(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the quarterly period ended September 30, 2018

Or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the transition period from _____ to _____.

Commission File Number 001-33092

LEMAITRE VASCULAR, INC.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

04-2825458
(I.R.S. Employer
Identification No.)

63 Second Avenue, Burlington, Massachusetts
(Address of principal executive offices)
(781) 221-2266

01803
(Zip Code)

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of large accelerated filer, accelerated filer, smaller reporting company and emerging growth Company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Emerging growth company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The registrant had 19,582,075 shares of common stock, \$.01 par value per share, outstanding as of October 30, 2018.

LeMaitre Vascular, Inc.

Notes to Consolidated Financial Statements

September 30, 2018

(unaudited)

1. Organization and Basis for Presentation

Description of Business

Unless the context requires otherwise, references to LeMaitre Vascular, we, our, and us refer to LeMaitre Vascular, Inc. and our subsidiaries. We develop, manufacture, and market medical devices and implants used primarily in the field of vascular surgery. We also derive revenues from the processing and cryopreservation of human tissues for implantation into patients. We operate in a single segment in which our principal product lines include the following: anastomotic clips, angioscopes, balloon catheters, biologic vascular grafts, biologic vascular patches, carotid shunts, powered phlebectomy devices, radiopaque marking tape, remote endarterectomy devices, synthetic vascular grafts, and valvulotomes. Our offices are located in Burlington, Massachusetts; Fox River Grove, Illinois; Vaughan, Canada; Sulzbach, Germany; Milan, Italy; Madrid, Spain; North Melbourne, Australia; Tokyo, Japan; and Shanghai, China.

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments, consisting only of normal, recurring adjustments considered necessary for a fair presentation of the results of these interim periods have been included. Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Actual results may differ from these estimates. Our estimates and assumptions, including those related to bad debts, inventories, intangible assets, sales returns and discounts, share-based compensation, and income taxes are updated as appropriate. The results for the nine months ended September 30, 2018 are not necessarily indicative of results to be expected for the entire year. The information contained in these interim financial statements should be read in conjunction with our audited consolidated financial statements as of and for the year ended December 31, 2017, including the notes thereto, included in our Form 10-K filed with the Securities and Exchange Commission (SEC) on March 9, 2018.

Consolidation

Our consolidated financial statements include the accounts of LeMaitre Vascular and the accounts of our wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

Revenue Recognition

Our revenue is derived primarily from the sale of disposable or implantable devices used during vascular surgery. We sell primarily directly to hospitals, and to a lesser extent to distributors. We also occasionally enter into consigned inventory arrangements with either hospitals or distributors on a limited basis. Following our acquisition of the

RestoreFlow allograft business, we also derive revenues from human tissue cryopreservation services. These service revenues are recognized when services have been provided and the tissue has been shipped to the customer, provided all other revenue recognition criteria discussed below have been met.

On January 1, 2018 we adopted the provisions of ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)*. We used the modified retrospective method of adoption under which the comparative information was not restated and will continue to be reported under the standard in effect for those periods. The adoption of this standard was not material to our financial statements and there was no cumulative effect adjustment to the opening balance of retained earnings required. The core principle of Topic 606 is that an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The standard explains that to achieve the core principle, an entity should take the following actions:

Step 1: Identify the contract with a customer

Step 2: Identify the performance obligations in the contract

Step 3: Determine the transaction price

Step 4: Allocate the transaction price

Step 5: Recognize revenue when or as the entity satisfies a performance obligation

Table of Contents

Revenue is recognized when or as a company satisfies a performance obligation by transferring a promised good or service to a customer (which is when the customer obtains control of that good or service).

We generally reference customer purchase orders to determine the existence of a contract. Orders that are not accompanied by a purchase order are confirmed with the customer either in writing or verbally. The purchase orders or similar correspondence, once accepted, identify the performance obligations as well as the transaction price, and otherwise outline the rights and obligations of each party. We allocate the transaction price of each contract among the performance obligations in accordance with the pricing of each item specified on the purchase order, which is in turn based on standalone selling prices per our published price lists. In cases where we discount products or provide certain items free of charge, we allocate the discount proportionately to all performance obligations, unless it can be demonstrated that the discount should be allocated entirely to one or more, but not all, of the performance obligations.

We recognize revenue, net of allowances for returns and discounts, fees paid to group purchasing organizations, and any sales and value added taxes required to be invoiced, which we have elected to exclude from the measurement of the transaction price as allowed by the standard, at the time of shipment (taking into consideration contractual shipping terms), or in the case of consigned inventory, when it is consumed. Shipment is the point at which control of the product and title passes to our customers, and at which LeMaitre has a present right to receive payment for the goods. Our shipping and handling activities generally occur prior to the customer taking control of the goods, but in instances where part of these services occurs after the customer gains control, we have made a policy election as allowed under the standard to account for them as activities to fulfill the promise to transfer the goods as opposed to a performance obligation.

Below is a disaggregation of our revenue by major geographic area, which is among the primary categorizations used by management in evaluating financial performance, for the periods indicated (in thousands):

	Nine months ended September 30,	
	2018	2017
Americas	\$ 46,885	\$ 46,510
Europe, Middle East and Africa	25,685	23,660
Asia/Pacific Rim	4,609	4,544
Total	\$ 77,179	\$ 74,714

Except as discussed in Note 6, we do not carry any contract assets or contract liabilities, as there are generally no unbilled amounts due from customers under contracts for which we have partially satisfied performance obligations, or amounts received from customers for which we have not satisfied performance obligations. We satisfy our performance obligations under revenue contracts within a very short time period from receipt of the orders, and payments from customers are typically received within 30 to 60 days of fulfillment of the orders, except in certain geographies such as Spain and Italy where the payment cycle is customarily longer. Accordingly, there is no significant financing component to our revenue contracts. Additionally, we have elected as a policy that incremental costs (such as commissions) incurred to obtain contracts are expensed as incurred, due to the short-term nature of the contracts.

Customers returning products may be entitled to full or partial credit based on the condition and timing of the return. To be accepted, a returned product must be unopened (if sterile), unadulterated, and undamaged, must have at least 18

months remaining prior to its expiration date, or twelve months for our hospital customers in Europe, and generally be returned within 30 days of shipment. These return policies apply to sales to both hospitals and distributors. The amount of products returned to us, either for exchange or credit, has not been material. Nevertheless, we provide for an allowance for future sales returns based on historical return experience, which requires judgment. Our cost of replacing defective products has not been material and is accounted for at the time of replacement.

Recent Accounting Pronouncements

In August 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2018-15, *Intangibles Goodwill and Other Internal-Use Software (Subtopic 350-40)*, which aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal-use software license). The new standard is effective for us beginning January 1, 2020, with early adoption permitted. The adoption of this standard is not expected to have a material impact on our financial statements.

Table of Contents

In August 2018, the FASB issued ASU 2018-13 Fair Value Measurement (Topic 820), which modifies the disclosure requirements for fair value measurements. The new standard is effective for us beginning January 1, 2020, with early adoption permitted. The adoption of this standard is not expected to have a material impact on our financial statements.

In February 2018, the FASB issued ASU 2018-02, *Income Statement Reporting Other Comprehensive Income (Topic 220)*, which allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act. Consequently, the amendments eliminate the stranded tax effects resulting from the Tax Cuts and Jobs Act and is expected to improve the usefulness of information reported to financial statement users. However, because the amendments only relate to the reclassification of the income tax effects of the Tax Cuts and Jobs Act, the underlying guidance that requires that the effect of a change in tax laws or rates be included in income from continuing operations is not affected. The amendments in this ASU also require certain disclosures about stranded tax effects. The new standard is effective for us beginning January 1, 2019, with early adoption permitted. The adoption of this standard is not expected to have a material impact on our financial statements.

In January 2017, the FASB issued ASU 2017-04, which, among other provisions, eliminates step 2 from the goodwill impairment test. The annual, or interim, goodwill impairment test will be performed by comparing the fair value of a reporting unit with its carrying amount. An impairment charge should be recognized for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The new standard is effective for us beginning January 1, 2020, with early adoption permitted. The adoption of this standard is not expected to have a material impact on our financial statements.

In February 2016, the FASB issued its new lease accounting guidance in ASU No. 2016-02, *Leases (Topic 842)*, subsequently amended by ASU 2018-11, *Leases (Topic 842): Targeted Improvements*. Under the new guidance, lessees will be required to recognize the following for all leases (with the exception of short-term leases) at the commencement date: a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Lessees will no longer be provided with a source of off-balance sheet financing. The new lease guidance also simplifies the accounting for sale and leaseback transactions primarily because lessees must recognize lease assets and lease liabilities. The standard is effective for public companies for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years (i.e., January 1, 2019, for a calendar year entity). Early application is permitted. Entities have the option of using either a modified retrospective approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, or else a transition option (which we currently expect to use) allowing lessees to not apply the new lease standard in comparative periods but instead recognize a cumulative-effect adjustment to retained earnings as of the date of adoption. The modified retrospective approach would not require any transition accounting for leases that expired before the earliest comparative period presented. Lessees and lessors may not apply a full retrospective transition approach. Our assessment of the impact of adopting this standard is underway, including cataloging all of our leases, performing a preliminary analysis of the amounts of lease liabilities and right-of-use assets to be recorded and reviewing potential changes to our disclosures on leases. Based on this preliminary assessment we do not expect the adoption of this standard to have a significant impact on our consolidated statement of operations. However, we expect that the recognition of right-of-use assets and corresponding lease liabilities will have a significant impact on our consolidated balance sheet.

2. Income Tax Expense

As part of the process of preparing our consolidated financial statements we are required to determine our income taxes in each of the jurisdictions in which we operate. This process involves estimating our actual current tax expense together with assessing temporary differences resulting from recognition of items for income tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included within our consolidated balance sheet. We must then assess the likelihood that our deferred tax assets will be recovered from taxable income during the carryback period or in the future; and to the extent we believe that recovery is not more likely than not, we must establish a valuation allowance. To the extent we establish a valuation allowance or increase this allowance in a period, we must reflect this increase as an expense within the tax provision in the statement of operations. We do not provide for income taxes on undistributed earnings of foreign subsidiaries, as our intention is to permanently reinvest these earnings.

The Tax Cut and Jobs Act of 2017 (the Tax Act) changed many aspects of U.S. corporate income taxation and included a reduction of the corporate income tax rate from 35% to 21%, implementation of a territorial tax system, and imposition of a tax on deemed repatriated earnings of foreign subsidiaries (the Transition Tax). We estimated the impact of the Tax Act in our financial statements as of December 31, 2017. We recorded \$0.6 million in tax expense related to the Transition Tax and recognized \$1.0 million in tax benefit related to the remeasurement of deferred taxes to the 21% tax rate. We timely filed our 2017 U.S. tax return with immaterial adjustments to the estimated tax provision recorded as of December 31, 2017.

Table of Contents

We recognize, measure, present and disclose in our financial statements any uncertain tax positions that we have taken, or expect to take on a tax return. We operate in multiple taxing jurisdictions, both within and without the United States, and may be subject to audits from various tax authorities. Management's judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities, liabilities for uncertain tax positions, and any valuation allowance recorded against our net deferred tax assets. We will monitor the realizability of our deferred tax assets and adjust the valuation allowance accordingly.

Our policy is to classify interest and penalties related to unrecognized tax benefits as income tax expense.

Our 2018 income tax expense varies from the statutory rate mainly due to the generation of federal and state tax credits, permanent items, and different statutory rates from our foreign subsidiaries. Additionally, in the second quarter of 2018, we recognized certain discrete items primarily related to the exercise of stock options. Our 2017 income tax expense varied from the statutory rate mainly due to federal and state tax credits, permanent items, different statutory rates from our foreign entities, and discrete stock option exercises.

We have reviewed the tax positions taken, or to be taken, in our tax returns for all tax years currently open to examination by a taxing authority. As of September 30, 2018, the gross amount of unrecognized tax benefits exclusive of interest and penalties was \$584,000. We remain subject to examination until the statute of limitations expires for each respective tax jurisdiction. The statute of limitations will be open with respect to these tax positions until 2025. A reconciliation of beginning and ending amount of our unrecognized tax benefits is as follows:

	Nine months ended September 30, 2018
	(in thousands)
Unrecognized tax benefits as of December 31, 2017	\$ 525
Additions for tax positions of current year	61
Additions for tax positions of prior years	(2)
Reductions for settlements with taxing authorities	
Reductions for lapses of the applicable statutes of limitations	
Unrecognized tax benefits as of September 30,	\$ 584

As of September 30, 2018, a summary of the tax years that remain subject to examination in our taxing jurisdictions is as follows:

United States	2015 and forward
Foreign	2011 and forward

3. Inventories and Other Deferred Costs

Inventories and other deferred costs consist of the following:

	September 30, 2018	December 31, 2017
	(in thousands)	
Raw materials	\$ 3,830	\$ 3,200
Work-in-process	3,907	3,745
Finished products	14,714	12,278
Other deferred costs	1,425	1,823
Total inventory and other deferred costs	\$ 23,876	\$ 21,046

We had inventory on consignment of \$1.4 million at both September 30, 2018 and December 31, 2017.

Other deferred costs relate to our RestoreFlow allograft offering and include costs incurred for the preservation of human vascular tissues available for shipment, tissues currently in active processing, and tissues held in quarantine pending release to implantable status. By federal law, human tissues cannot be bought or sold. Therefore, the vascular tissues we preserve are not held as inventory, and the costs we incur to procure and process them are instead accumulated and deferred. These costs include fixed and

Table of Contents

variable overhead costs associated with the cryopreservation process, including primarily direct labor costs, tissue recovery fees, inbound freight charges, indirect materials and facilities costs. General and administrative expenses and selling expenses associated with the provision of these services are expensed as incurred.

4. Acquisitions and Divestitures

Acquisitions are accounted for using the acquisition method, and the acquired companies' results have been included in the accompanying consolidated financial statements from their respective dates of acquisition. In each case for the acquisitions disclosed below, pro forma information assuming the acquisition had occurred at the beginning of the earliest period presented is not included, as the impact is immaterial.

Our acquisitions have historically been made at prices above the fair value of the acquired identifiable assets, resulting in goodwill, due to expectations of synergies that will be realized by combining businesses. These synergies include the use of our existing sales channel to expand sales of the acquired businesses' products and services, consolidation of manufacturing facilities, and the leveraging of our existing administrative infrastructure. The fair market valuations associated with these transactions fall within Level 3 of the fair value hierarchy, due to the use of significant unobservable inputs to determine fair value. The fair value measurements were calculated using unobservable inputs, primarily using the income approach, specifically the discounted cash flow method. The amount and timing of future cash flows within our analysis was based on our due diligence models, most recent operational budgets, long range strategic plans and other estimates. Our assumptions associated with these Level 3 valuations are discussed below and in Note 12 to these financial statements.

Applied Medical

On September 20, 2018, we entered into an agreement to acquire the assets of the clot management device business of Applied Medical Resource Corporation (Applied). The clot management business consists of several embolectomy and thrombectomy catheter product lines which are sold worldwide (approximately 60% in the U.S. and 40% outside the U.S.). On the same date, we entered into a transition services agreement under which Applied will manufacture and supply us with inventory for a period of twelve months, unless extended in writing by both parties.

The purchase price for the acquired assets, which included inventory, machinery and equipment, intellectual property, permits and approvals, data and records, and customer and supplier information, was \$14.2 million. Of this amount, \$11 million was paid at closing, with another \$2 million due 12 months following the closing date, and the final \$1.2 million due 24 months following the closing date. The deferred amounts totaling \$3.2 million were recorded at an acquisition-date fair value of \$3.043 million using a discount rate of 3.75% to reflect the time value of money between the acquisition date and the payment due dates.

The following table summarizes the preliminary purchase price allocation:

	Allocated Fair Value (in thousands)
Inventory	\$ 666
Equipment and supplies	600
Intangible assets	6,527
Goodwill	6,250

Purchase price	\$ 14,043
----------------	-----------

The goodwill results from expected synergies of combining the acquired products and customer information to our existing operations, and is deductible for tax purposes over 15 years.

Table of Contents

The following table reflects the preliminary allocation of purchase consideration to the acquired intangible assets and related estimated useful lives:

	Allocated Fair Value (in thousands)	Weighted Average Useful Life
Customer relationships	\$ 4,475	16.0 years
Intellectual property	1,316	7.0 years
Non-compete agreement	530	5.0 years
Tradenames	206	7.0 years
Total intangible assets	\$ 6,527	

The weighted-average amortization period of the acquired intangible assets was 13.0 years.

RestoreFlow Allografts

On November 10, 2016, we entered into an agreement to acquire the assets of Restore Flow Allografts, LLC, a provider of human vascular tissue processing and cryopreservation services, for an initial purchase price of \$12 million, with three additional payments of up to \$2 million each (\$6 million in total), depending upon the satisfaction of certain contingencies. One payment of \$2 million was due not later than 15 days following the expiration of the 18 month period following the closing date, subject to reductions as specified in the agreement for each calendar month that certain retained employees were not employed by us due to resignation without good reason, or termination for cause, both as defined in the agreement. The portion of this payment that was to be paid to retained employees and that was contingent on their continued employment, estimated at \$0.9 million, was being accounted for as post-combination compensation expense rather than purchase consideration. The remaining \$1.1 million that was payable to non-employee investors but that was also contingent on the continued employment of the retained employees had been accounted for as contingent purchase consideration, at an acquisition-date fair value of \$0.9 million. In May 2018 we paid this \$2 million liability as the contingency was met.

There are also two potential earn-out payments under the agreement. The first earn-out was to be calculated at 50% of the amount by which net revenue in the first 12 months following the closing exceeded \$6 million, with such payout not to exceed \$2 million. This milestone was not met and accordingly no amount was paid out. The second earn-out is calculated at 50% of the amount by which net revenue in the second 12 months following the closing exceeds \$9 million, with such payout not to exceed \$2 million. These earn-outs were accounted for as contingent consideration, at an acquisition-date fair value of \$0.1 million for the two earn-outs combined. This valuation was derived by utilizing an option pricing model technique incorporating, among other inputs, management's forecasts of future revenues, the expected volatility of revenues, and an estimated weighted average cost of capital of 14.1% to account for the risk of achievement of the revenue forecasts as well as the time value of money between acquisition date and the payment date.

The RestoreFlow business derives revenue from human tissue preservation services, in particular the processing and cryopreservation of veins and arteries. By federal law, human tissues cannot be bought or sold. Therefore, the tissues we obtain and preserve are not held as inventory, and the costs we incur to procure and process vascular tissues are

instead accumulated and deferred. Revenues are recognized for the provision of cryopreservation services rather than product sales.

The acquired assets included intellectual property, permits and approvals, data and records, equipment and furnishings, accounts receivable, inventory, literature, and customer and supplier information. We also assumed certain accounts payable. We accounted for the acquisition as a business combination.

The following table summarizes the final purchase price allocation:

	Allocated Fair Value (in thousands)
Accounts receivable	\$ 394
Deferred cryopreservation costs	2,583
Equipment and supplies	125
Accounts payable	(286)
Intangible assets	4,544
Goodwill	5,599
Purchase price	\$ 12,959

Table of Contents

The goodwill is deductible for tax purposes over 15 years.

The following table reflects the allocation of purchase consideration to the acquired intangible assets and related estimated useful lives:

	Allocated Fair Value (in thousands)	Weighted Average Useful Life
Non-compete agreements	\$ 180	5.0 years
Tradename	271	9.0 years
Procurement contracts	617	9.0 years
Technology	2,793	10.5 years
Customer relationships	683	12.5 years
Total intangible assets	\$ 4,544	

The weighted-average amortization period of the acquired intangible assets was 10.3 years.

ProCol Biologic Graft

On March 18, 2016, we acquired the ProCol biologic vascular graft (ProCol) business for \$2.7 million from Hancock Jaffe Laboratories, Inc. (HJL) and CryoLife, Inc. (CRY). HJL was the owner and manufacturer of ProCol and CRY was the exclusive distributor of the ProCol graft. CRY also owned an option to purchase the ProCol business, which we acquired from CRY. We bought finished goods inventory and other ProCol related assets from CRY for \$2.0 million, which was paid in full at closing. We bought other ProCol assets from HJL for \$0.7 million, 50% of which was paid at closing, with the remainder paid at subsequent dates as specified in the agreement. Additional consideration is payable to HJL for a three-year period following the closing, calculated at 10% of ProCol revenues. This additional consideration was initially valued at \$0.3 million and is being re-measured each reporting period until the payment requirement ends, with any adjustments reported in income from operations. To date since the acquisition there have been no material adjustments.

Assets acquired included inventory, intellectual property and a related license, the ProCol trade name, customer lists, non-compete agreements and certain equipment and supplies. We did not assume any liabilities. We accounted for the acquisition as a business combination. The purchase accounting is complete.

The following table summarizes the purchase price allocation as of the acquisition date:

	Allocated Fair Value (in thousands)
Inventory	\$ 2,080
Manufacturing equipment and supplies	25
Intangible assets	620

Goodwill		318
Purchase price	\$	3,043

The goodwill is deductible for tax purposes over 15 years.

Table of Contents

The following table reflects the allocation of purchase consideration to the acquired intangible assets and related estimated useful lives:

	Allocated Fair Value (in thousands)	Weighted Average Useful Life
Non-compete agreement	\$ 84	5.0 years
Tradename	109	9.5 years
Intellectual property	277	9.0 years
Customer relationships	150	9.0 years
Total intangible assets	\$ 620	

The weighted-average amortization period of the acquired intangible assets was 8.6 years.

Reddick Divestiture

On April 5, 2018, we entered into an asset purchase agreement with Specialty Surgical Instrumentation, Inc. to sell the inventory, intellectual property and other assets associated exclusively with our Reddick cholangiogram catheter and Reddick Saye-Screw product lines for \$7.4 million. In connection with this divestiture we at the same time entered into a transition services agreement under which we will continue to manufacture and supply these products to the buyer for a period of up to two years unless extended by both parties, as well as a balloon supply agreement under which we will supply latex balloons, a component of the cholangiogram catheters, to the buyer for a period of up to six years unless extended by both parties. During the three months ending June 30, 2018 we recorded a gain in connection with these agreements of \$5.9 million. The following table summarizes the allocation of consideration received:

	Allocated Fair Value (in thousands)
Inventory	\$ 308
Deferred revenue transition services agreement	1,081
Goodwill	135
Gain on divestiture	5,876
Consideration received	\$ 7,400

Under the terms of the transition services agreement, we have agreed to manufacture the Reddick products for the buyer at prices at or in some cases below our cost. We allocated a portion of the consideration received to this agreement to reflect it at fair value and recorded it as deferred revenue. As the products are sold to the buyer, we amortize a portion of the deferred revenue to adjust the gross margin on the sale to fair value on a specific identification basis. Additionally, as the Reddick product lines that were divested constituted a business, we allocated a portion of our goodwill to this divestiture based on the fair value of the business sold in relation to the fair value of

the business that will be retained.

Subsequent Event

On October 22, 2018, we entered into an agreement to acquire the assets of Cardial, a French joint stock company, whose business consists of the manufacture and sale of knitted and woven vascular grafts, valvulotomes and surgical glue, for a purchase price of 1.2 million. In connection with this asset purchase, we simultaneously entered into an agreement to purchase the land and building in which Cardial is located, for 0.8 million, bringing the total price paid for the business to 2.0 million. During the three months ending December 31, 2018 we expect to record a gain of approximately 1.6 million in connection with these agreements resulting from the excess value of the assets acquired over the purchase price of the transaction, subject to finalization of the purchase accounting for the transactions.

Table of Contents**5. Goodwill and Other Intangibles**

Goodwill consists of the following as of September 30, 2018:

	(in thousands)
Balance at December 31, 2017	\$ 23,844
Additions for acquisitions	6,250
Divestiture adjustment	(135)
Effects of currency exchange	(155)
Balance at September 30, 2018	\$ 29,804

Other intangible assets consist of the following:

	September 30, 2018			December 31, 2017		
	Gross Carrying Value	Accumulated Amortization	Net Carrying Value	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
	(in thousands)					
Product technology	\$ 10,143	\$ 5,483	\$ 4,660	\$ 10,267	\$ 4,908	\$ 5,359
Trademarks and licenses	3,465	1,530	1,935	1,948	1,468	480
Customer relationships	9,787	3,636	6,151	5,383	3,299	2,084
Other intangible assets	2,096	1,352	744	1,575	1,264	311
Total identifiable intangible assets	\$ 25,491	\$ 12,001	\$ 13,490	\$ 19,173	\$ 10,939	\$ 8,234

These intangible assets are being amortized over their useful lives ranging from 3 to 16 years. The weighted-average amortization period for these intangibles as of September 30, 2018 is 9.4 years. Amortization expense is included in general and administrative expense and was as follows for the periods indicated.

	Three months ended September 30, 2018		Nine months ended September 30, 2018	
	2018	2017	2018	2017
Amortization expense	\$ 380	\$ 443	\$ 1,213	\$ 1,353

We estimate that amortization expense for the remainder of 2018 and for each of the five succeeding fiscal years will be as follows:

	Year ended December 31,					
	2018	2019	2020	2021	2022	2023
	(in thousands)					
Amortization expense	\$ 521	\$ 1,972	\$ 1,721	\$ 1,523	\$ 1,316	\$ 1,257

Table of Contents**6. Accrued Expenses and Other Long-term Liabilities**

Accrued expenses consist of the following:

	September 30, 2018	December 31, 2017
	(in thousands)	
Compensation and related taxes	\$ 6,133	\$ 6,494
Income and other taxes	139	703
Professional fees	182	35
Deferred revenue	752	
Other	3,800	2,538
Total	\$ 11,006	\$ 9,770

As discussed in Note 4 above, deferred revenue relates to our divestiture of the Reddick product line and an associated transition services agreement that we entered into contemporaneously with the divestiture, under which we agreed to manufacture and sell product to the buyer at prices at or below our cost. We allocated a portion of the consideration received from the divestiture to this transition services agreement to reflect it at fair value and recorded it as deferred revenue. As the products are sold to the buyer, which we expect will occur over approximately the next nine to twelve months, we amortize a portion of the deferred revenue to adjust the gross margin on the sale to fair value on a specific identification basis. The following table summarizes the changes in the deferred revenue balance during the nine months ended September 30, 2018:

	September 30, 2018
	(in thousands)
Beginning contract liability balance	\$
Deferred revenue recorded	1,081
Revenue recognized upon satisfaction of performance obligations in the period	(329)
Ending balance	\$ 752

Other long-term liabilities consist of the following:

	September 30, 2018	December 31, 2017
	(in thousands)	
Acquisition-related liabilities	\$ 1,115	\$ 127
Deferred rent	539	561

Income taxes	318	321
Other	195	179
Total	\$ 2,167	\$ 1,188

7. Segment and Enterprise-Wide Disclosures

Under Accounting Standards Codification Topic 280, *Segment Reporting*, operating segments are defined as components of an enterprise for which separate, discrete financial information is available and evaluated by the chief operating decision-maker in making decisions on how to allocate resources and assess performance. We view our operations and manage our business as one operating segment. No discrete operating information is prepared by us except for sales by product line and by legal entity for local reporting purposes.

Table of Contents

Most of our revenues are generated in the United States, Germany, and other European countries as well as in Canada, Japan and China. Substantially all of our assets are located in the United States. Net sales to unaffiliated customers by country were as follows:

	Three months ended		Nine months ended	
	September 30, 2018	2017	September 30, 2018	2017
	(in thousands)		(in thousands)	
United States	\$ 13,937	\$ 14,506	\$ 43,620	\$ 43,485
Germany	3,058	2,885	9,421	8,624
Other countries	7,170	7,431	24,138	22,605
Net Sales	\$ 24,165	\$ 24,822	\$ 77,179	\$ 74,714

8. Share-based Compensation

Our Third Amended and Restated 2006 Stock Option and Incentive Plan allows for granting of incentive stock options, non-qualified stock options, stock appreciation rights, restricted stock units, unrestricted stock awards and deferred stock awards to our officers, employees, directors and consultants. The components of share-based compensation expense were as follows:

	Three months ended		Nine months ended	
	September 30, 2018	2017	September 30, 2018	2017
	(in thousands)		(in thousands)	
Stock option awards	\$ 331	\$ 723	\$ 1,111	\$ 1,347
Restricted stock units	206	164	683	498
Total share-based compensation	\$ 537	\$ 887	\$ 1,794	\$ 1,845

Stock-based compensation is included in our statements of operations as follows:

	Three months ended		Nine months ended	
	September 30, 2018	2017	September 30, 2018	2017
	(in thousands)		(in thousands)	
Cost of sales	\$ 61	\$ 46	\$ 209	\$ 141
Sales and marketing	155	78	429	309
General and administrative	266	718	967	1,261

Edgar Filing: LEMAITRE VASCULAR INC - Form 10-Q

Research and development	55	45	189	134
Total stock-based compensation	\$ 537	\$ 887	\$ 1,794	\$ 1,845

We did not grant any options during the nine months ended September 30, 2018. Option grants during the nine months ended September 30, 2017 were not material. Awards of restricted and unrestricted stock during the nine month periods ended September 30, 2018 and 2017 were not material.

We issued approximately 329,000 and 702,000 shares of common stock following the exercise or vesting of underlying stock options or restricted stock units in the nine months ended September 30, 2018 and 2017, respectively.

Table of Contents**9. Net Income per Share**

The computation of basic and diluted net income per share was as follows:

	Three months ended		Nine months ended	
	September 30, 2018	September 30, 2017	September 30, 2018	September 30, 2017
	(in thousands, except per share data)		(in thousands, except per share data)	
Basic:				
Net income available for common stockholders	\$ 4,314	\$ 5,042	\$ 16,918	\$ 12,893
Weighted average shares outstanding	19,503	19,124	19,369	18,589
Basic earnings per share	\$ 0.22	\$ 0.26	\$ 0.87	\$ 0.69
Diluted:				
Net income available for common stockholders	\$ 4,314	\$ 5,042	\$ 16,918	\$ 12,893
Weighted-average shares outstanding	19,503	19,124	19,369	18,589
Common stock equivalents, if dilutive	790	1,023	889	1,381
Shares used in computing diluted earnings per common share	20,293	20,147	20,258	19,970
Diluted earnings per share	\$ 0.21	\$ 0.25	\$ 0.84	\$ 0.65
Shares excluded in computing diluted earnings per share as those shares would be anti-dilutive	212		213	1

10. Stockholders Equity***Share Repurchase Program***

On July 25, 2017, our Board of Directors approved a stock repurchase program under which the Company was authorized to repurchase up to \$7.5 million of its common stock through transactions on the open market, in privately negotiated purchases or otherwise. This program expired on July 25, 2018. We did not make any share repurchases under this program.

Dividends

In February 2011, our Board of Directors approved a policy for the payment of quarterly cash dividends on our common stock. Future declarations of quarterly dividends and the establishment of future record and payment dates are subject to approval by our Board of Directors on a quarterly basis. The dividend activity for the periods presented

is as follows:

Record Date	Payment Date	Per Share Amount	Dividend Payment (in thousands)
Fiscal Year 2018			
March 22, 2018	April 5, 2018	\$0.070	\$1,351
May 22, 2018	June 7, 2018	\$0.070	\$1,353
August 22, 2018	September 6, 2018	\$0.070	\$1,369
Fiscal Year 2017			
March 22, 2017	April 6, 2017	\$0.055	\$1,029
May 24, 2017	June 8, 2017	\$0.055	\$1,036
August 23, 2017	September 7, 2017	\$0.055	\$1,055
November 22, 2017	December 7, 2017	\$0.055	\$1,060

On October 4, 2018 our Board of Directors approved a quarterly cash dividend on our common stock of \$0.07 per share payable on December 6, 2018 to stockholders of record at the close of business on November 20, 2018, which will total approximately \$1.4 million.

Table of Contents**11. Supplemental Cash Flow Information**

	Nine months ended September 30, 2018 2017	
	(in thousands)	
Cash paid for income taxes, net	\$ 5,086	\$ 2,953
Common stock repurchased for RSU tax withholdings	\$ 678	\$ 778

12. Fair Value Measurements

The fair value accounting guidance requires that assets and liabilities carried at fair value be classified and disclosed in one of the following three categories:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

Level 1 assets being measured at fair value on a recurring basis as of September 30, 2018 included our short-term investment mutual fund account.

We had no Level 2 assets being measured at fair value on a recurring basis as of September 30, 2018.

As discussed in Note 4, several of our acquisition-related assets and liabilities have been measured using Level 3 techniques. During 2016, we recorded contingent liabilities associated with our acquisitions of the RestoreFlow allograft and ProCol biologic graft businesses. In the case of the Restore Flow allograft acquisition, the agreement included the potential for us to pay up to \$5.1 million of additional consideration, with \$1.1 million contingent on the continued employment by LeMaitre of certain retained employees, and another \$4.0 million contingent on the achievement of specified levels of revenues in the first 12 and 24 months following the acquisition date. This additional consideration was initially valued in total at \$1.0 million and is being re-measured each reporting period until the payment requirement ends, with any adjustments reported in income from operations. The amount attributable to the first 12 months of revenue following the acquisition date was not paid as the associated revenue metric was not achieved. The amount that was contingent on the continued employment by LeMaitre of certain retained employees was paid in May 2018 as the contingency was met.

In the case of ProCol, additional consideration is payable to the former shareholders for a three-year period following the closing, calculated at 10% of ProCol revenues. This additional consideration was initially valued at \$0.3 million

and is being re-measured each reporting period until the payment requirement ends, with any adjustments reported in income from operations. These arrangements are described more fully in Note 4.

The following table provides a rollforward of the fair value of these liabilities, as determined by Level 3 unobservable inputs including management's forecast of future revenues for these acquired businesses, as well as, in the case of the Restore Flow allograft acquisition, management's estimate of the likelihood of continued employment of certain retained employees.

Table of Contents

	Nine months ended September 30, 2018 2017 (in thousands)	
Beginning balance	\$ 1,301	\$ 1,320
Additions		
Payments	(1,171)	(90)
Change in fair value included in earnings	(24)	72
Ending balance	\$ 106	\$ 1,302

13. Accumulated Other Comprehensive Loss

	Nine months ended September 30, 2018 2017 (in thousands)	
Beginning balance	\$ (2,289)	\$ (4,583)
Other comprehensive income (loss) before reclassifications	(1,193)	2,303
Amounts reclassified from accumulated other comprehensive loss		
Ending Balance	\$ (3,482)	\$ (2,280)

Changes to our accumulated other comprehensive loss consisted primarily of foreign currency translation for the nine months ended September 30, 2018 and 2017.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

This Quarterly Report on Form 10-Q contains forward-looking statements (within the meaning of the U.S. Private Securities Litigation Reform Act of 1995) that involve substantial risks and uncertainties. All statements, other than statements of historical facts, included in this report regarding our strategy, future operations, future financial position, future net sales, projected costs, projected expenses, prospects and plans and objectives of management are forward-looking statements. The words anticipates, believes, estimates, expects, intends, may, plans, projects, will, would, and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We have based these forward-looking statements on our current expectations and projections about future events. Although we believe that the expectations underlying any of our forward-looking statements are reasonable, these expectations may prove to be incorrect, and all of these statements are subject to risks and uncertainties. Should one or more of these risks and uncertainties materialize, or should underlying assumptions, projections, or expectations prove incorrect, our actual results, performance, or financial condition may vary materially and adversely from those anticipated, estimated, or expected. These risks and uncertainties include, but are not limited to: the risk of significant fluctuations in our quarterly and annual results due to numerous factors; the risk that we may not be able to maintain our recent levels of profitability; the risk that the Company may not realize the anticipated benefits of its strategic activities; the risk that assumptions about the market for the Company's products and the productivity of the Company's direct sales force and distributors may not be correct; risks related to the integration of acquisition targets; risks related to product demand and market acceptance of the Company's products and pricing; the risk that a recall of our products could result in significant costs or negative publicity; the risk that the Company is not successful in transitioning to a direct-selling model in new territories.

Forward-looking statements reflect management's analysis as of the date of this quarterly report. Further information on potential risk factors that could affect our business and financial results is detailed in Part II, Item 1A, Risk Factors in this Quarterly Report on Form 10-Q and in our other filings with the Securities and Exchange Commission, including under the section headed Risk Factors in our most recent Annual Report on Form 10-K. Given these risks, uncertainties and other factors, you should not place undue reliance on these forward-looking statements. The following discussion and analysis should be read in conjunction with our consolidated financial statements and the related notes included in this report and our other SEC filings, including our audited consolidated financial statements and the related notes contained in our Annual Report on Form 10-K for the year ended December 31, 2017, as filed with the SEC on March 9, 2018. We do not assume any obligation to update any forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by law. Unless the context indicates otherwise, references to LeMaitre Vascular, we, our, and us in this Quarterly Report on Form 10-Q refer to LeMaitre Vascular, Inc. and its subsidiaries.

LeMaitre, AnastoClip, Omniflow, ProCol, RestoreFlow and XenoSure are registered trademarks of LeMaitre Vascular or one of its subsidiaries. This Quarterly Report on Form 10-Q also includes the registered and unregistered trademarks of other persons, which are the property of their respective owners.

Overview

We are a medical device company that develops, manufactures, and markets medical devices and implants for the treatment of peripheral vascular disease. We also provide processing and cryopreservation services of human tissue for implantation into patients. Our principal product offerings are sold throughout the world, primarily in North America, Europe and, to a lesser extent, Asia and the Pacific Rim. We estimate that the annual worldwide market for all peripheral vascular devices exceeds \$5 billion, within which our core product lines address roughly \$900 million. We have grown our business by using a three-pronged strategy: 1) pursuing a focused call point, 2) competing for

sales of low-rivalry niche products, and 3) expanding our worldwide direct sales force while acquiring and developing complementary vascular devices. We have used acquisitions as a primary means of further accessing the larger peripheral vascular device market, and we expect to continue to pursue this strategy in the future. Additionally, we have continued our efforts to expand our vascular device offerings through research and development. We currently manufacture most of our product lines at our Burlington, Massachusetts headquarters.

Our products and services are used primarily by vascular surgeons who treat peripheral vascular disease through both open surgical methods and endovascular techniques. In contrast to interventional cardiologists and interventional radiologists, neither of whom are certified to perform open surgical procedures, vascular surgeons can perform both open surgical and minimally invasive endovascular procedures, and are therefore uniquely positioned to provide a wider range of treatment options to patients.

Our principal product lines include the following: anastomotic clips, angioscopes, intravascular catheters, biologic vascular grafts, biologic vascular patches, carotid shunts, powered phlebectomy devices, radiopaque marking tape, remote endarterectomy devices, synthetic vascular grafts, and valvulotomes. We also provide services related to the processing and cryopreservation of human vascular tissue in connection with our RestoreFlow allografts business.

Table of Contents

Our biologic devices, which include vascular patches and vascular grafts (including allografts, ovine grafts and bovine grafts), have become a larger proportion of our total sales over time, and in the current quarter represented 36% of worldwide sales. We generally view the biologic device segment favorably, as we believe it contains differentiated and growing product segments.

To assist us in evaluating our business strategies, we regularly monitor long-term technology trends in the peripheral vascular device market. Additionally, we consider the information obtained from discussions with the medical community in connection with the demand for our products, including potential new product launches. We also use this information to help determine our competitive position in the peripheral vascular device market and our manufacturing capacity requirements.

Our business opportunities include the following:

the long-term growth of our direct sales force in North America, Europe, Asia and the Pacific Rim;

the addition of complementary products through acquisitions;

the updating of existing products and introduction of new products through research and development;

the introduction of our products in new territories upon receipt of regulatory approvals or registrations in these territories; and

the consolidation of, and automation of, product manufacturing at our facilities in our Burlington, Massachusetts corporate headquarters.

We sell our products and services primarily through a direct sales force. As of September 30, 2018 our sales force was comprised of 106 sales representatives in North America, Europe, Japan, China and Australia. We also sell our products in other countries through distributors. Our worldwide headquarters is located in Burlington, Massachusetts. Our European operations are headquartered in Sulzbach, Germany. We also have sales offices located in Tokyo, Japan; Vaughan, Canada; Madrid, Spain; Milan, Italy; Shanghai, China; and North Melbourne, Australia, and we have a processing facility in Fox River Grove, Illinois and a manufacturing facility in North Melbourne, Australia. During the nine months ended September 30, 2018 and 2017, approximately 95% and 93%, respectively, of our net sales were generated in territories in which we employ direct sales representatives.

Historically we have experienced success in lower-rivalry niche product segments, for example the markets for biologic vascular patches and valvulotome devices. In the biologic vascular patch market the number of competitors has historically been limited, and we believe that we have been able to increase market share and increase selling prices, mainly due to the strength of our sales force. Recently, we have faced increased competition in this segment, which could inhibit our ability to increase market share or to implement selling price increases. In the valvulotome market, our highly differentiated devices have allowed us to increase our selling prices while maintaining our unit market share. In contrast, we have experienced less success in highly competitive markets such as synthetic grafts, where we face stronger competition from larger companies with greater resources and lower production costs. While we believe that these challenging market dynamics can be mitigated by our relationships with vascular surgeons, there

can be no assurance that we will be successful in these highly competitive markets.

In recent years we have also experienced success in international markets, such as Europe, where we sometimes offer comparatively lower average selling prices. If we continue to seek growth opportunities outside of North America, we may experience downward pressure on our gross margin.

Because we believe that direct-to-hospital sales engender closer customer relationships, and allow for higher selling prices and gross margins, we periodically enter into transactions with our distributors to transition their sales of our medical devices to our direct sales organization:

In December 2015, we signed a master distribution agreement with Meheco Yonstron Pharmaceutical Co. Ltd. (Meheco), a Chinese distribution and logistics company, and began selling our Chinese market products to Meheco in 2016. Meheco then sold our products to multiple sub-distributors who then sold to Chinese hospitals. This agreement expired in December 2017, and we are currently in the process of signing distribution agreements with sub-distributors and have begun selling our products directly to sub-distributors in China. We purchased \$120,000 of our products back from Meheco in the three months ended September 30, 2018, which resulted in a corresponding revenue reversal.

In March 2018 we terminated our master distribution agreement with Sinopharm United Medical Device Co., Ltd. under which we sold our powered phlebectomy device and related disposable devices to them for distribution in China. In April 2018 we began selling these products directly to sub-distributors in China. We anticipate that the expansion of our sales organization in China will result in increased sales, marketing and regulatory expenses during 2018. As of September 30, 2018 we had eight employees in China.

Table of Contents

Our strategy for growing our business includes the acquisition of complementary product lines and companies and occasionally the discontinuance or divestiture of products or activities that are no longer complementary:

In March 2016, we acquired substantially all of the assets as well as the production and distribution rights of the ProCol business from Hancock Jaffe Laboratories and CryoLife, Inc. for \$2.7 million plus 10% of net sales for three years following the closing. ProCol is a biologic vascular graft used for dialysis access and is approved for sale in the United States.

In November 2016, we acquired substantially all of the assets related to the peripheral vascular allograft operations of Restore Flow Allografts, LLC for \$12.0 million plus additional consideration depending upon the satisfaction of certain contingencies.

In April 2018, we sold our Reddick cholangiogram catheter and Reddick Saye-Screw product lines to Specialty Surgical Instrumentation, Inc. for \$7.4 million.

In September 2018, we acquired substantially all of the assets related to the clot management catheter business from Applied Medical Resources Corporation for \$14.2 million.

In October 2018, we acquired the business assets of Cardial from Becton, Dickinson and Company for 2.0 million. Cardial's business consists of the manufacture and sale of knitted and woven vascular grafts, valvulotomes and surgical glue.

In addition to relying upon acquisitions to grow our business, we also rely on our product development efforts to bring differentiated and next-generation products to market. These efforts have led to the following recent product developments:

In October 2016, we launched additional sizes of our XenoSure patch.

In December 2016, we launched the 7.0mm diameter size Omniflow graft.

In October 2017, we launched XenoSure biologic pledgets.

In April 2018, we expanded the indications for our Anastoclip GC in the United States to include dura tissue repair.

In addition to our sales growth strategies, we have also executed several operational initiatives designed to consolidate and streamline manufacturing within our Burlington, Massachusetts facilities. We expect that these plant consolidations will result in improved production control as well as reduced costs over the long-term. Our most recent manufacturing transitions included:

In May 2015, we entered into an asset purchase agreement with UreSil, LLC to acquire the production and distribution rights of UreSil's Tru-Incise valvulotome for sales outside the United States, and at the same time we initiated a project to begin manufacturing this product in our Burlington facility. The manufacturing transition was completed in 2017. In May 2018 our right to use the Tru-Incise name expired, and we re-branded this product as EZE-SIT.

In March 2016, we initiated a project to transfer the manufacturing of our ProCol biologic product line to our Burlington facility. This transition was completed in May 2018.

In 2017 we completed the renovation of a portion of our manufacturing facility in Burlington, in which we expect most of our biologic offerings, including the XenoSure patch as well as certain biologic grafts, to be produced or processed. The cost of the facility renovation was approximately \$3.0 million.

In September 2018, we acquired the clot management business assets from Applied Medical Resources. We have initiated a project to transfer the manufacturing of the acquired devices to our Burlington facility. We expect this transition to be completed in 2019.

Our execution of these business opportunities may affect the comparability of our financial results from period to period and may cause substantial fluctuations from period to period as we incur related process engineering and other charges, as well as longer term impacts to revenues and operating expenditures.

For the nine months ended September 30, 2018, approximately 43% of our sales were to customers located outside the United States. Fluctuations in the rate of exchange between the U.S. dollar and foreign currencies, primarily the Euro, affect our financial results. Selling, marketing, and administrative costs related to these sales are largely denominated in the local currency, thereby partially mitigating our exposure to exchange rate fluctuations. However, as most of our foreign sales are denominated in local currency, if there is an increase in the rate at which a foreign currency is exchanged for U.S. dollars, it will require more of the foreign currency to equal a specified amount of U.S. dollars. In such cases we will record less revenue in U.S. dollars than we did prior to the rate increase. For the nine months ended September 30, 2018, the effects of changes in foreign exchange rates increased our reported sales by approximately \$1.8 million as compared to the rates in effect in the year-earlier period.

Table of Contents**Net Sales and Expense Components**

The following is a description of the primary components of our net sales and expenses:

Net sales. We derive our net sales from the sale of our products and services, less discounts and returns. Net sales include the shipping and handling fees paid for by our customers. Most of our sales are generated by our direct sales force and are shipped and billed to hospitals or clinics throughout the world. In countries where we do not have a direct sales force, sales are primarily to distributors, who in turn sell to hospitals and clinics. In certain cases our products are held on consignment at a hospital or clinic prior to purchase; in those instances we recognize revenue at the time the product is used in surgery rather than at shipment.

Cost of sales. We manufacture the majority of the products that we sell. Our cost of sales consists primarily of manufacturing personnel, raw materials and components, depreciation of property and equipment, and other allocated manufacturing overhead, as well as freight expense we pay to ship products to customers.

Sales and marketing. Our sales and marketing expense consists primarily of salaries, commissions, stock based compensation, travel and entertainment, attendance at vascular congresses, training programs, advertising and product promotions, direct mail and other marketing costs.

General and administrative. General and administrative expense consists primarily of executive, finance and human resource salaries, stock based compensation, legal and accounting fees, information technology expense, intangible asset amortization expense and insurance expense.

Research and development. Research and development expense includes costs associated with the design, development, testing, enhancement and regulatory approval of our products, principally salaries, laboratory testing and supply costs. It also includes costs associated with design and execution of clinical studies, regulatory submissions and costs to register, maintain, and defend our intellectual property, and royalty payments associated with licensed and acquired intellectual property.

Other income (expense). Other income (expense) primarily includes interest income and expense, foreign currency gains (losses), and other miscellaneous gains (losses).

Income tax expense. We are subject to federal and state income taxes for earnings generated in the United States, which include operating losses in certain foreign jurisdictions for certain years depending on tax elections made, and foreign taxes on earnings of our wholly-owned foreign subsidiaries. Our consolidated tax expense is affected by the mix of our taxable income (loss) in the United States and foreign subsidiaries, permanent items, discrete items, unrecognized tax benefits, and amortization of goodwill for U.S tax reporting purposes.

Results of Operations***Comparison of the three and nine months ended September 30, 2018 to the three and nine months ended September 30, 2017:***

The following tables set forth, for the periods indicated, our net sales by geography (based on where our customers reside), and the change between the specified periods expressed as a percentage increase or decrease:

(unaudited)	Three months ended September 30,			Nine months ended September 30,		
	2018	2017	Percent change	2018	2017	Percent change
	(\$ in thousands)					
Net sales	\$ 24,165	\$ 24,822	(3%)	\$ 77,179	\$ 74,714	3%
Net sales by geography:						
Americas	\$ 14,943	\$ 15,439	(3%)	\$ 46,885	\$ 46,510	1%
Europe, Middle East and Africa	\$ 7,856	\$ 7,926	(1%)	\$ 25,685	\$ 23,660	9%
Asia/Pacific Rim	1,366	1,457	(6%)	4,609	4,544	1%
Total	\$ 24,165	\$ 24,822	(3%)	\$ 77,179	\$ 74,714	3%

Net sales. Net sales decreased \$0.7 million or 3% to \$24.2 million for the three months ended September 30, 2018, compared to \$24.8 million for the three months ended September 30, 2017. Net sales increased \$2.5 million or 3% to \$77.2 million for the nine months ended September 30, 2018, compared to \$74.7 million for the nine months ended September 30, 2017. The sales decrease for the three months ended September 30, 2018 was due to the divestiture of our Reddick cholangiogram catheter product in early Q2

Table of Contents

2018 of \$0.4 million, as well as decreased sales of vessel closure systems of \$0.3 million, radiopaque tape of \$0.2 million and valvulotomes of \$0.1 million. Partly offsetting these sales decreases were increased sales of biologic vascular patches of \$0.3 million and shunts of \$0.2 million. The sales increase for the nine months ended September 30, 2018 occurred across multiple product lines including our biologic vascular patches which increased by \$1.5 million, allografts \$0.9 million, shunts \$0.9 million and valvulotomes \$0.5 million. Partly offsetting these increases was the decrease in cholangiogram catheters in connection with our divestiture of the Reddick product line of \$1.0 million, as well as a decrease in vessel closure systems of \$0.6 million. Across all product lines, we estimate that the weakening U.S. dollar during the nine months ended September 30, 2018 as compared to the nine months ended September 30, 2017 increased our net sales by \$1.8 million.

Direct-to-hospital net sales were 95% and 93% of our total net sales for the nine months ended September 30, 2018 and 2017, respectively.

Net sales by geography. Net sales in the Americas decreased \$0.5 million or 3% for the three months ended September 30, 2018 as compared to September 30, 2017, due primarily to the divestiture of our Reddick cholangiogram catheter product in Q2 2018 of \$0.4 million, as well as decreases sales of radiopaque tape and powered phlebectomy devices of \$0.1 million each. These decreases were partly offset by increased sales of biologic vascular patches and valvulotomes. For the nine months ended September 30, 2018, sales in the Americas increased \$0.4 million or 1%. Sales of allografts increased \$0.9 million, biologic vascular patches \$0.5 million and valvulotomes \$0.4 million. These increases were largely offset by decreases of \$1.0 million from the cholangiogram catheter product line divestiture as well as decreased sales of radiopaque tape of \$0.4 million and vessel closure systems of \$0.3 million.

Europe, Middle East and Africa (or EMEA) net sales decreased \$0.1 million, or 1% for the three months ended September 30, 2018, and increased \$2.0 million or 9% for the nine months ended September 30, 2018. For the three-month period the decrease was primarily driven by lower export sales to distributors in countries where we do not have a direct sales force, as well as by decreased sales of valvulotomes, which were partly offset by increased sales of biologic vascular patches. For the nine months ended September 30, 2018, the increased sales were driven by increased sales of biologic vascular patches of \$1.0 million, biologic vascular grafts of \$0.3 million and embolectomy catheters of \$0.3 million. Across all product lines, we estimate that the weakening U.S. dollar during the nine months ended September 30, 2018 as compared to the nine months ended September 30, 2017 increased our EMEA net sales by \$1.7 million. The Reddick divestiture had an immaterial impact on EMEA sales as those products were sold primarily in the United States.

Asia/Pacific Rim net sales decreased \$0.1 million, or 6% for the three months ended September 30, 2018, and increased \$0.1 million or 1% for the nine months ended September 30, 2018. For the three month period the decrease was primarily related to lower sales of vessel closure systems to China of \$0.3 million as we transition to a direct sales model, which were partly offset by increased shunt sales of \$0.2 million. For the nine month period the increase was primarily related to higher sales of shunts, occlusion catheters and valvulotomes, which were partly offset by decreased sales of powered phlebectomy systems and vessel closure systems to China.

The following table sets forth the change in our gross profit and gross margin for the periods indicated:

(unaudited)	Three months ended September 30,				Nine months ended September 30,			
	2018	2017	Change	Percent change	2018	2017	Change	Percent change

	(\$ in thousands)							
Gross profit	\$ 17,255	\$ 17,577	\$ (322)	(2%)	\$ 54,721	\$ 52,446	\$ 2,275	4%
Gross margin	71.4%	70.8%	0.6%	*	70.9%	70.2%	0.7%	*

* Not applicable

Gross Profit. Gross profit decreased \$0.3 million to \$17.3 million for the three months ended September 30, 2018, while gross margin increased 60 basis points to 71.4% in the period. For the nine months ended September 30, 2018, gross profit increased \$2.3 million to \$54.7 million, while gross margin increased 70 basis points to 70.9% in the period. The increases for both comparative periods were the result of favorable geographic and product mix and higher average selling prices across most products, which were partially offset by higher per-unit costs of certain of our products. The nine months ended September 30, 2018 was also favorably impacted by changes in foreign currency exchange rates as compared to the prior year period.

Table of Contents**Operating Expenses**

The following tables set forth changes in our operating expenses for the periods indicated and the change between the specified periods expressed as a percentage increase or decrease:

(unaudited)	Three months ended September 30,				Nine months ended September 30,			
	2018	2017	\$ Change	Percent change	2018	2017	\$ Change	Percent change
Sales and marketing	\$ 6,622	\$ 6,201	\$ 421	7%	\$ 20,504	\$ 19,754	\$ 750	4%
General and administrative	3,983	4,562	(579)	(13%)	13,227	12,857	370	3%
Research and development	2,037	1,761	276	16%	5,850	5,053	797	16%
(Gain) loss on divestitures				*	(5,876)		(5,876)	*
Total	\$ 12,642	\$ 12,524	\$ 118	1%	\$ 33,705	\$ 37,664	\$ (3,959)	(11%)

	Three months ended September 30,			Six months ended June 30,

Sales and marketing	27%	25%	2%	27%	26%	1%
General and administrative	16%	18%	(2%)	17%	17%	0%
Research and development	8%	7%	1%	8%	7%	1%
(Gain) loss on divestitures	0%	0%	0%	(8%)	0%	(8%)

* Not a meaningful percentage relationship.

Sales and marketing. For the three months ended September 30, 2018, sales and marketing expense increased 7% to \$6.6 million. The increase was driven mainly by higher personnel costs, including salaries, recruiting and travel expenses associated with expanding the sales force in the 2018 period. As a percentage of net sales, sales and marketing expense increased to 27% in the three months ended September 30, 2018 from 25% in the prior period as spending growth outpaced sales growth. For the nine months ended September 30, 2018, sales and marketing expense increased 4% to \$20.5 million. The increase was driven mainly by higher compensation costs, increased spending related to our annual sales meeting, recruiting, severance and travel expenses. These increases were partly offset by lower sales force commissions. As a percentage of sales, sales and marketing expense increased to 27% for the nine months ended September 30, 2018, from 26% in the prior year period.

General and administrative. For the three months ended September 30, 2018, general and administrative expense decreased 13% to \$4.0 million. Included in the prior year period is a charge of \$0.5 million related to a stock option award modification associated with the departure of one of our European employees. Acquisition-related costs also decreased in the current year period. As a percentage of sales, general and administrative expense decreased to 16% for the three months ended September 30, 2018 from 18% in the prior year. For the nine months ended September 30, 2018, general and administrative expense increased 3% to \$13.2 million. The general and administrative expense increases were driven by higher compensation costs, professional fees and travel expense, which were partly offset by

lower facilities costs. As a percentage of sales, general and administrative expense was 17% for the nine months ended September 30, 2018 and 2017.

Research and development. For the three months ended September 30, 2018, research and development expense increased 16% to \$2.0 million. For the nine months ended September 30, 2018, research and development expense increased 16% to \$5.9 million. In both comparative periods the increase was primarily related to regulatory submissions for our products in China and Japan, as well as testing related to our biologic product offerings. We also had higher compensation, recruiting and travel expenses. As a percentage of sales, research and development expense increased to 8% for the three and nine months ended September 30, 2018, as compared to 7% for the prior year comparative periods.

Gain on divestiture. On April 5, 2018, we entered into an asset purchase agreement with Specialty Surgical Instrumentation, Inc. to sell the inventory, intellectual property and other assets associated with our Reddick cholangiogram catheter and Reddick Saye-Screw product lines for \$7.4 million. In connection with this divestiture we at the same time entered into a transition services agreement to manufacture and supply these products to the buyer for a period of up to two years unless extended by both parties. We also entered into an agreement to supply latex balloons to the buyer for the cholangiogram catheters for a period of up six years, unless extended by both parties. During the three months ended June 30, 2018 we recorded a gain in connection with these agreements of \$5.9 million.

Income tax expense. We recorded a tax provision of \$0.4 million on pre-tax income of \$4.7 million for the three months ended September 30, 2018, compared to a \$31,000 tax provision on pre-tax income of \$5.1 million for the three months ended September 30, 2017. We recorded a tax provision of \$4.3 million on pre-tax income of \$21.2 million for the nine months ended September 30, 2018, compared to \$1.9 million on pre-tax income of \$14.8 million for the nine months ended September 30, 2017. Our effective income tax rate was 8.8% and 20.2% for the three and nine month periods ended September 30, 2018. Our tax expense for the current period is based on an estimated annual effective tax rate of 25.1%, adjusted in the applicable quarterly periods for discrete stock option exercises and other discrete items. Our income tax expense for the current period varies from the statutory rate mainly due to federal and state tax credits, permanent items, different statutory rates from our foreign entities, and a discrete item for stock option exercises.

Table of Contents

Our effective income tax rate was 0.6% and 12.8% for the three and nine month period ended September 30, 2017. Our 2017 provision was based on the estimated annual effective tax rate of 36.8%, adjusted in the applicable quarterly period for discrete stock option exercises and other discrete items. Our income tax expense for 2017 varied from the statutory rate mainly due to certain permanent items, offset by lower statutory rates from our foreign entities and a discrete item for stock option exercises.

We monitor the mix of profitability by tax jurisdiction and adjust our annual expected rate on a quarterly basis as needed. While it is often difficult to predict the final outcome or timing of the resolution for any particular tax matter, we believe our tax reserves reflect the probable outcome of known contingencies.

We assess the likelihood that our deferred tax assets will be realized through future taxable income and record a valuation allowance to reduce gross deferred tax assets to an amount we believe is more likely than not to be realized. As of September 30, 2018, we have provided a valuation allowance of \$2.0 million for deferred tax assets primarily related to Australian net operating loss and capital loss carry forwards and Massachusetts tax credit carry forwards that are not expected to be realized.

Liquidity and Capital Resources

At September 30, 2018, our cash and cash equivalents were \$20.1 million as compared to \$19.1 million at December 31, 2017. We also had \$25.5 million in a short-term managed income mutual fund investment as of September 30, 2018 compared to \$22.6 million as of December 31, 2017. Our cash and cash equivalents are highly liquid investments with maturities of 90 days or less at the date of purchase, and consist primarily of operating bank accounts. Our short-term marketable securities consist of a managed income mutual fund investing mainly in short-term investment grade, U.S.-dollar denominated fixed and floating-rate debt. All of our cash held outside of the United States is available for corporate use, with the exception of \$9.1 million held by subsidiaries in jurisdictions for which earnings are planned to be permanently reinvested.

On July 25, 2017, our Board of Directors approved a stock repurchase program under which the Company was authorized to repurchase up to \$7.5 million of its common stock through transactions on the open market, in privately negotiated purchases or otherwise. This program expired on July 25, 2018. We did not make any share repurchases under this program.

Operating and Capital Expenditure Requirements

We require cash to pay our operating expenses, make capital expenditures, and pay our long-term liabilities. Since our inception, we have funded our operations through public offerings and private placements of equity securities, short-term borrowings, and funds generated from our operations.

We recognized operating income of \$21.0 million for the nine months ended September 30, 2018. For the year ended December 31, 2017, we had operating income of \$21.1 million. We expect to fund any increased costs and expenditures from our existing cash and cash equivalents, though our future capital requirements depend on numerous factors. These factors include, but are not limited to, the following:

the revenues generated by sales of our products and services;

payments associated with potential future quarterly cash dividends to our common stockholders;

future acquisition-related payments;

payments associated with income and other taxes;

the costs associated with expanding our manufacturing, marketing, sales, and distribution efforts;

the costs associated with our initiatives to sell direct-to-hospital in new countries;

the costs of obtaining and maintaining FDA and other regulatory clearances of our existing and future products;

the number, timing, and nature of acquisitions, divestitures and other strategic transactions, and

potential future share repurchases.

Our cash balances may decrease as we continue to use cash to fund our operations, make acquisitions, make payments under our quarterly dividend program, make share repurchases and make deferred payments related to prior acquisitions. We believe that our cash, cash equivalents, investments and the interest we earn on these balances will be sufficient to meet our anticipated cash requirements for at least the next twelve months. If these sources of cash are insufficient to satisfy our liquidity requirements beyond the next twelve months, we may seek to sell additional equity or debt securities or borrow funds from, or establish a revolving credit facility with, a financial institution. The sale of additional equity and debt securities may result in dilution to our stockholders. If we raise additional funds through the issuance of debt securities, such securities could have rights senior to those of our common stock and could contain covenants that would restrict our operations and possibly our ability to pay dividends. We may require additional capital beyond our currently-forecasted amounts. Any such required additional capital may not be available on reasonable terms, if at all.

Table of Contents**Dividends**

In February 2011, our Board of Directors approved a policy for the payment of quarterly cash dividends on our common stock. Future declarations of quarterly dividends and the establishment of future record and payment dates are subject to approval by our Board of Directors on a quarterly basis. The dividend activity for the periods presented is as follows:

Record Date	Payment Date	Per Share Amount	Dividend Payment (in thousands)
Fiscal Year 2018			
March 22, 2018	April 5, 2018	\$0.070	\$1,351
May 22, 2018	June 7, 2018	\$0.070	\$1,353
August 22, 2018	September 6, 2018	\$0.070	\$1,369
Fiscal Year 2017			
March 22, 2017	April 6, 2017	\$0.055	\$1,029
May 24, 2017	June 8, 2017	\$0.055	\$1,036
August 23, 2017	September 7, 2017	\$0.055	\$1,055
November 22, 2017	December 7, 2017	\$0.055	\$1,060

On October 4, 2018 our Board of Directors approved a quarterly cash dividend on our common stock of \$0.07 per share payable on December 6, 2018 to stockholders of record at the close of business on November 20, 2018, which will total approximately \$1.4 million.

Cash Flows

	Nine months ended September 30, (in thousands)		
	2018	2017	Net Change
Cash and cash equivalents	\$ 20,104	\$ 37,514	\$ (17,410)
Cash flows provided by (used in):			
Operating activities	\$ 12,935	\$ 16,098	\$ (3,163)
Investing activities	(8,312)	(4,780)	(3,532)
Financing activities	(3,113)	1,146	(4,259)

Net cash provided by operating activities. Net cash provided by operating activities was \$12.9 million for the nine months ended September 30, 2018, consisting of \$16.9 million in net income, adjustments for non-cash or non-operating items of \$0.4 million (including depreciation and amortization of \$3.1 million, stock-based compensation of \$1.8 million, provisions for inventory write-offs and doubtful accounts of \$0.5 million and a gain on divestiture of \$5.9 million) and also a net use of working capital of \$3.7 million. The net cash used for working capital was driven by an increase in inventory and other deferred costs of \$3.1 million, an increase in prepaid expenses and other assets of \$1.8 million, and a decrease in accounts payable and accrued expenses of \$0.3 million, all offset by a decrease in accounts receivable of \$1.5 million.

Net cash provided by operating activities was \$16.1 million for the nine months ended September 30, 2017, consisting of \$12.9 million in net income adjusted for non-cash items of \$5.2 million (including depreciation and amortization of \$3.0 million, stock-based compensation of \$1.8 million, and provisions for inventory write-offs and doubtful accounts

of \$0.4 million) and offset by changes in working capital of \$2.0 million. The net cash used for working capital was driven by increases in inventory of \$1.3 million, accounts receivable of \$0.1 million and prepaid expenses and other current assets of \$1.4 million, offset by a decrease in accounts payable and other liabilities of \$0.8 million.

Net cash used in investing activities. Net cash used in investing activities was \$8.3 million for the nine months ended September 30, 2018. This was primarily driven by an acquisition in the quarter for which we paid \$11.0 million, net purchases and sales of marketable securities of \$2.9 million and expenditures on equipment and technology of \$1.8 million, which were partially offset by proceeds from a business divestiture of \$7.4 million.

Table of Contents

Net cash used in investing activities was \$4.8 million for the nine months ended September 30, 2017. This was primarily driven by expenditures on leasehold improvements and equipment associated with the expansion of our Burlington facility.

Net cash used in financing activities. Net cash used in financing activities was \$3.1 million for the nine months ended September 30, 2018, primarily driven by cash dividends paid of \$4.1 million and payments related to prior acquisitions of \$1.2 million. These were partially offset by proceeds from stock option exercises of \$2.1 million net of shares repurchased to cover payroll taxes of \$0.7 million.

Net cash provided by financing activities was \$1.1 million for the nine months ended September 30, 2017, consisting of proceeds from stock option exercises of \$5.5 million, offset by dividend payments of \$3.1 million, shares repurchased for taxes on restricted stock vesting of \$0.8 million and payments related to prior acquisitions of \$0.4 million.

Contractual obligations. Our principal contractual obligations consist of operating leases and inventory purchase commitments, and have not changed significantly since December 31, 2017 as reported in our Annual Report on Form 10-K.

Off-Balance Sheet Arrangements

We did not have any off-balance sheet arrangements as of September 30, 2018. We do not currently have, nor have we ever had, any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. In addition, we do not engage in trading activities involving non-exchange traded contracts. As a result, we are not materially exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in these relationships.

Critical Accounting Policies and Estimates

We have adopted various accounting policies to prepare our consolidated financial statements in accordance with U.S. generally accepted accounting principles, or U.S. GAAP. Our most significant accounting policies are described in Note 1 to our consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017. With the exception of the adoption, effective January 1, 2018, of Accounting Standards Update (ASU) 2014-09, *Revenue from Contracts with Customers (Topic 606)* discussed in Note 1 to this Quarterly Report on Form 10-Q, there have been no material changes in our critical accounting policies during the nine months ended September 30, 2018. The preparation of our consolidated financial statements in conformity with U.S. GAAP requires us to make estimates and assumptions that affect the amounts reported in our consolidated financial statements and accompanying notes. Our estimates and assumptions, including those related to sales returns and discounts, share-based compensation, inventories, intangible assets, bad debts, and income taxes are reviewed on an ongoing basis and updated as appropriate. Actual results may differ from those estimates.

Recent Accounting Pronouncements

A summary of recent accounting pronouncements that may impact our financial statements upon adoption in future periods can be found in Note 1 to our financial statements included under Part 1, Item 1 of this Quarterly Report on Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

In the ordinary course of conducting business, we are exposed to certain risks associated with potential changes in market conditions. These market risks include changes in currency exchange rates and interest rates which could affect operating results, financial position and cash flows. We manage our exposure to these market risks through our regular operating and financing activities and, if considered appropriate, we may enter into derivative financial instruments such as forward currency exchange contracts, although we have not done so in 2018 or in recent years. There have been no material changes in our quantitative and qualitative market risks since the disclosure in our Annual Report on Form 10-K for the year ended December 31, 2017.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation and supervision of our Chief Executive Officer and Chief Financial Officer, is responsible for our disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified under SEC rules and forms. Disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to our principal executive

Table of Contents

officer and our principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. We design our disclosure controls and procedures to ensure, at reasonable assurance levels, that such information is timely recorded, processed, summarized and reported, and then accumulated and communicated appropriately.

Based on an evaluation of our disclosure controls and procedures as of September 30, 2018 our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at reasonable assurance levels.

Changes in Internal Control

There have been no changes in our internal control over financial reporting for the nine months ended September 30, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations of Internal Controls

Notwithstanding the foregoing, our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any system will succeed in achieving its stated goals under all potential future conditions. Over time, control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Part II. Other Information

Item 1. Legal Proceedings

In the ordinary course of business, we are from time to time involved in lawsuits, claims, investigations, proceedings, and threats of litigation relating to employment, product liability, commercial arrangements, contracts, intellectual property and other matters. While the outcome of these proceedings and claims cannot be predicted with certainty, there are no matters, as of November 2, 2018, that management believes would have a material adverse effect on our financial position, results of operations or cash flows.

Item 1A. Risk Factors

In addition to the information set forth in this report, you should consider the risks and uncertainties discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2017, which could materially affect our business, financial condition, or future results. There have been no substantive changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2017, which was filed with the Securities and Exchange Commission on March 9, 2018.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Recent Sales of Unregistered Securities

None.

Table of Contents**Issuer Purchases of Equity Securities**

Period	Issuer Purchases of Equity Securities			
	Total Number of Shares (or Units) Purchased (1)	Average Price Paid Per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Program	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that may yet be Purchased under the Plans or Program
July 1, 2018 through July 31, 2018	18,353	\$ 36.74	N/A	N/A
August 1, 2018 through August 31, 2018			N/A	N/A
September 1, 2018 through September 30, 2018			N/A	N/A
Total	18,353	\$ 36.74	N/A	N/A

(1) For the three months ended September 30, 2018, we repurchased 18,353 shares of our common stock to satisfy employees' obligations with respect to minimum statutory withholding taxes in connection with the vesting of restricted stock units.
