Report of Independent Registered Public Accounting Firm

The Benefits Committee
Costco 401(k) Retirement Plan:

We have audited the accompanying statements of net assets available for benefits of the Costco 401(k) Retirement Plan (the Plan) as of December 31, 2013 and 2012, and the related statements of changes in net assets available for benefits for the years then ended. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2013 and 2012, and the changes in net assets available for benefits for the years then ended, in conformity with U.S. generally accepted accounting principles.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental Schedule H, Line 4i - Schedule of Assets (Held at End of Year) as of December 31, 2013 is presented for the purpose of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. This supplemental schedule is the responsibility of the Plan's management. The supplemental schedule has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

COSTCO 401(k) RETIREMENT PLAN

Notes to Financial Statements

December 31, 2013 and 2012

(1) Plan Description

The following description of the Costco 401(k) Retirement Plan (the Plan) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions. Participants in the Plan are employees of Costco Wholesale Corporation (the Company).

The Plan is a defined contribution plan for the benefit of eligible employees established by the Company under Section 401(a) of the Internal Revenue Code (IRC). It includes a qualified cash or deferred arrangement as described in Section 401(k) of the IRC. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

(a) Employee Contributions

The Plan allows employees at least 18 years of age who have completed 90 days of service within a 12-consecutive-month period to make salary deferral contributions, commencing the first day of the month following the completion of 90 days of employment. Participants may contribute from 1% to 50% of their compensation before income taxes, subject to certain limitations set by the Internal Revenue Service (IRS). Participants may also contribute amounts representing distributions from other qualified benefit or contribution plans (known as rollover contributions).

All newly-eligible employees are automatically enrolled in the Plan, at a contribution rate of 3% unless the employee elects otherwise. The percentage deferred into the Plan automatically increases by one percentage point on an active participant's employment anniversary date and each anniversary date thereafter, to a maximum deferral of 20%. Employees may choose to opt out of this automatic deferral increase.

(b) Employer Contributions

All Company contributions are made in cash and invested in accordance with investment selections made by participants. If no selection has been made, the contribution defaults to the age-based target retirement fund. Employer contributions are allocated based on an employee's classification as either: 1) a California Union Employee; or 2) an Other than California Union Employee.

(1) California Union Employees

The Company matches 50% of each employee's contribution up to a maximum employer matching contribution of \$250 per year. Employees at least 18 years of age who have completed 12 consecutive months of service and worked at least 1,000 hours are eligible to enter the Plan for purposes of an annual employer contribution. Plan entry dates for this purpose occur on January 1 and July 1. If the minimum hours requirement is not met in the first 12 months, hours roll forward until the requirement is fulfilled. The Company makes contributions into the accounts of all eligible plan participants employed on the last day of the plan year, based on straight-time hours worked during the plan year up to a maximum of 2,080 hours per calendar year and years of service. These contributions in 2013 ranged from \$0.05 to \$0.47 per hour, totaling \$4.2 million and in 2012 ranged from \$0.05 to \$0.60 totaling \$5.9 million. Amounts decreased in 2013 due to a change in the Teamsters contract directing additional contributions to its pension fund.

(2) Other than California Union Employees

The Company matches 50% of each employee's contribution up to a maximum employer matching contribution of \$500 per year. Employees at least 18 years of age who have completed 12 consecutive months of service and worked at least 1,000 hours, calculated every pay period, are eligible to enter the Plan for purposes of an annual discretionary employer contribution. Plan entry dates for this purpose occur on January 1 and July 1. If the minimum hours requirement is not met in the first 12 months, hours roll forward until the requirement is fulfilled. The Company makes contributions into the accounts of all eligible plan participants employed on the last day of the plan year.

Discretionary

Table of Contents

COSTCO 401(k) RETIREMENT PLAN

Notes to Financial Statements

December 31, 2013 and 2012

contributions were approved for the plan years ending December 31, 2013 and 2012 totaling \$237.9 million and \$226.3 million, respectively, and ranged from 3% to 9% of each participant's compensation, as defined by the Plan, based on years of service.

(c) Participants' Accounts

Each participant's account is credited with the participant's contributions, the Company's contributions, plan earnings and appreciation or depreciation in underlying securities, and is charged with an allocation of certain expenses. Allocations are based on participant account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

(d) Vesting

Participants are immediately vested in their contributions, plus actual earnings thereon. Vesting in the employer match and discretionary contributions, including actual earnings thereon, is based on years of service, according to the following schedule:

Years of service	Percentage vested
Under 2 years	0%
2 years	20%
3 years	40%
4 years	60%
5 years	100%

(e) Forfeitures

Forfeited balances of terminated participants' nonvested accounts may be used to reduce future employer contributions or to pay administrative expenses. There were no unallocated forfeitures as of December 31, 2013, and 2012 after application to reduce the employer discretionary contributions. During 2013 and 2012, forfeitures totaling \$3.2 million and \$3.1 million respectively, were used to reduce employer contributions. Forfeitures, without the benefit of investment gains or losses, can be restored to a participant's account if, within five years, the participant is re-employed by the Company and repays the full amount distributed upon termination.

(f) Investment Options

Upon enrollment in the Plan, a participant may direct the account balance into any of the investment options currently available. Participants may change their investment options and transfer amounts between funds daily. T. Rowe Price is the trustee for all investments and keeper of records of all participant accounts. Amounts may be temporarily invested in a cash account prior to investment in the Plan's investment accounts.

The Capital Preservation Portfolio (CPP) is a fully benefit-responsive contract for the exclusive benefit of the Plan. The CPP invests in Guaranteed Investment Contracts (GICs), Synthetic Guaranteed Investment Contracts (SICs), Separate Account Contracts (SACs) and mutual funds. The CPP replaced the T. Rowe Price Stable Value Fund on January 23, 2013.

All age-based target retirement funds were replaced in 2013 by age-based target TRP Retirement Active Trust C accounts, which are common commingled trust funds. The Vanguard Inst Index Plus, a registered investment company fund, was also added to the portfolio replacing the Equity Index Trust Class C.

Table of Contents

COSTCO 401(k) RETIREMENT PLAN

Notes to Financial Statements

December 31, 2013 and 2012

The schedule below outlines the various retirement accounts that were replaced in 2013.

Retirement 2005 Fund	TRP Ret 2005 Active Trust C
Retirement 2010 Fund	TRP Ret 2010 Active Trust C
Retirement 2015 Fund	TRP Ret 2015 Active Trust C
Retirement 2020 Fund	TRP Ret 2020 Active Trust C
Retirement 2025 Fund	TRP Ret 2025 Active Trust C
Retirement 2030 Fund	TRP Ret 2030 Active Trust C
Retirement 2035 Fund	TRP Ret 2035 Active Trust C
Retirement 2040 Fund	TRP Ret 2040 Active Trust C
Retirement 2045 Fund	TRP Ret 2045 Active Trust C
Retirement 2050 Fund	TRP Ret 2050 Active Trust C
Retirement 2055 Fund	TRP Ret 2055 Active Trust C
Retirement Income Fund	TRP Ret Income Active Trust C
T. Rowe Price Stable Value Fund	Capital Preservation Portfolio
Equity Index Trust Class C	Vanguard Inst Index, Plus

(g) Distributions

Upon termination of employment, total disability or death, the vested interest in a participant's account is payable in a lump sum. Participants may apply for a distribution of all or a portion of the vested interest at any time after attaining age 59 1/2. Participants are also eligible to make hardship withdrawals from their salary deferral contributions in the event of certain financial hardships. Following a hardship withdrawal, participants are not allowed to contribute to the Plan for a period of six months.

Dividends on the Company's stock are reinvested in the participant's Company stock account unless a distribution is requested by the participant in advance of the ex-dividend date. Dividends on the Company's stock are reported on a gross basis with the dividends paid reported as "Net investment income" and the amounts distributed reported as "Distributions to participants" in the statements of changes in net assets available for benefits. On November 28, 2012, the Company declared a special cash dividend on Costco common stock of \$7 per share, which was paid on December 18, 2012. Of the \$158.6 million special dividend paid to Plan participants, approximately \$98.2 million was immediately distributed to the participants and the remaining \$60.4 million was reinvested into the participants' accounts.

(h) Notes Receivable from Participants

A participant may borrow up to the lesser of \$50,000 or 45% of the vested account balance, calculated using the participant's pre tax contribution, rollover, Company matching and Company discretionary contribution amounts. Only the participant's pre tax contribution, rollover, and Company matching amounts may be borrowed against, with a minimum note of \$1,000. Notes are payable through payroll deductions over a period ranging up to 180 months. The interest rate is determined by the Plan Administrator based on the Bank of America prime rate on the last day of the calendar year prior to when the note was made, plus 1% for a primary residence loan and 2% for a standard loan. The rates at December 31, 2013 and 2012 ranged from 4.25% to 11.50%. The notes have various maturity dates through December 2028.

Table of Contents

COSTCO 401(k) RETIREMENT PLAN

Notes to Financial Statements

December 31, 2013 and 2012

(i) Plan Administrator

The Plan is administered by the Benefits Committee of the Company.

(j) Administrative and Investment Expenses

All investment management and transaction fees are netted against "Net investment income." Certain administrative expenses of maintaining the Plan are paid by the Company, except for loan origination fees (paid by the participant requesting the loan) associated with notes receivable from participants.

(2) Summary of Significant Accounting Policies

(a) Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting. Investments are reported at fair value (see Note 3). Contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. As required under U.S. generally accepted accounting principles (U.S. GAAP), the accompanying statements of net assets available for benefits present the fair value of the fully benefit-responsive investment contracts with a corresponding adjustment to reflect these investments at contract value. The statements of changes in net assets available for benefits are prepared on a contract value basis.

(b) Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expense during the reporting period. Actual results could differ from those estimates and assumptions.

(c) Investment Valuation and Income Recognition

The Plan invests in the Company's common stock and other exchange-traded equity securities, as well as various registered investment companies and certain benefit-responsive investment contracts that, in turn, invest in a combination of stocks, bonds and other investment securities. Investment securities are exposed to various risks, such as interest rate, credit, and overall market volatility risks. Due to the level of risk associated with certain investment securities, it is possible that changes in the values of investment securities will occur and that those changes could materially affect the amounts reported in the statements of net assets available for benefits.

Registered investment company funds, Company common stock, and other equity securities (held in the separately managed accounts) are stated at fair value based upon quoted market prices.

The CPP is invested in GICs, SICs, and SACs, which are fully benefit-responsive and recorded at contract value. A benefit-responsive investment contract is a contract with a financial institution or an insurance company that provides for a stated return on principal invested over a specified period and that permits withdrawals at contract value for benefit payments, loans, or transfers to other investment options offered to the participant by the Plan. Participant withdrawals are required to be at contract value. The CPP overall effective yield and crediting rate was 3.13% and 3.5%, respectively, for the year ended December 31, 2013.

The Plan entered into GICs, which are a form of traditional investment contract and provide for a fixed return on principal invested for a specified period of time. GICs do not permit an insurance company to terminate an agreement prior to the scheduled maturity date.

Table of Contents

COSTCO 401(k) RETIREMENT PLAN

Notes to Financial Statements

December 31, 2013 and 2012

The Plan entered into SICs, which consist of a portfolio of underlying assets owned by the Plan and wrap contracts issued by an insurance company and a financial institution. The issuers of the wrap contracts provide for unscheduled withdrawals from the contracts at contract value, regardless of the value of the underlying assets, in order to fund routine permitted participant-initiated withdrawals.

The Plan entered into a SAC and wrap contract with an insurance company. The issuer legally owns the assets underlying the SAC and is required to segregate them into a separate account, which is designed to be protected from the claims of the issuer's general creditors in the event of issuer insolvency. The issuer of the wrap contract provides for unscheduled withdrawals from the contract at contract value, regardless of the value of the underlying assets, in order to fund routine permitted participant-initiated withdrawals.

There are no reserves against contract value for credit risk of the contract issuer or otherwise. The crediting interest rate is based on a formula agreed upon with the issuer, but it may not be less than zero. Such interest rates are reviewed on a quarterly basis for resetting. Certain events limit the ability of the Plan to transact at contract value with the issuer. The Plan Administrator believes any events that would limit the Plan's ability to transact at contract value with participants are not probable.

The T. Rowe Price Stable Value Fund, which was a Common Commingled Trust Fund, invested primarily in GICs. GICs were fully benefit-responsive and recorded at contract value. The overall effective yield and crediting rate of the Stable Value Fund was 2.36% and 2.45%, respectively, for the year ended December 31, 2012. Contract value was equal to principal balance plus accrued interest. The fair value of the GICs was calculated by discounting the related cash flows based on yields of similar instruments with comparable investment durations.

Purchases and sales of securities are recorded on a trade date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation or depreciation of investments includes the change in the fair value or contract value of assets from one period to the next, plus realized gains and losses.

(d) Notes Receivable from Participants

Participant loans are classified as notes receivable from participants, which are segregated from Plan investments and measured at their unpaid principal balance plus any accrued but unpaid interest.

(e) Distribution of Benefits

Distributions of benefits are recorded when paid.

(3) Fair Value Measurement

U.S. GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is estimated by applying a fair value hierarchy, which requires maximizing the use of observable inputs. The three levels of inputs are:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3: Significant unobservable inputs that are not corroborated by market data.

Table of Contents

COSTCO 401(k) RETIREMENT PLAN

Notes to Financial Statements

December 31, 2013 and 2012

The following valuation techniques are used to measure fair value:

Level 1 primarily consists of financial instruments, such as investments in registered investment company funds and Costco Common Stock, whose value is based on quoted market prices, such as quoted net asset values published by the fund as supported in an active market, exchange traded instruments and listed equities.

Level 2 includes assets and liabilities where quoted market prices are unobservable but observable inputs other than Level 1 prices, such as quoted prices for similar assets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Valuation methodologies are based on “consensus pricing,” using market prices from a variety of industry standard data providers or pricing that considers various assumptions, including time value, yield curve, volatility factors, credit spreads, default rates, loss severity, current market and contractual prices for the underlying instruments or debt, broker and dealer quotes, as well as other relevant economic measures. All are observable in the market or can be derived principally from or corroborated by observable market data, for which the Plan typically receives independent external valuation information.

Level 3 assets include significant unobservable inputs reflecting our own assumptions consistent with reasonably available assumptions made by other market participants. The Plan uses the income approach for certain investments, which involves determining fair values from discounted cash flow methodologies, or replacement cost for Level 3 assets.

Valuation techniques utilized during the reporting period in the fair value measurement of Level 1 and Level 2 assets and liabilities presented on the Plan’s statements of net assets available for benefits were not changed from previous practice. There were no level 3 assets or liabilities on December 31, 2012.

The carrying value of the Plan’s other financial instruments, such as the money market fund and notes receivable, approximate fair value due to their short-term nature or variable interest rates.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following is a description of the valuation methodologies used for assets measured at fair value.

Common stock, Registered investment company funds, and Separately managed accounts: Valued at the closing price reported in the active market in which the individual securities are traded.

Common commingled trust: Valued at the net asset value (NAV) of shares held by the Plan at year end.

GIC: Valued by discounting the related cash flows based on current yields of similar investments with comparable durations considering the credit worthiness of the issuer. As of December 31, 2013, the yields used to calculate the GICs’ fair value ranged from 0.54% to 0.80%. Maturities range from April 2014 to December 2015.

SIC: Valued at fair value of the underlying assets which include money market funds, mutual and trust funds, U.S. government related securities, corporate bonds and mortgage-backed securities. Money market funds are valued at the closing price reported in the active market in which the individual investments are traded. Fixed income and government related securities are valued using quotes from independent pricing vendors based on recent trading activity and other relevant market information, including market interest rate curves, referenced credit spreads and estimated prepayment and credit default rates where applicable.

SIC wrapper: Valued at rebid or replacement cost based upon fluctuations in the fair value of underlying fixed income securities. As of December 31, 2013, the yields used to calculate the SIC wrappers’ fair value ranged from 1.02% to 1.61%.

SAC: Valued at fair value of the underlying assets legally owned by the contract issuer.

SAC wrapper: Valued at rebid or replacement cost based upon fluctuation in the fair value of the underlying fixed securities. As of December 31, 2013, the yield used to calculate the SAC wrapper’s fair value was 1.64%.

Stable Value Fund	—	1,076,105

(5) Form 5500 Reconciliation

The following is a reconciliation of the net assets available for benefits per the financial statements at December 31, 2013 and 2012 to the Plan's Form 5500 (in thousands):

	2013	2012
Net assets available for benefits per the financial statements	\$8,797,704	\$7,030,844
Adjustment from contact value to fair value for fully benefit- responsive investment contracts	16,059	46,262
Net assets available for benefits per the Form 5500	\$8,813,763	\$7,077,106

The following is a reconciliation of the net increase in net assets available for benefits per the financial statements at December 31, 2013 and 2012 to the Plan's Form 5500 (in thousands):

	2013	2012
Net increase in net assets available for benefits per the financial statements	\$1,766,860	\$1,232,891
Net change from contact value to fair value for fully benefit- responsive contracts	(30,203) 46,262
Net increase in net assets available for benefits per the Form 5500	\$1,736,657	\$1,279,153

(6) Plan Termination

Although it has no present intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan, subject to the provisions of ERISA and the requirements of the collective bargaining agreement with the International Brotherhood of Teamsters in California. In the event of plan termination, participants will become 100% vested in their accounts.

(7) Tax Status

In a determination letter dated September 23, 2013, the Internal Revenue Service (IRS) informed the Company that the Plan is designed in accordance with applicable sections of the IRC. The Plan Administrator believes that the Plan is designed and is being operated in compliance with the applicable requirements of the IRC.

U.S. GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2013, there are no uncertain positions taken or expected to be taken that

COSTCO 401(k) RETIREMENT PLAN

Notes to Financial Statements

December 31, 2013 and 2012

would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; there are currently no audits for any tax periods in progress. The Plan Administrator believes it is no longer subject to income tax examinations for years prior to 2010.

(8) Party-in Interest and Related Party Transactions

Certain Plan investments are shares of registered investment companies, benefit-responsive investment contracts, and common commingled trust funds managed by T. Rowe Price. T. Rowe Price is also the trustee and record keeper as defined by the Plan. Therefore, these transactions qualify as party in interest transactions. The Plan also invests in the Company's common stock. Therefore, these transactions also qualify as party in interest transactions.
