THE BOARD OF OFFICERS

Comments of the Management about the Company's financial situation

Item 10 of the Reference Form, CVM Rule 480/2009 of December 7, 2009 ("ICVM 480")

10.1 General financial and equity conditions

Introduction

The following comments should be considered together with our individual and consolidated financial statements, filed with the Securities and Exchange Commission of Brazil (CVM) on February 12, 2015, including Notes to the financial statements, as well as other financial information contained herein.

As described in Note 2 to said financial statements, we reclassified certain items, especially those related to revenue from commercial centers in our stores. As such, the amounts shown here may differ from those previously released.

(a) general financial and equity conditions

The year 2014 was one of **major achievements for GPA**. During this complex period, we made use of many levers that guaranteed the success of our strategy and the achievement of our goals, despite the challenges imposed by Brazil's macroeconomic scenario. Through sustainable and structured actions, we managed to guarantee profitability in all businesses, along with higher sales and market share gains.

Anchored by our **multi-format, multichannel and multi-region** model and supported by the exchange of experiences and synergies with the Casino Group, we maintained a solid growth pace and improved our results. The diversity of the business, supported by a solid financial structure, attests to the effectiveness of our strategy, our competitive advantages and our strong focus on the customer.

It is important to highlight the support provided by the Board of Directors, which in turn was supported by the committees and the company's commitment to continuous advances in governance processes. It is this principle that guides us to deliver results in each period, but that also ensures our continuous growth in the long run and establishes GPA as a company poised for further growth.

In 2014:

- we recorded gross sales revenue of R\$72.804 billion and net sales revenue of R\$65.525 billion, up 12.8% and 13.3%, respectively, in relation to 2013. The upturn in 2014 resulted from the significant organic growth and a more competitive pricing policy, which led to growth similar to 2013, of 12.5% and 13.4% in gross and net sales revenue respectively in comparison with 2012;
- gross profit totaled R\$16.945 billion, increasing 12.2% from 2013. Gross margin in 2014 stood at 25.9%, versus 26.1% in 2013. This decrease in gross margin is mainly due to the Group's continued investments in competitiveness, and the higher share of Assaí and Cnova;
- total operating expenses corresponded to 18.5% of net sales revenue, totaling R\$12.121 billion, an increase of 6.6% from 2013, when they totaled R\$11.368 billion, representing 19.6% of net sales revenue, demonstrating greater control and discipline in spending, combined with higher share of Assaí and Cnova, which are formats with lower expenses;

10

- EBITDA adjusted for the “Other Operating Income (Expenses)” line increased by 19.7% over 2013, totaling R\$5.371 billion, with EBITDA margin of 8.2%, increasing 40 bps from 7.8% in 2013, which shows the improvement in the Company’s operations, backed by efficiency gains in practically all businesses, especially in Multivarejo and Via Varejo;
- net financial result was an expense of R\$1.508 billion, increasing 26.3% from 2013, but lower than the increase in the overnight interbank rate (CDI) during the period (33.9%), mainly reflecting the deleveraging carried out by the Company and improved working capital;
- net income amounted to R\$1.760 billion, increasing 26.0% from 2013. Net margin reached 2.7%, 30 bps higher than in 2013, due to greater profitability of the Multivarejo, Via Varejo and Assaí businesses;
- cash exceeded debt by R\$1.421 billion (positive), an important gain compared to the debt of R\$1.104 (negative) in 2013, mainly resulting from increased cash flow in the period, resulting from efforts to improve working capital;
- shareholders' equity totaled R\$14.482 billion, up 13.9% from shareholders' equity of R\$12.712 billion the previous year, chiefly due to the improved profitability of the Company and the share offering by CNova.

(b) *capital structure and eventual redemption of shares*

Below is GPA’s capital structure for the periods mentioned, considering as a percentage of equity, the amount resulting from total shareholders’ equity divided by total liabilities (current and non-current) and shareholders’ equity, and as a percentage of debt capital, the amount resulting from the sum of current and noncurrent liabilities divided by total liabilities (current and non-current) and shareholders' equity:

(R\$ million)	GPA CONSOLIDATED					
	<u>12.31.2014</u>	<u>AV</u>	<u>12.31.2013</u>	<u>AV</u>	<u>12.31.2012</u>	<u>AV</u>
Liabilities (Current e Non-Current)	31,018	68.2%	25,296	66.6%	23,764	68.2%

Total Shareholders' Equity	14,482	31.8%	12,712	33.4%	11,068	31.8%
Total Liabilities and Shareholders' Equity	45,500	100.0%	38,008	100.0%	34,832	100.0%

GPA believes its current capital structure, mainly measured by the Net Debt/EBITDA ratio, which was healthy in 2014, presents a significant reduction in leverage when compared with the levels recorded in 2013 and 2012. This improvement is the result of higher cash flow in the period, improved working capital and proceeds from the IPO of CNOVA, as the table below shows:

(R\$ million)	GPA Consolidated		
	12.31.2014	12.31.2013	12.31.2012

Net Debt / EBITDA⁽¹⁾	0.29x	-0.29x	-0.92x

(1) Include real estate projects. EBITDA for the last 12 months.

There is no assumption of share redemption.

(c) *ability to pay financial commitments*

GPA's executive officers believe that the cash flow and the funds currently available fully enable the GPA to pay all its short- and long-term financial commitments.

Note that due to the higher cash flow, driven by operational improvement of the Group's businesses, GPA has shown a trend of reduction in gross and net debt.

These results demonstrate GPA's capacity to continue meeting its financial commitments in the short and long terms.

(d) *sources of financing for working capital and investments in non-current assets utilized by GPA*

The Company raised funds in 2014, 2013 and 2012 through: (A) financial agreements that represent: (i) Brazilian reais denominated loans with obligation to payment principal and DI (interbank deposit)-pegged interest rates; (ii) foreign currency-denominated loans, which are immediately and fully “swapped,” with Brazilian reais denominated payment obligations with DI-pegged interest rates, through swap operations; and (iii) loans with the Brazilian Economic and Social Development Bank (“**BNDES**”), denominated in reais plus annual interest payments; (B) funding on capital markets, through the issue of debentures; and (C) cash generation through its operations.

In 2014, 2013 and 2012, we had no difficulties in obtaining loans or refinancing its current debt. For more information on agreements entered into by GPA and the BNDES, see “Relevant Loan and Financing Agreements,” item “f,” below.

(e) sources of financing for working capital and investments in non-current assets that GPA plans to utilize to cover liquidity deficiencies

In the opinion of the Group’s executive officers, the funding sources used in the fiscal years ended December 31, 2014, 2013 and 2012 are adequate, and will continue to be used by GPA as sources of financing, if necessary.

(f) debt levels and debt characteristics

i. Relevant loans and financing agreements

Financing of working capital

GPA and its subsidiaries raise loans and financing with major financial institutions to meet cash needs for investments.

Swap contracts

In terms of foreign currency, GPA uses swap transactions to exchange liabilities denominated in U.S. dollars and fixed interest rates for Real pegged to CDI floating interest rates. The average annual CDI rate was 10.81% in 2014 (8.06% in 2013 and 8.40% in 2012).

BNDES

GPA's credit facility with the Brazilian Development Bank (BNDES) is subject to the indexation based on the long-term interest rate - TJLP, plus spread, resulting in the final interest rate or fixed interest rate.

Financing is paid in monthly installments after a grace period, as mentioned below.

GPA cannot offer any assets as collateral for loans to other parties without the BNDES' prior consent and it must comply with certain financial debt covenants, calculated based on the consolidated balance sheet, as follows: (i) maintenance of a capitalization ratio (equity/total assets) equal to or greater than 0.30 and (ii) EBITDA/net debt equal to or greater than 0.35. The Group controls and monitors these ratios, and on December 31, 2014 it was in compliance with the established parameters.

Financial Lease Obligations

Financial lease agreements, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the commencement of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are allocated between finance charges and reduction of leasing liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized in the income statement. Leased assets are depreciated over their estimated useful life or lease term, whichever is shorter.

The total amount recorded from lease agreements classified as financial lease are listed below:

Receivable Securitization Fund – Pão de Açúcar (“PAFIDC” and “Globex FIDC”)

GPA maintained, until December of 2012, an operation of transfer of part of its trade receivables of credit cards and services for two receivables securitization fund constituted for such purposes, Globex FIDC and PAFIDC.

Funds Restructuring in 2012

Due to changes in the receivable discount policy, changes in the receivable funds were negotiated, as follows:

a) PAFIDC: Alteration on Regulation of PAFIDC was approved on the General Quotaholder Meeting of December 21, 2012, in which GPA no longer holds any participation or obligation in the fund. The fund had its corporate name changed, answering by the denomination of Multicredit FIDC and no longer holds, on an exclusive basis, receivable from GPA.

As GPA holds no further participation on the current MultiCredit FIDC and no further obligation of absorbing any of the risks expected on Fund's assets, the Fund are no longer consolidated since December 26, 2012.

b) Globex FIDC: The discount operations with credit cards by means of Globex FIDC were terminated on December 14, 2012, under mutual agreement between senior quotaholders.

As a result, the senior quotas were paid to Fund's quotaholders and on December 31, 2012, it remained in the Fund a cash balance amount and subordinates quotas obligations to be settled, concluding the process of Fund's settlement, during the first quarter of 2013.

GPA currently no longer transfers its credit card receivables through any FIDC.

ii. Other long-term relations with financial institutions

Currently, GPA has no relevant long-term relations with financial institutions referring to the fiscal years ended December 31, 2014, 2013 and 2012, in addition to those already described in item 10.1 (f) of this Reference Form.

iii. Level of subordination in Company's debt

GPA's executive officers inform that the level of subordination in GPA's debt is determined in accordance with the provisions set forth by the legislation in force.

iv. Restrictions imposed on indebtedness limits and new debt contracting, the distribution of dividends, the sale of assets, the issue of new securities and the sale of controlling interest

BNDES

Agreements signed with the BNDES are subject to "Provisions Applicable to BNDES Agreements", which borrowers of the BNDES, without previous authorization from BNDES, including GPA, may not: (i) give priority to other credits; (ii) amortize shares; (iii) issue debentures above the established limit; (iv) issue profit-sharing bonds; (v) taking on new debt; and (vi) sell or encumber permanent assets, in observance to the reservations expressly mentioned in the "Provisions Applicable to BNDES Agreements."

Debentures

The debentures issued are not convertible into shares and hold no guarantee, exception made to subsidiaries issuance, in which GPA grants suretyship.

These debentures are amortized according to the issue. The methods of amortization are as follows: (i) payment only at maturity with annual remuneration payment (10th issue of CBD), (ii) payment only at maturity with semiannual remuneration payment (11th issue of GPA and 3rd issue of Via Varejo); (iii) annual installments (12th issue of CBD) and semiannual payments as of the 4th anniversary of the issue.

The 10th, 11th and 12th issues are entitled to early redemption at any time, in accordance with the terms and conditions envisaged in the indenture. The 3rd issue of Via Varejo may be redeemed after 18 months. The issue of NCB, merged into Via Varejo, is not eligible for early redemption.

GPA is required to maintain certain debt financial covenants in connection with the issues made, except in the case of Nova Pontocom. These ratios are calculated based on consolidated interim financial information of GPA prepared in accordance with accounting practices adopted in Brazil, as follows: (i) net debt (debt minus cash and cash equivalents and trade accounts receivable) not greater than equity and (ii) consolidated net debt/EBITDA ratio lower than or equal to 3.25. At December 31, 2014, GPA was in compliance with these ratios.

Other covenants

Some loans and financing agreements of the subsidiary Via Varejo envisage early maturity of the debt in the event of transfer of control, including:

- loan agreements signed with IBM and Itaú banks;
- issue of debentures of NCB (merged into Via Varejo on January 2, 2013)
- financing agreements (FINAME) signed with Banco do Brasil;
- Contract of Adhesion to System of Protection Against Financial Risks – Derivatives (swap, forwards and options) entered into by GPA and Santander on April 12, 2010.

The provisions applicable to BNDES contracts also forbid any changes in the effective control, whether direct or indirect, without prior express authorization from BNDES.

(g) *limits on the use of the financing already contracted*

Though the Company does not have any fixed financing agreement contracted, on December 31, 2013, it signed loan agreements amounting to R\$ 1.350 billion.

As mentioned in the financial statements disclosed by the Company in 2015, the agreements were entered into as per market practices and are valid till 2016 and 2017.

(h) *relevant changes in each item of the financial statements*

The executive officers highlight that, in fiscal year 2012, GPA restructured the receivable securitization fund, aiming to change the debt structure, and started to perform the receivable sale operation through credit card operators. This change has significant impacts on the debt structure and accounts receivable of GPA.

There are no other items materially affecting the financial statements of 2013 and 2014.

2014 vs. 2013

Net revenue

GPA's consolidated net revenue increased 13.3% in 2014, from R\$57.854 billion in 2013 to R\$65.525 billion in 2014.

The Group's main revenues arise from GPA foods' operations, comprised by Multivarejo and Assaí, sales of electronics and home appliances (bricks-and-mortar stores of Via Varejo) and e-commerce (CNova). GPA's net revenues are shown in the table below for the years ended December 31, 2014, 2013 and 2012.

(R\$ million)	Net Sales		
	2014	2013	2012

(1) Excludes revenue from intercompany transactions; (2) Extra and Pão de Açúcar banners. Includes revenue from the leasing of commercial centers; (3) Cnova: Cnova Brasil + Cdiscount Group. Includes only revenue from the commissions in the marketplace, without considering total revenue from goods; (4) Includes revenue from intercompany transactions

The highlight of 2014 was strong organic growth, with 212 new stores opened, of which 124 were inaugurated by GPA Food (Multivarejo +Assaí) and 88 by Via Varejo. The consolidation of Cdiscount made since August 1, 2014 also drove sales growth, as disclosed under the item "CNova Highlights".

GPA Food Highlights

The organic expansion had a significant impact on GPA Food. We opened 97 new stores in the convenience format, which included **Minimercado Extra** and **Minuto Pão de Açúcar** stores. In the premium supermarket segment, through the **Pão de Açúcar** banner, revenue growth was driven by the

unique offering of this format, such as its increasingly innovative assortment, as well as by opening new units and converting existing units, adding a total of 17 new stores to the chain.

In the **Extra** banner, a series of measures were taken to recover sales in the hiper format, especially from the second half of the year, which included operational improvements at stores, adjustments to assortments, better communication and continuous reinforcement of the price competitiveness strategy. These measures supported better customer traffic trends at stores and a recovery in market share.

At **Assaí**, we opened nine new stores and expanded our operations in Brazil's Northeast, while reinforcing the strategy to grow the Cash and Carry operation. This expansion of operations has been making an important contribution to driving sales at Assaí, which registered net sales growth of 32.7% in the year

CNova Highlights

In 2014, **Cnova** was created, the product of the consolidation of Nova Pontocom, already operated by GPA, and Cdiscount, present in France and another ten other countries. In November 2014, CNova carried out its IPO on the NASDAQ and in January 2015, listed its shares in Euronext Paris.

In 2014, CNova's net sales revenue increased 90.2% as it includes CDiscount results as of August 1, 2014. On comparable bases, net sales revenue grew 28.1%, outpacing market levels. The strategy adopted in the year sought a balance between competitiveness and growth, with gains in efficiency and market share.

Via Varejo Highlights

In 2014, the company focused on its expansion plan by opening 88 new stores and launching pioneering initiatives, such as opening of 20 new Mobile stores¹ under the Casas Bahia and Pontofrio brands and expanding in the furniture segment by opening units focused on selling customized furniture, a segment in frank expansion.

2013 vs. 2012

In 2013, net sales revenue increased 13.4%, from R\$51.016 billion in 2012 to R\$57.854 billion in 2013.

GPA foods - Highlights

In Multivarejo, the growth of revenue sped up throughout the year for all brands, as a result of the implementation of a commercial competitive strategy in the first half of 2013, leveraged by an assertive

communication both in the stores and with the media. This strategy already reflects an increased flow of clients at stores, an upturn in the average ticket and gains in market share, especially in the hypermarkets.

Sales in Multivarejo also benefited from the excellent performance of the Black Friday sales, an initiative expanded to the food segment, especially perishable goods and liquid products. The non-food segment under the hypermarket format was also driven by the Black Friday sales, especially the telephony and video segments, mainly in the last quarter of the year.

Assaí's sales performance stood out in 2013. Throughout the year, we consolidated the new framework and invested in organic expansion with the inauguration of 14 stores and the penetration in other five states, which remain posting results above expected.

¹ Stores dedicated to selling mobile phones, tablets and accessories, as well as prepaid and postpaid plans of major Brazilian mobile operators.

Nova Pontocom - Highlights

In 2013, Nova Pontocom's net revenue grew by 26.1%, in a level above the market. The strategy adopted by the company in the year focused on competitive prices and growth, with efficiency gains, increase in market share and positive return as of the second quarter. Additionally, his year saw the launch of Extra Marketplace, the new sales model that unites offers from different stores from several segments in the same website, allowing us to increase significantly the range of products.

Via Varejo - Highlights

In 2013, sales grew by 11.9%, with same-store growth of 9.0%, driven by several factors throughout the year, such as: i) Christmas and Children's Day campaigns; ii) history record of Black Friday sales; iii) opening of 41 stores, 36 of which Casas Bahia and 5 Pontofrio; and iv) confirmation of the technology consumption cycle in Brazil, especially in the telephony and computing categories.

2012 x 2011

Net sales revenue increased by 9.5% in 2012, from R\$46.594 billion in 2011 to R\$51.016 billion in 2012.

On the retail food, the highlights were the conclusion of the process to convert Extra Fácil into Minimercado Extra, the consolidation of the changes started in 2011 at the Assaí brand, the resumption of the expansion process of the Pão de Açúcar brand and the strengthening of Extra as a nationwide player.

It was the first full year of operations of Extra Supermercado. Up to the last quarter of 2011, the brand operated only through Extra Hiper. In the last quarter of the year, Extra Delivery was launched to consolidate the Extra brand as a multichannel.

A total of 55 stores were opened in the year, with highlight for the growth of Minimercado Extra.

At Via Varejo, we highlight the repositioning and improvement of the assortment of products at Pontofrio stores, as well as the positive sales effect from the maintenance of the IPI tax reduction for home appliances. In real terms, growth was 7.9% given that we consider deflation on the electronics category and inflation in categories such as furniture and mattress on the last 12 months, as published by the Brazilian Geography and Statistics Institute (IBGE), weighted by the assortment of bricks-and-mortar stores and Nova Pontocom.

Gross Profit

Gross profit increased 12.2%, from R\$15.104 billion in 2013 to R\$16.945 billion in 2014. Gross margin stood at 25.9% in 2014, compared to 26.1% in 2013, as a result of the ongoing price competitiveness strategy, and the higher share of lower margin formats. The business highlights were:

ü Multivarejo (Extra and Pão de Açúcar): margin expansion of 80 bps in the year, mainly due to growth in revenue from rental of commercial centers; higher share in the sales mix, of sales in the Pão de Açúcar and Minimercado Extra formats, which operate with higher margins; and the lower share of electronics in the sales mix, reflecting the macroeconomic scenario in the year;

ü Assaí: maintenance of the gross margin in 2014 compared to 2013 (14.5% and 14.6%, respectively);

ü Via Varejo: margin expansion of 9.8%, mainly the result of initiatives to boost efficiency in logistics and assembly operations, growth in services and financial services, and synergies captured in the group.

In 2013, gross profit increased 9.4% to R\$15.104 billion in 2013 from R\$13.807 billion in 2012, in line with the growth of sales in the same period. Gross margin stood at 26.1% in 2013, down 100 bps on 2012.

In 2012, gross profit increased 9.1% to R\$13.807 billion, from R\$12.659 billion in 2011, chiefly due to: (i) better negotiations with suppliers, in line with a business strategy that applies specific IT systems, thus enabling improved business management; (ii) the consolidation of Nova Casas Bahia's results which, together with Pontofrio and Nova Pontocom operations, allowed scale gains with suppliers and access to a wider range of products.

Operating Income (Expenses)

Total operating expenses reached R\$12.121 billion in 2014, up 6.6% from R\$11.368 billion reported in 2013. Selling, general and administrative expenses totaled R\$11.787 billion, growing 9.7% from 2013. As a percentage of net sales revenue, selling, general and administrative expenses fell from 18.6% in 2013 to 18.0% in 2014. The main effects were:

ü Multivarejo: the 70 bps increase in selling, general and administrative expenses as a percentage of net sales revenue (19.7% in 2014 versus 19.0% in 2013), mainly due to the impact of the collective bargaining agreement in 2014, increased spending on medical insurance, which saw increases that outpaced inflation; greater spending with marketing to ensure broad dissemination of commercial incentives; and expenses with opening and renovation of stores; Assaí: selling, general and administrative expenses decreased by 20 bps (10.4% in 2014 and 10.6% in 2013), due to operating efficiency gains, despite the aggressive store opening plan;

ü Assaí: decrease of 20 bps in selling expenses, general and administrative of net revenue (10.4% in 2014 vs. 10.6% in 2013) due to operational efficiencies, even with aggressive opening plan stores;

ü Via Varejo: selling, general and administrative expenses decreased by 30 bps. (22.4% in 2014 vs. 22.7% in 2013), chiefly due to the efficiency gain of processes at the stores, optimization in the hiring of outside services, increased logistics efficiency and the rationalization of administrative, IT and marketing expenses.

In 2013, total operating expenses came to R\$11.368 billion, up 11.6% from the 2012 total of R\$10.186 billion, growing slower than net sales revenue. Selling, general and administrative expenses came to R\$10.742 billion. As a percentage of net sales revenue, selling, general and administrative expenses fell from 19.9% in 2012 to 18.6% in 2013.

In 2012, total operating expenses came to R\$10.186 billion, up 3.5% on the R\$9.844 billion posted in 2011, increasing in a percentage lower than the growth of net sales revenue. Selling, general and administrative expenses came to R\$10.164 billion. As a percentage of net sales revenue, selling, general and administrative expenses fell from 20.6% in 2011 to 19.9% in 2012.

Other Operating Income and Expenses

In 2014, other operating income (expenses) came to an expense of R\$441 million, down 34.4% from the 2013 total of R\$673 million. This decrease was driven by lower expenses with lawsuits in 2014 compared to 2013.

Depreciation and Amortization

Depreciation and amortization totaled R\$821 million in 2014, up 4.2% from R\$787 million in 2013. This increase was mainly due to depreciation and amortization of the new investments made in 2014.

In 2013, depreciation and amortization totaled R\$787 million, 4.8% up on the R\$752 million posted in 2012, chiefly due to the depreciation and amortization of the new investments made in 2013.

In 2012, depreciation and amortization totaled R\$752 million, up 10.8% on the R\$678 million posted in 2011, chiefly due to the depreciation and amortization of the new investments made in 2012.

Net Financial Result

Net financial result in 2014 was an expense of R\$1.508 billion, compared to an expense of R\$1.193 billion in 2013, increasing 26.3% from 2013, lower than the CDI rate in the period (33.9%). The key impacts on the net financial result were: (i) the increase of 12.0% in bank debt charges, which was lower than the increase in the CDI, reflecting the improvement in working capital in the period; (ii) the increase in the cost of sales of payment book receivables and the sale of credit card receivables by R\$220 million, in line with the growth in net sales revenue, as well as the hike in interest rates; and (iii) the R\$68 million increase in

the line “Restatement of other assets and liabilities”, mainly related to the variation in cash returns, which was offset by the increase in the provisions for lawsuits.

GPA ended 2014 with a net cash position of R\$1.421 billion, compared to the net debt position of R\$1.104 billion in 2013, due mainly to increased cash generation in the period on improved working capital needs. GPA held cash reserves of approximately R\$11.1 billion, compared to R\$8.4 billion at the end of 2013, which attests to its solid capital structure, especially given the economic environment marked by high volatility.

Net financial result came to R\$1.193 billion in 2013, the same amount reported in 2012 (R\$1.193 billion). As a percentage of net sales, the financial result declined from 2.3% to 2.1%, due to: (i) the reduction of interest on net debt of R\$14 million, as a result of the gradual reduction in indebtedness in 2013; (ii) the increase in the cost of prepayment of receivables related to payment vouchers and sale of credit cards receivables totaling R\$106 million, in line with the upturn in net revenue, and the increase in the interest rate; and (iii) gain in the adjustment of other assets and liabilities, totaling R\$92 million, chiefly due to the prepayment of the tax repayment program (REFIS) in the year, in addition to greater prepayment to suppliers, generating increased financial revenue in 2013 over 2012.

Net debt came to R\$1.104 billion in 2013, R\$2.302 billion down on 2012, mainly due to the greater cash generation in the period, leveraged by the efforts to improve working capital. Additionally, the public offering for the distribution of Units comprised by one (1) common share and two (2) preferred shares issued by Via Varejo, which represented an increase in gross cash of R\$896 million, also contributed to reduce GPA's indebtedness.

Net financial result decreased by 10.5% in 2012, from R\$1.333 billion in 2011 to R\$1.193 billion.

This decrease was mainly the result of: (i) the reduction in debt, mainly at the close of the year with the restructuring of FIDCs, and (ii) the reduction in the CDI rate, whose average weighted annual rate fell from 11.6% in 2011 to 8.4%.

Net debt was R\$3.406 billion in 2012, down R\$363 million from 2011, mainly due to alterations to the structure of FIDCs (as described in item d, above, "*sources of financing for working capital and investments in non-current assets used by GPA*").

Net Income

Net income increased 26.0% from R\$1.396 billion in 2013 to R\$1.760 billion in 2014. Net margin stood at 2.7% in 2014, compared to 2.4% in 2013. The business highlights were:

- ü Multivarejo: 38.6% increase in net income, mainly due to the growth in gross profit, driven by rental revenue from commercial centers, the higher share in the sales mix of Pão de Açúcar and Minimercado Extra, and the reduction in operating expenses;
- ü Assaí: growth of 6.9% in net income due to solid revenue growth and disciplined control of operating expenses despite the strong expansion of new stores;
- ü Via Varejo: Net income up 25.9%, due to better operating result arising from the program of efficiency initiatives implemented and captured throughout the year.

Accounts receivable

Accounts receivable increased by 18.3% in 2014, from R\$2.497 billion in 2013 to R\$2.954 billion. This variation of R\$457 million is mainly due to: i) R\$300 million in trade accounts receivable, related to consolidated CDiscount balances; ii) R\$226 million increase in CDCI receivables, partially reduced by the increase in the allowance for doubtful accounts, decreasing the balance by R\$111 million, in addition to other effects in the amount of R\$42 million.

On December 31, 2013, trade accounts receivable fell 5.3% from R\$2.637 billion in 2012 to R\$2.497 billion, mainly due to: i) the reduction in the balance of accounts receivable from credit cards and tickets of around R\$180 million, related mainly to sale of receivables from credit card in the last five days of 2013. In 2012, this effect had been impacted, as the last three days of the year were weekend days; ii) the increase of around R\$170 million in the payment book balance, or 8%, related to the expansion in sales recorded by Via Varejo; iii) the increase in provision for doubtful accounts, mainly related to the R\$40 million growth in the payment voucher balance; iv) the decrease in the receivables balance of debit card clients by approximately R\$70 million, related to the calendar effect explained in item i) above.

On December 31, 2012, accounts receivable grew by 8.5%, from R\$2.431 billion in 2011 to R\$2.637 billion, reflecting the increase in the CDCI consumer financing account.

On December 31, 2013, taxes increased by 4.2% in 2013, from R\$871 million in 2012 to R\$908 million, due to: i) the increase of R\$80 million in the ICMS tax balance; ii) reduction of R\$14 million in PIS/Cofins taxes; iii) reduction of R\$20 million in withholding income tax; and iv) reduction of R\$16 million in income tax and social contribution.

On December 31, 2012, taxes declined by 4%, from R\$908 million in 2011 to R\$871 million, primarily driven by the lower income tax and ICMS tax replacement.

Prepaid expenses and other accounts receivable

Prepaid expenses and other receivables increased 44.5% from R\$373 million in 2013 to R\$539 million in 2014, mainly driven by values for reimbursement in the amount of R\$37 million; R\$38 million increase in prepaid expenses related to R\$7 million from prepaid rental, R\$9 million from new Consulting contracts, and R\$24 million from the consolidation of Cdiscount; R\$15 million in FIC dividends receivable; R\$30 million in rentals receivable; and R\$46 million in variation from Other Receivables.

On December 31, 2013 Prepaid expenses and other accounts receivable increased by 17.6%, from R\$317 million in 2012 to R\$373 million, mainly related to the prepayment of Via Varejo's advertising expenses in the amount of R\$20 million and the transfer of the call option of 3 gas station of Rede Duque from the financial instrument balance to "Other accounts receivable" in the total amount of R\$49 million, once it has been exercised by the counterparty.

This was due to the reduction of two days in the average inventory balance compared to 2012, which, in turn, was driven by the decrease of four days in inventories in the Food Retail segment (Extra and Pão de Açúcar) and of five days in the Electronics segment. Nova Pontocom remained stable and Assaí recorded a two-day increase in inventories, mainly due to the strong expansion to new states.

Social and Labor Obligations

Liabilities with social and labor obligations increased 8.5% in 2014, from R\$796 million in 2013 to R\$864 million, mainly due to collective bargaining agreements in the year and the effects thereof on labor charges and provisions.

On December 31, 2014, liabilities with social and labor obligations accounted for 1.9% of total liabilities, versus 2.1% on December 31, 2013.

In 2013, liabilities related to social and labor obligations increased by 9.2%, from R\$729 million in 2012 to R\$796 million, due to the effect from the collective bargaining agreement on labor charges and provisions. On December 31, 2013, the social and labor obligations represented 2.1% of Company's total liabilities unchanged from December 31, 2012.

In 2012, payroll and labor liabilities fell by 3.9%, from R\$759 million in 2011 to R\$729 million. Social and labor obligations represented 2.1% of Company's total liabilities in comparison to 2.3% in December 31, 2011.

Taxes and Contributions

Liabilities with Taxes, Fees and Contributions fell 4.0% in 2014, from R\$825 million in 2013 to R\$792 million. This variation was mainly driven by balances recorded in 2013 for income tax on capital gains recorded by GPA and related to the public offering of Via Varejo in the amount of R\$134 million, and the increase in taxes related to operational expansion in 2014, particularly at Via Varejo.

On December 31, 2014, taxes, fees and contributions represented 1.7% of the total liabilities compared to 2.2% on December 31, 2013.

In 2013, liabilities with Taxes, Fees and Contributions increased by 26.8% in 2013, from R\$651 million in 2012 to R\$825 million. This variation was mainly due to the income tax on the GPA's capital gains, related to the public offering for the distribution of Units of Via Varejo, totaling R\$134 million, and the increase in taxes due to the expansion of the operation. On December 31, 2013, taxes and contributions represented 2.2% of total liabilities compared to 1.9% on December 31, 2012.

In 2012, Taxes and Contributions were up by 95.8%, from R\$332 million to R\$651 million. This variation was mainly due to the provision for income and social contribution taxes payable related to the subsidiary Via Varejo and the net amount of around R\$250 million booked under assets in 2011. Taxes and contributions represented 1.9% of total liabilities, versus 1.0% on December 31, 2011.

Noncurrent Liabilities

Loans and Financing – long term

In 2013, long-term loans and financing decreased 32.1%, from R\$2.539 billion in 2012 to R\$1.724 billion. In 2012, long-term loans and financing were down by 38.1%, from R\$4,103 billion in 2011 to R\$2,539 billion. Long-term loans and financing represented 7.3% of total liabilities, compared to 12.3% in December 31, 2011.

Debentures – long term

Long-term debt represented by debentures issued by GPA decreased 65.5% in 2014, from R\$2.599 billion in 2013 to R\$896 million. This decrease was mainly the result of the transfer from long term to short term, the maturity of the debentures issued, as well as the 12th issue of debentures by CBD.

In 2012, long-term indebtedness represented by debentures issued by the Company was up by 75.0%, from R\$2,138 billion in 2011 to R\$3,741 billion. On December 31, 2012, long-term debentures accounted for 10.7% of total liabilities, against 6.4% on December 31, 2011.

Deferred Income and Social Contribution Taxes

Deferred income tax and social contribution increased 6.8% in 2014, from R\$1.061 billion in 2013 to R\$1.133 billion, mainly due to the constitution of deferred income tax and social contribution liabilities on tax amortization of goodwill and property and equipment in 2014.

At December 27, 2013, the Via Varejo's Secondary Public Offering of Share Certificates or Units (each Unit is composed of one common share and two preferred shares) was concluded. Considering the overallotment, a total amount of one hundred, twenty-three million, six hundred, ninety-six thousand, nine hundred, eighty-four (123,697) Units were offered, totaling R\$2.845 million.

The proceeds from such divestment were recorded as credits in equity, as this is a transaction with non-controlling shareholders, being represented by a sale of the Company's interest and kept the control over Via Varejo. The effect of income tax on capital gain, transaction costs and write-off of related investments were also recorded in the equity. The equity effect deriving from this transaction was R\$200.

Also pursuant to Clauses 4.1.3 and 10.1.4.2 of the Shareholders' Agreement, a Sufficient Minimum Fragmentation was verified, considering the fulfillment of the following conditions cumulatively: (i) CB Group (represented by Messrs. Samuel Klein, Michael Klein and Mrs. Eva Lea Klein, and other entities) sold more than 23.64% of their shares representing Via Varejo's capital stock; and (ii) Via Varejo's total free float reached a level higher than 20% of total capital. In 2013, CB Group holds 27.31% of shares representing Via Varejo's capital and its free float reached 29.34% of total.

Accordingly, CB Group lost some rights, such as: (i) Mr. Michael Klein is no longer the Chairman of Via Varejo's Board of Directors; (ii) CB Group's agreement, in previous meeting, with Via Varejo's vote at the shareholders' meetings of its subsidiary Nova Pontocom or by members of Nova Pontocom's Board of Directors, appointed by Via Varejo, in relation to certain matters; (iii) the Migration Right; (iv) GPA's call option; and (v) CB Group's call option. In addition, pursuant to Clause 4.1.2 of the Shareholders' Agreement, as its interest decreased, CB Group now appoints only 2 members for Via Varejo's Board of Directors.

Transaction costs, totaling R\$89 million, net of income tax, were fully paid by Via Varejo, pursuant to the terms of the Shareholders Agreement, and recorded directly in shareholders' Equity.

(ii) E-commerce transaction – Accounting of equity interests at cost

Edgar Filing: BRAZILIAN DISTRIBUTION CO COMPANHIA BRASILEIRA DE DISTR CBD - Form 6-K affiliates (“CDiscount”).

Special Committees implemented by the Boards to evaluate the transactions, delivered a favorable recommendation of implementation of the operation considering the following elements: (a) the commercial interests of the Companies in the e-commerce activities will be preserved; and (b) the potential for value generation for the Companies and their shareholders through the integration of the e-Commerce activities currently developed by Nova and CDiscount into a new company named Cnova N.V. (“Cnova”) organized under the Holland laws.

42

Based on the opinions issued by the financial consultants, the exchange of net assets between Nova and CDiscount in Cnova are represented by 53.5% (Company and Via Varejo) and 46.5% (CDiscount).

On July 24, 2014, the corporate transaction was concluded at Cnova level in Holland, resulting in the subsidiary Nova Pontocom giving 46.5% of the operational net assets of Cnova Comércio Eletrônico, in exchange for 53.5% of interest in CDiscount Group.

- Cdiscount S.A.S.;
- Financiere MSR;
- E-trend;
- Cdiscount Colombia;
- Cdiscount Thailand;
- Cdiscount Afrique;
- Cdiscount Voyages.

The exchange of shares remained registered at historical cost, by Management understanding that this transaction is not the scope of CPC15/IFRS 3 (R) “Business Combinations”, by involving entities under common control. The date of the first consolidation of these entities, whose control was acquired by the Company, was July 31, 2014.

The impact booked in shareholders’ equity of the parent company on July 31, 2014 as a result of the transaction was broken down as follows (in millions of Brazilian reais):

	7.31.2014
Investment at Cnova given	(23)
Investment received	16
Impact in the Shareholders’ Equity of Nova Pontocom	(7)
Impact in the Shareholders’ Equity of the Parent Company	(5)

(iii) E-commerce public offering

In November and December of 2014 Cnova N.V., based in Holland, has concluded the initial public offering and complementary offer, and as a consequence the interest in Cnova N.V., directly and indirectly, reduced from 38,22% to 35,73%. The proceeds for the sale of shares were recorded in the shareholders' equity, since this is a transaction with non-controlling shareholders, deducted from the impacts of income tax, transaction costs and other effects. The net impact in the shareholders' equity as a result of this transaction was R\$ 411 million, divided in R\$ 132 million in the individual financial statements and R\$ 279 million of non-controlling interest. The Company issued a total 29.182.894 shares. Despite Company has indirect and direct interest of 35.73% in Cnova N.V, the control of this subsidiary is exercised through Nova Pontocom that has 49.96% of interest and more than 50% of Cnova N.V voting capital.

(iv) Corporate reorganization and the debt Nova Pontocom

The subsidiary Nova Pontocom, holding that had 100% of the entity Marneylectro S.A.R.L., indirect controlling entity of Cnova N.V., paid part of its debt against CBD and Via Varejo with the delivery of shares of the investee Marneylectro S.A.R.L. valued at market. As this transaction was done between entities under common control, all the related effects were recorded directly in the shareholders' equity on December 31, 2014, divided in R\$ 53 million in the individual and R\$ 14 million in the non-controlling interest.

(v) Corporate reorganization of C-Asia

On November 17, 2014, Casino transferred 30% of its indirect interest in C-Distribution Asia Pte. Ltd ("C-Asia"), which controls the subsidiaries of Cnova operating in Thailand and Vietnam, for an amount of R\$52 million. This transaction resulted in the fact that the Cnova NV, acquired indirect control with interest of 60% by C-Asia.

As this transaction took place between entities under common control, Cnova applied the accounting equity interest cost, thus, was not recognized gain compared to 30% previously held and the difference between the consideration paid and the net assets of 30% transferred was recorded in the Company's equity and non-controlling interest, amounting to R\$43 million and R\$6 million, respectively.

Cash and cash equivalents at acquisition accounted for R\$18.

(vi) Sale of subsidiary – Casas Bahia Contact Center Ltda – “CBCC”

On December 30, 2014, the subsidiary Via Varejo sold its shares on CBCC to Atento Brasil S.A. After the fulfillment of all preceding clauses within the shares purchase agreement, Via Varejo received R\$20 million, resulting in a gain of R\$16 million in other operating revenue and expenses. As a consequence of the transfer of control, CBCC was deconsolidated on December 31, 2014 in the balance sheet and cash flow.

(vi) Acquisition of Bartira

Until October 31, 2013, Via Varejo and Casa Bahia Comercial Ltda. (“CB”) were partners in Bartira, subsidiary Via Varejo, holding interests of 25% and 75%, respectively. Since the association between Company and CB (November 1, 2010), the Company held a purchase option to buy the other 75% of interest, which could be exercised between 3 and 6 years of association.

In 2013, this option fair value was calculated through the Black & Scholes method, using a volatility of 28% and a risk-free rate of 5.8% p.a., which resulted in a fair value of R\$314 million (R\$307 million on December 31, 2012) on the exercise date. Up to the exercise date, this option was recorded as financial instrument in the consolidated financial statements.

On October 31, 2013, the Company's Shareholders' Meeting approved the exercise of option to purchase the remaining interest in Bartira (“Purchase Option”), followed by the submission to CB of the exercise

notification on November 1, 2013. The quotas of Bartira's capital stock were transferred on December 2, 2013. The price paid for the exercise of the purchase option on November 1, 2013 was R\$212 million. After the transaction, the subsidiary Via Varejo holds Bartira's entire capital stock.

As of the date of notification to CB, Via Varejo holds substantive rights on Bartira, and November 1, 2013 was set as the business combination date.

Prior to the business combination, the subsidiary Via Varejo held a 25% interest in Bartira. The fair value of the previously held interest was measured at fair value on the acquisition date, as defined in IFRS 3 (R), CPC15 (R1), the fair value of interest was measured through the discounted cash flow method, and amounted to R\$176 million. The fair value of remeasurement of the investment previously held, compared to the book value of the investment, resulted in a gain of R\$71 million, presented in 2013 and recorded in "Other operating expenses and income".

Thus, the consideration transferred for the execution of the business combination is determined by (i) the exercise price of the call option in the amount of R\$212 million; (ii) the fair value of the call options held by the Company prior to the business combination in the amount of R\$314 million; and (iii) the remeasurement at fair value of the investment previously held in the amount of R\$176 million.

The main Intangible identified in Bartira business combination refers to:

(i) Brands - R\$46 million - Related to the brand "BARTIRA," which was calculated using the method of "royalties", whose useful life is indefinite.

(j) Contractual relationship (Rent on favorable terms) - R\$36 million - related to favorable terms compared to the market in the rent of the property used as a manufacturing plant pro Bartira. This asset will be amortized over the remaining term of 7-year contract.

Goodwill relating to the acquisition of control of Bartira is supported by the strategic nature to ensure a continuous supply of important supplier. In addition, the acquisition also enabled Via Varejo (i) to vertically integrate its mobile retail operation, (ii) benefiting the low cost structure of Bartira given its scale as one of the largest plants in Latin America in terms of volume production, and (iii) maintain operational efficiencies and synergies (including logistics, sales and administrative costs) developed through the historical development between the Company and Bartira. The combined outcomes of this operation cause the Company to have the largest margin in products sold at Via Varejo shops.

Lastly, a replacement supplier for Bartira would be difficult to find in the local market and would negatively affect the furniture line of products that are traded by Via Varejo.

For purposes of consolidated cash flow statement, the amount paid must be deducted from the net cash acquired. Thus, the amount recorded will be R\$212 million, less 75% of Bartira's cash equivalent, totaling R\$211 million. Goodwill on acquisition was fully allocated in the home appliance segment.

Subsequent measurement – final allocation of the purchase price.

The acquisition of Bartira's control was accounted for under the acquisition method, in accordance with CPC 15 (IFRS 3R). In compliance with this standard, in 2014 the Company concluded gathering the data and assessing the fair value of the net assets acquired on November 1, 2013, adjusting R\$23 million, and, consequently affected the goodwill on acquisition. The adjustments, mainly, refer to effects on measuring income tax, as well as inventories adjustments on acquisition date.

The sales result of Bartira is eliminated against the Cost of Goods Sold, as sales are done 100% by Via Varejo. Consolidated lingering effects are not significant.

(c) *unusual events or operations*

The Company takes extemporaneous credits of taxes, every time that brings together legal, documentary and factual understanding of such credits that allow their recognition, including the estimation of realization. Such credits are recognized as a reduction of cost of Goods sold. In 2014, among other credits, there was an unused credits by member companies of R\$302, in Via Varejo subsidiary. The elements that support the registration and utilization of such credit were obtained during the year.

(b) significant effects of changes in accounting practices

Revenues and costs with rental of commercial galleries, which were previously recorded as selling expenses recovery, were reclassified to "net operating revenue" and "cost of goods sold", respectively, due to an increase in the share of this activity in the Multivarejo segment and considering the expectations of new launches of "Conviva" projects and the increase in future operations, better displaying this activity in the Company's financial statements. The Management of the Company believes it is best to proceed with the current classification as to allow comparability and a final classification of revenues and costs

(c) reservations and emphasis in the independent auditor's report

There were no reservations in the report issued by Company's independent auditor on the financial statements for the fiscal years ended December 31, 2014, 2013 and 2012.

10.5 Critical accounting policies

Judgments, estimates and assumptions

The preparation of GPA's individual and consolidated financial statements requires that the management makes judgments, estimates and assumptions that affect the amounts stated of revenues, expenses, assets and liabilities and disclosure of contingent liabilities at year-end, however, uncertainties relating to these assumptions and estimates may produce results that require substantial adjustments to the accounted amount of the asset or liability affected in future periods. In the process of applying GPA's accounting policies, management has adopted the following judgments, which have the most significant effect on the amounts recognized in the individual and consolidated financial statements:

a) *Financial lease agreements - Company as lessee*

GPA has entered into commercial property lease agreements in its leased property portfolio and, based on an evaluation of the terms and of conditions of the agreements, it retains all the significant risks and of rewards of ownership of these properties and recorded the agreements as financial lease.

b) *Impairment*

GPA performed test to verify that the assets might not be recoverable and in the fiscal year ended December 31, 2014, based on those tests, there was no need for the provision.

The procedure for verification of non-recoverability of property and equipment, consisted in allocating operating assets and intangible assets (such as Commercial rights) directly attributable to the Cash Generating Units – CGU (stores). The steps of the test were as follows:

- Step 1: compared the carrying amount of CGUs with a multiple of sale (15% to 30%), representing transactions between retail companies. For CGUs multiple-valued lower than the carrying amount, we come to a more detailed method, described in Step 2;

- Step 2: we prepared the discounted cash flow of CGU, using sales growth between 5.9% and 7.5% (6.6% and 6.7% on December 31, 2013) for the next five years. The discount rate used was 11.37% (10.8% on December 31, 2013).

For the purposes of impairment testing, the goodwill acquired through business combinations and licenses with indefinite lives was allocated to four cash generating units which are also operating segments that report information, namely, retail, electronics and home appliances, cash and carry and E-commerce.

The recoverable value of segments is calculated based on the value in use from cash projections deriving from financial budgets approved by top management for the next three years. The discount rate before income taxes applied to cash flow projections is 11.37% (10.8% as at December 31, 2013), and cash flows exceeding the three-year period are extrapolated applying a growth rate of 6.7% (6.5% as at December 31, 2013). As a result of this analysis, GPA did not identify the need for recording provision for asset impairment.

The cash and carry wholesale brand refers to “ASSAÍ”, electronics and home appliance brands refer to “PONTO FRIO” and “CASAS BAHIA”. These brands were recorded upon the business combinations carried out with companies holding rights over them.

The value was submitted to an asset impairment testing through the Income approach - Relief from Royalty methodology, which consists of calculating the value of an asset by measuring the present value of future benefits. Given the brand's indefinite useful life, we considered a perpetual growth of 6.7% (6.5% on December 31, 2013) when preparing the discounted cash flows. Royalty rates were 0.4%, 0.8% and 0.9% for “ASSAÍ”, PONTO FRIO” and “CASAS BAHIA” brands, respectively.

c) *Income taxes*

Given the nature and complexity of the Group's business, the differences between actual results and assumptions, or future changes to such assumptions, could result in future adjustments to already recorded tax revenue and expenses. GPA and its subsidiaries record provisions, based on reasonable estimates, for any taxes due. The amount of these provisions is based on various factors, such as previous tax audits and different interpretations of tax regulations by the taxpayer and the appropriate tax authority. Such differences in interpretation may refer to a wide range of issues, depending on the conditions prevailing in the respective entity's domicile.

Deferred income and social contribution tax assets are recognized for all unused tax losses to the extent that it is probable that taxable income will be available against which to offset the tax credits. Significant Management judgment is required to determine the amount of deferred income and social contribution tax assets that can be recognized, based on income estimates and future taxable income, according to the strategic planning approved by the Board of Directors.

GPA and its subsidiaries' tax losses amounted to a tax benefit of R\$354 on December 31, 2014 (R\$794 on December 31, 2013). These losses do not expire; therefore their use is limited by law to 30% of taxable income for each year. The amounts relate to its subsidiaries that have tax planning opportunities for the use of these balances.

d) *Fair value of derivatives and other financial instruments*

When the fair value of financial assets and liabilities recorded in the financial statements cannot be obtained in active markets, it is determined according to the hierarchy set by technical pronouncement CPC 38 (IAS39), which establishes certain valuation techniques, including the discounted cash flow model. The data for these models are obtained, whenever possible, from observable markets or from information on comparable operations and transactions in the market. The judgments include the analyses of data, such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors may affect the reported fair value of financial instruments.

The fair value of financial instruments actively traded on organized markets is determined based on market quotes and at the end of the reporting periods. For financial instruments not actively traded, the fair value is based on valuation techniques defined by GPA and compatible with usual market practices. These techniques include the use of recent market arm's length transactions, the benchmarking of the fair value of similar financial instruments, the analysis of discounted cash flows or other valuation models.

When the fair value of financial assets and liabilities recorded in the balance sheet cannot be observed in active markets, it is determined by means of valuation techniques, including the discounted cash flow method. The inputs used by these methods are collected from the market, where applicable. When these inputs are not available, judgment is required to determine the fair value. This judgment considers liquidity risk, credit risk and volatility. Changes in assumptions for these factors may affect the fair value of the financial instruments.

e) *Share-based Payment*

GPA measures the costs of transactions with employees eligible to share-based remuneration based on the fair value of the equity instruments on the grant date. Estimating the fair value of share-based payment transactions requires determining the most appropriate valuation model, which depends on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs for the valuation model, including the expected useful life of the stock options, volatility and dividend yield, as well as making assumptions about them. The assumptions and models used to estimate the fair value of share-based payment transactions are disclosed in note 27 (f) to the Financial Statements for the year ended December 31, 2013.

The fair value of each option granted is estimated on the granting date, by using the options pricing model "Black&Scholes" taking into account the following assumptions for the B1 and C1 series: (a) expectation of dividends of 0.96%; (b) expectation of volatility of approximately 22.09%; and (c) the risk-free weighted average interest rate of 11.70%. The expectation of remaining average life of the series outstanding on December 31, 2014 was 1.52 years (1.64 years on December 31, 2013). The weighted average fair value of options granted at December 31, 2014 was R\$69.71 (R\$62.59 on December 31, 2013).

f) *Provision for lawsuits*

GPA and its subsidiaries are parties to several judicial and administrative proceedings (note 23 to the Financial Statements), and provisions for legal claims are recognized for all cases representing reasonably estimated probable losses. The assessment of the likelihood of loss takes into account available evidence, the hierarchy of laws, former court decisions and their legal significance, the historical occurrence and amounts involved, and the opinion of external counsels. The management concluded that the provisions for tax, civil and labor claims are adequately presented in the parent company and consolidated financial statements.

g) *Allowance for doubtful accounts*

The subsidiary Via Varejo has balances receivable from sales via payment vouchers. Estimated losses on this portfolio are calculated according to the expected percentage, which is obtained through the observation of the portfolios' trend over the past months and restated at every end of fiscal period.

h) *Recoverable taxes*

GPA and its subsidiaries have recoverable taxes balances mainly related to ICMS, ICMS Tax Replacement, PIS and Cofins. These taxes are realized based on the growth projections, operating issues, generation of debits and credit consumption by GPA.

(a) *efficiency level of these controls, indicating any failures and measures adopted to correct them*

The Company has implemented and maintains internal controls to provide reasonable assurance about the reliability of its financial statements and other financial information for external purposes, in accordance with broadly accepted accounting principles. During the year, any flaws identified in the execution of controls are rectified by implementing action plans to ensure the correct execution at the close of the year.

There were no significant changes in the Company's internal controls regarding the preparation of financial reports for the period covered by this report that affected, significantly, or would have been reasonably likely to affect the Company's internal controls over its financial reports.

(b) *deficiencies and recommendations for internal controls mentioned in the independent auditor's report*

The study and evaluation of the accounting system and internal controls of the Company, conducted by independent auditors, in connection with the audit of financial statements, was aimed at determining the nature, timing and extent of the application of audit procedures and not for the purpose of providing an opinion on the effectiveness of said internal controls.

The Executive Board has a policy of reporting the deficiencies that result in a more than remote probability that a material error is recorded in the financial statements, which are material weaknesses. In light of this, the Company states that during the audit of financial statements for the year ended December 31, 2014, no material weaknesses in internal controls were identified regarding the preparation of the financial statements to be reported to the Company Management and hence, in the opinion of the Executive Board, none of the suggestions made by the independent auditors can be considered a material weakness of the

13.1 Description of the compensation policy or practice, including Statutory and Non-Statutory Board of Executive Officers the Fiscal Council, Statutory Committees and Audit, Risk, Financial and Compensation Committees, as follow.:

(a) objectives of the remuneration policy or practice

The objective of this remuneration policy or practice is to remunerate Company's management and committee members in line with market practices, allowing the Company to attract and retain qualified professionals, in addition to promoting their engagement with the Company.

(b) Compensation breakdown, including

i. description of the elements that compose the compensation and the purpose of each of them

The members of the Board of Directors and committees, including external members and members of the Fiscal Council receives fixed monthly compensation, unlinked of effective participation in meetings. This form of compensation is aligned in relation to market practice in general and the Company's interests.

The compensation of Executive Officers consists of the following elements: (i) fixed remuneration reflected in a base salary, with the purpose of ensuring compliance with the general market practice; (ii) profit sharing plan, with the purpose of encouraging professionals to seek the success of the Company and of sharing Company's results with them; and (iii) a stock option plan, which is an incentive offered to Company's executives in order to ensure a sustainable and long-lasting business.

ii. the proportion of each element in the total compensation

The table below shows the proportion of each element of the total compensation for the fiscal year ended December 31, 2014:

	<i>% of total compensation</i>			
	Base Salary	Variable Remuneration	Stock Option Plans	Total
Board of Directors	100%	0%	0%	100%
Board of Officers	67.68%	25.07%	7.25%	100%
Fiscal Council	100%	0%	0%	100%

iii. methodology for the calculation and readjustment of each element of the compensation

In order to determine the compensation of the management and committee members, we regularly conduct market research to evaluate if the parameters and conditions we adopt to determine the fixed compensation are satisfactory and enable us to retain Company's professionals, as well to analyze the need to propose adjustments to any component of remuneration which may be misaligned.

These surveys are conducted annually by recognized expert advice and market contracted by us, and use as benchmarks the major economic groups operating in the country, including in particular, the groups that operate in the retail sector

The profit sharing portion allocated to the Executive Officers, on the other hand, is computed based on indicators aligned to the Company's strategic planning, determined in line with Company's business plan and the goals to be met.

For additional information on Company's stock option plan please refer to item 13.4 below.

iv. reasons that justify the composition of the compensation

What justifies the breakdown of Company's compensation policy is Company's result-oriented strategy, which depends on the continuous search for competent, qualified, dedicated and valuable professionals for the Company.

(c) key performance indicators considered in determining each element of the compensation

For setting the variable portion of remuneration, we consider performance indicators that we consider strategic, as gross sales, net income, total expenditure, working capital, engagement and turnover, beyond the level of excellence of managers in performing their functions, considering the degree of responsibility and individual assignments. Performance indicators are not taken into consideration for determining the proportion of fixed remuneration.

(d) *the way the compensation is structured to reflect the evolution of the performance indicators*

We structure Company's compensation through programs that monitor the accomplishment of goals previously determined by the Company and the results effectively met

(e) *the way the compensation policy or practice is aligned with the Company's short, medium and long-term interests*

In order to align the Board with the Company's objectives in a short and medium term perspective we offer to the Executive Officers a fixed compensation (base salary) and, additionally, a portion of the variable compensation, to be paid in the form of profit sharing. In addition, we offer to our Directors a stock option plan and compensation plan based on stock option that, by presenting some characteristics as grace periods for exercising the options and lock up of the shares acquired, keeps the Board aligned with the Company's objectives in a long-term perspective. It should be clarified that the stock option plan, the compensation plan based on stock options and profit sharing form the variable remuneration of the Board.

60

The compensation of the members of the Board of Directors, Fiscal Council and other committees is readjusted based on the amount usually paid in the industry, encouraging such professionals to maintain the excellence in exercising their functions and to strive for the improvement of Company's results. Therefore, we understand that the compensation policy or practice is aligned with Company's short, medium and longterm interests.

(f) *existence of compensation supported by subsidiaries or direct or indirect controlling shareholders*

The compensation of the management and committee members is supported exclusively by the Company.

FORMER OPTION PLAN

a. General Terms and Conditions

Our Former Option Plan was administered by a committee elected by our Board of Directors, called Stock Option Plan Administration Committee for Stock Option ("Stock Option Committee"). This committee determined the employees to be periodically included in stock options based on their functions, responsibilities and performance, and defined the applicable conditions.

Our Stock Option Committee developed annual cycles of grant of options. Each grant cycle had a serial number beginning with letter A. In the fiscal year ended December 31, 2014, options granted for Series A5 to A7 of the Former Option Plan were in force.

The options granted within the ambit of the Former Stock Option Plan are divided into "Gold" and "Silver" options, which implies a change in the options' exercise price, as explained in item (i) below.

In 2003, the Stock Option Committee approved new criteria to calculate the reduction and/or increase index (reducer or accelerator) for the number of options granted classified as "Gold" in each series of the Former Stock Option Plan, according to the analysis of compliance with the concept of return on invested capital (ROIC). According to item 3.3 of the Former Stock Option Plan, the Committee decided that, starting from Series A6, and including it, the reduction or increase in the number of "Gold" options should be calculated based on the due compliance with CBD's Return on Capital Employed (ROCE)..

There is no limit for reduction or acceleration under that new approved criterion. Upon the option vesting, one will calculate the average ROIC/ROCE for the last three fiscal years, against the ROIC/ROCE calculated upon the granting of each series.

b. Plan's Main Objectives

The objectives of the Stock Option Plan were: (i) to attract and retain highly qualified executives and professionals in the Company; (ii) to allow executives and employees to own Company's capital stock and the equity additions arising from the results said executives, employees and contractors have contributed to; and (iii) to align the interests of executives and employees with the interests of Company's shareholders, encouraging the good performance of these professionals and ensuring Company's management continuity.

c. How the Plan contributes to these objectives

The beneficiaries of the Former Stock Option Plan are encouraged to generate additional income to our Company, first to meet their goals in their role as managers and employees and, then, in order to increase the value of their shares, received as compensation.

d. How the Plan is included in the Company's Compensation Policy

The Former Stock Option Plan was an element making part of the compensation paid to our managers and were aligned with our compensation policy, which aims at retaining our managers and employees and encouraging the generation of better results.

e. How the Plan Aligns the Interests of the Executives and of the Company in the Short, Medium, and Long term

As the options were granted every year and based on Company's results, we understand that the Former Stock Option Plan was in line with Company's short-term interests because it encouraged their beneficiaries to meet their individual goals and the Company's goals. Furthermore, it allowed us not only to retain our Officers and employees benefitted by the Former Stock Option Plan, but also attracted new professionals, which is in line with the Company's medium-term interests. Finally, as mentioned in item (j) below, the beneficiaries of the Former Stock Option Plan would only be eligible to exercise their options after a given period of time in the Company, which encouraged them to generate better results in the long term so their shares increased value, in addition to retaining them for a longer period, in line with Company's long-term interests.

f. Maximum Number of Shares Involved

The maximum number of shares included in the Former Stock Option Plan was 15,500,000 preferred shares (as resolved by the Board of Directors at the meeting held on February 19, 2013).

The amount indicated above had to observe the Company's authorized capital limit, and could be changed at any time upon resolution of the Board of Directors. When the call options were exercised, new shares were issued to the beneficiaries, upon observance of the Company's right to use treasury shares.

g. Maximum Number of Options to be Granted

There was no maximum number of options to be granted within the scope of the Former Stock Option Plan, provided that the total number of shares resulting from their exercise did not exceed the limit indicated in

Edgar Filing: BRAZILIAN DISTRIBUTION CO COMPANHIA BRASILEIRA DE DISTR CBD - Form 6-K
item (f) above and the limit of 2% of Company capital stock per Series.

h. Stock Purchase Terms

The Stock Option Committee determined, for each Series and depending on the case, if necessary, the terms and conditions for the acquisition of the right to exercise options granted, under an express provision stated in the respective subscription agreement signed with the beneficiary.

For shares to be acquired under the Former Stock Option Plan, the beneficiaries had to remain working at the Company for a specific period, pursuant to item (j) below, except for the cases of employment termination as described in item (n) below.

The options could be exercised in whole or in part before the respective option's expiration date. For further information on the options' expiration dates currently in effect, please refer to item 13.6 below.

i. Criteria for Setting the Acquisition Price or Exercise Price

For the options classified as "Silver", the exercise price per preferred share corresponded to the average of the closing price of the preferred shares issued by the Company and traded in the last 20 sessions of BM&FBOVESPA before the date the Stock Option Committee resolved on the granting of the option. Upon determination of such average price, a negative goodwill of 20% was applied.

For the options classified as "Gold", the exercise price was R\$0.01 per preferred share.

j. Criteria for Determining the Exercise Price

As general rule for the Former Stock Option Plan, which could be amended by the Committee on each series, the right to exercise the stock option "Silver" matured after the 36th month and up to the 48th month following the execution of the respective subscription agreement, and the beneficiary had the right to acquire 100% of the option. The exercise of the "Gold" options will take place in the same period, but the percentage of said options subject to exercise will be determined by the Stock Option Committee in the 35th month following the date of execution of the respective subscription agreement.

The options granted within the ambit of the Former Option Plan may be exercised in whole or in part. It is worth mentioning that "Gold" options supplement "Silver" options, and, therefore, "Gold" options shall only be exercised together with "Silver" options.

k. Settlement Terms

The exercise price of the options granted under the Former Option Plan had to be fully paid in local currency by the beneficiary, and the exercise price had to be paid in full within 30 days following the date of subscription of the respective shares, except for the cases of termination as stated in item (n) below, in which case the exercise price had to be paid in cash upon subscription.

l. Restrictions to the Transfer of Shares

The Stock Option Committee may impose restrictions on the transfer or sale of shares obtained from the exercise of the options.

m. Criteria and Events That, When Verified, Shall Result in the Suspension, Amendment or Termination of the Plan

The number of shares to be acquired within the ambit of the “Gold” Series, as stated in item (j) above, may be limited by the Stock Option Committee.

The Former Option Plan and the shares granted are automatically cancelled if the Company is dissolved or liquidated.

Finally, the Stock Option Committee may determine the suspension, amendment to or termination of the Former Option Plan without the beneficiaries' prior consent, provided that no damage was caused to their rights and obligations.

n. Effects of the Executive's Leaving the Company on his Rights under the Stock-Based Compensation Plan

In the case of involuntary termination of employment by any beneficiary of the Former Option Plan up to the last working day of the 35th month following the date of execution of the respective subscription agreement, the right to exercise 100% of the "Silver" and "Gold" options will be granted". In this case, the limit determined by the Stock Option Committee shall not apply for the number of shares resulting from the exercise of the "Gold" options, described in item (j) above, and the total number of shares initially determined by the Committee shall be subject to exercise.

In the event of involuntary termination of employment by any beneficiary of the Former Option Plan between the last business day of the 35th month and the last business day of the 48th month following the date of execution of the respective subscription agreement, the right to exercise 100% of the "Silver" and "Gold" options will also be granted. In this case, however, the limit determined by the Stock Option Committee will remain applicable for the number of shares resulting from the exercise of the "Gold" options, as described in item (j) above.

In both cases, the beneficiaries shall communicate their intention to exercise the options granted to them within up to 15 days following the date of termination of employment.

In the case of voluntary termination of employment of any beneficiary of the Former Option Plan, and/or termination with cause, pursuant to the Brazilian labor law, the right to exercise the "Silver" and "Gold" options will not be granted.

In the event of death or permanent disability of any beneficiary, the rules governing involuntary termination of employment described above shall apply, and the exercise shall be carried out by a person duly authorized by the competent authority.

13.9 Brief description of the information necessary for the understanding of the data disclosed in items “13.6” to “13.8”, and explanation of the pricing method used for the shares and options

a. Pricing Method

The fair value of each option granted is estimated on the grant date using the *Black-Scholes-Merton* options pricing model

b. data and premises used in the pricing model, including the average weighted price of the shares, exercise price, expected volatility, option term, expected dividends, and risk-free interest rate

The market price of each granted option is estimated on the grant date using the *Black-Scholes-Merton* options pricing model, considering the following premises for the options in effect in 2014:

	<u>On the grant date</u>
Average weighted price of the shares (per share), according to the average value of the last 20 trading sections on the grant date	Series A5: R\$ 68.36 Series A6: R\$ 80.16 Series A7: R\$ 100.00 Series B1: R\$ 99.86

Series C1: 83.22

Expected updated volatility	22.09%
Options term	Four years
Expected dividends	0.96%
Risk-free interest rate	11.70%
Fair value of the option on the grant date (per option)	Please check 13.6 above

c. Method and Premises Used to Incorporate the Expected Effects of Early Exercise

We do not take into account, for purposes of pricing the options, early exercises resulting from involuntary termination of employment, death or permanent disability of the beneficiary, and as a result of corporate events.

We adopt the premise that the options will be exercised from the moment they become exercisable. Therefore, the options term adopted in the calculations ranges from 1 to 5 years, depending on the series and the corresponding vesting periods of the options.

86

d. How the Expected Volatility is Determined

In calculating the expected volatility, we used the standard deviation of the natural logarithms of the historic daily variations of the prices of the shares issued by the Company, according to the effective term of the options.

e. Other Characteristics Incorporated in the Measurement of the Options' Fair Value

Up to the end of the vesting period, the non-exercisable options are considered as call options in the calculations made using the *Black-Scholes-Merton* method. When they become exercisable, the options are considered as put options, that is, exercisable at any time up to the expiration date.
