ARTHUR J. GALLAGHER & CO.

(Exact name of registrant as specified in its charter)

Edgar Filing: GALLAGHER ARTHUR J & CO - Form 10-Q

DELAWARE
(State or other jurisdiction of
incorporation or organization)

36-2151613
(I.R.S. Employer
Identification No.)

Two Pierce Place, Itasca, Illinois 60143-3141

(Address of principal executive offices) (Zip code)

(630) 773-3800

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Non-accelerated filer

(Do not check if a smaller reporting company)

Accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

The number of outstanding shares of the registrant's Common Stock, \$1.00 par value, as of June 30, 2010 was 105,203,000.

Notes to June 30, 2010 Consolidated Financial Statements (Unaudited)

1. Nature of Operations and Basis of Presentation

Arthur J. Gallagher & Co. (Gallagher) provides insurance brokerage and risk management services to a wide variety of commercial, industrial, institutional and governmental organizations through two operating segments. Commission and fee revenue generated by the Brokerage Segment is primarily related to the negotiation and placement of insurance for Gallagher's clients. Fee revenue generated by the Risk Management Segment is primarily related to claims management, information management, risk control services and appraisals in the property/casualty (P/C) market. Investment income and other revenue is generated from Gallagher's investment portfolio, which includes invested cash and fiduciary funds, as well as tax-advantaged, clean-energy and other investments. Gallagher is headquartered in Itasca, Illinois, has operations in fifteen countries and does business in more than 100 countries globally through a network of correspondent brokers and consultants.

The accompanying unaudited consolidated financial statements have been prepared by Gallagher pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in annual financial statements have been omitted pursuant to such rules and regulations. Gallagher believes the disclosures are adequate to make the information presented not misleading. The unaudited consolidated financial statements included herein are, in the opinion of management, prepared on a basis consistent with the audited consolidated financial statements for the year ended December 31, 2009 and include all adjustments (consisting only of normal recurring adjustments) necessary for a fair presentation of the information set forth. The quarterly results of operations are not necessarily indicative of results of operations for subsequent quarters or the full year. These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the notes thereto included in Gallagher's Annual Report on Form 10-K for the year ended December 31, 2009. Certain reclassifications have been made to the amounts reported herein related to prior year amounts in order to conform them to the current year presentation.

In the preparation of Gallagher's consolidated financial statements as of June 30, 2010, management evaluated all material subsequent events or transactions that occurred after the balance sheet date, through the date on which the financial statements were issued, for potential recognition in its consolidated financial statements and/or disclosure in the notes thereto.

2. Effect of New Accounting Pronouncements

Revenue Arrangements with Multiple Deliverables

In October 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2009-13, Multiple Deliverable Revenue Arrangements (ASU 2009-13). ASU 2009-13 updates the existing multiple-element revenue arrangements guidance currently included in Accounting Standards Codification (ASC) 605-25.

The revised guidance provides for two significant changes to the existing multiple element revenue arrangements guidance. The first relates to the determination of when the individual deliverables included in a multiple-element arrangement may be treated as separate units of accounting. This change is significant as it will likely result in the requirement to separate more deliverables within an arrangement, ultimately leading to changes in revenue deferral.

The second change modifies the manner in which the transaction consideration is allocated across the separately identified deliverables. Together, these items may cause a change in the recognition of revenue for multiple-element arrangements from previous guidance. ASU 2009-13 also significantly expands the disclosures required for multiple-element revenue arrangements.

The revised multiple-element revenue arrangements guidance will be effective for the first annual reporting period beginning on or after June 15, 2010, and may be applied retrospectively for all periods presented or prospectively to arrangements entered into or materially modified after the adoption date. Early adoption is permitted provided that the revised guidance is retroactively applied to the beginning of the year of adoption. If the guidance is adopted prospectively, certain transitional disclosures are required for each reporting period in the initial year of adoption. Gallagher is currently evaluating the impact that the adoption of ASU 2009-13 could have, if any, on its consolidated financial statements and notes thereto. Gallagher has not yet determined whether it will elect to early adopt ASU 2009-13.

Table of Contents**Consolidation of Variable Interest Entities**

In June 2009, the FASB issued an amendment to the consolidation rules for variable interest entities (VIEs), which (i) addresses the effects of eliminating the qualifying special-purpose entity concept from existing guidance and (ii) responds to concerns about the application of certain key provisions in existing guidance, including concerns over the transparency of disclosures related to an enterprise's involvement with VIEs.

These amendments are applicable to all enterprises and to all entities with which those enterprises are involved, regardless of when that involvement arose. Therefore, upon adoption of these amendments, all enterprises must reconsider the conclusions previously reached for the consolidation of a VIE. These amendments, among other things:

Amended certain guidance for determining whether an entity is a VIE, which may change an enterprise's assessment of which entities with which it is involved are VIEs.

Require a qualitative rather than a quantitative analysis to determine the primary beneficiary of a VIE.

Amended existing considerations of related party relationships in the determination of the primary beneficiary of a VIE by providing, among other things, an exception with respect to de facto agency relationships in certain circumstances.

Require continuous assessments of whether an enterprise is the primary beneficiary of a VIE.

Require enhanced disclosures about an enterprise's involvement with a VIE.

These amendments are effective as of the beginning of an enterprise's first annual reporting period that began after November 15, 2009 and for interim periods within that first annual reporting period. Thus, these amendments were effective for Gallagher beginning on January 1, 2010. The adoption of these amendments did not have any impact on Gallagher's consolidated financial statements or notes thereto.

3. Investments

The following is a summary of Gallagher's investments reported in other current and non-current assets in the accompanying consolidated balance sheet and the related funding commitments (in millions):

	June 30, 2010		December 31, 2009
	Assets	Funding Commitments	Assets
Clean-coal related ventures	\$ 21.6	\$	\$ 29.8
Biomass energy ventures	8.5		8.5
Venture capital funds and other	7.2	1.3	7.4
Total investments	\$ 37.3	\$ 1.3	\$ 45.7

Clean-Coal Related Ventures

Gallagher owns portions of various clean-coal production facilities and two early-stage clean-coal ventures, all of which have been deemed to be VIEs.

Eight Clean-Coal Facilities - Gallagher incurred capital expenditures totaling \$31.4 million to build eight commercial clean-coal production facilities, and placed each into service in December 2009 at several coal-fired power plants. These facilities apply certain chemicals and

Edgar Filing: GALLAGHER ARTHUR J & CO - Form 10-Q

technologies (licensed from Chem-Mod, LLC (Chem-Mod) as discussed below) to coal feedstock which, when mixed, reduce harmful emissions. In first quarter 2010, Gallagher sold portions of its ownership in six facilities, which reduced its net investment in the facilities to \$22.3 million, and recognized a \$4.8 million net pretax gain on the sales. Gallagher is currently seeking other utilities to purchase the coal produced by the two remaining facilities and additional partners to invest in these facilities.

- 8 -

Table of Contents

For the first two months of 2010, Gallagher was required to consolidate the operating results of these facilities because of its majority ownership position. Effective March 1, 2010, Gallagher sold a portion of its ownership interests in six of these facilities. As part of the sales of the interests in the six facilities, all owners must now consent to actions that would denote control, which eliminated the requirement for Gallagher to consolidate these facilities. These facilities are now accounted for using equity method accounting.

Chem-Mod Clean-Coal Venture - At June 30, 2010, Gallagher held a 42% interest in Chem-Mod's U.S. and Canadian operations and 20% of its other international operations. At June 30, 2010, Gallagher's carrying value of its investment in these Chem-Mod operations was zero. Chem-Mod, a multi-pollutant reduction venture, possesses rights, information and technologies for the reduction of unwanted emissions created during the combustion of coal. Chem-Mod has developed and is the exclusive licensee of proprietary emissions technologies it refers to as The Chem-Mod Solution, which uses a dual injection sorbent system to reduce mercury, sulfur dioxide and other toxic emissions at coal-fired power plants. Gallagher also believes that the application of The Chem-Mod Solution will qualify for refined coal tax credits under Internal Revenue Code Section 45 (IRC Section 45).

Chem-Mod has been determined to be a VIE. Gallagher is deemed to be the primary beneficiary based on the level of control it exerts on the operations of Chem-Mod, and therefore was required to consolidate this investment into its consolidated financial statements beginning in third quarter 2008. At June 30, 2010, total assets and total liabilities of this investment that were included in Gallagher's consolidated balance sheet were each less than \$0.9 million. Gallagher is under no obligation to fund Chem-Mod's operations in the future and Chem-Mod has no debt that is recourse to Gallagher.

C-Quest Clean-Coal Venture - On April 15, 2010, Gallagher purchased an additional 3% interest in the global operations of C-Quest Technology LLC (C-Quest) for \$1.5 million, which was written-off under equity method accounting. At June 30, 2010, Gallagher held an 8% interest in C-Quest's global operations and its carrying value in C-Quest was zero. Gallagher also has options to acquire an additional 19% interest in C-Quest's global operations (total price \$9.5 million) at any time on or prior to August 1, 2013. C-Quest possesses rights, information and technology for the reduction of carbon dioxide emissions created by burning fossil fuels. C-Quest is deemed to be a VIE, but due to Gallagher's lack of control over the operation of C-Quest, Gallagher is not required to consolidate this investment.

Biomass Energy Ventures

Gallagher has made investments in various biomass energy ventures. At June 30, 2010, Gallagher's remaining investment of \$8.5 million consisted of a 13.4% equity interest in a biomass company and related partnerships which own the rights to biogas from landfills and the wells, infrastructure and a pipeline to capture, distribute and sell biogas.

Venture Capital Funds and Other

At June 30, 2010, Gallagher's remaining investment of \$7.2 million consisted of (i) four venture capital funds totaling \$6.2 million, (ii) a 20% interest in an investment management company totaling \$1.0 million, (iii) twelve certified low-income housing developments with zero carrying value, and (iv) two real estate entities with zero carrying value. Fourteen of the nineteen ventures have been determined to be VIEs, but are not required to be consolidated. At June 30, 2010, total assets and total debt of these fourteen ventures were approximately \$63.0 million and \$19.0 million, respectively. Gallagher's maximum exposure to a potential loss related to these investments was zero at June 30, 2010, which equaled the net aggregate carrying value of these ventures.

Table of Contents**4. Business Combinations**

During the six-month period ended June 30, 2010, Gallagher acquired policy renewal rights and substantially all of the net assets of the following brokerage firms in exchange for Gallagher common stock and/or cash (in millions except share data):

Name and Effective Date of Acquisition	Common Shares Issued (000s)	Common Share Value	Cash Paid	Accrued Liability	Escrow Deposited	Recorded Earnout Payable	Total Recorded Purchase Price	Maximum Potential Earnout Payable
Securitas Re (SRE) February 12, 2010		\$	\$ 1.0	\$ 0.3	\$	\$	\$ 1.3	\$
Winn & Company Insurance Brokers, Inc. (WIB) March 1, 2010	121	2.7	1.0		0.4	1.0	5.1	2.3
Policy renewal rights from FirstCity Partnership Ltd. (FCP) April 1, 2010	456	11.8	12.7			2.9	27.4	5.6
Risk & Reward Group (RRG) May 28, 2010			5.9			1.7	7.6	4.7
Bowen, Miclette, Britt & Merry of Arkansas, Inc. May 1, 2010	52	1.2			0.1	0.1	1.4	0.3
Joseph James & Associates (JJA) June 1, 2010	152	3.8	1.1		0.1	2.2	7.2	5.0
Two other acquisitions completed in first and second quarter	49	1.1	0.3		0.1	0.9	2.4	1.2
	830	\$ 20.6	\$ 22.0	\$ 0.3	\$ 0.7	\$ 8.8	\$ 52.4	\$ 19.1

Common shares issued in connection with acquisitions are valued at closing market prices as of the effective date of the applicable acquisition. Escrow deposits that are returned to Gallagher as a result of adjustments to net assets acquired are recorded as reductions of goodwill when the escrows are settled. The maximum potential earnout payables disclosed in the foregoing table represent the maximum amount of additional consideration that could be paid pursuant to the terms of the respective purchase agreement related to each applicable acquisition. The amounts recorded as earnout payables are primarily based upon the future operating results of the acquired entities over a two- to three-year period subsequent to the acquisition date, are measured at fair value as of the acquisition date and are included on that basis in the recorded purchase price consideration in the foregoing table. Subsequent changes in these estimated earnout obligations, including the accretion of discount, will be recorded in the consolidated statement of earnings when incurred.

The fair value of these earnout obligations is based on the present value of the expected future payments to be made to the sellers of the acquired entities in accordance with the provisions outlined in the respective purchase agreements. In determining fair value, the acquired entity's future performance was estimated using financial projections developed by management for the acquired entity and market participant assumptions that were derived for revenue growth and/or profitability. The future payments are estimated using the earnout formula and performance targets specified in each purchase agreement and these financial projections. These payments were then discounted to present value using a risk-adjusted rate that takes into consideration market based rates of return which reflect the ability of the acquired entity to achieve the forecast. During the three-month periods ended June 30, 2010 and 2009, Gallagher recognized \$1.5 million and \$1.4 million, respectively, of expense in its consolidated statement of earnings related to the accretion of the discount recorded for earnout obligations.

Table of Contents

related to its 2009 and 2010 acquisitions. During the six-month periods ended June 30, 2010 and 2009, Gallagher recognized \$2.9 million and \$1.4 million, respectively, of expense in its consolidated statement of earnings related to the accretion of the discount recorded for earnout obligations related to its 2009 and 2010 acquisitions. In addition, Gallagher recognized \$2.5 million and \$2.0 million of income during the three-month and six-month periods ended June 30, 2010, respectively, related to net adjustments in the estimated fair market values of earnout obligations related to four 2009 acquisitions. The aggregate amount of maximum earnout obligations related to the 2009 and 2010 acquisitions was \$160.4 million, of which \$70.5 million was recorded in the consolidated balance sheet as of June 30, 2010 based on the estimated fair value of the expected future payments to be made.

For all acquisitions made prior to 2009, potential earnout obligations were not included in the purchase price that was recorded for each applicable acquisition at its acquisition date because such obligations were not fixed and determinable. Future payments made under these arrangements, if any, will generally be recorded as additional goodwill when the earnouts are settled. The aggregate amount of maximum unrecorded earnout payables outstanding as of June 30, 2010 was \$207.6 million related to acquisitions made by Gallagher during the period from 2006 to 2008.

The following is a summary of the estimated fair values of the net assets acquired at the date of each acquisition based on preliminary purchase price allocations (in millions):

	SRE	WIB	FCP	RRG	JJA	Three Other Acquisitions	Total
Current assets	\$ 0.7	\$ 0.7	\$ 28.0	\$ 2.0	\$ 0.1	\$ 2.4	\$ 33.9
Fixed assets		0.4	0.5				0.9
Noncurrent assets			2.9				2.9
Goodwill	0.3	2.5	11.1	5.4	4.4	2.5	26.2
Expiration lists	1.0	2.2	10.0	2.9	2.8	1.5	20.4
Non-compete agreements		0.1				0.1	0.2
Total assets acquired	2.0	5.9	52.5	10.3	7.3	6.5	84.5
Current liabilities	0.4	0.8	24.3	1.9	0.1	2.4	29.9
Noncurrent liabilities	0.3		0.8	0.8		0.3	2.2
Total liabilities assumed	0.7	0.8	25.1	2.7	0.1	2.7	32.1
Total net assets acquired	\$ 1.3	\$ 5.1	\$ 27.4	\$ 7.6	\$ 7.2	\$ 3.8	\$ 52.4

These acquisitions allow Gallagher to expand into desirable geographic locations, further extend its presence in the retail and wholesale insurance brokerage services industries and increase the volume of general services currently provided. The excess of the purchase price over the estimated fair value of the tangible net assets acquired at the acquisition date was allocated within the Brokerage Segment to goodwill, expiration lists and non-compete agreements in the amounts of \$26.2 million, \$20.4 million and \$0.2 million, respectively. Purchase price allocations are preliminarily established at the time of the acquisition and are subsequently reviewed within the first year of operations to determine the necessity for allocation adjustments. The fair value of the current assets and current liabilities for each applicable acquisition at the acquisition date approximated their carrying values due to their short-term duration. The fair value of expiration lists was established using the excess earnings method, which is an income approach based on estimated financial projections developed by management for each acquired entity using market participant assumptions. The fair value is estimated as the present value of the benefits anticipated from ownership of the subject customer list in excess of returns required on the investment in contributory assets necessary to realize those benefits. The rate used to discount the net benefits was based on a risk-adjusted rate that takes into consideration market based rates of return and reflects the risk of the asset relative to the acquired business. The acquired non-compete agreements were valued using the profit differential method, which is an income approach based on estimated financial projections developed by management for the acquired company using market participant assumptions and various non-compete scenarios.

Table of Contents

Expiration lists and non-compete agreements related to these acquisitions are currently being amortized on a straight-line basis over useful lives of three to fifteen years and three to five years, respectively. Goodwill is not amortized, but is subject to periodic reviews for impairment. Gallagher reviews its intangible assets for impairment periodically (at least annually) and whenever events or changes in business circumstances indicate that the carrying value of the assets may not be recoverable. In reviewing intangible assets, if the fair value is less than the carrying amount of the respective (or underlying) asset, an indicator of impairment would exist and further analysis would be required to determine whether or not a loss would need to be charged against current period earnings. Based on the results of impairment reviews during the three-month and six-month periods ended June 30, 2010, Gallagher wrote off \$2.3 million of amortizable intangible assets related to the Brokerage Segment. No such indicators were noted in the six-month period ended June 30, 2009. Of the \$20.4 million of expiration lists related to the 2010 acquisitions, \$4.5 million is not expected to be deductible for income tax purposes. Accordingly, Gallagher recorded a deferred tax liability of \$1.4 million and a corresponding amount of goodwill in 2010 related to the nondeductible amortizable intangible assets.

During the six-month period ended June 30, 2010, Gallagher issued 703,000 shares of its common stock, paid \$1.3 million in cash, and accrued \$5.4 million in current liabilities related to earnout obligations for acquisitions made prior to 2009 and recorded additional goodwill of \$12.2 million. During the six-month period ended June 30, 2009, Gallagher issued 641,000 shares of its common stock, paid \$3.9 million in cash and accrued \$0.8 million in current liabilities related to earnout obligations for acquisitions made prior to 2009 and recorded additional goodwill of \$11.2 million. During the six-month period ended June 30, 2009, Gallagher also issued 1.1 million shares of its common stock related to an acquisition made in December 2008 and recorded in the consolidated financial statements as of December 31, 2008.

Gallagher's consolidated financial statements for the six-month period ended June 30, 2010 includes the operations of the entities acquired from the dates of their respective acquisitions. The following is a summary of the unaudited pro forma historical results, as if these purchased entities had been acquired at January 1, 2009 (in millions, except per share data):

	Three-month period ended		Six-month period ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Total revenues	\$ 460.5	\$ 467.4	\$ 952.0	\$ 876.9
Earnings from continuing operations	42.0	45.7	70.9	73.7
Basic earnings from continuing operations per share	0.40	0.45	0.68	0.74
Diluted earnings from continuing operations per share	0.40	0.45	0.68	0.74

The unaudited pro forma results above have been prepared for comparative purposes only and do not purport to be indicative of the results of operations which actually would have resulted had these acquisitions occurred at January 1, 2009, nor are they necessarily indicative of future operating results. Annualized revenues of the entities acquired during the six-month period ended June 30, 2010 totaled approximately \$44.2 million.

Table of Contents**5. Discontinued Operations**

The assets and liabilities included in the accompanying June 30, 2010 and December 31, 2009 consolidated balance sheet related to discontinued operations were as follows (in millions):

	June 30, 2010	December 31, 2009
Restricted cash	\$ 0.5	\$ 0.3
Other noncurrent assets	8.5	12.9
Total assets	\$ 9.0	\$ 13.2
Premiums payable to insurance and reinsurance companies	\$ 0.2	\$ 0.2
Other current liabilities	0.9	1.0
Other noncurrent liabilities	7.9	12.0
Total liabilities	\$ 9.0	\$ 13.2

As part of integrating the operations of a London-based insurance brokerage firm acquired by Gallagher on April 1, 2010, Gallagher restored into service certain leased real estate space that was abandoned in 2008 as part of the wind-down of certain of its discontinued operations. In the three-month and six-month periods ended June 30, 2010, Gallagher recognized \$2.1 million of pretax earnings from discontinued operations for the reversal of a portion of the lease abandonment charges incurred in 2008.

6. Intangible Assets

The carrying amount of goodwill at June 30, 2010 allocated by domestic and foreign operations is as follows (in millions):

	Brokerage	Risk Management	Corporate	Total
United States	\$ 731.2	\$ 9.5	\$	\$ 740.7
Foreign, principally Australia, Canada and the U.K.	39.5	0.2		39.7
Total goodwill - net	\$ 770.7	\$ 9.7	\$	\$ 780.4

The changes in the carrying amount of goodwill for the six-month period ended June 30, 2010 are as follows (in millions):

	Brokerage	Risk Management	Corporate	Total
Balance as of January 1, 2010	\$ 732.6	\$ 9.7	\$	\$ 742.3
Goodwill acquired during the period	26.2			26.2
Goodwill related to earnouts recognized during the period	12.2			12.2
Foreign currency translation adjustments during the period	(0.3)			(0.3)
Balance as of June 30, 2010	\$ 770.7	\$ 9.7	\$	\$ 780.4

Table of Contents

Major classes of amortizable intangible assets consist of the following (in millions):

	June 30, 2010	December 31, 2009
Expiration lists	\$ 617.6	\$ 594.8
Accumulated amortization - expiration lists	(196.0)	(166.6)
	421.6	428.2
Non-compete agreements	22.3	22.2
Accumulated amortization - non-compete agreements	(19.0)	(18.4)
	3.3	3.8
Trade name	7.9	7.9
Accumulated amortization - trade name	(1.8)	(1.5)
	6.1	6.4
Net amortizable assets	\$ 431.0	\$ 438.4

Estimated aggregate amortization expense for each of the next five years is as follows:

2010 (remaining six months)	\$ 28.2
2011	55.5
2012	52.8
2013	51.3
2014	49.5
Total	\$ 237.3

7. Credit and Other Debt Agreements

Note Purchase Agreement - Gallagher is party to an amended and restated note purchase agreement dated as of December 19, 2007, with certain accredited institutional investors, pursuant to which Gallagher issued and sold \$100.0 million in aggregate principal amount of Gallagher's 6.26% Senior Notes, Series A, due August 3, 2014 and \$300.0 million in aggregate principal amount of Gallagher's 6.44% Senior Notes, Series B, due August 3, 2017, in a private placement. These notes require semi-annual payments of interest that are due on February 3 and August 3. In connection with entering into this note purchase agreement, Gallagher incurred approximately \$1.3 million of debt acquisition costs that were capitalized and are being amortized on a pro rata basis over a seven-year period.

Gallagher is also party to a note purchase agreement dated as of November 30, 2009, with certain accredited institutional investors, pursuant to which Gallagher issued and sold \$150.0 million in aggregate principal amount of Gallagher's 5.85% Senior Notes, Series C, due in three equal installments on each of November 30, 2016, November 30, 2018 and November 30, 2019, in a private placement. These notes require semi-annual payments of interest that are due on May 30 and November 30.

Under the terms of the respective note purchase agreements, the notes are redeemable by Gallagher at any time, in whole or in part, at 100% of the principal amount of such notes being redeemed, together with accrued and unpaid interest and a make-whole amount. The make-whole amount is derived from a net present value computation of the remaining scheduled payments of principal and interest using a discount rate based on U.S. Treasury yields plus 0.5% and is designed to compensate the purchasers of the notes for their investment risk in the event prevailing interest rates at the time of prepayment are less favorable than the interest rates under the notes. Gallagher currently has no intention

of prepaying the notes.

The note purchase agreements contain customary provisions for transactions of this type, including representations and warranties regarding Gallagher and its subsidiaries and various financial covenants, including covenants that require Gallagher to maintain specified financial ratios. Gallagher was in compliance with these covenants at June 30, 2010. The note purchase agreements also provide customary events of default, generally with corresponding grace periods, including, without limitation, payment defaults with respect to the notes, covenant defaults, cross-defaults to other agreements evidencing indebtedness of Gallagher or its subsidiaries, certain judgments against Gallagher or its subsidiaries and events of bankruptcy involving Gallagher or its material subsidiaries.

Table of Contents

The notes issued under the note purchase agreements are senior unsecured obligations of Gallagher and rank equal in right of payment with Gallagher's Credit Agreement discussed below.

Credit Agreement - On July 15, 2010, Gallagher entered into an unsecured multicurrency credit agreement (Credit Agreement), which expires on July 14, 2014, with a group of twelve financial institutions. The Credit Agreement replaced a \$450.0 million unsecured revolving credit facility (that was scheduled to expire on October 4, 2010), which was terminated upon the execution of the Credit Agreement. All indebtedness, liabilities and obligations outstanding under the previous facility were fully paid and satisfied, except for the letters of credit (LOCs) which became LOCs under the Credit Agreement. Gallagher incurred no early termination fees in connection with replacing the previous credit agreement.

The Credit Agreement provides for a revolving credit commitment of up to \$500.0 million, of which up to \$75.0 million may be used for issuances of standby or commercial LOCs and up to \$50.0 million may be used for the making of swing loans, as defined in the Credit Agreement. Gallagher may from time to time request, subject to certain conditions, an increase in the revolving credit commitment up to a maximum aggregate revolving credit commitment of \$600.0 million.

The Credit Agreement provides that Gallagher may elect that each borrowing in U.S. dollars be either base rate loans or Eurocurrency loans, as defined in the Credit Agreement. All loans denominated in currencies other than U.S. dollars are Eurocurrency loans. Interest rates on base rate loans and outstanding drawings on LOCs in U.S. dollars under the Credit Agreement are based on the base rate, as defined in the Credit Agreement. Interest rates on Eurocurrency loans or outstanding drawings on LOCs in currencies other than U.S. dollars under the Credit Agreement are based on adjusted LIBOR, as defined in the Credit Agreement, plus a margin of 1.45%, 1.65%, 1.85% or 2.00%, depending on the financial leverage ratio maintained by Gallagher. Interest rates on swing loans are based, at the election of Gallagher, on either the base rate, as defined in the Credit Agreement, or such alternate rate as may be quoted by the lead lender. The annual facility fee related to the Credit Agreement is either .30%, .35%, .40% or .50% of the used and unused portions of the revolving credit facility, depending on the financial leverage ratio maintained by Gallagher. In connection with entering into the Credit Agreement, Gallagher incurred approximately \$3.3 million of debt acquisition costs that were capitalized and will be amortized on a pro rata basis over the term of the Credit Agreement.

The terms of Gallagher's Credit Agreement and the previous credit agreement include various financial covenants, including covenants that require Gallagher to maintain specified levels of net worth and financial leverage ratios. Gallagher was in compliance with these covenants at June 30, 2010 and July 15, 2010. The Credit Agreement also includes customary events of default, with corresponding grace periods, including, without limitation, payment defaults, cross-defaults to other agreements evidencing indebtedness and bankruptcy-related defaults.

At June 30, 2010 and July 15, 2010, \$15.2 million and \$16.0 million of LOCs (for which Gallagher had \$7.6 million of liabilities recorded at June 30, 2010) were outstanding under the previous credit agreement and the Credit Agreement, respectively. There were no borrowings outstanding under either facility at June 30, 2010 or July 15, 2010. Accordingly, as of July 15, 2010, \$484.0 million remained available for potential borrowings, of which \$59.0 million may be in the form of additional LOCs.

Table of Contents

The following is a summary of Gallagher's debt (in millions):

	June 30, 2010	December 31, 2009
Note Purchase Agreements:		
Semi-annual payments of interest, fixed rate of 6.26%, balloon due 2014	\$ 100.0	\$ 100.0
Semi-annual payments of interest, fixed rate of 6.44%, balloon due 2017	300.0	300.0
Semi-annual payments of interest, fixed rate of 5.85%, \$50 million due in 2016, 2018 and 2019	150.0	150.0
Total Note Purchase Agreements	550.0	550.0
Credit Agreement:		
Periodic payments of interest and principal, prime or LIBOR plus up to 2.00%, expires July 14, 2014		
Total debt	\$ 550.0	\$ 550.0

The fair value of the \$550.0 million in debt under the note purchase agreements at June 30, 2010 was \$602.7 million due to the long-term duration and fixed interest rates associated with these debt obligations. There is no active or observable market for Gallagher's private placement long-term debt. Therefore, the estimated fair value of this debt is based on discounted future cash flows using current interest rates available for debt with similar terms and remaining maturities. To estimate an all-in interest rate for discounting, market quotes were obtained for notes with the same terms as Gallagher's. There is no rate adjustment for the risk profile changes, covenant issues or credit ratings changes at Gallagher. Therefore, the market quotes are deemed to be the closest approximation of current market rates.

See Note 14 to the consolidated financial statements for additional discussion on commitments and contingencies.

8. Earnings Per Share

The following table sets forth the computation of basic and diluted net earnings per share (in millions, except per share data):

	Three-month period ended June 30,		Six-month period ended June 30,	
	2010	2009	2010	2009
Earnings from continuing operations	\$ 41.9	\$ 43.8	\$ 71.1	\$ 72.1
Earnings (loss) from discontinued operations	2.1		2.1	(1.9)
Net earnings	\$ 44.0	\$ 43.8	\$ 73.2	\$ 70.2
Weighted average number of common shares outstanding	104.4	100.6	103.6	99.3
Dilutive effect of stock options using the treasury stock method	0.2	0.1	0.2	0.1
Weighted average number of common and common equivalent shares outstanding	104.6	100.7	103.8	99.4
Basic net earnings (loss) per share:				
Earnings from continuing operations	\$ 0.40	\$ 0.44	\$ 0.69	\$ 0.73
Earnings (loss) from discontinued operations	0.02		0.02	(0.02)
Net earnings	\$ 0.42	\$ 0.44	\$ 0.71	\$ 0.71
Diluted net earnings (loss) per share:				
Earnings from continuing operations	\$ 0.40	\$ 0.44	\$ 0.69	\$ 0.73
Earnings (loss) from discontinued operations	0.02		0.02	(0.02)

Edgar Filing: GALLAGHER ARTHUR J & CO - Form 10-Q

Net earnings	\$	0.42	\$	0.44	\$	0.71	\$	0.71
--------------	----	------	----	------	----	------	----	------

- 16 -

Table of Contents

Options to purchase 9.6 million and 12.6 million shares of common stock were outstanding at June 30, 2010 and 2009, respectively, but were not included in the computation of the dilutive effect of stock options for the three-month periods then ended. Options to purchase 11.4 million and 12.6 million shares of common stock were outstanding at June 30, 2010 and 2009, respectively, but were not included in the computation of the dilutive effect of stock options for the six-month periods then ended. These options were excluded from the computation because the options exercise prices were greater than the average market price of Gallagher's common shares during the respective periods, and therefore would be antidilutive to earnings per share under the treasury stock method.

9. Stock Option Plans

On May 12, 2009, Gallagher's stockholders approved the 2009 Long-Term Incentive Plan (LTIP). The LTIP's term began May 12, 2009 and terminates on the date of the first annual meeting of stockholders to occur on or after the fifth anniversary of its effective date, unless terminated earlier by Gallagher's Board of Directors. All officers, employees and non-employee directors of Gallagher and persons expected to become officers, employees or non-employee directors of Gallagher are eligible to receive awards under the LTIP. The Compensation Committee of Gallagher's Board of Directors determines the participants under the LTIP. Awards include non-qualified and incentive stock options, stock appreciation rights, restricted stock, restricted stock units and performance units, any or all of which may be made contingent upon the achievement of performance criteria. Subject to the LTIP limits, the Compensation Committee has the discretionary authority to determine the size of an award.

As of the effective date of the LTIP, 3.0 million shares of Gallagher's common stock were available for awards granted under the LTIP. The number of available shares will be reduced by the aggregate number of shares that become subject to outstanding awards granted under the LTIP. To the extent that shares subject to an outstanding award granted under either the LTIP or any of the predecessor plans are not issued or delivered by reason of the expiration, termination, cancellation or forfeiture of such award or by reason of the settlement of such award in cash, then such shares will again be available under the LTIP. Shares that are subject to a stock appreciation right and were not issued upon the net settlement or net exercise of such stock appreciation right, shares that are used to pay the exercise price of an option, delivered to or withheld by Gallagher to pay withholding taxes, and shares that are purchased on the open market with the proceeds of an option exercise, may not again be made available for issuance.

Shares of Gallagher's common stock available for issuance under the plan include authorized and unissued shares of common stock or authorized and issued shares of common stock reacquired and held as treasury shares or otherwise, or a combination thereof. The maximum number of shares available under the LTIP for restricted stock, restricted stock unit awards and performance unit awards settled with stock (i.e., all awards other than stock options and stock appreciation rights) is 600,000. The maximum number of shares with respect to which options or stock appreciation rights or a combination thereof that may be granted during any fiscal year to any person is 200,000. The maximum number of shares with respect to which performance-based restricted stock or restricted stock units that may be granted during any fiscal year to any person is 100,000. The maximum amount that may be payable with respect to performance units granted during any fiscal year of Gallagher to any person is \$1.5 million.

The LTIP provides for the grant of stock options and stock appreciation rights. Stock options may be either tax-qualified incentive stock options or non-qualified options. The period for the exercise of a non-qualified stock option, tax-qualified incentive stock option or stock appreciation right is determined by the Compensation Committee, provided that no option can be exercised later than seven years after its date of grant. The exercise price of a non-qualified stock option or tax-qualified incentive stock option and the base price of a stock appreciation right cannot be less than 100% of the fair market value of a share of Gallagher common stock on the date of grant, provided that the base price of a stock appreciation right granted in tandem with an option will be the exercise price of the related option. A stock appreciation right entitles the holder to receive upon exercise (subject to withholding taxes), cash or shares of Gallagher common stock (which may be restricted stock) with a value equal to the difference between the fair market value of Gallagher common stock on the exercise date and the base price of the stock appreciation right.

Table of Contents

Upon exercise, the option exercise price may be paid in cash, by the delivery of previously owned shares of Gallagher common stock or through a cashless exercise arrangement. All of the terms relating to the exercise, cancellation or other disposition of an option or stock appreciation right upon a termination of employment, whether by reason of disability, retirement, death or any other reason, are determined by the Compensation Committee. Stock option and stock appreciation right awards under the plan are non-transferable.

Prior to 2009, Gallagher issued stock options under four stock option-based employee compensation plans. In May 2008, all of these plans expired. Under the expired plans, Gallagher granted both incentive and non-qualified stock options to officers and key employees of Gallagher and its subsidiaries. Most options granted under the incentive plan prior to 2007 become exercisable at the rate of 10% per year beginning the calendar year after the date of grant. Most options granted under the non-qualified plan prior to 2007 become exercisable at the rate of 10% per year beginning the calendar year after the date of grant or earlier in the event of death, disability or retirement (if the retirement eligible age requirement is met). Options granted prior to 2009 expire ten years from the date of grant, or earlier in the event of termination of the employee (if the retirement eligible age requirement is not met).

On March 2, 2010, the Compensation Committee granted 858,000 options to officers and key employees of Gallagher that become exercisable at the rate of 20% per year on the anniversary date of the grant. The 2010 options expire seven years from the date of grant, or earlier in the event of termination of the employee.

In addition to the employee plans discussed above, Gallagher had a non-employee directors' stock option plan, under which, in 2007 and prior years, discretionary options were granted at the direction of the Compensation Committee and retainer options were granted in lieu of the directors' annual retainer. Discretionary options were exercisable at such rates as determined by the Compensation Committee on the date of grant. Retainer options were cumulatively exercisable at the rate of 25% of the total retainer option at the end of each full fiscal quarter following the date of grant. Options granted under the non-employee directors' plan contained provisions where the vesting of the stock options accelerates to 100% on the termination of the director.

All of the aforementioned stock option plans provide for the immediate vesting of all outstanding stock option grants in the event of a change in control of Gallagher, as defined in the plan documents.

During the three-month periods ended June 30, 2010 and 2009, Gallagher recognized \$2.5 million and \$2.8 million, respectively, of compensation expense related to its stock option grants. During the six-month periods ended June 30, 2010 and 2009, Gallagher recognized \$3.5 million and \$3.9 million, respectively, of compensation expense related to its stock option grants.

For purposes of expense recognition, the estimated fair values of the stock option grants are amortized to expense over the options' expected lives. In 2010 and 2009, the fair value of stock options at the date of grant was estimated using the Black-Scholes option pricing model with the following weighted average assumptions:

	2010	2009
Expected dividend yield	5.0%	4.0%
Expected risk-free interest rate	2.8%	3.0%
Volatility	27.1%	27.3%
Expected life (in years)	6.1	7.0

Table of Contents

The Black-Scholes option pricing model was developed for use in estimating the fair value of traded options which have no vesting restrictions and are fully transferable. Any option pricing model requires the input of highly subjective assumptions including the expected stock price volatility. Because Gallagher's employee and director stock options have characteristics significantly different from those of traded options, and because changes in the selective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its employee and director stock options. The weighted average fair value per option for all options granted during the six-month periods ended June 30, 2010 and 2009, as determined on the grant date using the Black-Scholes option pricing model, was \$3.90 and \$4.19, respectively.

The following is a summary of Gallagher's stock option activity and related information for 2010 (in millions, except exercise price and years data):

	Six-month period ended June 30, 2010			
	Shares Under Option	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value
Beginning balance	13.4	\$ 26.26		
Granted	0.9	24.22		
Exercised	(1.0)	18.79		
Forfeited or canceled	(0.1)	26.49		
Ending balance	13.2	\$ 26.69	4.05	\$ 3.2
Exercisable at end of period	8.8	\$ 26.87	3.43	\$ 2.4
Ending vested and expected to vest	13.2	\$ 26.69	4.04	\$ 3.2

Options with respect to 1.8 million shares (less any shares of restricted stock issued under the LTIP as discussed in Note 11 to the consolidated financial statements) were available for grant under the LTIP at June 30, 2010.

The total intrinsic value of options exercised during the six-month periods ended June 30, 2010 and 2009 amounted to \$6.1 million and \$0.4 million, respectively. As of June 30, 2010, there was approximately \$26.7 million of total unrecognized compensation cost related to nonvested options. That cost is expected to be recognized over a weighted average period of approximately four years.

Other information regarding stock options outstanding and exercisable at June 30, 2010 is summarized as follows (in millions, except exercise price and years data):

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding	Weighted Average Remaining Contractual Term (in years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
\$ 1.11 - \$ 24.13	2.9	4.64	\$ 23.28	1.5	\$ 22.75
24.58 - 26.50	3.7	2.67	25.59	2.9	25.64
26.55 - 27.35	2.7	4.99	27.20	1.6	27.19
27.36 - 29.42	2.8	4.72	29.11	1.9	29.12

\$ 1.11 - \$ 36.94

13.2

4.05 \$ 26.69

8.8 \$ 26.87

Table of Contents**10. Deferred Compensation**

Gallagher has a Deferred Equity Participation Plan, which is a non-qualified plan that provides for distributions to certain key executives of Gallagher when they attain age 62 or upon or after their actual retirement. Under the provisions of the plan, Gallagher contributes shares of its common stock or cash, in an amount approved by the Compensation Committee, to a rabbi trust on behalf of the executives participating in the plan. Distributions under the plan may not normally be made until the participant reaches age 62 and are subject to forfeiture in the event of voluntary termination of employment prior to age 62. All distributions of stock contributions from the plan, except for accumulated non-invested dividends, are made in the form of Gallagher's common stock and all distributions of cash contributions are distributed in cash.

The Gallagher common stock that is issued under the plan to the rabbi trust is valued at historical cost (fair market value at the date of grant). The unearned deferred compensation obligation is recorded as a reduction of capital in excess of par value in the accompanying consolidated balance sheet and is being amortized to compensation expense ratably over the vesting period of the participants. Future changes in the fair market value of the Gallagher common stock that is owed to the participants do not have any impact on Gallagher's consolidated financial statements. During the three-month periods ended June 30, 2010 and 2009, \$0.3 million and \$0.4 million, respectively, was charged to compensation expense related to this plan. During the six-month periods ended June 30, 2010 and 2009, \$0.7 million and \$0.8 million, respectively, was charged to compensation expense related to this plan. At June 30, 2010 and December 31, 2009, \$8.8 million (related to 673,000 shares) and \$9.5 million (related to 685,000 shares), respectively, of unearned deferred compensation was recorded as an offset to capital in excess of par value in the accompanying consolidated balance sheet. The total intrinsic value of unvested Gallagher common stock under the plan at June 30, 2010 and December 31, 2009 was \$16.4 million and \$15.4 million, respectively.

In first quarter 2010 and 2009, the Compensation Committee approved \$5.9 million and \$5.5 million, respectively, of cash awards in the aggregate to certain key executives under the Deferred Equity Participation Plan that were contributed to the rabbi trust in second quarter 2010 and 2009, respectively. The fair value of the funded cash award assets at June 30, 2010 and December 31, 2009 was \$18.3 million and \$13.3 million, respectively, and has been included in other noncurrent assets in the accompanying consolidated balance sheet. During the three-month periods ended June 30, 2010 and 2009, \$0.6 million and \$0.4 million, respectively, was charged to compensation expense related to these awards. During the six-month periods ended June 30, 2010 and 2009, \$1.3 million and \$1.0 million, respectively, was charged to compensation expense related to these awards. During the six-month periods ended June 30, 2010 and 2009, cash and equity awards with an aggregate fair value of \$0.4 million and \$0.5 million, respectively, were vested and distributed to participants in this plan.

11. Restricted Stock and Cash Awards**Restricted Stock Awards**

As disclosed in Note 9 to the consolidated financial statements, Gallagher's stockholders approved the LTIP on May 12, 2009. The LTIP provides for the grant of a stock award either as restricted stock or as restricted stock units. In either case, the Compensation Committee may determine that the award will be subject to the attainment of performance measures over an established performance period. Stock awards are non-transferable and subject to forfeiture if the holder does not remain continuously employed at Gallagher during the restriction period or, in the case of a performance-based award, if applicable performance measures are not attained. All of the terms relating to the satisfaction of performance measures and the termination of a restriction period, or the forfeiture and cancellation of a stock award upon a termination of employment, whether by reason of disability, retirement, death or any other reason, will be determined by the Compensation Committee. The Compensation Committee may also grant unrestricted shares of common stock or units representing the right to receive shares of common stock to employees who have attained age 62.

The agreements awarding restricted stock units will specify whether such award may be settled in shares of Gallagher common stock, cash or a combination thereof and whether the holder will be entitled to receive dividend equivalents, on a current or deferred basis, with respect to such award. Prior to settlement of a restricted stock unit, the holder of a restricted stock unit will have no rights as a stockholder of Gallagher. The maximum number of shares available under the LTIP for awards of restricted stock, restricted stock units and performance units settled with stock (i.e., all awards other than stock options and stock appreciation rights) is 600,000. At June 30, 2010, 367,000 shares were available for grant under the LTIP for such awards.

Table of Contents

Prior to May 12, 2009, Gallagher had a restricted stock plan for its directors, officers and certain other employees, which was superseded by the LTIP. Under the provisions of that plan, Gallagher was authorized to issue 4.0 million restricted shares or related stock units of Gallagher common stock. The Compensation Committee was responsible for the administration of the plan. Each award granted under the plan represents a right of the holder of the award to receive shares of Gallagher common stock, cash or a combination of shares and cash, subject to the holder's continued employment with Gallagher for a period of time after the date the award was granted. The Compensation Committee determined each recipient of an award under the plan, the number of shares of common stock subject to such award and the period of continued employment required for the vesting of such award.

In first quarter 2010 and 2009, Gallagher granted 185,000 and 211,000 shares, respectively, of its common stock to employees under the LTIP or restricted stock plan, as applicable, with an aggregate fair value of \$4.5 million and \$3.4 million, respectively, at the date of grant. In second quarter 2010 and 2009, Gallagher granted 29,000 and 27,000 shares, respectively, of its common stock to employees under the LTIP or restricted stock plan, as applicable, with an aggregate fair value of \$0.7 million and \$0.6 million, respectively, at the date of grant.

The 2010 and 2009 restricted stock awards (consisting of restricted stock or restricted stock units) vest as follows: 185,000 shares granted in first quarter 2010 and 199,000 shares granted in first quarter 2009, vest in full based on continued employment through March 3, 2014 and March 4, 2013, respectively; the other 2010 and 2009 restricted stock awards generally vest annually on a pro rata basis. The vesting periods of the 2010 and 2009 restricted stock awards are as follows (in shares):

Vesting Period	Shares Granted	
	2010	2009
One year	12,000	16,000
Two years	17,000	4,000
Four years	185,000	199,000
Five years		7,000
Six years		12,000
Total shares granted	214,000	238,000

Gallagher accounts for restricted stock at historical cost, which equals its fair market value at the date of grant. When restricted shares are issued, an unearned restricted stock obligation is recorded as a reduction of capital in excess of par value in the accompanying consolidated balance sheet and is amortized to compensation expense ratably over the vesting period of the participants. Future changes in the fair value of the Gallagher common stock that is owed to the participants do not have any impact on Gallagher's consolidated financial statements. During the three-month periods ended June 30, 2010 and 2009, \$1.6 million and \$1.4 million, respectively, was charged to compensation expense related to restricted stock awards granted in 2005 through 2010. During the six-month periods ended June 30, 2010 and 2009, \$2.6 million and \$2.3 million, respectively, was charged to compensation expense related to restricted stock awards granted in 2006 through 2010. At June 30, 2010 and December 31, 2009, \$3.0 million (related to 221,000 shares) and \$3.4 million (related to 251,000 shares), respectively, of unearned restricted stock outstanding was recorded as an offset to capital in excess of par value in the accompanying consolidated balance sheet. The total intrinsic value of unvested restricted stock at June 30, 2010 and 2009 was \$21.0 million and \$16.4 million, respectively.

Cash Awards

On March 4, 2009, pursuant to a Performance Unit Program (the Program), the Compensation Committee approved the future grant of provisional cash awards of \$19.4 million in the aggregate to officers and key employees of Gallagher that are denominated in units (1.3 million units in the aggregate), each of which was equivalent to the value of one share of Gallagher's common stock on the approval date of grant. The Program consists of a one-year performance period based on financial performance and a two-year vesting period. At the discretion of the Compensation Committee and determined based on company performance, the officer or key employee was granted a percentage of the provisional cash award units that equates to the EBITA (as defined in the Program) growth achieved. At the end of the performance period, eligible employees were granted a number of units based on achievement of the performance goal and subject to approval by the Compensation Committee. Granted units fully

Table of Contents

vest based on continuous employment through January 1, 2012. The ultimate award value will be equal to the trailing twelve month stock price on December 31, 2011, multiplied by the number of units subject to the award, but limited to between 0.5 and 1.5 times the original value of the units determined as of the grant date. The fair value of the grant will be paid out in cash as soon as practicable in 2012. If an eligible employee leaves Gallagher prior to the vesting date, the entire award will be forfeited. Based on company performance for 2009, Gallagher granted 1.2 million units under the Program in first quarter 2010 that will fully vest on January 1, 2012. During the three-month period ended June 30, 2010, \$3.5 million was charged to compensation expense related to this provisional grant. During the six-month period ended June 30, 2010, \$7.0 million was charged to compensation expense related to this provisional grant.

During the three-month and six-month periods ended June 30, 2009, \$0.6 million and \$1.2 million, respectively, was charged to compensation expense related to a 2007 grant under the Program that fully vested on January 1, 2010. During the six-month period ended June 30, 2010, cash awards related to the 2007 grant with an aggregate fair value of \$4.6 million (215,000 units in the aggregate) were vested and distributed to employees under the Program.

On March 2, 2010, pursuant to the Program, the Compensation Committee approved the future grant of provisional cash awards of \$17.0 million in the aggregate to officers and key employees of Gallagher that are denominated in units (706,000 units in the aggregate), each of which is equivalent to the value of one share of Gallagher's common stock on the approval date of grant. Terms of the 2010 grants are similar to the terms discussed above for the 2009 grants; however, any 2010 granted units will fully vest based on continuous employment through January 1, 2013 and the provisional cash award units are based on EBITAC (as defined in the Program) growth achieved. No compensation expense was recognized during the six-month period ended June 30, 2010 related to this provisional grant.

12. Employee Stock Purchase Plan

Gallagher has an employee stock purchase plan (ESPP), under which the sale of 4.0 million shares of Gallagher's common stock has been authorized. Eligible employees may contribute up to 15% of their compensation towards the quarterly purchase of Gallagher's common stock at a purchase price equal to 95% of the lesser of the fair market value of Gallagher's common stock on the first business day or the last business day of the quarterly offering period. Eligible employees may annually purchase shares of Gallagher's common stock with an aggregate fair market value of up to \$25,000 (measured as of the first day of each quarterly offering period of each calendar year), provided that no employee may purchase more than 2,000 shares of Gallagher's common stock under the ESPP during any calendar year. Currently, 1.4 million shares of Gallagher's common stock are reserved for future issuance under the ESPP.

The quarterly ESPP information for the six-month periods ended June 30, 2010 and 2009 is as follows (in millions, except per share and share data):

	1st Quarter	2nd Quarter
2010		
Fair market value per share at date of purchase	\$ 24.55	\$ 24.38
Purchase price per share	\$ 21.21	\$ 23.16
Shares issued	116,000	66,000
Aggregate purchase price	\$ 2.5	\$ 1.5
2009		
Fair market value per share at date of purchase	\$ 17.00	\$ 16.86
Purchase price per share	\$ 16.15	\$ 16.02
Shares issued	146,000	89,000
Aggregate purchase price	\$ 2.4	\$ 1.9

Table of Contents**13. Retirement Plans**

Gallagher has a noncontributory defined benefit pension plan that, prior to July 1, 2005, covered substantially all domestic employees who had attained a specified age and one year of employment. Benefits under the plan were based on years of service and salary history. In 2005, Gallagher amended its defined benefit pension plan to freeze the accrual of future benefits for all domestic employees, effective on July 1, 2005. In the table below, the service cost component represents plan administration costs that are incurred directly by the plan.

The components of the net periodic pension benefit cost for the plan consists of the following (in millions):

	Three-month period ended June 30,		Six-month period ended June 30,	
	2010	2009	2010	2009
Service cost	\$ 0.1	\$ 0.1	\$ 0.2	\$ 0.2
Interest cost on benefit obligation	2.9	2.8	5.8	5.6
Expected return on plan assets	(3.3)	(2.6)	(6.6)	(5.2)
Amortization of net actuarial loss	0.5	1.2	1.0	2.4
Net periodic benefit cost	\$ 0.2	\$ 1.5	\$ 0.4	\$ 3.0

No minimum contribution is required to be made to the plan by Gallagher under the IRC for the 2010 and 2009 plan years. This level of required funding is based on the plan being frozen at June 30, 2010, and the aggregate amount of Gallagher's historical funding. During the six-month periods ended June 30, 2010 and 2009, Gallagher made discretionary contributions of \$3.0 million and \$1.0 million, respectively, to the plan. Gallagher is considering making additional discretionary contributions to the plan in 2010 and may be required to make contributions to the plan in future periods.

14. Commitments, Contingencies and Off-Balance Sheet Arrangements

In connection with its investing and operating activities, Gallagher has entered into certain contractual obligations and commitments. See Notes 3 and 7 to the consolidated financial statements for additional discussion of these obligations and commitments. Gallagher's future minimum cash payments, excluding interest, associated with its contractual obligations pursuant to the note purchase agreements and Credit Agreement, operating leases and purchase commitments at June 30, 2010 were as follows (in millions):

Contractual Obligations	Payments Due by Period						Total
	2010	2011	2012	2013	2014	Thereafter	
Note purchase agreements	\$	\$	\$	\$	\$ 100.0	\$ 450.0	\$ 550.0
Credit Agreement							
Total debt obligations					100.0	450.0	550.0
Operating lease obligations	66.4	62.0	47.9	31.4	18.2	41.7	267.6
Less sublease arrangements	(1.8)	(3.4)	(2.9)	(1.6)	(1.3)	(0.4)	(11.4)
Outstanding purchase obligations	2.5	3.6	2.0	0.1			8.2
Total contractual obligations	\$ 67.1	\$ 62.2	\$ 47.0	\$ 29.9	\$ 116.9	\$ 491.3	\$ 814.4

The amounts presented in the table above may not necessarily reflect the actual future cash funding requirements of Gallagher, because the actual timing of the future payments made may vary from the stated contractual obligation.

Note Purchase Agreements - On August 3, 2007, Gallagher entered into a note purchase agreement, as amended and restated on December 31, 2007, with certain accredited institutional investors, pursuant to which Gallagher issued and sold \$100.0 million in aggregate principal amount of Gallagher's 6.26% Senior Notes, Series A, due August 3, 2014 and \$300.0 million in aggregate principal amount of Gallagher's 6.44% Senior Notes, Series B, due August 3, 2017 in a private placement.

Table of Contents

On November 30, 2009, Gallagher entered into another note purchase agreement, with certain accredited institutional investors, pursuant to which Gallagher issued and sold \$150.0 million in aggregate principal amount of Gallagher's 5.85% Senior Notes, Series C, due in three equal installments on each of November 30, 2016, November 30, 2018 and November 30, 2019, in a private placement.

See Note 7 to the consolidated financial statements for a discussion of the terms of the note purchase agreements.

Credit Agreement - Gallagher has a \$500.0 million Credit Agreement, which expires on July 14, 2014, that it uses to post LOCs and that it can use from time to time to borrow funds to supplement operating cash flows. The Credit Agreement was entered into on July 15, 2010 and replaces a previous \$450.0 million credit agreement. At June 30, 2010 and July 15, 2010, \$15.2 million and \$16.0 million of LOCs (for which Gallagher had \$7.6 million of liabilities recorded as of June 30, 2010) were outstanding under the previous credit agreement and the Credit Agreement, respectively. There were no borrowings outstanding under either facility at June 30, 2010 or July 15, 2010. Accordingly, as of July 15, 2010, \$484.0 million remained available for potential borrowings, of which \$59.0 million may be in the form of additional LOCs. Gallagher is under no obligation to utilize the Credit Agreement in performing its normal business operations. See Note 7 to the consolidated financial statements for a discussion of the terms of the Credit Agreement.

Operating Lease Obligations - Gallagher's executive offices of the Corporate Segment and certain subsidiary and branch facilities of the Brokerage and Risk Management Segments are located at Two Pierce Place, Itasca, Illinois, where Gallagher leases approximately 306,000 square feet of space, or approximately 60% of the building. The lease commitment on this property expires February 28, 2018.

Gallagher generally operates in leased premises at its other locations. Certain office space leases have options permitting renewals for additional periods. In addition to minimum fixed rentals, a number of leases contain annual escalation clauses which are generally related to increases in an inflation index.

Gallagher has leased certain office space to several non-Gallagher tenants under operating sublease arrangements. In the normal course of business, Gallagher expects that the leases will not be renewed or replaced. Charges for real estate taxes and common area maintenance are adjusted annually based on actual expenses, and the related revenues are recognized in the year in which the expenses are incurred. These amounts are not included in the minimum future rentals to be received in the contractual obligations table above.

Outstanding Purchase Obligations - Gallagher is a service company and thus typically does not have a material amount of outstanding purchase obligations at any point in time. The amount disclosed in the contractual obligations table above represents the aggregate amount of unrecorded purchase obligations that Gallagher had outstanding as of June 30, 2010. These obligations represent agreements to purchase goods or services that were executed in the normal course of business.

Off-Balance Sheet Commitments - Gallagher's total unrecorded commitments associated with outstanding letters of credit and funding commitments as of June 30, 2010 were as follows (in millions):

Off-Balance Sheet Commitments	Amount of Commitment Expiration by Period						Total
	2010	2011	2012	2013	2014	Thereafter	Amounts Committed
Letters of credit	\$	\$	\$	\$	\$	\$ 15.2	\$ 15.2
Funding commitments				0.1		1.2	1.3
Total commitments	\$	\$	\$	\$ 0.1	\$	\$ 16.4	\$ 16.5

Since commitments may expire unused, the amounts presented in the table above do not necessarily reflect Gallagher's actual future cash funding requirements. See Note 3 to the consolidated financial statements for a discussion of Gallagher's funding commitments related to its Corporate Segment and the Off-Balance Sheet Debt section below for a discussion of LOCs. All of the LOCs represent multiple year commitments that have annual, automatic renewing provisions and are classified by the latest commitment date.

Since January 1, 2002, Gallagher has acquired 145 companies, all of which were accounted for using the purchase accounting method for recording business combinations. Substantially all of the purchase agreements related to these acquisitions contain provisions for potential earnout obligations. For all of its 2010 and 2009 acquisitions that contain potential earnout obligations, such obligations are measured at fair value as of the acquisition date and are included on that basis in the recorded purchase price consideration for the applicable

Table of Contents

acquisition. The maximum earnout obligations related to the 2010 acquisitions are disclosed in Note 4 to the consolidated financial statements, which represent the maximum amount of additional consideration that could be paid pursuant to the purchase agreements related to the applicable acquisitions. The amounts recorded as earnout payables are primarily based upon estimated future operating results of the acquired entities over a two-to-three-year period subsequent to the acquisition date. The aggregate amount of maximum earnout obligations related to the 2009 and 2010 acquisitions was \$160.4 million, of which \$70.5 million was recorded in the consolidated balance sheet as of June 30, 2010 based on the estimated fair value of the expected future payments to be made. For acquisitions made prior to 2009, potential earnout obligations were not included in the purchase price that was recorded for each applicable acquisition at its respective acquisition date because such obligations are not fixed and determinable. Future payments made under these arrangements, if any, will generally be recorded as additional goodwill when the earnouts are settled. The aggregate amount of maximum unrecorded earnout payables outstanding as of June 30, 2010 was \$207.6 million related to acquisitions made by Gallagher during the period from 2006 to 2008.

Off-Balance Sheet Debt - Gallagher's unconsolidated investment portfolio includes investments in enterprises where Gallagher's ownership interest is between 1% and 50%, in which management has determined that Gallagher's level of influence and economic interest is not sufficient to require consolidation. As a result, these investments are accounted for using the equity method. None of these unconsolidated investments had any outstanding debt at June 30, 2010 or December 31, 2009 that was recourse to Gallagher.

At June 30, 2010, Gallagher had posted two LOCs totaling \$9.5 million, in the aggregate, related to Gallagher's self-insurance deductibles, for which it had a recorded liability of \$7.6 million. Gallagher has an equity investment in a rent-a-captive facility, which Gallagher uses as a placement facility for certain of its insurance brokerage operations. At June 30, 2010, Gallagher had posted \$5.7 million of LOCs to allow the rent-a-captive facility to meet minimum statutory surplus requirements and for additional collateral related to premium and claim funds held in a fiduciary capacity. These LOCs have never been drawn upon.

Litigation - Gallagher is a defendant in various legal actions related to employment matters and otherwise incident to the nature of its business. Gallagher believes it has meritorious defenses and intends to defend itself vigorously in all unresolved legal actions. In addition, Gallagher is the plaintiff in certain legal actions with and relating to former employees regarding alleged breaches of non-compete or other restrictive covenants, theft of trade secrets, breaches of fiduciary duties and related causes of action. Neither the outcomes of these legal actions nor their effect upon Gallagher's business, financial condition or results of operations can be determined at this time.

Contingent Liabilities - Gallagher purchases insurance to provide protection from errors and omissions (E&O) claims that may arise during the ordinary course of business. Gallagher currently retains the first \$5.0 million of each and every E&O claim. Gallagher's E&O insurance provides aggregate coverage for E&O losses up to \$175.0 million in excess of Gallagher's retained amounts. Gallagher has historically maintained self-insurance reserves for the portion of its E&O exposure that is not insured. Gallagher periodically determines a range of possible reserve levels using actuarial techniques that rely heavily on projecting historical claim data into the future. Gallagher's E&O reserve in the June 30, 2010 consolidated balance sheet is above the lower end of the most recently determined actuarial range by \$1.2 million and below the upper end of the most recently determined actuarial range by \$4.2 million. There can be no assurances that the historical claim data used to project the current reserve levels will be indicative of future claim activity. Thus, the actuarial ranges and E&O reserve level could change in the future as more information becomes known, which could materially impact the amounts reported and disclosed herein.

Tax-advantaged Investments No Longer Held - Between 1996 and 2007, Gallagher developed and then sold portions of its ownership in various energy related investments, many of which qualified for tax credits under IRC Section 29. In connection with the sales to other investors, Gallagher provided various indemnifications. At June 30, 2010, the maximum potential amount of future payments that Gallagher could be required to make under these indemnifications totaled approximately \$210.0 million, net of the applicable income tax benefit. In addition, Gallagher recorded tax benefits in connection with its ownership in these investments. At June 30, 2010, Gallagher had exposure on \$155.3 million of previously earned tax credits. In 2004, 2007 and 2009, the IRS examined several of these investments and all examinations were closed without any changes being proposed by the IRS. However, any future adverse tax audits, administrative rulings or judicial decisions could disallow previously claimed tax credits or cause Gallagher to be subject to liability under the indemnification obligations discussed above.

Table of Contents**15. Comprehensive Earnings**

The after-tax components of Gallagher's comprehensive earnings consist of the following:

	Three-month period ended June 30,		Six-month period ended June 30,	
	2010	2009	2010	2009
Net earnings	\$ 44.0	\$ 43.8	\$ 73.2	\$ 70.2
Other comprehensive earnings (loss):				
Net change in pension liability, net of taxes	0.2	0.7	0.5	1.4
Foreign currency translation, net of taxes	(4.3)	9.0	(4.8)	7.4
Comprehensive earnings	\$ 39.9	\$ 53.5	\$ 68.9	\$ 79.0

The foreign currency translation during the three-month and six-month periods ended June 30, 2010 and 2009 relates to the net impact of changes in the value of the local currencies relative to the U.S. dollar for Gallagher's operations in Australia, Canada and the U.K.

16. Income Taxes

The total amount of net unrecognized tax benefits that, if recognized, would affect the effective tax rate was \$42.8 million and \$42.0 million at June 30, 2010 and December 31, 2009, respectively. Gallagher accrues interest and penalties related to unrecognized tax benefits in its provision for income taxes. At June 30, 2010 and December 31, 2009, Gallagher had accrued interest and penalties related to unrecognized tax benefits, net of tax, of \$2.8 million and \$3.5 million, respectively. Gallagher and its subsidiaries file income tax returns in the U.S. and in various state, local and foreign jurisdictions. Gallagher and its subsidiaries are routinely examined by tax authorities in these jurisdictions and a number of these examinations are currently ongoing. Due to the potential for resolution of Federal, state, local and foreign examinations, and the expiration of various statutes of limitations, it is reasonably possible that Gallagher's gross unrecognized tax benefits balance may decrease within the next twelve months by a range of zero to \$28.0 million.

17. Segment Information

Gallagher has identified three business segments: Brokerage, Risk Management and Corporate.

The Brokerage Segment is comprised of two operating divisions: Retail Insurance Brokerage and Wholesale Insurance Brokerage. The Brokerage Segment generates revenues through commissions paid by insurance underwriters and through fees charged to its clients. Gallagher's brokers, agents and administrators act as intermediaries between insurers and their customers and Gallagher does not assume underwriting risks.

The Risk Management Segment provides contract claim settlement and administration services for enterprises that choose to self-insure some or all of their P/C coverage and for insurance companies that choose to outsource some or all of their P/C claims departments. These operations also provide claims management, loss control consulting and insurance property appraisal services. Revenues are generally generated on a negotiated per-claim or per-service fee basis.

The Corporate Segment manages Gallagher's interests primarily in alternative energy (clean-energy/tax-advantaged) and venture capital investments. This segment also holds all of Gallagher's corporate debt.

Allocations of investment income and certain expenses are based on reasonable assumptions and estimates primarily using revenue, headcount and other information. Gallagher allocates the provision for income taxes to the Brokerage and Risk Management Segments as if those segments were preparing income tax provisions on a separate company basis. Reported operating results by segment would change if different methods were applied.

Table of Contents

Financial information relating to Gallagher's segments for 2010 and 2009 is as follows (in millions):

	Three-month period ended June 30,		Six-month period ended June 30,	
	2010	2009	2010	2009
Brokerage				
Total revenues	\$ 347.0	\$ 340.1	\$ 651.4	\$ 629.6
Earnings from continuing operations before income taxes	\$ 62.8	\$ 69.5	\$ 102.2	\$ 108.7
Identifiable assets at June 30, 2010 and 2009			\$ 2,627.7	\$ 2,734.0
Risk Management				
Total revenues	\$ 111.4	\$ 113.3	\$ 221.9	\$ 225.5
Earnings from continuing operations before income taxes	\$ 13.4	\$ 13.4	\$ 28.8	\$ 27.7
Identifiable assets at June 30, 2010 and 2009			\$ 395.3	\$ 393.5
Corporate				
Total revenues (loss)	\$ 1.1	\$ 0.2	\$ 68.6	\$ (0.4)
Loss from continuing operations before income taxes	\$ (12.3)	\$ (8.8)	\$ (24.2)	\$ (18.8)
Identifiable assets at June 30, 2010 and 2009			\$ 532.8	\$ 525.0

Review by Independent Registered Public Accounting Firm

The interim consolidated financial statements at June 30, 2010 and for the three-month and six-month periods ended June 30, 2010 and 2009 have been reviewed by Ernst & Young LLP, Gallagher's independent registered public accounting firm, and their report is included herein.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders

Arthur J. Gallagher & Co.

We have reviewed the consolidated balance sheet of Arthur J. Gallagher & Co. as of June 30, 2010 and the related consolidated statement of earnings for the three-month and six-month periods ended June 30, 2010 and 2009, the consolidated statement of cash flows for the six-month periods ended June 30, 2010 and 2009 and the consolidated statement of stockholders' equity for the six-month period ended June 30, 2010. These financial statements are the responsibility of Gallagher's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the interim consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) the consolidated balance sheet of Arthur J. Gallagher & Co. as of December 31, 2009, and the related consolidated statements of earnings, stockholders' equity, and cash flows for the year then ended, not presented herein, and in our report dated February 5, 2010, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2009, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction

The following discussion and analysis should be read in conjunction with Gallagher's Consolidated Financial Statements and the related Notes thereto that are included elsewhere in this quarterly report.

Gallagher is engaged in providing insurance brokerage and third-party property/casualty (P/C) claims settlement and administration services to entities in the U.S. and abroad. Gallagher believes that one of its major strengths is its ability to deliver comprehensively structured insurance and risk management services to its clients. Gallagher's brokers, agents and administrators act as intermediaries between insurers and their customers and Gallagher does not assume underwriting risks. Gallagher is headquartered in Itasca, Illinois, has operations in fifteen countries and does business in more than 100 countries globally through a network of correspondent brokers and consultants. Gallagher generates approximately 88% of its revenues domestically, with the remaining 12% derived primarily in Australia, Bermuda, Canada, New Zealand and the U.K. Gallagher operates three business segments: Brokerage, Risk Management and Corporate, which contributed 69%, 24% and 7%, respectively, to revenues during the six-month period ended June 30, 2010. The two major sources of operating revenues for Gallagher are commissions and fees from Brokerage operations and fees from Risk Management operations. Investment income is generated from Gallagher's investment portfolio, which includes invested cash and fiduciary funds, as well as alternative energy (clean-energy/tax-advantaged) investments and venture capital funds.

Insurance Market Overview

Fluctuations in premiums charged by P/C insurance carriers (Carriers) have a direct and potentially material impact on the insurance brokerage industry. Commission revenues are generally based on a percentage of the premiums paid by insureds and normally follow premium levels. Insurance premiums are cyclical in nature and may vary widely based on market conditions. Various factors, including competition for market share among insurance carriers, increased underwriting capacity and improved economies of scale following consolidations, can result in flat or reduced P/C premium rates (a soft market). A soft market tends to put downward pressure on commission revenues. Various countervailing factors, such as greater than anticipated loss experience and capital shortages, can result in increasing P/C premium rates (a hard market). A hard market tends to favorably impact commission revenues. Hard and soft markets may be broad-based or more narrowly focused across individual product lines or geographic areas.

As markets harden, there historically has been resistance among certain insureds, who are the buyers of insurance (Gallagher's brokerage clients), to pay increased premiums and the higher commissions generated by these premiums. Such resistance causes some buyers to raise their deductibles and/or reduce the overall amount of insurance coverage they purchase. As the market softens, or costs decrease, these trends have historically reversed. During a hard market, buyers may switch to negotiated fee in lieu of commission arrangements to compensate Gallagher for placing their risks, or may consider the alternative insurance market, which includes self-insurance, captives, rent-a-captives, risk retention groups and capital market solutions to transfer risk. According to industry estimates, these mechanisms now account for approximately 50% of the total U.S. commercial P/C market. Gallagher's brokerage units are very active in these markets as well. While increased use by insureds of these alternative markets historically has reduced commission revenue to Gallagher, such trends generally have been accompanied by new sales and renewal increases in the areas of risk management, claims management, captive insurance and self-insurance services and related growth in fee revenue.

Inflation tends to increase the levels of insured values and risk exposures, thereby resulting in higher overall premiums and higher commissions. However, the impact of hard and soft market fluctuations historically has had a greater impact on changes in premium rates, and therefore on Gallagher's revenues, than inflationary pressures.

Table of Contents

Beginning in 2004 and continuing into 2010, the P/C insurance market has been operating in a soft market in most lines and in most geographic areas. For example, surveys by the Council of Insurance Agents & Brokers (CIAB) indicated that commercial P/C rates fell again during second quarter 2010. The average premium decline for all commercial accounts, regardless of size, was 6.4% for second quarter 2010, which was slightly higher than rate declines in first quarter 2010. Strong competition for new business by Carriers looking to increase market share in a still weak economy continued the downward pressure on rates. In addition, insureds also added to the downward pressure on rates in the quarter as they negotiated to get the best terms and rates from the Carriers. The CIAB does not expect to see pricing turn upward until demand picks up and capacity in the marketplace diminishes. The CIAB represents the leading domestic and international insurance brokers, who write approximately 80% of the commercial P/C premiums in the U.S.

Historically, Gallagher has utilized acquisitions to grow its Brokerage Segment's commission and fee revenues. Acquisitions allow Gallagher to expand into desirable geographic locations and further extend its presence in the retail and wholesale insurance brokerage services industries. Gallagher expects that its Brokerage Segment's commission and fee revenues will continue to grow from acquisitions. Gallagher intends to continue to consider from time to time, additional acquisitions on terms that it deems advantageous. At any particular time Gallagher generally will be engaged in discussions with multiple acquisition candidates. However, no assurances can be given that any additional acquisitions will be consummated, or, if consummated, that they will be advantageous to Gallagher.

Recent Events

The disruption in the global credit markets, the repricing of credit risk and the deterioration of the financial and real estate markets in 2008 and 2009, particularly in the U.S. and Europe, have created increasingly difficult conditions for financial institutions, including participants in the insurance industry. Continued volatility and further deterioration in the credit markets and a recessionary environment may reduce Gallagher's customers' demand for its brokerage and risk management services and could negatively affect Gallagher's results of operations and financial condition. Additionally, the potential for a significant insurer to fail or withdraw from writing certain insurance coverages that Gallagher offers its clients, could negatively affect overall capacity in the industry, which could reduce Gallagher's placement of certain lines and types of insurance and, as a result, reduce its revenues and profitability. The failure of an insurer with whom Gallagher places business could result in errors and omissions claims by Gallagher's clients, which could also adversely affect Gallagher's results of operations and financial condition. In addition, the deterioration in the economy beginning in the fall of 2008 has adversely impacted Gallagher in 2010, and could continue to do so for the remainder of 2010 and future years as a result of reductions in the overall amount of insurance coverage that its clients purchase due to reductions in their headcount, payroll, properties, market values of assets, etc. Such reductions could also adversely impact Gallagher's commission revenues for 2010 and future years when exposure audits by the Carriers are performed and if subsequent downward premium adjustments are determined. The income effects of subsequent premium adjustments are recorded when the adjustments become known and, as a result, any improvement in Gallagher's results of operations and financial condition may lag an improvement in the economy. In addition, some of Gallagher's clients may cease operations completely in the event of a prolonged deterioration in the economy.

During March 2010, the Patient Protection and Affordable Care Act and the Health Care and Education Affordability Reconciliation Act (together, the 2010 Health Care Reform Legislation) were signed into law. The 2010 Health Care Reform Legislation, among other things, increases the level of regulatory complexity for companies that offer health and welfare benefits to their employees. Many clients of Gallagher's Brokerage Segment purchase health and welfare products for their employees and, therefore, are impacted by the 2010 Health Care Reform Legislation. As a result, the potential exists for Gallagher's employee benefits consultants to win new clients and generate additional revenue from existing clients by assisting them in navigating the increasingly complex regulations surrounding benefits plans. In 2009, approximately one quarter of the Brokerage Segment's revenues were generated by its employee benefits consulting operation. Although Gallagher believes that the 2010 Health Care Legislation could be beneficial for the Brokerage Segment's employee benefits consulting fee revenues, given the legislation's broad scope and the uncertainties that exist regarding the interpretation and implementation of many of its complex provisions, at this time the potential impact, beneficial or otherwise, on Gallagher of the 2010 Health Care Legislation is uncertain.

Table of Contents

Critical Accounting Policies

Gallagher's Consolidated Financial Statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP), which require management to make estimates and assumptions that affect the amounts reported in the Consolidated Financial Statements and accompanying Notes. Gallagher believes the following significant accounting policies may involve a higher degree of judgment and complexity. See Note 1 to the Consolidated Financial Statements included in Gallagher's Annual Report on Form 10-K for the year ended December 31, 2009 for other significant accounting policies.

Revenue Recognition

Commission revenues are recognized at the latter of the billing or the effective date of the related insurance policies, net of an allowance for estimated policy cancellations. Commission revenues related to installment premiums are recognized as the installments are billed. Supplemental commissions, contingent commissions and commissions on premiums directly billed by insurance carriers are recognized as revenue when the data necessary to reasonably determine such amounts has been obtained by Gallagher. Typically, these types of commission revenues cannot be reasonably determined until the cash or the related policy detail or other carrier specific information is received by Gallagher from the insurance carrier. A supplemental commission is a commission paid by an insurance carrier that is above the base commissions paid, is determined by the insurance carrier and is established annually in advance of the contractual period based on historical performance criteria. A contingent commission is a commission paid by an insurance carrier that is based on the overall profit and/or volume of the business placed with that insurance carrier during a particular calendar year and is determined after the contractual period. Commissions on premiums billed directly by insurance carriers to the insureds generally relate to a large number of P/C transactions, each with small premiums, and comprise a substantial portion of the revenues generated by Gallagher's employee benefit operations. Under these direct bill arrangements, the billing and policy issuance process is controlled entirely by the insurance carrier. The income effects of subsequent premium adjustments are recorded when the adjustments become known.

Fee revenues generated from the Brokerage Segment primarily relate to fees negotiated in lieu of commissions, which are recognized in the same manner as commission revenues. Fee revenues generated from the Risk Management Segment relate to third party claims administration, loss control and other risk management consulting services, which are provided over a period of time, typically one year. These fee revenues are recognized ratably as the services are rendered. The income effects of subsequent fee adjustments are recorded when the adjustments become known.

Premiums and fees receivable in the Consolidated Balance Sheet are net of allowances for estimated policy cancellations and doubtful accounts. The allowance for estimated policy cancellations is established through a charge to revenues, while the allowance for doubtful accounts is established through a charge to other operating expenses. Both of these allowances are based on estimates and assumptions using historical data to project future experience. Gallagher periodically reviews the adequacy of these allowances and makes adjustments as necessary. The use of different estimates or assumptions could produce different results.

Income Taxes

Gallagher's tax rate reflects its earnings, statutory tax rates and tax planning in the various jurisdictions in which it operates. Significant judgment is required in determining the annual effective tax rate and in evaluating uncertain tax positions. Gallagher reports a liability for unrecognized tax benefits resulting from uncertain tax positions taken or expected to be taken in a tax return as required by GAAP. Gallagher evaluates its tax positions using a two-step process. The first step involves recognition. Gallagher determines whether it is more likely than not that a tax position will be sustained upon tax examination based solely on the technical merits of the position. The technical merits of a tax position are derived from both statutory and judicial authority (legislation and statutes, legislative intent, regulations, rulings and case law) and their applicability to the facts and circumstances of the tax position. If a tax position does not meet the more likely than not recognition threshold, the benefit of that position is not recognized in the financial statements. The second step is measurement. A tax position that meets the more likely than not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured as the largest amount of benefit that is greater than 50% likely of being realized upon ultimate resolution with a taxing authority.

Uncertain tax positions are measured based upon the facts and circumstances that exist at each reporting period and involve significant management judgment. Subsequent changes in judgment based upon new information may lead to changes in recognition, derecognition and measurement. Adjustments may result, for example, upon

Table of Contents

resolution of an issue with the taxing authorities, or expiration of a statute of limitations barring an assessment for an issue. Gallagher recognizes interest and penalties, if any, related to unrecognized tax benefits in income tax expense. See Note 16 to the Consolidated Financial Statements for a discussion regarding the possibility that Gallagher's gross unrecognized tax benefits balance may decrease within the next twelve months.

Tax law requires items be included in Gallagher's tax returns at different times than the items are reflected in the financial statements. As a result, the annual income tax expense reflected in the Consolidated Statement of Earnings is different than that reported in the tax returns. Some of these differences are permanent, such as expenses that are not deductible in the returns, and some differences are temporary and reverse over time, such as depreciation expense and amortization expense deductible for income tax purposes. Temporary differences create deferred tax assets and liabilities. Deferred tax liabilities generally represent tax expense recognized in the financial statements for which a tax payment has been deferred, or expense which has been deducted in the tax return but has not yet been recognized in the financial statements. Deferred tax assets generally represent items that can be used as a tax deduction or credit in tax returns in future years for which a benefit has already been recorded in the financial statements.

Valuation allowances are established or adjusted for deferred tax assets when it is estimated that it is more likely than not that future taxable income will be insufficient to fully use a deduction or credit in that jurisdiction. In assessing the need for the recognition of a valuation allowance for deferred tax assets, Gallagher considers whether it is more likely than not that some portion, or all of the deferred tax assets, will not be realized and adjusts the valuation allowance accordingly. Gallagher evaluates all significant available positive and negative evidence as part of its analysis. Negative evidence includes the existence of losses in recent years. Positive evidence includes the forecast of future taxable income by jurisdiction, tax-planning strategies that would result in realization of deferred tax assets and the presence of taxable income in prior carryback years. The underlying assumptions Gallagher uses in forecasting future taxable income require significant judgment and take into account Gallagher's recent performance. The ultimate realization of deferred tax assets is dependent on the generation of future taxable income during the periods in which temporary differences are deductible or creditable.

Intangible Assets

Intangible assets represent the excess of cost over the fair value of net tangible assets of acquired businesses. Gallagher classifies its intangible assets as either goodwill, expiration lists or non-compete agreements. Expiration lists and non-compete agreements are amortized using the straight-line method over their estimated useful lives (three to fifteen years for expiration lists and three to five years for non-compete agreements), while goodwill is not subject to amortization. Allocation of intangible assets between goodwill, expiration lists and non-compete agreements and the determination of estimated useful lives are based on valuations Gallagher receives from qualified independent appraisers. The calculations of these amounts are based on estimates and assumptions using historical and pro forma data and recognized valuation methods. The use of different estimates or assumptions could produce different results. Intangible assets are carried at cost, less accumulated amortization in the Consolidated Balance Sheet.

Gallagher reviews all of its intangible assets for impairment periodically (at least annually) and whenever events or changes in business circumstances indicate that the carrying value of the assets may not be recoverable. Such impairment reviews are performed at the division level (i.e., reporting unit) with respect to goodwill and at the business unit level for amortizable intangible assets. In reviewing intangible assets, if the fair value were less than the carrying amount of the respective (or underlying) asset, an indicator of impairment would exist and further analysis would be required to determine whether or not a loss would need to be charged against current period earnings. Based on the results of impairment reviews during the three-month and six-month periods ended June 30, 2010, Gallagher wrote-off \$2.3 million of amortizable intangible assets related to the Brokerage Segment. No such indicators were noted in the six-month period ended June 30, 2009. The determinations of impairment indicators and fair value are based on estimates and assumptions related to the amount and timing of future cash flows and future interest rates. The use of different estimates or assumptions could produce different results.

Effective January 1, 2009, Gallagher estimates and recognizes the fair value of liabilities related to potential earnout obligations as of the acquisition dates for all of its 2010 and 2009 acquisitions whose purchase agreements contain such provisions. Subsequent changes in these estimated earnout obligations, including the accretion of discount, will be recorded in the Consolidated Statement of Earnings when incurred.

Potential

Table of Contents

earnout obligations are typically based upon future earnings of the acquired entities. During the three-month periods ended June 30, 2010 and 2009, Gallagher recognized \$1.5 million and \$1.4 million, respectively, of expense in its Consolidated Statement of Earnings related to the accretion of the discount recorded for earnout obligations related to its 2009 and 2010 acquisitions. During the six-month periods ended June 30, 2010 and 2009, Gallagher recognized \$2.9 million and \$1.4 million, respectively, of expense in its Consolidated Statement of Earnings related to the accretion of the discount recorded for earnout obligations related to its 2009 and 2010 acquisitions. In addition, during the three-month and six-month periods ended June 30, 2010, Gallagher recognized \$2.5 million and \$2.0 million, respectively, of income related to net adjustments in the estimated fair market values of earnout obligations related to four 2009 acquisitions. For acquisitions made prior to January 1, 2009, such obligations were not included in the purchase price recorded for each applicable acquisition at its acquisition date because such obligations are not fixed and determinable. Future payments made under these 2008 and prior arrangements, if any, will be generally recorded as additional goodwill when the earnouts are settled and will have no impact on the amounts reported in Gallagher's Consolidated Statement of Earnings. See Note 4 to the Consolidated Financial Statements for additional discussion on the 2010 business combinations.

Fair Value of Investments

For investments that do not have quoted market prices, Gallagher utilizes various valuation techniques to estimate fair value and proactively looks for indicators of impairment. Factors that may indicate that an impairment could exist include, among others, defaults on interest and/or principal payments, reductions or changes to dividend payments, sustained operating losses or a trend of poor operating performance, recent refinancings or recapitalizations, unfavorable press reports, untimely filing of financial information, significant customer or revenue loss, litigation, tax audits, losses by other companies in a similar industry, overall economic conditions, management and expert advisor changes and significant changes in strategy. In addition, in cases where the ultimate value of an investment is directly dependent on Gallagher for future financial support, Gallagher assesses its willingness and intent to provide future funding.

If an indicator of impairment exists, Gallagher compares the investment's carrying value to an estimate of its fair value. To estimate the fair value of its equity interests, Gallagher compares values established in recent recapitalizations or appraisals for the subject entities conducted by third parties. In some cases, no such recapitalizations or appraisals exist and Gallagher must perform its own valuations. This also requires Gallagher to exercise significant judgment. Even if impairment indicators exist, no write-down may be required if the estimated fair value is not less than the current carrying value, or the decline in value is determined to be temporary and Gallagher has no intent to sell the investment, and it is more likely than not that Gallagher will not be required to sell the investment prior to a recovery in value. When Gallagher determines that the decline in fair value is other-than-temporary, and therefore that a write-down is required, it is recorded as a realized loss against current period earnings.

Both the process to review for indicators of impairment and, if such indicators exist, the method to compute the amount of impairment incorporate quantitative data and qualitative criteria, including the receipt of new information, that can significantly change the decision about the valuation of an investment in a short period of time. The determination of whether a decline in fair value is other-than-temporary is necessarily a matter of subjective judgment. The timing and amount of realized losses reported in earnings could vary if management's conclusions were different.

Due to the inherent risk of investments, Gallagher cannot give assurance that there will not be impairments in the future should economic and other conditions change.

Business Combinations and Dispositions

See Note 4 to the Consolidated Financial Statements for a discussion of Gallagher's business combinations during the six-month period ended June 30, 2010. Gallagher had no material dispositions during the six-month period ended June 30, 2010.

Results of Operations

In the discussion that follows regarding Gallagher's results of operations, Gallagher provides organic growth percentages with respect to its commission, fee and supplemental commission revenues. This information may be considered a non-GAAP financial measure because it is derived from Gallagher's consolidated financial

Table of Contents

information but is not required to be presented in financial statements that are prepared in conformity with GAAP. Rules and regulations of the Securities and Exchange Commission (SEC) require supplemental explanations and reconciliations of all non-GAAP financial measures. When Gallagher refers to organic growth percentages with respect to its commission, fee and supplemental commission revenues in its discussion of results of operations, Gallagher excludes the first twelve months of commission, fee and supplemental commission revenues generated from the acquisitions accounted for as purchases and the commission, fee and supplemental commission revenues related to operations disposed of in each year presented. These commission, fee and supplemental commission revenues are excluded from organic revenues in order to determine the revenue growth that is associated with the operations that were part of Gallagher in both the current and prior year. In addition, organic growth excludes contingent commission revenues and foreign currency translation. These revenue items are excluded from organic revenues in order to determine a comparable measurement of revenue growth that is associated with the revenue sources that will be continuing in 2010 and beyond. Management has historically utilized organic revenue growth as an important indicator when assessing and evaluating the performance of its Brokerage and Risk Management Segments. Management also believes that the use of this measure allows financial statement users to measure, analyze and compare the growth from its Brokerage and Risk Management Segments in a meaningful and consistent manner. A reconciliation of organic revenue growth percentages to the reported revenue growth percentages for the Brokerage and Risk Management Segments is presented in the paragraphs immediately following each table in which such percentages are presented.

Allocations of investment income and certain expenses are based on reasonable assumptions and estimates primarily using revenue, headcount and other information. Gallagher allocates the provision for income taxes to the Brokerage and Risk Management Segments as if those segments were preparing income tax provisions on a separate company basis. Gallagher anticipates reporting an effective tax rate of approximately 39.0% to 41.0% in both its Brokerage Segment and its Risk Management Segment for the foreseeable future. Reported operating results by segment would change if different allocation methods were applied.

In the discussion that follows regarding Gallagher's results of operations, Gallagher also provides the following ratios with respect to its operating results: pretax profit margin, compensation expense ratio and operating expense ratio. Pretax profit margin represents pretax earnings from continuing operations divided by total revenues. The compensation expense ratio is derived by dividing compensation expense by total revenues. The operating expense ratio is derived by dividing operating expense by total revenues.

Brokerage

The Brokerage Segment accounted for 69% of Gallagher's revenue during the six-month period ended June 30, 2010. Gallagher's Brokerage Segment is primarily comprised of Retail and Wholesale Brokerage operations. Gallagher's Retail Brokerage operations negotiate and place P/C, employer-provided health and welfare insurance and retirement solutions, principally for middle-market commercial, industrial, public entity, religious and not-for-profit entities. Many of Gallagher's Retail Brokerage customers choose to place their insurance with insurance underwriters, while others choose to use alternative vehicles such as self-insurance pools, risk retention groups or captive insurance companies. Gallagher's Wholesale Brokerage operations assist Gallagher brokers and other unaffiliated brokers and agents in the placement of specialized, unique and hard to place insurance programs.

The primary source of Gallagher's compensation for its Retail Brokerage services is commissions paid by insurance carriers, which are usually based upon a percentage of the premium paid by insureds, and brokerage and advisory fees paid directly by its clients. For Wholesale Brokerage services, Gallagher generally receives a share of the commission paid to the retail broker from the insurer. Commission rates are dependent on a number of factors, including the type of insurance, the particular insurance company underwriting the policy and whether Gallagher acts as a retail or wholesale broker. Advisory fees are dependent on the extent and value of services provided. In addition, under certain circumstances, both Retail Brokerage and Wholesale Brokerage Services receive supplemental and contingent commissions. A supplemental commission is a commission paid by an insurance carrier that is above the base commissions paid, is determined by the insurance carrier and is established annually in advance of the contractual period based on historical performance criteria. A contingent commission is a commission paid by an insurance carrier that is based on the overall profit and/or volume of the business placed with that insurance carrier during a particular calendar year and is determined after the contractual period.

Table of Contents

Financial information relating to Gallagher's Brokerage Segment is as follows (in millions, except percentages and workforce data):

	Three-month period			Six-month period ended		
	ended		Percent	ended		Percent
	2010	June 30, 2009		2010	June 30, 2009	
Commissions	\$ 257.0	\$ 249.7	3%	\$ 461.2	\$ 447.7	3%
Fees	68.5	73.9	(7%)	123.4	128.7	(4%)
Supplemental and contingent commissions	19.3	11.8	64%	62.7	41.3	52%
Investment income	1.6	1.4	14%	2.6	2.5	4%
Gains on books of business sales	0.6	3.3	(82%)	1.5	9.4	(84%)
Total revenues	347.0	340.1	2%	651.4	629.6	3%
Compensation	206.7	199.5	4%	398.2	381.8	4%
Operating	57.0	51.1	12%	110.3	102.2	8%
Depreciation	4.9	4.7	4%	9.5	9.4	1%
Amortization	16.5	13.9	19%	30.2	26.1	16%
Change in estimated acquisition earnout payables	(0.9)	1.4	NMF	1.0	1.4	(29%)
Total expenses	284.2	270.6	5%	549.2	520.9	5%
Earnings from continuing operations before income taxes	62.8	69.5	(10%)	102.2	108.7	(6%)
Provision for income taxes	25.4	28.0	(9%)	41.3	43.1	(4%)
Earnings from continuing operations	\$ 37.4	\$ 41.5	(10%)	\$ 60.9	\$ 65.6	(7%)

Pretax profit margin	18%	20%		16%	23%	
Effective tax rate	40%	40%		40%	40%	
Workforce at end of period (includes acquisitions)				6,186	6,076	
Identifiable assets at June 30				\$ 2,627.7	\$ 2,734.0	

The aggregate increase in commissions and fees for the three-month period ended June 30, 2010 compared to the same period in 2009 was primarily due to revenues associated with acquisitions that were made in the twelve-month period ended June 30, 2010 (\$12.0 million), partially offset by a decline in organic revenue from existing operations. This decline is primarily due to decreases in both insurance rates and exposure units. New business production of commission and fees was \$28.7 million in the three-month period ended June 30, 2010, which was offset by renewal rate decreases and lost business of \$44.4 million. Commissions increased 3% and fees decreased 7% in the three-month period ended June 30, 2010 compared to the same period in 2009. Organic commission, fee and supplemental commission revenues for the three-month period ended June 30, 2010 declined 3.3% compared to the same period in 2009.

The aggregate increase in commissions and fees for the six-month period ended June 30, 2010 compared to the same period in 2009 was primarily due to revenues associated with acquisitions that were made in the twelve-month period ended June 30, 2010 (\$29.3 million), partially offset by a decline in organic revenue from existing operations. This decline is primarily due to decreases in both insurance rates and exposure units. New business production of commission and fees was \$73.1 million in the six-month period ended June 30, 2010, which was offset by renewal rate decreases and lost business of \$99.8 million. Commissions increased 3% and fees decreased 4% in the six-month period ended June 30, 2010 compared to the same period in 2009. Organic commission, fee and supplemental commission revenues for the six-month period ended June 30, 2010 declined 3.4% compared to the same period in 2009.

Table of Contents

Items excluded from organic revenue change computations yet impacting revenue comparisons for the three-month periods ended June 30, 2010 and 2009 include the following (in millions):

	2010 Organic Revenue		2009 Organic Revenue	
	2010	2009	2009	2008
Commissions and Fees				
Commission revenues as reported	\$ 257.0	\$ 249.7	\$ 249.7	\$ 232.6
Fee revenues as reported	68.5	73.9	73.9	63.5
Less commission and fee revenues from acquisitions	(12.0)		(41.4)	
Less commission and fee revenues from divestitures				(3.3)
Levelized foreign currency translation		0.4		(5.0)
Organic commission and fee revenues	\$ 313.5	\$ 324.0	\$ 282.2	\$ 287.8
Organic change in commission and fee revenues		-3.2%		-2.0%

Reported supplemental and contingent commission revenues recognized in 2010, 2009 and 2008 by quarter are shown in the table below. As previously disclosed, many insurance carriers are now providing sufficient information for Gallagher to recognize supplemental commission revenues on a quarterly basis for a majority of the 2010 supplemental commission arrangements. However, in 2009 and prior years, most carriers were only providing this information on an annual basis after the end of the contract period. Accordingly, the 2010 amounts reported in the table below include both a full year of 2009 supplemental commission revenues and 2010 supplemental commission revenues that were recognized by Gallagher on a quarterly basis. This situation should not occur again in 2011 and later years, as Gallagher anticipates that most of the carriers will continue to provide information on a quarterly basis sufficient to allow it to recognize revenues in a similar manner in future quarters. Gallagher expects to recognize a total of approximately \$9.0 million to \$11.0 million of supplemental commission revenues per quarter for the remaining two quarters of 2010 and each quarter of 2011, assuming that the current market conditions continue in those future quarters.

To assist in comparing 2010 to 2009, the supplemental commission timing line in the organic revenue tables above adjusts the 2009 revenue as if Gallagher had been receiving the information from the carriers and recognizing the quarterly supplemental commissions in 2009 on the same basis as it is in 2010. In order to estimate the quarterly information for 2009 and 2008 as if it would have been reported by the carriers, Gallagher allocated the annual amounts received from the carriers after the contract period to each quarter in the annual period on a straight-line pro rata

basis. The adjusted supplemental commission amounts for 2009 and 2008 would change if different allocation methods were used.

Table of Contents

An analysis of supplemental and contingent commission revenues recognized in 2010, 2009 and 2008 by quarter is as follows:

	Q1	Q2	Q3	Q4	Full Year
2010					
Reported supplemental commissions	\$ 27.9	\$ 10.6			\$ 38.5
Adjustments as if supplemental commission information was provided on a quarterly basis	(14.7)				(14.7)
Adjusted supplemental commissions	13.2	10.6			23.8
Reported contingent commissions	15.5	8.7			24.2
Adjusted supplemental and reported contingent commissions	\$ 28.7	\$ 19.3			\$ 48.0
2009					
Reported supplemental commissions	\$ 15.7	\$ 5.8	\$ 4.5	\$ 11.4	\$ 37.4
Adjustments as if supplemental commission information was provided on a quarterly basis	(8.2)	4.4	5.3	(0.1)	1.4
Adjusted supplemental commissions	7.5	10.2	9.8	11.3	38.8
Reported contingent commissions	13.8	6.0	5.8	2.0	27.6
Adjusted supplemental and reported contingent commissions	\$ 21.3	\$ 16.2	\$ 15.6	\$ 13.3	\$ 66.4
2008					
Reported supplemental commissions	\$ 6.4	\$ 3.3	\$ 5.1	\$ 5.6	\$ 20.4
Adjustments as if supplemental commission information was provided on a quarterly basis	(1.6)	3.0	2.4	2.3	6.1
Adjusted supplemental commissions	4.8	6.3	7.5	7.9	26.5
Reported contingent commissions	11.5	5.0	7.2	1.6	25.3
Adjusted supplemental and reported contingent commissions	\$ 16.3	\$ 11.3	\$ 14.7	\$ 9.5	\$ 51.8

Investment income primarily represents interest income earned on cash and restricted funds. The investment income in the three-month and six-month periods ended June 30, 2010 remained relatively unchanged compared to the same periods in 2009.

The decrease in one-time gains related to sales of books of business for both the three-month and six-month periods ended June 30, 2010 compared to the same periods in 2009 was due to the unusually high level of disposition activity that occurred in 2009.

The increase in compensation expense for the three-month period ended June 30, 2010 compared to the same period in 2009 was primarily due to salary increases, one-time compensation payments and increases in incentive compensation linked to Gallagher's overall operating results (\$4.1 million in the aggregate), severance related costs (\$2.8 million) and an increase in stock compensation expense (\$0.4 million), partially offset by a decrease in temporary-help expense (\$0.1 million).

Table of Contents

The increase in compensation expense for the six-month period ended June 30, 2010 compared to the same period in 2009 was primarily due to salary increases, one-time compensation payments and increases in incentive compensation linked to Gallagher's overall operating results (\$10.6 million in the aggregate), severance related costs (\$3.2 million) and increases in employee benefits expense (\$2.6 million) and stock compensation expense (\$0.3 million), partially offset by an decrease in temporary-help expense (\$0.3 million). The increase in employee headcount in 2010 relates to employees associated with the acquisitions completed in the twelve-month period ended June 30, 2010 and new production hires.

As previously disclosed, in fourth quarter 2009, Gallagher reduced its Brokerage Segment's existing middle and back office workforce by approximately 230 positions, or approximately 4% of its global workforce, through a combination of job elimination and attrition. Future annual pretax cost savings associated with these actions are estimated to be approximately \$22.0 million. Anticipated to offset these future savings, will be increased employee medical costs, salary increases and increased incentive compensation costs totaling \$10.0 million to \$11.0 million, related to the remaining workforce.

The increase in operating expenses for the three-month period ended June 30, 2010 compared to the same period in 2009 was primarily due to a \$3.5 million litigation settlement expense, unfavorable foreign currency translation (\$2.2 million) and lease termination charges (\$0.5 million), and increases in professional fees (\$1.9 million), travel and entertainment expense (\$1.0 million), office expense (\$0.7 million), bad debt expense (\$0.4 million) sales development, (\$0.4 million) and net rent and utilities (\$0.2 million) slightly offset by decreases in business insurance (\$2.9 million) and other expense (\$2.2 million). Also contributing to the increase in operating expenses in the three-month period ended June 30, 2010 were increased expenses associated with the acquisitions completed in the twelve-month period ended June 30, 2010.

The increase in operating expenses for the six-month period ended June 30, 2010 compared to the same period in 2009 was primarily due to a \$3.5 million litigation settlement expense, unfavorable foreign exchange translation (\$1.6 million) and lease termination charges (\$0.6 million), and increases in travel and entertainment expense (\$1.9 million), professional fees (\$1.3 million), taxes, licenses and fees (\$1.1 million), bad debt expense (\$0.8 million), net rent and utilities (\$0.8 million) and office expense (\$0.7 million) slightly offset by decreases in business insurance (\$2.9 million) and other expense (\$2.1 million). Also contributing to the increase in operating expenses in the six-month period ended June 30, 2010 were increased expenses associated with the acquisitions completed in the twelve-month period ended June 30, 2010.

Depreciation expense remained relatively unchanged in both the three-month and six-month periods ended June 30, 2010 compared to the same periods in 2009.

The increase in amortization expense in both the three-month and six-month periods ended June 30, 2010 compared to the same periods in 2009 was due primarily to impairment charges and amortization expense of intangible assets associated with acquisitions completed in the last twelve months. Based on the results of impairment reviews during the three-month and six-month periods ended June 30, 2010, Gallagher wrote off \$2.3 million of amortizable intangible assets related to the Brokerage Segment. No indicators of impairment were noted in the six-month period ended June 30, 2009. Expiration lists and non-compete agreements are amortized using the straight-line method over their estimated useful lives (three to fifteen years for expiration lists and three to five years for non-compete agreements).

The change in estimated acquisition earnout payables as reported in both the three-month and six-month periods ended June 30, 2010 compared to the same periods in 2009 was due to the adoption of revised accounting guidance for business combinations, which was effective January 1, 2009 for acquisitions completed in 2009 and 2010. During the three-month period ended June 30, 2010 and 2009, Gallagher recognized \$1.5 million and \$1.4 million, respectively, of expense in its Consolidated Statement of Earnings related to the accretion of the discount recorded for earnout obligations related to its 2009 and 2010 acquisitions. During the six-month periods ended June 30, 2010 and 2009, Gallagher recognized \$2.9 million and \$1.4 million, respectively, of expense in its Consolidated Statement of Earnings related to the accretion of the discount recorded for earnout obligations related to its 2009 and 2010 acquisitions. In addition, during the three-month and six-month periods ended June 30, 2010, Gallagher recognized \$2.5 million and 2.0 million, respectively, of income related to net adjustments in the estimated fair market values of earnout obligations related to four 2009 acquisitions.

Table of Contents

The Brokerage Segment's effective tax rates for the three-month periods ended June 30, 2010 and 2009 were 40.4% and 40.3%, respectively. The Brokerage Segment's effective tax rates for the six-month periods ended June 30, 2010 and 2009 were 40.4% and 39.7%, respectively. The increase in the effective tax rate for the six-month period ended June 30, 2010 compared to the same period in 2009 is primarily due to the resolution and/or the expiration of various statutes of limitations related to certain income tax matters in 2009. Gallagher anticipates reporting an effective tax rate of approximately 39.0% to 41.0% in its Brokerage Segment for the foreseeable future.

Risk Management

The Risk Management Segment accounted for 24% of Gallagher's revenue from continuing operations during the six-month period ended June 30, 2010. The Risk Management Segment provides contract claim settlement and administration services for enterprises that choose to self-insure some or all of their P/C coverages and for insurance companies that choose to outsource some or all of their P/C claims departments. In addition, Gallagher generates revenues from integrated disability management programs, information services, risk control consulting (loss control) services and appraisal services, either individually or in combination with arising claims. This Segment's revenues for risk management services are substantially in the form of fees that are generally negotiated in advance on a per-claim or per-service basis, depending upon the type and estimated volume of the services to be performed.

Financial information relating to Gallagher's Risk Management Segment is as follows (in millions, except percentages and workforce data):

	Three-month period			Six-month period		
	ended		Percent Change	ended		Percent Change
	2010	June 30, 2009		2010	June 30, 2009

Identifiable assets at June 30				\$ 395.3	\$ 393.5	

The decrease in fees for the three-month period ended June 30, 2010 compared to the same period in 2009 was due primarily to lost business and the impact of decreased claim counts (total of \$7.5 million), which were partially offset by new business of \$5.4 million. The decrease in fees for the six-month period ended June 30, 2010 compared to the same period in 2009 was due primarily to lost business and the impact of decreased claim counts (total of \$19.4 million), which were partially offset by new business of \$15.6 million. While historically the Risk Management Segment has made few acquisitions, and these acquisitions have not been material to this Segment's operations, from time to time Gallagher opportunistically considers acquisitions for this Segment.

Investment income primarily represents interest income earned on Gallagher's cash and cash equivalents. The investment income in both the three-month and six-month periods ended June 30, 2010 and 2009 remained relatively unchanged.

The decrease in compensation expense for the three-month period ended June 30, 2010 compared to the same period in 2009 was primarily due to decreased headcount and salaries (\$2.8 million) and employee benefits expense (\$1.4 million), partially offset by unfavorable foreign currency translation (\$0.8 million) and an increase in temporary help expense (\$0.2 million). The decrease in compensation expense for the six-month period ended June 30, 2010 compared to the same period in 2009 was primarily due to decreased headcount and salaries (\$5.7 million) and employee benefits expense (\$1.2 million), partially offset by unfavorable foreign currency translation (\$2.9 million) and an increase in temporary help expense (\$0.4 million).

As previously disclosed, in fourth quarter 2009, Gallagher reduced its Risk Management Segment's existing middle and back office workforce by approximately 170 positions, or approximately 4% of its global workforce, through a combination of job elimination and attrition. Future annual pretax cost savings associated with these actions are estimated to be approximately \$12.0 million. Anticipated to offset these future savings, will be increased employee medical costs, salary increases and increased incentive compensation costs totaling \$2.0 million to \$3.0 million, related to the remaining workforce.

Table of Contents

The increase in operating expenses for the three-month period ended June 30, 2010 compared to the same period in 2009 was primarily due to increases in business insurance (\$0.4 million), net rent and utilities (\$0.2 million), sales development expense (\$0.2 million) and bad debt expense (\$0.2 million) slightly offset by a decrease in professional fees (\$0.1 million). The decrease in operating expenses for the six-month period ended June 30, 2010 compared to the same period in 2009 was primarily due to decreases in professional fees (\$1.5 million), office expense (\$0.8 million), net rent and utilities (\$0.4 million) and travel and entertainment expense (\$0.1 million) partially offset by increases in business insurance (\$0.8 million), bad debt expense (\$0.5 million) and sales development expense (\$0.2 million).

Depreciation expense remained relatively unchanged in both the three-month and six-month periods ended June 30, 2010 compared to the same periods in 2009 and reflects the impact of disposals and fully depreciated fixed assets, partially offset by the impact of purchases of furniture, equipment and leasehold improvements related to office expansions and moves and expenditures related to upgrading computer systems.

Amortization expense remained relatively unchanged in both the three-month and six-month periods ended June 30, 2010 compared to the same periods in 2009. No acquisitions were made by this Segment during the three-month and six-month periods ended June 30, 2010 and 2009.

The Risk Management Segment's effective tax rates for the three-month periods ended June 30, 2010 and 2009 were 39.6% and 41.0%, respectively. The Risk Management Segment's effective tax rates for the six-month periods ended June 30, 2010 and 2009 were 39.9% and 40.1%, respectively. The effective tax rates were relatively unchanged in both the three-month and six-month periods ended June 30, 2010 compared to the same periods in 2009. Gallagher anticipates reporting an effective tax rate of approximately 39.0% to 41.0% in its Risk Management Segment for the foreseeable future.

Corporate

The Corporate Segment reports the financial information related to Gallagher's clean-energy ventures and other investments, its debt, and certain corporate and acquisition-related activities. The operations of the Corporate Segment are located in Itasca, Illinois. See Note 3 to the Consolidated Financial Statements for a summary of Gallagher's investments as of June 30, 2010 and December 31, 2009 and a detailed discussion on the nature of the investments held. See Note 7 to the Consolidated Financial Statements for a summary of Gallagher's debt as of June 30, 2010 and December 31, 2009.

Financial information relating to Gallagher's Corporate Segment is as follows (in millions):

	Three-month period		Six-month period	
	ended June 30,		ended June 30,	
	2010	2009	2010	2009

Table of Contents

Revenues in the Corporate Segment consist of the following:

Revenues from consolidated clean-coal production facilities - This represents revenues from eight clean-coal production facilities that were initially consolidated due to Gallagher's majority ownership interest. As of March 1, 2010, Gallagher sold portions of its ownership in six of the facilities, and as of that date no longer consolidates the operations at those facilities, which are now accounted for using equity method accounting. These facilities did not operate in the first or second quarters of 2009.

Royalty income from clean-coal licenses - This represents revenues related to Gallagher's ownership interests in Chem-Mod. Effective August 18, 2008, Gallagher has a 42% ownership interest in Chem-Mod and is required to consolidate its operations into Gallagher's Consolidated Financial Statements. The royalty income for the three-month and six-month periods ended June 30, 2010 is higher than the same periods in 2009 due to the increased production volume of Chem-Mod's licensees.

Income from unconsolidated clean-coal production facilities - This includes income related to Gallagher's equity portion of the pretax earnings (losses) of the six clean-coal production facilities discussed above and the production based income from the investors in the six facilities. The facilities did not operate in the first or second quarters of 2009.

Other net revenues (loss) - In 2010, other net revenues consists primarily of a \$4.8 million net pretax gain from the sales in first quarter 2010 of portions of Gallagher's ownership in the six clean-coal production facilities discussed above, offset by a \$1.5 million write-off, under equity method accounting, of an additional 3% investment in C-Quest's global operations. The loss in 2009 primarily consists of a \$1.0 million write-down by Gallagher of its investment in an investment management company.

Cost of revenues from consolidated clean-coal production facilities includes the costs incurred by the eight clean-coal production facilities to generate the revenues discussed above. These facilities did not operate in the first or second quarters of 2009.

Compensation expense for the three-month periods ended June 30, 2010 and 2009, respectively, includes salary and benefit expenses of \$1.5 million and \$1.0 million and incentive compensation of \$0.9 million and zero. Compensation expense for the six-month periods ended 2010 and 2009, respectively, includes salary and benefits expense of \$2.7 million and \$1.9 million and incentive compensation expense of \$2.7 million and zero. The increase in compensation expense for the three-month period ended June 30, 2010 compared to the same period in 2009 is primarily due to additional headcount and increased incentive compensation related to the operations of the facilities that qualify for tax credits under Internal Revenue Code Section 45 (IRC Section 45). The increase in compensation expense for the six-month period ended June 30, 2010 compared to the same period in 2009 is primarily due to additional headcount and increased incentive compensation related to the sales and operations of the IRC Section 45 facilities.

Operating expense in second quarter 2010 includes professional fees of \$0.3 million primarily related to clean-coal activities, expense and minority interest totaling \$0.4 million related to royalty income, other corporate operating expenses of \$0.9 million and external professional fees and other external due diligence costs of \$0.6 million related to 2010 acquisitions. Operating expense in second quarter 2009 includes professional fees of \$0.3 million primarily related to clean-coal activities, expense of \$0.2 million related to royalty income and other corporate operating expenses of \$0.5 million. The increase in operating expense for the three-month period ended June 30, 2010 compared to the same period in 2009 is primarily due to increased bank fees related to corporate debt (\$0.3 million) and increased professional fees and other due diligence costs related to 2010 acquisitions (\$0.6 million).

Operating expense for the six-month period ended June 30, 2010 includes professional fees of \$1.0 million primarily related to clean-coal activities, expense and minority interest totaling \$1.0 million related to royalty income, other corporate operating expenses of \$1.8 million and external professional fees and other external due diligence costs of \$2.1 million related to 2010 acquisitions. Operating expense for the six-month period ended June 30, 2009 includes professional fees of \$0.7 million primarily related to clean-coal activities, expense of \$0.6 million related to royalty income and other corporate operating expenses of \$0.9 million. The increase in operating expense for the six-month period ended June 30, 2010 compared to the same period in 2009 is primarily due to increased bank fees related to corporate debt (\$0.4 million), increased corporate costs (\$0.5 million) and increased professional fees and other due diligence costs related to 2010 acquisitions (\$2.1 million).

Table of Contents

The increase in interest expense for the three-month period ended June 30, 2010 compared to the same period in 2009 is due to interest on the \$150.0 million note purchase agreement entered into on November 30, 2009 (\$2.2 million), partially offset by a substantial reduction in the amount of borrowings outstanding under the previous credit agreement, plus a reduction in the interest rate of those borrowings (\$0.6 million). The increase in interest expense for the six-month period ended June 30, 2010 compared to the same period in 2009 is due to interest on the \$150.0 million note purchase agreement entered into on November 30, 2009 (\$4.4 million), partially offset by a substantial reduction in the amount of borrowings on the previous credit agreement, plus a reduction in the interest rate of those borrowings (\$1.4 million).

Depreciation expense remained relatively unchanged in the three-month and six-month periods ended June 30, 2010 compared to the same periods in 2009.

Gallagher's consolidated effective tax rate for the three-month period ended June 30, 2010 was 34.4% compared to 40.9% for the same period in 2009. Gallagher's consolidated effective tax rate for the six-month period ended June 30, 2010 was 33.4% compared to 38.7% for the same period in 2009. The decrease in the second quarter 2010 tax rate compared to the same period in 2009 was the result of the impact of IRC Section 45 tax credits that are expected to be generated throughout 2010. Gallagher's second quarter 2009 tax rate was lower than the statutory rate due to the resolution and/or the expiration of various statutes of limitations related to certain income tax matters in 2009.

Gallagher anticipates that the clean-coal production facilities could potentially generate net earnings for Gallagher of \$5.0 million to \$7.0 million for the remainder of 2010 while operating under temporary regulatory permits, and after receiving long-term permits and satisfying other operating conditions, potentially up to \$10.0 million quarterly from 2011 through 2019, from a combination of pretax income and tax credits under IRC Section 45.

Chem-Mod is in the early stages of commercializing and marketing its Chem-Mod Solution technologies to its principal customers, coal-fired power plants owned by utility companies, including those utilities that are operating with the clean-coal production facilities Gallagher built.

Gallagher's ability to recoup its clean-coal related investments and generate earnings on them is subject to significant risk and uncertainties relating to, among other things, its utility partners' ability to obtain long-term permits, the facilities' compliance with IRC Section 45, possible future changes in regulations, utilities' use of coal to produce electricity, the operations of the facilities, Gallagher's co-investors and operational partners, and the defense of its intellectual property. Also, while Gallagher believes that refined coal production at the clean-coal production facilities using the Chem-Mod Solution will qualify for tax credits under IRC Section 45, there can be no assurance that the production will continue to meet the requirements of IRC Section 45.

See the risk factors regarding Gallagher's IRC Section 45 facilities under Item 1A, Risk Factors, in Gallagher's Annual Report on Form 10-K for the year ended December 31, 2009 for more information regarding these risks and uncertainties. Also see Note 3 to the Consolidated Financial Statements.

Financial Condition and Liquidity

Liquidity describes the ability of a company to generate sufficient cash flows to meet the cash requirements of its business operations. The insurance brokerage industry is not capital intensive. Historically, Gallagher's capital requirements have primarily included dividend payments on its common stock, repurchases of its common stock, funding of its investments, acquisitions of brokerage and risk management operations and capital expenditures.

Historically, Gallagher has depended on its ability to generate positive cash flow from operations to meet its cash requirements on an annual basis. However, due to seasonality in its operations, in the six-month periods ended June 30, 2010 and 2009, Gallagher relied to a large extent on proceeds from borrowings under its previous credit agreement and the issuance of Gallagher's common stock for the funding of its 2010 acquisitions and earnout obligations. Management believes that cash flow from operations and borrowings under its Credit Agreement will provide Gallagher with adequate resources to meet its liquidity needs in the foreseeable future.

Cash Flows From Operating Activities

Cash provided by operating activities was \$89.6 million and \$77.6 million for the six-month periods ended June 30, 2010 and 2009, respectively. The increase in cash provided by operating activities during the six-month period ended June 30, 2010 compared to the same period in 2009 was primarily due to improved cash collections.

Table of Contents

on receivables. Gallagher's cash flows from operating activities are primarily derived from its earnings from continuing operations, as adjusted for realized gains and losses and its noncash expenses, which include depreciation, amortization, change in estimated acquisition earnout payables, deferred compensation, restricted stock and stock-based compensation expenses.

When assessing its overall liquidity, Gallagher believes that the focus should be on earnings from continuing operations, adjusted for non-cash items, in the Consolidated Statement of Earnings and cash provided by operating activities in the Consolidated Statement of Cash Flows. Gallagher believes that these items are indicators of trends in liquidity. From a balance sheet perspective, the focus should not be on premium and fees receivable, premiums payable or restricted cash for trends in liquidity. Because of the variability in the timing of premiums and fees receivable and premiums payable, net cash flows provided by operations will vary substantially from quarter to quarter and year to year related to these items. Gallagher believes that in order to consider these items in assessing trends in liquidity for Gallagher, they should be looked at in a combined manner, because changes in these balances are interrelated and are based on the timing of premium payments, both to and from Gallagher. In addition, funds legally restricted as to Gallagher's use relating to premiums and clients' claim funds held as fiduciary funds are presented in Gallagher's Consolidated Balance Sheet as Restricted Cash and have not been included in determining Gallagher's overall liquidity.

Gallagher's policy for funding its defined benefit pension plan is to contribute amounts at least sufficient to meet the minimum funding requirements under the IRC. There currently is no ERISA funding requirement for the plan in 2010. Contribution rates are determined by the plan's actuaries based on funding practices and requirements. Funding amounts may be influenced by future asset performance, the level of discount rates and other variables impacting the assets and/or liabilities of the plan. In addition, amounts funded in the future, to the extent not due under regulatory requirements, may be affected by alternative uses of Gallagher's cash flows, including dividends, acquisitions and common stock repurchases. During the six-month periods ended June 30, 2010 and 2009, Gallagher made discretionary contributions of \$3.0 million and \$1.0 million, respectively, to the defined benefit pension plan. Gallagher is considering making additional discretionary contributions to the plan in 2010 and may be required to make contributions to the plan in future periods.

Gallagher recognizes in its Consolidated Balance Sheet an asset for its defined benefit postretirement plans' overfunded status or a liability for its plans' underfunded status. Gallagher recognizes changes in the funded status of its defined benefit postretirement plans in comprehensive earnings in the year in which the changes occur. See Notes 15 and 16 to the Consolidated Financial Statements included in Gallagher's Annual Report on Form 10-K for the year ended December 31, 2009 for additional information required to be disclosed related to its defined benefit postretirement plans. GAAP requires that Gallagher recognize an accrued benefit plan liability for its underfunded defined benefit pension and unfunded retiree medical plans (together, the Plans). The offsetting adjustment to the amount of liabilities required to be recognized is recorded in Accumulated Other Comprehensive Loss, net of tax, in Gallagher's Consolidated Balance Sheet. Subsequent changes in the funded status will be recognized through the income statement and other comprehensive income in the year in which they occur as appropriate. The change in funded status of the Plans is impacted by numerous items, including actual results compared with prior estimates and assumptions and changes in assumptions to reflect information available at the respective measurement dates. In 2009, the funded status of the Plans significantly improved primarily due to favorable asset returns. The change in funded status of the Plans resulted in a decrease in noncurrent liabilities of \$30.5 million, including a related adjustment to tax benefits of \$12.4 million and an increase of Gallagher's stockholders' equity of \$18.1 million in 2009. While the change in funded status of the Plans had no impact on Gallagher's cash flows from operations in 2010 or 2009, changes in the pension regulatory environment and investment losses in its pension plan could have an effect on Gallagher's capital position and could require Gallagher to make significant contributions to its defined benefit pension plan and increase its pension expense in future periods.

Cash Flows From Investing Activities

Capital Expenditures - Net capital expenditures were \$13.0 million and \$13.5 million for the six-month periods ended June 30, 2010 and 2009, respectively. In 2010, Gallagher expects total expenditures for capital improvements to be approximately \$30.0 million, primarily related to office moves and expansions and updating computer systems and equipment.

Table of Contents

Acquisitions - Cash paid for acquisitions, net of cash acquired, was \$25.0 million and \$31.9 million in the six-month periods ended June 30, 2010 and 2009, respectively. Gallagher completed eight acquisitions and nine acquisitions in the six-month periods ended June 30, 2010 and 2009, respectively.

During the six-month period ended June 30, 2010, Gallagher issued 703,000 shares of its common stock, paid \$1.3 million in cash and accrued \$5.4 million in current liabilities related to earnout obligations for acquisitions made prior to 2009 and recorded additional goodwill of \$12.2 million. During the six-month period ended June 30, 2009, Gallagher issued 641,000 shares of its common stock, paid \$3.9 million in cash and accrued \$0.8 million in current liabilities related to earnout obligations for acquisitions made prior to 2009 and recorded additional goodwill of \$11.2 million. During the six-month period ended June 30, 2009, Gallagher also issued 1.1 million shares of its common stock related to an acquisition made in December 2008 and recorded in the consolidated financial statements as of December 31, 2008.

Gallagher's acquisition program has been an important part of its historical growth in revenues and earnings in its Brokerage Segment. While Gallagher intends to continue to seek to complete acquisitions, its ability to do so using cash may be inhibited in light of current conditions in the economy and financial markets, and there can be no assurance that Gallagher's level of acquisition activity and growth from acquisitions will be consistent with past levels.

For a further discussion of risks associated with Gallagher's acquisition activity, see Item 1A, Risk Factors, in Gallagher's Annual Report on Form 10-K for the year ended December 31, 2009.

Dispositions - During the six-month periods ended June 30, 2010 and 2009, Gallagher sold several small books of business and recognized one-time gains of \$1.5 million and \$9.4 million, respectively, which approximated the cash proceeds received related to these transactions.

Outlook - Gallagher believes it has sufficient capital to meet its short- and long-term cash flow needs. Except for 2008 and 2005, Gallagher's earnings from continuing operations before income taxes have increased year over year since 1991. In 2008, earnings from continuing operations before income taxes were adversely impacted by charges related to real estate lease terminations, severance, litigation, impairments of intangible assets and the adverse impact of foreign currency translation. In 2005, earnings from continuing operations before income taxes were adversely impacted by charges incurred for litigation and retail contingent commission related matters and claims handling obligations. Gallagher expects the historically favorable trend in earnings from continuing operations before income taxes to continue in the foreseeable future because it intends to expand its business through organic growth from its existing operations and growth through acquisitions. Additionally, Gallagher anticipates that it will continue to use cash flows from operations and, if needed, borrowings under the Credit Agreement and its common stock to fund acquisitions. In addition, Gallagher may from time to time consider other alternatives for longer-term funding sources. Such alternatives could include raising additional capital through public or private debt markets, equity markets, or restructuring its operations.

Cash Flows From Financing Activities

On July 15, 2010, Gallagher entered into an unsecured multicurrency credit agreement (Credit Agreement), which expires on July 14, 2014, with a group of twelve financial institutions. The Credit Agreement replaced a \$450.0 million unsecured revolving credit facility (that was scheduled to expire on October 4, 2010), which was terminated upon the execution of the Credit Agreement. All indebtedness, liabilities and obligations outstanding under the previous facility were fully paid and satisfied, except for outstanding letters of credit which became letters of credit under the Credit Agreement. Although Gallagher is not currently experiencing any limitation of access to its Credit Agreement and is not aware of any issues currently impacting the ability or willingness of the lenders under its Credit Agreement to honor their commitments to extend credit, the U.S. and global credit environment could adversely affect its ability to borrow under its Credit Agreement in the future.

The Credit Agreement provides for a revolving credit commitment of up to \$500.0 million, of which up to \$75.0 million may be used for issuances of standby or commercial letters of credit and up to \$50.0 million may be used for the making of swing loans, as defined in the Credit Agreement. Gallagher may from time to time request, subject to certain conditions, an increase in the revolving credit commitment up to a maximum aggregate revolving credit commitment of \$600.0 million.

Table of Contents

At June 30, 2010, Gallagher had \$550.0 million of corporate-related borrowings outstanding under two note purchase agreements entered into in 2009 and 2007 and a cash and cash equivalent balance of \$230.0 million. Gallagher also uses its Credit Agreement from time to time to borrow funds to supplement operating cash flows. See Note 7 to the Consolidated Financial Statements for a discussion of the terms of the note purchase agreements and the Credit Agreement. There were no borrowings outstanding under Gallagher's previous credit agreement or the Credit Agreement at June 30, 2010 or July 15, 2010, respectively. Due to outstanding letters of credit, \$484.0 million remained available for potential borrowings under the Credit Agreement at July 15, 2010.

In the six-month period ended June 30, 2010, Gallagher borrowed and repaid \$48.0 million under the previous credit agreement. In the six-month period ended June 30, 2009, Gallagher borrowed and repaid \$105.0 million and \$44.0 million, respectively, under the previous credit agreement. Principal uses of the 2010 and 2009 borrowings under the previous credit agreement were to fund acquisitions, earnout payments related to acquisitions and general corporate purposes.

The note purchase agreements and the Credit Agreement contain various financial covenants that require Gallagher to maintain specified levels of net worth and financial leverage ratios. Gallagher was in compliance with these covenants at June 30, 2010.

Unprecedented disruptions in the credit and financial markets, particularly in the U.S. and Europe, have had a material adverse impact on a number of financial institutions and have limited access to capital and credit for many companies. These disruptions could make it more difficult for Gallagher to obtain financing for its operations or investments or increase its cost of obtaining financing.

Gallagher also has a significant amount of trade accounts receivable from some of the insurance companies with which it places insurance. If those insurance companies experience liquidity problems or other financial difficulties, Gallagher could encounter delays or defaults in payments owed to Gallagher, which could have a significant adverse impact on Gallagher's consolidated financial position and results of operations.

See Part I, Item 1A, Risk Factors, included in Gallagher's Annual Report on Form 10-K for the year ended December 31, 2009 for additional information.

Dividends - Gallagher's dividend policy is determined by its Board of Directors. Dividends are declared on a quarterly basis by the Board of Directors after consideration of Gallagher's available cash from earnings, its anticipated cash needs and current conditions in the economy and financial markets.

In the six-month period ended June 30, 2010, Gallagher declared \$67.2 million in cash dividends on its common stock, or \$.32 per common share. On July 15, 2010, Gallagher paid a second quarter dividend of \$.32 per common share to shareholders of record at June 30, 2010. If the dividend is maintained at \$.32 per common share throughout 2010, this dividend level would result in annualized net cash used by financing activities in 2010 of approximately \$134.7 million (based on the number of outstanding shares as of June 30, 2010) or an increase in cash used of approximately \$3.6 million compared to 2009.

Common Stock Repurchases - Gallagher has a common stock repurchase plan that has been approved by the Board of Directors. Gallagher did not repurchase shares under the plan during the six-month periods ended June 30, 2010 and 2009. Repurchased shares are generally held for reissuance in connection with Gallagher's equity compensation and stock option plans. Under the provisions of the repurchase plan, as of June 30, 2010, Gallagher was authorized to repurchase approximately 10.0 million additional shares. The plan authorizes the repurchase of Gallagher's common stock at such times and prices as Gallagher may deem advantageous, in transactions on the open market or in privately negotiated transactions. Gallagher is under no commitment or obligation to repurchase any particular amount of common stock, and the share repurchase plan can be suspended at any time at Gallagher's discretion. Funding for share repurchases may come from a variety of sources, including cash from operations, short-term or long-term borrowings under Gallagher's Credit Agreement or other sources. The common stock repurchases reported in the Consolidated Statement of Cash Flows for the six-month period ended June 30, 2010 represent 15,000 shares (at a cost of \$0.3 million) that were repurchased by Gallagher from its employees to cover their income tax withholding obligations in connection with 2010 restricted stock distributions. The common stock repurchases reported in the Consolidated Statement of Cash Flows for the six-month period ended June 30, 2009 represent 18,000 shares (at a cost of \$0.3 million) that were repurchased by Gallagher from its employees to cover their income tax withholding obligations in connection with 2009 restricted stock distributions. Under these circumstances, Gallagher will withhold the proceeds from the repurchases and remit them to the taxing authorities on the employees' behalf to cover their income tax withholding obligations.

Table of Contents

Another source of liquidity to Gallagher is the issuance of its common stock pursuant to its stock option and employee stock purchase plans. Proceeds from issuance of common stock under these plans for the six-month periods ended June 30, 2010 and 2009 were \$23.1 million and \$4.5 million, respectively. Prior to 2009, Gallagher issued stock options under four stock option-based employee compensation plans. In May 2008, all of these plans expired. The options were primarily granted at the fair value of the underlying shares at the date of grant and generally became exercisable at the rate of 10% per year beginning the calendar year after the date of grant. On May 12, 2009, the stockholders of Gallagher approved the 2009 Long-Term Incentive Plan (LTIP). All officers, employees and non-employee directors of Gallagher and persons expected to become officers, employees or non-employee directors of Gallagher are eligible to receive awards under the LTIP. Awards which may be granted under the LTIP include non-qualified and incentive stock options, stock appreciation rights, restricted stock units and performance units any or all of which may be made contingent upon the achievement of performance criteria. As of June 30, 2010, 367,000 shares of Gallagher's common stock were available for awards granted under the LTIP. In addition, Gallagher has an employee stock purchase plan (ESPP) which allows Gallagher's employees to purchase its common stock at 95% of its fair market value. Proceeds from the issuance of its common stock related to these plans have contributed favorably to net cash provided by financing activities and Gallagher believes this favorable trend will continue in the foreseeable future, but at reduced levels from what occurred historically.

Contractual Obligations and Commitments

In connection with its investing and operating activities, Gallagher has entered into certain contractual obligations and commitments. See Note 14 to the Consolidated Financial Statements for additional discussion of these obligations and commitments. In addition, see Note 17 to the Consolidated Financial Statements included in Gallagher's Annual Report on Form 10-K for the year ended December 31, 2009 for additional discussion of these obligations and commitments.

Off-Balance Sheet Arrangements

See Notes 3, 7 and 14 to the Consolidated Financial Statements for a discussion of Gallagher's off-balance sheet arrangements. In addition, see Notes 3, 8 and 17 to the Consolidated Financial Statements included in Gallagher's Annual Report on Form 10-K for the year ended December 31, 2009 for additional discussion of these off-balance sheet arrangements.

Information Concerning Forward-Looking Statements

This quarterly report contains forward-looking statements within the meaning of that term in the Private Securities Litigation Reform Act of 1995 (the Act) found at Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). Additional written or oral forward-looking statements may be made by Gallagher from time to time in filings with the Securities and Exchange Commission, press releases, its website or otherwise. Statements contained in this report that are not historical facts are forward-looking statements made pursuant to the safe harbor provisions of the Act and the Exchange Act.

Forward-looking statements may include, but are not limited to, discussions concerning liquidity and capital resources, revenues, expenses, earnings, cash flow, capital structure, and financial losses, as well as market and industry conditions, premium rates, financial markets, interest rates, foreign exchange rates, contingencies and matters relating to Gallagher's operations and income taxes. In addition, when used in this report, the words anticipates, believes, could, should, estimates, expects, intends, plans and variations thereof and similar expressions are used to identify forward-looking statements.

Table of Contents

Forward-looking statements made by or on behalf of Gallagher are subject to risks and uncertainties that could cause Gallagher's actual results to be materially different than those expressed in its forward-looking statements, including but not limited to the following:

Revenues vary significantly from period to period as a result of the timing of policy inception dates and the net effect of new and lost business production;

Disruptions in the credit and financial markets could limit Gallagher's access to capital and credit and make it more difficult for Gallagher to obtain financing for its operations or investments or increase its cost of obtaining financing;

The recent recession and the current or any future economic downturn could adversely affect Gallagher's business in a number of ways, including by causing its clients to purchase less insurance coverage, by leading to a continued reduction in the number of claims processed by Gallagher, or by causing insurance companies with which Gallagher does business to experience liquidity problems, withdraw from writing certain coverages, or fail;

Gallagher's ability to grow has been enhanced through acquisitions, which may or may not be available on acceptable terms in the future and which, if consummated, may or may not be advantageous to Gallagher;

Gallagher's debt agreements contain restrictions and covenants that could significantly impact its ability to operate its business;

Gallagher's non-U.S. operations expose Gallagher to certain risks such as exchange rate fluctuations, geopolitical risk, and risks related to regulatory requirements including those imposed by the U.S. Foreign Corrupt Practices Act;

Gallagher is subject to insurance industry regulation worldwide, and such regulations could change at any time;

Changes in Gallagher's accounting estimates and assumptions could adversely affect its financial position and operating results;

Gallagher is subject to a number of contingencies and legal proceedings;

Rising employee benefits costs (including pension expense) could reduce Gallagher's profitability;

Gallagher's effective income tax rate and obligations under tax indemnity agreements may be subject to increase as a result of changes in income tax laws, unfavorable interpretations of past, current or future tax laws or developments resulting in the loss or unavailability of historically claimed tax credits under Section 29 of the Internal Revenue Code;

There are significant uncertainties related to Gallagher's IRC Section 45-related investments, which must be favorably resolved in order for Gallagher to recoup these investments and generate earnings on them; and

Edgar Filing: GALLAGHER ARTHUR J & CO - Form 10-Q

Operations at Gallagher's IRC Section 45-related facilities could subject Gallagher to environmental and product liability claims and environmental compliance costs.

The foregoing and other risks and uncertainties are described in more detail in Item 1A, Risk Factors, in Gallagher's Annual Report on Form 10-K for the year ended December 31, 2009.

Readers are cautioned not to place undue reliance on any forward-looking statements contained in this report, which speak only as of the date set forth on the signature page hereto. Gallagher undertakes no obligation to publicly release the result of any revisions to these forward-looking statements that may be made to reflect events or circumstances after such date or to reflect the occurrence of anticipated or unanticipated events.

Item 3. Quantitative and Qualitative Disclosure About Market Risk

Gallagher is exposed to various market risks in its day-to-day operations. Market risk is the potential loss arising from adverse changes in market rates and prices, such as interest and foreign currency exchange rates and equity prices. The following analyses present the hypothetical loss in fair value of the financial instruments held by Gallagher at June 30, 2010 that are sensitive to changes in interest rates and equity prices. The range of changes in interest rates used in the analyses reflects Gallagher's view of changes that are reasonably possible over a one-year period. This discussion of market risks related to Gallagher's Consolidated Balance Sheet includes estimates of future economic environments caused by changes in market risks. The effect of actual changes in these market risk factors may differ materially from Gallagher's estimates. In the ordinary course of business, Gallagher also faces risks that are either nonfinancial or unquantifiable, including credit risk and legal risk. These risks are not included in the following analyses.

Table of Contents

Gallagher's invested assets are primarily held as cash and cash equivalents, which are subject to various market risk exposures such as interest rate risk. The fair value of Gallagher's cash and cash equivalents investment portfolio at June 30, 2010 approximated its carrying value due to its short-term duration. Market risk was estimated as the potential decrease in fair value resulting from a hypothetical one-percentage point increase in interest rates for the instruments contained in the cash and cash equivalents investment portfolio. The resulting fair values were not materially different from the carrying values at June 30, 2010.

Gallagher has other investments that have valuations that are indirectly influenced by equity markets and general economic conditions, which can change rapidly. In addition, some investments require direct and active financial and operational support from Gallagher. A future material adverse effect may result from changes in market conditions or if Gallagher elects to withdraw financial or operational support.

At June 30, 2010, Gallagher had \$550.0 million of borrowings outstanding under its note purchase agreements. The aggregate fair value of these borrowings at June 30, 2010 was \$602.7 million due to their long-term duration and fixed interest rates associated with these debt obligations. There is no active or observable market for Gallagher's private placement long-term debt. Therefore, the estimated fair value of this debt is based on discounted future cash flows using current interest rates available for debt with similar terms and remaining maturities. To estimate an all-in interest rate for discounting, market quotes were obtained for notes with the same terms as Gallagher's. There is no rate adjustment for the risk profile changes, covenant issues or credit rating changes at Gallagher, and therefore the market quotes are deemed to be the closest approximation of current market rates. Market risk was estimated as the potential increase in fair value resulting from a hypothetical one-percentage point decrease in Gallagher's weighted average borrowing rate at June 30, 2010 and the resulting fair values would be \$30.7 million higher than their carrying value.

At June 30, 2010 or July 15, 2010, Gallagher had no borrowings outstanding under its previous credit agreement or the Credit Agreement, respectively. However, in the event that Gallagher does have borrowings outstanding, the fair value of these borrowings would approximate their carrying value due to their short-term duration and variable interest rates. Market risk would be estimated as the potential increase in fair value resulting from a hypothetical one-percentage point decrease in Gallagher's weighted average short-term borrowing rate at June 30, 2010 and the resulting fair values would not be materially different from their carrying value.

Gallagher is subject to foreign currency exchange rate risk primarily from its U.K. based subsidiaries that incur expenses denominated primarily in British pounds while receiving a substantial portion of their revenues in U.S. dollars. In addition, Gallagher is subject to foreign currency exchange rate risk from its Australian and Canadian operations due to transacting business in their local denominated currencies. Foreign currency gains (losses) related to this market risk are recorded in earnings from continuing operations before income taxes as they are incurred. Assuming a hypothetical adverse change of 10% in the average foreign currency exchange rate for 2010 (a weakening of the U.S. dollar), earnings from continuing operations before income taxes would decrease by approximately \$1.2 million. Assuming a hypothetical favorable change of 10% in the average foreign currency exchange rate for 2010 (a strengthening of the U.S. dollar), earnings from continuing operations before income taxes would increase by approximately \$1.0 million. Gallagher is also subject to foreign currency exchange rate risk associated with the translation of local currencies of its foreign subsidiaries into U.S. dollars. However, it is management's opinion that this foreign currency exchange risk is not material to Gallagher's consolidated operating results or financial position. Gallagher manages the balance sheets of its foreign subsidiaries, where practical, such that foreign liabilities are matched with equal foreign assets, thereby maintaining a balanced book which minimizes the effects of currency fluctuations. Historically, Gallagher has not entered into derivatives or other similar financial instruments for trading or speculative purposes. However, with respect to managing foreign currency exchange rate risk in the U.K., Gallagher has periodically purchased financial instruments when market opportunities arose to minimize its exposure to this risk. During the six-month periods ended June 30, 2010 and 2009, Gallagher had several monthly put/call options in place with an external financial institution that are designed to hedge a significant portion of its future U.K. currency disbursements through various future payment dates. This hedging strategy is designed to protect Gallagher against significant U.K. currency exchange rate movements, but Gallagher is still exposed to some foreign currency exchange rate risk for the portion of the payments and currency exchange rate that are unhedged. The impact of this hedging strategy was not material to Gallagher's Consolidated Financial Statements for the three-month and six-month periods ended June 30, 2010 and 2009.

Table of Contents**Item 4. Controls and Procedures**

Gallagher's management, including Gallagher's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), evaluated the effectiveness of its disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) of the Exchange Act) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, the CEO and CFO concluded that Gallagher's disclosure controls and procedures were effective as of such date.

There has been no change in Gallagher's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during the three-month period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, Gallagher's internal control over financial reporting.

Part II Other Information**Item 1. Legal Proceedings**

See Note 14 (Commitments, Contingencies and Off-Balance Sheet Arrangements) to the Consolidated Financial Statements.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Issuer Purchases of Equity Securities**

(in thousands, except per share data)

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
April 1 to April 30, 2010		\$		10,000
May 1 to May 31, 2010				10,000
June 1 to June 30, 2010				10,000
Total		\$		

- (1) As set forth in its public filings, Gallagher has a common stock repurchase plan that was adopted by the Board of Directors on May 10, 1988 and has been periodically amended (the last amendment was on January 24, 2008) since that date to authorize additional shares for repurchase. Under the provisions of the repurchase plan, as of June 30, 2010, Gallagher continues to have the capacity to repurchase approximately 10.0 million shares. There is no expiration date for the repurchase plan and Gallagher is under no commitment or obligation to repurchase any particular amount of common stock under the plan. At its discretion, Gallagher may suspend the repurchase plan at any time.

On May 5, 2010, Gallagher issued approximately 456,000 unregistered shares of its common stock, valued at approximately \$12.0 million, to FirstCity (N.A.), Inc., FirstCity Insurance Group Limited and FirstCity Partnership Limited, as partial consideration for the purchase of all of the insurance brokerage business of such entities. The shares issued by Gallagher were exempt from registration under Section 4(2) of the Securities Act of 1933, as amended. On May 5, 2010, Gallagher filed a prospectus supplement to its registration statement on Form S-3 to register the re-sale of such shares.
