PROSPECTUS SUMMARY

This summary highlights information contained elsewhere in, or incorporated by reference into, this prospectus. Because this is a summary, it may not contain all of the information that may be important to you. You should read the entire prospectus, our financial statements (including the related notes) and the other information that is incorporated by reference into this prospectus before making a decision to invest in our common stock.

Unless the text clearly suggests otherwise, references in this prospectus to us, we, our, or the company include Mercantile Bank Corporation and its consolidated subsidiaries.

Mercantile Bank Corporation

We are a single bank holding company headquartered in Wyoming, Michigan, a suburb of Grand Rapids. Grand Rapids is the second largest city in the State of Michigan. Our bank, Mercantile Bank of West Michigan, together with its subsidiaries, provide a wide variety of commercial and retail banking and related services primarily to small-to medium-sized businesses, and to a lesser extent, individuals and governmental units based in and around Grand Rapids from our main office and four additional full-service branches located throughout the Grand Rapids area. We serve primarily the Kent and Ottawa Counties of western Michigan. In addition, we have recently opened a loan production office in Holland, Michigan, a community located thirty miles southwest of Grand Rapids.

As part of our goal of increasing our fee-based income and strengthening our customer relationships, we have expanded the non-bank financial products and services we provide our customers. In October 2000, we formed Mercantile Bank Mortgage Company, a wholly-owned subsidiary of our bank, to increase the profitability and efficiency of our bank's mortgage loan function. In 2002, we formed Mercantile BIDCO, Inc., a non-depository Michigan financial institution operating as a Michigan Business and Industrial Development Company, which offers equipment lease financing, asset-based loans, junior debt facilities and other financing arrangements. Also in 2002, we introduced Mercantile Insurance Center, Inc., a wholly-owned subsidiary of our bank, which offers a wide variety of personal and small business insurance products on an agency basis. We also offer investment products and services to our customers through our joint brokerage relationship with Raymond James Financial Services, Inc.

At June 30, 2003, we had total assets of \$1.0 billion, loans of \$866 million, deposits of \$844 million and shareholders' equity of \$83 million. For the six month period ended June 30, 2003, our total revenues were \$28.3 million, our net income was \$4.8 million, and our diluted earnings per share were \$0.86.

Our principal executive offices are located at 5650 Byron Center Avenue SW, Wyoming, Michigan 49509. Our telephone number is 616-406-3000 and our website address is www.mercbank.com.

Financial Highlights

We have grown significantly since our bank opened in December 1997. We posted our first profit in the third quarter of 1998, only nine months after our bank opened. Since inception, management has focused on achieving profitable internal growth while maintaining strong asset quality. Over the past five and a half years, we have achieved significant growth in assets, loans, deposits and earnings per share, as highlighted below:

Our total assets have grown from \$24 million at December 31, 1997, to \$1.0 billion at June 30, 2003.

Our total loans have grown from \$13 million at December 31, 1997, to \$886 million at June 30, 2003.

Our total deposits have grown from \$10 million at December 31, 1997, to \$844 million at June 30, 2003, including \$242 million of local deposits at June 30, 2003.

Our diluted earnings per share have increased from \$(0.50) for the year ended December 31, 1998, to \$1.41 for the year ended December 31, 2002. Diluted earnings per share for the first half of 2003 were \$0.86.

Our return on average equity was 10.3% for the year ended December 31, 2002, and 11.8%, on an annualized basis, for the first six months of 2003.

Our asset quality has remained strong. Our ratio of non-performing loans to total loans was 0.10% at December 31, 2002, and 0.06% at June 30, 2003. Our ratio of net loan charge-offs to average total loans was 0.09% for the year ended December 31, 2002, and 0.05%, on an annualized basis, for the first six months of 2003.

Since 1998, our efficiency ratio has improved from 70.9% to 50.8% for the first six months of 2003, while we have added branches. Currently we have five banking offices and one loan production office.

Growth Strategy

We attribute our growth and profitability to our success in capitalizing on opportunities created by the significant market disruption caused by the consolidation of the financial services firms in our market area that has resulted in the dislocation of customers as well as employees of these firms. We intend to continue to expand our business through internal growth as well as selective geographic expansion, while maintaining our historically low efficiency ratio and strong asset quality. Our strategy for achieving these objectives includes:

Continuing our primary focus on commercial and commercial real estate lending to small to medium-sized businesses in and around our existing market area, with a goal of providing superior customer service and maintaining strong asset quality.

Seeking to recruit experienced commercial lenders and other banking professionals with significant relationships in and knowledge of our markets.

Expanding into selective new markets by establishing new branches or through possible acquisitions of existing branches or institutions.

Expanding our product lines and adding additional financial services in order to diversify our revenue base, increase our fee income and strengthen our customer relationships.

Seeking to attract new and larger loan relationships as we continue to grow. In particular, we believe we can continue to capitalize on opportunities created by continued market disruption as a result of the consolidation of the financial services firms in our market area.

Operating Strategy

Focus on locally-owned and operated businesses.

Our lending activities focus primarily on providing local businesses with commercial business loans and loans secured by owner-occupied real estate. Typically, we seek commercial lending relationships with customers borrowing from \$250,000 to \$5.0 million. Our legal lending limit was approximately \$19 million as of June 30, 2003, and this limit accommodates the vast majority of credit opportunities we encounter. If local businesses have credit needs beyond the scope of our lending capacity, we may participate out a portion of the credit with other financial institutions in order to accommodate our customers' needs. As of June 30, 2003, we had 13 relationships borrowing more than \$5.0 million from our bank.

Employing fewer, but highly qualified and productive individuals and focusing on low net overhead ratios.

Key to our growth and profitability is our management's extensive experience in providing community banking services and our ability to create a culture committed to both proactive sales and disciplined credit quality. Our practice of employing fewer, but highly qualified and productive individuals at all levels of the organization is key to maintaining a decentralized management structure. These individuals are able to manage large loan portfolios, which increases interest income while controlling personnel costs. Our commercial lending focus allows us to generate larger relationships than a retail focus would allow, which permits us to grow our assets with fewer individuals.

Operating a limited number of offices with a high asset base per office.

We currently have five full-service banking offices and one loan production office. We actively solicit local deposits to fund our asset growth. We grew our local deposit base 36.6% in 2002 and 18.1% in the first six months of 2003. However, our loan portfolio has increased faster than our local deposits. Because of this, we acquire out-of-area deposits from across the country to help fund our growth and because they typically are a lower cost of funds than local deposits. We believe that our ability to attract adequate funding with minimal branching allows us to grow at a lower overhead cost. Our efficiency ratio for the first six months of 2003 was 50.8%. We plan to continue using out-of-area deposits because we believe that this large and lower cost source of funds gives us a competitive advantage in our market.

Maintaining strong asset quality.

Equally important as our growth is our emphasis on the quality of our loan portfolio and the adequacy of our allowance for loan and lease losses. For the fiscal years since our opening, our ratio of annual net loan charge-offs to average loans has not exceeded 0.09%, and for the six-months ended June 30, 2003 our ratio was 0.05%, on an annualized basis. Our ratio of nonperforming loans to total loans was 0.06% at June 30, 2003. In addition to controlling provision for loan and lease loss expense, we believe that strong asset quality results in greater operating performance because it minimizes the time and money spent managing problem assets. At the same time we understand the risks associated with our loan portfolio and maintain a loan loss reserve that we believe is appropriate. At June 30, 2003, our ratio of allowance for loan and lease losses to total loans was 1.40%.

Market Area

We consider our market area to include the Kent and Ottawa Counties of western Michigan, including the city of Grand Rapids, the second largest city in the state of Michigan, and the city of Holland, Michigan. Kent County, which encompasses most of the Grand Rapids metropolitan area, has a diverse economy based primarily on manufacturing, retail and service businesses. Based on U.S. Census data for 2000, Kent County had approximately 575,000 people and approximately 210,000 households. According to the FDIC, total deposits in Kent County, including those of banks and thrifts, were approximately \$7.9 billion at June 30, 2002. The largest city in Ottawa County is Holland, Michigan. Ottawa County has approximately 240,000 people and approximately 80,000 households, according to 2000 U.S. Census data. Total deposits in Ottawa County were approximately \$2.9 billion at June 30, 2002, according to the FDIC.

Our bank's main office is currently located in downtown Grand Rapids. However, we have plans underway to construct a new facility just north of the center of downtown Grand Rapids which is expected to serve as our bank's new main office as well as house our loan operations function. Construction of this new office is expected to be completed by mid-2005. Our additional bank branches are strategically located in communities in and around Grand Rapids. We have a combined branch and operations center in Wyoming, Michigan, a southwestern suburb of Grand Rapids, where our administrative headquarters as well as the main offices of the company are located. We also have a branch in Comstock Park, Michigan, a northwestern suburb of Grand Rapids, which also includes a retail loan center, and a branch in Kentwood, Michigan, in the southeastern part of Grand Rapids. In May, 2003, we opened our Knapp's Corner branch, located in northeastern Grand Rapids, and a loan production office in Holland, Michigan.

Recent Developments

We experienced approximately \$82.2 million of loan growth during the first two months of the third quarter of 2003. During periods of significant loan growth, our earnings may be negatively impacted because growth in net interest income may lag the timing of additions we make to our allowance for loan losses to reflect the growth. Our policies call for additions of approximately \$1.1 million to our loan loss reserve levels associated with this growth which we will record as a portion of our third quarter 2003 provision for loan losses. This will affect our short-term earnings.

The Offering

Common stock offered 1,195,310 shares

Common stock to be outstanding upon completion of this offering 6,624,436 shares (1)

Use of proceeds We intend to use the net proceeds from this offering to increase our capital position in anticipation of future growth, and for other general corporate purposes. Promptly following the completion of this offering, we intend to contribute substantially all of the net proceeds to our bank to increase its capital position.

Cash dividends We paid cash dividends in the amount of \$0.08 per share on our common stock on March 10, 2003, June 10, 2003 and September 10, 2003. We currently expect to continue to pay a quarterly cash dividend, although there can be no assurance that we will continue to do so.

(3) To compute these ratios, we adjust GAAP reported net interest income by the tax equivalent adjustment amount (assuming a 34% tax rate) to account for the tax attributes on federally tax exempt municipal securities. For GAAP purposes, tax benefits associated with federally tax exempt municipal securities are

recorded as a benefit in income tax expense. The following table reconciles reported net interest income to net interest income on a tax equivalent basis for the periods presented:

RISK FACTORS

Investing in our common stock involves risks. You should carefully consider the following risk factors before you decide to buy our common stock. You should also consider other information in this prospectus, as well as in the other documents incorporated by reference into this prospectus. If any of these risks actually occur, our business could be adversely affected, the trading price of our common stock could decline, and you could lose all or a part of your investment.

Adverse changes in economic conditions or interest rates may negatively affect our earnings, capital and liquidity.

The results of operations for financial institutions, including our bank, may be materially and adversely affected by changes in prevailing local and national economic conditions, including declines in real estate market values and the related declines in value of our real estate collateral, rapid increases or decreases in interest rates and changes in the monetary and fiscal policies of the federal government. Our profitability is heavily influenced by the spread between the interest rates we earn on investments and loans and the interest rates we pay on deposits and other interest-bearing liabilities. Substantially all our loans are to businesses and individuals in western Michigan, and any decline in the economy of this area could adversely affect us. Like most banking institutions, our net interest spread and margin will be affected by general economic conditions and other factors that influence market interest rates and our ability to respond to changes in these rates. At any given time, our assets and liabilities will be such that they will be affected differently by a given change in interest rates.

Our credit losses could increase and our allowance for loan and lease losses may not be adequate to cover actual loan losses.

The risk of nonpayment of loans is inherent in all lending activities, and nonpayment, if it occurs, may have a materially adverse effect on our earnings and overall financial condition as well as the value of our common stock. Our focus on commercial lending may result in a larger concentration of loans to small businesses. As a result, we may assume greater lending risks than other banks. We make various assumptions and judgments about the collectibility of our loan portfolio and provide an allowance for losses based on several factors. If our assumptions are wrong, our allowance for loan and lease losses may not be sufficient to cover our losses, which would have an adverse effect on our operating results. While we have not experienced any significant charge-offs or had large numbers of nonperforming loans, due to the significant increase in loans originated since we began operations, we cannot assure you that we will not experience an increase in delinquencies and losses as these loans continue to mature. The actual amount of future provisions for loan losses cannot be determined at this time and may exceed the amounts of past provisions. Additions to our allowance for loan and lease losses decrease our net income.

We rely heavily on our management and other key personnel, and the loss of any of them may adversely affect our operations.

We are and will continue to be dependent upon the services of our management team, including Gerald R. Johnson, Jr., our Chairman and Chief Executive Officer, Michael H. Price, our President and Chief Operating Officer, and our other senior managers. The loss of either Mr. Johnson or Mr. Price, or any of our other senior managers, could have an adverse effect on our growth and performance. We have entered into employment contracts with Mr. Johnson and Mr. Price and two other senior managers. The contracts provide for a three year employment period that is extended for an additional year each year unless a notice is given indicating that the contract will not be extended.

In addition, we will continue to depend on our key commercial loan officers. We have several commercial loan officers who are responsible, or share responsibility, for generating and managing a significant portion of our commercial loan portfolio. Our success can be attributed in large part to the relationships these officers as well as members of our management team have developed and are able to maintain with our customers as we continue to implement our community banking philosophy. The loss of any of these commercial loan officers

could adversely affect our loan portfolio and performance, and our ability to generate new loans. Many of our key employees have signed agreements with us agreeing not to compete with us in our market for specified time periods if they leave employment with us.

Some of the other financial institutions in our market also require their key employees to sign agreements that preclude or limit their ability to leave their employment and compete with them or solicit their customers. These agreements make it more difficult for us to hire loan officers with experience in our market who can immediately solicit their former or new customers on our behalf.

Decline in the availability of out-of-area deposits could cause liquidity or interest rate margin concerns, or limit our growth.

We have utilized and expect to continue to utilize out-of-area or wholesale deposits to support our asset growth. These deposits are generally a lower cost source of funds when compared to the interest rates that we would have to offer in our local market to generate a commensurate level of funds. In addition, the overhead costs associated with wholesale deposits are considerably less than the overhead costs we would incur to administer a similar level of local deposits. A decline in the availability of these wholesale deposits would require us to fund our growth with more costly funding sources, which could reduce our net interest margin, limit our growth, reduce our asset size, or increase our overhead costs.

Future sales of our common stock or other securities may dilute the value of our common stock.

In many situations, our Board of Directors has the authority, without any vote of our shareholders, to issue shares of our authorized but unissued stock, including shares authorized and unissued under our stock option plans. In the future, we may issue additional securities, through public or private offerings, in order to raise additional capital. Any such issuance would dilute the percentage of ownership interest of existing shareholders and may dilute the per share book value of the common stock. In addition, option holders may exercise their options at a time when we would otherwise be able to obtain additional equity capital on more favorable terms.

The sale, or availability for sale, of a substantial number of shares of common stock in the public market as a result of or following this offering could adversely affect the price of our common stock and could impair our ability to raise additional capital through the sale of equity securities.

Our growth and expansion may be limited by many factors.

We have pursued and intend to continue to pursue an internal growth strategy, the success of which will depend primarily on generating an increasing level of loans and deposits at acceptable risk and interest rate levels without commensurate increases in non-interest expenses. There can be no assurance that we will be successful in continuing our growth strategies due to delays and other impediments resulting from regulatory oversight, limited availability of qualified personnel, or unavailability of branch sites. In addition, the success of our growth strategy will depend on maintaining sufficient regulatory capital levels and on adequate economic conditions in our market area.

In addition, although we have no current plans to do so, we may acquire banks, related businesses or branches of other financial institutions that we believe provide a strategic fit with our business. To the extent that we grow through acquisitions, we cannot assure you that we will be able to adequately or profitably manage this growth. Acquiring other banks, businesses, or branches involves risks commonly associated with acquisitions, including exposure to unknown or contingent liabilities and asset quality issues of banks, businesses, or branches we acquire, difficulty and expense of integrating the operations and personnel, potential disruption to our business including the diversion of management's time and attention, and the possible loss of key employees and customers of the banks, businesses, or branches we acquire.

Our future success is dependent on our ability to compete effectively in the highly competitive banking industry.

We face substantial competition in all phases of our operations from a variety of different competitors. Our future growth and success will depend on our ability to compete effectively in this highly competitive environment. We compete for deposits, loans and other financial services with numerous Michigan-based and out-of-state banks, thrifts, credit unions and other financial institutions as well as other entities that provide financial services. Some of the financial institutions and financial service organizations with which we compete are not subject to the same degree of regulation as we are. Most of our competitors have been in business for many years, have established customer bases, are larger, have substantially higher lending limits than we do and offer branch networks and other services which we do not, including, trust and international banking services. Most of these entities have greater capital resources than we do, which, among other things, may allow them to price their services at levels more favorable to the customer and to provide larger credit facilities than we do. This competition may limit our growth or earnings. Under the Gramm-Leach-Bliley Act of 1999, effective March 11, 2000, securities firms and insurance companies that elect to become financial holding companies may acquire banks and other financial institutions. The Gramm-Leach-Bliley Act affects the competitive environment in which we conduct business. The financial services industry is also likely to become more competitive as further technological advances enable more companies to provide financial services. These technological advances may diminish the importance of depository institutions and other financial intermediaries in the transfer of funds between parties.

We are subject to significant government regulation, and any regulatory changes may adversely affect us.

The banking industry is heavily regulated under both federal and state law. These regulations are primarily intended to protect customers, not our creditors or shareholders. Existing state and federal banking laws subject us to substantial limitations with respect to the making of loans, the purchase of securities, the payment of dividends and many other aspects of our business. Some of these laws may benefit us, others may increase our costs of doing business, or otherwise adversely affect us and create competitive advantages for others. Regulations affecting banks and financial services companies undergo continuous change, and we cannot predict the ultimate effect of these changes, which could have a material adverse effect on our profitability or financial condition. Federal economic and monetary policy may also affect our ability to attract deposits, make loans and achieve satisfactory interest spreads.

We continually encounter technological change, and we may have fewer resources than our competitors to continue to invest in technological improvements.

The banking industry is undergoing technological changes with frequent introductions of new technology-driven products and services. In addition to better serving customers, the effective use of technology increases efficiency and enables financial institutions to reduce costs. Our future success will depend, in part, on our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands for convenience as well as creating additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. There can be no assurance that we will be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers.

Our Articles of Incorporation and By-laws and the laws of Michigan contain provisions that may discourage or prevent a takeover of our company and reduce any takeover premium.

Our Articles of Incorporation and By-laws, and the corporate laws of the State of Michigan, include provisions which are designed to provide our board of directors with time to consider whether a hostile takeover offer is in our and our shareholders' best interest. These provisions, however, could discourage potential acquisition proposals and could delay or prevent a change in control. The provisions also could diminish the opportunities for a holder of our common stock to participate in tender offers, including tender offers at a price above the then-current market price for our common stock. These provisions could also prevent transactions in which our shareholders might otherwise receive a premium for their shares over

then-current market prices, and may limit the ability of our shareholders to approve transactions that they may deem to be in their best interests.

The Michigan Business Corporation Act contains provisions intended to protect shareholders and prohibit or discourage various types of hostile takeover activities. In addition to these provisions and the provisions of our Articles of Incorporation and Bylaws, federal law requires the Federal Reserve Board's approval prior to acquiring control of a bank holding company. All of these provisions may delay or prevent a change in control without action by our shareholders, and could adversely affect the price of our common stock.

There is a limited trading market for our common stock.

The price of our common stock subject to this offering may be greater than the market price for our common stock following the offering. The price of our common stock has been, and will likely continue to be, subject to fluctuations based on, among other things, economic and market conditions for bank holding companies and the stock market in general, as well as changes in investor perceptions of our company. The issuance of new shares of our common stock also may affect the market for our common stock.

Our common stock is traded on the Nasdaq National Market under the symbol **MBWM**. The development and maintenance of an active public trading market depends upon the existence of willing buyers and sellers, the presence of which is beyond our control. While we are a publicly-traded company, the volume of trading activity in our stock is still relatively limited. Even if a more active market develops, there can be no assurance that such a market will continue, or that our shareholders will be able to sell their shares at or above the offering price.

We paid a 5% stock dividend on our common stock in 2001, 2002 and 2003. We have only recently begun paying quarterly cash dividends. While we expect to continue paying cash dividends, there is no assurance that we will continue to do so.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

We make certain forward-looking statements in this prospectus and in the documents incorporated by reference into this prospectus that are based upon our current expectations and projections about current events. We intend these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we are including this statement for purposes of these safe harbor provisions. You can identify these statements from our use of the words *estimate*, *project*, *believe*, *intend*, *plan*, *anticipate*, *expect* and similar expressions. These forward-looking statements include:

statements of our goals, intentions and expectations;

statements regarding our business plans and growth strategies;

statements regarding the asset quality of our loan and investment portfolios; and

estimates of our risks and future costs and benefits.

These forward-looking statements are subject to significant risks, assumptions and uncertainties, including the factors discussed in the *Risk Factors* section of this prospectus. The forward-looking statements included in this prospectus are made on and as of the date of this prospectus. We are under no duty to update any of the forward-looking statements after the date of this prospectus to conform such statements to actual results. Further information concerning us and our business, including additional factors that could materially affect our business and financial results, is included in our filings with the Securities and Exchange Commission.

USE OF PROCEEDS

We will receive net proceeds of approximately \$37.26 million from the sale of 1,195,310 shares of our common stock in this offering, after deducting the underwriting discount and estimated offering expenses of approximately \$215,000 payable by us. If the underwriters over-allotment option is exercised in full, our net proceeds will be approximately \$42.88 million.

We intend to use the net proceeds from this offering to increase our capital position in anticipation of future growth, and for other general corporate purposes. Promptly following the completion of this offering, we intend to contribute substantially all of the net proceeds to our bank to increase its capital position.

PRICE RANGE OF COMMON STOCK

Our common stock is traded on the Nasdaq National Market under the symbol MBWM. At September 3, 2003, there were 221 record holders of our common stock. In addition, we estimate that there were approximately 3,000 beneficial owners of our common stock who own their shares through brokers or banks.

The following table shows the high and low bid prices for our common stock as reported by the Nasdaq National Market for the periods indicated, and the quarterly cash dividends paid by us during those periods. The prices do not include retail mark-up, mark-down or commission, but have been adjusted for the 5% stock dividends paid on February 3, 2003, February 1, 2002 and February 1, 2001.

DIVIDEND POLICY

Holders of our common stock are entitled to receive dividends that the Board of Directors may declare from time to time. We may only pay dividends out of funds that are legally available for that purpose. We are a holding company and substantially all of our assets are held by our subsidiaries. Our ability to pay dividends to our shareholders depends primarily on our bank's ability to pay dividends to us. Dividend payments and extensions of credit to us from our bank are subject to legal and regulatory limitations, generally based on capital levels and current and retained earnings imposed by law and regulatory agencies with authority over our bank. The ability of our bank to pay dividends is also subject to its profitability, financial condition, capital expenditures and other cash flow requirements. In addition, under the terms of our 9.60% junior subordinated debentures due 2029, we would be precluded from paying dividends on our common stock if we were in default under the debentures and did not take reasonable steps to cure the default, if we exercised our right to defer payments of interest on the debentures, or if certain related defaults occurred.

We paid 5% stock dividends on our common stock in February of 2001, 2002 and 2003. We paid cash dividends in the amount of \$0.08 per share on our common stock on March 10, June 10 and September 10 of this year. We currently expect to continue to pay a quarterly cash dividend, although there can be no assurance that we will continue to do so.

CAPITALIZATION

The following table sets forth our historical consolidated capitalization as of June 30, 2003, and our capitalization as of the same date on an adjusted basis, giving effect to the offering. For purposes of this table, our net proceeds are approximately \$37.26 million after deducting estimated offering expenses and underwriting discounts and commissions. If the underwriters' over-allotment option is exercised in full, 179,296 additional shares would be sold, resulting in net proceeds of approximately \$42.88 million based on the public offering price after deducting estimated offering expenses and underwriting discounts and commissions.

In 1999, Mr. Christmas was elected Chief Financial Officer, Treasurer and Compliance Officer of the company and our bank. In 2000, Mr. Christmas was elected Senior Vice President, Chief Financial Officer and Treasurer of the company, and Senior Vice President and Chief Financial Officer of our bank. Prior to joining the company, he examined various financial institutions for over ten years while serving as a bank examiner with the Federal Deposit Insurance Corporation (FDIC). He began his tenure with the FDIC upon his graduation from Ferris State University. Mr. Christmas holds a Bachelor of Science degree in Accountancy. Mr. Christmas serves on the Michigan Banker Association Funds Management Committee, as a fundraising volunteer for the Make-A-Wish Foundation of Michigan and the American Cancer Society, and as a volunteer for Habitat for Humanity.

UNDERWRITING

Subject to the terms and conditions in the underwriting agreement dated September 18, 2003, the underwriters named below, for whom Raymond James & Associates, Inc. is acting as representative, have severally agreed to purchase from us the respective number of shares of our common stock set forth opposite their names below:

Underwriters	Number of Shares
Raymond James & Associates, Inc.	567,772
Stifel, Nicolaus & Company, Incorporated	397,440
Oppenheimer & Co. Inc.	170,332
Friedman, Billings, Ramsey & Co., Inc.	29,883
Howe Barnes Investments, Inc.	29,883
	<hr/>
Total	1,195,310
	<hr/> <hr/>

The underwriting agreement provides that the obligations of the several underwriters to purchase and accept delivery of the common stock offered by this prospectus are subject to approval by their counsel of legal matters and to other conditions set forth in the underwriting agreement. The underwriters are obligated to purchase and accept delivery of all of the shares of common stock offered by this prospectus, if any are purchased, other than those covered by the over-allotment option described below.

The underwriters propose to offer the common stock directly to the public at the public offering price indicated on the cover page of this prospectus and to various dealers at that price less a concession not to exceed \$1.15 per share, of which \$0.10 may be reallocated to other dealers. After this offering, the public offering price, concession and reallocation to dealers may be reduced by the underwriters. No reduction will change the amount of proceeds to be received by us as indicated on the cover page of this prospectus. The shares of common stock are offered by the underwriters as stated in this prospectus, subject to receipt and acceptance by them and subject to their right to reject any order in whole or in part.

We have granted to the underwriters an option, exercisable within 30 days after the date of this prospectus, to purchase from time to time up to an aggregate of 179,296 additional shares of common stock to cover over-allotments, if any, at the public offering price less the underwriting discount. If the underwriters exercise their over-allotment option to purchase any of the additional 179,296 shares, each underwriter, subject to certain conditions, will become obligated to purchase its pro rata portion of these additional shares based on the underwriter's percentage purchase commitment in this offering as indicated in the table above. If purchased, these additional shares will be sold by the underwriters on the same terms as those on which the shares offered by this prospectus are being sold. The underwriters may exercise the over-allotment option only to cover over-allotments made in connection with the sale of the shares of common stock offered in this offering.

At our request, the underwriters have reserved up to 100,000 shares of our common stock offered by this prospectus for sale to our directors and officers at the public offering price set forth on the cover page of this prospectus. These persons must commit to purchase from an underwriter or selected dealer at the same time as the general public. The number of shares available for sale to the general public will be reduced to the extent these persons purchase the reserved shares. Any reserved shares purchased by our directors or executive officers will be subject to the lock-up agreements described on the following page. We are not making loans to these officers or directors to purchase such shares.

The following table summarizes the underwriting compensation to be paid to the underwriters by us. These amounts assume both no exercise and full exercise of the underwriters' over-allotment option to

purchase additional shares. We estimate that the total expenses payable by us in connection with this offering, other than the underwriting discount referred to below, will be approximately \$215,000.

	<u>Per Share</u>	<u>Without Option</u>	<u>With Option</u>
Underwriting discount payable by us	\$ 1.91245	\$ 2,285,970.61	\$ 2,628,865.24

We have agreed to indemnify the underwriters against various liabilities, including liabilities under the Securities Act of 1933, or to contribute to payments the underwriters may be required to make because of any of those liabilities.

Subject to specified exceptions, each of our directors and our executive officers has agreed, for a period of 90 days after the date of this prospectus, without the prior written consent of Raymond James & Associates, Inc., not to offer, sell, contract to sell, pledge, grant any option to purchase or otherwise dispose of any shares of our common stock or securities convertible into or exercisable or exchangeable for any shares of our common stock. This agreement also precludes any hedging collar or other transaction designed or reasonably expected to result in a disposition of our common stock or securities convertible into or exercisable or exchangeable for our common stock.

In addition, we have agreed that, for 90 days after the date of this prospectus, we will not, directly or indirectly, without the prior written consent of Raymond James & Associates, Inc., issue, sell, contract to sell, or otherwise dispose of or transfer, any of our common stock or securities convertible into, exercisable for or exchangeable for our common stock, or enter into any swap or other agreement that transfers, in whole or in part, the economic consequences of ownership of our common stock or securities convertible into, exercisable for or exchangeable for our common stock, except for our sale of common stock in this offering, and the issuance of options or shares of common stock under our existing incentive stock plans, employee benefit plans or dividend reinvestment and stock purchase plan.

Until the offering is completed, rules of the Securities and Exchange Commission may limit the ability of the underwriters and certain selling group members to bid for and purchase shares of our common stock. As an exception to these rules, the underwriters may engage in certain transactions that stabilize the price of our common stock. These transactions may include short sales, stabilizing transactions, purchases to cover positions created by short sales and passive market making. Short sales involve the sale by the underwriters of a greater number of shares of our common stock than they are required to purchase in the offering. Stabilizing transactions consist of certain bids or purchases made for the purpose of preventing or retarding a decline in the market price of our common stock while the offering is in progress. In passive market making, the underwriter, in its capacity as market maker in the common stock, may, subject to limitations, make bids for or purchases of our common stock until the time, if any, at which a stabilizing bid is made.

The underwriters also may impose a penalty bid. This occurs when a particular underwriter repays to the other underwriters a portion of the underwriting discount received by it because the representatives have repurchased shares sold by or for the account of such underwriter in stabilizing or short covering transactions.

These activities by the underwriters may stabilize, maintain or otherwise affect the market price of our common stock. As a result, the price of our common stock may be higher than the price that otherwise might exist in the open market. If these activities are commenced, they may be discontinued by the underwriters without notice at any time. These transactions may be effected on the Nasdaq National Market or otherwise.

Our common stock is listed on the Nasdaq National Market under the symbol MBWM.

Certain representatives of the underwriters or their affiliates may in the future perform investment banking and other financial services for us and our affiliates for which they may receive advisory or transaction fees, as applicable, plus out-of-pocket expenses, of the nature and in amounts customary in the industry for these financial services. Raymond James & Associates, Inc., Stifel, Nicolaus & Company, Incorporated and Oppenheimer & Co. Inc., are currently market makers in our common stock on the Nasdaq National Market.
