net income, before taking into account interest income (excluding interest earned on VOI notes receivable), interest expense (excluding interest expense incurred on financings related to Bluegreen s receivable-backed notes payable), provision for income taxes and franchise taxes, depreciation and amortization. For purposes of the **EBITDA** calculation, no

adjustments

were made for

interest income earned on Bluegreen s VOI notes receivable or the interest expense incurred on debt that is secured by such notes receivable because they are both considered to be part of the operations of Bluegreen s business. The Company considers Bluegreen s **EBITDA** to be an indicator of Bluegreen s operating

performance,

and

it

is

used

to

measure

Bluegreen s

ability

to

service

debt,

fund

capital

expenditures

and

expand

its

business.

EBITDA

is

also

used

by

companies,

lenders,

investors

and

others

because

it

excludes

certain

items

that

can

vary

widely

across

different

industries

or

among

companies

within

the

same

industry.

For

example,

interest

expense

can

be

dependent

on

a

company s

capital

structure,

debt

levels

and

credit

ratings.

Accordingly,

the

impact

of

interest

expense

on

earnings

can

vary

significantly

among

companies.

The

tax

positions

of

companies

can

also

vary

because

of

their

differing

abilities

to

take

advantage

of

tax

benefits

and

because

of

the

tax

policies of the jurisdictions in which they operate. As a result, effective tax rates and provision for income taxes can vary considerably among companies. **EBITDA** also excludes depreciation and amortization because companies utilize productive assets of different ages and use different methods of both acquiring and depreciating

productive assets.
These

differences

can

result

in

considerable

variability

in

the

relative

costs

of

productive

assets

and

the

depreciation

and

amortization

expense

among

companies.
