Exhibit 99.1

NEWS RELEASE

TRACK DATA REPORTS THIRD QUARTER RESULTS

Brooklyn, New York – November 13, 2009 – Track Data Corporation (Nasdaq: TRAC) today announced results for its third quarter ended September 30, 2009.

Revenues for the third quarter ended September 30, 2009 were \$10,209,000 compared to \$8,142,000 for the same period in 2008, an increase of 25%. Net income for the third quarter of 2009 was \$552,000, or \$.26 per share, compared to net income of \$764,000, or \$.36 per share, in 2008. The increase in revenues was due to home sales of \$3,600,000 from the Company's real-estate investment made in May, 2009. The Company's Track ECN revenues decreased approximately \$600,000. In November, 2008, the NSX changed its pricing for accessing its order delivery system pursuant to which it no longer pays rebates for adding liquidity to its book. As a result, Track ECN can only pay its subscribers for adding liquidity when there is an internal match on its own book. This change resulted in further deterioration of the trading volume on the Track ECN. The Company is presently exploring other venues for displaying its orders. Until such time there is no expectation of increasing volume of trading. Market data revenues decreased approximately \$1,000,000 in 2009 compared to 2008. For several years, the Company has experienced a decline in revenues from its market data services to the Professional Market segment due principally to staffing reductions in the securities industry, the use by customers of internally developed services, or lower priced services that are offered by the Company or other vendors. This trend has continued in 2009, negatively impacting revenues and profits. The third quarter of 2009 includes an after-tax gain of \$358,000 from the sale of Innodata common stock.

Revenues for the nine months ended September 30, 2009 were \$24,010,000 compared to \$23,673,000 for the same period in 2008. Net income for the first nine months of 2009 was \$1,043,000, or \$.50 per share, compared to net income of \$1,705,000, or \$.81 per share, in 2008. The increase in revenues was due to home sales of \$3,600,000 from the Company's real estate investment made in May, 2009, offset by a reduction in Track ECN revenues of approximately \$1,350,000 for the reasons stated above and a decrease in market data revenues of approximately \$2,400,000 in 2009 compared to 2008 for the reasons stated above. Broker-dealer commissions increased approximately \$500,000 in 2009 compared to 2008. The nine months ended September 30, 2009 includes an after-tax gain of \$359,000 from the sale of Innodata common stock.

All per share information has been adjusted to reflect a one-for-four reverse stock split that became effective on May 27, 2009.

Track Data is a New York-based financial services company that provides direct access brokerage, real-time financial market data, news, and research to institutional and individual investors through dedicated telecommunication lines and the Internet.

Continued

For professional investors, Track Data Securities offers proTrack, a direct access trading platform with fully integrated market data. proTrack offers unbiased trade routing, allowing clients control over where their orders are sent. proTrack is also available to broker-dealers under a service bureau arrangement as an execution platform.

The Company also owns and operates the Track ECN, an electronic communications network that allows traders to display and match limit orders for stocks.

For individual investors, Track Data Securities offers myTrack Edge, a fully integrated, Internet-based online trading and market data system. It offers direct access online trading, allowing users the choice of where to route their equity and options orders. myTrack Edge offers continuous dynamic streams of live market data powered by application-based software and a constant server connection similar to systems used by professionals. The Company also offers myTrack, a web-based trading service.

For all investors and business professionals, the Company's NewsWare division offers NewsWatch, a PC-based application that aggregates news from thousands of sources. Featuring real-time full text filtering and complex queries, its real-time alerting functions allow users to choose topics of interest and be among the first to know when news breaks.
