Item 2.05 Costs Associated with Exit or Disposal Activities.

On February 18, 2010, Ferro Corporation (the "Company") announced additional restructuring initiatives associated with the Company's European manufacturing operations. The Company concluded required consultations with workers' representatives in Portugal on February 12, 2010.

As a result of the new initiatives, Ferro expects to discontinue manufacturing of dinnerware frit materials in Castanheira, Portugal. This action represents the final step in consolidation of high-volume frit production into the Company's manufacturing site in Almazora, Spain. The Company also announced plans to consolidate plastics manufacturing from Portugal to its existing plastics production facility in Almazora, Spain. Because of the manufacturing consolidation, the number of selling, general and administrative positions in Portugal are expected to be reduced as well. In total, approximately 125 positions are expected to be eliminated when the initiatives are completed by August 2010.

The Company expects to record charges of approximately \$14 million in the six-month period ended June 30, 2010, related to the costs of the restructuring. The charges include approximately \$8 million in severance costs, \$3.4 million in asset write-offs and \$1.4 million in dismantling costs. The initiatives are expected to generate pre-tax cost and expense savings of approximately \$5 million on an annual basis.

A copy of the press release announcing the actions is attached, hereto, as Exhibit 99.1.

Item 9.01 Financial Statements and Exhibits.

Exhibit 99.1: Press release
