2
Total global priority brands	1	5
Local priority brands	(3)	15
Category brands	(5)	(1)
Total	(2)	5

The volume growth in overall global priority brands was led by a continued strong performance of Guinness in Africa. Johnnie Walker volume declined as growth in Johnnie Walker Red Label, up 2%, was offset by a 6% decline in Johnnie Walker Black Label. Johnnie Walker Black Label was impacted by the tough trading environment in Latin America. Excluding Latin America, Johnnie Walker Black Label volume was up 4%. Ready to drink volume was up 26% driven by further strong performance of Diageo's ready to drink brands in Australia and by the Smirnoff Ice launches in Taiwan, France, Japan and Global Duty Free.

Local priority brand volume fell as strong performance on Bundaberg Rum, up 16%, and Guinness Malta, up 17%, only partially

Edgar Filing: DIAGEO PLC - Form 20-F/A

compensated for the decline in Buchanans in Venezuela and for the impact which the change of distributor arrangements for Dimple in South Korea had on sales of that brand in the first half. Volume of category brands fell by 5% driven by the decline in VAT69 in Venezuela and by the decline in Spey Royal in Thailand in the first half. This was partially offset by growth in category brand volume in Africa.

While overall volume declined, net sales (after deducting excise duties) grew reflecting the benefit of strong price increases gained on the Guinness brand in Africa. Marketing investment grew by 12% driven by increased spend behind new brand launches and the relaunches of Johnnie Walker and Dimple in South Korea.

Other business performance drivers:

Strong performance in Africa

Strong volume growth in Australia

Continued impact of difficult economic situation in Latin America

Impact of SARS in Asia and Global Duty Free

Competitor pricing in Portugal

Table of Contents

30 Diageo	Annual Report 2003 Operating and financial review
-----------	--

As previously noted, several of Diageo's key markets are in geographies which have faced the most difficult challenges of the last year. The overall profitability of the key markets in Latin America declined. This was partially offset by growth in Africa and in South Korea while other key markets broadly maintained operating profit year on year.

Africa, which is Diageo's second largest market by volume, and its third largest market by operating profit, gained further momentum in the second half. Volume was up 6% and net sales (after deducting excise duties) up 18% for the full year. Guinness volume was up 10% driven by the continued success of the Michael Power campaign. Guinness Malta volume increased by 17% as distribution improved in Nigeria and Cameroon. Additional packaging and brewing capacity resulting from recent investment in Nigeria and Cameroon was also a major contributory factor behind the growth of both Guinness and Guinness Malta. Further capacity expansion projects are planned for the year to come. There was growth across all global priority spirits brands, with the exception of Smirnoff which was impacted by weak economic conditions in South Africa.

In Latin America overall volume and operating profit declined by 16% and 30% respectively. This reflects a dramatic decline in the Venezuelan business and a 7% volume decline in other Latin American markets. Despite a tough environment all markets remain profitable and there have been successes for a number of brands. For example, Smirnoff Red volume in Brazil grew by 12% as the brand benefited from increased marketing investment. Mexico's performance was also strong with volume up by 22%, driven by J & B and Baileys which were moved to in-house distribution during the year.

In South Korea, Windsor, the leading Scotch whisky brand, gained share in the year and volume grew by 1% in the six months ended 30 June 2003. The structure of the acquisition of the Windsor brands has delivered an operating profit margin improvement. The in-house distribution arrangements for Dimple, the third largest Scotch whisky brand, are now fully operational. Dimple distribution was rebuilt from 53% to over 80% of target accounts. The performance of the Scotch whisky category slowed in the second half, impacted by the weaker economic environment.

Global Duty Free volume was level despite the impact of the Iraqi conflict and the SARS outbreak on world travel. This reflects extremely strong customer and consumer activities and continued investment in priority brands in this high profile market. Smirnoff Ice was launched in the year in a number of duty free markets and Tanqueray No. TEN was launched with very strong impact.

In Australia Diageo's leadership position was reinforced as overall share of spirits grew by over 7 percentage points in the year as all the priority brands gained share. Diageo's spirits business in Australia has benefited from focus on programmes to improve quality of serve in the on trade and to improve merchandising in both the on and off trade. Overall volume increased 16% and net sales (after deducting excise duties) were up 14%. Net sales (after deducting excise duties) per equivalent unit were slightly down due to the decision to reposition the prices of ready to drink brands to an appropriate price premium to beer. The strong volume growth was driven by Johnnie Walker up 35%, Baileys up 7% and Bundaberg up 16%. Diageo's ready to drink business grew by 30%. Dark spirits ready to drink performed exceptionally well with both Johnnie Walker and Bundaberg Premix increasing their share of the total ready to drink category. Despite the strong volume performance, operating profit growth was constrained by higher marketing investment and higher pension costs.

Despite a reduction in general consumer confidence the beverage alcohol market in Greece was stable and Diageo volume grew 3%. Volume growth was principally driven by Johnnie Walker Red Label up 5% and Johnnie Walker Black Label up 10%, as both gained share. Ready to drink volume grew 4% as growth in Smirnoff Ice up 8%, and Gordon's Space up 5%, offset weakness in Archers Aqua and Smirnoff Mule. Marketing expenditure was up 5% to support the launch of new campaigns on a number of brands.

In Taiwan the key driver of volume growth of 9% was again Johnnie Walker which increased 9%. Pricing remained flat in the year but net sales (after deducting excise duties) grew 16% due to mix improvements.

In Japan overall volume declined 1%, with Johnnie Walker down 17% and Old Parr down 15%. The Scotch category is in decline and Diageo's brands have also lost some share. This was offset by volume growth in Guinness, up 17%. Smirnoff Ice has sold 51,000 equivalent units since its launch in May.

In Portugal Diageo's strategy has been to maintain price and not follow the aggressive discounting policy of competitors. In addition a new route to market was introduced in the year which led to a reduction in stock held by distributors. Consequently volume was down 36% and net sales (after deducting excise duties) were down 39%. The change in market dynamics is considered to be long term and, as Diageo's strategy is to maximise value not volume, Portugal has been managed as a venture market since 1 July 2003.

Venture markets

Edgar Filing: DIAGEO PLC - Form 20-F/A

Key measures:

	2003	2002	Reported	Organic
	£ million	£ million	movement	movement
			%	%
Volume			2	6
Turnover	1,231	1,173	5	10
Net sales (after deducting excise duties)	975	905	8	14
Marketing	186	156	19	25
Operating profit before exceptional items	266	243	9	14

Reported performance Turnover in venture markets increased by £58 million from £1,173 million in the year ended 30 June 2002 to £1,231 million in the year ended 30 June 2003. Operating profit before exceptional items, at £266 million for the year ended 30 June 2003, was £23 million higher than in the previous year.

Organic performance The main factor for the improvement in turnover was the strong organic growth which added £110 million to turnover compared with the previous year. However, this was offset by unfavourable exchange movements of £33 million and the disposal of brands of £31 million (principally Malibu £17 million and Gilbey's Green and White Label whiskies £9 million).

The principal element of the increase in operating profit before exceptional items was organic growth of £32 million.

Table of Contents

31 Diageo

Annual Report 2003

Organic brand performance:

	Volume movement	Net sales (after deducting excise duties) movement
	%	%
Johnnie Walker	7	10
Smirnoff	25	82
Guinness	1	3
Baileys	11	10
J B	4	4
Total global priority brands	11	22
Local priority brands	(3)	10
Category brands	(2)	(1)
Total	6	14

Smirnoff volume excluding ready to drink was up 4% and net sales (after deducting excise duties) was up 8%

Excluding ready to drink, volume was up 2% and net sales (after deducting excise duties) up 4%

Volume growth reflected strong growth in global priority brands. In addition ready to drink was an important contributor to venture markets' growth with further rollouts of Smirnoff Red and Black Ice as well as the full year benefit of last year's launches.

Johnnie Walker volume grew 7%, however growth slowed in the second half of the year due in part to the impact of the Iraqi conflict and the SARS outbreak on travel. Johnnie Walker Black Label volume was up 12% and Johnnie Walker Red Label grew 4% driven by strong performance across most of the venture markets with the exception of Germany where volume was constrained by competition from lower priced products.

Smirnoff Red volume increased 4% as the brand continued to benefit from the improvement in brand equity which has resulted from the launch of Smirnoff Ice across venture markets. In addition, marketing investment behind Smirnoff Red rose by 7%. Net sales (after deducting excise duties) of Smirnoff benefited from the favourable mix impact of ready to drink.

Guinness volume improved in the second half driven by strong performance in Malaysia. Volume of Red Stripe in Jamaica, venture markets' only local priority brand, was impacted in the second half by the worsening economic conditions in Jamaica and excise duty increases, but net sales (after deducting excise duties) benefited from price increases in the second half.

Baileys volume grew by 11%, as the brand benefited from an extremely strong holiday programme and continued marketing investment was increased by 15% versus the prior year.

Other business performance drivers:

Marketing investment up 25% mainly behind ready to drink launches and longer term growth projects

Operating profit growth led by the Caribbean, Middle East, Nordics and Germany

Marketing investment grew by 25% due to investment to support ready to drink launches as well as investment to support longer term growth behind Baileys in Germany, Italy, the Caribbean and venture markets in Latin America and Johnnie Walker in Asia and the Caribbean.

The Caribbean and the Middle East markets performed strongly as a result of good performance across the global priority brands with volume up on these brands 20% and 10%, respectively.

In Norway, Diageo's business was successfully maintained by a third party distributor during the six month suspension of Diageo's trading licence and volume grew. Diageo is now fully operational again in Norway following the reinstatement of the trading licence in February and Smirnoff, Bell's and Gordon's have all gained share in the off trade, a segment which is showing strong growth following a reduction in excise duty. Smirnoff Ice continues to perform well in the Nordics and full year volume was 100,000 equivalent units.

In Germany ready to drink is currently the fastest growing segment in the spirits market and since its launch in February 2002, Smirnoff Ice has sold nearly 500,000 equivalent units. Germany has been managed as a key market since 1 July 2003. In the

Edgar Filing: DIAGEO PLC - Form 20-F/A

Netherlands the second half performance was adversely impacted by an 18% duty increase in January and volume was down 2%.

In the venture markets across Asia, overall volume grew by 1% despite the impact of the SARS outbreak. In India the sale of the Gilbey's Green and White Label whiskies in December 2002 has resulted in increased focus on the global priority brands. However strong volume growth in India was offset by weakness in the Philippines where the decline in travel as a result of the SARS outbreak impacted the duty free channel.

Note: Exceptional items under UK GAAP represent items which, in management's judgement, are material items that arise from events or transactions that fall within the ordinary activities of the group and, by virtue of their size or incidence, should be separately disclosed if the financial statements are to properly reflect the results for the period. Exceptional items under UK GAAP do not represent extraordinary items under US GAAP.

Turnover

Overall Turnover decreased by £1,539 million (12%) from £12,821 million in the year ended 30 June 2001 to £11,282 million in the year ended 30 June 2002. Increased turnover of £1,124 million in the premium drinks business and £81 million at Burger King were more than offset by a decrease of £2,744 million attributable to Pillsbury.

Continuing operations premium drinks Premium drinks generated turnover of £8,704 million in the year ended 30 June 2002, an increase of £1,124 million (15%) from the £7,580 million reported in the year ended 30 June 2001. The acquisition of the Seagram brands, which include Captain Morgan, Crown Royal, Seagram's 7, Seagram's VO, Cacique, Windsor Premier, Myers's Rum and Sterling Vineyards, completed on 21 December 2001. The results for the year ended 30 June 2002 include the trading performance of that business for the six months ended 30 June 2002, and the acquired Seagram brands generated sales of £573 million in the year ended 30 June 2002 with no contribution in the prior period. Other minor acquisitions contributed £120 million of the increase in turnover, but this was more than offset by the impact of a number of disposals of non-core brands or the termination of distribution rights which reduced turnover by £196 million, principally attributable to the loss of the distribution rights of Stolichnaya in December 2000 (£94 million). Exchange rate movements had a small (£13 million beneficial impact on turnover. The remaining £614 million increase in turnover is attributable primarily to brands owned throughout the two year period ended 30 June 2002 and reflects strong volume performance of the global priority brands (which grew by 8%) and 2% volume growth in local priority brands, offset by a 4% volume decline in category brands (all brands other than global priority brands and local priority brands).

Discontinued operations The decrease in turnover at Pillsbury was primarily attributable to the disposal of the business, which was sold in October 2001, and for which turnover is only included for the four months up to the date of disposal in the year ended 30 June 2002 compared with a full year in the prior period. Pillsbury contributed £1,455 million in the year ended 30 June 2002 compared with £4,199 million in the prior year. Burger King contributed turnover of £1,123 million in the year ended 30 June 2002, compared with £1,042 million in the prior period, an increase of £81 million (8%) driven primarily by revenue generated by the increase in the number of Burger King owned restaurants. Both Pillsbury and Burger King, following its disposal in December 2002, are accounted for as discontinued operations under UK GAAP in the financial statements for the year ended 30 June 2003.

Operating costs

Overall Operating costs decreased by £1,319 million (12% on a reported basis) from £10,948 million in the year ended 30 June 2001 to £9,629 million in the year ended 30 June 2002. This decrease was caused by a fall of £2,439 million in costs in

Edgar Filing: DIAGEO PLC - Form 20-F/A

respect of Pillsbury, which was sold on 31 October 2001. Operating costs of premium drinks increased by £1,067 million. Operating costs in respect of Burger King increased £53 million to £988 million in the year ended 30 June 2002 due partly to a £44 million (15%) increase in staff costs.

Continuing operations premium drinks Operating costs of premium drinks increased by £1,067 million (17% on a reported basis) from £6,303 million to £7,370 million in the year ended 30 June 2002. Operating exceptional costs for continuing operations increased by £279 million from £153 million in the prior year to £432 million in the year ended 30 June 2002 (this is discussed under exceptional operating costs below).

Excluding the exceptional operating costs, continuing operating costs increased by £788 million (13% on a reported basis) from £6,150 million in the year ended 30 June 2001 to £6,938 million in the year ended 30 June 2002. The main reason for the increase was the effect of acquisitions, which contributed an additional £545 million to operating costs (principally Seagram £443 million). This was partially offset by reductions in costs from the movements in exchange rates of £44 million and from disposals of £138 million. Marketing investment increased by £147 million (15% on a reported basis) to £1,127 million. Marketing spend on

Table of Contents

the global priority brands grew by 10% to £764 million, particularly behind Smirnoff Ice in North America, the Keep Walking campaign for Johnnie Walker, and continued investment behind the successful Let Your Senses Guide You campaign for Baileys.

Operating profit before exceptional items

Overall Operating profit before exceptional items increased £5 million from £2,101 million to £2,106 million. Premium drinks operating profit before exceptional items increased by £336 million, offset by decreases in respect of Pillsbury and Burger King of £315 million and £16 million, respectively.

Continuing operations premium drinks Premium drinks accounted for £1,766 million of the operating profit before exceptional items, compared with £1,430 million in the prior period, an increase of £336 million.

Acquisitions represent £148 million of this increase, of which the Seagram spirits and wine businesses acquired on 21 December 2001 account for £130 million, whilst disposals adversely impacted profit by £58 million. Sales of Captain Morgan Gold did not meet original expectations and the product was subsequently withdrawn from the market, and therefore the total Seagram operating profit of £130 million before exceptional items earned in the period is after a provision of £24 million for the potential diminution in the value of product stock. Captain Morgan Gold was launched in May 2002 and in the period volume was 245,000 equivalent units, net sales (after deducting excise duties) were £27 million and marketing costs were £16 million.

The balance of the increase in the premium drinks contribution to operating profit before exceptional items of £246 million was driven primarily by volume increases, an improvement in the operating margin before exceptional items which increased from 18.9% to 20.3%, and the beneficial impact of exchange rate movements of £57 million, comprising £26 million on translation of overseas profits and £31 million on transactions.

Discontinued operations Pillsbury contributed £184 million in operating profit before exceptional items for the four months prior to its disposal compared with £499 million in the year ended 30 June 2001. The decline in operating profit before exceptional items primarily reflecting the reduced period of ownership in the year ended 30 June 2002 (four months) compared to the prior year (12 months).

Burger King contributed £156 million to operating profit before exceptional items compared with £172 million in the prior year. Worldwide comparable restaurant sales were flat for the year against a 4% decline in the prior year. Net restaurant numbers increased by 83 against an increase of 211 in the prior year.

Exceptional operating costs

Overall Operating profit was impacted in the year by exceptional charges which amounted to £453 million in the year ended 30 June 2002 compared with £228 million in the year ended 30 June 2001. These exceptional charges primarily relate to integration and restructuring costs, a settlement in relation to José Cuervo, and costs of the quick service restaurants business. This increase in exceptional charges of £225 million accounts for the majority of the decrease in operating profit of £220 million.

Continuing operations premium drinks The restructuring cost for the year ended 30 June 2002 included £48 million (2001 £74 million) in respect of the integration of the UDV (spirits and wine) and the Guinness (beer) businesses to create premium drinks. Approximately £18 million (2001 £32 million) of the costs were employee related, principally redundancy, £9 million (2001 £9 million) were legal and professional costs, £nil (2001 £7 million) were asset write downs, and the balance included consultancy and systems costs. The £48 million (2001 £74 million) integration cost comprised £15 million (2001 £32 million) in respect of global corporate functions, £5 million (2001 £15 million) on the integration of UDV and Guinness businesses in Great Britain, £12 million (2001 £12 million) on business services and £16 million (2001 £15 million) in other countries around the world. Incremental synergy achieved in the year, as a result of the integration of UDV and Guinness businesses amounted to £43 million. As a result of the amount charged to the profit and loss account in the two years ended 30 June 2002, it is expected that 680 jobs will be lost, of which 340 had been terminated by 30 June 2002. The total costs of this integration were £170 million with the remaining charge incurred in 2003 as an operating exceptional item.

The restructuring cost for the year ended 30 June 2002 included £164 million in respect of the integration of the Seagram spirits and wine businesses. Approximately £72 million of the costs were employee related, principally redundancies, £10 million were legal and professional costs, £36 million were asset write downs, and the balance included consultancy and systems costs. Of the £164 million integration cost, £20 million was in respect of global corporate functions, £114 million on the integration of the Seagram businesses in North America, and £30 million in other countries around the world. As a result of the amount charged to the profit and loss account in the year ended 30 June 2002, it is expected that approximately 1,200 jobs will be lost of which some 1,050 had been terminated by 30 June 2002.

Edgar Filing: DIAGEO PLC - Form 20-F/A

On 5 February 2002, it was announced that Diageo and José Cuervo SA (José Cuervo) had agreed to terminate their litigation in respect of a change of control issue which José Cuervo claimed arose as a result of the merger of GrandMet and Guinness, and new arrangements were formalised for the distribution rights for the José Cuervo brands in the United States which now extend to 2013. The settlement in favour of José Cuervo involved the return of the group's 45% interest in José Cuervo and a net cash payment of £85 million. The exceptional charge of £220 million (before tax) comprises the write off of the group's investment in José Cuervo of £115 million, related goodwill previously written off to reserves of £20 million and the net cash payment to José Cuervo.

In the year ended 30 June 2001, £79 million costs were incurred in the reorganisation of beer production facilities in England and Ireland and the restructuring of ownership and management within premium drinks. Included in the costs were £35 million of employee related costs, principally redundancy, and £26 million of tangible fixed asset write downs. The reorganisation included the closure of the Dundalk packaging plant in Ireland, the restructuring of the Dundalk brewery and Belfast packaging plant both in Ireland and the restructuring of the packaging plant in Runcorn in England. Jobs lost were approximately 550 of which 480 had been terminated by 30 June 2002.

Table of Contents

34 Diageo Annual Report 2003
Operating and financial review

Discontinued operations During 2002, in anticipation of the disposal of the Burger King business, its franchisee loan financing arrangements were restructured. This resulted in an exceptional charge for credit enhancement, performance and service fees of £21 million. In 2001, the exceptional items in respect of Burger King comprised provisions of £49 million made against certain fixed assets, costs associated with litigation of £21 million, less £5 million of successor franchise fee income.

During the year ended 30 June 2001, packaged food incurred restructuring costs of £10 million in respect of production facilities in Pillsbury's Bakeries and Foodservice division that have been classified as exceptional operating costs.

Associates

The group's share of profits of associates after exceptional items but before interest was £283 million for the year ended 30 June 2002 compared with £203 million for the year ended 30 June 2001. The group's 22% equity interest in General Mills contributed £112 million in the eight months ended 30 June 2002. Share of the associates profits for the year ended 30 June 2002 was adversely impacted by exceptional charges of £41 million, including £31 million in respect of General Mills' restructuring of the acquired Pillsbury business and of its cereal manufacturing operations and £10 million in respect of Moët Hennessy.

Interest

The interest charge in the year increased to £399 million from £350 million in the prior year. The net benefits of £45 million in respect of the disposal and acquisition of businesses and of £34 million from the reduction in interest rates were offset by other factors. These factors included the effect of exchange rate related movements of £35 million, the share of General Mills' interest charge of £59 million (for the eight months ended 30 June 2002) and the funding of the share repurchases made during the year, which increased the interest charge by £20 million.

Non operating exceptional items

Non operating exceptional items include losses on disposals of fixed assets of £22 million compared with gains of £19 million in the prior year and net gains on the disposal of brands and businesses of £821 million in the year ended 30 June 2002 compared with net losses of £23 million in the year ended 30 June 2001.

Exceptional items in respect of the disposal of fixed assets in the year ended 30 June 2002, included losses of £23 million relating to the disposal of tangible fixed assets in quick service restaurants.

The disposal of the Malibu brand, which was a condition of the acquisition of the Seagram spirits and wine businesses, resulted in a gain before taxes of £532 million. Pillsbury was sold on 31 October 2001 and generated a gain before taxes of £322 million, after writing back goodwill previously written off to reserves of £1,671 million. Other disposals in the year ended 30 June 2002 included Glen Ellen wines in North America which resulted in a loss before tax of £52 million, Guinness World Records Ltd which resulted in a gain before tax of £35 million and others which resulted in a loss before tax of £16 million.

In the year ended 30 June 2001, the disposals of premium drinks brands in Latin America resulted in a profit of £28 million. Professional fees, retention bonuses and other costs totalling £51 million were incurred in the year relating to the Pillsbury/General Mills transaction.

Taxation

The group complied with FRS 19 Deferred tax for the first time during the year ended 30 June 2002. The effective rate of taxation on profit before exceptional items for the year ended 30 June 2002 was 25.2%, compared with 24.0% for the year ended 30 June 2001. The 2001 tax charge benefited from a two percentage point reduction, reflecting a low effective rate of taxation in respect of associated companies, which did not recur in 2002.

The effective rate of taxation on profit after exceptional items for the year ended 30 June 2002 was 27.1% compared with 25.3% for the year ended 30 June 2001.

Annual Report 2003

Premium drinks

The following discussion provides additional commentary on the trading performance of the premium drinks business with the equivalent period in the prior year.

In the discussion movements are segregated between reported or organic performance. Reported means that the measure reflects movement in the number disclosed in the financial statements. Organic represents the movement excluding the impact of exchange, acquisitions and disposals. In the discussion under organic brand performance for each market, movements given for volume, turnover, net sales (after deducting excise duties) and marketing expenditure are organic movements. A further description of organic movement, how it is calculated and why it is considered useful for the reader is set out on pages 19 and 20.

The organic movement calculations for turnover, net sales (after deducting excise duties) and operating profit before exceptional items for the year ended 30 June 2002 were as follows:

	2001 Reported £ million	Exchange £ million	Disposals £ million	Acquisitions £ million	Organic movement £ million	2002 Reported £ million	Organic movement %

Operating and financial review

Notes

(1) The exchange adjustments for turnover, net sales (after deducting excise duties) and operating profit before exceptional items are principally in respect of the US dollar.

(2) Disposal adjustments for turnover, net sales (after deducting excise duties) and operating profit before exceptional items respectively were in relation to the termination of the distribution rights for Stolichnaya vodka in the United States (£94 million, £81 million, £32 million); the sale of Croft and Delaforce port and sherry brands (£18 million, £14 million, £7 million); the disposal of Malibu rum (£12 million, £11 million, £6 million); the sale of Glen Ellen wines (£15 million, £14 million, £2 million); the disposal of Guinness World Records (£22 million, £22 million, £4 million); the sale of Dreher brands in Brazil (£24 million, £16 million, £6 million); and other disposals (£11 million, £10 million, £1 million).

(3) Acquisition adjustments for turnover, net sales (after deducting excise duties) and operating profit before exceptional items respectively were in relation to the purchase of the Seagram spirits and wine businesses (£573 million, £451 million, £130 million); and the acquisition of further equity interests in former associated companies which are now subsidiaries (£120 million, £72 million, £18 million).

(4) In the calculation of operating profit before exceptional items the overheads included in disposals and acquisitions were directly attributable to those businesses and do not result from subjective judgements of management.

(5) The organic movement percentage is the amount in the column headed organic movement in the table above expressed as a percentage of the aggregate of the first three columns. The basis of the calculation of the organic movement is explained on page 20.

Analysis by individual markets**North America**

Key measures:

	2002	2001	Reported	Organic
	£ million	£ million	movement	movement
			%	%
Volume			18	7
Turnover	2,669	2,092	28	12
Net sales (after deducting excise duties)	2,230	1,741	28	13
Marketing	408	302	35	15
Operating profit before exceptional items	550	363	52	17

Reported performance Turnover in North America increased 28% on a reported basis from £2,092 million in the year ended 30 June 2001 to £2,669 million in the year ended 30 June 2002. Net sales (after deducting excise duties), a non-GAAP measure, increased from £1,741 million to £2,230 million, an increase of 28%. Operating profit before exceptional items increased from £363 million to £550 million, an increase of £187 million.

Table of Contents

37 Diageo

Annual Report 2003

Organic performance These increases were primarily due to acquisitions, which contributed an additional £431 million to turnover, £362 million to net sales (after deducting excise duties) and £95 million to operating profit before exceptional items compared with the prior year. The increases, were principally generated by the brands acquired with Seagram. These were partly offset by the effect of disposals, which in the year ended 30 June 2001 contributed an incremental £134 million, £119 million and £39 million to turnover, net sales (after deducting excise duties) and operating profit before exceptional items, respectively. This disposal impact is primarily attributable to the termination of the distribution rights for Stolichnaya in the year ended 30 June 2001 (£94 million, £81 million and £32 million impact on turnover, net sales (after deducting excise duties) and operating profit before exceptional items, respectively) and to the disposal of the GlenEllen wine business which completed in May 2002 (£15 million, £14 million and £2 million impact on turnover, net sales (after deducting excise duties) and operating profit before exceptional items, respectively).

The US dollar was relatively stable against sterling, with the average rate moving from £1 = \$1.45 to £1 = \$1.44. After taking account of the effect of the group's hedges (see Liquidity and capital resources Currency risk) exchange had a limited beneficial impact on reported turnover and net sales (after deducting excise duties) (£38 million and £35 million respectively). However, the beneficial impact on operating profit before exceptional items, affected by the losses arising from currency translation hedging arrangements in the year ended 30 June 2001, was more significant (£65 million).

Total global priority brands	14	22
Local priority brands		(3)
Category brands	(5)	(7)
Total	7	13

Volume of global priority brands up 14%

Growth of new products and improvements in product mix

Global priority brands posted strong growth, with volume up 14% over the prior year. The growth principally comprised strong performances by Smirnoff, Baileys and Johnnie Walker Black Label. Volume of J B, Tanqueray, Johnnie Walker Red Label and Guinness declined.

Marketing spend increased over the prior year, by 15%, driven by investment in Smirnoff Ice as well as increases in Johnnie Walker Black Label, Malibu and Tanqueray.

Smirnoff continued to lead the global priority brand growth with strong performance in the core brand, where volume was up 9%, and strong growth in Smirnoff Flavours and Smirnoff Ice. Total net sales (after deducting excise duties) growth was therefore 68%. Smirnoff Ice has continued to show strong growth since its launch in January 2001 and volume grew from 1.1 million equivalent units in the year ended 30 June 2001 to 2.8 million equivalent units.

Guinness net sales (after deducting excise duties) grew 9% despite a 1% volume decline, due to price increases and a favourable product mix. In its first nine months in the market, Guinness Draught in Bottles represented more than 10% of total Guinness volume in the North American market.

Johnnie Walker total volume grew 1%, whilst net sales (after deducting excise duties) grew 6% during the year due to a favourable mix between Johnnie Walker Black Label, which grew net sales (after deducting excise duties) 11%, and Johnnie Walker Red Label, where net sales (after deducting excise duties) declined 1%.

Edgar Filing: DIAGEO PLC - Form 20-F/A

Baileys volume grew by 7% during the year however net sales (after deducting excise duties) growth was impacted by the introduction of trial packaging formats and grew 4%.

Volume of J B declined 10% in the year and net sales (after deducting excise duties) were down 7% as a result of price increases. Contribution after marketing improved, mainly as a result of reduction in marketing spend.

Tanqueray volume declined by 2% while net sales (after deducting excise duties) declined only 1% as a result of a change in product mix to more profitable product sizes and growing on-premise sales.

José Cuervo volume was level for the year with net sales (after deducting excise duties) up 3% following the prior year's price increases to cover the rising agave prices. Towards the end of the year, volume performance improved following selective price reductions.

Volume of Captain Morgan, a former Seagram brand, was level in the year ended 30 June 2002 versus the year ended 30 June 2001, as a result of substantial de-stocking of the brand. On a depletion basis, against the six months ended 30 June 2001, volume was up 9%. Captain Morgan gained 0.4 market share percentage points in the growing US rum category. The brand is responding well to renewed distributor focus.

Table of Contents

38 Diageo Annual Report 2003
Operating and financial review

Volume of Crown Royal, another former Seagram brand, declined 2% in the six months ended 30 June 2002, again as a result of de-stocking and depletions were up 1%.

Some of the local priority brands showed weak performance with volume declines in Gordon's gin and Goldschlager. Overall, volume was level and net sales (after deducting excise duties) declined 3% during the year. Category brands such as Popov and Gordon's vodka also declined during the year, with volume down 5% and net sales (after deducting excise duties) down 7%.

Other business performance drivers Innovation continued to impact the North American performance positively. During the year, Smirnoff Ice volume showed strong selling growth, with the brand achieving a market share of approximately 1% of the US beer market and maintaining its position as the number one selling ready to drink brand. Smirnoff Ice now represents nearly one-third of the segment after just 18 months in the market. New product formats such as the 24-ounce format performed very well, as did the 16-ounce PET format that can be sold in sites where glass bottles are forbidden, such as sports arenas. The Smirnoff Ice six-pack is now number one in terms of dollar sales of premium beer in the grocery channel. Launched in September 2001, Guinness Draught in Bottles has exceeded initial targets for the brand with volume of over 100,000 equivalent units. Smirnoff Twist volume more than doubled to over 700,000 equivalent units.

The former Seagram wine business was transitioned into a new business, Diageo Chateau & Estates Wines, combining the Seagram and existing Diageo wine businesses in North America.

Diageo's North American business has achieved substantial progress on its strategic agenda over the year. Most notably, the Next Generation Growth (NGG) strategy was launched in the year. See Business description Premium drinks North America for further information.

Great Britain**Key measures:**

	2002	2001	Reported movement	Organic movement
	£ million	£ million	%	%
Volume			9	11
Turnover	1,467	1,304	13	14
Net sales (after deducting excise duties)	896	797	12	14
Marketing	188	169	11	13
Operating profit before exceptional items	204	162	26	30

Reported performance Great Britain showed a very strong performance in the year ended 30 June 2002. Turnover was up 13% on a reported basis from £1,304 million to £1,467 million. Net sales (after deducting excise duties), a non-GAAP measure, were up £99 million (12%) to £896 million and operating profit before exceptional items increased 26% on a reported basis from £162 million in the year ended 30 June 2001 to £204 million in the year ended 30 June 2002.

Organic performance The principal driver of this performance was organic growth, contributing £177 million to the turnover improvement, £112 million to the net sales (after deducting excise duties) growth and £46 million to the rise in operating profit before exceptional items.

The impact of the Seagram brands acquired was minimal, although disposals, principally the Malibu brand in May 2002 and Guinness World Records in July 2001, adversely affected turnover, net sales (after deducting excise duties) and operating profit before exceptional items by £22 million, £18 million and £7 million, respectively. There was no impact from exchange rate movements.

Favourable product mix

Table of Contents

Key growth drivers were an increase in marketing spend, up 13% during the year and successful innovation. Three global priority brands, Smirnoff Red, Baileys and Johnnie Walker, continued to improve on the prior year's strong performance.

Smirnoff Red is the number one spirit in the GB market and volume was up 15% with net sales (after deducting excise duties) up 15%. Market share in the vodka category increased to 34%.

Baileys showed net sales (after deducting excise duties) growth of 18%, suggesting that the brand is beginning to benefit from marketing aimed at reducing the seasonality of the product.

Johnnie Walker, which sold over 50,000 equivalent units in Great Britain, had net sales (after deducting excise duties) growth of 16% during the year following an increase in marketing spend.

Other brands also performed well. While Guinness volume was level due to weakness in the overall beer category, market share increased in the on trade beer sector. Bell's volume grew 4% and Gordon's grew 7%. Pimm's, another local priority brand, showed strong growth, with volume up 18%, as innovation such as Pimm's Draught broadened the reach of the brand. In addition, the Diageo wine portfolio had an excellent year, with Blossom Hill volume growing 45%.

Other business performance drivers Innovation was an important element of the overall growth. There were new Smirnoff Ice offerings, including new pack formats such as multi-packs and a larger 70cl bottle. Gordon's Edge and Archers Aqua Raspberry were also launched in the year. Great Britain has shown great success in the ready to drink category. Smirnoff Ice volume was up 19% year on year, significantly outpacing the growing ready to drink category and market share grew to 28%. Archers Aqua volume grew 179,000 equivalent units, up from 41,000 equivalent units in the prior year. In April 2002, the excise duty rate for ready to drink products was increased and was passed through into an increase in retail prices. Subsequent market data suggests a negative impact on rate of sale in the on trade across the category as a consequence. Diageo has already responded to this new challenge with the launch in August of Smirnoff Black Ice, a new vodka-based ready to drink designed to appeal to male consumers, and increased marketing support behind Archers Aqua and Smirnoff Ice.

Ireland**Key measures:**

	2002 £ million	2001 £ million	Reported movement %	Organic movement %
Volume			(1)	
Turnover	937	942	(1)	(1)
Net sales(after deducting excise duties)	625	627		(1)
Marketing	65	63	3	3
Operating profit before exceptional items	151	155	(3)	3

Reported performance Ireland's performance was broadly in line with the prior year. Turnover was down £5 million (1%) on a reported basis, to £937 million and net sales (after deducting excise duties), a non-GAAP measure, were down £2 million at £625 million. Operating profit before exceptional items was down £4 million (3% on a reported basis) from £155 million in the prior year to £151 million in the year ended 30 June 2002.

Organic performance The impact of acquisitions and disposals was insignificant and the beneficial effect of exchange rate movements on the euro (£1 = 1.61 in the year ended 30 June 2002 compared with £1 = 1.63 in the prior year) was largely offset by organic performance of the brands at the turnover and net sales (after deducting excise duties) levels. However, there was an adverse effect of exchange rate movements (after the impact of the group's hedges - see Liquidity and capital resources - Currency risk) of £8 million on operating profit before exceptional items, partly offset by organic growth of £4 million.

Organic brand performance:

Volume	Net sales (after deducting excise duties)

Baileys	7	6
Total global priority brands	(1)	
Local priority brands		5
Category brands	7	(10)
Total		(1)

In Ireland, Diageo's overall share of the beverage alcohol market has been maintained, with market share increases for most priority brands in their respective categories.

The declining beer market and a continuing trend away from stout impacted Guinness sales, which account for 37% of Diageo's volume in the market. Although Guinness volume decreased during the year, increased advertising and marketing slowed the decline, from 4% in the first half of the year to 2% in the second half. For the year, the brand had a 3% volume decline and net sales (after deducting excise duties) were level.

Table of Contents

40 Diageo Annual Report 2003
Operating and financial review

Volume of Smirnoff increased by 3% overall and it gained share. Smirnoff Red delivered strong performance with volume up 6% while volume of Smirnoff Ice declined by 14% against a decline in the first half of 17%. Smirnoff Ice achieved virtually full distribution at launch and after the high initial level of consumer trial, sales have settled to more normal levels. The rate of consumption in the on trade was also impacted by aggressive trade price increases behind the brand's number one market share and brand strength. A trial of Smirnoff Ice on Draught began in over 400 outlets which has been met with a very positive response.

Baileys strong growth continued with volume up 7% with success in both the on and off trade.

Budweiser and Carlsberg, which are agency brands, each grew volume by 2% and made further market share gains in the sector.

Spain**Key measures:**

	2002 £ million	2001 £ million	Reported movement %	Organic movement %
Volume			8	4
Turnover	380	335	13	7
Net sales(after deducting excise duties)	298	262	14	8
Marketing	71	70	1	5
Operating profit before exceptional items	94	85	11	5

Reported performance Turnover in Spain was up £45 million (13%) on a reported basis to £380 million in the year ended 30 June 2002. Net sales (after deducting excise duties), a non-GAAP measure, grew £36 million (14%) to £298 million. Operating profit before exceptional items was up £9 million (11%) on a reported basis to £94 million in the year ended 30 June 2002.

Organic performance The principal drivers of growth in Spain were the impact of the Seagram brands acquired in December 2001 and organic growth of continuing brands. In the six months ended 31 December 2002 the Seagram brands contributed turnover, net sales (after deducting excise duties) and operating profit before exceptional items of £18 million, £13 million and £7 million, respectively. Underlying growth of continuing brands added £25 million, £22 million and £4 million, respectively.

Operating profit before exceptional items was up 11% to £94 million on a reported basis despite higher marketing costs on J B associated with preparation for the launch in June 2002 of J B Twist and a year on year change in the basis of recharge of J B production costs to Spain. Exchange rate movements on the euro had little impact on reported results.

Organic brand performance:

	Volume movement %	Net sales (after deducting excise duties) movement %
J B	5	6
Baileys	11	13
Johnnie Walker	(1)	9
Smirnoff	(2)	14
Total global priority brands	6	9
Local priority brands	6	10
Category brands	(6)	1
Total	4	8

Volume and profit growth of priority brands

Edgar Filing: DIAGEO PLC - Form 20-F/A

Marketing spend on J B up over 25%

Global priority brands showed strong performance with net sales (after deducting excise duties) growth of 9% and with many of the brands achieving market share gains. Performance in the year ended 30 June 2002 was somewhat softer than that achieved in the first half as a result of the retailer buy-in during December in anticipation of an 8% duty increase in January.

J B, which represents nearly half of Diageo's volume in Spain, has been the only exception to the aggressive pricing policy pursued in Spain. The brand continues to build on its number one market position. Marketing spend increased 27%. As a result, volume grew by 5%, net sales (after deducting excise duties) grew by 6% and market share increased slightly to 26%.

Johnnie Walker Black Label continued its positive trend with a 32% volume increase and a similar net sales (after deducting excise duties) increase. However, Johnnie Walker Red Label declined by 8% in volume and by 3% in net sales (after deducting excise duties) during the year after a price increase.

Following a 10% price increase, Smirnoff Red volume was down 3% although net sales (after deducting excise duties) increased by 6%. Baileys volume grew 11% and net sales (after deducting excise duties) grew by 13%, supported by the 'Let Your Senses Guide You' campaign and off-premise marketing.

Guinness, though still a relatively small proportion of Diageo's business in Spain, showed a 33% increase in volume over the year. Similarly, José Cuervo, another relatively small brand in Spain, had very strong growth, with volume up 37% and net sales (after deducting excise duties) up 44%.

Table of Contents

41 Diageo

Annual Report 2003

Cardhu, a local priority brand, increased volume 6% and net sales (after deducting excise duties) 10%. In addition, volume of Cacique, a former Seagram brand, increased 13% in the year ended 30 June 2002 in the growing rum category. Cacique is the leader in this category by a clear margin and is making further share gains. Pampero showed continued strong growth, with volume up 22% and net sales (after deducting excise duties) up 34%.

Diageo launched its first ready to drink products across Spain in the year. J B Twist was test marketed during the year and launched in June 2002. Smirnoff Ice, targeted to tourist locations, delivered a very strong performance in the year contributing to a 14% increase in net sales (after deducting excise duties) of the Smirnoff brand overall.

Key markets**Key measures:**

	2002 £ million	2001 £ million	Reported movement %	Organic movement %
Volume			3	
Turnover	2,078	1,807	15	6
Net sales (after deducting excise duties)	1,631	1,450	12	7
Marketing	239	229	4	1
Operating profit before exceptional items	524	447	17	10

Reported performance In key markets, growth was based principally on the impact of the acquired Seagram brands and on strong organic performances from the other brands. Turnover was up £271 million (15%) on a reported basis from £1,807 million in the year ended 30 June 2001 to £2,078 million.

Operating profit before exceptional items was up £77 million (17%) on a reported basis to £524 million in the year ended 30 June 2002.

Organic performance Turnover benefited from acquisitions by £227 million and from organic growth in continuing brands of £111 million. The effect of disposals reduced turnover by £30 million, principally due to the sale of the Dreher brand in Brazil in January 2001 (£24 million). Exchange rate movements, particularly the Venezuelan Bolivar, adversely affected turnover by £37 million. The drivers of net sales (after deducting excise duties) growth (up £181 million) were the same as those for turnover. Organic growth in key markets was the result of very strong performance by several markets, most notably Africa, Australia, Greece and Taiwan. Exchange rate movements had a positive effect of £2 million on operating profit before exceptional items.

Operating profit benefited from acquisitions (£41 million) and organic growth (£44 million), offset by disposals (£10 million, including Dreher £6 million).

Organic brand performance:

	Volume movement %	Net sales (after deducting excise duties) movement %

Local priority brands	(1)	10
Category brands	(5)	1
Total		7

Edgar Filing: DIAGEO PLC - Form 20-F/A

Global priority brands volume up 4%

Strong volume and profit growth in Africa, Australia and Taiwan

Volume weakness in Latin America

Volume was level whilst net sales (after deducting excise duties) grew 7% over the period. This is a result of price and mix improvement. Marketing investment increased by 1%.

Global priority brands accounted for more than half of key market volume and showed volume growth of 4% and net sales (after deducting excise duties) growth of 10% during the year. All of the global priority brands, with the exception of José Cuervo, grew net sales (after deducting excise duties) with Guinness, Smirnoff, Baileys and Johnnie Walker Black Label performing particularly well as a result of both volume growth and price increases. Ready to drink, including, but not limited to, Smirnoff Ice, also showed strong performance.

Table of Contents

42 Diageo Annual Report 2003
Operating and financial review

Africa, representing nearly 40% of the key market volume, grew 7% in volume and 19% in net sales (after deducting excise duties) over the prior year. Guinness, which accounted for approximately a quarter of African volume, continued to perform well with volume up 6% and net sales (after deducting excise duties) up 23% due to price increases implemented to counter capacity constraints. Smirnoff, which accounts for 14% of the volume, grew 6% in volume terms and 25% in net sales (after deducting excise duties). Ready to drink products showed strong growth, with volume up 71%. Cameroon and Nigeria were impacted by capacity constraints and production was directed away from category management brands, towards the supply of higher margin Guinness. These capacity constraints have been addressed with the commissioning of two new production lines.

In Australia, volume grew 7% as a result of robust priority brand performance. Volume of priority brands increased with Johnnie Walker volume up 11% and Baileys volume up 20%. Baileys market share grew by 4 percentage points as a result of successful marketing programmes such as consumer sampling and Baileys Perfect Pour. Bundaberg Rum, a local priority brand, increased its volume by more than 10% and net sales (after deducting excise duties) by more than 25%. Smirnoff Red volume was up 29% in the year. Innovation, particularly around ready to drink products, is still a major factor in Australia's growth. Diageo's ready to drink products grew volume 40%. Volume of Johnnie Walker Red Label & Cola and Bundaberg & Cola was up significantly. Volume of Smirnoff Baltik, however, was down 37% in the year as a result of reduction in marketing spend. Volume of Stoli Ruski was up 12%, with the launch of a new flavour range. New products such as Archers Aqua and UDL Fusion were launched towards the end of the year.

Despite volatile economic and political conditions in Latin America, including economic crises in Brazil and Venezuela, operating profit increased year on year primarily as a result of growth in the first half. While overall volume declined across the region, Buchanan's volume grew 31% during the year, driven by a focus on effective marketing spend and a new advertising campaign. In Venezuela, Johnnie Walker volume was up 17% and Buchanan's was up 58% despite the challenging conditions. However, Johnnie Walker volume was down 12% across the region. One of the major factors in the volume decline was the performance of VAT 69 in Venezuela, with volume down 37%. During the year the price of VAT 69 was increased. In certain Latin American markets, Diageo mitigated risk by reducing stock levels and tightening credit terms. These actions, which substantially reduced exposure to debt risk and the possibility of stock write offs, did impact volume performance. Additionally, Diageo reduced promotional spending in certain Latin American countries while maintaining media spend.

South Korea is now Diageo's most profitable Asian market. Windsor Premier, previously owned by Seagram, continued to grow strongly with volume up 13% in the year ended June 2002. However, Dimple, a local priority brand that was previously distributed by a third party, declined by 22%. Since January 2003, Dimple has been distributed through Diageo's own in-market company.

In Taiwan, the continued success of the Keep Walking campaign, together with the innovations in route to market, resulted in 40% volume growth in Johnnie Walker. Overall volume growth in the market was 33% and contribution after marketing was also up 33%.

In Thailand, continued weakness in the economy led to volume decline of 8% although net sales (after deducting excise duties) were up 2%. Johnnie Walker, which represents nearly half of Diageo's volume in Thailand, and other global priority brands, continued to perform well, whilst Spey Royal, a local priority brand, suffered, with volume down 24%. Following test marketing during the year, Johnnie Walker One, a ready to drink product, was launched and supported by an advertising campaign that was implemented in July 2002.

In Greece, volume grew 8%. Johnnie Walker volume increased with both Johnnie Walker Red Label and Johnnie Walker Black Label showing strong off trade performance. Smirnoff delivered 15% volume growth due to increased marketing effectiveness, with marketing spend up 7%, and overall category growth. Baileys also showed a marked increase, driven by on trade sales. Smirnoff Ice volume nearly trebled, moving to the number two position in the Greek ready to drink segment, behind Diageo's Gordon's Space.

The Global Duty Free market, which accounts for 8% of key market volume, was heavily impacted by the decrease in international travel following the September 11 attacks. Against this background, however, volume was down only 5% for the year which represents a strong relative performance, and contribution after marketing was in line with the prior year as a result of price and mix improvements.

Venture markets

Key measures:

2002	2001	Reported movement	Organic movement
------	------	-------------------	------------------

Edgar Filing: DIAGEO PLC - Form 20-F/A

	£ million	£ million	%	%
Volume			(1)	
Turnover	1,173	1,100	7	7
Net sales (after deducting excise duties)	905	845	7	7
Marketing	156	147	6	8
Operating profit before exceptional items	243	218	11	12

Reported performance In Diageo's venture markets, turnover was up 7%, on a reported basis, from £1,100 million to £1,173 million in the year ended 30 June 2002.

Organic performance The principal driver of this performance was the organic growth of the brands (up £72 million). Growth in Asia, the Caribbean, the Middle East and across much of Europe was partially offset by a reduction in travel retail business and tough economic conditions in Latin America and Germany.

The growth in net sales (after deducting excise duties) of £60 million (7%) and in operating profit before exceptional items of £25 million (11%) was due to the organic growth of the brands.

Organic brand performance:

	Volume movement	Net sales (after deducting excise duties) movement
	%	%
Johnnie Walker	1	4
Smirnoff	17	74
Guinness	(2)	(3)
Baileys	7	9
J B	(2)	(3)
Total global priority brands	5	10
Local priority brands	(16)	16
Category brands	(5)	
Total		7

Volume of global priority brands up 5%

Strong growth in the Caribbean markets

Latin American markets negatively impacted by poor economic conditions

Volume was level during the year, though net sales (after deducting excise duties) increased by 7% principally as a result of volume growth in the global priority brands of 5%. In the year Smirnoff Ice was launched in Germany and contributed £9 million to net sales (after deducting excise duties).

Across the venture markets, Diageo's global priority brands, which accounted for more than half of the volume, performed well, with volume growth of 5% and net sales (after deducting excise duties) growth of 10%. Johnnie Walker Black Label volume increased 5% with strong performance in Asia and the Caribbean as a result of sharper focus on marketing and improved route to market. Baileys also continued its growth, with volume up 7% and net sales (after deducting excise duties) up 9% across the venture markets despite a decline in Germany. During the year, local priority brands showed a decline of 16% in volume but an increase of 16% in net sales (after deducting excise duties). There were only two local priority brands in the venture markets, Red Stripe in Jamaica and Gilbey's whisky in India. While Red Stripe volume was up 6% and net sales (after deducting excise duties) up 8%, Gilbey's volume was down 28%. Category brands showed a decline in volume of 5%, largely driven by declines in Gilbey's Gin in the Philippines and secondary whisky brands in Latin America. However, as a result of strong performance by Pampero in Italy, Buchanan's Deluxe in the Caribbean and Tiger in Malaysia, net sales (after deducting excise duties) was level for category brands.

Marketing expenditure increased by 8% over the prior year, driven by heavy investment behind Smirnoff Ice in Switzerland, the Netherlands and Germany. Increases also occurred in Italy for Baileys and in the Caribbean market for Johnnie Walker Black Label.

In Latin America, especially in Argentina in the face of the economic crisis there, prices were increased on early signs of currency devaluation, and overall volume declined over 25%.

In Germany, volume of Johnnie Walker Red Label, Baileys and José Cuervo were all adversely impacted by price increases, resulting in an overall volume decline of 5% in that market. Smirnoff Ice was launched in the second half of the year and has performed well.

In India, the global priority brands performed very well, with volume up 21%. Diageo is in the process of selling Gilbey's Green Label and White Label whiskies, a local priority brand.

The Philippines market showed weakness, with overall volume down approximately 20%, led by the 22% volume decline in Gilbey's gin.

Trend information

The following comments were made by Paul Walsh on the current financial year at the Diageo AGM on 22 October 2003.

Edgar Filing: DIAGEO PLC - Form 20-F/A

Looking to the future, while the outlook for a sustained recovery of world economies is still unclear Diageo has demonstrated its ability to generate growth even in challenging times. In addition, signs of improvement are evident in some markets particularly in the United States, which is now our most important market. Continued share gains, even in difficult markets such as those in Latin America, provide further evidence that Diageo is well positioned to achieve superior performance. Therefore, while recognising that we are only three months into the current financial year, we have not seen any trends emerging which would lead us to change our view of Diageo's future prospects.

Liquidity and capital resources

Cash flow A summary of the cash flow and reconciliation to movement in net borrowings for the three years ended 30 June 2003 is as follows:

	2003	Year ended 30 June	
	£	2002	2001
	million	£ million	£ million
Operating profit	1,861	1,653	1,873
Exceptional operating costs	168	453	228
Depreciation and other amortisation	276	314	403
Working capital	(227)	(125)	(54)
Restructuring and integration	(185)	(148)	(144)
Other items	77	(139)	(30)
Operating cash flow	1,970	2,008	2,276
Interest	(327)	(360)	(446)
Dividends from associates	60	87	101
Dividends paid to equity minority interests	(28)	(40)	(31)
Taxation	(105)	(311)	(230)
Own shares purchased for employee share schemes	(65)	(64)	(54)
Net capital expenditure	(361)	(528)	(396)
Free cash flow	1,144	792	1,220
Acquisitions and disposals	833	1,508	(105)
Equity dividends paid	(767)	(758)	(725)
Issue of share capital	4	11	31
Own shares purchased for cancellation	(852)	(1,658)	(108)
Redemption of guaranteed preferred securities			(39)
Exchange	227	267	(229)
Non-cash items	37	(179)	21
Decrease/(increase) in net borrowings	626	(17)	66

The primary sources of the group's liquidity over the last three fiscal years have been cash generated from operations and cash received from disposals. A portion of these funds has been used to fund acquisitions, share repurchases, to pay interest, dividends and taxes, and to fund capital expenditure.

Free cash flow is a non-GAAP liquidity measure that comprises the net cash flow arising from operating activities, dividends received from associates, returns on investments and servicing of finance, taxation, and capital expenditure and financial investment. Free cash flow as used by the company covers all the items that are required by FRS1 to be on the face of the cash flow statement down to, and including, capital expenditure and financial investment. It is therefore a natural sub-total but may not be comparable to similarly titled measures used by other companies. The group's management believe the measure assists users of the financial statements in understanding the group's cash generating performance as it comprises items which arise from the running of the ongoing business. Where appropriate, separate discussion is given for the impacts of acquisitions and disposals of businesses, equity dividends and purchase of own shares – each of which arises from decisions which are independent from the running of the ongoing underlying business. The management regards capital expenditure as ultimately non-discretionary since ongoing investment in plant and machinery is required to support the day-to-day operations, whereas acquisitions and disposals of businesses are discretionary. However, free cash flow does not necessarily reflect all amounts which the group either has a constructive or legal obligation to incur. The free cash flow measure is also used by management for their own planning, budgeting, reporting and incentive purposes since it provides information on those elements of performance which local managers are most directly able to influence.

Free cash flow was £1,144 million, compared with £792 million in the year ended 30 June 2002 and £1,220 million in the year ended 30 June 2001. Cash inflow, in the year ended 30 June 2003, from operating activities was £1,970 million (2002 £2,008 million; 2001 £2,276 million). Discontinued operations contributed £76 million (2002 £346 million; 2001 £852 million) to operating cash flow. Operating cash flow included £185 million of restructuring and integration costs compared with £148 million and £144 million in the years ended 30 June 2002 and 30 June 2001 respectively. The increase in the year ended 30 June 2003 largely arose because of costs incurred on the integration of the Seagram spirits and wine businesses (up £64 million to £133 million) partly offset by a reduction in the GUDV integration and other reorganisation costs. Working capital increased by

Edgar Filing: DIAGEO PLC - Form 20-F/A

£227 million in the year ended 30 June 2003 compared to an increase of £125 million and £54 million in the comparative years. Interest payments including dividends paid to non-equity minority interests were £327 million compared with £360 million in the year ended 30 June 2002 and £446 million in the year ended 30 June 2001. Purchases of tangible fixed assets in the current year amounted to £382 million (2002 £585 million; 2001 £439 million) and were attributable to the following segments: premium drinks £315 million and discontinued operations of £67 million (2002 £330 million, and £255 million, respectively; 2001 £176 million and £263 million, respectively). There were no individually significant expenditures on tangible fixed assets during the three years ended 30 June 2003. The company spent £65 million on the purchase of its own ordinary

Table of Contents

45 Diageo

Annual Report 2003

shares for employee option schemes compared to £64 million in the prior year and £54 million in the year ended 30 June 2001. Tax payments were lower in the year ended 30 June 2003 than the comparable years at £105 million due principally to repayments of prior year corporation tax in the United Kingdom and United States. It is expected that tax payments will increase in the year ending 30 June 2004 as minimal tax refunds are anticipated. In the year ending 30 June 2004 it is anticipated that the group will make contributions of approximately £100 million to the UK Diageo pension fund.

Sale of businesses generated £912 million (2002 £5,100 million; 2001 £31 million), including £642 million from the disposal of Burger King, and £173 million (\$273 million) from the contingent value right received as final settlement from General Mills on the sale of Pillsbury. In addition, £58 million (\$89 million) was received from the call option agreements granted to General Mills over 29 million of General Mills ordinary shares held by Diageo. The sale consideration received in the year ended 30 June 2002 arose principally from the disposal of Pillsbury and the subsequent sale of shares in General Mills to General Mills, the Malibu brand disposal and the subsequent sale of businesses acquired in connection with the Seagram acquisition. The sale consideration received in the year ended 30 June 2001 included the net proceeds in respect of the sale of UDV Indústria e Comércio Ltda in Brazil, less costs in respect of the combination of Pillsbury with General Mills.

The consideration received in the year ended 30 June 2003 was offset by cash outflows in respect of acquisitions of £137 million (2002 £3,592 million; 2001 £136 million). The acquisition of the Seagram spirits and wine businesses in the year ended 30 June 2002 cost £3,533 million. The amounts spent on acquisitions in the year ended 30 June 2001 included £56 million on the remaining 50% equity interest in Bundaberg Distilling Investments Pty Limited in Australia.

Capital repayments The group's management is committed to enhancing shareholder value, both by investing in the businesses and brands so as to improve the return on investment and by managing the capital structure so as to reduce the cost of capital, while maintaining prudent financial ratios. See Risk management below.

The company acquired, and subsequently cancelled, 116 million (2002 198 million; 2001 18 million) ordinary shares during the year ended 30 June 2003 for a consideration including expenses of £852 million (2002 £1,658 million; 2001 £108 million). The group continues to review its capital structure and will continue to conduct share buy-backs when appropriate.

Borrowings In the year ended 30 June 2003 the group's policy has been to maintain the proportion of borrowings maturing within one year at below 60% of total borrowings, and to maintain the level of commercial paper at below 50% of total borrowings. In addition, it is group policy to maintain backstop facility terms from relationship banks to support commercial paper obligations. In June 2003 the board reviewed and agreed changes to debt maturity and liquidity policies to be implemented during the year ending 30 June 2004 to limit the proportion of borrowings maturing within 12 months to 50% of gross borrowings less money market demand deposits and the level of commercial paper to 30% of gross borrowings less money market demand deposits.

The group's net borrowings comprise the following:

	2003	As at 30 June	
	£	2002	2001
	million	£ million	£ million
Total borrowings	(6,544)	(7,429)	(7,595)
Finance leases	(1)	(28)	(41)
Offset by:			
Cash and bank deposits	1,191	1,596	1,842
Interest rate and foreign currency swaps	484	365	315
	(4,870)	(5,496)	(5,479)

The group's net borrowings (after the impact of foreign currency swaps) were denominated in the following currencies:

	Total	US dollar	Sterling	Euro	Other
	£ million	%	%	%	%
Net borrowings					
2003	(4,870)	87	(15)	26	2
2002	(5,496)	86	(9)	21	2
2001	(5,479)	81	(4)	21	2

Edgar Filing: DIAGEO PLC - Form 20-F/A

Cash and bank deposits were denominated in the following currencies (bank deposits represent amounts placed with financial institutions which require notice of withdrawals of more than 24 hours to avoid an interest penalty):

	Total	US dollar	Sterling	Euro	Other
	£ million	%	%	%	%
Cash and bank deposits					
2003	1,191	53	14	15	18
2002	1,596	46	33	7	14
2001	1,842	43	29	11	17

The effective interest rate for the year ended 30 June 2003, based on average monthly net borrowings and interest charge, excluding the group's share of associate interest was 5.3% (2002 7.4%; 2001 6.2%).

The maturities of the borrowings due within one year (net of interest rate and foreign currency swaps) for 2003 were £3,079 million (2002 £3,687 million; 2001 £3,587 million) and due after five years were £795 million (2002 £624 million; 2001 £686 million).

Table of Contents

46 Diageo Annual Report 2003
Operating and financial review

The following table summarises the group's borrowings excluding overdrafts and net of interest rate, cross currency and foreign currency swaps:

	2003	2002	As at 30 June
	£ million	£ million	2001
			£ million
Global bonds	1,808	657	707
Yankee bonds	423	788	850
Zero coupon bonds	712	714	710
Guaranteed notes	242	263	497
Repurchase agreements			800
Preferred capital securities	455	493	532
Medium term notes	593	1,067	832
Commercial paper	863	1,600	1,310
Others (including swaps)	882	1,215	821
	5,978	6,797	7,059

During the year ended 30 June 2003 the group borrowed £1,258 million in the form of global bonds and £126 million in the form of medium term notes. The global bonds mature in 2007 and 2008. The medium term notes are repayable in 2018. During the year ended 30 June 2002 the group borrowed £500 million in the form of guaranteed bonds and £449 million in the form of medium term notes. The guaranteed bonds mature in December 2003 and the medium term notes were repaid during 2003. During the year ended 30 June 2001 the group borrowed £832 million in the form of preferred capital securities and repurchase agreements and £458 million in the form of medium term notes. The preferred capital securities (£532 million), and the repurchase agreements (£300 million) were repayable on demand (with 30 and 5 days notice, respectively). The medium term notes were repaid by 31 December 2002.

The £626 million decrease in net borrowings from 30 June 2002 to 30 June 2003 reflects free cash flow (see Glossary of £1,144 million noted above, net receipts for sales/purchases of businesses of £833 million and decreases due to exchange movements of £227 million, less dividends paid of £767 million and own shares purchased for cancellation of £852 million. The £17 million increase in net borrowings from 30 June 2001 to 30 June 2002 reflected free cash inflow of £792 million noted above, net receipts for sales/purchases of businesses of £1,508 million and decreases due to exchange movements of £267 million, less dividends paid of £758 million and own shares purchased for cancellation of £1,658 million.

At 30 June 2003, the group had available undrawn committed bank facilities of £1,970 million (2002 £2,105 million; 2001 £2,269 million). Of the facilities, £1,182 million expire in the period up to May 2004 and £788 million expire in the period up to May 2007. Commitment fees are paid on the undrawn portion of these facilities. Borrowings under these facilities will be at prevailing LIBOR rates plus an agreed margin, which is dependent on the period of drawdown. These facilities can be used for general corporate purposes and, together with cash and cash equivalents, support the group's commercial paper programmes. The committed bank facilities are subject to a single financial covenant, being a minimum interest cover ratio of two times (defined as the ratio of operating profit before exceptional items aggregated with share of profits of associates to net interest). They are also subject to pari passu ranking and negative pledge covenants.

Any non compliance with covenants underlying Diageo's financing arrangements could, if not waived, constitute an event of default with respect to any such arrangements, and any non compliance with covenants may, in particular circumstances, lead to an acceleration of maturity on certain notes and the inability to access committed facilities. Diageo was in full compliance with all of its financial covenants throughout each of the periods presented.

Capital commitments not provided for at 30 June 2003 were estimated at £62 million (2002 £43 million; 2001 £69 million).

Diageo management believes that it has sufficient funding for its working capital requirements.

Contractual obligations

	Less than 1 year	1-3 years	3-5 years	Payments due by period	
				More than 5 years	Total
	£ million	£ million	£ million	£ million	£ million
Long term debt obligations	2,617	919	1,267	795	5,598
Operating leases	57	84	66	209	416
Purchase obligations	594	551	332	493	1,970

Edgar Filing: DIAGEO PLC - Form 20-F/A

Provisions for liabilities and charges and creditors greater than one year

107	44	6	83	240
3,375	1,598	1,671	1,580	8,224

Long term debt obligations comprise borrowings (before deducting interest rate and foreign currency swaps) with an original maturity of greater than one year. Purchase obligations include various long term purchase contracts entered into for the supply of certain raw materials, principally grapes, cans and glass bottles. The contracts are used to guarantee supply of raw materials over the long term and to enable more accurate predictions of future costs. It is expected that all contractual commitments be funded from future operating cash flows and no new borrowings will be required to meet these obligations. Provisions for liabilities and charges and creditors greater than one year exclude, £43 million in respect of vacant properties (included in operating leases), £119 million for an onerous contract (included in purchase obligations), post employment provisions and deferred taxation.

In addition the group has £343 million of 9.42% cumulative guaranteed preferred securities which are included in non-equity minority interests on the consolidated balance sheet. The securities are redeemable only at the option of the company in or after 2004.

Table of Contents**Off-balance sheet arrangements**

In connection with the disposal of non-core businesses the group has given guarantees of third party debt which were necessary to complete the disposals on the most favourable terms. The directors are not aware of any instances of default by the borrowers at present, but the ability of the borrowers to continue to be in compliance with the guaranteed debt instruments, and in particular remaining current on payments of interest and repayments of principal, is significantly dependent on the current and future operations of those borrowers and their affiliates. At 30 June 2003 Diageo had outstanding guarantees in respect of Burger King and International Multifoods Corporation. Diageo has guaranteed up to \$850 million (£515 million) of external borrowings of Burger King. These loans have a term of five years from December 2002, although Diageo and Burger King have structured their arrangements to encourage refinancing by Burger King on a non-guaranteed basis prior to the end of five years. The primary covenants under the guarantee are pari passu ranking negative pledge. See Additional information for shareholders Material contracts Agreement for the sale of Burger King Corporation , for further information. In connection with the disposal of Pillsbury in October 2001, Diageo has guaranteed \$200 million (£121 million) of International Multifoods Corporation's debt, repayable in November 2009.

In addition, certain of the acquired Seagram businesses had pre-existing guarantees at the date of the acquisition in relation to the solvency of a third party partnership. This partnership has outstanding loans of \$100 million (£61 million). Vivendi has indemnified the group against any losses relating to these arrangements.

The above guarantees are unrelated to the ongoing operations of the group's premium drinks business.

The group also has unrecognised gains and losses of £386 million and £298 million, respectively, in respect of financial instruments at 30 June 2003. For further disclosures with regard to financial instruments see note 18 to the consolidated financial statements.

Save as disclosed above, neither Diageo plc nor any member of the Diageo group, has any off-balance sheet financing arrangements that currently have or are reasonably likely to have a material future effect on the group's financial condition, changes in financial condition, results of operation, liquidity, capital expenditure or capital resources.

Risk management

The group's funding, liquidity and exposure to interest rate and foreign exchange rate risks are managed by the group's treasury department. The treasury department uses a combination of derivative and conventional financial instruments to manage these underlying treasury risks.

Treasury operations are conducted within a framework of board-approved policies and guidelines, which are recommended and subsequently monitored by the finance committee (this committee is described in the corporate governance report). These include benchmark exposure and/or hedge cover levels for each of the key areas of treasury risk. The benchmarks and hedge cover levels are reviewed by the board as deemed appropriate following significant business or strategic changes. In June 2002 the board reviewed and approved changes to the group's interest rate and foreign exchange risk management policies in the light of the group's transition to a focused premium drinks company, its managing for value principles and recent trends in accounting standards. The transition to the revised policies, which are described below began during the year ended 30 June 2003. The framework provides for limited defined levels of flexibility in execution to allow for the optimal application of the board-approved strategies. Transactions giving rise to exposures away from the defined benchmark levels arising on the application of this flexibility are separately monitored on a daily basis using value at risk analysis. They are carried at fair value and gains or losses are taken to the profit and loss account as they arise. At 30 June 2003 gains and losses on these transactions were not material. In June 2003, the board reviewed and approved changes to the group's liquidity risk management policies. Transition to the new policies, which are described below, will take place during the year ending 30 June 2004.

The finance committee receives bi-monthly reports on the activities of the treasury department, including any exposures away from the defined benchmarks. The internal control environment is reviewed regularly.

Currency risk The group publishes its financial statements in sterling and conducts business in many foreign currencies. As a result, it is subject to foreign currency exchange risk due to exchange rate movements which will affect the group's transaction costs, and the translation of the results and underlying net assets of its foreign subsidiaries.

The group hedges a substantial portion of its exposure to fluctuations on the translation into sterling of its foreign currency net assets by holding net borrowings in foreign currencies and by using foreign currency swaps and cross currency interest rate swaps. The group's policy is to hedge currency exposure on its net assets before net borrowings at approximately the following percentages 90% for US dollars, 90% for euros and 50% for other significant currencies where a liquid foreign exchange market

exists. This policy leaves the remaining part of the group's net assets before net borrowings subject to currency movements. During the year ended 30 June 2003, Diageo increased the proportion of US dollar currency exposure being hedged from 75% to approximately 90% in line with the revised policies agreed by the board in June 2002. Exchange differences arising on the retranslation of foreign currency net borrowings and foreign exchange swaps are recognised in the statement of total recognised gains and losses to match exchange differences on foreign equity investments, in accordance with SSAP 20.

Following the June 2002 policy review, the group no longer undertakes profit translation hedging in respect of US dollar and euro forecast future profit before exceptional items and tax. The change in policy means that from 1 July 2003 the group's profit before exceptional items and tax is exposed to the full impact of translation movements in exchange. During the year ended 30 June 2003 the group did have profit translation hedges in place against a proportion of its core premium drinks business at the profit before exceptional items and tax level.

For currencies in which there is an active market, the group hedges between 80% and 100% of transactional foreign exchange rate risk, up to 18 months forward, using forward foreign currency exchange contracts. The gain or loss on the hedge is recognised at the same time as the underlying transaction.

Interest rate risk The group has an exposure to interest rate risk and within this category of market risk, is most vulnerable to changes in US dollar, sterling and euro interest rates. To manage interest rate risk, the group manages its proportion of fixed to variable rate borrowings within limits approved by the board, primarily through issuing long term fixed rate bonds, medium term notes and floating rate commercial paper, and by utilising interest rate swaps, cross currency interest rate swaps and swaptions. The profile of fixed rate to floating rate net borrowings is maintained such that projected net borrowings are targeted to be fully floating after five years, and are approximately 50% fixed and 50% floating on an amortising profile within five years. The floating element of US dollar net borrowings within five years is partly protected using interest rate collars. Following the June 2002 policy review, the level of interest rate collars will reduce. Remaining interest rate collars as at 30 June 2003 will take up to approximately three years to expire. In addition, where appropriate, the group may use forward rate agreements

Table of Contents

48 Diageo Annual Report 2003
Operating and financial review

to manage short term interest rate exposures. Swaps, swaptions, forward rate agreements and collars are accounted for as hedges. Such management serves to increase the accuracy of the business planning process and to help manage the interest cover ratio. Diageo has a target range for cash interest cover (defined as operating profit before exceptional items, interest, tax, depreciation and amortisation and share of profits of associates, and after dividends received from associates over net interest cash flow including minority interest dividends) of five to eight times and under the current economic environment Diageo's intention is to move towards the higher end of this range.

Liquidity risk The group's strategy with regard to the maturity profile of borrowings has been to maintain the proportion of borrowings maturing within one year at below 60% of total borrowings, and to maintain the level of commercial paper at below 50% of total borrowings. In June 2003 the board reviewed and agreed changes to debt maturity and liquidity policies to be implemented during the year ending 30 June 2004 to limit the proportion of borrowings maturing within 12 months to 50% of gross borrowings less money market demand deposits and the level of commercial paper to 30% of gross borrowings less money market demand deposits. In addition, it is group policy to maintain backstop facility terms from relationship banks to support commercial paper obligations.

Credit risk A large number of major international financial institutions are counterparties to the interest rate swaps, foreign exchange contracts and deposits transacted by the group. Such transactions are only entered into with counterparties with a long term credit rating of A or better. The group monitors its credit exposure to its counterparties, together with their credit ratings.

Commodity price risk The group uses commodity futures and options to hedge against price risk in certain commodities. All commodity futures and options contracts hedge a projected future purchase of raw material. Commodity futures or options are then either closed out at the time the raw material is purchased or they are exchanged with the company manufacturing the raw material to determine the contract price. Commodity contracts are held in the balance sheet at fair value but any gains and losses are deferred until the contracts are closed out or exchanged. Open contracts at 30 June 2003 and gains and losses realised in the year or deferred at the balance sheet date were not significant. This activity has reduced following the disposal of the packaged food businesses in October 2001.

Employee share schemes Awards and option grants vesting under the various employee share schemes are generally satisfied by the transfer of existing shares. These awards and option grants are hedged through the purchase of shares or call options. Exceptions to this policy are in respect of exercises under certain GrandMet and international schemes that are satisfied by the issue of new equity.

Sensitivity analysis

For financial instruments held, the group has used a sensitivity analysis technique that measures the change in the fair value of the group's financial instruments from hypothetical changes in market rates.

The amounts generated from the sensitivity analysis are forward-looking estimates of market risk assuming certain adverse market conditions occur. Actual results in the future may differ materially from those projected results due to developments in the global financial markets which may cause fluctuations in interest and exchange rates to vary from the hypothetical amounts disclosed in the table below, which therefore should not be considered a projection of likely future events and losses.

The estimated changes in the fair values of borrowings, the guaranteed preferred securities and the associated derivative financial instruments at 30 June 2003 are set out in the table below. The fair values of quoted borrowings and guaranteed preferred securities are based on year end mid-market quoted prices. The fair values of other borrowings, derivative financial instruments and other financial liabilities and assets are estimated by discounting the future cash flows to net present values using appropriate market rates prevailing at the year end. These are based on rates obtained from third parties.

The estimated changes in fair values for interest rate movements are based on an instantaneous decrease of 1% (100 basis points) in the specific rate of interest applicable to each class of financial instruments from the levels effective at 30 June 2003, with all other variables remaining constant. The estimated changes in the fair value for foreign exchange rates are based on an instantaneous 10% weakening in sterling against all other currencies from the levels applicable at 30 June 2003, with all other variables remaining constant. Such analysis is for illustrative purposes only as in practice, market rates rarely change in isolation.

Sensitivity analysis table at 30 June 2003

Fair value changes arising from:

Edgar Filing: DIAGEO PLC - Form 20-F/A

	Estimated fair value £ million	1% fall in interest rates £ million	10% weakening in sterling £ million
Borrowings	(6,974)	(199)	(680)
Interest rate contracts	429	156	45
Foreign exchange contracts:			
Transaction	24		(97)
Balance sheet translation	119		(124)
Guaranteed preferred securities	(370)	(6)	(41)
Written call options re General Mills, Inc shares*	(70)	(4)	(2)
Other financial net assets	69	7	7

*Diageo has sold call options to General Mills giving General Mills the option to purchase 29 million of General Mills shares held by Diageo subject to certain limitations. The call options have a strike price of \$51.56 and expire in October 2005. The estimated fair value of the call options was derived using a Black Scholes model using market volatility, share price and interest rates as at 30 June 2003. It is estimated that a 15% increase in the share price of General Mills would increase the negative fair value by £40 million.

Annual Report 2003

Critical UK GAAP accounting policies

The preparation of financial statements requires management to make estimates and judgements. Diageo's accounting policies are set out in the notes to the consolidated financial statements of the annual report. Of these policies, the board considers that policies in relation to the following areas are of greater complexity and/or particularly subject to the exercise of judgement.

Brands Acquired brands are held on the consolidated balance sheet at cost. Where brands are regarded as having indefinite useful economic lives, they are not amortised. Assessment of the useful economic life of an asset, or that an asset has an indefinite life, requires considerable management judgement. Impairment reviews are carried out to ensure that intangible assets, including brands, are not carried at above their recoverable amounts. In particular, the group performs a discounted cash flow analysis annually to compare discounted estimated future operating cash flows to the net carrying value of each acquired brand. Any impairment write downs identified are charged to the profit and loss account. The test is dependent on management estimates and judgements, in particular in relation to the forecasting of future cash flows, and the discount rate applied to these cash flows.

Post employment benefits Diageo accounts for post employment benefits under accounting standard SSAP 24, and provides additional disclosures in accordance with FRS 17. Application of SSAP 24 requires the exercise of judgement in relation to assumptions for future pay rises in excess of inflation, employee demographics and the future expected returns on assets. Diageo determines the assumptions to be adopted in discussion with its actuaries, and believes these assumptions to be in line with UK practice generally, but the application of different assumptions could have a significant effect on the amounts reflected in the profit and loss account and balance sheet in respect of post employment benefits.

Operating exceptional items Operating exceptional items are those that, in management's judgement, are material items that arise from events or transactions that fall within the ordinary activities of the group and by virtue of their size or incidence, should be separately disclosed if the financial statements are to properly reflect the results for the period. The determination of which items should be separately disclosed as operating exceptional items requires a significant degree of judgement. Exceptional items under UK GAAP do not represent extraordinary items under US GAAP.

Financial instruments The group uses financial instruments to hedge its exposures to fluctuations in interest rates and foreign exchange rates. Instruments accounted for as hedges are structured so as to reduce the market risk associated with the underlying transaction being hedged and are designated as a hedge at the inception of the contract. While UK GAAP includes prescriptive disclosure requirements in relation to financial instruments, it does not include a standard on hedge accounting. Nevertheless, under UK GAAP, hedging principles are generally applied whereby the cash flows on hedge instruments are matched to the underlying hedged risks with hedging instruments held in the balance sheet at amortised cost. In the absence of detailed guidance under UK GAAP, judgement must be applied in the establishment and application of accounting policies in relation to financial instruments accounted for as hedges.

New accounting standards

The financial information included in this annual report complies, to the extent detailed below, with the following Financial Reporting Standard issued by the UK Accounting Standards Board. New US accounting standards that will impact the US GAAP information are also set out below.

United Kingdom FRS 17 Retirement benefits This standard replaces the use of actuarial values for assets in a pension scheme in favour of a market-based approach. In order to cope with the volatility inherent in this measurement basis, the standard requires that the profit and loss account shows the relatively stable ongoing service cost, interest cost and expected return on assets. Fluctuations in market values and changes in actuarial assumptions are reflected in the statement of total recognised gains and losses. The group has continued to account for pensions and other post employment benefits in accordance with SSAP 24 but has complied with the transitional disclosure requirements of FRS 17 in its consolidated financial statements (see note 5 to the consolidated financial statements) and will adopt this standard in its primary financial statements from 1 July 2003.

Under FRS 17, Diageo's net deficit before taxation, as at 30 June 2003, for all defined benefit plans, is approximately £1.4 billion. It is estimated that as at the end of August 2003 the deficit is approximately £1.1 billion. The adoption of the accounting provisions of FRS 17 for the year ending 30 June 2004, in respect of the principal post employment plans, is currently estimated to result in a net charge to profit before exceptional items and taxation of approximately £120 million, compared to a restated

Edgar Filing: DIAGEO PLC - Form 20-F/A

£44 million net charge for the year ended 30 June 2003. In addition, in the year ending 30 June 2004 it is expected that there will be a charge of some £8 million (2003 £8 million) in respect of other post employment plans around the world and £20 million in respect of the cost of augmenting pension benefits in Ireland.

United States In November 2002, the Financial Accounting Standards Board (FASB) issued FIN No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. The interpretation provides guidance on the guarantor's accounting and disclosure requirements for guarantees, including indirect guarantees of indebtedness of others. The accounting guidelines are applicable to guarantees issued or amended after 31 December 2002 and require that a liability, at inception, be recorded for the fair value of such guarantees in the balance sheet. Subsequent to 31 December 2002 Diageo has not entered into or modified any guarantees.

In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation - Transition and Disclosure - an amendment of FASB Statement No. 123. This statement amends SFAS No. 123, Accounting for Stock-Based Compensation, to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation and requires certain additional disclosures in respect of stock-based compensation. The group has adopted the disclosure requirements of this standard.

In January 2003, the FASB issued FIN No. 46, Consolidation of Variable Interest Entities, an Interpretation of ARB No. 51. FIN No. 46 requires certain variable interest entities to be consolidated by the primary beneficiary of the entity if the equity investors in the entity do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. FIN No. 46 is effective immediately for all new variable interest entities created or acquired after 31 January 2003. For variable interest entities created or acquired prior to 1 February 2003 the provisions of FIN No. 46 must be applied for the first interim or annual period beginning after 15 June 2003. Diageo does not expect the adoption of FIN No. 46 to have a material effect on the group.

In April 2003, the FASB issued SFAS No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities. This statement amends and clarifies reporting for derivative instruments, including certain derivative instruments embedded in other contracts and for hedging activities, and is effective for contracts entered into or modified after 30 June 2003.

Table of Contents

50 Diageo	Annual Report 2003 Operating and financial review
-----------	--

In May 2003, the FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity. The statement requires issuers to classify as liabilities (or assets in some circumstances) three classes of freestanding financial instruments that embody obligations for the issuer. Generally, SFAS No. 150 is effective for financial instruments entered into or modified after 31 May 2003 and is otherwise effective at the beginning of the first interim period beginning after 15 June 2003. The group did not enter into any financial instruments within the scope of the Statement during June 2003. The group has not yet completed its evaluation of the impact of SFAS No. 150 on its existing financial instruments entered into on or before 31 May 2003.

Discussion of US GAAP differences

Diageo's consolidated financial statements have been prepared in accordance with UK GAAP, which is the group's primary reporting framework. Reconciliations between UK and US GAAP are set out in the consolidated financial statements and this section explains the principal differences.

	2003 (restated) £ million	Year ended 30 June	
		2002 £ million	2001 £ million
Turnover UK GAAP	9,440	11,282	12,821
US GAAP	9,153	10,760	11,868
Effect on net income of significant differences between UK and US GAAP:			
Net income in accordance with UK GAAP	76	1,617	1,207
Adjustments to conform with US GAAP:			
Brands, goodwill and other intangibles	(7)	(2)	(442)
Inventories	(46)	(58)	(74)
Pension and other post employment benefits	37	19	28
Derivative instruments in respect of General Mills shares	(4)	166	
Other derivative instruments	(189)	(100)	(17)
Burger King impairment charges and transaction costs	707	(135)	
Disposals of businesses	(171)	1,022	
Other items	46	99	(70)
Deferred taxation	(15)	(74)	126
Net income in accordance with US GAAP	434	2,554	758

The US GAAP financial information for the year ended 30 June 2003 has been restated to amend Diageo's treatment for deferred tax associated with minimum pension liabilities. The amendment results in a deferred tax charge of £53 million being reclassified from other comprehensive deficit in net income and a reversal of deferred tax of £118 million previously charged to other comprehensive deficit. The overall effect is therefore a reduction of £53 million to net income, a reduction in the comprehensive deficit of £118 million and an increase in shareholders' equity of £118 million. The amendment does not affect operating income or cash flow under US GAAP nor does it affect Diageo's principal financial information prepared under UK GAAP.

Turnover

UK GAAP turnover (sales in US terminology) for the year ended 30 June 2003 was £287 million (2002 £522 million; 2001 £953 million) higher than turnover under US GAAP, as (i) following the adoption of EITF 01-09, £74 million (2002 £306 million of which £217 million was in respect of Pillsbury; 2001 £714 million of which £619 million was in respect of Pillsbury) of marketing expenditure has been reclassified from selling, general and administrative expenses to a reduction in sales under US GAAP, and (ii) the accounting treatment of joint arrangements (between the group and LVMH) is different. Under UK GAAP, the group includes in turnover its attributable share of turnover of joint arrangements, measured according to the terms of the arrangement and sales to joint arrangements by Diageo companies are eliminated on consolidation. Under US GAAP, joint arrangements are accounted for under the equity method of accounting and the group's share of sales of the joint arrangements is not included as part of group sales. Sales to joint arrangements by Diageo companies are accounted for as part of turnover. All of the joint arrangements are included in the premium drinks segment.

Net income

The significant reconciling items in net income are as follows:

Brands, goodwill and other intangibles Under UK GAAP, all intangible assets acquired up to 30 June 1998, other than certain brands, have been written off direct to reserves in the period acquired. Intangible assets acquired since 1 July 1998 are capitalised on the balance sheet. Where the intangible assets are regarded as having limited useful economic lives, their cost is amortised over those lives; where they are regarded as having indefinite useful economic lives, they are not amortised but are subject to impairment reviews. From 1 July 2001, Diageo applied the requirements of SFAS No. 142, Goodwill and Other Intangible Assets to its US GAAP results. SFAS No. 142 requires that brands, goodwill and other intangible assets with indefinite lives should not be amortised but be reviewed at least annually for impairment. Application of SFAS No. 142 has resulted in a nil charge under US GAAP for amortisation of brands and goodwill for the years ended 30 June 2002 and 2003.

Inventories The fair value of the net assets under US GAAP of the Guinness Group was higher than the net assets under UK GAAP, primarily in respect of maturing whisky inventories. The fair value of the inventories at the date of acquisition (17 December 1997) was £601 million higher under US GAAP compared to UK GAAP. The increase in inventory values is unwinding over a number of years on the sale of the whisky to third parties. In the year ended 30 June 2003 £46 million (2002 £58 million; 2001 £74 million) of the fair trade value increase was realised.

Pension and other post employment benefits There are differences in the methods of valuation required under UK and US GAAP for valuing assets and liabilities of defined benefit pension plans. US GAAP is generally more prescriptive in respect of actuarial assumptions and the allocation of costs to accounting periods. These differences affect the group's post employment costs under UK and US GAAP.

Table of Contents

51 Diageo

Annual Report 2003

Under current UK GAAP (SSAP 24), the assumptions that the group has used to calculate the post employment liabilities have been derived by taking a risk free guaranteed bond rate and adding a margin for the expected return on assets. For US GAAP, the discount rates are derived from AA rated corporate bond yields. The other main difference is that under UK GAAP, any surplus or deficit arising on the actuarial valuation is spread over the average service lives of the employees (generally 12 years) and credited or charged to the profit and loss account. Under US GAAP, a similar spreading occurs but it is only recognised when outside a 10% corridor.

In the year ended 30 June 2003 under UK GAAP, the charge for post employment costs before taxation was £22 million (2002 a credit of £12 million; 2001 a credit of £13 million) compared to a credit of £15 million (2002 £31 million; 2001 £41 million) under US GAAP, excluding amounts in respect of disposals of businesses. Under US GAAP, applying the requirements of SFAS No. 88 in the year ended 30 June 2003, there was an additional credit of £18 million in relation to the disposal of Burger King (2002 £49 million in respect of Pillsbury).

Derivative instruments in respect of General Mills shares Under the terms of the contingent value right received in connection with the disposal of Pillsbury, in the year ended 30 June 2003, Diageo received a cash payment from General Mills. Under UK GAAP, this was recognised in the profit and loss account as an exceptional gain on the disposal of businesses. However, under US GAAP, this has been recognised in the profit and loss account in the year ended 30 June 2002 as a derivative and has accordingly been held at its estimated fair value with changes in this fair value included in the profit and loss account.

Under UK GAAP, the premium received from the sale of options to General Mills over 29 million ordinary shares of Diageo s holding in that company is deferred in the balance sheet. The premium will be recognised in the profit and loss account on exercise or lapse of the options. Under US GAAP, the option premium represents a derivative and is accordingly held at its estimated fair value at the balance sheet date with changes in fair value included in the profit and loss account.

Other derivative instruments The group uses derivative financial instruments for risk management purposes. Under UK GAAP, changes in the fair value of interest rate derivatives, derivatives hedging forecast transactions and currency option cylinders are not recognised until realised. Changes in the fair value of derivatives hedging the translation of net assets of overseas operations are taken to the statement of total recognised gains and losses.

Under US GAAP, all derivatives are carried at fair value at the balance sheet date. Certain of the group s derivatives qualify for and are designated as hedges under US GAAP which defers the effect on net income from gains and losses arising from changes in their fair value to coincide with the timing of the recognition of the hedged item. Gains and losses arising from changes in the fair value of derivatives which do not qualify for US GAAP hedge accounting treatment are charged or credited in determining net income under US GAAP. In the year ended 30 June 2003, under US GAAP, losses of £148 million were recognised on foreign exchange derivatives (2002 gains of £97 million; 2001 losses of £8 million) and losses of £45 million were recognised on interest rate instruments (2002 losses of £219 million; 2001 losses of £7 million). The year on year movements are a product of the portion of the group s hedging instruments for which mark-to-market movements are taken to net income under US GAAP but not under UK GAAP, and the movements in exchange and interest rates in each period. Other differences arising between UK and US GAAP on derivative instruments amounted to gains of £4 million (2002 gains of £22 million; 2001 losses of £2 million).

Burger King impairment charges and transaction costs Net income for the year ended 30 June 2003 reflects a pre tax charge in relation to the sale of Burger King of £1,457 million and £750 million under UK and US GAAP, respectively, representing £707 million of the total UK/US GAAP difference in net income. Under US GAAP, the transaction is not accounted for as a disposal due to the size of the investment made by the buyer and Diageo s continuing involvement through the guarantee provided by Diageo in respect of the acquisition finance. However, a charge for impairment has been recognised rather than a loss on disposal. The charge for impairment under US GAAP was lower than the loss on disposal under UK GAAP principally because the goodwill and brands acquired on the original acquisition of the quick service restaurants business were being amortised over 40 years up to 30 June 2001 (prior to the adoption of SFAS No. 142), whereas no amortisation had been charged on the goodwill and brands under UK GAAP. By the date of disposal, Diageo had incurred additional cumulative amortisation (including related deferred tax) under US GAAP of £609 million on the goodwill and brands of Burger King. Other differences arising between UK and US GAAP, principally in respect of derivative instruments, reduced the charge under US GAAP by £98 million.

As at 30 June 2002, under US GAAP, an impairment in the carrying value of goodwill attributable to the group s quick service restaurants business of £135 million was recognised. Under UK GAAP, the goodwill to which the impairment related had already been written off to reserves.

Disposals of businesses Under UK GAAP, excluding the pre tax loss in respect of the disposal of Burger King of £1,457 million and the receipt under the terms of the contingent value right of £173 million described above, the group made gains on disposals of

Edgar Filing: DIAGEO PLC - Form 20-F/A

other businesses of £14 million compared with gains of £16 million under US GAAP in the year ended 30 June 2003.

Net income for the year ended 30 June 2002 reflects pre tax gains on the disposals of businesses of £821 million and £1,843 million under UK and US GAAP, respectively, including £322 million and £1,279 million, respectively in respect of the disposal of Pillsbury. The gain arising on the disposal of Pillsbury under US GAAP, was £957 million higher than under UK GAAP principally because the goodwill and brands acquired in the original acquisition of Pillsbury were being amortised over 40 years up to 30 June 2001 (prior to the adoption of SFAS No. 142), whereas no amortisation had been charged on the goodwill and brands under UK GAAP. By the date of disposal, Diageo had incurred additional cumulative amortisation (including related deferred tax) under US GAAP of £871 million in respect of Pillsbury. In addition, under UK GAAP the cumulative exchange gains arising on the unhedged net assets of Pillsbury remain in reserves on the subsequent disposal of the business. Under US GAAP, the cumulative exchange gains on the unhedged net assets of £133 million, on disposal of the business have been credited to the profit and loss account. Other differences arising between UK and US GAAP increased the gain on disposal of Pillsbury under US GAAP by £47 million principally due to a guarantee given by Diageo to third parties.

Exceptional and extraordinary items Under UK GAAP, exceptional items are those that, in management's judgement, are material items that arise from events or transactions that fall within the ordinary activities of the group and, by virtue of their size or incidence, should be separately disclosed if the financial statements are to properly reflect the results for the period. US GAAP does not have such a category. Under US GAAP, certain of these items are treated in accordance with paragraph 26 of APB 30 as a separate component of income from continuing operations, if appropriate. The group has had no extraordinary items under either UK or US GAAP for the three years ended 30 June 2003.

Annual Report 2003

Independent auditor s report

To the Board of Directors and shareholders of Diageo plc.

We have audited the accompanying consolidated balance sheets of Diageo plc and subsidiaries as at 30 June 2003 and 30 June 2002, and the related consolidated profit and loss accounts, consolidated statements of total recognised gains and losses and consolidated cash flow statements for each of the years in the three year period ended 30 June 2003 presented on pages 70 to 129. These consolidated financial statements are the responsibility of the company s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the aforementioned consolidated financial statements present fairly, in all material respects, the financial position of Diageo plc and subsidiaries as of 30 June 2003 and 30 June 2002 and the results of their operations and their cash flows for each of the years in the three year period ended 30 June 2003 in conformity with generally accepted accounting principles in the United Kingdom.

Generally accepted accounting principles in the United Kingdom vary in certain significant respects from generally accepted accounting principles in the United States of America. Application of generally accepted accounting principles in the United States of America would have affected the results of operations for the years ended 30 June 2003, 2002 and 2001 and shareholders equity as at 30 June 2003 and 2002, to the extent summarised in note 32 to the consolidated financial statements.

As described in note 32 to the consolidated financial statements certain US GAAP information in respect of the year ended 30 June 2003 has been restated.

Note of consolidated historical cost profits and losses

There is no material difference between the reported profit shown in the consolidated profit and loss account and the profit for the relevant years restated on an historical cost basis.

The accompanying notes are an integral part of these financial statements.

Table of Contents

75 Diageo

Annual Report 2003

Accounting policies**Bases of accounting and consolidation**

The accounts are prepared under the historical cost convention, modified by the revaluation of certain land and buildings, and in accordance with applicable UK accounting standards.

The group accounts include the accounts of the company and its subsidiary undertakings (subsidiaries) together with the group's attributable share of the results of joint arrangements and associated undertakings (associates). Unless otherwise stated, the acquisition method of accounting has been adopted. Under this method, the results of subsidiaries sold or acquired are included in the profit and loss account up to, or from, the date control passes.

Acquisitions and disposals

On the acquisition of a business, or of an interest in an associate, fair values, reflecting conditions at the date of acquisition, are attributed to the net assets including significant owned brands acquired. Adjustments to fair values include those made to bring accounting policies into line with those of the group. Where merger relief is applicable under the UK Companies Acts, the difference between the fair value of the business acquired and the nominal value of shares issued as purchase consideration is treated as a merger reserve.

The profit and loss on the disposal of a previously acquired business includes the attributable amount of purchased goodwill relating to that business, including any goodwill written off direct to reserves prior to 1 July 1998.

Brands, goodwill and other intangible assets

When the cost of an acquisition exceeds the fair values attributable to the group's share of the net assets acquired, the difference is treated as purchased goodwill. Goodwill arising on acquisitions subsequent to 1 July 1998 is capitalised but prior to that date it was eliminated against reserves, and this goodwill has not been restated.

Acquired brands and other intangible assets which are controlled through custody or legal rights and could be sold separately from the rest of the business are capitalised, where fair value can be reliably measured.

Where capitalised goodwill and intangible assets are regarded as having limited useful economic lives, their cost is amortised on a straightline basis over those lives – up to 20 years. Where goodwill and intangible assets are regarded as having indefinite useful economic lives, they are not amortised. Assets with indefinite lives are reviewed for impairment annually and other assets are reviewed for impairment wherever events or circumstances indicate that the carrying amount may not be recoverable. Impairment reviews, comparing the discounted estimated future operating cash flows with the net carrying value of brands or goodwill, are carried out to ensure that goodwill and intangible assets are not carried at above their recoverable amounts. Amortisation and any impairment write downs are charged to the profit and loss account.

Tangible fixed assets

Land and buildings are stated at cost or, for certain assets acquired prior to 1993, at professional valuation, less depreciation. Freehold land is not depreciated. Leaseholds are depreciated over the unexpired period of the lease. Other tangible fixed assets are depreciated on a straightline basis to estimated residual values over their expected useful lives within the following ranges: industrial and other buildings – 10 to 50 years; plant and machinery – 5 to 25 years; fixtures and fittings – 5 to 10 years; casks and containers – 15 to 20 years; and computer software – up to 5 years.

Reviews are carried out if there is some indication that impairment may have occurred, to ensure that fixed assets are not carried at above their recoverable amounts.

Leases

Where the group has substantially all the risks and rewards of ownership of an asset subject to a lease, the lease is treated as a finance lease. Other leases are treated as operating leases, with payments and receipts taken to the profit and loss account on a straightline basis over the life of the lease.

Associates and joint arrangements

An associate is an undertaking in which the group has a long term equity interest and over which it exercises significant influence. The group's interest in the net assets of associates is included in investments in the group balance sheet. Joint arrangements, where each party has its own separate interest in particular risks and rewards, are accounted for by including the attributable share of the assets and liabilities, measured according to the terms of the arrangement.

Investment in own shares

Investment in own shares is undertaken for the purpose of fulfilling obligations in respect of various employee share plans around the group. The difference between the purchase price of the shares and the exercise price of the option or grant is amortised over the relevant period, which is generally three years from the date of an award.

Stocks

Stocks are stated at the lower of cost and net realisable value. Cost includes raw materials, direct labour and expenses, and an appropriate proportion of production and other overheads. Cost is calculated on an actual usage basis for maturing stocks and on a first in, first out basis for other stocks.

Table of Contents

76 Diageo

Annual Report 2003
Accounting Policies

Foreign currencies

The profit and loss accounts and cash flows of overseas subsidiaries and associates are translated into sterling at weighted average rates of exchange, other than substantial transactions which are translated at the rate on the date of the transaction. The adjustment to closing rates is taken to reserves.

Balance sheets are translated at closing rates. Exchange differences arising on the re-translation at closing rates of the opening balance sheets of overseas subsidiaries and associates are taken to reserves, as are exchange differences arising on related foreign currency borrowings and financial instruments. Tax charges and credits arising on such items are also taken to reserves. Other exchange differences are taken to the profit and loss account.

The results, assets and liabilities of operations in hyper-inflationary economies are determined using an appropriate relatively stable currency as the functional currency. The exchange differences arising from this initial process are taken to the profit and loss account.

Transactions in foreign currencies are recorded at the rate of exchange at the date of the transaction or, if hedged forward, at the rate of exchange under the related foreign currency contract.

Turnover

Turnover represents the net invoice value of goods and services, including excise duties and royalties receivable but excluding value added tax. Goods include premium drinks within continuing operations, and packaged food products and retail sales in the group's quick service restaurants within discontinued operations. Services include royalties and other franchise fees primarily related to the group's discontinued quick service restaurants business.

Turnover for goods is recognised depending upon individual customer terms at the time of despatch (where the customer's terms are FOB shipping point), delivery or some other specified point when the risk of loss transfers. Provision is made for returns where appropriate. Turnover for goods is stated net of price discounts, allowances for customer loyalty and certain promotional activities and similar items.

Royalties are accrued as earned and other franchise fees are recognised when the related restaurant begins operations.

Advertising

Advertising production costs are charged to the profit and loss account when the advertisement is first shown to the public.

Research and development

Research and development, including developing new drinks products and package design expenditure is written off in the period in which it is incurred.

Pensions and other post employment benefits

The cost of providing pensions and other post employment benefits is charged against profits on a systematic basis, with pension surpluses and deficits arising allocated over the expected average remaining service lives of current employees. Differences between the amounts charged in the profit and loss account and payments made to pension or other plans are treated as assets or liabilities. Deferred tax is accounted for on these assets and liabilities. Unfunded post employment medical benefit liabilities are included in provisions in the balance sheet.

Exceptional items

Exceptional items are those that in management's judgement need to be disclosed by virtue of their size or incidence. Such items are included within the profit and loss account caption to which they relate, and are separately disclosed either in the notes to the consolidated financial statements or on the face of the consolidated profit and loss account.

Deferred taxation

Full provision for deferred tax is made for timing differences between the recognition of gains and losses in the consolidated financial statements and their recognition in tax computations, using current tax rates. The group does not discount these balances. No deferred tax is provided in respect of any future remittance of earnings of foreign subsidiaries or associates where no commitment has been made to remit such earnings.

Financial instruments

The group uses derivative financial instruments to hedge its exposures to fluctuations in interest and foreign exchange rates.

Edgar Filing: DIAGEO PLC - Form 20-F/A

Instruments accounted for as hedges are structured so as to reduce the market risk associated with the underlying transaction being hedged and are designated as a hedge at the inception of the contract. If the underlying transaction to a hedge ceases to exist, the hedge is terminated and the profit or loss is recognised immediately. If the hedge transaction is terminated, the profit or loss is held in the balance sheet and amortised over the life of the original underlying transaction.

Receipts and payments on interest rate instruments are recognised on an accruals basis over the life of the instrument. Foreign exchange contracts hedging net investments in overseas businesses are revalued at closing rates and exchange differences arising are taken to reserves. Gains and losses on contracts hedging forecast transactional cash flows, and on option instruments hedging the sterling value of foreign currency denominated income, are recognised in the hedged periods.

Cash flows associated with derivative financial instruments are classified in the cash flow statement in a manner consistent with those of the transactions being hedged. Finance costs associated with debt issuances are charged to the profit and loss account over the life of the issue.

Table of Contents**Notes to the consolidated financial statements**

Diageo was created by the merger of the former GrandMet and Guinness Group businesses on 17 December 1997. Under generally accepted accounting principles (GAAP) in the United Kingdom the combination has been accounted as a merger and the results and cash flows of GrandMet and the Guinness Group are combined as of the beginning of the earliest financial year presented. Under US GAAP the merger has been accounted for as an acquisition of the Guinness Group by GrandMet. At the time of the merger, Diageo changed its year end to 30 June.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

1 New accounting standards in the United Kingdom

The financial statements comply, to the extent detailed below, with the following Financial Reporting Standard issued by the UK Accounting Standards Board.

FRS 17 Retirement benefits This standard replaces the use of actuarial values for assets in a pension scheme in favour of a market-based approach. In order to cope with the volatility inherent in this measurement basis, the standard requires that the profit and loss account shows the relatively stable ongoing service cost, interest cost and expected return on assets. The difference between expected and actual returns and changes in actuarial assumptions are reflected in the statement of total recognised gains and losses. The group has continued to account for pensions and other post employment benefits in accordance with SSAP 24 but has complied with the transitional disclosure requirements of FRS 17 in these consolidated financial statements and will adopt this standard in its primary financial statements from 1 July 2003.

2 Segmental analysis

The classes of business, and the group's reportable segments, are premium drinks, quick service restaurants and in prior years, packaged food. Each segment contains closely related products that are unique to that particular segment.

Premium drinks, an international manufacturer and distributor of spirits, wines and beer that produces and distributes a wide range of premium brands, including Smirnoff vodka, Johnnie Walker Scotch whiskies, Guinness stout, Baileys Original Irish Cream liqueur, J B Scotch whisky, Captain Morgan rum and Tanqueray gin. Premium drinks also owns the distribution rights for the José Cuervo tequila brands in the United States and other countries.

Premium drinks also owns a number of investments in unconsolidated associates, the principal investment being a 34% equity interest in Moët Hennessy, a French subsidiary of Moët Hennessy Louis Vuitton SA (LVMH). Moët Hennessy is based in France and is a leading producer and exporter of champagne and cognac.

Quick service restaurants, a leading fast food hamburger restaurant chain with, as at 30 June 2002, approximately 11,500 outlets worldwide of which over 8,100 were in the United States. At 30 June 2002, of the total number of outlets, 91% are franchised and 9% were company operated.

On 13 December 2002, the group disposed of its quick service restaurants business (Burger King) to a newly formed company owned by Texas Pacific Group, Bain Capital and Goldman Sachs Capital Partners. In connection with the transaction Diageo has guaranteed up to \$850 million (£515 million) of external borrowing of Burger King (see note 29).

Packaged food, produces and distributes leading food brands including Pillsbury refrigerated dough and other dough based goods, Old El Paso Mexican foods, Progresso soups, Green Giant vegetables and Häagen-Dazs ice cream, as well as operating a foodservice business.

On 31 October 2001, the group disposed of its worldwide packaged food businesses to General Mills, Inc (General Mills). Diageo now owns approximately 21% of the issued share capital of General Mills, having exercised an option to sell 55 million of its shares in General Mills on 1 November 2001. General Mills produces and sells a variety of food products, principally in North America including Big G ready-to-eat cereals, Betty Crocker dessert, baking, dinner mix and snack products, Yoplait and Colombo yogurt as well as the businesses that formerly comprised the packaged food businesses. General Mills business is primarily in the United States. General Mills is incorporated in the United States and is listed on the New York Stock Exchange.

Total assets	7,957	3,094	4,851	1,742	17,644

(a) The other segment for profit/(loss) before interest and tax represents the group's share of profit before interest and tax from its investment in General Mills. The other segment for net assets comprises the net investment in General Mills of £1,743 million (2002 £1,837 million; 2001 £nil); net external borrowings of £4,870 million (2002 £5,496 million; 2001 £5,479 million); tax and external dividend creditors of £1,532 million (2002 £1,223 million; 2001 £1,126 million); net pension prepayment of £518 million (2002 £466 million; 2001 £458 million); and other net assets of £248 million (2002 £205 million; 2001 £51 million). The other segment for total assets comprises the net investment in General Mills of £1,743 million (2002 £1,837 million; 2001 £nil); cash at bank and liquid resources of £1,191 million (2002 £1,596 million; 2001 £1,842 million); pension prepayment of £536 million (2002 £485 million; 2001 £477 million); investment in own shares of £259 million (2002 £219 million; 2001 £169 million); interest rate and foreign currency swaps of £484 million (2002 £365 million; 2001 £315 million); and other assets of £644 million (2002 £681 million; 2001 £291 million).

(b) The group interest expense is managed centrally and is not attributable to individual activities. Inter segmental sales are immaterial and have been eliminated in computing the segmental disclosure.

(c) The weighted average exchange rates used in the translation of profit and loss accounts were US dollar £1 = \$1.59 (2002 £1 = \$1.44; 2001 £1 = \$1.45) and euro £1 = €1.52 (2002 £1 = €1.61; 2001 £1 = €1.63). Exchange rates used to translate assets and liabilities at the balance sheet date were US dollar £1 = \$1.65 (2002 £1 = \$1.52) and euro £1 = €1.44 (2002 £1 = €1.54). The group uses option cylinders and foreign exchange transaction hedges to mitigate the effect of exchange rate movements.

(a) The geographical analysis of turnover and operating profit is based on the location of the third party customers.

(b) Long-lived assets comprise tangible fixed assets and intangible assets after depreciation and amortisation respectively. The net book value of brands are included in the geographical region in which the brand originated.

(c) Profit before interest and tax excludes the profit attributable to General Mills of £269 million (2002 £112 million; 2001 £nil) and the profit attributable to Moët Hennessy of £174 million (2002 £140 million; 2001 £155 million).

Annual Report 2003

4 Operating costs continued

(d) Goodwill amortisation Operating costs for continuing operations in the year include goodwill amortisation of £2 million (2002 £2 million; 2001 £2 million). Operating costs for discontinued operations include goodwill amortisation of £2 million (2002 £10 million; 2001 £24 million).

(e) Fees paid to auditor The fees paid to the principal auditor of the group, KPMG Audit Plc, and its affiliates were as follows:

	United Kingdom £ million	Rest of World £ million	2003 £ million	2002 £ million	2001 £ million
Audit fees	2.3	2.0	4.3	3.9	2.8
Acquisitions and disposals	4.2		4.2	9.5	7.5
Other audit-related fees	0.2	0.7	0.9	0.9	1.5
Tax fees	2.4	4.9	7.3	6.2	4.4
All other fees				1.7	0.9
	9.1	7.6	16.7	22.2	17.1

Audit fees include the fee for statutory audit of the company of £23,000 (2002 £23,000; 2001 £23,000); and its subsidiaries of £3.0 million (2002 £3.3 million; 2001 £2.8 million); and other audit services required by statute or regulation of £1.3 million (2002 £0.6 million; 2001 £nil). A further £0.2 million (2002 £0.1 million; 2001 £0.1 million) was charged in relation to the audit by firms other than KPMG. Fees in relation to acquisitions and disposals include due diligence and other advisory work in relation to the disposals of Burger King, Pillsbury and other brands, and the acquisition of Seagram. Other audit-related fees include employee pension fund and benefit plan services. Tax fees consist principally of tax compliance services and tax advice, including advice in relation to acquisitions and disposals. Other fees in prior years consist principally of IT projects and support.

Employer's pension	10	(24)	(33)
Other post employment	12	12	20
	1,080	1,369	1,605

Retirement benefits The group has continued to account for pensions and other post employment benefits in accordance with SSAP 24 and the disclosures in (i) below are those required by that standard. FRS 17 Retirement benefits was issued in November 2000 and the group expects to comply fully in its primary statements with its requirements in the year ending 30 June 2004. Prior to this, transitional disclosures are required which, to the extent they are not given in (i), are set out in (ii).

Edgar Filing: DIAGEO PLC - Form 20-F/A

(i) SSAP 24 disclosures The group operates a number of pension plans throughout the world, devised in accordance with local conditions and practices. The larger plans are generally of the defined benefit type and are funded by payments to separately administered funds or insurance companies. The principal plans are in the United Kingdom, Ireland, United States and Canada. All valuations were performed by independent actuaries using the projected unit method to determine pension costs.

The principal assumptions for the calculation of the pension cost under SSAP 24 for the year ended 30 June 2003 were: real rate of return on assets 4% (2002 4%; 2001 4%); real annual increase in wages and salaries 2% to 2.5% (2002 2% to 2.5%; 2001 2% to 2.5%); real rate of future dividend growth for UK equities 1% 1.25% (2002 1%; 2001 1%); and pension increases approximately in line with inflation. Surpluses or deficits on the pension plans arising from the actuarial valuations are spread over the expected average service lives of the members (12 to 17.5 years) of the relevant plan on a straight line basis using the single variation method.

84 Diageo Annual Report 2003
Notes to the consolidated financial statements

5 Employees continued

The actuarial value of the assets of those plans at 30 June 2002 was sufficient to cover approximately 123% of the benefits that had accrued to members after allowing for expected future increases in wages and salaries. Provision is made in the financial statements for the benefits accruing to members of unfunded pension plans in accordance with the advice of independent actuaries.

The group also operates a number of plans, primarily in the United States, which provide employees with post employment benefits in respect of medical costs. The plans are generally unfunded and the liability in respect of these benefits is included in provisions. The liability is assessed by qualified independent actuaries under the projected unit method, assuming that principal assumptions under SSAP 24 were a liability discount rate of 7.5% (2002 7.5%; 2001 7.5%) and medical inflation of 10% reducing by 1% per year to 5% (2002 6% reducing by 1% per year to 5%; 2001 7% reducing to 1% per year to 5%).

The most recent full valuations of the significant defined benefit post employment plans were carried out as follows: United Kingdom on 31 March 2000; United States on 1 January 2003; and Ireland on 31 December 2000.
