FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.

AMÉRICA MÓVIL S FIRST QUARTER OF 2006 FINANCIAL AND OPERATING REPORT

Mexico City, May 2, 2006 - América Móvil, S.A. de C.V. (América Móvil) [BMV: AMX] [NYSE: AMX] [NASDAQ: AMOV] [LATIBEX: XAMXL], announced today its financial and operating results for the first quarter of 2006.

- América Móvil s subscriber base topped 100.6 million in March, after net subscriber additions of 7.3 million in the first quarter. These exceeded the ones seen a year before by almost 40%, making it the best first quarter on record.
 - Colombia continued to lead the group in terms of net additions, with 2.1 million, followed by Mexico, with 1.7 million; Brazil, with 787 thousand; and the U.S., with 767 thousand. In practically all our operations first quarter net additions exceeded those of the same period of 2005.
 - First quarter revenues totaled 51 billion pesos, 26.4% more than a year before. Service revenues were up 29.0% annually and 4.6% sequentially, having increased sequentially in almost all of our subsidiaries.
 - Our EBITDA margin reached 36.2% in the quarter and was nearly four percentage points higher than that of the previous year. EBITDA came in at 18.3 billion pesos, representing an increase of 19.8% quarter-over-quarter and of 40.7% year-on-year.
 - Operating profits rose 50.9% over the previous year, to 12.4 billion pesos. They were equivalent to almost 25.0% of our revenues.
 - América Móvil generated a net profit of 9.9 billion pesos in the quarter, more than twice as large as the one observed in the same period of 2005. Profits represented 28 pesos cents per share and 52 dollar cents per ADR.
 - Net debt came down by 5.7 billion pesos in the period, thanks to strong cash generation and, to a more limited extent, foreign exchange gains. Capital expenditures totaled 6.5 billion pesos, and share buybacks and dividends, 2.3 billion pesos.
 - The Annual Shareholders Assembly approved a dividend payment of 0.10 pesos per share to be paid in a single installment in July 2006.
 - Towards the end of April, América Móvil obtained a five-year syndicated loan in the amount of US\$ 2 billion.
-

Relevant Events

During the first quarter of 2006 we have continued reducing the effective tariffs on voice airtime, both in nominal and real terms, in all of our markets. On average, tariffs in our Latin American operations are 56% lower than the average tariffs of the 30 countries that make up the OECD. Falling airtime prices, together with handset subsidies, have been key in stimulating the rise in wireless penetration in the region.

In Mexico our effective price per minute (voice) was equivalent to 1.48 pesos (13.6 dollar cents) at the end of March, having fallen by 9.6% in constant peso terms over the last 12-months and by 50.7% over the last five years. It now stands as one of the five lowest amongst OECD countries⁽²⁾.

For the most part (93%), the Mexican wireless market is based on the prepaid model, an important difference relative to practically all other OECD countries, including the U.S., where the prepaid segment is only 11% of the wireless market. Because of this, in comparing effective rates with the U.S. (which has the lowest tariffs within the OECD), for instance, adjustments must be made to allow for the effects of lower subsidies on handset prices and the non-existence of the calling-party-pays system in that market, which results in greater costs to subscribers on incoming calls. In the prepaid market itself, tariffs in Mexico are lower than in the United States.

The main Latin American countries have attained penetration rates of approximately 50% of the population. Penetration rates will continue to increase to the extent that the growth rates of the economies and the levels of employment lead to improvements in the purchasing power of the population. These would not only result in more clients; they would lead to greater consumption levels of our telecom services, including voice but also data services, such as short messages and a broad variety of new products.

Towards the end of April, América Móvil celebrated its Annual Shareholders Assembly, which approved the company's financial statements for the year 2005 and decreed the payment of a dividend of 0.10 pesos per share. The dividend will be paid in one installment in July 2006.

In the same month, an agreement was reached with Verizon Communications to acquire its ownership interests in Verizon Dominicana (100%), Telecomunicaciones de Puerto Rico Inc. (52%) and CANTV (28.51%), the latter through a joint venture equally owned with Telmex. The purchase prices for these stakes are US\$ 2.06 billion, US\$ 939 million and US\$ 676.6 million, respectively.

In Chile our subsidiary Smartcom obtained 25 MHz of spectrum in the 800 MHz band through an auction. It will be used for the new GSM network the company is rolling out, which can work on both the 850 and 1900 MHz frequencies.

América Móvil closed in April a U.S.\$2 billion syndicated loan. The loan has a tenor of five years, with one amortization payment at maturity. The interest rate on the loan is Libor plus 0.25%. Earlier, in February, América Móvil, through its Colombian subsidiary Comcel, issued a 10 year note in the Colombian market. The note, denominated in Colombian pesos, carries a coupon of 7.59%. The issue amount was the equivalent of US\$ 200 million.

Subscribers

América Móvil's subscriber base reached 100 million subscribers at the end of March, as the company gained 7.3 million wireless subscribers in the first three months of 2006, 39% more than in the same period a year before. Our lines total 102.6 million considering the fixed lines we have in Central America.

The pace of subscriber growth continued strong throughout the region, as shown by the 7.8% sequential increase in our subscriber base. In the larger countries, Mexico and Brazil, it expanded at a pace of approximately 4.5% quarter-over-quarter which resulted in 1.7 million and 787 thousand net subscriber additions respectively whereas in those where we have our smaller operations by subscribers, Uruguay and Paraguay, it grew at a rate of more than 30% sequentially.

The Andean region continued growing at a brisk pace. In Colombia, which had net additions of 2.1 million in the quarter, our subscriber base reached almost 16 million subscribers by the end of March. This represented a sequential increase of 15.3%. In Peru it expanded at a similar pace (13%), gaining 261 thousand clients to finish the quarter with 2.2 million subscribers. And in Ecuador, net additions amounted to 400 thousand subscribers, for a 10% sequential increase.

Argentina finished the quarter with 7.3 million subscribers, 10.2% more than in December, having obtained 677 thousand clients in the period. In Chile we ended the quarter with 1.9 million subscribers.

The consolidated subscriber base in Central America reached 4.4 million wireless subscribers, after gaining 436 thousand new clients in the first quarter. Honduras and Nicaragua experienced the faster rates of sequential growth within their region, nearly 16%. Together with 2.0 million fixed lines, our operations in Central America have a combined total of 6.4 million lines.

(2) Includes total subscribers weighted by the economic interest held in each company.

n.m. not meaningful

In the United States, Tracfone added 767 thousand subscribers in the period, ending the quarter with close to seven million subscribers. Net additions were up 68% relative to the ones obtained in the same period of 2005.

América Móvil Consolidated

With 7.3 million net subscriber additions, the first quarter of 2006 was our best first quarter ever in terms of subscriber growth. But whereas subscriber growth remains strong in absolute terms, it has begun to decelerate in relative terms from the highs that most operations observed in 2005.

Revenues topped 50.7 billion pesos in the quarter, expanding 26.4% year-on-year on the back of 29.0% service-revenue growth. Service revenues were up 4.6% in the quarter, as almost all operations registered increases in service revenues relative to the last quarter of 2005. These were particularly important in the U.S., where the sequential increase was 14.4%; in Colombia, where it was 10.3%; and in Argentina, where it reached 6.9% .

With revenues expanding at a brisk pace and subscriber growth decelerating in relative terms, subscriber acquisition costs have tended to decline relative to revenues, bringing about better EBITDA margins in practically all our operations. This means that the effort in EBITDA terms associated with maintaining a given level of subscriber growth has come down and will likely continue to fall if current trends remain in place.

At 18.3 billion pesos, EBITDA was up 19.8% in the quarter and 40.7% relative to the same period a year before, reflecting among other things cost control policies. The EBITDA margin climbed nearly 4 percentage points relative to the first quarter of 2005, to 36.2%, even as net subscriber additions were almost 40% greater year-on-year.

Noteworthy were the improvements in EBITDA margins observed over the same period in Mexico, Argentina, Brazil, and in Colombia. In the U.S. the EBITDA margin was down over the period, but net additions were up 68% over the first quarter of 2005.

Operating profits rose to 12.4 billion pesos, nearly 25.0% of revenues, having increased by 35.8% quarter-over-quarter and 50.9% annually.

A comprehensive financing income of 970 million pesos was obtained in the quarter, as foreign exchange gains more than offset net interest expenses. These gains arose from the appreciation of the Brazilian real and the depreciation of the Mexican peso vis-à-vis the U.S. dollar observed in the first quarter.

Altogether, América Móvil generated a net profit of 9.9 billion pesos in the quarter, which more than doubles the one obtained a year before. It represents 28 peso cents per share, or 52 dollar cents per ADR. Adjusting for the stock split that took place last July, net income per share was up by 117.3% year-on-year and, per ADR, by 129.5% .

Financial Debt of América Móvil

Millions of U.S. dollars

	Mar'06	Mar'05
Peso - denominated debt	2,787	1,489
<i>Bonds and other securities</i>	1,397	1,191
<i>Banks and other</i>	1,390	298
U.S. Dollar - denominated debt	3,523	3,648
<i>Bonds and other securities</i>	3,093	3,201
<i>Banks and other</i>	430	447
Debt denominated in other currencies	545	222
<i>Bonds and other securities</i>	392	196
<i>Banks and other</i>	153	26
Total debt	6,855	5,359
<i>Short-term debt and current portion of long-term debt</i>	1,971	494
<i>Long-term debt</i>	4,884	4,866

América Móvil's net debt was down 5.7 billion pesos in the quarter, to 51.4 billion pesos, partly stemming from foreign exchange gains but mostly resulting from our strong cash generation, which was more than sufficient to fully cover our capital expenditures 6.5 billion pesos and our share-buybacks and dividend payments, which together amounted to 2.3 billion pesos in the quarter.

Mexico

Telcel's subscriber base reached 37.6 million at the end of March 2006, 22.7% more than a year ago and 4.7% more than the previous quarter. Net additions of 1.7 million were only slightly below those registered in the same period of the previous year.

Revenues reached 24.4 billion Mexican pesos in the first quarter of 2006, up 18.6% from the same period a year ago. Service revenues climbed 19.2% year-on-year, ahead of equipment revenues, which grew at an annual rate of 15.4%. The average revenue per user during the period fell 3.6% in real terms but minutes of use picked-up 2.1% year-on-year.

EBITDA reached 12.3 billion pesos in the first three months of 2006 41.8% above last year's figures as both the cost of service and the cost of equipment fell relative to the same period a year ago. Strict cost controls allowed Telcel's EBITDA margin to reach 50.3% in the quarter, its highest level ever. EBITDA margins expanded by more than eight percentage points in a year.

Brazil

Claro's subscriber base grew 36.1% year-on-year to nearly 20 million clients in March of 2006. During the first quarter, net additions for our operations in Brazil totaled 787 thousand, 24.0% more than last year's.

Total revenues grew 7.2% year-on-year in the first quarter of 2006, to 1.5 billion reais, driven by service-revenues which increased by 19.2%.

Operating efficiencies and cost controls allowed Claro's EBITDA margin in the first quarter of 2006 to climb nine percentage points relative to the same period a year before, and 20 percentage points in comparison to the previous quarter, to reach 15.6% of revenues. EBITDA for the period amounted to 233 million reais.

Colombia

With nearly 16 million at the end of March, our subscriber base in Colombia was the fastest-growing one in absolute terms among those of our subsidiaries. It expanded by 2.1 million clients in the first quarter of this year.

First quarter revenues were up 61.0% year-on-year to reach 1.0 trillion Colombian pesos, with service revenues growing by 69.2% relative to the previous year. On a sequential basis, total revenues grew 6.1% due to strong service revenue expansion (10.3%) .

Comcel s EBITDA doubled relative to the previous year to reach 284 billion Colombian pesos. Margins expanded by 5.60 percentage points to 27.4% of revenues. In comparison to the fourth quarter of 2005, EBITDA increased by 24.9% and margins expanded by 4.1 percentage points.

Ecuador

Concel added 400 thousand clients in the first quarter, bringing its subscriber base to 4.5 million at the end of March. This represented an increase of 9.8% in the quarter and 70.7% year-on-year.

Revenues totaled 169 million dollars in the first quarter of 2006, 40.2% more than in the previous year. Equipment revenues were the most dynamic component, as Concel s net additions for the period exceed last year s by 29.0%, but service revenues rose nearly as fast as total revenues. EBITDA for the period totaled 40 million dollars up 4.0% from last year and margins reached 23.5% of revenues.

Peru

Our subscriber base in Peru ended March at 2.2 million, having increased by 261 thousand clients in the quarter, 49.4% more than a year before. Relative to the previous quarter, the base increased by 13.4%; in annual terms, it was up 73.2% .

In the first three months of 2006, Claro Peru s revenues reached 295 million soles. Falling subscriber acquisitions costs, stemming from fewer net additions in the first quarter, led to a strong sequential EBITDA expansion of 8.9% . EBITDA amounted to 94 million soles and was equivalent to 31.8% of revenues.

Central America

The wireless subscriber base in Central America expanded by 57.5% year-on-year, to 4.4 million clients. Net additions totaled 432 thousand in the quarter, 41.4% more than in the same period a year before. Subscriber growth was particularly noteworthy in Honduras and Nicaragua, as the former doubled its subscriber base and the latter increased it by 70% in the period. Including fixed-lines, which now exceed 2.0 million in the region, América Móvil managed 6.4 million lines in Central America.

Consolidated revenues in the region grew 14.6% annually to reach 360 million dollars in the first quarter of 2006. EBITDA totaled 186 million dollars through March, 12.0% above the one seen the year before and 2.6% higher than that of the previous quarter. The EBITDA margin reached 51.7% of total revenues.

United States

Trafone's subscriber base reached nearly 7.0 million in March after adding 767 thousand additional subscribers in the first quarter, 67.8% more than a year before.

Total revenues picked-up 33.6% relative to the same period last year and reached 309 million dollars. Relative to the previous quarter, service revenues increased by 14.4% sequentially helping bring about an expansion of 12.4% of total revenues.

EBITDA was breakeven in the first quarter in light of the strong subscriber expansion observed in the period. Compared to the previous quarter, when subscriber growth began to accelerate, the EBITDA margin improved by 9.2 percentage points.

Glossary of Terms

ARPU Average Revenue per User. The ratio of service revenues in a given period to the average number of wireless subscribers in the same period. It is presented on a monthly basis.

Capex Capital Expenditure. Accrued capital expenditures related to the expansion of the telecommunications infrastructure.

Churn Disconnection Rate. The ratio of wireless subscribers disconnected during a given period to the number of wireless subscribers at the beginning of that period.

EBIT Earnings Before Interest and Taxes, also known as Operating Profit.

EBIT margin The ratio of EBIT to total operating revenue.

EBITDA Earnings Before Interest, Taxes, Depreciation, and Amortization.

EBITDA margin The ratio of EBITDA to total operating revenue.

EDGE Enhanced Data rates for GSM Evolution. A technology that gives GSM the capacity to handle data services for the third generation mobile telephony.

EPS (Mexican pesos) Earnings per share. Total earnings in Mexican pesos divided by total shares.

Earnings per ADR (US\$) Total earnings in U.S. dollars divided by total ADRs equivalent.

Equity subscribers Subscribers weighted by the economic interest held in each company.

GSM Global System for Mobile communications. It is the world's leading and fastest growing mobile standard.

GPRS General Packet Radio Service. Enables GSM networks to offer higher capacity, Internet-based-content and packet-based data services. It is a second generation technology.

Gross additions Total number of subscribers acquired during the period.

Licensed pops Licensed population. Population covered by the licenses that each of the companies manage.

Market share A company's subscriber base divided by the total number of subscribers in that country.

MOU Minutes of Use per subscriber. The ratio of wireless traffic in a given period to the average number of wireless subscribers in that same period. It is presented on a monthly basis.

Net subscriber additions The difference in the subscriber base from one period to another. It is the different between gross additions and disconnections.

Net debt Total short and long term debt minus cash and marketable securities.

Net debt / EBITDA The ratio of total short and long term debt minus cash and securities to trailing 12-month income before interest, taxes, depreciation and amortization.

Prepaid Subscriber that may purchase airtime to recharge a cellular phone. The client does not hold a contract with the company for voice and data services.

Postpaid Subscriber that has a contract for the use of airtime. The client has no need of activating airtime, it is done so immediately.

Push-to-talk Enables compatible mobile phones to function like two-way radios.

SMS Short Message Service.

SAC Subscriber Acquisition Cost. The sum of handset subsidies, marketing expenses and commissions to distributors for handset activation. Handset subsidy is calculated as the difference between equipment cost and equipment revenues.

Wireless penetration The ratio of total wireless subscribers in any given country divided by the total population in that country.
