FOR IMMEDIATE RELEASE

DATA CENTER CLASS WAN OPTIMIZATION  
LEADER RAMPS UP ITS BUSINESS WITH  
SILICOM: BECOMES \$1.5 MILLION/YEAR  
CUSTOMER FOR SILICOM PRODUCTS

KFAR SAVA, Israel—August 3, 2010--Silicom Ltd. (NASDAQ and TASE: SILC) today announced that a rapidly-growing player in the data center class WAN optimization and virtualization industry, has recently ramped up its orders for the short term and long term significantly, reaching an annualized rate of approximately \$1.5 million dollars.

The impressive scale-up of Silicom's business with this customer reflects the market's enthusiastic adoption of its recently-released new line of high-performance appliances, the components of which include new versions of Silicom's 1/10 Gbps copper and fiber network and bypass interface cards as their standard network connectivity solutions. The performance advantage of these appliances, which is supported by Silicom's cards, makes them particularly attractive to IT managers of complex infrastructures faced with extraordinary traffic levels in demanding optimization and virtualization environments.

"We are proud that our solutions have contributed to the impressive growth of this rising company, and excited that their expansion has become a driver for our own success," commented Shaikha Orbach, Silicom's President and CEO. "This company has been using our products at a relatively low volume for several years. Their ongoing satisfaction with our service and technology led them recently to select more of our products for use in an expanded new line of next-generation systems, standardizing on a much broader range of our products. This has resulted in a significant ramp-up of our business with them.

"Our achievement with this company confirms our strategy of supporting young, growing companies with the same level of care and attention that we do large, mature companies, offering them the top-performance connectivity solutions they need in a challenging marketplace, and therefore to continually grow and expand, becoming increasingly more significant customers for our products. As such, this customer is a concrete demonstration of the significant growth potential inherent in our base of 70+ existing customers."

"From a strategic point of view, the fact that this technology leader has standardized on Silicom demonstrates the fit of our products to the needs of an industry coping with a wave of consolidation and virtualization. As such, we are positioned to benefit from one of the IT world's strongest trends, and continue with aggressive sales and marketing efforts to take full advantage."
