APEX MUNICIPAL FUND, INC.

Managed Dividend Policy

The Fund's dividend policy is to distribute all or a portion of its net investment income to its shareholders on a monthly basis. In order to provide shareholders with a more consistent yield to the current trading price of shares of Common Stock of the Fund, the Fund may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any particular month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Fund for any particular month may be more or less than the amount of net investment income earned by the Fund during such month. The Fund's current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Assets, Liabilities and Capital, which comprises part of the financial information included in this report.

Proxy Results

During the six-month period ended June 30, 2002, Apex Municipal Fund, Inc.'s shareholders voted on the following proposal. The proposal was approved at a shareholders' meeting on April 8, 2002. A description of the proposal and number of shares voted are as follows:

	Shares Voted For	Sha F

1. To elect the Fund's Board of Directors as follows:

Apex Municipal Fund, Inc., June 30, 2002

DEAR SHAREHOLDER

For the year ended June 30, 2002, Apex Municipal Fund, Inc. earned \$0.562 per share income dividends, which included earned and unpaid dividends of \$0.044. This represents a net annualized yield of 6.08%, based on a year-end net asset value of \$9.24 per share. Over the same period, the Fund's total investment return was +4.31%, based on a change in per share net asset value from \$9.45 to \$9.24 and assuming reinvestment of \$0.567 per share income dividends. For the six-month period ended June 30, 2002, the Fund's total investment return was +4.56%, based on a change in per share net asset value from \$9.13 to \$9.24, and assuming reinvestment of \$0.280 per share income dividends.

The Municipal Market Environment

During the six months ended June 30, 2002, the direction of long-term fixed income interest rates was driven as much by volatile U.S. equity markets and continued worldwide political tensions as by economic fundamentals. In early 2002, economic indicators were mixed, signaling some strength in consumer spending and housing-related industries but with continued declines in manufacturing employment. Interest rates remained in a narrow but volatile range as weak U.S. equity markets generally supported fixed income products. By the end of January 2002, the Federal Reserve Board ended its series of short-term interest rate reductions by maintaining its overnight rate target at 1.75%, a 40-year low. The Federal Reserve Board noted that while U.S. economic activity was beginning to strengthen, earlier weakness could easily resume should consumer spending falter. In recent months, however, the index of leading economic indicators has generally risen, suggesting that economic activity is likely to expand later this year. In its final revision, fourth quarter U.S. gross domestic product growth was revised higher to 1.7%, signaling improving economic conditions relative to earlier in 2001. By the end of February 2002, long-term U.S. Treasury bond yields stood at 5.42%.

In early March, a number of economic indicators, including surging existing home sales, solid consumer spending and positive nonfarm payroll growth following several months of job losses, suggested U.S. economic activity was continuing to strengthen. Also, in Congressional testimony, Federal Reserve Board Chairman Alan Greenspan was cautiously optimistic regarding future U.S. economic growth noting, while any increase in activity was likely to be moderate, "an economic expansion (was) well underway." These factors combined to push U.S. equity prices higher and bond prices sharply lower in expectation of a reversal of the Federal Reserve Board actions taken during the past 15 months. By the end of March 2002, long-term U.S. Treasury bond yields stood at 5.80%, their highest level in more than 18 months.

During the past few months, however, bond yields reversed their course to move sharply lower. First quarter 2002 gross domestic product activity was recently finalized at 6.1%, considerably above the level of economic growth seen in late 2001. A number of economic indicators, such as housing activity, consumer spending and recent employment trends have pointed to, at least, a moderate economic recovery for the remainder of 2002. Steady, dramatic declines in U.S. equity markets have led the majority of investors to conclude that the Federal Reserve Board is now unlikely to raise short-term interest rates for the remainder of 2002. U.S. Treasury issue prices were also boosted by erupting Middle East and India/Pakistan conflicts that led many international investors to seek the safe haven of U.S. Treasury securities. By the end of June 2002, long-term U.S. Treasury bond yields had declined to 5.50%. Over the last six months, long-term U.S. Treasury bond yields rose approximately 5 basis points (0.05%).

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

Municipal bond prices displayed a pattern similar to their taxable counterparts during the six-month period ended June 30, 2002. In early 2002, tax-exempt bond yields traded in a relatively narrow range as an increasingly positive technical position supported existing municipal bond prices. In March, however, increased economic activity and associated concerns regarding near-term Federal Reserve Board actions also pushed tax-exempt bond prices lower. By late March, long-term municipal revenue bond yields, as measured by the Bond Buyer Revenue Bond Index, rose to 5.67%, their highest level in more than a year. During the last three months, tax-exempt bond yields generally declined largely in response to the positive fixed income environment engendered by falling equity valuations. The municipal bond market's recent price advances also have been bolstered by the continued improvement in the tax-exempt market's technical position. Despite sizable advances in the rate of new municipal bond issuance, investor demand has increased in recent months, allowing tax-exempt bond prices to rise. For the six-month period ended June 30, 2002, long-term municipal revenue bond yields stood at 5.41%, a decline of almost 20 basis points.

Solid investment demand during the past six months has allowed the tax-exempt market to outperform its taxable counterpart in recent months. Reports stated that thus far in 2002 municipal bond fund net cash flows remained very strong exceeding \$5.9 billion, up more than 40% compared to the same period in 2001. Additionally, in January and February 2002, investors received almost \$50 billion in investment proceeds from coupon income, bond maturities and early redemptions. Given the recent weakness in U.S. equity markets, much of this money was likely reinvested in tax-exempt products. Perhaps, more importantly, short-term municipal interest rates continued to move lower in response to Federal Reserve Board actions. In reaction to the Federal Reserve Board interest rate reductions, short-term municipal interest rates declined to the 1% - 1.5% range. As interest rates declined, investors extended maturities to take advantage of the steep municipal bond yield curve. Also, analysts forecast that investors will receive approximately an additional \$75 billion during June -- August 2002 from bond maturities, proceeds from early bond redemptions and coupon income. Given the lack of strong investment alternatives, it is likely that this money will continue to support the municipal bond market's currently strong technical environment.

Interest rates are likely to remain near current levels as U.S. economic conditions are expected to remain relatively weak. However, going forward, business activity is likely to accelerate, perhaps significantly. Federal aid packages in response to the September 11, 2001 attacks in New York City and Washington, DC were sizable. Airline assistance packages, involving Federal grants and loan guarantees, also were substantial and are likely to continue. The military response to the initial terrorist attacks and ongoing military presence in the Middle East will continue to require significant increases in Defense Department spending. Eventually, this increased governmental spending should result in accelerated U.S. economic activity, especially in the construction and defense industries. This governmental stimulus, in conjunction with the monetary actions taken by the Federal Reserve Board, can be expected to generate significant increases in U.S. gross domestic product growth some time later in 2002.

As inflationary pressures are expected to remain well contained going forward, increased economic activity need not result in significant increases in long-term bond yields. Also, throughout much of 2001, the municipal bond market exhibited far less volatility than its taxable counterparts. Since the strong technical position that has supported the tax-exempt bond market's performance for much of this year can be expected to continue, any potential increases in municipal bond yields can also be expected to be limited.

Portfolio Strategy

During the 12 months ended June 30, 2002, the high-yield municipal bond market

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

was characterized by general improvement in relative valuation across a wide range of disparate credit sectors ranging from health care to various cyclical industrials. Perhaps the most glaring exception was the airline sector, which suffered significant price erosion in the aftermath of the terrorist attacks of September 11, 2001. Widespread losses in the steel industry, along with revelations concerning fraudulent accounting and energy trading practices in the investor-owned utility industry have also pressured valuations for related securities. Nevertheless, the overall picture conveys an impression of recovery from depressed levels that prevailed throughout 1999 and 2000. To a degree, this was a reflection of

2 & 3

Apex Municipal Fund, Inc., June 30, 2002

developments in the taxable corporate bond market where credit spreads narrowed considerably since the Federal Reserve Board embarked on its campaign of monetary policy accommodation beginning in January 2001. In addition, the municipal market in particular benefited from improved cash flows as investors were drawn to the relative stability and predictability of recent bond market returns.

Despite lower performance during the first six months of the Fund's fiscal year, the Fund has experienced more favorable results in the last few months as contributions from a diverse group of current holdings demonstrated the broad-based nature of the improvement in credit spreads. Specifically, the Fund's exposure in the airline sector recovered substantially from losses incurred last fall, providing a welcome lift to relative performance since the beginning of January 2002.

Our portfolio strategy continued to reflect our efforts to utilize analytical resources as a means to discover undervalued investment opportunities in the marketplace. This resulted in sector concentrations that included health care and transportation, while increasing exposure to infrastructure-related tax-backed financing for residential communities during the period. Future activity will likely reflect measures designed to further diversify portfolio holdings within the context of desired sector concentrations. In the past, significant exposure to individual credits has occasionally contributed to heightened levels of volatility in the Fund's total return. By achieving greater diversification, we believe the Fund's returns should exhibit less volatility, as individual credit developments are less likely to significantly impact overall performance.

In Conclusion

We appreciate your ongoing interest in Apex Municipal Fund, Inc., and we look forward to serving your investment needs in the months and years to come.

Sincerely,

/s/ Terry K. Glenn

NOTES TO FINANCIAL STATEMENTS

1. Significant Accounting Policies:

Apex Municipal Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940 as a non-diversified, closed-end management investment company. The Fund's financial statements are prepared in conformity with accounting principles generally accepted in the United States of America, which may require the use of management accruals and estimates. The Fund determines and makes available for publication the net asset value of its Common Stock on a weekly basis. The Fund's Common Stock is listed on the New York Stock Exchange under the symbol APX. The following is a summary of significant accounting policies followed by the Fund.

(a) Valuation of investments--Municipal bonds are traded primarily in the over-the-counter markets and are valued at the most recent bid price or yield equivalent as obtained by the Fund's pricing service from dealers that make markets in such securities. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the over-the-counter market, valuation is the last asked price (options written) or the last bid price (options purchased). Securities with remaining maturities of sixty days or less are valued at amortized cost, which

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

approximates market value. Securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Fund, including valuations furnished by a pricing service retained by the Fund, which may utilize a matrix system for valuations. The procedures of the pricing service and its valuations are reviewed by the officers of the Fund under the general supervision of the Board of Directors.

(b) Derivative financial instruments--The Fund may engage in various portfolio investment strategies to increase or decrease the level of risk to which the Fund is exposed more quickly and efficiently than transactions in other types of instruments. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

o Financial futures contracts--The Fund may purchase or sell financial futures contracts and options on such futures contracts for the purpose of hedging the market risk on existing securities or the intended purchase of securities. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

o Options--The Fund is authorized to write covered call options and purchase put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked to market to reflect the current market value of the option written.

When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

Written and purchased options are non-income producing investments.

(c) Income taxes--It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to

12 & 13

Apex Municipal Fund, Inc., June 30, 2002

NOTES TO FINANCIAL STATEMENTS (concluded)

regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no Federal income tax provision is required.

(d) Security transactions and investment income--Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

identified cost basis. Interest income is recognized on the accrual basis.

As required, effective July 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing all premiums and discounts on debt securities. The cumulative effect of this accounting change had no impact on total net assets of the Fund, but resulted in a \$34,920 increase in cost of securities (which, in turn, results in a corresponding \$34,920 increase in net unrealized depreciation and a corresponding \$34,920 increase in undistributed net investment income), based on securities held by the Fund as of June 30, 2001.

The effect of this change for the year ended June 30, 2002 was to increase net investment income by \$61,069, increase net unrealized depreciation by \$87,598 and increase net realized capital losses by \$8,391. The statement of changes in net assets and financial highlights for prior periods have not been restated to reflect this change in presentation.

(e) Dividends and distributions--Dividends from net investment income are declared daily and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

(f) Reclassification--Accounting principles generally accepted in the United States of America require that certain components of net assets be adjusted to reflect permanent differences between financial and tax reporting. Accordingly, the current year's permanent book/tax differences of \$2,776,491 have been reclassified between paid-in capital in excess of par and accumulated net realized capital losses, \$80,487 has been reclassified between paid-in capital in excess of par and undistributed net investment income and \$75,714 has been reclassified between undistributed net investment income and accumulated net realized capital losses. These reclassifications have no effect on net assets or net asset value per share.

2. Investment Advisory Agreement and Transactions with Affiliates:

The Fund has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of the Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, the Fund pays a monthly fee at an annual rate of .65% of the Fund's average weekly net assets.

For the year ended June 30, 2002, the Fund reimbursed FAM \$10,143 for certain accounting services.

Certain officers and/or directors of the Fund are officers and/or directors of FAM, PSI, Merrill Lynch, Pierce, Fenner & Smith Incorporated, and/or ML & Co.

3. Investments:

Purchases and sales of investments, excluding short-term securities, for the year ended June 30, 2002 were \$45,049,177 and \$52,053,383, respectively.

Net realized losses for the year ended June 30, 2002 and net unrealized losses as of June 30, 2002 were as follows:

	Realized Losses	Unrealized Losses
--	--------------------	----------------------

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

Long-term investments	\$ (4,092,274)	\$ (6,263,002)
	-----	-----
Total	\$ (4,092,274)	\$ (6,263,002)
	=====	=====

As of June 30, 2002, net unrealized depreciation for Federal income tax purposes aggregated \$6,175,404, of which \$5,026,474 related to appreciated securities and \$11,201,878 related to depreciated securities. The aggregate cost of investments at June 30, 2002 for Federal income tax purposes was \$186,721,527.

4. Common Stock Transactions:

At June 30, 2002, the Fund had one class of shares of Common Stock, par value \$.10 per share, of which 150,000,000 shares were authorized. Shares issued and outstanding during the years ended June 30, 2002 and June 30, 2001 remained constant.

5. Distributions to Shareholders:

On July 9, 2002, an ordinary income dividend of \$.044277 was declared. The dividend was paid on July 30, 2002, to shareholders of record on June 18, 2002.

The tax character of distributions paid during the fiscal years ended June 30, 2002 and June 30, 2001 was as follows:

	6/30/2002	6/30/2001
Distributions paid from:		
Tax-exempt income	\$11,114,247	\$11,694,527
	-----	-----
Total distributions	\$11,114,247	\$11,694,527
	=====	=====

As of June 30, 2002, the components of accumulated losses on a tax basis were as follows:

Undistributed tax-exempt income--net	\$ 1,736,391
Undistributed long-term capital gains--net	--

Total undistributed earnings--net	1,736,391
Capital loss carryforward	(21,453,358) *
Unrealized losses--net	(9,919,073) **

Total accumulated losses--net	\$(29,636,040)
	=====

* On June 30, 2002, the Fund had a net capital loss carryforward of \$21,453,358, of which \$1,754,099 expires in 2003, \$7,056,648 expires in 2004, \$1,311,769 expires in 2005, \$938,156 expires in 2006, \$2,975,000 expires in 2008, \$5,341,699 expires in 2009 and \$2,075,987 expires in 2010. This amount will be available to offset like amounts of any future taxable gains.

** The difference between book-basis and tax-basis net unrealized gains (losses) is attributable primarily to the difference between book and tax amortization methods for premiums and discounts on fixed income securities, the interest accrued on securities in default, the amortized

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

premium on securities in default and the deferral of post-October capital losses for tax purposes.

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders,
Apex Municipal Fund, Inc.:

We have audited the accompanying statement of assets, liabilities and capital, including the schedule of investments, of Apex Municipal Fund, Inc. as of June 30, 2002, the related statements of operations for the year then ended and changes in net assets for each of the years in the two-year period then ended, and the financial highlights for each of the years presented. These financial statements and the financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on the financial statements and the financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned at June 30, 2002 by correspondence with the custodian and brokers; when replies were not received from brokers, we performed other auditing procedures. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements and the financial highlights present fairly, in all material respects, the financial position of Apex Municipal Fund, Inc. as of June 30, 2002, the results of its operations, the changes in its net assets, and the financial highlights for the respective stated periods in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP

14 & 15

Apex Municipal Fund, Inc., June 30, 2002

IMPORTANT TAX INFORMATION (unaudited)

All of the net investment income distributions declared monthly by Apex Municipal Fund, Inc. during its taxable year ended June 30, 2002 qualify as tax-exempt interest dividends for Federal income tax purposes.

Please retain this information for your records.

ABOUT INVERSE FLOATERS

As a part of its investment strategy, the Fund may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

derivative securities and may subject the Fund to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed rate, tax-exempt securities. To the extent the Fund invests in inverse securities, the market value of the Fund's portfolio and the net asset value of the Fund's shares may also be more volatile than if the Fund did not invest in these securities.
