Item 2. Acquisition or Disposition of Assets.

On October 28, 2001, we entered into an Agreement and Plan of Merger and Reorganization (the "Merger Agreement") with Transilica Inc., a California corporation ("Transilica"). The acquisition of Transilica has not yet closed but we expect consummation of the acquisition to occur in the last half of November 2001. The acquisition of Transilica is subject to certain closing conditions. Upon closing, Transilica will continue its business as a wholly owned subsidiary of Microtune. Under the terms of the Merger Agreement, Microtune expects to acquire all of the outstanding capital stock of Transilica. The acquisition was structured to be a tax-free reorganization under Section 368 of the Internal Revenue Code. Upon closing, under the terms of the Merger Agreement, shares equivalent to 19.99% of Microtune's outstanding shares of common stock at

## Edgar Filing: MICROTUNE INC - Form 8-K

closing, excluding certain shares of our common stock issued for other acquisitions subsequent to September 30, 2001 and prior to closing, plus a cash amount that is based on the cash on the balance sheet of Transilica less certain liabilities at closing (the "Merger Consideration"), will be issued and exchanged for all of the outstanding capital stock of Transilica (the "Transilica Acquisition"). The Merger Agreement also provides that approximately fifteen percent (15%) of the total Merger Consideration in the form of Microtune shares of common stock will be placed in escrow for the purpose of securing the indemnification obligations of Transilica under the Merger Agreement. The escrow shares are to be released periodically, subject to any escrow claims, at the end of each of the three years following the closing. The shares to be issued by us pursuant to the Merger Agreement will be issued pursuant to an exemption from registration under the Securities Act. The Merger Agreement provides the Transilica shareholders with the right to require us to register their Microtune shares within twenty (20) days after the closing. Despite this registration obligation, certain former Transilica shareholders who receive shares of Microtune common stock will not be able to sell their shares of Microtune common stock until the earlier to occur of Transilica's achievement of certain product revenue-based milestones or the date that is three (3) months following closing. In addition, the shares of Microtune common stock received by former Transilica shareholders as a result of the Transilica Acquisition will be subject to lock-up agreements which restrict their ability to sell the shares of Microtune common stock that they received as a result of the Transilica Acquisition. The lock-up agreements provide that each month, ten percent (10%) of the shares subject to the lock-up agreements will be released from the lock-up restrictions.

Concurrent with the signing of the Merger Agreement, Transilica and Microtune entered into a Credit Agreement whereby Microtune has agreed to make unsecured loans to Transilica in an aggregate amount not exceeding five million dollars (\$5,000,000.00). Under the Credit Agreement, if Transilica's cash balance is less than five hundred thousand dollars (\$500,000.00) and subject to certain other conditions more fully described in the Credit Agreement, Microtune shall make advances to Transilica upon Transilica's request. In connection with the execution of the Credit Agreement, Transilica executed a convertible promissory note for five million dollars (\$5,000,000.00) in favor of Microtune, which provides that all outstanding amounts under the credit facility will bear interest at the rate of 8% per annum. In the event that the Merger Agreement is terminated, all outstanding amounts under the credit facility automatically convert into Transilica Series B Preferred Stock at a price of \$1.6026 per share.

The Credit Agreement also provides that Microtune will have the right to participate in future equity financings of Transilica.

Transilica was founded in 1998 and designs, system-on-chip silicon products for next-generation short-range wireless applications. The products Transilica is developing consist of highly integrated solutions incorporating radio transceivers, digital baseband and software on a single chip, which offer customers low-power consumption and small form factors. Transilica's initial products will be targeted at the Bluetooth and 802.11a standards, which are communication protocols for short-range wireless applications. To date, Transilica's activities have consisted primarily of product research and development and no significant revenues have been earned from the sale of these products. Additional research and development efforts will be required before these products will be available for commercial use. Transilica is also capable of designing customized system-on-chip solutions to meet a customer's specific application.

Item 7. Financial Statements and Exhibits.

MICROTUNE, INC.

UNAUDITED PRO FORMA COMBINED CONDENSED FINANCIAL INFORMATION

On October 28, 2001, Microtune, Inc. (the Company), entered into an Agreement and Plan of Merger and Reorganization (the "Merger Agreement") with Transilica Inc. (Transilica), a California Corporation. Under the terms of the Merger Agreement, the Company expects to acquire all of the outstanding capital stock of Transilica in exchange for shares of the Company's common stock representing 19.99% of the Company's outstanding shares on the merger closing date, excluding certain shares of the Company's common stock issued for other acquisitions subsequent to September 30, 2001 and prior to closing, and cash consideration that is based on the cash on the balance sheet of Transilica at closing less certain liabilities. Transilica was founded in 1998 and designs system-on-chip silicon products for next-generation short-range wireless applications. The products Transilica is developing consist of highly integrated solutions

Edgar Filing: MICROTUNE INC - Form 8-K

incorporating radio transceivers, digital baseband and software on a single chip, which offer customers low-power consumption and small form factors. This acquisition is expected to close in November 2001.

The combination with Transilica will be accounted for as a purchase business combination by the Company. The unaudited pro forma combined condensed statement of operations for the twelve months ended December 31, 2000 and nine months ended September 30, 2001 are based on the historical financial statements of the Company and Transilica and assumes the combination had been completed on January 1, 2000. The unaudited pro forma combined condensed balance sheet as of September 30, 2001 gives effect to the acquisition as if it had occurred on September 30, 2001.

The unaudited pro forma information is presented for illustrative purposes only and is not necessarily indicative of the results of operations or financial position that would have been reported if such transactions had been completed as presented in the accompanying unaudited pro forma combined condensed balance sheet and unaudited pro forma combined condensed statements of operations nor is it necessarily indicative of the Company's future results of operations or financial position. The pro forma adjustments and the assumptions on which they are based are described in the accompanying notes to unaudited pro forma combined condensed balance sheet and unaudited pro forma combined condensed statements of operations.

The unaudited pro forma combined condensed balance sheet and unaudited pro forma combined condensed statement of operations is based on, and should be read in conjunction with the historical consolidated financial statements and the related notes thereto of the Company for the year ended December 31, 2000 included in the Company's Annual Report on Form 10-K/A (Amendment No. 1) filed with the Securities and Exchange Commission (SEC), the historical consolidated financial statements and the related notes thereto of the Company for the nine months ended September 30, 2001 included in the Company's Form 10-Q filed with the SEC, and the consolidated financial statements and the related notes thereto of Transilica for the year ended December 31, 2000 and nine months ended September 30, 2001 included in this filing.

MICROTUNE, INC.

NOTES TO UNAUDITED PRO FORMA COMBINED CONSENSUED BALANCE SHEET AND  
UNAUDITED PRO FORMA COMBINED CONDENSED STATEMENTS OF OPERATIONS

Year Ended December 31, 2000 and Nine Months Ended September 30, 2001  
(Unaudited)

1. General

The combination with Transilica will be accounted for as a purchase business combination by the Company. The accompanying unaudited pro forma combined condensed balance sheet and unaudited pro forma combined condensed statements of operations reflects the estimated aggregate cost of the combination of approximately \$153.7 million, consisting of cash and the fair market value of the Company's securities to be issued to the shareholders of Transilica, plus costs directly related to the combination as follows (in thousands, except share data):

Estimated cash to be paid to Transilica shareholders.....	
Fair market value of 7,154,000 shares of common stock, including restricted common stock, to be issued to Transilica shareholders.....	
Fair market value of Transilica stock options to be assumed.....	
Estimated transaction costs.....	
Total estimated combination cost.....	

The cash to be paid to Transilica shareholders was estimated using Transilica's expected closing balance sheet provided by management of Transilica. The shares used in computing the pro forma purchase price were based on the Company's outstanding shares on October 31, 2001. The actual number of shares which will be issued in the combination will be based on the Company's outstanding shares on the merger closing date, excluding certain shares of the Company's common stock issued for other acquisitions subsequent to September 30, 2001 and prior to closing. The value of shares and stock options were based on a price of \$19.00 per share, which is the closing price of Microtune's common stock on October 29, 2001, the date that the significant terms of the Merger Agreement were agreed to and announced. The share price which will be used in computing the actual combination cost will be the price on the day the number shares to be issued is fixed. Accordingly, the actual combination cost will be different than the total estimated combination cost included in the table above. The fair value of the stock options assumed was estimated using the Black Scholes option valuation model.

The aggregate purchase price has been allocated to the net assets acquired on the basis of preliminary estimates of fair values as follows (in thousands):

Working capital.....	
Developed technology and other intangible assets.....	
Goodwill.....	
Acquired in-process research and development costs charged to expense.....	

## Edgar Filing: MICROTUNE INC - Form 8-K

Noncurrent assets and liabilities, net.....  
Deferred stock compensation.....

F-6

### MICROTUNE, INC.

#### NOTES TO UNAUDITED PRO FORMA COMBINED CONDENSED BALANCE SHEET AND UNAUDITED PRO FORMA COMBINED CONDENSED STATEMENTS OF OPERATIONS (Continued) (Unaudited)

##### 1. General (continued)

Microtune's management is primarily responsible for estimating the fair values of intangible assets and acquired in-process research and development. The estimates of fair values were determined based on preliminary information provided by management of Transilica. The amount of deferred stock compensation represents the estimated intrinsic value of unvested restricted stock grants and the estimated intrinsic value of unvested stock options assumed which will be charged to expense over the respective future vesting periods. The final allocation of the purchase price, which is expected to be completed in the first quarter of 2002, will be based on the complete evaluation by the Company of the assets and liabilities of Transilica acquired. Although management does not expect the final valuation of the assets and liabilities acquired to result in values that are significantly different from the estimates included in the table above, there can be no assurance that such differences will not occur.

Amounts allocated to acquired in-process research and development will be expensed at the date of acquisition because the purchased research and development does not have alternative future uses, and has not reached technological feasibility based on the status of design and development activities that required further refinement and testing. The estimates used in valuing the research and development were based upon assumptions regarding future events and circumstances management believes to be reasonable, but that are inherently uncertain and unpredictable. The relative stage of completion and projected operating cash flows of the underlying in-process projects acquired were the most significant and uncertain assumptions utilized in the valuation analysis of the acquired in-process research and development. Such uncertainties could give rise to unforeseen budget overruns and revenue shortfalls in the event that the Company is unable to successfully complete and commercialize the projects.

##### 2. Unaudited Pro Forma Combined Condensed Balance Sheet

The accompanying unaudited pro forma combined condensed balance sheet gives effect to the combination as if it had occurred on September 30, 2001 and reflects the following pro forma adjustments:

- (a) To record estimated use of cash during the period from October 1, 2001 through the estimated date of closing that will not be available for distribution to Transilica shareholders.
- (b) To record the aggregate cost of the acquisition as described in Note 1 above.
- (c) To eliminate Transilica's historical equity balances.

## Edgar Filing: MICROTUNE INC - Form 8-K

- (d) To record the preliminary allocation of the purchase price to goodwill, purchased intangibles, in-process research and development costs charged to expense, deferred stock compensation, and other assets and liabilities acquired as described in Note 1 above.

F-7

MICROTUNE, INC.

### NOTES TO UNAUDITED PRO FORMA COMBINED CONDENSED BALANCE SHEET AND UNAUDITED PRO FORMA COMBINED CONDENSED STATEMENTS OF OPERATIONS (Continued) (Unaudited)

#### 3. Unaudited Pro Forma Combined Condensed Statements of Operations

The accompanying unaudited pro forma combined condensed statements of operations have been prepared as if the combination was completed as of January 1, 2000. These statements exclude the write-off of in-process research and development costs as described in Note 1 above as this write-off was considered a non-recurring charge. These statements reflect the following pro forma adjustments:

- (a) To record the amortization of deferred stock compensation which resulted from the assumption of unvested Transilica restricted stock grants and stock options in connection with the acquisition. Deferred stock compensation is being amortized over the remaining vesting periods of the related restricted stock grants and stock options, which averaged two years at September 30, 2001.
- (b) To record the amortization of developed technology and intangible assets resulting from the allocation of the aggregate cost of the combination. The allocation of the cost is preliminary and amounts are subject to adjustment. The acquired developed technology and intangible assets are being amortized over periods of four to seven years. Goodwill resulting from this combination is not subject to amortization.

#### 4. Unaudited Pro Forma Combined Earnings Per Common Share Data

The unaudited pro forma combined basic and diluted loss per common share data is computed by dividing pro forma combined loss per share by the weighted average number of common shares assumed to be outstanding during each period. Because the combined pro forma results of operations are a loss for the period, the effects of the assumed exercise of stock options, warrants and restricted common stock subject to repurchase rights does not have a dilutive effect.

F-8

#### Report of Independent Public Accountants

To Transilica Inc.:

We have audited the accompanying balance sheets of Transilica Inc. (a California corporation in the development stage) as of December 31, 2000 and 1999, and the related statements of operations, stockholders' equity and cash flows for the years then ended and for the period from inception (December 21, 1998) to December 31, 2000. These financial statements are the responsibility of the

## Edgar Filing: MICROTUNE INC - Form 8-K

Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Transilica Inc. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for the period from inception (December 21, 1998) to December 31, 2000, in conformity with accounting principles generally accepted in the United States.

TRANSILICA INC.  
(a development stage company)

Notes to Financial Statements  
December 31, 2000 and the nine months ended September 30, 2001 (unaudited)

1. Basis of Presentation and Organization

-----

The accompanying financial statements and related footnotes at December 31, 2000 and 1999 and for the years then ended are audited, while the information at September 30, 2001 and for the nine-month periods ended September 30, 2001 and 2000 is unaudited. The consolidated financial statements for the September 30, 2001 and 2000 and for the nine-month periods then ended reflect all adjustments, consisting of only normal recurring accruals, which are, in the opinion of management, necessary for a fair statement of the results of the interim periods presented. The results of operations for the interim periods are not necessarily indicative of results to be expected for any other interim period or for the year as a

## Edgar Filing: MICROTUNE INC - Form 8-K

whole.

Transilica Inc. (the "Company"), a California corporation formerly known as Domain Knowledge, Inc., was founded in 1998 as a designer of system-on-chip silicon products for next-generation short-range wireless applications. The Company's products are highly integrated solutions incorporating radio transceivers, digital baseband and software on a single chip, which offer customers low-power consumption and small form factors. The Company's initial products will be targeted at the Bluetooth standard, which is emerging as a dominant worldwide communications protocol for short-range wireless applications. Future products will address other standards such as higher speed wireless LAN protocols. The Company is also capable of creating customized system-on-chip solutions to meet a customer's specific application.

The Company is based in San Diego, California and has subsidiaries in Taiwan and Japan, which operate as regional sales offices, and another subsidiary in Singapore, which operates as a design center for advanced silicon modeling and simulations. As of December 31, 2000 all revenues were from product development service contracts and there have been no significant revenues from products that the Company intends to offer in the future. Accordingly, the Company's activities have been accounted for as those of a development stage enterprise as set forth by Statement of Financial Accounting Standards No. 7.

### 2. Risk Factors and Uncertainties

-----  
The Company is subject to a number of risks associated with companies at a similar stage of development. Certain of these risks are discussed in the following paragraphs.

#### Nature of Wireless Communications Industry

-----  
The Company operates in the wireless communication industry which is diverse, complex and rapidly changing. By its very nature, the business risks associated therewith are numerous and significant. The effects of competition, substitute products, market acceptance, and customer satisfaction preclude the Company from forecasting revenues or income with any degree of certainty.

#### Unproven Products

-----  
The Company's products are in the research and development stage, and will require significant additional research and development efforts prior to commercial use. There can be no assurance that the Company's research and development efforts will be successful or that the Company's products will be successfully introduced and marketed at prices that would permit the Company to operate profitably. If successfully introduced and marketed, there can be no assurance that the Company will successfully mass produce the products.

#### Reliance on Key Personnel

-----  
The Company relies heavily on the expertise of its officers and advisors, and it is key to the Company's future success that such persons remain employed by the Company or that the Company obtains suitable replacements in the event that any key individuals leave their positions with the Company.

## Edgar Filing: MICROTUNE INC - Form 8-K

### 3. Summary of Significant Accounting Policies

#### Consolidation

The consolidated financial statements include the accounts of Transilica Inc. and its wholly owned subsidiaries. All significant intercompany accounts and transactions have been eliminated.

F-15

#### Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

#### Cash and Cash Equivalents

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. Cash and cash equivalents include cash in readily available checking and money market accounts.

#### Fixed Assets

Equipment, which consists primarily of computer equipment and software, is stated at cost and depreciated using the straight-line method over the estimated useful lives of the assets (2 to 5 years). When assets are sold or otherwise disposed of, the cost and related accumulated depreciation will be removed from the accounts and any gain or loss included in results from operations.

#### Capitalized Software Development Costs

The Company accounts for software development costs in accordance with SFAS No. 86, "Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed," whereby costs for the development of new software products and substantial enhancements to existing software are expensed until technological feasibility is attained using the working model method. To date, the Company has not capitalized any software development costs.

#### Research and Development Costs

All research and development costs are charged to expense as incurred.

#### Revenue Recognition

The Company's only source of revenue currently is from product development service contracts. The Company has not yet generated any revenues from the

## Edgar Filing: MICROTUNE INC - Form 8-K

sale of products, and does not project that it will generate product revenues until sometime during late 2001 or early 2002.

### Income Taxes

-----

The Company accounts for income taxes in accordance with Statement of Financial Accounting Standards No. 109 ("SFAS No. 109"), "Accounting for Income Taxes." Under SFAS No. 109, deferred tax assets and liabilities reflect the future tax consequences of the differences between the financial reporting and tax basis of assets and liabilities using current enacted tax rates. Valuation allowances are recorded when the realizability of such deferred tax assets is questionable.

### Long-Lived Assets

-----

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of," the Company periodically re-evaluates the original assumptions and rationale utilized in the establishment of the carrying value and estimated lives of all of its long-lived assets including computer and software equipment. The determinants used for this evaluation include management's estimate of the asset's ability to generate positive income from operations and positive cash flow in future periods as well as the strategic significance of the asset to the Company's business objective.

### Recent Accounting Pronouncements

-----

In July 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 141, "Business Combinations." SFAS No. 141 addresses financial accounting and reporting for business combinations, and supersedes APB Opinion No. 16, "Business Combinations" and SFAS No. 38, "Accounting for Preacquisition Contingencies of Purchased Enterprises." All business combinations in the scope of SFAS No. 141 are to be accounted for using one method, the purchase method. The Company adopted the provisions of SFAS No. 141 for business combinations initiated after June 30, 2001.

In July 2001, FASB issued SFAS No. 142, "Goodwill and Other Intangible Assets." SFAS No. 142 addresses financial accounting and reporting for acquired goodwill and other intangible assets, and supersedes APB Opinion No. 17, "Intangible Assets." SFAS No. 142 addresses how intangible assets acquired individually or with a group of other assets (but not those acquired in a business combination) should be accounted for in financial statements upon their

F-16

acquisition. This statement also addresses how goodwill and other intangible assets should be accounted for after they have been initially recognized in the financial statements. Upon adoption of SFAS No. 142, goodwill is no longer subject to amortization over its estimated useful life. Rather, goodwill will be subject to at least an annual assessment for impairment by applying a fair value test.

In August 2001, FASB issued SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS No. 144 addresses financial accounting and reporting for the impairment or disposal of long-lived assets. SFAS No.

## Edgar Filing: MICROTUNE INC - Form 8-K

144 supersedes SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of," and the accounting and reporting provisions of APB Opinion No. 30, "Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions," for the disposal of a segment of a business (as previously defined in that Opinion). The provisions of SFAS No. 144 are effective for financial statements issued for fiscal years beginning after December 15, 2001, with early application encouraged and generally are to be applied prospectively. The Company has not yet determined the impact of the adoption of SFAS No. 144 on its financial position and results of operations.

#### 4. Industry and Geographic Information

-----

The company operates in one reportable segment as defined by Statement of Financial Accounting Standards No. 131, "Disclosures about Segments of an Enterprise and Related Information," ("SFAS No. 131"). SFAS No. 131 requires disclosure of segment information in a manner consistent with the "management approach."

A summary of operations by geographic area is as follows:

	North America	Southeast Asia
Nine month period ended September 30, 2001 (unaudited)		
Revenues	\$ 155,700	\$ 1,295

Present value of capital lease payments		423,850
		-----
Less - current portion		(272,913)
		-----
Long-term obligations under capital leases		\$ 150,937
		=====

The Company did not enter into any new material operating or capital leases for the nine month period ending September 30, 2001 (unaudited).

7. Bridge Loan

During 2000, the Company borrowed \$5,240,000 from a venture capital firm and a consortium of individuals. In accordance with the loan agreement the principal balance of the promissory note together with accrued interest automatically converted into Series B Preferred Stock in connection with the sale of Series B Preferred Stock to other investors.

8. Stockholders' Equity

## Edgar Filing: MICROTUNE INC - Form 8-K

The Company's original articles of incorporation authorized the issuance of up to 200,000 common shares. A subsequent amendment to the articles of incorporation, dated July 19, 1999, increased this authorization to 10,000,000 common shares. At December 31, 1999, 150,000 shares of common stock were outstanding.

On May 9, 2000, the articles of incorporation were amended, increasing the number of authorized shares of common stock to 31,250,000, creating a new class of stock designated Preferred Stock, and authorizing 11,250,000 shares of Preferred Stock to be designated as Series A Stock at an original issue price of \$0.20 per share. In May 2000, the Company completed a private sale of 16,540,000 shares of common stock at \$.0001 per share, to certain key employees, subject to vesting over a 3 year period. Also in May 2000, the Company completed a Series A financing, issuing 11,250,000 shares of Series A Preferred Stock for an aggregate purchase price of \$2,250,000 in cash.

On December 7, 2000, the articles of incorporation were amended, increasing the number of authorized shares of common stock to 100,000,000 and increasing the number of authorized shares of Preferred Stock to 22,655,240, of which 11,250,000 were designated as Series A Stock and 11,405,240 were designated as Series B Stock. The original issue price of Series B Stock was \$1.6026 per share. Also in December 2000, the Company completed a Series B financing, issuing 10,812,454 shares of Series B Preferred Stock for an aggregate purchase price of \$9,888,038 in cash, \$5,240,000 in debt conversion and \$2,200,000 in a subscription receivable, less applicable expenses of \$148,447. The stock subscription receivable was received in January 2001.

On September 6, 2001, the articles of incorporation were amended, increasing the number of authorized Series B Preferred Stock to 23,884,960. Also, September 2001, the Company completed a second Series B financing, issuing 6,239,860 shares of Series B Preferred Stock for an aggregate purchase price of \$10,000,000 in cash.

Dividends, if declared, accrue at 9% per annum on Series A and 8% per annum on Series B, shall not be cumulative, and no right accrues by reason of the fact that dividends on such shares are not declared or paid in any prior year. Upon any liquidation, dissolution or winding up of the Company, either voluntary or involuntary, the holders of the Series A Stock and Series B Stock would be entitled to receive pari passu with each other and

F-18

prior and in preference to any distribution of any of the assets or surplus funds of the Company to the holders of the Common Stock, \$0.50 for each share of Series A Stock then held by them and \$1.6026 for each share of Series B Stock then held by them as adjusted for stock dividends, combinations or splits and, in addition, an amount equal to all declared but unpaid dividends on the Series A Stock and Series B Stock then held by them. After those amounts have been paid, the remaining assets of the Company shall be distributed among holders of Common Stock and Preferred Stock on an as-if-converted to Common Stock basis, provided that no holder of Series A Stock shall receive a distribution of more than ten (10) times the its Original Issue Price, and no holder of Series B shall receive a distribution of more than four (4) times its Original Issue Price. Thereafter, all remaining assets of the Company shall be distributed ratably among the holders of Common Stock.

Series A and Series B Preferred Stock, may, at the option of the holder, be converted into such number of fully paid and nonassessable shares of Common Stock as is determined with respect to the stock by dividing the original

## Edgar Filing: MICROTUNE INC - Form 8-K

issue price by the conversion price in effect at the time of conversion. As of December 31, 2000, the Conversion Price of the Series A Stock is \$0.20 per share of Common Stock and for the Series B Stock is \$1.6026 per share of Common Stock.

Each share of Series A and Series B Preferred Stock will automatically convert to Common Stock immediately upon the closing of a firm commitment underwritten public offering pursuant to an effective registration statement under the Securities Act of 1933, subject to certain provisions for share price and gross cash proceeds.

Shares of Common Stock are also subject to certain restrictions, including provisions for repurchase by the Company, under certain conditions.

### 9. Stock Option, Deferred Stock and Restricted Stock Plan

-----

The Company adopted the Domain Knowledge, Inc. 2000 Stock Option, Deferred Stock and Restricted Stock Plan ("the Plan") under which 9,500,000 common shares are reserved and available for issuance to officers and other key employees, directors and consultants and advisors of the Company, and any future subsidiary or any future parent corporation responsible for or contributing to the management, growth and/or profitability of the business of the Company. Anyone eligible may be granted non-qualified stock options, deferred stock or restricted stock awards, while only officers and other key employees shall be eligible to be granted incentive stock options. Recipients of incentive stock options shall be eligible to purchase shares of the Company's Common Stock at an exercise price equal to no less than the estimated fair market value of such stock on the date of grant. Recipients of stock purchasable under a non-qualified stock option may be less than fair market value but in no event less than 85% of fair market value. The maximum term of options granted under the plan is ten years. Vesting is determined by the Administrator at the time of grant but is generally monthly over a four-year period. Common Stock issued pursuant to the Plan's early exercise provision is subject to repurchase by the Company for the unvested portion of the stock option grant. The majority of the Common Stock issued pursuant to such exercise was paid for by executing full-recourse subscription notes payable.

The aforementioned plan was revised and replaced by the 2001 Amended and Restated Equity Incentive Plan (the "2001 Plan"). Under the revised terms of the Plan, upon change of control of the Company there is no accelerated vesting of options or forgiveness debt.

F-19

The following table summarizes stock option transactions for the Plan for the years ending December 31, 1999 and 2000 and for the nine months ended September 20, 2001 (unaudited):

	Shares	Weighted Average Exercise

	-----	-----
Outstanding, September 30, 2001 (unaudited)	5,515,395	\$0.14
	=====	

The Company has adopted the disclosure only provisions of Statement of Financial Accounting Standards 123 "Accounting For Stock-Based Compensation" ("SFAS 123") and has elected to continue to account for stock options granted under Accounting Principles Board Opinion No. 25 "Accounting for Stock Issued to Employees" (APB 25), which recognizes compensation cost based upon the intrinsic value of the equity award. No compensation expense has been recognized in the accompanying consolidated statements of operations for any equity awards.

Had compensation cost for the Company's stock-based compensation plans been determined based on the fair value at the grant dates for awards under those plans consistent with the method of SFAS 123, the Company's net loss would have been increased by approximately \$0 in 1999 and \$2,112 in 2000.

The fair value of each option grant is estimated on the date of grant using the present value pricing method as described in SFAS 123. The underlying assumptions used to estimate the fair values for the fiscal 2000 grants are weighted average risk-free interest rates ranging between 4.91% and 5.47%, with an expected life of 10 years. No dividend yield or stock price volatility was used in these calculations.

10. Employee 401(k) Profit Sharing Plan

-----

The Company established a retirement plan effective September 1, 2000. Substantially all employees of the Company who have completed three months of eligible service and attained the age of 21 may participate in the "DKI Employee 401(k) Plan". Employees may defer up to 25% of their compensation, subject to certain statutory limits. The Company does not match contributions.

11. Income Taxes

-----

As of December 31, 2000, the Company has available net operating loss carryforwards of approximately \$5.5 million to reduce future federal income taxes, if any. This carryforward will begin to expire in 2019. The Company has California net operating loss carryforwards of approximately \$5.5 million. This carryforward will begin to expire in 2009.

## Edgar Filing: MICROTUNE INC - Form 8-K

The Company's deferred tax assets and liabilities consist of the following at December 31, 2000:

Long-term deferred taxes:	
Accrued expenses	\$ 34,000
Net operating loss and credit carryforwards	2,602,000
	-----
Net deferred taxes	2,636,000
Valuation allowance	(2,636,000)
	-----
Net deferred taxes	\$ -
	=====

The Company also has federal and California tax research credit carryforwards of approximately \$210,000 and \$180,000 respectively. The federal research credit carryforwards will begin expiring in 2020 unless previously utilized.

### 12. Subsequent Events (unaudited)

-----

In 2001, the Company entered into memoranda of understanding with two customers. The first memorandum is an indefinite delivery, indefinite quantity order for 1,000,000 pieces of the Company's product. In connection with this agreement, the Company received a \$1.5 million advance payment, which will be recognized in revenue when products are shipped. This payment is recorded in customer deposits in the September 30, 2001 balance sheet. The second memorandum is an indefinite delivery, indefinite quantity order for development and production of up to approximately 5 million pieces of an integrated product. In consideration for the development of this product, the Company will receive a \$250,000 non-refundable development fee, of which \$150,000 was received and recognized as revenue in the nine-month period ending September 30, 2001. In the event that orders are placed under these memoranda of understanding, the Company expects to emerge out of the development stage in the fourth quarter of 2001 or early in 2002.

On October 28, 2001, the Company entered into an Agreement and Plan of Merger and Reorganization (the "Merger Agreement") with Microtune, Inc., a Delaware corporation ("Microtune"). Under the terms of the Merger Agreement, Microtune expects to acquire all of the outstanding capital stock of the Company. The consummation of the acquisition of the Company, which is expected to occur in November 2001, and which is structured to be a tax-free reorganization under Section 368 of the Internal Revenue Code, is subject to certain closing conditions. Upon closing, under the terms of the Merger Agreement shares equivalent to 19.99% of Microtune's outstanding shares of common stock at closing, plus a cash amount that is based on the cash on the balance sheet of the Company less certain liabilities at closing (the "Merger Consideration"), will be issued and exchanged for all of the outstanding capital stock of the Company (the "Acquisition"). The Merger Agreement also provides that approximately fifteen percent (15%) of the total Merger Consideration in the form of Microtune shares of common stock will be placed in escrow for the purpose of securing the indemnification obligations of the Company under the Merger Agreement. The escrow shares are to be released periodically, subject to any escrow claims, at the end of each of the full three years following the closing. The shares to be issued by Microtune pursuant to the Merger Agreement will be issued pursuant to an exemption from registration under the Securities Act. The Merger Agreement provides the Company's shareholders with the right to require Microtune to register their shares within twenty (20) days after the closing. Despite this registration obligation, the Company's former shareholders who receive shares of Microtune common stock will not be able to sell their shares of Microtune common stock until the earlier to occur of the Company's

## Edgar Filing: MICROTUNE INC - Form 8-K

achievement of certain product revenue-based milestones or the date that is three (3) months following closing as part of the lock-up agreement.. In addition, most of the shares of Microtune common stock received by the Company's former shareholders as a result of the Acquisition are also subject to lock-up agreements which restrict their ability to sell the shares of Microtune common stock that they received as a result of the Acquisition. The lock-up agreements provide that each month, ten percent (10%) of the shares subject to the lock-up agreements will be released from the lock-up restrictions.

Concurrent with the signing of the Merger Agreement, the Company and Microtune entered into a Credit Agreement whereby Microtune has agreed to make unsecured loans to the Company in an aggregate amount not exceeding five million dollars (\$5,000,000.00). Under the Credit Agreement, if the Company's cash balance is less than five hundred thousand dollars (\$500,000.00) and subject to certain other conditions more fully described in the Credit Agreement, Microtune shall make advances to the Company upon the Company's request. In connection with the execution of the Credit Agreement, the Company executed a convertible promissory note for five million dollars (\$5,000,000.00) in favor of Microtune, which provides that all outstanding amounts under the credit facility will bear interest at the rate of 8% per annum. In the event that the Merger Agreement is terminated, all outstanding amounts under the credit facility automatically convert into the Company's Series B Preferred Stock at a price of \$1.6026 per share. The Credit Agreement also provides that Microtune will have the right to participate on a pro rata basis in all future rounds of financing undertaken by the Company.

F-21

In October 2001, the Company granted options under the option plan discussed in Note 9 for the purchase of 1,451,500 shares of the Company's stock at an exercise price of \$1.16. Of those options, 150,000 were granted to a member of the Board of Directors of the Company and \$150,000 was paid in cash to the Company's Chief Executive Officer in conjunction with their assistance in consummating the agreement with Microtune.
