At January 31, 2016, the Fund had sufficient cash and/or securities to cover commitments under open derivative contracts.

The Fund is subject to equity price risk in the normal course of pursuing its investment objective. During the fiscal year to date ended January 31, 2016, the Fund entered into equity futures contracts on securities indices to gain or limit exposure to certain markets particularly in connection with engaging in the dividend capture trading strategy.

At January 31, 2016, the aggregate fair value of open derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) in an asset position and in a liability position and whose primary underlying risk exposure is equity price risk was \$861,071 and \$411,885, respectively.

The cost and unrealized appreciation (depreciation) of investments of the Fund at January 31, 2016, as determined on a federal income tax basis, were as follows:

Aggregate cost	\$ 1,704,098,376
Gross unrealized appreciation	\$ 82,933,245
Gross unrealized depreciation	(146,468,806)

Net unrealized depreciation

\$ (63,535,561)

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

* Includes foreign equity securities whose values were adjusted to reflect market trading of comparable securities or other correlated instruments that occurred after the close of trading in their applicable foreign markets.

The Fund held no investments or other financial instruments as of October 31, 2015 whose fair value was determined using Level 3 inputs. At January 31, 2016, the value of investments transferred between Level 1 and Level 2 during the fiscal year to date then ended was not significant.

Derivatives. Financial futures contracts are valued at the closing settlement price established by the board of trade or exchange on which they are traded, with adjustments for fair valuation for certain foreign financial futures contracts as described below.

Foreign Securities, Financial Futures Contracts and Currencies. Foreign securities, financial futures contracts and currencies are valued in U.S. dollars, based on foreign currency exchange rate quotations supplied by a third party pricing service. The pricing service uses a proprietary model to determine the exchange rate. Inputs to the model include reported trades and implied bid/ask spreads. The daily valuation of exchange-traded foreign securities and certain exchange-traded foreign financial futures contracts generally is determined as of the close of trading on the principal exchange on which such securities and contracts trade. Events occurring after the close of trading on foreign exchanges may result in adjustments to the valuation of foreign securities and certain foreign financial futures contracts to more accurately reflect their fair value as of the close of regular trading on the New York Stock Exchange. When valuing foreign equity securities and foreign financial futures contracts that meet certain criteria, the Fund's Trustees have approved the use of a fair value service that values such securities and foreign financial futures contracts to reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or other instruments that have a strong correlation to the fair-valued securities and foreign financial futures contracts.

Financial Futures Contracts - Upon entering into a financial futures contract, the Fund is required to deposit with the broker, either in cash or securities, an amount equal to a certain percentage of the contract amount (initial margin). Subsequent payments, known as variation margin, are made or received by the Fund each business day, depending on the daily fluctuations in the value of the underlying security or index, and are recorded as unrealized gains or losses by the Fund. Gains (losses) are realized upon the expiration or closing of the financial futures contracts. Should market conditions change unexpectedly, the Fund may not achieve the anticipated benefits of the financial futures contracts and may realize a loss. Futures contracts have minimal counterparty risk as they are exchange traded and the clearinghouse for the exchange is substituted as the counterparty, guaranteeing counterparty performance.

For additional information on the Fund's policy regarding the valuation of investments and other significant accounting policies, please refer to the Fund's most recent financial statements included in its semiannual or annual report to shareholders.

Item 2. Controls and Procedures

(a) It is the conclusion of the registrant's principal executive officer and principal financial officer that the effectiveness of the registrant's current disclosure controls and procedures (such disclosure controls and procedures having been evaluated within 90 days of the date of this filing) provide reasonable assurance that the information required to be disclosed by the registrant on this Form N-Q has been recorded, processed, summarized and reported within the time period specified in the Commission's rules and forms and that the information required to be disclosed by the registrant on this Form N-Q has been accumulated and communicated to the registrant's principal executive officer and principal financial officer in order to allow timely decisions regarding required disclosure.

(b) There have been no changes in the registrant's internal controls over financial reporting during the fiscal quarter for which the report is being filed that have materially affected, or are reasonably likely to materially affect the registrant's internal control over financial reporting.
