Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

(Title of Class)

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

As of March 31, 2012, 3,663,483,895 shares of Common Stock were outstanding, including 26,244,423 shares represented by 26,244,423 American Depositary Shares.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards as issued Other

by the International Accounting Standards Board

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Table of Contents

As used in this annual report, references to Company , Nomura , Nomura Group , we , us and our are to Nomura Holdings, Inc. and, except as the context otherwise requires, its consolidated subsidiaries. As part of certain line items in Nomura s financial statements and information included in this Form 20-F, references to NHI are to Nomura Holdings, Inc.

As used in this annual report, yen or ¥ means the lawful currency of Japan, and dollar or \$ means the lawful currency of the United States of America (U.S.).

As used in this annual report, ADS means an American Depositary Share, currently representing one share of the Company s common stock, and ADR means an American Depositary Receipt evidencing one or more ADSs. See Rights of Holders of ADSs under Item 10.B of this annual report.

Amounts shown in this annual report have been rounded to the nearest indicated digit unless otherwise specified. In tables and graphs with rounded figures, sums may not add up due to rounding.

PART I

Item 1. Identity of Directors, Senior Management and Advisers

Not applicable.

Item 2. Offer Statistics and Expected Timetable

Not applicable.

Item 3. Key Information

A. Selected Financial Data

The following table shows selected financial information as of and for the years ended March 31, 2008, 2009, 2010, 2011 and 2012 which is derived from our consolidated financial statements included in this annual report. These financial statements are prepared in accordance with accounting principles generally accepted in the U.S. (U.S. GAAP). Certain reclassifications of previously reported amounts have been made to conform to the current period presentation.

Table of Contents

The selected consolidated financial information set forth below should be read in conjunction with Item 5. *Operating and Financial Review and Prospects*, in this annual report and our consolidated financial statements and notes thereto included in this annual report.

	Millions of yen, except per share data and percentages				
	Year ended March 31				
	2008	2009	2010	2011	2012
Statement of income data:					
Revenue	¥ 1,593,722	¥ 664,511	¥ 1,356,751	¥ 1,385,492	¥ 1,851,760
Interest expense	806,465	351,884	205,929	254,794	315,901

Return on equity⁽⁶⁾:	(3.3)%	(40.2)%	3.7%	1.4%	0.6%

Notes:

- (1) On April 1, 2009, we adopted new guidance for the accounting and reporting for noncontrolling interests. In the above table, this guidance has been retrospectively applied to the amounts as of and for the years ended March 31, 2008 and 2009.
- (2) On April 1, 2008, we adopted new guidance for the offsetting of cash collateral against net derivative balances. See Note 1 *Summary of accounting policies* to our consolidated financial statements included in this annual report. In the above table, total assets as of March 31, 2008 has been adjusted to retrospectively apply this guidance.
- (3) Calculated using the number of shares outstanding at period end.
- (4) Calculated using the yen-dollar exchange rate of the respective fiscal year end date, the noon buying rate in New York City for cable transfers in foreign currencies as certified for customs purposes by the Federal Reserve Bank of New York.
- (5) The number shown is used to calculate basic earnings per share.
- (6) Calculated as Net income (loss) attributable to NHI shareholders divided by average Total NHI shareholders equity.

Table of Contents**Foreign Exchange**

Fluctuations in exchange rates between the Japanese yen and U.S. dollar will affect the U.S. dollar equivalent of the yen price of our shares and ADSs and the U.S. dollar amounts received on conversion of cash dividends. The following table provides the noon buying rates for Japanese yen in New York City for cable transfers as certified for customs purposes by the Federal Reserve Bank of New York, expressed in Japanese yen per \$1.00.

Year ended March 31	High	Low	Average⁽¹⁾	Year end
2008	124.09	96.88	113.61	99.85
2009	110.48	87.80	100.85	99.15
2010	100.71	86.12	92.49	93.40
2011	94.68	78.74	85.00	82.76
2012	85.26	75.72	78.86	82.41
Calendar year 2012	High	Low		
January	78.13	76.28		
February	81.10	76.11		
March	83.78	80.86		
April	82.62	79.81		
May	80.36	78.29		
June (through June 22)	80.52	78.21		

(1) Average rate represents the average of rates available on the last business day of each month during the period. The noon buying rate for Japanese yen on June 22, 2012 was \$1.00 = ¥80.52

Table of Contents

D. Risk Factors.

Risk Factors

You should carefully consider the risks described below before making an investment decision. If any of the risks described below actually occurs, our business, financial condition, results of operations or cash flows could be adversely affected. In that event, the trading prices of our shares could decline, and you may lose all or part of your investment. In addition to the risks listed below, risks not currently known to us or that we now deem immaterial may also harm us and affect your investment.

Our business may be materially affected by financial markets, economic conditions and market fluctuations in Japan and elsewhere around the world

Over recent years, continuous disruptions have led to an acute downturn in the markets and economic conditions in Japan and elsewhere around the world. In 2008 and through to early 2009, the financial services industry, global securities markets and economies, especially in developed countries, were materially and adversely affected by a world-wide market crisis and dislocation. In 2011, the manifestation of financial problems in the U.S. and the worsening of financial, economic and structural issues in the peripheral countries of the Eurozone including Greece, have adversely influenced major global financial markets, and the economic outlook in the medium to long-term remains uncertain.

In addition, not only purely economic factors but also future war, acts of terrorism, economic or political sanctions, pandemics, geopolitical risks and events, natural disasters or other similar events could have a material adverse effect on financial markets and economies. For example, the East Japan Earthquake in March 2011 severely affected the Japanese economy and our business environment through the damage to nuclear power plants and resulting power shortages, supply line disruptions and the reluctance of our existing and potential clients to engage in financial and corporate transactions. Today the Japanese economy has not yet attained a full-scale recovery, although some post-quake reconstruction demand can be anticipated.

A sustained market/economic downturn caused by these factors can adversely affect our business and can result in substantial losses. Even in the absence of a prolonged market/economic downturn, we may incur substantial losses due to market volatility. Also, governmental fiscal and monetary policy changes in Japan and other jurisdictions where we conduct business and other business environmental changes may adversely affect our business, financial condition and results of operations. The following are certain risks related to the financial markets and economic conditions on our specific businesses.

Our brokerage and asset management revenues may decline

A market downturn could result in a decline in the revenues generated by our intermediary business because of a decline in the volume and value of securities that we broker for our clients. Also, with regard to our asset management business, in most cases, we charge fees for managing our clients' portfolios that are based on the value of their portfolios. A market downturn that reduces the value of our clients' portfolios may increase the amount of withdrawals or reduce the amount of new investments in these portfolios, and would reduce the revenue we receive from our asset management businesses.

Our investment banking revenues may decline

Changes in financial or economic conditions would likely affect the number and size of transactions for which we provide securities underwriting, financial advisory and other investment banking services. Our investment banking revenues, which include fees from these services, are directly related to the number and size of the transactions in which we participate and would therefore decrease if there are financial and market changes unfavorable to our investment banking business and our clients.

Table of Contents

Our electronic trading business revenues may decline

Electronic trading is essential for our business in order to execute trades faster with fewer resources. It allows us to provide an efficient execution platform and on-line content and tools to our clients via exchanges or other automated trading facilities. Revenue from our electronic trading, which includes trading commissions and bid-offer spreads from these services, are directly correlated with the number and size of the transactions in which we participate and would therefore decrease if there are financial or market changes that would cause our clients to trade less frequently or in a smaller size. In addition, the use of electronic trading has increased across capital markets products and has put pressure on trading commissions and bid-offer spreads in our industry. Although trade volumes may increase due to the availability of electronic trading, this may not be sufficient to offset margin erosion in our execution business, leading to a potential decline in revenue generated from this business. We continue to invest in technology to provide an efficient trading platform; however, we may fail to maximize returns on these investments due to this increased pressure on margins.

We may incur significant losses from our trading and investment activities

We maintain large trading and investment positions in fixed income, equity and other markets, both for our own account and for the purpose of facilitating our clients' trades. Our positions consist of various types of assets, including financial derivatives transactions in equity, interest rate, currency, credit, commodity and other markets, as well as loans and real estate. Fluctuations in the markets where these assets are traded can adversely affect the value of these assets. To the extent that we own assets, or have long positions, a market downturn could result in losses if the value of these long positions decreases. Furthermore, to the extent that we have sold assets we do not own, or have short positions, an upturn in the prices of the assets could expose us to potentially significant losses. Although we have worked to mitigate these position risks with a variety of hedging techniques, these market movements could result in losses. We can incur losses if the financial system is overly stressed and the markets move in a way we have not anticipated.

Our businesses have been and may continue to be affected by changes in market volatility levels. Certain of our trading businesses depend on market volatility to provide trading and arbitrage opportunities, and decreases in volatility may reduce these opportunities and adversely affect the results of these businesses. On the other hand, increased volatility, while it can increase trading volumes and spreads, also increases risk as measured by Value-at-Risk (VaR) and may expose us to increased risks in connection with our market-making and proprietary businesses or cause us to reduce the outstanding position or size of these businesses in order to avoid increasing our VaR.

Furthermore, we commit capital to take relatively large positions for underwriting or warehousing assets to facilitate certain capital market transactions. Also, we structure and take positions in pilot funds for developing financial investment products and invest seed money to set up and support financial investment products. We may incur significant losses from these positions in the event of significant market fluctuations.

In addition, if we are the party providing collateral in a transaction, significant declines in the value of the collateral or a requirement to provide additional collateral due to our lowered creditworthiness (by way of a lowered credit rating or otherwise) can increase our costs and reduce our profitability. In contrast, if we are the party receiving collateral, such declines can reduce our profitability by reducing the level of business done with our clients and counterparties.

Holding large and concentrated positions of securities and other assets may expose us to large losses

Holding a large amount of securities concentrated in specific assets can increase our risks and expose us to large losses in our businesses such as market-making, block trading, underwriting, asset securitization and acquiring newly-issued convertible bonds through third-party allotment. We have committed substantial amounts of capital to these businesses. This often requires us to take large positions in the securities of a particular issuer

Table of Contents

or issuers in a particular industry, country or region. In addition, we may incur substantial losses due to market fluctuations on asset-backed securities such as residential and commercial mortgage-backed securities.

Extended market declines can reduce liquidity and lead to material losses

Extended market declines can reduce the level of market activity and the liquidity of the assets traded in the market for our business, which may make it difficult to sell, hedge or value such assets. If we cannot properly close out or hedge our associated positions in a timely manner or in full, particularly with respect to over-the-counter derivatives, we may incur substantial losses. Further, the difficulty in monitoring prices in a less liquid market could lead to unanticipated losses.

Our hedging strategies may not prevent losses

We use a variety of instruments and strategies to hedge our exposure to various types of risk. If our hedging strategies are not effective, we may incur losses. We base many of our hedging strategies on historical trading patterns and correlations. For example, if we hold an asset, we may hedge this position by taking another asset which has, historically, moved in a direction that would offset a change in value of the former asset. However, historical trading patterns and correlations may not continue, as seen in the case of past financial crises, and these hedging strategies may not be fully effective in mitigating our risk exposure because we are exposed to all types of risk in a variety of market environments.

Our risk management policies and procedures may not be fully effective in managing market risk

Our policies and procedures to identify, monitor and manage risks may not be fully effective. Some of our methods of managing risk are based upon observed historical market behavior. This historical market behavior may not continue in future periods. As a result, we may suffer large losses by being unable to predict future risk exposures that could be significantly greater than the historical measures indicate. Other risk management methods that we use also rely on our evaluation of information regarding markets, clients or other matters, which is publicly available or otherwise accessible by us. This information may not be accurate, complete, up-to-date or properly evaluated, in which case we may be unable to properly assess our risks, and thereby suffer large losses. Furthermore, certain factors, such as market volatility, may render our risk evaluation model unsuitable for the new market environment. In such event, we may become unable to evaluate or otherwise manage our risks adequately.

Market risk may increase other risks that we face

In addition to the potentially adverse effects on our businesses described above, market risk could exacerbate other risks that we face. For example, the risks associated with new products developed through financial engineering/innovation may be increased by market risk.

Also, if we incur substantial trading losses caused by our exposure to market risk, our need for liquidity could rise sharply while our access to cash may be impaired as a result of market perception of our credit risk.

Furthermore, in a market downturn, our clients and counterparties could incur substantial losses of their own, thereby weakening their financial condition and, as a result, increasing our credit risk exposure to them.

We may have to recognize impairment charges with regard to the amount of goodwill and tangible and intangible assets recorded on our consolidated balance sheets

We have purchased all or a part of the equity interests in, or certain operations from, certain other companies in order to pursue our business expansion, and expect to continue to do so when and as we deem appropriate. We account for certain of those and similar purchases and acquisitions in conformity with U.S. GAAP as a business combination by allocating their acquisition costs to the assets acquired and liabilities assumed and recording the remaining amount as goodwill.

Table of Contents

We may have to record impairment charges with regard to the amount of goodwill and tangible and intangible assets. Any impairment charges for goodwill or tangible or intangible assets we recognize, if recorded, may adversely affect our results of operations and financial condition.

Liquidity risk could impair our ability to fund operations and jeopardize our financial condition

Liquidity, or having ready access to cash, is essential to our businesses. In addition to maintaining a readily available cash position, we seek to secure ample liquidity through repurchase and securities lending transactions, access to long-term debt, issuance of mid/long-term debt, diversification of our short-term funding sources such as commercial paper, and by holding a portfolio of highly liquid assets. We bear the risk that we may lose liquidity under certain circumstances, including the following:

We may be unable to access the debt capital markets

We depend on continuous access to the short-term credit markets and the debt capital markets to finance our day-to-day operations. An inability to raise money in the long-term or short-term debt markets, or to engage in repurchase agreements and securities lending, could have a substantial negative effect on our liquidity. For example, lenders could refuse to extend the credit necessary for us to conduct our business based on their assessment of our long-term or short-term financial prospects if:

we incur large trading losses,

the level of our business activity decreases due to a market downturn, or

regulatory authorities take significant action against us.

In addition to the above, our ability to borrow in the debt markets could also be impaired by factors that are not specific to us, such as increases in banks' nonperforming loans which reduce their lending capacity, a severe disruption of the financial and credit markets which, among others, can lead to widening credit spreads and thereby increase our borrowing costs, or negative views about the general prospects for the investment banking, brokerage or financial services industries generally.

We may be unable to access the short-term debt markets

We issue commercial paper and short-term debt instruments as a source of unsecured short-term funding of our operations. Our liquidity depends largely on our ability to refinance these borrowings on a continuous basis. Investors who hold our outstanding commercial paper and other short-term debt instruments have no obligation to provide refinancing when the outstanding instruments mature. We may be unable to obtain short-term financing from banks to make up any shortfall.

We may be unable to sell assets

If we are unable to borrow in the debt capital markets or if our cash balances decline significantly, we will need to liquidate our assets or take other actions in order to meet our maturing liabilities. In volatile or uncertain market environments, overall market liquidity may decline. In a time of reduced market liquidity, we may be unable to sell some of our assets, which may adversely affect our liquidity, or we may have to sell assets at depressed prices, which could adversely affect our results of operations and financial condition. Our ability to sell our assets may be impaired by other market participants seeking to sell similar assets into the market at the same time.

Lowering of our credit ratings could increase our borrowing costs

Our borrowing costs and our access to the debt capital markets depend significantly on our credit ratings. Rating agencies may reduce or withdraw their ratings or place us on credit watch with negative implications. This could increase our borrowing costs and limit our access to the capital markets. This, in turn, could reduce our earnings and adversely affect our liquidity.

Table of Contents

Further, other factors which are not specific to us may increase our funding costs, such as negative market perception of Japanese fiscal soundness.

Event risk may cause losses in our trading and investment assets as well as market and liquidity risk

Event risk refers to potential losses in value we may suffer through unpredictable events that cause large unexpected market price movements. These include not only significant events such as the terrorist attacks in the U.S. on September 11, 2001, U.S. subprime issues since 2007, the global financial and credit crisis in the autumn of 2008, the East Japan Earthquake in March 2011 and sovereign debt problem in the U.S. and European countries, but also more specifically the following types of events that could cause losses on our trading and investment assets:

sudden and significant reductions in credit ratings with regard to our trading and investment assets by major rating agencies,

sudden changes in trading, tax, accounting, laws and other related rules which may make our trading strategy obsolete, less competitive or not workable, or

an unexpected failure in a corporate transaction in which we participate resulting in our not receiving the consideration we should have received, as well as bankruptcy, deliberate acts of fraud, and administrative penalty with respect to the issuers of our trading and investment assets.

We may be exposed to losses when third parties that are indebted to us do not perform their obligations

Our counterparties are from time to time indebted to us as a result of transactions or contracts, including loans, commitments to lend, other contingent liabilities, and derivatives transactions such as swaps and options. We may incur material losses when our counterparties default on their obligations to us due to bankruptcy, deterioration in their creditworthiness, lack of liquidity, operational failure, an economic or political event, or other reasons.

Credit risk may also arise from:

holding securities issued by third parties, or

the execution of securities, futures, currency or derivative trades that fail to settle at the required time due to nondelivery by the counterparty, such as monoline insurers (financial guarantors) which are counterparties in credit default swap contracts, or systems failure by clearing agents, exchanges, clearing houses or other financial infrastructure.

Problems related to third party credit risk may include the following:

Defaults by a large financial institution could adversely affect the financial markets generally and us specifically

The commercial soundness of many financial institutions is closely interrelated as a result of credit, trading, clearing or other relationships among the institutions. As a result, concern about the credit standing of, or a default by, one institution could lead to significant liquidity problems or losses in, or defaults by, other institutions. This may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges, with which we interact on a daily basis. Actual defaults, increases in perceived default risk and other similar events could arise in the future and could have an adverse effect on the financial markets and on us. Our finance operations may be damaged if major financial institutions, Japanese or otherwise, fail or experience severe liquidity or solvency problems.

Table of Contents

There can be no assurance as to the accuracy of the information about, or the sufficiency of the collateral we use in managing, our credit risk

We regularly review our credit exposure to specific clients or counterparties and to specific countries and regions that we believe may present credit concerns. Default risk, however, may arise from events or circumstances that are difficult to detect, such as account-rigging and fraud. We may also fail to receive full information with respect to the risks of a counterparty. In addition, in cases where we have extended credit against collateral, we may fall into a deficiency in value in the collateral. For example, if sudden declines in market values reduce the value of our collateral, we may become undersecured.

Our clients and counterparties may be unable to perform their obligations to us as a result of political or economic conditions

Country, regional and political risks are components of credit risk, as well as market risk. Political or economic pressures in a country or region, including those arising from local market disruptions or currency crises, may adversely affect the ability of clients or counterparties located in that country or region to obtain credit or foreign exchange, and therefore to perform their obligations owed to us.

The financial services industry faces intense competition

Our businesses are intensely competitive, and expect to remain so. We compete on the basis of a number of factors, including transaction execution capability, our products and services, innovation, reputation and price. In recent years, we have experienced intense price competition, particularly in brokerage, investment banking and other businesses.

Competition with commercial banks, commercial bank-owned securities subsidiaries and non-Japanese firms in the Japanese market is increasing

Since the late 1990s, the financial services sector in Japan has been undergoing deregulation. In accordance with the amendments to the Securities and Exchange Law (which has been renamed as the Financial Instruments and Exchange Act (the FIEA) since September 30, 2007), effective from December 1, 2004, banks and certain other financial institutions became able to enter into the securities brokerage business. In addition, in accordance with the amendments to the FIEA effective from June 1, 2009, firewalls between commercial banks and securities firms were deregulated. Therefore, as our competitors will be able to cooperate more closely with their affiliated commercial banks, banks and other types of financial services firms can compete with us to a greater degree than they could before deregulation in the areas of financing and investment trusts. Among others, securities subsidiaries of commercial banks and non-Japanese firms have been affecting our market shares in the sales and trading, investment banking and retail businesses.

Increased domestic and global consolidation in the financial services industry means increased competition for us

In recent years, there has been substantial consolidation and convergence among companies in the financial services industry. In particular, a number of large commercial banks, insurance companies and other broad-based financial services firms have established or acquired broker-dealers or have consolidated with other financial institutions in Japan and overseas. Through such business alliances and consolidations, these other securities companies and commercial banks have the ability to offer a wide range of products, including loans, deposit-taking, insurance, brokerage, asset management and investment banking services within their group. This diversity of services offered may enhance their competitive position compared with us. They also have the ability to supplement their investment banking and brokerage businesses with commercial banking, insurance and other financial services revenues in an effort to gain market share. Our market shares may decrease if these large consolidated firms expand their businesses.

Table of Contents

Our global business strategies may not result in the anticipated outcome due to competition with other financial services firms in international markets and the failure to realize the full benefit of management resource reallocation

We believe there are significant opportunities in the international markets, but there is also significant competition for such opportunities. In order to take advantage of these opportunities, we will have to compete successfully with financial services firms based in important non-Japanese markets, including the U.S., Europe and Asia. Some of these financial services firms are larger, better capitalized, and are able to secure talented human resources and have a stronger presence in these markets. As a means to bolster our international operations, we acquired certain Lehman operations in Europe, the Middle East and Asia in 2008 and we have invested significant management resources to rebuild and expand our operations in these regions and the U.S. However, due to the subsequent deterioration and destabilization of the global economy, the recent European sovereign debt crisis and regulatory/supervisory tightening around the world, many competitor firms in the financial services industry have undertaken cost reduction, asset disposals as well as withdrawal from certain businesses. In light of this challenging business environment, we endeavor to reallocate our management resources to optimize our global operations and thereby improve our profitability. These efforts are central to the successful execution of our global business strategy. Failure to realize the full benefits of such efforts may adversely affect our global businesses, financial condition and results of operations.

Our business is subject to substantial legal, regulatory and reputational risks

Substantial legal liability or a significant regulatory action against us could have a material financial effect on us or cause reputational harm to us, which in turn could seriously damage our business prospects and results of operations. Also, material changes in regulations applicable to us or to our market could adversely affect our business.

Our exposure to legal liability is significant

We face significant legal risks in our businesses. These risks include liability under securities or other laws in connection with securities underwriting and offering transactions, liability arising from the purchase or sale of any securities or other products, disputes over the terms and conditions of complex trading arrangements or the validity of contracts for our transactions and legal claims concerning our financial advisory and merchant banking businesses.

During a prolonged market downturn or upon the occurrence of an event that adversely affects the market, we would expect claims against us to increase. We may also face significant litigation. The cost of defending such litigation may be substantial and our involvement in litigation may damage our reputation. In addition, even legal transactions might be subject to adverse public reaction according to the particular details of such transactions. These risks may be difficult to assess or quantify and their existence and magnitude may remain unknown for substantial periods of time.

Extensive regulation of our businesses limits our activities and may subject us to significant penalties and losses

The financial services industry is subject to extensive regulation. We are subject to regulation by governmental and self-regulatory organizations in Japan and in virtually all other jurisdictions in which we operate, and such governmental and regulatory scrutiny may increase as our operations expand or as laws change. These regulations are broadly designed to ensure the stability of financial system and the integrity of the financial markets and financial institutions, and to protect clients and other third parties who deal with us, and often limit our activities, through net capital, client protection and market conduct requirements. Although we have policies in place to prevent violations of such laws and regulations, we may not always be able to prevent violations, and we could be fined, prohibited from engaging in some of our business activities, ordered to

Table of Contents

improve our internal governance procedures, or be subject to revocation of our license to conduct business. Our reputation could also suffer from the adverse publicity that any administrative or judicial sanction against us may create. As a result of any such sanction, we may lose business opportunities for a period of time, even after the sanction is lifted, if and to the extent that our clients, especially public institutions, decide not to engage us for their financial transactions.

Tightening of regulations applicable to the financial system and financial industry could adversely affect our business, financial condition and operating results

If regulations that apply to our businesses are introduced, modified or removed, we could be adversely affected directly or through resulting changes in market conditions. The impact of such developments could make it uneconomic for us to continue to conduct all or certain of our businesses, or could cause us to incur significant costs to adjust to such changes.

Particularly, in response to the financial markets crisis in the autumn of 2008, various reforms to the financial regulatory framework at a national level and by international agreements, such as the agreements reached at the Group of Twenty (G-20) Summit, are undergoing to restore financial stability and to enhance financial industry s resilience against future crises. Such proposals for reform include the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) in the U.S. and various proposals to strengthen financial regulation in the European Union and the United Kingdom (U.K.). The exact details of the implementation of these proposals and its impact on us will depend on the final regulations as they become ultimately adopted by various governmental agencies and oversight boards. For more information about such regulations, see Regulation under Item 4.B. of this annual report.

The changes in regulations on accounting standards, consolidated regulatory capital adequacy rules and liquidity ratio could also have a material adverse effect on our business, financial condition, and results of operations. For example, we currently calculate our consolidated regulatory capital adequacy ratio in accordance with the Financial Services Agency (the FSA) s notice on Basel 2.5 based consolidated capital adequacy rules applicable to the Final Designated Parent Company. In March, 2012, the FSA has published an amendment to the notice on capital adequacy rules in order to respond to the Basel III measures announced by the Basel Committee on Banking Supervision (the Basel Committee), and the amended notice will come in force on March 31, 2013. The implementation of those new measures may cause our capital adequacy ratio to decrease or may require us to liquidate assets, raise additional capital or otherwise restrict our business activities in a manner that could adversely increase our funding costs or could otherwise adversely affect our operating or financing activities or the interests of our shareholders. Further, based on Basel III, the Financial Stability Board and the Basel Committee have announced they will annually update the list of global systemically important financial institutions (G-SIFIs) identified by financial regulators and additional regulatory capital requirements imposed on those G-SIFIs. The costs and impact on us as described above may further increase if we are identified as a G-SIFI in the future.

Deferred tax assets may be impacted due to a change in business condition or in laws and regulations, resulting in an adverse effect on our operating results and financial condition.

We recognize deferred tax assets on our consolidated balance sheets as a possible benefit of tax relief in the future. If we experience or foresee a deteriorating business condition, a tax reform (such as a reduction of corporate tax rate) or a change in accounting standards in the future, we may reduce the deferred tax assets then recognized in our consolidated balance sheets. As a result, it could adversely affect our operating results and financial condition.

Table of Contents

Misconduct or fraud by an employee, director or officer, or any third party, could occur, and our reputation in the market and our relationships with clients could be harmed

We face the risk that misconduct by an employee, director or officer, or any third party, could occur which may adversely affect our business. Misconduct by an employee, director or officer can include, for example, entering into transactions in excess of authorized limits, acceptance of risks that exceed our limits, or concealment of unauthorized or unsuccessful activities. The misconduct could also involve, for example, the improper use or disclosure of our or our clients' confidential information, such as insider trading, which could result in regulatory sanctions, legal liability and serious reputational or financial damage to us. Although we have precautions in place to detect and prevent any such misconduct, it may not be effective in all cases, and we may not always be able to detect or deter misconduct by an employee, director or officer. If any administrative or judicial sanction is issued against us as a result of such misconduct, we may lose business opportunities for a period of time, even after the sanction is lifted, if and to the extent that our clients, especially public institutions, decide not to engage us for their financial transactions.

Third parties may also engage in fraudulent activities, including devising a fraudulent scheme to induce our investment, loans, guarantee or any other form of financial commitment, both direct and indirect. Because of the broad range of businesses that we engage in and the large number of third parties with whom we deal in our day-to-day business operations, such fraud or any other misconduct may be difficult to prevent or detect.

We may not be able to recover the financial losses caused by such activities and our reputation may also be damaged by such activities.

A failure to identify and address conflicts of interest appropriately could adversely affect our businesses

We are a global financial services firm providing a wide range of products and services to a diverse group of clients, including individuals, corporations, financial institutions and governmental institutions. As such, we face potential conflicts of interest in the ordinary course of business. Potential conflicts can occur when our services to a particular client or our own interests conflict, or are perceived to conflict, with the interest of another client. Potential conflicts can also occur where non-public information is not appropriately restricted or shared within the firm. While we have extensive internal procedures and controls designed to identify and address conflicts of interest, a failure, or a perceived failure, to identify, disclose and address appropriately the conflicts could adversely affect our reputation and the willingness of current or potential clients to do business with us. In addition, potential conflicts could give rise to regulatory scrutiny, enforcement action or litigation.

Our business is subject to various operational risks

Types of operational risk we face include the following, each of which could result in financial losses, disruption in our business, litigation from third parties, regulatory/supervisory actions, restrictions or penalties, and/or damage to our reputation:

failure to execute, confirm or settle securities transactions,

failure by our officers or employees to perform proper administrative activities prescribed in our regular procedures, such as placing erroneous orders to securities exchanges,

the destruction of or damage to our facilities or systems, or other impairment of our ability to conduct business, arising from the impacts of disasters or acts of terrorism which are beyond our anticipation and the scope of our contingency plan

the disruption of our business due to pandemic diseases or illnesses, such as avian and swine flu or

suspension or malfunction of internal or third party systems, or unauthorized access, misuse, computer viruses and cyber-attacks affecting such systems.

Table of Contents

Our businesses rely on the secure processing, storage, transmission and reception of confidential and proprietary information in our computer systems. Although we continue to monitor and update our security system, we recognize the increasing risk from the continuously evolving nature of cyber threats. As cyber security threats become more sophisticated, we may be required to expend significant additional resources to modify our systems, and if any of our protective measures are not adequate, it is possible that such attacks may lead to significant breaches in the future.

Unauthorized disclosure of personal information held by us may adversely affect our business

We keep and manage personal information obtained from clients in connection with our business. In recent years, there have been many reported cases of personal information and records in the possession of corporations and institutions being improperly accessed or disclosed.

Although we exercise care in protecting the confidentiality of personal information and take steps to safeguard such information in compliance with the Act on the Protection of Personal Information and rules, regulations and guidelines relating thereto, if any material unauthorized disclosure of personal information does occur, our business could be adversely affected in a number of ways. For example, we could be subject to complaints and lawsuits for damages from clients if they are adversely affected as a result of the release of their personal information. In addition, we could incur additional expenses associated with changing our security systems, either voluntarily or in response to administrative guidance or other regulatory initiatives, or in connection with public relations campaigns designed to prevent or mitigate damage to our corporate or brand image or reputation. Any damage to our reputation caused by such unauthorized disclosure could lead to a decline in new clients and/or a loss of existing clients, as well as to increased costs and expenses in dealing with any such problems.

We are a holding company and depend on payments from our subsidiaries

We depend on dividends, distributions and other payments from our subsidiaries to fund dividend payments and to fund all payments on our obligations, including debt obligations. Regulatory and other legal restrictions may limit our ability to transfer funds freely, either to or from our subsidiaries. In particular, many of our subsidiaries, including our broker-dealer subsidiaries, are subject to laws and regulations that authorize regulatory bodies to block or reduce the flow of funds to the parent holding company, or that prohibit such transfers altogether in certain circumstances. These laws and regulations may hinder our ability to access funds that we may need to make payments on our obligations.

We may not be able to realize gains we expect, and may even suffer losses, on our private equity investments

We engage in private equity businesses in and outside of Japan through certain entities which we consolidate under either a voting interest or variable interest model. A decline in the fair values of our investment positions, which could arise from deteriorating business performance of investee companies or any deterioration in the market conditions of these sectors, may cause material losses to us. Further, our inability to dispose of our private equity investments at the level and time we may wish could have a material impact on our operating results and financial condition.

We may not be able to realize gains we expect, and may even suffer losses, on our investments in equity securities and non-trading debt securities

We hold substantial investments in equity securities and non-trading debt securities. Under U.S. GAAP, depending on market conditions, we may record significant unrealized gains or losses on our investments in equity securities and debt securities, which would have a substantial impact on our consolidated statements of

Table of Contents

income. Depending on the conditions of the markets, we may not be able to dispose of these equity securities and debt securities when we would like to do so, as quickly as we may wish or at the desired values.

Equity investments in affiliates and other investees accounted for under the equity method in our consolidated financial statements may decline significantly over a period of time and result in us incurring an impairment loss

We have affiliates and investees, accounted for under the equity method in our consolidated financial statements, whose shares are publicly traded. Under U.S. GAAP, if there is a decline in the fair value, *i.e.*, the market price, of the shares we hold in such affiliates over a period of time, and we determine that the decline is other-than-temporary, then we record an impairment loss for the applicable fiscal period.

We may face an outflow of clients' assets due to losses of cash reserve funds or bonds we offered

We offer many types of products to meet various needs of our clients with different risk profiles. Cash reserve funds, such as money management funds and money reserve funds are categorized as low-risk products. Such cash reserve funds may fall below par value as a result of losses caused by the rise of interest rates or the withdrawals or defaults on bonds contained in the portfolio. In addition, bonds that we offer may default or experience delays in their obligation to pay interest and/or principal. Such losses in the products we offer may result in the loss of client confidence and lead to an outflow of client assets from our custody.

Because of daily price range limitations under Japanese stock exchange rules, you may not be able to sell your shares of our common stock at a particular price on any particular trading day, or at all

Stock prices on Japanese stock exchanges are determined on a real-time basis by the equilibrium between bids and offers. These exchanges are order-driven markets without specialists or market makers to guide price formation. For the purpose of protecting investors from excessive volatility, these exchanges set daily upward and downward price fluctuation limits for each stock, based on the previous day's closing price. Although transactions may continue at the upward or downward limit price if the limit price is reached on a particular trading day, no transactions may take place outside these limits. Consequently, an investor wishing to sell at a price above or below the relevant daily limit may not be able to sell his or her shares at such price on a particular trading day, or at all.

Under Japan's unit share system, holders of our shares constituting less than one unit are subject to transfer, voting and other restrictions

Pursuant to the Companies Act of Japan (Companies Act), relating to joint stock corporations and certain related legislation, our Articles of Incorporation provide that 100 shares of our stock constitute one unit. The Companies Act imposes significant restrictions and limitations on holdings of shares that constitute less than a whole unit. Holders of shares constituting less than one unit do not have the right to vote or any other rights relating to voting. Under the unit share system, any holders of shares constituting less than a unit have the right to require us to purchase their shares. Also, any holders of shares constituting less than a unit may require us to sell them such number of shares as may be necessary to raise such holder's share ownership to a whole unit. Shares constituting less than a unit are transferable under the Companies Act, but may not be traded on any Japanese stock exchange.

As a holder of ADSs, you will have fewer rights than a shareholder has and you will have to act through the depositary to exercise these rights

The rights of the shareholders under Japanese law to take actions including voting their shares, receiving dividends and distributions, bringing derivative actions, examining the company's accounting books and records

Table of Contents

and exercising appraisal rights are available only to holders of record. Because the depositary, through its custodian agent, is the record holder of the shares underlying the ADSs, only the depositary can exercise those rights in connection with the deposited shares. The depositary will make efforts to vote the shares underlying your ADSs as instructed by you and will pay you the dividends and distributions collected from us. However, in your capacity as an ADS holder, you will not be able to bring a derivative action, examine our accounting books and records or exercise appraisal rights except through the depositary.

Rights of shareholders under Japanese law may be more limited than under the laws of other jurisdictions

Our Articles of Incorporation, our Regulations of the Board of Directors and the Companies Act govern our corporate affairs. Legal principles relating to such matters as the validity of corporate procedures, directors' and executive officers' fiduciary duties and shareholders' rights may be different from those that would apply to a non-Japanese company. Shareholders' rights under Japanese law may not be as extensive as shareholders' rights under the laws of other jurisdictions, including jurisdictions within the U.S. You may have more difficulty in asserting your rights as a shareholder than you would as a shareholder of a corporation organized in another jurisdiction.

Our shareholders of record on a record date may not receive the dividend they anticipate

The customary dividend payout practice of publicly listed companies in Japan may significantly differ from that widely followed or otherwise deemed necessary or fair in foreign markets. Our dividend payout practice is no exception. We ultimately determine the actual dividend payment amount to our shareholders of record as of a record date, including whether we will make any dividend payment to such shareholders at all, only after such record date. For the foregoing reasons, our shareholders of record on a record date may not receive the dividends they anticipate. Furthermore, we do not announce any dividend forecast.

It may not be possible for investors to effect service of process within the U.S. upon us or our directors or executive officers, or to enforce against us or those persons judgments obtained in U.S. courts predicated upon the civil liability provisions of the federal securities laws of the U.S.

We are a limited liability, joint-stock corporation incorporated under the laws of Japan. Most of our directors and executive officers reside in Japan. Many of our assets and the assets of these persons are located in Japan and elsewhere outside the U.S. It may not be possible, therefore, for U.S. investors to effect service of process within the U.S. upon us or these persons or to enforce against us or these persons judgments obtained in U.S. courts predicated upon the civil liability provisions of the federal securities laws of the U.S. We believe that there is doubt as to the enforceability in Japan, in original actions or in actions for enforcement of judgment of U.S. courts, of liabilities predicated solely upon the federal securities laws of U.S.

Special Note Regarding Forward-looking Statements

This annual report contains forward-looking statements that are based on our current expectations, assumptions, estimates and projections about our business, our industry and capital markets around the world. These forward-looking statements are subject to various risks and uncertainties. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as *may*, *will*, *expect*, *anticipate*, *estimate*, *plan* or similar words. These statements discuss future expectations, identify strategies, contain projections of our results of operations or financial condition, or state other forward-looking information.

Known and unknown risks, uncertainties and other factors may cause our actual results, performance, achievements or financial position to differ materially from any future results, performance, achievements or financial position expressed or implied by any forward-looking statement contained in this annual report. Such risks, uncertainties and other factors are set forth in this Item 3.D and elsewhere in this annual report.

Table of Contents

Item 4. Information on the Company

A. History and Development of the Company.

The Company (previously known as The Nomura Securities Co., Ltd.) was incorporated in Japan on December 25, 1925 under the Commercial Code of Japan when the securities division of The Osaka Nomura Bank, Ltd. became a separate entity specializing in the trading and distribution of debt securities in Japan. The Company was the first Japanese securities company to develop its business internationally with the opening in 1927 of a representative office in New York. In Japan, we broadened the scope of our business when we began trading in equity securities in 1938 and when we organized the first investment trust in Japan in 1941.

Since the end of World War II, we have played a leading role in most major developments in the Japanese securities market. These developments include the resumption of the investment trust business in the 1950s, the introduction of public stock offerings by Japanese companies in the 1960s, the development of the over-the-counter bond market in the 1970s, the introduction of new types of investment trusts such as the medium-term Japanese government bond investment trust in the 1980s, and the growth of the corporate bond and initial public offering markets in the 1990s.

Our expansion overseas accelerated in 1967, when the Company acquired a controlling interest in Nomura International (Hong Kong) Limited for the purpose of conducting broker-dealer activities in the Hong Kong capital markets. Subsequently, we established a number of other overseas subsidiaries, including Nomura Securities International, Inc. in the U.S. in 1969 as a broker dealer and Nomura International Limited, now Nomura International plc, in the U.K. in 1981, which acts as an underwriter and a broker, as well as other overseas affiliates, branches and representative offices.

On October 1, 2001, we adopted a holding company structure. In connection with this reorganization, the Company changed its name from The Nomura Securities Co., Ltd. to Nomura Holdings, Inc. The Company continues to be listed on the Tokyo Stock Exchange and other stock exchanges on which it was previously listed. A wholly-owned subsidiary of the Company assumed the Company's securities businesses and was named Nomura Securities Co., Ltd.

In December 2001, we listed our shares (in the form of American Depositary Shares evidenced by American Depositary Receipts) on the New York Stock Exchange.

We have also enhanced our asset management business through the acquisition of a majority interest in Nomura Asset Management Co., Ltd. (NAM) in March 2000. NAM became a wholly-owned subsidiary of Nomura in December 2001.

In June 2003, we adopted a committee-based corporate governance system under which we established the Nomination Committee, the Audit Committee and the Compensation Committee. See Item 6.C of this annual report.

In February 2007, we acquired Instinet Incorporated, a global agency broker and major provider of electronic trading services for institutional investors, to develop an electronic platform in global equities.

In a series of steps beginning in September 2008, we acquired certain operations, including personnel, of former Lehman Brothers in Asia, Europe and the Middle East.

The address of the Company's registered office is 9-1, Nihonbashi 1-chome, Chuo-ku, Tokyo 103-8645, Japan, telephone number: +81-3-5255-1000.

Table of Contents

B. Business Overview.

Overview

We are one of the leading financial services groups in Japan and have worldwide operations. As of March 31, 2012, we operated offices in over 30 countries and regions including Japan, the U.S., the U.K., Singapore and Hong Kong Special Administrative Region (Hong Kong) through our subsidiaries.

Our clients include individuals, corporations, financial institutions, governments and governmental agencies.

Our business consists of the following three divisions, each followed by its principal business:

Retail investment consultation services

Asset Management development and management of investment trusts, and investment advisory services

Wholesale serving corporations and institutional investors with a broad range of products and services

Nomura discloses segmental information elsewhere in this annual report and in our consolidated financial statements based on these Divisions.

Corporate Goals and Principles

Nomura Group is committed to a management vision of firmly establishing ourselves as a globally competitive financial services group. We will seek to realize this vision and increase shareholder value by strengthening our base in the Japanese securities businesses, developing world-class businesses in other regions, and consolidating our comprehensive global strength.

We will establish our new growth model by working with our clients, providing them with the best solutions, and realizing the expansion of our business in new domains. Our management target is to maintain an average consolidated return on shareholders' equity (ROE) of 10% to 15% over the medium to long-term. However, depending on developments in the environment faced by financial institutions, such as the instability of the global economic situation as well as regulatory tightening by the Basel Committee on Banking Supervision and other financial regulators, we cannot discount the possibility that we may be impacted.

Nomura Group will continue to put high priority on compliance with applicable laws, regulations and proper corporate behavior, and to build compliance into our daily business operations.

Our Business Divisions

Retail

In Retail, we conduct business activities mainly for individuals and corporations in Japan primarily through a network of nationwide branches of Nomura Securities Co., Ltd. (NSC). The total number of its head office and local branches was 178 as of the end of March 2012. We offer investment consultation services to meet the medium to long-term needs of our clients. The aggregate market value of our retail client assets increased to ¥72.0 trillion as of the end of March 2012 from ¥70.6 trillion a year ago. We discuss retail client assets in *Retail Client Assets* under Item 5.A of this annual report.

In order to execute our business strategy, we employ various methods to deliver our services to clients. These include face-to-face meetings with our Financial Advisors, either in our branch offices or through client visits, communications through internet-based trading services, or through our call centers.

Table of Contents

We capitalize on the linkages between the Retail, the Asset Management and the Wholesale Divisions to offer various financial instruments such as stocks, debt securities, investment trusts and variable annuity insurance products, for the short, medium, and long-term, with different risk levels. We seek to provide proprietary Nomura expertise to clients through various media such as our investment reports and internet-based trading services.

Asset Management

We conduct our asset management business, which consists of the development and management of investment trusts and investment advisory services, primarily through NAM. NAM is the largest asset management company in Japan in terms of assets under management in investment trusts as of March 31, 2012. In Japan, our challenge is to shift individual financial assets from saving products into investment products to create business opportunities. In order to make these opportunities available, NAM manages various investment trusts, ranging from low risk/low return products to high risk/high return products, and develops new products to respond to various investor needs. Investment trusts are distributed to investors through NSC as well as through financial institutions such as securities companies (including those outside our group), banks and Japan Post Bank Co., Ltd. Investment trusts are also offered in defined contribution pension plans. We also provide investment advisory services to public pensions, private pensions, governments and their agencies, central banks and institutional investors.

Wholesale

In the fiscal year ended March 2012, our Wholesale Division consisted of Global Markets, Investment Banking and certain other non-Retail operations. We formed this division in April 2010 to promote seamless coordination between these underlying businesses and to provide our corporate and institutional clients with timely, high value-added services tailored to their needs.

Fixed Income

Fixed Income conducts sales, trading and market-making of fixed income-related products on a global basis. Our fixed income offerings include, among other products, government securities, interest-rate derivatives, investment-grade and high-yield corporate bonds, credit derivatives, G-10 and emerging markets foreign exchange, asset-backed securities and mortgage-related products, in over-the-counter (OTC) and listed markets. Nomura also undertake primary dealership business in the Japanese government securities market as well as in the Asian, European and U.S. markets. These product offerings are underpinned by our global structuring function which tailors ideas and trading strategies for our institutional and corporate client base.

Equities

Equities conducts sales, trading and market-making of equity-related products globally, including common stock, convertible securities, futures, options and OTC equity-linked derivatives. In addition, we offer execution services based on cutting-edge technologies such as electronic trading. Nomura is also a member of various exchanges around the world, with leading positions on the London and Tokyo stock exchanges.

Investment Banking

We offer a broad range of investment banking services to a diverse range of corporations, financial institutions, sovereigns, investment funds and others. We aim to develop and fortify solid relationships with these clients on a long-term basis by providing them with our extensive resources for each bespoke solution.

Underwriting. We underwrite offerings of a wide range of securities and other financial instruments, which include various types of stocks, convertible and exchangeable securities, investment grade debt, sovereign and

Table of Contents

emerging market debt, high yield debt, structured securities and other securities in Asia, Europe, U.S. and other major financial markets. We also arrange private placements and engage in other capital raising activities. We are one of the leading equity and fixed income securities underwriters in Japan.

Financial Advisory & Solutions Services. We provide financial advisory services on business transactions including mergers and acquisitions, divestitures, spin-offs, capital structuring, corporate defense activities, leveraged buyouts and risk solutions. Our involvement in initial public offerings (IPOs), reorganizations and other corporate restructurings related to industry consolidation enhance our opportunities to offer clients other advisory and investment banking services. We are one of the leading financial advisors in Asia and EMEA.

Private Equity. We operate private equity investment business mainly in Japan and Europe. For a further description of our private equity business, see Item 5.A *Private Equity Business* of this annual report.

Our Research Activities

We have an extensive network of intellectual capital with key research offices in Tokyo, Hong Kong and other major markets in Asia-Pacific, London and New York. Nomura is recognized as a leading content provider with an integrated global approach to providing capital markets research. Our Japan Equity Research team continues to top the Institutional Investor and Nikkei Veritas research polls. Our Fixed Income Research teams around the globe have gained top tier positions in external surveys and with clients; notably, the Japan Fixed Income team ranked number one for the second straight year in the fixed income analyst/economist ranking on Nikkei Veritas.

Our Information Technology

We believe that information technology is one of the key success factors for our overall business and intend to develop and maintain a solid technology platform to ensure that the firm is able to fulfill the various needs of our clients. Accordingly, we will continue to build a technology platform suitable for each business segment.

For example, for our retail clients, we provide internet-based trading services and current status reports on asset portfolios, investments and transactions and investment information, including our research reports through the internet or mobile phones.

On the wholesale side, we have enhanced our technology platforms to provide better risk management and also to increase trading capabilities through platforms allowing Direct Market Access and Algorithmic trading. We also plan to further leverage our service entities in India to support our wholesale operations.

Competition

The financial services industry is intensely competitive and we expect it to continue remain so. We compete globally with other brokers and dealers, investment banking firms, commercial banks, investment advisors and other financial services firms. We also face competition on regional, product and niche bases from local and specialist firms. A number of factors determine our competitive position against other firms, including:

the quality, range and prices of our products and services,

our ability to originate and develop innovative client solutions,

our ability to maintain and develop client relationships,

our ability to access and commit capital resources,

our ability to retain and attract qualified employees, and

our general reputation.

Table of Contents

Our competitive position is also affected by the overall condition of the global financial markets, which are influenced by factors such as:

the monetary and fiscal policies of national governments and international economic organizations, and

economic developments both within and between Japan, the U.S., Europe and other major industrialized and developing countries and regions.

In Japan, we compete with other Japanese and non-Japanese securities companies and other financial institutions. Competition has become more intense due to deregulation in the Japanese financial industry since the late 1990s and the increased presence of global securities companies and other financial institutions. In particular, major global firms have increased their presence in securities underwriting, corporate advisory services (particularly, mergers and acquisitions (M&A) advisory) and secondary securities sales and trading.

There has also been substantial consolidation and convergence among financial institutions, both within Japan and globally and this trend accelerated further in recent years as the credit crisis caused mergers and acquisitions and asset acquisitions in the industry. The growing presence and scale of financial groups which encompass commercial banking, securities brokerage, investment banking and other financial services has led to increased competition. Through their broadened offerings, these firms are able to create good client relationships and leverage their existing client base in the brokerage and investment banking business as well.

In addition to the breadth of their products and services, these firms have the ability to pursue greater market share in investment banking and securities products by reducing margins and relying on their commercial banking, asset management, insurance and other financial services activities. This has resulted in pricing pressure in our investment banking and trading businesses and could result in pricing pressure in other areas of our businesses. We have also competed, and expect to compete, with other financial institutions which commit capital to businesses or transactions for market share in investment banking activities. In particular, corporate clients may seek loans or commitments in connection with investment banking mandates and other assignments.

Moreover, the trend toward consolidation and convergence has significantly increased the capital base and geographic reach of some of our competitors, hastening the globalization of the securities and financial services markets. To accommodate this trend, we will have to compete successfully with financial institutions that are large and well-capitalized, and that may have a stronger local presence and longer operating history outside Japan.

Regulation

Japan

Regulation of the Securities Industry and Securities Companies. Pursuant to the FIEA, the Prime Minister of Japan has the authority to supervise and regulate the securities industry and securities companies, and delegates its authority to the Commissioner of the FSA. The Company, as a holding company of a securities company, as well as its subsidiaries including NSC are subject to such supervision and regulation by the FSA. The Commissioner of the FSA delegates certain authority to the Director General of Local Finance Bureaus to inspect local securities companies and branches. Furthermore, the Securities and Exchange Surveillance Commission, an external agency of the FSA which is independent from the Agency's other bureaus, is vested with authority to conduct day-to-day monitoring of the securities markets and to investigate irregular activities that hinder the fair trading of securities, including inspection of securities companies. Securities companies are also subject to the rules and regulations of the Japanese stock exchanges and the Japan Securities Dealers Association, a self-regulatory organization of the securities industry.

To enhance investor protection, each Japanese securities company is required to segregate client assets and to hold membership in an Investor Protection Fund approved by the government under the FIEA. The Investor Protection Fund is funded through assessments on its securities company members. In the event of failure of a

Table of Contents

securities company that is a member of the fund, the Investor Protection Fund provides protection of up to ¥10 million per client. The Investor Protection Fund covers claims related to securities deposited by clients with the failed securities company and certain other client claims.

Regulation of Other Financial Services. Securities companies are not permitted to conduct banking or other financial services directly, except for those which are registered as money lenders and engaged in money lending business under the Money Lending Business Act or which hold permission to act as bank agents and conduct banking agency activities under the Banking Law. As a result, NSC is prohibited from conducting banking and other financial services, and another subsidiary of the Company, The Nomura Trust & Banking Co., Ltd., engages in banking and certain financial services.

Financial Instruments and Exchange Act. The FIEA widely regulates financial products and services in Japan under the defined terms "financial instruments" and "financial instruments trading business". It regulates most aspects of securities transactions and the securities industry, including public offerings, private placements and secondary trading of securities, on-going disclosure by securities issuers, tender offers for securities, organization and operation of securities exchanges and self-regulatory associations, and registration of securities companies. In addition, to enhance fairness and transparency in the financial markets and to protect investors, the FIEA provides for, among other things, penalties for misrepresentations in disclosure documents and unfair trading, strict reporting obligations for large shareholders and corporate information disclosure systems, including annual and quarterly report systems, submission of confirmation certificates concerning the descriptions in securities reports, and internal controls over financial reporting.

The FIEA also provides for corporate group regulations on securities companies the size of which exceeds specified parameters (*tokubetsu kinyu shouhin torihiki gyosha*, "Special Financial Instruments Firm") and on certain parent companies designated by the Prime Minister (*shitei oyagaisha*, "Designated Parent Companies") and their subsidiaries (together the "Designated Parent Company Group"). The FIEA aims to regulate and strengthen business management system, compliance system and risk management system to ensure the protection of investors. The FIEA and its related guideline also provide reporting requirement to the FSA on the Designated Parent Company Group's business and capital adequacy ratio, enhanced public disclosures as well as restrictions on the compensation system, which are designed to reduce excessive risk taking by their executives and employees within the Designated Parent Company Group. We have been designated as the final parent company of Designated Parent Companies within a corporate group (*saishu shitei oyagaisha*, "a Final Designated Parent Company") in April 2011 and are subject to these requirements. A violation of the FIEA may result in various administrative sanctions, including the revocation of registration or license, the suspension of business or an order to discharge any director or executive officer who has failed to comply with the FIEA.

Regulatory Changes. On March 9, 2012, a bill to amend the FIEA was submitted to the Diet. A part of the amendment, based on the declaration reached at the G20 Pittsburgh Summit in September 2009 to enhance transparency of the settlement of OTC derivative transactions, requires Financial Instruments Business Operators to trade certain OTC derivative contracts through electronic trading platform and to report such OTC derivative contracts to repositories. The amendment is scheduled to become effective within three years from its promulgation.

Overseas

Our overseas offices and subsidiaries are also subject to various laws, rules and regulations applicable in the countries where they carry on their operations, including, but not limited to, those promulgated and enforced by the Securities and Exchange Commission, the Commodity Futures Trading Commission, the New York Stock Exchange and the Financial Industry Regulatory Authority (a non-governmental regulator for all securities companies doing business in the U.S.) in the U.S. and by the Financial Services Authority and the London Stock Exchange plc in the U.K. We are also subject to regulations in various countries regarding international money laundering and related issues. For example, the USA Patriot Act of 2011 contains measures to prevent, detect and

Table of Contents

prosecute terrorism and international money laundering by imposing significant compliance and due diligence obligations, creating crimes and penalties. Failure to comply with such laws, rules or regulations could result in fines, suspension or expulsion, which could have a material adverse effect upon us.

Regulatory Changes. In response to the financial markets crisis, governments and regulatory authorities in various jurisdictions have made and continue to make numerous proposals to reform the regulatory framework for, or impose a tax or levy upon, the financial services industry to enhance its resilience against future crises, contribute to the relevant economy generally or for other purposes. In July 2010, the U.S. enacted the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) which is now the subject of a multi-agency rulemaking process. The rulemakings include, among others, (i) creating a tighter regulatory framework for OTC derivatives; (ii) establishing a process for designating nonbank financial firms as systemic, subject to increased prudential standards and regulatory oversight (U.S. SIFIs); (iii) prohibiting material conflicts of interest between those who package and sell asset-backed securities (ABS) and those who invest in them; and (iv) establishing risk retention requirements for ABS. Other aspects of the Dodd-Frank Act and related rulemakings include provisions that (i) prohibit deposit-taking banks and their affiliates from engaging in proprietary trading and limit their ability to make investments in hedge funds and private equity funds (the so-called Volcker Rule); (ii) empower regulators to liquidate failing nonbank financial companies that are systemically important; (iii) provide for new systemic risk oversight and increased capital requirements for both bank and non-bank U.S. SIFIs; (iv) provide for a broader regulatory oversight of hedge funds; and (v) new regulations regarding the role of credit rating agencies, investment advisors and others. The exact details of the implementation of the Dodd-Frank Act and its impact on Nomura's operations will depend on the final regulations as they become ultimately adopted by various governmental agencies and oversight boards.

On July 19, 2011, the Financial Stability Board published a consultative document to establish a global framework to improve the capacity of authorities to resolve failing systemically important financial institutions without systemic disruption and exposing taxpayers to the risk of loss. The proposed measures require G-SIFIs to prepare and maintain recovery and resolution plans (RRPs) by December 2012. In light of such global framework, on August 9, 2011, the Financial Services Authority in the U.K. (U.K. FSA) published a consultation on its proposals for RRP. The consultation covered the requirement for banks and large investment firms in the U.K. and not limited to G-SIFIs, to prepare and maintain RRP, while a separate discussion paper explores matters relevant to the resolution of financial services firms, including the resolution of trading books, enhancing the resolution toolkit and bail-ins. In April 2012 the U.K. FSA published a feedback statement setting out the approach being taken by the U.K. FSA to ensure firms develop appropriate recovery plans and resolution packs. The feedback statement provides firms with clarity regarding what they are expected to do while final rules are being adjusted to take into account developments in the international arena. A draft of the core rules was published with the feedback statement and final rules are expected in the autumn of 2012.

On October 20, 2011 the European Commission published draft legislation for MiFID II. The draft legislation has been split into two parts: the Markets in Financial Instruments Directive and the Markets in Financial Instruments Regulation (MiFIR). The draft legislation seeks to introduce wide reaching changes to markets, including the extension of market transparency rules into non-equities and potentially reducing the size of the OTC derivative market by pushing derivatives onto exchanges.

On October 20, 2011 the European Commission published draft legislation for the review of the Market Abuse Directive (MAD II). The dossier has been split into two parts: the Market Abuse Directive and the Market Abuse Regulation. The draft legislation seeks to strengthen market abuse provisions and introduce measures allowing for effective deterrent of market abuse behaviors.

In early 2013 the Financial Services and Markets Bill 2010 is expected to be formally enacted which will see U.K. financial services regulation split into a twin peaks approach. The Prudential Regulatory Authority (PRA) will be formed as a subsidiary of the Bank of England and will be responsible for the prudential supervision of a number of large deposit takers, investment firms and insurers. The Financial Conduct Authority

Table of Contents

(FCA) will be a separate entity and will be responsible for the prudential supervision of firms not supervised by the PRA and for market conduct matters for all authorized firms. Ahead of this formal structure being put in place, the FSA has, as an interim measure, separated itself into two main operating units internally, the Prudential Business Unit and the Conduct Business Unit mirroring the scope of activities the PRA and FCA will carry out.

Regulatory Capital Rules

Japan

The FIEA requires that all Financial Instruments Firms (Category I) (Financial Instruments Firms I), a category that includes NSC, ensure that their capital adequacy ratios do not fall below 120% on a non-consolidated basis. The FIEA also requires Financial Instruments Firms I to file month-end reports regarding their capital adequacy ratios with the Commissioner of the FSA or the Director-General of the appropriate Local Finance Bureau, and also to disclose their capital adequacy ratios to the public on a quarterly basis. In addition, if the capital adequacy ratio of a Financial Instruments Firm I falls below 140%, it must file a daily report with the authorities. The FIEA provides for actions which the Prime Minister, through the Commissioner of the FSA or the Director-General of the appropriate Local Finance Bureau, may take if any Financial Instruments Firm I fails to meet the capital adequacy requirement. More specifically, if the capital adequacy ratio of any Financial Instruments Firms I falls below 120%, the Commissioner of the FSA or the Director-General of the appropriate Local Finance Bureau may order the Financial Instruments Firm I to change its business conduct, to deposit its property in trust, or may issue any other supervisory order that such authorities deem necessary and appropriate to protect the interests of the general public or investors. If the capital adequacy ratio of a Financial Instruments Firm I falls below 100%, the authorities may take further action, including the issuance of orders to temporarily suspend its business and the revocation of its registration as a Financial Instruments Firm I under the FIEA.

Under the FIEA and regulations thereunder, the capital adequacy ratio means the ratio of adjusted capital to a quantified total of business risks. Adjusted capital is defined as net worth less illiquid assets. Net worth mainly consists of stated capital, additional paid-in capital, retained earnings, reserves for securities transactions, certain allowances for doubtful current accounts, net unrealized gains/losses in the market value of investment securities, and subordinated debt. Illiquid assets generally include non-current assets, certain deposits and advances and prepaid expenses. The business risks are divided into three categories: (i) market risks (i.e., risks of asset value changes due to decline in market values and other reasons), (ii) counterparty risks (i.e., risks of delinquency of counterparties and other reasons) and (iii) basic risks (i.e., risks in carrying out daily business activities, such as administrative problems with securities transactions and clerical mistakes), each quantified in the manner specified in a rule promulgated under the FIEA.

We closely monitor the capital adequacy ratio of NSC on a continuous basis. Since the introduction of the capital adequacy requirement in Japan in 1989, we have at all times been in compliance with these requirements. We believe that we will continue to be in compliance with all applicable capital adequacy requirements in the foreseeable future.

Under the Guideline for Financial Conglomerates Supervision, established by the FSA in June 2005, a financial conglomerate is defined as a corporate group, including two or more different types of financial institutions, such as a securities company and a bank. Nomura is classified as a financial conglomerate. Similar to Financial Instruments Firms I, financial conglomerates are required to maintain 100% capital adequacy ratio on a consolidated basis, unless otherwise specified by other law or notice. The Financial Instruments Business Operators Guidelines, when established by the FSA in July 2007, required corporate groups of financial instruments firms engaging in international operations to report their consolidated capital adequacy ratios to the Commissioner of the FSA semi-annually and additionally if the ratio falls below 120%.

Until the end of March 2011, the Company calculated its consolidated capital adequacy ratio according to the Criteria for bank holding companies to judge whether their capital adequacy status is appropriate in light of their own and their subsidiaries' asset holdings, etc. under Article 52-25 of the Banking Act (the Bank Holding

Table of Contents

Companies Notice), as permitted under the provision in the Comprehensive Guidelines for Supervision of Financial Instruments Business Operators, etc. . The capital adequacy ratio (the ratio of adjusted capital to quantified total risk-weighted assets) required to be maintained by bank holding companies with international operations under the Bank Holding Companies Notice is 8.0% on a consolidated basis. We elected to calculate our capital adequacy ratio in accordance with the Bank Holding Companies Notice beginning on March 31, 2009.

As discussed above, the FSA amended the FIEA and introduced new rules on consolidated regulation and supervision of securities companies on consolidated basis on April 1, 2011 to improve the stability and transparency of Japan's financial system and ensure the protection of investors. The FSA also amended the FIEA to include reporting on consolidated regulatory capital for the Final Designated Parent Companies. On the introduction of these rules, NSC was designated as a Special Financial Instruments Firm, following which we have been designated as a Final Designated Parent Company. As such, we are required to calculate consolidated regulatory capital adequacy ratio according to the FSA's

Establishment of standards on sufficiency of capital stock of a final designated parent company and its subsidiary entities, etc. compared to the assets held thereby (2010 FSA Regulatory Notice No. 130; Capital Adequacy Notice on Final Designated Parent Company). Accordingly, since our designation as a Final Designated Parent Company in April 2011, we now calculate our Basel II-based consolidated regulatory capital adequacy ratio according to the Capital Adequacy Notice on Final Designated Parent Company.

The FSA also amended the FIEA to include reporting on consolidated regulatory capital for the Final Designated Parent Companies, effective April 1, 2011. We are subject to this reporting requirements as well as the capital adequacy requirements described above.

The FSA reviewed the Capital Adequacy Notice on Final Designated Parent Company in line with Basel 2.5 framework and the revised notice for Basel 2.5 was implemented at the end of December 2011. We are required to calculate the market risk requirement under the Basel 2.5 rule, which is significantly larger than under the Basel II rule.

If our capital ratios fall to the minimum level required by the FSA, our business activities may be impacted. However, these ratios are currently at well capitalized levels. We have met all capital adequacy requirements to which we are subject and have consistently operated in excess of the FSA's capital adequacy requirements. Subject to future developments in regulatory capital regulations and standards, there has been no significant change in our capital ratios which the management believes would have material impact on our operations.

The Basel Committee has issued a series of announcements regarding a broader program to strengthen the regulatory capital framework in light of weaknesses revealed by the financial crises, as described in *Consolidated Regulatory Requirements* under Item 5.B of this annual report. The Capital Adequacy Notice on Final Designated Parent Company is expected to incorporate the series of rules and standards in line with the schedule proposed by the Basel Committee.

Overseas

In the U.S., Nomura Securities International, Inc. (NSI) is a registered broker-dealer and registered futures commission merchant. As such, NSI is subject to the minimum net capital requirements of the U.S. Securities and Exchange Commission and the Commodity Futures Trading Commission. NSI is regulated by self-regulatory organizations, such as the Financial Industry Regulatory Authority and the Chicago Mercantile Exchange Group exchanges. These requirements specify minimum levels of capital that U.S. broker-dealers are required to maintain and limit the amount of leverage that such broker-dealers may use in their businesses. As a primary dealer of U.S. government securities, NSI is also subject to the capital adequacy requirements under the Government Securities Act of 1986.

Table of Contents

In Europe, the Nomura Europe Holdings plc group is regulated under consolidated supervision by the Financial Services Authority in the U.K. Various banking and broker/dealer subsidiaries of the group are regulated on a stand alone basis by their appropriate local regulators.

In addition, certain of our other subsidiaries are subject to various securities and banking regulations, and the capital adequacy requirements established by the regulatory and exchange authorities of the countries in which those subsidiaries operate. We believe that each such subsidiary is, and will in the foreseeable future be, in compliance with these requirements in all material respects.

Management Challenges and Strategies

The global financial and economic environment continues to be challenging as regulatory tightening over financial institutions progresses and due to destabilizing factors such as the European sovereign debt crisis. Although the market has been returning to stable growth since the beginning of 2012, the uncertainty in economy persists again, and complete recovery is expected to take considerable time. Under these management conditions, we will allocate management resources appropriately to pursue efficiency and sharpen our competitive edge, as well as to increase profitability by streamlining business processes.

Further, using our robust financial platform, a competitive advantage of Nomura, we will continue to provide services and solutions responding nimbly to changes in market conditions, financial business environments and client demands and fulfill our corporate social responsibility to contribute to a forum for steady liquidity through the market.

To achieve our strategic goals, we will implement the following initiatives:

Retail Division

In our Retail Division, we will continue to expand our products and service offerings, which are provided through Financial Advisors, online or via call centers to accommodate increasingly sophisticated and diverse client needs. We aim to enhance investment consultation services and to continue being a trusted partner to our clients by providing world-class products and services that meet their individual needs.

Asset Management Division

In our investment trust business, we provide individual clients with a diverse range of investment opportunities to meet investors' various demands and in investment advisory business, we provide institutional clients globally with value-added investment services. We intend to increase assets under management and expand our client base for these two core businesses.

We aim to enhance our world-class competitive advantage in Japan and the rest of Asia by making continuous efforts to improve investment performance and gain the trust of investors worldwide.

Wholesale Division

Our Wholesale Division consists of Fixed Income and Equities, which offer sales and trading of financial products and origination services, and Investment Banking which offers a broad range of financial advisory and financing solutions services.

Fixed Income and Equities, the market-related businesses, have been focusing on delivering high value-added products and solutions to our clients by leveraging our sophisticated trading expertise, intellectual capital in research and structuring and our global distribution capabilities. In Fixed Income, we will build further on our client-centric strategy globally, and in Equities, we will continue to build our leadership position further across Asia, leveraging our strength in Japan, and target further growth across our strengthened platforms in EMEA and the US based on our existing strategies.

Table of Contents

In Investment Banking, we are expanding our M&A advisory and corporate finance businesses to diversify sources of profit by providing high value-added solutions in a timely manner to meet the individual needs of each client.

Also in the Wholesale Division, cross-business and cross-regional cooperation are increasingly important elements of our Wholesale strategy to satisfy client needs. As a global financial services group, we will continue to strive collectively to further our growth through our geographic advantage in Asia where economic development and a deepening of our clients' footprint is expected. We aim to enhance our presence as a global investment bank providing world-class services, by enhancing regional integration and business coordination between Japan and the rest of Asia and utilizing our global business platform.

In implementing the initiatives outlined above, we aim to bring together the collective strengths of our domestic and international operations to realize our management objectives and to maximize shareholder value by enhancing profitability across our businesses, while helping to strengthen the global financial and capital markets.

We recognize that it is necessary to further strengthen and streamline our global risk management and we are pursuing a proactive, rather than a reactive, risk management approach. We will continue to develop a system where senior management directly engage in a proactive risk management approach for precise decision making.

As our business becomes increasingly international and diverse, we recognize the growing importance of compliance. In addition to complying with local laws and regulations in the countries that we operate, we view compliance in a wider context. We will further enhance our existing overall compliance system with initiatives towards promoting an environment of professionalism and high ethical standards among executive management to meet the expectations of society and clients and contribute to the further development of the financial and capital markets.

We view talented personnel as key assets. In line with our basic client-oriented business approach, we have established globally-uniform personnel policies firmly rooted in the belief that employees should be rewarded for their overall performance. We will continue to build a professional organization capable of delivering a comprehensive range of services that satisfy our clients.

Table of Contents

D. Property, Plants and Equipment.

Our Properties

As of March 31, 2012, our principal head office is located in Tokyo, Japan and occupies 1,016,132 square feet of office space. Our other major offices in Japan are our Osaka branch office, which occupies 125,218 square feet, our Nagoya branch office, which occupies 82,918 square feet, and the head office of NAM in Tokyo, which occupies 157,228 square feet. On May 24, 2011, Nomura acquired additional shares of common stock issued by one of its affiliated companies, Nomura Land and Building Co., Ltd. (NLB), converting NLB into a consolidated subsidiary of Nomura. As a result, Nomura consolidated the properties of NLB and its subsidiaries. See Note 11 *Business combinations* to our consolidated financial statements.

As of March 31, 2012, our major offices outside Japan are the head offices of Nomura International plc (NIP) located in London, which occupies 496,458 square feet, the New York head office of Nomura Securities International, Inc., which occupies 183,130 square feet, and offices of Nomura International (Hong Kong) Limited located in Hong Kong which occupies 160,436 square feet. We own the buildings and we either own or lease the land for the offices in London. We lease most of our other overseas office space.

As of March 31, 2012, the major office of Nomura Services India Private Limited, our specialized service company in India, occupies 476,271 square feet.

As of March 31, 2012, the aggregate book value of the land and buildings we owned, including capital leases was ¥830 billion, and the aggregate book value of equipment we owned, including communications and data processing facilities, was ¥61 billion.

In August 2009 a Nomura consolidated subsidiary, Nomura Properties plc (NPP) entered into a 20 year lease as tenant of a 525,000-square-foot development at 1 Angel Lane in London in the U.K. Construction was completed in December 2010 and the building is now used as our European headquarters.

Item 4A. Unresolved Staff Comments

We are a large accelerated filer as defined in Rule 12b-2 under the Securities Exchange Act of 1934. There are no written comments which have been provided by the staff of the Securities and Exchange Commission regarding our periodic reports under that Act not less than 180 days before the end of the fiscal year ended March 31, 2012 and which remain unresolved as of the date of the filing of this annual report with the Commission.

Item 5. Operating and Financial Review and Prospects

A. Operating Results.

You should read the following discussion of our operating and financial review and prospects together with Item 3.A Selected Financial Data of this annual report and our consolidated financial statements included elsewhere in this annual report.

This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of factors, including, but not limited to, those under Item 3.D Risk Factors and elsewhere in this annual report.

Business Environment

Japan

During the year ended March 31, 2012, the Japanese economy rebounded swiftly from the effects of the East Japan Earthquake, which caused disruption to operations and distribution networks particularly in the manufacturing industry. As a whole, however, the economy remained directionless, with the initial recovery later slowing as a result of delays in formulating post-quake reconstruction plans, the strengthening of the yen against the

Table of Contents

backdrop of the European sovereign debt crisis, and the widespread flooding in Thailand. Toward the end of the fiscal year, signs of a pickup in the economy emerged, including growth in automobile production, as reconstruction demand began to increase and the impact of the Thai floods eased. Within this environment, Japan's real gross domestic product (GDP) in the fiscal year ended March 31, 2012 showed the first contraction in two years, being slightly below 0% year on year, after having risen 3.2% in the prior fiscal year. With the Japanese economy having avoided a recession, meanwhile, the employment environment on the whole continued to stage a moderate recovery.

With regard to corporate earnings, Japanese companies' sales weakened in the fiscal year ended March 31, 2012 amid the disruptions to operations and distribution networks mainly in the manufacturing industry due to the East Japan Earthquake that occurred towards the end of the prior fiscal year, the strong yen, and the Thai floods. Some companies undertook restructuring measures to cope with these events, leading to a reduction in profits in the fiscal year ended March 31, 2012 particularly in the manufacturing industry. We estimate that recurring profits at major companies (Russell/Nomura Large Cap Index) declined by around 15% in the fiscal year ended March 31, 2012. Excluding weakness in the utilities sector, the nonmanufacturing sector performed solidly on the whole and provided support to corporate earnings.

In the stock market, major share price indices declined at first in the fiscal year ended March 31, 2012, then subsequently regained the levels of the prior fiscal year. Stocks rallied after sharp falls following the East Japan Earthquake in March 2011, but later trended downward again owing to the European sovereign debt crisis and the negative effects of the yen appreciation that resulted. Further into the fiscal year, stocks rebounded again as concerns over the European crisis eased and the strong yen corrected. The Tokyo Stock Price Index (TOPIX), after peaking in July 2011, declined through November 2011, then rose through March 2012. The TOPIX had fallen from 978.81 points at the end of March 2010 to 869.38 points at the end of March 2011, a decline of 11.2% over the fiscal year, then declined to 854.35 points at the end of March 2012, a further fall of 1.7%. The Nikkei Stock Average rose over the fiscal year as a whole, by 3.4%, from ¥9,755.10 at the end of March 2011 to ¥10,083.56 at the end of March 2012.

Yields on newly issued 10-year Japanese government bonds were at the 1.3% level in early April 2011, partly owing to concerns that Japan's sovereign debt would expand in line with post-quake reconstruction demand, but fell to the 0.9% level in November 2011 against a backdrop of share price declines. Although stocks later rallied, yields traded in a narrow range near the 1.0% mark and as of the end of March 2012 were around 0.98%. Despite concerns over Japan's expanding sovereign debt, interest rates stayed low amid expectations of further monetary easing by the Bank of Japan and other factors.

On the foreign exchange markets, the yen was influenced by changes in market expectations toward overseas policy, including concerns about the European sovereign debt crisis. At the end of March 2011, the yen was trading at the ¥83 level against the U.S. dollar and the ¥117 level against the euro. The U.S. dollar weakened against the yen from July 2011 as the view spread that reignited concerns over sovereign debt in Europe would adversely affect the U.S. and global economies and the yen was at the ¥75 level versus the U.S. dollar at the end of October 2011. The yen later corrected as the Japanese Ministry of Finance conducted yen-selling intervention and the market volatility stemming from Europe eased. At the end of March 2012, the yen was at the ¥83 level versus the U.S. dollar. Against the euro, the yen appreciated amid renewed concerns about Greece's sovereign debt and fears about how the European economy would be impacted by contagion to other countries, and in the wake of monetary easing by the European Central Bank (ECB). However, the yen later corrected against the euro as concerns over expanding sovereign debt eased, and the yen moved from the ¥97 level in January 2012 to about ¥111 at the end of March 2012.

Overseas

The economies of the leading industrialized nations showed slightly different pictures for the year ended March 31, 2012. The U.S. economy was supported by quantitative monetary easing, but the European economy deteriorated as a result of a credit crunch owing to the effects of the sovereign debt crisis, and fiscal austerity measures to address debt problems. In international commodity markets, prices lacked direction as investors took

Table of Contents

a risk-averse stance and emerging economies slowed. While curbing rising real estate prices remains a challenge, China ended a phase of monetary tightening as its economy slowed. In emerging markets, several countries implemented monetary easing to stimulate their economies.

U.S. real GDP grew by 3.0% year-on-year in 2010 but growth decelerated to 1.7% in 2011. Corporate earnings nonetheless improved in the second half of 2011 with support from policy measures, and growth picked up slightly on an upturn in the capex and employment environments. With the real estate market slow to recover, however, monetary policy tools continued to underpin the economy.

The Federal Reserve Board (FRB) sought to shift to a neutral policy stance, but again provided support to the U.S. economy and declared its intent to continue with easing. The FRB held the federal funds rate at 0.25%, effectively maintaining a zero interest rate policy, and in June 2011 it temporarily halted an operation in which it had been increasing the supply of funds by purchasing U.S. Treasuries on the bond market. However, as fears about the European sovereign debt crisis again destabilized financial markets, raising concerns about the adverse effects on the real economy, the FRB announced in August 2011 that it would maintain its near zero interest rate policy through the first half of 2013, and continued to reassure markets thereafter with further suggestions that monetary easing would be sustained. US stock markets declined on the resurfacing of the European sovereign debt crisis but subsequently rallied after the FRB said it would continue with monetary easing and concerns over European sovereign debt subsided. The Dow Jones Industrial Average stood at 12,319.73 at the end of March 2011 then fell below 11,000 in August 2011 before rallying to 13,212.04 at the end of March 2012. The yield on 10-year U.S. Treasuries was around 3.5% in March 2011, fell to around 1.7% in September 2011 amid stock market declines and expectations of ongoing FRB easing, then moved to around the 2.0% mark by March 2012.

In Europe, Eurozone real GDP growth slowed from 1.9% year-on-year in 2010 to 1.5% in 2011, but the overall economic situation worsened as a credit crunch took hold due to the effects of the sovereign debt crisis and as governments adopted austerity measures to address their debt problems. While the ECB's monetary easing and three-year loans to provide cash funding to financial institutions have mitigated the negative impact on the economy, concerns over sovereign risk have yet to be eliminated and remain a destabilizing factor for markets. European stock markets fell on growing market concerns but subsequently rallied, with the result that the benchmark German stock index (DAX) declined by about 1% during the year ended March 31, 2012.

The slowdown in Asia ex-Japan economies became more pronounced in 2011 even as inflationary concerns eased to some extent. Real GDP growth in China in 2011 was 9.2%, versus 10.3% in 2010. Growth in domestic demand centering on investment has been driving the Chinese economy, but investment in real estate weakened in the second half of 2011 as a result of monetary tightening, and exports also decelerated due to the worsening economic situation in Europe. With signs of more settled growth in consumer prices starting to emerge, Chinese authorities may shift the focus of monetary policy while continuing to curb the rise in real estate prices. The key question is whether the government can follow a path of sustainable economic management that achieves a balance between economic growth and inflation curbs.

Executive Summary

In the fiscal year ended March 31, 2012, the global economic recovery trend weakened in association with multiple factors, including international financial market turmoil stemming from sovereign debt problems in Europe, weak consumption in industrialized nations, concerns about an economic slowdown in China and other emerging countries, political instability in the Middle East, as well as rising crude oil prices. There was a dramatic increase in economic uncertainty, and on a global basis accelerated risk-averse sentiment towards risk assets like stocks. Meanwhile, the Japanese economy lost speed as the East Japan Earthquake caused a decline in exports due to disruptions in product supply networks, the rapid and significant appreciation of the yen, which hit the 75 yen per dollar range at one point, along with the impact of the flooding in Thailand. Since the end of last year, there has been a bit of a recovery in economic sentiment attributable to momentary easing concerns about

Table of Contents

the European debt problem, an improvement in U.S. economic indicators, the emergence of restoration-related demand and a recovery in automobile production, but recurring profits by key listed companies (excluding financial institutions) are expected to have declined roughly 20 percent versus the previous fiscal year. The TOPIX began the fiscal year at 862 points. After temporarily rising, the index then fell to 706 points in November. The TOPIX recovered to close the fiscal year at 854 points. With the market decline and uncertainty about future prospects for share prices, there was a large downturn in the amount of funds raised by Japanese companies in the capital markets, both in Japan and overseas. Throughout the year there was a low level of investor activity in financial and securities markets. Meanwhile, as evidenced by Basel III (new capital requirement regulations for financial institutions) and the Dodd-Frank Act in the U.S., regulations on and oversight of financial institutions continues to become more stringent on a global basis. Amid this environment, in order to quickly adapt to the difficult business environment, Nomura Group decided to implement a \$1.2 billion cost reduction program, and worked to improve cost efficiencies by making the scale of business operations in Europe more appropriate, and reviewing the regional allocation of resources. Based on its client-focused strategy, the Retail Division promoted investment consultation services and diversified its product offering, while the Asset Management Division worked to increase assets under management on a global basis and enhance investment performance. The Wholesale Division implemented the narrow and deep strategy focused on business areas where we can deliver added value to our clients, cooperation among business units was enhanced, revenues from client-flow businesses were increased, and products and solutions offered were diversified. As a result of these efforts, we succeeded in posting an overall profit for the third consecutive fiscal year while executing a cost-cutting program without substantial downscale of business platforms. We posted net revenue of ¥1,535.9 billion for the fiscal year ended March 31, 2012, a 36% increase from the previous fiscal year. Non-interest expenses increased 40% versus the previous fiscal year to ¥1,450.9 billion, income before income taxes was ¥85.0 billion, and net income attributable to the shareholders of NHI was ¥11.6 billion. Consequently, ROE for the full fiscal year was 0.6%.

In Retail, net revenue for the year ended March 31, 2012 decreased by 11% from the previous year to ¥350.3 billion, due primarily to decreasing commissions for distribution of investment trusts and brokerage commissions. Non-interest expenses decreased by 1% to ¥287.1 billion. As a result, income before income taxes decreased by 38% to ¥63.1 billion. The Retail Division focused on providing clients investment consultation services to accommodate client needs. To accommodate increasing client needs, we opened four new branch offices, and enhanced non-face-to-face services provided by Nomura Net & Call, which started last October. Investment consultation services resulted in balanced business growth, centered on equities, bonds, investment trusts and insurance products. There was a ¥2.4 trillion net inflow in retail client assets during the fiscal year. Total retail client assets increased to ¥72.0 trillion from ¥70.6 trillion at the end of the previous fiscal year. The number of client accounts increased by 49,000 to end the fiscal year at 4.985 million accounts, indicating steady growth in the business base.

In Asset Management, net revenue for the year ended March 31, 2012 decreased by 1% from the previous year to ¥65.8 billion. Non-interest expenses decreased by 3% to ¥45.3 billion. As a result, income before income taxes increased by 2% to ¥20.5 billion. Despite the challenging investment environment, in the investment trust business there was an inflow into funds representing a wide range of investment assets, including overseas bonds and Japanese equities. Furthermore, funds launched this fiscal year employing investment strategies matching the investment environment contributed to the increase in assets under management. In the investment advisory business, there was a steady increase in mandates from institutional investors, including domestic pension funds, overseas, mainly Asian and European pension funds and sovereign wealth funds. As a result, due to the inflow of funds into a diverse range of investment products, including actively managed funds, assets under management were ¥24.6 trillion as of March 31, 2012.

In Wholesale, net revenue for the year ended March 31, 2012 decreased by 12% from the previous year to ¥555.9 billion. Our performance was challenged in the first half of the fiscal year, due to revenue decrease of international business caused by a decrease in client trading volumes stemming from the financial market turmoil related to the European sovereign debt crisis. Although in the second half of the fiscal year we posted revenue

Table of Contents

growth, with private equity trades in the third quarter and revenue recovery in EMEA and Americas regions in the fourth quarter, result of the first half was not covered and net revenue for the fiscal year decreased from the previous year. The cost reduction program of \$1.2 billion announced in July and November of last year is progressing on schedule and non-interest expenses decreased by 5% to ¥593.5 billion. As a result, loss before income taxes dropped to ¥37.6 billion.

Results of Operations*Overview*

The following table provides selected consolidated statements of income information for the years indicated.

	Millions of yen, except percentages		
	Year ended March 31		
	2010	2011	2012
Non-interest revenues:			
Commissions	¥ 395,083	¥ 405,463	¥ 347,135
Fees from investment banking	121,254	107,005	59,638
Asset management and portfolio service fees	132,249	143,939	144,251
Net gain on trading	417,424	336,503	272,557
Gain on private equity investments	11,906	19,292	25,098
Gain (loss) on investments in equity securities	6,042	(16,677)	4,005
Other	37,483	43,864	563,186
Total Non-interest revenues	1,121,441	1,039,389	1,415,870
Net interest revenue	29,381	91,309	119,989
Net revenue	1,150,822	1,130,698	1,535,859
Non-interest expenses	1,045,575	1,037,443	1,450,902
Income before income taxes	105,247	93,255	84,957
Income tax expense	37,161	61,330	58,903
Net income	¥ 68,086	¥ 31,925	¥ 26,054
Less: Net income attributable to noncontrolling interests	288	3,264	14,471
Net income attributable to NHI shareholders	¥ 67,798	¥ 28,661	¥ 11,583

Return on equity 3.7% 1.4% 0.6%

Net revenue increased by 36% from ¥1,130,698 million for the year ended March 31, 2011 to ¥1,535,859 million for the year ended March 31, 2012. Commissions decreased by 14%, due primarily to a decrease in commissions for the distribution of investment trusts, reflecting the turmoil in the global financial markets which was mainly caused by the European sovereign debt crisis. Fees from investment banking decreased by 44%, due primarily to a decrease in transaction volume in equity finance for Japanese companies. Net gain on trading was ¥272,557 million for the year ended March 31, 2012, due primarily to downturn in financial markets mainly caused by the European sovereign debt crisis. Gain on private equity investments was ¥25,098 million for the year ended March 31, 2012 due primarily to realized gains on equity securities of certain investee companies. Other was ¥563,186 million for the year ended March 31, 2012, due primarily to the conversion of Nomura Land and Building Co., Ltd into a subsidiary of Nomura Holdings, Inc.

Net revenue decreased by 2% from ¥1,150,822 million for the year ended March 31, 2010 to ¥1,130,698 million for the year ended March 31, 2011. Commissions increased by 3%, due primarily to an increase in commissions for the distribution of investment trusts. As there were a number of large equity finance transactions with Japanese clients in the previous year compared with this year, fees from investment banking decreased by 12% for the year ended March 31, 2011. Asset management and portfolio service fees increased by 9%, due primarily to an increase in assets under management mainly driven by continuing cash inflows. Net gain on trading fell to ¥336,503 million for the year ended March 31, 2011, due primarily to a decrease in equity

Table of Contents

trading. Gain on private equity investments was ¥19,292 million for the year ended March 31, 2011 due primarily to realized gains on disposal of certain investments and unrealized gains on equity securities of certain investee companies.

Net interest revenue was ¥29,381 million for the year ended March 31, 2010, ¥91,309 million for the year ended March 31, 2011 and ¥119,989 million for the year ended March 31, 2012. Net interest revenue is a function of the level and mix of total assets and liabilities, which includes trading assets and financing and lending transactions, and the level, term structure and volatility of interest rates. Net interest revenue is an integral component of trading activity. In assessing the profitability of our overall business and of our Global Markets business in particular, we view net interest revenue and non-interest revenues in aggregate. For the year ended March 31, 2012, interest revenue increased by 26% due mainly to an increase in securitized product trading in our Americas region and interest expense increased by 24% due primarily to an increase in interest expense on securities lending transactions. As a result, net interest revenue for the year ended March 31, 2012 increased by ¥28,680 million from the year ended March 31, 2011. For the year ended March 31, 2011, interest revenue increased by 47% due mainly to expansion of securitized product trading in our Americas region and interest expense increased 24% due mainly to an increase in repo transactions. As a result, net interest revenue for the year ended March 31, 2011 increased by ¥61,928 million from the year ended March 31, 2010.

In our consolidated statements of income, we include gains and losses on investments in equity securities within revenue. We recognized gains and losses on such investments in the amount of ¥6,042 million for the year ended March 31, 2010, negative ¥16,677 million for the year ended March 31, 2011 and ¥4,005 million for the year ended March 31, 2012. This line item includes both realized and unrealized gains and losses on investments in equity securities held for operating purposes. These investments refer to our investments in unaffiliated companies, which we hold on a long-term basis in order to promote existing and potential business relationships.

Non-interest expenses increased by 40% from ¥1,037,443 million for the year ended March 31, 2011 to ¥1,450,902 million for the year ended March 31, 2012. The increase in non-interest expenses was caused by an increase in other expenses by 296% from ¥125,448 million for the year ended March 31, 2011 to ¥496,227 million for the year ended March 31, 2012, due primarily to the conversion of Nomura Land and Building Co., Ltd. into a subsidiary of Nomura Holdings, Inc.

Non-interest expenses decreased by 1% from ¥1,045,575 million for the year ended March 31, 2010 to ¥1,037,443 million for the year ended March 31, 2011. The decrease in non-interest expenses was caused by the decrease in other expenses by 12% from ¥142,494 million for the year ended March 31, 2010 to ¥125,448 million for the year ended March 31, 2011, due to, among other factors, impairment losses against affiliated companies were lower for the year ended March 31, 2011. The decrease in non-interest expenses was offset by a 7% increase in commissions and floor brokerage from ¥86,129 million for the year ended March 31, 2010 to ¥92,088 million for the year ended March 31, 2011.

Income before income taxes was ¥105,247 million for the year ended March 31, 2010, ¥93,255 million for the year ended March 31, 2011 and ¥84,957 million for the year ended March 31, 2012.

We are subject to a number of different taxes in Japan and have adopted the consolidation tax system permitted under Japanese tax law. The consolidation tax system only imposes a national tax. Since April 1, 2004, our domestic statutory tax rate has been approximately 41%. However, as a result of the revisions of domestic tax laws, the domestic statutory tax rates are approximately 38% between April 1, 2012 and March 31, 2015 and approximately 36% thereafter. Our foreign subsidiaries are subject to the income tax rates of the countries in which they operate, which are generally lower than those in Japan. Our effective tax rate in any one year is therefore dependent on our geographic mix of profits and losses and also on the specific tax treatment applicable in each location.

Income tax expense for the year ended March 31, 2012 was ¥58,903 million, representing an effective tax rate of 69.3%. The significant factor causing the difference between the effective tax rate of 69.3% and the statutory tax rate of 41% were changes in domestic tax laws which increased the effective tax rate by 45.7%.

Table of Contents

non-deductible expenses which increased the effective tax rate by 23.3% and different tax rates applicable for foreign subsidiaries which increased the effective tax rate by 14.1% for the year ended March 31, 2012. The significant factors reducing the effective tax rate were non-taxable revenue which decreased the effective tax rate by 29.7% and change in valuation allowance which decreased the effective tax rate by 22.5%.

Income tax expense for the year ended March 31, 2011 was ¥61,330 million, representing an effective tax rate of 65.8%. The significant factor causing the difference between the effective tax rate of 65.8% and the statutory tax rate of 41% were different tax rates applicable for foreign subsidiaries which increased the effective tax rate by 10.8%, taxable items to be added to financial profit and non-deductible expenses which increased the effective tax rate by 5.3% and 16.6%, respectively for the year ended March 31, 2011. The significant factor reducing the effective tax rate was non-taxable revenue which decreased the effective tax rate by 8.4%.

Income tax expense for the year ended March 31, 2010 was ¥37,161 million, representing an effective tax rate of 35.3%. The significant factor causing the difference between the effective tax rate of 35.3% and the statutory tax rate of 41% was due to different tax rates applicable for foreign subsidiaries which decreased the effective tax rate by 26.9%. Other significant factors causing the difference were taxable items to be added to financial profit and non-deductible expenses which increased the effective tax rate by 10.8% and 10.5%, respectively, for the year ended March 31, 2010.

Net income attributable to NHI shareholders for the year ended March 31, 2010, 2011 and 2012 was ¥67,798 million, ¥28,661 million and ¥11,583 million, respectively. Our return on equity for the year ended March 31, 2010, 2011 and 2012 was 3.7%, 1.4% and 0.6%, respectively.

Results by Business Segment

Our operating management and management reporting are prepared based on the Retail, the Asset Management and the Wholesale Divisions and we disclose business segment information in accordance with this structure. Gain (loss) on investments in equity securities, our share of equity in the earnings (losses) of affiliates, impairment losses on long-lived assets, corporate items and other financial adjustments are included as

Other operating results outside of business segments in our segment information. Unrealized gain (loss) on investments in equity securities held for operating purposes is classified as a reconciling items outside of our segment information. The following segment information should be read in conjunction with Item 4.B *Business Overview* of this annual report and Note 23 *Segment and geographic information* to our consolidated financial statements. The reconciliation of our segment results of operations and consolidated financial statements is set forth in Note 23

Segment and geographic information to our consolidated financial statements.

Retail

In Retail, we receive commissions and fees from investment consultation services which we provide mainly to individual clients in Japan. Additionally, we receive operational fees from asset management companies in connection with the administration services of investment trust certificates that we distribute. We also receive agent commissions from insurance companies for the insurance products we sell as an agent.

Operating Results of Retail

	Millions of yen		
	Year ended March 31		
	2010	2011	2012
Non-interest revenues	¥ 384,816	¥ 389,404	¥ 347,385
Net interest revenue	3,456	3,029	2,873
Net revenue	388,272	392,433	350,258
Non-interest expenses	274,915	291,245	287,128
Income before income taxes	¥ 113,357	¥ 101,188	¥ 63,130

Table of Contents

Net revenue for the year ended March 31, 2012 was ¥350,258 million, decreasing 11% from ¥392,433 million for the year ended March 31, 2011, due primarily to decreasing commissions for distribution of investment trusts and brokerage commissions.

Net revenue for the year ended March 31, 2011 was ¥392,433 million, increasing 1% from ¥388,272 million for the year ended March 31, 2010, due primarily to increasing revenues from bond related products and commissions for distribution of investment trusts.

Non-interest expenses for the year ended March 31, 2012 were ¥287,128 million, decreasing 1% from ¥291,245 million for the year ended March 31, 2011 due to primarily to a decrease in compensation and benefit.

Non-interest expenses for the year ended March 31, 2011 were ¥291,245 million, increasing 6% from ¥274,915 million for the year ended March 31, 2010, due primarily to an increase in compensation and benefits.

Income before income taxes was ¥113,357 million for the year ended March 31, 2010, ¥101,188 million for the year ended March 31, 2011, and ¥63,130 million for the year ended March 31, 2012.

The graph below shows the revenue generated by instrument in terms of Retail non-interest revenues for the years ended March 31, 2010, 2011, and 2012.

As described above, revenue composition of investment trusts and asset management decreased from 59% for the year ended March 31, 2011 to 57% for the year ended March 31, 2012. Revenue composition of equities decreased from 22% for the year ended March 31, 2011 to 15% for the year ended March 31, 2012. Revenue composition of bonds increased from 18% for the year ended March 31, 2011 to 26% for the year ended March 31, 2012, due primarily to an increase in revenue reflecting the increase in the sales of overseas and domestic bonds. Revenue composition of insurance increased from 1% for the year ended March 31, 2011 to 2% for the year ended March 31, 2012.

Table of Contents

Retail Client Assets

The following graph shows amounts and details regarding the composition of retail client assets at March 31, 2010, 2011, and 2012. Retail client assets consist of clients' assets held in our custody and assets relating to variable annuity insurance products.

Retail Client Assets

Retail client assets increased from ¥70.6 trillion as of March 31, 2011 to ¥72.0 trillion as of March 31, 2012, due to balanced business growth, centered on equities, bonds, investment trusts and insurance products. The balance of our clients' investment trusts decreased by 3% from ¥13.9 trillion as of March 31, 2011 to ¥13.5 trillion as of March 31, 2012, reflecting net cash inflows by clients of ¥0.7 trillion and market depreciation of ¥1.1 trillion.

Retail client assets decreased from ¥73.5 trillion as of March 31, 2010 to ¥70.6 trillion as of March 31, 2011, due to the impact of the East Japan Earthquake on the stock market. The balance of our clients' investment trusts increased by 8% from ¥12.9 trillion as of March 31, 2010 to ¥13.9 trillion as of March 31, 2011, reflecting net cash inflows by clients of ¥1.4 trillion and market depreciation of ¥0.4 trillion.

Table of Contents**Asset Management**

Our Asset Management segment is conducted principally through NAM. We earn portfolio management fees through the development and management of investment trusts, which are distributed by NSC, other brokers, banks, Japan Post Bank Co., Ltd. and Japan Post Network Co., Ltd. We also provide investment advisory services for pension funds and other institutional clients. Net revenues basically consist of asset management and portfolio services fees that are attributable to Asset Management.

Operating Results of Asset Management

	Millions of yen		
	Year ended March 31		
	2010	2011	2012
Non-interest revenues	¥ 60,537	¥ 62,670	¥ 63,022

Total	¥ 23,444	¥ 24,713	¥ 24,563

Table of Contents

Assets under management were ¥24.6 trillion as of March 31, 2012, a ¥1.1 trillion increase from March 31, 2010, and a ¥0.2 trillion decrease from March 31, 2011.

In our investment trust business, there was an inflow into funds representing a wide range of investment assets, including overseas bonds and Japanese equities. In the investment advisory business, there was an increase in mandates mainly from overseas clients. Investment trust assets included in assets under management by NAM were ¥15.3 trillion as of March 31, 2012, down ¥0.7 trillion, or 4%, from the previous year due to the impact of weakened market conditions, reflecting net cash inflows by clients of ¥0.2 trillion and market depreciation of ¥0.9 trillion. The balance of investment trusts such as Nomura Australian Bond Open Premium, Nomura Global Trend (Basket Currency Selection Type), Nomura Global High Dividend Stock Premium (Currency Selection Type) and Nomura Japan Brand Stock Investment Fund (Currency Selection Type) increased. The balance of investment trusts managed by NAM were ¥15.9 trillion as of March 31, 2011, up ¥1.3 trillion, or 9%, from the previous year, reflecting net cash outflows by clients of ¥1.7 trillion and market depreciation of ¥0.5 trillion.

The following table shows NAM's share, in terms of net asset value, in the Japanese asset management market as of the dates indicated.

NAM's share of the fund market in Japan

	Millions of yen Year ended March 31		
	2010	2011	2012
Non-interest revenues	¥ 763,567	¥ 534,094	¥ 426,608
Net interest revenue	25,964	96,442	129,274
Net revenue	789,531	630,536	555,882
Non-interest expenses	614,349	623,819	593,465
Income (loss) before income taxes	¥ 175,182	¥ 6,717	¥ (37,583)

Net revenue decreased by 12% from ¥630,536 million for the year ended March 31, 2011 to ¥555,882 million for the year ended March 31, 2012, due primarily to the volatile economical and financial market conditions in Europe.

Net revenue decreased by 20% from ¥789,531 million for the year ended March 31, 2010 to ¥630,536 million for the year ended March 31, 2011, due primarily to the financial turmoil related to Greece and the European sovereign debt crisis.

Non-interest expenses decreased by 5% from ¥623,819 million for the year ended March 31, 2011 to ¥593,465 million for the year ended March 31, 2012 as a result of the cost reduction program progressing on schedule.

Non-interest expenses increased by 2% from ¥614,349 million for the year ended March 31, 2010 to ¥623,819 million for the year end March 31, 2011 as a result of international business expansion in the first half of the fiscal year, while controlling compensation and benefits based on performance.

Table of Contents

Income before income taxes was ¥175,182 million for the year ended March 31, 2010 and ¥6,717 million for the year ended March 31, 2011 and loss before income taxes was ¥37,583 million for the year ended March 31, 2012.

Global Markets

We have a proven track record in sales and trading of bonds, stocks, and foreign exchange, as well as derivatives based on these financial instruments, mainly to domestic and overseas institutional investors. In response to the increasingly diverse and complex needs of our clients, we are building up our trading and product origination capabilities to offer superior products not only to domestic and overseas institutional investors but also to the Retail and the Asset Management. This cross-divisional approach also extends to the Investment Banking, where close collaboration leads to high value-added solutions for our clients.

We continue to develop extensive ties with institutional investors in Japan and international markets; wealthy and affluent investors, public-sector agencies, and regional financial institutions in Japan; and government agencies, financial institutions, and corporations around the world. These ties enable us to identify the types of products of interest to investors and then to develop and deliver products that meet their needs.

	Millions of yen		
	Year ended March 31		
	2010	2011	2012
Net revenue	¥ 658,441	¥ 518,788	¥ 460,737
Non-interest expenses	486,433	499,300	475,016
Income (loss) before income taxes	¥ 172,008	¥ 19,488	¥ (14,279)

Net revenue decreased from ¥518,788 million for the year ended March 31, 2011 to ¥460,737 million for the year ended March 31, 2012. In Fixed Income, net revenue increased from ¥259.8 billion for the year ended March 31, 2011 to ¥271.2 billion for the year ended March 31, 2012. In Equities, net revenue decreased from ¥227.3 billion for the year ended March 31, 2011 to ¥181.5 billion for the year ended March 31, 2012. Despite adverse market conditions driven by the ongoing Eurozone sovereign debt crisis, Fixed Income delivered stronger performance than the previous fiscal year. Growth in flow business was driven by resilient client flows despite a slowdown in client activity in the market and by robust risk management. Among our various products, a market-wide slowdown in securitized products was offset by improved performance in structured businesses across rates, credit and foreign exchange (FX). For Equities, we experienced a challenging fiscal year as exchange volumes decreased and client activity remained low for much of the year. Execution services performed in-line with declining market volume, while derivatives was challenged in some products, but showed resilience with innovative products in Japan along with tailored solutions for industrial corporations globally.

Net revenue decreased from ¥658,441 million for the year ended March 31, 2010 to ¥518,788 million for the year ended March 31, 2011. In Fixed Income, net revenue decreased from ¥308.0 billion for the year ended March 31, 2010 to ¥259.8 billion for the year ended March 31, 2011. In Equities, net revenue decreased from ¥352.8 billion for the year ended March 31, 2010 to ¥227.3 billion for the year ended March 31, 2011. Despite the overall drop in revenues amid difficult market conditions, client revenues increased as our investments in our client franchise and a broader product offering continued to produce results. In Fixed Income, we successfully diversified our revenue mix between products and regions. From a regional point of view, we saw a large increase in contribution from the Americas (in our first full year of operation), and Asia revenues also rose year on year. In terms of products, securitized products showed the largest revenue increase with foreign exchange products also reflecting an increase in revenue, while rates and credit performed relatively well. In Equities, we continued to improve our research and execution platforms overseas, and execution services again provided the largest revenue contribution. We also responded effectively to client needs and provided substantial liquidity to clients after the East Japan Earthquake, thus capturing a higher market share in Japan.

Table of Contents

Non-interest expenses decreased by 5% from ¥499,300 million for the year ended March 31, 2011 to ¥475,016 million for the year ended March 31, 2012, due to the cost reduction program which is progressing on schedule.

Non-interest expenses increased by 3% from ¥486,433 million for the year ended March 31, 2010 to ¥499,300 million for the year ended March 31, 2011, due primarily to increases in infrastructure cost for business expansion.

Income before income taxes was ¥172,008 million for the year ended March 31, 2010 and ¥19,488 million for the year ended March 31, 2011 and loss before income taxes was ¥14,279 million for the year ended March 31, 2012.

Investment Banking

We provide a broad range of investment banking services, such as underwriting and advisory activities to a diverse range of corporations, financial institutions, sovereigns, investment funds and others. We underwrite offerings of debt, equity and other financial instruments in Asia, Europe, U.S. and other major financial markets. We have been enhancing our M&A and financial advisory expertise to secure more high profile deals both across and within regions. We develop and forge solid relationships with these clients on a long-term basis by providing extensive resources in a seamless fashion to facilitate bespoke solutions.

	Millions of yen		
	Year ended March 31		
	2010	2011	2012
Investment Banking (Gross)	¥ 196,076	¥ 185,011	¥ 141,678
Allocation to Other divisions	(77,154)	(82,623)	(67,096)
Investment Banking (Net)	118,922	102,388	74,582
Other	12,168	9,360	20,563
Net revenue	131,090	111,748	95,145
Non-interest expenses	127,916	124,519	118,449
Income (loss) before income taxes	¥ 3,174	¥ (12,771)	¥ (23,304)

Net revenue decreased from ¥111,748 million for the year ended March 31, 2011 to ¥95,145 million for the year ended March 31, 2012. Investment banking (net) revenue decreased from ¥102,388 million for the year ended March 31, 2011 to ¥74,582 million for the year ended March 31, 2012, as the business environment proved challenging, especially in equity capital markets and M&A. Other revenue increased from ¥9,360 million for the year ended March 31, 2011 to ¥20,563 million for the year ended March 31, 2012. For the year ended March 31, 2012, realized gains from investments in Japan were ¥33.7 billion and unrealized losses from investments in Japan were ¥12.3 billion. Realized gains from the Terra Firma Investments were ¥0.5 billion and unrealized gains from Terra Firma Investments were ¥4.8 billion. Realized and unrealized gains arose primarily on residential real estate and utilities sectors while unrealized losses are related to investments in the leisure and services sectors.

Net revenue decreased from ¥131,090 million for the year ended March 31, 2010 to ¥111,748 million for the year ended March 31, 2011. Investment banking (net) revenue decreased from ¥118,922 million for the year ended March 31, 2010 to ¥102,388 million for the year ended March 31, 2011. Other revenue decreased from ¥12,168 million for the year ended March 31, 2010 to ¥9,360 million for the year ended March 31, 2011. In the year ended March 31, 2011, realized gains from investments in Japan were ¥11.1 billion. Realized losses from the Terra Firma Investments were ¥3.4 billion and unrealized gains from the Terra Firma Investments were ¥14.6 billion. Realized and unrealized gains arose primarily on residential real estate, leisure and utilities sectors while realized losses are related to the exit of a media business. In the year ended March 31, 2010, unrealized gains

Table of Contents

from investments in Japan were ¥4.8 billion. Realized gains from the Terra Firma Investments were ¥0.6 billion and unrealized gains from the Terra Firma Investments were ¥8.4 billion. Realized and unrealized gains arose from improving markets, primarily in residential real estate, renewable energy and utilities sectors.

Non-interest expenses decreased by 5% from ¥124,519 million for the year ended March 31, 2011 to ¥118,449 million for the year ended March 31, 2012, due to the cost reduction program which is progressing on schedule.

Non-interest expenses decreased by 3% from ¥127,916 million for the year ended March 31, 2010 to ¥124,519 million for the year ended March 31, 2011 as a result of our controlling compensation and benefits based on performance.

Income before income taxes was ¥3,174 million for the year ended March 31, 2010, loss before income taxes was ¥12,771 million for the year ended March 31, 2011 and ¥23,304 million for the year ended March 31, 2012.

Other Operating Results

Other operating results include net gain (loss) related to economic hedging transactions, realized gain (loss) on investments in equity securities held for operating purposes, equity in earnings of affiliates, corporate items, and other financial adjustments. See Note 23 *Segment and geographic information* to our consolidated financial statements.

Loss before income taxes in other operating results was ¥207,915 million for the year ended March 31, 2010, ¥17,776 million for the year ended March 31, 2011 and income before income taxes in other operating result was ¥35,084 million for the year ended March 31, 2012.

Other operating results for the year ended March 31, 2012 include the gains from changes in the fair value of the financial liabilities, for which the fair value option was elected, attributable to the change in our creditworthiness of ¥16.7 billion, the negative impact of our own creditworthiness on derivative liabilities which resulted in gains of ¥10.4 billion and the losses from changes in counterparty credit spreads of ¥16.1 billion.

Other operating results for the year ended March 31, 2011 include the gains from changes in the fair value of the financial liabilities, for which the fair value option was elected, attributable to the change in our creditworthiness of ¥9.3 billion, the negative impact of our own creditworthiness on derivative liabilities which resulted in gains of ¥20.5 billion and the losses from changes in counterparty credit spreads of ¥6.6 billion.

Summary of Regional Contribution

For a summary of our net revenue, income (loss) before income taxes and long-lived assets by geographic region, see Note 23 *Segment and geographic information* to our consolidated financial statements.

Regulatory Capital Requirements

Many of our business activities are subject to statutory capital requirements, including those of Japan, the U.S., the U.K. and certain other countries in which we operate.

Translation Exposure

A significant portion of our business is conducted in currencies other than yen most significantly, U.S. dollars, British pounds and Euros. We prepare financial statements of each of our consolidated entities in its functional currency, which is the currency of the primary economic environment in which the entity operates.

Table of Contents

Translation exposure is the risk arising from the effect of fluctuations in exchange rates on the net assets of our foreign subsidiaries. Translation exposure is not recognized in our consolidated statements of income unless and until we dispose of, or liquidate, the relevant foreign subsidiary, which historically has not occurred, and which we do not expect to occur frequently.

Critical Accounting Policies and Estimates

Use of estimates

In preparing the consolidated financial statements included within this annual report, management makes estimates regarding certain financial instrument and investment valuations, the outcome of litigation and tax examinations, the recovery of the carrying value of goodwill, the allowance for doubtful accounts, the realization of deferred tax assets and other matters that affect the reported amounts of assets and liabilities as well as the disclosures in the consolidated financial statements. Estimates, by their nature, are based on judgment and available information. Therefore, actual results may differ from estimates, which could have a material impact on the consolidated financial statements, and it is possible that such adjustments could occur in the near term.

Fair value for financial instruments

A significant amount of our financial instruments are carried at fair value, with changes in fair value recognized through the consolidated statements of income or the consolidated statements of comprehensive income on a recurring basis. Use of fair value is either specifically required under U.S. GAAP or we make an election to use fair value for certain eligible items under the fair value option.

Other financial assets and financial liabilities are carried at fair value on a nonrecurring basis, where the primary measurement basis is not fair value. Fair value is only used in specific circumstances after initial recognition, such as to measure impairment.

In accordance with Accounting Standard Codification (ASC) 820 *Fair Value Measurements and Disclosures*, all financial instruments measured at fair value have been categorized into a three-level hierarchy based on the transparency of valuation inputs used to establish fair value.

Level 1:

Unadjusted quoted prices for identical financial instruments in active markets accessible by Nomura at the measurement date.

Level 2:

Quoted prices in inactive markets or prices containing other inputs which are observable, either directly or indirectly. Valuation techniques using observable inputs reflect assumptions used by market participants in pricing financial instruments and are based on data obtained from independent market sources at the measurement date.

Level 3:

Unobservable inputs that are significant to the fair value measurement of the financial instrument. Valuation techniques using unobservable inputs reflect management's assumptions about the estimates used by other market participants in valuing similar financial instruments. These valuation techniques are developed based on the best available information at the measurement date.

The availability of inputs observable in the market varies by product and can be affected by a variety of factors. Significant factors include, but are not restricted to the prevalence of similar products in the market,

Table of Contents

especially for customized products, how established the product is in the market, for example, whether it is a new product or is relatively mature, and the reliability of information provided in the market which would depend, for example, on the frequency and volume of current data. A period of significant change in the market may reduce the availability of observable data. Under such circumstances, financial instruments may be reclassified into a lower level in the fair value hierarchy.

Significant judgments used in determining the classification of financial instruments include the nature of the market in which the product would be traded, the underlying risks, the type and liquidity of market data inputs and the nature of observed transactions for similar instruments.

Where valuation models include the use of parameters which are less observable or unobservable in the market, significant management judgment is used in establishing fair value. The valuations for Level 3 financial instruments, therefore, involve a greater degree of judgment than those valuations for Level 1 or Level 2 financial instruments.

Certain criteria management use to determine whether a market is active or inactive include the number of transactions, the frequency that pricing is updated by other market participants, the variability of price quotes among market participants, and the amount of publicly available information.

Level 3 financial assets excluding derivatives as a proportion of total financial assets excluding derivatives, carried at fair value on a recurring basis was 4% as of March 31, 2012 as listed below:

	Level 1	Level 2	Level 3	Billions of yen March 31, 2012 Counterparty and Cash Collateral Netting	Total	The proportion of Level 3
Financial assets measured at fair value (Excluding derivative assets)	¥ 6,951	¥ 7,522	¥ 658	¥	¥ 15,131	4%
Derivative assets	599	22,669	484	(22,392)	1,360	
Derivative liabilities	630	22,752	502	(22,576)	1,308	

See Note 2 *Fair value of financial instruments* to our consolidated financial statements.

Private equity business

All private equity investments made by investment company subsidiaries pursuant to the provisions of ASC 946 *Financial Services Investment Companies* (ASC 946) are accounted for at fair value, with changes in fair value recognized through the consolidated statements of income.

The valuation of unlisted private equity investments requires significant management judgment because the investments, by their nature, have little or no price transparency. Private equity investments are initially carried at cost as an approximation of fair value. Adjustments to carrying value are made if there is third-party evidence of a change in value. Adjustments are also made, in the absence of third-party transactions, if it is determined that the expected exit price of the investment is different from the carrying value. In reaching that determination, Nomura primarily uses either a discounted cash flow valuation technique which incorporates estimated future cash flows to be generated from the underlying investment, discounted at a weighted average cost of capital or comparable market multiple valuation techniques such as Enterprise Value/earnings before interest, taxes, depreciation and amortization, Price/Earnings Ratio, Price/Embedded Value Ratio and other multiples based on relationships between numbers reported in the financial statements and the price of comparable companies. Where possible these valuations are compared with the operating cash flows and financial performance of the

Table of Contents

companies or properties relative to budgets or projections, price/earnings data for similar quoted companies, trends within sectors and/or regions and any specific rights or terms associated with the investment, such as conversion features and liquidation preferences. Private equity investments are generally classified as Level 3 since the valuation inputs such as those mentioned above are usually unobservable or there is significant uncertainty between the level for the comparables used and those that would be used for the specific position.

Any changes to valuations are then stress tested to assess the impact of particular risk factors in order to establish the final estimated valuation. For more information on our private equity activities, see *Private Equity Business* below.

Derivative contracts

We use a variety of derivative financial instruments including futures, forwards, swaps and options, for trading and non-trading purposes. All derivatives are carried at fair value, with changes in fair value recognized either through the consolidated statements of income or the consolidated statements of comprehensive income depending on the purpose for which the derivatives are used.

Fair value amounts recognized for derivative instruments entered into under a legally enforceable master netting agreement are offset in the consolidated balance sheets and fair value amounts recognized for the right to reclaim cash collateral (a receivable) and the obligation to return cash collateral (a payable) are also offset against net derivative liabilities and net derivative assets, respectively.

Derivative contracts consist of listed derivatives and OTC derivatives. The fair value of listed derivatives are generally determined from quoted market prices. OTC derivatives are valued using valuation models. Listed derivative and OTC derivative assets and liabilities are shown below:

	Billions of yen March 31, 2011	
	Assets	Liabilities
Listed derivatives	¥ 224	¥ 334
OTC derivatives	1,267	1,322
	¥ 1,491	¥ 1,656

	Billions of yen March 31, 2012	
	Assets	Liabilities
Listed derivatives	¥ 304	¥ 334
OTC derivatives	1,056	974
	¥ 1,360	¥ 1,308

The fair value of OTC derivative assets and liabilities as of March 31, 2011 and 2012 by remaining contractual maturity are shown below:

	Billions of yen March 31, 2011						
	Years to Maturity					Cross-maturity netting ⁽¹⁾	Total fair value
	Less than 1 year	1 to 3 years	3 to 5 years	5 to 7 years	More than 7 years		
OTC derivative assets	¥ 512	¥ 598	¥ 717	¥ 575	¥ 1,424	¥ (2,559)	¥ 1,267
OTC derivative liabilities	713	768	612	681	1,369	(2,821)	1,322

Table of Contents

	Billions of yen						Cross-maturity netting ⁽¹⁾	Total fair value
	March 31, 2012							
	Years to Maturity							
	Less than 1 year	1 to 3 years	3 to 5 years	5 to 7 years	More than 7 years			
OTC derivative assets	¥ 633	¥ 747	¥ 736	¥ 728	¥ 2,024	¥ (3,812)	¥ 1,056	
OTC derivative liabilities	838	776	785	627	1,879	(3,931)	974	

(1) This column shows the impact of netting derivative assets with derivative liabilities for the same counterparty across maturity band categories. Derivative assets and derivative liabilities with the same counterparty in the same maturity category are netted within the maturity category. This column also includes cash collateral netting with the same counterparty.

The fair value of derivative contracts includes adjustments for credit risk, both with regards to counterparty credit risk on positions held and our own creditworthiness on positions issued. We realize gains or losses relating to changes in credit risk on our derivative contracts together with the movements of trading positions, which include derivatives, that are expected to mitigate the above mentioned impact of changes in credit risk.

Goodwill

Under U.S. GAAP, goodwill is allocated to reporting units and tested for impairment annually or more frequently in certain circumstances. The assumptions used in the valuations of the reporting units include estimates of future cash flows and the cost of equity used to discount those cash flows to a present value.

Goodwill impairment testing is performed at a level below the business segments. During the year ended March 31, 2012, Nomura performed the first step of impairment testing for the goodwill in accordance with U.S. GAAP, based on the reasonable management's estimates of future cash flows. As a result of the testing, Nomura concluded that the fair value of each reporting unit including goodwill exceeded its carrying value, thus no reporting units were at immediate risk of an impairment loss.

However, in the global capital markets there exist various uncertainties due to, but not limited to, economic and market conditions. Deterioration in economic and market conditions may result in declines in future business performance. Such future declines in business performance or significant increases in the cost of equity may result in the estimated fair values of the reporting units and associated goodwill to decline, potentially resulting in the recognition of impairment losses through the consolidated statements of income in future periods.

Assets and Liabilities Associated with Investment and Financial Services Business*Exposure to Certain Financial Instruments and Counterparties*

Challenging market conditions continue to impact numerous products including securitization products and leveraged finance to which we have certain exposures. We also have exposures to Special Purpose Entities (SPEs) and others in the normal course of business.

Securitization Products

Our exposure to securitization products consists of commercial mortgage-backed securities (CMBS), residential mortgage-backed securities (RMBS), commercial real estate-backed securities and other securitization products. We hold these securitization products in connection with securitization, financing, trading and other activities. The following table provides a summary of our exposure to securitization products by geographic region of the underlying collateral as of March 31, 2012.

Table of Contents

	Millions of yen March 31, 2012				
	Japan	Asia and Oceania	Europe	Americas	Total ⁽¹⁾
CMBS ⁽²⁾	¥ 1,963	¥	¥ 9,845	¥ 50,143	¥ 61,951
RMBS ⁽³⁾	45,684	3,123	33,647	238,596	321,050
Commercial real estate-backed securities	12,295				12,295
Other securitization products ⁽⁴⁾	32,606	312	13,280	105,486	151,684
Total	¥ 92,548	¥ 3,435	¥ 56,772	¥ 394,225	¥ 546,980

- (1) The balances shown exclude those for which we transferred financial assets to securitization vehicles where such transfers were accounted for as secured financings rather than sales under ASC 860, *Transfers and Servicing* (ASC 860), and in which we have no continuing economic exposures.
- (2) We have ¥24,227 million exposure, as whole loans and commitments, to U.S. CMBS-related business as of March 31, 2012.
- (3) The RMBS balance for Americas excludes mortgage pass-through securities and U.S. government guaranteed collateralized mortgage obligations (CMO) because their credit risks are considered minimal.
- (4) Includes collateralized loan obligations (CLO), collateralized debt obligations (CDO) and asset-backed securities (ABS) such as those secured on credit card loans, auto loans, student loans and home equity loans.

The following table provides our exposure to CMBS by geographic region and the external credit ratings of the underlying collateral as of March 31, 2012. Ratings are based on the lowest ratings given by Standard & Poor's, Moody's Investors Service, Fitch Ratings Ltd., Japan Credit Rating Agency, Ltd. or Rating and Investment Information, Inc. as of March 31, 2012.

	Millions of yen March 31, 2012								
	AAA	AA	A	BBB	BB	B	Not rated	GSE ⁽¹⁾	Total
Japan	¥ 591	¥	¥ 901	¥ 126	¥	¥	¥ 345	¥	¥ 1,963

- (1) GSE refers to government sponsored enterprises.
Leveraged Finance

We provide loans to clients in connection with leveraged buy-outs and leveraged buy-ins. As this type of financing is usually initially provided through a commitment, we have both funded and unfunded exposures on these transactions.

Table of Contents

The following table sets forth our exposure to leveraged finance by geographic location of the target company as of March 31, 2012.

	Millions of yen March 31, 2012		
	Funded	Unfunded	Total
Japan	¥ 2,682	¥	¥ 2,682
Europe	51,995	31,890	83,885
Americas	5,095	14,366	19,461
Asia and Oceania	2,036	520	2,556
Total	¥ 61,808	¥ 46,776	¥ 108,584

Special Purpose Entities

Our involvement with these entities includes structuring, underwriting, as well as, subject to prevailing market conditions, distributing and selling debt instruments and beneficial interests issued by these entities. In the normal course of securitization and equity derivative activities business, we also act as a transferor of financial assets to, and underwriter, distributor and seller of repackaged financial instruments issued by these entities. We retain, purchase and sell variable interests in SPEs in connection with our market-making, investing and structuring activities. Our other types of involvement with SPEs include guarantee agreements and derivative contracts.

For further discussion on Nomura's involvement with variable interest entities (VIEs), see Note 8 *Securitizations and Variable Interest Entities* to our consolidated financial statements.

Accounting Developments

See Note 1 *Summary of accounting policies: New accounting pronouncements adopted during the current year* to our consolidated financial statements.

Private Equity Business

We make private equity investments primarily in Japan and Europe.

Private equity investments made by certain entities which we consolidate under either a voting interest or variable interest model which are investment companies pursuant to the provisions of ASC 946 (investment company subsidiaries) are accounted for at fair value, with changes in fair value recognized through the consolidated statements of income. Investment company accounting applied by each of these investment company subsidiaries is retained in our consolidated financial statements included in this Form 20-F.

These entities make private equity investments solely for capital appreciation, current income or both rather than to generate strategic operating benefits to us. In accordance with our investment policies, non-investment companies within the group may not make investments in entities engaged in non-core businesses if such investments would result in consolidation or application of the equity method of accounting. Such investments may generally only be made by investment company subsidiaries. Non-core businesses are defined as those engaged in activities other than our business segments.

We also have a subsidiary which is not an investment company but which makes investments in entities engaged in our core businesses. These investments are made for capital appreciation or current income purposes or both and are also carried at fair value, either because of election of the fair value option or other U.S. GAAP requirements.

Table of Contents

Private equity business in Japan

We have an established private equity business in Japan, which is operated primarily through a wholly-owned subsidiary, Nomura Principal Finance Co., Ltd (NPF).

Since its inception in 2000, NPF has made investments in 21 entities and exited from the majority of these investments for the year ended March 31, 2012. The fair value of its investment portfolio is ¥77,793 million and ¥789 million as of March 31, 2011 and 2012, respectively.

NPF is an investment company subsidiary pursuant to the provisions of ASC 946 and therefore carries all of its investments at fair value, with changes in fair value recognized through the consolidated statements of income.

We also make private equity investments through another wholly-owned subsidiary, Nomura Financial Partners Co., Ltd. (NFP). NFP is not an investment company subsidiary as it invests in entities engaged in our core business. We elected the fair value option to account for its 47.0% investment in the common stock of Ashikaga Holdings Co., Ltd and it is reported in Private equity investment in the consolidated balance sheets.

Private equity business in Europe

In Europe, our private equity investments primarily comprise legacy investments made by its former Principal Finance Group (PFG) now managed by Terra Firma (collectively referred to as the Terra Firma Investments), investments in other funds managed by Terra Firma (Other Terra Firma Funds) and through other investment company subsidiaries (Other Investments).

Terra Firma Investments

Following a review to determine the optimum structure for our European private equity business, on March 27, 2002, we restructured PFG and, as a result, contributed our investments in certain of our remaining investee companies to Terra Firma Capital Partners I (TFCP I), a limited partnership which is engaged in the private equity business, in exchange for a limited partnership interest. Terra Firma Investments (GP) Limited, the general partner of TFCP I, which is independent of us, assumed the management and control of these investments, together with one other PFG investment, Annington Holdings plc, which due to contractual restrictions was not transferred to the partnership.

With effect from March 27, 2002, we ceased consolidating the Terra Firma Investments and accounted for those investments at fair value in accordance with ASC 946.

The Terra Firma Investments are held by entities which are investment company subsidiaries and therefore we continue to account for these investments at fair value, with changes in fair value recognized through the consolidated statements of income.

The fair value of the Terra Firma Investments was ¥100,395 million and ¥102,649 million as of March 31, 2011 and 2012, respectively.

Other Terra Firma Funds

In addition to the Terra Firma Investments, we are a 10% investor in a ¥213 billion private equity fund (TFCP II) and a 2% investor in a ¥568 billion private equity fund (TFCP III), also raised and managed by Terra Firma Capital Partners Limited.

Our total commitment for TFCP II was originally ¥21,295 million and reduced to ¥4,064 million as a result of adjustments for recyclable distributions. As of March 31, 2012, ¥3,914 million had been drawn down for investments.

Table of Contents

For TFCP III, our total commitment is ¥10,750 million and ¥8,347 million had been drawn down for investments as of March 31, 2012.

The investments in TFCP II and TFCP III are carried at fair value, with changes in fair value recognized through the consolidated statements of income.

Other Investments

We also make private equity investments in Europe through wholly-owned subsidiaries and other consolidated entities which have third party pooling of funds. Certain of these entities are investment company subsidiaries and therefore all of their investments are carried at fair value, with changes in fair value recognized through the consolidated statements of income.

Deferred Tax Assets Information*Details of deferred tax assets and liabilities*

Details of deferred tax assets and liabilities reported within *Other assets*, *Other* and *Other liabilities* respectively in the consolidated balance sheets as of March 31, 2012 are as follows:

	Millions of yen March 31, 2012
Deferred tax assets	
Depreciation, amortization and valuation of fixed assets	¥ 70,406
Investments in subsidiaries and affiliates	177,522
Valuation of financial instruments	197,961
Accrued pension and severance costs	34,291
Other accrued expenses and provisions	84,628
Operating losses	313,245
Other	20,034
Gross deferred tax assets	898,087
Less Valuation allowance	(490,986)
Total deferred tax assets	407,101
Deferred tax liabilities	
Investments in subsidiaries and affiliates	78,262
Valuation of financial instruments	56,732
Undistributed earnings of foreign subsidiaries	3,167
Valuation of fixed assets	117,112
Other	14,077
Total deferred tax liabilities	269,350
Net deferred tax assets	¥ 137,751

Calculation method of deferred tax assets

In accordance with U.S. GAAP, we recognize deferred tax assets to the extent we believe that it is more likely than not that a benefit will be realized. A valuation allowance is provided for tax benefits available to us, which are not deemed more likely than not to be realized.

Table of Contents

B. Liquidity and Capital Resources.

Funding and Liquidity Management

Overview

We define liquidity risk as the potential inability to meet financial obligations as they become due. This risk could arise from an inability to access the secured or unsecured debt markets, a deterioration in our credit ratings, a failure to manage unplanned changes in funding requirements, a failure to liquidate assets quickly and with minimal loss in value, or changes in regulatory capital restrictions which may prevent the free flow of funds between different group entities. Liquidity risk could be due both to Nomura-specific and market-wide events. Liquidity risk management policy is based on liquidity risk appetite which the Group Integrated Risk Management Committee formulates upon delegation by the Executive Management Board (*EMB*). Our primary objective for liquidity risk management is to ensure continuous liquidity across market cycles and periods of market stress, and to ensure that all funding requirements and unsecured debt obligations that fall due within one year can be met without additional unsecured funding or forced liquidation of assets.

We have in place a number of Liquidity Risk Management frameworks that enable us to achieve our primary liquidity objective. These frameworks include (1) Centralized Control of Residual Cash; (2) Appropriate Funding and Diversification of Funding Sources and Maturities Commensurate with the Composition of Assets; (3) Management of Credit Lines to Nomura Group Entities; (4) Implementation of Liquidity Stress Tests; and (5) Contingency Funding Plan.

Our *EMB* has the authority to make decisions concerning the group liquidity management. The Chief Financial Officer (*CFO*) has the operational authority and responsibility over our liquidity management based on decisions made by the *EMB*.

1. Centralized Control of Residual Cash.

We control centrally residual cash held at Nomura Group entities for effective utilization purposes. As for the usage of funds, we manage the overall level of unsecured funding and set internal limits on the additional amount of unsecured funding available across Nomura Group. The limit for unsecured funding is set by the *EMB* and monitored closely by Global Treasury.

In order to enable us to transfer funds smoothly among the group entities, we limit issuance of securities by regulated broker-dealers or banking entities. We actively seek to concentrate issuance of all long-term unsecured, non-deposit funding instruments at either Nomura or unregulated issuing entities. The primary benefits of this strategy include cost minimization, wider investor name recognition and greater flexibility in providing funding to various subsidiaries across Nomura Group.

2. Appropriate Funding and Diversification of Funding Sources and Maturities Commensurate with the Composition of Assets.

We seek to maintain a surplus of long-term debt and equity above the cash capital requirements of our assets. This enables us to fund our operations for at least one year in a stress event, without needing to raise additional unsecured funding or forcing the liquidation of assets. The amount of liquidity required is based on an internal model which incorporates the following requirements:

- (i) Our ability to finance assets using secured funding, including repurchase agreements and securities lending transactions. The cash capital requirements are calculated using conservative estimates of the assets secured borrowing power in stressed scenarios.
- (ii) Goodwill and identifiable intangible assets, property, equipment and other illiquid assets.
- (iii) Collateral requirements on derivative contracts arising as a result of a two-notch downgrade in our credit rating.

Collateral requirements to support potential increased intraday collateral requirements from our clearers and settlement agents arising as a result of a two-notch downgrade in our credit rating.

Table of Contents

In addition, other unencumbered assets held at exchanges for chaining requirements are also funded with long-term liquidity.

(iv) Commitments to lend to external counterparties based on the probability of drawdown.

(v) Capital or other forms of financing in our regulated subsidiaries that is in excess of their long-term cash capital requirements. Our internal model takes into account legal, regulatory and tax restrictions that may impact the ability to freely transfer of liquidity across the entities within the group.

We seek to achieve diversification of our funding sources by market, instrument type, investors and currency in order to reduce our reliance on any one funding source and reduce refinancing risk. We benefit by distributing a significant portion of our debt through our retail and institutional sales force to a diversified global investor base.

We diversify funding by issuing various types of debt instruments these include both structured loans and notes. Structured notes are debt obligations with returns linked to other debt or equity securities, indices, currencies or commodities. We issue structured notes in order to increase the diversity of our debt instruments. We typically hedge the returns we are obliged to pay with derivative positions and/or the underlying assets to maintain funding consistency with our unsecured long term debt. The proportion of our non-yen denominated long-term debt slightly decreased to 28.0% of total term debt outstanding as of March 31, 2012 from 28.5% as of March 31, 2011.

2.1 Short-Term Unsecured Debt

Our short-term unsecured debt consists primarily of short-term bank borrowings (including long-term bank borrowings maturing within one year), commercial paper, deposits at banking entities, certificates of deposit and bonds and notes maturing within one year. Deposits at banking entities and certificates of deposit represent customer deposits and certificates of deposit held by our banking subsidiaries.

Our short-term unsecured debt total increased ¥374.8 billion to ¥3,009.1 billion as of March 31, 2012 from ¥2,634.3 billion as of March 31, 2011 mainly due to a ¥366.4 billion increase in short-term bank borrowings to ¥1,250.7 billion as of March 31, 2012 from ¥884.3 billion as of March 31, 2011. The average outstanding balance of commercial paper was ¥338.0 billion for the period ended in March 31, 2012.

The table below summarizes our Short-Term Unsecured Debt:

	Billions of yen March 31	
	2011	2012
Short-Term Unsecured Debt Total ⁽¹⁾	¥ 2,634.3	¥ 3,009.1
Short-Term Bank Borrowings	884.3	1,250.7
Other Loans	84.8	99.0
Commercial Paper	379.5	315.6
Deposit at Banking Entities	573.1	589.8
Certificates of Deposit	184.0	234.7
Bonds and Notes maturing within one year	528.6	519.3

(1) Short-term unsecured debt includes the current portion of long-term unsecured debt.

2.2 Long-Term Unsecured Debt

We also routinely issue long term-debt in various maturities and currencies to maintain a long-term funding surplus, and to also achieve both cost-effective funding and a maturity profile where the average duration of our debt is sufficient to meet our long-term cash capital requirements.

Table of Contents

Our long-term unsecured debt includes senior and subordinated debt issued through U.S registered shelf offerings and our U.S. registered medium-term note programs, our Euro medium-term note programs, registered shelf offerings in Japan and various other bond programs.

As a globally competitive financial service group in Japan, we have access to multiple markets worldwide and major funding centers. The Company, NSC, Nomura Europe Finance N.V. (NEF) and Nomura Bank International plc (NBI) are the main entities that conduct external borrowings, issuances of debt instruments and other funding activities. By raising funds to match the currencies and liquidities of our assets or by using foreign exchange swaps as may be necessary, we pursue optimization of our funding structures.

We use a wide range of products and currencies to ensure that our funding is efficient and well diversified across markets and investor types. Our unsecured senior debt is issued without financial covenants, such as covenants related to adverse changes in our credit ratings, cash flows, results of operations or financial ratios, which could trigger an increase in our cost of financing or accelerate the maturity of the debt.

Our long-term debt decreased ¥93.9 billion to ¥6,373.0 billion as of March 31, 2012 from ¥6,466.9 billion as of March 31, 2011, primarily due to ¥663.7 billion decrease in bonds and notes to ¥3,559.3 billion as of March 31, 2012 from ¥4,223.0 billion as of March 31, 2011. The increase in long-term bank borrowings primarily reflected refinancing of some of our long-term bank borrowings which was, partly offset by a ¥589.5 billion increase in long-term bank borrowings to ¥2,589.1 billion as of March 31, 2012 from ¥1,999.6 billion as of March 31, 2011.

In the fiscal year ended on March 31, 2012, Nomura issued ¥215.4 billion of domestic bonds, that consists of ¥170.0 billion of subordinated bonds and ¥45.4 billion of senior debt securities.

The table below summarizes our Long-Term Unsecured Debt:

	Billions of yen March 31	
	2011	2012
Long-Term Unsecured Debt Total	¥ 6,466.9	¥ 6,373.0
Long-Term Deposit at Banking Entities	55.5	80.2
Long-Term Bank Borrowings	1,999.6	2,589.1
Other Loans	188.8	144.4
Bonds and Notes ⁽¹⁾	4,223.0	3,559.3
NHI Shareholders' Equity	2,082.8	2,107.2

- (1) Excluding long-term bonds and notes issued by consolidated VIEs that meet the definition of Variable Interest Entities (VIEs) under ASC 810, Consolidation (ASC 810) and secured financing transactions recognized within long-term borrowings as a result of transfers of financial assets that are accounted for as financings rather than sales in accordance with ASC 860.

2.3 Maturity Profile

We also seek to maintain an average maturity for plain vanilla instruments greater than or equal to three years. The average maturity for plain vanilla debt securities and borrowings with maturities longer than one year was 4.33 years as of March 31, 2012. A major part of our medium-term notes are structured and linked to interest or equity, indices, currencies or commodities. Conditions for calling notes by indices are individually determined. These maturities are evaluated based on our internal model and monitored by Global Treasury. Maturities for plain vanilla debt securities and borrowings are evaluated based on contractual maturities. Where there is a possibility that notes may be called prior to their scheduled maturity date, maturities are based on our internal stress option adjusted model. This model values the embedded optionality under stress market conditions in order to determine when the note is likely to be called.

Table of Contents

On this basis, the average maturity of structured notes (notes with maturities longer than one year) was 10.35 years as of March 31, 2012. The average maturity of our entire long term debt portfolio, including plain vanilla debt securities and borrowings, was 6.79 years as of March 31, 2012. The graph below shows the distribution of maturities of our outstanding long-term debt securities and borrowings.

(1) Redemption schedule is individually estimated by considering of probability of redemption. Due to structure bias, we use probability adjusted by a certain stress factor.

2.4 Secured Borrowings

We typically fund our trading activities on a secured basis through secured borrowings, repurchase agreements and Japanese Gensaki transactions. Repo transactions involve the selling of government and government agency securities under agreements with clients to repurchase these securities from clients. Japanese Gensaki transactions have no margin requirements or substitution right. We believe these funding activities in the secured markets are more cost-efficient and less credit-rating sensitive than financing in the unsecured market. Also, repurchase agreements tend to be short-term, often overnight. We manage the liquidity risks arising from secured funding by transacting with a diverse group of global counterparties, providing with a various range and types of securities collateral and actively seeking to term out the tenor of certain transactions. For more detail of secured borrowings and repurchase agreements, see Note 6 *Collateralized transactions* to our consolidated financial statements.

3. Management of Credit Lines to Nomura Group entities.

We maintain committed facility agreements with financial institutions for Nomura Group entities in order to provide contingent financing sources. Total of unused committed facilities increased ¥13.9 billion to ¥138.3 billion as of March 31, 2012 from ¥124.4 billion as of March 31, 2011. We have structured the facilities to ensure that the maturity dates of these facilities are distributed evenly throughout the year in order to prevent excessive maturities of facilities in any given period. While the ability to borrow under these facilities is subject to customary lending conditions and covenants, we do not believe that any of the covenant requirements will impair our ability to draw on the facilities. We occasionally test the effectiveness of our drawdown procedures.

Table of Contents**4. Implementation of Liquidity Stress Tests.**

We maintain our liquidity portfolio and monitor our sufficiency of liquidity based on an internal model which simulates changes in cash outflow under specified stress scenarios to comply with our above mentioned liquidity management policy.

We assess the firm's liquidity requirements under various stress scenarios with differing levels of severity over multiple time horizons. We evaluate these requirements under company-specific and broad market wide events, including potential credit rating downgrades at the parent company and subsidiary levels that may impact us by loss of access to unsecured capital markets, additional collateral posting requirements, limited or no access to secured funding markets and other events. We call this risk analysis our "Maximum Cumulative Outflow" framework.

To ensure a readily available source for a potential liquidity requirement, we maintain a liquidity portfolio in the form of cash and highly liquid, unencumbered securities that may be sold or pledged to provide liquidity. As of March 31, 2012, our liquidity portfolio was ¥ 5,427.7 billion which generated a liquidity surplus taking into account a stress scenario as defined in our liquidity risk policy. We recognize that the liquidity standards for financial institutions continue to be the subject of further discussion among the relevant supervisory bodies including the Basel Committee. The existing model and simulations upon which we currently rely may need to be reviewed depending on any new development in this area. Our liquidity portfolio is composed of the following highly liquid products.

	Billions of yen March 31	
	2011	2012
Liquidity Portfolio	¥ 5,819.1	¥ 5,427.7
Cash, Cash Equivalent and Time Deposits	1,959.7	1,137.3
Government Securities	3,851.1	3,877.4
Others	8.3	413.0

In addition to the liquidity portfolio, we have ¥1,289.6 billion of other unencumbered assets comprising mainly unpledged trading assets that can be used as an additional source of secured funding. The aggregate value of our liquidity portfolios and other unencumbered assets as of March 31, 2012 was ¥6,717.3 billion this represented 223.2 % of our total unsecured debt maturing within one year.

	Billions of yen March 31	
	2011	2012
Net Liquidity Value of Other Unencumbered Assets	¥ 1,806.9	¥ 1,289.6
Liquidity Portfolio	5,819.1	5,427.7
Total	¥ 7,626.0	¥ 6,717.3

In the stress test, we assume the cash outflow as shown below and also consider the assumption that in certain instances, legal and regulatory requirements can restrict the flow of funds between entities in our consolidated group, and funds or securities may not freely move among us.

The size and structure of our liquidity portfolio takes into account immediate cash requirements arising from

- (i) Upcoming maturities of unsecured debt (maturities less than one year)
- (ii) Potential buybacks of our outstanding debt
- (iii) Loss of secured funding lines particularly for less liquid assets, over and above our cash capital estimates

Table of Contents

(iv) Fluctuation of funding needs under normal business circumstances

(v) Cash and collateral outflows in a stress event

We constantly evaluate and modify our liquidity risk assumptions based on regulatory and market changes. The model we use in order to simulate the impact of stress scenarios assumes no liquidation of assets, no ability to issue additional unsecured funding, a widening of haircuts on outstanding repo funding, collateralization of clearing banks and depositories, drawdowns on loan commitments and loss of liquidity from market losses on inventory.

In 2008, the Basel Committee published Principles for Sound Liquidity Risk Management and Supervision (*Sound Principles*). To complement these principles, the Committee has further strengthened its liquidity framework by developing two minimum standards for funding liquidity. These standards have been developed to achieve two separate but complementary objectives.

The first objective is to promote short-term resilience of a bank's liquidity risk profile by ensuring that it has sufficient high-quality liquid assets to survive a significant stress scenario lasting for one month. The Committee developed the Liquidity Coverage Ratio (LCR) to achieve this objective.

The second objective is to promote resilience over a longer time horizon by creating additional incentives for banks to fund their activities with more stable sources of funding on an ongoing basis. The Net Stable Funding Ratio (NSFR) has a time horizon of one year and has been developed to provide a sustainable maturity structure of assets and liabilities.

These two standards are comprised mainly of specific parameters which are internationally harmonised with prescribed values. Certain parameters, however, contain elements of national discretion to reflect jurisdiction-specific conditions.

After an observation period, the LCR, including any revisions, will be introduced on January 1, 2015. The NSFR, including any revisions, will move to a minimum standard by January 1, 2018.

5. Contingency Funding Plan.

We have developed a detailed contingency funding plan to integrate liquidity risk control into our comprehensive risk management strategy and to enhance the quantitative aspects of our liquidity risk control procedures. As a part of the Contingency Funding Plan (*CFP*), we have developed an approach for analyzing and specifying the extent of any liquidity crisis. This allows us to estimate the likely impact of both a Nomura-specific and market-wide crises; and specifies the immediate action to be taken to mitigate any risk. The CFP lists details of key internal and external parties to be contacted and the processes by which information is to be disseminated. This has been developed at the legal entity level in order to capture specific cash requirements at the local level – it assumes that the parent company does not have access to cash that may be trapped at the subsidiary level due to regulatory, legal or tax constraints. We periodically test the effectiveness of our funding plans for different Nomura-specific and market-wide events. We also have access to operations at central banks including but not exclusively the Bank of Japan, which provide financing against various types of securities. These operations are accessed in the normal course of business and are an important tool in mitigating contingent risk from market disruptions.

Cash Flows

Nomura's cash flows are primarily generated from operating activities undertaken in connection with our client flows and trading and from financing activities which are closely related to such activities. As a financial institution, growth in operations tends to result in cash outflows from operating activities as well as investing

Table of Contents

activities, as was generally the case for a number of years through the fiscal year ended March 31, 2011. For the fiscal year ended March 31, 2012, we recorded net cash inflows from operating activities and investing activities as discussed in the comparative analysis mentioned below.

The following is the summary information on our consolidated cash flows for the years ended March 31, 2011 and 2012:

	Billions of yen	
	Year Ended March 31	
	2011	2012
Net cash provided by (used in) operating activities	¥ (235.1)	¥ 290.9
Net income	31.9	26.1
Trading assets and private equity investments	(1,481.9)	971.3
Trading liabilities	1,206.4	(1,058.4)
Securities purchased under agreements to resell, net of securities sold under agreements to repurchase	327.7	980.2
Securities borrowed, net of securities loaned	(446.2)	(508.8)
Other, net	127.0	(119.4)
Net cash provided by (used in) investing activities	(423.2)	9.9
Net cash provided by (used in) financing activities	1,284.2	(844.3)
Long-term borrowings, net	1,079.6	(867.6)
Other, net	204.6	23.3
Effect of exchange rate changes on cash and cash equivalents	(26.2)	(6.3)
Net increase (decrease) in cash and cash equivalents	599.7	(549.8)
Cash and cash equivalents at beginning of the year	1,020.6	1,620.3
Cash and cash equivalents at end of the year	¥ 1,620.3	¥ 1,070.5

See the consolidated statements of cash flows in our consolidated financial statements for more detailed information.

For the year ended March 31, 2012, our cash and cash equivalents decreased by ¥549.8 billion to ¥1,070.5 billion. Net cash of ¥844.3 billion was used in financing activities due to cash outflows of ¥867.6 billion by net payments of *Long-term borrowings*. As part of trading activities, while there were net cash outflows of ¥87.1 billion from cash inflows due to a decrease in *Trading assets and Private equity investments* in combination with cash outflows due to a decrease in *Trading liabilities*, they were offset by ¥471.4 billion of net cash inflows from repo transactions and securities borrowed and loaned transactions such as *Securities purchased under agreements to resell*, *Securities sold under agreements to repurchase*, and *Securities borrowed, net of Securities loaned*. As a result, net cash of ¥290.9 billion was provided by operating activities.

For the year ended March 31, 2011, our cash and cash equivalents increased by ¥599.7 billion to ¥1,620.3 billion. Net cash of ¥1,284.2 billion was provided by financing activities due to cash inflows of ¥1,079.6 billion from net issuance of *Long-term borrowings*. As part of trading activities, there were net cash outflows of ¥275.5 billion from cash outflows due to an increase in *Trading assets and Private equity investments* in combination with cash inflows due to an increase in *Trading liabilities* and there were also net cash outflows of ¥118.5 billion from repo transactions and securities borrowed and loaned transactions such as *Securities purchased under agreements to resell*, *Securities sold under agreements to repurchase*, and *Securities borrowed, net of Securities loaned*. As a result, net cash of ¥235.1 billion was used in operating activities.

Balance Sheet and Financial Leverage

Total assets as of March 31, 2012, were ¥35,697.3 billion, a decrease of ¥995.7 billion compared with ¥36,693.0 billion as of March 31, 2011, reflecting decreases in *Cash and cash equivalent*, *Securities purchased*

Table of Contents

under agreements to resell and *Trading assets*. Total liabilities as of March 31, 2012, were ¥33,308.2 billion, a decrease of ¥1,293.2 billion compared with ¥34,601.4 billion as of March 31, 2011, reflecting decreases in *Securities sold under agreements to repurchase*, *Trading liabilities* and *Other secured borrowings*. NHI shareholders' equity as of March 31, 2012, was ¥2,107.2 billion, an increase of ¥24.4 billion compared with ¥2,082.8 billion as of March 31, 2011, due to increases in *Additional paid-in capital*.

We seek to maintain sufficient capital at all times to withstand losses due to extreme market movements. The EMB is responsible for implementing and enforcing capital policies. This includes the determination of our balance sheet size and required capital levels. We continuously review our equity capital base to ensure that it can support the economic risk inherent in our business. There are also regulatory requirements for minimum capital of entities that operate in regulated securities or banking businesses.

As leverage ratios are commonly used by other financial institutions similar to us, we voluntarily provide a Leverage ratio and Adjusted leverage ratio primarily for benchmarking purposes so that users of our annual report can compare our leverage against other financial institutions. There are currently no regulatory or statutory reporting requirements which require us to disclose leverage ratios.

The following table sets forth NHI shareholders' equity, total assets, adjusted assets and leverage ratios:

	Billions of yen, except ratios	
	March 31	
	2011	2012
NHI shareholders' equity	¥ 2,082.8	¥ 2,107.2
Total assets ⁽¹⁾	36,693.0	35,697.3
Adjusted assets ⁽²⁾	21,536.7	21,954.7
Leverage ratio ⁽³⁾	17.6x	16.9x
Adjusted leverage ratio ⁽⁴⁾	10.3x	10.4x

(1) Reconciles to the total assets amount disclosed on the face of our consolidated balance sheets and therefore excludes the fair value of securities transferred to counterparties under repo-to-maturity and certain Japanese securities lending transactions which are accounted for as sales rather than collateralized financing arrangements. The fair value of securities derecognized under these agreements has not had a significant impact on our reported Leverage and Adjusted leverage ratios as of March 2011 and 2012.

(2) Represents total assets less *Securities purchased under agreements to resell* and *Securities borrowed*.

(3) Equals total assets divided by NHI shareholders' equity.

(4) Equals adjusted assets divided by NHI shareholders' equity.

Total assets decreased by 2.7% reflecting primarily a decrease in *Securities purchased under agreements to resell*. Total NHI shareholders' equity increased by 1.2%. As a result, our leverage ratio went down from 17.6 times as of March 31, 2011 to 16.9 times as of March 31, 2012.

Adjusted assets increased primarily due to an increase in *Office buildings, land, equipment and facilities*. As a result, our adjusted leverage ratio went up from 10.3 times as of March 31, 2011 to 10.4 times as of March 31, 2012.

Capital Management*Capital Management Policy*

We seek to enhance shareholder value and to capture growing business opportunities by maintaining sufficient levels of capital. We review levels of capital as appropriate, taking into consideration the economic risks inherent to operating our businesses, the regulatory requirements, and maintaining our ratings necessary to operate businesses globally.

Table of Contents*Dividends*

Nomura believes that pursuing a sustainable increase in shareholder value and paying dividends are essential to generating returns to our shareholders. Nomura will strive to pay stable dividends using a consolidated payout ratio of 30 percent as a key indicator.

Dividend payments will be determined taking into account a comprehensive range of factors such as the tightening of Basel regulations and other changes to the regulatory environment, as well as the Company's consolidated financial performance.

Nomura paid a dividend of ¥4.0 per share for the first half and a dividend of ¥2.0 per share for the second half in line with its dividend policy for the fiscal year ended March 31, 2012.

With respect to the retained earnings, in order to implement measures to adapt to regulatory changes and to increase shareholder value, we seek to efficiently invest in business areas where high profitability and growth may reasonably be expected, including the development and expansion of infrastructure.

The following table sets forth the amounts of dividends per share paid by us in respect of the periods indicated:

Fiscal year ended or ending March 31,	First Quarter		Second Quarter		Third Quarter		Fourth Quarter		Total
2007	¥	8.00	¥	8.00	¥	8.00	¥	20.00	¥ 44.00
2008		8.50		8.50		8.50		8.50	34.00
2009		8.50		8.50		8.50			25.50
2010				4.00				4.00	8.00
2011				4.00				4.00	8.00
2012				4.00				2.00	6.00

Stock Repurchases

We consider repurchase of treasury stock as an option in our financial strategy to respond quickly to changes in the business environment and to increase shareholder value. We make announcements immediately after any decision to set up a share buyback program and conduct such programs in accordance with internal guidelines.

Preferred Stock

Effective June 28, 2011, in order to respond to Basel III capital adequacy requirements, we have amended our Articles of Incorporation to enable issuance of each class of preferred stock with a provision for redemption upon the occurrence of certain events. (See *Preferred Stock* under Item 10.B. of this annual report for further information.) We do not have plans to issue preferred stocks as of June 27, 2012. The amendment did not result in any change to the total number of shares authorized to be issued.

Consolidated Regulatory Requirements

As discussed in Item 4.B. (Regulatory Capital Rules), the FSA established the *Guideline for Financial Conglomerate Supervision* (the *Financial Conglomerate Guideline*) in June 2005 and set out the rules on consolidated regulatory capital. We started monitoring our consolidated capital adequacy ratio in accordance with the *Financial Conglomerate Guideline* from April 2005.

Beginning from the end of March, 2009, we elected to calculate the consolidated capital adequacy ratio according to the *Bank Holding Companies Notice* as permitted under the *Financial Instruments Business Operators Guidelines*, although we continue to be monitored as a financial conglomerate governed by the *Financial Conglomerate Guideline*.

Table of Contents

The Company has been assigned as a Final Designated Parent Company who must calculate the consolidated regulatory capital adequacy ratio according to the Capital Adequacy Notice on Final Designated Parent Company in April 2011. Since then, we have been calculating our Basel II-based consolidated regulatory capital adequacy ratio according to the Capital Adequacy Notice on Final Designated Parent Company. Note that the Capital Adequacy Notice on Final Designated Parent Company has been revised in line with Basel 2.5 and we have calculated our Basel 2.5-based consolidated regulatory capital adequacy ratio since December 2011.

In accordance with Article 3 of the Capital Adequacy Notice on Final Designated Parent Company, our consolidated regulatory capital adequacy ratio is calculated based on the amounts of qualifying capital, credit risk-weighted assets, market risk, and operational risk. Also in accordance with Article 2 of the Capital Adequacy Notice on Final Designated Parent Company, our consolidated regulatory capital adequacy ratio is higher than 8%. As of March 31, 2012, we were in compliance with this requirement, with a ratio of total capital to risk-weighted assets of 16.5%.

The following table presents Nomura's consolidated capital adequacy ratio as of March 31, 2011 and March 31, 2012:

	Billions of yen, except ratios March 31	
	2011	2012
Qualifying Capital		
Tier 1 capital	¥ 1,915.0	¥ 2,090.2
Tier 2 capital	651.5	319.6
Tier 3 capital	139.6	224.3
Deductions	121.8	207.0
Total qualifying capital	2,584.3	2,427.0
Risk-Weighted Assets		
Credit risk-weighted assets	7,468.4	8,324.4
Market risk equivalent assets	2,442.3	3,924.6
Operational risk equivalent assets	1,718.8	2,432.0
Total risk-weighted assets	11,629.5	14,681.0
Consolidated Capital Adequacy Ratios		
Consolidated capital adequacy ratio	22.2%	16.5%
Tier 1 capital ratio	16.4%	14.2%

Total qualifying capital is comprised of Tier 1, Tier 2, Tier 3 capital and deduction items. Our Tier 1 capital mainly consists of NHI shareholders equity and non-controlling interests less goodwill, certain intangible fixed assets and 50% of expected loss defined in rule text. Tier 2 and Tier 3 capital consists of subordinated debt classified to Tier 2 and Tier 3 by original maturity and other conditions set out by the Capital Adequacy Notice on Final Designated Parent Company. Deduction items include the remaining 50% of expected loss and strategic holding as of financial institution's stock.

Market risk is calculated using an internal model method for market risk (Nomura's VaR model). Since the end of December, 2011, we are required to calculate market risk requirement under the Basel 2.5 rule, which is significantly larger than under Basel II rule. On March 31, 2011, we started calculating credit risk assets and operational risk using foundation Internal Ratings-Based approach and The Standardized Approach, respectively.

We provide Tier 1 capital ratio and consolidated capital adequacy ratio not only to demonstrate that we are in compliance with the Capital Adequacy Notice on Final Designated Parent Company but also for benchmarking purposes so that users of our report can compare our capital position against those of other financial groups under the same Basel framework. Management receives and reviews these capital ratios on a regular basis.

Table of Contents

The Basel Committee has issued a series of announcements regarding a broader program designed to strengthen the regulatory capital framework in light of weaknesses revealed by the financial crises. The following is a summary of the proposals which are most relevant to us.

On July 13, 2009, the Basel Committee announced its approval of a package of measures designed to strengthen its rules governing trading book capital and to enhance the three pillars of the Basel II framework, which is called "Basel 2.5". This announcement states that the Basel Committee's trading book rules, effective at the end of 2011, will introduce higher capital requirements to capture the credit risk of complex trading activities. Such trading rules also include a stressed VaR requirement.

On December 16, 2010, in an effort to promote a more resilient banking sector, the Basel Committee issued Basel III, that is, "International framework for liquidity risk measurement, standards and monitoring" and "A global regulatory framework for more resilient banks and banking systems". The proposals include raising the quality, consistency and transparency of the capital base; strengthening the risk coverage of the capital framework such as the implementation of a credit value adjustment charge for over-the-counter derivative trades; introducing a leverage ratio requirement as a supplemental measure to the risk-based framework; and introducing a series of measures to address concerns over the "procyclicality" of the current framework. The proposals also introduce a minimum liquidity standard including a 30-day liquidity coverage ratio as well as a longer-term structural liquidity ratio. Additional capital, liquidity or other supervisory measures to reduce the externalities created by systemically important institutions are also under review. These standards will be phased in gradually from 2013.

At the G-20 summit in November 2011, the Financial Stability Board ("FSB") and the Basel Committee announced the list of global systemically important financial institutions ("G-SIFIs") and the additional requirements to the G-SIFIs including the recovery and resolution plan. The FSB also announced the group of G-SIFIs will be updated annually and published by the FSB each November.

The FSA introduced notices such as the Capital Adequacy Notice on Final Designated Parent Company on consolidated regulation and supervision of securities companies on a consolidated basis on April 1, 2011 to improve the stability and transparency of Japan's financial system and ensure the protection of investors. It reviewed the Capital Adequacy Notice on Final Designated Parent Company according to Basel 2.5 and Basel III framework and the revised notice in line with Basel 2.5 was implemented at the end of December 2011 and the revised notice in line with Basel III will be implemented at the end of March 2013. It is expected that the revised notice will be in line with a series of rules and standards proposed by the Basel Committee.

Credit Ratings

The cost and availability of unsecured funding generally are dependent on credit ratings. Our long-term and short-term debt is rated by several recognized credit rating agencies. We believe that our credit ratings include the credit ratings agencies' assessment of the general operating environment, our positions in the markets in which we operate, reputation, earnings structure, trend and volatility of our earnings, risk management framework, liquidity and capital management. An adverse change in any of these factors could result in a downgrade of our credit ratings, and that could, in turn, increase our borrowing costs and limit our access to the capital markets or require us to post additional collateral and permit counterparties to terminate transactions pursuant to certain contractual obligations. In addition, our credit ratings can have a significant impact on certain of our trading revenues, particularly in those businesses where longer term counterparty performance is critical, such as OTC derivative transactions.

Table of Contents

As of May 31, 2012, the credit ratings of the Company and NSC were as follows:

Nomura Holdings, Inc.	Short-term Debt	Long-term Debt
Standard & Poor's	A-2	BBB+
Moody's Investors Service		Baa3
Rating and Investment Information, Inc.	a-1	A+
Japan Credit Rating Agency, Ltd.		AA-

Nomura Securities Co., Ltd.	Short-Term Debt	Long-term Debt
Standard & Poor's	A-2	A-
Moody's Investors Service	P-2	Baa2
Rating and Investment Information, Inc.	a-1	A+
Japan Credit Rating Agency, Ltd.		AA-

Both Rating and Investment Information, Inc. and Japan Credit Rating Agency, Ltd. are credit rating agencies nationally recognized in Japan. We rely on, or utilize, credit ratings on our long-term and short-term debt provided by these Japanese credit rating agencies, as well as Standard & Poor's and Moody's Investors Service, for unsecured funding and other financing purposes and also for our trading and other business activities. Within the rating classification system of Rating and Investment Information, Inc., a-1 is the highest of five categories for short-term debt and indicates a strong degree of certainty regarding the debt repayment; and A is the third highest of nine categories for long-term debt and indicates a high degree of certainty regarding the debt repayment with excellence in specific component factors, with a plus (+) or minus (-) sign added to a rating in that category to indicate its relative standing within that category. Within the rating classification system of Japan Credit Rating Agency, Ltd., AA is the second highest of ten categories for long-term debt and indicates a very high level of capacity to honor the financial commitment on the obligation, with a plus (+) or minus (-) sign added to a rating in that category to indicate its relative standing within that category.

On March 15, 2012, Moody's Investors Service downgraded the ratings for senior debt from Baa2 to Baa3 and from Baa1 to Baa2 for the Company and NSC, respectively. The short-term debt rating for NSC was affirmed at P-2 and the outlook on all the ratings is stable. This downgrade was attributable to Moody's view of the longer-term challenges facing Nomura's Institutional wholesale activities and a reassessment of the risks inherent in the business model of global investment banks while Moody's recognizes the progress being made in Nomura's recent restructuring efforts and its well-established retail and wholesale franchise in Japan.

There has been no change to the ratings in the above table since the date indicated.

C. Research and Development, Patents and Licenses, etc.

Not applicable.

D. Trend Information.

The information required by this item is set forth in Item 5.A of this annual report.

E. Off-Balance Sheet Arrangements.*Off-balance sheet entities*

In the normal course of business, we engage in a variety of off-balance sheet arrangements with off-balance sheet entities which may have an impact on Nomura's future financial position and performance.

Off-balance sheet arrangements with off-balance sheet entities include the following where Nomura has:

an obligation under a guarantee contract;

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

a retained or contingent interest in assets transferred to an off-balance sheet entity or similar arrangement that serves as credit, liquidity or market risk support;

Table of Contents

any obligation, including a contingent obligation, under a contract that would be accounted for as a derivative instrument; or

any obligation, including a contingent obligation, arising out of a variable interest in an off-balance sheet entity that is held by, and material to, us, where such entity provides financing, liquidity, market risk or credit risk support to, or engages in leasing, hedging or research and development services with, us.

Off-balance sheet entities may take the form of a corporation, partnership, fund, trust or other legal vehicle which is designed to fulfill a limited, specific purpose by its sponsor. We both create or sponsor these entities and also enter into arrangements with entities created or sponsored by others.

Our involvement with these entities includes structuring, underwriting, distributing and selling debt instruments and beneficial interests issued by these entities, subject to prevailing market conditions. In the normal course of business, we also act as a transferor of financial assets to these entities, as well as, and underwriter, distributor and seller of asset-repackaged financial instruments issued by these entities, in connection with our securitization and equity derivative activities. We retain, purchase and sell variable interests in SPEs in connection with our market-making, investing and structuring activities. Our other types of off-balance sheet arrangements include guarantee agreements and derivative contracts. Significant involvement is assessed based on all of our arrangements with these entities, even if the probability of loss, as assessed at the balance sheet date, is remote.

For further information about transactions with VIEs, see Note 8 *Securitized and Variable Interest Entities* to our consolidated financial statements.

Repurchase and securities lending transactions accounted for as sales

We enter into certain types of repurchase transactions and securities lending transactions which we account for as sales rather than collateralized financings where the criteria for derecognition of the securities transferred under ASC 860 are met. These consist of repo-to-maturity transactions and certain types of securities transactions.

We enter into repo-to-maturity transactions to take advantage of arbitrage opportunities between the cash security and repo markets. These transactions involve the sourcing of specific securities in the market and contemporaneously entering into repurchase agreements with different counterparties where the maturity of the agreement matches the maturity of the security transferred as collateral. We account for these transactions as sales rather than collateralized financings where the criteria for derecognition of the securities transferred under ASC 860 are met. The amounts of securities derecognized from our consolidated balance sheets under open repo-to-maturity transactions as of March 31, 2011 and 2012 were ¥169,766 million and ¥39,797 million, respectively.

We engage in certain Japanese securities lending transactions for funding purposes under which we transfer long securities (such as Japanese listed equities). The agreements supporting these transactions include varying margining requirements, but the amount of cash we borrow from our counterparties is typically significantly less than the fair value of securities we lend. We account for these transactions as sales in our consolidated financial statements where the criteria for derecognition of the transferred financial assets under ASC 860 are met. In particular, we do not maintain effective control over the transferred financial assets as we are not able to be returned the transferred financial assets on substantially agreed terms, even in the event of default by the transferee. Upon adoption of Accounting Standard Update (ASU) No. 2011-03 *Reconsideration of Effective Control for Repurchase Agreements* as of January 1, 2012, Nomura has not derecognized such transactions that started on and after the adoption date. The amounts of securities derecognized from our consolidated balance sheets under open securities lending transactions as of March 31, 2011 and 2012 were ¥291,870 million and ¥1,930 million, respectively.

Table of Contents

F. Tabular Disclosure of Contractual Obligations.

As part of our business, we enter into a variety of contractual obligations and contingent commitments, which may require future payments. These arrangements include:

Standby letters of credit and other guarantees:

In the normal course of our banking / financing activities, we enter into various guarantee arrangements with counterparties in the form of standby letters of credit and other guarantees, which generally have a fixed expiration date.

Long-term borrowings and contractual interest payments:

In connection with our operating activities, we issue Japanese yen and non-Japanese yen denominated long-term borrowings which incur variable and fixed interest payments in accordance with our funding policy.

Operating lease commitments:

We lease our office space and certain employees' residential facilities in Japan primarily under cancellable lease agreements which are customarily renewed upon expiration;

We lease certain equipment and facilities under non-cancellable operating lease agreements.

Capital lease commitments:

We lease certain office space, equipment and facilities under capital lease agreements.

Purchase obligations:

We have purchase obligations for goods and services which include payments for construction-related, advertising, and computer and telecommunications maintenance agreements.

Commitments to extend credit:

In connection with our banking and financing activities, we enter into contractual commitments to extend credit, which generally have a fixed expiration dates;

In connection with our investment banking activities, we enter into agreements with clients under which we commit to underwrite securities that may be issued by clients.

Commitments to invest in partnerships:

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

In connection with our merchant banking activities, we have commitments to invest in interests in various partnerships and other entities and commitments to provide financing for investments related to those partnerships.

Commitments to purchase aircraft:

In connection with our aircraft leasing business, we have commitments to purchase aircraft.

Commitments to purchase real estate:

In connection with our real estate related activities, we have commitments to purchase real estate for sale and rental.

Table of Contents

Note 13 *Borrowings* contains further detail on our short-term and long-term borrowing obligation and Note 22 *Commitments, contingencies and guarantees* to our consolidated financial statements contains further detail on our other commitments, contingencies and guarantees.

The contractual amounts of commitments to extend credit represent the maximum amounts at risk should the contracts be fully drawn upon, should the counterparties default, and assuming the value of any existing collateral becomes worthless. The total contractual amount of these commitments may not represent future cash requirements since the commitments may expire without being drawn upon. The credit risk associated with these commitments varies depending on the clients' creditworthiness and the value of collateral held. We evaluate each client's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on management's credit evaluation of the counterparty.

The following table presents information regarding amounts and timing of our future contractual obligations and contingent commitments as of March 31, 2012:

	Total contractual amount	Millions of yen			
		Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Standby letters of credit and other guarantees	¥ 21,674	¥ 12,919	¥ 138	¥ 212	¥ 8,405
Long-term borrowings ⁽¹⁾	8,281,872	1,112,828	2,463,672	1,623,241	3,082,131
Contractual interest payments ⁽²⁾	1,090,956	142,159	233,456	146,067	569,274
Operating lease commitments	169,038	21,129	35,821	25,089	86,999
Capital lease commitments ⁽³⁾	52,855	616	864	6,099	45,276
Purchase obligations ⁽⁴⁾	37,237	26,872	10,365		
Commitments to extend credit	332,009	81,515	48,052	147,354	55,088
Commitments to invest in partnerships	28,825	15,155	7,961	971	4,738
Commitments to purchase aircraft	52,411	25,727	26,684		
Commitments to purchase real estates	234,400	139,376	86,620	8,404	
Total	¥ 10,301,277	¥ 1,578,296	¥ 2,913,633	¥ 1,957,437	¥ 3,851,911

- (1) The amounts disclosed within long-term borrowings exclude financial liabilities recognized within long-term borrowings as a result of transfers of financial assets that are accounted for as financings rather than sales in accordance with ASC 860. These are not borrowings issued for our own funding purposes and therefore do not represent actual contractual obligations by us to deliver cash.
- (2) The amounts represent estimated future interest payments related to long-time borrowings based on the period through to their maturity and applicable interest rates as of March 31, 2012.
- (3) The total contractual amount of capital lease commitments is the total minimum lease payments before deducting interest.
- (4) The amounts reflect the minimum contractual obligations under enforceable and legally binding contracts that specify all significant terms. The amounts exclude obligations that are already reflected on our consolidated balance sheets as liabilities or payables.

Excluded from the above table are obligations that are generally short-term in nature, including short-term borrowings, deposits received at banks and other payables, collateralized agreements and financing transactions (such as resale and repurchase agreements), and trading liabilities.

In addition to amounts presented above, we have commitments under resale and repurchase agreements including amounts in connection with collateralized agreements, collateralized financing and Gensaki transactions. These commitments amount to ¥2,519 billion for resale agreements and ¥1,711 billion for repurchase agreements as of March 31, 2012. These amounts include certain types of repurchase transactions and securities lending transactions which we account for as sales rather than collateralized financings in accordance with ASC 860.

Table of Contents**Item 6. Directors, Senior Management and Employees****A. Directors and Senior Management.****Directors**

The following table provides information about Directors of the Company as of June 27, 2012. With respect to the information under Brief Personal History below, some of the Directors changed their titles upon our adoption of the holding company structure on October 1, 2001 and the Committee System on June 26, 2003, as described in Item 6.C of this annual report.

B. Compensation.

The overview of Nomura Group's compensation framework is as follows:

(1) Compensation policy

We have developed our compensation policy for both executives and employees of Nomura Group to enable us to achieve sustainable growth, realize a long-term increase in shareholder value, deliver client excellence, compete in a global market and enhance our reputation. Our compensation policy is based around the following six key themes. It aims to:

1. align with Nomura values and strategies;
2. reflect firm, division and individual performance;
3. establish appropriate performance measurement with a focus on risk;
4. align employee and shareholder interests;
5. establish appropriate compensation structures; and
6. ensure robust governance and control processes.

(2) Compensation governance

The Compensation Committee of Nomura, which is a statutory committee, is responsible for approving our overall compensation policy and for ensuring that Nomura Group's compensation framework supports our business strategy.

The Company has delegated authority to the Human Resources Committee (HRC) to develop and to implement Nomura Group's compensation policy. The HRC's responsibilities include:

approving the compensation framework, assuring that it is in line with global compensation strategy, while taking into account necessary factors to ensure that all staff, including members of executive management, are provided with appropriate incentives to enhance their performance and are rewarded for their individual contributions to the success of our business globally,

approving the total bonus pool and its allocation to each business,

Table of Contents

reviewing the performance measures of senior executives to ensure that benefits, including rights to performance-related compensation, reflect the performance of both individuals and our business globally,

continually reviewing the appropriateness and relevance of the compensation policy and

approving any major changes in employee benefits structures globally.

Current members include the Group CEO (as Chairman of the Committee), Group COO (concurrently serving as the Chairman and CEO of the Wholesale Division), CEO of the Retail Division, CEO of the Asset Management Division, CFO, Chief Risk Officer (CRO), head of the CEO/COO Office and heads of Human Resources.

(3) Nomura's compensation framework

The outline of our compensation framework is as follows:

Compensation		
Components	Purposes	Specific Elements
Base Salary	Rewards individuals for their knowledge, skills, competencies and experiences	Base pay
	Reflects local labor market standards	
Fixed Allowances	Reflects practices of local labor markets to deliver allowances as a part of fixed compensation to individuals	Housing allowances
		Overtime pay
Variable Compensation	Rewards team and individual performances, and their contribution to results as well as strategic and future value	Cash bonuses
	Reflects appropriate internal and market-based comparisons	Deferred compensation
	Reflects broad view on compensation, including individual performances, approaches to risk, compliance and cross divisional cooperation	

Note: Benefits are driven by local market regulations and practices, and are not included in the above.

(4) Variable compensation

In the compensation framework referred in (3), the outline of Variable Compensation is as follows;

Cash bonuses

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

A proportion of the variable compensation is delivered in the form of a cash payment following the end of the fiscal year. Individuals with higher levels of compensation receive a lower proportion in cash. This is in line with regulatory guidance, and while the policy is global in application, specific local regulatory requirements will be adhered to when deciding on proportions of cash bonuses.

Deferred compensation

Certain senior management and employees whose compensation is above a certain level receive a portion of their variable compensation in the form of deferred compensation vehicles. By linking the economic value to Nomura's stock price or imposing certain vesting periods in place, such plans will:

align employee interest with that of shareholders;

Table of Contents

increase employee retention through providing opportunities to grow personal wealth over certain period from the grant to vesting;
and

encourage cross-divisional and cross-regional collaboration by focusing individuals on a common goal of the long-term increase in corporate value.

With these benefits, deferred compensation plans are also recommended by regulators of key jurisdictions in which we operate.

The deferral period for our deferred compensation plans is three or more years in principle, and is five years for senior management and employees with certain responsibilities. This is in line with the Principles for Sound Compensation Practices issued by the FSB, which recommends, among others, a deferral period of three or more years.

In addition, unvested deferred compensation shall be reduced or forfeited in case of:

material restatement in financial statements

material violation of policies of Nomura; and

material detriment to the business or reputation of Nomura.

Nomura has 1. Core deferral plans, 2. Supplemental deferral plans and 3. Multi-Year Performance Deferral plan as its deferred compensation.

1. Core deferral plans

(a) Stock Acquisition Right (SAR) Plan

Nomura has issued the following two types of SARs.

SAR Plan A

Options are awarded with an exercise price higher than Nomura's stock price on the date of grant. There is a certain period set between the date of grant and the date of vesting. They are qualified as SARs under Japanese taxation laws and therefore have been issued mainly to employees in Japan.

SAR Plan B

This plan is intended to offer a similar economic effect as restricted stock, as commonly used in the U.S. and Europe. Options are granted with an exercise price of ¥1 per share. There is a certain period set between the date of grant and the date of vesting.

(b) Notional Stock Unit (NSU) Plan

This is a cash-settled plan that has been designed to replicate the key features of the SAR Plan B described above. This allows equity-linked awards to be made in countries where SARs are less favorably treated from tax or other perspectives.

2. Supplemental deferral plans

We also introduced the following deferral plans for the fiscal year ended March 31, 2011. These plans were offered to certain senior management and employees in addition to the Core deferral plans. The plans reinforce our goals of retaining and motivating our key talent in the

competitive market place.

Table of Contents*(a) Collared Notional Stock Unit (CSU) Plan*

This plan is linked to the value of the Nomura's stock price subject to a cap and a floor.

(b) Notional Indexed Unit (NIU) Plan

This plan is linked to a world stock index quoted by Morgan Stanley Capital International. Other material terms, including deferral period and vesting conditions, are the same as those for CSUs.

3. Multi-Year Performance Deferral (MYPD) plan

We also introduced MYPD as a deferred compensation for the fiscal year ended March 31, 2012 to senior management and employees with certain responsibilities. Number of units to be granted upon achieving a certain performance target is notified to applicable candidates in advance. At the end of a 2 year performance period, number of units is adjusted, subject to a degree of achievement, and granted in the form of Plan B SARs or NSUs. In case of performance below certain levels, no SARs or NSUs will be granted.

(5) Consistency with risk management and linkage to performance

In determining the aggregate compensation, Nomura considers the ratio of personnel expense against income (after a certain risk adjustment and before deduction of tax and personnel expenses). Risk adjustment of income is done by deducting a certain proportion of economic capital from each division's revenue. Such economic capital comprehensively recognizes quantitatively assessed risks, and reflects various risks including market, credit, liquidity, and operational risks.

Nomura recognizes that its aggregate compensation maintains consistency with the current financial soundness and future prospects of Nomura, and that it does not have significant impact on capital adequacy in the future.

(6) Compensation for Directors and Executive Officers

Pursuant to the fundamental approach and framework of compensation as described above, and as a company which adopts the committee-based corporate governance system, the Compensation Committee of Nomura determines compensation of its Directors and Executive Officers in accordance with the applicable compensation policy.

1 Aggregate compensation

Category	Number of Directors or Executive Officers ⁽¹⁾	Millions of yen Year ended March 31, 2012		
		Basic Compensation ⁽²⁾	Bonus	Total
Directors	15	¥362	¥	¥ 362
(Outside Directors)	(10)	(170)	()	(170)
Executive Officers	6	378		378
Total	21	¥740	¥	¥ 740

(1) The numbers of people above include 3 Directors (including 2 Outside Directors) and 1 Executive Officer who resigned in May and June 2011. There were 14 Directors and 5 Executive Officers as of March 31, 2012, of which 2 Directors were concurrently serving as Executive Officers. Their Compensation is included in that of Executive Officers.

Table of Contents

- (2) Basic compensation of ¥740 million includes other compensation (commuter pass allowance) of ¥1 million that has been provided.
- (3) In addition to the amount above: (1) SARs and supplemental deferral plans have been granted during the year ended March 31, 2012 and in the past. ¥214 million for Directors (including ¥1 million for Outside Directors) and ¥587 million for Executive Officers were recognized as expense in the financial statements for the year ended March 31, 2012; and (2) subsidiaries of Nomura paid ¥138 million to Outside Directors as compensation etc. for their directorship at those subsidiaries for the year ended March 31, 2012.

2. Individual compensation of Directors and Executive Officers receiving ¥100 million or more

Name	Company	Category	Millions of yen						
			Fixed Remuneration (Basic Compensation)			Variable Compensation ⁽²⁾			
			Base Salary	Equity Compensation (SARs) ⁽¹⁾	Total	Cash Bonus	Deferred Compensation (SARs, etc.)	Total	
Kenichi Watanabe	Nomura	Director, Representative Executive Officer (Group CEO)	108	20	128				128
Takumi Shibata	Nomura	Director, Representative Executive Officer (Group COO)	96	17	113				113

- (1) The fair value of Equity Compensation (SARs) under Basic Compensation is 397 yen per share, which is based on the share price at the time of grant (June 2011). For details, see Stock Acquisition Rights (SARs) below.
- (2) Variable Compensation indicates the amount determined as remuneration based on the performance during the fiscal year ended March 31, 2012 (this fiscal year). In accordance with the FIEA and the Comprehensive Guidelines for Supervision of Financial Instruments Business Operators, etc., Nomura, as a Final Designated Parent Company of a securities company, is required to prepare Explanatory Document on the Status of Operation and Property (Disclosure Paper) from this year. As the disclosure of compensation schemes and aggregate compensation of key officers and employees of the group for this fiscal year are required in the Disclosure Paper, the compensation disclosed in this Form 20-F is also based on this fiscal year's performance.
- (3) For accounting purposes, expenses of Equity Compensation and Deferred Compensation (such as SARs) are recognized over the vesting period, starting from the time of the grant. Amount of expenses for Equity Compensation under Basic Compensation and Variable Compensation recognized during this fiscal year relating to Kenichi Watanabe and Takumi Shibata were 191 million yen and 164 million yen, respectively, which is an aggregate of Equity Compensation and Deferred Compensation granted during the past several years before the end of this fiscal year. These amounts are not the compensation determined based on the performance during this fiscal year.

C. Board Practices.**Information Concerning Our Directors**

The Companies Act states that a company which adopts the committee-based corporate governance system (Committee System) must establish three committees: a nomination committee, an audit committee and a compensation committee. The members of each committee are chosen from the company's directors, and a majority of each committee must be outside directors. Under the Committee System, the board of directors is entitled to establish the basic management policy for the company, has decision-making authority over certain prescribed matters, and supervise the execution by the executive officers. Executive officers and representative executive officers appointed by a resolution of the board of directors manage the business affairs of the company, based on delegation of authority by the board of directors.

We adopted the Committee System by amending our Articles of Incorporation by way of a special resolution adopted at our annual meeting of shareholders held on June 26, 2003. Through adoption of the Committee System, we aim to strengthen management oversight, increase transparency in our management and have more flexible group operations. An outline of the Company's Board of Directors Compensation Committee, Nomination Committee and Audit Committee are described below.

Table of Contents

Board of Directors

Our Board of Directors consists of all Directors, who are elected at a meeting of shareholders, and our Articles of Incorporation provide that the number of Directors shall not exceed 20. The term of office of Directors is one year, although they may serve any number of consecutive terms. From among its members, our Board of Directors elects the chairman of meetings. Our Board of Directors met 10 times during the fiscal year ended March 31, 2012. As a group, our Directors attended approximately 95% of the total number of meetings of our Board of Directors during the year. Our Board of Directors has the authority to determine our basic management policy and supervise the execution by the Executive Officers of their duties, while by resolution, has delegated to our Executive Officers most of its authority to make decisions with regard to our business.

Compensation Committee

Our Compensation Committee determines the policy with respect to the determination of the particulars of the compensation for each Director and Executive Officer, and the particulars of the compensation for each Director and Executive Officer. Our Compensation Committee met four times during the fiscal year ended March 31, 2012. As a group, the member Directors attended 100% of the total number of meetings of our Compensation Committee during the year. The committee's current members are Nobuyuki Koga, Masahiro Sakane and Toshinori Kanemoto. Nobuyuki Koga is the Chairman of this committee.

Nomination Committee

Our Nomination Committee determines the particulars of proposals concerning the election and dismissal of Directors to be submitted to a general meeting of shareholders by our Board of Directors. Our Nomination Committee met two times during the fiscal year ended March 31, 2012. As a group, the member Directors attended 100% of the total number of meetings of our Nomination Committee during the year. The committee's current members are Nobuyuki Koga, Masahiro Sakane and Toshinori Kanemoto. Nobuyuki Koga is the Chairman of this committee.

Audit Committee

Our Audit Committee (i) audits the execution by the Directors and the Executive Officers of their duties and formulation of audit reports and (ii) determines the particulars of proposals concerning the election and dismissal of the independent auditors and the non-retention of such independent auditors to be submitted to a general meeting of shareholders by our Board of Directors. With respect to financial reporting, our Audit Committee has the statutory duty to examine our financial statements and business reports to be prepared by Executive Officers designated by our Board of Directors and is authorized to report its opinion to the annual meeting of shareholders. In addition, pursuant to our Regulations of the Audit Committee or resolutions of the Board of Directors concerning matters to be necessary for the performance of functions of the Audit Committee, our Audit Committee has the authority to (i) pre-approve audit or non-audit services provided by the independent auditors for SEC reporting purposes and their fees, (ii) fees for independent auditors, (iii) establish the procedures for (a) the receipt, retention, and treatment of complaints received by us regarding accounting, internal controls, or auditing matters and (b) the confidential, anonymous submission by our employees regarding questionable accounting or auditing matters, (iv) approve the annual audit plan of the independent auditors.

Our Audit Committee met 24 times during the fiscal year ended March 31, 2012. As a group, the member Directors attended approximately 98% of the total number of meetings of our Audit Committee during the year. The committee is currently composed of Haruo Tsuji, Tsuguoki Fujinuma and Masanori Itatani. Haruo Tsuji is the Chairman of this committee.

Table of Contents**Limitation of Liabilities of Outside Directors**

We have entered into agreements with our Outside Directors, Masahiro Sakane, Toshinori Kanemoto, Haruo Tsuji, Tsuguoki Fujinuma, Dame Clara Furse, Takao Kusakari, and Michael Lim Choo San that limit their liabilities to us for damages suffered by us due to their acts taken in good faith and without gross negligence, up to the higher of (a) ¥20 million or (b) the amount prescribed by laws and ordinances.

Information Concerning Our Executive Officers

Executive Officers of the Company are elected at a meeting of our Board of Directors, and our Articles of Incorporation provide that the number of Executive Officers shall not exceed 45. The term of office of Executive Officers is one year, although they may serve any number of consecutive terms. Our Executive Officers have the authority to determine the matters delegated by the resolutions of our Board of Directors and to execute our business activities.

Rights of ADR Holders

The rights of ADR holders, including their rights to corporate governance practices, are governed by the Deposit Agreement which is an exhibit to this annual report. See also *Rights of Holders of ADSs* under Item 10.B of our Registration Statement on Form 20-F (File No. 1-15270), which we filed with the Securities and Exchange Commission on December 13, 2001. The information contained in that part of the Registration Statement is incorporated in Item 10.B of this annual report by reference. For fees and charges that a holder of Nomura's ADSs may have to pay, see *Description of Securities Other Than Equity Securities* under Item 12 of this annual report.

D. Employees

The following table shows the number of our employees as of the dates indicated:

	March 31		
	2010	2011	2012
Japan	15,053	14,918	21,609
Europe	4,369	4,353	4,014
Americas	1,781	2,348	2,420
Asia Pacific (excluding Japan), India and Oceania	5,171	5,252	6,352
Total	26,374	26,871	34,395

As of March 31, 2012, we had 21,609 employees in Japan, including 9,493 of Retail Division, 1,900 of Wholesale Division and 868 of Asset Management Division. Overseas, we had 12,786 employees, of which 4,014 were located in Europe, 2,420 in the Americas, and 6,352 in Asia Pacific (excluding Japan), India and Oceania.

During the fiscal year, the Company increased its stake in NLB, one of its affiliated companies, by acquiring additional NLB shares and thereby made it a subsidiary. As a result, the total number of employees in Japan increased significantly compared to the previous year.

As of March 31, 2012, 7,780 of NSC's employees in Japan were members of Nomura employees' union, with which we have a labor contract. Between the company and the labor union, we had been holding constant discussions to resolve on labor-related matters.

We have not experienced any strikes or other labor disputes in Japan as well as overseas and consider our employee relations to be excellent.

Table of Contents**E. Share Ownership.**

The following table shows the number of shares owned by our Directors and Executive Officers as of June 27, 2012. As of that date, none of them owned 1% or more of our issued and outstanding shares. None of the shares referred to below have different voting rights.

Directors

Name	Number of Shareholdings
Nobuyuki Koga	130,533
Kenichi Watanabe	174,888
Takumi Shibata	158,258
Masanori Itatani	130,897
Masanori Nishimatsu	86,800
David Benson	
Masahiro Sakane	30,000
Toshinori Kanemoto	
Haruo Tsuji	14,000
Tsuguoki Fujinuma	19,448
Dame Clara Furse	
Takao Kusakari	
Michael Lim Choo San	
Total	744,824

Executive Officers

Name	Number of Shareholdings
Kenichi Watanabe	See above
Takumi Shibata	See above
Eiji Kutsukake	17,928
Toshihiro Iwasaki	26,833
Junko Nakagawa	
Total	44,761

For information regarding stock options granted to our Directors and Executive Officers, see under Item 6.B of this annual report.

Item 7. Major Shareholders and Related Party Transactions**A. Major Shareholders.**

The following table shows our major shareholder who owns more than 5% of our outstanding common stock on the register of shareholders as of March 31, 2012. The Company understands that this shareholder may not be the beneficial owner of the Company's common stock, but the Company does not have any further information available in determining the beneficial ownership of these shares.

Table of Contents

Names of Shareholders	Number of Shares Owned and Percentage of Shares Owned	
	(in thousand shares)	(%)
Japan Trustee Services Bank, Ltd. (Trust Account)	187,713	5.12

The Company is also aware that Sumitomo Mitsui Trust Holdings, Inc. filed reports of substantial shareholding with the Director General of the Kanto Finance Bureau on April 21, 2011 and its subsequent amendments. According to the reports, as of September 30, 2011, Sumitomo Trust Bank Limited and its affiliates, beneficially or of record, owned 205,208,100 shares in total, representing 5.37% of the issued shares of the Company's common stock. However the Company has not confirmed the status of these shareholdings as of March 31, 2012.

To our knowledge, we are not directly or indirectly owned or controlled by another corporation, by any government or by any other natural or legal person severally or jointly. We know of no arrangements the operation of which may at a later time result in a change of control of Nomura. Also as of March 31, 2012, there were 230 Nomura shareholders of record with addresses in the U.S., and those U.S. holders held 354,494,022 shares of the Company's common stock, representing 9.3% of Nomura's then outstanding common stock. As of March 31, 2012, there were 26,244,423 ADSs outstanding, representing 26,244,423 shares of the Company's common stock or 0.7% of Nomura's then outstanding common stock. Our major shareholders above do not have different voting rights.

B. Related Party Transactions.**Nomura Land and Building Co., Ltd.**

Nomura Land and Building Co., Ltd. (NLB) currently owns some of our leased office space in Japan. Since May 24, 2011, NLB has become a consolidated subsidiary of Nomura and is no longer an affiliated company of Nomura. We paid NLB ¥622 million as rents before it became a consolidated subsidiary.

See Note 11 *Business combinations* to our consolidated financial statements.

Nomura Research Institute, Ltd.

NRI develops and manages computer systems and provides research services and management consulting services. We are one of the major clients of NRI.

We held 39.1% of NRI's outstanding share capital as of March 31, 2012.

For the year ended March 31, 2012, we purchased ¥22,014 million worth of software and computer equipment, paid NRI ¥49,742 million for other services, and received ¥3,848 million as rents from NRI. In addition, we deposited ¥11,738 million as lease deposits to NRI.

In July 2011, Nomura acquired 381,520 shares of NLB from NRI and issued 45,019,360 common shares to NRI as a result of the share exchange. See Note 11 *Business combinations* to our consolidated financial statements.

Objects and Purposes in Nomura's Articles of Incorporation

Article 2 of our Articles of Incorporation, which is an exhibit to this annual report, states our objects and purposes.

Provisions Regarding Our Directors

There is no provision in our Articles of Incorporation as to a Director's power to vote on a proposal or arrangement in which the Director is materially interested, but, under the Companies Act and our Regulations of the Board of Directors, a Director must abstain from voting on such matters at meetings of the Board of Directors.

As a company organized under the Committee System of corporate governance, the compensation of our Directors and Executive Officers is determined by the Compensation Committee (see Item 6.C. above). The Compensation Committee establishes the policy with respect to the determination of the individual compensation (including variable compensation) of each of our Directors and Executive Officers and makes determinations in accordance with that compensation policy.

With respect to borrowing powers, these as well as other powers relating to the management of the business (with the exception of certain exclusions specified under the Companies Act) have been delegated to the Executive Officers by the Board of Directors as a company organized under the Committee System.

There is no mandatory retirement age for our Directors under the Companies Act or our Articles of Incorporation.

There is no requirement concerning the number of shares an individual must hold in order to qualify him or her as a Director of the Company under the Companies Act or our Articles of Incorporation.

Pursuant to the Companies Act and our Articles of Incorporation, we may, by a resolution of our Board of Directors, release the liabilities of any Directors or Executive Officers to us for damages suffered by us due to their acts taken in good faith and without gross negligence, to the extent permitted by the Companies Act and our Articles of Incorporation. In addition, we may execute with outside Directors agreements that limit their liabilities to us for damages suffered by us due to their acts in good faith and without gross negligence, to the extent permitted by the Companies Act and our Articles of Incorporation. See *Limitation of Liabilities of Outside Directors* under Item 6.C above.

Table of Contents

Holding of Our Shares by Foreign Investors

Other than the Japanese unit share system that is described in *Common Stock Japanese Unit Share System* below, no limitations on the rights of non-residents or foreign shareholders to hold or exercise voting rights on our shares are imposed by law, our Articles of Incorporation or our other constituent documents.

Common Stock

The following describes material features of the shares of our common stock, and includes a brief overview of the material provisions of our Articles of Incorporation and Share Handling Regulations, as currently in effect, and of the Companies Act and related legislation. In this *Common Stock* section, unless the context otherwise requires, *shares* means shares of our common stock and *shareholders* means holders of shares of our common stock.

General

Under our Articles of Incorporation, the authorized share capital is 6,000,000,000 shares, of which 3,822,562,601 shares were issued as of March 31, 2012. All issued shares are fully-paid and non-assessable.

On January 5, 2009, a central clearing system for shares of Japanese listed companies was established pursuant to the Act on Book-Entry Transfer of Company Bonds, Shares, Etc. (including regulations promulgated thereunder; the *Book-Entry Law*), and the shares of all Japanese companies listed on any Japanese stock exchange, including our shares, became subject to this clearing system. On the same day, all existing share certificates for such shares became null and void. At present, Japan Securities Depository Center, Inc. (*JASDEC*) is the only institution that is designated by the relevant authorities as a clearing house which is permitted to engage in the clearing operations of shares of Japanese listed companies under the *Book-Entry Law*. Under this clearing system, in order for any person to hold, sell or otherwise dispose of shares of Japanese listed companies, they must have an account at an account managing institution unless such person has an account at *JASDEC*.

Account managing institutions are financial instruments traders (i.e., securities companies), banks, trust companies and certain other financial institutions which meet the requirements prescribed by the *Book-Entry Law*, and only those financial institutions that meet further stringent requirements of the *Book-Entry Law* can open accounts directly at *JASDEC*. For purposes of the description under this *Common Stock* section, we assume that the relevant person has no account at *JASDEC*.

Under the *Book-Entry Law*, any transfer of shares is effected through book-entry, and title to the shares passes to the transferee at the time when the transferred number of the shares is recorded in the transferee's account by an account managing institution. The holder of an account at an account managing institution is presumed to be the legal owner of the shares held in such account.

Under the Companies Act and the *Book-Entry Law*, except in limited circumstances, a shareholder must have his or her name and address registered in our register of shareholders in order to assert shareholders' rights against us. Such registration is generally made upon our receipt of necessary information from *JASDEC*. See *Share Registrar* and *Record Date* below.

Non-resident shareholders are required to appoint a standing proxy in Japan or provide a mailing address in Japan. Each such shareholder must give notice of such standing proxy or mailing address to the relevant account managing institution. Such notice will be forwarded to us through *JASDEC*. Japanese securities companies and commercial banks customarily act as standing proxies and provide related services for standard fees. Notices from us to non-resident shareholders are delivered to such standing proxies or mailing addresses.

The registered holder of deposited shares underlying the ADSs is the depository for the ADSs. Accordingly, holders of ADSs will not be able to directly assert shareholders' rights.

Table of Contents*Dividends*

Under the Companies Act, distributions of cash or other assets by joint stock corporations to their shareholders, so called dividends, are referred to as distribution of Surplus (Surplus is defined in *Restriction on Distributions of Surplus* below). We may make distributions of Surplus to the shareholders any number of times per fiscal year, subject to certain limitations described in *Restriction on Distributions of Surplus*. As a company meeting the necessary requirements, the Companies Act allows for our Articles of Incorporation to authorize our Board of Directors to make decisions regarding distributions of Surplus (with the exceptions of certain exclusions specified under the Companies Act).

Under our Articles of Incorporation, dividends, if any, may be distributed to shareholders (or pledgees) appearing in the register of shareholders as of June 30, September 30, December 31 or March 31 of each year, pursuant to a resolution of our Board of Directors. In addition, under the Companies Act and our Articles of Incorporation, we may (but are not obligated to) make further distributions of Surplus by a resolution of our Board of Directors. However, we equally may decide not to pay dividends for any given period, regardless of the amount of Surplus we have.

Under our Articles of Incorporation, we are not obliged to pay any dividends that are left unclaimed for a period of three years after the date on which they first became payable.

Distributions of Surplus may be distributed in cash or in kind in proportion to the number of shares held by each shareholder. A resolution of our Board of Directors authorizing a distribution of Surplus must specify the kind and aggregate book value of the assets to be distributed, the manner of allocation of such assets to shareholders, and the effective date of the distribution. If a distribution of Surplus is to be made in kind, we may, pursuant to a resolution of our Board of Directors, grant to our shareholders the right to require us to make such distribution in cash instead of in kind. If no such right is granted to shareholders, the relevant distribution of Surplus must be approved by a special resolution of a meeting of shareholders.

For information as to Japanese taxes on dividends, see *Japanese Taxation* under Item 10.E of this annual report.

Restriction on Distributions of Surplus

When we make a distribution of Surplus, we must, until the aggregate amount of our additional paid-in capital and legal reserve reaches one-quarter of our stated capital, set aside in our additional paid-in capital and/or legal reserve an amount equal to one-tenth of the amount of Surplus so distributed in accordance with an ordinance of the Ministry of Justice.

The amount of Surplus at any given time must be calculated in accordance with the following formula:

$$A + B + C + D - (E + F + G)$$

In the above formula:

- A = the total amount of other capital surplus and other retained earnings each such amount being that appearing on our non-consolidated balance sheets as of the end of the last fiscal year;
- B = (if we have disposed of our treasury stock after the end of the last fiscal year) the amount of the consideration for such treasury stock received by us less the book value thereof;
- C = (if we have reduced our stated capital after the end of the last fiscal year) the amount of such reduction less the portion thereof that has been transferred to additional paid-in capital or legal reserve (if any);
- D = (if we have reduced our additional paid-in capital or legal reserve after the end of the last fiscal year) the amount of such reduction less the portion thereof that has been transferred to stated capital (if any);

Table of Contents

- E = (if we have cancelled our treasury stock after the end of the last fiscal year) the book value of such treasury stock;
- F = (if we have distributed Surplus to our shareholders after the end of the last fiscal year) the total book value of Surplus so distributed;
- G = certain other amounts set forth in ordinances of the Ministry of Justice, including (if we have reduced Surplus and increased our stated capital, additional paid-in capital or legal reserve after the end of the last fiscal year) the amount of such reduction and (if we have distributed Surplus to our shareholders after the end of the last fiscal year) the amount set aside in our additional paid-in capital or legal reserve (if any) as required by the ordinances of the Ministry of Justice.

The aggregate book value of Surplus distributed by us may not exceed a prescribed distributable amount (the Distributable Amount), as calculated on the effective date of such distribution. The Distributable Amount at any given time shall be equal to the amount of Surplus less the aggregate of the followings:

- (a) the book value of our treasury stock;
- (b) the amount of consideration for our treasury stock disposed of by us after the end of the last fiscal year; and
- (c) certain other amounts set forth in the ordinances of the Ministry of Justice, including (if the sum of one-half of goodwill and the deferred assets exceeds the total of stated capital, additional paid-in capital and legal reserve, each such amount being that appearing on our non-consolidated balance sheets as of the end of the last fiscal year) all or certain part of such excess amount as calculated in accordance with the ordinances of the Ministry of Justice.

If we have become at our option a company with respect to which consolidated balance sheets should also be taken into consideration in the calculation of the Distributable Amount (*renketsu haito kisei tekiyo kaisha*), it will be required to further deduct from the amount of Surplus the excess amount, if any, of (x) the total amount of shareholders equity appearing on our non-consolidated balance sheets as of the end of the last fiscal year and certain other amounts set forth in the ordinances of the Ministry of Justice over (y) the total amount of shareholders equity and certain other amounts set forth in the ordinances of the Ministry of Justice appearing on our consolidated balance sheets as of the end of the last fiscal year.

If we have prepared non-consolidated interim financial statements as described below, and if such interim financial statements have been approved by the Board of Directors or (if so required by the Companies Act) by a resolution of a meeting of shareholders, the Distributable Amount must be adjusted to take into account the amount of profit or loss, and the amount of consideration for our treasury stock disposed of by us, during the period in respect of which such interim financial statements have been prepared. We may prepare non-consolidated interim financial statements consisting of a balance sheet as of any date subsequent to the end of the last fiscal year and an income statement for the period from the first day of the current fiscal year to the date of such balance sheet. Interim financial statements so prepared by us must be approved by the Board of Directors and audited by our Audit Committee and independent auditors, as required by the ordinances of the Ministry of Justice.

Stock Splits

We may at any time split the issued shares into a greater number of shares by a resolution of our Board of Directors, and in accordance with the Companies Act, our Board of Directors has by a resolution delegated powers to make such stock splits to our executive management board (EMB).

In accordance with the Companies Act, our Board of Directors has by a resolution delegated to our EMB, powers to increase the number of authorized shares permitted to be issued up to the number reflecting the rate of

Table of Contents

stock splits and amend our Articles of Incorporation to this effect without approval by a resolution of a meeting of shareholders. For example, if each share became three shares by way of a stock split, we may increase authorized shares from the current 6,000,000,000 shares to 18,000,000,000 shares.

Japanese Unit Share System

Our Articles of Incorporation provide that 100 shares constitute one unit. The Companies Act permits us, by a resolution of our Board of Directors, to reduce the number of shares which constitutes one unit or abolish the unit share system, and amend our Articles of Incorporation to this effect without approval by a resolution of a meeting of shareholders.

Transferability of Shares Constituting Less Than One Unit. Under the clearing system, shares constituting less than one unit are transferable. Under the rules of the Japanese stock exchanges, however, shares constituting less than one unit do not comprise a trading unit, except in limited circumstances, and accordingly may not be sold on the Japanese stock exchanges.

Right of a Holder of Shares Constituting Less Than One Unit to Require Us to Purchase Its Shares. A holder of shares constituting less than one unit may at any time request us to purchase its shares. Under the clearing system, such request must be made through the relevant account managing institution. These shares will be purchased at (a) the closing price of our shares reported by the Tokyo Stock Exchange on the day when the request to purchase is received by our share registrar or (b) if no sale takes place on the Tokyo Stock Exchange on that day, then the price at which sale of shares is effected on such stock exchange immediately thereafter. An amount equal to the applicable handling fee will be deducted from the price so determined pursuant to our Share Handling Regulations.

Right of a Holder of Shares Constituting Less than One Unit to Purchase from Us Its Shares up to a Whole Unit. Our Articles of Incorporation provide that a holder of shares constituting less than one unit may request us to sell any shares we may have to such holder so that the holder can raise its fractional ownership up to a whole unit. Under the clearing system, such request must be made through the relevant account managing institution. These shares will be sold at (a) the closing price of our shares reported by the Tokyo Stock Exchange on the day when the request to sell is received by our share registrar or (b) if no sale has taken place on the Tokyo Stock Exchange on that day, then the price at which sale of shares is effected on such stock exchange immediately thereafter. An amount equal to the applicable handling fee will be added to the price so determined pursuant to our Share Handling Regulations.

Voting Rights of a Holder of Shares Constituting Less Than One Unit. A holder of shares constituting less than one unit cannot exercise any voting rights pertaining to those shares. In calculating the quorum for various voting purposes, the aggregate number of shares constituting less than one unit will be excluded from the number of outstanding shares. A holder of shares representing one or more whole units will have one vote for each whole unit represented.

A holder of shares constituting less than one unit does not have any rights related to voting, such as the right to participate in a demand for the dismissal of a Director, the right to participate in a demand for the convocation of a meeting of shareholders and the right to join with other shareholders to propose an agenda item to be addressed at a meeting of shareholders. In addition, a holder of shares constituting less than one unit does not have the right to institute a representative action by shareholders.

In accordance with the Companies Act, our Articles of Incorporation provide that a holder of shares constituting less than one unit does not have any other rights of a shareholder in respect of those shares, other than those provided by our Articles of Incorporation which includes the following rights:

to receive dividends,

to receive cash or other assets in case of consolidation or split of shares, exchange or transfer of shares, corporate split or merger,

Table of Contents

to be allotted rights to subscribe for free for new shares and stock acquisition rights when such rights are granted to shareholders, and

to participate in any distribution of surplus assets upon liquidation.

Annual Meeting of Shareholders

We normally hold our annual meeting of shareholders in June of each year. In addition, we may hold an extraordinary meeting of shareholders whenever necessary by giving at least two weeks advance notice. Under the Companies Act, notice of any meeting of shareholders must be given to each shareholder having voting rights or, in the case of a non-resident shareholder, to his resident proxy or mailing address in Japan in accordance with our Share Handling Regulations, at least two weeks prior to the date of the meeting.

Voting Rights

A shareholder is generally entitled to one vote per one unit of shares as described in this paragraph and under *Japanese Unit Share System* above. In general, under the Companies Act, a resolution can be adopted at a meeting of shareholders by the holders of a majority of the total number of voting rights represented at the meeting. A corporate shareholder having one-quarter or more of the total voting rights of which are directly or indirectly held by us does not have voting rights. The Companies Act and our Articles of Incorporation require a quorum for the election of Directors of not less than one-third of the total number of voting rights. Our shareholders are not entitled to cumulative voting in the election of Directors. Shareholders may exercise their voting rights through proxies, provided that those proxies are also shareholders who have voting rights.

The Companies Act provides that certain important matters shall be approved by a special resolution of a meeting of shareholders. Our Articles of Incorporation provide that the quorum for a special resolution is one-third of the total number of voting rights and the approval of at least two-thirds of the voting rights presented at the meeting is required for adopting a special resolution. Such important matters include:

a reduction of stated capital,

amendment to the Articles of Incorporation (except amendments which the Board of Directors (or under the Committee System, Executive Officers) are authorized to make under the Companies Act),

establishment of a 100% parent-subsidiary relationship by way of share exchange or share transfer requiring shareholders approval,

a dissolution, merger or consolidation requiring shareholders approval,

a corporate split requiring shareholders approval,

the transfer of the whole or an important part of our business,

the taking over of the whole of the business of any other corporation requiring shareholders approval,

any issuance of new shares or transfer of existing shares as treasury stock to persons other than the shareholders at a specially favorable price,

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

any issuance of stock acquisition rights (including those incorporated in bonds with stock acquisition rights) to persons other than the shareholders under specially favorable conditions,

purchase of shares by us from a specific shareholder other than our subsidiary,

consolidation of shares, and

release of part of directors, independent auditor s or executive officers liabilities to their corporation.
The voting rights of holders of ADSs are exercised by the depositary based on instructions from those holders.

Table of Contents

Subscription Rights

Holders of shares have no preemptive rights under our Articles of Incorporation when we issue new shares. Under the Companies Act, our EMB, which has been delegated by our Board of Directors with the authority to issue new shares, may, however, determine that shareholders be given subscription rights in connection with a particular issue of new shares. In this case, such rights must be given on uniform terms to all shareholders as of a specified record date with at least two weeks' prior notice to shareholders of the record date.

Stock Acquisition Rights

We may issue stock acquisition rights (*shinkabu yoyakuken*). Holders of stock acquisition rights are entitled to acquire shares from us, upon payment of the applicable exercise price, and subject to other terms and conditions thereof. The issuance of stock acquisition rights and bonds with stock acquisition rights may be authorized by our EMB, which has been delegated by our Board of Directors with the authority to issue stock acquisition rights, unless it is made under specially favorable conditions in which case a special resolution of meeting of shareholders is required. In issuing stock acquisition rights, notice must be given at least two weeks prior to the date for allotment in the form of individual notice or public notice. Under the Companies Act we will not be required to give such notice if we make relevant securities filing or reporting under the FIEA at least two weeks prior to the date for allotment, subject to the requirements provided by the ordinance of the Ministry of Justice.

Liquidation Rights

In the event of liquidation, the assets remaining after payment of all debt securities and borrowings, liquidation expenses and taxes will be distributed among the shareholders in proportion to the number of shares they own.

Liability to Further Calls or Assessments

All of our currently outstanding shares, including shares represented by the ADSs, are fully paid and nonassessable.

Share Registrar

Mitsubishi UFJ Trust and Banking Corporation (Mitsubishi UFJ Trust) is the share registrar for our shares. Mitsubishi UFJ Trust's office is located at 4-5, Marunouchi 1-chome, Chiyoda-ku, Tokyo, 100-8212 Japan. Mitsubishi UFJ Trust maintains our register of shareholders and registers the names and addresses of our shareholders and other relevant information in our register of shareholders upon notice thereof from JASDEC, as described in *Record Date* below.

Record Date

The close of business of June 30, September 30, December 31 and March 31 are the record dates for our distributions of Surplus (dividends), if any. A holder of shares constituting one or more whole units, who is registered as a holder on our register of shareholders at the close of business as of March 31, is also entitled to exercise shareholders' voting rights at the annual meeting of shareholders with respect to the fiscal year ended on March 31. In addition, we may set a record date for determining the shareholders entitled to other rights and for other purposes by giving at least two weeks' public notice.

Under the Book-Entry Law, we are required to give notice of each record date to JASDEC at least two weeks prior to such record date. JASDEC is required to promptly give us notice of the names and addresses of our shareholders, the numbers of shares held by them and other relevant information as of such record date.

Table of Contents

The shares are generally traded ex-dividend or ex-rights in the Japanese stock exchanges on the second business day prior to the record date (or if the record date is not a business day, the third business day prior thereto), for the purpose of dividends or rights offerings.

Acquisition of Own Shares

We may acquire our shares (i) by soliciting all our shareholders to offer to sell our shares held by them (pursuant to a resolution of the Board of Directors), (ii) from a specific shareholder other than any our subsidiaries (pursuant to a special resolution of a meeting of shareholders), (iii) from any of our subsidiaries (pursuant to a resolution of the Board of Directors), or (iv) by way of purchase on any Japanese stock exchange on which our shares are listed or by way of tender offer (in either case pursuant to a resolution of the Board of Directors). In the case of (ii) above, any other shareholder may make a request to us that such other shareholder be included as a seller in the proposed purchase, provided that no such right will be available if the purchase price or any other consideration to be received by the relevant specific shareholder will not exceed the higher of (x) the last trading price of the shares on the relevant stock exchange on the day immediately preceding the date on which the resolution mentioned in (ii) was adopted (or, if there is no trading in the shares on the stock exchange or if the stock exchange is not open on such day, the price at which the shares are first traded on such stock exchange thereafter) and (y) if the shares are subject to a tender offer on the day immediately preceding the date on which the resolution mentioned in (ii) above was adopted, the price of the shares under the agreement with respect to such tender offer on such day. This acquisition is subject to the condition that the aggregate amount of the purchase price must not exceed the Distributable Amount as described in *Dividends* above.

We may hold our shares acquired in compliance with the provisions of the Companies Act, and may generally dispose of or cancel such shares by resolutions of the Board of Directors.

In addition, we may acquire our shares by means of repurchase of any number of shares constituting less than one unit upon the request of the holder of those shares, as described under *Japanese Unit Share System* above.

Preferred Stock

The following is a description of material features of our preferred stock. The basic characteristics of our preferred stock are set forth in our Articles of Incorporation, and detailed terms and conditions of our preferred stock are to be determined prior to the issuance thereof by a resolution of our Board of Directors or by Executive Officer(s) under authorities delegated by a resolution of our Board of Directors.

General

Our Articles of Incorporation include the possibility of issuing preferred stock. We have not yet issued, and currently have no specific plan to issue, any preferred stock; however we provide as follows some information on the characteristics of the types of preferred stock set forth in our Articles of Incorporation.

Under our Articles of Incorporation, we are authorized to issue 200,000,000 shares of Class 1 preferred stock, 200,000,000 shares of Class 2 preferred stock, 200,000,000 shares of Class 3 preferred stock and 200,000,000 shares of Class 4 preferred stock. Of these, Class 3 and Class 4 preferred stock are convertible into common stock, while Class 1 and Class 2 preferred stock are not convertible into common stock. See *Right of Shareholders of Preferred Stock to Demand Acquisition thereof (Conversion)* below.

Preferred Dividends

Under our Articles of Incorporation, preferred dividends may be paid to shareholders of preferred stock on record as of March 31 every year. In addition, interim preferred dividends may be paid to shareholders of our preferred stock on record as of June 30, September 30 or December 31 of any year. Dividends on preferred stock are to be paid always in priority to dividends on common stock. The detailed terms and conditions of each class

Table of Contents

of preferred stock, including the amount of preferred dividends or preferred interim dividends, are to be determined by a resolution of our Board of Directors or by Executive Officer(s) under authorities delegated by a resolution of our Board of Directors prior to the time of issuance thereof, provided that the annual dividend rate applicable to Class 1 and Class 2 preferred stock may not exceed 15%, and the annual dividend rate applicable to Class 3 and Class 4 preferred stock may not exceed 10%.

Notwithstanding the provisions of our Articles of Incorporation, no payment of any dividend on preferred stock may be made unless we have sufficient Surplus to pay such dividend, and each payment of a dividend on a preferred stock must be approved by our Board of Directors.

Dividends on our preferred stock are non-cumulative. In the event that preferred dividends were paid, and the amount actually paid by us in respect of any fiscal year was less than the amount thereof payable in respect of such fiscal year, preferred shareholders would have no right to seek payment of the deficient amount as a cumulative preferred dividend in any subsequent fiscal year.

Shareholders of our preferred stock will not be entitled to any further dividends or other participation in or distribution of Surplus.

Voting Rights

Any voting rights attached to our preferred stock are limited to the extent specifically provided under the Companies Act, any other applicable laws and our Articles of Incorporation. Subject to the conditions stated therein, the voting rights of our preferred stock as provided in our Articles of Incorporation are as follows:

If no resolution to pay a preferred dividend has been passed by our Board of Directors prior to the dispatch of the convocation notice of the annual meeting of shareholders in respect of any fiscal year, and if no proposal to pay such preferred dividend was submitted to the relevant annual meeting of shareholders, then the shareholders of the relevant preferred stock will be entitled to vote at such meeting and all subsequent meetings of shareholders up to the time when our Board of Directors or meeting of shareholders passes a resolution to pay such preferred dividend; and

If a resolution to pay a preferred dividend has not been adopted at any annual meeting of shareholders, the shareholders of the relevant preferred stock will be entitled to vote at all subsequent meetings of shareholders up to the time when our Board of Directors or meeting of shareholders passes a resolution to pay such preferred dividend.

Liquidation Rights

In the event of our voluntary or involuntary liquidation, shareholders of our preferred stock would be entitled, in preference over shareholders of common stock, to receive such amounts of our residual assets as may be determined by a resolution of our Board of Directors or by Executive Officer(s) under authorities delegated by a resolution of the Board of Directors taking into consideration the amounts of subscription moneys paid for the respective preferred stock.

Except as described above, shareholders of our preferred stock would not be entitled to receive distribution of residual assets upon our liquidation.

Right of Shareholders of Preferred Stock to Demand Acquisition thereof (Conversion)

Class 3 preferred stock and Class 4 preferred stock are attached with the right to demand that we acquire such shares of preferred stock during a certain period. In the event of the exercise of such right, we shall be required to deliver to the relevant shareholder a certain number of shares of our common stock in exchange for the shares of the preferred stock acquired by us from such shareholder. Specific terms of such right, including the

Table of Contents

period during which the preferred stock would be acquired (a conversion period) and the initial acquisition price (a conversion price), would be determined by a resolution of our Board of Directors or by Executive Officer(s) under authorities delegated by a resolution of the Board of Directors.

Our Right and Obligation to Acquire Preferred Stock

Upon the occurrence of such event or on such date as may be determined by a resolution of our Board of Directors or by Executive Officer(s) under authorities delegated by a resolution of the Board of Directors prior to the issuance of any of Class 1 preferred stock, Class 2 preferred stock and/or Class 4 preferred stock, we shall have the right to acquire all or any part of the relevant shares of preferred stock. In the event we exercised such right, we would deliver to the relevant shareholder a certain amount of cash in exchange for the shares of the preferred stock acquired by us from such shareholder. The initial acquisition price at which the relevant preferred stock would be acquired by us would be determined prior to the time of issuance thereof by a resolution of our Board of Directors or by Executive Officer(s) under authorities delegated by a resolution of the Board of Directors taking into consideration the amount of subscription moneys paid for the relevant preferred stock.

With respect to Class 3 preferred stock and Class 4 preferred stock, we shall have the obligation to acquire all shares of such preferred stock outstanding on the day immediately following the last day of the relevant conversion period. In such event, we would deliver to the relevant shareholders a certain number of shares of our common stock in exchange for the shares of the preferred stock acquired by us from them. The number of shares of our common stock so to be delivered to a shareholder of the relevant preferred stock would be calculated by multiplying the number of shares of the preferred stock held by such shareholder by the amount of the subscription moneys per share paid for such preferred stock and dividing the resultant amount by the market price of a share of our common stock at the time.

Pursuant to amendments to our Articles of Incorporation approved at our annual meeting of shareholders on June 28, 2011 the following feature has been added to the preferred stock described in our Articles of Incorporation. We shall have the obligation to acquire all or any part of shares of Class 1 preferred stock, Class 2 preferred stock, Class 3 preferred stock and/or Class 4 preferred stock upon the occurrence of certain events determined by a resolution of our Board of Directors or by Executive Officer(s) under authorities delegated by a resolution of the Board of Directors (including the event that the Company's capital adequacy ratio or other measure of regulatory capital falls below a pre-determined threshold, and/or the event that a supervisory agency (or an equivalent body) determines that a write-down, capital injection by a public institution or other equivalent action is necessary for the Company) prior to the time of issuance of the relevant preferred stock. In such event, we would deliver to the relevant shareholders a certain number of shares of our common stock in exchange for the shares of the preferred stock acquired by us from them. The number of our common stock so to be delivered to a shareholder of the relevant preferred stock would be determined prior to the issuance of such preferred shares by a resolution of our Board of Directors or by Executive Officer(s) considering the subscription price of the preferred shares, the market value of the Company's common stock and market conditions. An upper limit for the common stock to be delivered in exchange for the relevant preferred shares may also be set pursuant to such resolution or determination.

Order of Priority

Class 1 through Class 4 preferred stock shall have the same order of priority in respect of the payment of preferred dividends and preferred interim dividends and the distribution of residual assets. All classes of preferred stock will be in priority to our common stock in respect of the payments of dividends and interim dividends and the distribution of residual assets.

Report of Substantial Shareholdings

The FIEA requires any person who has become, beneficially and solely or jointly, a holder of more than 5% of the total issued shares of a company listed on any Japanese stock exchange to file with the relevant Local

Table of Contents

Finance Bureau, within five business days, a report concerning those shareholdings. With certain exceptions, a similar report must also be filed to reflect any change of 1% or more in the above shareholding or any change in material matters set out in any previous filed reports. Copies of any reports must also be furnished to the company. For this purpose, shares issuable to a person upon exercise of stock acquisition rights are taken into account in determining both the number of shares held by that holder and the company's total issued share capital.

Daily Price Fluctuation Limits under Japanese Stock Exchange Rules

Stock prices on Japanese stock exchanges are determined on a real-time basis by the equilibrium between bids and offers. These exchanges are order-driven markets without specialists or market makers to guide price formation. To prevent excessive volatility, these exchange set daily upward and downward price fluctuation limits for each stock, based on the previous day's closing price. Although transactions may continue at the upward or downward limit price if the limit price is reached on a particular trading day, no transactions may take place outside these limits. Consequently, an investor wishing to sell at a price above or below the relevant daily limit may not be able to sell the shares at such price on a particular trading day, or at all.

On June 26, 2012, the closing price of our shares on the Tokyo Stock Exchange was ¥275 per share. The following table shows the daily price limit for a stock on the Tokyo Stock Exchange with a closing price of between ¥200 and ¥499 per share, as well as the daily price limit if our per share price were to rise to between ¥500 and ¥699, ¥700 and ¥999, and ¥1,000 and ¥1,499, or fall to between ¥100 and ¥199. Other daily price limits would apply if our per share price moved to other ranges.

Selected Daily Price Limits

	Previous Day's Closing Price or Special Quote		Maximum Daily Price Movement	
Equal to or greater than	¥ 100	Less than	¥ 200	¥ 50
Equal to or greater than	200	Less than	500	80
Equal to or greater than	500	Less than	700	100
Equal to or greater than	700	Less than	1,000	150
Equal to or greater than	1,000	Less than	1,500	300

For a history of the trading price of our shares on the Tokyo Stock Exchange, see Item 9.A of this annual report.

Rights of Holders of ADSs

For a description of rights of holders of ADSs, see *Rights of Holders of ADSs* under Item 10.B of our Registration Statement on Form 20-F (File No. 1-15270), which we filed with the Securities and Exchange Commission on December 13, 2001. The information contained in that part of the Registration Statement is incorporated in this Item 10.B by reference.

C. Material Contracts.

For the two years immediately preceding the date of this annual report, we have not been a party to any material agreement other than in the ordinary course of business, except as disclosed in Item 6.C of this annual report.

D. Exchange Controls.*Acquisition of Shares*

The Foreign Exchange and Foreign Trade Law of Japan and its related cabinet orders and ministerial ordinances (the Foreign Exchange Regulations) governs certain aspects relating to the acquisition and holding of securities by non-residents of Japan and foreign investors, as defined below.

Table of Contents

In general, acquisition of shares of stock of a Japanese company listed on any Japanese stock exchange by a non-resident of Japan from a resident of Japan is not subject to any prior notification requirement, but subject to a post reporting requirement by the resident.

If a foreign investor acquires shares of a Japanese company listed on a Japanese stock exchange and as a result of this acquisition directly or indirectly holds 10% or more of the issued shares of such company, together with its existing holdings and those of other parties who have a special relationship with that foreign investor, the foreign investor is, in general, required to report the acquisition to the Minister of Finance and any other competent ministers via the Bank of Japan by the 15th day of the immediately following month in which the date of acquisition falls. In exceptional cases, a prior notification is required in respect of the acquisition.

Non-residents of Japan are generally defined as individuals who are not resident in Japan and corporations whose principal offices are located outside Japan. Branches and other offices of Japanese corporations located outside Japan are considered as non-residents of Japan, and branches and other offices located within Japan of non-resident corporations are considered as residents of Japan.

Foreign investors are generally defined as (i) individuals who are not resident in Japan, (ii) corporations which are organized under the laws of foreign countries or whose principal offices are located outside Japan, and (iii) corporations of which (a) 50% or more of the voting rights are held directly or indirectly by (i) and/or (ii) above, (b) a majority of officers consists of non-residents of Japan or (c) a majority of officers having the power of representation consists of non-residents of Japan.

Dividends and Proceeds of Sale

Under the Foreign Exchange Regulations, dividends paid on, and the proceeds of sales in Japan of, shares held by non-residents of Japan may in general be converted into any foreign currency and repatriated abroad. Under the terms of the deposit agreement pursuant to which our ADSs will be issued, the depository is required, to the extent that in its judgment it can convert yen on a reasonable basis into dollars and transfer the resulting dollars to the U.S., to convert all cash dividends that it receives in respect of deposited shares into dollars and to distribute the amount received (after deduction of applicable withholding taxes) to the holders of ADSs.

E. Taxation.

U.S. Federal Income Taxation

This section describes the material U.S. federal income tax consequences of owning shares or ADSs. It applies to you only if you are a U.S. holder (as defined below), you acquire your shares or ADSs in an offering and you hold your shares or ADSs as capital assets for tax purposes. This section does not apply to you if you are a member of a special class of holders subject to special rules, including:

a dealer in securities,

a trader in securities that elects to use a mark-to-market method of accounting for your securities holdings,

a tax-exempt organization,

a life insurance company,

a person liable for alternative minimum tax,

a person that actually or constructively owns 10% or more of our voting stock,

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

a person that holds shares or ADSs as part of a straddle or a hedging, conversion, integrated or constructive sale transaction,

a person that purchases or sells shares or ADSs as part of a wash sale for tax purposes, or

a person whose functional currency is not the U.S. dollar.

Table of Contents

This section is based on the Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed regulations, published rulings and court decisions, all as currently in effect, as well as on the Income Tax Convention Between the U.S. and Japan (the Japan-U.S. Tax Treaty). These laws are subject to change, possibly on a retroactive basis. In addition, this section is based in part upon the representations of The Bank of New York Mellon and the assumption that each obligation in the deposit agreement and any related agreement will be performed in accordance with its terms.

If a partnership holds the shares or ADSs, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the tax treatment of the partnership. A partner in a partnership holding the shares or ADSs should consult its tax advisor with regard to the U.S. federal income tax treatment of an investment in the shares or ADSs.

You are a U.S. holder if you are a beneficial owner of shares or ADSs and you are:

a citizen or resident of the U.S.,

a corporation created or organized in or under the laws of the U.S. or any political subdivision thereof,

an estate whose income is subject to U.S. federal income tax regardless of its source, or

a trust if a U.S. court can exercise primary supervision over the trust's administration and one or more U.S. persons are authorized to control all substantial decisions of the trust.

You should consult your own tax advisor regarding the U.S. federal, state, local and other tax consequences of owning and disposing of shares and ADSs in your particular circumstances.

This discussion addresses only U.S. federal income taxation.

In general, and taking into account the earlier assumptions, for U.S. federal income tax purposes, if you hold ADRs evidencing ADSs, you will be treated as the owner of the shares represented by those ADSs. Exchanges of shares for ADRs, and ADRs for shares, generally will not be subject to U.S. federal income tax.

Taxation of Dividends

Under the U.S. federal income tax laws, and subject to the passive foreign investment company, or PFIC, rules discussed below, the gross amount of any dividend we pay out of our current or accumulated earnings and profits (as determined for U.S. federal income tax purposes) is subject to U.S. federal income taxation. If you are a noncorporate U.S. holder, dividends paid to you in taxable years beginning before January 1, 2013 that constitute qualified dividend income will be taxable to you at a maximum tax rate of 15% provided that you hold the shares or ADSs for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date and meet other holding period requirements. Dividends we pay with respect to the shares or ADSs generally will be qualified dividend income. You must include any Japanese tax withheld from the dividend payment in this gross amount even though you do not in fact receive it.

The dividend is taxable when you, in the case of shares, or the depository, in the case of ADSs, receive the dividend, actually or constructively. The dividend will not be eligible for the dividends-received deduction generally allowed to U.S. corporations in respect of dividends received from other U.S. corporations. The amount of the dividend distribution that you must include in your income as a U.S. holder will be the U.S. dollar value of the Japanese yen payments made, determined at the spot Japanese yen/U.S. dollar rate on the date the dividend distribution is includible in your income, regardless of whether the payment is in fact converted into U.S. dollars. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date you include the dividend payment in income to the date you convert the payment into U.S. dollars will be treated as ordinary income or loss and will not be eligible for the special tax rate applicable to qualified dividend income. The gain or loss generally will be income or loss from sources within the U.S. for foreign tax credit limitation

Table of Contents

purposes. Distributions in excess of current and accumulated earnings and profits, as determined for U.S. federal income tax purposes, will be treated as a non-taxable return of capital to the extent of your basis in the shares or ADSs and thereafter as capital gain.

Subject to certain limitations, the Japanese tax withheld in accordance with the Japan-U.S. Tax Treaty and paid over to Japan will be creditable against your U.S. federal income tax liability. Special rules apply in determining the foreign tax credit limitation with respect to dividends that are subject to the maximum 15% rate. To the extent a refund of the tax withheld is available under Japanese law or the Japan-U.S. Tax Treaty, the amount of tax withheld that is refundable will not be eligible for credit against your U.S. federal income tax liability.

For foreign tax credit purposes, dividends will generally be income from sources outside the U.S., and, depending on your circumstances, will generally be passive income or general income for purposes of computing the foreign tax credit allowable to you.

Taxation of Capital Gains

Subject to the PFIC rules discussed below, if you are a U.S. holder and you sell or otherwise dispose of your shares or ADSs, you will recognize capital gain or loss for U.S. federal income tax purposes equal to the difference between the U.S. dollar value of the amount that you realize and your tax basis, determined in U.S. dollars, in your shares or ADSs. Capital gain of a noncorporate U.S. holder is generally taxed at preferential rates where the property is held for more than one year. The gain or loss will generally be income or loss from sources within the U.S. for foreign tax credit limitation purposes.

PFIC Rules

We do not expect our shares and ADSs to be treated as stock of a PFIC for U.S. federal income tax purposes, but this conclusion is a factual determination that is made annually and thus may be subject to change. Moreover, the application of the PFIC rules to a corporation, such as Nomura, that is primarily engaged in an active business as a securities dealer is not entirely clear.

In general, if you are a U.S. holder, we will be a PFIC with respect to you if for any taxable year in which you held our ADSs or shares:

at least 75% of our gross income for the taxable year is passive income, or

at least 50% of the value, determined on the basis of a quarterly average, of our assets is attributable to assets that produce or are held for the production of passive income.

Passive income generally includes dividends, interest, royalties, rents (other than certain rents and royalties derived in the active conduct of a trade or business), annuities and gains from assets that produce passive income. If a foreign corporation owns at least 25% by value of the stock of another corporation, the foreign corporation is treated for purposes of the PFIC tests as owning its proportionate share of the assets of the other corporation, and as receiving directly its proportionate share of the other corporation's income.

If we are treated as a PFIC, and you are a U.S. holder that did not make a mark-to-market election, as described below, you will be subject to special rules with respect to:

any gain you realize on the sale or other disposition of your shares or ADSs, and

any excess distribution that we make to you (generally, any distributions to you during a single taxable year that are greater than 125% of the average annual distributions received by you in respect of the shares or ADSs during the three preceding taxable years or, if shorter, your holding period for the shares or ADSs).

Table of Contents

Under these rules:

the gain or excess distribution will be allocated ratably over your holding period for the shares or ADSs,

the amount allocated to the taxable year in which you realized the gain or excess distribution will be taxed as ordinary income,

the amount allocated to each previous year, with certain exceptions, will be taxed at the highest tax rate in effect for that year, and

the interest charge generally applicable to underpayments of tax will be imposed in respect of the tax attributable to each such year. Special rules apply for calculating the amount of the foreign tax credit with respect to excess distributions by a PFIC.

If you own shares or ADSs in a PFIC that are regularly traded on a qualified exchange, they will be treated as marketable stock, and you may elect to mark your shares or ADSs to market. If you make this election, you will not be subject to the PFIC rules described above. Instead, in general, you will include as ordinary income each year the excess, if any, of the fair market value of your shares or ADSs at the end of the taxable year over your adjusted basis in your shares or ADSs. These amounts of ordinary income will not be eligible for the favorable tax rates applicable to qualified dividend income or long-term capital gains. You will also be allowed to take an ordinary loss in respect of the excess, if any, of the adjusted basis of your shares or ADSs over their fair market value at the end of the taxable year (but only to the extent of the net amount of previously included income as a result of the mark-to-market election). Your basis in the shares or ADSs will be adjusted to reflect any such income or loss amounts. We urge you to speak to your tax advisor regarding the availability and advisability of this election.

Your shares or ADSs will be treated as stock in a PFIC if we were a PFIC at any time during your holding period in your shares or ADSs, even if we are not currently a PFIC. For purposes of this rule, if you make a mark-to-market election with respect to your shares or ADSs, you will be treated as having a new holding period in your shares or ADSs beginning on the first day of the first taxable year beginning after the last taxable year for which the mark-to-market election applies.

In addition, notwithstanding any election you make with regard to the shares or ADSs, dividends that you receive from us will not constitute qualified dividend income to you if we are a PFIC either in the taxable year of the distribution or the preceding taxable year. Dividends that you receive that do not constitute qualified dividend income are not eligible for taxation at the 15% maximum rate applicable to qualified dividend income. Instead, you must include the gross amount of any such dividend paid by us out of our accumulated earnings and profits (as determined for U.S. federal income tax purposes) in your gross income, and it will be subject to tax at rates applicable to ordinary income.

If you own shares or ADSs during any year that we are a PFIC with respect to you, you are generally required to file Internal Revenue Service Form 8621.

Japanese Taxation

The following is a summary of the principal Japanese tax consequences to owners of our shares who are non-resident individuals or non-Japanese corporations (non-resident shareholder) without a permanent establishment in Japan to which the relevant income is attributable. As tax laws are frequently revised, the tax treatments described in this summary are also subject to changes in the applicable Japanese laws and/or double taxation conventions occurring in the future, if any. This summary is not exhaustive of all possible tax considerations which may apply to specific investors under particular circumstances. Potential investors should satisfy themselves as to

the overall tax consequences of the acquisition, ownership and disposition of shares or ADSs, including specifically the tax consequences under Japanese law,

Table of Contents

the laws of the jurisdiction of which they are resident, and

any tax treaty between Japan and their country of residence, by consulting with their own tax advisers.

Generally, a non-resident shareholder is subject to Japanese withholding tax on dividends on the shares paid by us. A stock split is not subject to Japanese income or corporation tax, as it is characterized merely as an increase of number of shares (as opposed to an increase of value of shares) from Japanese tax perspectives. Conversion of retained earnings or legal reserve (but other than additional paid-in capital, in general) into stated capital on a non-consolidated basis is not characterized as a deemed dividend for Japanese tax purposes, and therefore such a conversion does not trigger Japanese withholding taxation (Article 2(16) of the Japanese Corporation Tax Law and Article 8(1)(xiii) of the Japanese Corporation Tax Law Enforcement Order).

Unless an applicable tax treaty, convention or agreement reducing the maximum rate of withholding tax applies, the rate of Japanese withholding tax applicable to dividends on listed shares such as those paid by us to non-resident shareholders is currently 7%. This rate is applicable for dividends due and payable on or before December 31, 2013, and on or after January 1, 2014, a 15% rate will apply, except for dividends paid to any individual shareholder who holds 3% or more of the issued shares for which the applicable rate is 20% (please refer to Article 182(2) of the Japanese Income Tax Law and Article 9-3(1)(i) of the Japanese Special Tax Measures Law including its relevant temporary provision for these withholding rates).

On December 2, 2011, the Special measures act to secure the financial resources required to implement policy on restoration after the East Japan Earthquake (Act No. 117 of 2011) was promulgated and special surtax measures on income tax were introduced to fund the restoration effort from the earthquake. Income tax and withholding tax payers will need to pay a surtax, calculated by multiplying the base income tax with 2.1% for 25 years starting from January 1, 2013. As a result, the fractional tax rate increase in the withholding tax on dividends will be made from January 1, 2013, such as 7.147% applicable from January 1, 2013 to December 31, 2013 and 15.315% applicable thereafter until December 31, 2037, respectively. If a non-resident taxpayer is a resident of a country that Japan has tax treaty with, as described below, such non-residents will not be subject to the surtax to the extent that the applicable rate agreed in the tax treaty is lower than the aggregate domestic rate.

Japan has income tax treaties, conventions or agreements whereby the above-mentioned withholding tax rate is reduced, generally to 15% for portfolio investors, with, among others, Belgium, Canada, Denmark, Finland, Germany, Ireland, Italy, Luxembourg, New Zealand, Norway, Singapore, Spain and Sweden. Under the Japan-U.S. Tax Treaty, the withholding tax rate on dividends is 10% for portfolio investors, provided that they do not have a permanent establishment in Japan, or if there is a permanent establishment, the shares with respect to which such dividends are paid are not effectively connected with such permanent establishment, and that they are qualified U.S. residents eligible to enjoy treaty benefits. It shall be noted that, under the Japan-U.S. Tax Treaty, withholding tax on dividends to be paid is exempt from Japanese taxation by way of withholding or otherwise for pension funds which are qualified U.S. residents eligible to enjoy treaty benefits unless such dividends are derived from the carrying on of a business, directly or indirectly, by such pension funds (please refer to Article 10(3)(b) of the Japan-U.S. Tax Treaty). In addition to the Japan-U.S. Tax Treaty, Japan currently has income tax treaties, whereby the withholding tax rate on dividends is also reduced from 15% to 10% for portfolio investors, with, among others, the U.K., France, Australia, the Netherlands and Switzerland due to the treaty renewals.

Non-resident shareholders who are entitled to a reduced treaty rate of Japanese withholding tax on payment of dividends on the shares by us are required to submit an Application Form for Income Tax Convention regarding Relief from Japanese Income Tax on Dividends in advance through us, which is the case for ADS holders, or (in cases where the relevant withholding taxpayer for the dividend payment is not us but a financial institution in Japan) through the financial institution, to the relevant tax authority before payment of dividends. Non-resident shareholders who do not submit an application in advance will be entitled to claim the refund of withholding taxes withheld in excess of the rate of an applicable tax treaty from the relevant Japanese tax authority. For Japanese tax purpose, the treaty rate normally applies superseding the tax rate under the domestic law. However, due to the so-called preservation doctrine under Article 3-2 of the Special Measures Law for the

Table of Contents

Income Tax Law, Corporation Tax Law and Local Taxes Law with respect to the Implementation of Tax Treaties, if the tax rate under the domestic tax law is lower than that promulgated under the applicable income tax treaty, then the domestic tax rate is still applicable. Consequently, if the domestic tax rate still applies, no treaty application is required to be filed.

Gains derived from the sale of shares outside Japan by a non-resident shareholder without a permanent establishment in Japan as a portfolio investor, are, in general, not subject to Japanese income or corporation taxes.

Japanese inheritance and gift taxes at progressive rates may be payable by an individual who has acquired shares as a legatee, heir or donee, even if the individual is not a Japanese resident.

You should consult your own tax advisors regarding the Japanese tax consequences of the acquisition, ownership and disposition of the shares and ADSs in your particular circumstances.

Item 11. Quantitative and Qualitative Disclosures about Market Risk

Risk Management

Business activities of Nomura Group are exposed to various risks such as market risk, credit risk, operational risk and other risks caused by external factors. Nomura Group has established a risk management framework to provide comprehensive controls, monitoring and reporting of these risks in order to maintain financial soundness and the Company's corporate values.

Table of Contents

Global Risk Management Structure

Governance

The Board of Directors has established the Structure for Ensuring Appropriate Business of Nomura Holdings, Inc. as the Company's basic principle and set up the framework for the management of risk of loss based on this. In addition, they are continuously making efforts to improve, strengthen and build up our risk management capabilities under this framework. Besides this, the Group Integrated Risk Management Committee (the GIRMC), upon delegation of the EMB, has established the Integrated Risk Management Policy, describing the overall risk management framework including the fundamental principles concerning risk management and organization and this is under continuous improvement.

Basic Principles of Risk Management

Nomura Group defines risks as i.) potential erosion of the Nomura Group's capital base due to unexpected losses from business operations, ii.) potential lack of access to funds due to deterioration of the Nomura Group's creditworthiness or deterioration in market conditions, or iii.) potential failure of revenues to cover expenses due to deterioration of earnings environment or deterioration of efficiency or effectiveness of business operations.

It is a fundamental principle that all Directors, Executive Managing Directors, Senior Managing Directors, Corporate Auditors and employees of Nomura Group shall regard themselves as principals of risk management and appropriately manage risks arising in the course of day-to-day business operations. At the same time, Nomura Group practices prudent risk management at an individual entity level within the group and also identifies, evaluates and appropriately manages risks within each of the business departments, risk management departments and internal audit departments, respectively.

Fundamental Policy of Risk Management

Our fundamental policy concerning risk management is to control risks arising in the course of business operations to the confines of the Company's risk appetite, which is clearly established based on risk tolerance in line with group-wide business strategy, business targets, management strength and financial base. We endeavor to embed this appetite into actual business operations.

Our risk appetite consists of quantitative and qualitative factors. Targets are set for such quantitative factors as capital adequacy, liquidity and profitability. Targets also set for such qualitative factors as Zero Tolerance Risk, which are risk that Nomura shall tolerate to no extent whatsoever, and for Minimum Tolerance Risk, which are risk that we may tolerate to a limited extent in consideration of profit potential, risk mitigation methods, monitoring capability and other factors, respectively.

We endeavor to measure risks using quantitative methods to the greatest extent possible and to continually improve its risk measurement methods. We use economic capital, for the risks measured by quantitative methods collectively and use this as the principal reference for assessment of capital adequacy, capital allocation and risk management. When evaluating risks by quantitative methods, we conduct stress testing as a complementary measure to analyze and evaluate the potential impact of each type of risk on our capital base.

Table of Contents

Risk Management Organizations

The organizational structure and core bodies tasked with risk management in the Nomura Group are shown in the following chart.

Executive Management Board

The EMB deliberates on and determines management strategy, allocation of management resources and important management matters of Nomura Group by promoting the effective use of management resources and execution of business with the unified intent of contributing to the increase of shareholder value.

Group Integrated Risk Management Committee

The GIRMC deliberates on and determines important matters concerning integrated risk management of the Nomura Group upon delegation by the EMB for contributing to the sound and effective management of the business. The GIRMC is a core organization for group-wide risk management and establishes the risk appetite for the Nomura Group and the framework of integrated risk management in accordance with the risk appetite.

Chief Risk Officer

The Chief Risk Officer (the CRO) is responsible for supervising the Risk Management Department and maintaining the effectiveness of the risk management framework independently from the business units within the Nomura Group. The CRO not only regularly reports on the status of the Nomura Group's risk management to the GIRMC, but also reports to and seeks the approval of the GIRMC on measures required for risk management.

Chief Financial Officer

The CFO has the operational authority and responsibility over our liquidity management. Liquidity risk management policy is based on risk appetite which the GIRMC formulates. Our primary objective for liquidity risk management is to ensure continuous liquidity across market cycles and periods of stress, and to ensure that all funding requirements and unsecured debt obligations that fall due within one year can be met without additional unsecured funding or forced liquidation of trading assets.

Risk Management Departments

The Risk Management Departments is defined as collectively the Group Risk Management Department and departments or units in charge of risk management established independently from the business units of Nomura

Table of Contents

entities. The Risk Management Departments is responsible for establishing and operating of risk management processes, establishing and enforcing risk management policies and regulations, verifying the effectiveness of risk management methods, gathering reports from Nomura Group entities, reporting to Executive/Senior Managing Directors and the GIRMC and others and also reporting to regulatory bodies and handling of regulatory applications concerning risk management methods and other items.

Classification and Definition of Risk

The Nomura Group classifies and defines risks as follows and has established departments or units to manage each risk type.

Risk Category	Summary Description
Market Risk	Risk of losses arising from fluctuations in values of financial assets and debts (including off-balance sheet items) due to fluctuations in market risk factors (interest rates, foreign exchange rates, prices of securities and others).
Credit Risk	Risk of losses arising from decrease or disappearance of asset values (including off-balance sheet items) due to deterioration in creditworthiness or default of an obligor or counterparty.
Country Risk	Risk brought about by a country's political, economic, legal, conventional, religious or other characteristics inherent to the country or risk of losses arising from changes in a country's situation due to a change of regime, fall in predictability of governmental measures, economic downturn or social turmoil.
Operational Risk	Risk of losses arising from inadequate or failed internal processes, people and systems or external events.
System Risk	Within Operational Risk, risk of losses due to system defects including, without limitation, computer crash or malfunction, or risk of losses due to unauthorized use of computers.
Liquidity Risk	Risk of losses arising from difficulty in securing the necessary funding or from a significantly higher cost of funding than normal levels due to deterioration of the Nomura Group's creditworthiness or deterioration in market conditions.
Business Risk	Risk of failure of revenues to cover costs due to deterioration of the earnings environment or deterioration of the efficiency or effectiveness of business operations.

Market Risk

Market risk refers to the potential loss in the value of an asset resulting from changes in market prices, rates, indices, volatilities, correlations or other market factors. This type of risk primarily impacts our trading activities. Effective management of this risk requires the ability to analyze a complex and constantly changing global market environment, identify problematic trends and ensure that appropriate action is taken in a timely manner.

Nomura uses a variety of complementary tools to measure, model and aggregate market risk. Our principle statistical measurement tool to assess and limit market risk on an ongoing basis is Value at Risk or VaR. Limits on VaR are set in line with the firm's risk appetite as expressed through economic capital. In addition to VaR, we use stress testing and sensitivity analysis to measure and analyze our market risk. Sensitivities are measures used to show the potential changes to a portfolio due to standard moves in market risk factors. They are specific to each asset class and cannot usually be aggregated across risk factors. Market risk is monitored against a set of approved limits, with daily reports and other management information provided to the business units and senior management.

Table of Contents

Value at Risk

VaR is a measure of the potential loss in the value of our trading positions due to adverse movements in markets over a defined time horizon with a specified confidence level. Market risks that are incorporated in the VaR model include equity prices, interest rates, credit, foreign exchange rates, and commodities with associated volatilities and correlations.

As part of our continuous investment to improve risk modelling and remain in line with industry good practise, Nomura enhanced the official VaR model from a variance-covariance type model to a historical simulation model in October 2011. This methodology change improved the capture of non-linear risks and led to an increased number of time series used in the VaR calculation to capture various basis risks. The two VaR models were run in parallel on the global portfolio from early 2011 until the switch-over in October 2011 to ensure that the model change implications and impacts were well understood. On average, from January to September 2011, a 27% VaR increase was observed from the old to the new VaR model, mainly as a result of better risk capture (e.g. basis risk) and more realistic modelling of tail events. As a result of this model enhancement, Nomura was well prepared for the change in Basel standards that took effect at the end of December 2011.

VaR Methodology Assumptions

Nomura's VaR methodology now uses historical simulation to estimate potential profit or loss. Historical market moves are repeatedly applied to the Firm's current exposure, forming a distribution of simulated portfolio returns. From this distribution the required potential losses can be estimated at required confidence levels (probabilities).

VaR is calculated across the Firm at a 99% confidence level. 1-day VaR is used for internal risk management and limits, and 10-day VaR is used for regulatory capital. The 10-day VaR is calculated using actual 10-day historical market moves. For internal information purposes, Nomura also calculates the 1% VaR which represents the potential profits from the same distribution. Differences between 99% and 1% measures can be used to demonstrate that markets do not always follow a simple statistical probability model. Additionally, Nomura calculates other measures used to complement VaR under recent regulation known as Basel 2.5. One of these, Stressed-VaR (SVaR) is calibrated on a one-year window from a period of financial stress. All VaR and SVaR numbers are calculated within the same system using equivalent assumptions.

The VaR model uses a default historical time window of two years (520 business days). For risk management and backtesting (see below), Nomura uses a weighted VaR. For the calculation of VaR, the probability weight assigned to each P&L in the historical simulation scenarios depends on when it occurred. The older the observation, the lower the weight. An exponential weighting scheme is used with the exponential weights set to 0.995. This choice of parameter implies a weighted average of the data set of 159 business days (just over 7 months).

The SVaR calculation uses one year of market data from a period of financial stress. The one-year window is calibrated to be the one with the largest SVaR, given the Firm's current portfolio. The historical data used for SVaR is not exponentially weighted.

Given a set of historical market moves, Nomura's VaR model calculates revenues impacts for current portfolio using sensitivities (greeks). Using second order sensitivities (gamma) for equity, rates, and foreign exchange, the VaR model is able to account for the non-linear pay-off of options. Material basis risks are captured either by using different time series (e.g. stock vs. ADR) or by using sensitivities and basis time series (e.g. Bond / Credit Default Swap (CDS) credit spread basis).

Nomura's VaR model uses time series for each individual underlying, whenever available. Approximately 25,000 time series are currently maintained in the Firm's market database. Time series are generally available for all assets but where a complete time series (i.e. 520 business days) cannot be found for a specific underlying, the

Table of Contents

VaR model will follow a proxy logic to map the exposure to an appropriate time series (for example, this would be the case for an option on a recently issued stock). The level of proxying taking place in the VaR model is carefully monitored through internal risk management processes and there is a continual effort to source new time series to use in the VaR calculation.

VaR Backtesting

The performance of the Firm's VaR model is constantly monitored to ensure that it remains fit for purpose. The main approach for validating VaR is to compare 1-day P&L with the corresponding VaR estimate. With a 99% VaR measure, one expects 2-3 exceptions (i.e. loss is larger than VaR) a year. We backtest the VaR model at Firm level as well as at a number of lower levels, and the backtesting results are reviewed on a monthly basis by the Firm's risk management function.

Limitations and Advantages of VaR

The main advantage of VaR as a risk measure is that it is able to aggregate risk from different asset classes (in contrast with other risk measures sensitivities that cannot be easily aggregated directly). The risk from different divisions of the Firm can therefore easily be compared and aggregated using VaR.

As a risk measure, however, VaR has well documented limitations. One of the main disadvantages with VaR is that it is a backward looking risk measure. Using historical market moves to infer future P&L for a firm, means that we assume that only events that have actually happened are relevant to analyse the risk of a portfolio.

Moreover, VaR only gives an estimate of the loss at a stated (99th) percentile (i.e. in one out of 100 days the loss will be greater than 1d VaR), but not what magnitude of loss that can take place whenever the loss does exceed VaR.

VaR as a risk measure is most appropriate for liquid markets and may understate the financial impact of severe events for which there is no historical precedent on where market liquidity may not be reliable. In particular, historical correlations can break down in extreme markets leading to unexpected relative market moves. This may make positions that off-set each other in VaR modeling move in the same direction thus increase losses.

Nomura is aware of the limitations of the Firm's VaR model and uses VaR only as one component of a diverse risk management process. Other metrics to supplement VaR include stress testing and sensitivity analysis.

The following tables show our VaR as of each of the dates indicated for substantially all of our trading positions:

VaR													
(maximum)	¥ 13.62	: April 16, 2010											
(average)	9.14	: Average for the period from April 1, 2010 to March 31, 2011											
(minimum)	6.00	: March 11, 2011											

Overall VaR has increased since March 31, 2011. VaR relating to interest rate risk increased from ¥4.08 billion at the end of March 2011 to ¥6.53 billion at the end of March 2012 mainly due to increase in interest rate related volatility. VaR relating to foreign exchange risk decreased from ¥4.53 billion at the end of March 2011 to ¥2.52 billion at the end of March 2012 mainly due to reductions in foreign exchange volatility. VaR relating to equity risk decreased from ¥1.78 billion at the end of March 2011 to ¥1.37 billion at the end of March 2012.

In the preceding year, VaR relating to equity risk decreased from ¥2.62 billion at the end of March 2010 to ¥1.78 billion at the end of March 2011 mainly due to reductions in equity related volatility. VaR relating to interest rate risk decreased from ¥4.36 billion at the end of March 2010 to ¥4.08 billion at the end of March 2011 mainly due to reductions in interest rate related positions. VaR relating to foreign exchange risk decreased from ¥10.54 billion at the end of March 2010 to ¥4.53 billion at the end of March 2011 mainly due to reductions in foreign exchange volatility.

No backing exceptions were experienced at Group level.

Other Controls

In some business lines or portfolios we use additional controls to control or limit risk taking activity. This may include the requirement for business units to fulfil additional conditions and/or seek additional approvals from senior management committees before the execution of certain types of transactions.

Stress Testing

Nomura Group conducts market risk stress testing since VaR and sensitivity analysis have limited ability to capture all portfolio risks or tail risks, including non-linear behaviors. Stress testing for market risk is conducted daily and weekly, scenarios are designed flexibly based upon the features of trading strategies. We conduct stress testing not only at each desk level, but also at the Nomura Group level with a set of common global scenarios in order to capture the impact on the whole company of market fluctuations.

Model Reviews

Models are used within the Firm for valuation and risk management of trading positions, financial reporting, and regulatory and internal capital calculations. The Global Model Validation Group validates the appropriateness and consistency of these models, functioning independently to those who design and build models. As part of this process, the Global Model Validation Group analyzes a number of factors to assess the model's suitability and to quantify model risk through model reserves and capital adjustments.

Table of Contents

Non-Trading Risk

A major market risk in our non-trading portfolio relates to equity investments held for operating purposes which we hold on a long-term basis. Our non-trading portfolio is exposed mainly to volatility in the Japanese stock market. One method that can estimate the market risk in the portfolio is to analyze market sensitivity based on changes in the TOPIX, which is a leading index of prices of stocks on the First Section of the Tokyo Stock Exchange.

We use regression analysis covering the previous 90 days which tracks and compares fluctuations in the TOPIX and the market value of our equity investments held for operating purposes. Our simulation indicates that, for each 10% change in the TOPIX, the market value of our operating equity investments held for operating purposes can be expected to change by ¥14,051 million at the end of March 2011 and ¥11,951 million at the end of March 2012. The TOPIX closed at 869.38 points at the end of March 2011 and at 854.35 points at the end of March 2012. This simulation analyzes data for our entire portfolio of equity investments held for operating purposes. Therefore, it is very important to note that the actual results differ from our expectations because of price fluctuations of individual equities.

Credit Risk

The Nomura Group defines credit risk as risk of losses arising from decrease or disappearance of asset values (including off-balance sheet items) due to deterioration in creditworthiness or default of an obligor.

For controlling credit risk appropriately, the Nomura Group has set out the basic principles in its Credit Risk Management Policy, a basic policy concerning credit risk management, which are important to meet the various needs of our clients whilst taking appropriate risks and ensuring sufficient returns to improve our corporate values. Under these basic principles, we have established a robust and comprehensive credit risk management framework.

The Nomura Group has been applying the Foundation Internal Rating Based Approach in calculating Credit Risk Weighted Asset for regulatory capital calculation since the end of March 2011. However, the Standardized Approach is applied to certain business units or asset types, which are considered immaterial to the calculation of credit risk weighted assets.

Credit Risk Management Framework

Under the credit risk management framework, the GIRMC, upon delegation by the EMB, deliberates on and determines important matters concerning integrated risk management of the Nomura Group and accordingly has established important principles concerning credit risk management as described in the Credit Risk Management Policy and other documents. Also, the Global Risk Management Committee, upon delegation by the GIRMC, deliberates on and determines important matters concerning credit risk management of the Nomura Group based on strategic risk allocation and risk appetite of Nomura Group as determined by the GIRMC.

The Nomura Group has established an organizational structure with an appropriate system of check-and-balances under the CRO. The Credit Planning Unit is responsible for planning or implementation of amending, revising or abolishing Internal Rating Systems, including development, oversight and continuous revising of the Internal Rating Model.

The Credit Department, which is independent from the business units, conducts credit analysis, internal rating assignment, monitoring of credit risk profiles including credit concentration risk and others. Also, the Credit Risk Control Unit (the CRCU), also independent from the business units and Credit Department, is responsible for monitoring operations, validation and others items for the Internal Rating System. Additionally, the Internal Audit Department, independently from these departments, audits the adequacy of credit risk management.

Table of Contents

Method of Credit Risk Management

Internal Rating System

The Nomura Group has established an Internal Rating System to be a unified, exhaustive and objective framework to evaluate credit risk with reasonable manner. Internal Ratings consist of Obligor Ratings, which represent assessment of an Obligor's creditworthiness, Facility Ratings, which represent assessment of potential unrecoverable loss for a facility in default and SL Rating, which represents the assessment of probability of default of a given Specialised Lending (SL) Transactions. Internal Ratings are classified into 20 grades, which consist of 17 non-default grades and 3 default grades based on creditworthiness. SL is defined in the Capital Adequacy Notice on Final Designated Parent Company as corporate exposure like project finance and object finance.

Obligor Ratings are assigned in principle to obligors which fall into the scope of the credit risk-weighted assets calculation. In order to appropriately reflect the creditworthiness of obligors, Obligor Ratings are not only reviewed periodically at least once a year, but also are reviewed as soon as significant change in the creditworthiness of the Obligor is identified. The Credit Department, functionally independent from the business units, is responsible for assigning Internal Ratings in order to ensure the sound process of rating assignment.

Each SL exposure is assigned SL Ratings which are then mapped to one of five slots of Strong, Good, Satisfactory, Weak and Default for credit risk weighted asset calculation. Frequency and process of SL Ratings reviews are conducted with almost same manner with that of Obligor Rating.

The CRCU, functionally independent from business units and the Credit Department, is responsible for validating the appropriateness of Internal Rating System at least once a year. In addition, the Internal Audit Unit, independent from all the divisions and units mentioned above, is responsible for auditing the appropriateness of the overall Internal Rating System, as part of Internal Audit's review of credit risk management.

Management of individual credit exposures

The Nomura Group's main type of credit risk assets are counterparties faced through derivatives transactions or securities financing transactions (derivatives in this section).

Credit exposures against counterparties are managed by means of setting Credit Limits based upon credit analysis of individual obligors. For ongoing risk monitoring, Credit Limits are managed through the daily calculation of potential credit exposures up to maturity, as well as monitoring the actual creditworthiness of obligors with adequate frequency, based upon which Obligor Ratings and Credit Limits are updated.

Credit Risk Mitigation Techniques

Nomura enters into International Swap and Derivatives Association, Inc. (ISDA) master agreements or equivalent agreements (called Master Netting Agreements) with many of its derivatives counterparties. Master Netting Agreements provide protection to reduce losses potentially incurred by a counterparty default.

In addition, to reduce losses potentially incurred by a counterparty default, Nomura requires collateral to mitigate exposure, principally cash or highly liquid bonds, including U.S. and Japanese government securities, when necessary.

Scope of Credit Risk Management

The scope of credit risk management includes counterparty trading and various debt or equity instruments including loans, private equity investments, fund investments, investment securities and any other as deemed necessary from a credit risk management perspective.

Table of ContentsIntegrated Management

We evaluate credit risk not only by obligor, but also by obligor group where it is appropriate that their credit risk should be evaluated collectively.

Credit Risk Reporting

The global risk management unit is responsible for monitoring, evaluating and analyzing credit risk and for reporting the status of credit risk to the CRO, Senior Managing Director(s) in charge of risk management and the GIRMC with appropriate frequency.

Credit Risk Measurement

Credit risk is quantitatively-measured by a globally unified methodology. Credit risk is properly measured to reflect the effect of collateral or a guarantee.

Credit Risk to counterparties to derivatives transaction

We measure our credit risk to counterparties of derivatives transactions as the sum of actual current exposure evaluated daily at its fair value, plus potential exposure until maturity of such transactions. All derivative credit lines are controlled through the risk management departments.

As we mentioned previously, we enter into Master Netting Agreements with many of our derivative counterparties. Master Netting Agreements provide protection to reduce our risks of counterparty default and, in some cases, offset our consolidated balance sheet exposure with the same counterparty and provide a more meaningful presentation of our balance sheet credit exposure. In addition, to reduce default risk, we require collateral, principally cash or highly liquid bonds, including U.S. and Japanese government securities when necessary.

The credit exposures in our trading-related derivatives at the end of March 2012 are summarized in the table below, showing as the fair value by counterparty credit rating and by tenor. The credit ratings are internally determined by our credit unit.

Credit Rating	Years to Maturity					Cross-Maturity Netting ⁽¹⁾	Total Fair Value (a)	Collateral Obtained (b)	Replacement Cost (a)-(b)
	Less than 1 Year	1 to 3 Years	3 to 5 Years	5 to 7 Years	More than 7 Years				
AAA	¥ 10	¥ 26	¥ 24	¥ 21	¥ 81	¥ (82)	¥ 80	¥ 6	¥ 74
AA	123	164	215	179	307	(772)	216	24	192
A	288	327	354	331	1,031	(1,901)	430	117	313
BBB	75	99	73	81	412	(495)	245	155	90
BB	22	33	28	18	71	(145)	27	47	(20)
Other ⁽²⁾	115	98	42	98	122	(417)	58	65	(7)
Sub-total	633	747	736	728	2,024	(3,812)	1,056	414	642
Listed	323	180	31	6	0	(236)	304	0	304
Total	¥ 956	¥ 927	¥ 767	¥ 734	¥ 2,024	¥ (4,048)	¥ 1,360	¥ 414	¥ 946

(1) This item represents netting of payable balances with receivable balances for the same counterparty across maturity band categories. Receivable and payable balances with the same counterparty in the same maturity category, however, are net within the maturity category. Cash collateral netting against net derivatives in accordance with ASC 210-20 *Balance Sheet Offsetting* are included.

(2) Other does not necessarily indicate that the counterparties' credit rating is below investment grade.

Table of Contents**Exposure to certain European peripheral countries**

During 2011 and continuing into 2012, the creditworthiness of several peripheral countries within the Eurozone such as Greece, Italy, Ireland, Portugal and Spain (the GIIPS countries) has declined due to economic and fiscal weaknesses.

The worsening of financial, economic and structural issues in the GIIPS countries have adversely influenced major global financial markets. A sustained market/economic downturn can adversely affect our business and can result in substantial losses.

The table below presents information regarding this exposure as at March 31, 2012 as measured in accordance with our internal risk management policies. Country risk exposure under these policies is reported based on the location of the counterparty, issuer or underlier's assets.

	Millions of yen March 31, 2012				
	By type of financial instrument				
	Inventory positions ⁽¹⁾	Derivative contracts ⁽²⁾ , Securities, financing and others ⁽³⁾	Total gross funded exposure	Less: Hedges ⁽⁴⁾	Total net funded exposure

- (1) Inventory positions consist of long and short-term debt and equity securities, loans, equity derivatives and credit derivatives, all of which are generally carried at fair value on a recurring basis in our consolidated balance sheets. Credit derivatives include single name CDS which reference GIIPS names. The gross notional value of single name CDS contracts where we have purchased and sold protection is ¥3,600 billion and ¥3,603 billion, respectively. The gross estimated fair value of these contract where we have purchased and sold protection is ¥413 billion and ¥403 billion, respectively. These notional and fair value amounts are not representative of Nomura's overall exposure as they exclude the impact of master netting agreements and collateralization arrangements in place with the counterparties to these transactions. See Note 3 *Derivative instruments and hedging activities* in our consolidated financial statements included within this annual report for more information around the nature of Nomura's credit derivative activities. Inventory positions also include GIIPS collateral with a fair value of ¥9,452 million used in open repo-to-maturity transactions.

Table of Contents

- (2) Derivatives are shown net by counterparty after deduction of collateral received.
 - (3) Securities financing transactions consist of repurchase agreements and securities borrowing and lending transactions are generally carried at amortized cost and are shown net by counterparty and after deduction of collateral amounts received.
 - (4) Hedges consist primarily of CDS contracts.
 - (5) Non-sovereign counterparties are primarily financial institutions located in these countries.
- In addition to the above, Nomura has outstanding unfunded loan commitments with a notional value of ¥6,364 million located in these countries.

Operational Risk Management

Overview of Operational Risk Management

The Nomura Group defines operational risk as the risk of loss resulting from inadequate or failed internal processes, people, and systems or from external events. This is an industry standard definition based on the Basel Committee on Banking Supervision definition of operational risk.

Nomura's GIRMC has approved the Nomura Global Operational Risk Management Policy, which defines the fundamental policy and framework for operational risk management across the Nomura Group in order to meet business and regulatory needs. This Policy is supported by further Minimum Standards and Procedures to clearly set out a consistent framework for the management of operational risk.

Operational Risk Principles

The Nomura Group adopts the industry standard Three Lines of Defence for the management of operational risk, comprising the following elements:

- 1) 1st Line of Defence: The business which owns and manages its risks
- 2) 2nd Line of Defence: The Operational Risk Management (ORM) function, which defines and co-ordinates the operational risk strategy and framework
- 3) 3rd Line of Defence: Internal and External Audit, who provide independent assurance

The Governing body: The GIRMC, with delegated authority from the Board of Directors, which provides formal oversight.

This ensures appropriate oversight and independent review and challenge of operational risk management throughout the Company.

Operational Risk Management Framework

We have established an operational risk management framework comprising certain key products, services and processes. This framework is shown below:

Infrastructure of the framework

Policy framework: Sets minimum standards for operational risk and details how to monitor adherence to these standards

Training and awareness: Action taken by ORM to improve business understanding of ORM
Products and Services

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Scenario analysis: Process to identify high impact, low probability tail events

Event reporting: Process to obtain information on and learn from actual events impacting on the Company and relevant external events

Table of Contents

Key Risk Indicators (KRI): Metrics which allow monitoring of certain key operational risks

Risk and Control Self Assessment (RCSA): Risk and Control Self Assessment process to identify key risks, controls and action plans
Outputs

Analysis and reporting: Key aspect of ORM role to analyze and report on ORM information and work with business to develop actions

Operational risk capital calculation: Calculate operational risk capital under Basel II provisions and allocate to the business to improve the efficiency on profit vs risks

Operational Risk Classification

The Nomura Group uses the standard Basel II event type as operational risk classifications (namely, Internal Fraud, External Fraud, Employee Practices and Workplace Safety, Clients, Products & Business Practices, Damage to Physical Assets, Business Disruption and System Failures and Execution, Delivery & Process Management).

Basel II regulatory capital calculation for operational risk

The Nomura Group uses The Standardized Approach (TSA) for calculating regulatory capital for operational risk. This involves using a 3 year average of gross income, allocated to business lines and multiplied by a fixed percentage determined by the FSA, to establish the amount of required OR capital.

The Nomura Group uses consolidated net revenue as gross income, however as for a part of the consolidated subsidiaries, gross operating profit is used as gross income. Gross income allocation is performed by mapping the net revenue of each given segment from management accounting data to each business line in accordance with the categories:

Business Line	Description	Beta Factor
Retail Banking	Retail deposit and loan-related services	12%
Commercial Banking	Deposit and loan-related services except for Retail Banking business	15%
Payment and Settlement	Payment and settlement services for clients transactions	18%
Retail Brokerage	Securities-related services mainly for individuals	12%
Trading and Sales	Market-related business	18%
Corporate Finance	M&A, underwriting, secondary and private offerings, and other funding services for clients	18%
Agency Services	Agency services for clients such as custody	15%
Asset Management	Fund management services for clients	12%

Calculation Process of Basel II regulatory capital calculation for operational risk

The Nomura Group then calculates capital for every business line by multiplying respectively allocated annual gross income by the corresponding factors set out above. Any unallocable gross income is multiplied by a fixed percentage of 18%.

The total Operational Risk capital is calculated as the three-year average of the simple summation of the amounts across each of the business lines and unallocable value in each year. However, where the aggregated amount within a given year is negative, then the input to the numerator for that year shall be zero.

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

In any given year, negative numbers in any business line shall offset positive numbers in other business lines. However, negative numbers in unallocable value shall not offset positive numbers in other business lines and shall be treated as zero.

Operational risk capital is calculated twice a year; reference dates for the calculation are the end of March and the end of September.

D. American Depositary Shares**Fees payable by ADR Holders**

The following table shows the fees and charges that a holder of our ADR may have to pay, either directly or indirectly:

Type of Services:	Amount of Fee (U.S. Dollars)
Taxes and other governmental charges	As applicable. The depositary may offset any taxes or governmental charges it is obligated to withhold, if applicable, against the proceeds from sale of the property received.
Transfers of the Company's shares to or from the name of the depositary (or its nominee) or the Custodian (or its nominee) in connection with deposits or withdrawals	Such registration fees as may be in effect for the registration of transfers of the Company's shares on the Company's share register (or any entity that presently carries out the duties of registrar)
Cable, telex and facsimile transmission expenses	As applicable
Expenses incurred by the depositary in the conversion of foreign currency	As applicable
Execution and delivery of Receipts in connection with deposit, stock split, exercise of subscription rights	\$5.00 or less per 100 ADSs (or portion thereof)
Surrender of Receipts in connection with withdrawal or termination of the Deposit Agreement	\$5.00 or less per 100 ADSs (or portion thereof)
Any cash distribution pursuant to the Deposit Agreement, including, but not limited to, cash distribution(s) made in connection with: cash dividend; distributions in securities, property or subscription rights; and stock split.	\$.02 or less per ADS (or portion thereof). Only the cash amounts net of this fee, if applicable, are distributed
Distribution by the depositary of securities (other than common shares of the Company) that accrued on the underlying shares to owners of the Receipts	Treating for the purpose of this fee all such securities as if they were common shares of the Company, \$5.00 or less per 100 ADSs (or portion thereof)
General depositary services	\$.02 or less per ADS (or portion thereof), accruing on the last day of each calendar year, except where the fee for cash distribution described above was assessed during that calendar year
Any other charge payable by the depositary, any of the depositary's agents, including the Custodian, or the agents of the depositary's agents in connection with the servicing of the Company's shares or other deposited securities	As applicable

Table of Contents

Fees paid to Nomura by the depositary

The Bank of New York Mellon, as depositary, has agreed to pay all its standard out-of-pocket administration and maintenance expenses for providing services to the registered shareholders and up to 100,000 non-registered shareholders of ADRs. From April 1, 2011 to March 31, 2012, the Bank of New York Mellon has waived a total of \$183,510.20 in fees (including \$51,082.31 in connection with the above-mentioned administration and maintenance expenses) associated with the administration of the ADR program and administrative fees for routine corporate actions and for providing investor relations information services.

Table of Contents

PART II

Item 13. Defaults, Dividend Arrearages and Delinquencies

None.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds

None.

Item 15. Controls and Procedures

Disclosure Controls and Procedures.

Our Disclosure Committee is responsible for establishment and maintenance of our disclosure controls and procedures. As of March 31, 2012, an evaluation was carried out under the supervision and with the participation of our management, including our Group Chief Executive Officer and Chief Financial Officer, and the Disclosure Committee, of the effectiveness of the disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934). Based on that evaluation, our Group Chief Executive Officer and Chief Financial Officer concluded that, as of March 31, 2012, our disclosure controls and procedures were effective.

Management's Annual Report on Internal Control Over Financial Reporting.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934). Our management, with the participation of our Group Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our internal control over financial reporting using the criteria set forth in the Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, management concluded that our internal control over financial reporting was effective as of March 31, 2012. Management has excluded from its assessment the internal control over financial reporting at Nomura Land and Building Co., Ltd. (NLB) and other companies consolidated as a result of purchase of additional NLB shares during the year ended March 31, 2012. The total assets and net revenues of NLB and such other companies represent 5.6% and 31.2%, respectively, of the related consolidated financial statement amounts as of and for the year ended March 31, 2012. Our independent registered public accounting firm, Ernst & Young ShinNihon LLC, has issued an attestation report on the effectiveness of our internal control over financial reporting, which appears on page F-2 of this Form 20-F.

Changes in Internal Control Over Financial Reporting.

Our management also carried out an evaluation, with the participation of our Group Chief Executive Officer and Chief Financial Officer, of changes in our internal control over financial reporting during the year ended March 31, 2012. Based upon that evaluation, there was no change in our internal control over financial reporting during the year ended March 31, 2012 that has materially affected, or is reasonably likely to affect, our internal control over financial reporting.

Item 16A. Audit Committee Financial Expert

Our Board of Directors has determined that Tsuguoki Fujinuma, a member of the Audit Committee, is an audit committee financial expert as such term is defined by Item 16A of Form 20-F. Mr. Fujinuma meets the independence requirements applicable to him under Section 303A.06 of the NYSE Listed Company Manual. For a description of his business experience, see Item 6.A of this annual report.

Table of Contents**Item 16B. Code of Ethics**

On March 5, 2004, we adopted the Code of Ethics of Nomura Group that includes the Code of Ethics for Financial Professionals, which applies to our financial professionals including our principal Executive Officer, principal financial officer, principal accounting officer and persons performing similar functions.

Item 16C. Principal Accountant Fees and Services

Ernst & Young ShinNihon LLC has been our principal accountants for SEC reporting purposes for the last ten fiscal years. The table set forth below contains the aggregate fees billed for each of the last two fiscal years by our principal accountants in each of the following categories: (i) Audit Fees, which are fees for professional services for the audit of our annual financial statements or services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements for those fiscal years, (ii) Audit-Related Fees, which are fees for assurance and related services that are reasonably related to the performance of the audit or review of our financial statements and are not reported as Audit Fees, (iii) Tax Fees, which are fees for professional services rendered for tax compliance, tax advice and tax planning, and (iv) All Other Fees, which are fees for products and services other than Audit Fees, Audit-Related Fees and Tax-Fees, such as advisory work for risk management and regulatory matters.

	Millions of yen	
	Year ended March 31	
	2011	2012
Audit Fees	¥ 2,690	¥ 3,002
Audit-Related Fees	113	217
Tax Fees	116	128
All Other Fees	175	120
Total	¥ 3,094	¥ 3,467

Audit-Related Fees included fees for services relating to consultations on accounting issues relating to our business such as securitization. Tax Fees included fees for services relating to tax planning and compliance. All Other Fees included fees for services relating to advice with respect to regulations and disclosures under the Financial Instruments and Exchange Act in connection with our underwriting business.

In accordance with the regulations of the Securities and Exchange Commission issued pursuant to Sections 202 and 208 of the Sarbanes-Oxley Act of 2002, our Audit Committee has adopted a pre-approval policy regarding the engagements of our principal accountants. Under the pre-approval policy, there are two types of pre-approval procedures, General Pre-Approval and Specific Pre-Approval.

Under the pre-approval procedure for General Pre-Approval, our CFO in conjunction with our principal accountants must make a proposal to our Audit Committee for the types of services and estimated fee levels of each category of services to be generally pre-approved. Such proposal must be made no less frequently than annually. The Audit Committee will discuss the proposal and if necessary consult with outside professionals as to whether the proposed services would impair the independence of our principal accountants. If such proposal is accepted, our Audit Committee will inform our CFO and principal accountants of the services that have generally been pre-approved and included in a General Pre-Approved List. Our Audit Committee is informed of each such service that is provided.

Under the pre-approval procedure for Specific Pre-Approval, if any proposed services are not on the General Pre-Approved List, our CFO must submit an application to our Audit Committee for such services. After reviewing the details and estimated fee levels for each engagement and if necessary consulting with outside professionals as to whether the proposed services would impair the independence of our principal accountants, our Audit Committee may make a specific pre-approval decision on these services. Also, if any approved services in the General Pre-Approved List exceed the fee levels prescribed on the List, our CFO must submit an

Table of Contents

application to our Audit Committee for new fee levels for such services. Our Audit Committee may make a pre-approval decision after reviewing the details of the services and the estimated fee levels for each engagement.

None of the services described in the first paragraph under this Item 16C were waived from the pre-approval requirement pursuant to Rule 2-01(c)(7)(i)(C) of Regulation S-X.

Item 16D. Exemptions from the Listing Standards for Audit Committees

We do not avail ourselves of any exemption from the independence requirements of Rule 10A-3 under the Securities Exchange Act of 1934.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

During the fiscal year ended March 31, 2012, we acquired 15,219 shares of our common stock by means of repurchase of shares constituting less than one unit upon the request of the holders of those shares. For an explanation of the right of our shareholders to demand such repurchases by us, see **Common Stock** under Item 10.B of this annual report. As of March 31, 2012, we had 3,663,483,895 outstanding shares excluding 159,078,706 shares as treasury stock.

During the fiscal year ended March 31, 2012, Nomura Asset Management Co., Ltd. received 47,790,000 shares of our common stock and Nomura Research Institute, Ltd. received 45,019,360 shares of our common stock as share exchange with Nomura Land and Building Co., Ltd.'s common stock. The Company received 47,790,000 shares of our common stock from Nomura Asset Management Co., Ltd. as dividend in kind. We also acquired 37,500 shares of our common stock according to Share Purchase Demand related to Nomura Land and Building Co., Ltd. acquisition.

We had not established share buyback programs nor purchased our common stock utilizing the programs during the year ended March 31, 2012.

The following table sets forth certain information with respect to our purchases of shares of our common stock during the fiscal year ended March 31, 2012.

Month	Total Number of Shares Purchased	Average Price Paid per Share (in yen)	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares that May Yet Be Purchased Under the Program
April 1 to 30, 2011	588	419		
May 1 to 31, 2011	739	400		
June 1 to 30, 2011	1,570	391		
July 1 to 31, 2011	47,792,312 ⁽¹⁾	391 ⁽²⁾		
August 1 to 31, 2011	39,705	286		
September 1 to 30, 2011	714	309		
October 1 to 31, 2011	912	285		
November 1 to 30, 2011	575	259		
December 1 to 31, 2011	1,865	252		
January 1 to 31, 2012	1,100	254		
February 1 to 29, 2012	1,591	307		
March 1 to 31, 2012	1,048	385		
Total	47,842,719	378		

(1) Includes shares acquired through payment of dividend in kind from a subsidiary.

- (2) Excludes the 47,790,000 shares of our common stock as described above.

Table of Contents

Nomura recognizes the need to set out flexible financial strategies that allow the Board of Directors to respond quickly to any changes in the business environment and is looking into implementing further share buybacks. Details will be announced when finalized.

As of May 31, 2012, 3,682,777,649 shares of Nomura Holdings were outstanding, excluding 139,784,952 shares held as treasury stock.

Item 16F. Change in Registrant's Certifying Accountant

Not applicable.

Item 16G. Corporate Governance

Companies listed on the NYSE must comply with certain standards regarding corporate governance under Section 303A of the NYSE Listed Company Manual. However, listed companies that are foreign private issuers, such as the Company, are permitted to follow home country practice in lieu of certain provisions of Section 303A.

The following table shows the significant differences between the corporate governance practices followed by U.S. listed companies under Section 303A of the NYSE Listed Company Manual and those followed by Nomura. The information set forth below is current as of the date of this annual report.

Corporate Governance Practices Followed

by NYSE-listed U.S. Companies

A NYSE-listed U.S. company must have a majority of Directors meeting the independence requirements under Section 303A of the NYSE Listed Company Manual.

The non-management directors of a NYSE-listed U.S. company must meet at regularly scheduled executive sessions without management.

A NYSE-listed U.S. company must have an audit committee that satisfies the requirements under Section 303A of the NYSE Listed Company Manual, including those imposed by Rule 10A-3 under the U.S. Securities Exchange Act of 1934. The audit committee must be composed entirely of independent directors and have at least three members.

Corporate Governance Practices Followed by Nomura

Under the Companies Act, a company which adopts the Committee System is not required to have a majority of outside directors, but is required to have a majority of outside directors on each of the audit, nomination and compensation committee. An outside director is defined under the Companies Act as a non-executive director who does not currently assume, and has never assumed, the position of executive director, executive officer, manager or employee of the company or its subsidiaries.

The Company, while meeting the requirements of the Companies Act, has seven outside directors among its thirteen Directors.

Under the Companies Act, the Company is not required to hold such executive sessions for its outside directors.

The Company has an Audit Committee consisting of three Directors, all of whom are independent directors under Rule 10A-3 under the U.S. Securities Exchange Act of 1934. The Audit Committee is in charge of monitoring the performance of the Directors and Executive Officers of Nomura and to propose the appointment or dismissal of its independent auditors and accounting firm. The Audit Committee satisfies the requirements of Rule 10A-3 under the U.S. Securities Exchange Act of 1934.

Table of Contents

Corporate Governance Practices Followed

by NYSE-listed U.S. Companies

A NYSE-listed U.S. company must have a nominating/corporate governance committee with responsibilities described under Section 303A of the NYSE Listed Company Manual. The nominating/corporate governance committee must be composed entirely of independent directors.

A NYSE-listed U.S. company must have a compensation committee with responsibilities described under Section 303A of the NYSE Listed Company Manual. The compensation committee must be composed entirely of independent directors.

A NYSE-listed U.S. company must generally obtain shareholder approval with respect to any equity compensation plan.

Item 16H. Mine Safety Disclosure

Not applicable

Corporate Governance Practices Followed by Nomura

The Company has a Nomination Committee consisting of three Directors, two of whom are outside directors. The Nomination Committee is in charge of proposing to the meeting of shareholders the election or dismissal of Directors of the Company.

The Company has a Compensation Committee consisting of three Directors, two of whom are outside directors. The Compensation Committee is in charge of determining the compensation of each Director and Executive Officer of the Company.

The Compensation Committee establishes the policy with respect to the determination of the individual compensation of each of our Directors and Executive Officers (including stock options in the form of stock acquisition rights as equity compensation) and makes determinations in accordance with that compensation policy. Under the Companies Act, stock options are deemed to be compensation for the services performed by our Directors and Executive Officers.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of

Nomura Holdings, Inc.

We have audited the accompanying consolidated balance sheets of Nomura Holdings, Inc. (the Company) as of March 31, 2011 and 2012, and the related consolidated statements of income, changes in equity, comprehensive income, and cash flows for each of the three years in the period ended March 31, 2012. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Nomura Holdings, Inc. at March 31, 2011 and 2012, and the consolidated results of its operations and its cash flows for each of the three years in the period ended March 31, 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Nomura Holdings, Inc.'s internal control over financial reporting as of March 31, 2012, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated June 27, 2012 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of

Nomura Holdings, Inc.

We have audited Nomura Holdings, Inc.'s internal control over financial reporting as of March 31, 2012, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Nomura Holdings, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Nomura Holdings, Inc. maintained, in all material respects, effective internal control over financial reporting as of March 31, 2012, based on the COSO criteria.

Management has excluded from its assessment the internal control over financial reporting at Nomura Land and Building Co., Ltd. (NLB) and other companies consolidated as a result of the purchase of additional NLB shares during the year ended March 31, 2012. The total assets and net revenues of NLB and such other companies represent 5.6% and 31.2%, respectively, of the related consolidated financial statement amounts as of and for the year ended March 31, 2012. Our audit of internal control over financial reporting of Nomura Holdings, Inc. also excluded an evaluation of the internal control over financial reporting of NLB and other companies consolidated as a result of purchase of additional NLB shares.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Nomura Holdings, Inc. as of March 31, 2011 and 2012, and the related consolidated statements of income, changes in equity, comprehensive income, and cash flows for each of the three years in the period ended March 31, 2012 and our report dated June 27, 2012 expressed an unqualified opinion thereon.

The increase in *Office buildings, land, equipment and facilities* in the consolidated balance sheets includes newly recognized capital leases of ¥26,572 million during the year ended March 31, 2010.

Conversion of convertible bonds:

During the year ended March 31, 2010, convertible bonds were exercised at the amount of ¥110,000 million. Accordingly, *Common Stock* increased by ¥55,000 million and *Additional paid-in capital* increased by ¥55,000 million.

Other:

During the year ended March 31, 2011, as a result of adoption of ASU 2009-17, assets excluding cash and cash equivalent increased by ¥275,464 million and liabilities increased by ¥289,757 million.

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of accounting policies:

Description of business

Nomura Holdings, Inc. (the Company) and its broker-dealer, banking and other financial services subsidiaries provide investment, financing and related services to individual, institutional and government clients on a global basis. The Company and other entities in which it has a controlling financial interest are collectively referred to as Nomura within these consolidated financial statements.

Nomura operates its business through various divisions based upon the nature of specific products and services, its main client base and its management structure. Nomura reports operating results through three business segments: Retail, Asset Management and Wholesale.

In its Retail segment, Nomura provides investment consultation services mainly to individual clients in Japan. In its Asset Management segment, Nomura develops and manages investment trusts, and provides investment advisory services. In its Wholesale segment, Nomura is engaged in the sales and trading of debt and equity securities and currencies on a global basis to various institutions, provides investment banking services such as the underwriting of bonds and equities as well as mergers and acquisitions and financial advice and invests in private equity businesses and seeks to maximize returns on these investments by increasing the corporate value of investee companies. As of April 2012, Nomura has simplified the organizational structure, and Global Markets has been split into Fixed Income and Equities.

Basis of presentation

The accounting and financial reporting policies of the Company conform to accounting principles generally accepted in the United States (U.S. GAAP) as applicable to broker-dealers.

These consolidated financial statements include the accounts of the Company and other entities in which it has a controlling financial interest. The Company initially determines whether it has a controlling financial interest in an entity by evaluating whether the entity is a variable interest entity (VIE) under the Financial Accounting Standards Board (FASB) Accounting Standard Codification (ASC) 810 *Consolidation* (ASC 810). VIEs are entities in which equity investors do not have the characteristics of a controlling financial interest or which do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support. The Company consolidates VIEs where Nomura is the primary beneficiary, which is where Nomura holds variable interests that provide power over the most significant activities of the VIE and the right to receive benefits or the obligation to absorb losses meeting a significance test, provided that Nomura is not acting as a fiduciary for other interest holders. For certain VIE entities that qualify as investment companies under ASC 946 *Financial Services Investment Companies* (ASC 946) or for which it is industry practice to apply guidance consistent with the measurement principles in ASC 946, Nomura is the primary beneficiary when it holds interests that will absorb a majority of the expected losses or a majority of the expected residual returns of the entity, or both.

For entities other than VIEs, Nomura is generally determined to have a controlling financial interest in an entity when it owns a majority of the voting interests.

Equity investments in entities in which Nomura has significant influence over operating and financial decisions (generally defined as 20 to 50 percent of the voting stock of a corporate entity, or at least 3 percent of a limited partnership) are accounted for under the equity method of accounting (equity method investments) and reported in *Other assets Investments in and advances to affiliated companies* or at fair value by electing the fair value option permitted by ASC 825 *Financial Instruments* (ASC 825) and reported within *Trading assets* or *Private equity investments* or *Other assets Other*. Investments undertaken by Nomura's merchant banking

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

business are reported within *Private equity investments* and *Other assets - Other*. Other investments are reported within *Trading assets*. Equity investments in which Nomura has neither control nor significant influence are carried at fair value, with changes in fair value recognized through the consolidated statements of income or the consolidated statements of comprehensive income.

Certain entities in which the Company has a financial interest are investment companies under ASC 946. These entities, including subsidiaries such as Nomura Principal Finance Co., Ltd. (NPF), carry all of their investments at fair value, with changes in fair value recognized through the consolidated statements of income.

The Company's principal subsidiaries include Nomura Securities Co., Ltd. (NSC), Nomura Securities International, Inc. (NSI) and Nomura International plc (NIP).

All material intercompany transactions and balances have been eliminated on consolidation. Certain reclassifications of previously reported amounts have been made to conform to the current year presentation.

Use of estimates

In presenting these consolidated financial statements, management makes estimates regarding the valuation of certain financial instruments and investments, the outcome of litigation and tax examinations, the recovery of the carrying value of goodwill, the allowance for doubtful accounts, the realization of deferred tax assets and other matters that affect the reported amounts of assets and liabilities as well as the disclosures in these consolidated financial statements. Estimates, by their nature, are based on judgment and available information. Therefore, actual results may differ from estimates which could have a material impact on these consolidated financial statements, and it is possible that such adjustments could occur in the near term.

Fair value of financial instruments

A significant amount of Nomura's financial assets and financial liabilities are carried at fair value, with changes in fair value recognized through the consolidated statements of income or the consolidated statements of comprehensive income. Use of fair value is either specifically required under U.S. GAAP or Nomura makes an election to use fair value for certain eligible items under the fair value option.

Other financial assets and financial liabilities are carried at fair value on a nonrecurring basis, where the primary measurement basis is not fair value. Fair value is only used in specific circumstances after initial recognition, such as to measure impairment.

In all cases, fair value is determined in accordance with ASC 820 *Fair Value Measurements and Disclosures* (ASC 820) which defines fair value as the amount that would be exchanged to sell a financial asset or transfer a financial liability in an orderly transaction between market participants at the measurement date. It assumes that the transaction occurs in Nomura's principal market, or in the absence of a principal market, the most advantageous market for the relevant financial asset or financial liability. See Note 2 *Fair value of financial instruments* for further information regarding how Nomura estimates fair value for specific types of financial instruments used in the ordinary course of business.

Private equity business

Private equity investments are generally carried at fair value, with changes in fair value recognized through the consolidated statements of income. See Note 4 *Private equity business* for further information.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Transfers of financial assets**

Nomura accounts for the transfer of a financial asset as a sale when Nomura relinquishes control over the asset by meeting the following conditions: (a) the asset has been isolated from the transferor (even in bankruptcy or other receivership), (b) the transferee has the right to pledge or exchange the asset received, or if the transferee is an entity whose sole purpose is to engage in securitization or asset-backed financing activities, if, the holders of its beneficial interests have the right to pledge or exchange the beneficial interests held and (c) the transferor has not maintained effective control over the transferred asset.

In connection with its securitization activities, Nomura utilizes special purpose entities (SPEs) to securitize commercial and residential mortgage loans, government and corporate securities and other types of financial assets. Nomura's involvement with SPEs includes structuring and underwriting, distributing and selling debt instruments and beneficial interests issued by SPEs to investors. Nomura derecognizes financial assets transferred in securitizations provided that Nomura has relinquished control over such assets and does not consolidate the SPE. Nomura may obtain or retain an interest in the financial assets, including residual interests in the SPEs dependent upon prevailing market conditions. Any such interests are accounted for at fair value and reported within *Trading assets* in the consolidated balance sheets with the change in fair value reported within *Revenue Net gain on trading* in the consolidated statements of income.

Foreign currency translation

The financial statements of the Company's subsidiaries are measured using their functional currency which is the currency of the primary economic environment in which the entity operates. All assets and liabilities of subsidiaries which have a functional currency other than Japanese yen are translated into Japanese yen at exchange rates in effect at the balance sheet date; all revenue and expenses are translated at the average exchange rates for the respective years and the resulting translation adjustments are accumulated and reported within *Accumulated other comprehensive income (loss)* in NHI shareholders' equity.

Foreign currency assets and liabilities are translated at exchange rates in effect at the balance sheet date and the resulting translation gains or losses are credited or charged to the consolidated statements of income.

Fee revenue

Revenue Commissions includes amounts charged for executing brokerage transactions accrued on a trade date basis and are included in current period earnings. *Revenue Fees from investment banking* includes securities underwriting fees and other corporate financing services fees. Underwriting fees are recorded when services for underwriting are completed. All other fees are recognized when related services are performed. *Revenue Asset management and portfolio service fees* are accrued over the period that the related services are provided or when specified performance requirements are met.

Trading assets and trading liabilities

Trading assets and *Trading liabilities* primarily comprise debt and equity securities, derivatives and loans which are generally recognized on the consolidated balance sheets on a trade date basis and carried at fair value with changes in fair value reported within *Revenue Net gain on trading* in the consolidated statements of income.

Collateralized agreements and collateralized financing

Collateralized agreements consist of resale agreements and securities borrowed. *Collateralized financing* consists of repurchase agreements, securities loaned and other secured borrowings.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Resale and repurchase agreements (repo transactions) principally involve the buying or selling of government and government agency securities under agreements with clients to resell or repurchase these securities to or from those clients. Nomura monitors the value of the underlying securities on a daily basis relative to the related receivables and payables, including accrued interest, and requests or returns additional collateral when appropriate. Repo transactions are generally accounted for as collateralized agreements or collateralized financing transactions and are recorded on the consolidated balance sheets at the amount at which the securities were originally acquired or sold with applicable accrued interest, as appropriate. Certain repo transactions are carried at fair value through election of the fair value option. No allowance for credit losses is generally recorded on repurchase agreements due to the strict collateralization requirements.

Repo transactions where the maturity of the security transferred as collateral matches the maturity of the repo transaction (repo-to-maturity transactions) are accounted for as sales rather than collateralized financings where the criteria for derecognition of the securities transferred under ASC 860 *Transfers and Servicing* (ASC 860) are met. The amounts of securities derecognized from the consolidated balance sheets under repo-to-maturity transactions as of March 31, 2011 and March 31, 2012 were ¥169,766 million and ¥39,797 million, respectively.

Nomura also enters into Gensaki Repo transactions which are the standard type of repurchase transaction used in the Japanese financial market. Gensaki Repo transactions contain margin requirements, rights of security substitution, and certain restrictions on the client's right to sell or repledge the transferred securities. Gensaki Repo transactions are accounted for as collateralized agreements or collateralized financing transactions and are recorded on the consolidated balance sheets at the amount that the securities were originally acquired or sold with applicable accrued interest, as appropriate.

Repo transactions (including Gensaki Repo transactions) are presented in the consolidated balance sheets net-by-counterparty, where offsetting is consistent with ASC 210-20 *Balance Sheet Offsetting* (ASC 210-20).

Securities borrowed and *securities loaned* are generally accounted for as collateralized agreements and collateralized financing transactions, respectively. Securities borrowed and securities loaned are generally cash collateralized and are recorded on the consolidated balance sheets at the amount of cash collateral advanced or received. Securities borrowed transactions generally require Nomura to provide the counterparty with collateral in the form of cash or other securities. For securities loaned transactions, Nomura generally receives collateral in the form of cash or other securities. Nomura monitors the market value of the securities borrowed or loaned and requires additional cash or securities, as necessary, to ensure that such transactions are adequately collateralized. No allowance for credit losses is generally recorded on securities borrowing transactions due to the strict collateralization requirements.

Nomura adopted Accounting Standard Update (ASU) No. 2011-03 *Reconsideration of Effective Control for Repurchase Agreements* (ASU 2011-03) from January 1, 2012 and certain Japanese securities lending transactions undertaken after adoption date are accounted for as secured borrowings rather than sales in these consolidated financial statements as the criteria for derecognition of the transferred financial assets under ASC 860 are no longer be met. The amounts of securities derecognized from the consolidated balance sheets under this type of securities lending transaction as of March 31, 2011 and March 31, 2012 were ¥291,870 million and ¥1,930 million, respectively.

Other secured borrowings consist primarily of secured borrowings from financial institutions and central banks in the inter-bank money market, and are recorded at contractual amounts due.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Trading balances of secured borrowings consist of liabilities related to transfers of financial assets that are accounted for as secured financing transactions rather than sales and are reported in the consolidated balance sheets within *Long-term borrowings*. The fair value option is generally elected for these transactions, which are carried at fair value on a recurring basis. See Note 8 *Securitized and Variable Interest Entities* and Note 13 *Borrowings* for further information regarding these transactions.

All Nomura-owned securities pledged to counterparties where the counterparty has the right to sell or repledge the securities, including Gensaki Repo transactions, are reported parenthetically within *Trading assets* as *Securities pledged as collateral* in the consolidated balance sheets.

Derivatives

Nomura uses a variety of derivative financial instruments, including futures, forwards, swaps and options, for both trading and non-trading purposes. All freestanding derivatives are carried at fair value in the consolidated balance sheets and reported within *Trading assets* or *Trading liabilities* depending on whether fair value is positive or negative, respectively. Certain derivatives embedded in hybrid financial instruments such as structured notes and certificates of deposit are bifurcated from the host contract and are also carried at fair value in the consolidated balance sheets and reported within *Short-term borrowings* or *Long-term borrowings* depending on the maturity of the underlying host contract.

Changes in fair value are recognized either through the consolidated statements of income or the consolidated statements of comprehensive income depending on the purpose for which the derivatives are used.

Derivative assets and liabilities are presented in the consolidated balance sheets on a net-by-counterparty basis where offsetting is consistent with ASC 210-20. In addition, fair value amounts recognized for the right to reclaim cash collateral (a receivable) and the obligation to return cash collateral (a payable) are also offset against net derivative liabilities and net derivative assets, respectively.

Trading

Derivative financial instruments used for trading purposes, including bifurcated embedded derivatives, are carried at fair value with changes in fair value reported in the consolidated statements of income within *Revenue Net gain on trading*.

Non-trading

In addition to its trading activities, Nomura uses derivative financial instruments for other than trading purposes such as to manage risk exposures arising from recognized assets and liabilities, forecasted transactions and firm commitments. Certain derivatives used for non-trading purposes are formally designated as fair value and net investment accounting hedges under ASC 815 *Derivatives and Hedging* (ASC 815).

Nomura designates derivative financial instruments as fair value hedges of interest rate risk arising from specific financial liabilities. These derivatives are effective in reducing the risk associated with the exposure being hedged and they are highly correlated with changes in the fair value of the underlying hedged item, both at inception and throughout the life of the hedge contract. Changes in fair value of the hedging derivatives are reported together with those of the hedged liabilities through the consolidated statements of income within *Interest expense*.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Derivative financial instruments designated as hedges of the net investment in foreign operations are linked to specific subsidiaries with non-Japanese yen functional currencies. When determining the effectiveness of net investment hedges, the effective portion of the change in fair value of the hedging derivative is determined by changes in spot exchange rates and is reported through NHI shareholders' equity within *Accumulated other comprehensive income (loss)*. Change in fair value of the hedging derivatives attributable to changes in the difference between the forward rate and spot rate is excluded from the measure of hedge effectiveness and is reported in the consolidated statements of income within *Revenue - Other*.

See Note 3 *Derivative Instruments and Hedging Activities* for further information.

Loans receivable

Loans receivable are loans which management intends to hold for the foreseeable future. Loans receivable are either carried at fair value or at amortized cost. Interest earned on loans receivable is generally reported in the consolidated statements of income within *Revenue - Interest and dividends*.

Loans receivable carried at fair value

Certain loans which are risk managed on a fair value basis are carried at fair value through election of the fair value option. Nomura makes this election to mitigate volatility in the consolidated statements of income caused by the difference in measurement basis that would otherwise exist between the loans and the derivatives used to risk manage those loans. Changes in the fair value of loans receivable carried at fair value are reported in the consolidated statements of income within *Revenue - Net gain on trading*.

Loans receivable carried at amortized cost

Loans receivable which are not carried at fair value are carried at amortized cost. Amortized cost represents cost adjusted for deferred fees or costs, unamortized premiums or discounts on purchased loans and after deducting any applicable allowance for loan losses.

Loan origination fees, net of direct origination costs, are amortized to *Revenue - Interest and dividends* as an adjustment to yield over the life of the loan. Net unamortized deferred fees and costs were ¥483 million and ¥552 million as of March 31, 2011 and March 31, 2012, respectively.

See Note 9 *Financing receivables* for further information.

Other receivables

Receivables from customers include amounts receivable on client securities transactions and *Receivables from other than customers* include amounts receivable for securities not delivered to a purchaser by the settlement date, margin deposits, commissions, and net receivables arising from unsettled securities transactions.

These amounts are carried at contractual amounts due less any applicable allowance for credit losses which reflects management's best estimate of probable losses incurred within receivables which have been specifically identified as impaired. The allowance for credit losses is reported in the consolidated balance sheets within the *Allowance for doubtful accounts*.

Loan commitments

Unfunded loan commitments are accounted for as either off-balance sheet instruments, or are carried at fair value on a recurring basis either as trading instruments or through election of the fair value option.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Loan commitments are generally accounted for in a manner consistent with the accounting for the loan receivable upon funding. Where the loan receivable will be classified as a trading asset or will be elected for the fair value option, the loan commitment is also generally held at fair value, with changes in fair value reported in the consolidated statements of income within *Revenue Net gain on trading*. Loan commitment fees are recognized as part of the fair value of the commitment.

For loan commitments where the loan will be held for the foreseeable future, Nomura recognizes an allowance for credit losses which is reported within *Other liabilities other* in the consolidated balance sheets which reflects management's best estimate of probable losses incurred within the loan commitments which have been specifically identified as impaired. Loan commitment fees are generally deferred and recognized over the term of the loan when funded as an adjustment to yield. If drawdown of the loan commitment is considered remote, loan commitment fees are recognized over the commitment period as service revenue.

Payables and deposits

Payables to customers include amounts payable on client securities transactions and are generally measured at contractual amounts due.

Payables to other than customers include payables to brokers and dealers for securities not received from a seller by the settlement date and net payables arising from unsettled securities transactions. Amounts are measured at contractual amounts due. The net payable arising from unsettled securities transactions reported within *Payables to other than customers* was ¥60,771 million and ¥396,116 million as of March 31, 2011 and March 31, 2012, respectively.

Deposits received at banks represent amounts held on deposit within Nomura's banking subsidiaries and are measured at contractual amounts due.

Office buildings, land, equipment and facilities

Office buildings, land, equipment and facilities, held for use by Nomura are stated at cost, net of accumulated depreciation and amortization, except for land, which is stated at cost. Significant renewals and additions are capitalized at cost. Maintenance, repairs and minor renewals are expensed as incurred in the consolidated statements of income.

The following table presents a breakdown of *Office buildings, land, equipment and facilities* as of March 31, 2011 and 2012.

	Millions of yen	
	March 31	
	2011	2012
Land	¥ 70,057	¥ 594,146
Office buildings	110,097	235,995
Equipment and facilities	79,747	60,840
Software	128,318	141,069
Construction in progress	3,817	13,900
Total	¥ 392,036	¥ 1,045,950

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Depreciation and amortization charges are generally computed using the straight-line method and at rates based on estimated useful lives of each asset according to general class, type of construction and use. The estimated useful lives for significant asset classes are as follows:

Office buildings	2 to 65 years
Equipment and facilities	3 to 15 years
Software	Up to 5 years

Depreciation and amortization is reported within *Non-interest expenses Information processing and communications* in the amount of ¥51,924 million, ¥52,455 million, ¥54,083 million, and in *Non-interest expenses Occupancy and related depreciation* in the amount of ¥21,157 million, and ¥23,132 million, and ¥46,489 million for the years ended March 31, 2010, 2011 and 2012, respectively.

Leases that involve real estate are classified as either operating or capital leases in accordance with ASC 840 *Leases* (ASC 840). Rent expense relating to operating leases is recognized over the lease term on a straight-line basis. If the lease is classified as a capital lease, Nomura recognizes the real estate as an asset on the consolidated balance sheets together with a lease obligation. The real estate is initially recognized at the lower of its fair value or present value of minimum lease payments, and subsequently depreciated over its useful life on straight-line basis. Where Nomura has certain involvement in the construction of real estate subject to a lease, Nomura is deemed the owner of the construction project and recognizes the real estate on the consolidated balance sheets until construction is completed. At the end of the construction period the real estate is either derecognized or continues to be recognized on the consolidated balance sheets in accordance with ASC 840, depending on the extent of Nomura's continued involvement with the real estate.

Long-lived assets, excluding goodwill and indefinite-lived intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the estimated future undiscounted cash flows generated by the asset is less than the carrying amount of the asset, a loss is recognized to the extent that the carrying value exceeds its fair value.

Nomura recorded non-cash impairment charges of ¥194 million, and ¥1,532 million, and ¥3,135 million substantially related to write-downs of software, office buildings, land, equipment, facilities, and other assets for the years ended March 31, 2010, 2011 and 2012, respectively. These losses are reported in the consolidated statements of income within *Non-interest expenses Other*. The revised carrying values of these assets were based on the estimated fair value of the assets.

Investments in equity securities

Nomura holds minority stakes in the equity securities of unaffiliated Japanese financial institutions and corporations in order to promote existing and potential business relationships. These companies will also often have similar investments in Nomura. Such cross-holdings are a customary business practice in Japan and provide a way for companies to manage shareholder relationships.

These investments, which Nomura refers to as being held for operating purposes, are carried at fair value and reported within *Other assets Investments in equity securities* in the consolidated balance sheets, with changes in fair value reported within *Revenue Gain (loss) on investments in equity securities* in the consolidated statements of income. These investments comprise listed and unlisted equity securities in the amounts of ¥66,792 million and ¥24,243 million, respectively, as of March 31, 2011 and ¥69,552 million and ¥18,635 million, respectively, as of March 31, 2012.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Other non-trading debt and equity securities**

Certain non-trading subsidiaries within Nomura and an insurance subsidiary which was acquired during the year ended March 31, 2012 hold debt securities and minority stakes in equity securities for non-trading purposes. Non-trading securities held by non-trading subsidiaries are carried at fair value and reported within *Other assets Non-trading debt securities* and *Other assets Other* in the consolidated balance sheets with changes in fair value recognized within *Revenue Other* in the consolidated statements of income. Non-trading securities held by the insurance subsidiary are also carried at fair value within *Other assets Non-trading debt securities* and *Other assets Other* in the consolidated balance sheets, and unrealized changes in fair value are reported net-of-tax within *Other comprehensive income (loss)* in the consolidated statements of comprehensive income. Realized gains and losses on non-trading securities are recognized within *Revenue Other* in the consolidated statements of income.

Where the fair value of non-trading securities held by the insurance subsidiary has declined below amortized cost, these are assessed to determine whether the decline in fair value is other-than-temporary in nature. Nomura considers quantitative and qualitative factors including the length of time and extent to which fair value has been less than amortized cost, the financial condition and near-term prospects of the issuer and Nomura's intent and ability to hold the securities for a period of time sufficient to allow for any anticipated recovery in fair value. If an other-than-temporary impairment loss exists, for equity securities, the security is written down to fair value, with the entire difference between fair value and amortized cost recognized within *Revenue Other* in the consolidated statements of income. For debt securities, an other-than-temporary impairment loss is also recognized within *Revenue Other* in the consolidated statements of income if Nomura intends to sell the debt security or it is more-likely-than-not that Nomura will be required to sell the debt security before recovery of amortized cost. If Nomura does not expect to sell or be required to sell the debt security, only the credit loss component of an other-than-temporary impairment loss is recognized in the consolidated statements of income and any non-credit loss component recognized within *Other comprehensive income (loss)* in the consolidated statements of comprehensive income.

See Note 7 *Non-trading securities* for further information regarding these securities.

Short-term and long-term borrowings

Short-term borrowings are defined as borrowings which are due on demand, which have a contractual maturity of one year or less at issuance date, or which have a longer contractual maturity but which contain features outside of Nomura's control that allows the investor to demand redemption within one year from original issuance date. Short-term and long-term borrowings primarily consist of commercial paper, bank borrowings, and certain structured notes issued by Nomura and SPEs consolidated by Nomura, and financial liabilities recognized in transfers of financial assets which are accounted for as financings rather than sales under ASC 860 (*secured financing transactions*). Of these financial liabilities, certain structured notes and secured financing transactions are accounted for at fair value on a recurring basis through election of the fair value option. Other short and long-term borrowings are primarily carried at amortized cost.

Structured notes

Structured notes are debt securities which contain embedded features (often meeting the accounting definition of a derivative) that alter the return to the investor from simply receiving a fixed or floating rate of interest to a return that depends upon some other variable(s) such as an equity or equity index, commodity price, foreign exchange rate, credit rating of a third party or more complex interest rate calculation.

All structured notes issued by Nomura on or after April 1, 2008 are carried at fair value on a recurring basis through election of the fair value option. This blanket election for structured notes is made primarily to mitigate

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the volatility in the consolidated statements of income caused by differences in the measurement basis for structured notes and the derivatives used to risk manage those positions and to generally simplify the accounting Nomura applies to these financial instruments.

Certain structured notes outstanding as of March 31, 2008 were already measured at fair value but others continue to be accounted for by Nomura by bifurcating the embedded derivative from the associated debt host contract. The embedded derivative is accounted for at fair value and the debt host contract is accounted for at amortized cost.

Changes in the fair value of structured notes elected for the fair value option and bifurcated embedded derivatives are reported within *Revenue Net gain on trading* in the consolidated statements of income.

Income taxes

Deferred tax assets and liabilities are recorded for the expected future tax consequences of tax loss carryforwards and temporary differences between the carrying amounts and the tax bases of assets and liabilities based upon enacted tax laws and tax rates. Nomura recognizes deferred tax assets to the extent it believes that it is more likely than not that a benefit will be realized. A valuation allowance is provided for tax benefits available to Nomura that are not deemed more likely than not to be realized.

Nomura recognizes and measures unrecognized tax benefits based on Nomura's estimate of the likelihood, based on the technical merits, that tax positions will be sustained upon examination based on the facts and circumstances and information available at the end of each period. Nomura adjusts the level of unrecognized tax benefits when there is more information available, or when an event occurs requiring a change. The reassessment of unrecognized tax benefits could have a material impact on Nomura's effective tax rate in the period in which it occurs.

Stock-based and other compensation awards

Stock-based awards issued by Nomura to senior management and other employees are classified as either equity or liability awards depending on the terms of the award.

Stock-based awards such as Stock Acquisition Rights (SARs) which are expected to be settled by the delivery of the Company's shares are classified as equity awards. For these awards, total compensation cost is generally fixed at the grant date and measured using the grant-date fair value of the award, net of any amount the employee is obligated to pay and estimated forfeitures.

Stock-based awards such as Notional Stock Units (NSUs) and Collared Notional Stock Units (CSUs) which are expected to be settled in cash are classified as liability awards. Other awards such as Notional Index Units (NIUs) which are linked to a world stock index quoted by Morgan Stanley Capital International and which are expected to be cash settled as also effectively classified as liability awards. These awards are remeasured to fair value at each balance sheet date, net of estimated forfeitures with the final measurement of cumulative compensation cost equal to the settlement amount.

For both equity and liability awards, fair value is determined either by using option pricing models, the market price of the Company's shares or the price of the third party index, as appropriate. Compensation cost is recognized in the consolidated statements of income over the requisite service period, which generally is equal to the vesting period. Where an award has graded vesting, compensation expense is recognized using the accelerated recognition method.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

See Note 16 *Deferred compensation plans* for further information regarding these types of award.

Earnings per share

The computation of basic earnings per share is based on the weighted average number of shares outstanding during the year. Diluted earnings per share reflects the assumed conversion of all dilutive securities based on the most advantageous conversion rate or exercise price available to the investors, and assuming conversion of convertible debt under the if-converted method.

Cash and cash equivalents

Nomura defines cash and cash equivalents as cash on hand and demand deposits with banks.

Goodwill and intangible assets

Goodwill and intangible assets not subject to amortization are reviewed annually, or more frequently in certain circumstances, for impairment. Goodwill is the cost of acquired companies in excess of the fair value of identifiable net assets at acquisition date. Nomura periodically assesses the recoverability of goodwill by comparing the fair value of each reporting unit to which goodwill relates to the carrying amount of the reporting unit including goodwill. If such assessment indicates that the fair value is less than the related carrying amount, a goodwill impairment determination is made. Identifiable intangible assets with finite lives are amortized over their expected useful lives.

Nomura's equity method investments are tested in their entirety for other-than-temporary impairment when there is an indication of impairment. The underlying assets associated with the equity method investments, including goodwill, are not tested separately for impairment.

Restructuring costs

Costs associated with an exit activity are recognized at fair value in the period in which the liability is incurred. Such costs include one-time termination benefits provided to employees, costs to terminate certain contracts and costs to relocate employees. Termination benefits provided to employees as part of ongoing benefit arrangements are recognized as liabilities at the earlier of the date an appropriately detailed restructuring plan is approved by regional executive management or the terms of the involuntary terminations are communicated to employees potentially affected. Contractual termination benefits included in a employee's contract of employment that is triggered by the occurrence of a specific event are recognized during the period in which it is probable that Nomura has incurred a liability and the amount of the liability can be reasonably estimated. A one-time termination benefit is established by a plan of termination that applies to a specified termination event and is recognized when an appropriately detailed restructuring plan is approved by regional executive management and the terms of the involuntary terminations are communicated to those employees potentially affected by the restructuring.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

New accounting pronouncements adopted during the current year

The following new accounting pronouncements relevant to Nomura have been adopted during the year ended March 31, 2012:

Fair value measurements and disclosures

In May 2011, the FASB issued amendments to ASC 820 through issuance of ASU 2011-04 *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs* (ASU 2011-04), which amends the methodology for determining fair value and enhances disclosures related to fair value measurements. In particular, ASU 2011-04:

Prohibits application of block discounts for all fair value measurements, regardless of classification in the fair value hierarchy, and clarifies how other premiums or discounts should be applied in a fair value measurement;

Allows the fair value of certain financial instruments held in a portfolio to be measured on the basis of the net position being managed if certain criteria are met;

Clarifies that the concepts of highest and best use and valuation premise in a fair value measurement are not relevant for most financial assets and financial liabilities;

Clarifies that the fair value of equity instruments classified in shareholders' equity and certain liabilities should be measured from the perspective of a market participant that holds the instrument as an asset;

Clarifies that the principal market should be determined based on the market with greatest volume and level of activity that a reporting entity can access, which is usually the market in which the reporting entity usually transacts;

Requires additional qualitative and quantitative disclosures around fair value measurements, including more information around Level 3 inputs.

ASU 2011-04 is effective prospectively during interim and annual periods beginning after December 15, 2011, with early adoption not permitted.

Nomura adopted ASU 2011-04 from January 1, 2012 and these amendments have not had a material impact on these consolidated financial statements.

See Note 2 *Fair value of financial instruments* for further information where the new disclosures have been provided.

Accounting for repurchase agreements and similar transactions

In April 2011, the FASB issued amendments to ASC 860 through issuance of ASU 2011-03 which modifies the effective control criterion related to when repurchase agreements and similar transactions are accounted for as secured financing transactions or sales. Prior to adoption of the ASU 2011-03, when assessing effective control, one of the conditions a transferor evaluated was the ability to repurchase or redeem the

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

financial assets even in the event of default of the transferee. This ability was demonstrated through obtaining cash or other collateral sufficient to fund substantially all of the cost to purchase replacement assets should the transferee fail to return the transferred asset. These amendments removed this condition and consequently, the level of cash collateral, haircuts and ongoing margining received by the transferor in a repurchase agreement or other similar agreement are now irrelevant in determining if it should be accounted for as a sale.

F-24

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ASU 2011-03 is effective prospectively during interim or annual periods beginning after December 15, 2011, with early adoption not permitted.

Nomura adopted ASU 2011-03 from January 1, 2012 and certain Japanese securities lending transactions undertaken after adoption date are now accounted for as secured borrowings rather than sales in these consolidated financial statements as the criteria for derecognition of the transferred financial assets under ASC 860 are no longer be met. The amounts of securities derecognized from the consolidated balance sheets under this type of securities lending transaction as of March 31, 2011 and as of March 31, 2012 were ¥291,870 million and ¥1,930 million, respectively.

Accounting for troubled debt restructurings

In April 2011, the FASB issued amendments to ASC 310 *Receivables* through issuance of Accounting Standard Update ASU 2011-02 *A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring* (ASU 2011-02). These amendments provide additional guidance and clarification to creditors in determining whether a debt restructuring constitutes a troubled debt restructuring.

ASU 2011-02 is effective for interim or annual periods beginning on or after June 15, 2011 and should be applied retrospectively to the beginning of the annual period of adoption.

As a result of issuance of ASU 2011-01 *Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20* , new disclosures around troubled debt restructuring required by ASU 2010-20 *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses* (ASU 2010-20) are also effective for interim or annual periods beginning on or after June 15, 2011.

Nomura adopted ASU 2011-02 from July 1, 2011 and these amendments have not had a material impact on these consolidated financial statements.

See Note 9 *Financing Receivables* for further information where the new disclosures have been provided.

Disclosure of supplementary pro forma information for business combinations

In December 2010, the FASB issued amendments to ASC 805 *Business Combinations* (ASC 805) through issuance of ASU 2010-29 *Disclosure of Supplementary Pro Forma Information for Business Combinations* (ASU 2010-29). These amendments address diversity in practice about the interpretation of the pro forma revenue and earnings disclosure requirements for business combinations. When a business combination has occurred, ASU 2010-29 requires a reporting entity such as Nomura that presents comparative financial statements to disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period. ASU 2010-29 also expands the supplemental pro forma disclosures under ASC 805 to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in reported pro forma revenue and earnings.

ASU 2010-29 is effective prospectively for business combinations occurring in fiscal years beginning on or after December 15, 2010 with early adoption permitted.

Nomura adopted ASU 2010-29 from April 1, 2011. Because the amendments only provide clarification on disclosure requirements, they have not had, and are not expected to have, a material impact on these consolidated financial statements.

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Clarifications on impairment testing of goodwill and other intangibles

In December 2010, the FASB issued amendments to ASC 350 *Intangibles Goodwill and Other* (ASC 350) through issuance of ASU 2010-28 *When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts* (ASU 2010-28). These amendments address questions about determination of the impairment of goodwill in certain narrow circumstances. Under ASC 350, testing for goodwill impairment is a two-step test conducted at a reporting unit level. When a goodwill impairment test is performed, a reporting entity must assess whether the carrying amount of a reporting unit exceeds its fair value (Step 1). If it does, a reporting entity must perform an additional test to determine whether goodwill has been impaired and to calculate the amount of that impairment (Step 2). ASU 2010-28 modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts by requiring performance of Step 2 of the test if it is more likely than not that a goodwill impairment exists. Upon adoption of the ASU 2010-28, a reporting entity with a reporting unit that has a carrying amount that is zero or negative is required to assess whether it is more likely than not that the reporting unit's goodwill is impaired.

ASU 2010-28 is effective prospectively for fiscal years, and interim periods within those years, beginning after December 15, 2010.

Nomura adopted ASU 2010-28 from April 1, 2011 and these amendments have not had a material impact on these consolidated financial statements.

Fair value measurement disclosures

In January 2010, the FASB issued amendments to ASC 820 through issuance of ASU 2010-06 *Improving Disclosures about Fair Value Measurements* (ASU 2010-06). These amendments expand fair value disclosure requirements, including a requirement that information about purchases, sales, issues and settlements of Level 3 instruments be provided on a gross basis.

The majority of the disclosure requirements of ASU 2010-06 were effective for interim or annual periods beginning after December 15, 2009, which for Nomura was the fourth quarter beginning January 1, 2010. Gross information on purchases, sales, issues and settlements is required in fiscal years beginning after December 15, 2010.

Nomura adopted these additional disclosure requirements within ASU 2010-06 from April 1, 2011. Because ASU 2010-06 only introduces new disclosures and does not impact upon how Nomura measures fair value, these amendments have not had a material impact on these consolidated financial statements.

See Note 2 *Fair value of financial instruments* for further information where the new disclosures have been provided.

Revenue recognition of multiple-deliverable revenue arrangements

In October 2009, the FASB issued amendments to ASC 605 *Revenue Recognition* through issuance of ASU 2009-13 *Multiple-Deliverable Revenue Arrangements-a consensus of the FASB Emerging Issues Task Force* (ASU 2009-13). These amendments revise the accounting for multiple-deliverable arrangements to enable vendors to account for products or services separately rather than as a combined unit.

ASU 2009-13 is effective prospectively from fiscal years beginning on or after June 15, 2010 with early adoption permitted.

Nomura adopted ASU 2009-13 from April 1, 2011 and these amendments have not had a material impact on these consolidated financial statements.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Future accounting developments

The following new accounting pronouncements relevant to Nomura will be adopted in future periods:

Disclosures about offsetting assets and liabilities

In December 2011, the FASB issued amendments to ASC 210-20 through issuance of ASU 2011-11 *Disclosures about Offsetting Assets and Liabilities* (ASU 2011-11). These amendments require a reporting entity to disclose information about rights of offset and related arrangements to enable users of its financial statements to understand the effect or potential effect of those arrangements on its financial position.

ASU 2011-11 is effective for fiscal years, and interim periods within those years, beginning on or after January 1, 2013 with required disclosures made retrospectively for all comparative periods presented.

Nomura will adopt ASU 2011-11 from April 1, 2013. Because these amendments only require enhanced disclosures rather than change the guidance around when assets and liabilities can be offset, they are not expected to have a material impact on these consolidated financial statements.

Goodwill impairment testing

In September 2011, the FASB issued amendments to ASC 350 through issuance of ASU 2011-08 *Testing Goodwill for Impairment* (ASU 2011-08). These amendments simplify goodwill impairment testing by permitting a reporting entity to initially assess qualitatively whether it is necessary to perform the current quantitative two-step goodwill impairment test required by ASC 350. If the reporting entity determines that it is not more-likely-than-not (i.e. greater than 50%) that a reporting unit's fair value is less than its carrying amount, the quantitative test is not required.

ASU 2011-08 is effective prospectively for goodwill impairment tests performed for fiscal years beginning after December 15, 2011 with early adoption permitted.

Nomura will adopt ASU 2011-08 from April 1, 2012. Because the amendments only simplify when a quantitative test is required rather than change either the level at which the test is performed or the quantitative test itself, these amendments are not expected to have a material impact on these consolidated financial statements.

Presentation of comprehensive income

In June 2011, the FASB issued amendments to ASC 220 *Comprehensive Income* (ASC 220) through issuance of ASU 2011-05 *Presentation of Comprehensive Income* (ASU 2011-05). These amendments revise the manner in which reporting entities present comprehensive income in their financial statements. The amendments remove certain presentation options in ASC 220 and require reporting entities to report components of comprehensive income in either a continuous statement of comprehensive income or two separate but consecutive statements.

ASU 2011-05 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011 with early adoption permitted.

In December 2011, the FASB issued ASU 2011-12 *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05* (ASU 2011-12) which deferred certain aspects of ASU 2011-05.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Nomura will adopt ASU 2011-05 from April 1, 2012 excluding those aspects that are deferred by ASU 2011-12. Because these amendments only change how comprehensive income is presented within these consolidated financial statements rather than changing whether an item must be reported in other comprehensive income or when an item of other comprehensive income is reclassified to earnings, these amendments are not expected to have a material impact on these consolidated financial statements.

2. Fair value of financial instruments:**The fair value of financial instruments**

A significant amount of Nomura's financial instruments are carried at fair value. Financial assets carried at fair value on a recurring basis are reported in the consolidated balance sheets within *Trading assets and private equity investments, Loans and receivables, Collateralized agreements and Other assets*. Financial liabilities carried at fair value on a recurring basis are reported within *Trading liabilities, Short-term borrowings, Payables and deposits, Collateralized financing, Long-term borrowings and Other liabilities*.

Other financial assets and financial liabilities are measured at fair value on a nonrecurring basis, where the primary measurement basis is not fair value but where fair value is used in specific circumstances after initial recognition, such as to measure impairment.

In all cases, fair value is determined in accordance with ASC 820 which defines fair value as the amount that would be exchanged to sell a financial asset or transfer a financial liability in an orderly transaction between market participants at the measurement date. It assumes that the transaction occurs in Nomura's principal market, or in the absence of the principal market, the most advantageous market for the relevant financial assets or financial liabilities.

Fair value is usually determined on an individual financial instrument basis consistent with the unit of account of the financial instrument. However, certain financial instruments managed on a portfolio basis are valued as a portfolio, namely based on the price that would be received to sell a net long position (i.e. a net financial asset) or transfer a net short position (i.e. a net financial liability) consistent with how market participants would price the net risk exposure at the measurement date.

Financial assets carried at fair value also include investments in certain funds where, as a practical expedient, fair value is determined on the basis of net asset value per share (NAV per share) if the NAV per share is calculated in accordance with certain industry standard principles.

Increases and decreases in the fair value of assets and liabilities will significantly impact Nomura's position, performance, liquidity and capital resources. As explained below, valuation techniques applied contain inherent uncertainties and Nomura is unable to predict the accurate impact of future developments in the market. Where appropriate, Nomura uses economic hedging strategies to mitigate its risk, although these hedges are also subject to unpredictable movements in the market.

Valuation methodology for financial instruments carried at fair value on a recurring basis

The fair value of financial instruments is based on quoted market prices including market indices, broker or dealer quotations or an estimation by management of the expected exit price under current market conditions. Various financial instruments, including cash instruments and over-the-counter (OTC) contracts, have bid and offer prices that are observable in the market. These are measured at the point within the bid-offer range which best represents Nomura's estimate of fair value. Where quoted market prices or broker or dealer quotations are not available, prices for similar instruments or valuation pricing models are considered in the determination of fair value.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Where quoted prices are available in active markets, no valuation adjustments are taken to modify the fair value of assets or liabilities marked using such prices. Other instruments may be measured using valuation techniques, such as valuation pricing models incorporating observable parameters, unobservable parameters or a combination of both. Valuation pricing models use parameters which would be considered by market participants in valuing similar financial instruments.

Valuation pricing models and their underlying assumptions impact the amount and timing of unrealized and realized gains and losses recognized, and the use of different valuation pricing models or underlying assumptions could produce different financial results. Valuation uncertainty results from a variety of factors, including the valuation technique or model selected, the quantitative assumptions used within the valuation model, the inputs into the model, as well as other factors. Valuation adjustments are used to reflect the assessment of this uncertainty. Common valuation adjustments include model reserves, credit adjustments, close-out adjustments, and other appropriate instrument-specific adjustments, such as those to reflect transfer or sale restrictions.

The level of adjustments is largely judgmental and is based on an assessment of the factors that management believe other market participants would use in determining the fair value of similar financial instruments. The type of adjustments taken, the methodology for the calculation of these adjustments, and the inputs for these calculations are reassessed periodically to reflect current market practice and the availability of new information.

For example, the fair value of certain financial instruments includes adjustments for credit risk; both with regards to counterparty credit risk on positions held and Nomura's own creditworthiness on positions issued. Credit risk on financial assets is significantly mitigated by credit enhancements such as collateral and netting arrangements. Any net credit exposure is measured using available and applicable inputs for the relevant counterparty. The same approach is used to measure the credit exposure on Nomura's financial liabilities as is used to measure counterparty credit risk on Nomura's financial assets.

Such valuation pricing models are calibrated to the market on a regular basis and inputs used are adjusted for current market conditions and risks. The global risk management unit reviews pricing models and assesses model appropriateness and consistency independently of the front office. The model reviews consider a number of factors about a model's suitability for valuation and sensitivity of a particular product. Valuation models are calibrated to the market on a periodic basis by comparison to observable market pricing, comparison with alternative models, and analysis of risk profiles.

As explained above, any changes in fixed income, equity, foreign exchange and commodity markets can impact Nomura's estimates of fair value in the future, potentially affecting trading gains and losses. Where financial contracts have longer maturity dates, Nomura's estimates of fair value may involve greater subjectivity due to the lack of transparent market data.

Fair value hierarchy

All financial instruments measured at fair value, including those carried at fair value using the fair value option, have been categorized into a three-level hierarchy (the fair value hierarchy) based on the transparency of valuation inputs used by Nomura to estimate fair value. A financial instrument is classified in the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement of the financial instrument. The three levels of the fair value hierarchy are defined as follows, with Level 1 representing the most transparent inputs and Level 3 representing the least transparent inputs:

Level 1:

Unadjusted quoted prices for identical financial instruments in active markets accessible by Nomura at the measurement date.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Level 2:

Quoted prices in inactive markets or prices containing other inputs which are observable, either directly or indirectly. Valuation techniques using observable inputs reflect assumptions used by market participants in pricing financial instruments and are based on data obtained from independent market sources at the measurement date.

Level 3:

Unobservable inputs that are significant to the fair value measurement of the financial instrument. Valuation techniques using unobservable inputs reflect management's assumptions about the estimates used by other market participants in valuing similar financial instruments. These valuation techniques are developed based on the best available information at the measurement date.

The availability of inputs observable in the market varies by product and can be affected by a variety of factors. Significant factors include, but are not restricted to the prevalence of similar products in the market, especially for customized products, how established the product is in the market, for example, whether it is a new product or is relatively mature, and the reliability of information provided in the market which would depend, for example, on the frequency and volume of current data. A period of significant change in the market may reduce the availability of observable data. Under such circumstances, financial instruments may be reclassified into a lower level in the fair value hierarchy.

Significant judgments used in determining the classification of financial instruments include the nature of the market in which the product would be traded, the underlying risks, the type and liquidity of market data inputs and the nature of observed transactions for similar instruments.

Where valuation models include the use of parameters which are less observable or unobservable in the market, significant management judgment is used in establishing fair value. The valuations for Level 3 financial instruments, therefore, involve a greater degree of judgment than those valuations for Level 1 or Level 2 financial instruments.

Certain criteria management use to determine whether a market is active or inactive include the number of transactions, the frequency that pricing is updated by other market participants, the variability of price quotes among market participants, and the amount of publicly available information.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following tables present the amounts of Nomura's financial instruments measured at fair value on a recurring basis as of March 31, 2011 and 2012 within the fair value hierarchy. Certain reclassifications of amounts as of March 31, 2011 have been made to align with the current year presentation.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

- (1) Represents the amount offset under counterparty netting of derivative assets and liabilities as well as cash collateral netting against net derivatives.
- (2) Includes investments in certain funds measured at fair value on the basis of NAV per share as a practical expedient.
- (3) Includes equity investments that would have been accounted for under the equity method had Nomura not chosen to elect the fair value option.
- (4) Includes collateralized loan obligations (CLO) and asset-backed securities (ABS) such as those secured on credit card loans, auto loans and student loans.
- (5) Each derivative classification includes derivatives referencing multiple risk components. For example, interest rates contracts include complex derivatives referencing interest rate risk as well as foreign exchange risk or other factors such as prepayment rates. Credit contracts include credit default swaps as well as derivatives referencing corporate and government securities.
- (6) Includes loans for which the fair value option is elected.
- (7) Includes collateralized agreements or collateralized financing for which the fair value option is elected.
- (8) Includes structured notes for which the fair value option is elected.
- (9) Includes embedded derivatives bifurcated from deposits received at banks. If unrealized gains are greater than unrealized losses, deposits are reduced by the excess amount.
- (10) Includes embedded derivatives bifurcated from issued structured notes. If unrealized gains are greater than unrealized losses, borrowings are reduced by the excess amount.
- (11) Includes liabilities recognized from secured financing transactions that are accounted for as financings rather than sales. Nomura elected the fair value option for these liabilities.

Valuation techniques by major class of financial instrument

The valuation techniques used by Nomura to estimate fair value for major classes of financial instruments, together with the significant inputs which determine classification in the fair value hierarchy, are as follows:

Equities Equities include direct holdings of both listed and unlisted equity securities, and fund investments. Listed equity securities are valued using quoted prices for identical securities from active markets where available. These valuations should be in line with market practice and therefore can be based on bid/offer prices as applicable or mid-market prices. Nomura determines whether the market is active depending on the sufficiency and frequency of trading activity. Where these securities are classified in Level 1 of the fair value hierarchy, no valuation adjustments are made to fair value. Listed equities traded in inactive markets are valued using the exchange price as adjusted to reflect liquidity and bid offer spreads and are classified in Level 2. Unlisted equity securities are valued using the same methodology as private equity investments described below and are usually classified as Level 3 because of the management judgment involved. As a practical expedient, fund investments are generally valued using NAV per share where available. Publicly traded mutual funds which are valued using a daily NAV per share are classified as Level 1. Investments in funds where Nomura has the ability to redeem its investment with the investee at NAV per share as of the balance sheet date or within the near term are classified as Level 2. Investments in funds where Nomura does not have the ability to redeem in the near term or does not know when it can redeem are classified as Level 3. The Direct Capitalization Method (DCM) is used as a valuation technique for certain equity investments in real estate funds, with net operating income used as a measure of financial performance which is then applied to a capitalization rate dependent on the characteristics of the underlying real estate. Equity investments which are valued using DCM valuation techniques are generally classified as Level 3 since observable market capitalization rates are usually not available for identical or sufficiently similar real estate to that held within the real estate funds being valued.

Private equity The valuation of unlisted private equity investments requires significant management judgment because the investments, by their nature, have little or no price transparency. Private equity investments are initially carried at cost as an approximation of fair value. Adjustments to carrying value are made if there is third-party evidence of a change in value. Adjustments are also made, in the absence of third-party transactions, if it is determined that the expected exit price of the investment is different from carrying value. In reaching that determination, Nomura primarily uses either a discounted cash flow (DCF) valuation techniques which incorporates estimated future cash flows to be generated from the underlying investment, discounted at a weighted average cost of capital (WACC) or comparable market multiple valuation techniques such as

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Enterprise Value/earnings before interest, taxes, depreciation and amortization ratios, (EV/EBITDA ratios), Price/Earnings ratios (PE ratios), Price/Embedded Value ratios and other multiples based on relationships between numbers reported in the financial statements and the price of comparable companies. Where possible these valuations are compared with the operating cash flows and financial performance of the companies or properties relative to budgets or projections, price/earnings data for similar quoted companies, trends within sectors and/or regions and any specific rights or terms associated with the investment, such as conversion features and liquidation preferences. Private equity investments are generally classified as Level 3 since the valuation inputs such as those mentioned above are usually unobservable or there is significant uncertainty.

Government, state, municipal and agency securities Japanese and other G7 government securities are valued using quoted market prices, broker or dealer quotations, or alternative pricing sources. These securities are traded in active markets and therefore are classified within Level 1 of the fair value hierarchy. Non-G7 government securities, agency securities and municipal securities are valued using similar pricing sources but are generally classified as Level 2 as they are traded in markets that are not considered to be active. Certain non-G7 securities may be classified as Level 1 because they trade in active markets. Certain securities may be classified as Level 3 because they trade infrequently and there is not sufficient information from comparable securities to classify them as Level 2. These are valued using DCF valuation techniques which include unobservable inputs such as credit spreads of the issuer.

Corporate debt securities The valuation of corporate debt securities is primarily performed using internal models and market inputs such as price quotes and recent market transactions of identical or similar debt, yield curves, asset swap spreads and credit default spreads. Most corporate debt securities are classified in Level 2 because the modeling inputs are usually observable. Certain corporate debt securities may be classified as Level 1 because they trade in active markets where there is sufficient information from a liquid exchange or multiple sources and they are valued using an unadjusted quote for an identical instrument. Certain securities may be classified as Level 3 because they trade infrequently and there is insufficient information from comparable securities to classify them as Level 2. These are valued using DCF valuation techniques which include unobservable inputs such as credit spreads of the issuer.

Commercial mortgage-backed securities (CMBS) and Residential mortgage-backed securities (RMBS) The fair value of CMBS and RMBS is estimated using quoted market prices, recent market transactions or by reference to a comparable market index. CMBS and RMBS securities are classified primarily as Level 2 if all significant inputs are observable. For certain asset classes, no direct pricing sources or comparable indices are available and valuation is based on a combination of indices. These securities are valued using DCF valuation techniques which include unobservable inputs such as yields, prepayment rates, default probabilities and loss severities and are classified as Level 3.

Mortgage and other mortgage-backed securities The fair value of other mortgage-backed securities is estimated using quoted market prices, recent market transactions or by reference to a comparable market index. Where all significant inputs are observable, the securities will be classified as Level 2. For certain securities, no direct pricing sources or comparable securities or indices may be available. These securities are valued using DCF or DCM valuation techniques and are classified as Level 3 as the valuation includes unobservable valuation inputs such as yields, prepayment rates, default probabilities, loss severities and capitalization rates.

Collateralized debt obligations (CDO) and other CDOs are valued using internal models where quoted market prices do not exist. Key inputs used by the model include market spread data for each credit rating, prepayment rates, loss severities and default probabilities. Where all significant inputs are observable, the securities will be classified as Level 2. Since some of these inputs are unobservable, certain CDOs are classified as Level 3 where the unobservable inputs are significant.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Investment trust funds and other Investment trust funds are generally valued using NAV per share. Publicly traded funds which are valued using a daily NAV per share are classified as Level 1. For funds that are not publicly traded but Nomura has the ability to redeem its investment with the investee at NAV per share on the balance sheet date or within the near term, the investments are classified as Level 2. Investments where Nomura does not have the ability to redeem in the near term or does not know when it can redeem are classified as Level 3.

Derivatives Exchange-traded derivatives are usually valued using unadjusted quoted market prices and are therefore classified as Level 1. Where exchange-traded derivatives are not valued at the exchange price due to timing differences, these are classified as Level 2. OTC derivatives are valued by internal models using market transactions and other market evidence whenever possible, including market-based inputs to models, model calibration to market clearing transactions, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. Valuation techniques include simple DCF techniques, Black-Scholes and Monte Carlo simulations. For OTC derivatives that trade in liquid markets, such as plain vanilla forwards, swaps and options, model inputs can generally be verified and model selection does not involve significant management judgment. OTC derivatives are classified within Level 2 of the fair value hierarchy when all of the significant inputs can be corroborated to market evidence. Derivatives that are valued using models with significant unobservable inputs such as correlation, long-dated volatility, credit curves or other unobservable inputs are classified within Level 3. Examples of derivatives classified as Level 3 by Nomura include exotic interest rate derivatives, exotic foreign exchange derivatives, exotic equity derivatives, exotic derivatives including a combination of interest rate, foreign exchange and equity risks and certain other transactions including long-dated or exotic credit derivatives. Valuation adjustments are recorded to model valuations which do not calibrate to market and consider all factors that would impact fair value including bid offer, liquidity and credit risk; both with regards to counterparty credit risk on derivative assets and Nomura's own creditworthiness on derivative liabilities. During the year ended March 31, 2012, Nomura began using the Overnight Indexed Swap (OIS) curve rather than the London Interbank Offered Rate (LIBOR) curve to estimate the fair value of certain collateralized interest rate, credit and foreign exchange derivative contracts. Nomura believes using an OIS rather than LIBOR curve is more representative of how market participants in the principal market for these derivatives would determine fair value. The impact of this change on the fair value measurements applied to these derivatives was not significant.

Loans Loans carried at fair value either as trading assets or through election of the fair value option are valued primarily through internal models using similar inputs to corporate debt securities as quoted prices are usually not available. Where there are no significant inputs which are unobservable, loans are classified as Level 2. Certain loans, however, may be classified as Level 3 because they are traded infrequently and there is not sufficient information from comparable securities to classify them as Level 2.

Collateralized agreements and Collateralized financing Resale and repurchase agreements carried at fair value through election of the fair value option are valued using DCF valuation techniques. Key inputs include expected future cash flows, interest rates and collateral funding spreads such as general collateral or special rates. Resale and repurchase agreements are generally classified in Level 2 of the fair value hierarchy as unobservable inputs are not significant. Where the unobservable inputs are significant, they will be classified in Level 3.

Non-trading debt securities These are debt securities held by certain non-trading subsidiaries in the group and are valued and classified in the fair value hierarchy using the same valuation techniques used for other debt securities classified as *government, agency and municipal bonds* and *bank and corporate debt securities* described above.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Short-term and long-term borrowings (Structured notes) Structured notes are debt securities issued by Nomura which contain embedded features that alter the return to the investor from simply receiving a fixed or floating rate of interest to a return that depends upon some other variables, such as an equity or equity index, commodity price, foreign exchange rate, credit rating of a third party or a more complex interest rate. The fair value of structured notes is estimated using a quoted price in an active market for the identical liability if available, and where not available, using a mixture of valuation techniques that use the quoted price of the identical liability when traded as an asset, quoted prices for similar liabilities, similar liabilities when traded as assets, and also the amount at the measurement date that Nomura would pay to transfer the identical liability or would receive if the identical liability is entered at the measurement date. The fair value of structured notes includes an adjustment to reflect Nomura's own creditworthiness. This adjustment can differ depending on the market in which the structured note is issued and traded. Structured notes are generally classified in Level 2 of the fair value hierarchy as unobservable inputs are not significant. Where the unobservable inputs are significant, they will be classified in Level 3.

Long-term borrowings (Secured financing transactions) Secured financing transactions are liabilities recognized when a transfer of a financial asset does not meet the criteria for sales accounting under ASC 860 and therefore the transaction is accounted for as a secured borrowing. These liabilities are valued using the same valuation techniques that are applied to the transferred financial assets which remain on the consolidated balance sheets and are therefore classified in the same level in the fair value hierarchy as the transferred financial assets. These liabilities do not provide general recourse to Nomura and therefore no adjustment is made to reflect Nomura's own creditworthiness.

Valuation processes

In order to ensure the appropriateness of any fair value measurement of a financial instrument used within these consolidated financial statements including those classified as Level 3 within the fair value hierarchy, Nomura operates a governance framework which mandates determination or validation of a fair value measurement by control and support functions independent of the trading businesses assuming the risk of the financial instrument. Such functions within Nomura with direct responsibility for either defining, implementing or maintaining valuation policies and procedures are as follows:

The Product Control Valuations Group (PCVG) within Nomura's Finance Department has primary responsibility for determining and implementing valuation policies and procedures in connection with determination of fair value measurements. In particular, this group will ensure that valuation policies are documented for each type of financial instrument in accordance with U.S. GAAP. While it is the responsibility of market makers and investment professionals in our trading businesses to price our financial instruments, the PCVG are responsible for independently verifying or validating these prices. In the event of a difference in opinion or where the estimate of fair value requires judgment, the valuation used within these consolidated financial statements is made by senior managers independent of the trading businesses. The group reports to the Global Head of Product Control and ultimately to the Chief Financial Officer (CFO);

The Accounting Policy Group within Nomura's Finance Department defines the group's accounting policies and procedures in accordance with U.S. GAAP, including those associated with determination of fair value under ASC 820 and other relevant U.S. GAAP pronouncements. This group reports to the Global Head of Accounting Policy and ultimately to the CFO; and

The Global Model Validation Group (MVG) within Nomura's Risk Management Department validates the appropriateness and consistency of pricing models used to determine fair value measurements independently of those who design and build the models. The group reports to the Global Head of Market and Quantitative Risk.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The fundamental components of this governance framework over valuation processes within Nomura particularly around Level 3 financial instruments are the procedures in place around independent price verification, pricing model validation and revenue substantiation.

Independent price verification processes

The key objective of the independent price verification processes within Nomura is to verify the appropriateness of fair value measurements applied to all financial instruments within Nomura. In applying these control processes, observable inputs are used whenever possible and when unobservable inputs are necessary, the processes seek to ensure the valuation technique and inputs are appropriate, reasonable and consistently applied.

The independent price verification processes aim to verify the fair value of all positions to external levels on a regular basis. The process will involve obtaining data such as trades, marks and prices from internal and external sources and examining the impact of marking the internal positions at the external prices. Margin disputes within the collateral process will also be investigated to determine if there is any impact on valuations.

Where third-party pricing information sourced from brokers, dealers and consensus pricing services is used as part of the price verification process, consideration is given as to whether that information reflects actual recent market transactions or prices at which transactions involving identical or similar financial instruments are currently executable. If such transactions or prices are not available, the financial instrument will generally be classified as Level 3.

Where there is a lack of observable market information around the inputs used in a fair value measurement then the PCVG and the MVG will assess the inputs used for reasonableness considering available information including comparable products, surfaces, curves and past trades. Additional valuation adjustments may be taken for the uncertainty in the inputs used, such as correlation and where appropriate trading desks may be asked to execute trades to evidence market levels.

Model review and validation

For more complex financial instruments pricing models are used to determine fair value measurements. The MVG performs an independent model approval process which incorporates a review of the model assumptions across a diverse set of parameters. Considerations include:

Scope of the model (different financial instruments may require different but consistent pricing approaches);

Mathematical and financial assumptions;

Full or partial independent benchmarking along with boundary and stability tests, numerical convergence, calibration quality and stability

Model integration within Nomura's trading and risk systems;

Calculation of risk numbers and risk reporting; and

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Hedging strategies/practical use of the model.

New models are reviewed and approved by the MVG. The frequency of subsequent reviews is generally based on the model risk rating and the materiality of usage of the model with more frequent review where warranted by market conditions.

F-37

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Revenue substantiation*

Nomura's Product Control function also ensures adherence to Nomura's valuation policies through daily and periodic analytical review of net revenues. This process involves substantiating revenue amounts through explanations and attribution of revenue sources based on the underlying factors such as interest rates, credit spreads, volatility, foreign exchange rates etc. In combination with the independent price verification processes, this daily, weekly, monthly and quarterly review substantiates the revenues made while helping to identify and resolve potential booking, pricing or risk quantification issues.

Level 3 financial instruments

As described above, the valuation of Level 3 financial assets and liabilities is dependent on certain significant inputs which cannot be observed in the market. Common characteristics of an inactive market include a low number of transactions of the financial instrument, stale or non-current price quotes, price quotes that vary substantially either over time or among market makers, or little publicly released information.

If corroborative evidence is not available to value Level 3 financial instruments, fair value may be established using other equivalent products in the market. The level of correlation between the specific Level 3 financial instrument and the available benchmark instrument is considered as an unobservable parameter. Other techniques for determining an appropriate value for unobservable parameters may consider information such as consensus pricing data among certain market participants, historical trends, extrapolation from observable market data and other information Nomura would expect market participants to use in valuing similar instruments.

Use of reasonably possible alternative input assumptions to value Level 3 financial instruments will significantly influence fair value determination. Ultimately, the uncertainties described above about input assumptions imply that the fair value of Level 3 financial instruments is a judgmental estimate. The specific valuation for each instrument is based on management's judgment of prevailing market conditions, in accordance with Nomura's established valuation policies and procedures.

During the year ended March 31, 2012, a lack of liquidity continues to persist in certain classes of financial instrument which have impacted the observability of certain inputs which are significant to Nomura's financial instrument valuations. These inputs include those listed below.

Quantitative information regarding significant unobservable inputs and assumptions

The following table presents information about the significant unobservable inputs and assumptions used by Nomura for certain Level 3 financial instruments as of March 31, 2012.

Financial Instrument	Fair value in billions of yen	Valuation technique(s)	March 31, 2012

(1) Valuation technique(s) and unobservable inputs represent those of non-trading equity securities which are reported in *Other assets*.

Sensitivity of fair value to changes in unobservable inputs

For each class of financial instrument described in the above table, changes in the each of the significant unobservable inputs and assumptions used by Nomura will impact upon the determination of a fair value measurement for the financial instrument. The sensitivity of these Level 3 fair value measurements to changes in unobservable inputs and interrelationships between those inputs are described below:

Equities, Private equity and non-trading equity securities included in *Other assets* When using DCF valuation techniques to determine fair value, a significant increase (decrease) in credit spreads or liquidity discount in isolation would result in a significantly lower (higher) fair value measurement. Conversely, a significant increase (decrease) in operating margin or growth rate would result in a corresponding significantly higher (lower) fair value measurement. There is little interrelationship between these measures. When using market multiples to determine fair value, a significant increase (decrease) in the relevant multiples such as PE ratios, EV/EBITDA ratios, Price/Book ratios, Price/Embedded Value ratios in isolation would result in a higher (lower) fair value measurement. Conversely, a significant increase (decrease) in the liquidity discount applied to the holding in isolation would result in a significantly lower (higher) fair value measurement. Generally changes in assumptions around multiples result in a corresponding similar directional change in a fair value measurement, assuming earnings levels remain constant. When using DCM, a significant increase (decrease) in the capitalization rate would result in a significantly lower (higher) fair value measurement.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Japanese agency and municipal securities, Foreign government, agency and municipal securities, Bank and corporate debt securities and loans for trading purposes, Loans and receivables and Non-trading debt securities Significant increases (decreases) in the credit spreads used in a DCF valuation technique would result in a significantly lower (higher) fair value measurement.

Commercial mortgage-backed securities (CMBS), Residential mortgage-backed securities (RMBS), Mortgage and other mortgage-backed securities and Collateralized debt obligations (CDO) and other Significant increases (decreases) in yields, prepayment rates, default probabilities and loss severities in isolation would result in a significantly lower (higher) fair value measurement. Generally, a change in default probabilities is accompanied by a directionally similar change loss severities and a directionally opposite change prepayment rates. When using DCM, a significant increase (decrease) in the capitalization rate would result in a significantly lower (higher) fair value measurement.

Investment trust funds and other Significant increases (decreases) in credit spreads used in a DCF valuation technique would result in a significantly lower (higher) fair value measurement, while significant increases (decreases) in correlation would result in a significantly higher (lower) fair value measurement.

Derivatives Where Nomura is long the underlying risk of a derivative, significant increases (decreases) in the underlying of the derivative, such as interest rates, credit spreads or forward FX rates in isolation or of significant decreases (increases) in dividend yields would result in a significantly higher (lower) fair value measurement. Where Nomura is short the underlying risk of a derivative, the impact of these changes would have a converse effect on the fair value measurements reported by Nomura. Where Nomura is long optionality, recovery rates or correlation, significant increases (decreases) in volatilities, recovery rates or correlation will generally result in a significantly higher (lower) fair value measurement. Where Nomura is short optionality, recovery rates or correlation, the impact of these changes would have a converse effect on the fair value measurements.

Long-term borrowings Significant increases (decreases) in yields, prepayment rates, default probabilities, and loss severities in isolation would result in a significantly lower (higher) fair value measurement. Generally, a change in default probabilities is accompanied by a directionally similar change in the assumption used for loss severities and a directionally opposite change in prepayment rates. Where Nomura is long optionality or correlation, significant increases (decreases) in volatilities or correlation will generally result in a significantly higher (lower) fair value measurement. Where Nomura is short optionality or correlation, the impact of these changes would have a converse effect on the fair value measurements.

Movements in Level 3 financial instruments

The following tables present gains and losses as well as increases and decreases of financial instruments measured at fair value on a recurring basis which Nomura classified as Level 3 for the years ended March 31, 2011 and 2012. Financial instruments classified as Level 3 are often hedged with instruments within Level 1 or Level 2 of the fair value hierarchy. The gains or losses presented below do not reflect the offsetting gains or losses for these hedging instruments. Level 3 financial instruments are also measured using both observable and unobservable inputs. Fair value changes presented below, therefore, reflect realized and unrealized gains and losses resulting from movements in both observable and unobservable parameters.

For the year ended March 31, 2012, gains and losses related to Level 3 assets did not have a material impact on Nomura's liquidity and capital resources management.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following tables in this note that relate to the year ended March 31, 2011 are prepared in accordance with the disclosure requirements in effect prior to certain amendments to ASC 820 that Nomura adopted during the year ended March 31, 2012.

	Billions of yen Year ended March 31, 2011

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

- (3) Includes the effect from the application of ASC 810 which has been amended in accordance with ASU No. 2009-17 *Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities* (ASU 2009-17) and ASU No. 2009-16 *Accounting for Transfers of Financial Assets* .
- (4) If financial instruments move from Level 3 to another Level or move from another Level to Level 3, the amount reported in *Net transfers in / (out of) Level 3, Transfers into Level 3* and *Transfers out of Level 3* are the fair value as of the beginning of the quarter during which the movement occurs. Therefore if financial instruments move from another Level to Level 3 all gains/ (losses) during the quarter are included in the table and if financial instruments move from Level 3 to another Level all gains/ (losses) during the quarter are excluded from the table.
- (5) Each derivative classification includes derivatives referencing multiple risk components. For example, interest rate contracts include complex derivatives referencing interest rate risk as well as foreign exchange risk or other factors such as prepayments speeds. Credit contracts include credit default swaps as well as derivatives referencing corporate and government securities.
- (6) Includes gains and losses reported mainly within *Net gain on trading, Gain on private equity investments*, and also within *Gain (loss) on investments in equity securities, Revenue Other* and *Non-interest expenses Other, Interest and dividends* and *Interest expense* in the consolidated statements of income.
- (7) Amounts reported in *Purchases / issues* include increases in trading liabilities while *Sales / redemptions* include decreases in trading liabilities.

Unrealized gains and losses recognized for Level 3 financial instruments

The following tables present the amounts of unrealized gains (losses) for the years ended March 31, 2011 and 2012, relating to those financial instruments which Nomura classified as Level 3 within the fair value hierarchy and that were still held by Nomura at the relevant consolidated balance sheet date:

F-45

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Transfers between levels of the fair value hierarchy**

Nomura assumes that all transfers of financial instruments from one level to another level within the fair value hierarchy occur at the beginning of the relevant quarter in which the transfer takes place. Amounts reported below therefore represent the fair value of the financial instruments at the beginning of the relevant quarter when the transfer was made.

Transfers between Level 1 and Level 2

For the year ended March 31, 2011 and for the nine months ended December 31, 2011, there were no significant transfers between Level 1 and Level 2.

For the three months ended March 31, 2012, a total of ¥115 billion of financial assets (excluding derivative assets) were transferred from Level 1 to Level 2. This comprised primarily ¥113 billion of equities reported within *Trading assets and private equity investments Equities* which were transferred because the observable markets in which these instruments are traded became inactive. During the same period, a total of ¥180 billion of financial liabilities (excluding derivative liabilities) were transferred from Level 1 to Level 2. This also comprised primarily ¥171 billion of short sales of equities reported within *Trading liabilities* which were transferred because the observable markets in which these instruments were traded became inactive.

For the three months ended March 31, 2012, a total of ¥12 billion of financial assets (excluding derivative assets) were transferred from Level 2 to Level 1. This comprised primarily ¥7 billion of equities reported within *Trading assets and private equity investments Equities* which were transferred because the observable markets in which these instruments are traded became active. During the same period, a total of ¥7 billion of financial liabilities (excluding derivative liabilities) were transferred from Level 2 to Level 1. This also comprised primarily ¥7 billion of short sales of equities reported within *Trading liabilities* which were transferred because the observable markets in which these instruments were traded became active.

Transfers out of Level 3

For the year ended March 31, 2011, approximately ¥43 billion of *Trading assets and private equity investments Bank and corporate debt securities and loans for trading purposes* was transferred out of Level 3 as certain market parameters became observable. For nine months ended December 31, 2011, there were no significant transfers out of Level 3.

For the three months ended March 31, 2012, a total of ¥25 billion of financial assets (excluding derivative assets) were transferred out of Level 3. This comprised primarily ¥16 billion of *Bank and corporate debt securities and loans for trading purposes*, principally debt securities and loans, which were transferred because credit spreads became observable. During the same period, a total of ¥ 48 billion of financial liabilities (excluding derivative liabilities) were transferred out of Level 3. This comprised primarily ¥48 billion of *Long-term borrowings*, principally structured notes, which were transferred because certain volatility and correlation became observable.

A total of ¥21 billion of net derivative contracts were also transferred out of Level 3. This comprised primarily ¥19 billion of interest rate contracts which were transferred because certain volatility and correlation inputs became observable.

Transfers into Level 3

For the year ended March 31, 2011 and for the nine months ended December 31, 2011, there were no significant transfers into Level 3.

For the three months ended March 31, 2012, a total of ¥15 billion of financial assets (excluding derivative assets) were transferred into Level 3. This comprised primarily ¥9 billion of *Bank and corporate debt securities and loans for*

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

trading purposes, principally debt securities, which were transferred because credit spreads became unobservable. The amount of gains and losses on these transfer reported in *Bank and corporate debt securities and loans for trading purposes* which were recognized in the quarter when the transfer into Level 3 occurred were not significant.

During the same period, a total of ¥1 billion of financial liabilities (excluding derivative liabilities) were transferred into Level 3. The amount of gains and losses on these transfer reported in financial liabilities which were recognized in the quarter when the transfer into Level 3 occurred were not significant.

A total of ¥34 billion of net derivative contracts were also transferred into Level 3. This comprised primarily ¥14 billion of interest rate contracts which were transferred because certain volatility and correlation inputs became unobservable and ¥21 billion of credit contracts which were transferred because certain credit spreads, recovery rates, volatility and correlation inputs became unobservable. Losses on these interest rate and credit contracts which were recognized in the quarter when the transfer into Level 3 occurred were ¥5 billion and ¥2 billion, respectively.

Investments in investment funds that calculate NAV per share

In the normal course of business, Nomura invests in non-consolidated funds which meet the definition of investment companies or are similar in nature and which do not have readily determinable fair values. For certain of these investments, Nomura uses NAV per share as the basis for valuation as a practical expedient. Some of these investments are redeemable at different amounts from NAV per share.

The following table presents information on these investments where NAV per share is calculated or disclosed as of March 31, 2011 and March 31, 2012. Investments are presented by major category relevant to the nature of Nomura's business and risks.

	Fair value ⁽¹⁾	Unfunded commitments ⁽²⁾	Billions of yen March 31, 2011 Redemption frequency (if currently eligible) ⁽³⁾	Redemption notice period ⁽⁴⁾
Hedge funds	¥ 91	¥ 0	Weekly/Monthly	Same day-95 days
Venture capital funds	2	0		
Private equity funds	64	23	Quarterly	30 days
Real estate funds	8	15		
Total	¥ 165	¥ 38		

	Fair value ⁽¹⁾	Unfunded commitments ⁽²⁾	Billions of yen March 31, 2012 Redemption frequency (if currently eligible) ⁽³⁾	Redemption notice period ⁽⁴⁾
Hedge funds	¥ 109	¥ 0	Monthly	Same day-95 days
Venture capital funds	4	1		
Private equity funds	61	12	Quarterly	30 days
Real estate funds	11	15		
Total	¥ 185	¥ 28		

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

- (1) Fair value generally determined using NAV per share as a practical expedient.
- (2) The contractual amount of any unfunded commitments Nomura is required to make to the entities in which the investment is held.
- (3) The range in frequency with which Nomura can redeem investments.
- (4) The range in notice period required to be provided before redemption is possible.

F-47

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Hedge funds:

These investments include funds of funds that invest in multiple asset classes. Nomura has developed the business of issuing structured notes linked to hedge funds. As a result, most of the risks are transferred as pass-through. The fair values of these investments are estimated using the NAV per share of the investments. Although most of these funds can be redeemed within six months, certain funds cannot be redeemed within six months due to contractual, liquidity or gating issues. The redemption period cannot be estimated for certain suspended or liquidating funds. Some of these investments contain restrictions against transfers of the investments to third parties.

Venture capital funds:

These investments include primarily start-up funds. The fair values of these investments in this category are estimated using the NAV per share of the investments. Most of these funds cannot be redeemed within six months. The redemption period cannot be estimated for certain suspended or liquidating funds. These investments contain restrictions against transfers of the investments to third parties.

Private equity funds:

These investments are made mainly in various sectors in Europe, United States and Japan. The fair values of these investments in this category are estimated using the NAV per share. Redemption is restricted for most of these investments. Some of these investments contain restrictions against transfers of the investments to third parties.

Real estate funds:

These are investments in commercial and other types of real estate. The fair values of these investments in this category are estimated using the NAV per share of the investments. Redemption is restricted for most of these investments. These investments contain restrictions against transfers of the investments to third parties.

Fair value option for financial assets and financial liabilities

Nomura carries certain eligible financial assets and liabilities at fair value through the election of the fair value option permitted by ASC 815 and ASC 825. When Nomura elects the fair value option for an eligible item, changes in that item's fair value are recognized in the consolidated statements of income. Election of the fair value option is generally irrevocable unless an event that gives rise to a new basis of accounting for that instrument occurs.

The financial assets and financial liabilities primarily elected for the fair value option by Nomura, and the reasons for the election, are as follows:

Equity method investments reported within *Trading assets and private equity investments* held for capital appreciation or current income purposes which Nomura generally has an intention to exit rather than hold indefinitely. Nomura elects the fair value option to more appropriately represent the purpose of these investments in these consolidated financial statements.

Loans reported within *Loans and receivables* which are risk managed on a fair value basis and loan commitments related to loans receivable for which the fair value option will be elected upon funding. Nomura elects the fair value option to mitigate volatility in the consolidated statements of income caused by the difference in measurement basis that otherwise would arise between loans and the derivatives used to risk manage those instruments.

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Resale and repurchase agreements reported within *Collateralized agreements* and *Collateralized financing* which are risk managed on a fair value basis. Nomura elects the fair value option to mitigate

F-48

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

volatility in the consolidated statements of income caused by the difference in measurement basis that otherwise would arise between the resale and repurchase agreements and the derivatives used to risk manage those instruments.

All structured notes issued on or after April 1, 2008 reported within *Short-term borrowings* and *Long-term borrowings*. Nomura elects the fair value option for those structured notes primarily to mitigate the volatility in the consolidated statements of income caused by differences in the measurement basis for structured notes and the derivatives Nomura uses to risk manage those positions. Nomura also elects the fair value option for certain notes issued by consolidated variable interest entities (VIEs) for the same purpose and for certain structured notes issued prior to April 1, 2008.

Financial liabilities reported within *Long-term borrowings* recognized in transactions which are accounted for as secured financing transactions under ASC 860. Nomura elects the fair value option for these financial liabilities to mitigate volatility in the consolidated statements of income that otherwise would arise had this election not been made. Even though Nomura usually has little or no continuing economic exposure to the transferred financial assets, they remain on the consolidated balance sheets and continue to be carried at fair value, with changes in fair value recognized through the consolidated statements of income.

Interest and dividends arising from financial instruments for which the fair value option has been elected are recognized within *Interest and dividends*, *Interest expense* or *Net gain on trading*.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents gains (losses) due to changes in fair value for financial instruments measured at fair value using the fair value option for the years ended March 31, 2010, 2011 and 2012.

	Billions of yen

Other liabilities ⁽⁶⁾			0
Total	¥ (150)	¥ (44)	¥ (26)

- (1) Includes gains and losses reported primarily within *Net gain on trading* and *Gain on private equity investments* in the consolidated statements of income.
- (2) Includes equity investments that would have been accounted for under the equity method had Nomura not chosen to elect the fair value option.
- (3) Includes resale and repurchase agreements.
- (4) Includes structured notes and other financial liabilities.
- (5) Includes secured financing transactions arising from transfers of financial assets which did not meet the criteria for sales accounting.
- (6) Includes loan commitments.

In the common stock of Ashikaga Holdings Co., Ltd. (Ashikaga Holdings), Nomura elected to apply the fair value option for its 45.5% investment as of March 31, 2011 and 47.0% investment as of March 31, 2012. This investment is reported within *Trading assets and private equity investments*, *Private equity investments* and *Other assets* in the consolidated balance sheets.

Ashikaga Holdings recognized total revenue of ¥118 billion, total expense of ¥93 billion and net income of ¥25 billion for the year ended March 31, 2010, determined in accordance with accounting principles generally accepted in Japan. Ashikaga Holdings recognized total revenue of ¥106 billion, total expense of ¥90 billion and net income of ¥16 billion for the year ended March 31, 2011. As of March 31, 2011, its total assets and total liabilities were ¥5,219 billion and ¥4,979 billion, respectively, determined in accordance with accounting principles generally accepted in Japan. Ashikaga Holdings recognized total revenue of ¥101 billion, total expense of ¥84 billion and net income of ¥17 billion for the year ended March 31, 2012. As of March 31, 2012, its total assets and total liabilities were ¥5,354 billion and ¥5,097 billion, respectively, determined in accordance with accounting principles generally accepted in Japan.

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Nomura calculates the impact of changes in its own creditworthiness on certain financial liabilities for which the fair value option is elected by DCF valuation techniques at a rate which incorporates observable

F-50

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

changes in its credit spread. Losses from changes in the fair value of the financial liabilities for which the fair value option was elected, attributable to the change in Nomura's creditworthiness were ¥64 billion for the year ended March 31, 2010, mainly due to the tightening of Nomura's credit spread. Gains from changes in the fair value of the financial liabilities for which the fair value option was elected, attributable to the change in Nomura's creditworthiness, were ¥9 billion for the year ended March 31, 2011, mainly because of the widening of Nomura's credit spread. Gains from changes in the fair value of the financial liabilities for which the fair value option was elected, attributable to the change in Nomura's creditworthiness, were ¥17 billion for the year ended March 31, 2012, mainly because of the widening of Nomura's credit spread.

There was no significant impact on financial assets for which the fair value option was elected attributable to instrument-specific credit risk.

As of March 31, 2011, there were no significant differences between the fair value of the aggregate unpaid principal balance (which is contractually principally protected) of loans and receivables for which the fair value option was elected and the principal balance of such loans and receivables. The fair value of the aggregate unpaid principal balance (which is contractually principally protected) of long-term borrowings for which the fair value option was elected was ¥50 billion less than the principal balance of such long-term borrowings. There were no loans and receivables for which the fair value option was elected that were 90 days or more past due.

As of March 31, 2012, the fair value of the aggregate unpaid principal balance (which is contractually principally protected) of loans and receivables for which the fair value option was elected was ¥1 billion more than the principal balance of such loans and receivables. The fair value of the aggregate unpaid principal balance (which is contractually principally protected) of long-term borrowings for which the fair value option was elected was ¥13 billion less than the principal balance of such long-term borrowings. There were no loans and receivables for which the fair value option was elected that were 90 days or more past due.

Concentrations of credit risk

Concentrations of credit risk may arise from trading, securities financing transactions and underwriting activities, and may be impacted by changes in political or economic factors. Nomura has credit risk concentrations on bonds issued by the Japanese Government, U.S. Government, Governments within the European Union (EU), their states and municipalities, and their agencies. These concentrations generally arise from taking trading securities positions and are reported within *Trading assets* in the consolidated balance sheets. Government, state, municipal, and government agency securities, including *Securities pledged as collateral*, represented 19% of total assets as of March 31, 2011 and 18% as of March 31, 2012. The following tables present geographic allocations of Nomura's trading assets related to government, state, municipal, and government agency securities. See Note 3 *Derivative instruments and hedging activities* for further information regarding the concentration of credit risk for derivatives.

	Billions of yen March 31, 2011				
	Japan	U.S.	EU	Other	Total ⁽¹⁾
Governments, states, municipalities and their agencies	¥ 2,822	¥ 1,184	¥ 2,640	¥ 370	¥ 7,016

	Billions of yen March 31, 2012				
	Japan	U.S.	EU	Other	Total ⁽¹⁾
Governments, states, municipalities and their agencies	¥ 2,304	¥ 1,319	¥ 2,527	¥ 448	¥ 6,598

- (1) Other than above, there were ¥410 billion of government, state, municipal and agency securities in *Other assets Non-trading debt securities* as of March 31, 2011 and ¥640 billion as of March 31, 2012. The vast majority of these securities are Japanese government, states, municipalities and agency securities.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Estimated fair value of financial instruments not carried at fair value

Certain financial instruments are not carried at fair value on a recurring basis in the consolidated balance sheets since they are neither held for trading purposes nor are elected for the fair value option. These are typically carried at contractual amounts due or amortized cost.

The carrying value of the majority of the financial instruments detailed below will approximate fair value since they are short-term in nature and contain minimal credit risk. These financial instruments include financial assets reported within *Cash and cash equivalents*, *Time deposits*, *Deposits with stock exchanges and other segregated cash*, *Receivables from customers*, *Receivables from other than customers*, *Securities purchased under agreements to resell* and *Securities borrowed* and financial liabilities reported within *Short-term borrowings*, *Payables to customers*, *Payables to other than customers*, *Deposits received at banks*, *Securities sold under agreements to repurchase*, *Securities loaned* and *Other secured borrowings* in the consolidated balance sheets. These would be generally classified as either Level 1 or Level 2 within the fair value hierarchy.

The estimated fair values of other financial instruments which are longer-term in nature or may contain more than minimal credit risk may be different to their carrying value. Financial assets of this type primarily include certain loans which are reported within *Loans receivable* while financial liabilities primarily include long-term borrowings which are reported within *Long-term borrowings*. The estimated fair value of loans receivable which are not elected for the fair value option is estimated in the same way as other loans carried at fair value on a recurring basis. Where quoted market prices are available, such market prices are utilized to estimate fair value. The fair value of long-term borrowings which are not elected for the fair value option is estimated in the same way as other borrowings carried at fair value on a recurring basis using quoted market prices where available or by DCF valuation techniques. All of these financial assets and financial liabilities would be generally classified as Level 2 or Level 3 within the fair value hierarchy using the same methodology as is applied to these instruments when they are elected for the fair value option.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents carrying values, fair values and classification within the fair value hierarchy for certain classes of financial instrument of which a portion of the ending balance was carried at fair value.

(1) Includes financial instruments which are carried at fair value on a recurring basis.

(2) Carrying values are shown after deducting allowance for loan losses.

(3) Includes amounts carried at fair value through election of the fair value option and represents amounts after counterparty netting in accordance with ASC 210-20.

Assets and liabilities measured at fair value on a nonrecurring basis

In addition to financial instruments carried at fair value on a recurring basis, Nomura also measures other financial and nonfinancial assets and liabilities at fair value on a nonrecurring basis, where the primary measurement basis is not fair value. Fair value is only used in specific circumstances after initial recognition such as to measure impairment.

There were no significant nonrecurring fair value measurements recognized for the year ended March 31, 2011. For the year ended March 31, 2012, certain land and buildings were measured at fair value on a nonrecurring basis. The carrying amount of these assets, which are reported within *Other assets Office buildings, land, equipment and facilities* in the consolidated balance sheets, were written down to their fair value of ¥17 billion as a result of impairment. Fair value was determined based on internal appraisal value and consequently, this nonrecurring fair value measurement has been determined using valuation inputs which would be classified as Level 3 in the fair value hierarchy.

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

3. Derivative instruments and hedging activities:

Nomura uses a variety of derivative financial instruments, including futures, forwards, options and swaps, for both trading and non-trading purposes.

Derivatives used for trading purposes

In the normal course of business, Nomura enters into transactions involving derivative financial instruments to meet client needs, for trading purposes, and to reduce its own exposure to loss due to adverse fluctuations in interest rates, currency exchange rates and market prices of securities. These financial instruments include contractual agreements such as commitments to swap interest payment streams, exchange currencies or purchase or sell securities and other financial instruments on specific terms at specific future dates.

Nomura maintains active trading positions in a variety of derivative financial instruments. Most of Nomura's trading activities are client oriented. Nomura utilizes a variety of derivative financial instruments as a means of bridging clients' specific financial needs and investors' demands in the securities markets. Nomura also actively trades securities and various derivatives to assist its clients in adjusting their risk profiles as markets change. In performing these activities, Nomura carries an inventory of capital markets instruments and maintains its access to market liquidity by quoting bid and offer prices to and trading with other market makers. These activities are essential to provide clients with securities and other capital markets products at competitive prices.

Futures and forward contracts are commitments to either purchase or sell securities, foreign currency or other capital market instruments at a specific future date for a specified price and may be settled in cash or through delivery. Foreign exchange contracts include spot and forward contracts and involve the exchange of two currencies at a rate agreed by the contracting parties. Risks arise from the possible inability of counterparties to meet the terms of their contracts and from movements in market prices. Futures contracts are executed through regulated exchanges which clear and guarantee performance of counterparties. Accordingly, credit risk associated with futures contracts is considered minimal. In contrast, forward contracts are generally negotiated between two counterparties and, therefore, are subject to the performance of the related counterparties.

Options are contracts that grant the purchaser, for a premium payment, the right to either purchase or sell a financial instrument at a specified price within a specified period of time or on a specified date from or to the writer of the option. The writer of options receives premiums and bears the risk of unfavorable changes in the market price of the financial instruments underlying the options.

Swaps are contractual agreements in which two counterparties agree to exchange certain cash flows, at specified future dates, based on an agreed contract. Certain agreements may result in combined interest rate and foreign currency exposures. Entering into swap agreements may involve the risk of credit losses in the event of counterparty default.

To the extent these derivative financial instruments are economically hedging financial instruments or securities positions of Nomura, the overall risk of loss may be fully or partly mitigated by the hedged position.

Nomura seeks to minimize its exposure to market risk arising from its use of these derivative financial instruments through various control policies and procedures, including position limits, monitoring procedures and hedging strategies whereby Nomura enters into offsetting or other positions in a variety of financial instruments. Credit risk associated with these financial instruments is controlled by Nomura through credit approvals, limits and monitoring procedures. To reduce default risk, Nomura requires collateral, principally cash collateral and government securities, for certain derivative transactions. From an economic standpoint, Nomura evaluates default risk exposure net of related collateral. Furthermore, for OTC derivatives, Nomura generally

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

enters into International Swaps and Derivatives Association, Inc. master agreements or their equivalents (Master Netting Agreements) with each of its counterparties. Master Netting Agreements provide a right of offset in the event of bankruptcy and mitigate the credit risk exposure from these transactions. In some cases, they enable unrealized gains and losses arising from Nomura's dealings in OTC derivatives to be presented on a net-by-counterparty basis and on a net-by-cash collateral basis in accordance with ASC 210-20.

Nomura offset ¥605 billion of cash collateral receivables against net derivative liabilities and ¥456 billion of cash collateral payables against net derivative assets as of March 31, 2011. Nomura offset ¥1,051 billion of cash collateral receivables against net derivative liabilities and ¥867 billion of cash collateral payables against net derivative assets as of March 31, 2012.

Derivatives used for non-trading purposes

Nomura's principal objectives in using derivatives for non-trading purposes are to manage interest rate risk, to modify the interest rate characteristics of certain financial liabilities, to manage net investment exposure to fluctuations in foreign exchange rates arising from certain foreign operations and to mitigate equity price risk arising from certain stock-based compensation awards given to employees.

Credit risk associated with derivatives utilized for non-trading purposes is controlled and managed in the same way as credit risk associated with derivatives utilized for trading purposes.

Nomura designates derivative financial instruments as fair value hedges of interest rate risk arising from specific financial liabilities. These derivatives are effective in reducing the risk associated with the exposure being hedged and they are highly correlated with changes in the fair value of the underlying hedged item, both at inception and throughout the life of the hedge contract. Changes in fair value of the hedging derivatives are reported together with those of the hedged liabilities through the consolidated statements of income within *Interest expense*.

Derivative financial instruments designated as hedges of the net investment in foreign operations relate to specific subsidiaries with non-Japanese yen functional currencies. When determining the effectiveness of net investment hedges, the effective portion of the change in fair value of the hedging derivative is determined by changes in spot exchange rates and is reported through Nomura Holdings, Inc. (NHI) shareholders' equity within *Accumulated other comprehensive income (loss)*. Changes in fair value of the hedging derivatives attributable to changes in the difference between the forward rate and spot rate are excluded from the measure of hedge effectiveness and are reported in the consolidated statements of income within *Revenue Other*.

Concentrations of credit risk for derivatives

The following table presents Nomura's significant concentration of exposures to credit risk in OTC derivatives with financial institutions. The gross fair value of derivative assets represents the maximum amount of loss due to credit risk that Nomura would incur if the counterparties of Nomura failed to perform in accordance with the terms of the instruments and any collateral or other security Nomura held in relation to those instruments proved to be of no value.

	Billions of yen March 31, 2011			
	Gross fair value of derivative assets	Impact of master netting agreements	Impact of collateral	Net exposure to credit risk

- (1) Each derivative classification includes derivatives referencing multiple risk components. For example, interest rates contracts include complex derivatives referencing interest rate risk as well as foreign exchange risk or other factors such as prepayment rates. Credit contracts include credit default swaps as well as derivatives referencing corporate and government securities.
- (2) Includes net gain (loss) on derivatives used for non-trading purposes which are not designated as fair value or net investment hedges.
Fair value hedges

Nomura issues Japanese yen and foreign currency denominated debt with both fixed and floating interest rates. Nomura generally enters into swap agreements to convert fixed rate interest payments on its debt obligations to a floating rate and applies hedge accounting to these instruments. Derivative financial instruments designated as fair value hedges are carried at fair value. Changes in fair value of the hedging derivatives are recognized together with those of the hedged liabilities in the consolidated statements of income within *Interest expense*.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents amounts included in the consolidated statements of income related to derivatives designated as fair value hedges by type of underlying derivative contract and the nature of the hedged item.

	Billions of yen		
	Year ended March 31		
	2010	2011	2012
Derivatives designated as hedging instruments:

Total	¥ (14)	¥ (22)	¥ (76)

Net investment hedges

Effective from April 2010, Nomura designates foreign currency forwards and foreign currency denominated long-term debt as hedges of certain subsidiaries with significant foreign exchange risks and applies hedge accounting to these instruments. Accordingly, the effective hedging portion of the foreign exchange gains (losses) arising from the derivative contracts and non-derivative financial products designated as hedges is recognized through the consolidated statements of comprehensive income within *Other comprehensive income (loss) Change in cumulative translation adjustments, net of tax*. This is offset by the foreign exchange adjustments arising from consolidation of the relevant foreign subsidiaries.

The following table presents gains (losses) from derivatives and non-derivatives designated as net investment hedges included in the consolidated statements of comprehensive income.

	Billions of yen		
	Year ended March 31		
	2010	2011	2012
Hedging instruments:			
Foreign exchange contracts	¥	¥ 0	¥ (1)
Long-term borrowings		17	4
Total	¥	¥ 17	¥ 3

- (1) The portion of the gains (losses) representing the amount of hedge ineffectiveness and the amount excluded from the assessment of hedge effectiveness are recognized within *Revenue Other* in the consolidated statements of income. The amount of gains (losses) was not significant during the years ended March 31, 2011 and 2012.

Derivatives containing credit risk related contingent features

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Nomura enters into certain OTC derivatives and other agreements containing credit-risk-related contingent features. These features would require Nomura to post additional collateral or settle the instrument upon occurrence of a credit event, the most common of which would be a downgrade in the Company's long-term credit rating.

F-58

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position as of March 31, 2011, was ¥1,779 billion with related collateral pledged of ¥958 billion. In the event of a one-notch downgrade to Nomura's long-term credit rating in effect as of March 31, 2011, the aggregate fair value of assets that would have been required to be posted as additional collateral or that would have been needed to settle the instruments immediately was ¥18 billion. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position as of March 31, 2012, was ¥1,867 billion with related collateral pledged of ¥1,143 billion. In the event of a one-notch downgrade to Nomura's long-term credit rating in effect as of March 31, 2012, the aggregate fair value of assets that would have been required to be posted as additional collateral or that would have been needed to settle the instruments immediately was ¥26 billion.

Credit derivatives

Credit derivatives are derivative instruments in which one or more of their underlyings are related to the credit risk of a specified entity (or group of entities) or an index based on the credit risk of a group of entities that expose the seller of credit protection to potential loss from credit risk related events specified in the contract.

Written credit derivatives are instruments or embedded features where Nomura assumes third party credit risk, either as guarantor in a guarantee-type contract, or as the party that provides credit protection in an option-type contract, credit default swap, or any other credit derivative contract.

Nomura enters into credit derivatives as part of its normal trading activities as both purchaser and seller of protection for credit risk mitigation, proprietary trading positions and for client transactions.

The most significant type of credit derivatives used by Nomura are single-name credit default swaps where settlement of the derivative is based on the credit risk of a single third party. Nomura also writes credit derivatives linked to the performance of credit default indices and issues other credit risk related portfolio products.

Nomura would have to perform under a credit derivative contract if a credit event as defined in the respective contract occurs. Typical credit events include bankruptcy, failure to pay and restructuring of obligations of the reference asset.

Credit derivative contracts written by Nomura are either cash or physically settled. In cash-settled instruments, once payment is made upon an event of a default, the contract usually terminates with no further payments due. Nomura generally has no right to assume the reference assets of the counterparty in exchange for payment, nor does Nomura usually have any direct recourse to the actual issuers of the reference assets to recover the amount paid. In physically settled contracts, upon a default event, Nomura takes delivery of the reference asset in return for payment of the full notional amount of the contract.

Nomura actively monitors and manages its credit derivative exposures. Where protection is sold, risks may be mitigated by purchasing credit protection from other third parties either on identical underlying reference assets or on underlying reference assets with the same issuer which would be expected to behave in a correlated fashion. The most common form of recourse provision to enable Nomura to recover from third parties any amounts paid under a written credit derivative is therefore not through the derivative itself but rather through the separate purchase of credit derivatives with identical or correlated underlyings.

Nomura quantifies the value of these purchased contracts in the following tables in the column titled "Purchased Credit Protection". These amounts represent purchased credit protection with identical underlyings to

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

the written credit derivative contracts which act as a hedge against Nomura's exposure. To the extent Nomura is required to pay out under the written credit derivative, a similar amount would generally become due to Nomura under the purchased hedge.

Credit derivatives have a stated notional amount which represents the maximum payment Nomura may be required to make under the contract. However, this is generally not a true representation of the amount Nomura will actually pay as in addition to purchased credit protection, other risk mitigating factors reduce the likelihood and amount of any payment, including:

The probability of default: Nomura values credit derivatives taking into account the probability that the underlying reference asset will default and that Nomura will be required to make payments under the contract. Based on historical experience and Nomura's assessment of the market, Nomura believes that the probability that all reference assets on which Nomura provides protection will default in a single period is remote. The disclosed notional amount, therefore, significantly overstates Nomura's realistic exposure on these contracts.

The recovery value on the underlying asset: In the case of a default, Nomura's liability on a contract is limited to the difference between the notional amount and the recovery value of the underlying reference asset. While the recovery value on a defaulted asset may be minimal, this does reduce amounts paid on these contracts.

Nomura holds assets as collateral in relation to written credit derivatives. However, these amounts do not enable Nomura to recover any amounts paid under the credit derivative but rather mitigate the risk of economic loss arising from a counterparty defaulting against amounts due to Nomura under the contract. Collateral requirements are determined on a counterparty level rather than individual contract, and also generally cover all types of derivative contracts rather than just credit derivatives.

The following tables present information about Nomura's written credit derivatives and purchased credit protection with identical underlyings as of March 31, 2011 and March 31, 2012.

	Billions of yen							Notional Purchased credit protection

(1) Carrying value amounts are shown on a gross basis prior to cash collateral or counterparty netting.

The following tables present information about Nomura's written credit derivatives by external credit rating of the underlying asset. Ratings are based on Standard & Poor's (S&P), or if not rated by S&P, based on Moody's Investors Service. If ratings from either of these agencies are not available, the ratings are based on Fitch Ratings Ltd. or Japan Credit Rating Agency, Ltd. For credit default indices, the rating is determined by taking the weighted average of the external credit ratings given for each of the underlying reference entities comprising the portfolio or index.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

4. Private equity business:

Nomura makes private equity investments primarily in Japan and Europe.

Private equity investments made by certain entities which Nomura consolidates under either a voting interest or variable interest model which are investment companies pursuant to the provisions of ASC 946 (investment company subsidiaries) are accounted for at fair value, with changes in fair value recognized through the consolidated statements of income. Investment company accounting applied by each of these investment company subsidiaries is retained in these consolidated financial statements.

These entities make private equity investments solely for capital appreciation, current income or both rather than to generate strategic operating benefits to Nomura. In accordance with Nomura investment policies, non-investment companies within the group may not make investments in entities engaged in non-core businesses if such investments would result in consolidation or application of the equity method of accounting. Such investments may generally only be made by investment company subsidiaries. Non-core businesses are defined as those engaged in activities other than Nomura's business segments.

Nomura also has a subsidiary which is not an investment company but which makes investments in entities engaged in Nomura's core businesses. These investments are made for capital appreciation or current income purposes or both and are also carried at fair value, either because of election of the fair value option or other U.S. GAAP requirements.

Private equity business in Japan

Nomura has an established private equity business in Japan, which is operated primarily through a wholly-owned subsidiary, NPF.

Since its inception in 2000, NPF has made investments in 21 entities and exited from the majority of these investments for the year ended March 31, 2012. The fair value of its investment portfolio is ¥77,793 million and ¥789 million as of March 31, 2011 and 2012, respectively.

NPF is an investment company subsidiary pursuant to the provisions of ASC 946 and therefore carries all of its investments at fair value, with changes in fair value recognized through the consolidated statements of income.

Nomura also makes private equity investments through another wholly-owned subsidiary, Nomura Financial Partners Co., Ltd. (NFP). NFP is not an investment company subsidiary as it invests in entities engaged in Nomura's core business. Nomura elected the fair value option to account for its 47.0% investment in the common stock of Ashikaga Holdings.

Private equity business in Europe

In Europe, Nomura's private equity investments primarily comprise legacy investments made by its former Principal Finance Group (PFG) now managed by Terra Firma (collectively referred to as the Terra Firma Investments), investments in other funds managed by Terra Firma (Other Terra Firma Funds) and through other investment company subsidiaries (Other Investments).

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Terra Firma Investments

Following a review to determine the optimum structure for Nomura's European private equity business, on March 27, 2002, Nomura restructured PFG and, as a result, contributed its investments in certain of its remaining investee companies to Terra Firma Capital Partners I (TFCP I), a limited partnership which is engaged in the private equity business, in exchange for a limited partnership interest. Terra Firma Investments (GP) Limited, the general partner of TFCP I, which is independent of Nomura, assumed the management and control of these investments, together with one other PFG investment, Annington Holdings plc, which due to contractual restrictions was not transferred to the partnership.

With effect from March 27, 2002, Nomura ceased consolidating the Terra Firma Investments and accounted for those investments at fair value in accordance with ASC 946.

The Terra Firma Investments are held by entities which are investment company subsidiaries and therefore Nomura continues to account for these investments at fair value, with changes in fair value recognized through the consolidated statements of income.

The fair value of the Terra Firma Investments was ¥100,395 million and ¥102,649 million as of March 31, 2011 and 2012, respectively.

Other Terra Firma Funds

In addition to the Terra Firma Investments, Nomura is a 10% investor in a ¥213 billion private equity fund (TFCP II) and a 2% investor in a ¥568 billion private equity fund (TFCP III), also raised and managed by Terra Firma Capital Partners Limited.

Nomura's total commitment for TFCP II was originally ¥21,295 million and reduced to ¥4,064 million as a result of adjustments for recyclable distributions. As of March 31, 2012, ¥3,914 million had been drawn down for investments.

For TFCP III, Nomura's total commitment is ¥10,750 million and ¥8,347 million had been drawn down for investments as of March 31, 2012.

The investments in TFCP II and TFCP III are carried at fair value, with changes in fair value recognized through the consolidated statements of income.

Other Investments

Nomura also makes private equity investments in Europe through wholly-owned subsidiaries and other consolidated entities which have third party pooling of funds. Certain of these entities are investment company subsidiaries and therefore all of their investments are carried at fair value, with changes in fair value recognized through the consolidated statements of income.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****5. Investment company accounting**

Certain entities, including NPF, are investment companies and therefore carry all of their investments at fair value, with changes in fair value recognized through the consolidated statements of income.

The following table summarizes the aggregate fair value and the cost of investments held by all investment company subsidiaries within Nomura and for which investment company accounting has been retained in these consolidated financial statements.

	Millions of yen March 31	
	2011	2012
Closing cost ⁽¹⁾	¥ 148,358	¥ 31,691
Gross unrealized appreciation	104,807	110,600
Gross unrealized depreciation	(44,411)	(9,971)
Closing fair value	¥ 208,754	¥ 132,320

(1) Cost is defined as the historical cost of each investment (i.e. purchase price) as adjusted for subsequent additional investment. The following table summarizes performance of the investments held by investment company subsidiaries during the period:

	Millions of yen March 31		
	2010	2011	2012
Opening fair value	¥ 253,693	¥ 267,168	¥ 208,754
Purchase / (sales) of investees during the period ⁽¹⁾	(5,004)	(70,292)	(109,724)
Realized gains / (losses) during the period ⁽²⁾	(2,212)	10,070	35,931
Change in unrealized gains / (losses) during the period ⁽³⁾	20,691	1,808	(2,641)
Closing fair value	¥ 267,168	¥ 208,754	¥ 132,320

(1) Acquisition cost of new investees and additional investments or sales proceeds of investees disposed of during the period.

(2) Realized gains and losses are calculated as the difference between sales proceeds and the adjusted historical cost of the investment.

(3) Includes the effect of foreign exchange movements.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****6. Collateralized transactions:**

Nomura enters into collateralized transactions, including resale and repurchase agreements, securities borrowed and loaned transactions, and other secured borrowings mainly to meet clients' needs, finance trading inventory positions and obtain securities for settlements. Under these transactions, Nomura either receives or provides collateral, including Japanese and non-Japanese government, agency, mortgage-backed, bank and corporate debt securities and equities. In many cases, Nomura is permitted to use the securities received to secure repurchase agreements, enter into securities lending transactions or to cover short positions with counterparties.

The fair value of securities received as collateral, securities borrowed with collateral and securities borrowed without collateral which Nomura is permitted to sell or repledge and the portion that has been sold or repledged are as follows:

	Billions of yen March 31	
	2011	2012
The fair value of securities received as collateral, securities borrowed with collateral and securities borrowed without collateral where Nomura is permitted to sell or repledge the securities	¥ 28,262	¥ 32,075
The portion of the above that has been sold (reported within <i>Trading liabilities</i> on the consolidated balance sheets) or repledged	22,576	23,895

Nomura pledges firm-owned securities to collateralize repurchase agreements and other secured financings. Pledged securities that can be sold or repledged by the secured party, including Gensaki Repo transactions, are reported in parentheses as *Securities pledged as collateral* within *Trading assets* in the consolidated balance sheets. Assets owned, which have been pledged as collateral, primarily to stock exchanges and clearing organizations, without allowing the secured party the right to sell or repledge them, are summarized in the tables below:

	Millions of yen March 31	
	2011	2012
Trading assets:		
Equities and convertible securities	¥ 29,935	¥ 47,966
Government and government agency securities	977,291	1,333,482
Bank and corporate debt securities	93,250	139,863
Commercial mortgage-backed securities (CMBS)	54,725	40,183
Residential mortgage-backed securities (RMBS)	1,572,177	1,527,946
Collateralized debt obligations (CDO) and other	64,247	82,298
Investment trust funds and other	9,652	
	¥ 2,801,277	¥ 3,171,738
Non-trading debt securities	¥ 86,234	¥ 54,969
Investments in and advances to affiliated companies	¥ 36,639	¥ 33,921

- (1) Includes collateralized loan obligations (CLO) and asset-backed securities (ABS) such as those secured on credit card loans, auto loans and student loans.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Assets subject to lien, except for those disclosed above, are as follows:

	Millions of yen March 31	
	2011	2012
Loans and receivables	¥ 27,635	¥ 55,236
Trading assets	2,010,605	1,515,079
Office buildings, land, equipment and facilities	20,815	116,530
Non-trading debt securities	278,261	337,681
Other		260,683
	¥ 2,337,316	¥ 2,285,209

Assets in the above table were primarily pledged for secured borrowings, including other secured borrowings, collateralized borrowings of consolidated VIEs and trading balances of secured borrowings, and derivative transactions. See Note 13 *Borrowings* for further information regarding trading balances of secured borrowings.

7. Non-trading securities:

The following table presents information regarding the cost and/or amortized cost, gross unrealized gains and losses and fair value of non-trading securities held by Nomura's insurance subsidiary as of March 31, 2012.

	Millions of yen March 31, 2012			
	Cost and/or amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
Government, state, municipal and government agency securities	¥ 150,203	¥ 445	¥ 164	¥ 150,484
Other debt securities	37,356	115	182	37,289
Equities	53,358	3,194	2,069	54,483
Total	¥ 240,917	¥ 3,754	¥ 2,415	¥ 242,256

Non-trading securities of ¥317,806 million were disposed of during the year ended March 31, 2012 resulting in ¥6,331 million of realized gains and ¥1,282 million of realized losses being recognized in *Revenue - Other* in the consolidated statements of income. Total proceeds received from these disposals were ¥322,855 million. Related gains and losses were computed using the average method.

The following table presents the fair value of residual contractual maturity of non-trading debt securities as of March 31, 2012. Actual maturities may differ from contractual maturities as certain securities contain features that allow redemption of the securities prior to their contractual maturity.

Millions of yen
March 31, 2012

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

	Total	Less than 1 year	Years to maturity		More than 10 years
			1 to 5 years	5 to 10 years	
Non-trading debt securities	¥ 187,773	¥ 16,241	¥ 37,200	¥ 90,423	¥ 43,909

F-66

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents the fair value and gross unrealized losses of non-trading securities aggregated by the length of time that individual securities have been in a continuous unrealized loss position as of March 31, 2012.

	Millions of yen March 31, 2012	
	Less than 12 months	
	Fair value	Gross unrealized losses
Government, state, municipal and government agency securities	¥ 14,954	¥ 164
Other debt securities	5,920	182
Equities	21,049	2,069
Total	¥ 41,923	¥ 2,415

As of March 31, 2012, the total number of non-trading securities that are in an unrealized loss position is approximately 70.

Nomura recognized credit-related other-than-temporary impairment losses of ¥1,078 million within *Revenue Other* in the consolidated statements of income against certain non-trading securities during the year ended March 31, 2012. Other gross unrealized losses were not considered other-than-temporary as Nomura does not intend to sell or expect to be required to sell these securities prior to recovering the amortized cost basis of the securities.

8. Securitizations and Variable Interest Entities:**Securitizations**

Nomura utilizes SPEs to securitize commercial and residential mortgage loans, government agency and corporate bonds and other types of financial assets. Those SPEs are incorporated as stock companies, Tokumei kumiai (silent partnerships), Cayman SPCs or trust accounts. Nomura's involvement with SPEs includes structuring SPEs, underwriting, distributing and selling debt instruments and beneficial interests issued by SPEs to investors. Nomura accounts for the transfer of financial assets in accordance with ASC 860. This statement requires that Nomura accounts for the transfer of financial assets as a sale when Nomura relinquishes control over the assets. ASC 860 deems control to be relinquished when the following conditions are met: (a) the assets have been isolated from the transferor (even in bankruptcy or other receivership), (b) the transferee has the right to pledge or exchange the assets received, or if the transferee is an entity whose sole purpose is to engage in securitization or asset-backed financing activities, and that entity is constrained from pledging or exchanging the assets it receives, the holders of its beneficial interests have the right to pledge or exchange the beneficial interests, and (c) the transferor has not maintained effective control over the transferred assets. Nomura may retain an interest in the financial assets, including residual interests in the SPEs. Any such interests are accounted for at fair value and reported within *Trading assets* in Nomura's consolidated balance sheets, with the change in fair value reported within *Revenue-Net gain on trading*. Fair value for retained interests in securitized financial assets is determined by using observable prices; or in cases where observable prices are not available for certain retained interests, Nomura estimates fair value based on the present value of expected future cash flows using its best estimates of the key assumptions, including forecasted credit losses, prepayment rates, forward yield curves and discount rates commensurate with the risks involved. Nomura may also enter into derivative transactions in relation to the assets transferred to an SPE.

As noted above, Nomura may have continuing involvement with SPEs to which Nomura transferred assets. For the years ended March 31, 2011 and 2012, Nomura received cash proceeds from SPEs in new securitizations of ¥481 billion and ¥349 billion, respectively, and recognized associated profit on sale of ¥0.2 million and ¥0.0 million, respectively. For the years ended March 31, 2011 and 2012, Nomura received debt securities issued by

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

these SPEs with an initial fair value of ¥2,271 billion and ¥1,336 billion, respectively, and cash inflows from third parties on the sale of those debt securities of ¥1,472 billion and ¥723 billion, respectively. The cumulative balance of financial assets transferred to SPEs with which Nomura has continuing involvement was ¥3,141 billion and ¥3,782 billion as of March 31, 2011 and 2012, respectively. Nomura's retained interests were ¥199 billion and ¥165 billion as of March 31, 2011 and 2012, respectively. For the years ended March 31, 2011 and 2012, Nomura received cash flows of ¥26 billion and ¥14 billion, respectively, from the SPEs on the retained interests held in SPEs. Nomura had outstanding collateral service agreements or written credit default swap agreements in the amount of ¥28 billion and ¥27 billion as of March 31, 2011 and 2012, respectively. Nomura does not provide financial support to SPEs beyond its contractual obligations.

The following tables present the fair value of retained interests which Nomura has continuing involvement in SPEs and their classification in the fair value hierarchy, categorized by the type of transferred assets.

	Billions of yen March 31, 2011					
	Level 1	Level 2	Level 3	Total	Investment grade	Other
Government and government agency bonds	¥	¥ 197	¥	¥ 197	¥ 194	¥ 3
Bank and corporate debt securities			0	0		0
Mortgage and mortgage-backed securities			2	2	2	
Total	¥	¥ 197	¥ 2	¥ 199	¥ 196	¥ 3

	Billions of yen March 31, 2012					
	Level 1	Level 2	Level 3	Total	Investment grade	Other
Government and government agency bonds	¥	¥ 163	¥	¥ 163	¥ 161	¥ 2
Bank and corporate debt securities			0	0		0
Mortgage and mortgage-backed securities			2	2	2	
Total	¥	¥ 163	¥ 2	¥ 165	¥ 163	¥ 2

The following table presents the key economic assumptions used to determine the fair value of the retained interests and the sensitivity of this fair value to immediate adverse changes of 10% and 20% in those assumptions.

	Billions of yen, except percentages Material retained interests held ⁽¹⁾ as of March 31	
	2011	2012
Fair value of retained interests ⁽¹⁾	¥ 192	¥ 157
Weighted-average life (Years)	6.3	7.0
Constant prepayment rate	7.1%	8.1%
Impact of 10% adverse change	(0.5)	(1.3)
Impact of 20% adverse change	(1.0)	(2.4)
Discount rate	4.7%	3.3%

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Impact of 10% adverse change	(4.3)	(3.7)
Impact of 20% adverse change	(7.4)	(7.1)

- (1) The sensitivity analysis covers the material retained interests held of ¥192 billion out of ¥199 billion as of March 31, 2011 and ¥157 billion out of ¥165 billion as of March 31, 2012. Nomura considers the probability of anticipated credit loss from the retained interests which Nomura continuously holds would be minimal.

F-68

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Changes in fair value based on 10% or 20% adverse changes generally cannot be extrapolated since the relationship of the change in assumption to the change in fair value may not be linear. The impact of a change in a particular assumption is calculated holding all other assumptions constant. For this reason, concurrent changes in assumptions may magnify or counteract the sensitivities disclosed above. The sensitivity analyses are hypothetical and do not reflect Nomura's risk management practices that may be undertaken under those stress scenarios.

The following table presents the type and carrying value of financial assets included within *Trading assets* which have been transferred to SPEs but which do not meet the criteria for derecognition under ASC 860. These transfers are accounted for as secured financing transactions within *Long-term borrowings*. The assets are pledged as collateral against the associated liabilities, cannot be removed unilaterally by Nomura and the liabilities are non-recourse to Nomura.

Variable Interest Entities

In the normal course of business, Nomura acts as a transferor of financial assets to VIEs, and underwriter, distributor, and seller of repackaged financial instruments issued by VIEs in connection with its securitization and equity derivative activities. Nomura retains, purchases and sells variable interests in VIEs in connection with its market-making, investing and structuring activities. Nomura consolidates VIEs for which Nomura is the primary beneficiary, including those that were created to market structured securities to investors by repackaging corporate convertible bonds, mortgages and mortgage-backed securities. Nomura also consolidates certain investment funds, which are VIEs, and for which Nomura is the primary beneficiary. Due to the adoption of ASC 810, as amended by ASU 2009-17 on April 1, 2010, Nomura consolidates certain SPEs used in connection with Nomura's aircraft leasing business as well as SPEs used for other purposes.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents the classification of consolidated VIEs' assets and liabilities in these consolidated financial statements. The assets of a consolidated VIE may only be used to settle obligations of that VIE. Creditors do not have any recourse to Nomura beyond the assets held in the VIEs.

- (1) Includes aircraft of ¥30 billion and ¥14 billion as of March 31, 2011 and 2012, respectively, held by SPEs consolidated due to the adoption of ASC 810 as amended by ASU 2009-17. Certain of these SPEs are used in connection with Nomura's aircraft leasing business.
- (2) Includes aircraft purchase deposits of ¥15 billion and ¥17 billion as of March 31, 2011 and 2012, respectively. In relation to these aircraft purchase deposits, certain of these SPEs have commitments to purchase aircraft. See Note 22 *Commitments, contingencies and guarantees* for further information.
- (3) Includes real estate and real estate for sale held by SPEs consolidated by a new subsidiary acquired during the year ended March 31, 2012. Nomura also holds variable interests in VIEs where Nomura is not the primary beneficiary. Nomura's variable interests in such VIEs include senior and subordinated debt, residual interests, and equity interests associated with commercial and residential mortgage-backed and other asset-backed securitizations and structured financings, equity interests in VIEs which were formed primarily to acquire high yield leveraged loans and other lower investment grade debt obligations, residual interests in operating leases for aircraft held by VIEs, and loans and investments in VIEs that acquire operating businesses.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following tables present the carrying amount of variable interests of unconsolidated VIEs and maximum exposure to loss associated with these variable interests. Maximum exposure to loss does not reflect Nomura's estimate of the actual losses that could result from adverse changes, nor does it reflect the economic hedges Nomura enters into to reduce its exposure. The risks associated with VIEs in which Nomura is involved are limited to the amount recorded in the consolidated balance sheets, the amount of commitments and financial guarantees and the notional amount of the derivative instruments. Nomura believes the notional amount of derivative instruments generally exceeds the amount of actual risk.

9. Financing receivables:

In the normal course of business, Nomura extends financing to clients primarily in the form of collateralized agreements such as reverse repurchase agreements and securities borrowing transactions and loans. These financing receivables are recognized as assets on Nomura's consolidated balance sheets and provide a contractual right to receive money either on demand or on future fixed or determinable dates.

F-71

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Collateralized agreements

Collateralized agreements consist of reverse repurchase agreements disclosed as *Securities purchased under agreements to resell* and securities borrowing transactions disclosed as *Securities borrowed* in the consolidated balance sheets, including those executed under Gensaki Repo agreements. Reverse repurchase agreements and securities borrowing transactions principally involve the buying of government and government agency securities from customers under agreements that also require Nomura to resell these securities to those customers. Nomura monitors the value of the underlying securities on a daily basis to the related receivables, including accrued interest, and requests or returns additional collateral when appropriate. Reverse repurchase agreements and securities borrowing transactions are generally recorded on the consolidated balance sheets at the amount at which the securities are purchased with applicable accrued interest. No allowance for credit losses is generally recorded on these transactions due to the strict collateralization requirements.

Loans receivable

The key types of loans receivable recognized by Nomura are loans at banks, short-term secured margin loans, inter-bank money market loans and corporate loans.

Loans at banks are secured and unsecured loans extended by licensed banks within Nomura. For those loans secured by real estate or securities, Nomura is exposed to the risk of a decline in the value of the underlying collateral. For unsecured loans provided for the investment banking activities, Nomura is exposed to risk of default of the counterparty, although these counterparties usually have high credit ratings. Where loans are secured by guarantees, Nomura is also exposed to the risk of default by the guarantor.

Short-term secured margin loans are loans provided to clients in connection with stock brokerage activities. These loans provide funding for clients in order to purchase securities. Nomura requests initial margin in the form of acceptable collateral securities or deposits against these loans and holds the purchased securities as collateral through the life of the loans. If the value of the securities declines by more than specified amounts, Nomura can make additional margin calls in order to maintain a specified ratio of loan-to-value (LTV) ratio. For these reasons, the risk to Nomura of providing these loans is limited.

Inter-bank money market loans are loans to financial institutions in the inter-bank money market, where overnight and intra-day financings are traded through money market dealers. The risk to Nomura of making these loans is not significant as only qualified financial institutions can participate in these markets and these loans are usually overnight or short-term in nature.

Corporate loans are primarily loans provided to corporate clients. Corporate loans include loans secured by real estate or securities, as well as unsecured loans which Nomura provides for the investment banking activities. The risk to Nomura of making these loans is similar to those risks arising from loans at banks.

In addition to the loans above, Nomura has advances to affiliated companies which are loans provided to related parties of Nomura. As these loans are generally not secured, Nomura is exposed to the risk of default of the counterparty.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents a summary of the loans receivable reported within *Loans receivable* or *Investments in and advances to affiliated companies* in the consolidated balance sheets by portfolio segment.

	Millions of yen March 31	
	2011	2012
Loans		
Loans at banks	¥ 320,296	¥ 285,516
Short-term secured margin loans	206,910	165,246
Inter-bank money market loans	8,281	95,461
Corporate loans	735,797	747,149
Loans receivable total	¥ 1,271,284	¥ 1,293,372
of which:		
Loans receivable carried at fair value ⁽¹⁾	¥ 554,180	¥ 458,352
Loans receivable carried at amortized cost	717,104	835,020
Advances to affiliated companies	12,766	10,649

(1) Carried at fair value through election of the fair value option.

There were no significant purchases or sales of *Loans receivable* and no reclassifications of *Loans receivable* to *Trading assets* during the years ended March 31, 2011 and 2012.

Allowance for loan losses

Management establishes an allowance for loan losses for loans carried at amortized cost which reflects management's best estimate of probable losses incurred. The allowance for loan losses which is reported in the consolidated balance sheets within *Allowance for doubtful accounts* comprises two components:

A specific component for loans which have been individually evaluated for impairment; and

A general component for loans which, while not individually evaluated for impairment, have been collectively evaluated for impairment based on historical loss experience

The specific component of the allowance for loan losses reflects probable losses incurred within loans which have been individually evaluated for impairment. A loan is defined as being impaired when, based on current information and events, it is probable that all amounts due according to the contractual terms of the loan agreement will not be collected. Factors considered by management in determining impairment include an assessment of the ability of borrowers to pay by considering various factors such as the nature of the loan, prior loan loss experience, current economic conditions, the current financial situation of the borrower, and the fair value of any underlying collateral. Loans that experience insignificant payment delays or insignificant payment shortfalls are not classified as impaired. The impairment is measured on a loan by loan basis by adjusting the carrying value of the loan to either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

The general component of the allowance for loan losses is for loans not individually evaluated for impairment and includes judgment about collectability based on available information at the balance sheet date and the uncertainties inherent in those underlying assumptions. The allowance is based on historical loss experience adjusted for qualitative factors such as current economic conditions.

F-73

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

While management has based its estimate of the allowance for loan losses on the best information available, future adjustments to the allowance for loan losses may be necessary as a result of changes in the economic environment or variances between actual results and original assumptions.

Loans are charged-off when Nomura determines that the loans are uncollectible. This determination is based on factors such as the occurrence of significant changes in the borrower's financial position such that the borrower can no longer pay the obligation or that the proceeds from collateral will not be sufficient to pay the loans.

The following tables present changes in the allowance for losses for the years ended March 31, 2010, 2011 and 2012.

	Millions of yen Year ended March 31		
	2010	2011	2012

Nonaccrual and past due loans

Loans which are individually evaluated as impaired are assessed for a nonaccrual status in accordance with Nomura's policy. When it is determined to suspend interest accrual as a result of an assessment, any accrued but unpaid interest is reversed. Loans are generally only returned to an accrual status if the loan is brought contractually current, i.e. all overdue principal and interest amounts are paid. In limited circumstances,

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

a loan which has not been brought contractually current will also be returned to an accrual status if all principal and interest amounts contractually due are reasonably assured of repayment within a reasonable period of time or there has been a sustained period of repayment performance by the borrower.

As of March 31, 2011, the amount of loans which were on a nonaccrual status or 90 days past due was not significant. As of March 31, 2012, there were ¥40,565 million of loans which were on a nonaccrual status, primarily unsecured corporate loans. The amount of loans which were 90 days past due was not significant.

Once a loan is impaired and placed on a nonaccrual status, interest income is subsequently recognized using the cash basis method.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Loan impairment and troubled debt restructurings*

In the ordinary course of business, Nomura may choose to recognize impairment and also restructure a loan classified as held for investment either because of financial difficulties of the borrower, or simply as a result of market conditions or relationship reasons. A troubled debt restructuring (TDR) occurs when Nomura (as lender) for economic or legal reasons related to the borrower's financial difficulties grants a concession to the borrower that Nomura would not otherwise consider.

Any loan being restructured under a TDR will generally already be identified as impaired with an applicable allowance recognized in the allowance for loan losses. If not (for example if the loan is collectively assessed for impairment with other loans), the restructuring of the loan under a TDR will immediately result in the loan as being classified as impaired. An impairment loss for a loan restructuring under a TDR which only involves modification of the loan's terms (rather than receipt of assets in full or partial settlement) is calculated in the same way as any other impaired loan. Assets received in full or partial satisfaction of a loan in a TDR are recognized at fair value.

As of March 31, 2011, the amount of loans which were classified as impaired but against which no allowance for loan losses had been recognized was not significant. For impaired loans with a related allowance, the amount of recorded investment was ¥41,630 million, the total unpaid principal balance was ¥43,715 million and the related allowance was ¥3,279 million, mainly for unsecured corporate loans. As of March 31, 2012, the amount of loans which were classified as impaired but against which no allowance for loan losses had been recognized was not significant. For impaired loans with a related allowance, the amount of recorded investment was ¥35,721 million, the total unpaid principal balance was ¥38,103 million and the related allowance was ¥2,693 million, mainly for unsecured corporate loans.

During the year ended March 31, 2012, the amount of loans under a TDR was not significant.

Credit quality indicators

Nomura is exposed to credit risks deriving from a decline in the value of loans or a default caused by deterioration of creditworthiness or bankruptcy of the borrower. Nomura's risk management framework for such credit risks is based on a risk assessment through an internal credit rating process, in depth pre-financing credit analysis of each individual loan and continuous post-financing monitoring of borrower's creditworthiness. Loans considered as collateralized transactions are not subject to an internal credit rating process as Nomura monitors the value of posted collateral closely and understands means to prevent potential losses.

The following tables present an analysis of each class of loans not carried at fair value using Nomura's internal ratings or equivalent credit quality indicators applied by subsidiaries as of March 31, 2011 and 2012.

	Millions of yen

(1) Relate to collateral exposures where a specified ratio of LTV is maintained.

Nomura reviews internal counterparty credit ratings at least once a year by using available borrower's credit information including financial statements and other information. Internal counterparty credit ratings are also reviewed more frequently for high-risk borrowers or problematic exposures and any significant credit event of a counterparty will trigger an immediate credit review process.

10. Leases:**Lessor**

Nomura leases office buildings located in Japan and aircraft in Japan and overseas. These leases are classified as operating leases and the related assets are stated at cost, net of accumulated depreciation, except for land, which is stated at cost in the consolidated balance sheets and reported within *Other assets* *Office buildings, land, equipment and facilities*.

A portion of such rentals is paid from Nomura Research Institute, Ltd. (NRI), an affiliated company. See Note 21 *Affiliated companies and other equity-method investees* for more information.

Lease deposits and rents received from NRI, were as follows:

	Millions of yen		
	As of or for the year ended		
	March 31		
	2010	2011	2012
Lease deposits	¥	¥	¥ 11,738
Rental income			3,848

The following table presents the types of assets which Nomura leases under operating leases.

Cost	Millions of yen	
	March 31, 2012	Net carrying amount
	Accumulated depreciation	

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Real estate ⁽¹⁾	¥ 984,087	¥	(11,174)	¥972,913
Aircraft	15,363		(1,684)	13,679
Total	¥ 999,450	¥	(12,858)	¥986,592

(1) The amounts of cost, accumulated depreciation and net carrying amount are including those for the portion utilized by Nomura.

F-77

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Nomura recognized rental income of ¥nil, ¥2,747 million and ¥66,180 million for the years ended March 31, 2010, 2011 and 2012, respectively in the consolidated statements of income within *Revenue Other*.

The following table presents a schedule of future minimum lease payments to be received on noncancelable operating leases as of March 31, 2012:

	Millions of yen						
	Total	Years of receipt					
		Less than 1 year	1 to 2 years	2 to 3 years	3 to 4 years	4 to 5 years	More than 5 years
Minimum lease payments to be received	¥ 146,108	¥ 24,607	¥ 23,197	¥ 21,458	¥ 17,713	¥ 12,876	¥ 46,257

Lessee

Nomura leases its office space and certain employees' residential facilities in Japan primarily under cancelable lease agreements which are customarily renewed upon expiration. Nomura also leases certain equipment and facilities under non-cancelable lease agreements. Rental expenses, net of sublease rental income, for the years ended March 31, 2010, 2011 and 2012 were ¥49,374 million, ¥48,957 million and ¥43,536 million, respectively. A portion of such rental expenses was paid by Nomura Land and Building Co., Ltd. (NLB) that became a consolidated subsidiary of Nomura in May 2011.

Lease deposits and rents paid to NLB were as follows:

	Millions of yen		
	As of or for the year ended March 31		
	2010	2011	2012
Lease deposits	¥ 6,541	¥ 4,229	¥
Rental expenses ⁽¹⁾	4,531	4,358	622

(1) Rental expenses for the year ended March 31, 2012 were those paid to NLB for the period before NLB was consolidated. In August 2009, a Nomura consolidated subsidiary, Nomura Properties plc (NPP) entered into a 20 year lease as tenant of a 525,000-square-foot development at 1 Angel Lane in London in the U.K. Construction was completed in December 2010 and the building is now used as Nomura's European headquarters. NPP was involved in the construction of the building and therefore was deemed the owner of the construction project from an accounting perspective in accordance with ASC 840. The building has been recognized on Nomura's consolidated balance sheets from the start of the lease term in 2009. The building remains on Nomura's consolidated balance sheets after completion of construction due to the NPP's continuing involvement with the property and is depreciated over its useful life similar to the treatment of a capital lease.

The following table presents a schedule of future minimum lease payments under capital leases as of March 31, 2012:

	Millions of yen
	March 31 2012
Total minimum lease payments	¥ 52,855

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Less: Amount representing interest	(28,896)
Present value of net lease payments	¥ 23,959

F-78

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents a schedule of future minimum lease payments as of March 31, 2012:

	Millions of yen						More than 5 years
	Total	Less than 1 year	1 to 2 years	2 to 3 years	3 to 4 years	4 to 5 years	
Minimum lease payments	¥ 52,855	¥ 616	¥ 456	¥ 408	¥ 2,809	¥ 3,290	¥ 45,276

Office buildings, land, equipment and facilities in the consolidated balance sheets includes capital lease assets of ¥24,855 million and ¥27,902 million as of March 31, 2011 and 2012, respectively.

The following table presents a schedule of future minimum lease payments under non-cancelable operating leases with remaining terms exceeding one year as of March 31, 2012:

	Millions of yen March 31 2012
Total minimum lease payments	¥ 169,038
Less: Sublease rental income	(9,948)
Net minimum lease payments	¥ 159,090

The following table presents a schedule of future minimum lease payments as of March 31, 2012:

	Millions of yen						More than 5 years
	Total	Less than 1 year	1 to 2 years	2 to 3 years	3 to 4 years	4 to 5 years	
Minimum lease payments	¥ 169,038	¥ 21,129	¥ 19,154	¥ 16,667	¥ 14,309	¥ 10,780	¥ 86,999

Certain leases contain renewal options or escalation clauses providing for increased rental payments based upon maintenance, utilities and tax increases.

11. Business combinations:

For the purpose of streamlining Nomura's management structure for faster decision making in relation to reorganization, on May 13, 2011, the Company entered into an agreement with one of its affiliated companies, NLB to implement a share exchange (Share Exchange Agreement) effective on July 1, 2011. In advance of the effective date of the Share Exchange Agreement, the Company acquired an additional 39.0% of the issued shares of NLB (Share Purchases) as of May 24, 2011. As a result of the Share Purchases, NLB became a consolidated subsidiary of Nomura during the three months ended June 30, 2011. Nomura's total consideration in relation to the Share Purchases was approximately ¥37,620 million. The difference between the fair value of the acquired net assets of NLB and the acquisition cost was accounted for as a bargain purchase gain of ¥44,963 million which is reported within *Revenue Other* in the consolidated statements of income.

The Share Purchases were accounted for as a step acquisition in these consolidated financial statements, because Nomura held 38.5% of the outstanding shares of NLB prior to the Share Purchases. Nomura remeasured the previously held equity investments in NLB and other companies which were acquired as a result of the Share Purchases at fair value. The change in fair value was a loss of ¥16,555 million which

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

was reported within *Revenue Other* in the consolidated statements of income. The remeasurement to fair value was determined primarily based on the cost of the Share Purchases, in which the financial condition and assets of NLB were considered in reference to the valuation results provided by third party appraisers. As of the date of the Share Purchases, the previously held equity investments were remeasured to a fair value of ¥38,379 million. Further,

F-79

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

equity investments in NLB previously held by other affiliated companies of Nomura were also remeasured at fair value, resulting in an additional loss of ¥4,109 million which was also reported within *Revenue Other* in the consolidated statements of income.

There were no other material acquisition-related costs incurred in connection with this business combination.

The operating results of NLB and other companies acquired as a result of the Share Purchases have been included in the consolidated statements of income from May 2011. As a result, revenue generated by NLB and these other companies which have been included in the consolidated statements of income was ¥488,536 million, which includes real estate sales of ¥251,377 million, for the year ended March 31, 2012. In addition, costs of real estate sales were ¥226,450 million, and net income of ¥5,107 million from NLB and other companies acquired as a result of the Share Purchases, was included in the consolidated statements of income for the year ended March 31, 2012, involving the impact of above business. Revenues and expenses arising from NLB and other companies that were acquired as a result of the Share Purchases, are generally reported in *Revenue Other* and *Non-interest expenses Other* in the consolidated statements of income.

The following table provides a summary of the fair value of the assets acquired and the liabilities assumed, as of the date of the Share Purchases.

	Millions of yen
Assets:	
Cash and cash deposits	¥ 78,634
Loans receivable ⁽¹⁾	54,023

Goodwill	¥ (44,963)

(1)

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Valuation is based on the difference between the gross contractual amounts receivable of ¥54,131 million and the estimate of the contractual cash flows not expected to be collected of ¥108 million.

- (2) Includes finite-lived intangible assets related to client contracts and lease agreements which are amortized based on a weighted-average amortization period of nine years with no estimated residual value.
- (3) Includes real estate classified as held for sale.

F-80

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(4) Valuation is based on the acquisition cost of the Share Purchases.

(5) Valuation is based on either the market value or the net asset value as of the date of acquisition.

The following selected (unaudited) pro-forma financial information presents *revenue* and *net income (loss)* amounts as if the Share Purchases occurred on April 1, 2010.

	Millions of yen, except per share data Year ended March 31	
	2011	2012
Total revenue	¥ 2,011,241	¥ 1,892,851
Net income (loss) attributable to NHI shareholders	¥ 58,533	¥ (13,951)
Basic net income (loss) attributable to NHI shareholders per share	16.13	(3.83)
Diluted net income (loss) attributable to NHI shareholders per share	16.06	(3.83)

Based on the Share Exchange Agreement, 118 common shares of the Company were allotted and delivered for each share of NLB, and NLB became a wholly owned subsidiary of Nomura as of July 1, 2011. On the same day, the Company issued 103,429,360 common shares. In addition, the common shares of NLB which the Company acquired through the Share Exchange Agreement include the shares that had been held by one of Nomura's subsidiaries, Nomura Asset Management Co., Ltd., and the acquisition of those shares is accounted for as a transaction between entities under common control.

12. Other assets Other / Other liabilities:

The following table presents *Other assets-Other* and *Other liabilities* in the consolidated balance sheets by type.

	Millions of yen March 31	
	2011	2012
<i>Other assets Other:</i>		
Securities received as collateral	¥43,624	¥ 92,743

Other accrued expenses and provisions	404,048	378,957
Other	94,521	678,032 ⁽³⁾
Total	¥552,316	¥ 1,165,901

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

- (1) Includes marketable and non-marketable equity securities held for other than trading or operating purposes. These investments are comprised of listed equity securities and unlisted equity securities of ¥6,496 million and ¥5,419 million, respectively as of March 31, 2011, and ¥58,460 million and ¥54,546 million respectively, as of March 31, 2012. These securities are carried at fair value, with changes in fair value recognized within *Revenue-other* in the consolidated statements of income.

F-81

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

- (2) Includes real estate classified as held for sale which is carried at the lower of net book value or fair value less cost to sell.
- (3) Includes the liabilities relating to the investment contracts which were underwritten by the insurance subsidiary. As of March 31, 2012, the amount of carrying values and estimated fair values are ¥292,120 million and ¥294,242 million, respectively. The fair value is estimated by discounting future cash flows and it would be generally classified as Level 3.

Goodwill is recognized upon completion of a business combination as the difference between the purchase price and the fair value of the net assets acquired. Subsequent to initial recognition, goodwill is not amortized but is tested for impairment during the fourth quarter of each fiscal year, or more often if events or circumstances, such as adverse changes in the business climate, indicate there may be impairment.

Changes in goodwill, which are reported in the consolidated balance sheets within *Other assets-Other*, are as follows.

	Millions of yen	
	Year ended March 31 2011	2012
Balance at beginning of year	¥ 79,818	¥ 70,223
Increases due to business combinations		4,898 ⁽³⁾
Other ⁽¹⁾	(9,595)	(1,087)
Balance at end of year ⁽²⁾	¥ 70,223	¥ 74,034

- (1) Includes currency translation adjustments at the amount of (¥7,276) million and (¥1,083) million, as of March 31, 2011 and 2012, respectively.
- (2) The amounts attributable to Wholesale segment as of March 31, 2011 and 2012 were ¥69,800 million and ¥68,718 million, respectively.
- (3) Relates to GE Capital Finance (China) Co., Ltd which is a subsidiary of Nomura Bank International plc.

Impairment testing

The goodwill impairment test is performed in two steps. In the first step, the current fair value of each reporting unit is compared with its carrying value, including goodwill. If the fair value is less than the carrying value, then a second step is performed. In the second step, the implied current fair value of the reporting unit's goodwill is determined by comparing the fair value of the reporting unit to the fair value of the net assets of the reporting unit, as if the reporting unit were being acquired in a business combination. An impairment loss is recognized if the carrying value of goodwill exceeds its implied current fair value. Goodwill impairment testing is performed at a level below Nomura's business segments.

The primary method the Company uses to estimate the fair value of reporting units is the income approach. The assumptions used in the valuations of the reporting units include estimates of future cash flows and the cost of equity used to discount those cash flows to a present value. The valuation of the reporting units is dependent upon economic conditions. Deterioration in these assumptions as well as in market conditions could cause the estimated fair values of these reporting units and their associated goodwill to decline, which may result in an impairment charge through the consolidated statements of income in a future period related to some portion of the associated goodwill.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Intangible assets subject to amortization as of March 31, 2011 and 2012 are shown below:

	Millions of yen

2013	¥ 9,636
2014	8,300
2015	8,268
2016	7,731
2017	7,314

The amounts of other intangible assets not subject to amortization excluding goodwill were ¥8,231 million and ¥16,609 million as of March 31, 2011 and 2012, respectively.

13. Borrowings:

Short-term and long-term borrowings of Nomura as of March 31, 2011 and 2012 are shown below:

	Millions of yen March 31	
	2011	2012
Short-term borrowings ⁽¹⁾ :		
Commercial paper	¥ 379,500	¥ 315,579
Bank borrowings	563,748	743,119
Other	223,829	126,915
Total	¥ 1,167,077	¥ 1,185,613

Long-term borrowings:

Long-term borrowings from banks and other financial institutions ⁽²⁾	¥ 2,559,325	¥ 3,494,323
Bonds and notes issued ⁽³⁾ :		

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Fixed-rate obligations:		
Japanese yen denominated	1,365,805	1,124,504
Non-Japanese yen denominated	748,626	860,975
Floating-rate obligations:		
Japanese yen denominated	897,147	788,224
Non-Japanese yen denominated	364,796	117,121
Index / Equity-linked obligations:

Total	¥ 8,402,917	¥ 8,504,840

F-83

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

- (1) Includes secured borrowings of ¥44,159 million as of March 31, 2011 and ¥8,647 million as of March 31, 2012.
 (2) Includes secured borrowings of ¥6,093 million as of March 31, 2011 and ¥224,543 million as of March 31, 2012.
 (3) Includes secured borrowings of ¥1,000,856 million as of March 31, 2011 and ¥757,018 million as of March 31, 2012.

Trading balances of secured borrowings

These are liabilities recognized when a transfer of a financial asset does not meet the criteria for sales accounting under ASC 860 and therefore the transaction is accounted for as a secured borrowing. These borrowings are part of Nomura's trading activities intended to generate profits from the distribution of financial products secured by those financial assets.

Long-term borrowings consisted of the following:

	Millions of yen March 31	
	2011	2012
Debt issued by the Company	¥ 3,205,519	¥ 3,178,278
Debt issued by subsidiaries guaranteed by the Company	2,270,308	2,076,721
Debt issued by subsidiaries not guaranteed by the Company ⁽¹⁾	2,927,090	3,249,841
Total	¥ 8,402,917	¥ 8,504,840

- (1) Includes trading balances of secured borrowings.

As of March 31, 2011, fixed-rate long-term borrowings are due between 2011 and 2035 at interest rates ranging from 0.00% to 10.01%. Floating-rate obligations, which are generally based on LIBOR, are due between 2011 and 2038 at interest rates ranging from 0.10% to 8.30%. Index / Equity-linked obligations are due between 2011 and 2042 at interest rates ranging from 0.00% to 32.50%.

As of March 31, 2012, fixed-rate long-term borrowings are due between 2012 and 2042 at interest rates ranging from 0.10% to 10.00%. Floating-rate obligations, which are generally based on LIBOR, are due between 2012 and 2039 at interest rates ranging from 0.00% to 8.54%. Index / Equity-linked obligations are due between 2012 and 2042 at interest rates ranging from 0.00% to 32.50%.

Certain borrowing agreements of subsidiaries contain provisions whereby the borrowings are redeemable at the option of the borrower at specified dates prior to maturity and include various equity-linked or other index-linked instruments.

Nomura enters into swap agreements to manage its exposure to interest rates and foreign exchange rates. Principally, bonds and notes issued are effectively converted to LIBOR-based floating rate obligations through such swap agreements. The carrying value of the long-term borrowings includes adjustments to reflect fair value hedges.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The effective weighted-average interest rates of borrowings, including the effect of fair value hedges, were as follows:

	March 31	
	2011	2012
Short-term borrowings	0.63%	0.43%
Long-term borrowings	1.48%	1.34%
Fixed-rate obligations	2.30%	2.04%
Floating-rate obligations	0.99%	0.90%
Index / Equity-linked obligations	1.20%	1.22%
<i>Maturities of long-term borrowings</i>		

The aggregate annual maturities of long-term borrowings, including adjustments related to fair value hedges and liabilities measured at fair value, as of March 31, 2012 consist of the following:

Year ending March 31	Millions of yen
2013	¥ 1,112,828
2014	884,259
2015	1,579,413
2016	936,386
2017	686,855
2018 and thereafter	3,082,131
Subtotal	8,281,872
Trading balances of secured borrowings	222,968
	¥ 8,504,840

Borrowing facilities

As of March 31, 2011 and 2012, Nomura had unutilized borrowing facilities of ¥124,380 million and ¥138,301 million, respectively. The terms for these unutilized borrowing facilities do not significantly differ from existing borrowings.

Subordinated borrowings

As of March 31, 2011 and 2012, subordinated borrowings were ¥1,059,261 million and ¥637,487 million, respectively.

14. Earnings per share:

Basic and diluted earnings per share (EPS) are presented on the face of the consolidated statements of income. Basic EPS is calculated by dividing net income attributable to NHI shareholders by the weighted average number of common shares outstanding during the year. The calculation of diluted EPS is similar to basic EPS, except that the weighted average number of common shares is adjusted to reflect all dilutive instruments where potential common shares are deliverable during the year. In addition, net income attributable to NHI shareholders is adjusted for any change in income or loss that would result from the assumed conversion of dilutive instruments issued by subsidiaries and affiliates.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A reconciliation of the amounts and the numbers used in the calculation of net income attributable to NHI shareholders per share (basic and diluted) is as follows:

	Millions of yen except per share data presented in yen Year ended March 31		
	2010	2011	2012
Basic			
Net income attributable to NHI shareholders	¥ 67,798	¥ 28,661	¥ 11,583
Weighted average number of shares outstanding	3,126,790,289	3,627,798,587	3,643,481,439
Net income attributable to NHI shareholders per share	¥ 21.68	¥ 7.90	¥ 3.18
Diluted			
Net income attributable to NHI shareholders	¥ 67,784	¥ 28,642	¥ 11,561
Weighted average number of shares outstanding	3,139,394,052	3,642,689,381	3,680,124,235
Net income attributable to NHI shareholders per share	¥ 21.59	¥ 7.86	¥ 3.14

For the year ended March 31, 2010, in determining diluted EPS, net income attributable to NHI shareholders was adjusted to reflect the decline in Nomura's income arising from convertible bonds issued by the Company. The decline of net income arising from convertible bonds was caused by presuming lump-sum expensing of the difference between the bond's carrying amount and the bond's redemption amount, which is accumulated over the life of the bond. Net income attributable to NHI shareholders was adjusted to reflect the decline in Nomura's equity share of earnings of subsidiaries and affiliates for the years ended March 31, 2010, 2011, and 2012 arising from options to purchase common shares issued by subsidiaries and affiliates.

The weighted average number of shares used in the calculation of diluted EPS reflects the increase in potential issuance of common shares arising from convertible bonds and stock-based compensation plans by the Company, which would reduce EPS for the year ended March 31, 2010. The weighted average number of shares used in the calculation of diluted EPS reflects the increase in potential issuance of common shares arising from stock-based compensation plans by the Company, which would have minimal impact on EPS for the years ended March 31, 2011 and 2012, respectively.

Antidilutive stock options to purchase 12,436,800, 59,670,700 and 24,840,700 common shares were not included in the computation of diluted EPS for the years ended March 31, 2010, 2011 and 2012, respectively.

The convertible bonds of ¥110,000 million were converted to 258,040,481 common shares for the year ended March 31, 2010. All of the convertible bonds were exercised for the year ended March 31, 2010, and therefore, the balances of outstanding convertible bonds as of March 31, 2011 and 2012, respectively, were ¥nil.

The Company issued 766,000,000 shares by way of public offering with a total amount to be paid of ¥416,949 million on the payment date of October 13, 2009 and 34,000,000 shares by way of third-party allotment with a total amount to be paid of ¥18,507 million on the payment date of October 27, 2009.

The Company conducted a share buyback of 75,000,000 common shares which amounted to ¥37,362 million from August 9, 2010 to August 31, 2010.

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

On July 1, 2011, the Company issued 103,429,360 common shares in accordance with NLB becoming a wholly owned subsidiary of Nomura. See Note 11 *Business combinations* for further information.

F-86

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****15. Employee benefit plans:**

Nomura provides various pension plans and other post-employment benefits which cover certain employees worldwide. In addition, Nomura provides health care benefits to certain active and retired employees through its Nomura Securities Health Insurance Society (NSHIS).

Defined benefit pension plans

The Company and certain subsidiaries in Japan (the Japanese entities) have contributory funded benefit pension plans for eligible employees. The benefits are paid as annuity payments subsequent to retirement or as lump-sum payments at the time of retirement based on the combination of years of service, age at retirement and employee's choice. The benefits under the plans are calculated based upon position, years of service and reason for retirement. In addition to the plans described above, certain Japanese entities also have unfunded lump-sum payment plans. Under these plans, employees with at least two years of service are generally entitled to lump-sum payments upon termination of employment. The benefits under the plans are calculated based upon position, years of service and the reason for retirement. Nomura's funding policy is to contribute annually the amount necessary to satisfy local funding standards. In December 2008, certain contributory funded benefit pension plans and unfunded lump-sum payment plans were amended and cash balance pension plans were introduced. Participants receive an annual benefit in their cash balance pension plan account, which is computed based on compensation of the participants, adjusted for changes in Japanese government bond rates. This plan amendment contributed to a reduction in the benefit obligations of the subsidiaries.

Some overseas subsidiaries have various local defined benefit plans covering certain employees. Nomura recognized an asset for pension benefits for these plans amounting to ¥5,787 million and ¥5,838 million as of March 31, 2011, and 2012, respectively.

Net Periodic Benefit Cost

The net periodic benefit cost of the defined benefit plans includes the following components. Nomura's measurement date is March 31 for its defined benefit plans for Japanese entities.

Japanese entities' plans

	Millions of yen		
	Year ended March 31		
	2010	2011	2012
Service cost	¥ 8,719	¥ 9,328	¥ 9,016
Interest cost	4,307	4,480	4,649
Expected return on plan assets	(3,023)	(3,182)	(3,262)
Amortization of net actuarial losses	4,735	3,088	3,687
Amortization of prior service cost	(1,148)	(1,148)	(1,479)
Net periodic benefit cost	¥ 13,590	¥ 12,566	¥ 12,611

The prior service cost is amortized on a straight-line basis over the average remaining service period of active participants. Gains and losses in excess of 10% of the greater of the benefit obligation or the fair value of plan assets are amortized over the average remaining service period of active participants.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Benefit Obligations and Funded Status*

The following table presents a reconciliation of the changes in projected benefit obligation (PBO) and the fair value of plan assets, as well as a summary of the funded status:

Japanese entities plans

	Millions of yen	
	As of or for the year ended March 31 2011	2012
Change in projected benefit obligation:		
Projected benefit obligation at beginning of year	¥ 215,761	¥ 213,653
Service cost	9,328	9,016
Interest cost	4,480	4,649
Actuarial gain (loss)	(647)	9,415
Benefits paid	(15,406)	(14,785)
Acquisition and Other ⁽¹⁾	137	20,542
Projected benefit obligation at end of year	¥ 213,653	¥ 242,490
Change in plan assets:		
Fair value of plan assets at beginning of year	¥ 122,632	¥ 120,727
Actual return on plan assets	1,865	6,696
Employer contributions	4,407	32,291
Benefits paid	(8,177)	(8,114)
Acquisition ⁽¹⁾		8,052
Fair value of plan assets at end of year	¥ 120,727	¥ 159,652
Funded status at end of year	(92,926)	(82,838)
Amounts recognized in the consolidated balance sheets	¥ (92,926)	¥ (82,838)

(1) Increased mainly because of business combination.

The accumulated benefit obligation (ABO) was ¥211,425 million and ¥238,614 million as of March 31, 2011 and 2012, respectively.

PBO, ABO, and fair value of plan assets for pension plans with ABO and PBO in excess of plan assets as of March 31, 2011 and 2012 are set forth in the tables below.

Japanese entities plans

Millions of yen

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

	March 31	
	2011	2012
Plans with ABO in excess of plan assets:		
PBO	¥ 213,653	¥ 242,490
ABO	211,425	238,614
Fair value of plan assets	120,727	159,652
Plans with PBO in excess of plan assets:		
PBO	¥ 213,653	¥ 242,490
ABO	211,425	238,614
Fair value of plan assets	120,727	159,652

F-88

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Amounts in accumulated other comprehensive income, pre-tax, that have not yet been recognized as components of net periodic benefit cost consist of:

Japanese entities plans

	Millions of yen For the year ended March 31, 2012	
Net actuarial loss	¥	70,196
Net prior service cost		(9,582)
Total	¥	60,614

Amounts in accumulated other comprehensive income, pre-tax, expected to be recognized as components of net periodic benefit cost over the next fiscal year are as follows:

Japanese entities plans

	Millions of yen For the year ending March 31, 2013	
Net actuarial loss	¥	3,295
Net prior service cost		(1,544)
Total	¥	1,751

Assumptions

The following table presents the weighted-average assumptions used to determine projected benefit obligations at year end:

Japanese entities plans

	March 31	
	2011	2012
Discount rate	2.1%	1.8%
Rate of increase in compensation levels	2.5%	2.8%

The following table presents the weighted-average assumptions used to determine Japanese entities plans net periodic benefit costs for the year:

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

	Year ended March 31		
	2010	2011	2012
Discount rate	2.2%	2.1%	1.8%
Rate of increase in compensation levels	2.5%	2.5%	2.8%
Expected long-term rate of return on plan assets	2.6%	2.6%	2.6%

Generally, Nomura determines the discount rates for its defined benefit plans by referencing indices for long-term, high-quality bonds and ensuring that the discount rate does not exceed the yield reported for those indices after adjustment for the duration of the plans' liabilities.

F-89

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Nomura uses the expected long-term rate of return on plan assets to compute the expected return on assets. Nomura's approach in determining the long-term rate of return on plan assets is primarily based on historical financial market relationships that have existed over time with the presumption that this trend will generally remain constant in the future.

Plan Assets

The Nomura's plan assets are managed with an objective to secure necessary plan assets in the long term to enable future pension payouts. While targeting to achieve the long-term rate of return on plan assets, Nomura aims to minimize short-term volatility by managing the portfolio through diversifying risk. Based on this portfolio policy, the plan assets are invested diversely.

The plan assets of domestic plans target to invest 23% in equities (includes private equity), 50% in debt securities, 15% in life insurance company general accounts and 12% in other. Investment allocations are generally reviewed and revised at the time of the actual revaluation that takes place every five years or when there is a significant change in prerequisites for the portfolio.

For details of the levels of inputs used to measure the fair value, see Note 2 *Fair value of financial instruments*.

The following tables present information about the plan assets at fair value as of March 31, 2011 and March 31 2012 within the fair value hierarchy.

Japanese entities' plans

	Millions of yen March 31, 2011			Balance as of March 31, 2011

(1) Includes hedge funds and real estate funds.

The fair value of the non-Japan plan assets as of March 31, 2011 was ¥3,055 million, ¥18,584 million and ¥1,692 million for Level 1, Level 2 and Level 3, respectively. The fair value of the non-Japan plan assets as of March 31, 2012 was ¥32 million, ¥20,848 million and ¥6,083 million for Level 1, Level 2 and Level 3, respectively.

Level 1 includes principally equity securities and government securities. Unadjusted quoted prices in active markets for identical assets that Nomura has the ability to access at the measurement date are classified as Level 1. Level 2 includes principally investment trust funds, corporate debt securities and investments in life insurance company's general accounts. Investment trust funds are valued at their net asset values as calculated by the sponsor of the funds. Investments in life insurance company's general accounts are valued at conversion value.

The following tables present information about the plan assets for which Nomura has utilized Level 3 inputs to determine fair value.

Japanese entities' plans

	Millions of yen				Balance as of March 31, 2011
	Balance as of April 1, 2010	Year ended March 31, 2011 Unrealized and realized gains / loss	Purchases / sales and other settlement	Net transfers in / (out of) Level 3

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	Balance as of April 1, 2011	Millions of yen Year ended March 31, 2012			Balance as of March 31, 2012
		Unrealized and realized gains / loss	Purchases / sales and other settlement	Net transfers in / (out of) Level 3	
Private equity	¥ 838	¥ 974	¥ 7,990	¥	¥ 9,802
Investment trust funds and other	8,807	(353)	3,980		12,434
Total	¥ 9,645	¥ 621	¥ 11,970	¥	¥ 22,236

The fair value of Level 3 non-Japan plans assets, consisting of real estate funds and annuities, was ¥1,692 million and ¥6,083 million as of March 31, 2011 and March 31, 2012, respectively. The plan purchased ¥4,416 million of Level 3 assets during the year ended March 31, 2012. The amounts of gains and losses, purchases and sales other than above, transfers between Level 1 or Level 2 and Level 3 relating to these assets during the years ended March 31, 2011 and 2012 were not significant.

Cash Flows

Nomura expects to contribute approximately ¥32,076 million to Japanese entities plans in the year ending March 31, 2013 based upon Nomura's funding policy to contribute annually the amount necessary to satisfy local funding standards.

Expected benefit payments for the next five fiscal years and in aggregate for the five fiscal years thereafter are as follows:

Japanese entities plans

Year ending March 31	Millions of yen
2013	¥ 9,504
2014	9,265
2015	9,999
2016	10,671
2017	10,634
2018-2022	56,148

Defined contribution pension plans

In addition to defined benefit pension plans, the Company, NSC and other Japanese and non-Japanese subsidiaries have defined contribution pension plans.

Nomura contributed ¥3,021 million, ¥3,233 million and ¥3,741 million to the defined contribution pension plans for Japanese entities plans for the years ended March 31, 2010, 2011 and 2012, respectively.

The contributions to overseas defined contribution pension plans were ¥5,712 million, ¥6,903 million and ¥7,882 million for the years ended March 31, 2010, 2011 and 2012, respectively.

Health care benefits

The Company and certain subsidiaries provide certain health care benefits to both active and retired employees through NSHIS. The Company and certain subsidiaries also sponsor certain health care benefits to

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

retired employees (Special Plan) and these retirees are permitted to continue participation in the Special Plan on a pay-all basis, i.e., by requiring a retiree contribution based on the estimated per capita cost of coverage. The Special Plan is a multi-employer post-retirement plan because it is jointly administered by NSHIS and the national government, and the funded status of it is not computed separately. Therefore, although the Company and certain subsidiaries contribute some portion of the cost of retiree health care benefits not covered through retiree contributions, the Company and certain subsidiaries do not reserve for the future cost. The health care benefit costs, which are equivalent to the required contribution, amounted to ¥5,820 million, ¥6,760 million and ¥7,614 million for the years ended March 31, 2010, 2011 and 2012, respectively.

16. Deferred compensation plans:

Nomura issues compensation awards to senior management and other employees, certain of which are linked to the Company's share price, in order to retain and motivate key staff.

These stock-based compensation awards comprise Plan A and Plan B Stock Acquisition Rights (SARs), Notional Stock Units (NSUs) and Collared Notional Stock Units (CSUs). SAR Plan A awards are effectively awards of stock options while SAR Plan B awards, NSUs and CSUs are analogous to awards of restricted stock. The Company also issues other deferred compensation awards, namely Notional index Units (NIUs) which are linked to world stock index quoted by Morgan Stanley capital International.

SAR Plan A

The Company issues SAR Plan A awards over the Company's common stock pursuant to several stock option plans which vest and become exercisable two years after the grant date, and expire approximately seven years after the grant date, subject to forfeiture on termination of employment. The exercise price generally is not less than the fair value of the Company's common stock on the grant date.

The fair value of the stock options as of the grant date is estimated using a Black-Scholes option-pricing model and using the following assumptions:

Expected volatilities based on historical volatility of the Company's common stock;

Expected dividend yield based on the current dividend rate at the time of grant;

Expected lives of the awards determined based on historical experience; and

The risk-free interest rate estimate based on yen swap rate with a maturity equal to the expected lives of options. The weighted-average amounts on the grant date fair values of options granted during the years ended March 31, 2010, 2011 and 2012 were ¥173, ¥127 and ¥48 per share, respectively. The weighted-average assumptions used in each of the years were as follows:

	Year ended March 31		
	2010	2011	2012
Expected volatility	40.06%	40.51%	41.78%
Expected dividends yield	3.25%	1.73%	3.31%
Expected lives (in years)	6	6	6

Risk-free interest rate	1.01%	0.76%	0.63%
-------------------------	-------	-------	-------

F-93

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents activity relating to SAR Plan A awards for the year ended March 31, 2012:

	Outstanding (number of shares)	Weighted-average exercise price	Weighted-average remaining life (years)
Outstanding as of March 31, 2011	13,817,800	¥ 1,176	3.9
Granted	2,858,000	302	
Exercised			
Repurchased			
Forfeited	(97,500)	1,183	
Expired	(1,224,000)	1,290	
Outstanding as of March 31, 2012	15,354,300	¥ 988	3.9
Exercisable as of March 31, 2012	9,662,300	¥ 1,339	10.6

No SAR Plan A awards were exercised during the years ended March 31, 2010, 2011 and 2012. The aggregate intrinsic values of SAR Plan A awards outstanding and exercisable as of March 31, 2012 were ¥182 million and ¥nil, respectively.

As of March 31, 2012, there was ¥213 million of total unrecognized compensation cost related to SAR Plan A awards. This cost is expected to be recognized over a weighted average period of 1.3 years.

SAR Plan B

The Company issues SAR Plan B awards over the Company's common stock pursuant to several effective stock unit plans which vest and become exercisable approximately from one to three years after the grant date, and expire approximately from seven to eight years after the grant date. The exercise price is a nominal ¥1 per share.

The following table presents activity relating to SAR Plan B awards for the year ended March 31, 2012:

	Outstanding (number of shares)	Weighted-average grant date fair value per share	Weighted-average remaining life (years)
Outstanding as of March 31, 2011	69,787,000	¥ 716	6.0
Granted	62,086,300	397 ⁽¹⁾	
Exercised	(9,271,600)	799	
Repurchased			
Forfeited	(8,226,100)	606	
Expired			
Outstanding as of March 31, 2012	114,375,600	¥ 544	5.6
Exercisable as of March 31, 2012	4,218,300	¥ 1,459	3.1

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

(1) The weighted-average grant date fair value per share for the years ended March 31, 2010 and 2011 were ¥618 and ¥638, respectively. The total intrinsic values of SAR Plan B awards exercised during the years ended March 31, 2010, 2011 and 2012 were ¥4,462 million, ¥3,934 million and ¥3,284 million, respectively.

The aggregate intrinsic values of SAR Plan B awards outstanding and exercisable as of March 31, 2012 were ¥41,747 million and ¥1,540 million, respectively.

F-94

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As of March 31, 2012, total unrecognized compensation cost relating to SAR Plan B awards was ¥14,119 million. This cost is expected to be recognized over a weighted average period of 1.7 years. The total fair values of shares vested during the years ended March 31, 2010, 2011 and 2012 were ¥5,593 million, ¥4,909 million and ¥3,868 million, respectively.

Total stock-based compensation expense recognized within *Non-interest expenses Compensation and benefits* in the consolidated statements of income relating to SAR Plan A and SAR Plan B awards for the years ended March 31, 2010, 2011 and 2012 was ¥9,737 million, ¥18,638 million and ¥26,869 million, respectively. Total related tax benefits recognized in the consolidated statements of income for stock-based compensation expense for the years ended March 31, 2010, 2011 and 2012 was ¥291 million, ¥546 million and ¥1,092 million, respectively. The dilutive effect of outstanding stock-based compensation plans is included in weighted average number of shares outstanding used in diluted EPS computations.

Cash received from exercise of SAR Plan A and SAR Plan B awards during the year ended March 31, 2012 was ¥9 million and the tax benefit realized from exercise of the stock options was ¥452 million.

NSU and CSU Awards

NSUs and CSUs are cash-settled awards linked to the price of the Company's common stock which have graded vesting over three years from grant date. NSUs replicate the key features of SAR Plan B awards described above but are settled in cash rather than the Company's common stock. CSUs are similar to NSUs but exposure of the employee to movements in the price of the Company's common stock is subject to a cap and floor.

The fair value of NSUs and CSUs are determined using the price of the Company's common stock.

The following table presents activity related to NSUs and CSUs for the year ended March 31, 2012:

	NSUs		CSUs	
	Outstanding (number of units)	Stock price	Outstanding (number of units)	Stock price
Outstanding as of March 31, 2011	48,543,628	¥ 350		¥
Granted	55,456,277	414 ⁽¹⁾	53,967,338	398 ⁽¹⁾
Vested	(29,882,636)	338 ⁽²⁾	(16,680,077)	376 ⁽²⁾
Forfeited	(5,706,291)		(4,190,773)	
Outstanding as of March 31, 2012	68,410,978	¥ 373 ⁽³⁾	33,096,488	¥ 373 ⁽³⁾

(1) Weighted-average price of the Company's common stock used to determine number of awards granted

(2) Weighted-average price of the Company's common stock used to determine the final cash settlement amount of the awards

(3) The price of the Company's common stock used to remeasure the fair value of the remaining outstanding unvested awards as of March 31, 2012

Total compensation expense recognized within *Non-interest expenses Compensation and benefits* in the consolidated statements of income relating to NSUs and CSUs for the years ended March 31, 2011 and 2012 were ¥13,708 million and ¥27,257 million, respectively. Total unrecognized compensation cost, based on the fair value of these awards as of March 31, 2012 was ¥8,499 million which will be recognized through the consolidated statements of income over a remaining weighted-average period of two years.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Other Awards**

In addition to the stock-based compensation awards described above, Nomura also grants NIUs to certain senior management and employees. NIUs are cash-settled awards linked to a world stock index quoted by Morgan Stanley Capital International which have graded vesting over three years from grant date.

The fair value of NIUs is determined using the price of the index.

The following table presents activity relating to NIUs for the year ended March 31, 2012:

	Outstanding (number of units)	Index price⁽¹⁾
Outstanding as of March 31, 2011		\$
Granted	58,890,897	3,300 ⁽²⁾
Vested	(18,785,827)	3,110 ⁽³⁾
Forfeited	(3,233,932)	
Outstanding as of March 31, 2012	36,871,138	\$ 3,320 ⁽⁴⁾

(1) The price of each unit is determined using 1/1000th of the index price.

(2) Weighted-average index price used to determine number of awards granted.

(3) Weighted-average index price used to determine the final cash settlement amount of the awards.

(4) Index price used to remeasure the total fair value of the remaining outstanding unvested awards as of March 31, 2012.

Total compensation expense recognized within *Non-interest expenses Compensation and benefits* in the consolidated statements of income relating to NIUs for the year ended March 31, 2012 was ¥8,819 million. Total unrecognized compensation cost, based on the fair value of these awards as of March 31, 2012 was ¥3,040 million which will be recognized through the consolidated statements of income over a remaining weighted-average period of two years.

Subsequent events

On May 16, 2012, the Company adopted a resolution to issue SARs No. 44, No. 45, No. 46, No. 47, No. 48, No. 49 and No. 50 of common stock pursuant to the SAR Plan B awards for directors and certain employees of the Company and subsidiaries and has issued SARs on June 5, 2012. The total number of SARs to be issued is 555,893 for the acquisition of 55,589,300 shares. The exercise price is a nominal ¥1 per share. The SARs vest and are exercisable one to five years after the grant date and expire six to ten years after the grant date.

In May, 2012, Nomura authorized the issuance of additional awards which are mainly linked to the Company's common stock price and a world index and a new performance-based award with a total grant date fair value of ¥45 billion (vesting period of up to five years) to certain senior management and employees as part of their compensation. Those awards linked to the Company's common stock price and to a world index will be settled typically in cash or in other type of assets calculated during the certain future period prior to the settlement date. As part of the new performance-based award, recipients receive notional performance units which are linked to profitability of the Nomura and business segments over a cumulative two year performance period. At the end of the performance period, depending on the extent to which these performance conditions are met, the performance units will be converted into a pre-determined amount of SAR Plan B or NSUs.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****17. Restructuring initiatives:**

In anticipation of an ongoing environment of economic uncertainty, Nomura has undertaken group-wide restructuring initiatives primarily focusing on the Wholesale Division to improve profitability, select accretive businesses aligned with market conditions and allocate business resources to growth regions accordingly.

As a result of these restructuring initiatives, Nomura recognized restructuring costs of ¥12,397 million in the consolidated statements of income for the year ended March 31, 2012. These primarily comprise employee termination costs reported within *Non-interest expenses Compensation and benefits*. As of March 31, 2012, ¥5,314 million of this amount had been settled and the remaining ¥7,083 million is reported as a liability.

These restructuring initiatives are expected to be completed during the year ending March 31, 2013, however, the total costs to be incurred going forward are currently under evaluation.

18. Income taxes:

The components of income tax expense reflected in the consolidated statements of income are as follows:

	Millions of yen		
	Year ended March 31		
	2010	2011	2012
Current:			
Domestic	¥ 12,988	¥ 175	¥ 13,481
Foreign	4,599	5,956	7,650
Subtotal	17,587	6,131	21,131
Deferred:			
Domestic	28,207	56,194	34,274
Foreign	(8,633)	(995)	3,498
Subtotal	19,574	55,199	37,772
Total	¥ 37,161	¥ 61,330	¥ 58,903

The income tax benefit recognized from net operating losses for the years ended March 31, 2010, 2011 and 2012 totaled ¥10,374 million, ¥4,645 million and ¥1,358 million, respectively.

The Company and its wholly-owned domestic subsidiaries have adopted the consolidation tax system permitted under Japanese tax law. The consolidation tax system only imposes a national tax. Since April 1, 2004, Nomura's domestic effective statutory tax rate has been approximately 41%. However, as a result of the revisions of domestic tax laws, the domestic statutory tax rates are approximately 38% between April 1, 2012 and March 31, 2015 and approximately 36% thereafter.

Foreign subsidiaries are subject to income taxes of the countries in which they operate. The relationship between income tax expense and pretax accounting income (loss) is affected by a number of items, including various tax credits, certain expenses not allowable for income tax purposes and different tax rates applicable to foreign subsidiaries.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A reconciliation of the effective income tax rate reflected in the consolidated statements of income to the normal effective statutory tax rate is as follows:

	Year ended March 31		
	2010	2011	2012
Normal effective statutory tax rate	41.0%	41.0%	41.0%
Impact of:			
Changes in deferred tax valuation allowance	6.7	1.6	(22.5)
Taxable items to be added on financial profit	10.8	5.3	3.8
Non-deductible expenses	10.5	16.6	23.3
Non-taxable revenue	(7.8)	(8.4)	(29.7)
Dividends from foreign subsidiaries	1.0	0.0	0.9
Tax effect of undistributed earnings of foreign subsidiaries	0.1	(0.0)	(1.1)
Different tax rate applicable to income (loss) of foreign subsidiaries	(26.9)	10.8	14.1
Changes in domestic tax laws			45.7
Expiration of loss carryforwards	0.7	1.3	2.8
Tax benefit recognized on the devaluation of investment in subsidiaries and affiliates		(1.3)	(8.8)
Other	(0.8)	(1.1)	(0.2)
Effective tax rate	35.3%	65.8%	69.3%

The net deferred tax assets of ¥241,911 million and ¥201,244 million reported within *Other assets* *Other* in the consolidated balance sheets as of March 31, 2011 and 2012, respectively, represent tax effects of the total of the temporary differences and tax loss carryforwards in components of those tax jurisdictions with net deductible amounts in future years. The net deferred tax liabilities of ¥12,180 million and ¥63,493 million reported within *Other liabilities* in the consolidated balance sheets as of March 31, 2011 and 2012, respectively, represent the total of the temporary differences in components of those tax jurisdictions with net taxable amounts in future years.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Details of deferred tax assets and liabilities are as follows:

	Millions of yen March 31	
	2011	2012
Deferred tax assets		
Depreciation, amortization and valuation of fixed assets	¥ 10,243	¥ 70,406
Investments in subsidiaries and affiliates	171,520	177,522
Valuation of financial instruments	214,706	197,961
Accrued pension and severance costs	41,402	34,291
Other accrued expenses and provisions	77,649	84,628
Operating losses	317,519	313,245
Other	5,215	20,034
Gross deferred tax assets	838,254	898,087
Less Valuation allowance	(461,966)	(490,986)
Total deferred tax assets	376,288	407,101
Deferred tax liabilities		
Investments in subsidiaries and affiliates	69,363	78,262
Valuation of financial instruments	47,694	56,732
Undistributed earnings of foreign subsidiaries	4,409	3,167
Valuation of fixed assets	19,355	117,112
Other	5,736	14,077
Total deferred tax liabilities	146,557	269,350
Net deferred tax assets	¥ 229,731	¥ 137,751

The valuation allowance mainly relates to deferred tax assets of consolidated subsidiaries with operating loss carryforwards for tax purposes. Based on the cumulative and continuing losses of these subsidiaries, management of Nomura believes that it is more likely than not that the related deferred tax assets will not be realized. The allowances against deferred tax assets are determined based on a review of future realizable value. Changes in the valuation allowance for deferred tax assets are shown below:

	Millions of yen Year ended March 31		
	2010	2011	2012
Balance at beginning of year	¥ 493,906	¥ 501,554	¥ 461,966
Net change during the year	7,648 ⁽¹⁾	(39,588) ⁽²⁾	29,020 ⁽³⁾
Balance at end of year	¥ 501,554	¥ 461,966	¥ 490,986

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

- (1) Includes ¥8,313 million and ¥2,667 million related to subsidiaries which is mainly due to an increase in non-recoverability of losses in certain foreign subsidiaries and in certain subsidiaries in Japan, negative ¥3,332 million related to the Company which is due to the decrease of allowance for the deferred tax assets previously recorded. In total, ¥7,648 million of allowances increased for the year ended March 31, 2010.
- (2) Includes negative ¥33,523 million related to foreign subsidiaries which is mainly due to an effect of utilized loss carryforwards in certain U.S. subsidiaries, negative ¥2,657 million and negative ¥3,408 million related to Japanese subsidiaries and the Company, respectively, which is due mainly to a result of a review of future realizable value for the deferred tax assets previously recorded. In total, ¥39,588 million of allowances decreased for the year ended March 31, 2011.

F-99

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

- (3) Includes ¥24,715 million related to foreign subsidiaries which is mainly due to an increase in non-recoverability of losses in certain foreign subsidiaries, ¥20,014 million related to Japanese subsidiaries which is mainly due to the effect of the conversion of Nomura Land and Building Co., Ltd. into a subsidiary of Nomura Holdings, Inc. and negative ¥15,709 million related to the Company which is due mainly to the decrease of allowance for the deferred tax assets previously recorded. In total, ¥29,020 million of allowances increased for the year ended March 31, 2012.

As of March 31, 2012, no deferred income taxes have been provided on undistributed earnings of foreign subsidiaries not expected to be remitted in the foreseeable future totaling ¥6,424 million. It is not practicable to determine the amount of income taxes payable in the event all such foreign earnings are repatriated.

As of March 31, 2012, Nomura has net operating loss carryforwards, for income tax purposes, of ¥1,190,179 million resulting from certain U.S. and European subsidiaries. These losses, except for ¥591,990 million, which can be carried forward indefinitely, expire as follows: 2012 through 2021 ¥365,464 million, 2022 and thereafter ¥232,725 million. Nomura believes that it is more likely than not that these loss carryforwards, less valuation allowance, will be realized.

The total amount of unrecognized tax benefits was ¥nil as of March 31, 2010. Also there were no movements of the gross amounts in unrealized tax benefits and the amount of interest and penalties recognized due to the unrealized tax benefits during the year ended March 31, 2010.

The total amount of unrecognized tax benefits as of March 31, 2011 and 2012 were not significant. Also there were no significant movements of the gross amounts in unrealized tax benefits and the amount of interest and penalties recognized due to the unrealized tax benefits during the years ended March 31, 2011 and 2012. Nomura recognizes the accrual of interest related to unrecognized tax benefits and penalties related to unrecognized tax benefits in *Income tax expense* in the consolidated statements of income.

Nomura is under continuous examination by the Japanese National Tax Agency and other tax authorities in major operating jurisdictions such as the United Kingdom (U.K.) and U.S. Nomura regularly assesses the likelihood of additional assessments in each tax jurisdiction and the impact on the consolidated financial statements. A liability for unrecognized tax benefits are recorded in the amount that is sufficient to cover potential exposure for an additional tax assessment depending on likelihood. It is reasonably possible that there may be a significant increase in unrecognized tax benefits within 12 months of March 31, 2012. Quantification of an estimated range cannot be made at this time due to the uncertainty of the potential outcomes. However, Nomura does not expect that any change in the gross balance of unrecognized tax benefits would have a material effect on its financial condition.

Nomura operates in multiple taxing jurisdictions, and faces audits from various tax authorities regarding many issues including but not limited to transfer pricing, deductibility of certain expenses, creditability of foreign taxes, and other matters. The table below summarizes the major jurisdictions in which Nomura operates and the earliest year in which Nomura remains subject to examination. Under Hong Kong Special Administrative Region (Hong Kong) tax law, the time bar does not apply if the entity records a tax loss, thus not stated in below table.

Jurisdiction	Year
Japan	2007 ⁽¹⁾
U.K.	2011
U.S.	2008

- (1) For transfer pricing, the earliest year in which Nomura remains subject to examinations is 2006.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Revisions of domestic tax laws**

On December 2, 2011, the Act to partially revise the Income Tax Act and others in order to construct a tax system corresponding to changes in the structure of economic system (Act No. 114 of 2011) (the Act 114) was promulgated. Under the Act 114, effective from the fiscal year beginning on or after April 1, 2012, the corporate income tax rate will be reduced from 30% to 25.5% and the use of operating loss carryforwards for tax purposes will be limited to 80% of the current year taxable income before deducting operating loss carryforwards for tax purposes. Also, on December 2, 2011, the Special measures act to secure the financial resources required to implement policy on restoration after the East Japan Earthquake (Act No. 117 of 2011) (the Act 117) was promulgated. Under the Act 117, effective for three fiscal years beginning between April 1, 2012 and March 31, 2015, the Special Reconstruction Corporate Tax will be imposed on the companies, which will be calculated by multiplying the base corporate income tax by 10%. As a result, the domestic statutory tax rates to calculate deferred tax assets and liabilities are 38% for the temporary differences expected to be reversed between April 1, 2012 and March 31, 2015 and 36% thereafter.

Due to these revisions, net deferred tax assets decreased by ¥5,510 million as at the revision of domestic tax laws. For the year ended March 31, 2012, income tax expenses increased by ¥5,510 million and net income attributable to NHI shareholders decreased by ¥13,251 million.

19. Shareholders equity:

Changes in shares of common stock outstanding are shown below:

	Shares Year ended March 31,		
	2010	2011	2012
Number of shares outstanding at beginning of year	2,604,779,843	3,669,044,614	3,600,886,932
New issue	800,000,000		103,429,360
Conversion of convertible bonds	258,040,481		
Common stock held in treasury:			
Repurchases of common stock	(26,857)	(75,030,934)	(50,093,031)
Sales of common stock	6,328	2,409	1,530
Common stock issued to employees	6,122,900	6,870,600	9,271,600
Other net change in treasury stock	121,919	243	(12,496)
Number of shares outstanding at end of year	3,669,044,614	3,600,886,932	3,663,483,895

The amount available for dividends and acquisition of treasury stock is subject to the restrictions under the Companies Act of Japan. Additional paid-in capital and retained earnings include amounts which the Companies Act of Japan prohibits for the use of dividends and acquisition of treasury stock. As of March 31, 2010, 2011 and 2012, the amounts available for distributions were ¥546,483 million, ¥480,471 million and ¥483,126 million, respectively. These amounts are based on the amounts recorded in the Company's unconsolidated financial statements maintained in accordance with accounting principles and practices prevailing in Japan. U.S. GAAP adjustments incorporated in the accompanying consolidated financial statements but not recorded in the Company's unconsolidated financial statements have no effect on the determination of the amounts available for distributions under the Companies Act of Japan.

Retained earnings include Nomura's share of investee undistributed earnings which have been accounted for based on the equity method, and those Nomura's share of investee undistributed earnings amounted to ¥72,405 million, ¥77,145 million and ¥50,922 million as of March 31, 2010, 2011 and 2012, respectively.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Dividends on common stock per share were ¥8 for the year ended March 31, 2010, ¥8 for the year ended March 31, 2011 and ¥6 for the year ended March 31, 2012.

On July 30, 2010, the board of directors approved a repurchase program of Nomura Holdings common stock in accordance with Article 459-1 of the Companies Act of Japan as follows: (a) total number of shares authorized for repurchase is up to 75,000,000 shares, (b) total value of shares authorized for repurchase is up to ¥50 billion and (c) the share buyback will run from August 9, 2010 to September 17, 2010. Under this repurchase program, the Company repurchased 75,000,000 shares of common stock at a cost of ¥37,362 million.

The Company issued new shares of common stock and repurchased common stock in accordance with NLB becoming a wholly owned subsidiary of Nomura for the year ended March 31, 2012. See Note 11 *Business combinations* for further information.

The change in common stock held in treasury includes the change in shares issued to employees under stock-based compensation plans, shares sold to enable shareholders to hold round lots of the 100 share minimum tradable quantity (adding-to-holdings requests) or shares acquired to create round lots or eliminate odd lots. Common stock held in treasury also includes, as of March 31, 2010, 2011, and 2012, 1,063,153 shares, or ¥2,189 million, 1,062,910 shares, or ¥2,189 million and 908,498 shares, or ¥1,985 million, respectively, held by affiliated companies.

Nomura issued 766,000,000 shares and 34,000,000 shares through a public offering and third-party allotment, respectively, in October, 2009.

20. Regulatory requirements:

Until the end of March 2011, the Company calculated its consolidated capital adequacy ratio according to the Criteria for bank holding companies to judge whether their capital adequacy status is appropriate in light of their own and their subsidiaries' asset holdings, etc. under Article 52-25 of the Banking Act, as permitted under the provision in the Comprehensive Guidelines for Supervision of Financial Instruments Business Operators, etc. In April 2011, the Company has been assigned as Final Designated Parent Company who must calculate consolidated regulatory capital adequacy ratio and since then, our consolidated regulatory capital adequacy ratio is calculated based on FSA's ministerial notice of the Establishment of standards on sufficiency of capital stock of a final designated parent company and its subsidiary entities, etc. compared to the assets held thereby (2010 FSA Regulatory Notice No. 130; Capital Adequacy Notice on Final Designated Parent Company). Note that Capital Adequacy Notice on Final Designated Parent Company has revised in line with Basel 2.5 and we calculate Basel 2.5-based consolidated regulatory capital adequacy ratio since December 2011.

In accordance with Article 3 of the Capital Adequacy Notice on Final Designated Parent Company, our consolidated regulatory capital adequacy ratio is calculated based on the amounts of qualifying capital, credit risk-weighted assets, market risk, and operational risk. Also in accordance with Article 2 of the Capital Adequacy Notice on Final Designated Parent Company, our consolidated regulatory capital adequacy ratio is higher than 8%. As of March 31, 2011 and 2012, the Company was in compliance with the minimum capital requirement.

Under the Financial Instruments and Exchange Act (the FIEA), NSC is subject to the capital adequacy rules of the FSA. This rule requires the maintenance of a capital adequacy ratio, which is defined as the ratio of adjusted capital to a quantified total of business risk, of not less than 120%. Adjusted capital is defined as net worth (which includes shareholders' equity, net unrealized gains and losses on securities held, reserves and subordinated debts) less illiquid assets. The business risks are divided into three categories: (1) market risks,

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(2) counterparty risks, and (3) basic risks. Under this rule, there are no restrictions on the operations of the companies provided that the resulting net capital adequacy ratio exceeds 120%. As of March 31, 2011 and 2012, the capital adequacy ratio of NSC exceeded 120%.

Financial Instruments Firms in Japan are required to segregate cash deposited by clients on securities transactions under the FIEA. As of March 31, 2011 and 2012, NSC segregated bonds with a market value of ¥394,863 million and ¥269,979 million and equities with a market value of ¥nil and ¥6,353 million, respectively, which were either included in *Trading assets* on the accompanying consolidated balance sheets or borrowed under lending and borrowing securities contracts, as a substitute for cash.

In the U.S., Nomura Securities International, Inc. (NSI) is registered as a broker-dealer under the Securities Exchange Act of 1934 and as a futures commission merchant with the Commodity Futures Trading Commission (CFTC). NSI is also regulated by self-regulatory organizations, such as the Financial Industry Regulatory Authority and the Chicago Mercantile Exchange Group as its designated self regulatory organization. NSI is subject to the Securities and Exchange Commission's Uniform Net Capital Rule (Rule 15c3-1) and other related rules, which require net capital, as defined under the alternative method, of not less than the greater of \$1,000,000 or 2% of aggregate debit items arising from client transactions. The subsidiary is also subject to CFTC Regulation 1.17 which requires the maintenance of net capital of 8% of the total risk margin requirement, as defined, for all positions carried in client accounts and nonclient accounts or \$1,000,000, whichever is greater. The subsidiary is required to maintain net capital in accordance with the SEC, CFTC, or other various exchange requirements, whichever is greater. As of March 31, 2011 and 2012, the subsidiary was in compliance with all applicable regulatory capital adequacy requirements.

In Europe, the Nomura Europe Holdings plc (NEHS) is regulated on a consolidated basis by the Financial Services Authority in the U.K., which imposes minimum capital adequacy requirements to the NEHS. Nomura International plc (NIP), the most significant of NEHS' subsidiaries, acts as a securities brokerage and dealing business. NIP is regulated and has minimum capital adequacy requirements imposed on it on a standalone basis by the Financial Services Authority in the U.K. Nomura Bank International plc (NBI), another subsidiary of NEHS, is also regulated by the Financial Services Authority in the U.K. on a standalone basis. As of March 31, 2011 and 2012, the NEHS, NIP and NBI were in compliance with all relevant regulatory capital related requirements.

In Asia, Nomura International (Hong Kong) Limited (NIHK) and Nomura Singapore Ltd (NSL) are regulated by the respective authorities. NIHK is licensed by the Securities and Futures Commission in Hong Kong to carry out regulated activities including the provision of securities brokerage and dealing, underwriting, investment advisory and securities margin financing services for its clients. NIHK has a branch located in Taiwan which is regulated by its local regulators under its respective jurisdictions. Activities of NIHK including its branch are subject to the Securities and Futures (Financial Resources) Rules which require it, at all times, to maintain its liquid capital at a level not less than its required liquid capital. Liquid capital means an amount by which its liquid assets exceed its ranking liabilities. Required liquid capital is calculated in accordance with the provisions laid down in the Securities and Futures (Financial Resources) Rules. NSL is a merchant bank with Asian Currency Unit (ACU) license governed by the Monetary Authority of Singapore (MAS). NSL carries out its ACU regulated activities including, among others, securities brokerage and dealing business. The regulations require NSL to maintain a minimum capital of SGD3 million. Currently, NSL is observing relevant financial ratios which fulfill the requirement from MAS. As of March 31, 2011 and 2012, NIHK and NSL were in compliance with all relevant regulatory capital related requirements.

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

21. Affiliated companies and other equity-method investees:

Nomura's significant affiliated companies and other equity-method investees include JAFCO Co., Ltd. (JAFCO), Nomura Research Institute, Ltd. (NRI), and Fortress Investment Group LLC (Fortress). During the year ended March 31, 2012, Nomura Land and Building Co., Ltd. (NLB) and Chi-X Europe Limited (Chi-X Europe), which were included in Nomura's significant affiliated companies, became no longer affiliated companies.

JAFCO

JAFCO, which is a listed company in Japan, manages various venture capital funds and provides private equity-related investment services to portfolio companies.

In May 2011, the Company purchased 382,000 shares of NLB in ¥18,145 million from JAFCO when Nomura purchased additional issued shares of NLB and made it a subsidiary. See Note 11 *Business combinations* for further information. In addition, Nomura indirectly acquired an additional 0.3% equity interest in JAFCO at the same time.

As of March 31, 2012, Nomura's ownership of JAFCO was 24.4% and there was no remaining equity method goodwill included in the carrying amount of the investment.

NRI

NRI develops and manages computer systems and provides research services and management consulting services. One of the major clients of NRI is Nomura.

In May 2011, Nomura indirectly acquired an additional 0.9% equity interest in NRI, when Nomura purchased additional issued shares of NLB and made it a subsidiary.

In July 2011, the Company acquired 381,520 shares of NLB from NRI and issued 45,019,360 common shares to NRI as a result of the share exchange. See Note 11 *Business combinations* for further information.

As of March 31, 2012, Nomura's ownership of NRI was 39.1% and the remaining balance of equity method goodwill included in the carrying value of the investment was ¥56,934 million.

NLB

NLB owns certain of Nomura's leased office space in Japan. NLB became a consolidated subsidiary of Nomura on May 24, 2011 and it has become no longer an affiliated company of Nomura. See Note 11 *Business combinations* for further information. In addition, the lease transactions with Nomura while NLB was an affiliated company of Nomura are disclosed in Note 10 *Leases* .

Nomura Real Estate Holdings, Inc. which is a subsidiary of NLB is a listed company in the First Section of the Tokyo Stock Exchange.

Fortress

Fortress is a global investment management firm. Fortress raises, invests and manages private equity funds, hedge funds and publicly traded alternative investment vehicles. The investment in Fortress is treated as an investment in a limited partnership and is accounted for by the equity method of accounting.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In May 2009, Fortress sold 46,000,000 Class A shares in a public offering and Nomura purchased 5,400,000 of these shares, at the public offering price.

As of March 31, 2012, Nomura's ownership of Fortress was 11.4% and there was no remaining equity method goodwill included in the carrying value of the investment.

Chi-X Europe

Chi-X Europe was a consolidated subsidiary of Nomura until December 31, 2009. On December 31, 2009, nonvoting shares issued by Chi-X Europe to third parties were converted into voting shares. As a result, Nomura's voting interest fell to 34% and Nomura ceased to have a controlling financial interest in Chi-X Europe, which was subsequently deconsolidated and accounted for under the equity method from December 31, 2009.

As part of the deconsolidation process, a gain of ¥3,074 million was recognized which is reported in the consolidated statements of income within *Revenue Other*. The gain resulted from a difference between the book value of the net assets of Chi-X Europe and the fair value of the retained investment in the company.

The fair value of the retained investment in Chi-X Europe was estimated using a combination of market and income approaches. The market approach was based on the *Guideline Public Company Method* whereby market multiples are derived from quoted market prices of publicly traded companies engaged in the same or similar line of business to Chi-X Europe. Under the income approach, a discounted cash flow method was used.

On February 18, 2011, BATS Global Markets, Inc. (*BATS*) entered into a definitive agreement to acquire a 100% of the outstanding stock of Chi-X Europe. After the regulatory approval, Nomura exchanged its shares in Chi-X Europe for approximately 7% (fully diluted) of the outstanding stock of BATS. As a result, Chi-X Europe has become no longer an affiliated company of Nomura.

Summary financial information

A summary of financial information for JAFCO, NRI and NLB is as follows:

	Millions of yen	
	March 31	
	2011	2012 ⁽¹⁾
Total assets	¥ 2,096,554	¥ 564,086
Total liabilities	1,521,653	200,020

	Millions of yen		
	Year ended March 31		
	2010	2011	2012 ⁽²⁾
Net revenues	¥ 526,350	¥ 590,985	¥ 161,209
Non-interest expenses	482,573	535,564	105,520
Net income attributable to the companies	22,779	29,392	31,007

(1) NLB's assets and liabilities are not included because it is no longer an affiliated company of Nomura as of March 31, 2012.

(2) For NLB, financial information while it was an affiliated company of Nomura is included.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A summary of financial information for Fortress is as follows:

	Millions of yen March 31	
	2011 ⁽¹⁾	2012 ⁽¹⁾
Total assets	¥ 172,677	¥ 184,650
Total liabilities	95,396	96,312

Net income (loss) attributable to the company	(23,651)	(24,400)	(36,994)

(1) Financial information for Fortress is as of its fiscal years ended December 31, 2009, 2010 and 2011, respectively. Nomura recognizes its share of Fortress's earnings on a three-month lag.

A summary of balances and transactions with affiliated companies and other equity-method investees, except for lease transactions with NLB and NRI, which are disclosed in Note 10 *Leases*, is presented below:

	Millions of yen March 31	
	2011	2012
Investments in affiliated companies	¥ 260,339	¥ 183,305
Advances to affiliated companies	12,766	10,649
Other receivables from affiliated companies	644	5,160
Other payables to affiliated companies	14,825	5,643

	Millions of yen Year ended March 31		
	2010	2011	2012
Revenues	¥ 362	¥ 3,056	¥ 5,635
Non-interest expenses	58,219	52,796	49,810
Purchase of software, securities and tangible assets	25,954	20,945	22,904

The aggregate carrying amount and fair value of investments in affiliated companies and other equity-method investees for which a quoted market price is available are as follows:

	Millions of yen March 31	
	2011	2012
Carrying amount	¥ 182,109	¥ 172,647

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Fair value 198,439 208,827

Equity in earnings of equity-method investees, including those above, was a gain of ¥12,924 million, gain of ¥11,602 million and gain of ¥5,716 million for the years ended March 31, 2010, 2011 and 2012, respectively. Equity in earnings of equity-method investees is reported within *Revenue Other* in the consolidated statements of income. Dividends from equity-method investees for the years ended March 31, 2010, 2011 and 2012 were ¥4,827 million, ¥4,802 million and ¥4,747 million, respectively.

F-106

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****22. Commitments, contingencies and guarantees:****Commitments***Credit and investment commitments*

In connection with its banking and financing activities, Nomura provides commitments to extend credit which generally have fixed expiration dates. In connection with its investment banking activities, Nomura enters into agreements with clients under which Nomura commits to underwrite notes that may be issued by the clients. The outstanding commitments under these agreements are included below in commitments to extend credit.

Nomura has commitments to invest in various partnerships and other entities, primarily in connection with its merchant banking activities, and also has commitments to provide financing for investments related to these partnerships. The outstanding commitments under these agreements are included in commitments to invest in partnerships.

Certain consolidated VIEs which are engaged in the aircraft leasing business have commitments to purchase aircraft. The outstanding commitments under these agreements are included in commitments to purchase aircraft.

These commitments outstanding were as follows:

	Millions of yen	
	March 31	
	2011	2012
Commitments to extend credit	¥ 264,736	¥ 332,009
Commitments to invest in partnerships	38,008	28,825
Commitments to purchase aircraft	77,928	52,411

As of March 31, 2012, these commitments had the following maturities:

	Total contractual amount	Millions of yen			
		Years to Maturity			
		Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Commitments to extend credit	¥ 332,009	¥ 81,515	¥ 48,052	¥ 147,354	¥ 55,088
Commitments to invest in partnerships	28,825	15,155	7,961	971	4,738
Commitments to purchase aircraft	52,411	25,727	26,684		

The contractual amounts of these commitments to extend credit represent the amounts at risk should the contracts be fully drawn upon, should the counterparties default, and assuming the value of any existing collateral becomes worthless. The total contractual amount of these commitments may not represent future cash requirements since the commitments may expire without being drawn upon. The credit risk associated with these commitments varies depending on the clients' creditworthiness and the value of collateral held. Nomura evaluates each client's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by Nomura upon extension of credit, is based on credit evaluation of the counterparty.

Other commitments

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

The amounts of commitments to purchase real estate for sale and rental were ¥nil as of March 31, 2011 and ¥234,400 million as of March 31, 2012. These included ¥139,376 million with maturities of less than 1 year and ¥95,024 million with maturities of 1 to 5 years. Purchase obligations for goods or services that include payments for construction-related, advertising, and computer and telecommunications maintenance agreements amounted to ¥39,543 million as of March 31, 2011 and ¥37,237 million as of March 31, 2012.

F-107

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Nomura has commitments under resale and repurchase agreements including amounts in connection with collateralized agreements, collateralized financing and Gensaki transactions. These commitments amounted to ¥1,337 billion for resale agreements and ¥1,605 billion for repurchase agreements as of March 31, 2011 and ¥2,519 billion for resale agreements and ¥1,711 billion for repurchase agreements as of March 31, 2012. These amounts include certain types of repurchase transactions and securities transactions which Nomura accounts for as sales rather than collateralized financings in accordance with ASC 860.

In Japan, there is a market in which participants lend and borrow debt and equity securities without collateral to and from financial institutions. Under these arrangements, Nomura had obligations to return debt and equity securities borrowed without collateral of ¥300 billion and ¥269 billion as of March 31, 2011 and 2012, respectively.

As a member of securities clearing houses and exchanges, Nomura may be required to pay a certain share of the financial obligations of another member who may default on its obligations to the clearing house or the exchange. These guarantees are generally required under the membership agreements. To mitigate these risks, exchanges and clearing houses often require members to post collateral. The potential for Nomura to make payments under such guarantees is deemed remote.

Contingencies

Investigations, lawsuits and other legal proceedings

In the normal course of business as a global financial services entity, Nomura is involved in investigations, lawsuits and other legal proceedings and, as a result, may suffer loss from any fine, penalties or damages awarded against Nomura, any settlements Nomura chooses to make to resolve a matter, and legal and other advisory costs incurred to support and formulate a defense.

The ability to predict the outcome of these actions and proceedings is inherently difficult, particularly where claimants are seeking substantial or indeterminate damages, where investigations and legal proceedings are at an early stage, where the matters present novel legal theories or involve a large number of parties, or which take place in foreign jurisdictions with complex or unclear laws.

The Company regularly evaluates each legal proceeding and claim on a case-by-case basis in consultation with external legal counsel to assess whether an estimate of possible loss or range of loss can be made, if accruals are not appropriate. In accordance with ASC 450 *Contingencies* (ASC 450), the Company recognizes a liability for this risk of loss arising on each individual matter when a loss is probable and the amount of such loss or range of loss can be reasonably estimated. The amount recognized as a liability is reviewed at least quarterly and is revised when further information becomes available. If these criteria are not met for an individual matter, such as if an estimated loss is only reasonably possible rather than probable, no liability is recognized. However, where a material loss is reasonably possible, the Company discloses details of the legal proceeding or claim below. Under ASC 450 an event is defined as reasonably possible if the chance of the loss to the Company is more than remote but less than probable.

The most significant actions and proceedings against Nomura are summarized below. The Company believes that, based on current information available as of the date of these consolidated financial statements, the ultimate resolution of these actions and proceedings will not be material to the Company's financial condition. However, an adverse outcome in certain of these matters could have a material adverse effect on the consolidated results of operations or cash flows in a particular quarter or annual period.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

For those significant actions and proceedings described below where the counterparty has alleged a specific amount of damages, the Company currently estimates that the reasonably possible for the matter would not exceed the amount specified in each case. For each of these matters, the specific amount alleged (which is the Company's current estimate of the maximum reasonably possible loss) is indicated in the description of the matter below.

For certain other significant actions and proceedings described below, management is unable to provide an estimate of the reasonably possible loss or range of reasonably possible losses because, among other reasons, (i) the proceedings are at such an early stage there is not enough information available to assess whether the stated grounds for the claim are viable; (ii) damages have not been identified by the claimant; (iii) damages are unsupported and/or exaggerated; (iv) there is uncertainty as to the outcome of pending appeals or motions; (v) there are significant legal issues to be resolved that may be dispositive, such as the applicability of statutes of limitations; and/or (vi) there are novel or unsettled legal theories underlying the claims.

In January 2008, Nomura International plc (NIP) was served with a tax notice issued by the tax authorities in Pescara, Italy alleging breaches by NIP of the U.K.-Italy Double Taxation Treaty of 1998 (the Tax Notice). The alleged breaches relate to payments to NIP of tax credits on dividends on Italian shares. The Tax Notice not only denies certain payments to which NIP claims to be entitled but is also seeking reimbursement of approximately EUR 36.3 million, including interest, already refunded. NIP will vigorously challenge the Pescara Tax Court's decision in favor of the local tax authorities. The specified amount alleged is the Company's current estimate of the maximum reasonably possible loss from this matter.

In April 2010, Lehman Brothers Holdings Inc. and Lehman Brothers Special Financing Inc. (collectively, Lehman Inc.) commenced proceedings in the U.S. Bankruptcy Court in New York objecting to the proofs of claims filed by the Company's subsidiaries, Nomura Securities Co., Ltd. (NSC), NIP and Nomura Global Financial Products Inc. (NGFP) in respect of swaps and other derivative transactions in the total amount of approximately \$1 billion; and in the case of NSC and NIP, Lehman Inc. sought to recover damages. On January 5, 2012, the parties filed a stipulation dismissing with prejudice the proceedings commenced against NIP and resolving the claims of NIP and NGFP against Lehman.

Fairfield Sentry Ltd. and Fairfield Sigma Ltd. (collectively, the Fairfield Funds), which are now in liquidation and were feeder funds to Bernard L. Madoff Investment Securities LLC (under the liquidation with its trustee's on-going recovery procedure pursuant to the Securities Investor Protection Act in the U.S. since December 2008), have filed lawsuits in the Supreme Court of the State of New York and U.S. Bankruptcy Court against a number of investors, including NIP, seeking to recover redemption payments that the Fairfield Funds allege, inter alia, were mistakenly made. In a complaint dated October 5, 2010, the amount currently claimed against NIP was approximately \$34 million plus interest. The claim against NIP is currently in the U.S. Bankruptcy Court. The specified amount alleged is the Company's current estimate of the maximum reasonably possible loss from this matter.

In November 2010, the High Court in London ruled in favor of NIP and Nomura Bank International plc (NBI) dismissing claims made by WestLB AG (WestLB) against them. WestLB first served the proceedings on NIP and NBI in April 2009, claiming that under the terms of a note issued by NBI and which matured in October 2008, WestLB was entitled to receive approximately \$22 million, which it claimed to be the value of a fund of shares referable to the NBI note. WestLB sought permission to appeal and on April 24, 2012 the Court of Appeal dismissed WestLB's appeal finally concluding the litigation.

In March 2011, PT Bank Mutiara Tbk. (Bank Mutiara) commenced proceedings in the Commercial Court of the Canton of Zurich against a special purpose company (SPC) established at the request of NIP. These are proceedings to challenge the SPC's rights over approximately \$156 million in an account held in Switzerland.

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The SPC has a security interest over the money pursuant to a loan facility with a third party. The SPC does not believe that Bank Mutiara has any enforceable security interest over the funds and is seeking release of the monies.

In April 2011, the Federal Home Loan Bank of Boston (FHLB-Boston) commenced proceedings in the Superior Court of Massachusetts against numerous sponsors, issuers and underwriters of residential mortgage-backed securities (MBS), and their controlling persons, including certain of the Company's U.S. subsidiaries. The action alleges that FHLB-Boston purchased residential MBS issued by a U.S. subsidiary of the Company for which the offering materials contained untrue statements or omitted material facts concerning the underwriting standards used by the original lenders and the characteristics of the loans underlying the securities. FHLB-Boston seeks rescission of its purchases or compensatory damages pursuant to state law. FHLB-Boston alleges that it purchased certificates in four offerings issued by a U.S. subsidiary of the Company but does not specify the amount of its purchases or the amount of any alleged losses. Due to the lack of information at this early stage of the litigation and the uncertainties involved, including lack of information concerning the alleged purchases by the plaintiff, and uncertainties concerning significant legal issues that may be dispositive, the Company cannot provide an estimate of exposure to loss related to this matter at this time.

In July 2011, the National Credit Union Administration Board (NCUA) commenced proceedings in the United States District Court for the Central District of California as liquidating agent of Western Corporate Federal Credit Union (Wescorp) against various sponsors, issuers and underwriters of residential MBS purchased by Wescorp. The complaint alleges that Wescorp purchased residential MBS issued by certain of the Company's U.S. subsidiaries, among others, for which the offering materials contained untrue statements or omitted material facts concerning the underwriting standards used by the original lenders. The complaint alleges that Wescorp purchased certificates in two offerings in which a U.S. subsidiary of the Company was the issuer in the original principal amount of approximately \$83 million and seeks rescission of its purchases or compensatory damages. Due to the lack of information at this early stage of the litigation and the uncertainties involved, the Company cannot provide an estimate of exposure to loss related to this matter at this time.

In September 2011, the Federal Housing Finance Agency (FHFA), as conservator for the government sponsored enterprises, Federal National Mortgage Association and Federal Home Loan Mortgage Corporation (the GSEs), commenced proceedings in the United States District Court for the Southern District of New York against numerous sponsors, issuers and underwriters of residential MBS, and their controlling persons, including certain of the Company's U.S. subsidiaries. The action alleges that the GSEs purchased residential MBS issued by certain Company subsidiaries in the U.S. for which the offering materials contained untrue statements or omitted material facts concerning the underwriting standards used by the original lenders and the characteristics of the loans underlying the securities. FHFA alleges that the GSEs purchased certificates in seven offerings in which a U.S. subsidiary of the Company was the issuer in the original principal amount of approximately \$2,046 million and seeks rescission of its purchases or compensatory damages. Due to the lack of information at this early stage of the litigation and the uncertainties involved, the Company cannot provide an estimate of exposure to loss related to this matter at this time.

In October 2011, the NCUA commenced proceedings in the United States District Court for the District of Kansas as liquidating agent of U.S. Central Federal Credit Union (U.S. Central) against various sponsors, issuers and underwriters of residential MBS purchased by U.S. Central, including a U.S. subsidiary of the Company. The complaint alleges that U.S. Central purchased residential MBS issued by the Company subsidiary, among others, for which the offering materials contained untrue statements or omitted material facts concerning the underwriting standards used by the original lenders. The complaint against the U.S. subsidiary alleges that U.S. Central purchased certificates in one offering in which the subsidiary was the issuer in the original principal

Table of Contents

NOMURA HOLDINGS, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

amount of approximately \$50 million and seeks rescission of its purchases or compensatory damages. Due to the lack of information at this early stage of the litigation and the uncertainties involved, the Company cannot provide an estimate of exposure to loss related to this matter at this time.

In November 2011, NIP was served with a claim filed by the trustee (the Madoff Trustee) appointed for the liquidation of Bernard L. Madoff Investment Securities LLC (BLMIS) in the United States Bankruptcy Court Southern District of New York. This is a clawback action similar to claims filed by the Madoff Trustee against numerous other institutions. The Madoff Trustee alleges that NIP received redemptions from BLMIS feeder fund, Harley International (Cayman) Limited in the six years prior to December 11, 2008 (the date proceedings were commenced against BLMIS) and that these are avoidable and recoverable under the U.S. Bankruptcy Code and New York law. The amount that the Madoff Trustee is currently seeking to recover from NIP is approximately \$21 million. The specified amount alleged is the Company's current estimate of the maximum reasonably possible loss from this matter.

Subsequent Events

NSC is the leading securities firm in Japan with approximately five million client accounts. Accordingly, with a significant number of client transactions, NSC is from time to time party to various Japanese civil litigation and other dispute resolution proceedings with clients relating to investment losses. Among these includes an action commenced against NSC in April 2012 by a large account corporate client seeking ¥5,102 million in damages for losses on the pre-maturity cash out of 16 series of currency-linked structured notes purchased from NSC between 2003 and 2008. The plaintiff alleges among other things, insufficient explanation in the sale of the structured notes by NSC. NSC believes these allegations are without merit. The specified amount alleged is the Company's current estimate of the maximum reasonably possible loss from this matter.

The Company supports the position of its subsidiaries in each of these claims.

Certain Mortgage-Related Contingencies in the U.S.

Certain of the Company's subsidiaries in the U.S. securitized mortgage loans in the form of MBS. These subsidiaries did not generally originate mortgage loans, but purchased mortgage loans from third-party loan originators (the originators). In connection with such purchases, these subsidiaries received loan level representations from the originators. Certain of the MBS issued by the subsidiaries were structured with credit protection provided to specified classes of certificates by monoline insurers. In connection with the securitizations, the relevant subsidiaries provided loan level representations and warranties of the type generally described below, which mirror the representations the subsidiaries received from the originators.

The loan level representations made in connection with the securitization of mortgage loans were generally detailed representations applicable to each loan and addressed characteristics of the borrowers and properties. The representations included, but were not limited to, information concerning the borrower's credit status, the loan-to-value ratio, the owner occupancy status of the property, the lien position, the fact that the loan was originated in accordance with the originator's guidelines, and the fact that the loan was originated in compliance with applicable laws.

The relevant subsidiaries have received claims demanding the repurchase of certain loans from trustees of various securitization trusts, which the subsidiaries believe were made at the instance of one or more investors, and from certificate insurers. It is our policy to review each claim that has been received, and the subsidiaries have contested those claims believed to be without merit or have agreed to repurchase certain loans (or to otherwise compensate the issuing trust) for those claims that the subsidiaries have determined to have merit.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company cannot provide an estimate of reasonably possible loss relating to the existing unresolved demands or the likelihood of additional breach of representation claims at this time due to the uncertainties involved. Specifically, macroeconomic conditions, including the unemployment rate, affect the rate of defaults in residential mortgages. Further, the Company's exposure with respect to such claims is influenced by the particular originators which underwrote the loans at issue, the particular representations made (which were not uniform across all securitizations), and fluctuations in values in the residential real estate markets which affect the loss severity for defaulting loans. As at June 15, 2012, the subsidiaries have received loan repurchase claims of \$2,924 million that are unresolved.

Guarantees

ASC 460 *Guarantees* specifies the disclosures to be made in regards to obligations under certain issued guarantees and requires a liability to be recognized for the fair value of a guarantee obligation at inception.

In the normal course of business, Nomura enters into various guarantee arrangements with counterparties in the form of standby letters of credit and other guarantees, which generally have a fixed expiration date.

In addition, Nomura enters into certain derivative contracts that meet the accounting definition of a guarantee, namely derivative contracts that contingently require a guarantor to make payment to a guaranteed party based on changes in an underlying that relate to an asset, liability or equity security held by a guaranteed party. Since Nomura does not track whether its clients enter into these derivative contracts for speculative or hedging purposes, Nomura has disclosed below information about derivative contracts that could meet the accounting definition of guarantees.

For information about the maximum potential amount of future payments that Nomura could be required to make under certain derivatives, the notional amount of contracts has been disclosed. However, the maximum potential payout for certain derivative contracts, such as written interest rate caps and written currency options, cannot be estimated, as increases in interest or foreign exchange rates in the future could be theoretically unlimited.

Nomura records all derivative contracts at fair value on its consolidated balance sheets. Nomura believes the notional amounts generally overstate its risk exposure. Since the derivative contracts are accounted for at fair value, carrying value is considered the best indication of payment and performance risk for individual contracts.

The following table presents information on Nomura's derivative contracts that could meet the accounting definition of a guarantee and certain other guarantees:

	Millions of yen March 31			
	2011	Maximum potential payout / Notional Total		2012
	Carrying value	Carrying value	Carrying value	Maximum potential payout / Notional Total
Derivative contracts ⁽¹⁾⁽²⁾	¥ 3,539,472	¥ 101,555,634	¥ 3,997,315	¥ 107,572,427
Standby letters of credit and other guarantees ⁽³⁾	267	8,512	264	21,674

(1) Credit derivatives are disclosed in Note 3 *Derivative instruments and hedging activities* and are excluded from *Derivative Contracts*.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

- (2) Derivative contracts primarily consist of equity contracts, interest rate contracts and foreign exchange contracts.
- (3) Collateral held in connection with standby letters of credit and other guarantees as of March 31, 2011 was ¥6,761 million and as of March 31, 2012 is ¥6,377 million.

The following table presents maturity information on Nomura's derivative contracts that could meet the accounting definition of a guarantee and certain other guarantees as of March 31, 2012:

	Carrying value	Total	Millions of yen Maximum potential payout/Notional Years to Maturity			
			Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Derivative contracts	¥ 3,997,315	¥ 107,572,427	¥ 37,525,420	¥ 22,496,226	¥ 12,868,744	¥ 34,682,037
Standby letters of credit and other guarantees	264	21,674	12,919	138	212	8,405

23. Segment and geographic information:**Operating segments**

Nomura's operating management and management reporting are prepared based on the Retail, the Asset Management, and the Wholesale segments. Nomura structures its business segments based upon the nature of its main products and services, its client base and its management structure.

The accounting policies for segment information materially follow U.S. GAAP, except for the impact of unrealized gains/losses on investments in equity securities held for operating purposes, which under U.S. GAAP are included in *Income (loss) before income taxes*, is excluded from segment information.

Revenues and expenses directly associated with each business segment are included in the operating results of each respective segment. Revenues and expenses that are not directly attributable to a particular segment are allocated to each respective business segment or included in Other, based upon Nomura's allocation methodologies as used by management to assess each segment's performance.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Business segments results are shown in the following tables. Net interest revenue is disclosed because management views interest revenue net of interest expense for its operating decisions. Business segments information on total assets is not disclosed because management does not utilize such information for its operating decisions and therefore, it is not reported to management. In April 2011, Nomura Bank (Luxembourg) S.A. in the Asset Management segment was integrated into Other. In accordance with this integration, certain prior year amounts have been reclassified to conform to the current presentation.

	Millions of yen

Consolidated income before income taxes	¥ 105,247	¥ 93,255	¥ 84,957

Geographic information

Nomura's identifiable assets, revenues and expenses are generally allocated based on the country of domicile of the legal entity providing the service. However, because of the integration of the global capital markets and the corresponding global nature of Nomura's activities and services, it is not always possible to make a precise separation by location. As a result, various assumptions, which are consistent among years, have been made in presenting the following geographic data.

Table of Contents**NOMURA HOLDINGS, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The table below presents a geographic allocation of net revenue and income (loss) before income taxes from operations by geographic areas, and long-lived assets associated with Nomura's operations. Net revenue in Americas and Europe substantially represents Nomura's operations in the U.S. and the U.K., respectively. Net revenue and long-lived assets have been allocated based on transactions with external customers while income (loss) before income taxes has been allocated based on the inclusion of intersegment transactions.

	Millions of yen		
	Year ended March 31

Report of Independent Auditors

The Board of Directors and Shareholders of

Nomura Research Institute, Ltd.

We have audited the accompanying consolidated balance sheet of Nomura Research Institute, Ltd. and subsidiaries (the Company) as of March 31, 2012, and the related consolidated statements of income and comprehensive income, changes in net assets, and cash flows for the year then ended, all expressed in Japanese yen. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Nomura Research Institute, Ltd. and subsidiaries at March 31, 2012 and the consolidated results of their operations and their cash flows for the year then ended in conformity with accounting principles generally accepted in Japan.

The accompanying consolidated balance sheet of Nomura Research Institute, Ltd. and subsidiaries as of March 31, 2011, and the related consolidated statements of income and comprehensive income, changes in net assets and cash flows for each of the two years in the period then ended were not audited by us in accordance with auditing standards generally accepted in the United States and, accordingly, we do not express an opinion on them in accordance with auditing standards generally accepted in the United States.

Notes to the Consolidated Financial Statements

31st March, 2012, 2011 (unaudited) and 2010 (unaudited)

1. Significant Accounting Policies

Description of Business

The NRI Group (Nomura Research Institute, Ltd. (the Company) and its 15 consolidated subsidiaries) and its affiliates (2 companies) engage in the following four business services: consulting services, comprised of research, management consulting and system consulting; system development & application sales, comprised of system development and the sales of package software products; system management & operation services, comprised of outsourcing services, multi-user system services, and information services; and product sales. Information on the Company's operations by segment is included in Note 19.

Basis of Presentation

The accompanying consolidated financial statements of the Company and its consolidated subsidiaries are prepared on the basis of accounting principles generally accepted in Japan, which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards, and are compiled from the consolidated financial statements prepared by the Company as required by the Financial Instruments and Exchange Law.

In addition, the notes to the consolidated financial statements include information which is not required under accounting principles generally accepted in Japan but is presented herein as additional information.

Certain reclassifications have been made to present the accompanying consolidated financial statements in a format which is familiar to readers outside Japan.

Basis of Consolidation and Application of Equity Method

The accompanying consolidated financial statements for the years ended 31st March, 2012, 2011 and 2010 include the accounts of the Company and all companies which are controlled directly or indirectly by the Company. All subsidiaries (15, 15 and 14 for the years ended 31st March, 2012, 2011 and 2010, respectively) have been consolidated. The major consolidated subsidiary is Nomura Research Institute (Beijing), Ltd. as of 31st March, 2012.

The Company's investments in affiliated companies over which it has the ability to exercise significant influence are accounted for by the equity method, and, accordingly, the Company's share of such affiliates' income or loss is included in consolidated income. All affiliated companies, Nihon Clearing Services Co., Ltd. and MC NRI Global Solutions Inc., have been accounted for by the equity method for the years ended 31st March, 2012, 2011 and 2010.

Nomura Research Institute India Pvt. Ltd., a newly established subsidiary during the year ended 31st March, 2012, is included in the scope of consolidation. Nomura Research Institute, Ltd. and UBIQLINK, Ltd., which was a wholly-owned subsidiary of the Company, merged in July 2011.

Cash Equivalents

Cash equivalents, as presented in the consolidated statements of cash flows, are defined as low-risk, highly liquid, short-term investments maturing within three months from their respective acquisition dates which are readily convertible into cash.

Table of Contents

Nomura Research Institute, Ltd.

Notes to the Consolidated Financial Statements (Continued)

31st March, 2012, 2011 (unaudited) and 2010 (unaudited)

Investment Securities

The Company holds investment securities in its major shareholder, Nomura Holdings, Inc. The Company's investment in Nomura Holdings, Inc. is included in Investments in affiliates.

The Company and its consolidated subsidiaries determine the appropriate classification of investment securities as either trading, held-to-maturity or available-for-sale securities based on their holding objectives. Available-for-sale securities include marketable securities and non-marketable securities.

Securities held for trading purposes are stated at market value and the cost of securities sold is determined by the moving average method.

Held-to-maturity securities are carried at amortized cost.

Marketable securities classified as available-for-sale securities are stated at market value as of the balance sheet date and the cost of securities sold is determined by the moving average method. Unrealized gain or loss on marketable securities classified as available-for-sale securities is included as a separate component of net assets, net of the applicable taxes.

Non-marketable securities classified as available-for-sale securities are stated at cost and the cost of securities sold is determined by the moving average method.

Inventories

Inventories are stated at cost based on the identified cost method (in cases where profitability has declined, the book value is reduced accordingly).

Depreciation of Property and Equipment (other than leased assets)

Property and equipment is stated at cost. Depreciation is calculated principally by the declining-balance method over the estimated useful lives of the related assets. Buildings (excluding structures attached to the buildings) acquired on or after 1st April, 1998 by the Company and its domestic consolidated subsidiaries are depreciated by the straight-line method over their respective estimated useful lives.

Amortization of Software and Other Intangibles (other than leased assets)

Development costs of computer software to be sold are amortized by the straight-line method over a useful life of three years, based on the estimated volume of sales or the estimated sales revenue with the minimum amortization amount. Software intended for use by the Company for the purpose of rendering customer services is being amortized by the straight-line method over useful lives of up to five years.

Other intangible assets are amortized by the straight-line method over their respective estimated useful lives.

Depreciation and Amortization of Leased Assets

Leased tangible assets under finance leases that do not transfer ownership are mainly depreciated by the declining-balance method over the lease period. Leased intangible assets under finance leases that do not transfer ownership are amortized by the straight-line method over the lease period.

Table of Contents

Nomura Research Institute, Ltd.

Notes to the Consolidated Financial Statements (Continued)

31st March, 2012, 2011 (unaudited) and 2010 (unaudited)

Allowance for Doubtful Accounts

The allowance for doubtful accounts has been provided based on the Company's and its consolidated subsidiaries' historical experience with respect to write-offs and an estimate of the amount of specific uncollectible accounts.

Retirement and Severance Benefits for Employees

The allowance for employees' retirement benefits has been provided on an accrual basis as of the balance sheet date based on an estimate of the projected benefit obligation and the employees' pension plan assets. The retirement benefit obligation at transition was fully expensed upon transition. Prior service cost is amortized by the straight-line method over the average remaining years of service (15 years) of the participants in the plan. Actuarial gain or loss is amortized in the following year in which the gain or loss is recognized by the straight-line method over a defined period not exceeding the average remaining period of employment (15 years) of the participants in the plan and is recognized as a pension cost.

Revenue Recognition

Revenues arising from made-to-order software and consulting projects are recognized by the percentage-of-completion method. The percent completed is estimated by the ratio of the costs incurred to the estimated total costs.

Research and Development Expenses

Research and development expenses are charged to selling, general and administrative expenses as incurred.

Appropriation of Capital Surplus and Retained Earnings

Under the Corporation Law of Japan, the appropriation of capital surplus and retained earnings with respect to a given period is made by resolution of the shareholders at a general meeting or by resolution of the Board of Directors. Appropriations from capital surplus and retained earnings are reflected in the consolidated financial statements applicable to the period in which such resolutions are approved.

Accounting Change

(Application of the Accounting Standard for Earnings Per Share)

Effective for the year ended 31st March, 2012, the Accounting Standard for Earnings Per Share (Accounting Standards Board of Japan (ASBJ) Statement No. 2) and the Guidance on Accounting Standard for Earnings Per Share (ASBJ Guidance No. 4) has been applied. The Company has changed the method by which it calculates diluted earnings per share as follows. For stock options that vest after a specified service period, the Company now includes the portion of the stock options' fair value attributable to future service when calculating the cash proceeds assumed to be receivable upon exercise of the stock options. Please see Note 11, Per Share Data for the impact of this change.

(Application of the Accounting Standard for Asset Retirement Obligations)

Effective for the year ended 31st March, 2011, the Accounting Standard for Asset Retirement Obligations (ASBJ Statement No. 18) and Guidance on Accounting Standard for Asset Retirement Obligations (ASBJ

Table of Contents

Nomura Research Institute, Ltd.

Notes to the Consolidated Financial Statements (Continued)

31st March, 2012, 2011 (unaudited) and 2010 (unaudited)

Guidance No. 21) has been applied. As a result of this change, operating profit for the year ended 31st March, 2011 increased by ¥36 million and income before income taxes and minority interests decreased by ¥328 million from the corresponding amounts which would have been recorded under the previous method. The amount of asset retirement obligations with this revision was ¥699 million at 31st March, 2011.

Additional Information

(Application of the Accounting Standard for Accounting Changes and Error Corrections)

Effective for the year ended 31st March, 2012, the Accounting Standard for Accounting Changes and Error Corrections (ASBJ Statement No. 24) and the Guidance on Accounting Standard for Accounting Changes and Error Corrections (ASBJ Guidance No. 24) has been applied.

Cumulative effect of accounting change and error corrections are reflected on the beginning balances of the year ended 31st March, 2011, but not reflected on the balances as of 31st March, 2010 and income for the year then ended.

(Accounting for Trust-type Employee Stock Ownership Incentive Plan)

The Company introduced a Trust-type Employee Stock Ownership Incentive Plan in March 2011. The purpose of this plan is to promote the Company's perpetual growth by providing incentives to employees for increasing the Company's corporate value in the mid- to long- term and to enhance benefits and welfare of employees.

This is an incentive plan under which gains from the Company's share price appreciation are returned to all participants in the Employee Stock Ownership Group (the ESOP Group). The Employee Stock Ownership Trust (the ESOP Trust) was established exclusively for the ESOP Group to carry out this plan. The ESOP Trust acquired a number of the Company's shares, which the ESOP Group would acquire over a period of five years subsequent to the establishment of the ESOP Trust. Then, the ESOP Trust sells them to the ESOP Group each time the ESOP Group makes an acquisition of the Company's shares. When the share price appreciates and earnings have accumulated in the ESOP Trust upon its termination, a cash distribution of the funds will be made to each beneficiary in proportion to the respective beneficiary's contribution. Since the Company guarantees the loans of the ESOP Trust taken out to purchase the Company's shares, the Company is obligated to pay the remaining liabilities of the ESOP Trust under a guarantee agreement if any obligations remain upon termination of the ESOP Trust.

The Company accounts for the transactions involving the ESOP Trust as its own with the assets, liabilities, expenses and income of the ESOP Trust included in the accompanying consolidated financial statements. Therefore, the Company's shares owned by the ESOP Trust are treated as treasury stock of the Company, and the loans of the ESOP Trust are treated as the loans of the Company. Also, the Company does not recognize the transfer of treasury stock when the Company sells treasury stock to the ESOP Trust. Each time the ESOP Trust sells treasury stock to the ESOP Group, however, the Company recognizes the transfer of treasury stock. As the amounts equal to the capital gain realized by the ESOP Trust will be distributed to the beneficiaries after the termination of the trust, the amounts are treated as expenses for the corresponding year the gain is incurred.

The ESOP Trust owned 4,865,300 shares of the Company's at 31st March, 2012.

2. Financial Instruments

1) Qualitative information

(a) Policy for financial instruments

In the course of business operations, the Company raises short-term funds through bank loans and commercial paper, and raises long-term funds through bank loans and issuances of corporate bonds. The Company manages funds by utilizing low-risk financial instruments. The Company's policy is to only enter into derivative transactions to reduce risks, and not for speculative purposes.

(b) Details of financial instruments and related risk and risk management system

Although accounts receivable and other receivables, are exposed to customers' credit risk, the historical loan loss ratio is low and those receivables are usually settled in a short period of time. The Company tries to reduce credit risk by managing due dates and balances of each customer, as well as monitoring and analyzing customers' credit status. The Company has little exposure of foreign currency exchange risk, since those receivables are mostly in Japanese yen. Investment securities, comprised of shares of companies with which the Company has operational relationships, bonds and bond investment trusts, are exposed to issuers' credit risk, risks of volatility of market prices, and foreign currency exchange and interest rates. To reduce these risks, the Company monitors market value and the issuers' financial status periodically. Long-term loans receivable is a construction assistance fund receivable due January 2017. Accounts payable are settled in a short period of time. Redemption of the convertible bonds, issued by the Company for capital expenditures, is March 2014. Long-term loans payable relates to the borrowing by the ESOP Trust to introduce the Trust-type Employee Stock Ownership Incentive Plan. Final installment payment is April 2016. Variable interest rates applied to long-term loans payable are exposed to interest rate fluctuation risk. The Company reduces liquidity risk relating to raising funds by developing a cash flow plan to manage all surplus funds in the Group, and by holding various financing methods.

(c) Supplementary explanation of the fair value of financial instruments

The fair value of financial instruments is based on their quoted market price, and when there is no quoted market price available, fair value is based on management assumption. Since various assumptions and factors are reflected in estimating the fair value, differences in the assumptions and factors may result in different indications of fair value.

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)**

2) Fair value of financial instruments

The carrying amount of financial instruments on the consolidated balance sheets as of 31st March, 2012 and 2011 and estimated fair value are shown in the following table. The following table does not include non-marketable securities whose fair value is not readily determinable (see Note 2).

	Millions of yen					
	Carrying amount	31st March, 2012 Estimated fair value	Difference	Carrying amount	31st March, 2011 Estimated fair value	Difference
Assets:						
Cash and bank deposits	¥ 8,462	¥ 8,462	¥	¥ 16,758	¥ 16,758	¥
Accounts receivable and other receivables	76,192	76,192		71,289	71,289	
Short-term investment securities, investment securities, and investments in affiliates	135,869	135,869		109,183	109,183	
Long-term loans receivable	7,821	8,274	453	7,706	8,107	401
Total	¥ 228,344	¥ 228,797	¥ 453	¥ 204,936	¥ 205,337	¥ 401
Liabilities:						
Accounts payable	¥ 21,811	¥ 21,811	¥	¥ 22,481	¥ 22,481	¥
Convertible bonds	49,997	49,297	(700)	49,997	48,797	(1,200)
Long-term loans payable*	9,208	9,208		11,783	11,783	
Total	¥ 81,016	¥ 80,316	¥ (700)	¥ 84,261	¥ 83,061	¥ (1,200)

* Long-term loans payable included the current portion of long-term loans payable totaling ¥2,531 million and ¥2,607 million as of 31st March, 2012 and 2011, respectively.

Note 1: Methods to determine the estimated fair value of financial instruments.

Assets

- a. Cash and bank deposits, accounts receivable and other receivables

Their carrying amount approximates the fair value due to the short maturity of these instruments.

- b. Short-term investment securities, investment securities and investments in affiliates

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

The fair value of stocks is based on quoted market prices. The fair value of bonds is based on either quoted market prices or prices provided by the financial institution making markets in these securities.

c. Long-term loans receivable

Long-term loans receivable consists of deposits and guarantee money. The fair value of long-term receivables is based on the present value of the total future cash flows, which are the principal and the interest, discounted by risk free rate relating to the time remaining until maturity.

A-14

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)**

Liabilities

a. Accounts payable

Their carrying amount approximates the fair value due to the short maturity of these instruments.

b. Convertible bonds

The fair value of convertible bonds is based on the quoted market price.

c. Long-term loans payable

The fair value of long-term loans payable, to which variable rates are applied, approximates the carrying amount because the variable rates reflect market interest rates over a short term.

Note 2: Non-marketable securities whose fair value is not readily determinable are as follows.

	Millions of yen	
	31st March, 2012	31st March, 2011
Unlisted companies' shares	¥ 7,623	¥ 15,328
Investments in partnerships	113	380

*1. Unlisted companies' shares are not measured at fair value because they have no market prices on exchanges, and their fair value is not readily determinable. Unlisted companies' shares included investments in affiliates accounted for under the equity method totaling ¥887 million and ¥830 million as of 31st March, 2012 and 2011, respectively.

*2. For investments in partnerships, when all or a part of the asset of partnership consist of non-marketable securities whose fair value is not readily determinable, such components are not measured at fair value.

Note 3: Redemption schedule for cash and bank deposits, receivables and marketable securities with maturities at 31st March, 2012 and 2011

Millions of yen

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

	31st March, 2012			31st March, 2011		
	Due within one year	Due after one year through five years	Due after five years through ten years	Due within one year	Due after one year through five years	Due after five years through ten years
Cash and bank deposits	¥ 8,462	¥	¥	¥ 16,758	¥	¥
Accounts receivable	56,486			54,691		
Investment securities:						
Available-for-sale securities with maturities:						
Government bonds		25,000	1			1
Corporate bonds	18,300			18,010	3,000	
Other	100			500		
Long-term loans receivable		8,400				8,400
	¥ 83,348	¥ 33,400	¥ 1	¥ 89,959	¥ 3,000	¥ 8,401

* Other receivables are not included in the above table as there is no applicable redemption schedule.

A-15

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)**

Note 4: Repayment schedule for convertible bonds and long-term loans payable at 31st March, 2012 and 2011

	Millions of yen 31st March, 2012				
	Due within one year	Due after one year through two years	Due after two years through three years	Due after three years through four years	Due after four years through five years
Convertible bonds	¥	¥ 49,997	¥	¥	¥
Long-term loans payable*	2,531	2,487	2,442	1,748	
	¥ 2,531	¥ 52,484	¥ 2,442	¥ 1,748	¥

	Millions of yen 31st March, 2011				
	Due within one year	Due after one year through two years	Due after two years through three years	Due after three years through four years	Due after four years through five years
Convertible bonds	¥	¥	¥ 49,997	¥	¥
Long-term loans payable*	2,607	2,556	2,505	2,452	1,663
	¥ 2,607	¥ 2,556	¥ 52,502	¥ 2,452	¥ 1,663

* Long-term loans payable represents loans by the ESOP Trust upon introduction of the Trust-type Employee Stock Ownership Incentive Plan. Under the loan contracts, the timing of the installment payments is determined, but the amount of each installment payment is not specified. Therefore, the repayment schedule was calculated at an estimated amount by reference to the acquisition price of the Company's shares that the ESOP Group was expected to purchase from the ESOP Trust.

3. Investments

The Company did not hold any held-to-maturity securities with determinable market value at 31st March, 2012 and 2011.

The following is a summary of the information concerning available-for-sale securities included in short-term investment securities, investment securities and investments in affiliates at 31st March, 2012 and 2011:

Securities Classified as Available-for-Sale Securities

	Millions of yen	
	31st March, 2012	31st March, 2011

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

	Acquisition cost	Carrying amount	Unrealized gain (loss)	Acquisition cost	Carrying amount	Unrealized gain (loss)
Equity securities	¥ 17,558	¥ 29,465	¥ 11,907	¥ 25,543	¥ 36,020	¥ 10,477
Bonds:

Other	69,559	69,501	(58)	66,928	66,990	62
Total	¥ 130,886	¥ 142,718	¥ 11,832	¥ 113,551	¥ 124,061	¥ 10,510

A-16

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)**

Non-marketable securities whose fair value is not readily determinable were included in the above table. Impairment loss on available-for-sale marketable securities as a result of a permanent decline in value amounted to ¥237 million for the year ended 31st March, 2012. For the year ended 31st March, 2011, impairment loss was ¥46 million, consisting of ¥37 million on marketable securities and ¥9 million on non-marketable securities whose fair values are not readily determinable. The Company has established a policy for the recognition of impairment losses under the following conditions:

- i) For marketable securities whose fair value has declined by 30% or more, the Company recognizes impairment loss except in cases where the decline in fair value is expected to be recoverable.
- ii) For non-marketable securities whose fair value is not readily determinable, of which net asset value has declined by 50% or more, the Company recognizes impairment loss except in cases where the decline in fair value is expected to be recoverable.

Proceeds from sales of available-for-sale securities during the years ended 31st March, 2012, 2011 and 2010 were as follows:

	Millions of yen 31st March,		
	2012	2011	2010
Proceeds (<i>Note 16</i>)	¥ 16,546	¥ 226	¥ 2,335
Gross gain	8,714	168	195
Gross loss	(22)		

Non-marketable securities whose fair value is not readily determinable were included in the above table.

4. Accounts Receivable and Other Receivables

For projects that have not been completed as of the balance sheet date, the percentage-of-completion method is applied and the estimated revenue to be earned from each project has been included in accounts receivable and other receivables in the amounts of ¥19,706 million and ¥16,597 million at 31st March, 2012 and 2011, respectively.

5. Property and Equipment

Property and equipment at 31st March, 2012 and 2011 is summarized as follows:

	Years Useful Life	Millions of yen 31st March,	
		2012	2011
Land		¥ 13,600	¥ 12,323
Buildings	15 50	70,842	68,519
Machinery and equipment	3 15	56,907	53,145
Leased assets		320	599
Construction in progress		7,789	
Accumulated depreciation		(81,889)	(76,135)

Property and equipment, net	¥ 67,569	¥ 58,451
-----------------------------	----------	----------

A-17

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)****6. Other Assets**

Other assets at 31st March, 2012 and 2011 consisted of the following:

	Millions of yen 31st March,	
	2012	2011
Lease deposits	¥ 10,720	¥ 10,687
Other	3,304	3,087
Other assets	¥ 14,024	¥ 13,774

Other includes golf club memberships.

7. Retirement and Severance Benefits

The Company has a defined benefit pension plan, a lump-sum payment plan and a defined contribution pension plan. In addition to the plans, an extra retirement payment may be provided. The Company also has an employee retirement benefit trust. Certain consolidated subsidiaries have defined benefit lump-sum payment plans and defined contribution pension plans.

The following table sets forth the funded and accrued status of the retirement and severance benefit plans and the amounts recognized in the accompanying consolidated balance sheets at 31st March, 2012 and 2011 for the Company's and its consolidated subsidiaries' defined benefit plans:

	Millions of yen 31st March,	
	2012	2011
Retirement benefit obligation	¥ (73,273)	¥ (66,032)
Plan assets at fair value	49,989	42,808
Unfunded retirement benefit obligation	(23,284)	(23,224)
Unrecognized actuarial gain	8,175	4,871
Unrecognized prior service cost	(2,142)	(2,336)
Unfunded retirement benefit obligation recognized on the balance sheets	¥ (17,251)	¥ (20,689)

Plan assets at fair value include those of the employee retirement benefit trust of ¥6,371 million and ¥6,409 million at 31st March, 2012 and 2011, respectively.

Prior service liability is amortized by the straight-line method over a defined period, not exceeding the average remaining service period of the employees (mainly 15 years).

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

Actuarial gain or loss is amortized by the straight-line method over a defined period, not exceeding the average remaining service period of the employees from the next fiscal year after the incurrence.

A-18

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)**

The components of retirement benefit expenses for the years ended 31st March, 2012, 2011 and 2010 are outlined as follows:

	Millions of yen 31st March,		
	2012	2011	2010
Service cost	¥ 4,070	¥ 3,928	¥ 3,558
Interest cost	1,332	1,245	1,174
Expected return on plan assets	(546)	(438)	(331)
Recognized actuarial loss	196	102	312

Deferred income tax assets, net	¥ 22,817	¥ 26,214

A-19

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)**

Income taxes applicable to the Company and its consolidated subsidiaries consisted of corporation, inhabitants and enterprise taxes which, in the aggregate, resulted in a statutory tax rate of approximately 40.6% for the years ended 31st March, 2012, 2011 and 2010.

Reconciliations of the differences between the statutory income tax rates and the effective income tax rates after deferred tax effect in the consolidated statements of income for the years ended 31st March, 2012, 2011 and 2010 have been omitted because the differences were immaterial in the consolidated statements of income.

On 2nd December, 2011, the Act to partially revise the Income Tax Act and others in order to construct a tax system corresponding to changes in the structure of economic system (Act No.114 of 2011) and the Special measures act to secure the financial resources required to implement policy on restoration after the Great East Japan Earthquake (Act No.117 of 2011) were promulgated. In response to these revisions of domestic Japanese tax laws, the applicable statutory tax rate to calculate deferred income tax assets and liabilities expected to be settled or realized in the period from 1st April, 2012 to 31st March, 2015 has been reduced from 40.6% to 38.0%, and subsequent to 31st March, 2015 it has been reduced to 35.6%.

As a result of these changes, net deferred income tax assets decreased by ¥1,773 million as of 31st March, 2012. For the year ended 31st March, 2012, income tax expense and valuation difference on available-for-sale securities increased by ¥2,318 million and ¥545 million, respectively.

9. Net Assets

The Corporation Law of Japan provides that earnings in an amount equal to at least 10% of dividends of capital surplus and retained earnings shall be appropriated to the legal reserve until the aggregate amount of the legal reserve and additional paid-in capital equals 25% of the stated capital. The legal reserve and the additional paid-in capital account are available for appropriation by resolution of the shareholders. In accordance with the Corporation Law, the Company provides a legal reserve which is included in retained earnings. This reserve amounted to ¥570 million and ¥570 million at 31st March, 2012 and 2011, respectively.

Shares Issued and Treasury Stock

The total number and periodic changes in the number of shares issued and treasury stock for the year ended 31st March, 2012 are summarized as follows:

	31st March, 2012	
	Shares issued	Treasury stock
Number of shares at 31st March, 2011	225,000,000	30,277,343
Increase in number of shares		50
Decrease in number of shares		1,442,700
Number of shares at 31st March, 2012	225,000,000	28,834,693

*1 The number of shares of treasury stock increased by 50 due to the purchases of odd-lot shares. The number of shares of treasury stock decreased by 1,336,200 due to the transfer of treasury stock from the ESOP Trust to the ESOP Group and decreased by 106,500 due to the exercise of stock options.

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

*2 Treasury stock included 4,865,300 shares of the Company owned by the ESOP Trust as of 31st March, 2012.

A-20

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)**

Share subscription rights recorded in the accompanying consolidated balance sheets at 31st March, 2012 relate to the Company's stock option plans described in Note 18.

Dividends

The following appropriations of cash dividends to shareholders of common stock were approved at meetings of the Board of Directors held on 18th May, 2011 and 28th October, 2011 and were paid to shareholders based on the record as of 31st March, 2011 and 30th September, 2011, respectively, during the year ended 31st March, 2012:

	Millions of yen	
Cash dividends approved on 18th May, 2011* (¥26.00 per share)	¥	5,063
Cash dividends approved on 28th October, 2011** (¥26.00 per share)		5,082

* Dividends of ¥161 million paid to the ESOP Trust are not included in the total dividends amount.

** Dividends of ¥144 million paid to the ESOP Trust are not included in the total dividends amount.

The following appropriation of cash dividends, which has not been reflected in the accompanying consolidated financial statements for the year ended 31st March, 2012, was approved at a meeting of the Board of Directors held on 17th May, 2012 and went into effect on 4th June, 2012:

	Millions of yen	
Cash dividends approved on 17th May, 2012* (¥26.00 per share)	¥	5,100

* Dividends of ¥126 million paid to the ESOP Trust are not included in the total dividends amount.

10. Cash and Cash Equivalents

A reconciliation between cash and bank deposits in the accompanying consolidated balance sheets and cash and cash equivalents in the accompanying consolidated statements of cash flows at 31st March, 2012 and 2011 is as follows:

	Millions of yen	
	31st March,	
	2012	2011
Cash and bank deposits	¥ 8,462	¥ 16,758
Short-term investment securities	81,079	79,661
Time deposits with maturities of more than three months when deposited	(706)	(782)
Bond and other investments maturing in more than three months from the acquisition date	(11,791)	(13,552)
Cash and cash equivalents	¥ 77,044	¥ 82,085

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)****11. Per Share Data**

Earnings per share for the years ended at 31st March, 2012, 2011, and 2010 and net assets per share at 31st March, 2012 and 2011 are summarized as follows:

	Yen		
	2012	31st March, 2011	2010
Earnings per share	¥ 168.40	¥ 119.11	¥ 112.32
Diluted earnings per share	158.69	112.22	105.81

	Yen	
	2012	31st March, 2011
Net assets per share	¥ 1,309.39	¥ 1,179.92

The computation of earnings and net assets per share is based on the weighted-average number of shares of common stock outstanding during each year and the number of shares of common stock outstanding at each balance sheet date, respectively.

The computation of earnings per share and diluted earnings per share for the years ended 31st March, 2012, 2011 and 2010 is as follows:

	Millions of yen		
	2012	31st March, 2011	2010
Numerator:			
Earnings	¥ 32,921	¥ 23,188	¥ 21,856
Earnings not attributable to common shareholders	()	()	()
Earnings attributable to common shareholders	¥ 32,921	¥ 23,188	¥ 21,856

	Thousands of shares		
Denominator:			
Weighted-average number of shares of common stock outstanding basic ^{*1}	195,492	194,677	194,587
Potentially dilutive shares of common stock Convertible bonds ^{2*}	11,839	11,836	11,836
Potentially dilutive shares of common stock Stock options	119	121	132
Weighted-average number of shares of common stock outstanding diluted	207,450	206,634	206,555

*1 The Company's shares owned by the ESOP Trust are included in treasury stock.

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

*2 The conversion price for the 1st unsecured convertible bonds with stock acquisition rights was adjusted from ¥4,224 to ¥4,222.90 effective from 30th March, 2011.

A-22

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)**

The following potentially issuable shares of common stock would have an antidilutive effect and thus have not been included in the diluted earnings per share calculation for the years ended 31st March, 2012, 2011 and 2010:

	Shares 31st March,		
	2012	2011	2010
a) 4th share subscription rights		0*	224,500
b) 6th share subscription rights	340,000	367,500	392,500
c) 8th share subscription rights	367,500	415,000	415,000
d) 10th share subscription rights	417,500	417,500	417,500
e) 12th share subscription rights	440,000	440,000	440,000
f) 14th share subscription rights	445,000	445,000	
g) 16th share subscription rights	392,500		

* The exercise period ended 30th June, 2010.
(Accounting Change)

Effective for the year ended 31st March, 2012, the Accounting Standard for Earnings Per Share (ASBJ Statement No. 2) and the Guidance on Accounting Standard for Earnings Per Share (ASBJ Guidance No. 4) has been applied.

The Company has changed the method by which it calculates diluted earnings per share as follows. For stock options that vest after a specified service period, the Company now includes the portion of the stock options fair value attributable to future service when calculating the cash proceeds assumed to be receivable upon exercise of the stock options.

The Company retroactively adopted these accounting standards for the computation of diluted earnings per share for the year ended 31st March, 2011.

Diluted earnings per share for the year ended 31st March, 2011 under the previous method were ¥112.21.

The computation of net assets per share at 31st March, 2012 and 2011 is summarized as follows:

	Millions of yen 31st March,	
	2012	2011
Numerator:		
Net assets	¥ 258,277	¥ 231,075
Share subscription rights	(1,420)	(1,317)
Net assets attributable to common stock	¥ 256,857	¥ 229,758

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

	Thousands of shares	
Denominator:		
Number of shares of common stock outstanding	196,165	194,723

* The Company's shares owned by the ESOP Trust are included in treasury stock which has been deducted from total common stock outstanding.

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)****16. Related Party Transactions**

Related party transactions for the years ended 31st March, 2012, 2011 and 2010 and the respective balances at 31st March, 2012 and 2011 were as follows:

1) Transactions

Related party	Nature of transaction	Millions of yen		
		2012	31st March, 2011	2010
a) Major shareholder:				
Nomura Holdings, Inc.	Sales*1	¥ 51,750	¥ 41,037	¥ 49,211
	Exchange of shares*2	17,873		
b) Major shareholder's subsidiaries:				
The Nomura Trust & Banking Co., Ltd.	Borrowings*3		9,283	
	Repayment of borrowings*3	2,028		
	Payments of interest*3	53	1	
Nomura Real Estate Development Co., Ltd.	Rent*4	1,637		

2) Balances

Related party	Nature of transaction	Millions of yen	
		2012	31st March, 2011
a) Major shareholder:			
Nomura Holdings, Inc.	Accounts receivable and other receivables*1	¥ 11,738	¥ 5,149
b) Major shareholder's subsidiaries:			
The Nomura Trust & Banking Co., Ltd.	Long-term loans payable*3	7,255	9,283
Nomura Real Estate Development Co., Ltd.	Long-term loans receivable*4	7,821	
	Lease deposits*4	1,793	

*1 The terms and conditions of the agreements were determined in the same way as ordinary transactions with non-related parties through discussions with consideration of costs associated with system development.

*2 The share exchange involved shares of Nomura Land and Building Co., Ltd. owned by the Company and shares of Nomura Holdings, Inc. The Company received 118 shares of Nomura Holdings, Inc. for each Nomura Land and Building Co., Ltd. share in reference to the valuation results provided by third-party appraisers and the results of the calculation after applying the average market share price method.

The amount above was calculated based on the market value as of the effective date.

Edgar Filing: NOMURA HOLDINGS INC - Form 20-F

The Company sold the shares of Nomura Holdings, Inc. that it received in the exchange to a third party, and a gain on the sale of the shares is recognized as Gain on investments in affiliates in the accompanying consolidated statements of income and comprehensive income for the year ended March 31, 2012.

- *3 The borrowing represents loans by the ESOP Trust upon introduction of the Trust-type Employee Stock Ownership Incentive Plan. The term of the borrowing is five years (final repayment is in April 2016), with variable interest rates. The borrowing is being repaid semiannually in installments, and the borrowing rate has been determined based on the Company's credit risk.

A-26

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)**

- *4 Long-term loans receivable is a construction assistance fund receivable corresponding to an office lease deposit to be refunded in a lump sum 10 years after the initial guarantee deposit was made (January 2017). The difference between the initial fair value, calculated as the disbursement amount discounted by the market interest rate, and the initial loan amount is recognized as a long-term prepaid expense and is being allocated as rent expense over 10 years (amount is not included in the transaction amount of the rent presented above). The difference between the initial fair value and the reimbursement amount is being allocated as an interest receivable over 10 years. With regard to the rent, as presented above, the Company pays rent and a lease deposit (guarantee deposit), which were determined by considering market prices of similar properties.

17. Contingent Liabilities

There were no material contingent liabilities at 31st March, 2012 and 2011.

18. Stock Option Plans

The Company issued the following share subscription rights for the purchase of new shares of common stock in accordance with the former Commercial Code of Japan or the Corporation Law of Japan.

For the years ended 31st March, 2012, 2011 and 2010, the Company recognized and allocated share-based compensation cost as follows:

	Millions of yen 31st March,		
	2012	2011	2010
Cost of sales	¥ 167	¥ 173	¥ 243
Selling, general and administrative expenses	184	206	290
Total	¥ 351	¥ 379	¥ 533

For the years ended 31st March, 2012, 2011 and 2010, the Company recognized reversal of share-based compensation as follows:

	Millions of yen 31st March,		
	2012	2011	2010
Reversal of share-based compensation	¥ 73	¥	¥

	Yen									
	6th stock option plan	8th stock option plan	10th stock option plan	12th stock option plan	13th stock option plan	14th stock option plan	15th stock option plan	16th stock option plan	17th stock option plan	
Exercise price	¥ 3,282	¥ 3,680	¥ 2,650	¥ 2,090	¥ 1	¥ 2,010	¥ 1	¥ 1,869	¥ 1	
Average price on exercise					1,694		1,865			
Fair value on grant date	865	1,030	631	539	2,012	284	1,534	460	1,792	

The exercise price and fair value on grant date as of 31st March, 2012 reflect the five-for-one stock split on 1st April, 2007.

Fair value as of the grant date for stock options which were issued during the year ended 31st March, 2012 was estimated using the Black-Scholes option pricing model with the following assumptions:

	16th stock option plan	17th stock option plan
Expected volatility*1	37.2%	27.8%
Expected remaining period*2	5 years	1 year and 6 months
Expected dividend yield*3	¥52 per share	¥52 per share
Risk-free interest rate*4	0.444%	0.141%

*1 Expected volatility is estimated based on the recent actual stock price in relation to the expected remaining period for each plan.

*2 As it is difficult to estimate the expected remaining period in a reasonable manner, it is determined to be the period from the grant date to the mid-point of the exercisable period.

*3 Expected dividend yield is the expected annual dividend amount for the year ended 31st March, 2012 as of the date of the grant.

*4 Risk-free interest rate represents the interest rate of governmental bonds whose remaining period corresponds to the expected remaining period of stock options.

Because it is difficult to estimate the forfeited number of stock options for future periods, estimation of the vested number is based upon actual forfeitures in prior periods.

19. Segment Information**Segment Information**

1) Outline of reportable segments

The Company's reportable segments have been determined on the basis that separate financial information for such segments is available and evaluated periodically by the Board of Directors in deciding the allocation of management resources and in assessing the business performances of such segments. The Company consists of divisions basically based on services, customers and markets, and those divisions engage in consulting services; system development and application sales; system management and operation services; and product sales. Therefore, the Company has classified its reportable segments as follows: Consulting, Financial IT Solutions, Industrial IT Solutions and IT Platform Services.

Table of Contents

Nomura Research Institute, Ltd.

Notes to the Consolidated Financial Statements (Continued)

31st March, 2012, 2011 (unaudited) and 2010 (unaudited)

Consulting

In addition to management consulting, which provides assistance for formulation and execution of management and business strategies, organizational reform etc., system consulting is provided for all aspects of IT management including valuation and diagnosis of IT assets, formulation of IT strategies and support for system operation.

Financial IT Solutions

Customers in the financial sector, who usually belong to the securities, insurance, or banking industries, are provided with services including system consulting, system development and system management and operation. Specifically, in addition to providing system development and outsourcing services to each customer, this segment provides industry-standard business platforms such as THE STAR, a total securities back-office system, I-STAR, a multi-user system for the wholesale securities sector, T-STAR, a multi-user system for asset management firms, BESTWAY, a system for over-the-counter sales of investment trusts, and e-JIBAI, a multi-user system for automobile liability insurance.

Industrial IT Solutions

The main customers in this segment include not only the distribution, manufacturing and service sectors, but also governments and other public agencies. The services provided include system consulting, system development and system management and operation. Services including information security services and IT platform architecture tools are also provided to customers from a broad range of industry sectors.

IT Platform Services

Services including system operation, management and administration of data centers and IT platform and network architecture related services are provided to mainly the Financial IT Solutions segment and Industrial IT Solutions segment. This segment also conducts research for the development of new business operations and new products related to IT solutions and research related to leading-edge information technologies.

The Company implemented an organizational change on 1st April, 2011. This organizational change is reflected in the presentation of segment information for the year ended 31st March, 2011.

2) Methods of calculating net sales, profit (loss), assets and other items by reportable segment

The accounting policies for reportable segments are generally the same as described in Significant Accounting Policies. Segment profit is based on operating profit. Intersegment sales or transfers are based on current market prices.

Table of Contents**Nomura Research Institute, Ltd.****Notes to the Consolidated Financial Statements (Continued)****31st March, 2012, 2011 (unaudited) and 2010 (unaudited)**

3) Net sales, profit (loss), assets and other items by reportable segment
