**CVRD signs mining contract for Moatize**

Rio de Janeiro, June 28, 2007 Companhia Vale do Rio Doce (CVRD) announces that the government of Mozambique approved the mining contract for the exploitation of the Moatize coal project, located in the northwestern province of Tete.

This event follows the approval of the project development plan by the Mozambican authorities in early June. The contract has duration of 25 years, which can be extended for additional periods of time, and establishes the tax, international trade and foreign exchange regimes that will rule the CVRD investment in Moatize.

This process begun in November 2004 and the last steps to be taken comprehend the mining concession and the conclusion of the negotiations with the local railroad and port operators for the logistics contract.

The project involves the exploitation of an open pit mine for 35 years, with an estimated average annual production of 11 million metric tons (Mt) of coal products 8.5 Mt of metallurgical coal and 2.5 Mt of thermal coal.

Roger Agnelli, Chief Executive Officer of CVRD, commented: This is an important step in our strategy for the coal business. We still need to reach an agreement, which is in the final stage of discussion, involving competitive costs for the logistics of the project. Roger added: I would like to highlight the support and partnership developed with the government of Mozambique, which were very important for the smooth evolution of this process. I am very happy with it.

This press release may contain statements that express management's expectations about future events or results rather than historical facts. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected in forward-looking statements, and CVRD cannot give assurance that such statements will prove correct. These risks and uncertainties include factors: relating to the Brazilian and Canadian economy and securities markets, which exhibit volatility and can be adversely affected by developments in other countries; relating to the iron ore and nickel business and its dependence on the global steel industry, which is cyclical in nature; and relating to the highly competitive industries in which CVRD operates. For additional information on factors that could cause CVRD's actual results to differ from expectations reflected in forward-looking statements, please see CVRD's reports filed with the Brazilian Comissão de Valores Mobiliários and the U.S. Securities and Exchange Commission.
