FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission file number 001-35968

MIDWESTONE FINANCIAL GROUP, INC.
(Exact name of Registrant as specified in its charter)

Iowa 42-1206172
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)
102 South Clinton Street
Iowa City, IA 52240
(Address of principal executive offices, including zip code)
319-356-5800
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of May 3, 2016, there were 11,427,560 shares of common stock, \$1.00 par value per share, outstanding.

Table of Contents

MidWestOne Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(Unaudited)

1. Principles of Consolidation and Presentation

MidWestOne Financial Group, Inc. (the “Company,” which is also referred to herein as “we,” “our” or “us”) is an Iowa corporation incorporated in 1983, a bank holding company under the Bank Holding Company Act of 1956 and a financial holding company under the Gramm-Leach-Bliley Act of 1999. Our principal executive offices are located at 102 South Clinton Street, Iowa City, Iowa 52240.

On May 1, 2015, the Company completed its merger with Central Bancshares, Inc. (“Central”), pursuant to which Central was merged with and into the Company. In connection with the merger, Central Bank, a Minnesota-chartered commercial bank and wholly-owned subsidiary of Central, became a wholly-owned subsidiary of the Company. On April 2, 2016, Central Bank merged with and into MidWestOne Bank.

The Company issued 2,723,083 shares of common stock and paid \$64.0 million in cash, for total consideration of \$141.9 million, in connection with the holding company merger. The results of operations acquired from Central have been included in the Company’s results of operations for the time period since the date of acquisition.

The Company owns all of the common stock of MidWestOne Bank, an Iowa state non-member bank chartered in 1934 with its main office in Iowa City, Iowa, and prior to the bank merger, all of the common stock of Central Bank, a Minnesota state non-member bank chartered in 1988 with its main office in Golden Valley, Minnesota, and all of the common stock of MidWestOne Insurance Services, Inc., Oskaloosa, Iowa. We operate primarily through our bank subsidiaries, MidWestOne Bank and, prior to the bank merger, Central Bank, and MidWestOne Insurance Services, Inc., our wholly-owned subsidiary that operates an insurance agency business through six offices located in central and east-central Iowa.

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and, therefore, do not include all the information and notes necessary for complete financial statements in conformity with U.S. Generally Accepted Accounting Principles (“GAAP”). The information in this Quarterly Report on Form 10-Q is written with the presumption that the users of the interim financial statements have read or have access to the most recent Annual Report on Form 10-K of the Company, which contains the latest audited financial statements and notes thereto, together with Management’s Discussion and Analysis of Financial Condition and Results of Operations as of December 31, 2015 and for the year then ended. Management believes that the disclosures are adequate to make the information presented not misleading. In the opinion of management, the accompanying consolidated financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly the Company’s financial position as of March 31, 2016, and the results of operations and cash flows for the three months ended March 31, 2016 and 2015. All significant intercompany accounts and transactions have been eliminated in consolidation.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect: (1) the reported amounts of assets and liabilities, (2) the disclosure of contingent assets and liabilities at the date of the financial statements, and (3) the reported amounts of revenues and expenses during the reporting period. These estimates are based on information available to management at the time the estimates are made. Actual results could differ from those estimates. The results for the three months ended March 31, 2016 may not be indicative of results for the year ending December 31, 2016, or for any other period.

All significant accounting policies followed in the preparation of the quarterly financial statements are disclosed in the Annual Report on Form 10-K for the year ended December 31, 2015. In the consolidated statements of cash flows, cash and cash equivalents include cash and due from banks, interest-bearing deposits in banks, and federal funds sold. Certain reclassifications have been made to prior periods’ consolidated financial statements to present them on a basis comparable with the current period’s consolidated financial statements.

2. Business Combination

On May 1, 2015, the Company acquired all of the voting equity interests of Central, a bank holding company and the parent company of Central Bank, a commercial bank headquartered in Golden Valley, Minnesota, through the merger of Central with and into the Company. Among other things, this transaction provided the Company with the opportunity to expand its business into new markets and grow the size of the business. At the effective time of the merger, each share of common stock of Central converted into a pro rata portion of (1) 2,723,083 shares of common stock of the Company, and (2) \$64.0 million in cash.

6

Table of Contents

This business combination was accounted for under the acquisition method of accounting. Accordingly, the results of operations of the acquired company have been included in the Company's results of operations since the date of acquisition. Under this method of accounting, assets and liabilities acquired are recorded at their estimated fair values. The excess cost over fair value of net assets acquired is recorded as goodwill. As the consideration paid for Central exceeded the net assets acquired, goodwill of \$64.7 million has been recorded on the acquisition. Goodwill recorded in this transaction, which reflects the entry into the geographically new markets served by Central, has been allocated to our Central Bank segment. Goodwill recorded in the transaction is not tax deductible. The amounts recognized for the business combination in the financial statements have been determined to be final as of March 31, 2016.

Estimated fair values of assets acquired and liabilities assumed in the Central transaction, as of the closing date of the transaction, were as follows:

(in thousands)	May 1, 2015
ASSETS	
Cash and due from banks	\$28,404
Investment securities	160,775
Loans	916,973
Premises and equipment	27,908
Goodwill	64,654
Core deposit intangible	12,773
Trade name intangible	1,380
FDIC indemnification asset	3,753
Other real estate owned	8,420
Other assets	14,482
Total assets	1,239,522
LIABILITIES	
Deposits	1,049,167
Short-term borrowings	16,124
Junior subordinated notes issued to capital trusts	8,050
Subordinated notes payable	12,669
Accrued expenses and other liabilities	11,617
Total liabilities	1,097,627
Total identifiable net assets	141,895

Consideration:

Market value of common stock at \$29.31 per share at May 1, 2015 (2,723,083 shares of common stock issued), net of stock illiquidity discount due to restrictions	77,895
Cash paid	64,000
Total fair value of consideration	\$141,895

Purchased loans acquired in a business combination are recorded and initially measured at their estimated fair value as of the acquisition date. Credit discounts are included in the determination of fair value. An allowance for loan losses is not carried over. These purchased loans are segregated into two types: purchased credit impaired loans and purchased non-credit impaired loans without evidence of significant credit deterioration.

Purchased credit impaired loans are accounted for in accordance with ASC 310-30 "Loans and Debt Securities Acquired with Deteriorated Credit Quality" as they display significant credit deterioration since origination and it is probable, as of the acquisition date, that the Company will be unable to collect all contractually required payments from the borrower.

Purchased non-credit impaired loans are accounted for in accordance with ASC 310-20 "Nonrefundable Fees and Other Costs" as these loans do not have evidence of significant credit deterioration since origination and it is probable all contractually required payments will be received from the borrower.

For purchased non-credit impaired loans, the difference between the estimated fair value of the loans (computed on a loan-by-loan basis) and the principal outstanding is accreted over the remaining life of the loans.

7

Table of Contents

For purchased credit impaired loans the difference between contractually required payments at acquisition and the cash flows expected to be collected is referred to as the non-accretable difference. Further, any excess of cash flows expected at acquisition over the estimated fair value is referred to as the accretable yield and is recognized into interest income over the expected remaining life of the loan if the timing and amount of the future cash flows are reasonably estimable. Subsequent to the purchase date, increases in cash flows over those expected at the purchase date are recognized as interest income prospectively. The present value of any decreases in expected cash flows after the purchase date is recognized by recording an allowance for credit losses and a provision for loan losses.

The following table presents the purchased loans as of the acquisition date:

(in thousands)	Purchased	
	Credit Impaired Loans	Non-Credit Impaired Loans
Contractually required principal payments	\$ 36,886	\$ 905,314
Nonaccretable difference	(6,675)	—
Principal cash flows expected to be collected	30,211	905,314
Accretable discount ⁽¹⁾	(1,882)	(16,670)
Fair value of acquired loans	\$ 28,329	\$ 888,644

(1) Included in the accretable discount for purchased non-credit impaired loans is approximately \$10.4 million of estimated undiscounted principal losses.

Disclosures required by ASC 805-20-50-1(a) concerning the Federal Deposit Insurance Corporation (the "FDIC") indemnification assets have not been included due to the immateriality of the amount involved. See Note 6. "Loans Receivable and the Allowance for Loan Losses" to our consolidated financial statements for additional information related to the FDIC indemnification asset.

ASC 805-30-30-7 requires that the consideration transferred in a business combination should be measured at fair value. Since the common shares issued as part of the consideration of the merger included a restriction on their sale, pledge or other disposition, an illiquidity discount has been assigned to the shares based upon the volatility of the underlying shares' daily returns and the period of restriction.

The Company recorded \$2.2 million and \$0.5 million in pre-tax merger-related expenses for the three months ended March 31, 2016 and 2015, respectively, including professional and legal fees of \$0.1 million and \$0.2 million, respectively, to directly consummate the bank merger and the holding company merger, respectively. These amounts are included in professional fees in the Company's consolidated statements of operations. The remainder of merger-related expenses primarily relate to retention and severance compensation costs in the amount of \$0.3 million and \$0.3 million, for the three months ended March 31, 2016 and 2015, respectively, which are included in salaries and employee benefits in the consolidated statements of operations, and \$1.8 million of data processing service contract termination costs for the three months ended March 31, 2016, which are included in data processing expense. During the measurement period, specifically the three months ended March 31, 2016, the Company recognized adjustments to the provisional amounts reported at December 31, 2015, which reflect new information that existed as of May 1, 2015 that, if known, would have affected the measurement of the amounts recognized as of that date. In its interim financial statements for the three months ended March 31, 2016, the Company adjusted the provisional amounts for deferred taxes. The results of these adjustments are reflected in the \$0.1 million increase to goodwill during the quarter ended March 31, 2016. The final adjustments had no impact on earnings, and in accordance with ASU 2015-16 were recorded during the three months ending March 31, 2016.

Table of Contents

The following table provides the unaudited pro forma information for the results of operations for the three months ended March 31, 2015, as if the acquisition had occurred January 1, 2015. The pro forma results combine the historical results of Central into the Company's consolidated statement of income including the impact of certain purchase accounting adjustments, including loan discount accretion, investment securities discount accretion, intangible assets amortization, deposit premium accretion and borrowing discount amortization. The pro forma results have been prepared for comparative purposes only and are not necessarily indicative of the results that would have been obtained had the acquisition actually occurred on January 1, 2015. No assumptions have been applied to the pro forma results of operations regarding possible revenue enhancements, expense efficiencies or asset dispositions. Net income in the table below includes merger expenses.

	Pro Forma Three Months Ended March 31, 2015
(in thousands)	
Total revenues (net interest income plus noninterest income)	\$34,338
Net income	\$6,497

The pro forma information above excludes the impact of any provision recorded related to renewing Central loans. Revenues and earnings included in the consolidated statements of operations of the acquired company were \$15.6 million and \$1.9 million for the three months ended March 31, 2016.

3. Shareholders' Equity

Preferred Stock: The number of authorized shares of preferred stock for the Company is 500,000. As of March 31, 2016, none were issued or outstanding.

Common Stock: As of March 31, 2016, the number of authorized shares of common stock for the Company was 15,000,000. As of March 31, 2016, 11,425,035 shares were outstanding.

On May 1, 2015, in connection with the Central merger, the Company issued 2,723,083 shares of its common stock. On June 22, 2015, the Company entered into a Securities Purchase Agreement with certain institutional accredited investors, pursuant to which, on June 23, 2015, the Company sold an aggregate of 300,000 newly issued shares of the Company's common stock, \$1.00 par value per share, at a purchase price of \$28.00 per share. Each of the purchasers was an existing shareholder of the Company.

On July 17, 2014, the board of directors of the Company approved a share repurchase program, allowing for the repurchase of up to \$5.0 million of stock through December 31, 2016. The repurchase program replaced the Company's prior repurchase program. Pursuant to the repurchase program, the Company may continue to repurchase shares from time to time in the open market, and the method, timing and amounts of repurchase will be solely in the discretion of the Company's management. The repurchase program does not require the Company to acquire a specific number of shares. Therefore, the amount of shares repurchased pursuant to the program will depend on several factors, including market conditions, capital and liquidity requirements, and alternative uses for cash available. During the first quarter of 2016 the Company repurchased no common stock. Of the \$5.0 million of stock authorized under the repurchase plan, \$3.8 million remained available for possible future repurchases as of March 31, 2016.

4. Earnings per Share

Basic per-share amounts are computed by dividing net income (the numerator) by the weighted-average number of common shares outstanding (the denominator). Diluted per-share amounts assume issuance of all common stock issuable upon conversion or exercise of other securities, unless the effect is to reduce the loss or increase the income per common share from continuing operations.

Table of Contents

The following table presents the computation of earnings per common share for the respective periods:

(dollars in thousands, except per share amounts)	Three Months Ended March 31,	
	2016	2015
Basic earnings per common share computation		
Numerator:		
Net income	\$5,544	\$ 4,796
Denominator:		
Weighted average shares outstanding	11,416,983	11,363,861
Basic earnings per common share	\$0.49	\$ 0.57
Diluted earnings per common share computation		
Numerator:		
Net income	\$5,544	\$ 4,796
Denominator:		
Weighted average shares outstanding, including all dilutive potential shares	11,442,983	11,194,026
Diluted earnings per common share	\$0.48	\$ 0.57

5. Investment Securities

The amortized cost and fair value of investment securities available for sale, with gross unrealized gains and losses, are as follows:

(in thousands)	As of March 31, 2016			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
U.S. Government agencies and corporations	\$11,433	\$ 113	\$ —	\$11,546

Collateralized mortgage obligations	30,505	1	459	30,047
Corporate debt securities	17,544	—	515	17,029
Total	\$118,423	\$ 933	\$ 1,122	\$ 118,234

Investment securities with a carrying value of \$290.2 million and \$321.6 million at March 31, 2016 and December 31, 2015, respectively, were pledged on public deposits, securities sold under agreements to repurchase and for other purposes, as required or permitted by law.

The summary of investment securities shows that some of the securities in the available for sale and held to maturity investment portfolios had unrealized losses, or were temporarily impaired, as of March 31, 2016 and December 31, 2015. This temporary impairment represents the estimated amount of loss that would be realized if the securities were sold on the valuation date.

The following presents information pertaining to securities with gross unrealized losses as of March 31, 2016 and December 31, 2015, aggregated by investment category and length of time that individual securities have been in a continuous loss position:

	As of March 31, 2016						
	Number of Securities	Less than 12 Months		12 Months or More		Total	
Available for Sale		Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses

The Company's assessment of other-than-temporary impairment ("OTTI") is based on its reasonable judgment of the specific facts and circumstances impacting each individual security at the time such assessments are made. The Company reviews and considers factual information, including expected cash flows, the structure of the security, the creditworthiness of the issuer, the type of underlying assets and the current and anticipated market conditions.

At March 31, 2016 and December 31, 2015, the Company's mortgage-backed securities and collateralized mortgage obligations portfolios consisted of securities predominantly backed by one- to four-family mortgage loans and underwritten to the standards of and guaranteed by the following government-sponsored agencies: the Federal Home Loan Mortgage Corporation, the Federal National Mortgage Association, and the Government National Mortgage Association. The receipt of principal, at par, and interest on mortgage-backed securities is guaranteed by the respective government-sponsored agency guarantor, such that the Company believes that its mortgage-backed securities and collateralized mortgage obligations do not expose the Company to credit-related losses.

At March 31, 2016, approximately 58% of the municipal bonds held by the Company were Iowa-based, and approximately 20% were Minnesota-based. The Company does not intend to sell these municipal obligations, and it is more likely than not that the Company will not be required to sell them until the recovery of their cost. Due to the issuers' continued satisfaction of their obligations under the securities in accordance with their contractual terms and the expectation that they will continue to do so, management's intent and ability to hold these securities for a period of time sufficient to allow for any anticipated recovery in fair value, as well as the evaluation of the fundamentals of the issuers' financial conditions and other objective evidence, the Company believes that the municipal obligations identified in the tables above were temporarily impaired as of March 31, 2016 and December 31, 2015.

Table of Contents

As of March 31, 2016, the Company also owned \$0.3 million of equity securities in banks and financial service-related companies, and \$1.0 million of mutual funds invested in debt securities and other debt instruments that will cause units of the fund to be deemed to be qualified under the Community Reinvestment Act. Equity securities are considered to have OTTI whenever they have been in a loss position, compared to current book value, for twelve consecutive months, and the Company does not expect them to recover to their original cost basis. For the three months ended March 31, 2016 and the full year of 2015, no impairment charges were recorded, as the affected equity securities were not deemed impaired due to stabilized market prices in relation to the Company's original purchase price.

It is reasonably possible that the fair values of the Company's investment securities could decline in the future if interest rates increase or the overall economy or the financial conditions of the issuers deteriorate. As a result, there is a risk that OTTI may be recognized in the future and any such amounts could be material to the Company's consolidated statements of operations.

The contractual maturity distribution of investment debt securities at March 31, 2016, is summarized as follows:

	Available For Sale		Held to Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
(in thousands)				
Due in one year or less	\$20,886	\$ 20,986	\$—	\$—
Due after one year through five years	86,325	88,511	6,117	6,149
Due after five years through ten years	100,431	105,087	51,082	52,116
Due after ten years	16,281	16,782	28,627	28,794
Debt securities without a single maturity date	154,085	154,863	32,422	32,355
Total	\$378,008	\$ 386,229	\$ 118,248	\$ 119,414

Mortgage-backed securities and collateralized mortgage obligations are collateralized by mortgage loans and guaranteed by U.S. government agencies. Our experience has indicated that principal payments will be collected sooner than scheduled because of prepayments. Therefore, these securities are not scheduled in the maturity categories indicated above. Equity securities available for sale with an amortized cost of \$1.3 million and a fair value of \$1.3 million are also excluded from this table.

Proceeds from the sales of investment securities available for sale during the three months ended March 31, 2016 and March 31, 2015 were \$19.7 million and \$48.3 million, respectively.

Realized gains and losses on sales are determined on the basis of specific identification of investments based on the trade date. Realized gains on investments for the three months ended March 31, 2016 and 2015 are as follows:

	Three Months Ended March 31, 2016 2015

Included above as of March 31, 2016, are loans with a contractual balance of \$95.7 million and a recorded balance of \$90.6 million, which are covered under loss sharing agreements with the FDIC. The agreements cover certain losses and expenses and expire at various dates through October 7, 2021. The related FDIC indemnification asset is reported separately in Note 8. "Other Assets".

As of March 31, 2016, the purchased credit impaired loans included above are \$31.3 million, net of a discount of \$6.8 million.

Loans with unpaid principal in the amount of \$568.3 million and \$558.8 million at March 31, 2016 and December 31, 2015, respectively, were pledged to the Federal Home Loan Bank (the "FHLB") as collateral for borrowings.

Table of Contents

As part of the merger between MidWestOne Bank and Central Bank, management developed a single methodology for determining the amount of the ALLL that would be needed at the combined bank. The new methodology is a hybrid of the methods used at MidWestOne Bank and Central Bank prior to the bank merger and the results from the new ALLL model are consistent with the results that the two banks calculated individually. The refined allowance calculation allocates the portion of allowance that was previously deemed to be unallocated to instead be included in management's determination of appropriate qualitative factors. These qualitative factors include (i) national and local economic conditions, (ii) the quality and experience of lending staff and management, (iii) changes in lending policies and procedures, (iv) changes in volume and severity of past due loans, classified loans and non-performing loans, (v) potential impact of any concentrations of credit, (vi) changes in the nature and terms of loans such as growth rates and utilization rates, (vii) changes in the value of underlying collateral for collateral-dependent loans, considering the Company's disposition bias, and (viii) the effect of other external factors such as the legal and regulatory environment. The Company may also consider other qualitative factors for additional allowance allocations, including changes in the Company's loan review process. Changes in the criteria used in this evaluation or the availability of new information could cause the allowance to be increased or decreased in future periods. In addition, bank regulatory agencies, as part of their examination process, may require adjustments to the allowance for loan losses based on their judgments and estimates.

Loan Portfolio Segment Risk Characteristics

Agricultural - Agricultural loans, most of which are secured by crops, livestock, and machinery, are provided to finance capital improvements and farm operations as well as acquisitions of livestock and machinery. The ability of the borrower to repay may be affected by many factors outside of the borrower's control including adverse weather conditions, loss of livestock due to disease or other factors, declines in market prices for agricultural products and the impact of government regulations. The ultimate repayment of agricultural loans is dependent upon the profitable operation or management of the agricultural entity. Collateral for these loans generally includes accounts receivable, inventory, equipment and real estate. However, depending on the overall financial condition of the borrower, some loans are made on an unsecured basis. The collateral securing these loans may depreciate over time, may be difficult to appraise and may fluctuate in value based on the success of the business.

Commercial and Industrial - Commercial and industrial loans are primarily made based on the reported cash flow of the borrower and secondarily on the underlying collateral provided by the borrower. The collateral support provided

by the borrower for most of these loans and the probability of repayment are based on the liquidation of the pledged collateral and enforcement of a personal guarantee, if any exists. The primary repayment risks of commercial and industrial loans are that the cash flows of the borrower may be unpredictable, and the collateral securing these loans may fluctuate in value. The size of the loans the Company can offer to commercial customers is less than the size of the loans that competitors with larger lending limits can offer. This may limit the Company's ability to establish relationships with the largest businesses in the areas in which the Company operates. As a result, the Company may assume greater lending risks than financial institutions that have a lesser concentration of such loans and tend to make loans to larger businesses. Collateral for these loans generally includes accounts receivable, inventory, equipment and real estate. However, depending on the overall financial condition of the borrower, some loans are made on an unsecured basis. The collateral securing these loans may depreciate over time, may be difficult to appraise and may fluctuate in value based on the success of the business. In addition, if the U.S. economy does not continue to improve, this could harm or continue to

Table of Contents

harm the businesses of the Company's commercial and industrial customers and reduce the value of the collateral securing these loans.

Commercial Real Estate - The Company offers mortgage loans to commercial and agricultural customers for the acquisition of real estate used in their businesses, such as offices, warehouses and production facilities, and to real estate investors for the acquisition of apartment buildings, retail centers, office buildings and other commercial buildings. The market value of real estate securing commercial real estate loans can fluctuate significantly in a short period of time as a result of market conditions in the geographic area in which the real estate is located. Adverse developments affecting real estate values in one or more of the Company's markets could increase the credit risk associated with its loan portfolio. Additionally, real estate lending typically involves higher loan principal amounts than other loans, and the repayment of the loans generally is dependent, in large part, on sufficient income from the properties securing the loans to cover operating expenses and debt service. Economic events or governmental regulations outside of the Company's control or that of the borrower could negatively impact the future cash flow and market values of the affected properties.

Residential Real Estate - The Company generally retains short-term residential mortgage loans that are originated for its own portfolio but sells most long-term loans to other parties while retaining servicing rights on the majority of those loans. The market value of real estate securing residential real estate loans can fluctuate as a result of market conditions in the geographic area in which the real estate is located. Adverse developments affecting real estate values in one or more of the Company's markets could increase the credit risk associated with its loan portfolio. Additionally, real estate lending typically involves higher loan principal amounts than other loans, and the repayment of the loans generally is dependent, in large part, on the borrower's continuing financial stability, and is therefore more likely to be affected by adverse personal circumstances.

Consumer - Consumer loans typically have shorter terms, lower balances, higher yields and higher risks of default than real estate-related loans. Consumer loan collections are dependent on the borrower's continuing financial stability, and are therefore more likely to be affected by adverse personal circumstances. Collateral for these loans generally includes automobiles, boats, recreational vehicles, mobile homes, and real estate. However, depending on the overall financial condition of the borrower, some loans are made on an unsecured basis. The collateral securing these loans may depreciate over time, may be difficult to recover and may fluctuate in value based on condition. In addition, a decline in the United States economy could result in reduced employment, impacting the ability of customers to repay their obligations.

Purchased Loans Policy

All purchased loans (nonimpaired and impaired) are initially measured at fair value as of the acquisition date in accordance with applicable authoritative accounting guidance. Credit discounts are included in the determination of fair value. An allowance for loan losses is not recorded at the acquisition date for loans purchased.

Individual loans acquired through the completion of a transfer, including loans that have evidence of deterioration of credit quality since origination and for which it is probable, at acquisition, that the Company will be unable to collect all contractually required payments receivable, are referred to herein as "purchased credit impaired loans." In determining the acquisition date fair value and estimated credit losses of purchased credit impaired loans, and in subsequent accounting, the Company accounts for loans individually. Contractually required payments for interest and principal that exceed the undiscounted cash flows expected at acquisition, or the "nonaccretable difference," are not recognized as a yield adjustment or as a loss accrual or valuation allowance. Expected cash flows at the purchase date in excess of the fair value of loans, if any, are recorded as interest income over the expected life of the loans if the timing and amount of future cash flows are reasonably estimable. Subsequent to the purchased date, increases in cash flows over those expected at the purchase date are recognized as interest income prospectively. The present value of any decreases in expected cash flows after the purchase date is recognized by recording an allowance for loan losses and a provision for loan losses. If the Company does not have the information necessary to reasonably estimate cash flows to be expected, it may use the cost-recovery method or cash-basis method of income recognition.

Subsequent to the purchase date, increases in cash flows over those expected at the purchase date are recognized as interest income prospectively. Subsequent to the purchase date, the methods utilized to estimate the required allowance for loan losses for these loans are similar to originated loans. The remaining differences between the

purchase price and the unpaid balance at the date of acquisition are recorded in interest income over the life of the loan.

Charge-off Policy

The Company requires a loan to be charged-off, in whole or in part, as soon as it becomes apparent that some loss will be incurred, or when its collectability is sufficiently questionable that it no longer is considered a bankable asset. The primary considerations when determining if and how much of a loan should be charged-off are as follows: (1) the potential for future cash flows; (2) the value of any collateral; and (3) the strength of any co-makers or guarantors.

Table of Contents

When it is determined that a loan requires a partial or full charge-off, a request for approval of a charge-off is submitted to the Company's President, Executive Vice President and Chief Credit Officer, and the Senior Regional Loan officer. The bank's board of directors formally approves all loan charge-offs. Once a loan is charged-off, it cannot be restructured and returned to the Company's books.

The Allowance for Loan and Lease Losses

The Company requires the maintenance of an adequate allowance for loan and lease losses ("ALLL") in order to cover estimated probable losses without eroding the Company's capital base. Calculations are done at each quarter end, or more frequently if warranted, to analyze the collectability of loans and to ensure the adequacy of the allowance. In line with FDIC directives, the ALLL calculation does not include consideration of loans held for sale or off-balance-sheet credit exposures (such as unfunded letters of credit). Determining the appropriate level for the ALLL relies on the informed judgment of management, and as such, is subject to inaccuracy. Given the inherently imprecise nature of calculating the necessary ALLL, the Company's policy permits the actual ALLL to be between 20% above and 5% below the "indicated reserve."

Loans Reviewed Individually for Impairment

The Company identifies loans to be reviewed and evaluated individually for impairment based on current information and events and the probability that the borrower will be unable to repay all amounts due according to the contractual terms of the loan agreement. Specific areas of consideration include: size of credit exposure, risk rating, delinquency, nonaccrual status, and loan classification.

The level of individual impairment is measured using one of the following methods: (1) the fair value of the collateral less costs to sell; (2) the present value of expected future cash flows, discounted at the loan's effective interest rate; or (3) the loan's observable market price. Loans that are deemed fully collateralized or have been charged down to a level corresponding with any of the three measurements require no assignment of reserves from the ALLL.

A loan modification is a change in an existing loan contract that has been agreed to by the borrower and the bank, which may or may not be a troubled debt restructure or "TDR." All loans deemed TDR are considered impaired. A loan is considered a TDR when, for economic or legal reasons related to a borrower's financial difficulties, a concession is granted to the borrower that would not otherwise be considered. Both financial distress on the part of the borrower and the bank's granting of a concession, which are detailed further below, must be present in order for the loan to be considered a TDR.

All of the following factors are indicators that the debtor is experiencing financial difficulties (one or more items may be present):

- The debtor is currently in default on any of its debt.
- The debtor has declared or is in the process of declaring bankruptcy.
- There is significant doubt as to whether the debtor will continue to be a going concern.
- Currently, the debtor has securities that have been delisted, are in the process of being delisted, or are under threat of being delisted from an exchange.

Based on estimates and projections that only encompass the current business capabilities, the debtor forecasts that its entity-specific cash flows will be insufficient to service the debt (both interest and principal) in accordance with the contractual terms of the existing agreement through maturity.

Absent the current modification, the debtor cannot obtain funds from sources other than the existing creditors at an effective interest rate equal to the current market interest rate for similar debt for a non-troubled debtor.

The following factors are potential indicators that a concession has been granted (one or multiple items may be present):

- The borrower receives a reduction of the stated interest rate for the remaining original life of the debt.
- The borrower receives an extension of the maturity date or dates at a stated interest rate lower than the current market interest rate for new debt with similar risk characteristics.
- The borrower receives a reduction of the face amount or maturity amount of the debt as stated in the instrument or other agreement.
- The borrower receives a deferral of required payments (principal and/or interest).
- The borrower receives a reduction of the accrued interest.

Table of Contents

The following table sets forth information on the Company's TDRs by class of financing receivable occurring during the stated periods:

	Three Months Ended March 31, 2016		2015	
	Pre-Modification Number of Outstanding Contracts Recorded Investment	Post-Modification Outstanding Recorded Investment	Pre-Modification Number of Outstanding Contracts Recorded Investment	Post-Modification Outstanding Recorded Investment
(dollars in thousands)				
Troubled Debt Restructurings ⁽¹⁾ :				
Agricultural				
Extended maturity date	1 \$ 25	\$ 25	—\$	— \$ —
Residential real estate:				
One- to four- family first liens				
Interest rate reduction	1 104	104	—	—
One- to four- family junior liens				
Interest rate reduction	1 71	71	—	—
Total	3 \$ 200	\$ 200	—\$	— \$ —

(1) TDRs may include multiple concessions and the disclosure classifications are based on the primary concession provided to the borrower.

Loans by class of financing receivable modified as TDRs within the previous 12 months and for which there was a payment default during the stated periods were as follows:

	Three Months Ended March 31, 2016		2015	
	Number of Recorded Investment Contracts	Number of Recorded Investment Contracts	Number of Recorded Investment Contracts	Number of Recorded Investment Contracts
(dollars in thousands)				
Troubled Debt Restructurings ⁽¹⁾ That Subsequently Defaulted:				
Total	—\$	—	\$	—

(1) TDRs may include multiple concessions and the disclosure classifications are based on the primary concession provided to the borrower.

Loans Reviewed Collectively for Impairment

All loans not evaluated individually for impairment will be separated into homogeneous pools to be collectively evaluated. Loans will be first grouped into the various loan types (i.e. commercial, agricultural, consumer, etc.) and further segmented within each subset by risk classification (i.e. pass, special mention/watch, and substandard). Homogeneous loans past due 60-89 days and 90 days and over are classified special mention/watch and substandard, respectively, for allocation purposes.

The Company's historical loss experience for each group segmented by loan type is calculated for the prior 20 quarters as a starting point for estimating losses. In addition, other prevailing qualitative or environmental factors likely to cause probable losses to vary from historical data are incorporated in the form of adjustments to increase or decrease the loss rate applied to each group. These adjustments are documented and fully explain how the current information, events, circumstances, and conditions impact the historical loss measurement assumptions.

Although not a comprehensive list, the following are considered key factors and are evaluated with each calculation of the ALLL to determine if adjustments to historical loss rates are warranted:

-

- Changes in lending policies and procedures, including changes in underwriting standards and collection, charge-off, and recovery practices not considered elsewhere in estimating credit losses.
- Changes in international, national, regional, and local economic and business conditions and developments that affect the collectability of the portfolio, including the condition of various market segments.
- Changes in the nature and volume of the portfolio and in the terms of loans.
- Changes in the experience, ability and depth of lending management and other relevant staff.
- Changes in the volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans.
- Changes in the quality of our loan review system.
- Changes in the value of underlying collateral for collateral-dependent loans.

Table of Contents

•The existence and effect of any concentrations of credit, and changes in the level of such concentrations.

•The effect of other external factors, such as competition and legal and regulatory requirements, on the level of estimated credit losses in the banks' existing portfolios.

The items listed above are used to determine the pass percentage for loans evaluated under ASC 450, and as such, are applied to the loans risk rated pass. Due to the inherent risks associated with special mention/watch risk rated loans (i.e. early stages of financial deterioration, technical exceptions, etc.), this subset is reserved at a level that will cover losses above a pass allocation for loans that had a loss in the last 20 quarters in which the loan was risk rated special mention/watch at the time of the loss. Substandard loans carry exponentially greater risk than special mention/watch loans, and as such, this subset is reserved at a level that will cover losses above a pass allocation for loans that had a loss in the last 20 quarters in which the loans was risk rated substandard at the time of the loss. Ongoing analysis will be performed to support these factor multiples.

The following tables set forth the risk category of loans by class of loans and credit quality indicator based on the most recent analysis performed, as of March 31, 2016 and December 31, 2015:

	Pass	Special Mention/ Watch	Substandard	Doubtful	Loss	Total

Table of Contents

Included within the special mention, substandard, and doubtful categories at March 31, 2016 and December 31, 2015 are purchased credit impaired loans totaling \$19.0 million and \$23.7 million, respectively.

Special Mention/Watch - A special mention/watch asset has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the Company's credit position at some future date. Special mention/watch assets are not adversely classified and do not expose the Company to sufficient risk to warrant adverse classification.

Substandard - Substandard loans are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

Doubtful - Loans classified doubtful have all the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions and values, highly questionable and improbable.

Loss - Loans classified loss are considered uncollectible and of such little value that their continuance as bankable assets is not warranted. This classification does not mean that the loan has absolutely no recovery or salvage value but rather it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may be effected in the future.

Table of Contents

The following table presents loans individually evaluated for impairment, excluding purchased credit impaired loans, by class of loan, as of March 31, 2016 and December 31, 2015:

Non-accrual and Delinquent Loans

Loans are placed on non-accrual when (1) payment in full of principal and interest is no longer expected or (2) principal or interest has been in default for 90 days or more (unless the loan is both well secured with marketable collateral and in the process of collection). All loans rated doubtful or worse, and certain loans rated substandard, are placed on non-accrual.

A non-accrual asset may be restored to an accrual status when (1) all past due principal and interest has been paid (excluding renewals and modifications that involve the capitalizing of interest) or (2) the loan becomes well secured with marketable collateral and is in the process of collection. An established track record of performance is also considered when determining accrual status.

Delinquency status of a loan is determined by the number of days that have elapsed past the loan's payment due date, using the following classification groupings: 30-59 days, 60-89 days and 90 days or more. Loans shown in the 30-59

Table of Contents

days and 60-89 days columns in the table above reflect contractual delinquency status of loans not considered nonperforming due to classification as a TDR or being placed on non-accrual.

The following table sets forth the composition of the Company's recorded investment in loans on nonaccrual status and past due ninety days or more and still accruing by class of loans, excluding purchased credit impaired loans, as of March 31, 2016 and December 31, 2015:

	March 31, 2016		December 31, 2015

Consumer	10	9	11	5
Total	\$16,486	\$ 527	\$4,012	\$ 284

Not included in the loans above as of March 31, 2016 and December 31, 2015 were purchased credit impaired loans with an outstanding balance of \$4.5 million and \$33.0 million, net of a discount of \$1.8 million and \$7.4 million, respectively.

As of March 31, 2016, the Company had no commitments to lend additional funds to any borrowers who have had a TDR.

Purchased Loans

Purchased loans acquired in a business combination are recorded and initially measured at their estimated fair value as of the acquisition date. Credit discounts are included in the determination of fair value. An allowance for loan losses is not carried over. These purchased loans are segregated into two types: purchased credit impaired loans and purchased non-credit impaired loans.

Purchased non-credit impaired loans are accounted for in accordance with ASC 310-20 "Nonrefundable Fees and Other Costs" as these loans do not have evidence of significant credit deterioration since origination and it is probable all contractually required payments will be received from the borrower.

Purchased credit impaired loans are accounted for in accordance with ASC 310-30 "Loans and Debt Securities Acquired with Deteriorated Credit Quality" as they display significant credit deterioration since origination and it is probable, as of the acquisition date, that the Company will be unable to collect all contractually required payments from the borrower.

For purchased non-credit impaired loans the accretable discount is the discount applied to the expected cash flows of the portfolio to account for the differences between the interest rates at acquisition and rates currently expected on

similar portfolios in the marketplace. As the accretable discount is accreted to interest income over the expected average life of the portfolio, the result will be interest income on loans at the estimated current market rate. We anticipate recording a provision for the acquired portfolio in future quarters as the former Central loans renew and the discount is accreted.

For purchased credit impaired loans the difference between contractually required payments at acquisition and the cash flows expected to be collected is referred to as the non-accretable difference. Further, any excess of cash flows expected at acquisition over the estimated fair value is referred to as the accretable yield and is recognized into interest income over the expected remaining life of the loan if the timing and amount of the future cash flows are reasonably estimable.

Table of Contents

This discount includes an adjustment on loans that are not accruing or paying contractual interest so that interest income will be recognized at the estimated current market rate.

Subsequent to the purchase date, increases in cash flows over those expected at the purchase date are recognized as interest income prospectively. The present value of any decreases in expected cash flows after the purchase date is recognized by recording an allowance for credit losses and a provision for loan losses.

Changes in the accretable yield for loans acquired and accounted for under ASC 310-30 were as follows for the three months ended March 31, 2016 and 2015:

	Three Months Ended March 31,	
	2016	2015
(in thousands)		
Balance at beginning of period	\$1,446	\$ —
Purchases	—	—
Accretion	(601)	—
Reclassification from nonaccretable difference	—	—
Balance at end of period	\$845	\$ —

7. Goodwill and Intangible Assets

The excess of the cost of an acquisition over the fair value of the net assets acquired, including core deposit, trade name, and client relationship intangibles, consists of goodwill. Under ASC Topic 350, goodwill and the non-amortizing portion of the trade name intangible are subject to at least annual assessments for impairment by applying a fair value based test. The Company reviews goodwill and the non-amortizing portion of the trade name intangible at the reporting unit level to determine potential impairment annually on October 1, or more frequently if events or changes in circumstances indicate that the carrying value may not be recoverable, by comparing the carrying value of the reporting unit with the fair value of the reporting unit. As of March 31, 2016, the Company had three reporting units: MidWestOne Bank, Central Bank, and Corporate and other. No impairment was recorded on either the goodwill or the trade name intangible assets during the three months ended March 31, 2016. The carrying amount of goodwill was \$64.7 million at March 31, 2016 and \$64.5 million at December 31, 2015. The increase of \$0.1 million in goodwill was due to the finalization of merger accounting issues related to the Central merger.

In addition to goodwill, the Company recognized a \$12.7 million core deposit intangible, and a \$1.4 million trade name intangible in 2015 due to the Central merger.

The following table presents the changes in the carrying amount of intangibles (excluding goodwill), gross carrying amount, accumulated amortization, and net book value as of March 31, 2016:

	Insurance Agency Intangible	Core Deposit Intangible	Indefinite-Lived Trade Name Intangible	Finite-Lived Trade Name Intangible	Customer List Intangible	Total
(in thousands)						
March 31, 2016

Net book value	\$ 257	\$ 9,506	\$ 7,040	\$ 1,140	\$ 137	\$18,080

Table of Contents

8. Other Assets

The components of the Company's other assets were as follows:

	March 31, December 31,	
	2016	2015
(in thousands)		
Federal Home Loan Bank Stock	\$ 10,812	\$ 9,832
FDIC indemnification asset, net	3,787	4,274
Prepaid expenses	2,145	2,271
Mortgage servicing rights	2,090	2,249
Federal & state income taxes receivable, current	—	1,079
Accounts receivable & other miscellaneous assets	2,892	2,104
	\$ 21,726	\$ 21,809

MidWestOne Bank and, previously, Central Bank are each members of The Federal Home Loan Bank of Des Moines, and ownership of FHLB stock is a requirement for membership in the FHLB Des Moines. The amount of FHLB stock the banks are required to hold is directly related to the amount of FHLB advances borrowed. Because this security is not readily marketable and there are no available market values, this security is carried at cost and evaluated for potential impairment each quarter. Redemption of this investment is at the option of the FHLB. No impairment was recorded on FHLB stock in the three months ended March 31, 2016 or in the year ended December 31, 2015.

Redemption of this investment is at the option of the FHLB.

As part of the Central merger, the Company became a party to certain loss-share agreements with the FDIC from previous Central-related acquisitions. These agreements cover realized losses on loans and foreclosed real estate for specified periods. These loss-share assets are measured separately from the loan portfolios because they are not contractually embedded in the loans and are not transferable with the loans should the Company choose to dispose of them. Fair values at the acquisition dates were estimated based on projected cash flows available for loss-share based on the credit adjustments estimated for each loan. The loss-share assets are separately measured from the related loans and foreclosed real estate and recorded within other assets on the balance sheet.

Mortgage servicing rights are recorded at fair value based on assumptions provided by a third-party valuation service. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the servicing cost per loan, the discount rate, the escrow float rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses.

9. Short-Term Borrowings

Short-term borrowings were as follows as of March 31, 2016 and December 31, 2015:

	March 31, 2016		December 31, 2015	
	Weighted	Average	Weighted	Average
(in thousands)	Cost	Balance	Cost	Balance
Federal funds purchased	— %	\$—	0.34 %	\$1,500
Securities sold under agreements to repurchase	0.34	57,869	0.31	67,463
Total	0.34 %	\$57,869	0.31 %	\$68,963

At March 31, 2016 and December 31, 2015, the Company had no borrowings through the Federal Reserve Discount Window, while the borrowing capacity was \$11.8 million as of both March 31, 2016 and December 31, 2015. As of March 31, 2016 and December 31, 2015, MidWestOne Bank and Central Bank had municipal securities pledged with a market value of \$13.1 million pledged to the Federal Reserve to secure potential borrowings. The Company also has various other unsecured federal funds agreements with correspondent banks. As of March 31, 2016 and December 31, 2015, there were zero and \$1.5 million of borrowings through these correspondent bank federal funds agreements, respectively.

Securities sold under agreements to repurchase are agreements in which the Company acquires funds by selling assets to another party under a simultaneous agreement to repurchase the same assets at a specified price and date. The Company enters into repurchase agreements and also offers a demand deposit account product to customers that sweeps their balances in excess of an agreed upon target amount into overnight repurchase agreements. All securities sold under agreements to repurchase are recorded on the face of the balance sheet.

Table of Contents

On April 30, 2015, the Company entered into a \$5.0 million unsecured line of credit with a correspondent bank. Interest is payable at a rate of one-month LIBOR + 2.00%. The line is scheduled to mature on April 28, 2016. The Company had no balance outstanding under this agreement as of March 31, 2016.

10. Subordinated Notes Payable

The Company has established three statutory business trusts, Central Bancshares Capital Trust II, Barron Investment Capital Trust I, and MidWestOne Statutory Trust II, under the laws of the state of Delaware, which exist for the exclusive purposes of (i) issuing trust securities representing undivided beneficial interests in the assets of the trust; (ii) investing the gross proceeds of the trust securities in junior subordinated deferrable interest debentures (subordinated debentures); and (iii) engaging in only those activities necessary or incidental thereto. For regulatory capital purposes, these trust securities qualify as a component of Tier 1 capital.

The table below summarizes the outstanding junior subordinated notes and the related trust preferred securities issued by each trust as of March 31, 2016 and December 31, 2015:

(in thousands)	Face Value	Book Value	Interest Rate	Interest Rate at 3/31/2016	Maturity Date	Callable Date
March 31, 2016						
Central Bancshares Capital Trust II ^{(1) (2)}	\$7,217	\$6,568	Three-month LIBOR + 3.50%	4.13 %	03/15/2038	03/15/2013
Barron Investment Capital Trust I ^{(1) (2)}	2,062	1,582	Three-month LIBOR + 2.15%	2.77 %	09/23/2036	09/23/2011
MidWestOne Statutory Trust II ⁽¹⁾	15,464	15,464	Three-month LIBOR + 1.59%	2.20 %	12/15/2037	12/15/2012
Total	\$24,743	\$23,614				
(in thousands)	Face Value	Book Value	Interest Rate	Interest Rate at 12/31/2015	Maturity Date	Callable Date
December 31, 2015						
Central Bancshares Capital Trust II ^{(1) (2)}	\$7,217	\$6,552	Three-month LIBOR + 3.50%	4.01 %	03/15/2038	03/15/2013
Barron Investment Capital Trust I ^{(1) (2)}	2,062	1,571	Three-month LIBOR + 2.15%	2.74 %	09/23/2036	09/23/2011
MidWestOne Statutory Trust II ⁽¹⁾	15,464	15,464	Three-month LIBOR + 1.59%	2.10 %	12/15/2037	12/15/2012
Total	\$24,743	\$23,587				

(1) All distributions are cumulative and paid in cash quarterly.

(2) Central Bancshares Capital Trust II and Barron Investment Capital Trust I were established by Central prior to the Company's merger with Central, and the junior subordinated notes issued by Central were assumed by the Company. The trust preferred securities are subject to mandatory redemption, in whole or in part, upon repayment of the junior subordinated notes at the stated maturity date or upon redemption of the junior subordinated notes. Each trust's ability to pay amounts due on the trust preferred securities is solely dependent upon the Company making payment on the related junior subordinated notes. The Company's obligation under the junior subordinated notes and other relevant trust agreements, in aggregate, constitutes a full and unconditional guarantee by the Company of each trust's obligations under the trust preferred securities issued by each trust. The Company has the right to defer payment of interest on the notes and, therefore, distributions on the trust preferred securities, for up to five years, but not beyond the stated maturity date in the table above. During any such deferral period the Company may not pay cash dividends on its stock and generally may not repurchase its stock.

11. Long-Term Borrowings

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

Long-term borrowings were as follows as of March 31, 2016 and December 31, 2015:

(in thousands)	March 31, 2016		December 31, 2015	
	Weighted Average Cost	Balance	Weighted Average Cost	Balance
FHLB Borrowings	1.71%	\$112,000	1.64%	\$87,000
Note payable to unaffiliated bank	2.19	21,250	2.17	22,500
Total	1.79%	\$133,250	1.75%	\$109,500

27

Table of Contents

The Company utilizes FHLB borrowings as a supplement to customer deposits to fund earning assets and to assist in managing interest rate risk. As a member of The Federal Home Loan Bank of Des Moines, the Bank may borrow funds from the FHLB in amounts up to 35% of the Bank's total assets, provided the Bank is able to pledge an adequate amount of qualified assets to secure the borrowings. Advances from the FHLB are collateralized primarily by 1-4 unit residential, commercial and agricultural real estate first mortgages equal to various percentages of the total outstanding notes. See Note 6 "Loans Receivable and the Allowance for Loan Losses" of the notes to the consolidated financial statements.

On April 30, 2015, the Company entered into a \$35.0 million unsecured note payable with a correspondent bank with a maturity date of June 30, 2020. The Company drew \$25.0 million on the note prior to June 30, 2015, at which time the ability to obtain additional advances ceased. Payments of principal and interest are payable quarterly, which began September 30, 2015. As of March 31, 2016, \$21.3 million of that note was outstanding.

12. Income Taxes

The income tax provisions for the three months ended March 31, 2016 and 2015 were less than the amounts computed by applying the maximum effective federal income tax rate of 35% to the income before income taxes, because of the following items:

(in thousands)	For the Three Months Ended March 31,			
	2016		2015	
	Amount	% of Pretax Income	Amount	% of Pretax Income
Expected provision	\$2,607	35.0 %	\$2,265	35.0 %
Tax-exempt interest	(754)	(10.1)	(670)	(10.4)
Bank-owned life insurance	(134)	(1.8)	(103)	(1.6)
State income taxes, net of federal income tax benefit	320	4.3	200	3.1
Non-deductible acquisition expenses	25	0.3	65	1.0
General business credits	(139)	(1.9)	(8)	(0.1)
Other	(20)	(0.3)	(74)	(1.1)
Total income tax provision	\$1,905	25.5 %	\$1,675	25.9 %

The Company also recognized income tax expense pertaining to state franchise and income taxes payable by the subsidiary banks.

13. Estimated Fair Value of Financial Instruments and Fair Value Measurements

Fair value is the price that would be received in selling an asset or paid in transferring a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability is not adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (1) independent, (2) knowledgeable, (3) able to transact and (4) willing to transact.

GAAP requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the

assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, GAAP establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

28

Table of Contents

Level 1 Inputs – Unadjusted quoted prices for identical assets or liabilities in active markets that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs – Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements. The Company is required to use observable inputs, to the extent available, in the fair value estimation process unless that data results from forced liquidations or distressed sales. A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

Valuation methods for instruments measured at fair value on a recurring basis.

Securities Available for Sale - The Company's investment securities classified as available for sale include: debt securities issued by the U.S. Treasury and other U.S. Government agencies and corporations, debt securities issued by state and political subdivisions, mortgage-backed securities, collateralized mortgage obligations, corporate debt securities, and equity securities. Quoted exchange prices are available for equity securities, which are classified as Level 1. The Company utilizes an independent pricing service to obtain the fair value of debt securities. On a quarterly basis, the Company selects a sample of 30 securities from its primary pricing service and compares them to a secondary independent pricing service to validate value. In addition, the Company periodically reviews the pricing methodology utilized by the primary independent service for reasonableness. Debt securities issued by the U.S. Treasury and other U.S. Government agencies and corporations and mortgage-backed obligations are priced utilizing industry-standard models that consider various assumptions, including time value, yield curves, volatility factors, prepayment speeds, default rates, loss severity, current market and contractual prices for the underlying financial instruments, as well as other relevant economic measures. Substantially all of these assumptions are observable in the marketplace, can be derived from observable data, or are supported by observable levels at which transactions are executed in the marketplace and are classified as Level 2. Municipal securities are valued using a type of matrix, or grid, pricing in which securities are benchmarked against the treasury rate based on credit rating. These model and matrix measurements are classified as Level 2 in the fair value hierarchy. On an annual basis, a group of selected municipal securities are priced by a securities dealer and that price is used to verify the primary independent service's valuation.

The following table summarizes assets measured at fair value on a recurring basis as of March 31, 2016 and December 31, 2015. There were no liabilities subject to fair value measurement as of these dates. The assets are segregated by the level of valuation inputs within the fair value hierarchy utilized to measure fair value:

Fair Value Measurement at March 31, 2016 Using

(in thousands)	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Available for sale debt securities:

Total available for sale debt securities	425,979	—	425,979	—
Other equity securities	1,262	1,262	—	—
Total securities available for sale	\$427,241	\$ 1,262	\$ 425,979	\$ —

There were no transfers of assets between levels of the fair value hierarchy during the three months ended March 31, 2016 or the year ended December 31, 2015.

There have been no changes in valuation techniques used for any assets measured at fair value during the three months ended March 31, 2016 or the year ended December 31, 2015.

Changes in the fair value of available for sale securities are included in other comprehensive income to the extent the changes are not considered OTTI. OTTI tests are performed on a quarterly basis and any decline in the fair value of an individual security below its cost that is deemed to be other-than-temporary results in a write-down that is reflected directly in the Company's consolidated statements of operations.

Valuation methods for instruments measured at fair value on a nonrecurring basis

Collateral Dependent Impaired Loans - From time to time, a loan is considered impaired and an allowance for credit losses is established. The specific reserves for collateral dependent impaired loans are based on the fair value of the collateral less estimated costs to sell. The fair value of collateral is determined based on appraisals. In some cases, adjustments are made to the appraised values due to various factors, including age of the appraisal, age of comparables included in the appraisal, and known changes in the market and in the collateral. Because many of these inputs are unobservable, the valuations are classified as Level 3.

Other Real Estate Owned ("OREO") - OREO represents property acquired through foreclosures and settlements of loans. Property acquired through or in lieu of foreclosure are initially recorded at fair value less estimated selling cost at the date of foreclosure, establishing a new cost basis. The Company considers third party appraisals as well as independent fair value assessments from real estate brokers or persons involved in selling OREO in determining the fair value of particular properties. Accordingly, the valuation of OREO is subject to significant external and internal judgment. The Company also periodically reviews OREO to determine whether the property continues to be carried at the lower of its recorded book value or fair value of the property, less disposal costs. Because many of these inputs are unobservable, the valuations are classified as Level 3.

The following table discloses the Company's estimated fair value amounts of its assets recorded at fair value on a nonrecurring basis. It is management's belief that the fair values presented below are reasonable based on the valuation techniques and data available to the Company as of March 31, 2016 and December 31, 2015, as more fully described above.

(in thousands)	Fair Value Measurement at March 31, 2016 Using

The following presents the carrying amount and estimated fair value of the financial instruments held by the Company at March 31, 2016 and December 31, 2015. The information presented is subject to change over time based on a variety of factors. The operations of the Company are managed on a going concern basis and not a liquidation basis. As a result, the ultimate value realized from the financial instruments presented could be substantially different when actually recognized over time through the normal course of operations. Additionally, a substantial portion of the Company's inherent value is the capitalization and franchise value of MidWestOne Bank and, previously, Central Bank. Neither of these components has been given consideration in the presentation of fair values below.

March 31, 2016

• Cash and cash equivalents, federal funds purchased, securities sold under repurchase agreements, and accrued interest are instruments with carrying values that approximate fair value.

• Investment securities available for sale are measured at fair value on a recurring basis. Held to maturity securities are carried at amortized cost. Fair value is based upon quoted prices, if available. If a quoted price is not available, the fair value is obtained from benchmarking the security against similar securities by using a third-party pricing service.

• Loans held for sale are carried at the lower of cost or fair value, with fair value being based on recent observable loan sales. The portfolio has historically consisted primarily of residential real estate loans.

• For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The fair values for other loans are determined using estimated future cash flows, discounted at the interest rates currently being offered for loans with similar terms to borrowers with similar credit quality. The Company does record nonrecurring fair value adjustments to loans to reflect (1) partial write-downs and allowances that are based on the observable market price or appraised value of the collateral or (2) the full charge-off of the loan carrying value.

• The fair value of FHLB stock is estimated at its carrying value and redemption price of \$100 per share.

Deposit liabilities are carried at historical cost. The fair value of demand deposits, savings accounts and certain money market account deposits is the amount payable on demand at the reporting date. The fair value of fixed maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities. If the fair value of the fixed maturity certificates of deposit is calculated at less than the carrying amount, the carrying value of these deposits is reported as the fair value.

FHLB borrowings, junior subordinated notes issued to capital trusts, and long-term debt are recorded at historical cost. The fair value of these items is estimated using discounted cash flow analysis, based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

Table of Contents

The following presents the valuation technique(s), observable inputs, and quantitative information about the unobservable inputs used for fair value measurements of the financial instruments held by the Company at March 31, 2016, categorized within Level 3 of the fair value hierarchy:

Quantitative Information About Level 3 Fair Value Measurements						
(dollars in thousands)	Fair Value at March 31, 2016	Valuation Techniques(s)	Unobservable Input	Range of Inputs		Weighted Average
Collateral dependent impaired loans	\$18,729	Modified appraised value	Third party appraisal	NM *	NM *	NM *
			Appraisal discount	NM *	NM *	NM *
Other real estate owned	\$6,169	Modified appraised value	Third party appraisal	NM *	NM *	NM *
			Appraisal discount	NM *	NM *	NM *

* Not Meaningful. Third party appraisals are obtained as to the value of the underlying asset, but disclosure of this information would not provide meaningful information, as the range will vary widely from loan to loan. Types of discounts considered include age of the appraisal, local market conditions, current condition of the property, and estimated sales costs. These discounts will also vary from loan to loan, thus providing a range would not be meaningful.

Changes in assumptions or estimation methodologies may have a material effect on these estimated fair values.

14. Operating Segments

Selected financial and descriptive information is required to be disclosed for reportable operating segments, applying a “management perspective” as the basis for identifying reportable segments. The management perspective is determined by the view that management takes of the segments within the Company when making operating decisions, allocating resources, and measuring performance. The segments of the Company have been defined by the structure of the Company’s internal organization, focusing on the financial information that the Company’s operating decision-makers routinely use to make decisions about operating matters.

The Company’s primary segment, Commercial Banking, is geographically divided by markets into the secondary segments which are the two subsidiary banks wholly-owned by the Company: MidWestOne Bank and Central Bank (which was acquired May 1, 2015 and merged into MidWestOne Bank on April 2, 2016). Each of these secondary segments offers similar products and services, with each offering commercial, consumer, and mortgage loans and deposit services.

The Company’s All Other segment includes the operations of all other consolidated subsidiaries and/or defined operating segments that fall below the segment reporting thresholds. This segment includes the corporate operations of the parent company.

Table of Contents

The following table presents summary financial information for the reportable segments for the three months ended March 31, 2016 and 2015:

(in thousands)	Commercial Banking			Intercompany Eliminations	Consolidated Total
	MidWestOne Bank	Central Bank	All Other		
Three months ended March 31, 2016					
Net interest income	\$ 13,125	\$ 12,743	\$(313)	\$ —	\$ 25,555
Provision for loan losses	450	615	—	—	1,065
Noninterest income	3,194	2,892	319	—	6,405
Noninterest expense ⁽¹⁾	10,616	11,983	847	—	23,446
Income tax expense (benefit)	1,172	1,144	(411)	—	1,905
Net income	\$4,081	\$ 1,893	\$(430)	\$ —	\$ 5,544
Goodwill	\$ —	\$ 64,654	\$ —	\$ —	\$ 64,654
Total assets	\$ 1,737,351	\$ 1,247,265	\$ 347,498	\$ (367,896)	\$ 2,964,218
Three months ended March 31, 2015					
Net interest income	\$ 14,334	\$ —	\$(92)	\$ —	\$ 14,242
Provision for loan losses	600	—	—	—	600
Noninterest income	3,420	—	588	—	4,008
Noninterest expense ⁽¹⁾	10,026	—	1,153	—	11,179
Income tax expense (benefit)	1,919	—	(244)	—	1,675
Net income	\$5,209	\$ —	\$(413)	\$ —	\$ 4,796
Goodwill	\$ —	\$ —	\$ —	\$ —	\$ —
Total assets	\$ 1,773,402	\$ —	\$ 214,211	\$ (209,636)	\$ 1,777,977

(1) Includes merger-related expenses of \$2.2 million and \$0.1 million for the three months ended March 31, 2016 and 2015, respectively, included in the MidWestOne Bank subsegment.

15. Branch Sales

On September 24, 2015, Central Bank, previously a wholly owned subsidiary of the Company, entered into an agreement to sell its Barron and Rice Lake, Wisconsin branches to Citizens Community Federal Bank (“CCF Bank”) headquartered in Altoona, Wisconsin, a unit of Citizens Community Bancorp, Inc. of Eau Claire, Wisconsin. CCF Bank assumed approximately \$27.1 million in deposits and \$16.4 million in loans on the sale completion date of February 5, 2016, and the Company realized a net gain of \$0.7 million, which is included on the Consolidated Statements of Operation in Other service charges, commissions and fees.

16. Effect of New Financial Accounting Standards

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, Revenue from Contract with Customers (Topic 606). The guidance in this update affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards (for example, insurance contracts or lease contracts). The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following five steps: 1) identify the contract(s) with the customer; 2) identify the performance obligations in the contract; 3) determine the transaction price; 4) allocate the transaction price to the performance obligations in the contract; and 5) recognize revenue when (or as) the entity satisfies a performance obligation. The guidance also specifies the accounting for some costs to obtain or fulfill a contract with a customer. For a public entity, the amendments in this update are effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. The adoption of this amendment is not expected to have a material effect on the Company’s consolidated

financial statements.

In August 2014, the FASB issued Accounting Standards Update No. 2014-15, Presentation of Financial Statements - Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern. The amendments in this update provide guidance in GAAP about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. In doing so, the amendment should reduce diversity in the timing and content of footnote disclosures. Disclosures are required if it is probable an entity will be unable to meet its obligations within the look-forward period of twelve months

34

Table of Contents

after the financial statements are made available. Incremental substantial doubt disclosure is required if the probability is not mitigated by management's plans. The new standard applies to all entities for the first annual period ending after December 15, 2016, and interim periods thereafter. The adoption of this standard is not expected to have a material effect on the Company's consolidated financial statements.

In July 2015, the FASB announced a delay to the effective date of Accounting Standards Update No. 2015-09, Revenue from Contract with Customers (Topic 606). Reporting entities may choose to adopt the standard as of the original date, or take advantage of a one-year delay. For a public entity, the revised effective date is for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early application is not permitted prior to the original effective date. The adoption of this amendment is not expected to have a material effect on the Company's consolidated financial statements.

In January 2016, the FASB issued Accounting Standards Update No. 2016-01, Financial Instruments-Overall: Recognition and Measurement of Financial Assets and Financial Liabilities. The guidance in this update makes changes to the current GAAP model primarily affect the accounting for equity investments, financial liabilities under the fair value option, and the presentation and disclosure requirements for financial instruments. In addition, the FASB clarified guidance related to the valuation allowance assessment when recognizing deferred tax assets resulting from unrealized losses on available-for-sale debt securities. The accounting for other financial instruments, such as loans, investments in debt securities, and financial liabilities is largely unchanged. The treatment of gains and losses for all equity securities, including those without a readily determinable market value, is expected to result in additional volatility in the income statement, with the loss of mark to market via equity for these investments. Additionally, changes in the allowable method for determining the fair value of financial instruments in the financial statement footnotes ("exit price" only), will likely require changes to current methodologies of determining these values, and how they are disclosed in the financial statement footnotes. The new standard applies to public business entities in fiscal years beginning after December 15, 2017, including interim periods within those fiscal years, with early adoption permitted. The adoption of this amendment is not expected to have a material effect on the Company's consolidated financial statements.

In February 2016, the FASB issued Accounting Standards Update No. 2016-02, Leases (Topic 842). The guidance in this update is meant to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. The core principle of Topic 842 is that a lessee should recognize the assets and liabilities that arise from leases. All leases create an asset and a liability for the lessee in accordance with FASB Concepts Statement No. 6, Elements of Financial Statements, and, therefore, recognition of those lease assets and lease liabilities represents an improvement over previous GAAP, which did not require lease assets and lease liabilities to be recognized for most leases. Disclosures are required by lessees and lessors to meet the objective of enabling users of financial statements to assess the amount, timing, and uncertainty of cash flows arising from leases. To meet that objective, qualitative disclosures along with specific quantitative disclosures are required. The new standard applies to public business entities in fiscal years beginning after December 15, 2018, including interim periods within those fiscal years, with early adoption permitted. The Company is still evaluating the effect of this guidance on the Company's consolidated financial statements.

In March 2016, the FASB issued Accounting Standards Update No. 2016-09, Compensation - Stock Compensation (Topic 718). The guidance involves several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The new standard applies to public business entities for annual periods beginning after December 15, 2016, including interim periods within those annual periods, with early adoption permitted. An entity that elects early adoption must adopt all of the amendments in the same period. The Company is still evaluating the effect of this guidance on the Company's consolidated financial statements.

17. Subsequent Events

Management evaluated subsequent events through the date the consolidated financial statements were issued. Events or transactions occurring after March 31, 2016, but prior to the date the consolidated financial statements were issued, that provided additional evidence about conditions that existed at March 31, 2016 have been recognized in the consolidated financial statements for the period ended March 31, 2016. Events or transactions that provided evidence about conditions that did not exist at March 31, 2016, but arose before the consolidated financial statements were issued, have not been recognized in the consolidated financial statements for the period ended March 31, 2016.

On April 2, 2016, Central Bank, a wholly owned subsidiary of the Company, was merged into the charter of MidWestOne Bank, also a wholly owned subsidiary of the Company. The merger of the banks was the final step in the merger with Central, which was first announced in November 2014.

Table of Contents

On April 21, 2016, the board of directors of the Company declared a cash dividend of \$0.16 per share payable on June 15, 2016 to shareholders of record as of the close of business on June 1, 2016.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

OVERVIEW

The Company provides financial services to individuals, businesses, governmental units and institutional customers located primarily in the upper Midwest, through its bank subsidiary. MidWestOne Bank has office locations in central and east-central Iowa, the Twin Cities area of Minnesota, Wisconsin, and Florida. On April 2, 2016, MidWestOne Bank merged with Central Bank, which was the Company's subsidiary bank following the Company's merger with Central. Central Bank had office locations in the Twin Cities area of Minnesota, Wisconsin, and Florida. MidWestOne Insurance Services, Inc. provides personal and business insurance services in Iowa. MidWestOne Bank is actively engaged in many areas of commercial banking, including: acceptance of demand, savings and time deposits; making commercial, real estate, agricultural and consumer loans; and other banking services tailored for its individual customers. The Wealth Management Division of MidWestOne Bank administers estates, personal trusts, conservatorships, and pension and profit-sharing accounts along with providing brokerage and other investment management services to customers.

We operate as an independent community bank that offers a broad range of customer-focused financial services as an alternative to large regional banks in our market area. Management has invested in infrastructure and staffing to support our strategy of serving the financial needs of businesses, individuals and municipalities in our market area. We focus our efforts on core deposit generation, especially transaction accounts, and quality loan growth with an emphasis on growing commercial loan balances. We seek to maintain a disciplined pricing strategy on deposit generation that will allow us to compete for high quality loans while maintaining an appropriate spread over funding costs.

Our results of operations depend primarily on our net interest income, which is the difference between the interest income on our earning assets, such as loans and securities, and the interest expense paid on our deposits and borrowings. Results of operations are also affected by non-interest income and expense, the provision for loan losses and income tax expense. Significant external factors that impact our results of operations include general economic and competitive conditions, as well as changes in market interest rates, government policies, and actions of regulatory authorities.

The following discussion and analysis should be read in conjunction with the consolidated financial statements and related notes and with the statistical information and financial data appearing in this report as well as our 2015 Annual Report on Form 10-K. Results of operations for the three-month period ended March 31, 2016 are not necessarily indicative of results to be attained for any other period.

Sale of Barron and Rice Lake, Wisconsin Central Bank Branch Offices

On February 5, 2016, Central Bank, formerly a wholly owned subsidiary of the Company prior to its merger with MidWestOne Bank, completed the sale of its Barron and Rice Lake, Wisconsin branches to Citizens Community Federal Bank headquartered in Altoona, Wisconsin, a unit of Citizens Community Bancorp, Inc. of Eau Claire, Wisconsin. CCF Bank assumed approximately \$27.1 million in deposits and \$16.4 million in loans, and the Company realized a net gain of \$0.7 million.

Critical Accounting Policies

Critical accounting estimates are those which are both most important to the portrayal of our financial condition and results of operations, and require our management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Our critical accounting estimates relate to the allowance for loan losses, application of purchase accounting, goodwill and intangible assets, and fair value of available for sale investment securities, all of which involve significant judgment by our management. Information about our critical accounting estimates is included under Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended December 31, 2015.

RESULTS OF OPERATIONS

Comparison of Operating Results for the Three Months Ended March 31, 2016 and March 31, 2015

Summary

For the quarter ended March 31, 2016, we earned net income of \$5.5 million, which was an increase of \$0.7 million from \$4.8 million for the quarter ended March 31, 2015. Basic and diluted earnings per common share for the first quarter of 2016 were \$0.49 and \$0.48, respectively, versus \$0.57 for both basic and diluted earnings per common share in the first quarter of 2015. After excluding the effects of \$2.2 million (\$1.4 million after tax) of expenses related to the merger with Central Bank, adjusted diluted

Table of Contents

earnings per share for the first quarter of 2016 were \$0.60. Our annualized Return on Average Assets (“ROAA”) for the first quarter of 2016 was 0.75% compared with a ROAA of 1.10% for the same period in 2015. Our annualized Return on Average Shareholders’ Equity (“ROAE”) was 7.46% for the three months ended March 31, 2016 compared with 9.99% for the three months ended March 31, 2015. The annualized Return on Average Tangible Equity (“ROATE”) was 11.62% for the first quarter of 2016 compared with 10.58% for the same period in 2015.

The following table presents selected financial results and measures as of and for the quarter ended March 31, 2016 and 2015.

(dollars in thousands)	As of and for the Three Months Ended March 31,	
	2016	2015
Net Income	\$5,544	\$4,796
Average Assets	2,961,462	1,773,129
Average Shareholders’ Equity	299,071	194,761
Return on Average Assets* (ROAA)	0.75 %	1.10 %
Return on Average Shareholders’ Equity* (ROAE)	7.46	9.99
Return on Average Tangible Equity* (ROATE)	11.62	10.58
Total Equity to Assets (end of period)	10.18	11.10
Tangible Equity to Tangible Assets (end of period)	7.75	10.69

* Annualized

We have traditionally disclosed certain non-GAAP ratios, including our ROATE and the ratio of our tangible equity to tangible assets. We believe these ratios provide investors with information regarding our financial condition and results of operations and how we evaluate them internally.

The following tables provide a reconciliation of the non-GAAP measures to the most comparable GAAP equivalents.

(in thousands)	For the Three Months Ended March 31,	
	2016	2015
Net Income:		
Net income	\$5,544	\$4,796

Net Interest Income

Net interest income is the difference between interest income and fees earned on earning assets and interest expense incurred on interest-bearing liabilities. Interest rate levels and volume fluctuations within earning assets and interest-bearing liabilities impact net interest income. Net interest margin is net interest income as a percentage of average earning assets.

Certain assets with tax favorable treatment are evaluated on a tax-equivalent basis. Tax-equivalent basis assumes a federal income tax rate of 35%. Tax favorable assets generally have lower contractual pretax yields than fully taxable assets. A tax-equivalent analysis is performed by adding the tax savings to the earnings on tax-favorable assets. After factoring in the tax-favorable effects of these assets, the yields may be more appropriately evaluated against alternative earning assets. In addition to yield, various other risks are factored into the evaluation process.

Our net interest income for the quarter ended March 31, 2016 increased \$11.3 million, or 79.4%, to \$25.6 million from \$14.2 million for the first quarter of 2015, primarily due to the merger with Central. An increase in average loan balances, a 21 basis point increase in average yield, and the effect of the merger-related discount accretion of \$1.2 million resulted in loan interest income increasing by \$12.5 million, or 99.7%, to \$25.1 million for the first quarter of 2016 compared to the first quarter of 2015. Income from investment securities increased to \$3.4 million for the first quarter of 2016 compared to \$3.3 million for the first quarter of 2015, reflective of an increase of \$41.6 million in the average balance of investment securities between the two comparable periods, and despite a decrease of 21 basis points in the average yield. There was no income from loan pool participations for the first quarter of 2016, compared to \$0.6 million for the same period a year ago. The Company sold its remaining loan pool participations in June 2015, and has completely exited this line of business.

Interest expense increased \$0.7 million, or 30.8%, to \$2.9 million for the first quarter of 2016, compared to \$2.2 million for the same period in 2015, primarily due to the additional cost of merger-related assumptions of deposits and debt and by an increased expense on FHLB borrowings which resulted from the increase of \$42.6 million, or 49.9%, in the average balance of FHLB borrowings between first quarter of 2015 and the first quarter of 2016, despite a decrease of 48 basis points in average rate.

Our net interest margin on a tax-equivalent basis for the first quarter of 2016 improved to 3.97% compared with 3.72% for the first quarter of 2015. Net interest margin is a measure of the net return on interest-earning assets and is computed by dividing annualized net interest income on a tax-equivalent basis by the average of total interest-earning assets for the period. Our overall yield on earning assets increased to 4.41% for the first quarter of 2016 from 4.26% for the first quarter of 2015. This improvement was due primarily to the increase in average loan balances, as loans generally have higher yields compared to other earning assets, and the effect of the merger-related discount accretion of \$1.2 million in the first quarter of 2016. The average cost of interest-bearing liabilities decreased in the first quarter of 2016 to 0.56% from 0.67% for the first quarter of 2015.

Table of Contents

The following table shows the consolidated average balance sheets, detailing the major categories of assets and liabilities, the interest income earned on interest-earning assets, the interest expense paid for the interest-bearing liabilities, and the related yields and interest rates for the quarters ended March 31, 2016 and 2015. Dividing annualized income or expense by the average balances of assets or liabilities results in average yields or rates. Average information is provided on a daily average basis.

Securities	759	734
Total tax equivalent adjustment	1,187	1,056
Net Interest Income	\$25,555	\$14,242

(1) Loan fees included in interest income are not material.

(2) Computed on a tax-equivalent basis, assuming a federal income tax rate of 35%.

(3) Non-accrual loans have been included in average loans, net of unearned discount.

(4) Includes interest income and discount realized on loan pool participations.

(5) Net interest margin is tax-equivalent net interest income as a percentage of average earning assets.

Table of Contents

The following table sets forth an analysis of volume and rate changes in interest income and interest expense on our average earning assets and average interest-bearing liabilities during the three months ended March 31, 2016, compared to the same period in 2015, reported on a fully tax-equivalent basis assuming a 35% tax rate. The table distinguishes between the changes related to average outstanding balances (changes in volume holding the initial interest rate constant) and the changes related to average interest rates (changes in average rate holding the initial outstanding balance constant). The change in interest due to both volume and rate has been allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.

Percentage increase in net interest income over prior period			74.8 %

Interest income and fees on loans on a tax-equivalent basis in the first quarter of 2016 increased \$12.6 million, or 98.0%, compared with the same period in 2015. This increase includes the effect of the merger-related accretion income of \$1.2 million on loans. Average loans were \$1.01 billion, or 87.8%, higher in the first quarter of 2016 compared with the first quarter of 2015, due primarily to the merger with Central. In addition to purchase accounting adjustments, the yield on our loan portfolio is affected by the amount of nonaccrual loans (which do not earn interest income), the mix of the portfolio (real estate loans generally have a lower overall yield than commercial and agricultural loans), the effects of competition and the interest rate environment on the amounts and volumes of new loan originations, and the mix of variable-rate versus fixed-rate loans in our portfolio. While the increase in interest income on loans was primarily the result of the larger loan portfolio, the average yield on loans increased from 4.53% in the first quarter of 2015 to 4.74% in the first quarter of 2016, which was primarily attributable to purchase accounting adjustments and to market conditions in the areas served by Central Bank, which allow for somewhat higher loan rates.

Interest and discount income on loan pool participations decreased \$0.6 million, or 100.0%, from \$0.6 million in the first quarter of 2015 to zero in the same period of 2016. The Company entered into this business upon consummation of a prior merger in March 2008. These loan pool participations were investments in pools of performing, subperforming and nonperforming loans purchased at varying discounts to the aggregate outstanding principal amount of the underlying loans. The loan pool participations were held and serviced by a third-party independent servicing corporation, and the amount of income received from them varied widely due to unpredictable payment collections

and loss recoveries. The Company sold its remaining loan pool participations in the second quarter of 2015. Interest income on investment securities on a tax-equivalent basis totaled \$4.1 million in the first quarter of 2016 compared with \$4.0 million for the same period of 2015, including \$0.1 million of purchase accounting premium amortization expense in 2016. The tax-equivalent yield on our investment portfolio in the first quarter of 2016 decreased to 3.10% from 3.31% in the comparable period of 2015, partially due to a decline of 7 basis points attributable to premium amortization from the acquisition of the Central portfolio at fair value on May 1, 2015. The average balance of investments in the first quarter of 2016 was \$534.2 million compared with \$492.5 million in the first quarter of 2015, an increase of \$41.6 million, or 8.5%. The increase in

Table of Contents

average balance resulted primarily from the merger, despite using proceeds from the pre-merger sale and maturity of securities to pay the cash portion of the merger consideration for the closing of the Central acquisition.

Interest expense on deposits increased \$0.4 million, or 20.4%, in the first quarter of 2016 compared with the same period in 2015, primarily due to the addition of deposits resulting from the Central merger. The weighted average rate paid on interest-bearing deposits was 0.44% in the first quarter of 2016, compared with 0.59% in the first quarter of 2015. This decrease includes the effect of the merger-related premium amortization of \$0.4 million on certificates of deposit, which served to decrease deposit interest expense. Average interest-bearing deposits for the first quarter of 2016 increased \$698.9 million compared with the same period in 2015, due primarily to the merger.

Interest expense on borrowed funds of \$0.9 million was \$0.3 million higher in the first quarter of 2016 compared with the same period in 2015, due primarily to increased balances. Average borrowed funds for the first quarter of 2016 were \$70.2 million higher compared with the same period in 2015. This increase was primarily due to the borrowing of \$25.0 million in new long-term debt as well as \$21.6 million of subordinated notes assumed in connection with the merger in the second quarter of 2015, along with the \$42.6 million increase in the average level of FHLB borrowing. The weighted average rate on borrowed funds increased to 1.44% for the first quarter of 2016 compared with 1.24% for the first quarter of 2015, reflecting the increased cost of new debt relative to that of pre-merger debt.

Provision for Loan Losses

The provision for loan losses is a current charge against income and represents an amount which management believes is sufficient to maintain an adequate allowance for known and probable losses. In assessing the adequacy of the allowance for loan losses, management considers the size and quality of the loan portfolio measured against prevailing economic conditions, regulatory guidelines, historical loan loss experience and credit quality of the portfolio. When a determination is made by management to charge off a loan balance, such write-off is charged against the allowance for loan losses.

We recorded a provision for loan losses of \$1.1 million in the first quarter of 2016, an increase of \$0.5 million, from \$0.6 million in the first quarter of 2015. The increased provision reflects primarily the increase in outstanding loan balances in the first quarter of 2016, compared to the first quarter of 2015. Net loans charged off in the first quarter of 2016 totaled \$0.2 million, compared to \$0.4 million net loans charged off in the first quarter of 2015. We determine an appropriate provision based on our evaluation of the adequacy of the allowance for loan losses in relationship to a continuing review of problem loans, current economic conditions, actual loss experience and industry trends. We believe that the allowance for loan losses was adequate based on the inherent risk in the portfolio as of March 31, 2016; however, there is no assurance losses will not exceed the allowance, and any growth in the loan portfolio and the uncertainty of the general economy may require additional provisions in future periods as deemed necessary.

Sensitive assets include nonaccrual loans, loans on MidWestOne Bank's and, prior to the merger, Central Bank's, watch loan reports and other loans identified as having higher potential for loss. We review sensitive assets on at least a quarterly basis for changes in the customers' ability to pay and changes in the valuation of underlying collateral in order to estimate probable losses. We also periodically review a watch loan list which is comprised of loans that have been restructured or involve customers in industries which have been adversely affected by market conditions. The majority of these loans are being repaid in conformance with their contracts.

Total noninterest income	\$6,405	\$4,008	\$2,397	59.8	%
Noninterest income as a % of total revenue*	19.8	%	19.5	%	

* Total revenue is net interest income plus noninterest income excluding gain/loss on securities and premises and equipment and impairment of investment securities.

Table of Contents

Total noninterest income for the first quarter of 2016 increased to \$6.4 million, up \$2.4 million, or 59.8%, from \$4.0 million in the first quarter of 2015, due primarily to the merger. The increase was primarily in other service charges, commissions and fees, which increased by \$2.0 million, or 334.2%, from \$0.6 million in the first quarter of 2015 to \$2.6 million for the first quarter of 2016. While the majority of this increase was due to the merger, \$0.7 million of the increase represents the gain on sale of our Barron and Rice Lake, Wisconsin branches, which was completed in early February 2016. Service charges and fees on deposit accounts in the first quarter of 2016 increased \$0.5 million, or 71.6%, compared to the first quarter of 2015, and mortgage origination and loan servicing fees rose \$0.3 million, or 130.7%, from \$0.2 million for the first quarter of 2015 to \$0.5 million for the first quarter of 2016. The noted increases were partially offset by decreased gains on the sale of available for sale securities of \$0.3 million, and losses on the sale of premises and equipment of \$0.1 million, due primarily to the loss on the sale of the Rice Lake, Wisconsin building in a transaction separate from the sale of the branch.

Management's strategic goal is for noninterest income to constitute 25% of total revenues (net interest income plus noninterest income excluding gain/loss on securities and premises and equipment and impairment of investment securities) over time. For the three months ended March 31, 2016, noninterest income comprised 19.8% of total revenues, compared with 19.5% for the same period in 2015. With the recent merger of Central Bank into MidWestOne Bank, management expects to see gradual improvement in this ratio in future periods.

Noninterest Expense

	Three Months Ended March 31,			
	2016	2015	\$ Change	% Change
(dollars in thousands)				
Salaries and employee benefits	\$12,645	\$6,869	\$5,776	84.1 %
Net occupancy and equipment expense	3,251	1,524	1,727	113.3
Professional fees	946	680	266	39.1
Data processing expense	2,573	432	2,141	495.6
FDIC insurance expense	421	239	182	76.2
Amortization of intangible assets	1,061	108	953	882.4
Other operating expense	2,549	1,327	1,222	92.1
Total noninterest expense	\$23,446	\$11,179	\$12,267	109.7 %

Noninterest expense for the first quarter of 2016 was \$23.4 million, up \$12.3 million, or 109.7%, from the first quarter of 2015. The increase was mainly due to operating a larger company with a new markets following the Central merger. Salaries and employee benefits increased \$5.8 million, or 84.1%, between the first quarter of 2015 and the first quarter of 2016 mainly as a result of the increased number of employees of the Company after the merger. Likewise, net occupancy and equipment expense increased \$1.7 million, or 113.3%, from \$1.5 million for the first quarter of 2015 to \$3.3 million for the first quarter of 2016 mainly due to the merger. Merger-related expenses, relating to the bank merger, in the first quarter of 2016 were \$2.2 million, compared to \$0.5 million of expenses related to the holding company merger in the first quarter of 2015. The majority of the 2016 bank merger expenses were comprised of data processing fees, which increased \$2.1 million, or 495.6%, for the first quarter of 2016, compared with the first quarter of 2015. The increase was primarily due to the bank merger-related data processing contract termination expense of \$1.8 million realized during the quarter. Professional fees expense increased \$0.3 million, or 39.1%, for the first quarter of 2016, compared with the first quarter of 2015. Other operating expense for the first quarter of 2016 increased \$1.2 million, or 92.1%, compared with the first quarter of 2015, primarily due to the merger of the banks.

Income Tax Expense

Our effective income tax rate, or income taxes divided by income before taxes, was 25.6% for the first quarter of 2016, which was lower than the effective tax rate of 25.9% for the first quarter of 2015. Income tax expense was \$1.9 million in the first quarter of 2016 compared to \$1.7 million for the same period of 2015. The primary reason for the increase in income tax expense was primarily due to an increase in the level of taxable income between the comparable periods due to the merger.

FINANCIAL CONDITION

Our total assets decreased to \$2.96 billion at March 31, 2016 from \$2.98 billion at December 31, 2015. The main areas of asset decreases were investment securities available for sale and loans held for sale. These decreases were partially offset by an increase in loans, and cash and cash equivalents. Total deposits at March 31, 2016, were \$2.43 billion, a decrease of \$33.9 million from December 31, 2015. The deposit decrease was concentrated in non-interest-bearing demand deposits, which decreased \$46.6 million, or 8.3%, between the two dates, and certificates of deposits under \$100,000, which decreased \$10.4 million, or 3.0%, to \$337.9 million at March 31, 2016, from \$348.3 million at December 31, 2015. Securities sold under agreement to repurchase declined \$9.6 million, or 14.2%, from \$67.5 million at December 31, 2015 to \$57.9 million at March 31, 2016. These decreases were somewhat offset by an increase in FHLB borrowings of \$25.0 million, or 28.7% between December 31, 2015 and March 31,

Table of Contents

2016, to \$112.0 million at March 31, 2016. The amounts recognized in the financial statements for the merger have been determined to be final as of March 31, 2016. See Note 2. "Business Combination" to our consolidated financial statements for additional information related to our merger with Central.

Investment Securities

Investment securities totaled \$505.7 million at March 31, 2016, or 17.1% of total assets, a decrease of \$39.9 million, or 7.3%, from \$545.7 million, or 18.3% of total assets, as of December 31, 2015. A total of \$387.5 million of the investment securities were classified as available for sale at March 31, 2016, compared to \$427.2 million at December 31, 2015. Investment securities available for sale decreased \$39.7 million, or 9.30%, from December 31, 2015 to March 31, 2016 due to the sale of securities to provide liquidity for loan originations. As of March 31, 2016, the portfolio consisted mainly of obligations of states and political subdivisions (48.9%), mortgage-backed securities and collateralized mortgage obligations (37.0%), and obligations of U.S. government agencies (2.3%). Investment securities held to maturity were \$118.2 million at March 31, 2016, compared to \$118.4 million at December 31, 2015.

Loans

The composition of loans (before deducting the allowance for loan losses) was as follows:

	March 31, 2016		December 31, 2015		
	Balance	% of Total	Balance	% of Total	
(dollars in thousands)					
Agricultural	\$123,495	5.7	% \$121,714	5.7	%
Commercial and industrial	471,830	21.7	467,412	21.7	
Credit cards	1,488	0.1	1,377	0.1	
Overdrafts ¹	—	0.0	1,483	0.1	
Commercial real estate:					
Construction and development	115,218	5.3	120,753	5.6	
Farmland	91,816	4.2	89,084	4.1	
Multifamily	125,410	5.8	121,763	5.7	
Commercial real estate-other	687,808	31.6	660,341	30.7	
Total commercial real estate	1,020,252	46.9	991,941	46.1

Total residential real estate	518,877	23.9	530,506	24.6	
Consumer	36,449	1.7	37,509	1.7	
Total loans	\$2,172,391	100.0	% \$2,151,942	100.0	%

(1) As of the first quarter 2016, overdrafts are no longer included as a separate class of loan.

Total loans (excluding loans held for sale) increased \$20.4 million, or 1.0%, from December 31, 2015, to \$2.17 billion at March 31, 2016, primarily due to new originations. The increase was primarily concentrated in commercial real estate-other, and commercial and industrial loans, partially offset by decreases in one- to four- family first liens and construction and development loans. As of March 31, 2016, the largest category of bank loans was commercial real estate loans, comprising approximately 47% of the portfolio, which included 4% of total loans being farmland, 5% being construction and development, 6% being multifamily residential mortgages, and 32% being other commercial real estate. Residential real estate loans was the next largest category at 24% of total loans, followed by commercial and industrial loans at 22%, agricultural loans at 6%, and consumer loans at 2%. The Company also held \$24.5 million net of a discount of \$6.8 million, or 1.1% of the total loan portfolio, in purchased credit impaired loans as a result of the merger. As of March 31, 2016, our loan to deposit ratio was 89.4% compared with a loan to deposit ratio of 87.4% at December 31, 2015. We anticipate that the loan to deposit ratio will remain relatively stable in future periods.

We have minimal direct exposure to subprime mortgages in our loan portfolio. Our loan policy provides a guideline that real estate mortgage borrowers have a Beacon score of 640 or greater. Exceptions to this guideline have been noted but the overall exposure is deemed minimal by management. Mortgages we originate and sell on the secondary

market are typically underwritten according to the guidelines of secondary market investors. These mortgages are sold on a non-recourse basis.

Table of Contents**Premises and Equipment**

As of March 31, 2016, premises and equipment totaled \$75.5 million, a decrease of \$0.7 million, or 1.0%, from \$76.2 million at December 31, 2015. This decrease was primarily due the sale of the Rice Lake and Barron, Wisconsin branch buildings and associated furniture, fixtures, and equipment, combined with normal depreciation expense of \$1.1 million. These decreases were partially offset by the ongoing major construction project involving the main office of MidWestOne Bank and headquarters of the Company in Iowa City, Iowa. In August 2013, we entered into a contract for the restoration and remodeling of the building, with an estimated cost of the restoration and remodeling of \$13.8 million, and an anticipated completion in April 2016. As of March 31, 2016, an estimated \$1.9 million remained to be paid on this contract. We expect the balance of premises and equipment to stabilize and then begin declining in the future as this project reaches completion in 2016.

Deposits

Total deposits as of March 31, 2016 were \$2.43 billion, a decrease of \$33.9 million, or 1.4%, from \$2.46 billion as of December 31, 2015. The decrease was primarily due to the sale of the Rice Lake and Barron, Wisconsin branches and the deposits associated with those branches. Interest-bearing checking deposits were the largest category of deposits at March 31, 2016, representing approximately 44.3% of total deposits. Total interest-bearing checking deposits were \$1.08 billion at March 31, 2016, an increase of \$11.1 million, or 1.0%, from \$1.06 billion at December 31, 2015. Included in interest-bearing checking deposits at March 31, 2016 was \$7.7 million of brokered deposits in the Insured Cash Sweep (ICS) program, a decrease of \$12.6 million, or 62.0%, from \$20.3 million at December 31, 2015, due primarily to a withdrawal by one account holder. Non-interest bearing demand deposits were \$513.0 million at March 31, 2016, a decrease of \$46.6 million, or 8.3%, from \$559.6 million at December 31, 2015. Savings deposits were \$194.5 million at March 31, 2016, an increase of \$5.0 million, or 2.7%, from December 31, 2015 to March 31, 2016. Total certificates of deposit were \$646.7 million at March 31, 2016, down \$3.4 million, or 0.5%, from \$650.1 million at December 31, 2015. Included in total certificates of deposit at March 31, 2016 was \$2.9 million of brokered deposits in the Certificate of Deposit Account Registry Service (CDARS) program, unchanged from December 31, 2015. Based on recent experience, management anticipates that many of the maturing certificates of deposit will not be renewed upon maturity due to the current low interest rate environment. Approximately 87.3% of our total deposits were considered “core” deposits as of March 31, 2016.

Debt**Federal Home Loan Bank Borrowings**

FHLB borrowings totaled \$112.0 million as of March 31, 2016 compared with \$87.0 million as of December 31, 2015. We utilize FHLB borrowings as a supplement to customer deposits to fund earning assets and to assist in managing interest rate risk. Thus, when deposits decline, FHLB borrowing may increase to provide necessary liquidity. See Note 11. “Long-Term Borrowings” to our consolidated financial statements for additional information related to our FHLB borrowings.

Junior Subordinated Notes Issued to Capital Trusts

Junior subordinated notes that have been issued to capital trusts that issued trust preferred securities were \$23.6 million as of March 31, 2016, unchanged from December 31, 2015. See Note 10. “Subordinated Notes Payable” to our consolidated financial statements for additional information related to our junior subordinated notes.

Long-term Debt

Long-term debt in the form of a \$35.0 million unsecured note payable to a correspondent bank was entered into on April 30, 2015 in connection with the payment of the merger consideration at the closing of the Central merger, of which \$21.3 million was outstanding as of March 31, 2016. See Note 11. “Long-Term Borrowings” to our consolidated financial statements for additional information related to our long-term debt.

Goodwill and Other Intangible Assets

Goodwill increased from \$64.5 million as of December 31, 2015, to \$64.7 million as of March 31, 2016 due to the finalization of merger accounting issues related to the Central merger. Other intangible assets decreased \$1.1 million, or 5.5%, to \$18.1 million at March 31, 2016 compared to \$19.1 million at December 31, 2015, due to normal amortization. See Note 7. “Goodwill and Intangible Assets” to our consolidated financial statements for additional information.

Table of Contents

Nonperforming Assets

The following tables set forth information concerning nonperforming loans by class of financing receivable at March 31, 2016 and December 31, 2015:

	90 Days or More Past Due and Still Accruing Interest	Restructured	Nonaccrual	Total

-------	--------	----------	----------	-----------

Not included in the loans above as of March 31, 2016, were purchased credit impaired loans with an outstanding balance of \$4.5 million, net of a discount of \$1.8 million.

Our nonperforming assets totaled \$30.5 million as of March 31, 2016, an increase of \$10.1 million, or 49.8%, from December 31, 2015. The balance of OREO at March 31, 2016 was \$6.2 million, a decrease of \$2.6 million, from \$8.8 million of OREO at December 31, 2015. All of the OREO property was acquired through foreclosures, and we are actively working to sell all properties held as of March 31, 2016. OREO is carried at appraised value less estimated cost of disposal at the date of acquisition. Additional discounts could be required to market and sell the properties, resulting in a write down through expense. Nonperforming

Table of Contents

loans totaled \$24.3 million (1.12% of total loans) as of March 31, 2016, compared to \$11.5 million (0.54% of total loans) as of December 31, 2015.

At March 31, 2016, nonperforming loans increased from \$11.5 million, or 0.54% of total loans, at December 31, 2015, to \$24.3 million, or 1.12% of total loans, at March 31, 2016. At March 31, 2016, nonperforming loans consisted of \$16.5 million in nonaccrual loans, \$7.3 million in troubled debt restructures and \$0.5 million in loans past due 90 days or more and still accruing. This compares to nonaccrual loans of \$4.0 million, TDRs of \$7.2 million, and loans past due 90 days or more and still accruing of \$0.3 million at December 31, 2015. Nonaccrual loans increased by \$12.5 million between March 31, 2016 and December 31, 2015 due primarily to the addition of one commercial loan customer with four loans totaling \$10.4 million. The increase in TDRs was primarily due the addition of three loans totaling \$0.2 million, partially offset by payments collected from TDR-status borrowers. Loans 90 days past due and still accruing interest increased \$0.2 million between December 31, 2015 and March 31, 2016. Loans past due 30 to 89 days and still accruing interest (not included in the nonperforming loan totals) increased to \$9.2 million at March 31, 2016, compared with \$8.5 million at December 31, 2015. At March 31, 2016, other real estate owned (not included in nonperforming loans) was \$6.2 million, down from \$8.8 million of other real estate owned at December 31, 2015. During the first three months of 2016, the Company had a net decrease of 10 properties in other real estate owned. As of March 31, 2016, the allowance for loan losses was \$20.2 million, or 0.93% of total loans, compared with \$19.4 million, or 0.90% of total loans, at December 31, 2015. The allowance for loan losses represented 83.2% of nonperforming loans at March 31, 2016, compared with 168.5% of nonperforming loans at December 31, 2015. The Company had net loan charge-offs of \$0.2 million in the three months ended March 31, 2016, or an annualized 0.05% of average loans outstanding, compared to net charge-offs of \$0.4 million, or an annualized 0.15% of average loans outstanding, for the same period of 2015.

Loan Review and Classification Process for Agricultural, Commercial and Industrial, and Commercial Real Estate Loans at MidWestOne Bank:

MidWestOne Bank maintains a loan review and classification process which involves multiple officers of MidWestOne Bank and is designed to assess the general quality of credit underwriting and to promote early identification of potential problem loans. All commercial and agricultural loan officers are charged with the responsibility of risk rating all loans in their portfolios and updating the ratings, positively or negatively, on an ongoing basis as conditions warrant. A monthly loan officer validation worksheet documents this process. Risk ratings are selected from an 8-point scale with ratings as follows: ratings 1- 4 Satisfactory (pass), rating 5 Watch (potential weakness), rating 6 Substandard (well-defined weakness), rating 7 Doubtful, and rating 8 Loss.

When a loan officer originates a new loan, based upon proper loan authorization, he or she documents the credit file with an offering sheet summary, supplemental underwriting analysis, relevant financial information and collateral evaluations. All of this information is used in the determination of the initial loan risk rating. MidWestOne Bank's loan review department undertakes independent credit reviews of relationships based on either criteria established by loan policy, risk-focused sampling, or random sampling. Loan policy requires all lending relationships with total exposure of \$5.0 million or more as well as all classified and Watch rated credits over \$1.0 million be reviewed no less than annually. The individual loan reviews consider such items as: loan type; nature, type and estimated value of collateral; borrower and/or guarantor estimated financial strength; most recently available financial information; related loans and total borrower exposure; and current/anticipated performance of the loan. The results of such reviews are presented to executive management.

Through the review of delinquency reports, updated financial statements or other relevant information, the lending officer and/or loan review personnel may determine that a loan relationship has weakened to the point that a criticized (loan grade 5) or classified (loan grades 6 through 8) status is warranted. When a loan relationship with total related exposure of \$1.0 million or greater is adversely graded (5 or above), or is classified as a TDR (regardless of size), the lending officer is then charged with preparing a loan strategy summary worksheet that outlines the background of the credit problem, current repayment status of the loans, current collateral evaluation and a workout plan of action. This plan may include goals to improve the credit rating, assist the borrower in moving the loans to another institution and/or collateral liquidation. All such reports are first presented to regional management and then to the board of directors of MidWestOne Bank by the Executive Vice President, Chief Credit Officer (or a designee) of MidWestOne

Bank.

Depending upon the individual facts and circumstances and the result of the Classified/Watch review process, loan officers and/or loan review personnel may categorize the loan relationship as impaired. Once that determination has occurred, the loan officer, in conjunction with regional management, will complete an evaluation of the collateral (for collateral-dependent loans) based upon the estimated collateral value, adjusting for current market conditions and other local factors that may affect collateral value. Loan review personnel may also complete an independent impairment analysis when deemed necessary. These judgmental evaluations may produce an initial specific allowance for placement in the Company's allowance for loan and lease losses calculation. As soon as practical, an updated value estimate of the collateral backing that impaired loan relationship is completed. After the updated value is determined, regional management, with assistance from the loan review department, reviews the valuation

46

Table of Contents

and updates the specific allowance analysis for each loan relationship accordingly. The board of directors of MidWestOne Bank on a quarterly basis reviews the Classified/Watch reports including changes in credit grades of 5 or higher as well as all impaired loans, the related allowances and OREO.

In general, once the specific allowance has been finalized, regional and executive management will consider a chargeoff prior to the calendar quarter-end in which that reserve calculation is finalized.

The review process also provides for the upgrade of loans that show improvement since the last review. All requests for an upgrade of a credit are approved by loan strategy committee before the rating can be changed.

Loan Review and Classification Process for Agricultural, Commercial and Industrial, and Commercial Real Estate Loans at Central Bank:

Prior to the bank merger on April 2, 2016, Central Bank had a loan classification process that started with the relationship managers who were ultimately responsible for properly risk rating the loans in their portfolio. A 9 point scale was used with ratings 1-5 as pass; 6 watch (potential weakness); 7 substandard (well defined weakness); 8 Doubtful and 9 Loss. When a loan officer originated a new loan, renewed an existing loan or performed an annual review, either a loan presentation or a summary comment was created which summarized the current financial condition of that customer. A formal evaluation of its risk rating was done at that time. The lender was also responsible for monitoring their portfolio throughout the course of the year and proactively reacting to changing conditions by making any risk rating adjustments.

On a bi-monthly basis the Chief Executive Officer of Central Bank, Chief Credit Officer of Central Bank and Senior Vice President of Special Assets of Central Bank met with each Market President and reviewed their watch list, past due report and past due real estate taxes report. The action plans for watch list credits were reviewed at these meetings and adjustments were made as needed. Each watch list credit was labeled either “Retain” or “Exit” with those labeled “Exit” transferred to special assets. On a monthly basis the board of directors of Central Bank reviewed: a watch list containing watch list credits greater than \$500,000; a summary report of loans removed from the watch list; and a summary report of any additions to the list.

Central Bank engaged an outside consultant to conduct independent credit reviews of relationships based on criteria established by policy, risk-focused sampling or random sampling. The individual loan reviews considered borrower and/or guarantor financial strength, most recently available financial information, current/anticipated performance of the loan, appropriateness of credit risk grading, compliance with loan approval requirements, and completeness of loan and collateral documentation. The results of credit reviews were presented to management.

Each 7 rated credit was reviewed for impairment. If the loan was determined to be impaired an impairment worksheet was completed which focused on updating the collateral values based on the current market conditions. These worksheets were updated on a quarterly basis by either the lender or analyst and reviewed and compiled by credit administration. Credit administration sent the compiled impairment information to the finance department for the allowance calculation.

Restructured Loans

We restructure loans for our customers who appear to be able to meet the terms of their loan over the long term, but who may be unable to meet the terms of the loan in the near term due to individual circumstances. We consider the customer’s past performance, previous and current credit history, the individual circumstances surrounding the current difficulties and their plan to meet the terms of the loan in the future prior to restructuring the terms of the loan. The following factors are indicators that a concession has been granted (one or multiple items may be present):

- The borrower receives a reduction of the stated interest rate for the remaining original life of the debt.
- The borrower receives an extension of the maturity date or dates at a stated interest rate lower than the current market interest rate for new debt with similar risk characteristics.
- The borrower receives a reduction of the face amount or maturity amount of the debt as stated in the instrument or other agreement.
- The borrower receives a deferral of required payments (principal and/or interest).
- The borrower receives a reduction of the accrued interest.

Generally, loans are restructured through short-term interest rate relief, short-term principal payment relief or short-term principal and interest payment relief. Once a restructured loan has gone 90 days or more past due or is

placed on nonaccrual status, it is included in the 90 days and over past due or nonaccrual totals in the previous table.

47

Table of Contents

During the three months ended March 31, 2016, the Company restructured three loans by granting a concession to a borrower experiencing financial difficulties.

A loan classified as a troubled debt restructuring will no longer be included in the troubled debt restructuring disclosures in the periods after the restructuring if the loan performs in accordance with the terms specified by the restructuring agreement and the interest rate specified in the restructuring agreement represents a market rate at the time of modification. The specified interest rate is considered a market rate when the interest rate is equal to or greater than the rate the Company is willing to accept at the time of restructuring for a new loan with comparable risk. If there are concerns that the borrower will not be able to meet the modified terms of the loan, the loan will continue to be included in the troubled debt restructuring disclosures.

We consider all TDRs, regardless of whether they are performing in accordance with their modified terms, to be impaired loans when determining our allowance for loan losses. A summary of restructured loans as of March 31, 2016 and December 31, 2015 is as follows:

	March 31, 2016	December 31, 2015
(in thousands)		
Restructured Loans (TDRs):		
In compliance with modified terms	\$ 7,317	\$ 7,232
Not in compliance with modified terms - on nonaccrual status	440	458
Total restructured loans	\$ 7,757	\$ 7,690
Allowance for Loan Losses		

Our ALLL as of March 31, 2016 was \$20.2 million, which was 0.93% of total loans as of that date. This compares with an ALLL of \$19.4 million as of December 31, 2015, which was 0.90% of total loans. Gross charge-offs for the first three months of 2016 totaled \$0.4 million, while recoveries of previously charged-off loans totaled \$0.1 million. Annualized net loan charge offs to average loans for the first three months of 2016 was 0.05% compared to 0.11% for the year ended December 31, 2015. As of March 31, 2016, the ALLL was 83.2% of nonperforming loans compared with 168.5% as of December 31, 2015. Based on the inherent risk in the loan portfolio, we believe that as of March 31, 2016, the ALLL was adequate; however, there is no assurance losses will not exceed the allowance, and any growth in the loan portfolio or uncertainty in the general economy may require that management continue to evaluate the adequacy of the ALLL and make additional provisions in future periods as deemed necessary. Non-acquired loans with a balance of \$1.43 billion had \$19.4 million of the allowance for loan losses allocated to them, providing an allocated allowance for loan loss to non-acquired loan ratio of 1.35%. Non-acquired loans are total loans minus those loans acquired in the Central merger. New loans and loans renewed after the merger are considered non-acquired loans.

	Gross Loans (A)	Discount (B)	Loans, Net of Discount (A-B)	Allowance (C)	Allowance/Gross Loans (C/A)		Allowance + Discount/Gross Loans ((B+C)/A)	
Total Non-Acquired Loans	\$ 1,518,675	\$—	\$ 1,518,675	\$ 19,414	1.28	%	1.28	%
Total Acquired Loans	672,600	18,884	653,716	831	0.12		2.93	
Total Loans	\$ 2,191,275	\$ 18,884	\$ 2,172,391	\$ 20,245	0.92	%	1.79	%

As part of the merger between MidWestOne Bank and Central Bank, management developed a single methodology for determining the amount of the ALLL that would be needed at the combined bank. The new methodology is a hybrid of the methods used at MidWestOne Bank and Central Bank prior to the bank merger and the results from the new ALLL model are consistent with the results that the two banks calculated individually.

During the first quarter of 2016 we changed the historical charge-off component of the ALLL calculation to include both Central Bank and MidWestOne Bank in the 20-quarter annual average. A separate qualitative factor table is now being maintained for each region it services (Iowa, Minnesota/Wisconsin, and Florida), all with a similar methodology, but adjusted based on the economic/business conditions in each region. Loans below \$250,000 continue

to be evaluated solely based on delinquency status, but no longer receive an increased allocation of between 25% and 50% of the loss given default. Instead they receive the normal ASC 450 allocation based on the type of loan and the risk rating. To streamline the ALLL process, a number of low-balance loan types that do not have a material impact on the overall calculation are now excluded. As of the first quarter 2016, overdrafts are no longer included in the ALLL calculation. Additionally, the guaranteed portion of government guaranteed loans is no longer being adjusted out of the calculation, and as a result, the entire loan balance is subject to reserve requirements. Special mention/watch and substandard rated credits not individually reviewed for impairment previously received an allocation of 2 and 6 times respectively of the pass allocation. Due to the inherent risks associated with special mention/watch risk rated loans (i.e. early stages of financial deterioration, technical exceptions, etc.), this subset is reserved at a level that will cover losses above a pass

Table of Contents

allocation for loans that had a loss in the last 20 quarters in which the loan was risk rated special mention/watch at the time of the loss. Substandard loans carry exponentially greater risk than special mention/watch loans, and as such, this subset is reserved at a level that covers losses above a pass allocation for loans that had a loss in the last 20 quarters in which the loans was risk rated substandard at the time of the loss. Classified and impaired loans are reviewed per the requirements of FASB ASC Topic 310.

We currently track the loan to value (“LTV”) ratio of loans in our portfolio, and those loans in excess of internal and supervisory guidelines are presented to the Bank’s board of directors on a quarterly basis. At March 31, 2016, there were 18 owner-occupied 1-4 family loans with a LTV ratio of 100% or greater. In addition, there were 54 home equity loans without credit enhancement that had a LTV ratio of 100% or greater. We have the first lien on 28 of these equity loans and other financial institutions have the first lien on the remaining 26. Additionally, there were 63 commercial real estate loans without credit enhancement that exceeded the supervisory LTV guidelines.

We review all impaired and nonperforming loans individually on a quarterly basis to determine their level of impairment due to collateral deficiency or insufficient cash-flow based on a discounted cash-flow analysis. At March 31, 2016, TDRs were not a material portion of the loan portfolio. We review loans 90 days and over past due that are still accruing interest no less than quarterly to determine if there is a strong reason that the credit should not be placed on non-accrual.

Capital Resources

Total shareholders’ equity was \$301.8 million as of March 31, 2016, compared to \$296.2 million as of December 31, 2015, an increase of \$5.6 million, or 1.9%. This increase was primarily attributable to net income of \$5.5 million for the first three months of 2016, a \$1.7 million increase in accumulated other comprehensive income due to market value adjustments on investment securities available for sale, and a \$0.3 million decrease in treasury stock due to the issuance of 16,262 shares of Company common stock in connection with stock compensation plans. These increases were partially offset by the payment of \$1.8 million in common stock dividends. No shares of Company common stock were repurchased in the first quarter of 2016.

Total shareholders’ equity was 10.18% of total assets as of March 31, 2016 and was 9.94% of total assets as of December 31, 2015. The ratio of tangible equity to tangible assets was 7.75% as of March 31, 2016 and 7.51% as of December 31, 2015. Our Tier 1 capital to risk-weighted assets ratio was 10.65% as of March 31, 2016 and was 10.63% as of December 31, 2015. Risk-based capital guidelines require the classification of assets and some off-balance-sheet items in terms of credit-risk exposure and the measuring of capital as a percentage of the risk-adjusted asset totals. We believe that, as of March 31, 2016, the Company and its two bank subsidiaries met all capital adequacy requirements to which we were subject. As of that date, both bank subsidiaries were “well capitalized” under regulatory prompt corrective action provisions.

In July 2013, the U.S. federal banking agencies approved the implementation of the Basel III regulatory capital reforms in pertinent part, and, at the same time, promulgated rules effecting certain changes required by the Dodd-Frank Act (the “Basel III Rules”). In contrast to capital requirements historically, which were in the form of guidelines, Basel III was released in the form of regulations by each of the regulatory agencies. The Basel III Rules are applicable to all banking organizations that are subject to minimum capital requirements, including federal and state banks and savings and loan associations, as well as to bank and savings and loan holding companies, other than “small bank holding companies” (generally bank holding companies with consolidated assets of less than \$1 billion which are not publicly traded companies). The Basel III Rules not only increase most of the required minimum regulatory capital ratios, but they also introduce a Common Equity Tier 1 Capital ratio and the concept of a capital conservation buffer. The Basel III Rules also expand the definition of capital as in effect previously by establishing criteria that instruments must meet to be considered Additional Tier 1 Capital (Tier 1 Capital in addition to Common Equity) and Tier 2 Capital. A number of instruments that previously generally qualified as Tier 1 Capital now do not qualify, or their qualifications changed. The Basel III Rules also permitted banking organizations with less than \$250.0 billion in assets to retain, through a one-time election, the existing treatment for accumulated other comprehensive income, which previously did not affect regulatory capital. The Company elected to retain this treatment, which reduces the volatility of regulatory capital levels. The Basel III Rules have maintained the general structure of the prompt corrective action framework, while incorporating the increased requirements. The prompt

corrective action guidelines were also revised to add the Common Equity Tier 1 Capital ratio. In order to be a “well-capitalized” depository institution under the new regime, a bank and holding company must maintain a Common Equity Tier 1 Capital ratio of 6.5% or more; a Tier 1 Capital ratio of 8% or more; a Total Capital ratio of 10% or more; and a leverage ratio of 5% or more. A new capital conservation buffer, comprised of common equity Tier 1 capital, is also established above the regulatory minimum capital requirements. This capital conservation buffer is being phased in, which began January 1, 2016, at 0.625% of risk-weighted assets and increases each subsequent year by an additional 0.625% until reaching the final level of 2.5% on January 1, 2019. Generally, financial institutions became subject to the new Basel III Rules on January 1, 2015, with phase-in periods for many of the changes. We have traditionally disclosed certain non-GAAP ratios and amounts to evaluate and measure our financial condition, including our Tier 1 capital to risk-weighted assets ratio. We believe this ratio provides investors with information regarding our

Table of Contents

financial condition and how we evaluate our financial condition internally. The following table provides a reconciliation of this non-GAAP measure to the most comparable GAAP equivalent.

(in thousands)	At March 31, 2016	At December 31, 2015
Tier 1 capital		
Total shareholders' equity	\$301,777	\$296,178
Less: Net unrealized gains on securities available for sale	(5,143)	(3,408)
Disallowed Intangibles	(72,803)	(72,203)
Common equity tier 1 capital	\$223,831	220,567
Plus: Junior subordinated notes issued to capital trusts (qualifying restricted core capital)	23,614	23,587
Tier 1 capital	\$247,445	\$244,154
Risk-weighted assets	\$2,322,675	\$2,296,478
Tier 1 capital to risk-weighted assets	10.65 %	10.63 %
Common equity tier 1 capital to risk-weighted assets	9.64 %	N/A

The following table provides the capital levels and minimum required capital levels for the Company, MidWestOne Bank, and Central Bank:

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions

Table of Contents

On February 15, 2016, 30,200 restricted stock units were granted to certain officers of the Company. Additionally, during the first three months of 2016, 17,708 shares of common stock were issued in connection with the vesting of previously awarded grants of restricted stock units, of which 1,446 shares were surrendered by grantees to satisfy tax requirements, and 50 nonvested restricted stock units were forfeited. No shares of common stock were issued in connection with the exercise of previously issued stock options, and no options were forfeited.

Liquidity

Liquidity management involves meeting the cash flow requirements of depositors and borrowers. We conduct liquidity management on both a daily and long-term basis, and adjust our investments in liquid assets based on expected loan demand, projected loan maturities and payments, expected deposit flows, yields available on interest-bearing deposits, and the objectives of our asset/liability management program. We had liquid assets (cash and cash equivalents) of \$60.7 million as of March 31, 2016, compared with \$47.1 million as of December 31, 2015. Interest-bearing deposits in banks at March 31, 2016, increased to \$20.5 million, an increase of \$17.8 million from December 31, 2015. Investment securities classified as available for sale, totaling \$387.5 million and \$427.2 million as of March 31, 2016 and December 31, 2015, respectively, could be sold to meet liquidity needs if necessary. Additionally, our bank subsidiaries maintain unsecured lines of credit with several correspondent banks and secured lines with the Federal Reserve Bank Discount Window and the FHLB that would allow us to borrow funds on a short-term basis, if necessary. Management believes that the Company had sufficient liquidity as of March 31, 2016 to meet the needs of borrowers and depositors.

Our principal sources of funds between December 31, 2015 and March 31, 2016 were proceeds from the maturity and sale of investment securities, and FHLB borrowings. While scheduled loan amortization and maturing interest-bearing deposits are relatively predictable sources of funds, deposit flows and loan prepayments are greatly influenced by economic conditions, the general level of interest rates, and competition. We utilize particular sources of funds based on comparative costs and availability. This includes fixed-rate FHLB borrowings that can generally be obtained at a more favorable cost than deposits of comparable maturity. We generally manage the pricing of our deposits to maintain a steady deposit base but from time to time may decide, as we have done in the past, not to pay rates on deposits as high as our competition.

As of March 31, 2016, we had \$21.3 million of long-term debt outstanding to an unaffiliated banking organization. See Note 11. "Long-Term Borrowings" to our consolidated financial statements for additional information related to our long-term debt. We also have \$23.6 million of indebtedness payable under junior subordinated debentures issued to subsidiary trusts that issued trust preferred securities in pooled offerings. See Note 10. "Subordinated Notes Payable" to our consolidated financial statements for additional information related to our junior subordinated notes.

Inflation

The effects of price changes and inflation can vary substantially for most financial institutions. While management believes that inflation affects the growth of total assets, it is difficult to assess its overall impact on the Company. The price of one or more of the components of the CPI may fluctuate considerably and thereby influence the overall CPI without having a corresponding effect on interest rates or upon the cost of those goods and services normally purchased by us. In years of high inflation and high interest rates, intermediate and long-term interest rates tend to increase, thereby adversely impacting the market values of investment securities, mortgage loans and other long-term fixed rate loans held by financial institutions. In addition, higher short-term interest rates caused by inflation tend to increase financial institutions' cost of funds. In other years, the reverse situation may occur.

Off-Balance-Sheet Arrangements

We are a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of our customers, which include commitments to extend credit, standby and performance letters of credit, and commitments to originate residential mortgage loans held for sale. Commitments to extend credit are agreements to lend to customers at predetermined interest rates, as long as there is no violation of any condition established in the contracts. Our exposure to credit loss in the event of nonperformance by the other party to the commitments to extend credit is represented by the contractual amount of those instruments. We use the same credit policies in making off-balance sheet commitments as we do for on-balance-sheet instruments.

Commitments to extend credit generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. We evaluate each customer's creditworthiness on a case-by-case basis. As of March 31, 2016, outstanding commitments to extend credit totaled approximately \$398.8 million. We have established a reserve of \$0.2 million, which represents our estimate of probable losses as a result of these transactions. This reserve is not part of our allowance for loan losses.

Table of Contents

Commitments under standby and performance letters of credit outstanding aggregated \$12.1 million as of March 31, 2016. We do not anticipate any losses as a result of these transactions.

Residential mortgage loans sold to others are predominantly conventional residential first lien mortgages originated under our usual underwriting procedures, and are most often sold on a nonrecourse basis. At March 31, 2016, there were approximately \$6.5 million of mandatory commitments with investors to sell not yet originated residential mortgage loans. We do not anticipate any losses as a result of these transactions.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

In general, market risk is the risk of change in asset values due to movements in underlying market rates and prices. Interest rate risk is the risk to earnings and capital arising from movements in interest rates. Interest rate risk is the most significant market risk affecting the Company as other types of market risk, such as foreign currency exchange rate risk and commodity price risk, play a lesser role in the normal course of our business activities.

In addition to interest rate risk, economic conditions in recent years have made liquidity risk (in particular, funding liquidity risk) a more prevalent concern among financial institutions. In general, liquidity risk is the risk of being unable to fund an entity's obligations to creditors (including, in the case of banks, obligations to depositors) as such obligations become due and/or fund its acquisition of assets.

Liquidity Risk

Liquidity refers to our ability to fund operations, to meet depositor withdrawals, to provide for our customers' credit needs, and to meet maturing obligations and existing commitments. Our liquidity principally depends on cash flows from operating activities, investment in and maturity of assets, changes in balances of deposits and borrowings, and our ability to borrow funds.

Net cash inflows from operating activities were \$12.0 million in the first three months of 2016, compared with \$8.6 million in the first three months of 2015. Net income before depreciation, amortization, and accretion is generally the primary contributor for net cash inflows from operating activities.

Net cash inflows from investing activities were \$24.7 million in the first three months of 2016, compared to net cash inflows of \$20.0 million in the comparable three-month period of 2015. In the first three months of 2016, investment securities transactions resulted in net cash inflows of \$42.4 million, compared to inflows of \$65.1 million during the same period of 2015. Increased loan volume accounted for net cash outflows of \$21.1 million for the first three months of 2016, compared with \$44.2 million of net cash outflows for the same period of 2015. Purchases of premises and equipment resulted in \$1.9 million cash outflows in the first three months of 2016, compared to outflows of \$2.2 million relating to premises and equipment in the comparable period of 2015, both resulting from the two large building projects currently underway to restore and remodel the main office of MidWestOne Bank and headquarters of the Company, and to construct a new Home Mortgage Center, and partially offset by the sale of the Rice Lake and Barron, Wisconsin branch offices. There were no cash inflows from loan pool participations during the first three months of 2016 compared to \$1.1 million during the same period of 2015, as we sold our interest in these instruments in the second quarter of 2015.

Net cash used in financing activities in the first three months of 2016 was \$23.1 million, compared with net cash used of \$30.5 million for the same period of 2015. The largest financing cash outflows during the three months ended March 31, 2016 was a \$33.9 million decrease in deposits. Other cash outflows included a decrease of \$9.6 million in securities sold under agreements to repurchase, a decrease of \$1.5 million in federal funds purchased, and the use of \$1.8 million to pay dividends. Sources of cash inflows during the first three months of 2016 were a net increase of \$25.0 million in FHLB borrowings.

To further mitigate liquidity risk, both MidWestOne Bank and, previously, Central Bank have several sources of liquidity in place to maximize funding availability and increase the diversification of funding sources. The criteria for evaluating the use of these sources include volume concentration (percentage of liabilities), cost, volatility, and the fit with the current asset/liability management plan. These acceptable sources of liquidity include:

- Federal Funds Lines
- FHLB Borrowings
- Brokered Deposits

- Brokered Repurchase Agreements
- Federal Reserve Bank Discount Window

52

Table of Contents

Federal Funds Lines:

Routine liquidity requirements are met by fluctuations in the federal funds position of both MidWestOne Bank and, previously, Central Bank. The principal function of these funds is to maintain short-term liquidity. Unsecured federal funds purchased lines are viewed as a volatile liability and are not used as a long-term funding solution, especially when used to fund long-term assets. Multiple correspondent relationships are preferable and federal funds sold exposure to any one customer is continuously monitored. The current federal funds purchased limit is 10% of total assets, or the amount of established federal funds lines, whichever is smaller. Currently, MidWestOne Bank has unsecured federal funds lines totaling \$95.0 million, which lines are tested annually to ensure availability.

FHLB Borrowings:

FHLB borrowings provide both a source of liquidity and long-term funding for both MidWestOne Bank and, previously, Central Bank. Use of this type of funding is coordinated with both the strategic balance sheet growth projections and interest rate risk profile of MidWestOne Bank and, previously, Central Bank. Factors that are taken into account when contemplating use of FHLB borrowings are the effective interest rate, the collateral requirements, community investment program credits, and the implications and cost of having to purchase incremental FHLB stock. The current FHLB borrowing limit is 35% of total assets. As of March 31, 2016, MidWestOne Bank and Central Bank had \$112.0 million in outstanding FHLB borrowings, leaving \$253.8 million available for liquidity needs, based on collateral capacity. These borrowings are secured by various real estate loans (residential, commercial and agricultural).

Brokered Deposits:

MidWestOne Bank and, previously, Central Bank have brokered certificate of deposit lines/deposit relationships available to help diversify their various funding sources. Brokered deposits offer several benefits relative to other funding sources, such as: maturity structures which cannot be duplicated in the current deposit market, deposit gathering which does not cannibalize the existing deposit base, the unsecured nature of these liabilities, and the ability to quickly generate funds. However, brokered deposits are often viewed as a volatile liability by banking regulators and market participants. This viewpoint, and the desire to not develop a large funding concentration in any one area outside of the respective bank's core market area, is reflected in an internal policy stating that MidWestOne Bank and, previously, Central Bank limit the use of brokered deposits as a funding source to no more than 10% of total assets. Board approval is required to exceed this limit. MidWestOne Bank will also have to maintain a "well capitalized" standing to access brokered deposits, as an "adequately capitalized" rating would require an FDIC waiver to do so, and an "undercapitalized" rating would prohibit them from using brokered deposits altogether.

Brokered Repurchase Agreements:

Brokered repurchase agreements may be established with approved brokerage firms and banks. Repurchase agreements create rollover risk (the risk that a broker will discontinue the relationship due to market factors) and are not used as a long-term funding solution, especially when used to fund long-term assets. Collateral requirements and availability are evaluated and monitored. The current policy limit for brokered repurchase agreements is 10% of total assets. There were no outstanding brokered repurchase agreements at March 31, 2016.

Federal Reserve Bank Discount Window:

The Federal Reserve Bank Discount Window is another source of liquidity, particularly during difficult economic times. MidWestOne Bank and, previously, Central Bank each have a borrowing capacity with the Federal Reserve Bank of Chicago limited by the amount of municipal securities pledged against the line. As of March 31, 2016, the banks had combined municipal securities with an approximate market value of \$13.1 million pledged for liquidity purposes.

Interest Rate Risk

Interest rate risk is defined as the exposure of net interest income and fair value of financial instruments (interest-earning assets, deposits and borrowings) to movements in interest rates. The Company's results of operations depend to a large degree on its net interest income and its ability to manage interest rate risk. The Company considers interest rate risk to be one of its more significant market risks. The major sources of the Company's interest rate risk are timing differences in the maturity and re-pricing characteristics of assets and liabilities, changes in the shape of the yield curve, changes in customer behavior and changes in relationships between rate indices (basis risk). Management

measures these risks and their impact in various ways, including through the use of simulation and valuation analyses. The interest rate scenarios may include gradual or rapid changes in interest rates, spread narrowing and widening, yield curve twists and changes in assumptions about customer behavior in various interest rate scenarios. A mismatch between maturities, interest rate sensitivities and prepayment characteristics of assets and liabilities results in interest-rate risk. Like most financial institutions, we have material interest-rate risk exposure to changes in both short-term and long-term interest rates, as well as variable interest rate indices (e.g., the prime rate or LIBOR). The change in the Company's interest rate profile between March 31, 2016 and December 31, 2015 is largely attributable to the change in the mix

Table of Contents

of earning assets. During the first quarter, investment portfolio balances declined while floating-rate loan balances increased. This shift toward more rapidly repricing assets is the primary reason the Company became more asset sensitive during the quarter.

MidWestOne Bank's and, previously, Central Bank's Asset and Liability Committees meet regularly and are responsible for reviewing their respective interest rate sensitivity positions and establishing policies to monitor and limit exposure to interest rate risk. Our asset and liability committees seek to manage interest rate risk under a variety of rate environments by structuring our balance sheet and off-balance-sheet positions in such a way that changes in interest rates do not have a large negative impact. The risk is monitored and managed within approved policy limits.

We use a third-party service to model and measure our exposure to potential interest rate changes. For various assumed hypothetical changes in market interest rates, numerous other assumptions are made, such as prepayment speeds on loans and securities backed by mortgages, the slope of the Treasury yield-curve, the rates and volumes of our deposits, and the rates and volumes of our loans. There are two primary tools used to evaluate interest rate risk: net interest income simulation and economic value of equity ("EVE"). In addition, interest rate gap is reviewed to monitor asset and liability repricing over various time periods.

Net Interest Income Simulation:

Management utilizes net interest income simulation models to estimate the near-term effects of changing interest rates on its net interest income. Net interest income simulation involves forecasting net interest income under a variety of scenarios, including the level of interest rates and the shape of the yield curve. Management exercises its best judgment in making assumptions regarding events that management can influence, such as non-contractual deposit re-pricings, and events outside management's control, such as customer behavior on loan and deposit activity and the effect that competition has on both loan and deposit pricing. These assumptions are subjective and, as a result, net interest income simulation results will differ from actual results due to the timing, magnitude and frequency of interest rate changes, changes in market conditions, customer behavior and management strategies, among other factors. We perform various sensitivity analyses on assumptions of deposit attrition and deposit re-pricing.

The following table presents the anticipated effect on net interest income over a twelve month period if short- and long-term interest rates were to sustain an immediate increase of 100 basis points and 200 basis points:

	Immediate Change in Rates	
	+100	+200
(dollars in thousands)		
March 31, 2016		
Dollar change	\$1,058	\$2,874
Percent change	1.1 %	3.0 %
December 31, 2015		
Dollar change	\$636	\$1,616
Percent change	0.7 %	1.7 %

As of March 31, 2016, 39.8% of the Company's earning asset balances will reprice or are expected to pay down in the next twelve months, and 46.2% of the Company's deposit balances are low cost or no cost deposits.

Economic Value of Equity:

Management also uses EVE to measure risk in the balance sheet that might not be taken into account in the net interest income simulation analysis. Net interest income simulation highlights exposure over a relatively short time period, while EVE analysis incorporates all cash flows over the estimated remaining life of all balance sheet positions. The valuation of the balance sheet, at a point in time, is defined as the discounted present value of asset cash flows minus the discounted present value of liability cash flows. EVE analysis addresses only the current balance sheet and does not incorporate the run-off replacement assumptions that are used in the net interest income simulation model. As with the net interest income simulation model, EVE analysis is based on key assumptions about the timing and variability of balance sheet cash flows and does not take into account any potential responses by management to anticipated changes in interest rates.

Interest Rate Gap:

The interest rate gap is the difference between interest-earning assets and interest-bearing liabilities re-pricing within a given period and represents the net asset or liability sensitivity at a point in time. An interest rate gap measure could be significantly affected by external factors such as loan prepayments, early withdrawals of deposits, changes in the correlation of various interest-bearing instruments, competition, or a rise or decline in interest rates.

Item 4. Controls and Procedures.

Disclosure Controls and Procedures

Under supervision and with the participation of certain members of our management, including our chief executive officer and chief financial officer, we completed an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of March 31, 2016. Based on this evaluation, our chief executive officer and chief financial officer have concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report with respect to timely communication to them and other members of management responsible for preparing periodic reports of material information required to be disclosed in this report as it relates to the Company and our consolidated subsidiaries.

The effectiveness of our or any system of disclosure controls and procedures is subject to certain limitations, including the exercise of judgment in designing, implementing, and evaluating the controls and procedures, the assumptions used in identifying the likelihood of future events, and the inability to eliminate misconduct completely. As a result, there can be no assurance that our disclosure controls and procedures will prevent all errors or fraud or ensure that all material information will be made known to appropriate management in a timely fashion. By their nature, our or any system of disclosure controls and procedures can provide only reasonable assurance regarding management's control objectives.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Special Cautionary Note Regarding Forward-Looking Statements

This report contains certain "forward-looking statements" within the meaning of such term in the Private Securities Litigation Reform Act of 1995. We and our representatives may, from time to time, make written or oral statements that are "forward-looking" and provide information other than historical information. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results to be materially different from any results, levels of activity, performance or achievements expressed or implied by any forward-looking statement. These factors include, among other things, the factors listed below.

Forward-looking statements, which may be based upon beliefs, expectations and assumptions of our management and on information currently available to management, are generally identifiable by the use of words such as "believe", "expect", "anticipate", "should", "could", "would", "plans", "intend", "project", "estimate", "forecast", "may" or similar expressions. Forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those expressed in, or implied by, these statements. Readers are cautioned not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Additionally, we undertake no obligation to update any statement in light of new information or future events, except as required under federal securities law.

Our ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors that could have an impact on our ability to achieve operating results, growth plan goals and future prospects include, but are not limited to, the following:

- credit quality deterioration or pronounced and sustained reduction in real estate market values could cause an increase in our allowance for credit losses and a reduction in net earnings;
- our management's ability to reduce and effectively manage interest rate risk and the impact of interest rates in general on the volatility of our net interest income;
- changes in the economic environment, competition, or other factors that may affect our ability to acquire loans or influence the anticipated growth rate of loans and deposits and the quality of the loan portfolio and loan and deposit pricing;
- fluctuations in the value of our investment securities;
- governmental monetary and fiscal policies;
- legislative and regulatory changes, including changes in banking, securities and tax laws and regulations and their application by our regulators (particularly with respect to the Dodd-Frank Act and the extensive regulations

promulgated and to be promulgated thereunder, as well as the Basel III Rules and changes in the scope and cost of FDIC insurance and other coverages);

the ability to attract and retain key executives and employees experienced in banking and financial services;

the sufficiency of the allowance for loan losses to absorb the amount of actual losses inherent in our existing loan portfolio;

55

Table of Contents

our ability to adapt successfully to technological changes to compete effectively in the marketplace;

credit risks and risks from concentrations (by geographic area and by industry) within our loan portfolio;

the effects of competition from other commercial banks, thrifts, mortgage banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds, and other financial institutions operating in our markets or elsewhere or providing similar services;

the failure of assumptions underlying the establishment of allowances for loan losses and estimation of values of collateral and various financial assets and liabilities;

the risks of mergers, including, without limitation, the related time and costs of implementing such transactions, integrating operations as part of these transactions and possible failures to achieve expected gains, revenue growth and/or expense savings from such transactions;

volatility of rate-sensitive deposits;

operational risks, including data processing system failures or fraud;

asset/liability matching risks and liquidity risks;

the costs, effects and outcomes of existing or future litigation;

changes in general economic or industry conditions, nationally or in the communities in which we conduct business;

changes in accounting policies and practices, as may be adopted by state and federal regulatory agencies and the FASB;

cyber-attacks; and

other factors and risks described under “Risk Factors” in our Annual Report on Form 10-K for the period ended December 31, 2015.

We qualify all of our forward-looking statements by the foregoing cautionary statements. Because of these risks and other uncertainties, our actual future results, performance or achievement, or industry results, may be materially different from the results indicated by these forward-looking statements. In addition, our past results of operations are not necessarily indicative of our future results.

Table of Contents

PART II – OTHER INFORMATION

Item 1. Legal Proceedings.

The Company and its subsidiaries are from time to time parties to various legal actions arising in the normal course of business. We believe that there are no threatened or pending proceedings, other than ordinary routine litigation incidental to the Company's business, against the Company or its subsidiaries or of which any of their property is the subject, which, if determined adversely, would have a material adverse effect on the business or financial condition of the Company.

Item 1A. Risk Factors.

There have been no material changes from the risk factors set forth in Part I, Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the period ended December 31, 2015. Please refer to that section of our Form 10-K for disclosures regarding the risks and uncertainties related to our business.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Issuer Purchases of Equity Securities

We did not repurchase any of our equity securities during the first quarter of 2016.

On July 17, 2014, the board of directors of the Company approved a new share repurchase program, allowing for the repurchase of up to \$5.0 million of stock through December 31, 2016. The new repurchase program replaced the Company's prior repurchase program, pursuant to which the Company had repurchased approximately \$3.7 million of common stock since January 1, 2013. Pursuant to the program, the Company may continue to repurchase shares from time to time in the open market, and the method, timing and amounts of repurchase will be solely in the discretion of the Company's management. The repurchase program does not require the Company to acquire a specific number of shares. Therefore, the amount of shares repurchased pursuant to the program will depend on several factors, including market conditions, capital and liquidity requirements, and alternative uses for cash available. Of the \$5.0 million of stock authorized under the repurchase plan, \$3.8 million remained available for possible future repurchases as of March 31, 2016.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not Applicable.

Item 5. Other Information.

None.
