PART I

Item 1. Business

Company Overview

Pilgrim's Pride Corporation (referred to herein as "Pilgrim's," "PPC," "the Company," "we," "us," "our," or similar terms), wh
was incorporated in Texas in 1968 and reincorporated in Delaware in 1986, is the successor to a partnership founded in 1946 as a retail feed store. We are the second-largest chicken producer in the world with operations in the United States ("US"), Mexico and Puerto Rico. We are primarily engaged in the production, processing, marketing and distribution of fresh, frozen and value-added chicken products to retailers, distributors and foodservice operators. We employ approximately 39,500 people and have the capacity to process more than 36 million birds per week for a total of more than 9.5 billion pounds of live chicken annually. In 2011, we generated $7.5 billion in total revenue, and produced 8.1 billion pounds of chicken products.

In December 2009, we adopted Amended and Restated Corporate Bylaws (the "Restated Bylaws"), which changed our fiscal year end from the Saturday nearest September 30 of each year to the last Sunday in December of each year. This change aligns our reporting cycle with the fiscal calendar of our majority stockholder, JBS USA Holdings, Inc. ("JBS USA"). The change was effective for our 2010 fiscal year, which began December 28, 2009 and ended December 26, 2010 and resulted in an approximate three-month transition period which began September 27, 2009 and ended December 27, 2009 (the "Transition Period"). We now operate on the basis of a 52/53-week fiscal year that ends on the Sunday falling on or before December 31. The reader should assume any reference we make to a particular year (for example, 2010) in this annual report applies to our fiscal year and not the calendar year.

In January 2007, we completed the acquisition of Gold Kist Inc. ("Gold Kist"), which we refer to as the Gold Kist acquisition. Gold Kist operated a fully-integrated chicken production business that included live production, processing, marketing and distribution. This acquisition positioned us as one of the largest chicken companies in the US, and that position provided us with opportunities to expand our geographic reach and customer base and further pursue value-added and prepared chicken opportunities.

We have a broad geographic reach and we offer our diverse customer base a balanced portfolio of fresh and prepared chicken products. We have consistently provided our customers with high quality products and service with a focus on delivering higher-value, higher-quality products. As such we have become a valuable partner to our customers and a recognized industry leader. Our sales efforts are largely targeted towards the foodservice industry, principally chain restaurants and food processors such as Yum! Brands®, Burger King®, Wendy's®, Chick-fil-A® and retail customers including grocery store chains and wholesale clubs such as Kroger®, Wal-Mart®, Costco®, Publix® and Sam's Club®. We also export products to customers in approximately 105 countries, including Mexico.

Mexico represented approximately 10% of our net sales in 2011. We are the second-largest producer and seller of chicken in Mexico and are one of the lower-cost producers of chicken in the country. While the market for chicken products in Mexico is less developed than in the US, with sales attributed to fewer, more basic products, we have been successful in differentiating our products through high-quality client service and product improvements such as dry-air chilled, eviscerated products. Additionally, we are an important player in the live market, which accounts for 31% of the chicken sales in Mexico. We believe that Mexican supermarket chains consider us one of the leaders in innovation for fresh products. Our strategy is to capitalize on this trend through our vast US experience in products, quality and our well-known service.

As a vertically integrated company, we control every phase of the production of our products. We believe that vertical integration helps us better manage food safety and quality, as well as more effectively

Table of Contents

control margins and improve customer service. We currently operate in 12 US states, Puerto Rico and Mexico. Our plants are strategically located to supply our distribution network and ensure that customers timely receive the freshest products. We operate 25 fresh processing plants, eight prepared foods cook plants, one fresh processing plant in Puerto Rico, three processing plants in Mexico, and 13 distribution centers (one in Puerto Rico and 12 in Mexico). We reopened an idled processing plant in Douglas, Georgia in January 2011. The Company will evaluate the decision to bring the Douglas, Georgia facility to full capacity during 2012. In addition, the Company operates nine rendering facilities (six in the US, one in Puerto Rico and two in Mexico) and three pet food plants in the US. The Company currently has five additional processing plants that are currently idle. Combined with our global network of approximately 4,200 growers, 31 feed mills and 37 hatcheries, we believe we are well positioned to keep up with the growing demand for our products.

Emergence from Bankruptcy

On December 1, 2008, we and six of our subsidiaries filed voluntary petitions in the United States Bankruptcy Court for the Northern District of Texas, Fort Worth Division, seeking reorganization relief under the provisions of Chapter 11 of Title 11 of the United States Code. We emerged from our Chapter 11 bankruptcy proceedings on December 28, 2009. In connection with our emergence from bankruptcy, our common stock outstanding immediately prior to the emergence was canceled and converted into the right to receive newly-issued shares of common stock of the reorganized Company based on a one-for-one exchange ratio, which constitutes 36.0% of the total number of shares of our newly-issued common stock. The remaining shares of our newly-issued common stock, constituting 64.0% of our total issued and outstanding common stock on the date of our emergence from bankruptcy, were purchased by JBS USA, a wholly-owned indirect subsidiary of JBS S.A., a Brazil-based meat producer, for $800.0 million in cash. On November 5, 2010, JBS USA increased its stake in the Company to 67.3% of the total number of shares issued and outstanding on such date. On January 5, 2012, the Company issued 200,000 shares of common stock, which subsequently reduced JBS USA's stake in the Company to 67.2%. See "Note 18. Incentive Compensation Plans" to the Consolidated Financial Statements for additional information. Upon exiting from bankruptcy, we and certain of our subsidiaries entered into an exit credit facility that provides for an aggregate commitment of $1.75 billion (the “Exit Credit Facility”). The facility consisted of a three-year $600.0 million revolving credit facility, a three-year $375.0 million Term A facility and a five-year $775.0 million Term B facility. As of December 25, 2011, a principal amount of $347.3 million under the revolving loan commitment and a principal amount of $574.6 million under the Term B facility were outstanding. See "Note 2. Chapter 11 Proceedings" of our Consolidated Financial Statements included in this annual report for additional information on our Chapter 11 filings and proceedings.

The Industry

Industry Overview

The US consumes more chicken than any other protein (approximately 30 billion pounds projected in calendar year 2012), and chicken is the second most consumed protein globally after pork. The US is the world’s largest producer of chicken and is projected to produce approximately 37 billion pounds of ready-to-cook broiler meat in calendar year 2012, representing 20.0% of the total world production. China and Brazil produce the second and third most broiler meat, with 16.6% and 16.4% of the world market, respectively.

The US is the second-largest exporter of broiler meat behind Brazil. The US is projected to export 7 billion pounds in calendar year 2012 which would account for 31.6% of the total world exports and 18.4% of the total US production. The top five exporters control over 89% of the market. The broiler export marketplace has grown at a rapid pace since the early 1990s. The growth has been driven by various

Table of Contents

geopolitical events such as the collapse of the former Soviet Union as well as changing consumer preferences. Key importers of broilers include Russia, China, the EU, Mexico and Saudi Arabia. Other export markets such as Hong Kong, Vietnam, the Middle East and Africa are projected to increase their imports of US chicken.

The US market is concentrated with four major chicken producers accounting for over 50% of production. The US chicken industry is largely vertically integrated with major producers owning and operating feed mills, processing plants and further processing plants while contracting out breeding and broiler production to thousands of contractually bound chicken farmers. More than 90% of all chickens raised for consumption are produced by farmers under a contract with processing companies. Processing companies provide the growers with chickens, feed, vaccines and medicines required for the production of broilers. The grower supplies all systems and labor required to bring the broilers up to slaughter weight. The grower is then paid based on the weight gain exhibited by the flock.

According to the USDA, chicken production in the US has increased at a compounded annual growth rate of 3.2% over the past 20 years. Similarly, per capita consumption of chicken has increased at a compounded annual growth rate of 1.4%. During this same period of time, per capita beef consumption has declined at a compounded annual growth rate of 0.6% while pork has declined at a compounded annual growth rate of 0.3%. The growth in chicken demand is attributable to (i) relative affordability compared to other proteins such as beef and pork, (ii) the increasingly health conscious nature of US consumers, (iii) chicken's consistent quality and versatility and (iv) its introduction on many foodservice menus. In addition, global protein demand has remained strong, and we believe protein demand will continue to expand consistent with rising standards of living and a growing middle class in developing countries around the world.

We benefit from a shorter production lifecycle of chickens compared to other proteins. While production for beef takes approximately 28 to 30 months from breeding to slaughter and the production for pork takes 11 to 12 months, the production lifecycle for the broiler is only ten weeks. There are three key components of broilers that are sold for consumption: the breast, the wing and the leg quarters. An estimated 88% of broiler production in the US is sold in separate parts, rather than as a whole bird. This is due primarily to an increase in demand associated with the white meat of the breast, as well as demand for boneless breasts and wings.

Key Industry Dynamics

Pricing. Like other commodities, changes to either the supply or demand components of the market can largely impact the profitability of key players in the industry. Specifically, given the low margins associated with the broiler industry, a change in pricing of commodity chicken products has a significant impact on the income generated by the producer. Items that impact chicken pricing in the US include international demand, changes in production by other broiler exporting countries, input costs, and the demand associated with substitute products such as beef and pork. While broiler producers attempt to match supply and demand, a minor change in downstream demand can impact whether the planned supply meets the market need.

Feed. Broilers are fed corn and soybean meal as well as certain vitamins and minerals. Corn and soybean meal account for approximately 65% and 24% of the feed, respectively. Broiler production is significantly more efficient from a feed perspective than cattle or hogs. Approximately 1.9 pounds of feed are required for each pound of chicken, as compared to approximately 6.5 and 3.0 pounds for cattle and hogs, respectively.

Table of Contents

In the past, cost of feed had been largely steady, with occasional spikes resulting from externalities. These externalities often took the form of poor weather conditions, such as droughts or excessive rains leading to poor crop yields. More recently, however, feed prices have risen significantly due to increased demand both domestically for ethanol and globally for protein production.

Relationship with JBS USA

JBS USA currently owns 67.2% of our total issued and outstanding common stock. As a majority owned subsidiary of JBS USA, we work closely with their management to identify areas where both companies can seek synergies and benefit together. As part of our broader reorganization plan, we moved our headquarters to Greeley, Colorado, the headquarters of JBS USA.

Over the past three years, we have closed, idled or sold ten plants and 13 distribution centers, reduced or consolidated production at other facilities, streamlined our workforce and reduced administrative and corporate expenses, including closing our corporate headquarters and satellite headquarters as part of our relationship with JBS USA. We reopened an idled processing plant in Douglas, Georgia in January 2011. The Company will evaluate the decision to bring the Douglas, Georgia facility to full capacity during 2012.

While the US is our largest market, we have a growing focus on international markets as we diversify our geographic presence and expand our revenue base. Our key international markets include former countries within the Commonwealth of Independent States ("CIS"), the Far East and Mexico. We continue to leverage JBS USA's existing international network and distribution capabilities to tap new markets such as Africa and the Middle East.

Working with JBS USA, we have integrated sophisticated risk management techniques into our operations. We have taken steps to avoid, reduce and insure the different risks inherent in our business from a holistic viewpoint. We focus not only on operational risk, but financial and strategic risk as well. These areas of focus include input costs (commodity pricing, live and processed product cost and spoilage), revenue risk (sales price and mix), financial risk (adequate controls, timely and effective reporting systems and other management and governance systems) as well as competitive risks and market trends. We aim to identify, categorize and respond to these risks in a systematic manner to manage as much of their impact on our business as possible.

Recent Developments

Pilgrim's commenced a rights offering for up to approximately 44.4 million shares of common stock to its stockholders of record on January 17, 2012 in order to strengthen its capital structure. Pilgrim's distributed one nontransferable subscription right for each share of common stock then owned (the "Rights Offering"). Each subscription right entitles the holder to purchase 0.2072 shares of common stock at a purchase price of $4.50 per share. The Rights Offering also includes an over-subscription privilege, which entitles a stockholder who exercises all of their basic subscription privilege in full the right to purchase pro rata additional shares of common stock that remain unsubscribed at the expiration of the Rights Offering, which is scheduled to expire on February 29, 2012. Pilgrim's expects the aggregate gross proceeds (before expenses) of the offering to be approximately $200.0 million. Pilgrim's expects to use the net proceeds from the offering for additional working capital to improve our capital position and for general corporate purposes. We also anticipate that we will use a portion of the net proceeds from the Rights Offering to repay the principal amount of $50.0 million, plus accrued interest, of our subordinated debt owed to our majority stockholder, JBS USA. We may also use the net proceeds to repay indebtedness under the Exit Credit Facility. In addition, in connection with the Rights Offering, we expect to terminate certain commitments of JBS USA to make additional subordinated loans to us. JBS USA has committed to participate in the Rights Offering and exercise

Table of Contents

its basic subscription and over-subscription privilege in full and has executed an agreement reflecting its commitment.
Competitive Strengths
We believe that our competitive strengths will enable us to maintain and grow our position as a leading chicken company and to capitalize on future favorable growth opportunities:
Leading market position in the growing chicken industry. We are the second-largest chicken producer in the US with a 16.9% market share, based on ready-to-cook production. We believe we can maintain this leading market position as we are one of the few producers in the chicken industry that can fully supply larger retailers and foodservice companies due to our broad product offering and technical capabilities. We are a viable supplier for large integrated customers due to our ability to ensure supply, demonstrate innovation and new product development and provide competitive pricing. Our vertical integration gives us control over our supply of chicken and chicken parts. Further, our processing facilities offer a wide range of capabilities and are particularly suited for the high-volume production as well as low-volume custom production runs necessary to meet both the capacity and quality requirements of our customer base. Finally, we have established a reputation for dependable quality, highly responsive service and excellent technical support.
Experienced management team. We have a proven senior management team whose tenure in the chicken industry has spanned numerous market cycles and is among the most experienced in the industry. Our senior management team is led by William W. Lovette, our Chief Executive Officer, who has 29 years of experience in the chicken industry. Our management team has successfully improved and realigned our business and instilled a corporate culture focused on performance and accountability. Our senior operating executives have backgrounds with leading agribusiness companies, including Tyson Foods, Inc., ConAgra Foods, Inc. and Bunge Limited, among others. We believe that this combination of backgrounds and experience will continue to provide the foundation for a focused business strategy and will enable us to maintain and strengthen long-term relationships with customers and help us grow our business in the future. We also benefit from management ideas, best practices, and talent shared with the seasoned management team at our majority stockholder, JBS USA, and its parent company, JBS S.A., who have over 50 years of combined experience operating protein processing facilities in South America, the United States and Australia.
Leaner, more focused enterprise since emergence from bankruptcy. Following our restructuring efforts, we are a more efficient and lean organization supported by a market-driven business strategy. Since 2008, we have closed, idled or sold ten plants and 13 distribution centers, reduced or consolidated production at other facilities, streamlined our workforce and reduced administrative and corporate expenses including closing our corporate headquarters and satellite headquarters as part of our becoming a majority owned subsidiary of JBS USA. In addition, we continue to make significant production improvements driven by improved yields, labor, cost savings and product mix. We estimate that these efforts will result in a $400.0 million annualized run rate improvement in plant related costs and mix by the first part of 2012. Further, we are a financially stronger company with a more conservative balance sheet.
Blue chip and diverse customer base. We benefit from strong relationships with leading companies, including Sysco®, US Foodservice, Yum! Brands®, Wendy's®, Chick-fil-A®, Kroger®, Wal-Mart®, Costco®, Publix®, Sam's Club®, ConAgra Foods®, and Nestle®, many of whom have been doing business with us for more than six years. We sell our products to a large and diverse customer base, with over 5,000 customers and no concentrations above 6.0% of sales except for our largest customer, Wal-Mart Stores, Inc., which accounted for 9.9% of net sales in 2011.

Table of Contents

Relationship with JBS USA. In addition to cost savings through the integration of certain corporate functions and the rationalization of facilities, our relationship with JBS USA allows us to enjoy several advantages given its diversified international operations and strong record in commodity risk management. We are leveraging JBS USA's international network and seek to expand into untapped international markets and strengthen our presence in geographies in which we already operate. In addition, JBS USA's expertise in managing the risk associated with volatile commodity inputs will help us to further improve our operations and manage our margins.

Business Strategy

Our objectives are to (i) strategically grow value added exports, (ii) be a valued partner with our key customers, (iii) relentlessly pursue operational excellence and (iv) instill accountability and ownership into our company culture. To achieve these goals, we plan to continue pursuing the following strategies:

Strategically grow value added exports. We will continue to focus on international opportunities and we plan to further diversify our international markets to complement our US chicken operations and capitalize on attractive export markets. According to the USDA, the export of US chicken products increased at a average annual growth rate of 3.6% from 2000 through 2010. We believe US chicken exports will continue to grow as worldwide demand increases for high-grade, low-cost meat protein sources. Historically, we targeted international markets to generate additional demand for our dark chicken meat, which is a natural by-product of our US operations given our concentration on prepared foods products and the US customers' general preference for white chicken meat. As part of this initiative, we created a significant international distribution network into several markets, including Mexico, which we now utilize not only for dark chicken meat distribution, but also for various higher-margin prepared foods and other poultry products. We employ both a direct international sales force and export brokers. Our key international markets include CIS, the Far East and Mexico. Our relationship with our majority owner, JBS USA, has improved our access to markets such as Africa, the Middle East and Asia. We believe substantial opportunities exist to expand our sales to these markets by capitalizing on direct international distribution channels supplemented by our existing export broker relationships. Our export sales accounted for approximately 13.0% of our US chicken sales in 2011 with year over year growth of 40.1%.

Valued partner with our key customers. We are the second-largest producer of chicken products in the world. We have developed and acquired complementary markets, distributor relationships and geographic locations, establishing relationships with broad-line national distributors and retailers which have enabled us to expand our customer base and provide nationwide distribution capabilities for all of our product lines. As a result, we believe we are one of only two US chicken producers that can supply the growing demand for a broad range of price competitive standard and specialized products with well-known brand names on a nationwide basis from a single-source supplier. By having the best in class quality management systems, we plan to further grow our industry position and continue being a valued partner with our key customers.

Operational excellence. As production and sales grow, we continue to focus on improving operating efficiencies by focusing on cost reductions, improving processes, training and our total quality management program. In addition, we remain focused on cost control. Specific initiatives include:

- Benchmarking live and plant costs against the industry;
- Striving to be in the top 25% of the industry for yields and costs;
- Driving accountability and ownership deeper in the organization;
- Conducting monthly performance reviews with senior management; and,
- Improving sales mix and price.

Table of Contents

Accountability and ownership instilled in to the company culture. The Company has realigned its business units to give ownership and accountability to proven leaders of management. We plan to further grow and develop our talent within the company and implement a results oriented culture, consistent with the values of JBS USA. We have also implemented a new incentive system that focuses on process improvements, higher margins, improved sales mix and increased profits throughout the organization.

Reportable Business Segment

We operate in one reportable business segment, as a producer and seller of chicken products we either produce or purchase for resale in the US, Puerto Rico and Mexico. We conduct separate operations in the US, Puerto Rico and Mexico; however, for geographic reporting purposes, we include Puerto Rico with our US operations. See "Note 22. Business Segment and Geographic Reporting" of our Consolidated Financial Statements included in this annual report for additional information.

Narrative Description of Business

Products and Markets

Our primary chicken product types are fresh, prepared and export. We sell our fresh chicken products to the foodservice and retail markets. Our fresh chicken products consist of refrigerated (nonfrozen) whole or cut-up chicken, either pre-marinated or non-marinated and prepackaged case-ready chicken. Our case-ready chicken includes various combinations of freshly refrigerated, whole chickens and chicken parts in trays, bags or other consumer packs labeled and priced ready for the retail grocer’s fresh meat counter. Our fresh chicken sales in 2011 accounted for 51.7% of our total US chicken sales.

We also sell prepared chicken products, including portion-controlled breast fillets, tenderloins and strips, delicatessen products, salads, formed nuggets and patties and bone-in chicken parts. These products are sold either refrigerated or frozen and may be fully cooked, partially cooked or raw. In addition, these products are breaded or non-breaded and either pre-marinated or non-marinated. Our prepared chicken products sales in 2011 accounted for 35.0% of our total US chicken sales.

Export and other chicken products primarily consist of whole chickens and chicken parts sold mostly in bulk, non-branded form either refrigerated for distributors in the US or frozen for distribution to export markets. In the US, prices of these products are negotiated daily or weekly and are generally related to market prices quoted by the US Department of Agriculture (“USDA”) or other public price reporting services. We sell US-produced chicken products for export to CIS, the Far East, Mexico and other world markets. Our export and other chicken products sales in 2011 accounted for 13.3% of our total US chicken sales.

Our primary customer markets consist of the foodservice and retail channels, as well as selected export and other markets. The foodservice market principally consists of chain restaurants, food processors, broad-line distributors and certain other institutions located throughout the continental US. We supply chicken products ranging from portion-controlled refrigerated chicken parts to fully-cooked and frozen, breaded or non-breaded chicken parts or formed products.

Our categories within foodservice include frozen, fresh and corporate accounts. Fresh and frozen chicken products are usually pre-cut to customer specifications and are often marinated to enhance value and product differentiation. Corporate accounts include further-processed and value-added products supplied to select foodservice customers improving their ability to manage product consistency and quality in a cost efficient manner. We believe we are positioned to be the primary or secondary supplier to national and international chain restaurants who require multiple suppliers of chicken products. Additionally, we believe

Table of Contents

we are well suited to be the sole supplier for many regional chain restaurants. Regional chain restaurants often offer better margin opportunities and a growing base of business. We believe we have operational strengths in terms of full-line product capabilities, high-volume production capacities, research and development expertise and extensive distribution and marketing experience relative to smaller and non-vertically integrated producers. Foodservice growth is anticipated to continue, despite the effects resulting from continued weak economic conditions in the US.

The retail market consists primarily of grocery store chains, wholesale clubs and other retail distributors. We concentrate our efforts in this market on sales of branded, prepackaged cut-up and whole chicken and chicken parts to grocery store chains and retail distributors. For many years, we have invested in both trade and retail marketing designed to establish high levels of brand name awareness and consumer preferences. We utilize numerous marketing techniques, including advertising, to develop and strengthen trade and consumer awareness and increase brand loyalty for consumer products marketed under the Pilgrim's Pride® and Pilgrim's® brands. We believe our efforts to achieve and maintain brand awareness and loyalty help to provide more secure distribution for our products. We also believe our efforts at brand awareness generate greater price premiums than would otherwise be the case in certain markets. Additionally, we maintain an active program to identify consumer preferences. The program primarily consists of discovering and validating new product ideas, packaging designs and methods through sophisticated qualitative and quantitative consumer research techniques in key geographic markets.

The export and other chicken market consists primarily of customers who purchase for distribution in the US or for export to CIS, the Far East, Mexico and other world markets. Our export and other chicken products, with the exception of our exported prepared chicken products, consist of whole chickens and chicken parts sold primarily in bulk, nonbranded form, either refrigerated or frozen.

Historically, we have targeted international markets to generate additional demand for our dark chicken meat, which is a natural by-product of our US operations given our concentration on prepared chicken products and the US customers' general preference for white chicken meat. We have also begun selling prepared chicken products for export to the international divisions of our US chain restaurant customers. Utilizing the extensive sales network of JBS USA, we believe that we can accelerate the sales of value-added chicken products into international channels. We also believe that the history of our successful export sales and our relationship with JBS USA position us favorably to capitalize on international growth.

Table of Contents

The following table sets forth, for the periods beginning with 2007, net sales attributable to each of our primary product lines and markets served with those products. We based the table on our internal sales reports and their classification of product types.

	2011	2010	Transition Period	2009	2008	2007
US chicken:	(In thousands)					
Prepared chicken	$2,135,337	$2,262,107	$535,810	$2,294,576	$2,552,065	$2,409,113
Fresh chicken	3,160,429	2,834,972	663,418	3,113,062	3,591,785	3,255,716
Export and other chicken by-products	808,038	581,303	134,976	656,276	933,197	663,525
Total US chicken	6,103,804	5,678,382	1,334,204	6,063,914	7,077,047	6,328,354
Mexico chicken	720,333	615,433	127,557	487,785	543,583	488,466
Total chicken	6,824,137	6,293,815	1,461,761	6,551,699	7,620,630	6,816,820
Other products:						
US	674,923	558,675	132,500	505,738	863,495	661,115
Mexico	36,638	29,139	8,473	30,618	34,632	20,677
Total other products	711,561	587,814	140,973	536,356	898,127	681,792
Total net sales	$7,535,698	$6,881,629	$1,602,734	$7,088,055	$8,518,757	$7,498,612

The following table sets forth, beginning with 2007, the percentage of net US chicken sales attributable to each of our primary product lines and the markets serviced with those products. We based the table and related discussion on our internal sales reports and their classification of product types and customers.

	2011	2010	Transition Period	2009	2008	2007
	(Percent)					
Prepared chicken	35.0	39.9	40.2	37.9	36.1	38.2
Fresh chicken	51.7	49.9	49.7	51.3	50.7	51.4
Export and other chicken by-products	13.3	10.2	10.1	10.8	13.2	10.4
Total US chicken	100.0	100.0	100.0	100.0	100.0	100.0

United States

Product Types

Fresh Chicken Overview. Fresh chicken is an important component of our sales and accounted for $3,160.4 million, or 51.7%, of our total US chicken sales in 2011 and $3,255.7 million, or 51.4%, in 2007. Most fresh chicken products are sold to established customers, based upon certain weekly or monthly market prices reported by the USDA and other public price reporting services, plus a markup, which is dependent upon the customer's location, volume, product specifications and other factors. We believe our practices with respect to sales of fresh chicken are generally consistent with those of our competitors. The majority of these products are sold pursuant to agreements with varying terms that either set a fixed price for the products or set a price according to formulas based on underlying commodity markets such as corn and chicken price forecasts, subject in many cases to minimum and maximum prices.

Prepared Chicken Overview. In 2011, $2,135.3 million, or 35.0%, of our US chicken sales were in prepared chicken products to foodservice customers and retail distributors, as compared to $2,409.1 million, or 38.2%, in 2007. The production and sale in the US of prepared chicken products reduce the impact of the

Table of Contents

costs of feed ingredients on our profitability. Feed ingredient costs are the single largest component of our US cost of sales, representing approximately 40.7% of our US cost of sales in 2011. The production of feed ingredients is positively or negatively affected primarily by the global level of supply inventories, demand for feed ingredients, the agricultural policies of the US and foreign governments and weather patterns throughout the world. As further processing is performed, feed ingredient costs become a decreasing percentage of a product's total production cost, thereby reducing their impact on our profitability. Products sold in this form enable us to charge a premium, reduce the impact of feed ingredient costs on our profitability and improve and stabilize our profit margins.

We establish prices for our prepared chicken products based primarily upon perceived value to the customer, production costs and prices of competing products. The majority of these products are sold pursuant to agreements with varying terms that either set a fixed price for short-term periods or set a price according to formulas based on an underlying commodity market such as corn and chicken price forecasts, subject in many cases to minimum and maximum prices. Many times, these prices are dependent upon the customer's location, volume, product specifications and other factors.

Export and Other Chicken Products Overview. Our export and other products consist of whole chickens and chicken parts sold primarily in bulk, non-branded form, either refrigerated to distributors in the US or frozen for distribution to export markets, and branded and non-branded prepared chicken products for distribution to export markets. In 2011, approximately $808.0 million, or 13.3%, of our total US chicken sales were attributable to US chicken export and other products, as compared to $663.5 million, or 10.4%, in 2007.

Markets for Other Products

In 2011, we had regional distribution centers located in Arizona, Texas and Utah that were primarily focused on distributing our own chicken products. In November 2011, we sold the distribution centers to JBS Trading International, Inc., a wholly owned subsidiary of JBS USA. See "Note 17. Related Party Transactions" of our Consolidated Financial Statements included in this annual report for additional information on the sale of the distribution centers. In addition, we market fresh eggs under private labels, in various sizes of cartons and flats to US retail grocery and institutional foodservice customers located primarily in Texas. Many of our US feed mills produce and sell some livestock feeds to local dairy farmers and livestock producers. Also included in this category are chicken by-products, which we convert into protein products and sell primarily to manufacturers of pet foods.

Mexico

Background

The Mexico market represented approximately 10.0% of our net sales in 2011. We are the second-largest producer and seller of chicken in Mexico. We believe that we are one of the lower-cost producers of chicken in Mexico.

Product Types

While the market for chicken products in Mexico is less developed than in the US, with sales attributed to fewer, more basic products, we have been successful in differentiating our products through high-quality client service and product improvements. Additionally, we are an important player in the live market, which accounts for 31% of the chicken sales in Mexico.

Table of Contents

Markets

We sell our chicken products primarily to wholesalers, large restaurant chains, fast food accounts, supermarket chains and direct retail distribution in selected markets. Our largest presence is by far in the central states of the country where we have been able to gain market share. Our presence in Mexico reaches 74% of the population.

Foreign Operations Risks

Our foreign operations pose special risks to our business and operations. A discussion of foreign operations risks is included in "Item 1A. Risk Factors."

General

Competitive Conditions

The chicken industry is highly competitive. We are the second largest producer in the world and we believe our relationship with JBS USA enhances our competitive position. In the US and Mexico, we compete principally with other vertically integrated poultry companies.

In general, the competitive factors in the US chicken industry include price, product quality, product development, brand identification, breadth of product line and customer service. Competitive factors vary by major market. In the US retail market, we believe that product quality, brand awareness, customer service and price are the primary bases of competition. In the foodservice market, competition is based on consistent quality, product development, service and price. There is some competition with non-vertically integrated further processors in the US prepared chicken business. We believe vertical integration generally provides significant, long-term cost and quality advantages over non-vertically integrated further processors.

In Mexico, where product differentiation has traditionally been limited, we believe product quality and price have been the most critical competitive factors.

Restructuring Efforts

Since January 2010, we implemented significant operational changes to reduce costs and operate more efficiently, as well as realized substantial benefits through synergies following the JBS USA acquisition. We reduced our production footprint to mitigate capacity utilization and efficiency issues created by previously enacted across-the-board production cuts. In addition, we continue to evaluate our noncore businesses, which has resulted in the sale of certain noncore businesses. Our restructuring efforts included:

- Idling a processing facility in Dallas, Texas.
- Closing hatcheries in Moulton, Alabama and DeQueen, Arkansas.
- Idling a feed mill in Staley, North Carolina.
- Closing administrative offices in Pittsburg, Texas and Atlanta, Georgia.
- Selling distribution centers in Mt. Pleasant, Texas; Arlington, Texas; San Antonio, Texas; Salt Lake City, Utah, and Phoenix, Arizona to JBS Trading International, Inc.
- Selling our pork operations to Swift Pork Company.
- Selling a rendering facility in Ball Ground, Georgia and a hatchery in Crossville, Alabama.
- Reducing or consolidating production at various other facilities throughout the US.

Exit and disposal activities from January 2010 to present have eliminated approximately 1,500 positions and recognized net pre-tax charges totaling $96.4 million.

Table of Contents

In addition, we continue to realize other business improvements and efficiency gains from ongoing actions and a more favorable product mix since exiting from bankruptcy. These ongoing improvements include reductions in selling, general and administrative expenses through administrative headcount reductions; supply chain and margin improvements; savings from contract rejections; and additional improvements. We also continue to review and evaluate various restructuring and other alternatives to streamline our operations, improve efficiencies and reduce costs. Such initiatives may include selling assets, consolidating operations and functions, employee relocation and voluntary and involuntary employee separation programs. Any such actions may require us to obtain the pre-approval of our lenders under our Exit Credit Facility. In addition, such actions will subject the Company to additional short-term costs, which may include asset impairment charges, lease commitment costs, employee retention and severance costs and other costs. Certain of these activities may have a disproportionate impact on our income relative to the cost savings.

Key Customers

Our two largest customers accounted for approximately 15.9% of our net sales in 2011, and our largest customer, Wal-Mart Stores Inc., accounted for 9.9% of our net sales in 2011.

Regulation and Environmental Matters

The chicken industry is subject to government regulation, particularly in the health and environmental areas, including provisions relating to the discharge of materials into the environment, by the Centers for Disease Control, the USDA, the Food and Drug Administration (“FDA”) and the Environmental Protection Agency (“EPA”) in the US and by similar governmental agencies in Mexico. Our chicken processing facilities in the US are subject to on-site examination, inspection and regulation by the USDA. The FDA inspects the production of our feed mills in the US. Our Mexican food processing facilities and feed mills are subject to on-site examination, inspection and regulation by a Mexican governmental agency that performs functions similar to those performed by the USDA and FDA. We believe that we are in substantial compliance with all applicable laws and regulations relating to the operations of our facilities.

Our operations are subject to extensive regulation by the EPA and other state and local authorities relating to handling and discharge of waste water, storm water, air emissions, treatment, storage and disposal of wastes, handling of hazardous substances and remediation of contaminated soil, surface water and groundwater. Our Mexican operations also are subject to extensive regulation by Mexican environmental authorities. The EPA and/or other US or Mexican state and local authorities may, from time to time, adopt revisions to environmental rules and regulations, and/or changes in the terms and conditions of our environmental permits, with which we must comply. Compliance with existing or new environmental requirements, including more stringent limitations imposed or expected in recently-renewed or soon-to be renewed environmental permits, may require capital expenditures and operating expenses which may be significant.

Some of our properties have been impacted by contamination from spills or other releases, and we have incurred costs to remediate such contamination. In addition, in the past we acquired businesses with operations such as pesticide and fertilizer production that involved greater use of hazardous materials and generation of more hazardous wastes than our current operations. While many of those operations have been sold or closed, some environmental laws impose strict and, in certain circumstances, joint and several liability for costs of investigation and remediation of contaminated sites on current and former owners and operators of the sites, and on persons who arranged for disposal of wastes at such sites. In addition, current owners or operators of such contaminated sites may seek to recover cleanup costs from us based on past operations or contractual indemnifications. See “Item 1A. Risk Factors” for risks associated with compliance with existing

Table of Contents

or changing environmental requirement.
We anticipate increased regulation by the USDA concerning food safety, by the FDA concerning the use of medications in feed and by the EPA and various other state agencies concerning discharges to the environment. Although we do not anticipate any regulations having a material adverse effect upon us, a material adverse effect may occur.

Employees

As of December 25, 2011, we employed approximately 34,500 persons in the US and approximately 5,000 persons in Mexico. Approximately 36.0% of the Company's employees were covered under collective bargaining agreements. Substantially all employees covered under collective bargaining agreements are covered under agreements that expired in 2011 and have yet to be renegotiated or will expire in 2012. We have not experienced any labor-related work stoppage at any location in over seven years. We believe our relations with our employees are satisfactory. At any given time, we will be in some stage of contract negotiation with various collective bargaining units. The Company is currently in negotiations with union locals in eight locations, and there is no assurance that agreement will be reached, or if reached, on terms that are favorable to the Company. In the absence of an agreement, we may become subject to a strike, a work stoppage or other labor action at any of these locations.

Financial Information about Foreign Operations

Our foreign operations are in Mexico. Geographic financial information is set forth in "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation."

Available Information

The Company's Internet website is http://www.pilgrims.com. The Company makes available, free of charge, through its Internet website, the Company's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, Directors and Officers Forms 3, 4 and 5, and amendments to those reports, as soon as reasonably practicable after electronically filing such materials with, or furnishing them to, the Securities and Exchange Commission. The public may read and copy any materials that the Company files with the Securities and Exchange Commission at its Public Reference Room at 100 F Street, NE, Washington, DC 20549 and may obtain information about the operation of the Public Information Room by calling the Securities and Exchange Commission at 1-800-SEC-0330.
In addition, the Company makes available, through its Internet website, the Company's Business Code of Conduct and Ethics, Corporate Governance Guidelines and the written charter of the Audit Committee, each of which is available in print to any stockholder who requests it by contacting the Secretary of the Company at 1770 Promontory Circle, Greeley, Colorado 80634-9038. Information contained on the Company's website is not included as part of, or incorporated by reference into, this annual report.

Executive Officers

Set forth below is certain information relating to our current executive officers:

Name	Age	Positions
Wesley Mendonça Batista	41	Chairman of the Board
William W. Lovette	51	President and Chief Executive Officer
Fabio Sandri	40	Chief Financial Officer

Table of Contents

Wesley Mendonça Batista, 41, currently serves as Chairman of the Board of Pilgrim's Pride Corporation. Mr. Batista became President and Chief Executive Officer of JBS S.A. in February 2011. Mr. Batista previously served as President and Chief Executive Officer of JBS USA for approximately four years. Mr. Batista also serves as Chairman of the Board of JBS USA and is the Vice President of JBS S.A.'s board of directors. Mr. Batista has served in various capacities at JBS S.A. since 1987. Mr. Batista is the brother of Joesley Mendonça Batista, Chairman of the Board of JBS S.A., and José Batista Júnior, a Director of the Company and a Director of JBS S.A., and is the son of José Batista Sobrinho, the founder of JBS S.A. and a member of its board of directors. Mr. Batista brings to our board significant senior leadership and industry experience. Mr. Batista has long been one of the most respected executives in Brazil's protein industry, and his reputation is now firmly established worldwide. Mr. Batista grew up in the protein industry, and it is his strategic insight and entrepreneurial spirit that has facilitated the growth of JBS S.A. through numerous acquisitions, expanding its reach across the globe. As Chairman of the Board, Mr. Batista has direct responsibility for Pilgrim's Pride's strategy and operations.

William W. Lovette, 51, joined Pilgrim's as President and Chief Executive Officer on January 3, 2011. He brings more than 29 years of industry leadership experience to Pilgrim's. He previously served two years as President and Chief Operating Officer of Case Foods, Inc. Before joining Case Foods, Inc., Mr. Lovette spent 25 years with Tyson Foods in various roles in senior management, including President of its International Business Unit, President of its Foodservice Business Unit and Senior Group Vice President of Poultry and Prepared Foods. Mr. Lovette earned a B.S. degree from Texas A&M University. In addition, he is a graduate of Harvard Business School's Advanced Management Program.

Fabio Sandri, 40, has served as the Chief Financial Officer for Pilgrim's since June 2011. He previously served as the chief financial officer of Estacio Participações, the private post-secondary educational institution in Brazil since April 2010. From November 2008 until April 2010, he was the chief financial officer of Imbra SA, a provider of dental services based in Sao Paolo, Brazil. Commencing in 2005 through October 2008, he was employed by Braskem S.A., a New York Stock Exchange-listed petrochemical company headquartered in Camaçari, Brazil, first from 2005 to 2007 as its strategy director and from 2007 until his departure as its corporate controller. He earned his Masters in Business Administration in 2001 from the Wharton School at the University of Pennsylvania and a degree in electrical engineering in 1993 from Escola Politécnica da Universidade de São Paulo.

Item 1A. Risk Factors

Forward Looking Statements

Certain written and oral statements made by our Company and subsidiaries of our Company may constitute "forward-looking statements" as defined under the Private Securities Litigation Reform Act of 1995. This includes statements made herein, in our other filings with the SEC, in press releases, and in certain other oral and written presentations.

Statements of our intentions, beliefs, expectations or predictions for the future, denoted by the words "anticipate," "believe," "estimate," "expect," "plan," "project," "imply," "intend," "foresee" and similar expressions, are forward-looking st that reflect our current views about future events and are subject to risks, uncertainties and assumptions. Such risks, uncertainties and assumptions include those described under "Risk Factors" below and elsewhere in this annual report. Actual results could differ materially from those projected in these forward-looking statements as a result of these factors, among others, many of which are beyond our control.

Table of Contents

In making these statements, we are not undertaking, and specifically decline to undertake, any obligation to address or update each or any factor in future filings or communications regarding our business or results, and we are not undertaking to address how any of these factors may have caused changes in information contained in previous filings or communications. The risks described below are not the only risks we face, and additional risks and uncertainties may also impair our business operations. The occurrence of any one or more of the following or other currently unknown factors could materially adversely affect our business and operating results.

Risk Factors

The following risk factors should be read carefully in connection with evaluating our business and the forward-looking information contained in this annual report on Form 10-K. Any of the following risks could materially adversely affect our business, operations, industry or financial position or our future financial performance. While we believe we have identified and discussed below all risk factors affecting our business that we believe are material, there may be additional risks and uncertainties that are not presently known or that are not currently believed to be significant that may adversely affect our business, operations, industry, financial position and financial performance in the future.

Industry cyclicality can affect our earnings, especially due to fluctuations in commodity prices of feed ingredients and chicken.

Profitability in the chicken industry is materially affected by the commodity prices of feed ingredients and chicken, which are determined by supply and demand factors. As a result, the chicken industry is subject to cyclical earnings fluctuations.

The production of feed ingredients is positively or negatively affected primarily by the global level of supply inventories and demand for feed ingredients, the agricultural policies of the United States and foreign governments and weather patterns throughout the world. In particular, weather patterns often change agricultural conditions in an unpredictable manner. A significant change in weather patterns could affect supplies of feed ingredients, as well as both the industry's and our ability to obtain feed ingredients, grow chickens or deliver products. More recently, feed prices have been impacted by increased demand both domestically for ethanol and globally for protein production. Market prices for feed ingredients decreased throughout 2009 and the first six months of 2010, but rose significantly again from the third quarter of 2010 to the second quarter of 2011. These prices remained at historically high levels throughout the third quarter of 2011 before decreasing in the fourth quarter of 2011. Market prices for feed ingredients remain volatile. Consequently, there can be no assurance that the price of corn or soybean meal will not continue to rise as a result of, among other things, increasing demand for these products around the world and alternative uses of these products, such as ethanol and biodiesel production.

High feed ingredient prices have had, and may continue to have, a materially adverse effect on our operating results, which has resulted in, and may continue to result in, additional noncash expenses due to impairment of the carrying amounts of certain of our assets. We periodically seek, to the extent available, to enter into advance purchase commitments or financial derivative contracts for the purchase of feed ingredients in an effort to manage our feed ingredient costs. The use of these instruments may not be successful. In addition, we have not designated the derivative financial instruments that we have purchased to mitigate commodity purchase exposures as cash flow hedges. Therefore, we recognized changes in the fair value of these derivative financial instruments immediately in earnings. Unexpected changes in the fair value of these instruments could adversely affect the results of our operations.

Table of Contents

As a result of high corn and soybean meal prices and low chicken prices, we have experienced significant losses during 2011. If chicken prices and feed ingredient prices fail to improve relative to the average 2011 prices, then, despite the amendments to the Exit Credit Facility obtained in connection with the Rights Offering, we may not be able to continue to comply with the financial covenants in the Exit Credit Facility.

Outbreaks of livestock diseases in general and poultry diseases in particular, including avian influenza, can significantly affect our ability to conduct our operations and demand for our products.

We take precautions designed to ensure that our flocks are healthy and that our processing plants and other facilities operate in a sanitary and environmentally-sound manner. However, events beyond our control, such as the outbreaks of disease, either in our own flocks or elsewhere, could significantly affect demand for our products or our ability to conduct our operations. Furthermore, an outbreak of disease could result in governmental restrictions on the import and export of our fresh chicken or other products to or from our suppliers, facilities or customers, or require us to destroy one or more of our flocks. This could also result in the cancellation of orders by our customers and create adverse publicity that may have a material adverse effect on our ability to market our products successfully and on our business, reputation and prospects.

During the first half of 2006, there was substantial publicity regarding a highly pathogenic strain of avian influenza, known as H5N1, which has been affecting Asia since 2002 and which has also been found in Europe and Africa. It is widely believed that H5N1 is being spread by migratory birds, such as ducks and geese. There have also been some cases where H5N1 is believed to have passed from birds to humans as humans came into contact with live birds that were infected with the disease.

Although highly pathogenic H5N1 has not been identified in North America, there have been outbreaks of low pathogenic strains of avian influenza in North America, and in Mexico outbreaks of both high and low-pathogenic strains of avian influenza are a fairly common occurrence. Historically, the outbreaks of low pathogenic avian influenza have not generated the same level of concern, or received the same level of publicity or been accompanied by the same reduction in demand for poultry products in certain countries as that associated with the highly pathogenic H5N1 strain. Accordingly, even if the highly pathogenic H5N1 strain does not spread to North or Central America, there can be no assurance that it will not materially adversely affect demand for North or Central American produced poultry internationally and/or domestically, and, if it were to spread to North or Central America, there can be no assurance that it would not significantly affect our ability to conduct our operations and/or demand for our products, in each case in a manner having a material adverse effect on our business, reputation and/or prospects.

If our poultry products become contaminated, we may be subject to product liability claims and product recalls.

Poultry products may be subject to contamination by disease-producing organisms, or pathogens, such as Listeria monocytogenes, Salmonella and generic E.coli. These pathogens are generally found in the environment, and, as a result, there is a risk that they, as a result of food processing, could be present in our processed poultry products. These pathogens can also be introduced as a result of improper handling at the further processing, foodservice or consumer level. These risks may be controlled, although not eliminated, by adherence to good manufacturing practices and finished product testing. We have little, if any, control over proper handling once the product has been shipped. Illness and death may result if the pathogens are not eliminated at the further processing, foodservice or consumer level. Even an inadvertent shipment of contaminated products is a violation of law and may lead to increased risk of exposure to product liability claims, product recalls and increased scrutiny by federal and state regulatory agencies and may have a material adverse effect on our business, reputation and prospects.

Table of Contents

Product liability claims or product recalls can adversely affect our business reputation, expose us to increased scrutiny by federal and state regulators and may not be fully covered by insurance.

The packaging, marketing and distribution of food products entail an inherent risk of product liability and product recall and the resultant adverse publicity. We may be subject to significant liability if the consumption of any of our products causes injury, illness or death. We could be required to recall certain of our products in the event of contamination or damage to the products. In addition to the risks of product liability or product recall due to deficiencies caused by our production or processing operations, we may encounter the same risks if any third party tampers with our products. We cannot assure you that we will not be required to perform product recalls, or that product liability claims will not be asserted against us, in the future. Any claims that may be made may create adverse publicity that would have a material adverse effect on our ability to market our products successfully or on our business, reputation, prospects, financial condition and results of operations.

If our poultry products become contaminated, we may be subject to product liability claims and product recalls. There can be no assurance that any litigation or reputational injury associated with product recalls will not have a material adverse effect on our ability to market our products successfully or on our business, reputation, prospects, financial condition and results of operations.

We currently maintain insurance with respect to certain of these risks, including product liability insurance, property insurance, workers compensation insurance, business interruption insurance and general liability insurance, but in many cases such insurance is expensive, difficult to obtain and no assurance can be given that such insurance can be maintained in the future on acceptable terms, or in sufficient amounts to protect us against losses due to any such events, or at all. Moreover, even though our insurance coverage may be designed to protect us from losses attributable to certain events, it may not adequately protect us from liability and expenses we incur in connection with such events. Additionally, in the past, two of our insurers encountered financial difficulties and were unable to fulfill their obligations under the insurance policies as anticipated and, separately, two of our other insurers contested coverage with respect to claims covered under policies purchased, forcing us to litigate the issue of coverage before we were able to collect under these policies.

Competition in the chicken industry with other vertically integrated poultry companies may make us unable to compete successfully in these industries, which could adversely affect our business.

The chicken industry is highly competitive. In both the United States and Mexico, we primarily compete with other vertically integrated chicken companies.

In general, the competitive factors in the US chicken industry include:

- Price;
- Product quality;
- Product development;
- Brand identification;
- Breadth of product line; and
- Customer service.

Competitive factors vary by major market. In the foodservice market, competition is based on consistent quality, product development, service and price. In the US retail market, we believe that competition is based on product quality, brand awareness, customer service and price. Further, there is some competition with non-vertically integrated further processors in the prepared chicken business. In Mexico, where product

Table of Contents

differentiation has traditionally been limited, we believe product quality and price have been the most critical competitive factors.

The loss of one or more of our largest customers could adversely affect our business.

Our two largest customers accounted for approximately 15.9% of our net sales in 2011, and our largest customer, Wal-Mart Stores Inc., accounted for 9.9% of our net sales in 2011. Our business could suffer significant setbacks in revenues and operating income if we lost one or more of our largest customers, or if our customers' plans and/or markets should change significantly.

Our foreign operations pose special risks to our business and operations.

We have significant operations and assets located in Mexico and may participate in or acquire operations and assets in other foreign countries in the future. Foreign operations are subject to a number of special risks, including among others:

- Currency exchange rate fluctuations;
- Trade barriers;
- Exchange controls;
- Expropriation; and
- Changes in laws and policies, including tax laws and laws governing foreign-owned operations.

Currency exchange rate fluctuations have adversely affected us in the past. Exchange rate fluctuations or one or more other risks may have a material adverse effect on our business or operations in the future.

Our operations in Mexico are conducted through subsidiaries organized under the laws of Mexico. We may rely in part on intercompany loans and distributions from our subsidiaries to meet our obligations. Claims of creditors of our subsidiaries, including trade creditors, will generally have priority as to the assets of our subsidiaries over our claims. Additionally, the ability of our Mexican subsidiaries to make payments and distributions to us will be subject to, among other things, Mexican law. In the past, these laws have not had a material adverse effect on the ability of our Mexican subsidiaries to make these payments and distributions. However, laws such as these may have a material adverse effect on the ability of our Mexican subsidiaries to make these payments and distributions in the future.

Disruptions in international markets and distribution channels could adversely affect our business.

Historically, we have targeted international markets to generate additional demand for our products. In particular, given US customers' general preference for white meat, we have targeted international markets for the sale of dark chicken meat, specifically leg quarters, which are a natural by-product of our US operations' concentration on prepared chicken products. As part of this initiative, we have created a significant international distribution network into several markets in Mexico, CIS, and the Far East. Our success in these markets may be, and our success in recent periods has been, adversely affected by disruptions in chicken export markets. For example:

- As a result of the January 2008 elimination of a tariff with regard to the import of chicken leg quarters into Mexico, greater amounts of chicken have been imported into Mexico from the US. On February 7, 2011, Mexico announced that it would investigate US producers over dumping complaints lodged by Mexican chicken processors. Mexican chicken processors allege US producers sold chicken legs and thighs on the Mexican market below their cost of production in 2010. The reinstatement of tariffs

Table of Contents

in Mexico would affect our ability to export products to Mexico and could have a material negative effect on our results of operations.

- China imposed anti-dumping and countervailing duties on the US chicken producers in 2010. Until these duties are modified or eliminated, the duty rates can be expected to deter Chinese importers from purchases of US-origin chicken products, including our chicken products, and can be expected to diminish the volume of such purchases.

- Russia effectively banned US poultry imports shipped after January 1, 2010 because of a chlorine treatment procedure required by US Department of Agriculture regulations. While Russia did allow US poultry imports to resume and we began exporting products to Russia again in September 2010, there can be no assurances that new disruptions will not arise. For example, Russia has indicated that it will develop its own internal poultry production and has set an import quota of 330,000 metric tons of poultry for 2012.

A significant risk is disruption due to import restrictions and tariffs, other trade protection measures, and import or export licensing requirements. In addition, disruptions may be caused by outbreaks of disease such as avian influenza, either in our flocks or elsewhere in the world, and resulting changes in consumer preferences. For example, the occurrence of avian influenza in Eastern Europe in October 2005 affected demand for poultry in Europe.
One or more of these or other disruptions in the international markets and distribution channels could adversely affect our business.

Regulation, present and future, is a constant factor affecting our business.

Our operations will continue to be subject to federal, state and local governmental regulation, including in the health, safety and environmental areas. We anticipate increased regulation by various agencies concerning food safety, the use of medication in feed formulations and the disposal of chicken by-products and wastewater discharges.
Also, changes in laws or regulations or the application thereof may lead to government enforcement actions and the resulting litigation by private litigants. We are aware of an industry-wide investigation by the Wage and Hour Division of the US Department of Labor to ascertain compliance with various wage and hour issues, including the compensation of employees for the time spent on such activities such as donning and doffing work equipment. We have been named a defendant in a number of related suits brought by employees. Due, in part, to the government investigation and the recent US Supreme Court decision in IBP, Inc. v. Alvarez, it is possible that we may be subject to additional employee claims.
Further, on December 8, 2011, the USDA's Grain Inspection, Packers and Stockyards Administration issued new regulations under the Packers and Stockyards Act that would apply to all stages of a live poultry dealer's poultry grow-out. The new regulations will likely have a significant impact on the relationship between integrated poultry processors, like us, and their independent growers. Among other things, the new regulations will substantially limit our and our independent contract growers' freedom of contract, and affect the way we pay our independent contract growers. Many of the new regulations are, in our view, unclear, vague and will likely require litigation to determine their scope and impact. Such litigation could be costly to our industry and us. The new regulations could also lead to increased enforcement activity and private litigation against integrated poultry producers that could have a material adverse effect on our operations and financial operating results. Additionally, the new regulations could increase the cost of doing business or change the way in which we do business.

Table of Contents

In addition, unknown matters, new laws and regulations, or stricter interpretations of existing laws or regulations may also materially affect our business or operations in the future.

New immigration legislation or increased enforcement efforts in connection with existing immigration legislation could cause the costs of doing business to increase, cause us to change the way we conduct our business or otherwise disrupt our operations.

Immigration reform continues to attract significant attention in the public arena and the US Congress. If new federal immigration legislation is enacted or if states in which we do business enact immigration laws, such laws may contain provisions that could make it more difficult or costly for us to hire US citizens and/or legal immigrant workers. In such case, we may incur additional costs to run our business or may have to change the way we conduct our operations, either of which could have a material adverse effect on our business, operating results and financial condition. Also, despite our past and continuing efforts to hire only US citizens and/or persons legally authorized to work in the US, we may be unable to ensure that all of their employees are US citizens and/or persons legally authorized to work in the US. For example, US Immigration and Customs Enforcement has investigated identity theft within our workforce. With our cooperation, during 2008 US Immigration and Customs Enforcement arrested approximately 300 employees believed to have engaged in identity theft at five of our facilities. No assurances can be given that further enforcement efforts by governmental authorities will not disrupt a portion of our workforce or operations at one or more facilities, thereby negatively impacting our business. Also, no assurance can be given that further enforcement efforts by governmental authorities will not result in the assessment of fines that could adversely affect our financial position, operating results or cash flows.

Loss of essential employees could have a significant negative impact on our business.

Our success is largely dependent on the skills, experience, and efforts of our management and other employees. The loss of the services of one or more members of our senior management or of numerous employees with essential skills could have a negative effect on our business, financial condition and results of operations. If we are not able to retain or attract talented, committed individuals to fill vacant positions when needs arise, it may adversely affect our ability to achieve our business objectives.

Our performance depends on favorable labor relations with our employees and our compliance with labor laws. Any deterioration of those relations or increase in labor costs due to our compliance with labor laws could adversely affect our business.

As of December 25, 2011, we employed approximately 34,500 persons in the US and approximately 5,000 persons in Mexico. Approximately 36.0% of the Company’s employees were covered under collective bargaining agreements. Substantially all employees covered under collective bargaining agreements are covered under agreements that expired in 2011 and have yet to be renegotiated or will expire in 2012. We have not experienced any labor-related work stoppage at any location in over seven years. We believe our relations with our employees are satisfactory. At any given time, we will be in some stage of contract negotiation with various collective bargaining units. The Company is currently in negotiation with union locals in eight locations, and there is no assurance that agreement will be reached, or if reached, on terms that are favorable to the Company. In the absence of an agreement, we may become subject to a strike, a work stoppage or other labor action at any of these locations.

Extreme weather or natural disasters could negatively impact our business.

Extreme weather or natural disasters, including droughts, floods, excessive cold or heat, hurricanes or other storms, could impair the health or growth of our flocks, production or availability of feed ingredients,

Table of Contents

or interfere with our operations due to power outages, fuel shortages, damage to our production and processing facilities or disruption of transportation channels, among other things. Any of these factors could have an adverse effect on our financial results.

We may face significant costs for compliance with existing or changing environmental requirements and for potential environmental obligations relating to current or discontinued operations.

Compliance with existing or changing environmental requirements, including more stringent limitations imposed or expected in recently-renewed or soon-to be renewed environmental permits, will require capital expenditures for installation of new or upgraded pollution control equipment at some of our facilities. In addition, a number of our facilities, that have been operating below capacity due to economic conditions or where upgrades have been delayed or deferred, will require capital expenditures before production can be restored to pre-bankruptcy levels in compliance with environmental requirements.

In the past, we have acquired businesses with operations such as pesticide and fertilizer production that involved greater use of hazardous materials and generation of more hazardous wastes than our current operations. While many of those operations have been sold or closed, some environmental laws impose strict and, in certain circumstances, joint and several liability for costs of investigation and remediation of contaminated sites on current and former owners and operators of the sites, and on persons who arranged for disposal of wastes at such sites. In addition, current owners or operators of such contaminated sites may seek to recover cleanup costs from us based on past operations or contractual indemnifications.

New environmental requirements, stricter interpretations of existing environmental requirements, or obligations related to the investigation or clean-up of contaminated sites, may materially affect our business or operations in the future.

JBS USA holds a majority of our common stock and has the ability to control the vote on most matters brought before the holders of our common stock.

JBS USA holds a majority of the shares and voting power of our common stock and is entitled to appoint a majority of the members of our board of directors. As a result, JBS USA will, subject to restrictions on its voting power and actions in a stockholders agreement between us and JBS USA and our organization documents, have the ability to control our management, policies and financing decisions, elect a majority of the members of our board of directors at the annual meeting and control the vote on most matters coming before the holders of our common stock.

Our majority stockholder, JBS USA, has committed to participate in the Rights Offering and exercise the basic subscription and over-subscription privilege in full and has executed an agreement reflecting its commitment. Once JBS USA exercises its basic and over-subscription privilege in full and no other stockholders do so, the percentage of the outstanding common stock beneficially owned by JBS USA would increase from approximately 67.2% to 72.8% based on the number of shares of common stock outstanding as of January 17, 2012. Under the stockholders agreement between us and JBS USA, JBS USA has the ability to elect up to six members of our board of directors and the other holders of our common stock have the ability to elect up to two members of our board of directors. If the percentage of our outstanding common stock owned by JBS USA exceeds 80%, then JBS USA would have the ability to elect one additional member of our board of directors while the other holders of our common stock would have the ability to elect one less member of our board of directors.

Our operations are subject to general risks of litigation.

We are involved on an on-going basis in litigation with our independent contract growers or arising

Table of Contents

in the ordinary course of business or otherwise. Trends in litigation may include class actions involving consumers, shareholders, employees or injured persons, and claims relating to commercial, labor, employment, antitrust, securities or environmental matters. Litigation trends and the outcome of litigation cannot be predicted with certainty and adverse litigation trends and outcomes could adversely affect our financial results.

We depend on contract growers and independent producers to supply us with livestock.

We contract primarily with independent contract growers to raise the live chickens processed in our poultry operations. If we do not attract and maintain contracts with growers or maintain marketing and purchasing relationships with independent producers, our production operations could be negatively affected.

Changes in consumer preference could negatively impact our business.

The food industry in general is subject to changing consumer trends, demands and preferences. Trends within the food industry change often, and failure to identify and react to changes in these trends could lead to, among other things, reduced demand and price reductions for our products, and could have an adverse effect on our financial results.

The consolidation of customers could negatively impact our business.

Our customers, such as supermarkets, warehouse clubs and food distributors, have consolidated in recent years, and consolidation is expected to continue throughout the US and in other major markets. These consolidations have produced large, sophisticated customers with increased buying power who are more capable of operating with reduced inventories, opposing price increases, and demanding lower pricing, increased promotional programs and specifically tailored products. These customers also may use shelf space currently used for our products for their own private label products. Because of these trends, our volume growth could slow or we may need to lower prices or increase promotional spending for our products, any of which would adversely affect our financial results.

Our future financial and operating flexibility may be adversely affected by our significant leverage.

We have substantial indebtedness, which could adversely affect our financial condition. On a consolidated basis, as of December 25, 2011, we had approximately $926.8 million in secured indebtedness, $546.8 million of unsecured indebtedness and had the ability to borrow approximately $248.0 million under the credit agreements, unless such requirement is waived by the lenders party thereto. Significant amounts of cash flow will be necessary to make payments of interest and repay the principal amount of such indebtedness.

The degree to which we are leveraged could have important consequences because:

- It could affect our ability to satisfy our obligations under the credit agreement;
- A substantial portion of our cash flow from operations is required to be dedicated to interest and principal payments and may not be available for operations, working capital, capital expenditures, expansion, acquisitions or general corporate or other purposes;
- Our ability to obtain additional financing and to fund working capital, capital expenditures and other general corporate requirements in the future may be impaired;
- We may be more highly leveraged than some of our competitors, which may place us at a competitive disadvantage;

Table of Contents

- Our flexibility in planning for, or reacting to, changes in our business may be limited;
- It may limit our ability to pursue acquisitions and sell assets; and
- It may make us more vulnerable in the event of a continued or new downturn in our business or the economy in general.

Our ability to make payments on and to refinance our debt, including the Exit Credit Facility, will depend on our ability to generate cash in the future. This, to a certain extent, is subject to various business factors (including, among others, the commodity prices of feed ingredients and chicken) and general economic, financial, competitive, legislative, regulatory, and other factors that are beyond our control.

There can be no assurance that we will be able to generate sufficient cash flow from operations or that future borrowings will be available under our credit facilities in an amount sufficient to enable us to pay our debt obligations, including obligations under the Exit Credit Facility, or to fund our other liquidity needs. We may need to refinance all or a portion of their debt on or before maturity. There can be no assurance that we will be able to refinance any of their debt on commercially reasonable terms or at all.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Operating Facilities

Our main operating facilities are as follows:

	Operating	Idled	Capacity[(a)(b)]	Average Capacity Utilization[(b)]	
US Chicken Facilities					
Fresh Processing Plants	25	5	33.5 million head	90.5	%
Prepared Foods Cook Plants	8	—	22.6 million pounds	73.1	%
Feed mills	26	3	11.9 million tons	74.3	%
Hatcheries	30	10	1,935.0 million eggs	84.6	%
Rendering	6	1	7,300 tons	59.9	%

Other Facilities and Information

Our corporate offices share a building with JBS USA in Greeley, Colorado. We own a partially automated distribution freezer located outside of Pittsburg, Texas, which includes 125,000 square feet of storage area. We own a building in Richardson, Texas, which houses our computer data center; and an office building in Broadway, Virginia, which houses additional sales and marketing, research and development, and support activities. We own an office building in Mexico City, which houses our Mexican marketing office and we lease an office building in Querétaro, Mexico, which houses our Mexican administrative functions. In addition, we own administrative office buildings in Pittsburg, Texas and Atlanta, Georgia that we are currently marketing for sale.

Most of our domestic property, plant and equipment are pledged as collateral on our long-term debt and credit facilities. See "Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operation.”

Item 3. Legal Proceedings

Grower Claims and Proceedings

Ricky Arnold et al. v. Pilgrim's Pride Corp., et al. On September 10, 2008, a lawsuit styled "Ricky Arnold, et al. v. Pilgrim's Pride Corp., et al." was filed against our Company and two of its representatives. In this lawsuit, filed in the Circuit Court of Van Buren County, Arkansas, nearly 100 contract poultry growers and their spouses assert claims of fraud and deceit, constructive fraud, fraud in the inducement, promissory estoppel, and violations of the Arkansas Livestock and Poultry Contract Protection Act relating to the idling of our Clinton, Arkansas processing plant. The total amount of damages sought by the contract poultry growers is unliquidated and unknown at this time. We filed a Notice of Suggestion of Bankruptcy. The Court has not issued an order in response to it. The plaintiffs filed proofs of claim in the Bankruptcy Court, and we filed objections to the proofs of claim. The plaintiffs in the Arnold case, and a number of other growers from the Clinton, Arkansas facility filed proofs of claim in the bankruptcy case. We anticipate that the Arnold case will be resolved as a part of the claim resolution process in the Bankruptcy Court. We express no opinion as to the likelihood of an unfavorable outcome or the amount or range of any possible loss to us.

Sheila Adams, et al. v. Pilgrim's Pride Corporation. On June 1, 2009, approximately 555 former and current independent contract broiler growers, their spouses and poultry farms filed an adversary proceeding against us in the Bankruptcy Court styled "Sheila Adams, et al. v. Pilgrim's Pride Corporation." In the adversary proceeding, the plaintiffs assert claims against us for: (i) violations of Sections 202(a), (b) and (e), 7 US C. § 192 of the Packers and Stockyards Act of 1921 (the "PSA"); (ii) intentional infliction of emotional distress; (iii) violations of the Texas Deceptive Trade Practices Act ("DTPA"); (iv) promissory estoppel; (v) simple fraud; and (vi) fraud by nondisclosure. The plaintiffs also filed a motion to withdraw the reference of the adversary proceeding from the Bankruptcy Court to the U.S District for the Eastern Court of Texas ("Marshall Court"). The motion was filed with the US District Court for the Northern District of Texas-Fort Worth Division (the "Fort Worth Court"). The Bankruptcy Court recommended the reference be withdrawn, but that the Fort Worth Court retain venue over the action to ensure against forum shopping. The Fort Worth Court granted the motion to withdraw the reference and consolidated this action with the City of Clinton proceeding described below. We filed a motion to dismiss the plaintiffs' claims. The Fort Worth Court granted in part and denied in part our motion, dismissing the following claims and ordering the plaintiffs to file a motion to amend their lawsuit and re-plead their claims with further specificity or the claims would be dismissed with prejudice: (i) intentional infliction of emotional distress; (ii) promissory estoppel; (iii) simple fraud and fraudulent nondisclosure; and (iv) DTPA claims with respect to growers from Oklahoma, Arkansas, and Louisiana. The plaintiffs filed a motion for leave to amend on October 7, 2009. Plaintiffs' motion for leave was granted and the plaintiffs filed their Amended Complaint on December 7, 2009. Subsequent to the

Table of Contents

Fort Worth Court granting in part and denying in part our motion to dismiss, the plaintiffs filed a motion to transfer venue of the proceeding from the Fort Worth Court to the Marshall Court. We filed a response to the motion, but the motion to transfer was granted on December 17, 2009. On December 29, 2009, we filed our answer to plaintiffs' Amended Complaint with the Marshall Court. A bench trial commenced on June 16, 2011. The trial concluded as to the El Dorado growers on August 25, 2011. On September 30, 2011, the Marshall Court issued its Findings of Facts and Conclusions of Law and Judgment finding in favor of the Company on each of the grower claims with exception of claims under 7 U.S.C. §192(e), and awarding damages to plaintiffs in the aggregate of approximately $25.8 million. Afterward, the Company filed post-judgment motions attacking the trial court's findings of fact and conclusions of law, which, on December 28, 2011, were granted in part and resulted in a reduction of the damages award from $25.8 million to $25.6 million. On January 19, 2012, the Company appealed the findings of fact and conclusions of law and decision concerning the post-judgment motions to the United States Fifth Circuit Court of Appeals. The Company intends to vigorously pursue its appellate rights and defend against the underlying judgment. While the outstanding judgment is reasonably possible, the Company has recorded an estimated probable loss that is less than the outstanding judgment. No date has been scheduled for trying the remaining growers' claims, but the Company intends to vigorously defend against these claims. Although the likelihood of financial loss related to the remaining growers' claims is reasonably possible, an estimate of potential loss cannot be determined at this time because of now conflicting legal authority, the factual nature of the various growers' individual claims, and a new judge who will preside over the remaining bench trials. There can be no assurances that other similar claims may not be brought against the Company.

Grower Proofs of Claim. Approximately 161 former independent contract broiler growers, their spouses and poultry farms filed proofs of claim against us relating to the idling of the Company's El Dorado, Arkansas; Douglas, Georgia; Siler City and Sanford, North Carolina; and Athens, Alabama processing facilities. Eight of the growers also filed administrative claims against us. The growers' claims include: (i) fraud; (ii) fraudulent inducement; (iii) violations of the Packers & Stockyards Act; (iv) breach of fiduciary duty; (v) promissory estoppel; (vi) equitable estoppel; (vii) restitution; and (viii) deceptive trade practices. The claims relate to the growers' allegations that they were required to spend significant amounts improving their poultry farms in order to continue their contractual relationship with our Company and predecessor companies. On December 17, 2009, we filed objections to the proofs of claim and administrative claims. The parties have engaged in discovery. Since discovery commenced, we announced that we are reopening the Douglas, Georgia complex. Consequently, we circulated new poultry grower contracts with releases to those growers that own and/or operate poultry farms within or near Douglas, Georgia. Because numerous growers signed the poultry grower agreement that contained the release of their claims, approximately 133 of the 161 growers in this consolidated claims administration proceeding withdrew their proofs of claim and motions for administrative expense claims. There are currently approximately 48 growers in this proceeding. After engaging in discovery motion practice and a trial, the majority of the 48 growers' claims were dismissed. The Company subsequently settled the remaining claims.

Numerous former independent contract growers located in our Clinton, Arkansas complex filed proofs of claim against us relating to the Arnold litigation referenced above. The claims include: (i) fraud and deceit; (ii) constructive fraud; (iii) fraud in the inducement; (iv) promissory estoppel; (v) a request for declaratory relief; and (vi) violations of the Arkansas Livestock and Poultry Contract Protection Act, and relate to the growers' allegations that they were required to spend significant amounts improving their poultry farms in order to continue their contractual relationship with our Company and predecessor companies prior to us idling our Clinton processing facility. Most of the growers in this consolidated claims administration proceeding were named plaintiffs in the case styled, "Ricky Arnold, et al. v. Pilgrim's Pride Corporation, et al." discussed above. On November 30, 2009, we filed objections to the proofs of claim. On August 2, 2010, we filed numerous motions for summary judgment requesting the Bankruptcy Court to dismiss each grower's causes of action against our Company. In response to the dispositive motions, the growers conceded that

their numerous fraud and statutory claims lacked merit; consequently, the parties recently submitted agreed orders dismissing these claims with prejudice. The sole remaining cause of action alleged by the growers against us is promissory estoppel. The hearing on our motions for summary judgment with respect to the promissory estoppel claims occurred on October 19, 2010. On December 15, 2010, the Bankruptcy Court granted the Company's summary judgment motion on 106 of the 107 growers' promissory estoppel claims. The Company settled with the grower whose claims were not dismissed for an immaterial amount. The growers whose claims were dismissed appealed the decision to the District Court, which, on December 19, 2011, affirmed the Bankruptcy Court's decision. On January 17, 2012, the growers appealed the District Court's decision to the United States Fifth Circuit of Court of Appeals. The Company intends to defend vigorously against the merits of the growers' appeal. We express no opinion as to the likelihood of an unfavorable outcome or the amount or range of any possible loss to us.

Securities Litigation

On October 29, 2008, Ronald Acaldo filed suit in the US District Court for the Eastern District of Texas, Marshall Division, against us and individual defendants Lonnie "Bo" Pilgrim, Lonnie Ken Pilgrim, J. Clinton Rivers, Richard A. Cogdill and Clifford E. Butler. The Complaint alleged that our Company and the individual defendants violated sections 10(b) and 20(a) of the Securities Exchange Act of 1934, as amended, and Rule 10b-5 promulgated thereunder.

On November 13, 2008, Chad Howes filed suit in the US District Court for the Eastern District of Texas, Marshall Division, against us and individual defendants Lonnie "Bo" Pilgrim, Lonnie Ken Pilgrim, J. Clinton Rivers, Richard A. Cogdill and Clifford E. Butler. The allegations in the Howes Complaint are identical to those in the Acaldo Complaint, as are the class allegations and relief sought. The defendants were never served with the Howes Complaint.

On May 14, 2009, the Court consolidated the Acaldo and Howes cases and renamed the style of the case, "In re: Pilgrim's Pride Corporation Securities Litigation." On May 21, 2009, the Court granted the Pennsylvania Public Fund Group's Motion for Appointment of Lead Plaintiff. Thereafter, on June 26, 2009, the lead plaintiff filed a Consolidated (and amended) Complaint. The Consolidated Complaint dismissed the Company and Clifford E. Butler as Defendants. In addition, the Consolidated Complaint added the following directors as Defendants: Charles L. Black, Key Coker, Blake D. Lovette, Vance C. Miller, James G. Vetter, Jr., Donald L. Wass, Linda Chavez, and Keith W. Hughes. The Consolidated Complaint alleges four causes of action: violations of Sections 10(b) and 20(a) of the Securities and Exchange Act of 1934, as amended, and Rule 10b-5 promulgated thereunder solely against Lonnie "Bo" Pilgrim, Clint Rivers, and Richard A. Cogdill (the "Officer Defendants"). Those claims assert that, during the Class Period of May 5, 2008 through October 28, 2008, the defendants, through various financial statements, press releases and conference calls, made material misstatements of fact and/or omitted to disclose material facts by purportedly failing to completely impair the goodwill associated with the Gold Kist acquisition. The Consolidated Complaint also asserts claims under Section 11 of the Securities Act of 1933 against all defendants, asserting that, statements made in a registration statement in connection with the May 14, 2008 secondary offering of our common stock were materially false and misleading for their failure to completely impair the goodwill associated with the Gold Kist acquisition. Finally, the Consolidated Complaint asserts a violation of Section 15 of the Securities Act of 1933 against the Officer Defendants only, claiming that the Officer Defendants were controlling persons of the Company and the other defendants in connection with the Section 11 violation. By the Consolidated Complaint, the lead plaintiff seeks certification of the Class, undisclosed damages, and costs and attorneys' fees.

On July 27, 2009, defendants filed a Motion to Dismiss the Consolidated Complaint for its failure to adequately plead, as to the Sections 10(b) and 20(a) claims, scienter and loss causation and, as to the Sections

Table of Contents

11 and 15 claims, for its failure to adequately plead misrepresentations and omissions. Defendants requested that the Consolidated Complaint be dismissed with prejudice.

On August 17, 2010, the Court issued its Memorandum Opinion and Order on the motion to dismiss, granting in part and denying in part, the defendants' motion. The Court dismissed without prejudice the plaintiffs' claims alleging securities fraud under Section 10(b) of the Exchange Act and Rule 10b-5 and for controlling person liability under Section 20(a) of the Exchange Act. The Court denied defendants' motion to dismiss with respect to the plaintiffs' claim for negligent misrepresentation under Section 11 of the Securities Act and for controlling person liability under Section 15 of the Securities Act. The plaintiffs were granted leave to amend their complaint but elected not to do so. The defendants filed their Original Answer to the Complaint on November 15, 2010.

On May 9, 2011, the Court issued an Order setting a class certification hearing for February 7, 2012 and ordering the parties to confer and file a Docket Control Order by May 26, 2011. Thereafter, as per the Court's Order, the parties negotiated a proposed Docket Control Order, which was signed by the Court on May 31, 2011.

The parties have reached an agreement to settle this matter for $1.5 million, subject to Court approval. A Stipulation of Settlement was filed on November 14, 2011. On January 23, 2012, the Court issued an order Preliminarily Approving Settlement, in which the Court set a hearing date for the final approval of settlement for May 1, 2012. If the case does not settle as expected, the defendants intend to defend vigorously against the merits of the action and any attempts by the Lead Plaintiff to certify a class action.

ERISA Claims and Proceedings

On December 17, 2008, Kenneth Patterson filed suit in the US District Court for the Eastern District of Texas, Marshall Division, against Lonnie "Bo" Pilgrim, Lonnie Ken Pilgrim, Clifford E. Butler, J. Clinton Rivers, Richard A. Cogdill, Renee N. DeBar, our Compensation Committee and other unnamed defendants (the "Patterson action"). On January 2, 2009, a nearly identical suit was filed by Denise M. Smalls in the same court against the same defendants (the "Smalls action"). The complaints in both actions, brought pursuant to section 502 of the Employee Retirement Income Security Act of 1974 ("ERISA"), 29 US C. § 1132, alleged that the individual defendants breached fiduciary duties to participants and beneficiaries of the Pilgrim's Pride Stock Investment Plan (the "Stock Plan"), as administered through the Pilgrim's Pride Retirement Savings Plan (the "RSP"), and the To-Ricos, Inc. Employee Savings and Retirement Plan (the "To-Ricos Plan") (collectively, the "Plans") by failing to sell the common stock held by the Plans before it declined in value in late 2008, based on factual allegations similar to the allegation made in the Acaldo securities case discussed above. Patterson and Smalls further alleged that they purported to represent a class of all persons or entities who were participants in or beneficiaries of the Plans at any time between May 5, 2008 through the present and whose accounts held our common stock or units in our common stock. Both complaints sought actual damages in the amount of any losses the Plans suffered, to be allocated among the participants' individual accounts as benefits due in proportion to the accounts' diminution in value, attorneys' fees, an order for equitable restitution and the imposition of constructive trust, and a declaration that each of the defendants have breached their fiduciary duties to the Plans' participants.

On July 20, 2009, the Court entered an order consolidating the Smalls and Patterson actions. On August 12, 2009, the Court ordered that the consolidated case will proceed under the caption "In re Pilgrim's Pride Stock Investment Plan ERISA Litigation, No. 2:08-cv-472-TJW."

Patterson and Smalls filed a consolidated amended complaint ("Amended Complaint") on March 2, 2010. The Amended Complaint names as defendants the Pilgrim's Pride Board of Directors, Lonnie "Bo" Pilgrim, Lonnie Ken Pilgrim, Charles L. Black, Linda Chavez, S. Key Coker, Keith W. Hughes, Blake D.

Table of Contents

Lovette, Vance C. Miller, James G. Vetter, Jr., Donald L. Wass, J. Clinton Rivers, Richard A. Cogdill, the Pilgrim's Pride Pension Committee, Robert A. Wright, Jane Brookshire, Renee N. DeBar, the Pilgrim's Pride Administrative Committee, Gerry Evenwel, Stacey Evans, Evelyn Boyden, and "John Does 1-10." The Amended Complaint purports to assert claims on behalf of persons who were participants in or beneficiaries of the RSP or the To-Ricos Plan at any time between January 29, 2008 through December 1, 2008 ("the alleged class period"), and whose accounts included investments in the Company's common stock.

Like the original Patterson and Smalls complaints, the Amended Complaint alleges that the defendants breached ERISA fiduciary duties to participants and beneficiaries of the RSP and To-Ricos Plan by permitting both Plans to continue investing in the Company's common stock during the alleged class period. The Amended Complaint also alleges that certain defendants were "appointing" fiduciaries who failed to monitor the performance of the defendant-fiduciaries they appointed. Further, the Amended Complaint alleges that all defendants are liable as co-fiduciaries for one another's alleged breaches. Plaintiffs seek actual damages in the amount of any losses the RSP and To-Ricos Plan attributable to the decline in the value of the common stock held by the Plans, to be allocated among the participants' individual accounts as benefits due in proportion to the accounts' alleged diminution in value, costs and attorneys' fees, an order for equitable restitution and the imposition of constructive trust, and a declaration that each of the defendants have breached their ERISA fiduciary duties to the RSP and To-Ricos Plan's participants.

The defendants filed a motion to dismiss the Amended Complaint on May 3, 2010. The plaintiffs responded to that motion on July 2, 2010, dropping plaintiff Smalls from the case and adding an additional plaintiff, Stanley Sylvestros. The defendants filed their reply in support of their motion to dismiss on August 2, 2010. The defendants files a notice of supplemental authority in support of their motion to dismiss on April 13, 2011, to which the plaintiffs responded on April 27, 2011. The plaintiffs in turn filed their own notice of supplement authority in opposition to the motion to dismiss on April 27, 2011, to which the defendants responded on May 10, 2011. On December 20, 2011, the case was reassigned to Judge Rodney Gilstrap, and on January 25, 2012, Judge Gilstrap referred the proceedings to Magistrate Roy S. Payne. The court has not yet ruled on the motion to dismiss.

Tax Claims and Proceedings

The United States Department of Treasury, Internal Revenue Service ("IRS") has filed an amended proof of claim in the Bankruptcy Court pursuant to which the IRS asserts claims that total $74.7 million. We have filed in the Bankruptcy Court (i) an objection to the IRS' amended proof of claim and (ii) a motion requesting the Bankruptcy Court to determine our US federal tax liability pursuant to Sections 105 and 505 of the Bankruptcy Code. The objection and motion assert that the Company has no liability for the additional US federal taxes that have been asserted for pre-petition periods by the IRS. The IRS has responded in opposition to our objection and motion. On July 8, 2010, the Bankruptcy Court granted our unopposed motion requesting that the Bankruptcy Court abstain from determining our federal tax liability. As a result, we intend to work with the IRS through the normal processes and procedures that are available to all taxpayers outside of bankruptcy (including the United States Tax Court ("Tax Court") proceedings discussed below) to resolve the IRS' amended proof of claim.

In connection with the amended proof of claim, on May 26, 2010, we filed a petition in Tax Court in response to a Notice of Deficiency that was issued to the Company as the successor in interest to Gold Kist. The Notice of Deficiency and the Tax Court proceeding relate to a loss that Gold Kist claimed for its tax year ended June 30, 2004. The matter is currently in litigation before the Tax Court.

On August 10, 2010, we filed two petitions in Tax Court. The first petition relates to three Notices of Deficiency that were issued to us with respect to our 2003, 2005 and 2007 tax years. The second petition relates to a Notice of Deficiency that was issued to us with respect to Gold Kist's tax year ended June 30,

Table of Contents

2005 and its short tax year ended September 30, 2005. Both cases are currently in litigation before the Tax Court.
We express no opinion as to the likelihood of an unfavorable outcome or the amount or range of any possible loss to us related to the above Tax Court cases. If adversely determined, the outcome could have a material effect on the Company's operating results and financial position.

The Notices of Deficiency and the Tax Court proceedings discussed above cover the same tax years and the same amounts that were asserted by the IRS in its $74.7 million amended proof of claim that was filed in the Bankruptcy Court.

Other Claims and Proceedings

We are subject to various other legal proceedings and claims, which arise in the ordinary course of our business. In the opinion of management, the amount of ultimate liability with respect to these actions will not materially affect our financial condition, results of operations or cash flows.

Item 4. Mine Safety Disclosures

None.

PART II

Item 5. Market for the Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock is listed on the New York Stock Exchange ("NYSE") and it is quoted under our ticker symbol “PPC.” High and low prices of the Company’s common stock for 2011 and 2010 are as follows:

	2011 Prices		2010 Prices	
Quarter	High	Low	High	Low
First	$8.40	$6.59	$11.53	$7.63
Second	$7.71	$4.05	$13.05	$6.38
Third	$5.46	$2.96	$7.70	$5.73
Fourth	$6.30	$3.69	$8.10	$5.35

Holders

The Company estimates there were approximately 26,000 holders (including individual participants in security position listings) of the Company’s common stock as of February 17, 2012.

Dividends

The Company did not pay dividends in 2011 or 2010. Our Exit Credit Facility prohibits us from paying dividends on our common stock. Further, the indenture governing our 2018 Notes restricts, but does not prohibit, the Company from declaring dividends.

Issuer Purchases of Equity Securities in 2011

The Company did not repurchase any of its equity securities in 2011.

Equity Compensation Plan Information

The following table provides certain information about our common stock that may be issued under the Long Term Incentive Plan (the "LTIP"), as of December 25, 2011. For additional information concerning terms of the LTIP, see "Note 18. Incentive Compensation Plans" of our Consolidated Financial Statements included in this annual report.

Plan Category	Number of Securities to Be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted-Average Exercise Price of Outstanding Option, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in the First Column)
Equity compensation plans approved by securities holders	—	—	6,688,068
Equity compensation plans not approved by securities holders	—	—	—
Total	—	—	6,688,068

Table of Contents

Total Return on Registrant's Common Equity

The following graph compares the performance of the Company with that of the Russell 2000 composite index and a peer group of companies for the period from December 29, 2009 to December 25, 2011, with the investment weighted on market capitalization. Data for periods prior to December 29, 2009 is not shown because we were in bankruptcy prior to that date and financial results before and after December 29, 2009 are not comparable. The total cumulative return on investment (change in the year-end stock price plus reinvested dividends) for each of the periods for the Company, the Russell 2000 composite index and the peer group is based on the stock price or composite index at the beginning of the applicable period. Companies in the peer group index include Cagle's, Inc., Sanderson Farms Inc., Hormel Foods Corp., Smithfield Foods Inc. and Tyson Foods Inc.

The graph covers the period from December 29, 2009 to December 25, 2011, and reflects the performance of the Company's single class of common stock. The stock price performance represented by this graph is not necessarily indicative of future stock performance.

(a) In December 2009, we changed our fiscal year end from the Saturday nearest September 30 of each year to the last Sunday in December of each year. The change was effective for our 2010 fiscal year, which began December 28, 2009 and ended December 26, 2010 and resulted in an approximate three-month transition period which began September 27, 2009 and ended December 27, 2009. The reader should assume any reference we make to a particular year (for example, 2010) in this annual report applies to our fiscal year and not the calendar year.

(b) In March 2008, the Company sold certain assets of its turkey business. We are reporting our operations with respect to this business as a discontinued operation for all periods presented.

(c) The Company acquired Gold Kist Inc. on December 27, 2006, for $1.139 billion. For financial reporting purposes, we have not included the operating results and cash flows of Gold Kist in our consolidated financial statements for the period from December 27, 2006, through December 30, 2006. The operating results and cash flows of Gold Kist from December 27, 2006, through December 30, 2006, were not material.

(d) Gross profit, operating income and net income include the following nonrecurring recoveries, restructuring charges and other unusual items for each of the years presented:

Table of Contents

	2011	2010	Three Months Ended Dec 27, 2009	Dec 27, 2008	2009	2008	2007
Effect on gross profit and operating income:	(In millions)						
Operational restructuring charges	$—	$(4.3)	$(2.9)	$—	$(12.5)	$(28.0)	$—
Additional effect on operating income:							
Goodwill impairment	—	—	—	—	—	(501.4)	—
Administrative restructuring charges	(26.1)	(66.0)	1.4	(2.4)	(2.0)	(16.2)	—

(e) Income tax expense in 2011 resulted primarily from an increase in valuation allowance and an increase in reserves for unrecognized tax benefits. Income tax benefit in 2010 resulted primarily from the benefit on the deconsolidation for tax purposes of the Mexico operations and a decrease in valuation allowance. The deconsolidation for tax purposes of the Mexico operations was in response to changes in the Mexican tax laws that became effective January 1, 2010. The deconsolidation reduces the accrued taxes that had been previously recognized under the consolidated filing status as it eliminates recapturing certain taxes required under the new consolidation laws. Income tax benefit for the Transition Period resulted primarily from the release of valuation allowance because of new provisions that increased US federal net operating loss carry backs net of tax expense for new Mexico tax legislation. Income tax expense for the thirteen weeks ended December 27, 2008 resulted primarily from an increase in valuation allowance. Income tax benefit in 2009 resulted primarily from a decrease in reserves for unrecognized tax benefits. Income tax benefit in 2008 resulted primarily from significant net operating losses incurred in 2008. The tax expense in 2007 resulted primarily from the pretax earnings and an increase in tax contingency reserves.

(f) For purposes of computing the ratio of earnings to fixed charges, earnings consist of income before income taxes plus fixed charges (excluding capitalized interest). Fixed charges consist of interest (including capitalized interest) on all indebtedness, amortization of capitalized financing costs and that portion of rental expense that we believe to be representative of interest. Earnings were inadequate to cover fixed charges by $490.6 million, $69.5 million, $229.8 million, $176.5 million, and $1,191.2 million in 2011, 2010,the Transition Period, the three months ended December 27, 2008, 2009, and 2008, respectively.

(g) We experienced a working capital deficit in 2008. Upon the filing of the Chapter 11 petitions, certain of our debt obligations became automatically and immediately due and payable, subject to an automatic stay of any action to collect, assert, or recover a claim against the Company and the application of applicable bankruptcy law. As a result, the accompanying Consolidated Balance Sheet as of September 27, 2008, included reclassifications of $1,872.1 million to reflect as current certain long-term debt under the Company’s credit facilities that was accelerated.

(h) The Company had current maturities of pre-petition long-term debt totaling $4.2 million and pre-petition long-term debt totaling $1,999.8 million at September 26, 2009, that were included in Liabilities subject to compromise.

(i) Includes amortization of capitalized financing costs of approximately $9.5 million, $14.8 million, $1.4 million, $1.5 million, $6.8 million, $4.9 million, and $6.6 million in 2011, 2010, the Transition Period, the three months ended December 27, 2008, 2009, 2008, and 2007, respectively.

(j) “EBITDA” is defined as the sum of income (loss) from continuing operations plus interest, taxes, depreciation and amortization. “Adjusted EBITDA” is calculated by adding to EBITDA certain items of expense and deducting from EBITDA certain items of income that we believe are not indicative of our ongoing operating performance consisting of: (i) income (loss) attributable to noncontrolling interests in the period from 2007 through 2011 and the Transition Period, (ii) goodwill impairment in 2008, (iii) restructuring charges in 2010, 2009, 2008 and 2007, (iv) reorganization items in 2010 and 2009 and (v) losses on early extinguishment of debt in 2007 and 2010. EBITDA is presented because it is used by us and we believe it is frequently used by securities analysts, investors and other interested parties, in addition to and not in lieu of results prepared in conformity with GAAP, to compare

the performance of companies. We believe investors would be interested in our Adjusted EBITDA because this is how our management analyzes EBITDA from continuing operations. We also believe that Adjusted EBITDA, in combination with our financial results calculated in accordance with GAAP, provides investors with additional perspective regarding the impact of certain significant items on EBITDA and facilitates a more direct comparison of its performance with its competitors. EBITDA and Adjusted EBITDA are not measurements of financial performance under GAAP. EBITDA and Adjusted EBITDA have limitations as analytical tools and should not be considered in isolation or as substitutes for an analysis of our results as reported under GAAP. Some of the limitations of these measures are:

- They do not reflect our cash expenditures, future requirements for capital expenditures or contractual commitments;
- They do not reflect changes in, or cash requirements for, our working capital needs;
- They do not reflect the significant interest expense or the cash requirements necessary to service interest or principal payments on our debt;
- Although depreciation and amortization are noncash charges, the assets being depreciated and amortized will often have to be replaced in the future, and EBITDA and Adjusted EBITDA do not reflect any cash requirements for such replacements;
- They are not adjusted for all noncash income or expense items that are reflected in our statements of cash flows;
- EBITDA does not reflect the impact of earnings or charges attributable to noncontrolling interests;
- They do not reflect the impact of earnings or charges resulting from matters we consider to not be indicative of our ongoing operations; and
- They do not reflect limitations on or costs related to transferring earnings from our subsidiaries to us.

In addition, other companies in our industry may calculate these measures differently than we do, limiting their usefulness as a comparative measure. Because of these limitations, EBITDA and Adjusted EBITDA should not be considered as an alternative to cash flow from operating activities or as a measure of liquidity or an alternative to net income as indicators of our operating performance or any other measures of performance derived in accordance with GAAP. You should compensate for these limitations by relying primarily on our GAAP results and using EBITDA and Adjusted EBITDA only supplementally.

Table of Contents

A reconciliation of income (loss) from continuing operations to EBITDA and Adjusted EBITDA is as follows:

			Three Months Ended				
	2011	2010	Dec 27, 2009	Dec 27, 2008	2009	2008	2007

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Description of the Company

We are the second-largest chicken producer in the world with operations in the US, Mexico and Puerto Rico. We are primarily engaged in the production, processing, marketing and distribution of fresh, frozen and value-added chicken products to retailers, distributors and foodservice operators. Our primary product types are fresh chicken products, prepared chicken products and export chicken products. We sell our fresh chicken products to the foodservice and retail markets. We sell our prepared food products to foodservice customers and retail distributors. We also export products to customers in approximately 105 countries, including Mexico. As a vertically integrated company, we control every phase of the production of our products. We operate feed mills, hatcheries, processing plants and distribution centers in 12 US states, Puerto Rico and Mexico. We operate in one reportable business segment, as a producer and seller of chicken products we either produce or purchase for resale. Our fresh chicken products consist of refrigerated (nonfrozen) whole or cut-up chicken, either pre-marinated or non-marinated, and pre-packaged chicken in various combinations of freshly refrigerated, whole chickens and chicken parts. Our prepared chicken products include portion-controlled breast fillets, tenderloins and strips, delicatessen products, salads, formed nuggets and patties and bone-in chicken parts. These products are sold either refrigerated or frozen and may be fully cooked, partially cooked or raw. In addition, these products are breaded or non-breaded and either pre-marinated or non-marinated.

We have a broad geographic reach, and we offer our diverse customer base a balanced portfolio of fresh and prepared chicken products. We have consistently provided our customers with high quality products and service with a focus on delivering higher-value, higher-quality products. As such, we have become a valuable partner to our customers and a recognized industry leader. Our sales efforts are largely targeted towards the foodservice industry, principally chain restaurants and food processors. In 2011, we sold 7.6 billion pounds of dressed chicken and generated net sales of $7.5 billion. Our US operations, including Puerto Rico, accounted for 90.0% of our net sales in 2011. Our Mexico operations generated the remaining 10.0% of our net sales in that year.

In December 2009, we adopted the Restated Bylaws, which changed our fiscal year end from the Saturday nearest September 30 of each year to the last Sunday in December of each year. This change aligns our reporting cycle with the fiscal calendar of our majority stockholder, JBS USA Holdings, Inc. ("JBS USA"). The change was effective for our 2010 fiscal year, which began December 28, 2009 and ended December 26, 2010 and resulted in an approximate three-month transition period which began September 27, 2009 and ended December 27, 2009 (the “Transition Period”). We now operate on the basis of a 52/53-week fiscal year that ends on the Sunday falling on or before December 31. The reader should assume any reference we make to a particular year (for example, 2010) in this annual report applies to our fiscal year and not the calendar year.

Executive Summary

We reported a net loss attributable to Pilgrim’s Pride Corporation of $496.8 million, or $2.32 per common share, for 2011. These operating results included gross losses of $141.5 million. During 2011, we used $129.0 million of cash from operations. At December 25, 2011, we had cash and cash equivalents totaling $41.6 million.

Market prices for feed ingredients decreased throughout 2009 and the first six months of 2010, but rose significantly again from the third quarter of 2010 to the second quarter of 2011. These prices remained at historically high levels throughout the third quarter of 2011 before decreasing in the fourth quarter of 2011.

Table of Contents

Market prices for feed ingredients remain volatile. Consequently, there can be no assurance that our feed ingredient prices will not continue to increase materially. The following table compares the highest and lowest prices reached on nearby futures for one bushel of corn and one ton of soybean meal during the current year and previous three years:

	Corn		Soybean Meal	
	Highest Price	Lowest Price	Highest Price	Lowest Price
2011:				
Fourth Quarter	$6.66	$5.72	$332.20	$273.50
Third Quarter	7.65	6.17	382.20	325.80
Second Quarter	7.99	6.40	378.50	338.00
First Quarter	7.35	5.95	391.00	340.00
2010:				
Fourth Quarter	6.15	4.56	364.90	283.20
Third Quarter	5.24	3.25	321.50	293.00
Second Quarter	3.79	3.36	296.50	260.60
First Quarter	4.26	3.44	321.00	249.60
Transition Period	4.13	3.31	336.00	272.00
2009	5.24	2.90	433.00	237.00

Market prices for chicken products have stabilized since the end of 2008 but remain below levels sufficient to offset the generally higher costs of feed ingredients. Many producers within the industry, including Pilgrim's Pride, cut production in 2011 in an effort to correct the general oversupply of chicken in the US. Despite these production cuts, there can be no assurance that chicken prices will not decrease due to such factors as weakening demand for breast meat from food service providers and lower prices for chicken leg quarters in the export market as a result of weakness in world economies and restrictive credit markets.

We reopened an idled processing plant in Douglas, Georgia in January 2011. The Company will evaluate the decision to bring the Douglas, Georgia facility to full capacity during 2012.

On January 13, 2010, we started purchasing derivative financial instruments, specifically exchange-traded futures and options, in an attempt to mitigate price risk related to our anticipated consumption of commodity inputs such as corn, soybean meal and natural gas. At December 25, 2011, the fair values of commodity derivative assets and commodity derivative liabilities totaled $2.9 million and $2.7 million, respectively. Our counterparties require that we post cash collateral for changes in the net fair value of the derivative contracts. At December 25, 2011, we had posted $3.3 million of cash collateral with our counterparties to secure our open positions. We do not designate derivative financial instruments that we purchase to mitigate commodity purchase exposures as cash flow hedges; therefore, we recognize changes in the fair value of these derivative financial instruments immediately in earnings. The Company recognized $63.8 million and $69.2 million in net gains and net losses of $21.1 million related to changes in the fair value of its derivative financial instruments during 2011, 2010 and 2009, respectively. We did not recognize gains or losses related to changes in derivative financial instruments during the Transition Period. At December 25, 2011, we held written put options expiring March 2012 on 500 corn contracts, in a liability position, with an aggregate fair value of $0.6 million. At December 25, 2011, we were also in short positions on 2,531 corn contracts and 96 soybean meal contracts with an aggregate fair value of $0.5 million.

Beginning in January 2010, Company management implemented certain exit or disposal activities

Table of Contents

to integrate the administrative functions of the Company into those of JBS USA. In July 2011, additional exit and disposal activities were implemented by Company management to consolidate operations at our Dallas, Texas facility into other facilities in the surrounding area. These exit or disposal activities eliminated a total of approximately 1,500 positions and resulted in net pre-tax charges totaling $96.4 million. Of these charges, we recognized $42.5 million of severance and other personnel costs, $46.6 million of asset impairments, $2.4 million in losses related to the sale of unneeded eggs and the depletion of unneeded flocks, $2.1 million in losses related to scrapped inventory and $2.8 million in other restructuring costs. Restructuring costs related to severance and other personal costs resulted in cash expenditures or will result in cash expenditures within one year. The cash-related portion of these exit or disposal costs totaled $42.5 million.

Results of operations for 2011, 2010 and 2009 included accrued exit or disposal costs totaling $2.4 million, $41.0 million, and $6.0 million, respectively. There were no accrued exit or disposal costs during the Transition Period. All exit or disposal costs, with the exception of costs related to lease obligations and inventory reserves related to closed facilities, have resulted in cash expenditures or will result in cash expenditures within one year. Included in the costs for 2011 are $2.4 million in losses related to the sale of unneeded eggs and depletion of unneeded flocks, $0.7 million in severance and $2.9 million in other costs related to the idling of the Dallas, Texas facility. In addition, during 2011 we recognized $20.1 million of asset impairment charges that were classified as restructuring charges.

Results of operations for 2011, 2010, Transition Period and 2009 also included adjustments to exit or disposal costs totaling $1.3 million, $10.5 million, $0.4 million, and $6.7 million, respectively, which reduced the accrued costs. Adjustments recognized in 2011 included favorable adjustments of accrued severance.

In addition, we are continuing to realize other business improvements and efficiency gains from ongoing actions and more favorable product mix. These ongoing improvements include reductions in selling, general and administrative expenses through administrative headcount reductions, supply chain and margin improvements, savings from contract rejections, and additional improvements. We also continue to review and evaluate various restructuring and other alternatives to streamline our operations, improve efficiencies and reduce costs. Such initiatives may include selling assets, consolidating operations and functions, employee relocation and voluntary and involuntary employee separation programs. Any such actions may require us to obtain the pre-approval of the lenders under our secured revolving credit and term loan agreement with CoBank ACB, as administrative agent and collateral agent, and certain other lenders party thereto (the “Exit Credit Facility”). In addition, such actions will subject the Company to additional short-term costs, which may include asset impairment charges, lease commitment costs, employee retention and severance costs and other costs. Certain of these activities may have a disproportionate impact on our income relative to the cost savings.

On February 7, 2011, Mexico, the top foreign buyer of US chicken in calendar year 2010, announced that it would investigate US producers over dumping complaints lodged by Mexican chicken processors. Mexican chicken processors allege US producers sold chicken legs and thighs on the Mexican market below their cost of production in 2010.

Emergence from Bankruptcy

On December 1, 2008, Pilgrim's and six of its subsidiaries filed voluntary petitions in the United States Bankruptcy Court for the Northern District of Texas, Fort Worth Division (the “Bankruptcy Court”), seeking reorganization relief under the provisions of Chapter 11 of Title 11 of the United States Code (the “Bankruptcy Code”). We emerged from Chapter 11 bankruptcy proceedings on December 28, 2009. In connection with our emergence from bankruptcy, our common stock outstanding immediately prior to the

Table of Contents

emergence was cancelled and converted into the right to receive newly-issued shares of common stock of the reorganized Company based on a one-for-one exchange ratio, which constituted 36.0% of the total number of shares of our newly-issued common stock on that date. The remaining shares of our newly-issued common stock, constituting 64.0% of our total issued and outstanding common stock on December 28, 2009, were purchased for $800.0 million by JBS USA, a wholly-owned indirect subsidiary of JBS S.A., a Brazil-based meat producer. On November 5, 2010, JBS USA increased its stake in the Company to 67.3% of the total number of shares issued and outstanding on such date. On January 5, 2012, the Company issued 200,000 shares of common stock, which subsequently reduced JBS USA's stake in the Company to 67.2%. See "Note 18. Incentive Compensation Plans" to the Consolidated Financial Statements for additional information.

Upon exiting from bankruptcy, Pilgrim's and certain of its subsidiaries entered into an exit credit facility that provided for an aggregate commitment of $1.75 billion (the “Exit Credit Facility”). The facility currently consists of a $700.0 million revolving credit facility maturing on December 28, 2014 and a $582.3 million Term B facility maturing on December 28, 2014. As of December 25, 2011, a principal amount of $347.3 million under the revolving loan commitment and a principal amount of $574.6 million under the Term B facility were outstanding.
See “Note 2. Chapter 11 Proceedings” of our Consolidated Financial Statements included in this annual report for additional information on our Chapter 11 filings and proceedings.

Business Segment and Geographic Reporting

We operate in one reportable business segment, as a producer and seller of chicken products we either produce or purchase for resale in the US, Puerto Rico and Mexico. We conduct separate operations in the US, Puerto Rico and Mexico; however, for geographic reporting purposes, we include Puerto Rico with our US operations. Corporate expenses are allocated to Mexico based upon various apportionment methods for specific expenditures incurred related thereto with the remaining amounts allocated to the US.

Results of Operations

2011 Compared to 2010

Net sales. Net sales for 2011 increased $654.1 million, or 9.5%, from 2010. The following table provides additional information regarding net sales:

Source	2011	Change from 2010 Amount	Change from 2010 Percent	
	(In thousands, except percent data)			
United States	$6,778,727	$541,670	8.7	%(a)
Mexico	756,971	112,399	17.4	%(b)
Total net sales	$7,535,698	$654,069	9.5	%

(a) US sales generated in 2011 increased $541.7 million, or 8.7%, from US sales generated in 2010, which resulted from higher domestic sales of $5,986.4 million compared to $5,671.3 million in the prior year and higher export sales of $792.3 million compared to $565.7 million in the prior year. An increase in unit sales volume, which resulted primarily from higher demand and the Company's focused inventory reduction efforts during 2011 contributed $596.4 million, or 9.6 percentage points, to the period's revenue increase. A decrease in net revenue per pound sold, which resulted primarily from a less favorable product mix sold in the current year as compared to the prior year, partially offset the positive impact that increased unit sales volume had on the period's revenue comparison by $54.7 million, or 0.9 percentage points. Included in US sales generated during 2011 and 2010 were sales to JBS USA, LLC totaling $117.9 million and $5.4 million, respectively.

(b) Mexico sales generated in 2011 increased 17.4% from Mexico sales generated in 2010. Sales volume increased $92.6 million, or 14.3 percentage points, from the prior year because of increased demand. Net revenue per pound sold increased $19.8 million, or 3.1 percentage points, from the prior year primarily because of fluctuations in the Mexican peso against the US dollar in 2011 and increase in live chicken market prices.

Table of Contents

Gross profit (loss). Gross profit decreased by $602.5 million, or 130.7%, from a gross profit of $461.0 million incurred in 2010 to gross loss of $141.5 million generated in 2011. The following table provides gross loss information:

Components	2011	Change from 2010 Amount	Change from 2010 Percent	Percent of Net Sales 2011	Percent of Net Sales 2010	
	(In thousands, except percent data)					
Net sales	$7,535,698	$654,069	9.5 %	100.0 %	100.0 %	
Cost of sales	7,677,235	1,260,917	19.7 %	101.9 %	93.2 %	(a) (b)
Operational restructuring charges	—	(4,318)	(100.0)%	— %	0.1 %	(c)
Gross loss	$(141,537)	$(602,530)	(130.7)%	(1.9)%	6.7 %	

(a) Cost of sales incurred by the US operations during 2011 increased $1,073.6 million from cost of sales incurred by the US operations during 2010. Live production costs, which increased primarily because of higher feed ingredient costs, contributed $773.1 million, or 11.1 percentage points, to the increase in cost of sales. The Company's focused inventory reduction efforts during 2011, which resulted in increased sales, contributed $215.2 million, or 3.1 percentage points, to the increase in costs of sales. Higher freight, storage and handling costs contributed $29.9 million, or 0.4 percentage points, to the increase in cost of sales. Cost of sales incurred by our distribution, protein conversion and other operations, which increased due to higher unit sales volume, contributed $72.8 million, or 1.1 percentage points to the increase in cost of sales. The contribution to the increase in cost of sales resulting from a decrease in the amount of net gains recognized on both settled and outstanding derivative instruments of $5.4 million, or 0.1 percentage points. A decrease in utility, maintenance and other complex costs of $27.6 million or 0.4 percentage points, partially offset the increase in cost of sales. Included in the costs listed above are losses on egg sales and flock depletion expense of $18.5 million, product recall expenses of $7.9 million, and uninsured loss related to the Marshville, North Carolina facility of $1.9 million. Other factors affecting cost of sales were immaterial.

(b) Cost of sales incurred by the Mexico operations during 2011 increased $187.3 million, or 34.0%, from cost of sales incurred by the Mexico operations during 2010. Increased sales volume contributed $79.2 million, or 14.4 percentage points, and foreign currency translation contributed $35.5 million, or 6.4 percentage points, to the increase in cost of sales. The remaining $72.6 million, or 13.2 percentage points, of the increase in cost of sales resulted primarily from higher feed ingredient costs.

(c) Operational restructuring charges incurred by the US operations during 2011 decreased $4.3 million, or 100.0%, from operational restructuring charges incurred by the US operations during 2010. Operational restructuring charges for 2010 represented noncash based impairment expense recognized to reduce the carrying amount of certain assets located in our closed processing facility in Georgia and hatchery in North Carolina to fair value and relocation expenses related to the integration with JBS USA.

Operating income (loss). Operating income decreased $559.0 million, or 301.5%, from operating income of $185.4 million incurred for 2010 to an operating loss of $373.6 million generated for 2011. The following tables provide operating income/(loss) information:

Source	2011	Change from 2010 Amount	Change from 2010 Percent
	(In thousands, except percent data)		
United States	$(373,268)	$(485,414)	(432.8)%
Mexico	(323)	(73,604)	(100.4)%
Total operating loss	$(373,591)	$(559,018)	(301.5)%

Components	2011	Change from 2010 Amount	Percent	Percent of Net Sales 2011	2010	
	(In thousands, except percent data)					
Gross loss	$(141,537)	$(602,530)	(130.7)%	(1.9)%	6.7%	
SG&A expenses	205,993	(3,551)	(1.7)%	2.7%	3.0%	(a)(b)
Administrative restructuring charges	26,061	(39,961)	(60.5)%	0.3%	1.0%	(c)
Operating loss	$(373,591)	$(559,018)	(301.5)%	(4.9)%	2.7%	

(a) SG&A expenses incurred by the US operations during 2011 decreased $2.2 million, or 1.2%, from SG&A expenses incurred by the US operations during 2010 primarily because of (i) a $3.0 million decrease from the prior period in payroll and related benefit expenses, (ii) a decrease of $3.4 million in depreciation and losses on asset disposals, (iii) a decrease of $2.2 million related to sales programs and (iv) a decrease of $1.3 million in lease

Table of Contents

expenses. These decreases were partially offset by (i) a $3.7 million increase in expenses related to the Company's insurance costs, (ii) a $1.7 million increase in property tax expense and (iii) a $1.5 million increase in outside services. Other factors affecting SG&A expense were immaterial.

(b) SG&A expense incurred by the Mexico operations during 2011 decreased $1.3 million, or 6.6%, from SG&A expense incurred by the Mexico operations during 2010 primarily because of increased freight and storage costs of $1.0 million that were partially offset by a $0.9 million decrease in costs related to employee relations and a $1.4 million decrease in outside services related expenses.

(c) In 2011, the Company incurred administrative restructuring charges composed of cash-based severance, change-in-control compensation, scrapped inventory and noncash impairment charges related to (i) two administrative offices in Texas and Georgia and (ii) certain idled assets located in Texas, Pennsylvania, Georgia, North Carolina and Louisiana. The Company incurred administrative restructuring charges in 2010 composed of cash-based severance, change-in-control compensation, charges related to the integration with JBS USA, other facility closure costs and noncash impairment charges related to (i) a feed mill in Georgia, (ii) land in Texas and (iii) two administrative offices in Texas and Georgia.

Interest expense. Consolidated interest expense increased 5.7% to $111.5 million in 2011 from $105.6 million in 2010 primarily because of increased average borrowings of $1,483.0 million in 2011 compared to $1,215.7 million in 2010. In addition, the weighted average interest rate increased to 6.7% in 2011 from 6.4% in 2010. As a percent of net sales, interest expense in 2011 and 2010 remained the same at 1.5%.

Early extinguishment of debt. The Company did not recognize any expense related to the early extinguishment of debt in 2011. The Company incurred expenses of $11.7 million related to the early extinguishment of debt in 2010. These expenses included costs associated with the elimination of unamortized capitalized finance charges related to the Term A loan and a portion of the Term B loan of the Exit Credit Facility.

Reorganization items. The Company did not recognize any reorganization costs in 2011. The Company incurred reorganization costs of $18.5 million in 2010. These expenses included (i) costs associated with the elimination of unamortized capitalized finance charges related to our pre-petition secured credit facilities, the 7 5/8% senior notes due 2015 and the 8 3/8% senior subordinated notes due 2017, (ii) professional fees charged for post-petition reorganization services and (iii) severance and other costs related to post-petition facility closures and RIF actions. These reorganization costs were partially offset by the recognition during the three months ended March 28, 2010 of a previously unrealized gain totaling $4.1 million on a derivative financial instrument designated as a cash flow hedge related to public debt extinguished on December 28, 2009.

Income taxes. The Company's consolidated income tax expense in 2011 was $8.6 million, compared to a tax benefit of $23.8 million in 2010. The income tax expense in 2011 resulted primarily from an increase in valuation allowance and an increase in reserves for unrecognized tax benefits. The income tax benefit in 2010 resulted primarily from the deconsolidation for tax purposes of the Mexico operations and a decrease in the valuation allowance, offset by an increase in reserves for unrecognized tax benefits. See “Note 13. Income Taxes” to the Consolidated Financial Statements.

Net income (loss) attributable to noncontrolling interests. For the year ended December 25, 2011, we recognized net income attributable to noncontrolling interests in three of our consolidated subsidiaries of $1.1 million. For the year ended December 26, 2010, we recognized net income attributable to noncontrolling interests $3.2 million.

Table of Contents

2010 Compared to 2009

Net sales. Net sales for 2010 decreased $206.4 million, or 2.9%, from 2009. The following table provides additional information regarding net sales:

Source	2010	Change from 2009 Amount	Percent	
	(In thousands, except percent data)			
United States	$6,237,057	$(332,595)	(5.1)%	(a)
Mexico	644,572	126,169	24.3%	(b)
Total net sales	$6,881,629	$(206,426)	(2.9)%	

(a) US sales generated in 2010 decreased 5.1% from US sales generated in 2009. Sales volume decreased 7.1% primarily because of previously announced production cutbacks and subsequent reorganization efforts. Net revenue per pound sold increased 0.8% from the prior year.

(b) Mexico sales generated in 2010 increased 24.3% from Mexico sales generated in 2009. Sales volume increased 17.9% from the prior year because of increased demand. Net revenue per pound sold increased 7.0% from the prior year primarily because of the appreciation of the Mexican peso against the US dollar in 2010.

Gross profit. Gross profit results improved by $150.2 million, or 48.3%, from a gross profit of $310.8 million incurred in 2009 to gross profit of $461.0 million generated in 2010. The following table provides gross profit information:

Components	2010	Change from 2009 Amount	Percent	Percent of Net Sales 2010	2009	
	(In thousands, except percent data)					
Net sales	$6,881,629	$(206,426)	(2.9)%	100.0%	100.0%	
Cost of sales	6,416,318	(348,470)	(5.2)%	93.2%	95.4%	(a)
Operational restructuring charges	4,318	(8,146)	(65.4)%	0.1%	0.2%	(b)
Gross profit	$460,993	$150,190	48.3%	6.7%	4.4%	(c)

(a) Cost of sales incurred by the US operations during 2010 decreased $429.3 million from cost of sales incurred by the US operations during 2009. This decrease occurred primarily because of improved production efficiencies, production cutbacks and aggregate net gain of $69.2 million recognized by the Company during 2010 on derivative financial instruments. Cost of sales incurred by the Mexico operations during 2010 increased $80.8 million from cost of sales incurred by the Mexico operations during 2009 primarily because of increased production volume.

(b) The Company recognized noncash asset impairment charges in 2010 related to the closing of a processing plant in Georgia and a hatchery in North Carolina. In addition, the Company recognized relocation charges relating to the integration with JBS USA. In 2009, the Company recognized losses on sales of excess eggs and flock depletion at its operational production complexes.

(c) Gross profit as a percent of net sales generated in 2010 increased 2.3 percentage points from 2009 primarily because of the cost-savings impact of production cutbacks, improved production efficiencies and gains recognized from derivative financial instruments during 2010.

Operating income. Operating income increased $118.1 million, or 175.4%, from an operating income of $67.3 million incurred for 2009 to operating income of $185.4 million generated for 2010. The following tables provide operating income information:

Source	2010	Change from 2009 Amount	Percent

	(In thousands, except percent data)			
United States	$112,146	$73,819	192.6	%
Mexico	73,281	44,281	152.7	%
Total operating income	$185,427	$118,100	175.4	%

Table of Contents

Components	2010	Change from 2009 Amount	Percent		Percent of Net Sales 2010		2009	
	(In thousands, except percent data)							
Gross profit	$460,993	$150,190	48.3	%	6.7	%	4.4	%
SG&A expenses	209,544	(31,945)	(13.2	)%	3.0	%	3.4	%(a)
Administrative restructuring charges	66,022	64,035	3,222.7	%	1.0	%	0.1	%(b)
Operating income	$185,427	$118,100	175.4	%	2.7	%	0.9	%(c)

(a) SG&A expenses incurred by the US operations during 2010 decreased 14.9% from SG&A expenses incurred by the US operations during 2009 primarily because of reductions in employee compensation and related benefit costs resulting from restructuring actions taken in 2009 and 2010.

(b) In 2010, the Company incurred administrative restructuring charges, composed of cash-based severance, change-in-control compensation, charges related to the integration with JBS USA, other facility closure costs and noncash impairment charges related to, (i) a feed mill in Georgia, (ii) land in Texas and (iii) two administrative offices in Texas and Georgia. The Company incurred administrative restructuring charges in 2009 composed of cash-based severance, change-in-control compensation, charges related to the integration with JBS USA and other facility closure costs.

(c) Operating income as a percent of net sales generated in 2010 increased 1.8 percentage points from operating loss as a percent of sales incurred in 2009 primarily because of improved gross profit performance and reductions in employee compensation and related benefit costs resulting from restructuring actions taken in 2009 and 2010.

Interest expense. Consolidated interest expense decreased 34.8% to $105.6 million in 2010 from $161.9 million in 2009 primarily because of decreased average borrowings and a decrease in weighted average interest rate. As a percent of net sales, interest expense in 2010 decreased to 1.5% from 2.3% in 2009.

Early extinguishment of debt. The Company incurred expenses of $11.7 million related to the early extinguishment of debt in 2010. These expenses included costs associated with the elimination of unamortized capitalized finance charges related to the Term A loan and a portion of the Term B loan of the Exit Credit Facility.

Reorganization items. The Company incurred reorganization costs of $18.5 million in 2010. These expenses included (i) costs associated with the elimination of unamortized capitalized finance charges related to our pre-petition secured credit facilities, the 7 5/8% senior notes due 2015 and the 8 3/8% senior subordinated notes due 2017, (ii) professional fees charged for post-petition reorganization services and (iii) severance and other costs related to post-petition facility closures and reduction in force ("RIF") actions. These reorganization costs were partially offset by the recognition during the three months ended March 28, 2010 of a previously unrealized gain totaling $4.1 million on a derivative financial instrument designated as a cash flow hedge related to public debt extinguished on December 28, 2009.

Income taxes. The Company's consolidated income tax benefit in 2010 was $23.8 million, compared to a tax benefit of $21.6 million in 2009. The income tax benefit in 2010 resulted primarily from the deconsolidation for tax purposes of the Mexico operations and a decrease in the valuation allowance offset by an increase in reserves for unrecognized tax benefits. The deconsolidation for tax purposes of the Mexico operations was in response to changes in the Mexican tax laws that became effective January 1, 2010. The deconsolidation reduces the accrued taxes that had been previously recognized under the consolidated filing
status as it eliminates recapturing certain taxes required under the new consolidation laws. The income tax benefit in 2009 resulted primarily from a decrease in reserves for unrecognized tax benefits. See "Note 13. Income Taxes" to the Consolidated Financial Statements.

Net income (loss) attributable to noncontrolling interests. For the year ended December 26, 2010, we recognized net income attributable to noncontrolling interest in three of our consolidated subsidiaries of $3.2 million. For the year ended September 26, 2009, we recognized net losses attributable to noncontrolling interests in three of our

consolidated subsidiaries of $82,000.

Table of Contents

The Transition Period Compared to the Three Months Ended December 27, 2008

Net sales. Net sales generated in the Transition Period decreased $274.3 million, or 14.6%, from net sales generated in the three months ended December 27, 2008. The following table provides net sales information:

Source	Transition Period	Change from Three Months Ended December 27, 2008				
		Amount		Percent		
	(In thousands, except percent data)					
United States	$1,466,705	$(265,044	)	(15.3	)%	(a)
Mexico	136,029	(9,213	)	(6.3	)%	(b)
Total net sales	$1,602,734	$(274,257	)	(14.6	)%	

(a) US sales generated in the Transition Period decreased 15.3% from US sales generated in the three months ended December 27, 2008. Sales volume decreased 16.5% primarily because of previously announced production cutbacks and subsequent reorganization efforts. Net revenue per pound sold increased 0.7% from the prior year.

(b) Mexico sales generated in the Transition Period decreased 6.3% from Mexico sales generated in the three months ended December 27, 2008. Sales volume increased 3.9% from the prior year because of increased demand during the current winter holiday season over that of the previous year. Net revenue per pound sold decreased 9.8% from the prior year primarily because of current unfavorable economic conditions in Mexico. In an effort to increase demand for chicken products, the industry lowered prices.

Gross profit. Gross profit improved by $168.9 million, or 168.7%, from a loss of $100.1 million incurred in the three months ended December 27, 2008 to a profit of $68.8 million generated in the Transition Period. The following table provides gross profit information:

Components	Transition Period	Change from Three Months Ended December 27, 2008				Percent of Net Sales Three Months Ended December 27,				
		Amount		Percent		2009		2008		
	(In thousands, except percent data)									
Net sales	$1,602,734	$(274,257	)	(14.6	)%	100.0	%	100.0	%	
Cost of sales	1,531,104	(446,029	)	(22.6	)%	95.5	%	105.3	%	(a)
Operational restructuring charges	2,877	2,877		NM		0.2	%	—		(b)
Gross profit	$68,753	$168,895		168.7	%	4.3	%	(5.3	)%	(c)

(a) Cost of sales incurred by the US operations during the Transition Period decreased $434.9 million from cost of sales incurred by the US operations during the three months ended December 27, 2008. This decrease occurred primarily because of the cost-savings impact of prior-period production cutbacks, decreased feed ingredient purchases and decreased corn prices during the Transition Period and an aggregate net loss of $21.4 million recognized by us during the three months ended December 27, 2008 on derivative financial instruments. We did not participate in any derivative financial instrument transactions in the Transition Period. Cost of sales incurred by the Mexico operations during the Transition Period decreased $11.1 million from cost of sales incurred by the Mexico operations during the three months ended December 27, 2008 primarily because of decreased net sales and decreased feed ingredient costs.

(b) During the Transition Period the Company recognized a loss on the sale of excess eggs and flock depletion related to its operational production complexes. The Company did not recognize operational restructuring charges in the three months ended December 27, 2008.

(c) Gross profit as a percent of net sales generated in the Transition Period increased 9.6 percentage points from gross profit as a percent of sales generated in the three months ended December 27, 2008 primarily because of the cost-savings impact of prior-period production cutbacks and decreased corn costs experienced during the Transition Period.

NM Not meaningful

Table of Contents

Operating income. Operating income improved by $185.8 million, or 104.3%, from a loss of $178.2 million incurred in the three months ended December 27, 2008, to income of $7.6 million generated in the Transition Period. The following tables provide operating loss information:

Source	Transition Period	Change from Three Months Ended December 27, 2008 Amount	Percent
	(In thousands, except percent data)		
United States	$9,637	$181,782	105.6 %
Mexico	(2,048)	4,021	66.3 %
Total operating income	$7,589	$185,803	104.3 %

Components	Transition Period	Change from Three Months Ended December 27, 2008 Amount	Percent	Percent of Net Sales Three Months Ended December 27, 2009	2008	
	(In thousands, except percent data)					
Gross profit	$68,753	$168,895	168.7 %	4.3 %	(5.3)%	
SG&A expenses	62,523	(13,127)	(15.3)%	3.9 %	4.0 %	(a)
Administrative restructuring charges	(1,359)	(3,781)	(156.1)%	(0.1)%	0.1 %	(b)
Operating income	$7,589	$185,803	104.3 %	0.5 %	(9.4)%	(c)

(a) SG&A expenses incurred by the US operations during the Transition Period decreased 16.0% from SG&A expenses incurred by the US operations during the three months ended December 27, 2008 primarily because of reductions in employee compensation and related benefit costs resulting from restructuring actions taken in 2009.

(b) During the Transition Period, we recognized an administrative restructuring credit resulting from a positive adjustment to accrued lease obligation charges for the closed distribution center in Mississippi. We recognized net administrative restructuring charges in the three months ended December 27, 2008 resulting primarily from a November 2008 non-production employee RIF action, production cutbacks at a facility in Florida, and closures of distribution centers in Florida, Iowa, Mississippi, Ohio, Tennessee and Texas.

(c) Operating income as a percent of net sales incurred in the Transition Period improved 9.9 percentage points from operating loss as a percent of net sales incurred in the three months ended December 27, 2008 primarily because of the improvement in gross profit performance and the positive impact of 2009 restructuring actions on SG&A expenses.

Interest expense. Interest expense increased 12.9% to $44.7 million recognized in the Transition Period from $39.6 million recognized in the three months ended December 27, 2008 primarily because of increased borrowings and increased interest rates recognized on several of our secured credit facilities. As a percent of net sales, interest expense recognized in the Transition Period increased to 2.8% from 2.1% recognized in the three months ended December 27, 2008.

Reorganization items. Net reorganization costs increased 145.9% to $32.7 million recognized in the Transition Period from $13.3 million recognized in the three months ended December 27, 2008. Costs recognized in the Transition Period included certain incentive compensation costs that were contingent upon confirmation by the Bankruptcy Court of a plan of reorganization that satisfied the requirements of the Bankruptcy Code, professional fees charged for post-petition reorganization services, and severance and other costs related to post-petition facility closures and RIF actions. Costs recognized in the three months ended December 27, 2008 included professional fees charged for post-petition reorganization services, finance costs related to the debtor in possession credit agreement and fees

associated with the termination of our receivables purchase agreement on December 3, 2008.

Table of Contents

Income taxes. We recognized an income tax benefit of $102.4 million for the Transition Period compared to income tax expense of $0.3 million for the three months ended December 27, 2008. The income tax benefit for the Transition Period was primarily the result of the Company's release of valuation allowance because of new provisions that increased US federal net operating loss carry backs net of tax expense for new legislation enacted in Mexico. The income tax expense for the three months ended December 27, 2008 resulted primarily from an increase in valuation allowance.

Income from operation of discontinued business. We generated income from the operation of our discontinued turkey business of $0.9 million ($0.6 million, net of tax) in the three months ended December 27, 2008. Net sales generated by the discontinued turkey business in the three months ended December 27, 2008, were $26.5 million. There were no net sales or operating results generated by the discontinued turkey business in the three months ended December 27, 2009.

Net income (loss) attributable to noncontrolling interests. For the three months ended December 27, 2009, we recognized net income attributable to noncontrolling interests in three of our consolidated subsidiaries of $0.3 million. For the three months ended December 27, 2008, we recognized net losses attributable to noncontrolling interests in three of our consolidated subsidiaries of $0.1 million.

Liquidity and Capital Resources

The following table presents our available sources of liquidity as of December 25, 2011:

Source of Liquidity[d]	Facility Amount	Amount Outstanding	Available	
	(In millions)			
Cash and cash equivalents	$—	$—	$41.6	
Investments in available-for-sale securities	—	—	0.7	
Debt facilities:				
Exit Credit Facility	700.0	347.3	248.0	(a)
ING Credit Facility	40.3	—	40.3	(b)
JBS Subordinated Loan Agreement	100.0	50.0	50.0	(c)

(a) Actual borrowings by the Company under the Exit Credit Facility are subject to a borrowing base, which is a formula based on certain eligible inventory and eligible receivables. The borrowing base in effect on December 25, 2011 was $635.4 million. Availability under the Exit Credit Facility is also reduced by the Company's outstanding standby letters of credit. Standby letters of credit outstanding at December 25, 2011 totaled $40.1 million.

(b) Under the ING Credit Facility, if (i) any default or event of default has occurred and is continuing or (ii) the quotient of the borrowing base divided by the outstanding loans and letters of credit (the "Collateral Coverage Ratio") under the ING Credit Facility is less than 1.25 to 1.00, the loans and letters of credit under the ING Credit Facility will be subject to, and cannot exceed, a borrowing base. The borrowing base is a formula based on accounts receivable, inventory, prepaid assets, net cash under the control of the administrative agent and up to 150.0 million Mexican pesos of fixed assets of the loan parties. The borrowing base formula will be reduced by trade payables of the loan parties. If the Collateral Coverage Ratio falls below 1.25 to 1.00, the borrowing base requirement would terminate upon the earlier of (i) the Collateral Coverage Ratio exceeding 1.25 to 1.00 as of the latest measurement period for 60 consecutive days or (ii) the borrowing availability under the ING Credit Facility being equal to or greater than the greater of 20% of the revolving commitments under the ING Credit Facility and 100.0 million Mexican pesos for a period of 60 consecutive days.

(c) Under the Exit Credit Facility, the Company is also permitted to receive loans from JBS USA on a subordinated basis on terms reasonably satisfactory to the agents under the Exit Credit Facility of up to $200.0 million. The Company has a subordinated loan facility with JBS USA of $100.0 million, with a term loan of $50.0 million principal amount outstanding at December 25, 2011. If the Rights Offering is consummated, the existing

commitment of JBS USA to make an additional $50.0 million term loan to the Company under the Subordinated Loan Agreement will be terminated.

(d) Pilgrim's commenced a rights offering for up to approximately 44.4 million shares of common stock to its stockholders of record on January 17, 2012 in order to strengthen its capital structure. Pilgrim's expects the aggregate gross proceeds (before expenses) of the offering to be approximately $200.0 million. JBS USA has committed to participate in the Rights Offering and exercise its basic subscription and over-subscription privilege in full and has executed an agreement reflecting its commitment.The Rights Offering is currently scheduled to expire on February 29, 2012.

Table of Contents

Debt Obligations

Senior and Subordinated Notes. On December 15, 2010, the Company closed on the sale of $500.0 million of $7\ ^{7}/8\%$ senior notes due 2018 (the “2018 Notes”). The 2018 Notes are unsecured obligations of the Company and are guaranteed by one the Company's subsidiaries. Interest is payable on December 15 and June 15 of each year, commencing on June 15, 2011. The indenture governing the 2018 Notes contains various covenants that may adversely affect our ability, among other things, to incur additional indebtedness, incur liens, pay dividends or make certain restricted payments, consummate certain asset sales, enter into certain transactions with JBS USA and our other affiliates, merge, consolidate and/or sell or dispose of all or substantially all of our assets. The Company has subsequently exchanged these notes for substantially identical notes that are registered under the Securities Act of 1933. Additionally, we have an aggregate principal balance of $3.6 million of $7\ ^{5}/8\%$ senior unsecured notes, $8\ ^{3}/8\%$ senior subordinated unsecured notes and $9\ ^{1}/_{4}\%$ senior unsecured notes outstanding at December 25, 2011.

JBS Subordinated Loan Agreement. On June 23, 2011, the Company entered into a Subordinated Loan Agreement with JBS USA (the “Subordinated Loan Agreement”), which provided an aggregate commitment of $100.0 million. On June 23, 2011, JBS USA made a term loan to the Company in the principal amount of $50.0 million. In addition, JBS USA agreed to make an additional one-time term loan in the principal amount of $50.0 million if the Company's availability under the revolving loan commitment in the Exit Credit Facility is less than $200.0 million. Pursuant to the terms of the Subordinated Loan Agreement, we also agreed to reimburse JBS USA up to $56.5 million for draws upon any letters of credit issued for JBS USA's account that support certain obligations of Mayflower Insurance Company, Ltd., a wholly owned subsidiary of the Company. The commitment under the Subordinated Loan Agreement will terminate on the earlier to occur of (i) the date on which all amounts owing under the 2018 Notes and the Exit Credit Facility are due and payable in accordance with its terms and (ii) June 27, 2015. Loans under the Subordinated Loan Agreement mature on June 28, 2015. Additionally, on December 16, 2011, the Company entered into an amendment to the Subordinated Loan Agreement which, among other things, provided that if the Company consummates the Rights Offering on or before March 24, 2012 (unless such date is extended in accordance with the terms of the Exit Credit Facility), the revolving loan commitment under the Subordinated Loan Agreement will be terminated. Further, the Exit Credit Facility, as amended, also provides that if the Rights Offering occurs, then (i) the Company, at its option, is permitted to prepay the outstanding $50.0 million term loan under the Subordinated Loan Agreement and (ii) the existing commitment of JBS USA to make an additional $50.0 million term loan to the Company under the Subordinated Loan Agreement will be terminated.

JBS USA agreed to provide letters of credit in the amount of $56.5 million to an insurance company serving the Company in order to allow that insurance company to return cash it held as collateral against potential workers compensation, auto and general liability claims. In return for providing this letter of credit, the Company is reimbursing JBS USA for the letter of credit cost it would otherwise incur under its revolving credit agreement. The total costs accrued by the Company in 2011 to reimburse JBS USA was $0.4 million.

Exit Credit Facility. Upon exiting from bankruptcy, the Company and certain of its subsidiaries entered into the Exit Credit Facility that provided for an aggregate commitment of $1.75 billion. The facility consisted of a three-year $600.0 million revolving credit facility, a three-year $375.0 million Term A facility and a five-year $775.0 million Term B facility. The Exit Credit Facility also includes an accordion feature that allows us, at any time, to increase the aggregate revolving loan commitment by up to an additional $250.0 million and to increase the aggregate Term B loans commitment by up to an additional $400.0 million, in each case subject to the satisfaction of certain conditions, including an aggregate cap on all commitments under the Exit Credit Facility of $1.85 billion. On January 13, 2011, we increased the amount of the revolving

Table of Contents

loan commitments under the Exit Credit Facility to $700.0 million. On April 22, 2011, we increased the amount of the sub-limit for swingline loans under the Exit Credit Facility to $100.0 million. The Term A loan was repaid on December 15, 2010 with proceeds from the 2018 Notes. The revolving loan commitment and the Term B loans will mature on December 28, 2014.

On December 25, 2011, a principal amount of $574.6 million under the Term B loans commitment and $347.3 million under the revolving loan commitment were outstanding. On December 28, 2009, the Company also paid loan costs totaling $50.0 million related to the Exit Credit Facility that it recognized as an asset on its balance sheet. The Company amortizes these capitalized costs to expense over the life of the Exit Credit Facility.

Subsequent to the end of each fiscal year, a portion of our cash flow must be used to repay outstanding principal amounts under the Term B loans. The Company did not have excess cash flow from 2011 to be applied toward the outstanding principal under the Term B loans. In April 2011, the Company paid approximately $46.3 million of its excess cash flow from 2010 toward the outstanding principal under the Term B loans. After giving effect of the 2010 prepayment and other prepayments, the Term B loans must be repaid in 16 quarterly installments of approximately $3.9 million which began on April 15, 2011, with the final installment due on December 28, 2014. The Exit Credit Facility also requires us to use the proceeds we receive from certain asset sales and specified debt or equity issuances and upon the occurrence of other events to repay outstanding borrowings under the Exit Credit Facility. The cash proceeds received by the Company from the Rights Offering will not be required to be prepaid to the lenders under the Exit Credit Facility as a mandatory prepayment.

The Exit Credit Facility includes a $100.0 million sub-limit for swingline loans and a $200.0 million sub-limit for letters of credit. Outstanding borrowings under the revolving loan commitment bear interest at a per annum rate equal to 3.00% plus the greater of (i) the US prime rate as published by the Wall Street Journal, (ii) the average federal funds rate plus 0.5%, and (iii) the one-month LIBOR rate plus 1.0%, in the case of alternate base rate loans, or 4.00% plus the one, two, three or six month LIBOR rate adjusted by the applicable statutory reserve, in the case of Eurodollar loans. Outstanding Term B-1 loans bear interest at a per annum rate equal to 3.50% plus greater of (i) the US prime rate, as published by the Wall Street Journal, (ii) the average federal funds rate plus 0.5%, and (iii) the one month LIBOR rate plus 1.0%, in the case of alternate base rate loans, or 4.50%, plus the one, two, three or six month LIBOR Rate adjusted by the applicable statutory reserve, in the case of Eurodollar loans. Outstanding Term B-2 loans bear interest at a per annum rate equal to 9.00%. Commitment fees charged on the revolving commitments under the Exit Credit Facility accrue at a per annum rate equal to 0.50%.

Actual borrowings by the Company under the revolving credit commitment component of the Exit Credit Facility are subject to a borrowing base, which is a formula based on certain eligible inventory, eligible receivables and restricted cash under the control of CoBank ACB, as administrative agent under the Exit Credit Facility. The borrowing base formula is reduced by the sum of (i) inventory reserves, (ii) rent and collateral access reserves, and (iii) any amount more than 15 days past due that is owed by the Company or its subsidiaries to any person on account of the purchase price of agricultural products or services (including poultry and livestock) if that person is entitled to any grower's or producer's lien or other security arrangement. As of December 25, 2011, the applicable borrowing base was $635.4 million, the amount available for borrowing under the revolving loan commitment was $248.0 million and outstanding borrowings and letters of credit under the revolving loan commitment were $347.3 million and $40.1 million, respectively.

Under the Exit Credit Facility, JBS USA, the Company's majority stockholder, or its affiliates may make loans to the Company on a subordinated basis on terms reasonably satisfactory to the agents under the Exit Credit Facility and up to $200.0 million of such subordinated indebtedness may be included in the

Table of Contents

calculation of EBITDA (as defined in the Exit Credit Facility as amended).

The Exit Credit Facility provides that the Company may not incur capital expenditures in excess of $175.0 million in 2011 and 2012 and $350.0 million each fiscal year thereafter. The Exit Credit Facility contains various other covenants that may adversely affect our ability to, among other things, incur additional indebtedness, incur liens, pay dividends or make certain restricted payments, consummate certain assets sales, enter into certain transactions with JBS USA and our other affiliates, merge, consolidate and/or sell or dispose of all or substantially all of our assets.

On June 23, 2011 and December 16, 2011, the Company entered into amendments to the Exit Credit Facility, which, among other things:

- Temporarily suspended the requirement for the Company to comply with the fixed charge coverage ratio and senior secured leverage ratio financial covenants until September 23, 2012;
- Modified the consolidated tangible net worth financial covenant to (i) require the Company to maintain consolidated tangible net worth of at least $550.0 million, including subordinated indebtedness owed to JBS USA, plus 50.0% of the cumulative net income (excluding any losses) of the Company from June 24, 2011 through the date of calculation and (ii) eliminate the requirement for the Company to comply with that financial covenant for the fiscal quarter ended December 25, 2011 and, if certain conditions are met, for the fiscal quarter ended March 25, 2012;
- Amended the fixed charge coverage ratio and the senior secured leverage ratio financial covenants so that when testing of those financial covenants resumes September 24, 2012, the Company can calculate those financial covenants based upon a specified number of fiscal quarters selected by the Company;
- Provided that if the Rights Offering occurs on or before March 24, 2012 (which date may be extended under certain circumstances at the sole discretion of the administrative agent and Rabobank International to April 24, 2012), then:

The senior secured leverage ratio financial covenant will be set at levels more favorable to the Company after June 30, 2013; and

The consolidated tangible net worth financial covenant will be modified to reduce the level of tangible net worth of the Company required to satisfy such financial covenant.

ING Credit Agreement. On October 19, 2011, Avícola Pilgrim's Pride de México, S.A. de C.V. (“Avicola”), Pilgrim's Pride S. de R.L. de C.V. (“PPS”, together with Avicola, the “Borrowers”) and certain Mexican subsidiaries (together with the Borrowers, the “Loan Parties”) entered into an amended and restated credit agreement (the “ING Credit Agreement”) with ING Bank (México), S.A. Institución de Banca Múltiple, ING Grupo Financiero, as lender and ING Capital LLC, as administrative agent (“ING Capital”). The ING Credit Agreement has a final maturity date of September 25, 2014. As of December 25, 2011, the US dollar-equivalent of the ING Loan Commitment under the ING Credit Agreement was $40.3 million. There were no outstanding borrowings under the ING Credit Agreement at December 25, 2011.

Under the ING Credit Agreement, if (i) any default or event of default has occurred and is continuing or (ii) the quotient of the borrowing base divided by the outstanding loans and letters of credit (the “Collateral Coverage Ratio”) under the ING Credit Agreement is less than 1.25 to 1.00, the loans and letters of credit under the ING Credit Agreement will be subject to, and cannot exceed, a borrowing base. The borrowing base is a formula based on accounts receivable, inventory, prepaid assets, net cash under the control of the

Table of Contents

administrative agent and up to 150.0 million Mexican pesos of fixed assets of the Loan Parties. The borrowing base formula will be reduced by trade payables of the Loan Parties. If the Collateral Coverage Ratio falls below 1.25 to 1.00, the borrowing base requirement would terminate upon the earlier of (i) the Collateral Coverage Ratio exceeding 1.25 to 1.00 as of the latest measurement period for 60 consecutive days or (ii) the borrowing availability under the ING Credit Agreement being equal to or greater than the greater of 20% of the revolving commitments under the ING Credit Agreement and 100.0 million Mexican pesos for a period of 60 consecutive days.
Avicola may pay dividends or make other restricted payments to the Company in an amount not to exceed in the aggregate 250.0 million Mexican pesos during the term of the ING Credit Agreement if certain conditions are satisfied, including a condition that availability is at least 100% of the revolving loan commitment under the ING Credit Agreement, less any letter of credit liability under the ING Credit Agreement. However, the Company deems its earnings from Mexico to be permanently reinvested. As such, US deferred income taxes have not been provided on these earnings. If such earnings were not considered indefinitely reinvested, certain deferred foreign and US income taxes would be provided.

Collateral

Substantially all of our domestic inventories and domestic fixed assets are pledged as collateral to secure the obligations under the Exit Credit Facility. The ING Credit Agreement is secured by substantially all of the assets of the Company's Mexico subsidiaries.

Off-Balance Sheet Arrangements

We maintain operating leases for various types of equipment, some of which contain residual value guarantees for the market value of assets at the end of the term of the lease. The terms of the lease maturities range from one to ten years. We estimate the maximum potential amount of the residual value guarantees is approximately $20.2 million; however, the actual amount would be offset by any recoverable amount based on the fair market value of the underlying leased assets. No liability has been recorded related to this contingency as the likelihood of payments under these guarantees is not considered to be probable, and the fair value of the guarantees is immaterial. We historically have not experienced significant payments under similar residual guarantees.
We are a party to many routine contracts in which we provide general indemnities in the normal course of business to third parties for various risks. Among other considerations, we have not recorded a liability for any of these indemnities as, based upon the likelihood of payment, the fair value of such indemnities would not have a material impact on our financial condition, results of operations and cash flows.

Table of Contents

Contractual Obligations

In addition to our debt commitments at December 25, 2011, we had other commitments and contractual obligations that obligate us to make specified payments in the future. The following table summarizes the total amounts due as of December 25, 2011, under all debt agreements, commitments and other contractual obligations. The table indicates the years in which payments are due under the contractual obligations.

	Payments Due By Period				
Contractual Obligations[e]	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
	(In thousands)				
Long-term debt[a]	$1,472,630	$15,042	$955,403	$502,185	-
Interest[b]	466,950	104,072	242,134	120,630	114
Capital leases[c]	1,338	194	582	368	195
Operating leases	26,793	16,132	10,614	47	—
Derivative liabilities	2,723	2,723	—	—	—
Purchase obligations[d]	143,599	143,599	—	—	—
Total	$2,114,034	$281,763	$1,208,733	$623,230	$309

(a) Long-term debt includes an accreted discount of $3.2 million and excludes $40.1 million in letters of credit outstanding related to normal business transaction. In April 2011, the Company paid approximately $46.3 million of its cash flow toward the outstanding principal under the Term B loans. After giving effect to this prepayment and other prepayments of the Term B Loans, the Term B Loans must be repaid in 16 quarterly installments of approximately $3.9 million from April 15, 2011, with the final installment due on December 28, 2014.

(b) Interest expense in the table above assumes the continuation of interest rates and outstanding borrowings under our credit facilities as of December 25, 2011.

(c) Capital leases includes $0.4 million in interest expense.

(d) Includes agreements to purchase goods or services that are enforceable and legally binding on us and that specify all significant terms, including fixed or minimum quantities to be purchased; fixed, minimum, or variable price provisions; and the approximate timing of the transaction.

(e) The total amount of PPC's unrecognized tax benefits at December 25, 2011 was $64.8 million. We did not include this amount in the contractual obligations table above as reasonable estimates cannot be made at this time of the amounts or timing of future cash outflows.

Historical Flow of Funds

Cash used in operating activities was $129.0 million for 2011 and cash provided by operating activities was $14.6 million for 2010. The increase in cash flows used in operating activities was primarily from reductions in net working capital as well as a net loss of $495.7 million for 2011 as compared to a net income of $90.3 million for 2010.

Our net working capital position, which we define as current assets less current liabilities, decreased $224.8 million to a surplus of $747.0 million and a current ratio of 2.04 at December 25, 2011 compared to a surplus of $971.8 million and a current ratio of 2.32 at December 26, 2010. Key contributors to the reduction in net working capital included decreases in cash and cash equivalents, restricted cash, inventories and prepaid expenses and other current assets and an increase in current deferred tax liabilities, partially offset by an increase in trade accounts and other receivables and a decreases in current maturities of long-term debt, accrued expenses and income taxes payable.

Restricted cash decreased $53.3 million, or 87.4%, to $7.7 million at December 25, 2011 from $61.0 million at December 26, 2010. The change in restricted cash resulted from the release of cash held in our captive insurance companies.

Trade accounts and other receivables, including accounts receivable from JBS USA, increased $48.6 million, or 15.1%, to $370.4 million at December 25, 2011 from $321.8 million at December 26, 2010. The change in trade accounts and other receivables resulted primarily from increased sales recognized towards

51

Table of Contents

the latter part of the current period as well as an increase of $20.7 million in receivables from JBS USA.
Inventories decreased $150.2 million, or 14.6%, to $879.1 million at December 25, 2011 from $1,029.3 million at December 26, 2010. The change in inventories was primarily due to a decrease in finished products resulting from the Company's concerted efforts to reduce inventory during 2011.
Prepaid expenses and other current assets decreased $28.9 million, or 35.6%, to $52.4 million at December 25, 2011 from $81.3 million at December 26, 2010. This decrease occurred primarily because of a $30.5 million reduction in open derivative positions, offset by a $2.1 million increase in prepaid grain purchases.
Accounts payable increased $3.5 million, or 1.0%, to $340.5 million at December 25, 2011 from $337.0 million at December 26, 2010. This increase occurred primarily because of a $4.4 million increase in accounts payable to JBS USA.
Accrued expenses decreased $16.1 million, or 5.4%, to $281.8 million at December 25, 2011 from $297.9 million at December 26, 2010. This decrease resulted primarily from a $13.7 million reduction in derivative liabilities and a $11.4 million reduction in employee related expenses. This was partially offset by a $6.8 million increase in the accrued balances for sales programs and a $2.3 million increase in grain commitments.
Cash used in investing activities was $58.2 million and $113.7 million in 2011 and 2010, respectively. Capital expenditures of $136.0 million and $179.3 million for 2011 and 2010, respectively, were primarily incurred for the reopening of the Douglas, Georgia facility and for the routine replacement of equipment and to improve efficiencies and reduce costs. Capital expenditures for 2011 could not exceed $175 million under the terms of the Exit Credit Facility. Cash was used to purchase investment securities totaling $4.6 million and $17.2 million in 2011 and 2010, respectively. Cash proceeds in 2011 and 2010 from the sale or maturity of investment securities were $15.9 million and $68.1 million, respectively. Cash proceeds from property disposals in 2011 and 2010 were $29.0 million and $14.7 million, respectively. Cash proceeds from business dispositions in 2011 totaled $37.5 million.
Cash provided by financing activities was $126.9 million in 2011. Cash used in financing activities was $29.5 million in 2010. Cash proceeds for 2011 from notes payable to JBS USA were $50.0 million. Cash proceeds in 2011 and 2010 from long-term debt were $965.7 million and $2,438.9 million, respectively. Cash was used to repay long-term debt totaling $881.8 million and $3,197.4 million in 2011 and 2010, respectively. Cash proceeds in 2010 from the sale of common stock were $800.0 million. Cash was used to pay capitalized loan costs totaling $4.4 million and $62.8 million in 2011 and 2010. Cash used to purchase the remaining interest in a subsidiary we did not already own totaled $2.5 million and $7.6 million in 2011 and 2010. Cash was used for other financing activities totaling $0.1 million and $0.5 million in 2011 and 2010, respectively.
Recently Adopted Accounting Pronouncements
On December 27, 2010, the Company adopted a portion of Accounting Standards Update (“ASU”) 2010-06, Improving Disclosures about Fair Value Measurements, issued by the Financial Accounting Standards Board (the "FASB"). The ASU amended Accounting Standards Codification (“ASC”) Subtopic 820-10 by including new required disclosures regarding activity in Level 3 fair value measurements. The adoption of the subject guidance under amended ASC 820-10 did not have a material impact on the Company's consolidated financial statements.

Table of Contents

Accounting Pronouncements Issued But Not Yet Adopted

The FASB recently issued ASU No. 2011-04, Fair Value Measurement: Amendments to Achieve Common Fair Value Disclosure Requirements in the U.S. GAAP and IFRS. The amendment clarifies the FASB's intent about the application of existing fair value measurement and disclosure requirements (ASC Topic 820) and improves consistency in wording to ensure that accounting principles generally accepted in the US ("U.S. GAAP") and International Financial Reporting Standards ("IFRS") are described the same way. Other amendments change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The amendment is effective for fiscal years beginning after December 15, 2011 and is to be applied prospectively. The Company has not yet adopted this amendment; however, adoption will not have a material impact on the Company's financial position, results of operations or cash flow.

Critical Accounting Policies and Estimates

General. Our discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. On an ongoing basis, we evaluate our estimates, including those related to revenue recognition, customer programs and incentives, allowance for doubtful accounts, inventories, income taxes and product recall accounting. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our financial statements.

Revenue Recognition. We recognize revenue when all of the following circumstances are satisfied: (i) persuasive evidence of an arrangement exists, (ii) price is fixed or determinable, (iii) collectability is reasonably assured and (iv) delivery has occurred. Delivery occurs in the period in which the customer takes title and assumes the risks and rewards of ownership of the products specified in the customer's purchase order or sales agreement. Revenue is recorded net of estimated incentive offerings including special pricing agreements, promotions and other volume-based incentives. Revisions to these estimates are charged back to net sales in the period in which the facts that give rise to the revision become known.

Inventory. Live chicken inventories are stated at the lower of cost or market and breeder hens at the lower of cost, less accumulated amortization, or market. The costs associated with breeder hens are accumulated up to the production stage and amortized over their productive lives using the unit-of-production method. Finished poultry products, feed, eggs and other inventories are stated at the lower of cost (average) or market. We record valuations and adjustments for our inventory and for estimated obsolescence at or equal to the difference between the cost of inventory and the estimated market value based upon known conditions affecting inventory obsolescence, including significantly aged products, discontinued product lines, or damaged or obsolete products. We allocate meat costs between our various finished chicken products based on a by-product costing technique that reduces the cost of the whole bird by estimated yields and amounts to be recovered for certain by-product parts. This primarily includes leg quarters, wings, tenders and offal, which are carried in inventory at the estimated recovery amounts, with the remaining amount being reflected as our breast meat cost. Generally, the Company performs an evaluation of whether any lower of cost or market adjustments are required at the country level based on a number of factors, including: (i) pools of

Table of Contents

related inventory, (ii) product continuation or discontinuation, (iii) estimated market selling prices and (iv) expected distribution channels. If actual market conditions or other factors are less favorable than those projected by management, additional inventory adjustments may be required.

Property, Plant and Equipment. The Company records impairment charges on long-lived assets held for use when events and circumstances indicate that the assets may be impaired and the undiscounted cash flows estimated to be generated by those assets are less than the carrying amount of those assets. The impairment charge is determined based upon the amount the net book value of the assets exceeds their fair market value. In making these determinations, the Company utilizes certain assumptions, including, but not limited to: (i) future cash flows estimated to be generated by these assets, which are based on additional assumptions such as asset utilization, remaining length of service and estimated salvage values; (ii) estimated fair market value of the assets; and (iii) determinations with respect to the lowest level of cash flows relevant to the respective impairment test, generally groupings of related operational facilities. Given the interdependency of the Company’s individual facilities during the production process, which operate as a vertically integrated network, and the fact that the Company does not price transfers of inventory between its vertically integrated facilities at market prices, it evaluates impairment of assets held for use at the country level (i.e., the US and Mexico) within each segment. Management believes this is the lowest level of identifiable cash flows for its assets that are held for use in production activities. At the present time, the Company’s forecasts indicate that it can recover the carrying value of its assets held for use based on the projected undiscounted cash flows of the operations. A key assumption in management’s forecast is that the Company’s sales volumes will return to historical margins as supply and demand between commodities and chicken and other animal-based proteins become more balanced. However, the exact timing of the return to historical margins is not certain and if the return to historical margins is delayed, impairment charges could become necessary in the future. The Company recognized impairment charges related to assets held for sale of $22.9 million and $26.5 million during 2011 and 2010 respectively.

The Company records impairment charges on long-lived assets held for sale when the carrying amount of those assets exceeds their fair value less appropriate selling costs. Fair value is based on amounts documented in sales contracts or letters of intent accepted by the Company, amounts included in counteroffers initiated by the Company, or, in the absence of current contract negotiations, amounts determined using a sales comparison approach for real property and amounts determined using a cost approach for personal property. Under the sales comparison approach, sales and asking prices of reasonably comparable properties are considered to develop a range of unit prices within which the current real estate market is operating. Under the cost approach, a current cost to replace the asset new is calculated and then the estimated replacement cost is reduced to reflect the applicable decline in value resulting from physical deterioration, functional obsolescence and economic obsolescence. Appropriate selling costs includes reasonable broker's commissions, costs to produce title documents, filing fees, legal expenses and the like. We estimate appropriate closing costs as 6% of asset fair value. This rate is considered reasonable for our assets held for sale based on historical experience.

Litigation and Contingent Liabilities. The Company is subject to lawsuits, investigations and other claims related to employment, environmental, product, and other matters. The Company is required to assess the likelihood of any adverse judgments or outcomes, as well as potential ranges of probable losses, to these matters. The Company estimates the amount of reserves required for these contingencies when losses are determined to be probable and after considerable analysis of each individual issue. With respect to our environmental remediation obligations, the accrual for environmental remediation liabilities is measured on an undiscounted basis. These reserves may change in the future due to changes in the Company’s assumptions, the effectiveness of strategies, or other factors beyond the Company’s control.

Accrued Self Insurance. Insurance expense for casualty claims and employee-related health care

benefits are estimated using historical and current experience and actuarial estimates. Stop-loss coverage is maintained with third-party insurers to limit the Company's total exposure. Certain categories of claim liabilities are actuarially determined. The assumption used to arrive at periodic expenses is reviewed regularly by management. However, actual expenses could differ from these estimates and could result in adjustments to be recognized.

Income Taxes. The provision for income taxes has been determined using the asset and liability approach of accounting for income taxes. Under this approach, deferred income taxes reflect the net tax effect of temporary differences between the book and tax bases of recorded assets and liabilities, net operating losses and tax credit carry forwards. The amount of deferred tax on these temporary differences is determined using the tax rates expected to apply to the period when the asset is realized or the liability is settled, as applicable, based on the tax rates and laws in the respective tax jurisdiction enacted as of the balance sheet date. The Company recognizes potential interest and penalties related to income tax positions as a part of the income tax provision.

Realizability of Deferred Tax Assets. The Company reviews its deferred tax assets for recoverability and establishes a valuation allowance based on historical taxable income, potential for carry back of tax losses, projected future taxable income, applicable tax strategies, and the expected timing of the reversals of existing temporary differences. A valuation allowance is provided when it is more likely than not that some or all of the deferred tax assets will not be realized. Valuation allowances have been established primarily for net operating loss carry forwards. See “Note 13. Income Taxes” to the Consolidated Financial Statements.

Indefinite Reinvestment in Foreign Subsidiaries. The Company deems its earnings from Mexico to be permanently reinvested. As such, US deferred income taxes have not been provided on these earnings. If such earnings were not considered indefinitely reinvested, certain deferred foreign and US income taxes would be provided. For activity after 2008, the Company did not permanently reinvest its earnings in Puerto Rico. Therefore, net earnings generated in Puerto Rico have US taxes provided as if the earnings were distributed.

Accounting for Uncertainty in Income Taxes. The Company follows the provisions under ASC 740-10-25 that provides a recognition threshold and measurement criteria for the financial statement recognition of a tax benefit taken or expected to be taken in a tax return. Tax benefits are recognized only when it is more likely than not, based on the technical merits, that the benefits will be sustained on examination. Tax benefits that meet the more-likely-than-not recognition threshold are measured using a probability weighting of the largest amount of tax benefit that has greater than 50% likelihood of being realized upon settlement. Whether the more-likely-than-not recognition threshold is met for a particular tax benefit is a matter of judgment based on the individual facts and circumstances evaluated in light of all available evidence as of the balance sheet date. See “Note 13. Income Taxes” to the Consolidated Financial Statements.

Pension and Other Postretirement Benefits. The Company's pension and other postretirement benefit costs and obligations are dependent on the various actuarial assumptions used in calculating such amounts. These assumptions relate to discount rates, salary growth, long-term return on plan assets, health care cost trend rates and other factors. The Company bases the discount rate assumptions on current investment yields on high-quality corporate long-term bonds. The salary growth assumptions reflect our long-term actual experience and future or near-term outlook. Long-term return on plan assets is determined based on historical portfolio results and management's expectation of the future economic environment. Our health care cost trend assumptions are developed based on historical cost data, the near-term outlook and an assessment of likely long-term trends. Actual results that differ from our assumptions are accumulated and, if in excess of the lesser of 10% of the project benefit obligation or the fair market value of plan assets, amortized over the estimated future working life of the plan participants.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Market Risk-Sensitive Instruments and Positions

The risk inherent in our market risk-sensitive instruments and positions is primarily the potential loss arising from adverse changes in the price of feed ingredients, foreign currency exchange rates, interest rates and the credit quality of available-for-sale securities as discussed below. The sensitivity analyses presented do not consider the effects that such adverse changes may have on overall economic activity, nor do they consider additional actions our management may take to mitigate our exposure to such changes. Actual results may differ.

Feed Ingredients. We purchase certain commodities, primarily corn and soybean meal, for use as ingredients in the feed we either sell commercially or consume in our live operations. As a result, our earnings are affected by changes in the price and availability of such feed ingredients. In the past, we have from time to time attempted to minimize our exposure to the changing price and availability of such feed ingredients using various techniques, including, but not limited to, (i) executing purchase agreements with suppliers for future physical delivery of feed ingredients at established prices and (ii) purchasing or selling derivative financial instruments such as futures and options.

Market risk is estimated as a hypothetical 10% increase in the weighted-average cost of our primary feed ingredients as of December 25, 2011. Based on our feed consumption during 2011, such an increase would have resulted in an increase to cost of sales of approximately $301.8 million, excluding the impact of any feed ingredients derivative financial instruments in that period. A 10% change in ending feed ingredients inventories at December 25, 2011 would be $10.2 million, excluding any potential impact on the production costs of our chicken inventories. A 10% change in corn and soybean meal prices on December 25, 2011 would have resulted in a $0.3 million change in the fair value of our net commodity derivative asset position as of that date.

Foreign Currency. Our earnings are affected by foreign exchange rate fluctuations related to the Mexican peso net monetary position of our Mexican subsidiaries. We manage this exposure primarily by attempting to minimize our Mexican peso net monetary position. We are also exposed to the effect of potential exchange rate fluctuations to the extent that amounts are repatriated from Mexico to the US. However, we currently anticipate that the future cash flows of our Mexican subsidiaries will be reinvested in our Mexican operations. In addition, the Mexican peso exchange rate can directly and indirectly impact our financial condition and results of operations in several ways, including potential economic recession in Mexico because of devaluation of their currency. The impact on our financial position and results of operations resulting from a hypothetical change in the exchange rate between the US dollar and the Mexican peso cannot be reasonably estimated. Foreign currency exchange gains and losses, representing the change in the US dollar value of the net monetary assets of our Mexican subsidiaries denominated in Mexican pesos, was a loss of $12.6 million in 2011, a gain of $0.1 million in 2010, a loss of $0.6 million in the Transition Period and a loss of $0.1 million in 2009. The average exchange rates for 2011, 2010, the Transition Period and 2009 were 12.39 Mexican pesos to 1 US dollar, 12.65 Mexican pesos to 1 US dollar, 13.11 Mexican pesos to 1 US dollar and 13.49 Mexican pesos to 1 US dollar, respectively. No assurance can be given as to how future movements in the Mexican peso could affect our future financial condition or results of operations.

Interest Rates. Our earnings are also affected by changes in interest rates due to the impact those changes have on our variable-rate debt instruments. We had variable-rate debt instruments representing approximately 42.3% of our total debt at December 25, 2011. Holding other variables constant, including levels of indebtedness, an increase in interest rates of 25 basis points would have increased our interest expense by $0.4 million for 2011. These amounts are determined by considering the impact of the hypothetical

Table of Contents

interest rates on our variable-rate debt at December 25, 2011.

Market risk for fixed-rate debt is estimated as the potential increase in fair value resulting from a hypothetical decrease in interest rates of 10%. Using a discounted cash flow analysis, a hypothetical 10% decrease in interest rates would have increased the fair value of our fixed rate debt by approximately $9.7 million as of December 25, 2011.

Available-for-Sale Securities. The Company and certain retirement plans that it sponsors invest in a variety of financial instruments. In response to the continued turbulence in global financial markets, we have analyzed our portfolios of investments and, to the best of our knowledge, none of our investments, including money market funds units, commercial paper and municipal securities, have been downgraded because of this turbulence, and neither we nor any fund in which we participate hold significant amounts of structured investment vehicles, mortgage backed securities, collateralized debt obligations, auction-rate securities, credit derivatives, hedge funds investments, fund of funds investments or perpetual preferred securities. At December 25, 2011, the fair value of the Company's available-for-sale portfolio was $0.7 million. Management does not believe a hypothetical change in interest rates of 25 basis points or a 10% decrease in equity prices would be material to the Company.

Impact of Inflation. Due to low to moderate inflation in the US and Mexico and our rapid inventory turnover rate, the results of operations have not been significantly affected by inflation during the past three-year period.

Item 8. Financial Statements and Supplementary Data

The consolidated financial statements together with the report of our independent registered public accounting firm and financial statement schedule are included on pages 69 through 136 of this annual report. Financial statement schedules other than those included herein have been omitted because the required information is contained in the consolidated financial statements or related notes, or such information is not applicable.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

As of December 25, 2011, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Principal Financial Officer, of the effectiveness of the design and operation of the Company's "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")). Based on that evaluation, the Company's management, including the Chief Executive Officer and Principal Financial Officer, concluded the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that information we are required to disclose in our reports filed with the Securities and Exchange Commission is accumulated and communicated to our management, including our Chief Executive Officer and Principal Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

In connection with the evaluation described above, the Company's management, including the Chief Executive Officer and Principal Financial Officer, identified no changes in the Company's internal control

Table of Contents

over financial reporting that occurred during the Company's quarter ended December 25, 2011, and that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Pilgrim's Pride Corporation's ("PPC") management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). PPC's internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles.

Under the supervision and with the participation of management, including its principal executive officer and principal financial officer, PPC's management assessed the design and operating effectiveness of internal control over financial reporting as of December 25, 2011 based on the framework set forth in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on this assessment, management concluded that PPC's internal control over financial reporting was effective as of December 25, 2011. Ernst & Young LLP, an independent registered public accounting firm, has issued an attestation report on the effectiveness of the Company's internal control over financial reporting as of December 25, 2011. That report is included herein.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The Board of Directors and Stockholders
Pilgrim's Pride Corporation

We have audited Pilgrim's Pride Corporation's internal control over financial reporting as of December 25, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Pilgrim's Pride Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Pilgrim's Pride Corporation maintained, in all material respects, effective internal control over financial reporting as of December 25, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Pilgrim's Pride Corporation as of December 25, 2011 and December 26, 2010, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for the years ended December 25, 2011 and December 26, 2010, the three months ended December 27, 2009, and the year ended September 26, 2009 of Pilgrim's Pride Corporation and our report dated February 17, 2012 expressed an unqualified opinion thereon.

Item 9B. Other Information

As previously announced, the Company filed voluntary Chapter 11 petitions on December 1, 2008 and emerged from bankruptcy on December 28, 2009. The Chapter 11 cases were being jointly administered under case number 08-45664. The Company has and intends to continue to post important information about the restructuring, including quarterly operating reports and other financial information required by the Bankruptcy Court, on the Company's website www.pilgrims.com under the “Investors-Reorganization” caption. The quarterly operating reports are required to be filed with the Bankruptcy Court no later than the 20th day of the next calendar month immediately following the end of the fiscal quarter and will be posted on the Company's website concurrently with being filed with the Bankruptcy Court. The Company intends to use its website as a means of complying with its disclosure obligations under SEC Regulation FD. Information is also available via the Company's restructuring information line at (888) 830-4659.

The information contained on or accessible through the Company's website shall not be deemed to be part of this annual report.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Pilgrim’s Pride Corporation

We have audited the accompanying consolidated balance sheets of Pilgrim’s Pride Corporation (the “Company”) as of December 25, 2011 and December 26, 2010, and the related consolidated statements of operations, comprehensive income, stockholders’ equity, and cash flows for the years ended December 25, 2011 and December 26, 2010, the three months ended December 27, 2009, and the year ended September 26, 2009. Our audits also include the financial statement schedule listed in the index at Item 15(a). These financial statements and schedule are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Pilgrim’s Pride Corporation at December 25, 2011 and December 26, 2010, and the consolidated results of its operations and its cash flows for the years ended December 25, 2011 and December 26, 2010, the three months ended December 27, 2009 and the year ended September 26, 2009, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Pilgrim’s Pride Corporation’s internal control over financial reporting as of December 25, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 17, 2012 expressed an unqualified opinion thereon.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. BUSINESS AND BASIS OF PRESENTATION

Business

Pilgrim’s Pride Corporation (referred to herein as “Pilgrim’s,” “PPC,” “the Company,” “we,” “us,” “our,” or similar terms) is o the largest chicken companies in the United States (“US”), Mexico and Puerto Rico. Our fresh chicken retail line is sold in the southeastern, central, southwestern and western regions of the US, throughout Puerto Rico, and in the northern and central regions of Mexico. Our prepared-foods products meet the needs of some of the largest customers in the food service industry across the US. Additionally, the Company exports commodity chicken products to approximately 105 countries. As a vertically integrated company, we control every phase of the production of our products. We operate feed mills, hatcheries, processing plants and distribution centers in 12 US states, Puerto Rico and Mexico. Our fresh chicken products consist of refrigerated (nonfrozen) whole or cut-up chicken, either pre-marinated or non-marinated, and pre-packaged chicken in various combinations of freshly refrigerated, whole chickens and chicken parts. Our prepared chicken products include portion-controlled breast fillets, tenderloins and strips, delicatessen products, salads, formed nuggets and patties and bone-in chicken parts. These products are sold either refrigerated or frozen and may be fully cooked, partially cooked or raw. In addition, these products are breaded or non-breaded and either pre-marinated or non-marinated.

Consolidated Financial Statements

On December 28, 2009, the Company adopted the Amended and Restated Corporate Bylaws (the “Restated Bylaws”), which changed the Company’s fiscal year end from the Saturday nearest September 30 of each year to the last Sunday in December of each year. This change aligns the Company’s reporting cycle with the fiscal calendar of JBS USA Holdings, Inc. (“JBS USA”). The change was effective with the Company’s 2010 fiscal year, which began December 28, 2009 and ended December 26, 2010 and resulted in an approximate three-month transition period which began September 27, 2009 and ended December 27, 2009 (the “Transition Period”). The Company now operates on the basis of a 52/53-week fiscal year that ends on the Sunday falling on or before December 31. The reader should assume any reference we make to a particular year (for example, 2010) in the notes to these Consolidated Financial Statements applies to our fiscal year and not the calendar year.

The consolidated financial statements include the accounts of Pilgrim’s Pride Corporation and its majority owned subsidiaries. We eliminate all significant affiliate accounts and transactions upon consolidation.

The Company measures the financial statements of its Mexico subsidiaries as if the US dollar were the functional currency. Accordingly, we remeasure assets and liabilities, other than non-monetary assets, of the Mexico subsidiaries at current exchange rates. We remeasure nonmonetary assets using the historical exchange rate in effect on the date of each asset's acquisition. We remeasure income and expenses at average exchange rates in effect during the period, except for certain accounts which are remeasured at a historical rate. Currency exchange gains or losses are included in the line item Foreign currency transaction losses in the Condensed Consolidated Statements of Operations.

Revenue Recognition

We recognize revenue when all of the following circumstances are satisfied: (i) persuasive evidence of an arrangement exits, (ii) price is fixed or determinable, (iii) collectability is reasonably assured and (iv) delivery has occurred. Delivery occurs in the period in which the customer takes title and assumes the risks

and rewards of ownership of the products specified in the customer's purchase order or sales agreement. Revenue is recorded net of estimated incentive offerings including special pricing agreements, promotions and other volume-based incentives. Revisions to these estimates are charged back to net sales in the period in which the facts that give rise to the revision become known.

Shipping and Handling Costs

Costs associated with the products shipped to customers are recognized in cost of sales.

Cash Equivalents

The Company considers highly liquid investments with a maturity of three months or less when purchased to be cash equivalents.

Current and Long-Term Investments

The Company’s current and long-term investments consist primarily of fixed income securities, municipal debt securities, bond and equity mutual funds and fund-of-funds. The fixed income securities, municipal debt securities, bond and equity mutual funds and fund-of-funds are classified as available-for-sale. These securities are recorded at fair value, and unrealized holding gains and losses are recorded, net of tax, as a separate component of accumulated other comprehensive income. Debt securities with remaining maturities of less than one year and those identified by management at the time of purchase for funding operations in less than one year are classified as current. Debt securities with remaining maturities greater than one year that management has not identified at the time of purchase for funding operations in less than one year are classified as long-term. Unrealized losses are charged against net earnings when a decline in fair value is determined to be other than temporary. Management reviews several factors to determine whether a loss is other than temporary, such as the length of time a security is in an unrealized loss position, the extent to which fair value is less than amortized cost, the impact of changing interest rates in the short and long term, and the Company’s intent and ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value. The Company determines the cost of each security sold and each amount reclassified out of accumulated other comprehensive income into earnings using the specific identification method. Purchases and sales are recorded on a trade date basis.

Investments in joint ventures and entities in which the Company has an ownership interest greater than 50% and exercises control over the venture are consolidated in the Consolidated Financial Statements. Investments in joint ventures and entities in which the Company has an ownership interest between 20% and 50% and exercises significant influence are accounted for using the equity method. The Company invests from time to time in ventures in which its ownership interest is less than 20% and over which it does not exercise significant influence. Such investments are accounted for under the cost method. The fair values for investments not traded on a quoted exchange are estimated based upon the historical performance of the ventures, the ventures’ forecasted financial performance and management’s evaluation of the ventures’ viability and business models. To the extent the book value of an investment exceeds its assessed fair value, the Company will record an appropriate impairment charge. Thus, the carrying value of the Company’s investments approximates fair value.

Accounts Receivable

The Company records accounts receivable when revenue is recognized. We record an allowance for doubtful accounts, reducing our receivables balance to an amount we estimate is collectible from our customers. Estimates used in determining the allowance for doubtful accounts are based on historical

collection experience, current trends, aging of accounts receivable, and periodic credit evaluations of our customers' financial condition. We write off accounts receivable when it becomes apparent, based upon age or customer circumstances, that such amounts will not be collected. Generally, the Company does not require collateral for its accounts receivable.

Inventories

Live chicken inventories are stated at the lower of cost or market and breeder hens at the lower of cost, less accumulated amortization, or market. The costs associated with breeder hens are accumulated up to the production stage and amortized over their productive lives using the unit-of-production method. Finished poultry products, feed, eggs and other inventories are stated at the lower of cost (average) or market.

We record valuation adjustments for our inventory and for estimated obsolescence at or equal to the difference between the cost of inventory and the estimated market value based upon known conditions affecting inventory, including significantly aged products, discontinued product lines, or damaged or obsolete products. We allocate meat costs between our various finished chicken products based on a by-product costing technique that reduces the cost of the whole bird by estimated yields and amounts to be recovered for certain by-product parts. This primarily includes leg quarters, wings, tenders and offal, which are carried in inventory at the estimated recovery amounts, with the remaining amount being reflected as our breast meat cost.

Generally, the Company performs an evaluation of whether any lower of cost or market adjustments are required at the country level based on a number of factors, including: (i) pools of related inventory, (ii) product continuation or discontinuation, (iii) estimated market selling prices and (iv) expected distribution channels. If actual market conditions or other factors are less favorable than those projected by management, additional inventory adjustments may be required.

Property, Plant and Equipment

Property, plant and equipment are stated at cost, and repair and maintenance costs are expensed as incurred. Depreciation is computed using the straight-line method over the estimated useful lives of these assets. Estimated useful lives for building, machinery and equipment are five to 33 years and for automobiles and trucks are three to ten years. The charge to income resulting from amortization of assets recorded under capital leases is included with depreciation expense.

The Company records impairment charges on long-lived assets held for use when events and circumstances indicate that the assets may be impaired and the undiscounted cash flows estimated to be generated by those assets are less than the carrying amount of those assets. When the above is true, the impairment charge is determined based upon the amount the net book value of the assets exceeds their fair market value. In making these determinations, the Company utilizes certain assumptions, including, but not limited to: (i) future cash flows estimated to be generated by these assets, which are based on additional assumptions such as asset utilization, remaining length of service and estimated salvage values, (ii) estimated fair market value of the assets and (iii) determinations with respect to the lowest level of cash flows relevant to the respective impairment test, generally groupings of related operational facilities.

Given the interdependency of the Company's individual facilities during the production process, which operate as a vertically integrated network, and the fact that the Company does not price transfers of inventory between its vertically integrated facilities at market prices, it evaluates impairment of assets held for use at the country level (i.e., the US and Mexico). Management believes this is the lowest level of identifiable cash flows for its assets that are held for use in production activities. At the present time, the Company's forecasts indicate that it can recover the carrying value of its assets held for use based on the projected undiscounted

cash flows of the operations. A key assumption in management's forecast is that the Company's sales volumes will return to historical margins as supply and demand between commodities and chicken and other animal-based proteins become more balanced. However, the exact timing of the return to historical margins is not certain, and if the return to historical margins is delayed, impairment charges could become necessary in the future.

The Company records impairment charges on long-lived assets held for sale when the carrying amount of those assets exceeds their fair value less appropriate selling costs. Fair value is based on amounts documented in sales contracts or letters of intent accepted by the Company, amounts included in counteroffers initiated by the Company, or, in the absence of current contract negotiations, amounts determined using a sales comparison approach for real property and amounts determined using a cost approach for personal property. Under the sales comparison approach, sales and asking prices of reasonably comparable properties are considered to develop a range of unit prices within which the current real estate market is operating. Under the cost approach, a current cost to replace the asset new is calculated and then the estimated replacement cost is reduced to reflect the applicable decline in value resulting from physical deterioration, functional obsolescence and economic obsolescence. Appropriate selling costs includes reasonable broker's commissions, costs to produce title documents, filing fees, legal expenses and the like. We estimate appropriate closing costs as 6% of asset fair value. This rate is considered reasonable for our assets held for sale based on historical experience.

Identified Intangible Assets

Our identified intangible assets consist of assets subject to amortization such as trade names, customer relationships and non-compete agreements. We calculate amortization of those assets that are subject to amortization on a straight-line basis over the estimated useful lives of the related assets. The useful lives range from three to 15 years for trade names and non-compete agreements and 13 years for customer relationships.

We review intangible assets subject to amortization for impairment whenever an event or change in circumstances indicates the carrying values of the assets may not be recoverable. We test intangible assets subject to amortization for impairment and estimate their fair values using the same assumptions and techniques we employ on property, plant and equipment.

Litigation and Contingent Liabilities

The Company is subject to lawsuits, investigations and other claims related to employment, environmental, product and other matters. The Company is required to assess the likelihood of any adverse judgments or outcomes, as well as potential ranges of probable losses, to these matters. The Company estimates the amount of reserves required for these contingencies when losses are determined to be probable and after considerable analysis of each individual issue. With respect to our environmental remediation obligations, the accrual for environmental remediation liabilities is measured on an undiscounted basis. These reserves may change in the future due to changes in the Company's assumptions, the effectiveness of strategies, or other factors beyond the Company's control.

Accrued Self Insurance

Insurance expense for casualty claims and employee-related health care benefits are estimated using historical and current experience and actuarial estimates. Stop-loss coverage is maintained with third-party insurers to limit the Company's total exposure. Certain categories of claim liabilities are actuarially determined. The assumptions used to arrive at periodic expenses are reviewed regularly by management.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

However, actual expenses could differ from these estimates and could result in adjustments to be recognized.

Income Taxes

The provision for income taxes has been determined using the asset and liability approach of accounting for income taxes. Under this approach, deferred income taxes reflect the net tax effect of temporary differences between the book and tax bases of recorded assets and liabilities, net operating losses and tax credit carry forwards. The amount of deferred tax on these temporary differences is determined using the tax rates expected to apply to the period when the asset is realized or the liability is settled, as applicable, based on the tax rates and laws in the respective tax jurisdiction enacted as of the balance sheet date.

The Company reviews its deferred tax assets for recoverability and establishes a valuation allowance based on historical taxable income, potential for carry back of tax losses, projected future taxable income, applicable tax strategies, and the expected timing of the reversals of existing temporary differences. A valuation allowance is provided when it is more likely than not that some or all of the deferred tax assets will not be realized. Valuation allowances have been established primarily for net operating loss carry forwards. See “Note 13. Income Taxes” to the Consolidated Financial Statements.

The Company deems its earnings from Mexico to be permanently reinvested. As such, US deferred income taxes have not been provided on these earnings. If such earnings were not considered indefinitely reinvested, certain deferred foreign and US income taxes would be provided. For activity after 2008, the Company did not permanently reinvest its earnings in Puerto Rico. Therefore, net earnings generated in Puerto Rico have US taxes provided as if the earnings were distributed.

The Company follows the provisions under ASC 740-10-25 that provides a recognition threshold and measurement criteria for the financial statement recognition of a tax benefit taken or expected to be taken in a tax return. Tax benefits are recognized only when it is more likely than not, based on the technical merits, that the benefits will be sustained on examination. Tax benefits that meet the more-likely-than-not recognition threshold are measured using a probability weighting of the largest amount of tax benefit that has greater than 50% likelihood of being realized upon settlement. Whether the more-likely-than-not recognition threshold is met for a particular tax benefit is a matter of judgment based on the individual facts and circumstances evaluated in light of all available evidence as of the balance sheet date. See “Note 13. Income Taxes” to the Consolidated Financial Statements.

Pension and Other Postemployment Benefits

Our pension and other postemployment benefit costs and obligations are dependent on the various actuarial assumptions used in calculating such amounts. These assumptions relate to discount rates, salary growth, long-term return on plan assets, health care cost trend rates and other factors. We base the discount rate assumptions on current investment yields on high-quality corporate long-term bonds. The salary growth assumptions reflect our long-term actual experience and future or near-term outlook. We determine the long-term return on plan assets based on historical portfolio results and management’s expectation of the future economic environment. Our health care cost trend assumptions are developed based on historical cost data, the near-term outlook and an assessment of likely long-term trends. Actual results that differ from our assumptions are accumulated and, if in excess of the lesser of 10% of the projected benefit obligation or the fair market value of plan assets, amortized over the estimated future working life of the plan participants.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Operating Leases

Rent expense for operating leases is recorded on a straight-line basis over the lease term unless the lease contains an escalation clause which is not fixed or determinable. The lease term begins when we have the right to control the use of the leased property, which is typically before rent payments are due under the terms of the lease. If a lease has a fixed or determinable escalation clause, the difference between rent expense and rent paid is recorded as deferred rent and is included in the Consolidated Balance Sheets. Rent for operating leases that do not have an escalation clause or where escalation is based on an inflation index is expensed over the lease term as it is payable.

Commodity Risk Management

The Company attempts to mitigate commodity purchase exposures through a program of risk management that includes the use of forward purchase contractual obligations and derivative financial instruments. We recognize all derivative financial instruments in the Consolidated Balance Sheets at fair value. We elected not to designate derivative financial instruments executed to mitigate commodity purchase exposures as hedges of forecasted transactions. Therefore, we recognize changes in the fair value of these derivative financial instruments immediately in earnings. Gains or losses related to these derivative financial instruments are included in the line item Cost of sales in the Consolidated Statements of Operations.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the US ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. We make significant estimates in regard to receivables collectability; inventory valuation; realization of deferred tax assets; valuation of long-lived assets; valuation of contingent liabilities, liabilities subject to compromise and self insurance liabilities; valuation of pension and other postretirement benefits obligations; and valuation of acquired businesses.

Recently Adopted Accounting Pronouncements

On December 27, 2010, the Company adopted a portion of Accounting Standards Update (“ASU”) 2010-06, Improving Disclosures about Fair Value Measurements, issued by the Financial Accounting Standards Board (the "FASB"). The ASU amended Accounting Standards Codification (“ASC”) Subtopic 820-10 by including new required disclosures regarding activity in Level 3 fair value measurements. The adoption of the subject guidance under amended ASC 820-10 did not have a material impact on the Company's consolidated financial statements.

Accounting Pronouncements Issued But Not Yet Adopted

The FASB recently issued ASU No. 2011-04, Fair Value Measurement: Amendments to Achieve Common Fair Value Disclosure Requirements in the U.S. GAAP and IFRS. The amendment clarifies the FASB's intent about the application of existing fair value measurement and disclosure requirements (ASC Topic 820) and improves consistency in wording to ensure that U.S. GAAP and International Financial Reporting Standards ("IFRS") are described the same way. Other amendments change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The amendment is effective for fiscal years beginning after December 15, 2011 and is to be applied prospectively. The Company has not yet adopted this amendment; however, adoption will not have a material impact on

the Company's financial position, results of operations or cash flow.

2. CHAPTER 11 PROCEEDINGS

Chapter 11 Bankruptcy Filings and Proceedings

Emergence from Bankruptcy

On December 1, 2008, Pilgrim's and six of its subsidiaries filed voluntary petitions in the United States Bankruptcy Court for the Northern District of Texas, Fort Worth Division (the “Bankruptcy Court”), seeking reorganization relief under the provisions of Chapter 11 of Title 11 of the United States Code (the “Bankruptcy Code”). We emerged from Chapter 11 bankruptcy proceedings on December 28, 2009 (the "Effective Date"). In connection with our emergence from bankruptcy, our common stock outstanding immediately prior to the emergence was canceled and converted into the right to receive newly-issued shares of common stock of the reorganized Company based on a one-for-one exchange ratio, which constituted 36.0% of the total number of shares of our newly-issued common stock on that date. The remaining shares of our newly-issued common stock, constituting 64.0% of our total issued and outstanding common stock on December 28, 2009, were purchased for $800.0 million by JBS USA Holdings, Inc. (“JBS USA”), a wholly-owned indirect subsidiary of JBS S.A., a Brazil-based meat producer. On November 5, 2010, JBS USA increased its stake in the Company to 67.3% of the total number of shares issued and outstanding on such date. On January 5, 2012, the Company issued 200,000 shares of common stock, which subsequently reduced JBS USA's stake in the Company to 67.2%. See "Note 18. Incentive Compensation Plans" to the Consolidated Financial Statements for additional information.

Upon exiting from bankruptcy, Pilgrim's and certain of its subsidiaries entered into an exit credit facility that provided for an aggregate commitment of $1.75 billion (the “Exit Credit Facility”). The facility currently consists of a $700.0 million revolving credit facility maturing on December 28, 2014 and a $582.3 million Term B facility maturing on December 28, 2014. As of December 25, 2011, a principal amount of $347.3 million under the revolving loan commitment and a principal amount of $574.6 million under the Term B facility were outstanding.

Financial Reporting Considerations

The Company's emergence from bankruptcy did not qualify for fresh start accounting because the reorganization value determined for the Company upon emergence exceeded post-petition liabilities and allowed claims. Reorganization value is the estimated fair value of the Company before considering liabilities and approximates the amount a willing buyer would pay for the assets of the Company immediately after the restructuring. To determine its reorganization value, the Company considered recent third-party valuations of its assets as well as the purchase price paid by JBS USA for 64.0% of the common stock of the reorganized Company. Management believes that the method used to determine the Company's reorganization value was the most appropriate method under the circumstances because the Bankruptcy Court did not declare a reorganization value for the Company. The Company's conclusion that it did not qualify for fresh start accounting was substantiated by the fact that (i) no liabilities were discounted in the plan of reorganization and (ii) the common stock of the reorganized Company traded at an average price of $8.40 per share on December 28, 2009, resulting in a market capitalization on 36.0% of the outstanding common stock of the reorganized Company of approximately $650.0 million and indicating that the investment community believed that the fair value of the Company's assets exceeded its post-petition liabilities and allowed claims on December 28, 2009. The acquisition of a controlling interest in the Company by JBS USA did not qualify for push-down accounting as JBS USA only purchased 64.0% of the common stock of the reorganized

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Company on December 28, 2009. Thus, the Company did not revalue its assets and liabilities because of either its emergence from bankruptcy or the purchase of 64.0% of the common stock of the reorganized Company by JBS USA. Between December 1, 2008, the petition date, and through December 25, 2011, the Company applied ASC Topic 852, Reorganizations, in preparing the Consolidated Financial Statements. ASC Topic 852 requires that the financial statements, for periods subsequent to the Chapter 11 filing, distinguish transactions and events that are directly associated with the reorganization from the ongoing operations of the business. Accordingly, certain expenses (including professional fees), realized gains and losses and provisions for losses that are realized or incurred in the bankruptcy proceedings are recorded in Reorganization items, net on the accompanying Consolidated Statements of Operations.

Beginning in December 2008, certain activities directly associated with the reorganization were approved by the Bankruptcy Court. These activities eliminated approximately 8,100 positions and resulted in net pre-tax charges totaling $138.5 million. Of these charges, we recognized $51.8 million of professional fees directly related to the reorganization, $25.0 million of finance costs related to various credit facilities, $14.1 million of incentive compensation costs and $62.9 million of other reorganization costs such as severance, other personnel costs and facility closure costs. We also recognized an aggregate net gain totaling $15.3 million on asset disposals directly associated with the reorganization. The cash-related portion of these reorganization costs totaled $133.7 million. Asset impairments and other noncash charges totaled $20.1 million. Proceeds received on asset disposals directly associated with the reorganization totaled $78.9 million.
Exit or disposal costs totaling $18.5 million, $32.7 million and $87.3 million incurred during 2010, the Transition Period and 2009, respectively, were classified as reorganization items. There were no reorganization items incurred in 2011.
The Debtors' reorganization items consisted of the following:

	2010	Transition Period	2009
	(In thousands)		
Professional fees directly related to reorganization[(a)]	$2,785	$ 14,175	$34,831
Incentive compensation[(b)]	—	14,071	—
Finance costs related to various credit facilities[(c)]	13,654	—	11,375
Net loss (gain) on asset disposal[(d)]	—	570	(15,850)
Other costs[(e)]	2,102	3,910	56,919
Reorganization items, net	$18,541	$ 32,726	$87,275

(a) Professional fees directly related to the reorganization included post-petition fees and fee reductions associated with advisors to the Debtors, the statutory committee of unsecured creditors and certain secured creditors. Professional fees are estimated by the Debtors and continue to be reconciled to actual invoices when received.

(b) During the Transition Period incentive compensation included certain incentive compensation costs that were contingent upon confirmation by the Bankruptcy Court of a plan of reorganization that satisfied the requirements of the Bankruptcy Code. These costs included incentive compensation of $10.3 million awarded under the Pilgrim's Pride Corporation FY2009 Performance Bonus Plan approved by the Bankruptcy Court on September 29, 2009, and both cash incentive compensation of $2.0 million and share-based incentive compensation of $1.8 million awarded under the Amended and Restated Employment Agreement between the Company and Don Jackson, the Company's former Chief Executive Officer, which was approved by the Bankruptcy Court on January 27, 2009 (the "Jackson Employment Agreement"). The Company recognized share-based compensation expense of $0.9 million on December 10, 2009, when restrictions on 1,542,828 shares of common stock awarded to Dr. Jackson lapsed following the confirmation of the Plan and the Company's achievement of certain financial performance targets established under the Jackson Employment Agreement. The Company also recognized share-based compensation expense of $0.9 million on December 27, 2009, when restrictions on 1,542,828 shares of common stock awarded to the Dr. Jackson expired upon the Company's achievement of certain financial performance targets established under

the Jackson Employment Agreement. As of December 27, 2009, the intrinsic value of the shares of common stock awarded to Dr. Jackson totaled $25.9 million.

(c) For the year ended December 26, 2010, Finance costs related to various credit facilities included expenses related to the elimination of an amortized loan cost associated with the Prior Secured Credit Facilities and the Unsecured Notes and the recognition in earnings of a previously unrealized gain on a derivative instrument designated as a cash flow hedge associated with the Unsecured Notes. For the year ended September 26, 2009, Finance costs related to various credit facilities included finance costs related to the DIP Credit Agreement.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(d) In 2009, the Company recognized net gains on asset disposals including (i) a gain recognized on the sale of the Farmerville, Louisiana processing facility, (ii) a gain recognized on the sale of undeveloped land in Camp County, Texas, (iii) a loss recognized on the sale of the Company's interest in a hog farming joint venture and (iv) a loss recognized on the sale of the assets of Luker, Inc., a metal fabrication subsidiary. During the Transition Period the Company recognized a loss on the sale of Valley Rail Services, Inc., a wholly owned subsidiary of the Company that participated in a joint venture holding the access rights to a railroad spur in northern Virginia.

(e) Other expenses includes (i) severance, grower pay, live flock impairment, inventory disposal costs, equipment relocation costs and other shutdown costs related to the closed processing facilities in Douglas, Georgia; El Dorado, Arkansas; Farmerville, Louisiana; Franconia, Pennsylvania; Dalton, Georgia; Athens, Georgia; and Athens, Alabama, (ii) severance costs related to the closed distribution center in Houston, Texas, the February 2009 Operations management reduction-in-force ("RIF") action, the April 2009 non-production employee RIF action, and reduced or consolidated production at various facilities throughout the US, (iii) asset impairment costs related to the closed processing facility in Dalton, Georgia and (iv) fees associated with the termination of the Restated Receivables Purchase Agreement dated September 26, 2008, as amended, on December 3, 2008.

We did not receive cash from reorganization activities for the year ended December 25, 2011. Net cash received from reorganization activities for the year ended December 26, 2010 totaled $0.3 million from the sale of maintenance inventory parts. These cash flows are included in the section Cash flows from investing activities on the Consolidated Statement of Cash Flows. Net cash received from reorganization activities during the Transition Period totaled $1.0 million from the sale of Valley Rail Service, Inc. Net cash received from reorganization activities during the year ended September 26, 2009 totaled $77.6 million. This represented proceeds of $72.3 million from the sale of the Farmerville, Louisiana processing facility, proceeds of $5.0 million from the sales of undeveloped land in Camp County, Texas and Hopkins County, Texas and proceeds of $0.3 million from the sale of the assets owned by Luker, Inc.

We did not pay cash for reorganization activities for the year ended December 25, 2011. Net cash paid for reorganization items in 2010 totaled $30.7 million. This represented payment of incentive compensation totaling $13.0 million that was contingent upon confirmation by the Bankruptcy Court of a plan of reorganization that satisfied the requirements of the Bankruptcy Code, professional fees directly related to the reorganization totaling $15.7 million, severance payments of $1.5 million and payment of facility closure costs totaling $0.5 million. Net cash paid for reorganization items during the Transition Period totaled $17.0 million. This represented payment of professional fees directly related to the reorganization totaling $9.5 million, severance payments of $2.3 million and payment of facility closure costs totaling $5.2 million. Net cash paid for reorganization items in 2009 totaled $51.7 million. This represented payment of professional fees directly related to the reorganization totaling $25.4 million, payment of DIP Credit Agreement related expenses totaling $11.4 million, severance payments of $8.6 million, payment of facility closure costs totaling $5.6 million and payment of fees associated with the termination of the Company's Amended and Restated Receivables Purchase Agreement dated September 26, 2008 totaling $0.7 million.

The Company did not record activity through the accrued reorganization cost accounts during 2011. The following table sets forth activity that was recorded through the Company's accrued reorganization cost accounts during 2010, the Transition Period and 2009:

	Accrued Other Costs	Accrued Severance	Total
September 27, 2008	$—	$—	$—
Accruals	10,637	13,933	24,570
Payment /Disposal	(3,775)	(8,593)	(12,368)

Adjustments	(1,372)	(56)	(1,428)
December 26, 2010	$—	$—	$—

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Costs incurred in the second, third and fourth quarters of 2009, the Transition Period and the first quarter of 2010, were primarily classified as reorganization items.

The Company resolved a majority of the claims against it through settlement or by Bankruptcy Court order resulting in benefits of $8.8 million that are reflected in Miscellaneous, net on the Consolidated Statements of Operations for the year ended December 26, 2010. The claims resolution process continues for the remaining unresolved claims and will continue until all claims are concluded. Prior to the Effective Date, estimated claims were presented as Liabilities subject to compromise in the Consolidated Balance Sheets because of the uncertainty of the eventual settlement amounts. Due to the Plan becoming effective and the claims reconciliation process being substantially complete with respect to claims not subject to litigation, there is little uncertainty as to the total amount to be distributed under the Plan with respect to these claims. As such, pre-petition obligations after the Effective Date are no longer presented as subject to compromise. Unpaid amounts related to unresolved claims are classified in Accrued expenses and other current liabilities on the Condensed Consolidated Balance Sheets. During the fifty-two weeks December 25, 2011, the Company paid creditors approximately $0.4 million to settle allowed claim amounts and interest accrued on those claim amounts. During the year ended December 26, 2010, the Company paid creditors, excluding creditors under the Prior Secured Credit Facilities and the Unsecured Notes, for allowed claim amounts with interest totaling approximately $101.1 million. As of December 25, 2011, the following pre-petition obligations relating to claims not subject to litigation remain outstanding (in thousands):

Trade claims	$801
Interest accrued on unpaid claims	25
Total pre-petition obligations	$826

The Company is also the named defendant in several pre-petition lawsuits that, as of December 25, 2011, have not been resolved. See “Note 17. Commitments and Contingencies” to the Consolidated Financial Statements for additional information.

3. EXIT OR DISPOSAL ACTIVITIES

Beginning in January 2010, Company management implemented certain exit or disposal activities to integrate the administrative functions of the Company into those of JBS USA. In July 2011, additional exit and disposal activities were implemented by Company management to consolidate operations at our Dallas, Texas facility into other facilities in the surrounding area. The Company expects to incur ongoing costs of approximately $14.5 million related to the idling of the Dallas, Texas facility in future quarters.

Since February 2008, these exit or disposal activities eliminated a total of approximately 6,000 positions and resulted in net pre-tax charges totaling $153.2 million. Of these charges, we recognized $48.8 million of severance and other personnel costs, $54.1 million of impairment costs related to long-lived assets held for sale, $32.5 million in losses related to the sale of unneeded eggs and the depletion of unneeded flocks, $4.0 million of grower compensation, $2.0 million of lease continuation costs, $2.1 million in losses related to scrapped inventory and $9.7 million in other restructuring costs. All exit or disposal costs related to these activities, with the exception of costs or losses related to asset impairments, sales of unneeded eggs, depletion of unneeded flocks and scrapped inventory, resulted in cash expenditures or will result in cash expenditures within one year. The cash-related portion of these exit or disposal costs totaled $54.8 million.

Results of operations for 2011, 2010 and 2009 included accrued exit or disposal costs totaling $2.4 million, $41.0 million, and $6.0 million, respectively. There were no accrued exit or disposal costs during the Transition Period. All exit or disposal costs, with the exception of costs related to lease obligations and

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

inventory reserves related to closed facilities, have resulted in cash expenditures or will result in cash expenditures within one year.
Results of operations for 2011, 2010, Transition Period and 2009 also included adjustments to exit or disposal costs totaling $1.3 million, $10.5 million, $0.4 million, and $6.7 million, respectively, which reduced the accrued costs. Adjustments recognized in 2011 included favorable adjustments of accrued severance.

The following table sets forth restructuring activity that occurred during 2011, 2010, the Transition Period and 2009:

	Accrued Lease Obligation	Accrued Severance	Accrued Other Exit or Disposal Costs	Inventory Reserves	Total
	(In thousands)				
September 27, 2008	$4,466	$2,694	$5,651	$1,212	$14,023
Accruals	—	3,897	2,059	—	5,956
Payment/Disposal	(622)	(4,283)	(2,753)	(1,000)	(8,658)
Adjustments	(2,202)	(1,792)	(2,454)	(212)	(6,660)
September 26, 2009	1,642	516	2,503	—	4,661
Accruals	—	—	—	—	—
Payment/Disposal	(86)	—	—	—	(86)
Adjustments	(1,536)	—	1,111	—	(425)
December 27, 2009	20	516	3,614	—	4,150
Accruals	—	31,116	9,869	—	40,985
Payment /Disposal	—	(27,086)	(2,611)	—	(29,697)
Adjustments	(20)	(396)	(10,872)	793	(10,495)
December 26, 2010	—	4,150	—	793	4,943
Accruals	—	2,375	—	—	2,375
Payment/Disposal	—	(5,111)	—	—	(5,111)
Adjustments	—	(1,324)	—	—	(1,324)
December 25, 2011	$—	$90	$—	$793	$883

The Company recognized impairment charges totaling $20.1 million and $26.5 million for the years ended 2011 and 2010, respectively, to reduce the carrying amounts of certain property, plant and equipment to their estimated fair values. These costs were classified as restructuring items in 2011 and 2010.
Exit or disposal costs totaling $4.3 million, $2.9 million, and $12.5 million were recognized during 2010, the Transition Period, and 2009, respectively, and were classified as Operational restructuring charges, net, a component of gross profit, because management believes these costs are directly related to the Company’s ongoing production activities. There were no exit or disposal costs classified as Operational restructuring charges, net in 2011. Exit or disposal costs totaling $26.1 million, $66.0 million, a credit of $1.4 million, and costs of $2.0 million were recognized during 2011, 2010, the Transition Period, and 2009, respectively, and were classified as Administrative restructuring charges, net, a component of operating income below gross profit, because management believes these costs were not directly related to the Company’s ongoing production.
In 2009, the Company recognized losses totaling $12.5 million related to sales of unneeded broiler eggs. These losses were recognized as a component of gross profit (loss).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Components of operational restructuring charges and administrative restructuring charges are summarized below:

	2011	2010	Transition Period	2009
	(In thousands)			
Operational restructuring charges, net:				
Relocation charges expensed as incurred	$—	$3,288	$—	$—
Asset impairments (See "Note 10—Property, Plant and Equipment")	—	1,030	—	—
Loss on egg sales and flock depletion expensed as incurred	—	—	2,877	12,464
Total	$—	$4,318	$2,877	$12,464
Administrative restructuring charges, net:				
Accrued severance provisions (adjustments)	$724	$31,227	$—	$1,941
Relocation charges expensed as incurred	—	7,224	—	—
Asset impairments (See "Note 10—Property, Plant and Equipment")	20,088	25,453	—	—
Loss on inventory scrapped expensed as incurred	2,390	2,118	—	—
Lease continuation	—	—	(1,359)	—
Other restructuring costs	2,859	—	—	46
Total	$26,061	$66,022	$(1,359)	$1,987

We continue to review and evaluate various restructuring and other alternatives to streamline our operations, improve efficiencies and reduce costs. Such initiatives may include selling assets, consolidating operations and functions, employee relocation and voluntary and involuntary employee separation programs. Any such actions may require us to obtain the pre-approval of our lenders under our Exit Credit Facility. In addition, such actions will subject the Company to additional short-term costs, which may include asset impairment charges, lease commitment costs, employee retention and severance costs and other costs. Certain of these activities may have a disproportionate impact on our income relative to the cost savings in a particular period.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

4. FAIR VALUE MEASUREMENT

The asset (liability) amounts recorded in the Consolidated Balance Sheet (carrying amounts) and the estimated fair values of financial instruments consisted of the following:

	2011 Carrying Amount (In thousands)	Fair Value	2010 Carrying Amount	Fair Value	Note Reference
Short-term investments in available-for-sale securities	157	157	1,554	1,554	7
Commodity derivative assets[a]:					8
Futures	2,870	2,870	32,962	32,962	
Options	—	—	399	399	
Long-term investments in available-for-sale securities	497	497	11,595	11,595	7
Commodity derivative liabilities[b]:					8
Futures	(2,120)	(2,120)	(8,497)	(8,497)	
Options	(603)	(603)	(7,890)	(7,890)	
Long-term debt and other borrowing arrangements[c]	(1,423,612)	(1,421,517)	(1,339,304)	(1,355,135)	12
Note payable to JBS USA Holdings	(50,000)	(50,077)	—	—	12, 16

(a) Commodity derivative assets are included in Prepaid expenses and other current assets on the Consolidated Balance Sheet.

(b) Commodity derivative liabilities are included in Accrued expenses on the Consolidated Balance Sheet.

(c) The fair values of the Company’s long-term debt and other borrowing arrangements were estimated by calculating the net present value of future payments for each debt obligation or borrowing by: (i) using a risk-free rate applicable for an instrument with a life similar to the remaining life of each debt obligation or borrowing plus the current estimated credit risk spread for the Company or (ii) using the quoted market price at December 25, 2011 or December 26, 2010.

The carrying amounts of our cash and cash equivalents, derivative trading accounts margin cash, restricted cash and cash equivalents, accounts receivable, accounts payable and certain other liabilities approximate their fair values due to their relatively short maturities. The Company adjusts its investments, commodity derivative assets and commodity derivative liabilities to fair value based on quoted market prices in active markets for identical instruments, quoted market prices in active markets for similar instruments or other inputs that are observable for the subject instrument or unobservable inputs such as discounted cash flow models or valuations.

ASC Topic 820, Fair Value Measurements and Disclosures, establishes a framework for measuring fair value and requires enhanced disclosures about fair value measurements. The subject guidance under ASC Topic 820 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The subject guidance under ASC Topic 820 also requires disclosure about how fair value was determined for assets and liabilities and established a hierarchy for which these assets and liabilities must be grouped, based on significant levels of inputs as follows:

Level 1	Unadjusted quoted prices in active markets for identical assets or liabilities;
Level 2	Quoted prices in active markets for similar assets and liabilities or other inputs that are observable for the asset or liability; or
Level 3	Unobservable inputs, such as discounted cash flow models or valuations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The determination of where assets and liabilities fall within this hierarchy is based upon the lowest level of input that is significant to the fair value measurement.
As of December 25, 2011, the Company held certain items that are required to be measured at fair value on a recurring basis. These included cash and cash equivalents, derivative assets and liabilities, short-term investments in available-for-sale securities and long-term investments in available-for-sale securities. Cash equivalents consist of short-term, highly liquid, income-producing investments such as money market funds and other funds that have maturities of 90 days or less. Derivative assets and liabilities consist of long and short positions on both exchange-traded commodity futures and commodity options as well as margin cash on account with the Company’s derivatives brokers. Short-term investments in available-for-sale securities consist of short-term, highly liquid, income-producing investments such as municipal debt securities that have maturities of greater than 90 days but less than one year. Long-term investments in available-for-sale securities consist of income-producing investments such as municipal debt securities, corporate debt securities and fund-of-funds units that have maturities of greater than one year.

The following items are measured at fair value on a recurring basis at December 25, 2011:

	Level 1	Level 2	Level 3	Total
	(In thousands)			
Short-term investments in available-for-sale securities	$—	$157	$—	$157
Commodity derivative assets:				
Futures	2,870	—	—	2,870
Long-term investments in available-for-sale securities	—	438	59	497
Commodity derivative liabilities:				
Futures	(2,120)	—	—	(2,120)
Options	—	(603)	—	(603)

Financial assets and liabilities classified in Level 1 at December 25, 2011 include commodity futures derivative instruments traded in active markets. The valuation of these instruments is determined using a market approach, taking into account current interest rates, creditworthiness, and liquidity risks in relation to current market conditions, and is based upon unadjusted quoted prices for identical assets in active markets. The valuation of plan assets in Level 2 is determined using a market approach based upon quoted prices for similar assets and liabilities in active markets, or other inputs that are observable for substantially the full term of the financial instrument. Level 2 securities primarily include equity securities, fixed income securities and commodity option derivative instruments. The valuation of plan assets in Level 3 is determined using an income approach based on unobservable inputs such as discounted cash flow models or valuations. Level 3 securities consist of a fund of funds investment and auction rate securities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table presents activity for each reporting period related to the Company’s investment in a fund of funds asset and auction rate securities that are measured at fair value on a recurring basis using Level 3 inputs:

	Fund of Funds	Auction Rate Securities	Total
	(In thousands)		
Balance at September 27, 2008	$1,197	$3,850	$5,047
Included in other comprehensive income	(129)	—	(129)
Sale of securities	—	(3,850)	(3,850)
Balance at September 26, 2009	1,068	—	1,068
Included in other comprehensive income	48	—	48
Balance at December 27, 2009	1,116	—	1,116
Included in other comprehensive income	74	—	74
Balance at December 26, 2010	1,190	—	1,190
Included in other comprehensive income	(19)	—	(19)
Sale of securities	(1,112)	—	(1,112)
Balance at December 25, 2011	$59	$—	$59

In addition to assets and liabilities that are recorded at fair value on a recurring basis, the Company records certain assets and liabilities at fair value on a nonrecurring basis. Generally, assets are recorded at fair value on a nonrecurring basis as a result of impairment charges when required by U.S. GAAP. During 2011, certain long-lived assets with a carrying amount of $62.1 million were written down to their fair value of $39.2 million, resulting in a loss of $22.9 million recorded in earnings. These assets are classified as Level 2 assets because their fair value can be corroborated based on observable market data.

5. TRADE ACCOUNTS AND OTHER RECEIVABLES

Trade accounts and other receivables, less allowance for doubtful accounts, consisted of the following:

	December 25, 2011	December 26, 2010
	(In thousands)	
Trade accounts receivable	$337,411	$318,008
Account receivable from JBS USA, LLC	21,198	465
Other receivables	16,974	9,355
Receivables, gross	375,583	327,828
Allowance for doubtful accounts	(5,163)	(6,063)
Receivables, net	$370,420	$321,765

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

6. INVENTORIES

Inventories consisted of the following:

	December 25, 2011	December 26, 2010
	(In thousands)	
Chicken:		
Live chicken and hens	$363,590	$348,700
Feed, eggs and other	238,449	221,939
Finished chicken products	273,363	440,458
Total chicken inventories	875,402	1,011,097
Other products:		
Commercial feed, table eggs, retail farm store and other	3,674	12,355
Distribution inventories (other than chicken products)	18	5,802
Total other products inventories	3,692	18,157
Total inventories	$879,094	$1,029,254

Inventories did not include a lower-of-cost-or-market allowance at December 25, 2011. Inventories included a lower-of-cost-or-market allowance of $2.5 million at December 26, 2010. The loss recognized on the application of the rule of lower-of-cost-or-market valuation in 2010 was also $2.5 million.

7. INVESTMENTS IN SECURITIES

We recognize investments in available-for-sale securities as cash equivalents, current investments or long-term investments depending upon each security's length to maturity. Additionally, those securities identified by management at the time of purchase for funding operations in less than one year are classified as current.

The following table summarizes our investments in available-for-sale securities:

	December 25, 2011		December 26, 2010	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(In thousands)			
Cash equivalents:				
Fixed income securities	$—	$—	$50	$51
Current investments:				
Fixed income securities	$152	$157	$1,518	$1,554
Long-term investments:				
Fixed income securities	$367	$438	$3,285	$3,452
Equity securities	—	—	5,884	6,953
Other	59	59	1,300	1,190

Table of Contents

Maturities for the Company's investments in fixed income securities as of December 25, 2011, were as follows:

	Amount (In thousands)	Percent	
Matures in less than one year	$157	26.4	%
Matures between one and two years	109	18.3	%
Matures between two and five years	242	40.7	%
Matures in excess of five years	87	14.6	%
	$595	100	%

The Company and certain retirement plans that it sponsors invest in a variety of financial instruments. Certain postretirement funds in which the Company participates hold significant amounts of mortgage-backed securities. However, none of the mortgages collateralizing these securities are considered subprime.

Certain investments are held in trust as compensating balance arrangements for our insurance liability and are classified as long-term based on a maturity date greater than one year from the balance sheet date and management's intention not to use such assets in the next year.

8. DERIVATIVE FINANCIAL INSTRUMENTS

The Company utilizes various raw materials in its operations, including corn, soybean meal, soybean oil and energy, such as natural gas, electricity and diesel fuel, which are all considered commodities. The Company considers these raw materials generally available from a number of different sources and believes it can obtain them to meet its requirements. These commodities are subject to price fluctuations and related price risk due to factors beyond our control, such as economic and political conditions, supply and demand, weather, governmental regulation and other circumstances. Generally, the Company incurs forward purchase contractual obligations or purchases derivative financial instruments, specifically exchange-traded futures and options, in an attempt to mitigate price risk related to its anticipated consumption of commodity inputs for periods of up to 12 months. The Company may purchase longer-term derivative financial instruments on particular commodities if deemed appropriate. The fair value of derivative assets is included in the line item Prepaid expenses and other current assets on the Condensed Consolidated Balance Sheets while the fair value of derivative liabilities is included in the line item Accrued expenses and other current liabilities on the same statements. Our counterparties require that we post cash collateral for changes in the net fair value of the derivative contracts.

We have not designated the derivative financial instruments that we have purchased to mitigate commodity purchase exposures as cash flow hedges. Therefore, we recognized changes in the fair value of these derivative financial instruments immediately in earnings. Gains or losses related to these derivative financial instruments are included in the line item Cost of sales in the Condensed Consolidated Statements of Operations. The Company recognized $63.8 million and $69.2 million in net gains and net losses of $21.1 million related to changes in the fair value of its derivative financial instruments during 2011, 2010 and 2009, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Information regarding the Company's outstanding derivative instruments and cash collateral posted with (owed to) brokers is included in the following table:

	December 25, 2011	December 26, 2010
	(Fair values in thousands)	
Fair values:		
Commodity derivative assets	$2,870	$33,361
Commodity derivative liabilities	(2,723)	(16,387)
Cash collateral posted with brokers	3,271	4,528
Derivatives Coverage[(a)]:		
Corn	N/A	13.8 %
Soybean meal	N/A	8.7 %
Period through which stated percent of needs are covered:		
Corn	N/A	December 2011
Soybean meal	N/A	December 2011
Written put options outstanding[(b)]:		
Fair value	$(603)	$7,890
Number of contracts:		
Corn	500	6,775
Soybean meal	—	750
Expiration dates	March 2012	May 2011 through December 2011
Short positions on outstanding futures derivative instruments[(b)]:		
Fair value	$495	$8,497
Number of contracts:		
Corn	2,531	2,805
Soybean meal	96	692

(a) Derivatives coverage is the percent of anticipated corn and soybean meal needs covered by outstanding derivative instruments through a specified date. As of December 25, 2011, the Company had short derivative positions to offset long forward cash purchases, which exceeded open long derivative positions for both corn and soybean meal. These positions expire by December 2012.

(b) A written put option is an option that the Company has sold that grants the holder the right, but not the obligation, to sell the underlying asset at a certain price for a specified period of time. When the Company takes a short position on a futures derivative instrument, it agrees to sell the underlying asset in the future at a price established on the contract date. The Company writes put options and takes short positions on futures derivative instruments to minimize the impact of feed ingredients price volatility on its operating results.

On December 28, 2009, the Company recognized in earnings a previously unrealized gain totaling $4.1 million on a derivative instrument designated as a cash flow hedge against the interest rate charged on an unsecured note payable that was effectively extinguished on December 28, 2009. This gain was included in the line item Reorganization items, net in the Consolidated Statement of Operations for the thirty-nine weeks ended September 26, 2010.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

9. IDENTIFIED INTANGIBLE ASSETS

Identified intangible assets consisted of the following:

	Useful Life (Years)	Original Cost	Accumulated Amortization	Carrying Amount
			(In thousands)	
December 26, 2010:				
Trade names	3–15	$39,271	$(25,629)	$13,642
Customer relationships	13	51,000	(15,692)	35,308
Non-compete agreements	3	300	(300)	—
Total intangible assets		90,571	(41,621)	48,950
December 25, 2011:				
Trade names	3–15	40,143	(27,445)	12,698
Customer relationships	13	51,000	(19,615)	31,385
Non-compete agreements	3	300	(300)	—
Total intangible assets		$91,443	$(47,360)	$44,083

We recognized amortization expense related to identified intangible assets of $5.7 million in 2011, $5.7 million in 2010, $2.5 million in the Transition Period and $10.2 million in 2009.

We expect to recognize amortization expense associated with identified intangible assets of $5.7 million in each year from 2012 through 2016.

10. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment (“PP&E”), net consisted of the following:

	December 25, 2011	December 26, 2010
	(In thousands)	
Land	$65,413	$81,212
Buildings	1,077,789	1,091,004
Machinery and equipment	1,492,251	1,414,718
Autos and trucks	58,518	57,441
Construction-in-progress	36,094	96,442
Property, plant and equipment, gross	2,730,065	2,740,817
Accumulated depreciation	(1,488,313)	(1,382,681)
Property, plant and equipment, net	$1,241,752	$1,358,136

The Company recognized depreciation expense of $192.6 million, $209.4 million, $52.4 million and $217.9 million during 2011, 2010, the Transition Period and 2009, respectively.

During 2011, the Company sold certain property, plant and equipment for cash of $29.0 million and recognized a gain of $4.3 million. PP&E sold in 2011 included a processing plant in North Carolina, a rendering plant in Georgia, an egg production facility in Texas, a feed mill in Georgia, a hatchery in Alabama, various broiler, breeder and pullet farms in Texas, an empty office building in West Virginia, rental properties in Texas, developed and undeveloped real estate in Texas and miscellaneous processing equipment.

The Company has temporarily idled (i) processing facilities in Alabama, Georgia, Arkansas and Texas,

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(ii) hatcheries in Alabama, Georgia, Texas, Arkansas and North Carolina, (iii) various broiler farms in Texas, (iv) a feed mill in North Carolina and (v) a vehicle maintenance center in Texas. The Company continues to depreciate these assets. At December 25, 2011, the carrying amount of these idled assets was $67.7 million based on depreciable value of $168.9 million and accumulated depreciation of $101.2 million. We reopened an idled processing plant in Douglas, Georgia in January 2011. The Company will evaluate the decision to bring the Douglas, Georgia facility to full capacity during 2012.

The Company has closed and is actively marketing for sale (i) processing plants in Georgia, Louisiana and Pennsylvania (ii) administrative offices in Texas and Georgia, (iii) a distribution center in Louisiana, (iv) various breeder and broiler farms in Texas and Georgia, (v) hatcheries in Alabama and Georgia, (vi) a warehouse in Texas and (vii) a commercial egg facility in Texas. At December 25, 2011, the Company reported assets held for sale totaling $53.8 million in Assets held for sale on its Consolidated Balance Sheets. In 2011, the Company recognized charges totaling $2.8 million in cost of goods sold and administrative restructuring charges totaling $20.1 million to impair the carrying amounts of certain assets held for sale located in Texas, Pennsylvania, Georgia, North Carolina, and Louisiana to fair value.

The Company tested the recoverability of its long-lived assets held for use during the thirteen weeks ended December 25, 2011 by comparing the book value of its invested capital, exclusive of assets held for sale, with the undiscounted cash flows expected to result from the use and eventual disposition of its long-lived assets held for use. The Company determined that the carrying amount of its long-lived assets held for use is recoverable over the remaining life of the primary asset in the group, and the long-lived assets for use pass the Step 1 recoverability test of ASC 360-10-35, Impairment or Disposal of Long-Lived Assets.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Debt Obligations

Senior and Subordinated Notes. On December 15, 2010, the Company closed on the sale of $500.0 million of 7 $^{7}/_{8}$% senior notes due 2018 (the “2018 Notes”). The 2018 Notes are unsecured obligations of the Company and are guaranteed by one of the Company's subsidiaries. Interest is payable on December 15 and June 15 of each year, commencing on June 15, 2011. The indenture governing the 2018 Notes contains various covenants that may adversely affect our ability, among other things, to incur additional indebtedness, incur liens, pay dividends or make certain restricted payments, consummate certain asset sales, enter into certain transactions with JBS USA and our other affiliates, merge, consolidate and/or sell or dispose of all or substantially all of our assets. The Company has subsequently exchanged these notes for substantially identical notes that are registered under the Securities Act of 1933. Additionally, we have an aggregate principal balance of $3.9 million of 7 $^{5}/_{8}$% senior unsecured notes, 8 $^{3}/_{8}$% senior subordinated unsecured notes and 9 $^{1}/_{4}$% senior unsecured notes outstanding at December 25, 2011.

JBS Subordinated Loan Agreement. On June 23, 2011, the Company entered into a Subordinated Loan Agreement with JBS USA (the “Subordinated Loan Agreement”), which provided an aggregate commitment of $100.0 million. On June 23, 2011, JBS USA made a term loan to the Company in the principal amount of $50.0 million. In addition, JBS USA agreed to make an additional one-time term loan in the principal amount of $50.0 million if the Company's availability under the revolving loan commitment in the Exit Credit Facility is less than $200.0 million. Pursuant to the terms of the Subordinated Loan Agreement, we also agreed to reimburse JBS USA up to $56.5 million for draws upon any letters of credit issued for JBS USA's account that support certain obligations of Mayflower Insurance Company, Ltd., a wholly owned subsidiary of the Company. The commitment under the Subordinated Loan Agreement will terminate on the earlier to occur of (i) the date on which all amounts owing under the 2018 Notes and the Exit Credit Facility are due and payable in accordance with its terms or (ii) June 27, 2015. Loans under the Subordinated Loan Agreement mature on June 28, 2015. Additionally, on December 16, 2011, the Company entered into an amendment to the Subordinated Loan Agreement which, among other things, provided that if the Company consummates the Rights Offering on or before March 24, 2012 (unless such date is extended in accordance with the terms of the Exit Credit Facility), the revolving loan commitment under the Subordinated Loan Agreement will be terminated. Further, the Exit Credit Facility, as amended, also provides that if the Rights Offering occurs, then (i) the Company, at its option, is permitted to prepay the outstanding $50.0 million term loan under the Subordinated Loan Agreement and (ii) the existing commitment of JBS USA to make an additional $50.0 million term loan to the Company under the Subordinated Loan Agreement will be terminated.

JBS USA agreed to provide letters of credit in the amount of $56.5 million to an insurance company serving the Company in order to allow that insurance company to return cash it held as collateral against potential workers compensation, auto and general liability claims. In return for providing this letter of credit, the Company is reimbursing JBS USA for the letter of credit cost it would otherwise incur under its revolving credit agreement. The total costs accrued by the Company in 2011 to reimburse JBS USA was $0.4 million.

Exit Credit Facility. Upon exiting from bankruptcy, the Company and certain of its subsidiaries entered into the Exit Credit Facility that provided for an aggregate commitment of $1.75 billion. The facility consisted of a three-year $600.0 million revolving credit facility, a three-year $375.0 million Term A facility and a five-year $775.0 million Term B facility. The Exit Credit Facility also includes an accordion feature that allows us, at any time, to increase the aggregate revolving loan commitment by up to an additional $250.0 million and to increase the aggregate Term B loans commitment by up to an additional $400.0 million, in each case subject to the satisfaction of certain conditions, including an aggregate cap on all commitments under the Exit Credit Facility of $1.85 billion. On January 13, 2011, we increased the amount of the revolving

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

loan commitments under the Exit Credit Facility to $700.0 million. On April 22, 2011, we increased the amount of the sub-limit for swingline loans under the Exit Credit Facility to $100.0 million. The Term A loan was repaid on December 15, 2010 with proceeds from the 2018 Notes. The revolving loan commitment and the Term B loans will mature on December 28, 2014.

On December 25, 2011, a principal amount of $574.6 million under the Term B loans commitment and $347.3 million under the revolving loan commitment were outstanding. On December 28, 2009, the Company also paid loan costs totaling $50.0 million related to the Exit Credit Facility that it recognized as an asset on its balance sheet. The Company amortizes these capitalized costs to expense over the life of the Exit Credit Facility.

Subsequent to the end of each fiscal year, a portion of our cash flow must be used to repay outstanding principal amounts under the Term B loans. The Company did not have excess cash flow from 2011 to be applied toward the outstanding principal under the Term B loans. In April 2011, the Company paid approximately $46.3 million of its excess cash flow from 2010 toward the outstanding principal under the Term B loans. After giving effect of the 2010 prepayment and other prepayments, the Term B loans must be repaid in 16 quarterly installments of approximately $3.9 million which began on April 15, 2011, with the final installment due on December 28, 2014. The Exit Credit Facility also requires us to use the proceeds we receive from certain asset sales and specified debt or equity issuances and upon the occurrence of other events to repay outstanding borrowings under the Exit Credit Facility. The cash proceeds received by the Company from the Rights Offering will not be required to be prepaid to the lenders under the Exit Credit Facility as a mandatory prepayment.

The Exit Credit Facility includes a $100.0 million sub-limit for swingline loans and a $200.0 million sub-limit for letters of credit. Outstanding borrowings under the revolving loan commitment bear interest at a per annum rate equal to 3.00% plus the greater of (i) the US prime rate as published by the Wall Street Journal, (ii) the average federal funds rate plus 0.5%, and (iii) the one-month LIBOR rate plus 1.0%, in the case of alternate base rate loans, or 4.00% plus the one, two, three or six month LIBOR rate adjusted by the applicable statutory reserve, in the case of Eurodollar loans. Outstanding Term B-1 loans bear interest at a per annum rate equal to 3.50% plus greater of (i) the US prime rate, as published by the Wall Street Journal, (ii) the average federal funds rate plus 0.5%, and (iii) the one month LIBOR rate plus 1.0%, in the case of alternate base rate loans, or 4.50%, plus the one, two, three or six month LIBOR Rate adjusted by the applicable statutory reserve, in the case of Eurodollar loans. Outstanding Term B-2 loans bear interest at a per annum rate equal to 9.00%. Commitment fees charged on the revolving commitments under the Exit Credit Facility accrue at a per annum rate equal to 0.50%.

Actual borrowings by the Company under the revolving credit commitment component of the Exit Credit Facility are subject to a borrowing base, which is a formula based on certain eligible inventory, eligible receivables and restricted cash under the control of CoBank ACB, as administrative agent under the Exit Credit Facility. The borrowing base formula is reduced by the sum of (i) inventory reserves, (ii) rent and collateral access reserves, and (iii) any amount more than 15 days past due that is owed by the Company or its subsidiaries to any person on account of the purchase price of agricultural products or services (including poultry and livestock) if that person is entitled to any grower's or producer's lien or other security arrangement. As of December 25, 2011, the applicable borrowing base was $635.4 million, the amount available for borrowing under the revolving loan commitment was $248.0 million and outstanding borrowings and letters of credit under the revolving loan commitment were $347.3 million and $40.1 million, respectively.

Under the Exit Credit Facility, JBS USA, the Company's majority stockholder, or its affiliates may make loans to the Company on a subordinated basis on terms reasonably satisfactory to the agents under the Exit Credit Facility and up to $200.0 million of such subordinated indebtedness may be included in the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

calculation of EBITDA (as defined in the Exit Credit Facility as amended).

The Exit Credit Facility provides that the Company may not incur capital expenditures in excess of $175.0 million in 2011 and 2012 and $350.0 million each fiscal year thereafter. The Exit Credit Facility contains various other covenants that may adversely affect our ability to, among other things, incur additional indebtedness, incur liens, pay dividends or make certain restricted payments, consummate certain assets sales, enter into certain transactions with JBS USA and our other affiliates, merge, consolidate and/or sell or dispose of all or substantially all of our assets.

On June 23, 2011 and December 16, 2011, the Company entered into amendments to the Exit Credit Facility, which, among other things:

- Temporarily suspended the requirement for the Company to comply with the fixed charge coverage ratio and senior secured leverage ratio financial covenants until September 23, 2012;

- Modified the consolidated tangible net worth financial covenant to (i) require the Company to maintain consolidated tangible net worth of at least $550.0 million, including subordinated indebtedness owed to JBS USA, plus 50.0% of the cumulative net income (excluding any losses) of the Company from June 24, 2011 through the date of calculation and (ii) eliminate the requirement for the Company to comply with that financial covenant for the fiscal quarter ended December 25, 2011 and, if certain conditions are met, for the fiscal quarter ended March 25, 2012;

- Amended the fixed charge coverage ratio and the senior secured leverage ratio financial covenants so that when testing of those financial covenants resumes on September 24, 2012, the Company can calculate those financial covenants based upon a specified number of fiscal quarters selected by the Company;

- Provided that if the Rights Offering occurs on or before March 24, 2012 (which date may be extended under certain circumstances at the sole discretion of the administrative agent and Rabobank International to April 24, 2012), then:

The senior secured leverage ratio financial covenant will be set at levels more favorable to the Company after June 30, 2013; and

The consolidated tangible net worth financial covenant will be modified to reduce the level of tangible net worth of the Company required to satisfy such financial covenant.

ING Credit Agreement. On October 19, 2011, Avícola Pilgrim's Pride de México, S.A. de C.V. (“Avicola”), Pilgrim's Pride S. de R.L. de C.V. (“PPS”, together with Avicola, the “Borrowers”) and certain Mexican subsidiaries (together with the Borrowers, the “Loan Parties”) entered into an amended and restated credit agreement (the “ING Credit Agreement”) with ING Bank (México), S.A. Institución de Banca Múltiple, ING Grupo Financiero, as lender and ING Capital LLC, as administrative agent (“ING Capital”). The ING Credit Agreement has a final maturity date of September 25, 2014. As of December 25, 2011, the US dollar-equivalent of the ING Loan Commitment under the ING Credit Agreement was $40.3 million. There were no outstanding borrowings under the ING Credit Agreement at December 25, 2011.

Under the ING Credit Agreement, if (i) any default or event of default has occurred and is continuing or (ii) the quotient of the borrowing base divided by the outstanding loans and letters of credit (the “Collateral Coverage Ratio”) under the ING Credit Agreement is less than 1.25 to 1.00, the loans and letters of credit under the ING Credit Agreement will be subject to, and cannot exceed, a borrowing base. The borrowing base is a formula based on accounts receivable, inventory, prepaid assets, net cash under the control of the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

administrative agent and up to 150.0 million Mexican pesos of fixed assets of the Loan Parties. The borrowing base formula will be reduced by trade payables of the Loan Parties. If the Collateral Coverage Ratio falls below 1.25 to 1.00, the borrowing base requirement would terminate upon the earlier of (i) the Collateral Coverage Ratio exceeding 1.25 to 1.00 as of the latest measurement period for 60 consecutive days or (ii) the borrowing availability under the ING Credit Agreement being equal to or greater than the greater of 20% of the revolving commitments under the ING Credit Agreement and 100.0 million Mexican pesos for a period of 60 consecutive days.

Avicola may pay dividends or make other restricted payments to the Company in an amount not to exceed in the aggregate 250.0 million Mexican pesos during the term of the ING Credit Agreement if certain conditions are satisfied, including a condition that availability is at least 100% of the revolving loan commitment under the ING Credit Agreement, less any letter of credit liability under the ING Credit Agreement. However, the Company deems its earnings from Mexico to be permanently reinvested. As such, US deferred income taxes have not been provided on these earnings. If such earnings were not considered indefinitely reinvested, certain deferred foreign and US income taxes would be provided.

Early Extinguishment of Debt

The Company did not recognize any expense related to the early extinguishment of debt in 2011. The Company incurred expenses of $11.7 million related to the early extinguishment of debt in 2010. These expenses included costs associated with the elimination of unamortized capitalized finance charges related to the Term A loan and a portion of the Term B loan of the Exit Credit Facility.

Other Disclosures

Substantially all of our domestic inventories and domestic fixed assets are pledged as collateral to secure the obligations under the Exit Credit Facility. The ING Credit Agreement is secured by substantially all of the assets of the Company's Mexico subsidiaries.

Annual maturities of long-term debt for the five years subsequent to December 25, 2011 are as follows:

For the fiscal years ending December:	Debt Maturities (In thousands)
2012	$15,611
2013	15,886
2014	891,027
2015	50,263
2016	86
Thereafter	503,893
Total maturities	1,476,766
Less: Amount representing original issue discount, net of accretion	(3,154)
Total long-term debt	$1,473,612

Total interest expense was $111.5 million, $105.6 million, $44.7 million and $161.9 million in 2011, 2010, the Transition Period and 2009, respectively. Interest related to new construction capitalized in 2011, 2010, the Transition Period and 2009 was $3.4 million, $1.3 million, $1.1 million and $2.6 million, respectively.

The effective tax rate for continuing operations for 2011 was (1.8%) compared to (35.9)% for 2010. The effective tax rate for 2011 differed from 2010 primarily as a result of an increase in the valuation allowance during 2011 and the benefit in 2010 on the deconsolidation for tax purposes of the Mexico operations.

The effective tax rate for continuing operations in 2009 was 12.4%. The effective tax rate for 2010 differed from 2009 primarily as a result of a benefit on the deconsolidation for tax purposes of the Mexico operations and a decrease in the valuation allowance. The deconsolidation for tax purposes of the Mexico operations was in response to changes in the Mexican tax laws that became effective January 1, 2010. The deconsolidation reduces the accrued taxes that had been previously recognized under the consolidated filing status as it eliminates recapturing certain taxes required under the new consolidation laws.
