

MDU RESOURCES GROUP INC

Form 8-K

May 05, 2015

MDU Resources Reports First Quarter Earnings

Significantly warmer weather across service territories reduces utility business reported earnings to \$29.8 million.

Construction materials group narrows seasonal loss with 38 percent improvement in first quarter results, best performance since 2007.

Construction services and construction materials groups have nearly \$1 billion combined backlog.

Pipeline group commenced operations at Dakota Prairie refinery, first U.S. refinery built in nearly 40 years.

Utility group has record five-year capital investment program, which is expected to result in 11 percent compound annual growth rate in rate base.

BISMARCK, N.D. - May 4, 2015 - MDU Resources Group, Inc. (NYSE:MDU) today reported first quarter consolidated adjusted earnings of \$22.8 million, or 12 cents per share, compared to \$35.6 million, or 19 cents per share for the first quarter of 2014. On a GAAP basis the company reported a loss of \$306.1 million, or \$1.57 per share, compared to first quarter 2014 earnings of \$56.5 million, or 30 cents per share. GAAP results reflect a \$315.3 million after-tax noncash write-down of oil and natural gas properties pertaining to a quarterly ceiling test.

"We remain positive about our long-term growth potential despite not being satisfied with our first quarter results," said David L. Goodin, president and CEO of MDU Resources Group. "We have record capital investment opportunities at the utility and pipeline businesses, a refinery that is now in production, clear momentum at our construction materials business along with increasing bidding opportunities at our construction services business and a combined backlog of nearly \$1 billion.

"Several factors impacted our results for the quarter when compared to last year including weather, which was a significant factor with our utility operations experiencing some of the warmest weather on record. We continue to expect this business to grow substantially over time with the investment opportunities ahead. At Dakota Prairie refinery, we experienced additional startup costs and going forward, now that the plant is on line, we will have associated revenues. We also sold some underperforming non-strategic assets at construction services and, based on recent additional information, had a true up to an estimated liability we recorded at year-end 2014 for a specific multi-employer pension plan withdrawal liability at our construction materials business."

The Dakota Prairie diesel refinery, the first greenfield refinery built in the United States since 1976, recently commenced operations. The facility has begun producing diesel fuel and is expected to begin sales of diesel as the plant ramps up during May. The refinery is a joint venture with Calumet Specialty Products Partners and is designed to process 20,000 barrels of oil per day.

"The refinery adds a much-needed supply of diesel to the local market," Goodin said. "We are excited this facility is now on line. This is one of the many projects we have, along with our planned \$3.9 billion, five-year capital budget that includes record levels for our utility and our pipeline and energy services businesses, which provides us a clear path forward to grow MDU Resources."

Because of the company's strategic decision to market the exploration and production business, in this release adjusted earnings are defined as results from its utility, pipeline and energy services and construction businesses. Adjusted earnings exclude results from its exploration and production business. GAAP earnings and GAAP earnings guidance are all-in. Consolidated adjusted earnings are a non-GAAP measure. For an explanation of non-GAAP earnings adjustments, see the Reconciliation of GAAP to Adjusted Earnings and the Use of Non-GAAP Financial Measures sections in this press release.

Business Unit Results

The utility business reported earnings of \$29.8 million. Significantly warmer weather across its service territory during the winter heating season resulted in a \$6.6 million earnings effect, including a 14 percent decrease in natural gas sales as well as a slight decline in electric sales. The company's natural gas business is non-weather normalized in five of its eight states of operation. The utility experienced increased operating and maintenance costs as a result of a planned outage at the Big Stone generating plant. Earnings were positively affected by the implementation of the environmental cost recovery rider and the electric generation resource recovery rider in North Dakota. In addition to an advance determination of prudence filing with the NDPSC related to the \$200 million Thunder Spirit Wind project, the utility group has natural gas rate case filings pending in three jurisdictions and has plans to file three more. Three electric rate case filings are also planned.

The pipeline and energy services business posted earnings of \$4.0 million. Results include a \$1.9 million after tax increase in the company's portion of startup costs related to the Dakota Prairie refinery. Absent these costs, earnings would have been up \$1.6 million, or 33 percent, over last year. The business experienced a 30 percent increase in total transportation volumes on its pipeline system, driven by strong growth of off-system transportation volumes. Earnings also benefited from increased rates that went into effect in May 2014 the result of a favorable rate case settlement. Gathering and processing volumes at the Pronghorn facilities, in which the company owns a 50 percent interest, increased but were largely offset by lower processing rates.

The construction materials business had its best first quarter since 2007 narrowing its seasonal loss compared to first quarter last year by 38 percent as a result of favorable weather that allowed an early start of the construction season. The business experienced higher construction revenues and margins and higher aggregate and ready-mix concrete margins and volumes. The construction services group experienced decreased workloads in first quarter when compared to last year's record quarterly earnings, largely the result of the closing out of several stronger-margin large projects a year ago. Although backlog is lower at construction services than a year ago, backlog is higher than it was at year-end, and the group has strong bidding opportunities and anticipates success in adding backlog in the near term. In addition, construction materials results reflect a \$1.5 million charge after tax for a multi-employer pension plan withdrawal liability true up related to the same plan for which an

estimate was recorded in the fourth quarter 2014. Construction services results include a \$1.4 million expense after tax associated with underperforming non-strategic assets sold in the quarter.

The company continues to monitor market conditions to determine an appropriate time to begin the marketing and sale process of Fidelity Exploration & Production Company.

Reiterating 2015 Guidance

"Despite our first quarter challenges some of which could impact the remainder of 2015, we continue to be confident in our 2015 adjusted earnings guidance range of \$1.05 to \$1.20," said Goodin. Adjusted earnings per share guidance includes results from its utility, pipeline and energy services and construction businesses and excludes results for its exploration and production business.

GAAP results are expected to be a loss per share in the range of 65 cents to 80 cents for 2015 including the first quarter ceiling test impairment and excluding any future potential ceiling test impairments. GAAP earnings and GAAP earnings guidance are all-in.

The company will host a webcast at 10 a.m. EDT Tuesday, May 5, to discuss first quarter 2015 results. The event can be accessed at www.mdu.com. Webcast and audio replays will be available. The dial-in number for audio replay is 855-859-2056, or 404-537-3406 for international callers, conference ID 12424597.

About MDU Resources

MDU Resources Group, Inc., a member of the S&P MidCap 400 index, provides value-added natural resource products and related services that are essential to energy and transportation infrastructure, including regulated utilities and pipelines, construction materials and services, and exploration and production. For more information about MDU Resources, see the company's website at www.mdu.com or contact the Investor Relations Department at investor@mduresources.com.

Performance Summary and Future Outlook

The following information highlights the key growth strategies, projections and certain assumptions for the company and its subsidiaries and other matters for each of the company's businesses. Many of these highlighted points are "forward-looking statements." There is no assurance that the company's projections, including estimates for growth and changes in earnings, will in fact be achieved. Please refer to assumptions contained in this section, as well as the various important factors listed at the end of this document under the heading "Risk Factors and Cautionary Statements that May Affect Future Results." Changes in such assumptions and factors could cause actual future results to differ materially from growth and earnings projections.

Adjusted Earnings by Segment

Business Line	First Quarter 2015 Adjusted Earnings (In millions)	First Quarter 2014 Adjusted Earnings
Regulated		
Electric and natural gas utilities	\$29.8	\$38.3
Pipeline and energy services	4.0	4.3
Construction materials and services	(9.8)(7.0
Other and eliminations	(1.2)—
Adjusted earnings*	\$22.8	\$35.6

* Excludes exploration and production

Reconciliation of GAAP to Adjusted Earnings

	First Quarter 2015 Earnings (In millions, except per share amounts)	First Quarter 2014 Earnings
Earnings (loss) per share	\$(1.57)\$.30
Earnings (loss) on common stock	\$(306.1)\$56.5
Adjustment net of tax:		
Exploration and production loss (earnings)	328.9	(20.9
Adjusted earnings	\$22.8	\$35.6
Adjusted earnings per share	\$.12	\$.19

On a consolidated basis, the following information highlights the key strategies, projections and certain assumptions for the company:

Adjusted earnings per share for 2015 are projected in the range of \$1.05 to \$1.20. Adjusted earnings excludes the effects of the exploration and production segment.

GAAP guidance for 2015 is a loss per share in the range of 65 cents to 80 cents. GAAP guidance includes the first quarter ceiling test impairment and excludes any future potential ceiling test impairments related to lower commodity prices. Given the current oil and natural gas pricing environment, the company believes it is likely it will have additional noncash ceiling test write-downs of its oil and natural gas properties in 2015. The quarterly ceiling test considers many factors including reserves, capital expenditure estimates and trailing 12-month average prices. Securities and Exchange Commission Defined Prices for each quarter of the previous 12 months were as follows:

SEC Defined Prices for 12 months ended	NYMEX Oil Price (per Bbl)	Henry Hub Gas Price (per MMBtu)	Ventura Gas Price (per MMBtu)
March 31, 2015	\$ 82.72	\$ 3.87	\$ 3.96
Dec. 31, 2014	\$ 94.99	\$ 4.34	\$ 7.71
Sept. 30, 2014	\$ 99.08	\$ 4.24	\$ 7.60
June 30, 2014	\$ 100.27	\$ 4.10	\$ 7.47

The company's long-term compound annual growth goals on adjusted earnings per share from operations are in the range of 7 to 10 percent.

The company continually seeks opportunities to expand through organic growth opportunities and strategic acquisitions.

The company focuses on creating value through vertical integration between its business units.

Estimated capital expenditures for 2015 through 2019 are noted in the following table:

Capital Expenditures

Business Line	2015 Estimated	2016 Estimated	2017 Estimated	2015 - 2019 Total Estimated
	(In millions)			
Regulated				
Electric	\$315	\$172	\$177	\$1,027
Natural gas distribution	162	191	158	754
Pipeline and energy services*	88	423	336	1,098
Construction				
Construction materials and contracting	50	206	123	639
Construction services	27	82	72	347
Other	5	4	2	14
Exploration and production**	108	—	—	108
Net proceeds and other	(79)	(4)	(7)	(111)
Total capital expenditures	\$676	\$1,074	\$861	\$3,876

* Capital expenditure projections include the company's proportionate share of Dakota Prairie Refining.

** Future exploration and production capital expenditures are dependent upon the timing of marketing and sale. Sale proceeds for the business are excluded from capital expenditure projections.

Cascade	78	% 100	%
Intermountain	84	% 96	%

* Degree days are a measure of the daily temperature-related demand for energy for heating.

The combined utility businesses reported earnings of \$29.8 million in the first quarter of 2015, compared to \$38.3 million for the same period in 2014. This decrease reflects warmer weather effects of \$6.6 million resulting in lower natural gas and electric retail sales volumes. Also contributing were higher operation and maintenance expense, largely contract services, as well as higher depreciation, depletion and amortization expense and interest expense, items that are included for potential recovery in rate cases. Partially offsetting these decreases were increased electric retail sales margins, primarily due to rate recovery on electric generation and environmental upgrades.

The following information highlights the key growth strategies, projections and certain assumptions for this segment:

Rate base growth is projected to be approximately 11 percent compounded annually over the next five years, including plans for an approximate \$1.8 billion gross capital investment program with \$477 million planned for 2015. Although a prolonged period of lower commodity prices may slow Bakken-area growth in the future, the company continues to see strong current growth with increases of 4.4 percent in electric customer counts and 3.6 percent in natural gas customers in the first quarter compared to a year ago in this area.

Regulatory actions

Completed Cases:

July 10 the North Dakota Public Service Commission approved recovery of \$8.6 million annually effective July 15 to reflect actual costs incurred through February 2014 and projected costs through June 2015 for an environmental cost recovery rider related to costs resulting from the retrofit required to be installed at the Big Stone Station. The company's share of the cost for the installation is approximately \$90 million and is expected to be complete in 2015.

The commission had earlier approved advance determination of prudence for recovery of costs on the system.

Aug. 11 the company filed an application with the Montana Public Service Commission for a natural gas rate increase of approximately \$3.0 million annually, or 3.6 percent. The requested increase includes costs associated with the increased investment in facilities and associated depreciation, taxes and operation and maintenance expenses. An interim increase of \$2.0 million annually was approved and implemented for service effective Feb. 6 subject to refund. A settlement has been reached with the consumer counsel stipulating a \$2.5 million annual increase and the commission approved the stipulated increase April 28.

Nov. 14 the company filed an application with the NDPSC for approval to implement the rate adjustment associated with the electric generation resource recovery rider previously approved by the commission. The rider was established to recover costs associated with new generation such as the Heskett III 88-MW natural gas combustion turbine. The commission approved rate adjustments of \$5.3 million annually, which were implemented Jan. 9.

Pending Cases:

Oct. 3 the company filed an application with the Wyoming Public Service Commission for a natural gas rate increase of approximately \$788,000 annually, or 4.1 percent above current rates. The requested increase includes the costs associated with the increased investment in facilities and associated depreciation, taxes and operation and maintenance expenses. The company and the consumer advocacy group filed a stipulation agreement that resolved all issues between the parties for an increase of \$501,000 annually. A hearing is scheduled for May 19.

Dec. 22 the company filed for advanced determination of prudence with the NDPSC on the Thunder Spirit Wind project. A hearing is scheduled for May 14. The company recently signed an agreement to purchase the project, which includes 43 wind turbines totaling 107.5 MW of electric generation at a cost of approximately \$200 million with approximately \$55 million already funded in 2014. The project is being developed by ALLETE Clean Energy with an expected completion in December 2015.

Feb. 6 the company filed an application with the NDPSC for a natural gas rate increase of approximately \$4.3 million annually, or 3.4 percent above current rates. The requested increase includes costs associated with the increased investment in facilities and associated depreciation, taxes and operation and maintenance expenses. An interim increase of \$4.3 million annually was implemented for service effective April 7, subject to refund. A hearing is scheduled for July 20.

March 31 the company filed an application with the Oregon Public Utility Commission for a natural gas rate increase of approximately \$3.6 million, or 5.1 percent above current rates. The requested increase includes costs associated with the increased investment in facilities and associated depreciation, taxes and operation and maintenance expenses, as well as environmental remediation expenses.

April 10 the company filed an update with the NDPSC to the environmental cost recovery rider for a total of \$8.1 million for new rates effective July 1, 2015 through June 30, 2016. The requested recovery includes costs for the Big Stone and Lewis and Clark station environmental upgrades.

Expected Filings:

The company expects to file electric rate cases in Montana, South Dakota and Wyoming and natural gas rate cases in Washington, Minnesota and South Dakota.

Investments of approximately \$60 million are being made to serve the growing electric and natural gas customer base associated with the Bakken oil development where customer growth is higher than the national average. This reflects a slightly lower capital expenditure level compared to 2014, anticipating a tempering of economic activity due to recent lower oil prices.

The company, along with a partner, expects to build a 345-kV transmission line from Ellendale, North Dakota, to Big Stone City, South Dakota, about 160 miles. The company's share of the cost is estimated at approximately \$170 million. The project is a Midcontinent Independent System Operator multivalued project. A route application was filed in August 2013 with the state of South Dakota and in October 2013 with the state of North Dakota. A route permit was approved July 10 in North Dakota and Aug. 13 in South Dakota. The South Dakota route permit was appealed and a district court ruled in favor of the project. The district court decision has been appealed to the South Dakota Supreme Court. The company continues to expect the project to be completed in 2019.

The company is pursuing additional generation projects to meet projected capacity requirements, including 19 MW of natural gas generation at the Lewis & Clark Station to be in service later this year.

The company is analyzing potential projects for accommodating load growth in its industrial and agricultural sectors, with company- and customer-owned pipelines designed to serve existing facilities utilizing fuel oil or propane, and to serve new customers.

The company is involved with a number of pipeline projects to enhance the reliability and deliverability of its system in the Pacific Northwest and Idaho.

Pipeline and Energy Services

	Three Months Ended	
	March 31,	2014
	2015	
	(Dollars in millions)	
Operating revenues	\$46.4	\$61.9
Operating expenses:		
Purchased natural gas sold	6.5	26.2
Cost of crude oil	2.3	—
Operation and maintenance	20.2	16.8
Depreciation, depletion and amortization	8.7	7.1
Taxes, other than income	3.5	3.1
	41.2	53.2
Operating income	5.2	8.7
Earnings	\$4.0	\$4.3
Transportation volumes (MMdk)	68.0	52.5
Natural gas gathering volumes (MMdk)	9.4	9.5
Customer natural gas storage balance (MMdk):		
Beginning of period	14.9	26.7
Net withdrawal	(7.7)(16.3
End of period	7.2	10.4

This segment reported earnings of \$4.0 million in the first quarter of 2015, compared to \$4.3 million for the same period in 2014. The earnings decrease reflects \$1.9 million after tax of additional startup expenses related to the company's portion of the Dakota Prairie refinery and lower storage services earnings. These decreases were largely offset by higher transportation rates, primarily resulting from a rate case settlement where new rates went into effect May 1, 2014, and higher transportation volumes.

The following information highlights the key growth strategies, projections and certain assumptions for this segment:

The company, in conjunction with Calumet Specialty Products Partners, L.P., formed Dakota Prairie Refining, LLC, to develop, build and operate a 20,000-barrel-per-day refinery in southwestern North Dakota. Construction began on the facility in late March 2013 and operations have commenced. The facility has begun producing diesel fuel and is expected to begin sales of diesel as the plant ramps up during May. The refinery processes Bakken crude into diesel, which is marketed within the Bakken region. Other byproducts, naphtha and atmospheric tower bottoms, are being transported to other areas. The total project cost is estimated to be approximately \$425 million to \$435 million. EBITDA for the first full year of operation is projected to be in the range of \$60 million to \$80 million, to be shared equally with Calumet.

The company is evaluating the construction of a second 20,000-barrel-per-day refinery to be located near Minot, North Dakota, in the Bakken region. The company expects economic evaluation of this project to continue through much of 2015.

The company continues work on acquiring easements as well as filing its application for its planned Wind Ridge Pipeline project, a 95-mile natural gas pipeline designed to deliver approximately 90 million cubic feet per day to an announced fertilizer plant near Spiritwood, North Dakota. The project is estimated to cost approximately \$120 million, with an in-service date in 2017. There is an opportunity to expand this pipeline's capacity to serve other customers in eastern North Dakota.

The company has entered into an agreement with an anchor shipper to construct a pipeline to connect the Demicks Lake gas processing plant in northwestern North Dakota to deliver natural gas into a new interconnect with the Northern Border Pipeline. Project costs are estimated to be \$50 million to \$60 million.

The company continues to pursue new growth opportunities and expansion of existing facilities and services offered to customers. The company expects energy development to continue to grow long term within its geographic region, most notably in the Bakken area, where the company owns an extensive natural gas pipeline system. The company plans to invest \$1.1 billion of capital related to ongoing energy and industrial development over the next five years.

Construction

Construction Materials and Contracting

	Three Months Ended March 31,	
	2015	2014
	(Dollars in millions)	
Operating revenues	\$206.6	\$168.5
Operating expenses:

Loss	\$(14.6)	\$(23.6)
Sales (000's):		
Aggregates (tons)	3,566	2,829
Asphalt (tons)	232	184
Ready-mixed concrete (cubic yards)	576	497

Construction Services

	Three Months Ended March 31,	
	2015	2014
	(In millions)	
Operating revenues	\$247.1	\$273.6
Operating expenses:		
Operation and maintenance	225.0	234.0
Depreciation, depletion and amortization	3.3	3.2
Taxes, other than income	10.0	10.2
	238.3	247.4
Operating income	8.8	26.2
Earnings	\$4.8	\$16.6

The combined construction businesses reported a loss of \$9.8 million in the first quarter of 2015, compared to a loss of \$7.0 million for the same period in 2014. The increased loss reflects decreased construction workloads and margins in the Western region at the services group and a \$1.4 million expense after tax associated with the sale of underperforming non-strategic assets at construction services. Also, based on recent additional information, results were impacted by a \$1.5 million charge after tax for a true up to an estimated liability recorded at year-end 2014 for a specific multi-employer pension plan withdrawal liability at our construction materials business. Partially offsetting these decreases were higher construction revenues and margins due to favorable weather and increased aggregate and ready-mixed concrete margins and volumes at the materials group.

The following information highlights the key growth strategies, projections and certain assumptions for the construction segments:

The construction materials approximate work backlog as of March 31 was \$664 million, compared to \$653 million a year ago. Private work represents 10 percent of construction backlog and public work represents 90 percent of backlog. The March 31 approximate backlog at construction services was \$321 million, compared to \$397 million a year ago. The backlogs include a variety of projects such as highway grading, paving and underground projects, airports, bridge work, subdivisions, substation and line construction, solar and other commercial, institutional and industrial projects including petrochemical work.

Projected revenues included in the company's 2015 earnings guidance are in the range of \$1.7 billion to \$1.9 billion for construction materials and \$1.1 billion to \$1.3 billion for construction services.

The company anticipates margins in 2015 to be higher at construction materials and slightly lower at construction services compared to 2014 margins.

The company continues to pursue opportunities for expansion in energy projects such as petrochemical, transmission, substations, utility services, solar, wind towers and geothermal. Initiatives are aimed at capturing additional market share and expanding into new markets.

As the country's fifth-largest sand and gravel producer, the company will continue to strategically manage its 1.1 billion tons of aggregate reserves in all its markets, as well as take further advantage of being vertically integrated.

Exploration and Production

	\$12.88	\$16.98

Notes:

- Oil includes crude oil and condensate; natural gas liquids are reflected separately.
- Results are reported in barrel of oil equivalents based on a 6:1 ratio.

This segment reported a loss of \$6.6 million for the first quarter of 2015, excluding the effects of a \$315.3 million after-tax noncash write-down and a \$7.0 million unrealized commodity derivative loss, compared to earnings of \$25.2 million for the same period in 2014, excluding the effect of a \$4.3 million unrealized commodity derivative loss. This decrease reflects 56 percent lower average realized oil and natural gas liquids prices, 65 percent lower average realized gas prices and 25 percent lower oil production. Partially offsetting these decreases were higher realized commodity derivative adjustments and lower production taxes, lease operating expenses, depreciation, depletion and amortization expense, and general and administrative expense. This segment recorded a GAAP loss of \$328.9 million in the first quarter of 2015, compared to earnings of \$20.9 million for the same period last year.

The following information highlights the key strategies, projections and certain assumptions for this segment:

The company intends to market and sell its exploration and production company and although an actual sale date is unknown, for forecasting purposes the company is assuming a sale transaction after 2015.

During 2015, the company plans to continue to focus on maximizing the value of the company to market it for sale, including focusing on lowering its cost structure beyond the 25 percent general and administrative cost reduction already in place.

The company expects to spend approximately \$108 million in gross capital expenditures in 2015, operating within projected cash flows. The company currently has no rigs drilling on its operated properties and anticipates commencing drilling in the second half of this year.

Key activities for 2015 include:

Commissioning and startup of the gas gathering and processing facilities in the Paradox Basin.

Fracture stimulate two wells and drill new wells in the Paradox Basin.

Completion of a backlog of wells in the non-operated Powder River Basin.

Completion of 2014 activity carryover in the Bakken.

Drilling of additional horizontal wells in East Texas is currently not planned in this low natural gas price environment.

Operational updates:

The Cane Creek Unit 28-3 well (100 percent working interest) completed in mid-December and slowly ramped up to about 600 BOPD, has continued to flow 600 BOPD on an 11/64ths inch choke at a current flowing tubing pressure of approximately 1,790 psi.

Commissioning of the Blues Hills natural gas plant in the Paradox field began in late January with first gas sales occurring March 10. Commissioning of the plant is expected to be completed by the end of May.

Per unit lease operating costs in the first quarter of 2015 were 15 percent lower than costs for the same time period in 2014 after adjusting for 2014 asset divestments. Lower operating costs have been achieved through reductions in costs of services as well as optimization of production operations.

The company is projecting a 2015 net loss of approximately \$30 million to \$40 million excluding the first quarter ceiling test impairment and any potential future ceiling test impairments. Annual oil production is expected to decline approximately 27 percent in 2015 primarily due to 2014 divestments in the Bakken and limited oil-related investments in 2015. Annual natural gas and natural gas liquids volumes are estimated to decrease 10 percent and 27 percent, respectively, in 2015, primarily the result of 2014 asset divestments in South Texas. The December 2015 oil production rate is estimated to decrease 20 percent compared to December 2014, while natural gas and natural gas liquids rates are estimated to decrease 5 percent and 3 percent, respectively. The company is assuming average NYMEX index prices for May through December 2015 of \$54.50 per barrel of crude oil, \$2.83 per Mcf of natural gas and \$21.94 per barrel of natural gas liquids.

Derivatives in place as of May 3 include:

For April through June 2015, 7,000 BOPD of swaps at a weighted average price of \$53.21, and a 1,500 BOPD costless collar with a floor/ceiling of \$50.00/\$57.50.

For July through September 2015, 6,000 BOPD at a weighted average price of \$55.78.

For October through December 2015, 6,000 BOPD at a weighted average price of \$58.61.

For April through December 2015, 10,000 MMBtu of natural gas per day at a weighted average price of \$4.28.

Other

	Three Months Ended

	2015	
	(In millions)	
Operating revenues	\$2.1	\$2.1
Operating expenses:		
Operation and maintenance	.8	1.2
Depreciation, depletion and amortization	.5	.6
	1.3	1.8
Operating income	.8	.3
Earnings (loss)	\$(.3))\$.3

Earnings decreased \$600,000, primarily the result of a foreign currency translation loss including effects of the sale of the company's remaining interest in the Brazilian Transmission Lines.

Use of Non-GAAP Financial Measures

The company, in addition to presenting its earnings information in conformity with Generally Accepted Accounting Principles (GAAP), has provided non-GAAP earnings data that reflect adjustments to exclude:

Three months ended March 31, 2015 and 2014:

• Exploration and production loss of \$328.9 million and earnings of \$20.9 million in 2015 and 2014, respectively.

Twelve months ended March 31, 2015:

• Exploration and production loss of \$253.1 million.

• A multiemployer pension plan withdrawal liability of \$8.4 million after tax recorded in fourth quarter 2014.

Twelve months ended March 31, 2014:

• Exploration and production earnings of \$95.1 million.

• A net benefit related to natural gas gathering operations litigation of \$1.5 million after tax.

• Natural gas gathering asset impairment of \$9.0 million after tax.

The company believes that these non-GAAP financial measures are useful to investors because the items excluded are not indicative of the company's continuing operating results. Also, the company's management uses these non-GAAP financial measures as indicators for planning and forecasting future periods. The presentation of this additional information is not meant to be considered a substitute for financial measures prepared in accordance with GAAP.

Risk Factors and Cautionary Statements that May Affect Future Results

The information in this release includes certain forward-looking statements, including earnings per share guidance and statements by the president and CEO of MDU Resources, within the meaning of Section 21E of the Securities Exchange Act of 1934. Although the company believes that its expectations are based on reasonable assumptions, actual results may differ materially. Following are important factors that could cause actual results or outcomes for the company to differ materially from those discussed in forward-looking statements.

The company's exploration and production and pipeline and energy services businesses are dependent on factors, including commodity prices and commodity price basis differentials, that are subject to various external influences that cannot be controlled.

Actual quantities of recoverable oil, natural gas liquids and natural gas reserves and discounted future net cash flows from those reserves may vary significantly from estimated amounts. There is a risk that changes in estimates of proved reserve quantities or other factors including low oil and natural gas prices, could result in future noncash write-downs of the company's oil and natural gas properties.

The regulatory approval, permitting, construction, startup and/or operation of power generation facilities may involve unanticipated events or delays that could negatively impact the company's business and its results of operations and cash flows.

The operation of Dakota Prairie refinery may involve unanticipated events or delays that could negatively impact the company's business and its results of operations and cash flows.

Economic volatility affects the company's operations, as well as the demand for its products and services and the value of its investments and investment returns including its pension and other postretirement benefit plans, and may have a negative impact on the company's future revenues and cash flows.

The company relies on financing sources and capital markets. Access to these markets may be adversely affected by factors beyond the company's control. If the company is unable to obtain economic financing in the future, the company's ability to execute its business plans, make capital expenditures or pursue acquisitions that the company may otherwise rely on for future growth could be impaired. As a result, the market value of the company's common stock may be adversely affected. If the company issues a substantial amount of common stock it could have a dilutive effect on its existing shareholders.

The company is exposed to credit risk and the risk of loss resulting from the nonpayment and/or nonperformance by the company's customers and counterparties.

The backlogs at the company's construction materials and contracting and construction services businesses are subject to delay or cancellation and may not be realized.

The company's operations are subject to environmental laws and regulations that may increase costs of operations, impact or limit business plans, or expose the company to environmental liabilities.

Initiatives to reduce greenhouse gas emissions could adversely impact the company's operations.

The company is subject to government regulations that may delay and/or have a negative impact on its business and its results of operations and cash flows. Statutory and regulatory requirements also may limit another party's ability to acquire the company.

Weather conditions can adversely affect the company's operations, and revenues and cash flows.

Competition is increasing in all of the company's businesses.

The company could be subject to limitations on its ability to pay dividends.

- An increase in costs related to obligations under multiemployer pension plans could have a material negative effect on the company's results of operations and cash flows.

The company's operations may be negatively impacted by cyber attacks or acts of terrorism.

While the company plans to market and sell its exploration and production business, there is no assurance that it will be successful.

Other factors that could cause actual results or outcomes for the company to differ materially from those discussed in forward-looking statements include:

Acquisition, disposal and impairments of assets or facilities.

Changes in operation, performance and construction of plant facilities or other assets.

Changes in present or prospective generation.

The ability to obtain adequate and timely cost recovery for the company's regulated operations through regulatory proceedings.

The availability of economic expansion or development opportunities.

Population growth rates and demographic patterns.

Market demand for, available supplies of, and/or costs of, energy- and construction-related products and services.

The cyclical nature of large construction projects at certain operations.

Changes in tax rates or policies.

Unanticipated project delays or changes in project costs, including related energy costs.

Unanticipated changes in operating expenses or capital expenditures.

Labor negotiations or disputes.

Inability of the various contract counterparties to meet their contractual obligations.

Changes in accounting principles and/or the application of such principles to the company.

Changes in technology.

Changes in legal or regulatory proceedings.

The ability to effectively integrate the operations and the internal controls of acquired companies.

The ability to attract and retain skilled labor and key personnel.

Increases in employee and retiree benefit costs and funding requirements.

For a further discussion of these risk factors and cautionary statements, refer to Item 1A – Risk Factors in the company’s most recent Form 10-K and Form 10-Q.
