FORM 10-Q

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington D.C. 20549

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended

March 31, 2013

OR

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number 0-12379

FIRST FINANCIAL BANCORP.

(Exact name of registrant as specified in its charter)

Ohio

(State or other jurisdiction of  
incorporation or organization)

31-1042001

(I.R.S. Employer  
Identification No.)

255 East Fifth Street, Suite 700

Cincinnati, Ohio

(Address of principal executive offices)

45202

(Zip Code)

Registrant's telephone number, including area code (877) 322-9530

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Edgar Filing: FIRST FINANCIAL BANCORP /OH/ - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of Exchange Act).  
Yes  No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at May 6, 2013
Common stock, No par value	57,852,390

FIRST FINANCIAL BANCORP. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
MARCH 31, 2013  
(Unaudited)

The consolidated financial statements for interim periods are unaudited; however, in the opinion of the management of First Financial Bancorp. (First Financial or the Company), all material adjustments (consisting of only normal recurring adjustments) necessary for a fair presentation have been included.

NOTE 1: BASIS OF PRESENTATION

The Consolidated Financial Statements of First Financial, a bank holding company, principally serving Ohio, Indiana and Kentucky, include the accounts and operations of First Financial and its wholly-owned subsidiary – First Financial Bank, N.A. (First Financial Bank or the Bank). All significant intercompany transactions and accounts have been eliminated in consolidation. Certain reclassifications of prior periods' amounts have been made to conform to the current period's presentation and had no effect on net earnings.

The preparation of financial statements in conformity with U.S. Generally Accepted Accounting Principles (GAAP) requires management to make estimates, assumptions and judgments that affect the amounts reported in the Consolidated Financial Statements and accompanying Notes. Actual realized amounts could differ materially from those estimates.

These interim financial statements have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X and serve to update the First Financial Bancorp. Annual Report on Form 10-K (Form 10-K) for the year ended December 31, 2012. These interim financial statements may not include all information and notes necessary to constitute a complete set of financial statements under GAAP applicable to annual periods and accordingly should be read in conjunction with the financial information contained in the Form 10-K. Management believes these unaudited consolidated financial statements reflect all adjustments of a normal recurring nature which are necessary for a fair presentation of the results for the interim periods presented. The results of operations for the interim periods are not necessarily indicative of the results that may be expected for the full year or any other interim period. The Consolidated Balance Sheet as of December 31, 2012, has been derived from the audited financial statements in the Company's 2012 Form 10-K.

NOTE 2: RECENTLY ADOPTED AND ISSUED ACCOUNTING STANDARDS

In December 2011, the FASB issued an update (ASU 2011-11, Disclosures About Offsetting Assets and Liabilities) which creates new disclosure requirements about the nature of an entity's rights of offset and related arrangements associated with its financial instruments and derivative instruments. These disclosure requirements are required for recognized financial and derivative instruments that are offset in accordance with the guidance in FASB ASC Topic 210-20-45, Balance Sheet - Offsetting - Other Presentation Matters, FASB ASC Topic 815-10-45, Derivatives and Hedging - Other Presentation Matters, or are subject to an enforceable master netting arrangement or similar agreement. Subsequently, the FASB issued ASU 2013-01, Scope Clarification of Disclosures about Offsetting Assets and Liabilities, which limits the scope of ASU 2011-11 to derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and lending transactions. Companies are required to disclose information to enable users of its financial statements to evaluate the effect or potential effect of netting arrangements on its financial position, including the effect or potential effect of rights of set-off associated with certain financial instruments and derivative instruments. The provisions of ASU 2011-11 became effective for the interim reporting period ended March 31, 2013. For further detail, see Note 6 - Derivatives.

In July 2012, the FASB issued an update (ASU 2012-02, Intangibles—Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment) which allows an entity testing an indefinite-lived intangible asset for impairment the option of performing a qualitative assessment before calculating the fair value of the asset. This update also addresses circumstances that a company should consider in interim periods, but does not remove the requirement for testing of indefinite-lived intangible assets for impairment annually and between annual tests if there is a change in events and circumstances. The provisions of ASU 2012-02 became effective for the interim reporting period ended March 31, 2013 and did not have a material impact on the Company's Consolidated Financial Statements.

In October 2012, the FASB issued an update (ASU 2012-06, Business Combinations (Topic 805): Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution) which clarifies the applicable guidance for subsequently measuring an indemnification asset recognized as a result of a government-assisted acquisition of a financial institution. When a company recognizes an indemnification asset as a result of a government-assisted acquisition of a financial institution and subsequently a change in the cash flows expected to be

Table of Contents

collected on the indemnification asset occurs (as a result of a change in cash flows expected to be collected on the assets subject to indemnification), the company should subsequently account for the change in the measurement of the indemnification asset on the same basis as the change in the assets subject to indemnification. Any amortization of changes in value should be limited to the contractual term of the indemnification agreement (that is, the lesser of the term of the indemnification agreement and the remaining life of the indemnified assets). The provisions of ASU 2012-06 became effective for the interim reporting period ended March 31, 2013 and did not have a material impact on the Company's Consolidated Financial Statements.

On February 5, 2013, the FASB issued an update (ASU 2013-02, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income (AOCI)) which requires preparers to report in one place information about reclassifications out of AOCI. The ASU also requires companies to report changes in AOCI balances and expands the disclosure requirements in FASB ASC Topic 220, Comprehensive Income (ASC 220), for presentation of changes in AOCI. This ASU requires companies to disaggregate the total change of each component of other comprehensive income and separately present (1) reclassification adjustments and (2) current-period OCI. ASU 2013-02 also requires companies to present information about significant items reclassified out of AOCI by component either (1) on the face of the statement where net income is presented or (2) as a separate disclosure in the notes to the financial statements. The provisions of ASU 2013-02 became effective for the interim reporting period ended March 31, 2013. For further detail, see Note 14 - Accumulated Other Comprehensive Income (Loss).

NOTE 3: GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill. Assets and liabilities of acquired entities are recorded at their estimated fair values as of the acquisition date. The excess cost of the acquisition over the fair value of net assets acquired is recorded as goodwill. Goodwill is not amortized, but is measured for impairment on an annual basis as of October 1 of each year or whenever events or changes in circumstances indicate that the fair value of a reporting unit may be below its carrying value. First Financial performed its annual impairment test as of October 1, 2012 and no impairment was indicated. As of March 31, 2013, no events or changes in circumstances indicated that the fair value of a reporting unit was below its carrying value. First Financial had goodwill of \$95.1 million as of March 31, 2013 and December 31, 2012.

Other intangible assets. Other intangible assets consist primarily of core deposit intangibles. Core deposit intangibles are recorded at their estimated fair value as of the acquisition date and are then amortized on an accelerated basis over their estimated useful lives. Core deposit intangibles were \$6.9 million and \$7.4 million as of March 31, 2013 and December 31, 2012, respectively. First Financial's core deposit intangibles have an estimated weighted average remaining life of 7.6 years. Amortization expense recognized on intangible assets for the three months ended March 31, 2013 and 2012, was \$0.4 million and \$0.5 million, respectively.

NOTE 4: COMMITMENTS AND CONTINGENCIES

In the normal course of business, First Financial offers a variety of financial instruments with off-balance-sheet risk to its clients to assist them in meeting their requirements for liquidity and credit enhancement. These financial instruments include standby letters of credit and outstanding commitments to extend credit. GAAP does not require these financial instruments to be recorded in the Consolidated Financial Statements.

First Financial's exposure to credit loss, in the event of nonperformance by the other party to the financial instrument for standby letters of credit, and outstanding commitments to extend credit, is represented by the contractual amounts of those instruments. First Financial uses the same credit policies in issuing commitments and conditional obligations as it does for credit instruments recorded on the Consolidated Balance Sheets.

Letters of credit. These transactions are conditional commitments issued by First Financial to guarantee the performance of a client to a third party. First Financial's portfolio of standby letters of credit consists primarily of performance assurances made on behalf of clients who have a contractual commitment to produce or deliver goods or services. The risk to First Financial arises from its obligation to make payment in the event of the client's contractual default to produce the contracted good or service to a third party. First Financial has issued letters of credit (including standby letters of credit) aggregating \$14.9 million and \$14.8 million at March 31, 2013, and December 31, 2012, respectively. Management conducts regular reviews of these instruments on an individual client basis.

Loan commitments. Commitments to extend credit are agreements to lend to a client as long as there is no violation of any condition established in the commitment. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. First Financial evaluates each client's

Table of Contents

creditworthiness on an individual basis. The amount of collateral obtained, if deemed necessary by First Financial upon extension of credit, is based on management's credit evaluation of the client. The collateral held varies, but may include securities, real estate, inventory, plant or equipment. First Financial had commitments outstanding to extend credit totaling \$1.3 billion at March 31, 2013, and \$1.2 billion at December 31, 2012.

First Financial utilizes the allowance for loan and lease losses methodology to maintain a reserve that it considers sufficient to absorb probable losses inherent in standby letters of credit and outstanding loan commitments and records the reserve within Accrued interest and other liabilities on the Consolidated Balance Sheets.

Contingencies/Litigation. First Financial and its subsidiaries are engaged in various matters of litigation, other assertions of improper or fraudulent loan practices or lending violations and other matters from time to time, and have a number of unresolved claims pending. Additionally, as part of the ordinary course of business, First Financial and its subsidiaries are parties to litigation involving claims to the ownership of funds in particular accounts, the collection of delinquent accounts, challenges to security interests in collateral and foreclosure interests, that is incidental to our regular business activities. While the ultimate liability with respect to these other litigation matters and claims cannot be determined at this time, First Financial believes that damages, if any, and other amounts relating to pending matters are not probable or cannot be reasonably estimated as of March 31, 2013. Reserves are established for these various matters of litigation, when appropriate under FASB ASC Topic 450, Contingencies, based in part upon the advice of legal counsel.

## NOTE 5: INVESTMENTS

The following is a summary of held-to-maturity and available-for-sale investment securities as of March 31, 2013:

(Dollars in thousands)	Held-to-Maturity				Available-for-Sale			
	Amortized Cost	Unrealized Gain	Unrealized Loss	Market Value	Amortized Cost	Unrealized Gain	Unrealized Loss	Market Value

Total	\$280,435	\$(1,895)	\$25,513	\$(405)	\$305,948	\$(2,300)

Gains and losses on debt securities are generally due to higher current market yields relative to the yields of the debt securities at their amortized cost. All securities with unrealized losses are reviewed quarterly to determine if any impairment is considered other than temporary, requiring a write-down to fair market value. First Financial considers the percentage loss on a security, duration of the loss, average life or duration of the security, credit rating of the security, and payment performance as well as the Company's intent and ability to hold the security to maturity when determining whether any impairment is other than temporary. At this time First Financial does not intend to sell, and it is not more likely than not that the Company will be required to sell debt securities temporarily impaired prior to maturity or recovery of book value. First Financial had no other than temporary impairment expense for the three months ended March 31, 2013 or the year ended December 31, 2012.

For further detail on the fair value of investment securities, see Note 13 – Fair Value Disclosures.

**NOTE 6: DERIVATIVES**

First Financial uses derivative instruments, including interest rate caps, floors and swaps, to meet the needs of its clients while managing the interest rate risk associated with certain transactions. First Financial does not use derivatives for speculative purposes.

While authorized to use a variety of derivative products, First Financial primarily utilizes interest rate swaps as a means to offer borrowers credit-based products that meet their needs and may from time to time utilize interest rate swaps to manage the

9

---

Table of Contents

macro interest rate risk profile of the Company. The interest rate swap agreements establish the basis on which interest rate payments are exchanged with counterparties referred to as the notional amount.

The following table summarizes the notional values of derivative financial instruments utilized by First Financial by the nature of the underlying asset or liability:

(Dollars in thousands)	March 31, 2013	December 31, 2012
Fair value hedges		
Instruments associated with loans	\$912,689	\$935,493

As only interest rate payments are exchanged, the cash requirements and credit risk associated with interest rate swaps are significantly less than the notional amount and the Company's credit risk exposure is limited to the market value of the instruments. First Financial manages the market value credit risk associated with counterparties through counterparty credit policies. These policies require the Company to maintain a total derivative notional position of less than 35% of assets, total credit exposure of less than 3% of capital and no single counterparty credit risk exposure greater than \$20.0 million. The Company is currently well below all single counterparty and portfolio limits. At March 31, 2013, the Company had a total counterparty notional amount outstanding of approximately \$497.6 million, spread among eight counterparties, with an outstanding liability from these contracts of \$22.8 million. At December 31, 2012, the Company had a total counterparty notional amount outstanding of approximately \$509.1 million, spread among eight counterparties, with an outstanding liability from these contracts of \$26.0 million.

First Financial's exposure to credit loss, in the event of nonperformance by a borrower, is limited to the market value of the derivative instrument associated with that borrower. First Financial monitors its derivative credit exposure to borrowers through the normal credit review processes the Company performs on all borrowers. Additionally, the Company monitors derivative credit risk exposure related to problem loans through the Company's allowance for loan and lease losses committee. First Financial considers the market value of a derivative instrument to be part of the carrying value of the related loan for these purposes as the borrower is contractually obligated to pay First Financial this amount in the event the derivative contract is terminated.

The following table summarizes the derivative financial instruments utilized by First Financial and their balances:

(Dollars in thousands)	Balance Sheet Classification	March 31, 2013			December 31, 2012		
		Notional amount	Estimated fair value		Notional amount	Estimated fair value	
			Gain	Loss		Gain	Loss
Fair value hedges							
Pay fixed interest rate swaps with counterparty	Accrued interest and other liabilities	\$12,501	\$0	\$(1,302)	\$12,739	\$0	\$(1,445)
Matched interest rate swaps with borrower	Accrued interest and other assets	450,094	21,444	(113)	461,377	24,135	0
Matched interest rate swaps with counterparty	Accrued interest and other liabilities	450,094	113	(22,224)	461,377	0	(24,978)
Total		\$912,689	\$21,557	\$(23,639)	\$935,493	\$24,135	\$(26,423)

In connection with its use of derivative instruments, from time to time First Financial and its counterparties are required to post cash collateral to offset the market position of the derivative instruments. First Financial maintains the right to offset these derivative positions with the collateral posted against them by or with the relevant counterparties. First Financial classifies the derivative cash collateral outstanding with its counterparties as an adjustment to the fair

value of the derivative contracts within Accrued interest and other assets or Accrued interest and other liabilities in the Consolidated Balance Sheets.

---

Table of Contents

The following table discloses the gross and net amounts of liabilities recognized in the Consolidated Balance Sheets:

(Dollars in thousands)	March 31, 2013			December 31, 2012		
	Gross amounts of recognized liabilities	Gross amounts offset in the Consolidated Balance Sheets	Net amounts of liabilities presented in the Consolidated Balance Sheets	Gross amounts of recognized liabilities	Gross amounts offset in the Consolidated Balance Sheets	Net amounts of liabilities presented in the Consolidated Balance Sheets
Fair value hedges						
Pay fixed interest rate swaps with counterparty	\$1,302	\$ (723 )	\$ 579	\$1,445	\$ (669 )	\$ 776
Matched interest rate swaps with counterparty	22,337	(21,833 )	504	24,978	(23,057 )	1,921
Total	\$23,639	\$ (22,556 )	\$ 1,083	\$26,423	\$ (23,726 )	\$ 2,697

The following table details the derivative financial instruments, the average remaining maturities and the weighted-average interest rates being paid and received by First Financial at March 31, 2013:

(Dollars in thousands)	Notional amount	Average maturity (years)	Fair value	Weighted-average rate		
				Receive	Pay	
Asset conversion swaps						
Pay fixed interest rate swaps with counterparty	\$12,501	3.3	\$(1,302 )	2.29	6.82	%
Receive fixed, matched interest rate swaps with borrower	450,094	4.3	21,331	5.04	2.95	%
Pay fixed, matched interest rate swaps with counterparty	450,094	4.3	(22,111 )	2.95	5.04	%
Total asset conversion swaps	\$912,689	4.3	\$(2,082 )	3.97	4.03	%

The accounting for changes in the fair value of derivatives depends on the intended use of the derivative instrument and the resulting designation. Derivatives used to hedge the exposure to changes in the fair value of an asset, liability or firm commitment attributable to a particular risk, such as interest rate risk, are considered fair value hedges. Derivatives used to hedge the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges.

**Fair Value Hedges.** First Financial utilizes interest rate swaps designated as fair value hedges as a means to offer commercial borrowers products that meet their needs, but are also designed to achieve First Financial's desired interest rate risk profile. First Financial accomplishes this by entering into swap agreements with commercial borrowers and simultaneously entering into offsetting swap agreements, with substantially matching terms, with institutional counterparties. These interest rate swap agreements generally involve the receipt by First Financial of floating rate amounts from counterparties in exchange for payments to these counterparties by First Financial of fixed rate amounts received from commercial borrowers over the life of the agreements. These interest rate swap agreements do not involve an exchange of the underlying principal or notional amount. This results in First Financial's loan customers receiving fixed rate funding, while providing First Financial with a floating rate asset. First Financial's matched interest rate swaps economically hedge offsetting "receive fixed" and "pay fixed" exposures, but do not qualify for hedge accounting.

The net interest receivable or payable on matched interest rate swaps is accrued and recognized as an adjustment to the interest income of the hedged item. The fair value of matched interest rate swaps is included within Accrued interest and other assets and Accrued interest and other liabilities on the Consolidated Balance Sheets.

For the unmatched, pay fixed interest rate swaps, which qualify for hedge accounting, the corresponding fair-value adjustment is included on the Consolidated Balance Sheets in the carrying value of the hedged item. The net interest receivable or payable on unmatched interest rate swaps is accrued and recognized as an adjustment to the interest income of the hedged item. Derivative gains and losses not considered effective in hedging the change in fair value of the hedged item, if any, are recognized in income immediately.

Table of Contents

The following table details the location and amounts recognized for fair value hedges:

(Dollars in thousands)		Location of change in fair value		Decrease to Interest income	
				Three months ended	
Derivatives in fair value hedging relationships				March 31,	
				2013	2012
Interest rate contracts					
Loans	Interest income - loans			\$(142 )	\$(196 )
Total				\$(142 )	\$(196 )

Cash Flow Hedges. First Financial utilizes interest rate swaps designated as cash flow hedges to manage the variability of cash flows, primarily net interest income, attributable to changes in interest rates. The net interest receivable or payable on an interest rate swap designated as a cash flow hedge is accrued and recognized as an adjustment to interest income or interest expense. The fair value of interest rate swaps is included within accrued interest and other liabilities on the Consolidated Balance Sheets. Changes in the fair value of interest rate swaps are included in accumulated other comprehensive income (loss). Derivative gains and losses not considered effective in hedging the cash flows related to the hedged items, if any, are recognized in income immediately.

In 2012, First Financial executed a cash flow hedge utilizing an interest rate swap to hedge against interest rate volatility on \$35.0 million of floating rate interest-bearing deposits indexed to the U.S. Federal Funds Target Rate. This interest rate swap involves the receipt by First Financial of variable-rate interest amounts in exchange for fixed-rate interest payments by First Financial for a period of 7 years and does qualify for hedge accounting. Accrued interest and other liabilities included \$0.1 million at March 31, 2013 and \$0.2 million at December 31, 2012 reflecting the fair value of this cash flow hedge.

**NOTE 7: BORROWINGS**

Short-term borrowings on the Consolidated Balance Sheets include repurchase agreements utilized for corporate sweep accounts with cash management account agreements in place as well as overnight advances from the Federal Loan Home Bank (FHLB). All repurchase agreements are subject to terms and conditions of repurchase/security agreements between First Financial Bank and the client. To secure the Bank's liability to the client, First Financial Bank is authorized to sell or repurchase U. S. Treasury, government agency and mortgage-backed securities.

First Financial had \$502.2 million in short-term borrowings with the FHLB at March 31, 2013 and \$502.0 million as of December 31, 2012. These short-term borrowings are used to manage the Company's normal liquidity needs and support the Company's asset and liability management strategies.

Long-term debt primarily consists of FHLB long-term advances and repurchase agreements utilizing investment securities pledged as collateral. These instruments are primarily utilized to reduce overnight liquidity risk and to mitigate interest rate sensitivity on the Consolidated Balance Sheets. First Financial has \$65.0 million in repurchase agreements which have remaining maturities of less than 3 years and a weighted average rate of 3.50%. Securities pledged as collateral in conjunction with the repurchase agreements are included within Investment securities available-for-sale on the Consolidated Balance Sheets.

The following is a summary of long-term debt:

(Dollars in thousands)	March 31, 2013		December 31, 2012		
	Amount	Average Rate	Amount	Average Rate	
Federal Home Loan Bank	\$8,724	3.74	% \$9,427	3.74	%

Edgar Filing: FIRST FINANCIAL BANCORP /OH/ - Form 10-Q

National Market Repurchase Agreement	65,000	3.50	% 65,000	3.50	%
Capital loan with municipality	774	0.00	% \$775	0.00	%
Total long-term debt	\$74,498	3.50	% \$75,202	3.49	%

Under Federal Reserve Board guidelines, a company can issue qualifying debentures up to 25% of qualifying Tier I capital. First Financial has the capacity to issue approximately \$159.7 million in additional qualifying debentures under these guidelines.

Table of Contents

NOTE 8: LOANS - EXCLUDING COVERED LOANS

First Financial offers clients a variety of commercial and consumer loan and lease products with various interest rates and payment terms. Lending activities are primarily concentrated in Ohio, Indiana and Kentucky, where the Bank currently operates banking centers. Additionally, First Financial provides equipment and leasehold improvement financing for franchisees in the quick service and casual dining restaurant sector throughout the United States.

**Credit Quality.** To facilitate the monitoring of credit quality for commercial loans, and for purposes of determining an appropriate allowance for loan and lease losses, First Financial utilizes the following categories of credit grades:

**Pass** - Higher quality loans that do not fit any of the other categories described below.

**Special Mention** - First Financial assigns a Special Mention rating to loans and leases with potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or lease or in First Financial's credit position at some future date.

**Substandard** - First Financial assigns a substandard rating to loans or leases that are inadequately protected by the current sound financial worth and paying capacity of the borrower or of the collateral pledged, if any. Substandard loans and leases have well-defined weaknesses that jeopardize repayment of the debt. Substandard loans and leases are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not addressed.

**Doubtful** - First Financial assigns a doubtful rating to loans and leases with all the attributes of a substandard rating with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors that may work to the advantage and strengthening of the credit quality of the loan or lease, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition or liquidation procedures, capital injection, perfecting liens on additional collateral and refinancing plans.

The credit grades described above, which are derived from standard regulatory rating definitions, are assigned upon initial approval of credit to borrowers and updated periodically thereafter.

First Financial considers repayment performance as the best indicator of credit quality for consumer loans. Consumer loans that have principal and interest payments that are past due by ninety days or more are generally classified as nonperforming. Additionally, consumer loans that have been modified in a troubled debt restructuring (TDR) are classified as nonperforming unless such loans have a sustained period of repayment performance of six months or greater and are reasonably assured of repayment in accordance with the restructured terms.

Table of Contents

Commercial and consumer credit exposure by risk attribute was as follows:

As of March 31, 2013

(Dollars in thousands)	Commercial	Real Estate Construction	Commercial	Total

Total	\$12,367	\$5,411	\$41,660	\$59,438	\$3,119,626	\$3,179,064	\$212

Nonaccrual. Loans are classified as nonaccrual when, in the opinion of management, collection of principal or interest is doubtful or when principal or interest payments are ninety days or more past due. Generally, loans are placed in nonaccrual status due to the continued failure to adhere to contractual payment terms by the borrower coupled with other pertinent factors, such as insufficient collateral value. The accrual of interest income is discontinued and previously accrued, but unpaid interest is reversed when a loan is placed on nonaccrual status. Any payments received while a loan is on nonaccrual status are applied as a reduction to the carrying value of the loan. A loan may be placed back on accrual status if all contractual payments have been received and collection of future principal and interest payments is no longer doubtful.

Troubled Debt Restructurings. A loan modification is considered a TDR when two conditions are met: 1) the borrower is experiencing financial difficulty and 2) concessions are made by the Company that would not otherwise be considered for a borrower with similar credit characteristics. The most common types of modifications include interest

rate reductions, maturity extensions and modifications to principal amortization including interest only structures. Modified terms are dependent upon the financial position and needs of the individual borrower. If the modification agreement is violated, the loan is handled by the Company's credit administration group for resolution, which may result in foreclosure in the case of real estate.

TDRs are generally classified as nonaccrual for a minimum period of six months and may qualify for return to accrual status once they have demonstrated performance with the terms of the loan modification.

Table of Contents

First Financial had 198 TDRs totaling \$35.1 million at March 31, 2013, including \$12.8 million on accrual status and \$22.3 million classified as nonaccrual. First Financial had \$2.7 million of commitments outstanding to lend additional funds to borrowers whose loan terms have been modified through TDRs. At March 31, 2013, the allowance for loan and lease losses included reserves of \$4.2 million related to TDRs. For the three months ended March 31, 2013, First Financial charged off \$0.9 million for the portion of TDRs determined to be uncollectible. Additionally, at March 31, 2013, approximately \$4.9 million of the accruing TDRs have been performing in accordance with the restructured terms for more than one year.

First Financial had 145 TDRs totaling \$25.0 million at December 31, 2012, including \$10.9 million of loans on accrual status and \$14.1 million classified as nonaccrual. First Financial had \$3.5 million of commitments outstanding to lend additional funds to borrowers whose loan terms have been modified through TDRs. At December 31, 2012, the allowance for loan and lease losses included reserves of \$3.0 million related to TDRs. For the year ended December 31, 2012, First Financial charged off \$7.2 million for the portion of TDRs determined to be uncollectible. At December 31, 2012, approximately \$2.7 million of the accruing TDRs had been performing in accordance with the restructured terms for more than one year.

The following tables provide information on loan modifications classified as TDRs during the three months ended March 31, 2013 and 2012.

(Dollars in thousands)	Three months ended March 31, 2013			March 31, 2012		
	Number of loans	Pre-modification loan balance	Period end balance	Number of loans	Pre-modification loan balance	Period end balance
Commercial	6	\$ 7,568	\$7,561	8	\$ 4,505	\$4,496
Real estate - construction	0	0	0	0	0	0
Real estate - commercial	4	1,592	1,588	6	3,840	3,817
Real estate - residential	21	1,373	1,320	0	0	0
Installment	8	138	130	0	0	0
Home equity	24	801	798	0	0	0
Total	63	\$ 11,472	\$11,397	14	\$ 8,345	\$8,313

The following table provides information on how TDRs were modified during the three months ended March 31, 2013 and 2012.

(Dollars in thousands)	Three months ended March 31, <sup>(2)</sup>	
	2013	2012
Extended maturities	\$8,481	\$6,854
Adjusted interest rates	568	0
Combination of rate and maturity changes	98	95
Forbearance	0	1,143
Other <sup>(1)</sup>	2,250	221
Total	\$11,397	\$8,313

(1) Other includes covenant modifications and other concessions or combination of concessions that do not consist of interest rate adjustments, forbearance, and maturity extensions.

(2) Balances are as of period end.

First Financial considers repayment performance as an indication of the effectiveness of the Company's loan modifications. A borrower that is ninety days or more past due on any principal or interest payments for a TDR, or who prematurely terminates a restructured loan agreement without satisfying the contractual principal balance (for

example, in a deed-in-lieu arrangement), is considered to be in payment default of the terms of the TDR agreement.

Table of Contents

The following table provides information on TDRs for which there was a payment default during the period that occurred within twelve months of the loan modification:

(Dollars in thousands)	March 31,	Period End Balance	2012	Period End Balance
	2013		Number of Loans

Total interest included in income	315	292
Net impact on interest income	\$807	\$1,038
Commitments outstanding to borrowers with nonaccrual loans	\$2,691	\$0

Table of Contents

First Financial individually reviews all impaired commercial loan relationships greater than \$250,000, as well as consumer loan TDRs greater than \$100,000, to determine if a specific allowance based on the borrower's overall financial condition, resources and payment record, support from guarantors and the realizable value of any collateral is necessary. Specific allowances are based on expected cash flows, discounted using the loan's initial effective interest rate or the fair value of the collateral for certain collateral dependent loans.

First Financial's investment in impaired loans was as follows:

	As of March 31, 2013				
(Dollars in thousands)	Current Balance	Contractual Principal Balance	Related Allowance	Average Current Balance	YTD Interest Income Recognized
Loans with no related allowance recorded

OREO. Other real estate owned (OREO) is comprised of properties acquired by the Company through the loan foreclosure or repossession process, or other resolution activity that results in partial or total satisfaction of problem loans. The acquired properties are recorded at the lower of cost or fair value less estimated costs of disposal (net realizable value) upon acquisition. Losses arising at the time of acquisition of such properties are charged against the allowance for loan and lease losses. Subsequent write-downs in the carrying value of OREO properties are expensed as incurred. Improvements to the properties may be capitalized if the improvements contribute to the overall value of the property, but may not be capitalized in excess of the net realizable value of the property.

Table of Contents

Changes in OREO were as follows:

(Dollars in thousands)	Three months ended	
	March 31,	
	2013	2012
Balance at beginning of period	\$12,526	\$11,317

Residential	297	25
Total write-downs	702	983
Balance at end of period	\$11,993	\$15,036

## NOTE 9: COVERED LOANS

Loans acquired in Federal Deposit Insurance Corporation (FDIC)-assisted transactions initially covered under loss sharing agreements whereby the FDIC will reimburse First Financial for the majority of any losses incurred are referred to as covered loans. Pursuant to the terms of the loss sharing agreements, covered loans are subject to a stated loss threshold, as outlined in each loss sharing agreement, whereby the FDIC will reimburse First Financial for 80% of losses up to a stated loss threshold, and 95% of losses in excess of the threshold. First Financial will reimburse the FDIC for its share of recoveries with respect to losses for which the FDIC paid First Financial a reimbursement under the loss sharing agreement. The FDIC's obligation to reimburse First Financial for losses with respect to covered loans began with the first dollar of loss incurred.

First Financial accounts for the majority of covered loans under FASB ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality, except loans with revolving privileges, which are outside the scope of this guidance, and loans for which cash flows could not be estimated, which are accounted for under the cost recovery method. Loans accounted for under FASB ASC Topic 310-30 are referred to as purchased impaired loans.

Purchased impaired loans are not classified as nonperforming assets as the loans are considered to be performing under FASB ASC Topic 310-30. Therefore, interest income, through accretion of the difference between the carrying value of the loans and the expected cash flows (accretable difference) is recognized on all covered purchased impaired loans.

Table of Contents

The following table reflects the carrying value of all covered purchased impaired and nonimpaired covered loans:

(Dollars in thousands)	March 31, 2013			December 31, 2012		
	Loans accounted for under FASB ASC Topic 310-30	Loans excluded from FASB ASC Topic 310-30	Total purchased loans	Loans accounted for under FASB ASC Topic 310-30	Loans excluded from FASB ASC Topic 310-30	Total purchased loans
	Commercial	\$83,262	\$7,162	\$90,424	\$94,775	\$7,351
Real estate - construction	9,866	0	9,866	10,631	0	10,631
Real estate - commercial	419,177	6,773	425,950	458,066	7,489	465,555
Real estate - residential	95,991	0	95,991	100,694	0	100,694
Installment	6,938	702	7,640	7,911	763	8,674
Home equity	1,706	53,315	55,021	2,080	55,378	57,458
Other covered loans	0	2,906	2,906	0	2,978	2,978
Total covered loans	\$616,940	\$70,858	\$687,798	\$674,157	\$73,959	\$748,116

The balance of all loans accounted for under FASB ASC Topic 310-30, including all contractual principal, interest, fees and penalties, was \$1.0 billion and \$1.1 billion as of March 31, 2013 and December 31, 2012, respectively. These balances include \$237.0 million and \$220.4 million of contractual interest not yet accrued as of March 31, 2013 and December 31, 2012, respectively.

Changes in the carrying amount of accretable difference for covered purchased impaired loans were as follows:

(Dollars in thousands)	Three months ended March 31,	
	2013	2012
Balance at beginning of period	\$224,694	\$344,410
Reclassification from nonaccretable difference	7,751	14,384
Accretion	(17,947 )	(25,919 )
Other net activity <sup>(1)</sup>	(5,828 )	(19,206 )
Balance at end of period	\$208,670	\$313,669

(1) Includes the impact of loan repayments and charge-offs.

First Financial regularly reviews its forecast of expected cash flows for covered purchased impaired loans. The Company recognized improvement in the cash flow expectations related to certain loan pools resulting in the reclassification from nonaccretable to accretable difference during the first quarter of 2013 of \$7.8 million. Similarly, the Company reclassified \$14.4 million from nonaccretable to accretable difference during the first quarter of 2012. These reclassifications resulted in yield adjustments on the related loan pools on a prospective basis. The Company also recognized declines in the cash flow expectations of certain loan pools. Any decline in expected cash flows for a pool of loans is considered impairment and recorded as provision expense, and a related allowance for loan and lease losses on covered loans, on a discounted basis during the period. Improved cash flow expectations for loan pools that were impaired during prior periods is first recorded as a reversal of previously recorded impairment and then as an increase in prospective yield when all previously recorded impairment has been recaptured. For further detail on impairment and provision expense related to covered purchased impaired loans, see "Covered Loans" in Note 10 - Allowance for Loan and Lease Losses.

Table of Contents

Credit Quality. For further discussion of First Financial's monitoring of credit quality for commercial and consumer loans, including discussion of the risk attributes noted below, please see Note 8 - Loans, excluding covered loans.

Covered commercial and consumer credit exposure by risk attribute was as follows:

Total	\$794	\$1,619	\$9,721	\$12,134	\$61,825	\$73,959	\$31

Nonaccrual. Covered purchased impaired loans are classified as performing, even though they may be contractually past due, as any nonpayment of contractual principal or interest is considered in the periodic re-estimation of expected cash flows and is included in the resulting recognition of current period covered loan loss provision or prospective yield adjustments.

Similar to uncovered loans, covered loans accounted for outside FASB ASC Topic 310-30 are classified as nonaccrual when, in the opinion of management, collection of principal or interest is doubtful or when principal or interest payments are 90 days or more past due. Generally, these loans are placed on nonaccrual status due to the continued failure to adhere to contractual payment terms by the borrower coupled with other pertinent factors, such as insufficient collateral value. The accrual of interest income is discontinued and previously accrued, but unpaid interest is reversed when a loan is placed in nonaccrual status. Any payments received while a loan is in nonaccrual status are applied as a reduction to the carrying value of the loan. A loan may be returned to accrual status if all contractual payments have been received and collection of future principal and interest payments is no longer doubtful.

Information on covered nonaccrual loans was as follows:

(Dollars in thousands)	March 31, 2013	December 31, 2012
Nonaccrual loans		
Commercial	\$2,097	\$4,498
Real estate-commercial	1,282	2,986

All other	11	11	0	13	0
Total	\$11,722	\$13,147	\$0	\$8,698	\$85

Covered OREO. Covered OREO is comprised of properties acquired by the Company through the loan foreclosure or repossession process, or other resolution activities that result in partial or total satisfaction of problem covered loans. These properties remain subject to loss sharing agreements whereby the FDIC reimburses First Financial for the majority of any losses incurred. The acquired properties are recorded at the lower of cost or fair value upon acquisition. Losses arising at the time of acquisition of such properties are charged against the allowance for loan and lease losses. Subsequent write-downs in the carrying value of covered OREO properties are expensed as incurred. Estimated reimbursements due from the FDIC under loss sharing agreements related to any losses upon acquisition or subsequent write-downs in the carrying value of covered OREO are recorded as noninterest income and an increase to the FDIC indemnification asset in the same period. Improvements to the properties may be capitalized if the improvements contribute to the overall value of the property, but may not be capitalized in excess of the net realizable value of the property.

Table of Contents

Changes in covered OREO were as follows:

Balance at end of period	\$29,345	\$41,489

## NOTE 10: ALLOWANCE FOR LOAN AND LEASE LOSSES

Loans - excluding covered loans. For each reporting period, management maintains the allowance for loan and lease losses at a level that it considers sufficient to absorb probable loan and lease losses inherent in the portfolio.

Management determines the adequacy of the allowance based on historical loss experience as well as other significant factors such as composition of the portfolio, economic conditions, geographic footprint, the results of periodic internal and external evaluations of delinquent, nonaccrual and classified loans and any other adverse situations that may affect a specific borrower's ability to repay (including the timing of future payments). This evaluation is inherently subjective as it requires utilizing material estimates that may be susceptible to significant change.

In the commercial portfolio, which includes commercial loans, construction and commercial real estate loans and lease financing, impaired loan relationships greater than \$250,000 are evaluated to determine the need for a specific allowance based on the borrower's overall financial condition, resources and payment record, support from guarantors and the realizable value of any collateral. Loans are considered impaired when, in the judgment of management, based on current information and events, it is probable that all amounts due according to the contractual terms of the loan agreement will not be collected.

The allowance for non-impaired commercial loans and impaired commercial loan relationships less than \$250,000 includes a process of estimating the probable losses inherent in the portfolio by category, based on First Financial's internal system of credit risk ratings and historical loss data. These estimates may also be adjusted for management's estimate of probable losses on specific loan types dependent upon trends in the values of the underlying collateral, delinquent and nonaccrual loans, prevailing economic conditions, changes in lending strategies and other influencing factors.

With the exception of loans modified as TDRs, consumer loans are evaluated by loan type (i.e. residential real estate, installment, etc.), as these loans exhibit homogeneous characteristics. The allowance for consumer loans, which includes residential real estate, installment, home equity, credit card loans and overdrafts, is established by estimating losses inherent in each particular category of consumer loans. The estimate of losses is primarily based on historical loss rates for each category, as well as trends in delinquent and nonaccrual loans, prevailing economic conditions and

other significant influencing factors. Consumer loans modified as TDRs greater than \$100,000 are individually reviewed to determine if a specific allowance is necessary.

There were no material changes to First Financial's accounting policies or methodology related to the allowance for loan and lease losses during the first three months of 2013, however certain modifications were made to the estimation process in the third quarter of 2012 to place greater emphasis on quantitative factors such as historical loan losses and less emphasis on qualitative factors. This resulted in a shift in the allocation of the allowance between certain consumer and commercial loan types but had no significant impact on the total allowance for loan and lease losses at March 31, 2013.

Table of Contents

The allowance is increased by provisions charged to expense and decreased by actual charge-offs, net of recoveries of amounts previously charged-off. First Financial's policy is to charge-off all or a portion of a loan when, in management's opinion, it is unlikely to collect the principal amount owed in full either through payments from the borrower or from the liquidation of collateral.

Changes in the allowance for loan and lease losses for the previous five quarters are presented in the table that follows:

(Dollars in thousands)	Three Months Ended					
	2013 Mar. 31,	2012 Dec. 31,	Sep. 30,	June 30,	Mar. 31,

Covered Loans. In accordance with the accounting guidance for business combinations, there was no allowance brought forward on covered loans as any credit deterioration evident in the loans at the time of acquisition was included in the determination of the fair value of the loans at the acquisition date.

The majority of covered loans are accounted for under FASB ASC Topic 310-30, whereby First Financial is required to periodically re-estimate the expected cash flows on the loans. For purposes of applying the guidance under FASB ASC Topic 310-30, First Financial grouped acquired loans into pools based on common risk characteristics.

Generally, a decline in expected cash flows for a pool of loans is referred to as impairment and recorded as provision expense, and a related allowance for loan and lease losses on covered loans, on a discounted basis during the period. Estimated reimbursements due from the FDIC under loss sharing agreements related to any declines in expected cash

flows for a pool of loans are recorded as noninterest income and an increase to the FDIC indemnification asset in the same period. Improvement in expected cash flows for a pool of loans, once any previously recorded impairment is recaptured, is recognized prospectively as an adjustment to the yield on the loans in the pool and a related adjustment to the yield on the FDIC indemnification asset.

First Financial performs periodic valuation procedures to re-estimate the expected cash flows on covered loans accounted for under FASB ASC Topic 310-30 and compare the present value of expected cash flows to the carrying value of the loans at the pool level. In order to estimate expected cash flows, First Financial specifically reviews a sample of these covered loans to assist in the determination of appropriate probability of default and loss given default assumptions to be applied to the remainder of the portfolio. The estimate of expected cash flows may also be adjusted for management's estimate of probable losses on specific loan types dependent upon trends in observable market and industry data, such as prepayment speeds and collateral values. These cash flow evaluations are inherently subjective as they require material estimates, all of which may be susceptible to significant change.

First Financial updated the valuations related to covered loans during the first quarter of 2013, and as a result of impairment in certain loan pools, recognized total provision expense of \$9.0 million and realized net charge-offs of \$8.7 million during the quarter, resulting in an allowance for covered loan losses of \$45.5 million as of March 31, 2013. For the first quarter of 2012, First Financial recognized provision expense on covered loans of \$13.0 million related to net charge-offs of \$9.6 million during the period. Additionally, the Company recognized loss sharing expenses of \$2.1 million and \$3.0 million for the first quarter of 2013 and 2012, respectively, primarily related to attorney fees and delinquent taxes during the periods. The receivable due from the FDIC under loss sharing agreements related to covered loan provision expenses, losses on covered OREO and loss sharing expenses of \$8.9 million for the first quarter of 2013 and \$12.8 million for the first quarter of 2012, was recognized as FDIC loss sharing income and a corresponding increase to the FDIC indemnification asset.

Table of Contents

The allowance for loan and lease losses on covered loans is presented in the tables below:

(Dollars in thousands)	March 31, 2013				
	Commercial	Real Estate Commercial	Residential	Installment	Total
Ending allowance on loans acquired with deteriorated credit quality (ASC 310-30)	\$ 15,362	\$ 26,391	\$ 3,384	\$ 359	\$ 45,496
Ending allowance on acquired loans outside the scope of ASC 310-30	0	0	0	0	0
Ending allowance on covered loans	\$ 15,362	\$ 26,391	\$ 3,384	\$ 359	\$ 45,496

(Dollars in thousands)	December 31, 2012				
	Commercial	Real Estate Commercial	Residential	Installment	Total
Ending allowance on loans acquired with deteriorated credit quality (ASC 310-30)	\$ 19,136	\$ 22,918	\$ 2,599	\$ 537	\$ 45,190
Ending allowance on acquired loans outside the scope of ASC 310-30	0	0	0	0	0
Ending allowance on covered loans	\$ 19,136	\$ 22,918	\$ 2,599	\$ 537	\$ 45,190

Changes in the allowance for loan and lease losses on covered loans for the previous five quarters were as follows:

(Dollars in thousands)	Three Months Ended				
	2013		2012		
	Mar. 31,	Dec. 31,	Sep. 30,	June 30,	Mar. 31,
Balance at beginning of period	\$ 45,190	\$ 48,895	\$ 48,327	\$ 46,156	\$ 42,835

Loans charged-off	(9,684 )	(9,568 )	(9,058 )	(5,163 )	(10,118 )
Recoveries	948	580	3,004	1,287	488
Balance at end of period	\$ 45,496	\$ 45,190	\$ 48,895	\$ 48,327	\$ 46,156

## NOTE 11: INCOME TAXES

For the first quarter 2013, income tax expense was \$6.4 million, resulting in an effective tax rate of 31.5%, compared with income tax expense of \$9.6 million and an effective tax rate of 36.2% for the first quarter 2012. The decrease in the effective tax rate during the first quarter 2013 as compared to the same period in 2012 was primarily the result of higher income earned on tax-exempt investment securities as well as a favorable tax reversal related to an intercompany tax obligation associated with an unconsolidated former Irwin subsidiary.

At March 31, 2013, and December 31, 2012, First Financial had no FASB ASC Topic 740-10 unrecognized tax benefits recorded. First Financial does not expect the total amount of unrecognized tax benefits to significantly increase within the next twelve months.

First Financial recognizes interest and penalties on income tax assessments or income tax refunds in the Consolidated Financial Statements as a component of noninterest expense.

First Financial regularly reviews its tax positions and establishes reserves for income tax-related uncertainties based on estimates of whether it is more likely than not that the tax uncertainty would be sustained upon challenge by the appropriate tax authorities which would then result in additional taxes, penalties and interest due. These evaluations are inherently subjective as they require material estimates and may be susceptible to significant change. Provision for tax reserves, if any, is included in income tax expense in the Consolidated Financial Statements. Management

determined that no reserve for income tax-related uncertainties was necessary as of March 31, 2013 and December 31, 2012.

Table of Contents

First Financial and its subsidiaries are subject to U.S. federal income tax as well as state and local income tax in several jurisdictions. Tax years prior to 2010 have been closed and are no longer subject to U.S. federal income tax examinations. Tax years 2010 and 2011 remain open to examination by the federal taxing authority.

First Financial is no longer subject to state and local income tax examinations for years prior to 2009. Tax years 2009 through 2011 remain open to state and local examination in various jurisdictions.

## NOTE 12: EMPLOYEE BENEFIT PLANS

First Financial sponsors a non-contributory defined benefit pension plan covering substantially all employees and uses a December 31 measurement date for its defined benefit pension plan.

First Financial made no cash contributions to fund the pension plan in 2012 and does not expect to make cash contributions to its pension plan in 2013. As a result of the plan's actuarial projections for 2013, First Financial recorded expense related to its pension plan in the first three months of 2013 of \$15 thousand, compared to income of \$0.1 million for the same period in 2012.

The following table sets forth information concerning amounts recognized in First Financial's Consolidated Balance Sheets and Consolidated Statements of Income:

(Dollars in thousands)	Three months ended	
	March 31,	
	2013	2012
Service cost	\$975	\$832
Interest cost	619	690
Expected return on assets	(2,294)	(2,235)
Amortization of prior service cost	(105)	(105)
Net actuarial loss	820	675
Net periodic benefit cost (income)	\$15	\$(143)

Amounts recognized in accumulated other comprehensive income (loss):

(Dollars in thousands)	Three months ended	
	March 31,	
	2013	2012
Net actuarial loss	\$820	\$675
Amortization of prior service cost	(105)	(105)
Deferred tax liabilities	(270)	(215)
Net amount recognized in accumulated other comprehensive income (loss)	\$445	\$355

Table of Contents

NOTE 13: FAIR VALUE DISCLOSURES

Fair Value Measurement

The fair value framework as disclosed in the Fair Value Measurements and Disclosure Topic of FASB ASC Topic 825, Financial Instruments (Fair Value Topic) includes a hierarchy which focuses on prioritizing the inputs used in valuation techniques. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1), a lower priority to observable inputs other than quoted prices in active markets for identical assets and liabilities (Level 2) and the lowest priority to unobservable inputs (Level 3). When determining the fair value measurements for assets and liabilities, First Financial looks to active markets to price identical assets or liabilities whenever possible and classifies such items in Level 1. When identical assets and liabilities are not traded in active markets, First Financial looks to observable market data for similar assets and liabilities and classifies such items as Level 2. Certain assets and liabilities are not actively traded in observable markets and First Financial must use alternative techniques, based on unobservable inputs, to determine the fair value and classifies such items as Level 3. The level within the fair value hierarchy is based on the lowest level of input that is significant in the fair value measurement.

The following methods, assumptions and valuation techniques were used by First Financial to measure different financial assets and liabilities at fair value and in estimating its fair value disclosures for financial instruments.

Cash and short-term investments. The carrying amounts reported in the Consolidated Balance Sheets for cash and short-term investments, such as federal funds sold, approximated the fair value of those instruments. The Company classifies cash and short-term investments in Level 1 of the fair value hierarchy.

Investment securities. Investment securities classified as trading and available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted market prices, when available (Level 1). If quoted market prices are not available, fair values are measured utilizing independent valuation techniques of identical or similar investment securities. First Financial compiles prices from various sources who may apply such techniques as matrix pricing to determine the value of identical or similar investment securities (Level 2). Matrix pricing is a mathematical technique widely used in the banking industry to value investment securities without relying exclusively on quoted prices for the specific investment securities but rather relying on the investment securities' relationship to other benchmark quoted investment securities. Any investment securities not valued based upon the methods above are considered Level 3.

First Financial utilizes information provided by a third-party investment securities administrator in analyzing the investment securities portfolio in accordance with the fair value hierarchy of the Fair Value Topic. The administrator's evaluation of investment security portfolio pricing is performed using a combination of prices and data from other sources, along with internally developed matrix pricing models and assistance from the administrator's internal fixed income analysts and trading desk. The administrator's month-end pricing process includes a series of quality assurance activities where prices are compared to recent market conditions, previous evaluation prices and between the various pricing services. These processes produce a series of quality assurance reports on which price exceptions are identified, reviewed and where appropriate, securities are repriced. In the event of a materially different price, the administrator will report the variance as a "price challenge" and review the pricing methodology in detail. The results of the quality assurance process are incorporated into the selection of pricing providers by the portfolio manager.

First Financial reviews the pricing methodologies utilized by the administrator to ensure the fair value determination is consistent with the applicable accounting guidance and that the investments are properly classified in the fair value hierarchy. Further, the Company periodically validates the fair values for a sample of securities in the portfolio by comparing the fair values provided by the administrator to prices from other independent sources for the same or similar securities. First Financial analyzes unusual or significant variances, conducts additional research with the

administrator, if necessary, and takes appropriate action based on its findings.

Loans held for sale. Loans held for sale are carried at the lower of cost or fair value. These loans currently consist of one-to-four family residential real estate loans originated for sale to qualified third parties. Fair value is based on the contractual price to be received from these third parties, which is not materially different than cost due to the short duration between origination and sale (Level 2). As such, First Financial records any fair value adjustments on a nonrecurring basis. Gains and losses on the sale of loans are recorded as net gains from sales of loans within noninterest income in the Consolidated Statements of Income.

Loans - excluding covered loans. The fair value of commercial, commercial real estate, residential real estate and consumer loans were estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities or repricing frequency. The Company classifies the estimated fair value of uncovered loans as Level 3 in the fair value hierarchy.

30

---

## Table of Contents

Loans are designated as impaired when, in the judgment of management based on current information and events, it is probable that all amounts due according to the contractual terms of the loan agreement will not be collected. Impaired loans are valued at the lower of cost or fair value for purposes of determining the appropriate amount of impairment to be allocated to the allowance for loan and lease losses. Fair value is generally measured based on the value of the collateral securing the loans. Collateral may be in the form of real estate or business assets including equipment, inventory and accounts receivable. The vast majority of the collateral is real estate. The value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed third party appraiser (Level 3). The value of business equipment is based upon an outside appraisal if deemed significant, or the net book value on the applicable borrower financial statements if not considered significant. Likewise, values for inventory and accounts receivable collateral are based on borrower financial statement balances or aging reports on a discounted basis as appropriate (Level 3). Impaired loans allocated to the allowance for loan and lease losses are measured at fair value on a nonrecurring basis. Any fair value adjustments are recorded in the period incurred as provision for loan and lease losses on the Consolidated Statements of Income.

Covered loans. Fair values for covered loans accounted for under FASB ASC Topic 310-30 are based on a discounted cash flow methodology that considered factors including the type of loan and related collateral, classification status, fixed or variable interest rate, term of the loan and whether or not the loan was amortizing and a discount rate reflecting the Company's assessment of risk inherent in the cash flow estimates. These covered loans are grouped together according to similar characteristics and were treated in the aggregate when applying various valuation techniques. First Financial estimated the cash flows expected to be collected on these loans based upon the expected remaining life of the underlying loans, which includes the effects of estimated prepayments. These cash flow evaluations are inherently subjective as they require material estimates, all of which may be susceptible to significant change.

Fair values for covered loans accounted for outside of FASB ASC Topic 310-30 were estimated by discounting the future cash flows using current interest rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities or repricing frequency. The carrying amount of accrued interest approximates its fair value.

The Company classifies the estimated fair value of covered loans as Level 3 in the fair value hierarchy.

FDIC indemnification asset. The accounting for FDIC indemnification assets is closely related to the accounting for the underlying, indemnified assets. Fair value of the FDIC indemnification asset was estimated using projected cash flows related to the loss sharing agreements based on the expected reimbursements for losses and the applicable loss sharing percentages. First Financial re-estimates the expected indemnification asset cash flows in conjunction with the periodic re-estimation of cash flows on covered loans accounted for under FASB ASC Topic 310-30. Improvements in cash flow expectations on covered loans generally result in a related decline in the expected indemnification cash flows while declines in cash flow expectations on covered loans generally result in an increase in expected indemnification cash flows.

The expected cash flows are discounted to reflect the uncertainty of the timing and receipt of the loss sharing reimbursement from the FDIC. These cash flow evaluations are inherently subjective as they require material estimates, all of which may be susceptible to significant change. The Company classifies the estimated fair value of the indemnification asset as Level 3 in the fair value hierarchy.

Deposit liabilities. The fair value of demand deposits, savings accounts and certain money-market deposits was the amount payable on demand at the reporting date. The carrying amounts for variable-rate certificates of deposit approximated their fair values at the reporting date. The fair value of fixed-rate certificates of deposit was estimated

using a discounted cash flow calculation which applies the interest rates currently offered for deposits of similar remaining maturities. The carrying amount of accrued interest approximates its fair value. The Company classifies the estimated fair value of deposit liabilities as Level 2 in the fair value hierarchy.

Borrowings. The carrying amounts of federal funds purchased and securities sold under agreements to repurchase and other short-term borrowings approximate their fair values. The Company classifies the estimated fair value of short-term borrowings as Level 1 of the fair value hierarchy.

The fair value of long-term debt is estimated using a discounted cash flow calculation which utilizes the interest rates currently offered for borrowings of similar remaining maturities. Third-party valuations are used for long-term debt with embedded options, such as call features. The Company classifies the estimated fair value of long-term debt as Level 2 in the fair value hierarchy.

Table of Contents

Commitments to extend credit and standby letters of credit. Pricing of these financial instruments is based on the credit quality and relationship, fees, interest rates, probability of funding and compensating balance and other covenants or requirements. Loan commitments generally have fixed expiration dates, are variable rate and contain termination and other clauses which provide for relief from funding in the event that there is a significant deterioration in the credit quality of the client. Many loan commitments are expected to expire without being drawn upon. The rates and terms of the commitments to extend credit and the standby letters of credit are competitive with those in First Financial's market area. The carrying amounts are reasonable estimates of the fair value of these financial instruments. Carrying amounts, which are comprised of the unamortized fee income and, where necessary, reserves for any expected credit losses from these financial instruments, are immaterial.

Derivatives. The fair values of derivative instruments are based primarily on a net present value calculation of the cash flows related to the interest rate swaps at the reporting date, using primarily observable market inputs such as interest rate yield curves. The discounted net present value calculated represents the cost to terminate the swap if First Financial should choose to do so. Additionally, First Financial utilizes a vendor-developed, proprietary model to value the credit risk component of both the derivative assets and liabilities. The credit valuation adjustment is recorded as an adjustment to the fair value of the derivative asset or liability on the reporting date. Derivative instruments are classified as Level 2 in the fair value hierarchy.

Table of Contents

The estimated fair values of First Financial's financial instruments not measured at fair value on a recurring or nonrecurring basis in the consolidated financial statements were as follows:

(Dollars in thousands)	Carrying value	Estimated Fair Value			
		Total	Level 1	Level 2	Level 3

(1) Amounts represent the impact of legally enforceable master netting arrangements that allow First Financial to settle positive and negative positions and also cash collateral held with the same counterparties.

Table of Contents

Certain financial assets and liabilities are measured at fair value on a nonrecurring basis. Adjustments to the fair market value of these assets usually result from the application of lower of cost or fair value accounting or write-downs of individual assets. The following table summarizes financial assets and liabilities measured at fair value on a nonrecurring basis.

(Dollars in thousands)	Fair Value Measurements Using		
	Level 1	Level 2	Level 3
March 31, 2013			
Assets			
Impaired loans <sup>(1)</sup>	\$0	\$0	\$20,836
OREO	0	0	6,077
Covered OREO	0	0	12,263

(Dollars in thousands)	Fair Value Measurements Using		
	Level 1	Level 2	Level 3
December 31, 2012			
Assets			
Impaired loans <sup>(1)</sup>	\$0	\$0	\$19,564
OREO	0	0	5,651
Covered OREO	0	0	14,059

(1) Amounts represent the fair value of collateral for impaired loans allocated to the allowance for loan and lease losses. Fair values are determined using actual market prices (Level 1), independent third party valuations and borrower records, discounted as appropriate (Level 3).

## NOTE 14: ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Shareholders' equity is affected by transactions and valuations of asset and liability positions that require adjustments to accumulated other comprehensive income (loss). The related tax effects allocated to other comprehensive income and reclassifications out of accumulated other comprehensive income (loss) are as follows:

(Dollars in thousands)	March 31, 2013					Total accumulated other comprehensive income		
	Total other comprehensive income		Pre-tax	Tax-effect	Net of tax	Beginning Balance	Net Activity	Ending Balance
	Prior to Reclassification	Reclassification from

Table of Contents

The following table details the activity reclassified from accumulated other comprehensive income into income during the period:

(Dollars in thousands)	March 31, 2013 Amount Reclassified from Accumulated Other Comprehensive Income *	Affected Line Item in the Consolidated Statements of Income
Gains and loss on cash flow hedges		
Interest rate contracts	\$(66	) Interest expense - deposits
Realized gains and losses on securities available-for-sale	1,536	Gains on sales of investments securities
Defined benefit pension plan		
Amortization of prior service cost	105	
Recognized net actuarial loss	(820	)
Amortization of defined benefit pension items	(715	) Salaries and benefits expense
Total reclassifications for the period, before tax	\$755	

\* Amounts in parentheses are debits to profit/loss.

## NOTE 15: EARNINGS PER COMMON SHARE

The following table sets forth the computation of basic and diluted earnings per share:

(Dollars in thousands, except per share data)	Three months ended March 31,	
	2013	2012
Numerator		
Net income available to common shareholders	\$13,824	\$16,994
Denominator		
Basic earnings per common share - weighted average shares	57,439,029	57,795,258
Effect of dilutive securities —		
Employee stock awards	744,503	957,800
Warrants	99,935	127,985
Diluted earnings per common share - adjusted weighted average shares	58,283,467	58,881,043
Earnings per share available to common shareholders		
Basic	\$0.24	\$0.29
Diluted	\$0.24	\$0.29

Warrants to purchase 465,117 shares of the Company's common stock were outstanding as of March 31, 2013 and 2012. These warrants, each representing the right to purchase one share of common stock, no par value per share, have an exercise price of \$12.26 and expire on December 23, 2018.

Stock options and warrants, where the exercise price was greater than the average market price of the common shares were not included in the computation of net income per diluted share as they would have been antidilutive. These out-of-the-money options were 346,765 and 282,163 at March 31, 2013 and 2012, respectively.

ITEM 2-MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL  
CONDITION AND RESULTS OF OPERATIONS (MD&A)  
FIRST FINANCIAL BANCORP. AND SUBSIDIARIES  
(Unaudited)

Reclassifications of prior period amounts, if applicable, have been made to conform to the current period's presentation and had no effect on previously reported net income amounts or financial condition.

SUMMARY

First Financial Bancorp. (First Financial or the Company) is a \$6.3 billion bank holding company headquartered in Cincinnati, Ohio. As of March 31, 2013 First Financial, through its subsidiaries, operated primarily in Ohio, Indiana and Kentucky. These subsidiaries include a commercial bank, First Financial Bank, N.A. (First Financial Bank or the Bank) with 113 banking centers and 142 ATMs. First Financial conducts three primary activities through its bank subsidiary: commercial banking, retail banking and wealth management. First Financial Bank provides credit-based products, deposit accounts, corporate cash management support and other services to commercial and retail clients. Additionally, the Bank provides franchise lending products, primarily equipment and leasehold improvement financing, for select franchisees and concepts in the quick service and casual dining restaurant sector throughout the United States. First Financial Wealth Management provides wealth planning, portfolio management, trust and estate, brokerage and retirement plan services.

First Financial acquired the banking operations of Peoples Community Bank (Peoples), and Irwin Union Bank and Trust Company and Irwin Union Bank, F.S.B. (collectively, Irwin), through Federal Deposit Insurance Corporation (FDIC)-assisted transactions in 2009. The acquisitions of the Peoples and Irwin franchises significantly expanded the First Financial footprint, opened new markets and strengthened the Company through the generation of additional capital.

In connection with the Peoples and Irwin FDIC-assisted transactions, First Financial entered into loss sharing agreements with the FDIC. Under the terms of these agreements the FDIC reimburses First Financial for a percentage of losses with respect to certain loans (covered loans) and other real estate owned (covered OREO) (collectively, covered assets). These agreements provide for loss protection on single-family, residential loans for a period of ten years and First Financial is required to share any recoveries of previously charged-off amounts for the same time period, on the same pro-rata basis with the FDIC. All other loans are provided loss protection for a period of five years and recoveries of previously charged-off amounts must be shared with the FDIC for an additional three year period, again on the same pro-rata basis. The FDIC's obligation to reimburse First Financial for losses with respect to covered assets for all three assisted transactions began with the first dollar of loss incurred.

Covered loans represent approximately 17% of First Financial's loans at March 31, 2013.

MARKET STRATEGY

First Financial serves a combination of metropolitan and non-metropolitan markets in Ohio, Indiana and Kentucky through its full-service banking centers, while providing franchise lending services to borrowers throughout the United States. First Financial's market selection process includes a number of factors, but markets are primarily chosen for their potential for growth and long-term profitability. First Financial's goal is to develop a competitive advantage utilizing a local market focus, building long-term relationships with clients to help them reach greater levels of success in their financial life and providing a superior level of service. First Financial intends to continue to concentrate future growth plans and capital investments in its metropolitan markets. Smaller markets have historically provided stable, low-cost funding sources to First Financial and remain an important part of its funding base.

As part of the on-going evaluation of its banking center network, First Financial consolidated ten banking centers located in Ohio and Indiana during the first quarter 2013. These banking center actions allow the Company to focus additional resources in the Cincinnati, Dayton and Indianapolis metropolitan markets. Customer relationships related to the consolidated banking centers were transferred to the nearest First Financial location where those customers continue to receive the same high level of service.

#### OVERVIEW OF OPERATIONS

First quarter 2013 net income was \$13.8 million, and earnings per diluted share were \$0.24. This compares with first quarter 2012 net income of \$17.0 million and earnings per diluted share of \$0.29.

Table of Contents

Return on average assets for the first quarter of 2013 was 0.88% compared to 1.05% for the comparable period in 2012. Return on average shareholders' equity for the first quarter of 2013 was 7.91% compared to 9.67% for the comparable period in 2012.

A discussion of the first quarter of 2013 results of operations follows.

## NET INTEREST INCOME

Net interest income, First Financial's principal source of income, is the excess of interest received from earning assets over interest paid on interest-bearing liabilities. For analytical purposes, net interest income is also presented in the table that follows, adjusted to a tax equivalent basis assuming a 35% marginal tax rate for interest earned on tax-exempt assets such as municipal loans and investments. This is to recognize the income tax savings that facilitates a comparison between taxable and tax-exempt assets. Management believes that it is a standard practice in the banking industry to present net interest margin and net interest income on a fully tax equivalent basis. Therefore, management believes these measures provide useful information to make peer comparisons.

The majority of First Financial's covered loans are accounted for under FASB ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality (FASB ASC Topic 310-30). As such, the Company is required to periodically update its forecast of expected cash flows from these loans. Impairment, as a result of a decrease in expected cash flows, is recognized in the period it is measured as provision expense and has no impact on net interest income or net interest margin. Improvements in expected cash flows are recognized on a prospective basis through an upward adjustment to the yield earned on the portfolio, impacting both net interest income and net interest margin. Impairment and improvement are both partially offset by the impact of changes in the value of the FDIC indemnification asset. Impairment is partially offset by an increase to the FDIC indemnification asset as a result of FDIC loss sharing income and has no impact on net interest income or net interest margin. Improvement, which is reflected as a higher yield on the loans, is partially offset by a lower yield earned on the FDIC indemnification asset until the next periodic valuation of the loans and the indemnification asset. The weighted average yield of the acquired loan portfolio can also be subject to change as loans with higher yields pay down more quickly or slowly than loans with lower yields.

(Dollars in thousands)	Three months ended			
	March 31,			
	2013	2012		
Net interest income	\$58,666	\$66,689		
Tax equivalent adjustment	477	218		
Net interest income - tax equivalent	\$59,143	\$66,907		
Average earning assets	\$5,887,810	\$5,950,151		
Net interest margin *	4.04	% 4.51		%
Net interest margin (fully tax equivalent) *	4.07	% 4.52		%

\* Margins are calculated using annualized net interest income divided by average earning assets.

Net interest income for the first quarter 2013 was \$58.7 million, declining \$8.0 million or 12.0% from first quarter 2012 net interest income of \$66.7 million. Net interest income on a fully tax-equivalent basis for the first quarter 2013 was \$59.1 million as compared to \$66.9 million for the first quarter 2012. Net interest margin was 4.04% for the first quarter 2013 as compared to 4.51% for the first quarter 2012. The declines in net interest income and net interest margin were primarily related to changes in the composition of the Company's earning assets as well as the current low interest rate environment for loans and investment securities.

The decline in net interest income in the first quarter 2013 as compared to the first quarter 2012 was the result of an \$11.6 million or 15.4% decline in total interest income partially offset by a \$3.6 million or 42.4% decline in total interest expense. The decline in total interest income resulted from a decline in interest income and fees earned on loans, primarily as a result of continued amortization and paydowns in the Company's high-yielding covered loan portfolio, as well as lower interest income earned on the investment portfolio due to the current low rate environment.

Contributing to the lower interest income earned on loans, and a related decline in net interest margin, was a \$295.4 million or 29.0% decline in the average balance of covered loans as compared to the first quarter 2012. Declines in covered loan balances

Table of Contents

are a result of payments received, including full payoffs, charge-offs and other loan resolution activities. The decline in covered loan balances was partially offset by growth in lower yielding assets as average uncovered loan balances increased \$224.9 million or 7.6% from the first quarter of 2012. Average interest-bearing deposits with other banks also declined \$123.3 million or 97.6% from the first quarter of 2012.

While average uncovered loan balances increased from the first quarter 2012 as a result of strong new loan origination activity in recent periods, payoff activity was also elevated. As a result of the low interest rate environment and heightened competition, recent loan originations have been recorded at yields significantly lower than the yields on loans that paid off during the same period, muting the impact of increased balances on interest income earned and net interest margin. Interest income and net interest margin were also negatively impacted, to a lesser extent, by a decline in loan fees.

The decline in total interest income was also due to lower interest income earned on investment securities despite a \$174.1 million increase in the average balance of the Company's investment securities portfolio in the first quarter 2013 as compared to the first quarter 2012. The average yield on investment securities declined 59 basis points, to 1.98% in the first quarter 2013 from 2.57% in the first quarter 2012, primarily as a result of elevated prepayment activity related to higher yielding mortgage-backed securities (MBS) and lower reinvestment rates in recent periods.

Interest expense and net interest margin continued to benefit from the impact of deposit pricing and rationalization strategies as the average balance of interest-bearing deposits declined \$759.7 million or 16.7% and the cost of funds related to these deposits decreased 27 basis points to 41 basis points for the first quarter 2013 compared to 68 basis points for the comparable quarter in 2012. However, interest expense and net interest margin were also impacted by a \$574.7 million increase in the average balance of short-term borrowings for the first quarter 2013 as compared with the comparable quarter in 2012. Short-term borrowings, which are utilized to manage the Company's normal liquidity needs, increased as a result of loan demand as well as deposit rationalization, banking center consolidation and investment portfolio strategies during 2012 and into 2013.

The Consolidated Average Balance Sheets and Net Interest Income Analysis that follows are presented on a GAAP basis.
