Anglo Swiss Resources Inc. increases its 31,000 hectare Diamond Exploration Property

February 3, 2005. Anglo Swiss Resources Inc. (TSX-Venture-ASW, OTC BB ASWRF, Berlin - AMO) has entered into an Option to Purchase Agreement to acquire the Iva Fern Group of claims, which consist of two crown granted mineral claims and three reverted crown granted claims. The claims are situated within the Company's 31,000 ha. McAllister Claim Group in southeastern BC and compliments the existing holdings.

The Option to Purchase Agreement, which is subject to regulatory approval, provides for a payment of \$50,000 plus 200,000 common shares to be paid in instalments on the anniversary dates of the Agreement, ending February 1, 2010.

The McAllister Group of claims is located 13.5 kilometres southeast from the City of Nelson, British Columbia. The company's original claim in this area, the McAllister Diatreme, has been identified as the host of a potential diamondiferous lamproite.

Additional staking was completed on January 13, 2005, which gave Anglo Swiss a significant land position in the Nelson Mining District, where Anglo Swiss discovered its first diatreme. Anglo Swiss President, Len Danard stated, "We believe we have located a second diatreme approximately 4 kilometres from the McAllister Diatreme, which suggests that a cluster of diatremes may be present in the area. This new development is a perfect complement to our existing gemstone properties in south-eastern British Columbia."

Additional work is needed and warranted on this exciting discovery and a comprehensive exploration program is currently being designed by W.G. Timmins, P.Eng & G. C. Macdonald, P.Geo. Both are qualified persons by NI43-101 definition, and are familiar with exploration for and experienced in discovery of diamond bearing kimberlite diatremes in the Northwest Territories.

On behalf of the Board,

"Len Danard"
President & CEO
