BANCFIRST CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(1) GENERAL

The accompanying consolidated financial statements include the accounts of BancFirst Corporation, Council Oak Partners, LLC, Wilcox, Jones & McGrath, Inc., and BancFirst and its subsidiaries (the Company). The operating subsidiaries of BancFirst are Council Oak Investment Corporation, BancFirst Agency, Inc., Lenders Collection Corporation, BancFirst Community Development Corporation and Council Oak Real Estate, Inc. All significant intercompany accounts and transactions have been eliminated. Assets held in a fiduciary or agency capacity are not assets of the Company and, accordingly, are not included in the consolidated financial statements.

The unaudited interim financial statements contained herein reflect all adjustments which are, in the opinion of management, necessary to provide a fair statement of the financial position and results of operations of the Company for the interim periods presented. All such adjustments are of a normal and recurring nature. There have been no significant changes in the accounting policies of the Company since December 31, 2008, the date of the most recent annual report.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States inherently involves the use of estimates and assumptions that affect the amounts reported in the financial statements and the related disclosures. These estimates relate principally to the determination of the allowance for loan losses, income taxes and the fair values of financial instruments. Such estimates and assumptions may change over time and actual amounts realized may differ from those reported.

(2) RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued FAS No. 168 (FAS 168), The FASB Accounting Standards Codification (ASC) and the Hierarchy of Generally Accepted Accounting Principles, a Replacement of FASB Statement No. 162 which replaces FAS No. 162 (FAS 162) The Hierarchy of Generally Accepted Accounting Principles . FAS 168 establishes the FASB Accounting Standards Codification (the Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by non-governmental entities in the preparation of financial statements in conformity with generally accepted accounting principles. Rules and interpretive releases of the SEC under authority of federal securities laws are also sources of authoritative guidance for SEC registrants. All guidance contained in the Codification carries an equal level of authority. All non-grandfathered, non-SEC accounting literature not included in the Codification is superseded and deemed non-authoritative. FAS 168 was effective for the Company's financial statements for periods ending after September 15, 2009. FAS 168 was subsequently incorporated into FASB ASC Topic 105, reported as FASB Accounting Standards Update 2009-01, and did not have a significant impact on the Company's financial statements.

In May 2009, the FASB issued FAS No. 165 (FAS 165), Subsequent Events to provide authoritative accounting guidance on management's assessment of subsequent events. FAS 165 incorporates existing U.S. auditing literature and clarifies that management is responsible for evaluating, as of each reporting period, events or transactions that occur after the balance sheet date through the date that the financial statements are issued or are available to be issued. FAS 165 is effective for the Company as of June 30, 2009. The adoption of FAS 165 did not have a significant impact on the Company's financial statements. The Company evaluated its September 30, 2009 financial statements for subsequent events through November 9, 2009, the filing date of this report. The Company is not aware of any subsequent events which would require recognition or disclosure in the financial statements. FAS 165 was subsequently incorporated into FASB ASC Topic 855.

In April 2009, the FASB issued three FASB Staff Positions (FSP):

FAS No. 115-2 and FAS No. 124-2, Recognition and Presentation of Other-Than-Temporary Impairments amends the other-than-temporary impairment guidance under U.S. GAAP for debt securities to make the guidance more operational and improve the presentation and disclosure in the financial statements. The FSP specifies that if a company does not have the intent to sell a debt security prior to recovery and it is more likely than not that it will not have to sell the debt security prior to recovery, the security

would not be considered other-than-temporarily impaired unless there is a credit loss. The credit loss component of an other-than-temporarily impaired debt security must be determined based on the company's best estimate of cash flows expected to be collected. FAS No. 115-2 and FAS No. 124-2 were subsequently incorporated into FASB ASC Topic 320.

FAS No. 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That are Not Orderly* provides additional guidance for estimating fair value in accordance with FAS No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset and liability have significantly decreased and for identifying circumstances that indicate a transaction is not orderly. FAS 157 does not prescribe a methodology for making significant adjustments to transactions or quoted prices when estimating fair value in these situations but this FSP states that a change in valuation technique or the use of multiple valuation techniques may be appropriate. FAS No. 157-4 was subsequently incorporated into FASB ASC Topic 820.

FAS No. 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments* requires companies to provide the same fair value of financial instruments disclosures presently required on an annual basis on a quarterly interim basis. FAS No. 107-1 and APB 28-1 were subsequently incorporated into FASB ASC Topic 820.

These three FSPs were effective for the interim and annual periods ending after June 15, 2009 and subsequent incorporation in FASB ASC topics did not have a significant impact on the Company's financial statements.

In March 2008, the FASB issued FAS No. 161 (*FAS 161*), *Disclosures About Derivative Instruments and Hedging Activities, an Amendment of FASB Statement No. 133* which amends FAS 133, *Accounting for Derivative Instruments and Hedging Activities*. FAS 161 amended and expanded the disclosure requirements of FAS 133 to provide greater transparency about (i) how and why an entity uses derivative instruments, (ii) how derivative instruments and related hedge items are accounted for under FAS 133 and its related interpretations, and (iii) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. To meet those objectives, FAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments and disclosures about credit-risk-related contingent features in derivative agreements. FAS 161 was effective for the Company on January 1, 2009, subsequently incorporated into FASB ASC Topic 815, and did not have a significant impact on the Company's financial statements.

In December 2007, the FASB issued FAS No. 141R, *Business Combinations* (*FAS 141R*), which establishes principles and requirements for the reporting entity in a business combination, including recognition and measurement in the financial statements of the identifiable assets acquired, the liabilities assumed (including contingent liabilities), and any noncontrolling interest in the acquiree. This statement also establishes disclosure requirements to enable financial statement users to evaluate the nature and financial effects of the business combination. FAS 141R applies prospectively to business combinations for which the acquisition date is on or after fiscal years beginning after December 15, 2008. FAS 141R was effective for our fiscal year beginning January 1, 2009, subsequently incorporated into FASB ASC Topic 805, and is not expected to have a material effect on the recently announced acquisition.

In September 2006, the FASB issued FAS No. 157, *Fair Value Measurements* (*FAS 157*), which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements (see Note 15 *Fair Value Measurements*). The Company adopted the provisions of FAS 157 on January 1, 2008 for financial assets and financial liabilities. In accordance with Financial Accounting Standards Board Staff Position (FSP) No. SFAS 157-2, *Effective Date of FASB Statement No. 157*, the Company delayed the application of FAS 157 for non-financial assets and non-financial liabilities to January 1, 2009. The provisions of SFAS 157-2 which was subsequently incorporated into FASB ASC Topic 820 and did not have a significant impact on the Company's financial statements.

(3) RECENT DEVELOPMENTS: MERGERS, ACQUISITIONS AND DISPOSALS

On October 2, 2009 the Company announced it entered into an agreement to purchase First Jones Bancorporation and its subsidiary bank, First State Bank, Jones, Oklahoma. First State Bank had \$40 million in total assets and equity capital of \$4.6 million. The transaction is subject to regulatory approval and is expected to be completed before year end 2009.

On May 22, 2009 the FDIC imposed a Special Assessment on member financial institutions that was based on June 30, 2009 assets less tier one capital. The amount of \$1.9 million was accrued in the second quarter and paid on September 30, 2009.

In November 2008, the Company announced it would not accept funds from the U.S. Treasury's Capital Purchase Program due to current capital levels that exceeded well-capitalized guidelines and the potential for additional governmental regulation related to the program. Also, the Company did not elect to participate in the Debt Guarantee Program for newly issued senior unsecured debt. The Company did elect to participate in the Transaction Account Guarantee Program for extended coverage on non-interest bearing transaction deposit accounts.

The Company's loans are mostly to customers within Oklahoma and over half of the loans are secured by real estate. Credit risk on loans is managed through limits on amounts loaned to individual borrowers, underwriting standards and loan monitoring procedures. The amounts and types of collateral obtained, if any, to secure loans are based upon the Company's underwriting standards and management's credit evaluation. Collateral varies, but may include real estate, vehicles, equipment, accounts receivable, inventory and securities. The Company's interest in collateral is secured through filing mortgages and liens, and in some cases, by possession of the collateral.

Loans held for sale as of September 30, 2009 include \$77.6 million of guaranteed student loans due to a change in the intention of management based on structural changes in the Student Loan Program. Student loans are classified as consumer loans in the preceding table and valued at the lower of cost or market.

The amount of estimated loss due to credit risk in the Company's loan portfolio is provided for in the allowance for loan losses. The amount of the allowance required to provide for all existing losses in the loan portfolio is an estimate based upon evaluations of loans, appraisals of collateral and other estimates which are subject to rapid change due to changing economic conditions and the economic prospects of borrowers. Given the current environment of instability in the economy at large, it is reasonably possible that a material change could occur in the estimated allowance for loan losses in the near term.

Changes in the allowance for loan losses are summarized as follows (**dollars in thousands**):

(8) COMMITMENTS AND CONTINGENT LIABILITIES

During the third quarter of 2009, the Company was advised by the State of Oklahoma of a demand for payment of \$2.3 million related to an embezzlement conducted by an employee of the state who deposited stolen checks into an account at BancFirst that was opened under false pretenses. Counsel for the Company believes it has several meritorious defenses to the claims asserted although resolution of the matter may not occur for several years. Management does not anticipate any material loss from the demand.

(9) CAPITAL

The Company is subject to risk-based capital guidelines issued by the Board of Governors of the Federal Reserve System. These guidelines are used to evaluate capital adequacy and involve both quantitative and qualitative evaluations of the Company's assets, liabilities, and certain off-balance-sheet items calculated under regulatory practices. Failure to meet the minimum capital requirements can initiate certain mandatory or discretionary actions by the regulatory agencies that could have a direct material effect on the Company's financial statements. The required minimums and the Company's respective ratios are shown in the following table (**dollars in thousands**):

	Minimum Required	September 30,		December 31,
		2009	2008	2008

Edgar Filing: BANCFIRST CORP /OK/ - Form 10-Q

As of September 30, 2009 and 2008, and December 31, 2008, BancFirst was considered to be well capitalized . There are no conditions or events since the most recent notification of BancFirst s capital category that management believes would change its category.

(10) STOCK REPURCHASE PLAN

In November 1999, the Company adopted a new Stock Repurchase Program (the SRP) authorizing management to repurchase up to 600,000 shares of the Company's common stock. The SRP was amended in May 2001, August 2002, and September 2007 to increase the shares authorized to be purchased by 555,832 shares, 364,530 shares and 366,948 shares, respectively. The SRP may be used as a means to increase earnings per share and return on equity, to purchase treasury stock for the exercise of stock options or for distributions under the Deferred Stock Compensation Plan, to provide liquidity for optionees to dispose of stock from exercises of their stock options, and to provide liquidity for shareholders wishing to sell their stock. The timing, price and amount of stock repurchases under the SRP may be determined by management and approved by the Company's Executive Committee. At September 30, 2009 there were 560,000 shares remaining that could be repurchased under the SRP. The following table is a summary of the shares repurchased under the program.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Number of shares repurchased				40,000
Average price of shares repurchased				\$ 40.70

(11) SHARE-BASED COMPENSATION

BancFirst Corporation adopted a nonqualified incentive stock option plan (the BancFirst ISOP) in May 1986. The Company amended the BancFirst ISOP to increase the number of shares to be issued under the plan to 2,500,000 shares in May 2006 and to 2,650,000 shares in May 2009. At September 30, 2009, 157,460 shares are available for future grants. The BancFirst ISOP will terminate December 31, 2011. The options are exercisable beginning four years from the date of grant at the rate of 25% per year for four years. Options granted expire at the end of fifteen years from the date of grant. Options outstanding as of September 30, 2009 will become exercisable through the year 2015. The option price must be no less than 100% of the fair market value of the stock relating to such option at the date of grant.

In June 1999, the Company adopted the BancFirst Corporation Non-Employee Directors' Stock Option Plan (the BancFirst Directors' Stock Option Plan). Each non-employee director is granted an option for 10,000 shares. The Company amended the BancFirst Directors' Stock Option Plan to increase the number of shares to be issued under the plan to 180,000 shares in May 2006 and to 205,000 shares in May 2009. At September 30, 2009, 50,000 shares are available for future grants. The options are exercisable beginning one year from the date of grant at the rate of 25% per year for four years, and expire at the end of fifteen years from the date of grant. Options outstanding as of September 30, 2009 will become exercisable through the year 2012. The option price must be no less than 100% of the fair value of the stock relating to such option at the date of grant.

The following table is a summary of the activity under both the BancFirst ISOP and the BancFirst Directors' Stock Option Plan (**dollars in thousands, except per share data**):

	Nine Months Ended September 30, 2009			Aggregate Intrinsic Value
	Options	Wgt'd. Avg. Exercise Price	Wgt'd. Avg. Remaining Contractual Term	
Outstanding at January 1, 2009	1,092,453	\$ 27.80		
Options granted	92,200	35.58		
Options exercised	(11,750)	22.26		
Options cancelled	(7,500)	43.37

Exercisable at September 30, 2009	683,639	20.35	7.06	\$ 11,334

The following table is additional information regarding options granted and options exercised under both the BancFirst ISOP and the BancFirst Directors Stock Option Plan (**dollars in thousands, except per share data**):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Weighted average grant-date fair value per share of options granted	\$ 21.93	N/A	\$ 21.93	\$ 20.24
Total intrinsic value of options exercised	20	1,589	218	1,828
Cash received from options exercised	25	1,035	262	1,196
Tax benefit realized from options exercised	8	615	85	707

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model and is based on certain assumptions including risk-free rate of return, dividend yield, stock price volatility, and the expected term. The fair value of each option is expensed over its vesting period.

For the three months ended September 30, 2009 and 2008, the Company recorded share-based employee compensation expense of approximately \$149,000 and \$184,000, respectively, net of tax and approximately \$475,000 and \$550,000 for the nine months ended September 30, 2009 and 2008, respectively.

The Company will continue to amortize the remaining fair value of these stock options of approximately \$3.2 million, net of tax, over the remaining vesting period of approximately seven years. Share-based employee compensation expense under the fair value method was measured using the following assumptions for the options granted:

	2009	2008
Risk-free interest rate	3.64%	3.85%
Dividend yield	1.50%	1.50%
Stock price volatility	63.28%	38.37%
Expected term	10 Yrs	10 Yrs

The risk-free interest rate is determined by reference to the spot zero-coupon rate for the U.S. Treasury security with a maturity similar to the expected term of the options. The dividend yield is the expected yield for the expected term. The stock price volatility is estimated from the recent historical volatility of the Company's stock. The expected term is estimated from the historical option exercise experience.

(12) COMPREHENSIVE INCOME

The only component of comprehensive income reported by the Company is the unrealized gain or loss on securities available for sale. The amount of this unrealized gain or loss, net of tax, has been presented in the statement of income for each period as a component of other comprehensive income. The following table is a summary of the tax effects of this unrealized gain or loss (**dollars in thousands**):

	Three Months Ended September 30,		Nine Months Ended September 30,

(14) SEGMENT INFORMATION

The Company evaluates its performance with an internal profitability measurement system that measures the profitability of its business units on a pre-tax basis. The four principal business units are metropolitan banks, community banks, other financial services, and executive, operations and support. Metropolitan and community banks offer traditional banking products such as commercial and retail lending, and a full line of deposit accounts. Metropolitan banks consist of banking locations in the metropolitan Oklahoma City and Tulsa areas. Community banks consist of banking locations in communities throughout Oklahoma. Other financial services are specialty product business units including guaranteed small business lending, guaranteed student lending, residential mortgage lending, trust services, securities brokerage, electronic banking and insurance. The executive, operations and support groups represent executive management, operational support and corporate functions that are not allocated to the other business units.

The results of operations and selected financial information for the four business units are as follows (**dollars in thousands**):

	Metropolitan Banks	Community Banks	Other Financial Services	Executive, Operations & Support	Eliminations	Consolidated

The financial information for each business unit is presented on the basis used internally by management to evaluate performance and allocate resources. The Company utilizes a transfer pricing system to allocate the benefit or cost of funds provided or used by the various business units. Certain revenues related to other financial services are allocated to the banks whose customers receive the services and, therefore, are not reflected in the income for other financial services. Certain services provided by the support group to other business units, such as item processing, are allocated at rates approximating the cost of providing the services. Eliminations are adjustments to consolidate the business units and companies.

(15) FAIR VALUE MEASUREMENTS

ASC Topic 820 (formerly FAS 157) establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 Inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset and liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to all of the Company's financial assets and financial liabilities carried at fair value effective January 1, 2008.

Securities Available for Sale

Securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value information from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things. The Company also invests in equity securities classified as available for sale for which observable information is not readily available. These securities are reported at fair value utilizing Level 3 inputs. For these securities, management determines the fair value based on replacement cost, the income approach or information provided by outside consultants or lead investors.

Derivatives

Derivatives are reported at fair value utilizing Level 2 inputs. The Company obtains dealer and market quotations to value its oil and gas swaps/options. The Company utilizes dealer quotes and observable market data inputs to substantiate internal valuation models.

Loans Held For Sale

The Company originates mortgage and student loans to be sold. At the time of origination, the acquiring bank or governmental agency has already been determined and the terms of the loan, including interest rate, have already been set by the acquiring bank, allowing the Company to originate the loan at fair value. Mortgage loans are generally sold within 30 days of origination and student loans are generally sold within one year. Loans held for sale are carried at lower of cost or market. Gains or losses recognized upon the sale of the loans are determined on a specific identification basis.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of September 30, 2009, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (**dollars in thousands**):

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
Securities Available for Sale	\$	\$ 351,610	\$ 11,300	\$ 362,910
Derivative Assets		9,898		9,898
Derivative Liabilities		7,848		7,848
Loans Held For Sale		86,450		86,450

The changes in Level 3 assets measured at estimated fair value on a recurring basis during the nine months ended September 30, 2009 were as follows:

	Securities Available for Sale
Balance January 1, 2009	\$ 16,345
Purchases and sales, net	(4,426)
Total unrealized losses	(619)
 Balance September 30, 2009	 \$ 11,300

(16) DERIVATIVE FINANCIAL INSTRUMENTS

The Company enters into oil and gas swaps and options contracts to accommodate the business needs of its customers. Upon the origination of an oil or gas swap or option contract with a customer, the Company simultaneously enters into an offsetting contract with a counterparty to mitigate the exposure to fluctuations in oil and gas prices. These derivatives are not designated as hedged instruments and are recorded on the Company's consolidated balance sheet at fair value.

The Company utilizes dealer quotations and observable market data inputs to substantiate internal valuation models. The notional amounts and estimated fair values of oil and gas derivative positions outstanding are presented in the following table (**notional amounts and dollars in thousands**):

	Notional Units	September 30, 2009		September 30, 2008		December 31, 2008

The Company recognized income related to the activity, which was included in Other Income and summarized in the following table (**dollars in thousands**):

	Three Months Ended September 30, 2009		Nine Months Ended September 30, 2008	
Derivative Income	\$ 121	\$ 62	\$ 572	\$ 456

The Company's credit exposure on oil and gas swaps and options varies based on the current market prices of oil and natural gas. Other than credit risk, changes in the fair value of customer positions will be offset by equal and opposite changes in the counterparty positions. The net positive fair value of the contracts is the profit derived from the activity and is unaffected by market price movements.

Customer credit exposure is managed by strict position limits and is primarily offset by first liens on production while the remainder is offset by cash. Counterparty credit exposure is managed by selecting highly rated counterparties (rated A- or better by Standard and Poor's) and monitoring market information.

The Company had credit exposure relating to oil and gas swaps and options with bank counterparties of approximately \$7.9 million at September 30, 2009 and \$15.4 million at December 31, 2008. Conversely, the Company had exposure to bank customers of approximately \$1.6 million at September 30, 2008.

The Company entered into a \$30 million five year guaranty with a counterparty on June 4, 2008 for the timely payment of the obligations of its subsidiary Bank related to the settlement of oil and gas positions.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

SUMMARY

Net income for the third quarter of 2009 was \$9.4 million compared to \$11.0 million for the third quarter of 2008. Diluted net income per share was \$0.60 and \$0.70 for the third quarter of 2009 and 2008, respectively. For the first nine months of 2009, net income was \$22.8 million, compared to \$36.3 million for the first nine months of 2008. Diluted net income per share for the first nine months of 2009 was \$1.46 compared to \$2.33 for the first nine months of 2008. The results for 2009 and 2008 include several one-time items that are more fully described below.

Total assets at September 30, 2009 were \$4.3 billion, up \$455 million from December 31, 2008 and up \$497 million from a year ago. Total loans were \$2.71 billion, virtually unchanged from December 31, 2008 and September 30, 2008. Total deposits were \$3.8 billion, up \$454 million from December 31, 2008 and up \$471 million from September 30, 2008. Stockholders' equity was \$426 million, or 9.9% of total assets, at September 30, 2009, up \$12 million from December 31, 2008 and \$28 million from September 30, 2008. The Company's liquidity remains strong as its average loan to deposit ratio was 76.3% at quarter end and core deposits represented 93.0% of total deposits. The Company had no brokered deposits and no Federal Home Loan Bank borrowings.

On October 2, 2009 the Company announced it entered into an agreement to purchase First Jones Bancorporation and its subsidiary bank, First State Bank, Jones, Oklahoma. First State Bank had \$40 million in total assets and equity capital of \$4.6 million. The transaction is subject to regulatory approval and is expected to be completed before year end 2009.

On May 22, 2009 the FDIC imposed a Special Assessment on member financial institutions that was based on June 30, 2009 assets less tier one capital. The amount of \$1.9 million was accrued in the second quarter and paid on September 30, 2009.

In November 2008, the Company announced it would not accept funds from the U.S. Treasury's Capital Purchase Program due to current capital levels that exceeded well-capitalized guidelines and the potential for additional governmental regulation related to the program. Also, the Company did not elect to participate in the Debt Guarantee Program for newly issued senior unsecured debt. The Company did elect to participate in the Transaction Account Guarantee Program for extended coverage on non-interest bearing transaction deposit accounts.

In June 2008, the Company recorded a \$1.2 million pre-tax gain from the sale of an asset. The gain was included in gain on sale of other assets.

In April 2008, the Company completed an \$80 million sale of securities resulting in a securities pre-tax gain of \$6.1 million. The transactions resulted in the sale of \$80 million of US Treasury securities and the purchase of Government Sponsored Enterprises (GSE) senior debt securities of similar amounts and maturities. The after-tax gain related to these transactions, net of the interest income differential, was approximately \$3.3 million for the year.

In March 2008, the Company, as a member bank of Visa, recorded a \$1.8 million pre-tax gain from the mandatory partial redemption of the Company's Visa shares received in the first quarter initial public offering. The gain was included in gain on sale of other assets.

Beginning in 2008 and into 2009, the national economy has seen declining home sales and values, a generally declining dollar, volatile commodity prices, increasing unemployment and unstable financial markets. These events have caused credit and liquidity issues throughout the country and has resulted in an increase in credit losses at many U.S. banks. While the Oklahoma economy initially performed better than the national average, the state has felt the impact of the national recession primarily from lower commodity prices and lower tax revenues. Consequently, it is reasonable to expect nonperforming loans and loan losses of the Company to increase. Also, in light of the low interest rate environment and competitive pressures for deposits, the Company's

interest rate margin will likely stay compressed until interest rates rise, and it is likely to experience slower loan growth.

The FDIC increased deposit insurance premiums in 2009 and made a Special Assessment in the second quarter of 2009. These increases caused the Company's noninterest expense to increase in 2009. The Company opted to participate in the deposit insurance guarantee for noninterest bearing deposits in excess of \$250,000. This program is at a cost of 10 basis points on those account balances in excess of \$250,000 and is in effect until June 30, 2010. If the FDIC imposes the mandatory three-year prepayment of insurance premiums, the payment is expected to be between \$20 and \$21 million. Although the prepayment does not change the amount of FDIC insurance expense over the prepayment period, the early payment may cause a marginal decline in net interest income.

It appears likely that current proposed legislation may centralize student lending in a governmental agency which would result in an end to the student loan programs provided by the Company.

RESULTS OF OPERATIONS

Third Quarter

Net interest income totaled \$33.0 million, a decrease of \$2.3 million, or 6.5%, compared to the third quarter of 2008. The Company's net interest margin (on a taxable equivalent basis) was 3.27% compared to 4.03% for the same period a year ago. The lower interest rate environment combined with an increase in earning assets with a higher concentration in overnight funds has caused the Company's net interest margin to decline.

The Company's provision for loan losses was \$998,000 compared to \$2.3 million during the same period a year ago. Net loan charge-offs were \$4.3 million for the third quarter of 2009, compared to \$1.9 million for the third quarter of 2008. One charge-off of a commercial loan which had been fully provided for accounted for \$3.5 million of the total for the quarter. The net charge-offs represent a rate of 0.63% of average total loans for the third quarter of 2009 compared to 0.32% for the same period in 2008.

Noninterest income was \$17.0 million for the quarter compared to \$17.8 million for the same quarter a year ago. The decrease was due primarily to lower cash management revenues resulting from lower investment sweep balances. Noninterest expense of \$35.5 million was up 3.4% from the operating expenses a year ago driven primarily by higher FDIC insurance premiums. The Company's effective tax rate was 30.5% for the quarter compared to 33.4% a year ago. The decrease is a result of additional tax credits realized in 2009.

Year-To-Date

Net interest income for the nine months ended September 30, 2009 was \$97.3 million, a decrease of \$8.2 million from the same period in 2008. The net interest margin in 2009 decreased to 3.45% from 4.11% for the first nine months of 2008. The lower interest rate environment combined with an increase in earning assets with a higher concentration in overnight funds has caused the Company's net interest margin to decline.

The Company provided a \$9.2 million provision for loan losses in the first nine months of 2009, compared to \$7.6 million for the same period of 2008. The loan provision was driven primarily by the identification of certain commercial credits that were internally downgraded by management. Net loan charge-offs were \$7.5 million for the first nine months of 2009, compared to \$2.9 million for the first nine months of 2008. The net charge-offs represent an annualized rate of 0.36% of average total loans for the first nine months of 2009 compared to 0.15% for the first nine months of 2008.

Noninterest income for the nine months of 2009 decreased \$7.7 million compared to the same period for 2008. Noninterest income during the first nine months of 2008 included nonrecurring items totaling \$9.1 million before taxes including pretax gains of approximately \$1.8 million from the Company's interest in the Visa initial public offering, \$6.1 million on the sale of securities, and \$1.2 million on the sale of an asset. Core noninterest income was up in 2009 due to increases in commercial deposit fees and sales of mortgage loans and student loans offset by lower cash management fees. Noninterest expense increased \$4.4 million compared to the first nine months of 2008 due primarily to higher FDIC insurance premiums. Income tax expense decreased \$8.3 million compared to the first nine months of 2008 due to lower profitability and a lower effective tax rate. The effective tax rate on income before taxes was 32.0%, compared to 34.4% for the first nine months of 2008. The decrease is a result of additional tax credits realized in 2009.

FINANCIAL POSITION

The aggregate of cash and due from banks, interest-bearing deposits with banks, and federal funds sold as of September 30, 2009 increased \$561 million from December 31, 2008 and increased \$569 million from September 30, 2008. The increase was due primarily to sweep account customers moving from outside money market funds to bank deposits and to a lesser extent from growth in deposits.

Total securities decreased \$64 million compared to December 31, 2008 and \$71 million compared to September 30, 2008. The size of the Company's securities portfolio is a function of liquidity management and excess funds available for investment. The Company has maintained a very liquid securities portfolio to provide funds for loan growth and to meet possible liquidity needs. The net unrealized gain on securities available for sale, before taxes, was \$19.6 million at the end of the third quarter of 2009, compared to an unrealized gain of \$22.6 million at December 31, 2008, and an unrealized gain of \$7.4 million at September 30, 2008. The average taxable equivalent yield on the securities portfolio was 3.76%, 3.94% and 4.18% at September 30, 2009, December 31, 2008 and September 30, 2008, respectively.

Total loans decreased \$45 million from December 31, 2008 and decreased \$17 million from September 30, 2008. The decrease from year end and quarter end 2008 was due to student loan sales. Due to changes in the Student Loan Program, the Company will generally sell student loans originated within one year. The allowance for loan losses increased \$1.7 million from year-end 2008 and \$2.1 million from the third quarter of 2008. The allowance as a percentage of total loans was 1.33%, 1.24% and 1.24% at September 30, 2009, December 31, 2008 and September 30, 2008, respectively. The allowance to nonperforming and restructured loans at the same dates was 75.3%, 144.5% and 153.5%, respectively. The allowance to nonperforming and restructured loans was largely impacted by the relatively high percentage of highly collateralized loans.

Nonperforming and restructured loans totaled \$47.8 million at September 30, 2009, compared to \$23.7 million at December 31, 2008 and \$22.1 million at September 30, 2008. The ratio of nonperforming and restructured loans to total loans for the same periods was 1.76%, 0.86% and 0.81%, respectively. The level of nonperforming loans and loan losses may rise over time as a result of economic and credit cycles.

Potential problem loans are performing loans to borrowers with a weakened financial condition, or which are experiencing unfavorable trends in their financial condition, which causes management to have concerns as to the ability of such borrowers to comply with the existing repayment terms. The Company had approximately \$72.3 million of these loans at September 30, 2009 compared to \$66.8 million at December 31, 2008 and \$70.6 million at September 30, 2008. These loans are not included in nonperforming and restructured assets. In general, these loans are adequately collateralized and have no identifiable loss potential. Loans which are considered to have identifiable loss potential are placed on nonaccrual status, are allocated a specific allowance for loss or are directly charged-down, and are reported as nonperforming. The Company's nonaccrual loans are primarily commercial and real estate loans.

Total deposits increased \$454 million compared to December 31, 2008, and \$471 million compared to September 30, 2008 due primarily to customers moving funds out of money market investments and into interest bearing deposits at the bank. The Company's deposit base continues to be comprised substantially of core deposits, with large denomination certificates of deposit being only 10.7% of total deposits at September 30, 2009, up slightly compared to 10.1% at December 31, 2008 and September 30, 2008. The Company does not utilize brokered deposits.

Short-term borrowings decreased \$11.8 million from December 31, 2008, and \$14.3 million from September 30, 2008. Fluctuations in short-term borrowings are a function of federal funds purchased from correspondent banks, customer demand for repurchase agreements and liquidity needs of the bank.

The Company does not have any borrowings from the Federal Home Loan Bank or other sources at September 30, 2009.

Stockholders' equity was \$425.6 million at September 30, 2009 which was an increase of \$11.8 million from year-end 2008 and an increase of \$28.0 million from the third quarter of 2008 due to accumulated earnings. Average stockholders' equity to average assets for the third quarter of 2009 was 10.26%, compared to 10.28% for the third quarter of 2008. The Company's leverage ratio and total risk-based capital ratio were 9.29% and 14.87%, respectively, at September 30, 2009, well in excess of the regulatory minimums.
