Edgar Filing: United Continental Holdings, Inc. - Form 10-K

Securities registered pursuant to Section 12(b) of the Act:

	Title of Each Class	Name of Each Exchange on Which Registered
United Continental Holdings, Inc.	Common Stock, \$0.01 par value	New York Stock Exchange
United Airlines, Inc.	None	None

Securities registered pursuant to Section 12(g) of the Act:

United Continental Holdings, Inc.	None
United Airlines, Inc.	None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

United Continental Holdings, Inc.	Yes	No
United Airlines, Inc.	Yes	No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

United Continental Holdings, Inc.	Yes	No
United Airlines, Inc.	Yes	No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

United Continental Holdings, Inc.	Yes	No
United Airlines, Inc.	Yes	No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

United Continental Holdings, Inc.	Yes	No
United Airlines, Inc.	Yes	No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

United Continental Holdings, Inc.
United Airlines, Inc.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Edgar Filing: United Continental Holdings, Inc. - Form 10-K

United Continental

Holdings, Inc.	Large accelerated filer	Accelerated filer	Non-accelerated filer	Smaller reporting company
United Airlines, Inc.	Large accelerated filer	Accelerated filer	Non-accelerated filer	Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

United Continental Holdings, Inc.	Yes	No
United Airlines, Inc.	Yes	No

The aggregate market value of common stock held by non-affiliates of United Continental Holdings, Inc. was \$12,558,237,332 as of June 30, 2016, based on the closing price of \$41.04 on the New York Stock Exchange reported for that date. There is no market for United Airlines, Inc. common stock.

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of February 13, 2017.

United Continental Holdings, Inc.	314,622,651 shares of common stock (\$0.01 par value)
United Airlines, Inc.	1,000 (100% owned by United Continental Holdings, Inc.)

This combined Form 10-K is separately filed by United Continental Holdings, Inc. and United Airlines, Inc.

OMISSION OF CERTAIN INFORMATION

United Airlines, Inc. meets the conditions set forth in General Instruction I(1)(a) and (b) of Form 10-K and are therefore filing this form with the reduced disclosure format allowed under that General Instruction.

DOCUMENTS INCORPORATED BY REFERENCE

Information required by Items 10, 11, 12 and 13 of Part III of this Form 10-K are incorporated by reference for United Continental Holdings, Inc. from its definitive proxy statement for its 2017 Annual Meeting of Stockholders.

Table of Contents

This Form 10-K contains various forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). Forward-looking statements represent our expectations and beliefs concerning future events, based on information available to us on the date of the filing of this Form 10-K, and are subject to various risks and uncertainties. Factors that could cause actual results to differ materially from those referenced in the forward-looking statements are listed in Part I, Item 1A, Risk Factors and in Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations. We disclaim any intent or obligation to update or revise any of the forward-looking statements, whether in response to new information, unforeseen events, changed circumstances or otherwise, except as required by applicable law.

PART I

ITEM 1. BUSINESS. Overview

United Continental Holdings, Inc. (together with its consolidated subsidiaries, UAL or the Company) is a holding company and its principal, wholly-owned subsidiary is United Airlines, Inc. (together with its consolidated subsidiaries, United). As UAL consolidates United for financial statement purposes, disclosures that relate to activities of United also apply to UAL, unless otherwise noted. United's operating revenues and operating expenses comprise nearly 100% of UAL's revenues and operating expenses. In addition, United comprises approximately the entire balance of UAL's assets, liabilities and operating cash flows. When appropriate, UAL and United are named specifically for their individual contractual obligations and related disclosures and any significant differences between the operations and results of UAL and United are separately disclosed and explained. We sometimes use the words we, our, us, and the Company in this report for disclosures that relate to all of UAL and United.

UAL was incorporated under the laws of the State of Delaware on December 30, 1968. Our principal executive office is located at 233 South Wacker Drive, Chicago, Illinois 60606 (telephone number (872) 825-4000).

The Company's website is www.unitedcontinentalholdings.com. The information contained on or connected to the Company's website is not incorporated by reference into this annual report on Form 10-K and should not be considered part of this or any other report filed with the U.S. Securities and Exchange Commission (SEC). Through this website, the Company's filings with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports, as well as our proxy statement for our annual meeting of stockholders, are accessible without charge, as soon as reasonably practicable, after such material is electronically filed with or furnished to the SEC. Such filings are also available on the SEC's website at www.sec.gov.

Operations

The Company transports people and cargo through its mainline and regional operations. With key global aviation rights in North America, Asia-Pacific, Europe, Middle East and Latin America, UAL has the world's most comprehensive global route network. UAL, through United and its regional carriers, operates more than 4,500 flights a day to 339 airports across five continents from the Company's hubs at Newark Liberty International Airport (Newark), Chicago O'Hare International Airport (Chicago O'Hare), Denver International Airport (Denver), George Bush Intercontinental Airport (Houston Bush), Los Angeles International Airport (LAX), A.B. Won Pat International Airport (Guam), San Francisco International Airport (SFO) and Washington Dulles International Airport (Washington Dulles).

All of the Company's domestic hubs are located in large business and population centers, contributing to a large amount of origin and destination traffic. The hub and spoke system allows us to transport passengers between a large number of destinations with substantially more frequent service than if each route were served directly. The

Table of Contents

hub system also allows us to add service to a new destination from a large number of cities using only one or a limited number of aircraft. As discussed under *Alliances* below, United is a member of Star Alliance, the world's largest alliance network.

Financial information on the Company's operating revenues by geographic regions, as reported to the U.S. Department of Transportation (the DOT), can be found in Note 17 to the financial statements included in Part II, Item 8 of this report.

Regional. The Company has contractual relationships with various regional carriers to provide regional jet and turboprop service branded as United Express. These regional operations are an extension of the Company's mainline network. This regional service complements our operations by carrying traffic that connects to our mainline service and allows flights to smaller cities that cannot be provided economically with mainline aircraft. Republic Airlines (Republic), Champlain Enterprises, LLC d/b/a CommutAir (CommutAir), ExpressJet Airlines (ExpressJet), GoJet Airlines (GoJet), Mesa Airlines (Mesa), Shuttle America (Shuttle), SkyWest Airlines (SkyWest) and Trans States Airlines (Trans States) are all regional carriers, which operate most of their capacity contracted to United under capacity purchase agreements (CPAs) with United. Under these CPAs, the Company pays the regional carriers contractually agreed fees (carrier-controlled costs) for operating these flights plus a variable reimbursement (incentive payment for operational performance) based on agreed performance metrics. The fees for carrier-controlled costs are based on specific rates for various operating expenses of the regional carriers, such as crew expenses, maintenance and aircraft ownership, some of which are multiplied by specific operating statistics (e.g., block hours, departures) while others are fixed monthly amounts. Under these CPAs, the Company is responsible for all fuel costs incurred as well as landing fees, facilities rent and other costs, which are either passed through by the regional carrier to the Company without any markup or directly incurred by the Company. In return, the regional carriers operate this capacity exclusively for United, on schedules determined by the Company. The Company also determines pricing and revenue management, assumes the inventory and distribution risk for the available seats and permits mileage accrual and redemption for regional flights through its MileagePlus® loyalty program.

Alliances. United is a member of Star Alliance, a global integrated airline network and the largest and most comprehensive airline alliance in the world. As of January 1, 2017, Star Alliance carriers served 1,300 airports in 190 countries with 18,450 daily departures. Star Alliance members, in addition to United, are Adria Airways, Aegean Airlines, Air Canada, Air China, Air India, Air New Zealand, All Nippon Airways (ANA), Asiana Airlines, Austrian Airlines, Avianca, Avianca Brasil, Brussels Airlines, Copa Airlines, Croatia Airlines, EGYPTAIR, Ethiopian Airlines, EVA Air, LOT Polish Airlines, Lufthansa, SAS Scandinavian Airlines, Shenzhen Airlines, Singapore Airlines, South African Airways, SWISS, TAP Portugal, THAI Airways International and Turkish Airlines. In October 2016, Star Alliance announced the future inclusion of Juneyao Airlines as a new connecting partner.

United has a variety of bilateral commercial alliance agreements and obligations with Star Alliance members, addressing, among other things, reciprocal earning and redemption of frequent flyer miles, access to airport lounges and, with certain Star Alliance members, codesharing of flight operations (whereby one carrier's selected flights can be marketed under the brand name of another carrier). In addition to the alliance agreements with Star Alliance members, United currently maintains independent marketing alliance agreements with other air carriers, including Aeromar, Aer Lingus, Air Dolomiti, Azul, Cape Air, Eurowings, Germanwings, Great Lakes Airlines, Hawaiian Airlines, Island Air, Jet Airways and Silver Airways. In addition to the marketing alliance agreements with air partners, United also offers a train-to-plane codeshare and frequent flyer alliance with Amtrak from Newark on select city pairs in the northeastern United States.

United also participates in three passenger joint ventures, one with Air Canada and the Lufthansa Group (which includes Lufthansa and its affiliates Austrian Airlines, Brussels Airlines, Eurowings and SWISS) covering transatlantic routes, one with ANA covering certain transpacific routes and one with Air New Zealand covering certain routes between the United States and New Zealand. These passenger joint ventures enable the participating carriers to integrate the services they provide in the respective regions, capturing revenue synergies and delivering highly competitive flight schedules, fares and services. United has also begun implementation of a

Table of Contents

cargo joint venture with ANA for transpacific cargo services. This cargo joint venture offers expanded and more seamless access to cargo space across the carriers' respective combined networks.

Loyalty Program. United's MileagePlus program builds customer loyalty by offering awards, benefits and services to program participants. Members in this program earn miles for flights on United, United Express, Star Alliance members and certain other airlines that participate in the program. Members can also earn miles by purchasing the goods and services of our network of non-airline partners, such as credit card issuers, retail merchants, hotels and car rental companies. Members can redeem miles for free (other than taxes and government imposed fees), discounted or upgraded travel and non-travel awards.

The Company has an agreement with Chase Bank USA, N.A. (Chase), pursuant to which members of the Company's MileagePlus loyalty program who are residents of the United States can earn miles for making purchases using a MileagePlus credit card issued by Chase. The agreement also provides for joint marketing and other support for the MileagePlus credit card and provides Chase with other benefits such as permission to market to the Company's customer database.

Approximately 5.2 million and 5.0 million MileagePlus flight awards were used on United in 2016 and 2015, respectively. These awards represented 7.7% and 7.5% of United's total revenue passenger miles in 2016 and 2015, respectively. Total miles redeemed for flights on United in 2016, including class-of-service upgrades, represented approximately 84% of the total miles redeemed. In addition, excluding miles redeemed for flights on United, MileagePlus members redeemed miles for approximately 2.0 million other awards in 2016 as compared to 1.8 million in 2015. These awards include United Club memberships, car and hotel awards, merchandise and flights on other air carriers.

Aircraft Fuel. The table below summarizes UAL's aircraft fuel consumption and expense during the last three years.

Year	Gallons Consumed (in millions)	Fuel Expense (in millions)	Average Price Per Gallon	Percentage of Total Operating Expense
2016	3,904	\$ 5,813	\$ 1.49	18%
2015	3,886	\$ 7,522	\$ 1.94	23%
2014	3,905	\$ 11,675	\$ 2.99	32%

Our operational and financial results can be significantly impacted by changes in the price and availability of aircraft fuel. To provide adequate supplies of fuel, the Company routinely enters into purchase contracts that are customarily indexed to market prices for aircraft fuel, and the Company generally has some ability to cover short-term fuel supply and infrastructure disruptions at some major demand locations. The price of aircraft fuel has fluctuated substantially in the past several years and in order to lower its exposure to unpredictable increases in the market prices of aircraft fuel, the Company has historically hedged a portion of its planned fuel requirements. As of December 31, 2016, the Company did not have any outstanding fuel hedging contracts. The Company's current strategy is to not enter into transactions to hedge its fuel consumption, although the Company regularly reviews its strategy based on market conditions and other factors.

Third-Party Business. United generates third-party business revenue that includes frequent flyer award non-air redemptions, maintenance services, catering and ground handling. Third-party business revenue is recorded in Other operating revenue. Expenses associated with third-party business are recorded in Other operating expenses.

Distribution Channels. The Company's airline seat inventory and fares are distributed through the Company's direct channels, traditional travel agencies and on-line travel agencies. The use of the Company's direct sales website, united.com, the Company's mobile applications and alternative distribution systems, provides the Company with an opportunity to de-commoditize its services, better present its content, make more targeted offerings, better retain its customers, enhance its brand and lower its ticket distribution costs. Agency sales are

Table of Contents

primarily sold using global distribution systems (GDS). United has developed capabilities to sell certain ancillary products through the GDS channel to provide an enhanced buying experience for customers who purchase in that channel. To increase the Company's opportunities to sell its full range of products and services and lower distribution costs, the Company will continue to develop new selling capabilities in third-party channels and expand the capabilities of its website and mobile applications.

Industry Conditions

Domestic Competition. The domestic airline industry is highly competitive and dynamic. The Company's competitors consist primarily of other airlines and, to a certain extent, other forms of transportation. Currently, any U.S. carrier deemed fit by the DOT is free to operate scheduled passenger service between any two points within the United States. Competition can be direct, in the form of another carrier flying the exact non-stop route, or indirect, where a carrier serves the same two cities non-stop from an alternative airport in that city or via an itinerary requiring a connection at another airport. Air carriers' cost structures are not uniform and there are numerous factors influencing cost structure. Carriers with lower costs may offer lower fares to passengers, which could have a potential negative impact on the Company's revenues. Decisions on domestic pricing are based on intense competitive pressure exerted on the Company by other U.S. airlines. In order to remain competitive and maintain passenger traffic levels, we often find it necessary to match competitors' discounted fares. Since we compete in a dynamic marketplace, attempts to generate additional revenue through increased fares oftentimes fail.

International Competition. Internationally, the Company competes not only with U.S. airlines, but also with foreign carriers. International competition has increased and may increase in the future as a result of airline mergers and acquisitions, joint ventures, alliances, restructurings, liberalization of aviation bilateral agreements and new or increased service by competitors, including government subsidized competitors from certain Middle East countries. Competition on international routes is subject to varying degrees of governmental regulation. The Company's ability to compete successfully with non-U.S. carriers on international routes depends in part on its ability to generate traffic to and from the entire United States via its integrated domestic route network and its ability to overcome business and operational challenges across its network worldwide. Foreign carriers currently are prohibited by U.S. law from carrying local passengers between two points in the United States and the Company generally experiences comparable restrictions in foreign countries. Separately, fifth freedom rights allow the Company to operate between points in two different foreign countries and foreign carriers may also have fifth freedom rights between the U.S. and another foreign country. In the absence of fifth freedom rights, or some other extra-bilateral right to conduct operations between two foreign countries, U.S. carriers are constrained from carrying passengers to points beyond designated international gateway cities. To compensate partially for these structural limitations, U.S. and foreign carriers have entered into alliances, joint ventures and marketing arrangements that enable these carriers to exchange traffic between each other's flights and route networks. See *Alliances*, above, for additional information.

Seasonality. The air travel business is subject to seasonal fluctuations. Historically, demand for air travel is higher in the second and third quarters, driving higher revenues, than in the first and fourth quarters, which are periods of lower travel demand.

Industry Regulation

Domestic Regulation

All carriers engaged in air transportation in the United States are subject to regulation by the DOT. Absent an exemption, no air carrier may provide air transportation of passengers or property without first being issued a DOT certificate of public convenience and necessity. The DOT also grants international route authority, approves international codeshare arrangements and regulates methods of competition. The DOT regulates consumer protection and maintains jurisdiction over advertising, denied boarding compensation, tarmac delays, baggage liability and other areas and may add additional expensive regulatory burdens in the future. The DOT has

Table of Contents

launched investigations or claimed rulemaking authority to regulate commercial agreements among carriers or between carriers and third parties in a wide variety of contexts.

Airlines are also regulated by the Federal Aviation Administration (the FAA), an agency within the DOT, primarily in the areas of flight safety, air carrier operations and aircraft maintenance and airworthiness. The FAA issues air carrier operating certificates and aircraft airworthiness certificates, prescribes maintenance procedures, oversees airport operations, and regulates pilot and other employee training. From time to time, the FAA issues directives that require air carriers to inspect or modify aircraft and other equipment, potentially causing the Company to incur substantial, unplanned expenses. The airline industry is also subject to numerous other federal laws and regulations. The U.S. Department of Homeland Security (DHS) has jurisdiction over virtually every aspect of civil aviation security. The Antitrust Division of the U.S. Department of Justice (DOJ) has jurisdiction over certain airline competition matters. The U.S. Postal Service has authority over certain aspects of the transportation of mail by airlines. Labor relations in the airline industry are generally governed by the Railway Labor Act (RLA), a federal statute. The Company is also subject to investigation inquiries by the DOT, FAA, DOJ, DHS and other U.S. and international regulatory bodies.

Airport Access. Access to landing and take-off rights, or slots, at several major U.S. airports and many foreign airports served by the Company are, or recently have been, subject to government regulation. Federally mandated domestic slot restrictions that limit operations and regulate capacity currently apply at Reagan National Airport in Washington, D.C. and at John F. Kennedy International Airport and LaGuardia Airport in the New York City metropolitan region. Additional restrictions on airline routes and takeoff and landing slots at these and other airports may be proposed in the future that could affect the Company's rights of ownership and transfer. In April 2016, the FAA announced that it was lifting slot controls at Newark as of the winter 2016 season. This change may result in additional congestion at Newark and in the New York City metropolitan region airspace as a whole. If slots are eliminated at an airport, or if the number of hours of operation governed by slots is reduced at an airport, the lack of controls on takeoffs and landings could result in greater congestion both at the affected airport or in the regional airspace (e.g., the New York City metropolitan airspace) and could significantly impact the Company's operations.

Legislation. The airline industry is subject to legislative activity that may have an impact on operations and costs. In 2017, the U.S. Congress will continue to consider legislation to reauthorize the FAA, which encompasses all significant aviation tax and policy-related issues. As with previous reauthorization legislation, the U.S. Congress may consider a range of policy changes that could impact operations and costs. Finally, aviation security continues to be the subject of legislative and regulatory action, requiring changes to the Company's security processes, potentially increasing the cost of its security procedures and affecting its operations.

International Regulation

International air transportation is subject to extensive government regulation. In connection with the Company's international services, the Company is regulated by both the U.S. government and the governments of the foreign countries the Company serves. In addition, the availability of international routes to U.S. carriers is regulated by aviation agreements between the U.S. and foreign governments, and in some cases, fares and schedules require the approval of the DOT and/or the relevant foreign governments.

Legislation. Foreign countries are increasingly enacting passenger protection laws, rules and regulations that meet or exceed U.S. requirements. In cases where this activity exceeds U.S. requirements, additional burden and liability may be placed on the Company. Certain countries have regulations requiring passenger compensation and/or enforcement penalties from the Company in addition to changes in operating procedures due to canceled and delayed flights.

Airport Access. Historically, access to foreign markets has been tightly controlled through bilateral agreements between the U.S. and each foreign country involved. These agreements regulate the markets served, the number of carriers allowed to serve each market and the frequency of carriers' flights. Since the early 1990s, the U.S. has pursued a policy of "Open Skies" (meaning all U.S.-flag carriers have access to the destination), under which the

Table of Contents

U.S. government has negotiated a number of bilateral agreements allowing unrestricted access between U.S. and foreign markets. Currently, there are more than 100 Open Skies agreements in effect. However, even with Open Skies, many of the airports that the Company serves in Europe, Asia and Latin America maintain slot controls. A large number of these slot controls exist due to congestion, environmental and noise protection and reduced capacity due to runway and air traffic control (ATC) construction work, among other reasons. London Heathrow International Airport, Frankfurt Rhein-Main Airport, Shanghai Pudong International Airport, Beijing Capital International Airport, Sao Paulo Guarulhos International Airport and Tokyo Haneda International Airport are among the most restrictive foreign airports due to slot and capacity limitations.

The Company's ability to serve some foreign markets and expand into certain others is limited by the absence of aviation agreements between the U.S. government and the relevant foreign governments. Shifts in U.S. or foreign government aviation policies may lead to the alteration or termination of air service agreements. Depending on the nature of any such change, the value of the Company's international route authorities and slot rights may be materially enhanced or diminished.

Environmental Regulation

The airline industry is subject to increasingly stringent federal, state, local and international environmental requirements, including those regulating emissions to air, water discharges, safe drinking water and the use and management of hazardous substances and wastes.

Climate Change. There is an increasing global regulatory focus on greenhouse gas (GHG) emissions and their potential impacts relating to climate change. In October 2013, the International Civil Aviation Organization (ICAO), a United Nations body, agreed to develop a global market based measure to address carbon emissions from international aviation, which was adopted in October 2016. The program, the Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA), is intended to create a single global market-based measure to achieve carbon-neutral growth for international aviation after 2020, which will be achieved through airline purchases of carbon offset credits. Certain CORSIA program details remain to be developed and the impact of CORSIA cannot be fully predicted, but CORSIA is expected to increase operating costs for airlines that operate internationally. In 2016, ICAO also adopted a carbon dioxide (CO₂) emission standard for aircraft and the U.S. Environmental Protection Agency has started the process required to adopt the standard. While the precise timing and final form of these various programs and requirements continue to evolve, the Company is taking various actions that are expected to help to reduce its CO₂ emissions over time such as fleet renewal, aircraft retrofits and the commercialization of aviation alternative fuels.

Other Regulations. Our operations are subject to a variety of other environmental laws and regulations both in the United States and internationally. These include noise-related restrictions on aircraft types and operating times, which have or could in the future, result in curtailments in services, increased operating costs or limits on expansion. Certain foreign airports and/or governments either have or are seeking to establish environmental fees applicable to carbon emissions, local air quality pollutants and/or noise. In the United States, new regulations affecting underground storage tanks became effective in 2015, which are expected to affect certain airport fuel hydrant systems, potentially impacting operating costs. The implementation of revised national ambient air quality standards for ozone by individual affected states, scheduled for early 2020, is expected to trigger restrictions on mobile sources such as cars, trucks and airport ground support equipment in those jurisdictions where ozone levels exceed the new standards. Finally, environmental cleanup laws can require the Company to undertake or subject the Company to liability for investigation and remediation costs at owned or leased locations or third party disposal locations.

Until applicability of new regulations to our specific operations is better defined and/or when new regulations are finalized, future costs to comply with such regulations will remain uncertain but are likely to increase our operating costs over time. While we continue to monitor these developments, the precise nature of future requirements and their applicability to the Company are difficult to predict, but the financial impact to the Company and the aviation industry could be significant.

Table of Contents

Employees

As of December 31, 2016, UAL, including its subsidiaries, had approximately 88,000 employees. Approximately 80% of the Company's employees were represented by various U.S. labor organizations as of December 31, 2016.

Collective bargaining agreements between the Company and its represented employee groups are negotiated under the RLA. Such agreements typically do not contain an expiration date and instead specify an amendable date, upon which the agreement is considered open for amendment. In 2016, the Company finalized new or extension agreements with all 11 of its U.S. employee groups, including joint collective bargaining agreements with its flight attendants and technicians and related employees.

The following table reflects the Company's represented employee groups, the number of employees per represented group, union representation for each of United's employee groups, and the amendable date for each employee group's collective bargaining agreement as of December 31, 2016:

Employee Group	Number of Employees	Union	Agreement Open for Amendment
Flight Attendants	22,779	Association of Flight Attendants (the AFA)	August 2021
Fleet Service	12,812	International Association of Machinists and Aerospace Workers (the IAM)	December 2021
Passenger Service	12,012	IAM	December 2021
Pilots	11,454	Air Line Pilots Association, International	January 2019
Technicians and Related &			
Flight Simulator Technicians	9,521	International Brotherhood of Teamsters (the IBT)	December 2022
Storekeeper Employees	977	IAM	December 2021
Dispatchers	396	Professional Airline Flight Control Association	December 2021
Fleet Tech Instructors	128	IAM	December 2021
Load Planners	67	IAM	December 2021
Security Officers	50	IAM	December 2021
Maintenance Instructors	42	IAM	December 2021

Table of Contents

ITEM 1A. RISK FACTORS.

The following risk factors should be read carefully when evaluating the Company's business and the forward-looking statements contained in this report and other statements the Company or its representatives make from time to time. Any of the following risks could materially and adversely affect the Company's business, operating results, financial condition and the actual outcome of matters as to which forward-looking statements are made in this report.

Global economic, political and industry conditions constantly change and unfavorable conditions may have a material adverse effect on the Company's business and results of operations.

The Company's business and results of operations are significantly impacted by global economic and industry conditions. The airline industry is highly cyclical, and the level of demand for air travel is correlated to the strength of the U.S. and global economies. The Company is a global business with operations outside of the United States from which it derives significant operating revenues. The Company's international operations are a vital part of its worldwide airline network. Volatile economic, political and market conditions in these international regions may have a negative impact on the Company's operating results and its ability to achieve its business objectives.

Robust demand for the Company's air transportation services depends largely on favorable economic conditions, including the strength of the domestic and foreign economies, low unemployment levels, strong consumer confidence levels and the availability of consumer and business credit. Air transportation is often a discretionary purchase that leisure travelers may limit or eliminate during difficult economic times. In addition, during periods of unfavorable economic conditions, business travelers usually reduce the volume of their travel, either due to cost-saving initiatives or as a result of decreased business activity requiring travel. During such periods, the Company's business and results of operations may be adversely affected due to significant declines in industry passenger demand, particularly with respect to the Company's business and premium cabin travelers, and a reduction in fare levels.

Stagnant or weakening global economic conditions either in the United States or in other geographic regions, and any future volatility in U.S. and global financial and credit markets may have a material adverse effect on the Company's revenues, results of operations and liquidity. If such economic conditions were to disrupt capital markets in the future, the Company may be unable to obtain financing on acceptable terms (or at all) to refinance certain maturing debt and to satisfy future capital commitments.

Recently, United Kingdom (UK) voters voted for the UK to exit the European Union (the EU), a non-binding referendum that, if passed into law, could adversely affect European and worldwide economic and market conditions and could contribute to instability in global financial and foreign exchange markets, including volatility in the value of the British pound and European euro, additional travel restrictions on passengers traveling between the UK and other EU countries and legal uncertainty and potentially divergent national laws and regulations. These adverse effects in European market conditions could negatively impact the Company's business, results of operations and financial condition.

In addition, significant or volatile changes in exchange rates between the U.S. dollar and other currencies may have a material adverse impact upon the Company's liquidity, revenues, costs and operating results.

The airline industry is highly competitive and susceptible to price discounting and changes in capacity, which could have a material adverse effect on the Company.

The U.S. airline industry is characterized by substantial price competition including from low-cost carriers. The significant market presence of low-cost carriers, which engage in substantial price discounting, may diminish our ability to achieve sustained profitability on domestic and international routes.

Airlines also compete for market share by increasing or decreasing their capacity, including route systems and the number of markets served. Several of the Company's domestic and international competitors have increased

Table of Contents

their international capacity by including service to some destinations that the Company currently serves, causing overlap in destinations served and therefore increasing competition for those destinations. This increased competition in both domestic and international markets may have a material adverse effect on the Company's results of operations, financial condition or liquidity.

Terrorist attacks or international hostilities, or the fear of terrorist attacks or hostilities, even if not made directly on the airline industry, could negatively affect the Company and the airline industry.

The terrorist attacks on September 11, 2001 involving commercial aircraft severely and adversely impacted the Company's financial condition and results of operations, as well as the prospects for the airline industry. Among the effects experienced from the September 11, 2001 terrorist attacks were substantial flight disruption costs caused by the FAA-imposed temporary grounding of the U.S. airline industry's fleet, significantly increased security costs and associated passenger inconvenience, increased insurance costs, substantially higher ticket refunds and significantly decreased traffic and passenger revenue.

Additional terrorist attacks, even if not made directly on the airline industry, or the fear of or the precautions taken in anticipation of such attacks (including elevated national threat warnings or selective cancellation or redirection of flights) could materially and adversely affect the Company and the airline industry. Wars and other international hostilities could also have a material adverse impact on the Company's financial condition, liquidity and results of operations. The Company's financial resources may not be sufficient to absorb the adverse effects of any future terrorist attacks or other international hostilities.

Increasing privacy and data security obligations or a significant data breach may adversely affect the Company's business.

The Company is subject to increasing legislative, regulatory and customer focus on privacy issues and data security. Also, a number of the Company's commercial partners, including credit card companies, have imposed data security standards that the Company must meet and these standards continue to evolve. The Company will continue its efforts to meet its privacy and data security obligations; however, it is possible that certain new obligations may be difficult to meet and could increase the Company's costs. Additionally, the Company must manage evolving cybersecurity risks. The loss, disclosure, misappropriation of or access to customers', employees' or business partners' information or the Company's failure to meet its obligations could result in legal claims or proceedings, liability or regulatory penalties. A significant data breach or the Company's failure to meet its obligations may adversely affect the Company's reputation, business, results of operations and financial condition.

The Company relies heavily on technology and automated systems to operate its business and any significant failure or disruption of the technology or these systems could materially harm its business.

The Company depends on automated systems and technology to operate its business, including computerized airline reservation systems, flight operations systems, revenue management systems, accounting systems, telecommunication systems and commercial websites, including www.united.com. United's website and other automated systems must be able to accommodate a high volume of traffic, maintain secure information and deliver important flight and schedule information, as well as process critical financial transactions. These systems could suffer substantial or repeated disruptions due to various events, some of which are beyond the Company's control, including natural disasters, power failures, terrorist attacks, equipment or software failures, computer viruses or cyber security attacks. Substantial or repeated systems failures or disruptions, including failures or disruptions related to the Company's complex integration of systems, could reduce the attractiveness of the Company's services versus those of its competitors, materially impair its ability to market its services and operate its flights, result in the unauthorized release of confidential or otherwise protected information, result in increased costs, lost revenue and the loss or compromise of important data, and may adversely affect the Company's business, results of operations and financial condition.

Table of Contents

Current or future litigation and regulatory actions, or failure to comply with the terms of any settlement, order or arrangement relating to these actions, could have a material adverse impact on the Company.

From time to time, we are subject to litigation and other legal and regulatory proceedings relating to our business or investigations or other actions by governmental agencies, including as described in Part I, Item 3 Legal Proceedings of this annual report on Form 10-K. No assurances can be given that the results of these or new matters will be favorable to us. An adverse resolution of lawsuits, arbitrations, investigations or other proceedings or actions could have a material adverse effect on our financial condition and results of operations, including as a result of non-monetary remedies. Defending ourselves in these matters may be time-consuming, expensive and disruptive to normal business operations and may result in significant expense and a diversion of management's time and attention from the operation of our business, which could impede our ability to achieve our business objectives. Additionally, any amount that we may be required to pay to satisfy a judgment, settlement, fine or penalty may not be covered by insurance. If we fail to comply with the terms contained in any settlement, order or agreement with a governmental authority relating to these matters, we could be subject to criminal or civil penalties, which could have a material adverse impact on the Company. Under our charter and certain indemnification agreements that we have entered into (and may in the future enter into) with our officers, directors and certain third parties, we could be required to indemnify and advance expenses to them in connection with their involvement in certain actions, suits, investigations and other proceedings. There can be no assurance that any of these payments will not be material.

Disruptions to the Company's regional network and United Express flights provided by third-party regional carriers could adversely affect the Company's operations and financial condition.

The Company has contractual relationships with various regional carriers to provide regional jet and turboprop service branded as United Express. These regional operations are an extension of the Company's mainline network and complement the Company's operations by carrying traffic that connects to mainline service and allows flights to smaller cities that cannot be provided economically with mainline aircraft. The Company's business and operations are dependent on its regional flight network, with regional capacity accounting for approximately 11% of the Company's total capacity as of December 31, 2016.

Although the Company has agreements with its regional carriers that include contractually agreed performance metrics, the Company does not control the operations of these carriers. A number of factors may impact the Company's regional network, including weather-related effects and seasonality. In addition, the decrease in qualified pilots driven by federal regulations has adversely impacted and could continue to affect the Company's regional flying. For example, the FAA's expansion of minimum pilot qualification standards, including a requirement that a pilot have at least 1,500 total flight hours, as well as the FAA's revised pilot flight and duty time rules, effective January 2014, have contributed to a smaller supply of pilots available to regional carriers. The decrease in qualified pilots resulting from the regulations as well as factors including a decreased student pilot population and a shrinking U.S. military from which to hire qualified pilots, could adversely impact the Company's operations and financial condition, and also require the Company to reduce regional carrier flying.

If a significant disruption occurs to the Company's regional network or flights or if one or more of the regional carriers with which the Company has relationships is unable to perform their obligations over an extended period of time, there could be a material adverse effect on the Company's business, financial condition and operations.

The Company's business relies extensively on third-party service providers. Failure of these parties to perform as expected, or interruptions in the Company's relationships with these providers or their provision of services to the Company, could have an adverse effect on the Company's financial position and results of operations.

The Company has engaged third-party service providers to perform a large number of functions that are integral to its business, including regional operations, operation of customer service call centers, distribution and sale of airline seat inventory, provision of information technology infrastructure and services, transmitting or uploading of data, provision of aircraft maintenance and repairs, provision of various utilities and performance of aircraft

Table of Contents

fueling operations, among other vital functions and services. The Company does not directly control these third-party service providers, although it does enter into agreements with most of them that define expected service performance. Any of these third-party service providers, however, may materially fail to meet their service performance commitments to the Company, may suffer disruptions to their systems that could impact their services, or the agreements with such providers may be terminated. For example, flight reservations booked by customers and travel agencies via third-party GDSs may be adversely affected by disruptions in the business relationships between the Company and GDS operators. Such disruptions, including a failure to agree upon acceptable contract terms when contracts expire or otherwise become subject to renegotiation, may cause the Company's flight information to be limited or unavailable for display, significantly increase fees for both the Company and GDS users and impair the Company's relationships with its customers and travel agencies. The failure of any of the Company's third-party service providers to perform their service obligations adequately, or other interruptions of services, may reduce the Company's revenues and increase its expenses, prevent the Company from operating its flights and providing other services to its customers or result in adverse publicity or harm to its brand. In addition, the Company's business and financial performance could be materially harmed if its customers believe that its services are unreliable or unsatisfactory.

Orders for new aircraft typically must be placed years in advance of scheduled deliveries, and changes in the Company's route network over time may make aircraft on order less economic for the Company, but any modification or termination of such orders could result in material liability for the Company.

The Company's orders for new aircraft are typically made years in advance of actual delivery of such aircraft, and the financial commitment required for purchases of new aircraft is substantial. At December 31, 2016, the Company had firm commitments to purchase 257 new aircraft from The Boeing Company (Boeing), Airbus S.A.S (Airbus) and Embraer S.A. (Embraer), as well as related agreements with engine manufacturers, maintenance providers and others. At December 31, 2016, the Company's commitments relating to the acquisition of aircraft and related spare engines, aircraft improvements and other related obligations aggregated \$23.6 billion.

Subsequent to the Company placing an order for new aircraft, the Company's route network may change, such that the aircraft on order become less economic to operate flights in the Company's network. As a result, the Company's preference for a particular aircraft that it has ordered, often years in advance, may be decreased or eliminated. If the Company were to seek to modify or terminate its existing aircraft order commitments, it may be responsible for material obligations to its counterparties arising from any such change. However, the Company expects that any such change that it makes would be in the long-term best economic interest of the Company.

The Company could experience adverse publicity, harm to its brand, reduced travel demand and potential tort liability as a result of an accident, catastrophe, or incident involving its aircraft, the aircraft of its regional carriers or the aircraft of its codeshare partners, which may result in a material adverse effect on the Company's results of operations or financial position.

An accident, catastrophe, or incident involving an aircraft that the Company operates, or an aircraft that is operated by a codeshare partner or one of the Company's regional carriers, could have a material adverse effect on the Company if such accident, catastrophe, or incident created a public perception that the Company's operations, or the operations of its codeshare partners or regional carriers, are not safe or reliable, or are less safe or reliable than other airlines. Such public perception could in turn result in adverse publicity for the Company, cause harm to the Company's brand and reduce travel demand on the Company's flights, or the flights of its codeshare partners or regional carriers.

In addition, any such accident, catastrophe, or incident could expose the Company to significant tort liability. Although the Company currently maintains liability insurance in amounts and of the type the Company believes to be consistent with industry practice to cover damages arising from any such accident or catastrophe, and the Company's codeshare partners and regional carriers carry similar insurance and generally indemnify the

Table of Contents

Company for their operations, if the Company's liability exceeds the applicable policy limits or the ability of another carrier to indemnify it, the Company could incur substantial losses from an accident, catastrophe or incident which may result in a material adverse effect on the Company's results of operations or financial position.

If we experience changes in, or are unable to retain, our senior management team or other key employees, our operating results could be adversely affected.

Much of our future success depends on the continued availability of skilled personnel with industry experience and knowledge, including our senior management team and other key employees. If we are unable to attract and retain talented, highly qualified senior management and other key employees, or if we are unable to effectively provide for the succession of senior management, our business may be adversely affected.

High and/or volatile fuel prices or significant disruptions in the supply of aircraft fuel could have a material adverse impact on the Company's strategic plans, operating results, financial position and liquidity.

Aircraft fuel is critical to the Company's operations and is one of its single largest operating expenses. The timely and adequate supply of fuel to meet operational demand depends on the continued availability of reliable fuel supply sources, as well as related service and delivery infrastructure. Although the Company has some ability to cover short-term fuel supply and infrastructure disruptions at some major demand locations, it can neither predict nor guarantee the continued timely availability of aircraft fuel throughout the Company's system. The Company generally sources fuel at prevailing market prices.

Aircraft fuel has historically been the Company's most volatile operating expense due to the highly unpredictable nature of market prices for fuel. Market prices for aircraft fuel have historically fluctuated substantially in short periods of time and continue to be highly volatile due a dependence on a multitude of unpredictable factors beyond the Company's control. These factors include changes in global crude oil prices, the balance between aircraft fuel supply and demand, natural disasters, prevailing inventory levels and fuel production and transportation infrastructure. Prices of fuel are also impacted by indirect factors that may potentially impact fuel supply or demand balance, such as geopolitical events, economic growth indicators, fiscal/monetary policies, fuel tax policies, environmental concerns and financial investments in energy markets. Both actual changes in these factors, as well as changes in market expectations of these factors can potentially drive rapid changes in fuel price levels in short periods of time.

Given the highly competitive nature of the airline industry, the Company may not be able to increase its fares and fees sufficiently to offset the full impact of increases in fuel prices, especially if these increases are significant, rapid and sustained. Further, such fare and fee increases may not be sustainable, may reduce the general demand for air travel and may also eventually impact the Company's strategic growth and investment plans for the future. In addition, decreases in fuel prices for an extended period of time may result in increased industry capacity, increased competitive actions for market share and lower fares or surcharges in general. If fuel prices were to then subsequently rise quickly, there may be a lag between the rise in fuel prices and any improvement of the revenue environment.

To protect against increases in the market prices of fuel, the Company may hedge a portion of its future fuel requirements. However, the Company's hedging program may not be successful in mitigating higher fuel costs, and any price protection provided may be limited due to choice of hedging instruments and market conditions, including breakdown of correlation between hedging instrument and market price of aircraft fuel and failure of hedge counterparties. To the extent that the Company decides to hedge a portion of its future fuel requirements and uses hedge contracts that have the potential to create an obligation to pay upon settlement if fuel prices decline significantly, such hedge contracts may limit the Company's ability to benefit fully from lower fuel costs in the future. If fuel prices decline significantly from the levels existing at the time the Company enters into a hedge contract, the Company may be required to post collateral (margin) beyond certain thresholds. There can be no assurance that the Company's hedging arrangements will provide any particular level of protection against

Table of Contents

rises in fuel prices or that its counterparties will be able to perform under the Company's hedging arrangements. Additionally, deterioration in the Company's financial condition could negatively affect its ability to enter into new hedge contracts in the future.

See Note 10 to the financial statements included in Part II, Item 8 of this report for additional information on the Company's hedging activities.

Union disputes, employee strikes or slowdowns, and other labor-related disruptions could adversely affect the Company's operations and could result in increased costs that impair its financial performance.

United is a highly unionized company. As of December 31, 2016, the Company and its subsidiaries had approximately 88,000 active employees, of whom approximately 80% were represented by various U.S. labor organizations.

There is a risk that unions or individual employees might pursue judicial or arbitral claims arising out of changes implemented as a result of the Company entering into collective bargaining agreements with its represented employee groups. There is also a possibility that employees or unions could engage in job actions such as slowdowns, work-to-rule campaigns, sick-outs or other actions designed to disrupt the Company's normal operations, in an attempt to pressure the Company in collective bargaining negotiations. Although the RLA makes such actions unlawful until the parties have been lawfully released to self-help, and the Company can seek injunctive relief against premature self-help, such actions can cause significant harm even if ultimately enjoined. In addition, collective bargaining agreements with the Company's represented employee groups increase the Company's labor costs, which increase could be material for any applicable reporting period.

See Notes 15 and 16 to the financial statements included in Part II, Item 8 of this report for additional information on labor negotiations and costs.

An outbreak of a disease or similar public health threat could have a material adverse impact on the Company's business, financial position and results of operations.

An outbreak of a disease or similar public health threat that affects travel demand or travel behavior, or travel restrictions or reduction in the demand for air travel caused by an outbreak of a disease or similar public health threat in the future, could have a material adverse impact on the Company's business, financial condition and results of operations.

Extensive government regulation could increase the Company's operating costs and restrict its ability to conduct its business.

Airlines are subject to extensive regulatory and legal oversight. Compliance with U.S. and international regulations imposes significant costs and may have adverse effects on the Company. Laws, regulations, taxes and airport rates and charges, both domestically and internationally, have been proposed from time to time that could significantly increase the cost of airline operations or reduce airline revenue.

United provides air transportation under certificates of public convenience and necessity issued by the DOT. If the DOT altered, amended, modified, suspended or revoked these certificates, it could have a material adverse effect on the Company's business. The FAA regulates the safety of United's operations. United operates pursuant to an air carrier operating certificate issued by the FAA. In January 2014, the FAA's more stringent pilot flight and duty time requirements under Part 117 of the Federal Aviation Regulations took effect, which has increased costs for all carriers. In July 2014, minimum qualifications took effect for air carrier first officers. These regulations will continue to impact the industry and the Company for years to come, as they have caused mainline airlines to hire regional pilots, while simultaneously significantly reducing the pool of new pilots from which regional carriers themselves can hire. Although this is an industry issue, it directly affects the Company and requires it to reduce regional partner flying, as several regional partners have experienced difficulty flying their schedules due to reduced pilot availability. From time to time, the FAA also issues orders, airworthiness

Table of Contents

directives and other regulations relating to the maintenance and operation of aircraft that require material expenditures or operational restrictions by the Company. These FAA orders and directives could include the temporary grounding of an entire aircraft type if the FAA identifies design, manufacturing, maintenance or other issues requiring immediate corrective action. These FAA directives or requirements could have a material adverse effect on the Company.

In addition, the Company's operations may be adversely impacted due to the existing antiquated ATC system utilized by the U.S. government. During peak travel periods in certain markets, the current ATC system's inability to handle ATC demand has led to short-term capacity constraints imposed by government agencies and resulted in delays and disruptions of air traffic. In addition, the current system will not be able to effectively handle projected future air traffic growth. Imposition of these ATC constraints on a long-term basis may have a material adverse effect on the Company's operations. Failure to update the ATC system in a timely manner, and the substantial funding requirements of a modernized ATC system that may be imposed on air carriers may have an adverse impact on the Company's financial condition or results of operations.

Access to landing and take-off rights, or slots, at several major U.S. airports and many foreign airports served by the Company are, or recently have been, subject to government regulation. Certain of the Company's major hubs are among the most congested airports in the United States and have been or could be the subject of regulatory action that might limit the number of flights and/or increase costs of operations at certain times or throughout the day. The FAA may limit the Company's airport access by limiting the number of departure and arrival slots at high density traffic airports, which could affect the Company's ownership and transfer rights, and local airport authorities may have the ability to control access to certain facilities or the cost of access to their facilities, which could have an adverse effect on the Company's business. The FAA historically has taken actions with respect to airlines' slot holdings that airlines have challenged; if the FAA were to take actions that adversely affect the Company's slot holdings, the Company could incur substantial costs to preserve its slots or may lose slots. If slots are eliminated at an airport, or if the number of hours of operation governed by slots is reduced at an airport, the lack of controls on takeoffs and landings could result in greater congestion both at the affected airport or in the regional airspace (e.g., the New York City metropolitan region airspace) and could significantly impact the Company's operations. Further, the Company's operating costs at airports, including the Company's major hubs, may increase significantly because of capital improvements at such airports that the Company may be required to fund, directly or indirectly. Such costs could be imposed by the relevant airport authority without the Company's approval and may have a material adverse effect on the Company's financial condition.

The ability of carriers to operate flights on international routes between the United States and other countries may be subject to change. Applicable arrangements between the United States and foreign governments may be amended from time to time, government policies with respect to airport operations may be revised, and the availability of appropriate slots or facilities may change. The Company currently operates a number of flights on international routes under government arrangements, regulations or policies that designate the number of carriers permitted to operate on such routes, the capacity of the carriers providing services on such routes, the airports at which carriers may operate international flights, or the number of carriers allowed access to particular airports. Any further limitations, additions or modifications to such arrangements, regulations or policies could have a material adverse effect on the Company's financial position and results of operations. Additionally, a change in law, regulation or policy for any of the Company's international routes, such as Open Skies, could have a material adverse impact on the Company's financial position and results of operations and could result in the impairment of material amounts of related tangible and intangible assets. In addition, competition from revenue-sharing joint ventures and other alliance arrangements by and among other airlines could impair the value of the Company's business and assets on the Open Skies routes. The Company's plans to enter into or expand U.S. antitrust immunized alliances and joint ventures on various international routes are subject to receipt of approvals from applicable U.S. federal authorities and obtaining other applicable foreign government clearances or satisfying the necessary applicable regulatory requirements. There can be no assurance that such approvals and clearances will be granted or will continue in effect upon further regulatory review or that changes in regulatory requirements or standards can be satisfied.

Table of Contents

Many aspects of the Company's operations are also subject to increasingly stringent federal, state, local and international laws protecting the environment. Future environmental regulatory developments, such as climate change regulations in the United States and abroad could adversely affect operations and increase operating costs in the airline industry. In addition, there is the potential for additional regulatory actions in regard to the emission of GHGs by the aviation industry. The precise nature of future requirements and their applicability to the Company are difficult to predict, but the financial impact to the Company and the aviation industry would likely be adverse and could be significant.

In 2017, the U.S. Congress will continue to consider legislation to reauthorize the FAA, which encompasses all significant aviation tax and policy related issues. As with previous reauthorization legislation, the U.S. Congress may consider a range of policy changes that could impact the Company's operations and costs.

See Part I, Item 1, Business - Industry Regulation, of this report for additional information on government regulation impacting the Company.

The airline industry may undergo further change with respect to alliances and joint ventures or due to consolidations, any of which could have a material adverse effect on the Company.

The Company faces and may continue to face strong competition from other carriers due to the modification of alliances and formation of new joint ventures. Carriers may improve their competitive positions through airline alliances, slot swaps and/or joint ventures. Certain types of airline joint ventures further competition by allowing multiple airlines to coordinate routes, pool revenues and costs, and enjoy other mutual benefits, achieving many of the benefits of consolidation. Open Skies agreements, including the agreements between the United States and the EU and between the United States and Japan, may also give rise to better integration opportunities among international carriers. Movement of airlines between current global airline alliances could reduce joint network coverage for members of such alliances while also creating opportunities for joint ventures and bilateral alliances that did not exist before such realignment. There is ongoing speculation that further airline and airline alliance consolidations or reorganizations could occur in the future, especially if new Open Skies agreements between Brazil and the United States are fully implemented. The Company routinely engages in analysis and discussions regarding its own strategic position, including current and potential alliances, asset acquisitions and divestitures and may have future discussions with other airlines regarding strategic activities. If other airlines participate in such activities, those airlines may significantly improve their cost structures or revenue generation capabilities, thereby potentially making them stronger competitors of the Company and potentially impairing the Company's ability to realize expected benefits from its own strategic relationships.

Insufficient liquidity may have a material adverse effect on the Company's financial position and business.

The Company has a significant amount of financial leverage from fixed obligations, including aircraft lease and debt financings, leases of airport property and other facilities, and other material cash obligations. In addition, the Company has substantial noncancelable commitments for capital expenditures, including for the acquisition of new aircraft and related spare engines.

Although the Company's cash flows from operations and its available capital, including the proceeds from financing transactions, have been sufficient to meet these obligations and commitments to date, the Company's future liquidity could be negatively affected by the risk factors discussed in this Item 1A., including, but not limited to, substantial volatility in the price of fuel, adverse economic conditions, disruptions in the global capital markets and catastrophic external events.

If the Company's liquidity is materially diminished due to the various risk factors noted in this Item 1A. or otherwise, the Company might not be able to timely pay its leases and debts or comply with certain operating and financial covenants under its financing and credit card processing agreements or with other material provisions of its contractual obligations. Certain of these covenants require the Company or United, as applicable, to maintain minimum liquidity and/or minimum collateral coverage ratios. The Company's or United's ability to comply with these covenants may be affected by events beyond its control, including the overall industry revenue environment, the level of fuel costs and the appraised value of the collateral.

Table of Contents

If the Company does not timely pay its leases and debts or comply with such covenants, a variety of adverse consequences could result. These potential adverse consequences include an increase of required reserves under credit card processing agreements, withholding of credit card sale proceeds by its credit card service providers, loss of undrawn lines of credit, the occurrence of one or more events of default under the relevant agreements, the acceleration of the maturity of debt and/or the exercise of other remedies by its creditors and equipment lessors that could result in a material adverse effect on the Company's financial position and results of operations. The Company cannot provide assurance that it would have sufficient liquidity to repay or refinance such debt if it were accelerated. In addition, an event of default or acceleration of debt under certain of its financing agreements could result in one or more events of default under certain of the Company's other financing agreements due to cross default and cross acceleration provisions.

Furthermore, insufficient liquidity may limit the Company's ability to withstand competitive pressures and downturns in the travel business and the economy in general.

The Company's substantial level of indebtedness and non-investment grade credit rating, as well as market conditions and the availability of assets as collateral for loans or other indebtedness, may make it difficult for the Company to raise additional capital if needed to meet its liquidity needs on acceptable terms, or at all.

See Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, of this report for additional information regarding the Company's liquidity.

Increases in insurance costs or reductions in insurance coverage may materially and adversely impact the Company's results of operations and financial condition.

The Company could be exposed to significant liability or loss if its property or operations were to be affected by a natural catastrophe or other event, including aircraft accidents. If the Company is unable to obtain sufficient insurance (including but not limited to terrorism, aviation hull and liability, workers' compensation and property and business interruption insurance) with acceptable terms or if the coverage obtained is insufficient relative to actual liability or losses that the Company experiences, whether due to insurance market conditions or otherwise, its results of operations and financial condition could be materially and adversely affected.

The Company's results of operations fluctuate due to seasonality and other factors associated with the airline industry.

Due to greater demand for air travel during the spring and summer months, revenues in the airline industry in the second and third quarters of the year are generally stronger than revenues in the first and fourth quarters of the year, which are periods of lower travel demand. The Company's results of operations generally reflect this seasonality, but have also been impacted by numerous other factors that are not necessarily seasonal including, among others, the imposition of excise and similar taxes, extreme or severe weather, ATC congestion, geological events, natural disasters, changes in the competitive environment due to industry consolidation, general economic conditions and other factors. As a result, the Company's quarterly operating results are not necessarily indicative of operating results for an entire year and historical operating results in a quarterly or annual period are not necessarily indicative of future operating results.

The Company may never realize the full value of its intangible assets or its long-lived assets causing it to record impairments that may negatively affect its financial position and results of operations.

In accordance with applicable accounting standards, the Company is required to test its indefinite-lived intangible assets for impairment on an annual basis, or more frequently if conditions indicate that an impairment may have occurred. In addition, the Company is required to test certain of its other assets for impairment if conditions indicate that an impairment may have occurred.

The Company may be required to recognize impairments in the future due to, among other factors, extreme fuel price volatility, tight credit markets, a decline in the fair value of certain tangible or intangible assets,

Table of Contents

unfavorable trends in historical or forecasted results of operations and cash flows and an uncertain economic environment, as well as other uncertainties. The Company can provide no assurance that a material impairment charge of tangible or intangible assets will not occur in a future period. The value of the Company's aircraft could be impacted in future periods by changes in supply and demand for these aircraft. Such changes in supply and demand for certain aircraft types could result from grounding of aircraft by the Company or other carriers. An impairment charge could have a material adverse effect on the Company's financial position and results of operations.

The Company's ability to use its net operating loss carryforwards to offset future taxable income for U.S. federal income tax purposes may be significantly limited due to various circumstances, including certain possible future transactions involving the sale or issuance of UAL common stock, or if taxable income does not reach sufficient levels.

As of December 31, 2016, UAL reported consolidated federal net operating loss (NOL) carryforwards of approximately \$4.4 billion.

The Company's ability to use its NOL carryforwards may be limited if it experiences an ownership change as defined in Section 382 (Section 382) of the Internal Revenue Code of 1986, as amended. An ownership change generally occurs if certain stockholders increase their aggregate percentage ownership of a corporation's stock by more than 50 percentage points over their lowest percentage ownership at any time during the testing period, which is generally the three-year period preceding any potential ownership change.

There is no assurance that the Company will not experience a future ownership change under Section 382 that may significantly limit or possibly eliminate its ability to use its NOL carryforwards. Potential future transactions involving the sale or issuance of UAL common stock, including the exercise of conversion options under the terms of any convertible debt that UAL may issue in the future, the repurchase of such debt with UAL common stock, any issuance of UAL common stock for cash, and the acquisition or disposition of such stock by a stockholder owning 5% or more of UAL common stock, or a combination of such transactions, may increase the possibility that the Company will experience a future ownership change under Section 382.

Under Section 382, a future ownership change would subject the Company to additional annual limitations that apply to the amount of pre-ownership change NOLs that may be used to offset post-ownership change taxable income. This limitation is generally determined by multiplying the value of a corporation's stock immediately before the ownership change by the applicable long-term tax-exempt rate. Any unused annual limitation may, subject to certain limits, be carried over to later years, and the limitation may under certain circumstances be increased by built-in gains in the assets held by such corporation at the time of the ownership change. This limitation could cause the Company's U.S. federal income taxes to be greater, or to be paid earlier, than they otherwise would be, and could cause all or a portion of the Company's NOL carryforwards to expire unused. Similar rules and limitations may apply for state income tax purposes. The Company's ability to use its NOL carryforwards will also depend on the amount of taxable income it generates in future periods. Its NOL carryforwards may expire before the Company can generate sufficient taxable income to use them in full.

Our significant investments in airlines in other parts of the world and the commercial relationships that we have with those carriers may not produce the returns or results we expect.

An important part of our strategy to expand our global network includes making significant investments in airlines in other parts of the world and expanding our commercial relationships with these carriers. In 2015, we made a \$100 million investment in Azul Linhas Aéreas Brasileiras S.A. (Azul) and enhanced our commercial arrangements with Azul. We expect to continue exploring similar non-controlling investments in, and entering into joint ventures, commercial agreements, loan transactions and strategic alliances with, other carriers as part of our global business strategy. These transactions and relationships (including our strategic partnership with, and investment in, Azul) involve significant challenges and risks, including that we may not realize a satisfactory return on our investment, that we may not receive repayment of invested funds, that they may distract

Table of Contents

management from our operations or that they may not generate the expected revenue synergies. These events could have a material adverse effect on our operating results or financial condition.

In addition, we are dependent on these other carriers for significant aspects of our network in the regions in which they operate. While we work closely with these carriers, we do not have control over their operations or business methods. We may be subject to consequences from any improper behavior of joint venture partners, including for failure to comply with anti-corruption laws such as the United States Foreign Corrupt Practices Act. Furthermore, our relationships with these carriers may be subject to the laws and regulations of non-U.S. jurisdictions in which these carriers are located or conduct business. Any political or regulatory change in these jurisdictions that negatively impact or prohibit our arrangements with these carriers could have an adverse effect on our results of operations or financial condition. To the extent that the operations of any of these carriers are disrupted over an extended period of time or their actions subject us to the consequences of failure to comply with laws and regulations, our results of operations may be adversely affected.

Table of Contents

In addition to the aircraft presented in the tables above, United owns or leases the following aircraft listed below as of December 31, 2016:

One owned Boeing 767-200, which is being subleased to another airline;
 Four Boeing 757-200s, which are owned and being held for disposition;
 Ten leased Embraer ERJ 135s, which are permanently grounded; and
 Three owned Embraer ERJ 145s, which are temporarily grounded.

Firm Order and Option Aircraft

As of December 31, 2016, United had firm commitments and options to purchase aircraft from Boeing, Embraer and Airbus presented in the table below:

Aircraft Type	Number of Firm Commitments (a)
Airbus A350-1000	35
Boeing 737NG/737MAX	165
Boeing 777-300ER	12
Boeing 787-8/-9/-10	21
Embraer E175	24

(a) United also has options and purchase rights for additional aircraft.

In 2016, United announced a modification to its then-existing narrow body order book by converting its original order for 65 Boeing 737-700 aircraft into four 737-800s to be delivered in 2017 and 61 Boeing 737MAX aircraft with delivery dates to be determined.

The aircraft listed in the table above are scheduled for delivery from 2017 through 2027. In 2017, United expects to take delivery of four Boeing 737NG aircraft, three Boeing 787-9 aircraft, 12 Boeing 777-300ER aircraft, 24 Embraer aircraft and six used Airbus A319s. In addition, up to 14 additional used Airbus A319s may be delivered between 2018 and 2021, subject to certain conditions. To the extent the Company and the aircraft manufacturers with whom the Company has existing orders for new aircraft agree to modify the contracts governing those orders, the amount and timing of the Company's future capital commitments could change. See Notes 11 and 15 to the financial statements included in Part II, Item 8 of this report for additional information.

Facilities

United's principal facilities relate to leases of airport facilities, gates, hangar sites, terminal buildings and other facilities in the municipalities it serves. United has major terminal facility leases at SFO, Washington Dulles, Chicago O'Hare, LAX, Denver, Newark, Houston Bush, Hopkins International Airport and Guam with expiration dates ranging from 2018 to 2041. Substantially all of these facilities are leased on a net-rental basis, resulting in the Company's responsibility for maintenance, insurance and other facility-related expenses and services.

United also maintains administrative offices, catering, cargo, training facilities, maintenance facilities and other facilities to support operations in the cities served. United also has multiple leases, which expire from 2017 through 2029 for its principal executive office and operations center in downtown Chicago, and certain administrative offices in downtown Houston.

ITEM 3. LEGAL PROCEEDINGS.

On June 30, 2015, UAL received a Civil Investigative Demand (CID) from the Antitrust Division of the DOJ seeking documents and information from the Company in connection with a DOJ investigation related to statements and decisions about airline capacity. The Company is working with the DOJ and has completed its response to the CID. The Company is not able to predict what action, if any, might be taken in the future by the DOJ or other governmental authorities as a result of the investigation. Beginning on July 1, 2015, subsequent to the announcement of the CID, UAL and United were named as defendants in multiple class action lawsuits that

Table of Contents

asserted claims under the Sherman Antitrust Act, which have been consolidated in the United States District Court for the District of Columbia. The complaints generally allege collusion among U.S. airlines on capacity impacting airfares and seek treble damages. The Company intends to vigorously defend against the class action lawsuits.

On October 13, 2015, United received a CID from the Civil Division of the DOJ. The CID requested documents and oral testimony from United in connection with an industry-wide DOJ investigation related to delivery scan and other data purportedly required for payment for the carriage of mail under United's International Commercial Air Contracts with the United States Postal Service. The Company has been responding to the DOJ's request and cooperating in the investigation since that time. On November 8, 2016, the DOJ Criminal Division met with representatives from the Company and advised they are conducting an industry-wide investigation into the same matter. The Company is also cooperating with the government in this aspect of their investigation and on December 21, 2016 representatives from the Company met with both the Civil and Criminal Divisions to provide additional information. The Company cannot predict what action, if any, might be taken in the future by the DOJ or other governmental authorities as a result of these investigations.

As disclosed in the Company's prior two Annual Reports on Form 10-K for fiscal years 2014 and 2015, the Company and certain of its current and former executive officers and employees received federal grand jury subpoenas requesting records and testimony related to certain individuals formerly associated with the Port Authority of New York and New Jersey and related operations of the Company. As announced on September 8, 2015, certain of the Company's executives stepped down in connection with its related internal investigation. The Company cooperated with the investigation by the USAO in respect of the Port Authority matter and, as announced on July 14, 2016, the Company reached a resolution in the form of a Non-Prosecution Agreement with the USAO. As announced on December 2, 2016, the Company also resolved the previously disclosed related investigation by the SEC in respect of the Port Authority matter.

Other Legal Proceedings

The Company is involved in various other claims and legal actions involving passengers, customers, suppliers, employees and government agencies arising in the ordinary course of business. Additionally, from time to time, the Company becomes aware of potential non-compliance with applicable environmental regulations, which have either been identified by the Company (through internal compliance programs such as its environmental compliance audits) or through notice from a governmental entity. In some instances, these matters could potentially become the subject of an administrative or judicial proceeding and could potentially involve monetary sanctions. After considering a number of factors, including (but not limited to) the views of legal counsel, the nature of contingencies to which the Company is subject and prior experience, management believes that the ultimate disposition of these other claims and legal actions will not materially affect its consolidated financial position or results of operations. However, the ultimate resolutions of these matters are inherently unpredictable. As such, the Company's financial condition and results of operations could be adversely affected in any particular period by the unfavorable resolution of one or more of these matters.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.**

UAL's common stock is listed on the New York Stock Exchange (NYSE) under the symbol UAL. The following table sets forth the ranges of high and low sales prices per share of UAL common stock during the last two fiscal years, as reported by the NYSE:

	UAL			
	2016		2015	
	High	Low	High	Low
1st quarter	\$ 61.41	\$ 42.17	\$ 74.52	\$ 62.37
2nd quarter	58.90	37.41	65.85	49.85
3rd quarter	54.53	37.64	62.21	49.20
4th quarter	76.80	51.34	61.87	49.76

Based on reports by the Company's transfer agent for UAL common stock, as of February 13, 2017, there were 8,049 holders of record of UAL common stock.

UAL did not pay any dividends in 2016 or 2015. Under the restricted payment provisions of the Company's Credit and Guaranty Agreement, dated as of March 27, 2013 (the "Credit Agreement"), and certain indentures, UAL's ability to pay dividends on or repurchase UAL's common stock is subject to limits on the amount of such payments and to certain conditions, including that no default or event of default exists under those instruments and that after giving effect to the making of any such payments, UAL would be in compliance with a minimum fixed charge coverage ratio. Any future determination regarding dividend or distribution payments will be at the discretion of the UAL Board of Directors, subject to the foregoing limits and applicable limitations under Delaware law.

United paid dividends of \$2.6 billion and \$1.2 billion to UAL in 2016 and 2015, respectively.

The following graph shows the cumulative total stockholder return for UAL's common stock during the period from December 31, 2011 to December 31, 2016. The graph also shows the cumulative returns of the Standard and Poor's (S&P) 500 Index and the NYSE Arca Airline Index (AAI) of 15 investor-owned airlines. The comparison assumes \$100 was invested on December 31, 2011 in UAL common stock.

Table of Contents

Note: The stock price performance shown in the graph above should not be considered indicative of potential future stock price performance. The foregoing performance graph is being furnished as part of this report solely in accordance with the requirement under Rule 14a-3(b)(9) to furnish our stockholders with such information, and therefore, shall not be deemed to be filed or incorporated by reference into any filings by the Company under the Securities Act or the Exchange Act.

The following table presents repurchases of UAL common stock made in the fourth quarter of 2016:

Period	Total number of shares purchased (a)(b)	Average price paid per share (b)(c)	Total number of shares purchased as part of publicly announced plans or programs (a)	Approximate dollar value of shares that may yet be purchased under the plans or programs
				(in millions) (a)
October 1, 2016 through October 31, 2016	1,282,714	\$ 54.19	1,282,714	\$ 1,930
November 1, 2016 through November 30, 2016	1,368,204	62.96	1,368,204	1,844
December 1, 2016 through December 31, 2016				1,844
Total	2,650,918		2,650,918	

(a) In 2016, UAL repurchased approximately 50 million shares of UAL common stock for \$2.6 billion. In July 2016, UAL's Board of Directors authorized a \$2 billion share repurchase program to acquire UAL's common stock. As of December 31, 2016, the Company had approximately \$1.8 billion remaining to purchase shares under its share repurchase program. UAL may repurchase shares through the open market, privately negotiated transactions, block trades or accelerated share repurchase transactions from time to time in accordance with applicable securities laws.

(b) The table does not include shares withheld from employees to satisfy certain tax obligations due upon the vesting of restricted stock units. The United Continental Holdings, Inc. 2008 Incentive Compensation Plan provides for the withholding of shares to satisfy tax obligations due upon the vesting of restricted stock units. However, this plan does not specify a maximum number of shares that may be withheld for this purpose. A total of 502 shares were withheld under this plan in the fourth quarter of 2016 at an average share price of \$62.50. These shares of common stock withheld to satisfy tax withholding obligations may be deemed to be issuer purchases of shares that are required to be disclosed pursuant to this Item.

(c) Average price paid per share is calculated on a settlement basis and excludes commission.

Average stage length (miles) (f)	1,473	1,487	1,480	1,445	1,429

(a) The number of revenue passengers measured by each flight segment flown.

(b) The number of scheduled miles flown by revenue passengers.

(c) The number of seats available for passengers multiplied by the number of scheduled miles those seats are flown.

(d) RPM divided by ASM.

(e) The average passenger revenue received for each revenue passenger mile flown.

(f) Average stage length equals the average distance a flight travels weighted for size of aircraft.

(g) The average number of hours per day that an aircraft flown in revenue service is operated (from gate departure to gate arrival).

Table of Contents

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS. **Overview**

United Continental Holdings, Inc. (together with its consolidated subsidiaries, UAL or the Company) is a holding company and its principal, wholly-owned subsidiary is United Airlines, Inc. (together with its consolidated subsidiaries, United). As UAL consolidates United for financial statement purposes, disclosures that relate to activities of United also apply to UAL, unless otherwise noted. United's operating revenues and operating expenses comprise nearly 100% of UAL's revenues and operating expenses. In addition, United comprises approximately the entire balance of UAL's assets, liabilities and operating cash flows. When appropriate, UAL and United are named specifically for their individual contractual obligations and related disclosures and any significant differences between the operations and results of UAL and United are separately disclosed and explained. We sometimes use the words we, our, us, and the Company in this report for disclosures that relate to all of UAL and United.

2016 Financial Highlights

2016 net income was \$2.3 billion, or \$6.85 diluted earnings per share.

United's consolidated PRASM decreased 5.4% in 2016 compared to 2015.

Aircraft fuel cost decreased 23% year-over-year due mainly to lower fuel prices.

2016 CASM decreased 2.9% year-over-year on a consolidated capacity increase of 1.4%.

In 2016, UAL repurchased approximately 50 million shares of UAL common stock for \$2.6 billion. As of December 31, 2016, the Company had approximately \$1.8 billion remaining to purchase shares under its share repurchase program.

UAL ended the year with \$5.8 billion in unrestricted liquidity, which consisted of unrestricted cash, cash equivalents, short-term investments and available capacity under the revolving credit facility of the Company's Credit Agreement.

2016 Operational Highlights

Consolidated RPMs for 2016 increased 0.8% as compared to 2015, and consolidated ASMs increased 1.4% from the prior year, resulting in a consolidated load factor of 82.9% in 2016 versus 83.4% in 2015.

For 2016 and 2015, the Company recorded a DOT on-time arrival rate of 81.3% and 78.1%, respectively, and a system completion factor of 99.0% and 98.7%, respectively.

The Company took delivery of five new Boeing 787-9 Dreamliners, eight new Boeing 737-900ERs, seven new Boeing 737-800s, two new Boeing 777-300ERs and six used Airbus A319s. United exited from scheduled service four Boeing 757-200s, 16 Embraer ERJ 145s and two Boeing 747-400s. The Company took delivery of the first Boeing 777-300ER in the Company's fleet, named the New Spirit of United, featuring the all-new United Polaris business class seat.

Edgar Filing: United Continental Holdings, Inc. - Form 10-K

The Company introduced new products to its industry-leading existing portfolio of products such as United Polaris service and announced Basic Economy fares which will expand its customers' options.

During 2016, the Company reached new agreements with every domestic unionized work group.

Outlook

Set forth below is a discussion of the principal matters that we believe could impact our financial and operating performance and cause our results of operations in future periods to differ materially from our historical

Table of Contents

operating results and/or from our anticipated results of operations described in the forward-looking statements in this report. See Part I, Item 1A., Risk Factors, of this report and the factors described under Forward-Looking Information below for additional discussion of these and other factors that could affect us.

The Company is committed to improving the efficiency and quality of all aspects of its business in 2017. In order to continue improving operational performance in 2017, our top focus will be on further improvements in completion factor, departure performance and baggage handling.

As outlined at our 2016 Investor Day presentation, the Company expects to drive significant incremental value by 2020 relative to 2015. United anticipates capturing this value through a variety of initiatives including a re-fleeting and upgauge program, additional customer choice through segmentation, improvements to the revenue management systems, ongoing sensible cost management, realizing our full network potential through improved schedule quality and enhancements to the MileagePlus program. In addition, the Company will continue to focus on improving reliability while increasing the efficiency of the operation.

Economic Conditions. The economic outlook for the aviation industry in 2017 is characterized by moderate U.S. and global economic growth. In such conditions, we expect a moderate increase in the demand for air travel. Continuing economic uncertainty, along with the strengthening U.S. dollar, is providing uncertainty in key Asian, South American and European markets, and continued political and socioeconomic tensions may result in diminished demand for air travel.

Capacity. In 2017, the Company expects consolidated ASMs to grow between 1% and 2% year-over-year.

Fuel. The Company's average aircraft fuel price per gallon including related taxes was \$1.49 in 2016 as compared to \$1.94 in 2015. Since 2014, the price of jet fuel has declined and remains volatile. Based on projected fuel consumption in 2017, a one dollar change in the price of a barrel of crude oil would change the Company's annual fuel expense by approximately \$95 million.

Labor. As of December 31, 2016, United had approximately 80% of employees represented by unions. In 2016, United reached contract extensions with its pilots and dispatchers, amended collective bargaining agreements with its IAM represented employees, reached a five-year contract with the AFA covering all of its flight attendants and reached a six-year contract with the IBT covering its technicians and related employees. Additionally, the Company will be increasing pay for its pilots in order to align with a recently implemented contract of another airline. The costs associated with all these agreements is expected to add approximately \$900 million of costs for full-year 2017. The Company cannot predict the outcome of future negotiations with its unionized employee groups. Increases in the pay and benefits resulting from new collective bargaining agreements could have a material financial impact on the Company.

Results of Operations

In this section, we compare results of operations for the year ended December 31, 2016 with results of operations for the year ended December 31, 2015, and results of operations for the year ended December 31, 2015 with results of operations for the year ended December 31, 2014.

Table of Contents

2016 compared to 2015

Operating Revenue

The table below illustrates the year-over-year percentage change in the Company's operating revenues for the years ended December 31 (in millions, except percentage changes):

	2016	2015	Increase (Decrease)	% Change
Passenger Mainline	\$ 25,414	\$ 26,333	\$ (919)	(3.5)
Passenger Regional	6,043	6,452	(409)	(6.3)
Total passenger revenue	31,457	32,785	(1,328)	(4.1)
Cargo	876	937	(61)	(6.5)
Other operating revenue	4,223	4,142	81	2.0
	\$ 36,556	\$ 37,864	\$ (1,308)	(3.5)

The table below presents the Company's selected passenger revenue and selected operating data based on geographic region (regional flights consist primarily of domestic routes):

Increase (decrease) in 2016 from 2015 (a):							
	Domestic	Atlantic	Pacific	Latin	Total Mainline	Regional	Consolidated
Passenger revenue (in millions)	\$ (118)	\$ (512)	\$ (215)	\$ (74)	\$ (919)	\$ (409)	\$ (1,328)
Passenger revenue	(0.9)%	(8.6)%	(4.9)%	(2.7)%	(3.5)%	(6.3)%	(4.1)%
Average fare per passenger	(6.6)%	(5.2)%	(5.6)%	(8.0)%	(8.0)%	(2.2)%	(5.9)%
Yield	(3.2)%	(4.6)%	(7.4)%	(7.8)%	(4.8)%	(3.1)%	(4.8)%
PRASM	(3.8)%	(8.4)%	(6.7)%	(5.5)%	(5.5)%	(2.7)%	(5.4)%
Passengers	6.1 %	(3.7)%	0.7 %	5.8 %	4.9 %	(4.3)%	2.0 %
RPMs (traffic)	2.3 %	(4.3)%	2.7 %	5.5 %	1.4 %	(3.4)%	0.8 %
ASMs (capacity)	3.1 %	(0.2)%	2.0 %	2.8 %	2.1 %	(3.7)%	1.4 %
Passenger load factor (points)	(0.6)	(3.3)	0.6	2.2	(0.6)	0.3	(0.5)

(a) See Part II, Item 6 of this report for the definition of these statistics.

Consolidated passenger revenue decreased \$1.3 billion, or 4.1%, in 2016 as compared to 2015. Consolidated PRASM decreased 5.4% in 2016 as compared to 2015. The decline in PRASM was driven by factors including a competitive domestic fare environment, lower surcharges, a strong U.S. dollar and reductions from energy-related corporate travel.

Cargo revenue decreased \$61 million, or 6.5%, in 2016 as compared to 2015 due to lower freight yields and lower mail volumes year-over-year, partially offset by an increase in freight volumes. Freight yields were negatively impacted as air freighter competitors increased capacity in response to lower fuel prices. Another contributing factor to the year-over-year decrease was a U.S. West Coast port labor dispute that resulted in an increase in air freight results in the first quarter of 2015. The labor dispute was resolved during the first quarter of 2015.

Table of Contents

Operating Expense

The table below includes data related to the Company's operating expense for the year ended December 31 (in millions, except percentage changes):

	2016	2015	Increase (Decrease)	% Change
Salaries and related costs	\$ 10,275	\$ 9,713	\$ 562	5.8
Aircraft fuel	5,813	7,522	(1,709)	(22.7)
Regional capacity purchase	2,197	2,290	(93)	(4.1)
Landing fees and other rent	2,165	2,203	(38)	(1.7)
Depreciation and amortization	1,977	1,819	158	8.7
Aircraft maintenance materials and outside repairs	1,749	1,651	98	5.9
Distribution expenses	1,303	1,342	(39)	(2.9)
Aircraft rent	680	754	(74)	(9.8)
Special charges	638	326	312	NM
Other operating expenses	5,421	5,078	343	6.8
	\$ 32,218	\$ 32,698	\$ (480)	(1.5)

Salaries and related costs increased \$562 million, or 5.8%, in 2016 as compared to 2015 primarily due to higher pay rates and benefit expenses driven by new and extended collective bargaining agreements, an increase in employee incentive expenses due to improvements in operational performance and a 2.2% increase in average full-time equivalent employees, partially offset by a reduction in profit sharing expense in 2016 as compared to 2015, a reduction in medical and dental costs and the results of certain costs savings initiatives in 2016.

The decrease in aircraft fuel expense was primarily attributable to decreased fuel prices and a reduction in fuel hedge losses, partially offset by the impact of a 1.4% increase in capacity. 2016 fuel expense includes the benefit of a \$20 million fuel tax refund. The table below presents the significant changes in aircraft fuel cost per gallon for the year ended December 31 (in millions, except percentage changes):

	(In millions)			Average price per gallon		
	2016	2015	% Change	2016	2015	% Change
Total aircraft fuel purchase cost excluding fuel hedge impacts	\$ 5,596	\$ 6,918	(19.1)	\$ 1.43	\$ 1.78	(19.7)
Hedge losses reported in fuel expense	(217)	(604)	NM	(0.06)	(0.16)	NM
Fuel expense	5,813	7,522	(22.7)	1.49	1.94	(23.2)
Total fuel consumption (gallons)	3,904	3,886	0.5			

Depreciation and amortization increased \$158 million, or 8.7%, in 2016 as compared to 2015 primarily due to additions of new aircraft, conversions of operating leases to capital leases, aircraft improvements, accelerated depreciation of certain assets related to several fleet types and increases in information technology assets.

Aircraft maintenance materials and outside repairs increased \$98 million, or 5.9%, in 2016 as compared to 2015 primarily due to a year-over-year increase in airframe maintenance visits as a result of the cyclical timing of these visits and volume-driven increases in component costs, partially offset by a reduction in costs due to the timing of maintenance on certain engines.

Aircraft rent decreased \$74 million, or 9.8%, in 2016 as compared to 2015 primarily due to lease expirations, the purchase or capital lease conversion of several operating leased aircraft and lower lease renewal rates for certain aircraft.

Table of Contents

The table below presents special charges incurred by the Company during the years ended December 31 (in millions):

	2016	2015
Impairment of assets	\$ 412	\$ 79
Cleveland airport lease restructuring	74	
Labor agreement costs	64	18
Severance and benefit costs	37	107
(Gains) losses on sale of assets and other special charges	51	122
Total special charges	\$ 638	\$ 326

See Note 16 to the financial statements included in Part II, Item 8 of this report for additional information.

Other operating expenses increased \$343 million, or 6.8%, in 2016 as compared to 2015 primarily due to increases in ground handling costs, food and technology costs associated with the Company's enhanced customer experience initiatives, rate-driven increases in hotel expenses for crews, increases in marketing expenses related to the 2016 Summer Olympics and volume-driven increases in cargo costs.

Nonoperating Income (Expense)

The following table illustrates the year-over-year dollar and percentage changes in the Company's nonoperating income (expense) (in millions, except percentage changes):

	2016	2015	Increase (Decrease)	% Change
Interest expense	\$ (614)	\$ (669)	\$ (55)	(8.2)
Interest capitalized	72	49	23	46.9
Interest income	42	25	17	68.0
Miscellaneous, net	(19)	(352)	(333)	(94.6)
Total	\$ (519)	\$ (947)	\$ (428)	(45.2)

The decrease in interest expense of \$55 million, or 8.2%, in 2016 as compared to 2015 was primarily due to the prepayment of certain debt issuances in 2015 and declining balances of other debt, partially offset by interest expense on debt issued for the acquisition of new aircraft, the conversion of certain operating leases to capital leases and certain constructed airport assets accounted for as capital leases.

In 2015, Miscellaneous, net included losses of \$80 million from fuel derivatives not qualifying for hedge accounting. Foreign currency losses were approximately \$43 million and \$129 million in 2016 and 2015, respectively. Foreign currency results included \$8 million and \$61 million of foreign exchange losses for 2016 and 2015, respectively, related to the Company's cash holdings in Venezuela. Miscellaneous, net for 2015 also includes a \$134 million special charge related to the write-off of unamortized non-cash debt discounts for the early redemption of the 6% Notes due 2026 (the 2026 Notes) and the 6% Notes due 2028 (the 2028 Notes).

2015 compared to 2014

Operating Revenue

The table below illustrates the year-over-year percentage change in the Company's operating revenues for the years ended December 31 (in millions, except percentage changes):

	2015	2014	Increase (Decrease)	% Change
Passenger Mainline	\$ 26,333	\$ 26,785	\$ (452)	(1.7)
Passenger Regional	6,452	6,977	(525)	(7.5)
Total passenger revenue	32,785	33,762	(977)	(2.9)
Cargo	937	938	(1)	(0.1)
Other operating revenue	4,142	4,201	(59)	(1.4)
	\$ 37,864	\$ 38,901	\$ (1,037)	(2.7)

The table below presents the Company's selected passenger revenue and selected operating data based on geographic region (regional flights consist primarily of domestic routes):

	Increase (decrease) in 2015 from 2014 (a):						
	Domestic	Pacific	Atlantic	Latin	Total Mainline	Regional	Consolidated
Passenger revenue (in millions)	\$ 132	\$ (331)	\$ (159)	\$ (94)	\$ (452)	\$ (525)	\$ (977)
Passenger revenue	1.0 %	(7.0)%	(2.6)%	(3.4)%	(1.7)%	(7.5)%	(2.9)%
Average fare per passenger	(5.0)%	(7.5)%	(1.2)%	(10.2)%	(6.6)%	(2.2)%	(4.5)%
Yield	(1.9)%	(9.4)%	(1.7)%	(10.3)%	(4.1)%	(1.7)%	(4.3)%
PRASM	(1.6)%	(9.2)%	(3.1)%	(11.3)%	(4.3)%	(1.6)%	(4.4)%
Passengers	6.3 %	0.5 %	(1.4)%	7.6 %	5.3 %	(5.4)%	1.7 %
RPMs (traffic)	3.0 %	2.7 %	(0.9)%	7.7 %	2.6 %	(5.9)%	1.5 %
ASMs (capacity)	2.6 %	2.4 %	0.5 %	8.9 %	2.7 %	(6.0)%	1.6 %
Passenger load factor (points)	0.3	0.2	(1.0)	(1.0)	(0.1)		(0.2)

(a) See Part II, Item 6 of this report for the definition of these statistics.

Consolidated passenger revenue in 2015 decreased \$977 million, or 2.9%, as compared to 2014 primarily due to a decrease in consolidated yield of 4.3% year-over-year. Yields were impacted by a competitive domestic fare environment, unfavorable foreign currency results due to the strengthening of the U.S. dollar, international surcharge declines, travel reductions from corporate customers in the energy sector and increased industry capacity in certain regions. The decline in yields was partially offset by a 1.5% year-over-year increase in traffic.

Table of Contents

Operating Expense

The table below includes data related to the Company's operating expense for the year ended December 31 (in millions, except percentage changes):

	2015	2014	Increase (Decrease)	% Change
Salaries and related costs	\$ 9,713	\$ 8,935	\$ 778	8.7
Aircraft fuel	7,522	11,675	(4,153)	(35.6)
Regional capacity purchase	2,290	2,344	(54)	(2.3)
Landing fees and other rent	2,203	2,274	(71)	(3.1)
Depreciation and amortization	1,819	1,679	140	8.3
Aircraft maintenance materials and outside repairs	1,651	1,779	(128)	(7.2)
Distribution expenses	1,342	1,373	(31)	(2.3)
Aircraft rent	754	883	(129)	(14.6)
Special charges	326	443	(117)	NM
Other operating expenses	5,078	5,143	(65)	(1.3)
	\$ 32,698	\$ 36,528	\$ (3,830)	(10.5)

Salaries and related costs increased \$778 million, or 8.7%, in 2015 as compared to 2014 primarily due to a \$463 million increase in profit sharing costs as a result of improved profitability, higher pay rates driven by new collective bargaining agreements, an increase in medical and dental costs and an increase in pension expense resulting from changes in actuarial assumptions.

The decrease in aircraft fuel expense was primarily attributable to decreased fuel prices partially offset by losses from fuel hedging activity and a 1.6% increase in capacity. The table below presents the significant changes in aircraft fuel cost per gallon for the year ended December 31 (in millions, except percentage changes):

	(In millions)			Average price per gallon		
	2015	2014	% Change	2015	2014	% Change
Total aircraft fuel purchase cost excluding fuel hedge impacts	\$ 6,918	\$ 11,586	(40.3)	\$ 1.78	\$ 2.97	(40.1)
Hedge losses reported in fuel expense	(604)	(89)	NM	(0.16)	(0.02)	NM
Fuel expense as reported	7,522	11,675	(35.6)	1.94	2.99	(35.1)
Total fuel consumption (gallons)	3,886	3,905	(0.5)			

Depreciation and amortization increased \$140 million, or 8.3%, in 2015 as compared to 2014 primarily due to additions in owned property and equipment, specifically related to new aircraft, information technology assets and several aircraft capital lease conversions from operating leases.

Aircraft maintenance materials and outside repairs decreased \$128 million, or 7.2%, in 2015 as compared to 2014 primarily due to a year-over-year decrease in significant airframe maintenance visits as a result of the cyclical timing of these visits, improvements in the efficiency of in-house maintenance programs, a reduced volume of seat and landing gear maintenance and a reduction of flying hours under certain power-by-the-hour engine maintenance agreements, partially offset by increases in expenses related to aircraft reliability projects and Wi-Fi systems maintenance.

Aircraft rent decreased \$129 million or 14.6% in 2015 as compared to 2014 primarily due to lease expirations, the purchase or capital lease conversion of several operating leased aircraft and lower lease renewal rates for certain aircraft.

Table of Contents

The table below presents special charges incurred by the Company during the years ended December 31 (in millions):

	2015	2014
Severance and benefit costs	\$ 107	\$ 199
Impairment of assets	79	49
Labor agreement costs	18	
(Gains) losses on sale of assets and other miscellaneous (gains) losses, net	122	195
Total special charges	\$ 326	\$ 443

See Note 16 to the financial statements included in Part II, Item 8 of this report for additional information.

Nonoperating Income (Expense)

The following table illustrates the year-over-year dollar and percentage changes in UAL's nonoperating income (expense) (in millions, except percentage changes):

	2015	2014	Increase (Decrease)	% Change
Interest expense	\$ (669)	\$ (735)	\$ (66)	(9.0)
Interest capitalized	49	52	(3)	(5.8)
Interest income	25	22	3	13.6
Miscellaneous, net	(352)	(584)	(232)	(39.7)
Total	\$ (947)	\$ (1,245)	\$ (298)	(23.9)

The decrease in interest expense of \$66 million, or 9.0%, in 2015 as compared to 2014 was primarily due to the prepayment of certain debt issuances and declining balances of other debt, partially offset by interest expense on debt issued for the acquisition of new aircraft.

Miscellaneous, net included losses of \$80 million and \$462 million from fuel derivatives not qualifying for hedge accounting in 2015 and 2014, respectively. Foreign currency losses were approximately \$129 million and \$41 million in 2015 and 2014, respectively. Foreign currency results included \$61 million and \$10 million of foreign exchange losses for 2015 and 2014, respectively, related to the Company's cash holdings in Venezuela. Miscellaneous, net for 2015 includes a \$134 million special charge related to the write-off of unamortized non-cash debt discounts for the early redemption of the 2026 Notes and the 2028 Notes. 2014 Miscellaneous, net includes a \$64 million debt extinguishment charge related to the retirement of the \$248 million 6% Convertible Junior Subordinated Debentures due 2030.

Liquidity and Capital Resources

As of December 31, 2016, the Company had \$4.4 billion in unrestricted cash, cash equivalents and short-term investments, a decrease of \$0.8 billion from December 31, 2015. The Company had its entire commitment capacity of \$1.35 billion under the Credit Agreement available for letters of credit or borrowings as of December 31, 2016. As of December 31, 2016, the Company had \$124 million of restricted cash and cash equivalents, which is primarily collateral for letters of credit and estimated future workers' compensation claims. We may be required to post significant additional cash collateral to provide security for obligations. Restricted cash and cash equivalents at December 31, 2015 totaled \$206 million.

We have a significant amount of fixed obligations, including debt, aircraft leases and financings, leases of airport property and other facilities and pension funding obligations. At December 31, 2016, the Company had

Table of Contents

approximately \$11.7 billion of debt and capital lease obligations, including \$1.0 billion that are due within the next 12 months. In addition, we have substantial noncancelable commitments for capital expenditures, including the acquisition of new aircraft and related spare engines. As of December 31, 2016, our current liabilities exceeded our current assets by approximately \$5.0 billion. However, approximately \$5.9 billion of our current liabilities are related to our advance ticket sales and frequent flyer deferred revenue, both of which largely represent revenue to be recognized for travel in the near future and not actual cash outlays. The deficit in working capital does not have an adverse impact to our cash flows, liquidity or operations. The Company made principal payments of debt and capital lease obligations totaling \$1.4 billion in 2016.

The Company will continue to evaluate opportunities to prepay its debt, including open market repurchases, to reduce its indebtedness and related interest.

For 2017, the Company expects between \$4.2 billion and \$4.4 billion of gross capital expenditures. See Notes 11 and 15 to the financial statements included in Part II, Item 8 of this report for additional information on commitments.

As of December 31, 2016, a substantial portion of the Company's assets, principally aircraft, route authorities, airport slots and loyalty program intangible assets, was pledged under various loan and other agreements. We must sustain our profitability and/or access the capital markets to meet our significant long-term debt and capital lease obligations and future commitments for capital expenditures, including the acquisition of aircraft and related spare engines. See Note 11 to the financial statements included in Part II, Item 8 of this report for additional information on assets provided as collateral by the Company.

The following is a discussion of the Company's sources and uses of cash from 2014 through 2016.

Cash Flows from Operating Activities

2016 compared to 2015

Cash flow provided by operations for the year ended December 31, 2016 was \$5.5 billion compared to \$6.0 billion in the same period in 2015. Working capital changes reduced cash flow from operations by \$0.5 billion year-over-year in 2016 as compared to 2015. The following were significant working capital items in 2016:

Frequent flyer and advance purchase of miles decreased \$0.6 billion due to increased utilization of pre-purchased miles.

Other assets, including spare parts, increased by \$0.3 billion as part of the Company's efforts to improve fleet reliability.

Accounts payable increased \$0.2 billion, driven by the timing of payments.

2015 compared to 2014

Cash flow provided by operations for the year ended December 31, 2015 was \$6.0 billion compared to \$2.6 billion in the same period in 2014. The \$3.4 billion increase is primarily attributable to an increase of \$3.1 billion in income before income taxes and a \$0.4 billion increase in non-cash items for the year ended December 31, 2015 as compared to the same period in 2014. Working capital changes reduced cash flow from operations by \$0.1 billion year-over-year in 2015 as compared to 2014. The following were significant working capital items in 2015:

Cash flow increased by \$0.2 billion from the return of hedge collateral net of the impact of changes in fuel derivative positions.

Other liabilities, including accrued wages, decreased \$0.2 billion, which included \$0.8 billion in pension contributions offset by \$0.7 billion in profit sharing accruals.

Frequent flyer deferred revenue and advanced purchase of miles decreased \$0.2 billion.

Table of Contents

Cash Flows from Investing Activities

2016 compared to 2015

The Company's capital expenditures were \$3.2 billion and \$2.7 billion in 2016 and 2015, respectively. The Company's capital expenditures for both years were primarily attributable to the purchase of aircraft, facility and fleet-related costs and the purchase of information technology assets.

2015 compared to 2014

The Company's capital expenditures were \$2.7 billion and \$2.0 billion in 2015 and 2014, respectively. The Company's capital expenditures for both years were primarily attributable to the purchase of aircraft, facility and fleet-related costs. In 2015, the Company announced a strategic partnership with Azul. Through a wholly-owned subsidiary, the Company invested \$100 million for an economic stake of approximately five percent in Azul, Brazil's largest carrier by cities served, which provides a range of customer benefits including codesharing of flights, joint loyalty program participation and expanded connection opportunities on routes between the U.S. and Brazil, a key market for United, in addition to other points in North and South America.

Cash Flows from Financing Activities

Significant financing events in 2016 were as follows:

Share Repurchases

The Company used \$2.6 billion of cash to purchase 50 million shares of its common stock during 2016 under its share repurchase programs. As of December 31, 2016, the Company has \$1.8 billion remaining to spend under its share repurchase program.

Debt Issuances

In 2016, United completed two enhanced equipment trust certificate (EETC) offerings for a total principal amount of \$2.0 billion. Of the \$2.0 billion, United received and recorded \$708 million of proceeds as debt as of December 31, 2016 to finance the purchase of 17 aircraft. United expects to receive all proceeds from the pass-through trusts by the end of the second quarter of 2017.

In 2016, United borrowed approximately \$369 million aggregate principal amount from various financial institutions to finance the purchase of several aircraft delivered in 2016.

Debt and Capital Lease Principal Payments

During the year ended December 31, 2016, the Company made debt and capital lease principal payments of \$1.4 billion.

Significant financing events in 2015 were as follows:

Share Repurchases

The Company used \$1.2 billion of cash to purchase 21 million shares of its common stock during 2015 under its share repurchase programs.

Debt Issuances

During 2015, United issued \$1.4 billion of debt related to EETC offerings to finance aircraft.

In 2015, United borrowed approximately \$590 million aggregate principal amount from various financial institutions to finance the purchase of several aircraft delivered in 2015.

Table of Contents

Debt and Capital Lease Principal Payments

During the year ended December 31, 2015, the Company made debt and capital lease principal payments of \$2.3 billion, including the following prepayments:

UAL used cash to repurchase all \$321 million par value 2026 Notes.

UAL used cash to repurchase all \$311 million par value 2028 Notes.

UAL used cash to prepay, at par, \$300 million principal amount of its \$500 million term loan due September 2021 under the Credit Agreement.

Financing Activities Not Affecting Cash

The holders of substantially all of the remaining \$202 million principal amount of United's 4.5% Convertible Notes due 2015 exercised their conversion option resulting in the issuance of 11 million shares of UAL common stock.

Significant financing events in 2014 were as follows:

Share Repurchases

The Company used \$320 million of cash to purchase approximately 7 million shares of its common stock under the 2014 Program.

Debt Issuances

During 2014, United issued \$1.8 billion of debt related to EETC offerings to finance aircraft.

United borrowed a \$500 million term loan under the Credit Agreement.

Debt and Capital Lease Principal Payments

During the year ended December 31, 2014, the Company made debt and capital lease principal payments of \$2.6 billion, including the following prepayments:

UAL retired, at par, \$400 million principal balance of its 8% Notes due 2024.

United used cash to purchase approximately \$276 million principal amount of convertible notes and retired the notes.

United retired, at par, the entire \$800 million principal balance of its 6.75% Senior Secured Notes.

Financing Activities Not Affecting Cash

UAL amended its revolving credit facility under the Credit Agreement, increasing the capacity from \$1.0 billion to \$1.35 billion and establishing the maturity date for \$1.315 billion in lender commitments as January 2, 2019.

UAL issued approximately 17 million shares in exchange for, or conversion of, \$260 million of convertible notes and retired the notes.

Edgar Filing: United Continental Holdings, Inc. - Form 10-K

For additional information regarding these Liquidity and Capital Resource matters, see Notes 3, 11, 13 and 14 to the financial statements included in Part II, Item 8 of this report. For information regarding non-cash investing and financing activities, see the Company's statements of consolidated cash flows.

Other significant financing event was as follows:

Debt Issuance

In January 2017, United issued \$300 million aggregate principal amount of 5% Senior Notes due February 1, 2024. See Note 11 to the financial statements included in Part II, Item 8 of this report for additional information.

Table of Contents

Credit Ratings. As of the filing date of this report, UAL and United had the following corporate credit ratings:

	S&P	Moody's	Fitch
UAL	BB-	Ba2	BB
United	BB-	*	BB

*The credit agency does not issue corporate credit ratings for subsidiary entities.

These credit ratings are below investment grade levels. Downgrades from these rating levels, among other things, could restrict the availability or increase the cost of future financing for the Company.

Other Liquidity Matters

Below is a summary of additional liquidity matters. See the indicated notes to our consolidated financial statements included in Part II, Item 8 of this report for additional details related to these and other matters affecting our liquidity and commitments.

Pension and other postretirement plans	Note 8
Hedging activities	Note 10
Long-term debt and debt covenants	Note 11
Leases and capacity purchase agreements	Note 13
Commitments and contingencies	Note 15

Contractual Obligations. The Company's business is capital intensive, requiring significant amounts of capital to fund the acquisition of assets, particularly aircraft. In the past, the Company has funded the acquisition of aircraft through outright purchase, by issuing debt, by entering into capital or operating leases, or through vendor financings. The Company also often enters into long-term lease commitments with airports to ensure access to terminal, cargo, maintenance and other required facilities.

The table below provides a summary of the Company's material contractual obligations as of December 31, 2016 (in billions):

	2017	2018	2019	2020	2021	After 2021	Total
Long-term debt (a)	\$ 0.8	\$ 1.4	\$ 1.9	\$ 1.0	\$ 1.2	\$ 4.6	\$ 10.9
Capital lease obligations – principal portion	0.1	0.1	0.1			0.6	0.9
Total debt and capital lease obligations	0.9	1.5	2.0	1.0	1.2	5.2	11.8
Interest on debt and capital lease obligations (b)	0.5	0.5	0.4	0.3	0.3	0.9	2.9
Aircraft operating lease obligations	1.3	1.1	0.9	0.7	0.5	2.0	6.5
Regional CPAs (c)	1.9	1.9	1.3	1.0	1.0	4.3	11.4
Other operating lease obligations	1.2	1.1	1.0	1.1	0.9	6.7	12.0
Postretirement obligations (d)	0.1	0.1	0.1	0.1	0.1	0.7	1.2
Pension obligations (e)				0.4	0.3	1.1	1.8
Capital purchase obligations (f)	4.5	3.2	3.1	2.5	2.2	7.8	23.3
Total contractual obligations	\$ 10.4	\$ 9.4	\$ 8.8	\$ 7.1	\$ 6.5	\$ 28.7	\$ 70.9

(a) Long-term debt presented in the Company's financial statements is net of \$124 million of debt discount, premiums and debt issuance costs which are being amortized over the debt terms. Contractual payments are not net of the debt discount, premiums and debt issuance costs.

(b) Includes interest portion of capital lease obligations of \$67 million in 2017, \$57 million in 2018, \$50 million in 2019, \$47 million in 2020, \$44 million in 2021 and \$339 million thereafter. Future interest payments on variable rate debt are estimated using estimated future variable rates based on a yield curve.

Table of Contents

- (c) Represents our estimates of future minimum noncancelable commitments under our CPAs and does not include the portion of the underlying obligations for aircraft and facility rent that is disclosed as part of aircraft and nonaircraft operating leases. Amounts also exclude a portion of United's capital lease obligation recorded for certain of its CPAs. See Note 13 to the financial statements included in Part II, Item 8 of this report for the significant assumptions used to estimate the payments.
- (d) Amounts represent postretirement benefit payments, net of subsidy receipts, through 2026. Benefit payments approximate plan contributions as plans are substantially unfunded.
- (e) Represents estimate of the minimum funding requirements as determined by government regulations for United's material pension plans. Amounts are subject to change based on numerous assumptions, including the performance of assets in the plan and bond rates. See Critical Accounting Policies, below, for a discussion of our current year assumptions regarding United's pension plans.
- (f) Represents contractual commitments for firm order aircraft, spare engines and other capital purchase commitments. See Note 15 to the financial statements included in Part II, Item 8 of this report for a discussion of our purchase commitments.

Off-Balance Sheet Arrangements. An off-balance sheet arrangement is any transaction, agreement or other contractual arrangement involving an unconsolidated entity under which a company has (1) made guarantees, (2) a retained or a contingent interest in transferred assets, (3) an obligation under derivative instruments classified as equity, or (4) any obligation arising out of a material variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support, or that engages in leasing, hedging or research and development arrangements. The Company's primary off-balance sheet arrangements include operating leases, which are summarized in the contractual obligations table in *Contractual Obligations*, above, and certain municipal bond obligations, as discussed below.

As of December 31, 2016, United had cash collateralized \$72 million of letters of credit. United also had \$383 million of surety bonds securing various obligations at December 31, 2016. Most of the letters of credit have evergreen clauses and are expected to be renewed on an annual basis and the surety bonds have expiration dates through 2021.

As of December 31, 2016, United is the guarantor of approximately \$1.9 billion in aggregate principal amount of tax-exempt special facilities revenue bonds and interest thereon. These bonds, issued by various airport municipalities, are payable solely from rentals paid under long-term agreements with the respective governing bodies. The leasing arrangements associated with a majority of these obligations are accounted for as operating leases. The leasing arrangements associated with a portion of these obligations are accounted for as capital leases. The annual lease payments for those obligations accounted for as operating leases are included in the operating lease payments in the contractual obligations table above.

As of December 31, 2016, United is the guarantor of \$168 million of aircraft mortgage debt issued by one of United's regional carriers. The aircraft mortgage debt is subject to increased cost provisions and the Company would potentially be responsible for those costs under the guarantees. The increased cost provisions in the \$168 million of aircraft mortgage debt are similar to those in certain of the Company's debt agreements. See Note 15 to the financial statements included in Part II, Item 8 of this report for additional information on increased cost provisions related to the Company's debt.

EETCs. In June 2016 and September 2016, United completed two separate EETC offerings for a total principal amount of \$2.0 billion. United has received and recorded \$708 million of the proceeds from these offerings as debt as of December 31, 2016. See Notes 11 and 14 to the financial statements included in Part II, Item 8 of this report for additional information on EETC pass-through trusts and variable interest entity consideration.

Increased Cost Provisions. See Note 15 to the financial statements included in Part II, Item 8 of this report for additional information on increased cost provisions related to the Company's debt.

Fuel Consortia. United participates in numerous fuel consortia with other air carriers at major airports to reduce the costs of fuel distribution and storage. Interline agreements govern the rights and responsibilities of the consortia members and provide for the allocation of the overall costs to operate the consortia based on usage. The consortia (and in limited cases, the participating carriers) have entered into long-term agreements to lease certain airport fuel storage and distribution facilities that are typically financed through tax-exempt bonds (either special facilities lease revenue bonds or general airport revenue bonds), issued by various local municipalities. In general, each consortium lease agreement requires the consortium to make lease payments in amounts sufficient

Table of Contents

to pay the maturing principal and interest payments on the bonds. As of December 31, 2016, approximately \$1.5 billion principal amount of such bonds were secured by significant fuel facility leases in which United participates, as to which United and each of the signatory airlines has provided indirect guarantees of the debt. As of December 31, 2016, the Company's contingent exposure was approximately \$234 million principal amount of such bonds based on its recent consortia participation. The Company's contingent exposure could increase if the participation of other air carriers decreases. The guarantees will expire when the tax-exempt bonds are paid in full, which ranges from 2017 to 2049. The Company did not record a liability at the time these indirect guarantees were made. See Note 15 to the financial statements included in Part II, Item 8 of this report for additional information related to the Company's fuel consortia.

Critical Accounting Policies

Critical accounting policies are defined as those that are affected by significant judgments and uncertainties which potentially could result in materially different accounting under different assumptions and conditions. The Company has prepared the financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP), which requires management to make estimates and assumptions that affect the reported amounts in the financial statements. Actual results could differ from those estimates under different assumptions or conditions. The Company has identified the following critical accounting policies that impact the preparation of the financial statements.

Revenue Recognition. The Company records passenger ticket sales and tickets sold by other airlines for use on United as passenger revenue when the transportation is provided or upon estimated breakage. The value of unused passenger tickets is included in current liabilities as Advance ticket sales. Tickets sold by other airlines are recorded at the estimated values to be billed to the other airlines. Differences between amounts billed and the actual amounts may be rejected and rebilled or written off if the amount recorded was different from the original estimate. When necessary, the Company records a reserve against its interline billings and payables if historical experience indicates that these amounts are different. Non-refundable tickets generally expire on the date of the intended flight, unless the date is extended by notification from the customer on or before the intended flight date.

Fees charged in association with changes or extensions to non-refundable tickets are recorded as other revenue at the time the fee is incurred. The fare on the changed ticket, including any additional collection of fare, is deferred and recognized in accordance with our transportation revenue recognition policy at the time the transportation is provided. Change fees related to non-refundable tickets are considered a separate transaction from the air transportation because they represent a charge for the Company's additional service to modify a previous sale. Therefore, the pricing of the change fee and the initial customer order are separately determined and represent distinct earnings processes.

The Company records an estimate of breakage revenue on the flight date for tickets that will expire unused. These estimates are based on the evaluation of actual historical results and forecasted trends. Refundable tickets expire after one year from the date of issuance.

The Financial Accounting Standards Board (FASB) amended the FASB Accounting Standards Codification and created a new Topic 606, *Revenue from Contracts with Customers*. This amendment prescribes that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The amendment supersedes the revenue recognition requirements in Topic 605, *Revenue Recognition*, and most industry-specific guidance throughout the Industry Topics of the Accounting Standards Codification. The Company currently plans to use the full-retrospective approach in adopting this standard on January 1, 2018. Under the new standard, certain airline ancillary fees directly related to passenger revenue tickets, such as ticket change fees and baggage fees, are likely to no longer be considered distinct performance obligations separate from the passenger travel component. In addition, the ticket change fees which were previously recognized when received and booking fees when paid, will likely be recognized when transportation is provided. The Company

Table of Contents

has previously recorded ancillary fees and change fees in other operating revenue but will record these in passenger revenue under the new standard. The Company is evaluating other possible impacts from the new standard on its consolidated financial statements.

Frequent Flyer Accounting. The Company's MileagePlus program is designed to increase customer loyalty. Program participants earn miles by flying on United and certain other participating airlines. Program participants can also earn miles through purchases from other non-airline partners that participate in the Company's loyalty program. We sell miles to these partners, which include credit card issuers, retail merchants, hotels, car rental companies and our participating airline partners. Miles can be redeemed for free (other than taxes and government imposed fees), discounted or upgraded air travel and non-travel awards. The Company records its obligation for future award redemptions using a deferred revenue model.

When frequent flyers earn miles for flights, the Company recognizes a portion of the ticket sales as revenue when the air transportation occurs and defers a portion of the ticket sale representing the value of the related miles as a multiple-deliverable revenue arrangement. The Company determines the estimated selling price of air transportation and miles as if each element is sold on a separate basis. The total consideration from each ticket sale is then allocated to each of these elements, individually, on a pro rata basis. The miles are recorded in Frequent flyer deferred revenue on the Company's consolidated balance sheet and recognized into revenue when the transportation is provided.

The Company's estimated selling price of miles is based on an equivalent ticket value less fulfillment discount, which incorporates the expected redemption of miles, as the best estimate of selling price for these miles. The equivalent ticket value is based on the prior 12 months' weighted average equivalent ticket value of similar fares as those used to settle award redemptions while taking into consideration such factors as redemption pattern, cabin class, loyalty status and geographic region. The estimated selling price of miles is adjusted by a fulfillment discount that considers a number of factors, including redemption patterns of various customer groups.

United has a significant contract to sell MileagePlus miles to its co-branded credit card partner, Chase. United identified the following significant revenue elements in its Second Amended and Restated Co-Branded Card Marketing Services Agreement (the "Co-Brand Agreement"): the air transportation element represented by the value of the mile (generally resulting from its redemption for future air transportation and whose fair value is described above); use of the United brand and access to MileagePlus member lists; advertising; and other travel related benefits.

The fair value of the elements is determined using management's estimated selling price of each element. The objective of using the estimated selling price based methodology is to determine the price at which we would transact a sale if the product or service were sold on a stand-alone basis. Accordingly, we determine our best estimate of selling price by considering multiple inputs and methods including, but not limited to, discounted cash flows, brand value, volume discounts, published selling prices, number of miles awarded and number of miles redeemed. The Company estimated the selling prices and volumes over the term of the Co-Brand Agreement in order to determine the allocation of proceeds to each of the multiple elements to be delivered. We also evaluate volumes on an annual basis, which may result in a change in the allocation of estimated selling price on a prospective basis.

The Company records passenger revenue related to the air transportation element when the transportation is delivered. The other elements are generally recognized as Other operating revenue when earned.

The Company accounts for miles sold and awarded that will never be redeemed by program members, which we refer to as breakage. The Company reviews its breakage estimates annually based upon the latest available information regarding redemption and expiration patterns. Miles expire after 18 months of member account inactivity. The Company's estimate of the expected expiration of miles requires significant management judgment. Current and future changes to expiration assumptions or to the expiration policy, or to program rules and program redemption opportunities, may result in material changes to the deferred revenue balance as well as recognized revenues from the programs.

Table of Contents

The following table summarizes information related to the Company's Frequent flyer deferred revenue liability:

Frequent flyer deferred revenue at December 31, 2016 (in millions)	\$ 4,883
% of miles earned expected to expire	16%
Impact of 1% change in outstanding miles or weighted average ticket value on deferred revenue (in millions)	\$ 54

Long-Lived Assets. The net book value of operating property and equipment for the Company was \$23 billion and \$22 billion at December 31, 2016 and 2015, respectively. The assets' recorded value is impacted by a number of accounting policy elections, including the estimation of useful lives and residual values and, when necessary, the recognition of asset impairment charges.

The Company records assets acquired, including aircraft, at acquisition cost. Depreciable life is determined through economic analysis, such as reviewing existing fleet plans, obtaining appraisals and comparing estimated lives to other airlines that operate similar fleets. As aircraft technology has improved, useful life has increased and the Company has generally estimated the lives of those aircraft to be 30 years. Residual values are estimated based on historical experience with regard to the sale of both aircraft and spare parts and are established in conjunction with the estimated useful lives of the related fleets. Residual values are based on when the aircraft are acquired and typically reflect asset values that have not reached the end of their physical life. Both depreciable lives and residual values are revised periodically as facts and circumstances arise to recognize changes in the Company's fleet plan and other relevant information. A one-year increase in the average depreciable life of the Company's flight equipment would reduce annual depreciation expense on flight equipment by approximately \$57 million.

The Company evaluates the carrying value of long-lived assets and intangible assets subject to amortization whenever events or changes in circumstances indicate that an impairment may exist. For purposes of this testing, the Company has generally identified the aircraft fleet type as the lowest level of identifiable cash flows for purposes of testing aircraft for impairment. An impairment charge is recognized when the asset's carrying value exceeds its net undiscounted future cash flows and its fair market value. The amount of the charge is the difference between the asset's carrying value and fair market value.

In 2016, the Company determined that the FAA's action impaired the entire value of its Newark slots because the slots no longer were the mechanism that governed take-off and landing rights, and the Company recorded a special charge to write off the intangible asset. See Notes 16 to the financial statements included in Part II, Item 8 of this report for additional information.

Defined Benefit Plan Accounting. We sponsor defined benefit pension plans for eligible employees and retirees. The most critical assumptions impacting our defined benefit pension plan obligations and expenses are the weighted average discount rate and the expected long-term rate of return on the plan assets.

United's pension plans' under-funded status was \$1.9 billion at December 31, 2016. Funding requirements for tax-qualified defined benefit pension plans are determined by government regulations. In 2017, we anticipate contributing at least \$400 million to our pension plans. The fair value of the plans' assets was \$3.4 billion at December 31, 2016.

When calculating pension expense for 2017, the Company assumed that its plans' assets would generate a long-term rate of return of approximately 7.0%. The expected long-term rate of return assumption was developed based on historical experience and input from the trustee managing the plans' assets. The expected long-term rate of return on plan assets is based on a target allocation of assets, which is based on a goal of earning the highest rate of return while maintaining risk at acceptable levels. Our projected long-term rate of return reflects the active management of our plans' assets. The plans strive to have assets sufficiently diversified so that adverse or unexpected results from one security class will not have an unduly detrimental impact on the entire portfolio. Plan fiduciaries regularly review actual asset allocation and the pension plans' investments are periodically rebalanced to the targeted allocation when considered appropriate.

Table of Contents

The defined benefit pension plans' assets consist of return generating investments and risk mitigating investments which are held through direct ownership or through interests in common collective trusts. Return generating investments include primarily equity securities, fixed-income securities and alternative investments (e.g. private equity and hedge funds). Risk mitigating investments include primarily U.S. government and investment grade corporate fixed-income securities. The allocation of assets was as follows at December 31, 2016:

	Percent of Total	Expected Long-Term Rate of Return
Equity securities	35 %	9.5 %
Fixed-income securities	39	5.0
Alternatives	17	7.3
Other	9	7.0

Pension expense increases as the expected rate of return on plan assets decreases. Lowering the expected long-term rate of return on plan assets by 50 basis points (from 7.0% to 6.5%) would increase estimated 2017 pension expense by approximately \$17 million. Future pension obligations for United's plans were discounted using a weighted average rate of 4.18% at December 31, 2016. The Company selected the discount rate for substantially all of its plans by using a hypothetical portfolio of high quality bonds at December 31, 2016 that would provide the necessary cash flows to match the projected benefit payments. The pension liability and future pension expense both increase as the discount rate is reduced. Lowering the discount rate by 50 basis points (from 4.18% to 3.68%) would increase the pension liability at December 31, 2016 by approximately \$575 million and increase the estimated 2017 pension expense by approximately \$73 million. Future changes in plan asset returns, plan provisions, assumed discount rates, pension funding law and various other factors related to the participants in our pension plans will impact our future pension expense and liabilities. We cannot predict with certainty what these factors will be in the future.

Actuarial gains or losses are triggered by changes in assumptions or experience that differ from the original assumptions. Under the applicable accounting standards for defined benefit pension plans, those gains and losses are not required to be recognized currently as pension benefit expense, but instead may be deferred as part of accumulated other comprehensive income and amortized into expense over the average remaining service life of the covered active employees. All gains and losses in accumulated other comprehensive income are amortized to expense over the remaining years of service of the covered active employees. At December 31, 2016 and 2015, the Company had unrecognized actuarial losses for pension benefit plans of \$1.5 billion and \$844 million, respectively, recorded in accumulated other comprehensive income.

Other Postretirement Benefit Plan Accounting. United's postretirement plan provides certain health care benefits, primarily in the United States, to retirees and eligible dependents, as well as certain life insurance benefits to certain retirees reflected as Other Benefits. United also has retiree medical programs that permit retirees who meet certain age and service requirements to continue medical coverage between retirement and Medicare eligibility. Eligible employees are required to pay a portion of the costs of their retiree medical benefits, which in some cases may be offset by accumulated unused sick time at the time of their retirement. Plan benefits are subject to co-payments, deductibles and other limits as described in the plans.

The Company accounts for other postretirement benefits by recognizing the difference between plan assets and obligations, or the plan's funded status, in its financial statements. Other postretirement benefit expense is recognized on an accrual basis over employees' approximate service periods and is generally calculated independently of funding decisions or requirements. United has not been required to pre-fund its plan obligations, which has resulted in a significant net obligation, as discussed below. The Company's benefit obligation was \$1.7 billion and \$2.0 billion for the other postretirement benefit plans at December 31, 2016 and 2015, respectively.

Table of Contents

The calculation of other postretirement benefit expense and obligations requires the use of a number of assumptions, including the assumed discount rate for measuring future payment obligations and the health care cost trend rate. The Company determines the appropriate discount rate for each of the plans based on current rates on high quality corporate bonds that would generate the cash flow necessary to pay plan benefits when due. The Company's weighted average discount rate to determine its benefit obligations as of December 31, 2016 was 4.07%, as compared to 4.49% for December 31, 2015. The health care cost trend rate assumed for 2016 was 6.75%, declining to 5.0% in 2023, as compared to assumed trend rate for 2017 of 6.50%, declining to 5.0% in 2023. A 1% increase in assumed health care trend rates would increase the Company's total service and interest cost for the year ended December 31, 2016 by \$13 million; whereas, a 1% decrease in assumed health care trend rates would decrease the Company's total service and interest cost for the year ended December 31, 2016 by \$11 million. A one percentage point decrease in the weighted average discount rate would increase the Company's postretirement benefit liability by approximately \$181 million and increase the estimated 2016 benefits expense by approximately \$11 million.

Actuarial gains or losses are triggered by changes in assumptions or experience that differ from the original assumptions and prior service credits result from a retroactive reduction in benefits due under the plans. Under the applicable accounting standards for postretirement welfare benefit plans, actuarial gains and losses and prior service credits are not required to be recognized currently, but instead may be deferred as part of accumulated other comprehensive income and amortized into expense over the average remaining service life of the covered active employees or the average life expectancy of inactive participants. At December 31, 2016 and 2015, the Company had unrecognized actuarial gains for postretirement welfare benefit plans of \$384 million and \$236 million, respectively, recorded in accumulated other comprehensive income.

Income Taxes. The Company has a net deferred tax asset totaling \$655 million as of December 31, 2016, including \$1.6 billion of federal and state NOL carryforwards and \$108 million of alternative minimum tax credit carryforwards, net of a \$8 million valuation allowance, which do not expire. The federal NOL carryforwards will expire beginning in 2026 if unused. In addition, the majority of tax benefits of the state net operating losses of \$56 million, net of a \$36 million valuation allowance, will expire over a five to 20-year period. At the end of 2016, the Company maintained a valuation allowance of \$68 million against certain state and local NOLs and credit carryforwards which will expire unused due to limited carryforward periods.

The Company periodically assesses whether it is more likely than not that it will generate sufficient taxable income to realize its deferred income tax assets. The Company establishes valuation allowances if it is not likely it will realize its deferred income tax assets. In making this determination, the Company considers all available positive and negative evidence and makes certain assumptions. The Company considers, among other things, projected future taxable income, scheduled reversals of deferred tax liabilities, the overall business environment, the Company's historical financial results and tax planning strategies. In evaluating the likelihood of utilizing the Company's net deferred income tax assets, the significant factors that the Company considers include (1) the Company's recent history and forecasted profitability; (2) growth in the U.S. and global economies; and (3) future impact of taxable temporary differences. During 2015, after considering all positive and negative evidence and the four sources of taxable income, the Company concluded that its deferred income tax assets were more likely than not to be realized. Therefore, the Company released almost all of its valuation allowance in 2015, resulting in a \$3.1 billion benefit in its provision for income taxes.

Forward-Looking Information

Certain statements throughout Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and elsewhere in this report are forward-looking and thus reflect the Company's current expectations and beliefs with respect to certain current and future events and anticipated financial and operating performance. Such forward-looking statements are and will be subject to many risks and uncertainties relating to the Company's operations and business environment that may cause actual results to differ materially from any future results expressed or implied in such forward-looking statements. Words such as expects, will, plans, anticipates, indicates, believes, forecasts, guidance, outlook, goals and similar expressions are intended to identify forward-looking statements.

Table of Contents

Additionally, forward-looking statements include statements that do not relate solely to historical facts, such as statements which identify uncertainties or trends, discuss the possible future effects of current known trends or uncertainties or which indicate that the future effects of known trends or uncertainties cannot be predicted, guaranteed or assured. All forward-looking statements in this report are based upon information available to the Company on the date of this report. The Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, changed circumstances or otherwise, except as required by applicable law.

Our actual results could differ materially from these forward-looking statements due to numerous factors including, without limitation, the following: our ability to comply with the terms of our various financing arrangements; the costs and availability of financing; our ability to maintain adequate liquidity; our ability to execute our operational plans and revenue-generating initiatives, including optimizing our revenue; our ability to control our costs, including realizing benefits from our resource optimization efforts, cost reduction initiatives and fleet replacement programs; costs associated with any modification or termination of our aircraft orders; our ability to utilize our net operating losses; our ability to attract and retain customers; demand for transportation in the markets in which we operate; an outbreak of a disease that affects travel demand or travel behavior; demand for travel and the impact that global economic and political conditions have on customer travel patterns; excessive taxation and the inability to offset future taxable income; general economic conditions (including interest rates, foreign currency exchange rates, investment or credit market conditions, crude oil prices, costs of aircraft fuel and energy refining capacity in relevant markets); economic and political instability and other risks of doing business globally; the effects of any hostilities, act of war or terrorist attack; the ability of other air carriers with whom we have alliances or partnerships to provide the services contemplated by the respective arrangements with such carriers; the effects of any technology failures or cybersecurity breaches; disruptions to our regional network; the costs and availability of aviation and other insurance; industry consolidation or changes in airline alliances; the success of our investments in airlines in other parts of the world; competitive pressures on pricing and on demand; our capacity decisions and the capacity decisions of our competitors; U.S. or foreign governmental legislation, regulation and other actions (including Open Skies agreements and environmental regulations); the impact of regulatory, investigative and legal proceedings and legal compliance risks; the impact of any management changes; labor costs; our ability to maintain satisfactory labor relations and the results of any collective bargaining agreement process with our union groups; any disruptions to operations due to any potential actions by our labor groups; weather conditions; and other risks and uncertainties set forth under Part I, Item 1A., Risk Factors of this report, as well as other risks and uncertainties set forth from time to time in the reports we file with the SEC.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Interest Rates. Our net income (loss) is affected by fluctuations in interest rates (e.g. interest expense on variable rate debt and interest income earned on short-term investments). The Company's policy is to manage interest rate risk through a combination of fixed and variable rate debt. The following table summarizes information related to the Company's interest rate market risk at December 31 (in millions):

	2016	2015
Variable rate debt		
Carrying value of variable rate debt at December 31	\$ 2,582	\$ 2,345
Impact of 100 basis point increase on projected interest expense for the following year	25	23
Fixed rate debt		
Carrying value of fixed rate debt at December 31	8,185	8,552
Fair value of fixed rate debt at December 31	8,469	9,022
Impact of 100 basis point increase in market rates on fair value	(340)	(369)

A change in market interest rates would also impact interest income earned on our cash, cash equivalents and short-term investments. Assuming our cash, cash equivalents and short-term investments remain at their average

Table of Contents

2016 levels, a 100 basis point increase in interest rates would result in a corresponding increase in the Company's interest income of approximately \$47 million during 2017.

Commodity Price Risk (Aircraft Fuel). The price level of aircraft fuel can significantly affect the Company's operations, results of operations, financial position and liquidity. Since 2014, the price of jet fuel has declined but remains volatile.

Our operational and financial results can be significantly impacted by changes in the price and availability of aircraft fuel. To provide adequate supplies of fuel, the Company routinely enters into purchase contracts that are customarily indexed to market prices for aircraft fuel, and the Company generally has some ability to cover short-term fuel supply and infrastructure disruptions at some major demand locations. The price of aircraft fuel has fluctuated substantially in the past several years and in order to lower its exposure to unpredictable increases in the market prices of aircraft fuel, the Company has historically hedged a portion of its planned fuel requirements. As of December 31, 2016, the Company did not have any outstanding fuel hedging contracts. The Company's current strategy is to not enter into transactions to hedge its fuel consumption, although the Company regularly reviews its policy based on market conditions and other factors. The Company's 2017 forecasted fuel consumption is presently approximately four billion gallons, and based on this forecast, a one dollar change in the price of a barrel of crude oil would change the Company's annual fuel expense by approximately \$95 million.

Foreign Currency. The Company generates revenues and incurs expenses in numerous foreign currencies. Changes in foreign currency exchange rates impact the Company's results of operations through changes in the dollar value of foreign currency-denominated operating revenues and expenses. Some of the Company's more significant foreign currency exposures include the Canadian dollar, Chinese renminbi, European euro, British pound and Japanese yen. The Company's current strategy is to not enter into transactions to hedge its foreign currency sales, although the Company regularly reviews its policy based on market conditions and other factors. As of December 31, 2016, the Company did not have any foreign currency derivative contracts outstanding. The last of the Company's foreign currency derivatives expired in December 2016.

The result of a uniform 10 percent strengthening in the value of the U.S. dollar from December 31, 2016 levels relative to each of the currencies in which the Company has foreign currency exposure would result in a decrease in pre-tax income of approximately \$239 million for the year ending December 31, 2017. This sensitivity analysis was prepared based upon projected 2017 foreign currency-denominated revenues and expenses as of December 31, 2016.

Table of Contents

**ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.
REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

The Board of Directors and Stockholders

United Continental Holdings, Inc.

We have audited the accompanying consolidated balance sheets of United Continental Holdings, Inc. (the Company) as of December 31, 2016 and 2015, and the related statements of consolidated operations, comprehensive income (loss), cash flows, and stockholders' equity for each of the three years in the period ended December 31, 2016. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and the financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company at December 31, 2016 and 2015, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework) and our report dated February 23, 2017, expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholder of

United Airlines, Inc.

We have audited the accompanying consolidated balance sheets of United Airlines, Inc. (the Company) as of December 31, 2016 and 2015, and the related statements of consolidated operations, comprehensive income (loss), cash flows, and stockholder's equity for each of the three years in the period ended December 31, 2016. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company at December 31, 2016 and 2015, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

UNITED CONTINENTAL HOLDINGS, INC.

UNITED AIRLINES, INC.

COMBINED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Overview

United Continental Holdings, Inc. (together with its consolidated subsidiaries, UAL or the Company) is a holding company and its principal, wholly-owned subsidiary is United Airlines, Inc. (together with its consolidated subsidiaries, United). As UAL consolidates United for financial statement purposes, disclosures that relate to activities of United also apply to UAL, unless otherwise noted. United's operating revenues and operating expenses comprise nearly 100% of UAL's revenues and operating expenses. In addition, United comprises approximately the entire balance of UAL's assets, liabilities and operating cash flows. When appropriate, UAL and United are named specifically for their individual contractual obligations and related disclosures and any significant differences between the operations and results of UAL and United are separately disclosed and explained. We sometimes use the words we, our, us, and the Company in this report for disclosures that relate to all of UAL and United.

NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES

(a) **Use of Estimates** The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the amounts reported in these financial statements and accompanying notes. Actual results could differ from those estimates.

(b) **Revenue Recognition** The Company records passenger ticket sales and tickets sold by other airlines for use on United as passenger revenue when the transportation is provided or upon estimated breakage. The value of unused passenger tickets is included in current liabilities as Advance ticket sales. Tickets sold by other airlines are recorded at the estimated values to be billed to the other airlines. Differences between amounts billed and the actual amounts may be rejected and rebilled or written off if the amount recorded was different from the original estimate. When necessary, the Company records a reserve against its interline billings and payables if historical experience indicates that these amounts are different. Non-refundable tickets generally expire on the date of the intended flight, unless the date is extended by notification from the customer on or before the intended flight date.

Fees charged in association with changes or extensions to non-refundable tickets are recorded as other revenue at the time the fee is incurred. The fare on the changed ticket, including any additional collection of fare, is deferred and recognized in accordance with our transportation revenue recognition policy at the time the transportation is provided. Change fees related to non-refundable tickets are considered a separate transaction from the air transportation because they represent a charge for the Company's additional service to modify a previous sale. Therefore, the pricing of the change fee and the initial customer order are separately determined and represent distinct earnings processes.

The Company records an estimate of breakage revenue on the flight date for tickets that will expire unused. These estimates are based on the evaluation of actual historical results and forecasted trends. Refundable tickets expire after one year from the date of issuance.

The Company recognizes cargo and other revenue as service is provided.

Under our capacity purchase agreements (CPAs) with regional carriers, we purchase all of the capacity related to aircraft covered by the contracts and are responsible for selling all of the related seat inventory. We record the passenger revenue and related expenses as separate operating revenue and expense in the consolidated statement of operations.

Accounts receivable primarily consist of amounts due from credit card companies and customers of our aircraft maintenance and cargo transportation services. We provide an allowance for uncollectible

Table of Contents

accounts equal to the estimated losses expected to be incurred based on historical write-offs and other specific analyses. Bad debt expense and write-offs were not material for the years ended December 31, 2016, 2015 and 2014.

- (c) **Frequent Flyer Accounting** United's MileagePlus program builds customer loyalty by offering awards, benefits and services to program participants. Members in this program earn miles for flights on United, United Express, Star Alliance members and certain other airlines that participate in the program. Members can also earn miles by purchasing the goods and services of our network of non-airline partners. We sell miles to these partners, which include credit card issuers, retail merchants, hotels, car rental companies and our participating airline partners. Miles can be redeemed for free (other than taxes and government imposed fees), discounted or upgraded air travel and non-travel awards. The Company records its obligation for future award redemptions using a deferred revenue model.

Miles Earned in Conjunction with Flights

When frequent flyers earn miles for flights, the Company recognizes a portion of the ticket sales as revenue when the air transportation occurs and defers a portion of the ticket sale representing the value of the related miles as a multiple-deliverable revenue arrangement. The Company determines the estimated selling price of air transportation and miles as if each element is sold on a separate basis. The total consideration from each ticket sale is then allocated to each of these elements, individually, on a pro rata basis. The miles are recorded in Frequent flyer deferred revenue on the Company's consolidated balance sheet and recognized into revenue when the transportation is provided.

The Company's estimated selling price of miles is based on an equivalent ticket value less fulfillment discount, which incorporates the expected redemption of miles, as the best estimate of selling price for these miles. The equivalent ticket value is based on the prior 12 months' weighted average equivalent ticket value of similar fares as those used to settle award redemptions while taking into consideration such factors as redemption pattern, cabin class, loyalty status and geographic region. The estimated selling price of miles is adjusted by a fulfillment discount that considers a number of factors, including redemption patterns of various customer groups.

Co-branded Credit Card Partner Mileage Sales

United has a significant contract, the Second Amended and Restated Co-Branded Card Marketing Services Agreement (the "Co-Brand Agreement"), to sell MileagePlus miles to its co-branded credit card partner, Chase Bank USA, N.A. ("Chase"). United identified the following significant revenue elements in the Co-Brand Agreement: the air transportation element represented by the value of the mile (generally resulting from its redemption for future air transportation and whose fair value is described above); use of the United brand and access to MileagePlus member lists; advertising; and other travel related benefits.

The fair value of the elements is determined using management's estimated selling price of each element. The objective of using the estimated selling price based methodology is to determine the price at which we would transact a sale if the product or service were sold on a stand-alone basis. Accordingly, we determine our best estimate of selling price by considering multiple inputs and methods including, but not limited to, discounted cash flows, brand value, volume discounts, published selling prices, number of miles awarded and number of miles redeemed. The Company estimated the selling prices and volumes over the term of the Co-Brand Agreement in order to determine the allocation of proceeds to each of the multiple elements to be delivered. We also evaluate volumes on an annual basis, which may result in a change in the allocation of estimated selling price on a prospective basis.

The Company records passenger revenue related to the air transportation element when the transportation is delivered. The other elements are generally recognized as Other operating revenue when earned.

Table of Contents

Expiration of Miles

The Company accounts for miles sold and awarded that will never be redeemed by program members, which we refer to as breakage. The Company reviews its breakage estimates annually based upon the latest available information regarding redemption and expiration patterns. Miles expire after 18 months of member account inactivity.

The Company's estimate of the expected expiration of miles requires significant management judgment. Current and future changes to expiration assumptions or to the expiration policy, or to program rules and program redemption opportunities, may result in material changes to the deferred revenue balance as well as recognized revenues from the programs.

Other Information

The following table provides additional information related to the frequent flyer program (in millions):

Year Ended December 31,	Cash Proceeds from Miles Sold and Earned	Other Revenue Recognized Upon Award of Miles to Third-Party Customers (a)	Increase in Frequent Flyer Deferred Revenue for Miles Awarded (b)	Decrease in Advanced Purchase of Miles (c)
2016	\$ 3,022	\$ 1,221	\$ 2,050	\$ (249)
2015	2,999	1,050	2,173	(224)
2014	2,861	882	2,178	(199)

(a) This amount represents other revenue recognized during the period from the sale of miles to third parties, representing the marketing-related deliverable services component of the sale.

(b) This amount represents the increase to Frequent flyer deferred revenue during the period.

(c) This amount represents the net decrease in the advance purchase of miles obligation due to cash payments for the sale of miles less than miles awarded to customers.

(d) **Cash and Cash Equivalents and Restricted Cash** Highly liquid investments with a maturity of three months or less on their acquisition date are classified as cash and cash equivalents.

Restricted cash primarily includes cash collateral associated with workers' compensation obligations and reserves for institutions that process credit card ticket sales. Restricted cash is classified as short-term or long-term in the consolidated balance sheets based on the expected timing of return of the assets to the Company.

The following table provides a reconciliation of cash, cash equivalents and restricted cash reported within the consolidated balance sheets that sum to the total of the same such amounts shown in the statements of consolidated cash flows:

	UAL At December 31,			United At December 31,		
	2016	2015	2014	2016	2015	2014
Current assets:

Total cash, cash equivalents and restricted cash shown in the statement of consolidated cash flows	\$ 2,303	\$ 3,212	\$ 2,322	\$ 2,297	\$ 3,206	\$ 2,316
--	----------	----------	----------	----------	----------	----------

Table of Contents

- (e) **Short-term Investments** Short-term investments are classified as available-for-sale and are stated at fair value. Realized gains and losses on sales of investments are reflected in nonoperating income (expense) in the consolidated statements of operations. Unrealized gains and losses on available-for-sale securities are reflected as a component of accumulated other comprehensive income (loss).
- (f) **Aircraft Fuel, Spare Parts and Supplies** The Company accounts for aircraft fuel, spare parts and supplies at average cost and provides an obsolescence allowance for aircraft spare parts with an assumed residual value of 10% of original cost.
- (g) **Property and Equipment** The Company records additions to owned operating property and equipment at cost when acquired. Property under capital leases and the related obligation for future lease payments are recorded at an amount equal to the initial present value of those lease payments. Modifications that enhance the operating performance or extend the useful lives of airframes or engines are capitalized as property and equipment. It is the Company's policy to record compensation from delays in delivery of aircraft as a reduction of the cost of the related aircraft.

Depreciation and amortization of owned depreciable assets is based on the straight-line method over the assets' estimated useful lives. Leasehold improvements are amortized over the remaining term of the lease, including estimated facility renewal options when renewal is reasonably assured at key airports, or the estimated useful life of the related asset, whichever is less. Properties under capital leases are amortized on the straight-line method over the life of the lease or, in the case of certain aircraft, over their estimated useful lives, whichever is shorter. Amortization of capital lease assets is included in depreciation and amortization expense. The estimated useful lives of property and equipment are as follows:

	Estimated Useful Life (in years)
Aircraft and related rotatable parts	25 to 30
Buildings	25 to 45
Other property and equipment	3 to 15
Computer software	5
Building improvements	1 to 40

As of December 31, 2016 and 2015, the Company had a carrying value of computer software of \$356 million and \$279 million, respectively. For the years ended December 31, 2016, 2015 and 2014, the Company's depreciation expense related to computer software was \$108 million, \$93 million and \$81 million, respectively. Aircraft and aircraft spare parts were assumed to have residual values of approximately 10% of original cost, and other categories of property and equipment were assumed to have no residual value.

- (h) **Maintenance and Repairs** The cost of maintenance and repairs, including the cost of minor replacements, is charged to expense as incurred, except for costs incurred under our power-by-the-hour (PBTH) engine maintenance agreements. PBTH contracts transfer certain risk to third-party service providers and fix the amount we pay per flight hour or per cycle to the service provider in exchange for maintenance and repairs under a predefined maintenance program. Under PBTH agreements, the Company recognizes expense at a level rate per engine hour, unless the level of service effort and the related payments during the period are substantially consistent, in which case the Company recognizes expense based on the amounts paid.
- (i) **Lease Fair Value Adjustments** Lease fair value adjustments, which arose from recording operating leases at fair value under fresh start or business combination accounting, are amortized on a straight-line basis over the related lease term.
- (j) **Regional Capacity Purchase** Payments made to regional carriers under CPAs are reported in Regional capacity purchase in our consolidated statements of operations.

Table of Contents

- (k) **Advertising** Advertising costs, which are included in Other operating expenses, are expensed as incurred. Advertising expenses were \$220 million, \$201 million and \$179 million for the years ended December 31, 2016, 2015 and 2014, respectively.

- (l) **Intangibles** The Company has finite-lived and indefinite-lived intangible assets, including goodwill. Finite-lived intangible assets are amortized over their estimated useful lives. Goodwill and indefinite-lived intangible assets are not amortized but are reviewed for impairment annually or more frequently if events or circumstances indicate that the asset may be impaired. Goodwill and indefinite-lived assets are reviewed for impairment on an annual basis as of October 1, or on an interim basis whenever a triggering event occurs. See Note 2 of this report for additional information related to intangibles.

- (m) **Long-Lived Asset Impairments** The Company evaluates the carrying value of long-lived assets subject to amortization whenever events or changes in circumstances indicate that an impairment may exist. For purposes of this testing, the Company has generally identified the aircraft fleet type as the lowest level of identifiable cash flows. An impairment charge is recognized when the asset's carrying value exceeds its net undiscounted future cash flows and its fair market value. The amount of the charge is the difference between the asset's carrying value and fair market value. See Note 16 of this report for additional information related to asset impairments.

- (n) **Share-Based Compensation** The Company measures the cost of employee services received in exchange for an award of equity instruments based on the grant date fair value of the award. The resulting cost is recognized over the period during which an employee is required to provide service in exchange for the award, usually the vesting period. Obligations for cash-settled restricted stock units (RSUs) are remeasured at fair value throughout the requisite service period on the last day of each reporting period based upon UAL's stock price. In addition to the service requirement, certain RSUs have performance metrics that must be achieved prior to vesting. These awards are accrued based on the expected level of achievement at each reporting period. A cumulative adjustment is recorded on the last day of each reporting period to adjust compensation expense based on both UAL's stock price and the then current level of expected performance achievement for the performance-based awards. See Note 5 of this report for additional information on UAL's share-based compensation plans.

- (o) **Ticket Taxes** Certain governmental taxes are imposed on the Company's ticket sales through a fee included in ticket prices. The Company collects these fees and remits them to the appropriate government agency. These fees are recorded on a net basis (excluded from operating revenue).

- (p) **Retirement of Leased Aircraft** The Company accrues for estimated lease costs over the remaining term of the lease at the present value of future minimum lease payments, net of estimated sublease rentals (if any), in the period that aircraft are permanently removed from service. When reasonably estimable and probable, the Company estimates maintenance lease return condition obligations for items such as minimum aircraft and engine conditions specified in leases and accrues these amounts over the lease term while the aircraft are operating, and any remaining unrecognized estimated obligations are accrued in the period that an aircraft is removed from service.

- (q) **Uncertain Income Tax Positions** The Company has recorded reserves for income taxes and associated interest that may become payable in future years. Although management believes that its positions taken on income tax matters are reasonable, the Company nevertheless has established tax and interest reserves in recognition that various taxing authorities may challenge certain of the positions taken by the Company, potentially resulting in additional liabilities for taxes and interest. The Company's uncertain tax position reserves are reviewed periodically and are adjusted as events occur that affect its estimates, such as the availability of new information, the lapsing of applicable statutes of limitation, the conclusion of tax audits, the measurement of additional estimated liability, the identification of new tax matters, the release of administrative tax guidance affecting its estimates of tax liabilities, or the rendering of relevant court decisions. The Company records penalties and interest relating to uncertain tax positions in Other operating expense and Interest expense, respectively, in its

Table of Contents

consolidated statements of operations. The Company has not recorded any material expense or liabilities related to interest or penalties in its consolidated financial statements.

- (r) **Labor Costs** The Company records expenses associated with amendable labor agreements when the amounts are probable and estimable. These include costs associated with lump sum cash payments that would be made in conjunction with the ratification of labor agreements. To the extent these upfront costs are in lieu of future pay increases, they would be capitalized and amortized over the term of the labor agreements. If not, these amounts would be expensed.
- (s) **Third-Party Business** The Company has third-party business revenue that includes fuel sales, catering, ground handling, maintenance services and frequent flyer award non-air redemptions, and third-party business revenue is recorded in Other operating revenue. The Company also incurs third-party business expenses, such as maintenance, ground handling and catering services for third parties, fuel sales and non-air mileage redemptions, and those third-party business expenses are recorded in Other operating expenses.
- (t) **Recently Issued Accounting Standards** The Financial Accounting Standards Board (FASB) amended the FASB Accounting Standards Codification and created a new Topic 606, *Revenue from Contracts with Customers*. This amendment prescribes that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The amendment supersedes the revenue recognition requirements in Topic 605, *Revenue Recognition*, and most industry-specific guidance throughout the Industry Topics of the Accounting Standards Codification. The Company currently plans to use the full-retrospective approach in adopting this standard on January 1, 2018. Under the new standard, certain airline ancillary fees directly related to passenger revenue tickets, such as ticket change fees and baggage fees, are likely to no longer be considered distinct performance obligations separate from the passenger travel component. In addition, the ticket change fees which were previously recognized when received and booking fees when paid, will likely be recognized when transportation is provided. The Company has previously recorded ancillary fees and change fees in other operating revenue but will record these in passenger revenue under the new standard. The Company is evaluating other possible impacts from the new standard on its consolidated financial statements.

In 2016, the FASB amended the FASB Accounting Standards Codification and created a new Topic 842, *Leases* (Topic 842). The guidance requires lessees to recognize a right-of-use asset and a lease liability for all leases (with the exception of short-term leases) at the commencement date and recognize expenses on their income statements similar to the current Topic 840, *Leases*. It is effective for fiscal years and interim periods beginning after December 15, 2018, and early adoption is permitted. Lessees and lessors are required to adopt Topic 842 using a modified retrospective approach for all leases existing at or commencing after the date of initial application with an option to use certain practical expedients. The Company is evaluating the impact the adoption of this standard will have on its consolidated financial statements and believes this standard will have a significant impact on its consolidated balance sheets.

In 2016, the FASB issued Accounting Standards Update No. 2016-09, *Improvements to Employee Share-Based Payment Accounting* (ASU 2016-09). The update requires excess tax benefits and tax deficiencies, which arise due to differences between the measure of compensation expense and the amount deductible for tax purposes, to be recorded directly through earnings as a component of income tax expense. Under current GAAP, these differences are generally recorded in additional paid-in capital and thus have no impact on net income. The change in treatment of excess tax benefits and tax deficiencies will also impact the computation of diluted earnings per share and the cash flows associated with those items will be classified as operating activities on the statements of consolidated cash flows. Additionally, entities will be permitted to make an accounting policy election for the impact of forfeitures on the recognition of expense for share-based payment awards. Forfeitures can be estimated, as required under current GAAP, or recognized when they occur. The amendments in this update are

Table of Contents

effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. The Company does not expect the adoption of ASU 2016-09 to have a material impact on its consolidated financial statements.

In 2016, the FASB issued Accounting Standards Update No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments* (ASU 2016-15). The update amends the guidance in Accounting Standards Codification 230, *Statement of Cash Flows* (ASC 230), and clarifies how entities should classify certain cash receipts and cash payments on the statement of cash flows with the objective of reducing the existing diversity in practice related to eight specific cash flow issues. The Company adopted ASU 2016-15 as of December 31, 2016 and the standard did not have a material impact on its consolidated financial statements.

In 2016, the FASB issued Accounting Standards Update No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash*. The update amends ASC 230 to add guidance on the classification and presentation of restricted cash in the statement of cash flows. Furthermore, a reconciliation between the statement of financial position and the statement of cash flows must be disclosed when the statement of financial position includes more than one line item for cash, cash equivalents, restricted cash, and restricted cash equivalents. The Company adopted this standard as of December 31, 2016 and included \$124 million, \$206 million and \$320 million of restricted cash in the total of cash, cash equivalents and restricted cash in its statements of consolidated cash flows for the year ended December 31, 2016, 2015 and 2014, respectively. A reconciliation of restricted cash for each period of the Company's balance sheet to its statement of consolidated cash flows is included in Note 1(d) Cash and Cash Equivalents and Restricted Cash of this report.

The FASB issued Accounting Standards Update No. 2015-07, *Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*. Under the standard, investments for which fair value is measured at net asset value (NAV) per share (or its equivalent) using the practical expedient are no longer categorized in the fair value hierarchy. The Company adopted this standard on January 1, 2016. As of December 31, 2016, the Company had approximately \$182 million of such investments as part of Short-term investments on its consolidated balance sheets. In addition, pension plan investments measured at NAV per share are no longer categorized within the fair value hierarchy. As of December 31, 2016, the Company had approximately \$1.8 billion of such investments.

Table of Contents**NOTE 2 - GOODWILL AND OTHER INTANGIBLE ASSETS**

The following table presents information about the Company's goodwill and other intangible assets at December 31 (in millions):

Item	Asset life (a)	2016		2015	
		Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Goodwill		\$ 4,523		\$ 4,523	
Finite-lived intangible assets					
Frequent flyer database (b)	22	\$ 1,177	\$ 771	\$ 1,177	\$ 702
Hubs	20	145	82	145	74
Contracts	13	135	95	135	86
Patents and tradenames	3	108	108	108	108
Airport slots and gates	8	97	97	97	97
Other	25	109	81	109	77
Total		\$ 1,771	\$ 1,234	\$ 1,771	\$ 1,144
Indefinite-lived intangible assets					
Route authorities		\$ 1,562		\$ 1,570	
Airport slots and gates		536		942	
Tradenames and logos		593		593	
Alliances		404		404	
Total		\$ 3,095		\$ 3,509	

(a) Weighted average life expressed in years.

(b) The frequent flyer database is amortized based on an accelerated amortization schedule to reflect utilization of the assets. Estimated cash flows correlating to the expected attrition rate of customers in the frequent flyer database is considered in the determination of the amortization schedules.

Amortization expense in 2016, 2015 and 2014 was \$90 million, \$105 million and \$128 million, respectively. Projected amortization expense in 2017, 2018, 2019, 2020 and 2021 is \$79 million, \$70 million, \$64 million, \$58 million and \$53 million, respectively.

See Note 16 of this report for additional information related to impairment of intangible assets.

NOTE 3 - COMMON STOCKHOLDERS' EQUITY AND PREFERRED SECURITIES

In 2016, UAL repurchased approximately 50 million shares of UAL common stock for \$2.6 billion. As of December 31, 2016, the Company had approximately \$1.8 billion remaining to purchase shares under its share program. UAL may repurchase shares through the open market, privately negotiated transactions, block trades or accelerated share repurchase transactions from time to time in accordance with applicable securities laws. UAL may repurchase shares of UAL common stock subject to prevailing market conditions, and may discontinue such repurchases at any time. See Part II, Item 5, "Market for registrant's common equity, related stockholder matters and issuer purchases of equity securities" of this report for additional information.

In 2016, the Company retired 70 million treasury shares that were originally acquired at an average cost of approximately \$53 per share.

At December 31, 2016, approximately 5 million shares of UAL's common stock were reserved for future issuance related to the issuance of equity-based awards under the Company's incentive compensation plans.

Edgar Filing: United Continental Holdings, Inc. - Form 10-K

As of December 31, 2016, UAL had two shares of junior preferred stock (par value \$0.01 per share) outstanding. In addition, UAL is authorized to issue 250 million shares of preferred stock (without par value) under UAL's amended and restated certificate of incorporation.

Table of Contents**NOTE 4 - EARNINGS PER SHARE**

The computations of UAL's basic and diluted earnings per share are set forth below for the years ended December 31 (in millions, except per share amounts):

	2016	2015	2014
Basic earnings per share:			
Earnings available to common stockholders	\$ 2,263	\$ 7,340	\$ 1,132
Basic weighted-average shares outstanding	329.9	376.1	371.1
Earnings per share, basic	\$ 6.86	\$ 19.52	\$ 3.05
Diluted earnings per share:			
Earnings available to common stockholders	\$ 2,263	\$ 7,340	\$ 1,132
Effect of dilutive securities			11
Earnings available to common stockholders including the effect of dilutive securities	\$ 2,263	\$ 7,340	\$ 1,143
Diluted shares outstanding:			
Basic weighted-average shares outstanding	329.9	376.1	371.1
Effect of convertible notes		0.3	17.7
Effect of employee stock awards	0.4	0.5	0.9
Diluted weighted-average shares outstanding	330.3	376.9	389.7
Earnings per share, diluted	\$ 6.85	\$ 19.47	\$ 2.93

The number of antidilutive securities excluded from the computation of diluted earnings per share amounts was not material.

NOTE 5 - SHARE-BASED COMPENSATION PLANS

UAL maintains several share-based compensation plans. These plans provide for grants of qualified and non-qualified stock options, stock appreciation rights, restricted stock awards, RSUs, performance compensation awards, performance units, cash incentive awards and other types of equity-based and equity-related awards.

All awards are recorded as either equity or a liability in the Company's consolidated balance sheets. The share-based compensation expense is directly recorded in salaries and related costs or integration-related expense.

During 2016, UAL granted share-based compensation awards pursuant to the United Continental Holdings, Inc. 2008 Incentive Compensation Plan. These share-based compensation awards include approximately 1.9 million RSUs, 0.4 million shares of restricted stock and 0.4 million stock options. The time-vested RSUs and the restricted stock awards vest in one-third increments over the first three anniversaries of the date of grant. The time-vested RSUs are generally stock-settled for domestic employees and cash-settled for international employees based on the 20-day average closing price of UAL common stock immediately prior to the vesting date. The remainder of the RSUs are performance-based and vest based on the Company's return on invested capital and the Company's relative improvement in pre-tax margin for the three years ending December 31, 2018. If the applicable performance conditions are achieved, cash payments will be made after the end of the performance period based on the 20-day average closing price of UAL common stock immediately prior to the vesting date. The stock options vest in one-third increments over either (i) the first three anniversaries of the date of grant (for seven-year term options) or (ii) the fourth, fifth and sixth anniversaries of the date of grant (for ten-year term options).

Table of Contents

The following table provides information related to UAL's share-based compensation plan cost for the years ended December 31 (in millions):

	2016	2015	2014
Compensation cost (a):			
RSUs	\$ 58	\$ 52	\$ 104
Restricted stock	11	6	10
Stock options	1		
Total	\$ 70	\$ 58	\$ 114

(a) All compensation cost is recorded to Salaries and related costs, with the exception of \$3 million in 2014 that was recorded in integration-related costs as a component of special items.

The table below summarizes UAL's unearned compensation and weighted-average remaining period to recognize costs for all outstanding share-based awards that are probable of being achieved as of December 31, 2016 (in millions, except as noted):

	Unearned Compensation	Weighted- Average Remaining Period (in years)
RSUs	\$ 49	1.5
Restricted stock	11	1.5
Stock options	5	3.2
Total	\$ 65	

RSUs and Restricted Stock. All performance-based RSUs, as well as a portion of the time-vested RSUs, will be settled in cash. As of December 31, 2016, UAL had recorded a liability of \$70 million related to its RSUs. UAL paid \$69 million, \$85 million and \$86 million related to its RSUs during 2016, 2015 and 2014, respectively.

Table of Contents

The table below summarizes UAL's RSUs and restricted stock activity for the years ended December 31 (shares in millions):

	RSUs	Restricted Stock	Weighted-Average Grant Price
Non-vested at December 31, 2013	5.4	0.9	\$ 25.02
Granted	0.9	0.3	43.33
Vested	(2.2)	(0.4)	24.66
Forfeited	(0.3)	(0.1)	28.88
Non-vested at December 31, 2014	3.8	0.7	32.55
Granted	1.0	0.2	66.53
Vested	(1.6)	(0.4)	31.14
Forfeited	(0.6)	(0.2)	46.23
Non-vested at December 31, 2015	2.6	0.3	48.68
Granted	1.9	0.4	50.63
Vested	(1.4)	(0.1)	41.47
Forfeited	(0.2)	(0.1)	53.42
Non-vested at December 31, 2016	2.9	0.5	52.00

The fair value of RSUs and restricted stock that vested in 2016, 2015 and 2014 was \$80 million, \$92 million and \$97 million, respectively. The fair value of the restricted stock awards was based upon the UAL common stock price on the date of grant. These awards are accounted for as equity awards. The fair value of the RSUs was based on the UAL common stock price as of the last day preceding the settlement date. These awards were accounted for as either equity or liability awards based on their method of settlement. Restricted stock vesting and the recognition of the expense is similar to the stock option vesting described below.

Stock Options. During 2016, UAL granted 0.1 million stock options with exercise prices equal to the fair market value of UAL's common stock on the date of grant and an additional 0.3 million stock options with exercise prices at a 25% premium of the grant date fair market value resulting in a weighted-average exercise price of \$56.19 and a weighted-average grant date fair value of approximately \$2.3 million. Prior to 2016, UAL had not granted any stock options since 2010. Expense related to each portion of an option grant is recognized on a straight-line basis over the specific vesting period for those options.

The Company determined the fair value of stock options at the grant date using a Black Scholes option pricing model, which requires the use of several assumptions. The risk-free interest rate is based on the U.S. treasury yield curve in effect for the expected term of the option at the time of grant. The dividend yield on UAL's common stock was assumed to be zero since UAL did not have any plans to pay dividends at the time of the option grants. The volatility assumptions were based upon historical volatilities of UAL using daily stock price returns equivalent to the expected term of the option. The expected lives of the options were determined based upon a simplified assumption that the option will be exercised evenly from vesting to expiration due to the Company's lack of relevant historical data.

As of December 31, 2016, there were approximately 0.5 million outstanding stock option awards, 0.1 million of which were exercisable, with weighted-average exercise prices of \$46.83 and \$18.58, respectively, intrinsic values of \$14 million and \$7 million, respectively, and weighted-average remaining contractual lives (in years) of 6.3 and 1.6, respectively.

Table of Contents**NOTE 6 - ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)**

The tables below present the components of the Company's accumulated other comprehensive income (loss) (AOCI), net of tax (in millions):

	Pension and Other Postretirement Liabilities	Fuel Derivatives Contracts	Investments and Other	Deferred Taxes Pension and Other Postretirement Liabilities	Fuel Derivative Contracts	Total
Balance at December 31, 2013	\$ 699	\$ 11	\$ 13	\$ (115)	\$ (c)	\$ 608

Available-for-sale securities reclassifications of gains into earnings	(1)	(6)	Miscellaneous, net
--	-----	-----	--------------------

(a) Income tax expense for these items was offset by the Company's valuation allowance.

(b) Prior service credits increased by \$30 million, \$0 million and \$3 million and actuarial gains (losses) increased (decreased) by approximately \$560 million, \$78 million and \$(1.1) billion for 2016, 2015 and 2014, respectively.

(c) Deferred tax balance was offset by the Company's valuation allowance.

(d) This AOCI component is included in the computation of net periodic pension and other postretirement costs (see Note 8 of this report for additional information).

Prior to the release of the deferred income tax valuation allowance in the third quarter of 2015, the Company recorded approximately \$465 million of valuation allowance adjustments in AOCI. Subsequent to the release of

Table of Contents

the deferred income tax valuation allowance in 2015, the \$465 million debit remained within AOCI, of which \$180 million related to losses on fuel hedges designated for hedge accounting and \$285 million related to pension and other postretirement liabilities. Accounting rules required the adjustments to remain in AOCI as long as the Company had fuel derivatives designated for cash flow hedge accounting and the Company continues to provide pension and postretirement benefits. In 2016, we settled all of our fuel hedges and have not entered into any new fuel derivative contracts for hedge accounting. Accordingly, the Company reclassified the \$180 million to income tax expense in 2016.

NOTE 7 - INCOME TAXES

The significant components of the income tax expense (benefit) are as follows (in millions):

	2016	UAL	United
Current		\$ (92)	\$ (92)
Deferred		1,648	1,650
		\$ 1,556	\$ 1,558
	2015		
Current		\$ 56	\$ 56
Deferred		(3,177)	(3,136)
		\$ (3,121)	\$ (3,080)
	2014		
Current		\$ (17)	\$ (17)
Deferred		13	13
		\$ (4)	\$ (4)

Table of Contents

The income tax provision differed from amounts computed at the statutory federal income tax rate, as follows (in millions):

UAL	2016	2015	2014
Income tax provision at statutory rate	\$ 1,337	\$ 1,477	\$ 395
State income taxes, net of federal income tax	38	38	10
Foreign income taxes	3	4	2
Nondeductible employee meals	16	15	15
Income tax adjustment	180		
State rate change	(12)

	\$ 1,556	\$ (3,121)	\$ (4)

United	2016	2015	2014
Income tax provision at statutory rate	\$ 1,338	\$ 1,477	\$ 388
State income taxes, net of federal income tax	38	38	10
Foreign income taxes	3	4	2
Nondeductible employee meals	16	15	15
Derivative market adjustment			(7)
Income tax adjustment	180		
State rate change	(12)		
Valuation allowance	20	(4,621)	(421)
Other, net	(25)	7	9
	\$ 1,558	\$ (3,080)	\$ (4)

The Company's effective tax rate for the year ended December 31, 2016 differed from the federal statutory rate of 35% primarily because of the non-cash income tax expense of \$180 million that was related to losses on fuel derivatives designated for hedge accounting. Subsequent to the release of the valuation allowance in 2015, this deferred income tax expense of \$180 million remained in AOCI until all fuel derivatives were settled in December 2016. The change in the effective tax rate each period is impacted by a number of factors, including the relative mix of domestic and state income tax expense in the U.S., adjustments to the valuation allowances and discrete items.

Table of Contents

Temporary differences and carryforwards that give rise to deferred tax assets and liabilities at December 31, 2016 and 2015 were as follows (in millions):

	UAL December 31,		United December 31,	
	2016	2015	2016	2015
Deferred income tax asset (liability):				
Federal and state net operating loss (NOL) carryforwards	\$ 1,613	\$ 2,897	\$ 1,571	\$ 2,855

Net deferred tax asset	\$ 655	\$ 2,037	\$ 612	\$ 1,995

United and its domestic consolidated subsidiaries file a consolidated federal income tax return with UAL. Under an intercompany tax allocation policy, United and its subsidiaries compute, record and pay UAL for their own tax liability as if they were separate companies filing separate returns. In determining their own tax liabilities, United and each of its subsidiaries take into account all tax credits or benefits generated and utilized as separate companies and they are each compensated for the aforementioned tax benefits only if they would be able to use those benefits on a separate company basis.

The Company's federal and state NOL carryforwards relate to prior years' NOLs, which may be used to reduce tax liabilities in future years. These tax benefits are mostly attributable to federal pre-tax NOL carryforwards of \$4.4 billion for UAL. If not utilized these federal pre-tax NOLs will expire as follows (in billions): \$0.5 in 2026, \$1.4 in 2027 and \$2.5 after 2028. In addition, the majority of tax benefits of the state net operating losses of \$56 million, net of a valuation allowance of \$36 million, for UAL will expire over a five to 20-year period. Additionally, the Company has \$108 million of AMT credit carryforwards, net of a valuation allowance of \$8 million, which do not expire.

The Company periodically assesses whether it is more likely than not that it will generate sufficient taxable income to realize its deferred income tax assets. The Company establishes valuation allowances if it is not likely it will realize its deferred income tax assets. In making this determination, the Company considers all available positive and negative evidence and makes certain assumptions. The Company considers, among other things, projected future taxable income, scheduled reversals of deferred tax liabilities, the overall business environment, the Company's historical financial results and tax planning strategies. In evaluating the likelihood of utilizing the Company's net deferred income tax assets, the significant factors that the Company considers include (1) the Company's recent history and forecasted profitability; (2) growth in the U.S. and global economies; and (3) future impact of taxable temporary differences. In 2015, the Company concluded that its deferred income tax assets were more likely than not to be realized and released almost all of its valuation allowance in 2015, resulting in a \$3.1 billion benefit in its provision for income taxes. The valuation allowance recorded in AOCI in prior years was released through the income statement.

Table of Contents

The Company has a valuation allowance of \$68 million for certain state and local NOLs and credit carryforwards. The Company expects these NOLs and credits will expire unused due to limited carryforward periods. The ability to utilize these state NOLs and credits will be evaluated on a quarterly basis to determine if there are any significant events or any prudent and feasible tax planning strategies that would affect the Company's ability to realize these deferred tax assets.

The Company's unrecognized tax benefits related to uncertain tax positions were \$74 million, \$24 million and \$9 million at 2016, 2015 and 2014, respectively. Included in the ending balance at 2016 is \$20 million that would affect the Company's effective tax rate if recognized. The changes in unrecognized tax benefits relating to settlements with taxing authorities, unrecognized tax benefits as a result of tax positions taken during a prior period and unrecognized tax benefits relating from a lapse of the statute of limitations were immaterial during 2016, 2015 and 2014. The Company does not expect significant increases or decreases in their unrecognized tax benefits within the next 12 months.

There are no material amounts included in the balance at December 31, 2016 for tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility.

The Company's federal income tax returns for tax years after 2002 remain subject to examination by the Internal Revenue Service (IRS) and state taxing jurisdictions. Currently, there are no ongoing examinations of the Company's prior year tax returns being conducted by the IRS.

NOTE 8 - PENSION AND OTHER POSTRETIREMENT PLANS

The following summarizes the significant pension and other postretirement plans of United:

Pension Plans

United maintains two primary defined benefit pension plans, one covering certain pilot employees and another covering certain U.S. non-pilot employees. Each of these plans provide benefits based on a combination of years of benefit accruals service and an employee's final average compensation. Additional benefit accruals are frozen under the plan covering certain pilot employees and management and administrative employees. Benefit accruals for certain non-pilot employees continue. United maintains additional defined benefit pension plans, which cover certain international employees.

Other Postretirement Plans

United maintains postretirement medical programs which provide medical benefits to certain retirees and eligible dependents, as well as life insurance benefits to certain retirees participating in the plan. Benefits provided are subject to applicable contributions, co-payments, deductibles and other limits as described in the specific plan documentation.

Actuarial assumption changes are reflected as a component of the net actuarial gains/(losses) during 2016 and 2015. These amounts will be amortized over the average remaining service life of the covered active employees or the average life expectancy of inactive participants and will impact 2016 and 2015 pension and retiree medical expense as described below.

Table of Contents

The following table sets forth the reconciliation of the beginning and ending balances of the benefit obligation and plan assets, the funded status and the amounts recognized in these financial statements for the defined benefit and other postretirement plans (in millions):

	Pension Benefits	
	Year Ended December 31, 2016	Year Ended December 31, 2015
Accumulated benefit obligation:	\$ 4,158	\$ 3,795
Change in projected benefit obligation:

	Other Postretirement Benefits	
	December 31, 2016	December 31, 2015
Amounts recognized in the consolidated balance sheets consist of:		
Current liability	\$ (51)	\$ (64)
Noncurrent liability	(1,581)	(1,882)
Total liability	\$ (1,632)	\$ (1,946)
Amounts recognized in accumulated other comprehensive income consist of:		
Net actuarial gain	\$ 384	\$ 236
Prior service credit	245	246
Total accumulated other comprehensive income	\$ 629	\$ 482

The following information relates to all pension plans with an accumulated benefit obligation and a projected benefit obligation in excess of plan assets at December 31 (in millions):

	2016	2015
Projected benefit obligation	\$ 5,025	\$ 4,292
Accumulated benefit obligation	3,985	3,655
Fair value of plan assets	3,164	2,794

Table of Contents

Net periodic benefit cost for the years ended December 31 included the following components (in millions):

	2016		2015		2014	
	Pension Benefits	Other Postretirement Benefits	Pension Benefits	Other Postretirement Benefits	Pension Benefits	Other Postretirement Benefits
Service cost	\$ 112	\$ 19	\$ 124	\$ 21	\$ 98	\$ 19
Interest cost	200	86	200	82	201	88
Expected return on plan assets	(216)	(2)	(194)	(2)	(180)	(2)
Curtailment gain		(107)				
Amortization of unrecognized actuarial (gain) loss	76	(19)	85	(22)	12	(47)
Amortization of prior service credits		(31)		(32)		(31)
Other	5		4		1	
Net periodic benefit cost	\$ 177	\$ (54)	\$ 219	\$ 47	\$ 132	\$ 27

As part of the ratified contract with the Association of Flight Attendants (AFA) in 2016, the Company amended two of its flight attendant postretirement medical plans. The amendments triggered curtailment accounting, resulting in the recognition of a one-time \$47 million gain for accelerated recognition of a prior service credit in one of the plans. Also, as part of the ratified contract with the International Brotherhood of Teamsters (the IBT) in 2016, the Company amended some of its technicians and related employees' postretirement medical plans. The amendments triggered curtailment accounting, resulting in the recognition of a one-time \$60 million gain for accelerated recognition of a prior service credit in one of the plans.

The estimated amounts that will be amortized in 2017 out of accumulated other comprehensive income (loss) into net periodic benefit cost are as follows (in millions):

	Pension Benefits	Other Postretirement Benefits
Actuarial (gain) loss	\$ 127	\$ (36)
Prior service credit		(37)

The assumptions used for the benefit plans were as follows:

Assumptions used to determine benefit obligations	Pension Benefits	
	2016	2015
Discount rate	4.18%	4.58%
Rate of compensation increase	3.54%	3.66%
Assumptions used to determine net expense		
Discount rate	4.58%	4.20%
Expected return on plan assets	7.04%	7.40%
Rate of compensation increase	3.53%	3.51%

Table of Contents

Assumptions used to determine benefit obligations	Other Postretirement Benefits	
	2016	2015
Discount rate	4.07%	4.49%
Assumptions used to determine net expense		
Discount rate	4.49%	4.07%
Expected return on plan assets	3.00%	3.00%
Health care cost trend rate assumed for next year	6.50%	6.75%
Rate to which the cost trend rate is assumed to decline (ultimate trend rate in 2023)	5.00%	5.00%
The Company used the Society of Actuaries' 2014 mortality tables, modified to reflect the Social Security Administration Trustee's Report on current projections regarding expected longevity improvements.		

The Company selected the 2016 discount rate for substantially all of its plans by using a hypothetical portfolio of high quality bonds at December 31, 2016, that would provide the necessary cash flows to match projected benefit payments.

We develop our expected long-term rate of return assumption for our defined benefit plans based on historical experience and by evaluating input from the trustee managing the plans' assets. Our expected long-term rate of return on plan assets for these plans is based on a target allocation of assets, which is based on our goal of earning the highest rate of return while maintaining risk at acceptable levels. The plans strive to have assets sufficiently diversified so that adverse or unexpected results from one security class will not have an unduly detrimental impact on the entire portfolio. Plan fiduciaries regularly review our actual asset allocation and the pension plans' investments are periodically rebalanced to our targeted allocation when considered appropriate. United's plan assets are allocated within the following guidelines:

	Percent of Total	Expected Long-Term Rate of Return
Equity securities	30-40 %	9.5 %
Fixed-income securities	34-44	5.0
Alternatives	14-27	7.3
Other	0-10	7.0

One-hundred percent of other postretirement plan assets are invested in a deposit administration fund.

Assumed health care cost trend rates have a significant effect on the amounts reported for the other postretirement plans. A 1% change in the assumed health care trend rate for the Company would have the following additional effects (in millions):

	1% Increase	1% Decrease
Effect on total service and interest cost for the year ended December 31, 2016	\$ 13	\$ (11)
Effect on postretirement benefit obligation at December 31, 2016	169	(149)

A one percentage point decrease in the weighted average discount rate would increase the postretirement benefit liability by approximately \$181 million and increase the estimated 2016 benefits expense by approximately \$11 million.

Table of Contents

Fair Value Information. Accounting standards require us to use valuation techniques to measure fair value that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are prioritized as follows:

- Level 1 Unadjusted quoted prices in active markets for assets or liabilities identical to those to be reported at fair value
 Level 2 Other inputs that are observable directly or indirectly, such as quoted prices for similar assets or liabilities or market-corroborated inputs
 Level 3 Unobservable inputs for which there is little or no market data and which require us to develop our own assumptions about how market participants would price the assets or liabilities
- Assets and liabilities measured at fair value are based on the valuation techniques identified in the tables below. The valuation techniques are as follows:

(a) *Market approach.* Prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities; and

(b) *Income approach.* Techniques to convert future amounts to a single current value based on market expectations (including present value techniques, option-pricing and excess earnings models).

The following tables present information about United's pension and other postretirement plan assets at December 31 (in millions):

	2016					2015				
	Total	Level 1	Level 2	Level 3	Assets Measured at NAV(a)	Total	Level 1	Level 2	Level 3	Assets Measured at NAV(a)

-----------------------------	-------	----	----	-------	----	-------	----	----	-------	----

(a) In accordance with the relevant accounting standards, certain investments that are measured at fair value using the NAV per share (or its equivalent) have not been classified in the fair value hierarchy. These investments are commingled funds that invest in fixed-income instruments including bonds, debt securities, and other similar instruments issued by various U.S. and non-U.S. public- or private-sector entities. Redemption periods for these investments range from daily to annually.

Equity and Fixed-Income. Equities include investments in both developed market and emerging market equity securities. Fixed-income includes primarily U.S. and non-U.S. government fixed-income securities and U.S. and non-U.S. corporate fixed-income securities.

Deposit Administration Fund. This investment is a stable value investment product structured to provide investment income.

Alternatives. Alternative investments consist primarily of investments in hedge funds, real estate and private equity interests.

Other investments. Other investments consist of cash, insurance contracts and other funds.

Table of Contents

The reconciliation of United's defined benefit plan assets measured at fair value using unobservable inputs (Level 3) for the years ended December 31, 2016 and 2015 is as follows (in millions):

	2016	2015
Balance at beginning of year	\$ 208	\$ 188
Actual return on plan assets:		
Sold during the year	4	8
Held at year end	3	(1)
Purchases, sales, issuances and settlements (net)	72	13
Balance at end of year	\$ 287	\$ 208

Funding requirements for tax-qualified defined benefit pension plans are determined by government regulations. United's contributions reflected above have satisfied its required contributions through the 2016 calendar year. In 2017, employer anticipated contributions to all of United's pension and postretirement plans are at least \$400 million and approximately \$108 million, respectively.

The estimated future benefit payments, net of expected participant contributions, in United's pension plans and other postretirement benefit plans as of December 31, 2016 are as follows (in millions):

	Pension	Other Postretirement	Other Postretirement subsidy receipts
2017	\$ 303	\$ 112	\$ 6
2018	300	117	6
2019	310	122	7
2020	319	126	7
2021	337	130	8
Years 2022 - 2026	1,782	682	44

Defined Contribution Plans

Depending upon the employee group, employer contributions consist of matching contributions and/or non-elective employer contributions. United's employer contribution percentages vary from 1% to 16% of eligible earnings depending on the terms of each plan. United recorded contributions to its defined contribution plans of \$592 million, \$522 million and \$503 million in the years ended December 31, 2016, 2015 and 2014, respectively.

Table of Contents**Multi-Employer Plans**

United's participation in the IAM National Pension Plan (IAM Plan) for the annual period ended December 31, 2016 is outlined in the table below. There have been no significant changes that affect the comparability 2016 and 2015 contributions. The risks of participating in these multi-employer plans are different from single-employer plans, as United may be subject to additional risks that others do not meet their obligations, which in certain circumstances could revert to United. The IAM Plan reported \$395 million in employers' contributions for the year ended December 31, 2015. For 2015, the Company's contributions to the IAM Plan represented more than 5% of total contributions to the IAM Plan.

Pension Fund	IAM National Pension Fund
EIN/ Pension Plan Number	51-6031295 - 002
Pension Protection Act Zone Status (2016 and 2015)	Green Zone. Plans in the green zone are at least 80 percent funded.
FIP/RP Status Pending/Implemented	No
United's Contributions	\$41 million, \$40 million and \$39 million in the years ended December 31, 2016, 2015 and 2014, respectively
Surcharge Imposed	No
Expiration Date of Collective Bargaining Agreement	N/A

At the date the financial statements were issued, Forms 5500 were not available for the plan year ending in 2016.

Profit Sharing

Substantially all employees participate in profit sharing based on a percentage of pre-tax earnings, excluding special items, profit sharing expense and share-based compensation. Profit sharing percentages range from 5% to 20% depending on the work group, and in some cases profit sharing percentages vary above and below certain pre-tax margin thresholds. Eligible U.S. co-workers in each participating work group receive a profit sharing payout using a formula based on the ratio of each qualified co-worker's annual eligible earnings to the eligible earnings of all qualified co-workers in all domestic work groups. Eligible non-U.S. co-workers receive profit sharing based on the calculation under the U.S. profit sharing plan for management and administrative employees. The Company recorded profit sharing and related payroll tax expense of \$628 million, \$698 million and \$235 million in 2016, 2015 and 2014, respectively. Profit sharing expense is recorded as a component of Salaries and related costs in the Company's statements of consolidated operations.

Table of Contents

NOTE 9 - FAIR VALUE MEASUREMENTS

Fair Value Information. Accounting standards require us to use valuation techniques to measure fair value that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are described in Note 8 of this report. The table below presents disclosures about the fair value of financial assets and liabilities measured at fair value on a recurring basis in the Company's financial statements as of December 31 (in millions):

	2016				2015			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
	UAL							
Cash and cash equivalents	\$ 2,179	\$ 2,179	\$	\$	\$ 3,006	\$ 3,006	\$	\$
Short-term investments:								
Corporate debt	835		835		891		891	
Asset-backed securities	792		792		710		710	
Certificates of deposit placed through an account registry service (CDARS)	246		246		281		281	
U.S. government and agency notes	140		140		72		72	
Auction rate securities					9			9
Other fixed-income securities	54		54		26		26	
Other investments measured at NAV (a)	182				201			
Restricted cash	124	124			206	206		
Enhanced equipment trust certificates (EETC)	23			23	26			26
Fuel derivatives liability, net					124		124	

(a) In accordance with the relevant accounting standards, certain investments that are measured at fair value using the NAV per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statement of financial position. The investments measured using NAV are shares of mutual funds that invest in fixed-income instruments including bonds, debt securities, and other similar instruments issued by various U.S. and non-U.S. public- or private-sector entities. The Company can redeem its shares at any time at NAV subject to a three-day settlement period.

Available-for-sale investment maturities The short-term investments shown in the table above are classified as available-for-sale. As of December 31, 2016, asset-backed securities have remaining maturities of less than one year to approximately 30 years, corporate debt securities have remaining maturities of less than one year to approximately five years and CDARS have maturities of less than one year. U.S. government and other securities have maturities of less than one year to approximately three years. The EETC securities mature in 2019.

Derivative instruments and investments presented in the table above have the same fair value as their carrying value. The table below presents the carrying values and estimated fair values of financial instruments not presented in the tables above as of December 31 (in millions):

Fair Value of Debt by Fair Value Hierarchy Level										
	2016					2015				
	Carrying Amount	Fair Value				Carrying Amount	Fair Value			
		Total	Level 1	Level 2	Level 3		Total	Level 1	Level 2	Level 3
Long-term debt	\$ 10,767	\$ 11,055	\$	\$ 8,184	\$ 2,871	\$ 10,897	\$ 11,371	\$	\$ 8,646	\$ 2,725

Table of Contents

Fair value of the financial instruments included in the tables above was determined as follows:

Description	Fair Value Methodology
<i>Cash and cash equivalents</i>	The carrying amounts approximate fair value because of the short-term maturity of these assets.
<i>Short-term investments and Restricted cash</i>	Fair value is based on (a) the trading prices of the investment or similar instruments, (b) an income approach, which uses valuation techniques to convert future amounts into a single present amount based on current market expectations about those future amounts when observable trading prices are not available, (c) internally-developed models of the expected future cash flows related to the securities, or (d) broker quotes obtained by third-party valuation services.
<i>Fuel derivatives</i>	Derivative contracts are privately negotiated contracts and are not exchange traded. Fair value measurements are estimated with option pricing models that employ observable inputs. Inputs to the valuation models include contractual terms, market prices, yield curves, fuel price curves and measures of volatility, among others.
<i>Debt</i>	Fair values were based on either market prices or the discounted amount of future cash flows using our current incremental rate of borrowing for similar liabilities.

NOTE 10 HEDGING ACTIVITIES

Fuel Derivatives

As of December 31, 2016, the Company did not have any fuel hedging contracts outstanding to hedge its fuel consumption. The last of the Company's fuel hedge derivatives designated for cash flow hedge accounting expired in December 2016. The Company's current strategy is to not enter into transactions to hedge its fuel consumption, although the Company regularly reviews its strategy based on market conditions and other factors.

The Company records each derivative instrument as a derivative asset or liability (on a gross basis) in its consolidated balance sheets, and, accordingly, records any related collateral on a gross basis. The table below presents the fair value amounts of fuel derivative assets and liabilities and the location of amounts recognized in the Company's financial statements.

At December 31, the Company's derivatives were reported in its consolidated balance sheets as follows (in millions):

Classification	Balance Sheet Location	2016	2015
<u>Derivatives designated as cash flow hedges</u>			
<i>Liabilities:</i>			
Fuel contracts due within one year	Fuel derivative instruments	\$	\$ 119
<u>Derivatives not designated for hedge accounting</u>			
<i>Liabilities:</i>			
Fuel contracts due within one year	Fuel derivative instruments	\$	\$ 5
<u>Total derivatives</u>			
Total liabilities		\$	\$ 124

Table of Contents

The following tables present the fuel hedge gains (losses) recognized during the periods presented and their classification in the financial statements (in millions):

Derivatives designated as cash flow hedges

	Amount of Loss Recognized in AOCI on Derivatives (Effective Portion)		Loss Reclassified from AOCI into Income (Fuel Expense) (Effective Portion)		Amount of Loss Recognized in Nonoperating income (expense): Miscellaneous, net (Ineffective Portion)	
	2016	2015	2016	2015	2016	2015
Fuel contracts	\$ (4)	\$ (320)	\$ (217)	\$ (604)	\$	\$

Derivatives not designated for hedge accounting

	Amount of Loss Recognized in Nonoperating income (expense): Miscellaneous, net		
	2016	2015	2014
Fuel contracts	\$	\$ (80)	\$ (462)

Foreign Currency Derivatives

As of December 31, 2016, the Company did not have any foreign currency contracts outstanding to hedge its foreign currency sales. The last of the Company's foreign currency derivatives designated for cash flow hedge accounting expired in December 2016. The Company's current strategy is to not enter into transactions to hedge its foreign currency sales, although the Company regularly reviews its strategy based on market conditions and other factors.

NOTE 11 - DEBT**(In millions)**

	At December 31,	
	2016	2015
<u>Secured</u>		
Notes payable, fixed interest rates of 1.42% to 9.75% (weighted average rate of 4.85% as of December 31, 2016), payable through 2028	\$ 7,586	\$ 7,971
Notes payable, floating interest rates of the London Interbank Offered Rate (LIBOR) plus 0.20% to 2.85%, payable through 2028	1,546	1,302
Term loan, LIBOR subject to a 0.75% floor, plus 2.50%, or alternative rate based on certain market rates plus 1.50%, due 2019	866	875

Other	101	100
	10,891	11,042
Less: unamortized debt discount, premiums and debt issuance costs	(124)	(145)
Less: current portion of long-term debt	(849)	(1,224)

Long-term debt, net	\$ 9,918	\$ 9,673
---------------------	----------	----------

(a) UAL is the issuer of this debt. United is a guarantor.

Table of Contents

The table below presents the Company's contractual principal payments at December 31, 2016 under then-outstanding long-term debt agreements in each of the next five calendar years (in millions):

2017	\$ 849
2018	1,427
2019	1,852
2020	1,007
2021	1,174
After 2021	4,582
	\$ 10,891

As of December 31, 2016, a substantial portion of the Company's assets, principally aircraft, route authorities, airport slots and loyalty program intangible assets, was pledged under various loan and other agreements. As of December 31, 2016, UAL and United were in compliance with their respective debt covenants. Continued compliance depends on many factors, some of which are beyond the Company's control, including the overall industry revenue environment and the level of fuel costs.

Secured debt

2013 Credit and Guaranty Agreement. United and UAL are parties to a Credit and Guaranty Agreement (the "Credit Agreement") as the borrower and guarantor, respectively. The Credit Agreement consists of a \$900 million term loan due April 2019 (of which \$866 million was outstanding as of December 31, 2016) (the "Term Loan due 2019"), a \$500 million term loan due September 2021 (of which \$192 million was outstanding as of December 31, 2016) (the "Term Loan due 2021") and a \$1.35 billion revolving credit facility, with \$1.35 billion being available for drawing until April 2018 and \$1.315 billion being available for drawing until January 2019.

Borrowings under the revolving credit facility of the Credit Agreement bear interest at a variable rate equal to LIBOR plus a margin of 3.0% per annum, or another rate based on certain market interest rates, plus a margin of 2.0% per annum. The principal amount of the term loans must be repaid in consecutive quarterly installments of 0.25% of the original principal amount thereof, with any unpaid balance due, in the case of the Term Loan due 2019, on April 1, 2019 and, in the case of the Term Loan due 2021, on September 15, 2021. United may prepay all or a portion of the term loans from time to time, at par plus accrued and unpaid interest. United pays a commitment fee equal to 0.75% per-annum on the undrawn amount available under the revolving credit facility.

The Term Loan due 2021 ranks pari passu with the Term Loan due 2019 that United originally borrowed under the Credit Agreement. The Credit Agreement requires United to repay the term loans and any other outstanding borrowings under the Credit Agreement at par plus accrued and unpaid interest if certain changes of control of UAL occur.

As of December 31, 2016, United had its entire capacity of \$1.35 billion available under the revolving credit facility of the Company's Credit Agreement.

As of December 31, 2016, United had cash collateralized \$72 million of letters of credit. United also had \$383 million of surety bonds securing various obligations at December 31, 2016. Most of the letters of credit have evergreen clauses and are expected to be renewed on an annual basis and the surety bonds have expiration dates through 2021.

EETCs. United has \$7.5 billion principal amount of equipment notes outstanding issued under EETC financings included in notes payable in the table of outstanding debt above. Generally, the structure of these EETC financings consists of pass-through trusts created by United to issue pass-through certificates, which represent fractional undivided interests in the respective pass-through trusts and are not obligations of United. The proceeds of the issuance of the pass-through certificates are used to purchase equipment notes which are issued

Table of Contents

by United and secured by its aircraft. The payment obligations under the equipment notes are those of United. Proceeds received from the sale of pass-through certificates are initially held by a depository in escrow for the benefit of the certificate holders until United issues equipment notes to the trust, which purchases such notes with a portion of the escrowed funds. These escrowed funds are not guaranteed by United and are not reported as debt on United's consolidated balance sheet because the proceeds held by the depository are not United's assets.

In September 2016 and June 2016, United created separate EETC pass-through trusts, each of which issued pass-through certificates. The proceeds of the issuance of the pass-through certificates are used to purchase equipment notes issued by United and secured by its aircraft. The Company records the debt obligation upon issuance of the equipment notes rather than upon the initial issuance of the pass-through certificates. United expects to receive all proceeds from the September 2016 and June 2016 pass-through trusts by the end of the second quarter of 2017. Certain details of the pass-through trusts with proceeds received from issuance of debt in 2016 are as follows (in millions, except stated interest rate):

EETC Date	Class	Principal	Final expected distribution date	Stated interest rate	Total debt recorded of December 31, 2016	Proceeds received from issuance of debt during 2016	Remaining proceeds from issuance of debt to be received in future periods
September 2016	AA	\$ 637	October 2028	2.875%	\$ 80	\$ 80	\$ 557
September 2016	A	283	October 2028	3.10%	36	36	247
June 2016	AA	729	July 2028	3.10%	410	410	319
June 2016	A	324	July 2028	3.45%	182	182	142
		\$ 1,973			\$ 708	\$ 708	\$ 1,265

In 2016, United borrowed approximately \$369 million aggregate principal amount from various financial institutions to finance the purchase of several aircraft delivered in 2016. The notes evidencing these borrowings, which are secured by the related aircraft, have maturity dates ranging from 2026 to 2028 and have interest rates comprised of the LIBOR plus a specified margin.

Unsecured debt

5% Senior Notes due 2024. In January 2017, United issued \$300 million aggregate principal amount of 5% Senior Notes due February 1, 2024 (the "5% Senior Notes due 2024"). These notes are fully and unconditionally guaranteed and recorded by United on its balance sheet as debt. The indenture for the 5% Senior Notes due 2024 requires UAL to offer to repurchase the notes for cash if certain changes of control of UAL occur at a purchase price equal to 101% of the principal amount of notes repurchased plus accrued and unpaid interest.

Table of Contents

The collateral, covenants and cross default provisions of the Company's principal debt instruments that contain such provisions are summarized in the table below:

Debt Instrument

Various equipment notes and other notes payable

Credit Agreement

Collateral, Covenants and Cross Default Provisions

Secured by certain aircraft. The indentures contain events of default that are customary for aircraft financing, including in certain cases cross default to other related aircraft.

Secured by certain of United's international route authorities, specified take-off and landing slots at certain airports and certain other assets.

The Credit Agreement requires the Company to maintain at least \$3.0 billion of unrestricted liquidity at all times, which includes unrestricted cash, short-term investments and any undrawn amounts under any revolving credit facility, and to maintain a minimum ratio of appraised value of collateral to the outstanding obligations under the Credit Agreement of 1.67 to 1.0 at all times. The Credit Agreement contains covenants that, among other things, restrict the ability of UAL and its restricted subsidiaries (as defined in the Credit Agreement) to incur additional indebtedness and to pay dividends on or repurchase stock, although the Company currently has ample ability under these restrictions to repurchase stock under the Company's share repurchase program.

The Credit Agreement contains events of default customary for this type of financing, including a cross default and cross acceleration provision to certain other material indebtedness of the Company.

6.375% Senior Notes due 2018

6% Senior Notes due 2020

The indentures for these notes contain covenants that, among other things, restrict the ability of the Company and its restricted subsidiaries (as defined in the indenture) to incur additional indebtedness and pay dividends on or repurchase stock, although the Company currently has ample ability under these restrictions to repurchase stock under the Company's share repurchase program.

5% Senior Notes due 2024

NOTE 12 - ADVANCED PURCHASE OF MILES

United previously sold MileagePlus miles to Chase which United recorded as Advanced purchase of miles. The remaining balance of pre-purchased miles is eligible to be allocated by Chase to MileagePlus members' accounts in 2017. The Company has recorded these amounts as Advanced purchase of miles in the liabilities section of the Company's consolidated balance sheets. The Co-Brand Agreement contains termination penalties that may require United to make certain payments and repurchase outstanding pre-purchased miles in cases such as United's insolvency, bankruptcy or other material breaches.

Table of Contents

NOTE 13 - LEASES AND CAPACITY PURCHASE AGREEMENTS

United leases aircraft, airport passenger terminal space, aircraft hangars and related maintenance facilities, cargo terminals, other airport facilities, other commercial real estate, office and computer equipment and vehicles.

At December 31, 2016, United's scheduled future minimum lease payments under operating leases having initial or remaining noncancelable lease terms of more than one year, aircraft leases, including aircraft rent under CPAs and capital leases (substantially all of which are for aircraft) were as follows (in millions):

	Capital Leases	Facility and Other Operating Leases	Aircraft Operating Leases
2017	\$ 183	\$ 1,256	\$ 1,271
2018	170	1,106	1,074
2019	105	991	894
2020	85	1,104	669
2021	84	888	551
After 2021	915	6,702	2,049
Minimum lease payments	\$ 1,542	\$ 12,047	\$ 6,508
Imputed interest	(604)		
Present value of minimum lease payments	938		
Current portion	(116)		
Long-term obligations under capital leases	\$ 822		

As of December 31, 2016, United's aircraft capital lease minimum payments relate to leases of 38 mainline and 29 regional aircraft as well as to leases of nonaircraft assets. Imputed interest rate ranges are 3.5% to 20.8%.

Aircraft operating leases have initial terms of five to 26 years, with expiration dates ranging from 2017 through 2028. Under the terms of most leases, United has the right to purchase the aircraft at the end of the lease term, in some cases at fair market value, and in others, at fair market value or a percentage of cost. United has facility operating leases that extend to 2041.

During 2015, the Company reached an agreement with AerCap Holdings N.V., a major aircraft leasing company, to lease used Airbus S.A.S (Airbus) A319s. Five such aircraft are expected to be delivered in 2017. In addition, up to 14 more aircraft may be delivered over the next four years subject to certain conditions.

United is the lessee of real property under long-term operating leases at a number of airports where we are also the guarantor of approximately \$1.4 billion of underlying debt and interest thereon as of December 31, 2016. These leases are typically with municipalities or other governmental entities, which are excluded from the consolidation requirements concerning a variable interest entity (VIE). To the extent United's leases and related guarantees are with a separate legal entity other than a governmental entity, United is not the primary beneficiary because the lease terms are consistent with market terms at the inception of the lease and the lease does not include a residual value guarantee, fixed-price purchase option, or similar feature.

In 2016, United signed a seven year lease extension through 2024 with the Metropolitan Washington Airports Authority to continue its use of terminals at Washington Dulles International Airport.

United's nonaircraft rent expense was approximately \$1.2 billion, \$1.3 billion and \$1.4 billion for the years ended December 31, 2016, 2015 and 2014, respectively.

Edgar Filing: United Continental Holdings, Inc. - Form 10-K

In addition to nonaircraft rent and aircraft rent, which is separately presented in the consolidated statements of operations, United had aircraft rent related to regional aircraft operating leases, which is included as part of Regional capacity purchase expense in United's consolidated statement of operations, of \$439 million, \$461 million and \$442 million for the years ended December 31, 2016, 2015 and 2014, respectively.

Table of Contents

In connection with UAL Corporation's and United Air Lines, Inc.'s fresh-start reporting requirements upon their exit from Chapter 11 bankruptcy protection in 2006 and the Company's acquisition accounting adjustments related to the Company's merger transaction in 2010, lease valuation adjustments for operating leases were initially recorded in the consolidated balance sheet, representing the net present value of the differences between contractual lease rates and the fair market lease rates for similar leased assets at the time. An asset (liability) results when the contractual lease rates are more (less) favorable than market lease terms at the valuation date. The lease valuation adjustment is amortized on a straight-line basis as an increase (decrease) to rent expense over the individual applicable remaining lease terms, resulting in recognition of rent expense as if United had entered into the leases at market rates. The related remaining lease terms, primarily related to aircraft which make up the majority of the fair value lease adjustment balance, are one to eight years for United. The lease valuation adjustments are classified within other noncurrent liabilities and the net accretion amounts are \$82 million, \$107 million and \$160 million for the years ended December 31, 2016, 2015 and 2014, respectively.

Regional CPAs

United has CPAs with certain regional carriers. We purchase all of the capacity from the flights covered by the CPA at a negotiated price. We pay the regional carrier a predetermined rate, subject to annual inflation adjustments, primarily for block hours flown (the hours from gate departure to gate arrival) and other operating factors and reimburse the regional carrier for various pass-through expenses related to the flights. Under the CPAs, we are responsible for the cost of providing fuel for all flights and for paying aircraft rent for all of the aircraft covered by the CPAs. Generally, the CPAs contain incentive bonus and rebate provisions based upon each regional carrier's operational performance. United's CPAs are for 494 regional aircraft, and the CPAs have terms expiring through 2029. Aircraft operated under CPAs include aircraft leased directly from the regional carriers and those owned by United or leased from third-party lessors and operated by the regional carriers. See Part I, Item 2, "Properties" of this report for additional information.

In 2016 and 2015, Republic Airline Inc. ("Republic"), a wholly-owned subsidiary of Republic Airways Holdings ("Republic Airways"), purchased and took delivery of 16 new 76-seat Embraer S.A. ("Embraer") E175 aircraft, and placed these aircraft into service under the United Express brand. Subsequent to the Chapter 11 bankruptcy filing by Republic Airways and certain of its subsidiaries in the first quarter of 2016, United entered into amendments to its CPA with Republic in 2016 for Republic to operate a total of 28 Embraer E175 aircraft, 16 of which were delivered as previously described and 12 of which remain to be delivered in 2017. In connection with the amended CPA, United will own the 12 remaining Embraer E175 aircraft.

In 2016, United agreed to purchase 12 new Embraer E175 aircraft that were previously expected to be purchased by one of its United Express operators, and in the first quarter of 2017, United entered into a CPA amendment with Mesa Air Group, Inc. ("Mesa Air Group") and Mesa Airlines, Inc. ("Mesa"), a wholly-owned subsidiary of Mesa Air Group, for Mesa to operate these 12 additional Embraer E175 aircraft under the United Express brand. As of December 31, 2016, all 12 of these aircraft are expected to be delivered in 2017.

In 2015, United entered into amendments to the CPA with SkyWest Airlines, Inc. ("SkyWest"), a wholly-owned subsidiary of SkyWest, Inc., to operate an additional 25 new 76-seat Embraer E175 aircraft under the United Express brand. SkyWest purchased all of these 76-seat aircraft directly from the manufacturer with seven deliveries remaining in 2017.

In 2015, United entered into a new CPA with Champlain Enterprises, LLC d/b/a CommutAir ("CommutAir"), pursuant to which CommutAir will operate 40 used Embraer ERJ145 aircraft under the United Express brand that are currently being operated by a different United Express regional carrier, with transfers that are continuing through 2018. As of December 31, 2016, 28 aircraft are still pending transfer.

Our future commitments under our CPAs are dependent on numerous variables, and are therefore difficult to predict. The most important of these variables is the number of scheduled block hours. Although we are not required to purchase a minimum number of block hours under certain of our CPAs, we have set forth below estimates of our future payments under the CPAs based on our assumptions. United's estimates of its future

Table of Contents

payments under all of the CPAs do not include the portion of the underlying obligation for any aircraft leased to a regional carrier or deemed to be leased from other regional carriers and facility rent that are disclosed as part of aircraft and nonaircraft operating leases. For purposes of calculating these estimates, we have assumed (1) the number of block hours flown is based on our anticipated level of flight activity or at any contractual minimum utilization levels if applicable, whichever is higher, (2) that we will reduce the fleet as rapidly as contractually allowed under each CPA, (3) that aircraft utilization, stage length and load factors will remain constant, (4) that each carrier's operational performance will remain at historic levels and (5) an annual projected inflation rate. These amounts exclude variable pass-through costs such as fuel and landing fees, among others. Based on these assumptions as of December 31, 2016, our future payments through the end of the terms of our CPAs are presented in the table below (in billions):

2017	\$	1.9
2018		1.9
2019		1.3
2020		1.0
2021		1.0
After 2021		4.3
	\$	11.4

The actual amounts we pay to our regional operators under CPAs could differ materially from these estimates. For example, a 10% increase or decrease in scheduled block hours for all of United's regional operators (whether as a result of changes in average daily utilization or otherwise) in 2017 would result in a corresponding change in annual cash obligations under the CPAs of approximately \$147 million.

NOTE 14 - VARIABLE INTEREST ENTITIES

Variable interests are contractual, ownership or other monetary interests in an entity that change with fluctuations in the fair value of the entity's net assets exclusive of variable interests. A VIE can arise from items such as lease agreements, loan arrangements, guarantees or service contracts. An entity is a VIE if (a) the entity lacks sufficient equity or (b) the entity's equity holders lack power or the obligation and right as equity holders to absorb the entity's expected losses or to receive its expected residual returns. Therefore, if the equity owners as a group do not have the power to direct the entity's activities that most significantly impact its economic performance, the entity is a VIE.

If an entity is determined to be a VIE, the entity must be consolidated by the primary beneficiary. The primary beneficiary is the holder of the variable interests that has the power to direct the activities of a VIE that (i) most significantly impact the VIE's economic performance and (ii) has the obligation to absorb losses of or the right to receive benefits from the VIE that could potentially be significant to the VIE. Therefore, the Company must identify which activities most significantly impact the VIE's economic performance and determine whether it, or another party, has the power to direct those activities.

The Company's evaluation of its association with VIEs is described below:

Aircraft Leases. We are the lessee in a number of operating leases covering the majority of our leased aircraft. The lessors are trusts established specifically to purchase, finance and lease aircraft to us. These leasing entities meet the criteria for VIEs. We are generally not the primary beneficiary of the leasing entities if the lease terms are consistent with market terms at the inception of the lease and do not include a residual value guarantee, fixed-price purchase option or similar feature that obligates us to absorb decreases in value or entitles us to participate in increases in the value of the aircraft. This is the case for many of our operating leases; however, leases of 37 mainline jet aircraft contain a fixed-price purchase option that allow United to purchase the aircraft at predetermined prices on specified dates during the lease term. Additionally, leases covering 192 leased

Table of Contents

regional jet aircraft contain an option to purchase the aircraft at the end of the lease term at prices that, depending on market conditions, could be below fair value. United has not consolidated the related trusts because, even taking into consideration these purchase options, United is still not the primary beneficiary. United's maximum exposure under these leases is the remaining lease payments, which are reflected in future lease commitments in Note 13 of this report.

EETCs. United evaluated whether the pass-through trusts formed for its EETC financings, treated as either debt or aircraft operating leases, are VIEs required to be consolidated by United under applicable accounting guidance, and determined that the pass-through trusts are VIEs. Based on United's analysis as described below, United determined that it does not have a variable interest in the pass-through trusts.

The primary risk of the pass-through trusts is credit risk (i.e. the risk that United, the issuer of the equipment notes, may be unable to make its principal and interest payments). The primary purpose of the pass-through trust structure is to enhance the credit worthiness of United's debt obligation through certain bankruptcy protection provisions, a liquidity facility (in certain of the EETC structures) and improved loan-to-value ratios for more senior debt classes. These credit enhancements lower United's total borrowing cost. Pass-through trusts are established to receive principal and interest payments on the equipment notes purchased by the pass-through trusts from United and remit these proceeds to the pass-through trusts' certificate holders.

United does not invest in or obtain a financial interest in the pass-through trusts. Rather, United has an obligation to make interest and principal payments on its equipment notes held by the pass-through trusts. United did not intend to have any voting or non-voting equity interest in the pass-through trusts or to absorb variability from the pass-through trusts. Based on this analysis, the Company determined that it is not required to consolidate the pass-through trusts.

NOTE 15 - COMMITMENTS AND CONTINGENCIES

Commitments. As of December 31, 2016, United had firm commitments and options to purchase aircraft from The Boeing Company (Boeing), Embraer and Airbus presented in the table below:

Aircraft Type	Number of Firm Commitments (a)
Airbus A350-1000	35
Boeing 737NG/737MAX	165
Boeing 777-300ER	12
Boeing 787-8/-9/-10	21
Embraer E175	24

(a) United also has options and purchase rights for additional aircraft.

The aircraft listed in the table above are scheduled for delivery from 2017 through 2027. To the extent the Company and the aircraft manufacturers with whom the Company has existing orders for new aircraft agree to modify the contracts governing those orders, the amount and timing of the Company's future capital commitments could change.

Table of Contents

The table below summarizes United's commitments as of December 31, 2016, which primarily relate to the acquisition of aircraft and related spare engines, aircraft improvements and include other capital purchase commitments for the years ended December 31 (in billions). Any new firm aircraft orders, including through the exercise of purchase options and purchase rights, will increase the total future capital commitments of the Company.

2017	\$	4.5
2018		3.2
2019		3.1
2020		2.5
2021		2.2
After 2021		7.8
	\$	23.3

In the first quarter of 2017, the Company announced that it will retire its fleet of Boeing 747 aircraft from scheduled service by the end of 2017. The Company does not expect there to be a material impact to depreciation and amortization expense.

As of December 31, 2016, United had \$1.3 billion in financing available through EETC transactions for the financing of all of its aircraft deliveries scheduled in the first half of 2017. See Note 11 of this report for additional information on aircraft financing. The Company has also secured backstop financing commitments from certain of its aircraft manufacturers for a limited number of its future aircraft deliveries, subject to certain customary conditions. Financing may be necessary to satisfy the Company's capital commitments for its firm order aircraft and other related capital expenditures.

Legal and Environmental. The Company has certain contingencies resulting from litigation and claims incident to the ordinary course of business. As of December 31, 2016, management believes, after considering a number of factors, including (but not limited to) the information currently available, the views of legal counsel, the nature of contingencies to which the Company is subject and prior experience, that the ultimate disposition of the litigation and claims will not materially affect the Company's consolidated financial position or results of operations. The Company records liabilities for legal and environmental claims when a loss is probable and reasonably estimable. These amounts are recorded based on the Company's assessments of the likelihood of their eventual disposition.

Guarantees and Indemnifications. In the normal course of business, the Company enters into numerous real estate leasing and aircraft financing arrangements that have various guarantees included in the contracts. These guarantees are primarily in the form of indemnities under which the Company typically indemnifies the lessors and any tax/financing parties against tort liabilities that arise out of the use, occupancy, operation or maintenance of the leased premises or financed aircraft. Currently, the Company believes that any future payments required under these guarantees or indemnities would be immaterial, as most tort liabilities and related indemnities are covered by insurance (subject to deductibles). Additionally, certain leased premises such as fueling stations or storage facilities include indemnities of such parties for any environmental liability that may arise out of or relate to the use of the leased premises.

As of December 31, 2016, United is the guarantor of approximately \$1.9 billion in aggregate principal amount of tax-exempt special facilities revenue bonds and interest thereon. These bonds, issued by various airport municipalities, are payable solely from rentals paid under long-term agreements with the respective governing bodies. The leasing arrangements associated with \$1.4 billion of these obligations are accounted for as operating leases with the associated expense recorded on a straight-line basis resulting in ratable accrual of the lease obligation over the expected lease term. These tax-exempt special facilities revenue bonds are included in our lease commitments disclosed in Note 13 of this report. The leasing arrangements associated with \$400 million of these obligations are accounted for as capital leases. All of these bonds are due between 2017 and 2038.

Table of Contents

In United's financing transactions that include loans, United typically agrees to reimburse lenders for any reduced returns with respect to the loans due to any change in capital requirements and, in the case of loans in which the interest rate is based on LIBOR, for certain other increased costs that the lenders incur in carrying these loans as a result of any change in law, subject, in most cases, to obligations of the lenders to take certain limited steps to mitigate the requirement for, or the amount of, such increased costs. At December 31, 2016, the Company had \$2.6 billion of floating rate debt and \$90 million of fixed rate debt, with remaining terms of up to 12 years, that are subject to these increased cost provisions. In several financing transactions involving loans or leases from non-U.S. entities, with remaining terms of up to 12 years and an aggregate balance of \$2.6 billion, the Company bears the risk of any change in tax laws that would subject loan or lease payments thereunder to non-U.S. entities to withholding taxes, subject to customary exclusions.

As of December 31, 2016, United is the guarantor of \$168 million of aircraft mortgage debt issued by one of United's regional carriers. The aircraft mortgage debt is subject to similar increased cost provisions as described above for the Company's debt and the Company would potentially be responsible for those costs under the guarantees.

Fuel Consortia. United participates in numerous fuel consortia with other air carriers at major airports to reduce the costs of fuel distribution and storage. Interline agreements govern the rights and responsibilities of the consortia members and provide for the allocation of the overall costs to operate the consortia based on usage. The consortia (and in limited cases, the participating carriers) have entered into long-term agreements to lease certain airport fuel storage and distribution facilities that are typically financed through tax-exempt bonds (either special facilities lease revenue bonds or general airport revenue bonds), issued by various local municipalities. In general, each consortium lease agreement requires the consortium to make lease payments in amounts sufficient to pay the maturing principal and interest payments on the bonds. As of December 31, 2016, approximately \$1.5 billion principal amount of such bonds were secured by significant fuel facility leases in which United participates, as to which United and each of the signatory airlines has provided indirect guarantees of the debt. As of December 31, 2016, the Company's contingent exposure was approximately \$234 million principal amount of such bonds based on its recent consortia participation. The Company's contingent exposure could increase if the participation of other air carriers decreases. The guarantees will expire when the tax-exempt bonds are paid in full, which ranges from 2017 to 2049. The Company did not record a liability at the time these indirect guarantees were made.

Regional Capacity Purchase. As of December 31, 2016, United had 223 call options to purchase regional jet aircraft being operated by certain regional carriers. At December 31, 2016, none of the call options were exercisable because none of the required conditions to make an option exercisable by United was met.

Credit Card Processing Agreements. The Company has agreements with financial institutions that process customer credit card transactions for the sale of air travel and other services. Under certain of the Company's credit card processing agreements, the financial institutions in certain circumstances have the right to require that the Company maintain a reserve equal to a portion of advance ticket sales that has been processed by that financial institution, but for which the Company has not yet provided the air transportation. Such financial institutions may require additional cash or other collateral reserves to be established or additional withholding of payments related to receivables collected if the Company does not maintain certain minimum levels of unrestricted cash, cash equivalents and short-term investments (collectively, "Unrestricted Liquidity"). The Company's current level of Unrestricted Liquidity is substantially in excess of these minimum levels.

Labor Negotiations. As of December 31, 2016, United, including its subsidiaries, had approximately 88,000 employees. Approximately 80% of United's employees were represented by various U.S. labor organizations as of December 31, 2016. In January 2016, United's pilots, represented by the Air Line Pilots Association, International ("ALPA"), agreed to extend their contract through January 31, 2019. In March 2016, the Company's dispatchers, represented by the Professional Airline Flight Control Association, agreed to extend their current contract through 2021. In April 2016, the fleet service, passenger service, storekeeper and other employees represented by the International Association of Machinists and Aerospace Workers ("IAM") ratified seven new contracts with the Company which extended the contracts through 2021. In August 2016, United's

Table of Contents

flight attendants, represented by the AFA, ratified a five-year joint collective bargaining agreement through 2021. In December 2016, the technicians and related employees, represented by the IBT, ratified a six-year joint collective bargaining agreement which extended the contract through 2022. The agreements with ALPA and IBT contain provisions that require the Company to align contract terms with other airlines workgroups under certain conditions.

NOTE 16 - SPECIAL ITEMS

Special items classified as special charges in the statements of consolidated operations consisted of the following for the years ended December 31 (in millions):

<u>Operating:</u>	2016	2015	2014
Impairment of assets	\$ 412	\$ 79	\$ 49
Cleveland airport lease restructuring	74		
Labor agreement costs	64	18	
Severance and benefit costs	37	107	199
(Gains) losses on sale of assets and other special charges	51
