Item 8.01 Other Events.

Today we announced that we have stopped shipment and are retrieving field inventory of all our implantable cardioverter defibrillators (ICDs) and cardiac resynchronization therapy defibrillators (CRT-Ds). We have determined that some manufacturing process changes were not submitted for approval to the U.S. Food and Drug Administration (FDA). At this time, we have identified two instances of changes that, while successfully validated, were not submitted to the FDA. We have informed the FDA and plan to work closely with the agency to resolve this situation as soon as possible.

We have no indication that the manufacturing process changes pose any risk to patient safety, and we are not recommending explantation of the devices. Given the financial uncertainty involved, these actions could have a material impact on our previously issued guidance, including revenue, operating profit and cash flows for the first quarter and full year of 2010.

A copy of the press release is attached hereto as Exhibit 99.1.
