A free translation from Portuguese into English of Review Report of Independent Auditors on Quarterly Information prepared in accordance with the accounting practices adopted in Brazil and with specific standards established by the Brazilian Institute of Independent Auditors (IBRACON), in conjunction with the National Association of State Boards of Accountancy (CFC)

**Special review report of independent auditors**

The Board of Directors and Shareholders

**Gol Linhas Aéreas Inteligentes S.A.**

São Paulo SP

- 1) We have reviewed the accounting information contained in the Quarterly Information (ITR), individual and consolidated, of Gol Linhas Aéreas Inteligentes S.A. for the three-month period ended March 31, 2009, including the balance sheet and the statements of income, cash flows and value added, the performance report and notes to quarterly information. This quarterly information is the responsibility of the Company's management.
- 2) We conducted our review in accordance with specific standards set forth by the Brazilian Institute of Independent Auditors (IBRACON), in conjunction with the National Association of State Boards of Accountancy (CFC), and mainly comprised: (a) questioning and discussing with management members responsible for the Company's accounting, operating and finance areas in relation to the criteria adopted when preparing the Quarterly Information; and (b) reviewing information and subsequent events that had, or may have, significant effects on the Company's financial position and operations.
- 3) Based on our reviews, we are not aware of any other material changes that shall be made in accounting information contained in the aforementioned Quarterly Information, so as to comply with accounting practices adopted in Brazil and rules from the Brazilian Securities and Exchange Commission (CVM), applicable to the preparation thereof.
- 4) As mentioned in Note 2, due to changes in accounting practices adopted in Brazil during 2008, the statements of income, cash flows and value added for the three-month period ended March 31, 2008, presented for comparison purposes, were adjusted and are being restated, as provided for by NPC 12 Accounting Practices, Changes in Accounting Estimates and Correction of Errors, approved by CVM Rule No. 506/06.
- 5) Accounting practices adopted in Brazil are, in certain significant respects, different from the International Financial Reporting Standards (IFRS). Information relating to the nature and effect of these differences are stated in Note 2 to the Quarterly Information.

São Paulo, May 13, 2009.

**1. Business overview**

Gol Linhas Aéreas Inteligentes S.A. (the Company, Parent Company or COMPANY) is a joint stock corporation organized under Brazilian law. The Company's object is exercising shareholding control over VRG Linhas Aéreas S.A. (VRG) and, through subsidiary or associated companies, engage in the following activities: (i) regular and non-regular domestic and international airline transportation of passengers, cargo or mail baggage, in conformity with concessions granted by the appropriate authorities; and (ii) complementary airline transportation services involving the chartering of passenger, cargo and mail services.

The Company's shares are traded on the New York Stock Exchange - NYSE and the São Paulo Stock Exchange BOVESPA. The Company adopts BOVESPA's Level 2 Differentiated Corporate Practices and its shares are included in the indexes of Shares with Differentiated Corporate Governance - IGC and Shares with Differentiated Tag Along Rights - ITAG, which were created by the São Paulo Exchange to differentiate companies that undertake to adopt differentiated corporate governance practices.

On March 20, 2009 the Board of Directors has approved the capital increase of the Company in the amount of R\$203,531 and the issuance of 26,093,722 shares, at price of R\$7,80 per share, comprising of 6,606,366 common shares and 19,487,356 preferred shares, nominatives and without par value.

**2. Basis for preparation and presentation of the Quarterly Information**

Authorization to conclude these Quarterly Information was granted at the meeting of the Board of Directors held on May 11, 2009.

The Quarterly Information of the Parent Company and its subsidiaries for the period ended March 31, 2009 have been prepared in accordance with accounting principles generally accepted in Brazil (BR GAAP), the rules of the Brazilian Securities Commission - CVM, the Chart of Accounts of the National Civil Aviation Agency - ANAC, the technical pronouncements of the Accounting Pronouncements Committee (CPC), and pursuant to the provisions contained in the Brazilian Corporation Law, as recently altered by Law No. 11.638/07 and Provisory Measure No. 449/08, aligned with specific international accounting policies for the airline industry, based on international accounting standards in the absence of specific local rules applied in accordance with the annual financial statements of the year ended December 31, 2008.

 Periods from January 1, to March 31, 2009 and 2008  
 (Expressed in thousands of Reais, except as indicated otherwise)

**2. Basis for preparation and presentation of the Quarterly Information--Continued**

*Effects of the initial adoption of Law No. 11.638/07 and MP No. 449/08 as of March 31, 2009:*

The statement of income for the period ended March 31, 2008, is being restated to reflect the effects of initial adoption of Law No. 11.638/07 and MP No. 449/08, and therefore differ from that published on April 30, 2008. The effects on the results are described and quantified below:

	<b>Results for the period</b>
Balance at March 31, 2008 before adoption of Law No. 11.638/07 and MP No. 449/08	<b>(74,098)</b>
Finance leases, net of depreciation	546
Lease return conditions	57,781
Maintenance deposits	10,521
Write-off of deferred charges	(728)
Share-based payments	(1,137)
Financial instruments	380
Aircraft sale-leaseback transactions	409
Other items	17,539
Effect of IRPJ and CSLL on adjustments	(29,393)
Balance at March 31, 2008 after adoption of Law No. 11.638/07 and MP No. 449/08	(18,179)

Effects of new accounting pronouncements

Based on the draft of new accounting pronouncements issued by CPC Accounting Pronouncements Committee that are in public hearing, the Company identified the following technical pronouncements that will impact on the financial statements of the Company, with mandatory application on the financial statements of the financial year ended December 31, 2010:

- CPC 15 Business Combinations
- CPC 27 Fixed Assets
- CPC 16 Inventories
- CPC 20 Borrowing Costs
- CPC 21 Interim Financial Reporting

The Company will continue evaluating the effects of new pronouncements and future regulations, if any, applicable to the preparation of its financial statements of the year ended December 31, 2009.

**2. Basis for preparation and presentation of the Quarterly Information--Continued**Reconciliation with IFRS

The Company's preferred stock is traded in the form of American Depositary Shares (ADS) on the New York Stock Exchange (NYSE), in the United States of America; accordingly, the Company is subject to the rules of the US Securities and Exchange Commission (SEC). In order to provide information on a single and consistent basis and at the same time meet regulatory requirements of all the markets where its shares are traded, in 2008 the Company adopted the international accounting standards issued by the International Accounting Standards Board (IASB), thus benefiting the users of the information and favoring the process of adherence to Law No. 11.638/07 in the preparation of the Company's Financial Statements for the year ended December 31, 2008. As permitted by the SEC and in order to meet the information needs of the market in which it operates, the Company is disclosing its financial statements under the Brazilian Corporation Law, as well as those pursuant to International Financial Reporting Standards (IFRS), on a simultaneous basis.

Considering the current stage of the convergence of accounting principles generally accepted in Brazil (BR GAAP) with international accounting standards, there are still differences between the Company's financial statements under Brazilian law and those prepared according to the rules of the International Accounting Standards Board (IASB). As of March 31, 2009, a reconciliation of income for the period and shareholders' equity is as follows:

	<b>Shareholders equity</b>	<b>Results for the period</b>
<b>Per Corporation Law</b>	<b>1,478,167</b>	<b>54,579</b>
Mileage program	(19,277)	10,386
Effects of acquisition of companies	(238,707)	-
Deferred income taxes	2,053	(3,531)
<b>Per IFRS</b>	<b>1,222,236</b>	<b>61,434</b>

Financial assets available for sale	<b>42,658</b>	52,264	<b>194,194</b>	213,932
Hedge of foreign currency cash flow	-	-	-	7,035
	<b>42,658</b>	52,264	<b>194,194</b>	220,967

The financial assets classified as available for sale are comprised of exclusive funds, the portfolio of which includes investments in certificates of bank deposit (CDB s), FIDC, box operations, public bonds, fixed income securities, swap arrangements and other investments.

The cash flow hedge consists of future derivative financial instruments and options for purchase of U.S. Dollars booked in equity or compensation accounts, aimed at managing the Company to market and exchange rate risks, as detailed in Note 20.

The restricted cash represents guarantee margin deposits linked to hedge operations and BNDES and BDMG loans and includes the remuneration on the investments.

Liabilities Current	-	-	-	-
Liabilities Non-current	<b>47,763</b>	41,032	<b>373,387</b>	327,738

The Company and its subsidiary have IRPJ tax losses and negative CSLL results in calculating taxable income that are offsettable against 30% of the taxable income accrued each year, without any final deadline, in the following amounts:

Parent Company	Subsidiary (VRG)
----------------	------------------

	<b>03.31.2009</b>	<b>12.31.2008</b>	<b>03.31.2009</b>	<b>12.31.2008</b>
Accumulated IRPJ tax losses	<b>150,452</b>	144,786	<b>1,179,939</b>	1,183,236
Negative CSLL results	<b>150,452</b>	144,786	<b>1,179,939</b>	1,183,236

On March 31, 2009, the tax credits resulting from accumulated IRPJ tax losses, negative CSLL results and temporary differences were recorded based on expectations for future taxable income of the Parent Company and its subsidiaries, within the legal limits. company Management believes that with the operational structuring of the companies and after the corporate restructuring described in Note 8, it is probable that the future taxable income of subsidiary VRG Linhas Aéreas S.A. will be sufficient to realize its tax credits recognized in the financial statements.

	03.31.2009	12.31.2008
VRG Linhas Aéreas S.A.	<b>748,403</b>	699,923

Description of acquisition of VRG:

As a result of the acquisition of VRG, on April 9, 2007, the total goodwill calculated on the acquisition, in the amount of R\$ 980,223 was determined based on the shareholders' equity of the company acquired, reflecting all the assets and liabilities identified and measurable existing as of the acquisition date, excluding capitalizable credits with respect to the former stockholder in the amount of R\$ 192,795. As described in Note 4, as a result of the application of Law No. 11.638, the goodwill arising from the acquisition of VRG, previously classified under the heading Investments, began to be classified under Intangible assets.

On June 25, 2008, the federal government's anti-trust board (CADE) approved the acquisition and, on September 23, 2008, the ANAC approved the request for authorization to carry out the corporate restructuring of the Company, joining its subsidiaries GOL Transportes Aéreos S.A. ( GOL ) and VRG Linhas Aéreas S.A. ( VRG ) into a single airline company, VRG Linhas Aéreas S.A., that assumed the rights and obligations of GOL.

		3,255,819	(257,064)	2,998,755	2,998,755

The advances for acquisition of aircraft, net of returns, refer to the pre-payments made based on contracts with the Boeing Company for acquisition of 55 next generation 737-800 aircraft (58 aircraft in December 31, 2008), in the

amount of R\$ 957,932 (R\$957,204 in December 31,2008), including the interest and charges capitalized in the amount of R\$32,520 (R\$ 133,955 in December 31, 2008).

As described in Note 11, as of March 31, 2009, the advances for acquisition of aircraft, in the amount of R\$ 568,960, are linked to loan contract guarantees.

**GOL LINHAS AÉREAS INTELIGENTES S.A.**

 Periods from January 1, to March 31, 2009 and 2008s  
 (Expressed in thousands of Reais, except as indicated otherwise)

**10. Intangible Assets**

	<b>Defined life span</b>	<b>Undefined life span</b>	
	<b>Software</b>	<b>Goodwill</b>	<b>Net Balance</b>
Useful life span	5 years	-	
Balances as of December 31, 2008	44,067	980,223	1,024,290
Additions	3,235	-	3,235
Amortization	(2,435)	-	(2,435)
<b>Balances as of March 31, 2009</b>	<b>44,867</b>	<b>980,223</b>	<b>1,025,090</b>

The total goodwill calculated upon the acquisition of VRG Linhas Aéreas S.A., in the amount of R\$ 980,223, was determined based on the balance sheet of the acquired company, reflecting all the assets and liabilities identified and measurable existing as of the acquisition date, excluding credits capitalizable with respect to the former stockholder in the amount of R\$ 192,795. The goodwill on acquisition of VRG is supported by expectations for future profits, pursuant to technical studies prepared by independent specialists based on economic-financial premises, and the amortization criterion defined was to amortize it in proportion to the expected benefits to be accrued over a period of 10 years from the VRG acquisition date, as from the month in which the economic benefits begin to be effectively generated through restructuring of operations. Even in light of the current adverse economic scenario, management has not identified any indicators of loss of economic substance of the goodwill (i.e. no impairment), the economic benefits of which have been measured based on the value in use of the unit generating consolidated cash, including all the revenues generated by the additional operating capacity resulting from this acquisition.

The Company appraised the recovery of the book value of the amounts of goodwill based on their value in use, using the discounted cash flow model for the unit generating consolidated cash. The process of estimating the value in use involves employment of premises, judgments and estimates of future cash flows, growth rates and discount rates. The premises regarding the cash flow and future growth projections are based on the annual budget and on the Company's long-term business plan, as approved by the Board of Directors, as well as on comparable market data, and represent the management's best estimate as to the economic conditions that should prevail over the economic useful life span of the set of assets that provide generation of the cash flows.

**GOL LINHAS AÉREAS INTELIGENTES S.A.**

Notes to the Quarterly Information - ITR  
Periods from January 1, to March 31, 2009 and 2008  
(Expressed in thousands of Reais, except as indicated otherwise)

**10. Intangible Assets--Continued**

The main key premises used in estimating the value in use, of which the most sensitive is the recovery value of the assets, are described as follows:

Use of the discounted cash flow model for appraisal of the value in use;

Discount rate that is derived from the weighted average rate for cost of the Company's capital, adjusted for specific market risks;

Long-term growth rate that reflects the market consensus for the Company's business;

The recovery testing conducted of the Company's intangible assets did not result in the need for recognition of losses, inasmuch as the estimated market value exceeds their net book value as of the appraisal date.

Based on the sensitivity analyses of the projected economic scenarios, in the event there are shifts in the key premises used in estimating the value in use of the cash generating unit, such changes would not result in a recoverable amount that is less than the book value of the goodwill and other intangible assets as of the appraisal date.

**11. Loans and Financings--Continued****Perpetual and senior notes**

The fair values of the senior notes and perpetual bonds as of December 31, 2008, reflecting the frequent readjustment of the market quotations for these instruments, based on the exchange rate in effect on the balance sheet closing date, are as follows:

	<b>Consolidated</b>	
	<b>Book</b>	<b>Market</b>
Senior notes	477,852	244,615
Perpetual bonds	411,027	175,093

**Restrictive covenants**

The loan and financing agreements with the IFC and BNDES call for certain obligations and restrictions, including requirements for maintenance of defined liquidity ratios and coverage of financial expenses. In previous period, the Company was not in compliance with two of the financial ratios established in such agreements, though it managed to obtain the specific consent of the respective creditors allowing it to maintain the classification of the respective debts under long-term liabilities.

As regards the BNDES, according to the consent obtained, the Company is to submit a letter of bank guarantee within the deadlines and on the terms established for as long as it remains non-compliant with the ratios agreed upon.

**12. Advance for Ticket Sales**

As of March 31, 2009, the balance of advance for ticket sales is R\$422,049 (R\$572,573 as of December 31, 2008), represented by 1,571,755 (2,010,347 as of December 31, 2008) coupons of tickets sold and not yet used, with average usage period of 69 days (80 days on December 31, 2008).

**GOL LINHAS AÉREAS INTELIGENTES S.A.**

Notes to the Quarterly Information - ITR  
 Periods from January 1, to March 31, 2009 and 2008  
 (Expressed in thousands of Reais, except as indicated otherwise)

**13. Mileage Program**

As of March 31, 2009 the Company's mileage program Smiles included 2,789,230 (2,953,050 on December 31, 2008) estimated laps earned by participants that have not yet been redeemed.

The changes in the balance of mileage program obligations, considering the number of miles accumulated, is shown as follows:

Balances as of December 31, 2008	18,399
Miles granted and accumulated	35,404
Miles redeemed and used or expired	(36,556)
<b>Balances as of March 31, 2009</b>	<b>17,247</b>

The program's benefits consist of the right to use miles accrued for exchange for tickets or other benefits and privileges such as upgrade of class on flights, bonuses for miles flown, exclusive service center, differentiated check-in service, greater baggage and access to VIP rooms at airports, pursuant to the program's regulations. The miles accrued by participants remain valid for three years, counting from the month they were issued, whereas tickets issued based on usage of miles are valid for one year.

**14. Provision for Contingencies**

As of March 31, 2009 the Companhia and its subsidiaries are party to court cases and administrative complaints, broken down as follows: approximately 1,110 administrative complaints or claims, 9,759 civil suits, 4,459 labor grievance cases, of which 1,067 administrative processes, 9,169 civil suits and 814 labor cases arose from the Company's own operations. The remaining cases are the result of claims recognized when VRG succeeded the former airline company Varig.

The estimated obligations resulting from the civil and labor suits are shown as follows:

	<b>Consolidated</b>	
	<b>03.31.2009</b>	<b>12.31.2008</b>
Civil	<b>20,684</b>	20,898
Labor	<b>52,064</b>	51,425
	<b>72,748</b>	72,323

The deposits in court relating to the provisions for labor and civil contingencies correspond to R\$21,750 and R\$1,633, respectively (R\$18,189 and R\$1,605 as of December 31, 2008, respectively).

Notes to the Quarterly Information - ITR  
 Periods from January 1, to March 31, 2009 and 2008  
 (Expressed in thousands of Reais, except as indicated otherwise)

**14. Provision for Contingencies--Continued**

The Company is claiming in a lawsuit that the state value-added tax on circulation of goods and services (ICMS) should not be levied on the importation of aircraft and engines, on the basis of lease agreements without purchase options, operations that are carried out with the lessors headquartered in foreign countries. As Company management sees it, such operations are merely rentals, with express contractual obligation to return the asset after the lease expires. Since the asset will never become Company property, management argues, there is no circulation of goods and thus not ICMS tax-triggering event. The estimated aggregate amount at dispute in the cases underway is R\$ 204,271 as of March 31, 2009 (R\$201,760 as of December 31, 2008), monetarily updated and not including late payment charges.

Based on the interpretation of the issue by its legal counsel, and further backed up by suits of the same nature judged in favor of taxpayers at the Superior Court of Justice (STJ) and Federal Supreme Court (STF) in the second quarter of 2007, management believes that chances of loss are remote. Even though the result of such suits and processes cannot be predicted, management's opinion, backed up by inquiries of its external legal counsel, is that the final decision in these suits will not have a materially adverse effect on the Company's financial position, results of operations and cash.

There are other cases underway in the amount of R\$ 4,737, where the risks of loss have likewise been ranked as remote by the Company's legal counsel.

	<b>100.00%</b>	<b>100.00%</b>	<b>100.00%</b>	100.00%	100.00%	100.00%

The authorized capital stock as of March 31, 2009 is R\$ 2,000,000. Within the authorized limit, the Company's Board of Directors may decide to increase the capital stock irrespective of amendment to the Bylaws, through issuance of shares, without maintaining proportion between the different types of shares. The Board of Directors is to set the terms of issue, including price and pay-in deadline. Also at the discretion of the Board of Directors, preference rights may be excluded or the period for exercise thereof may be reduced in issuance of preferred shares of capital stock. Placement of the preferred shares may be made through sale on the stock exchange or through public subscription, or further through exchange of shares as part of a public offer for acquisition of control, in the manner provided by law. Under the provisions of the Company's Bylaws, it is forbidden to issue minority shares.

The preferred shares do not vest voting rights, except in the event of the occurrence of specific facts established by law. Such shares vest the following preferences: priority in the event of reimbursement of capital, without premium, and the right to be included in public offerings as a result of sale of control at the same price per share as the control block, with assurance of a dividend that is at least equal to that paid to the holders of common shares.

**GOL LINHAS AÉREAS INTELIGENTES S.A.**

Periods from January 1, to March 31, 2009 and 2008  
(Expressed in thousands of Reais, except as indicated otherwise)

**16. Shareholders Equity--Continued**

a) Capital stock--Continued

In March 20, 2009 the Board of Directors has approved the capital increase of the Company in the amount of R\$203,531,031.60 and the issuance of 26,093,722 shares, comprising 6,606,366 common shares and 19,487,356 preferred shares. The issuance price for the common and preferred shares is fixed at R\$ 7.80 per share, according to the quotation of the shares in the São Paulo Stock Exchange on March 20, 2009, verified after the closing of the trading session, in accordance with Article 170, Paragraph 1, Item III of the Law No. 6,404/76. The issuance price is equivalent to 90.9% of the average closing price of the preferred shares during the last 30 trading sessions, which was R\$ 8.58, and to 83.2% of the average closing price during the last 60 trading sessions, which was R\$ 9.37. As of March 31, 2009 total amount subscribed and paid in was R\$ 100,084, amounting to 12,831,282 shares. However, the capital increase is anticipated to be concluded in May 2009, when the all shares will be effectively issued.

The quotation of the shares of Gol Linhas Aéreas Inteligentes S.A. as of March 31, 2009 on the BOVESPA corresponded to R\$ 6.65 and on the NYSE to US\$ 2.83. The book value of each shares as of March 31, 2009 is R\$7.31 (R\$6.45 as of December 31, 2008).

b) Dividends

Under the Company's Bylaws, shareholders are guaranteed a minimum mandatory dividend of 25% of the net income for each year, adjusted in the manner provided by Article 202 of the Brazilian Corporation Law

c) Treasury shares

At a meeting held January 28, 2008, the Board of Directors approved a program to buy back preferred shares, in order to generate value for shareholders, and maintain it as Treasury shares and subsequently sell and/or cancel, without reduction of the capital stock. The total number of shares to be acquired is up to 5,000,000 (five million), equivalent to 5.3% of the shares of this class. Pursuant to CVM Instruction No. 10/80, the deadline for carrying out this operation is 365 days from January 28, 2008.

**19. Commitments**

The Company has a purchase agreement with Boeing for acquisition of next generation Boeing 737-800 aircraft. As of March 31, 2009 there were 92 firm orders and 36 purchase options. The approximate value of the firm orders is R\$ 14,501,012 (corresponding to US\$ 6.3 billion), based on the list price of the aircraft (which excludes the contractual construction discounts), including estimates for contractual price increases during the construction phase of the aircraft and guarantees on deposit. The commitments for purchase of aircraft, including the portion that will be financed by long-term loans with guarantee of the aircraft by the US Exim Bank, correspond to approximately 85% of the total cost of the aircraft.

The Company has been making the payments relating to the acquisition of the aircraft using its own funds, loans, cash generated on its operations, short- and medium-term credit lines and supplier financing.

**GOL LINHAS AÉREAS INTELIGENTES S.A.**

Notes to the Quarterly Information - ITR  
 Periods from January 1, to March 31, 2009 and 2008  
 (Expressed in thousands of Reais, except as indicated otherwise)

**19. Commitments--Continued**

The following table shows a summary of the payments relating to aircraft purchase commitments for the next few years :

	<b>Up to one year</b>	<b>Between one and five years</b>	<b>Over five years</b>	<b>Total</b>
Advances for acquisition of aircraft	378,954	1,473,213	-	1,852,167
Commitments for purchase of aircraft	2,205,791	10,544,690	1,750,531	14,501,012
<b>Total</b>	<b>2,584,745</b>	<b>12,017,903</b>	<b>1,750,531</b>	<b>16,353,179</b>

The Company leases its entire fleet of aircraft through a combination of operating and finance lease agreements. As of March 31, 2009 the total fleet was comprised of 120 aircraft, of which 5 737-300 aircraft are in the process of being returned, 95 are classified as operating lease and 25 finance lease. During the period ended March 31, 2009, the Company received no aircraft on the basis of financial leasing operations and no return of 737-300 aircraft

a) Finance leases

Future payments of installments under finance lease agreements as December 31, 2008 are detailed below:

	<b>03.31.2009</b>	<b>12.31.2008</b>
Up to one year	<b>220,221</b>	222,222
Between one and five years	<b>870,331</b>	881,186
Over five years	<b>911,503</b>	972,318
<b>Total minimum lease payments</b>	<b>2,002,054</b>	2,075,726
Less total interest	<b>(469,196)</b>	(502,121)
<b>Present value of minimum lease payments</b>	<b>1,532,859</b>	1,573,605
Less short-term portion	<b>(156,488)</b>	(157,948)
<b>Long-term portion</b>	<b>1,376,371</b>	1,415,657

The Company has extended the maturity of the financing for some of its leased aircraft to 15 years by using the SOAR structure, which is a mechanism for lengthening the period for amortizing and paying off the financing and permits calculated drawdowns to be made for settlement by payment in full at the end of the lease agreement. As of March 31, 2008 the value of the drawdowns made for payment in full upon termination of the lease agreement is R\$19,191 (R\$13,556 as of December 31, 2008).

 Periods from January 1, to March 31, 2009 and 2008  
 (Expressed in thousands of Reais, except as indicated otherwise)

**19. Commitments--Continued****b) Operating leases--Continued**

The Company leases aircraft, airport terminals, other airport installations, offices and other equipment on the basis of operating lease agreements that expired between 2009 and 2020.

The future payments of the operating lease agreements that cannot be cancelled are denominated in US\$ as of March 31, 2009 and are shown as follows:

	<b>03.31.2009</b>	<b>12.31.2008</b>
Up to one year	<b>553,855</b>	916,298
Between one and five years	<b>2,340,288</b>	3,080,918
Over five years	<b>630,982</b>	678,204
Total minimum lease payments	<b>3,525,125</b>	4,675,420

**20. Risks Inherent in Company Operations and Sensitivity Analysis of Derivative Financial Instruments**

The Company is exposed to market risks as a result of its operations, chiefly the effects of changes in the price of fuel and exchange, credit and interest rate risks.

The Company uses derivative financial instruments in order to minimize these risks based on its formal policy for management of risks, which are under the guidance of its executive officers, Risk Policies Committee and Board of Directors. The Company's Risk Management Policy establishes controls and limits, as well as other tracking techniques, chiefly mathematical models adopted to constantly monitor exposures, in addition to expressly prohibiting the carrying out of speculative operations involving derivative instruments that are only used for hedge purposes. The Company does not conduct operations with exotic derivative instruments or any other type of operation involving leverage.

The exclusive investment funds of which the Company and its subsidiaries are members are used as vehicles to contract risk coverage according to the Company Risk Management Policy.

The relevant information relating to the main risks that affect Company operations are detailed as follows:

**GOL LINHAS AÉREAS INTELIGENTES S.A.**

Notes to the Quarterly Information - ITR  
 Periods from January 1, to March 31, 2009 and 2008  
 (Expressed in thousands of Reais, except as indicated otherwise)

**20. Risks Inherent in Company Operations and Sensitivity Analysis of Derivative Financial Instruments--Continued**a) Fuel price risk

Airline companies are exposed to the effects of hikes in the prices of aviation fuel. In the first quarter of 2009 and 2008, consumption of aviation fuel represented 31.6% and 42.7%, respectively, of the Company's cost of services rendered, selling and administrative expenses. To manage this risk, Company uses futures contracts, swaps and options for oil and its byproducts. The object of such fuel hedges is to protect operating expenses on fuel. As aviation fuel is not traded on a commodities exchange, the liquidity and alternatives for contracting hedge operations for this item are limited. Even so, the Company has discovered commodities that are effective in hedging its aviation fuel costs, chiefly crude oil. Historically, oil prices have been highly correlated to aviation fuel prices, which makes petroleum derivatives effective in offsetting the prices of aviation fuel, so as to provide short-term protection in relation to sharp rises in fuel prices. The futures contracts are listed on the New York Mercantile Exchange (NYMEX), the swaps are contracted with first tier international banks and options can be listed on the NYMEX, as can those contracted with first tier international banks.

The Company's derivative contracts as of March 31, 2009 and 2008 are summarized as follows (in thousands, except as indicated otherwise):

	<b>03.31.2009</b>	<b>12.31.2008</b>
Fair value of derivative financial instruments at end of period (R\$)	<b>2,386</b>	(102,387)
Average term (months)	<b>4</b>	6
Volume covered by derivative financial instruments designated as hedge (barrels)	<b>1,355</b>	2,046
<b>Period ended March 31:</b>	<b>2009</b>	<b>2008</b>
Gains (losses) with effectiveness derivative financial instruments designated as a hedge and are recognized as a rectifier of expenses on aviation fuel (R\$)	-	13,785
Gains (losses) with ineffectiveness derivative financial instruments designated as a hedge and are recognized as a financial expense (R\$)	<b>(42,346)</b>	1,203
Percentage of consumption covered by hedge during the period	<b>12%</b>	60%

Company uses short- and long-term derivative financial instruments and maintains positions for future months. Nevertheless, the Company does not contract hedges to cover all of its future consumption of aviation fuel, which therefore makes it subject to the risks inherent in the volatility of aviation fuel prices in relation to that portion of its consumption that is not covered by hedges. As of March 31, 2009, the Company has a combination of call options and collar structures to hedge approximately 23%, 29% and 16% of its aviation fuel consumption for the second, third and fourth quarters of 2009, respectively.

**GOL LINHAS AÉREAS INTELIGENTES S.A.**

Notes to the Quarterly Information - ITR  
Periods from January 1, to March 31, 2009 and 2008  
(Expressed in thousands of Reais, except as indicated otherwise)

**20. Risks Inherent in Company Operations and Sensitivity Analysis of Derivative Financial Instruments--Continued**

a) Fuel price risk--Continued

The Company classifies the fuel hedge derivative financial instruments as cash flow hedges and recognizes the variations in the fair market value of the effective derivative financial instruments under shareholders' equity until such time as the fuel covered by the hedge is consumed. The effectiveness of the derivative financial instruments designated as fuel hedges is estimated based on statistical correlation methods or by the proportion of the variation in fuel expenses that are offset by the variation in the fair market value of the derivatives. The results of effective hedges are booked as a reduction or increase in the acquisition cost of fuel, and the results of hedges that are not effective are recognized as a financial income or expense. Ineffective hedges occur when the variation in the value of the derivatives is not between 80% and 125% of the variation in the price of the fuel covered by the hedge. When the aviation fuel is consumed and the respective derivative financial instrument is settled, the unrealized gains or losses booked under shareholders' equity are recognized in the income statement as rectifying the expenses on fuel.

The Company is exposed to the risk that periodic variations in the fair value of the derivative financial instruments contracted may not be effective to offset the variations in the price of aviation fuel, or that the unrealized gains or losses of the derivative financial instruments may no longer be qualified for remaining under shareholders' equity. As the derivative financial instruments become ineffective, the contracts are recognized in income for the period as financial income or expenses.

Ineffectiveness is inherent in transactions conducted in order to hedge against exposures by means of derivative financial instruments based on commodities related to petroleum, especially in time of high volatility of refined products price. When the Company determines that certain contracts in effect are not going to be effective in the period remaining through their expiration date, any alterations in the fair market value of the derivative financial instruments are recognized in results for the period in which the variation occurs.

**GOL LINHAS AÉREAS INTELIGENTES S.A.**

Notes to the Quarterly Information - ITR  
 Periods from January 1, to March 31, 2009 and 2008  
 (Expressed in thousands of Reais, except as indicated otherwise)

**20. Risks Inherent in Company Operations and Sensitivity Analysis of Derivative Financial Instruments--Continued**a) Fuel price risk--Continued

During the three month period ended March 31, 2009, the Company did not recognize net gains resulting from settlement of hedge contracts that were ranked as effective, rectifying expenses on fuel (R\$13,785 in gains for the year ended March 31, 2008), and recognized net losses of R\$42,346 (gains of R\$1,203 in March 31, 2008) under financial expenses, related to the ineffectiveness of the financial instruments designated as hedges. The loss of R\$13,451 were also registered in financial expenses at the end of 2008 totaled a loss of R\$55,797 related to ineffectiveness of hedge contracts already settled. For contracts with future competences that are considered ineffective, losses totaled R\$24,127 (total losses of R\$7,270 in March 31, 2008) recognized as financial expenses. As of March 31, 2009 there were unrealized fuel hedges in the amount of R\$86,645 (R\$90,580 of loss as of December 31, 2008) relating to the effective portion of the derivative financial instruments designated as hedges contracted for future periods booked under shareholders equity.

The fair market value of the swaps is estimated based on discounted cash flow methods, and the fair market value of options is estimated based on the Black-Scholes model adapted to commodities options, in this case petroleum.

 (Expressed in thousands of Reais, except as indicated otherwise)

**20. Risks Inherent in Company Operations and Sensitivity Analysis of Derivative Financial Instruments--Continued**b) Exchange rate risk--Continued

The Company contracts exchange rate derivative financial instruments to hedge its exposure to this risk related to short-term obligations and, therefore, a substantial portion of its exchange exposure is not covered.

The Company uses short-term derivative financial instruments. The positions of the derivative exchange contracts (in thousands, except as indicated otherwise) are presented as follows:

	<b>03.31.2009</b>	<b>12.31.2008</b>
Fair value of derivative financial instruments at end of period (R\$)	-	9,416
Longest remaining period (months)	-	12
Volume hedged (US\$)	-	139,750
<b>Period ended March 31:</b>	<b>2009</b>	<b>2008</b>
Gains (losses) on effective hedges recognized as operating expenses (R\$)	-	(2,636)
Gains (losses) on ineffective hedges recognized as financial expenses (R\$)	<b>22,822</b>	(1,954)
Current percentage portion of consumption hedged during the period	-	52%

The fair market value of the swaps is estimated based on the discounted cash flow. The fair market value of options is estimated based on the Black-Scholes model adapted to currency options, and the fair value of futures refers to the last adjustment due or receivable that has already been calculated and not yet paid.

During the three month period ended March 31, 2009 the unrealized gains on derivative financial instruments designated as exchange rate hedges and measured as effective, booked under shareholders' equity, totaled R\$24,904 (R\$50,387 of gains for the year ended December 31, 2008). Were recorded gains in financial income related to ineffectiveness of exchange hedge operations already settled an amount of R\$25,728, of which R\$ 2,906 were recognized on December 31, 2008 and the remaining R\$22,822 were recognized during the first quarter ended on March 31, 2009. On March 31, 2009, were also recognized losses of R\$5,184 in financial expenses related to ineffective hedge contracts for future competences.

As of March 31, 2009, the Company has no derivative financial instruments designated for hedge U.S. dollar exchange rate.

**GOL LINHAS AÉREAS INTELIGENTES S.A.**

Notes to the Quarterly Information - ITR  
Periods from January 1, to March 31, 2009 and 2008  
(Expressed in thousands of Reais, except as indicated otherwise)

**20. Risks Inherent in Company Operations and Sensitivity Analysis of Derivative Financial Instruments--Continued**

c) Credit risk

A credit risk arises from the risk that another party may not comply with its obligations, hence generating a financial loss for the Company.

The Company is exposed to credit risks resulting from its operating activities, chiefly accounts receivable, cash and cash equivalents, including deposits in banks, financial assets classified as available for sale, and derivative financial instruments. The credit risk on accounts receivable is minimized due to the fact that they are substantially represented by accounts receivable from the major credit card operators, which as a general rule are settled in 30 days.

The credit risk of the derivative financial instruments is represented by the risks that the counterparties will not fulfill their obligations. The Company rates the risks of the other parties and limits its exposure to any one single party. The derivative financial instruments used by the Company are signed with high credit ratings, such as international banks with AA+ or better ratings, according to the Moody's and Fitch agencies, or international futures exchanges or the Brazilian Futures Market (BM&F). Company management believes that the risk of not receiving the amounts due on the derivative operations is not significant.

d) Interest rate risk

The Company's results are affected by fluctuations in international interest rates due to the impact of such alterations on its operating lease expenses. As of March 31, 2009 the Company contracted interest swap-lock derivative financial instruments to hedge against oscillation in interest rates on aircraft lease agreements. The variations in the fair market value of these instruments are recognized in results as financial income or expenses for derivative financial instruments not designated as hedges, and for those that are designated as hedges, the effective portions of the variations in the fair market value are booked under shareholders' equity until the date on which the cash flows covered by the hedge generate results.

**GOL LINHAS AÉREAS INTELIGENTES S.A.**

Notes to the Quarterly Information - ITR  
Periods from January 1, to March 31, 2009 and 2008  
(Expressed in thousands of Reais, except as indicated otherwise)

**20. Risks Inherent in Company Operations and Sensitivity Analysis of Derivative Financial Instruments--Continued****d) Interest rate risk--Continued**

As of March 31, 2009 the Company maintains derivative financial instruments represented by interest swap-lock contracts to hedge against oscillation in international interest rates. As of March 31, 2009 the nominal value of the financial instruments designated as cash flow hedges was in the amount of R\$140,244 (US\$60,575 thousand) (R\$141,564 (US\$60,575 thousand) as of December 31, 2008), with fair market value of R\$4,235 in losses (R\$3,878 of losses on December 31, 2008), which amount of R\$4,232 (R\$3,873 of losses on December 31, 2008), corresponds to unrealized losses, was recorded under the equity adjustment heading in shareholders' equity. During the three month period ended March 31, 2009, the Company recognized gains of R\$156 (there were no gains or losses on March 31, 2008) related to interest payments as a financial expense.

For financial instruments not designated as hedges as of March 31, 2009 derivative financial instruments were contracted in the nominal amount of R\$100,711 (US\$43,200 thousand) (R\$203,786 (US\$87,200 thousand) as of December 31, 2008) with loss in market value of R\$19,765 (losses of R\$30,903 as of December 31, 2008) and net gains of R\$5,764 (US\$2,490 thousand) (there were no gains or losses on March 31, 2008) being recognized under financial income. Variations in the fair market value are recognized in results as financial income or expenses.

Company results are also affected by fluctuations of the interest rates in effect in Brazil, which impact marketable securities, short-term investments, obligations denominated in Reais, as well as assets and obligations indexed to the U.S. Dollar. Such fluctuations affect the market value of the derivative financial instruments contracted in Brazil, the market value of securities pre-fixed in Reais, and the remuneration of the balance of cash and marketable securities. The Company uses Interbank Deposit (DI) futures contracts through the BM&F to hedge against fluctuations in domestic interest rates on the pre-fixed portion of its investments. As of March 31, 2009, the Company has no Interbank Deposit future contracts traded on BM&FBOVESPA.

**20. Risks Inherent in Company Operations and Sensitivity Analysis of Derivative Financial Instruments--Continued****2- Statement analyzing sensitivity of derivative financial instruments:**

Analysis of the sensitivity of derivative financial instruments, taken on an isolated basis, to the fluctuation of the principal risk factor for the probable scenario and the possible and remote adverse scenarios considers the following elements:

The probable scenario is defined as the scenario expected by the Company's management, established through the volatility of each asset.

The possible adverse scenario considers a deterioration of 25% in the principal variable determinant of the fair value of the derivative instrument.

The remote adverse scenario considers a deterioration of 50% deterioration in the principal variable determinant of the fair value of the derivative instrument.

The following table shows the sensitivity analysis conducted by Company management and the cash effect on the derivative financial instruments open as of March 31, 2009 based on the three scenarios described above:

<b>Operation</b>	<b>Risk</b>	<b>Probable Scenario</b>	<b>Possible Adverse Scenario</b>	<b>Remote Adverse Scenario</b>
Fuel	Drop in the price of WTI (NYMEX)	US\$ 49.66 / barrel R\$ 12,244	US\$ 37.25 / barrel R\$ (2,094)	US\$ 24.83 / barrel R\$ (10,458)
	Drop in the price of Heating Oil (NYMEX)	US\$ 1.344 / gallon R\$ (9,858)	US\$ 1.008 / gallon R\$ (13,768)	US\$ 0.672 / gallon R\$ (17,774)

**20. Risks Inherent in Company Operations and Sensitivity Analysis of Derivative Financial Instruments--Continued****2 - Statement analyzing sensitivity of derivative financial instruments--Continued:**

The following considerations are important for understanding management's sensitivity analysis:

**D) *Operations with derivative fuel instruments:***

As of March 31, 2009 the Company held two collar options and 23 call option contracts for WTI oil, representing a notional value of 176 thousand and 1,876 thousand barrels, respectively. Those contracts have, respectively, maturities falling between July and October of 2009 and between April and November of 2009. The Company has also contracted collar options that contain the option to purchase WTI oil (call) and a heating oil sale option (put). As of March 31, 2009 the Company has two contracts that involve a notional amount of 116 thousand barrels and with maturities in June 2009.

The Company contracts derivative financial instruments for fuel hedges on the OTC market with the following international concerns:

<b>Counterparty</b>	<b>Maturity</b>	<b>Type of contract</b>
British Petroleum	April-09	Call WTI
	July-09	Collar WTI
		Call WTI
	August-09	Call WTI
	October-09	Collar WTI
	March-09	Call WTI
	June-09	Collar WTI-HO
Deutsche Bank	May-09	Call WTI
	March-09	Call WTI
	June-09	Collar WTI-HO
MF Global	May-09	Call WTI
	September-09	Call WTI
Mitsui	November-09	Call WTI
	September-09	Call WTI
Morgan Stanley	March-09	Call WTI
	April-09	Call WTI
	June-09	Collar WTI-HO
	July-09	Call WTI
	August-09	Call WTI
	October-09	Call WTI

**20. Risks Inherent in Company Operations and Sensitivity Analysis of Derivative Financial Instruments--Continued**

2 - Statement analyzing sensitivity of derivative financial instruments--Continued:

I) *Operations with derivative fuel instruments--Continued:*

As of March 31, 2009 the Company has financial assets in the amount of R\$ 3,195 linked to the margin of guarantee on contracting fuel hedge derivative instruments.

The scenario considered probable by management is that the price of WTI grade petroleum will reach an average of US\$ 49.66 per barrel, which would result in a cash inflow of R\$12,244 in the event the contracts are settled, which would be recorded as expenses on fuel, if the instruments are measured as effective, or booked as a financial expense if the instruments are considered ineffective. Management estimates that the possible scenario is a reduction in the price of a barrel of WTI oil to US\$37.25 and a remote scenario would be if the price went all the way down to US\$24.83 per barrel. In the event the possible or remote scenario were to materialize, the Company would book losses in the fair market value of the derivative financial instruments corresponding, respectively, to R\$2,094 and R\$10,458 for the scenarios of a drop in oil prices, due to the fact that Company has WTI collar type contracts. The Company also contracts collar options linked to Heating Oil (HO) type petroleum. The probable scenario for this type of commodity is that the price will reach an average of US\$1.344 per gallon, which would result in a cash outflow of R\$9,858. For the possible and remote scenarios, management considers an average HO quotation of US\$1.008 per gallon and US\$0.672 per gallon, which would result in respective cash outflows of R\$13,768 and R\$17,774.

II) *Operations with dollar derivative instruments:*

As of March 31, 2009 the Company has no contracts of derivative financial instruments to protect against oscillation of U.S. dollar exchange rate.

 (Expressed in thousands of Reais, except as indicated otherwise)

**20. Risks Inherent in Company Operations and Sensitivity Analysis of Derivative Financial Instruments--Continued***III) Operations with interest rate derivative instruments:*

As of March 31, 2009 the Company has two swap amortizing contracts with a notional amount of R\$140,564 (US\$60,575 thousand) and expiring up to July 2010, for the purpose of hedging its expenses on aircraft leases to the variations in interest rates. The Company further has six interest swap-lock contracts with a notional value of R\$100,711 (US\$43,500 thousand) expiring between August 2021 and December 2022. The interest rate hedge operations are carried out through contracts with first tier financial institutions. As of March 31, 2009 the Company has contracts outstanding with the following financial institutions:

<b>Party</b>	<b>Month due</b>	<b>Type of contract</b>
Calyon	July 2010	Libor swap amortizing
Citibank	July 2010	Libor swap amortizing
	August 2021	swap-lock
	December 2021	swap-lock
Merrill Lynch	January 2022	swap-lock
	October 2022	swap-lock
	November 2022	swap-lock
	December 2022	swap-lock

The value of the financial assets linked to margin deposits as of March 31, 2009 is R\$10,372.

Management estimates that the probable scenario is that the Libor will reach 1.74 % p.a., whereas under the possible and remote scenarios the rates considered are 1.30% p.a. and 0.87% p.a., respectively. The estimated losses under the probable, possible and remote scenarios are, respectively, R\$24,000, R\$28,651 and R\$33,302.

 (Expressed in thousands of Reais, except as indicated otherwise)

**21. Insurance Coverage**

Management takes out insurance coverage in amounts it considers necessary to cover any claims, in view of the nature of Company's assets and the risks inherent in its operating activities, with due heed being paid to the limits set in the lease agreements. As of March 31, 2009 the insurance coverage per type, considering the fleet of aircraft and in relation to the maximum amounts of indemnification, is as follows:

<b>Type of Aircraft Insurance</b>	<b>R\$ (Th.)</b>	<b>US\$ (Th.)</b>
Guarantee for plane fuselage	9,515,528	4,110,024
Civil Liability per occurrence/aircraft	4,051,600	1,750,000
Guarantee for fuselage/war	3,982,545	3,982,545
Inventories	289,400	125,000

By means of Law No. 10.744 of October 9, 2003, the Brazilian government took on the commitment to complement any civil liability expenses with respect to third parties caused by acts of war or terrorist attacks that might occur in Brazil or overseas and which VRG might be required to pay in terms of indemnities for amounts in excess of insurance policy limits in effect as of September 10, 2001, limited to the equivalent in Reais of US\$ 1 billion U.S. Dollars.
