PART I

ITEM 1. DESCRIPTION OF BUSINESS

THE CORPORATION

Community Central Bank Corporation (the "Corporation") is a registered bank holding company under the Bank Holding Company Act of 1956, as amended (the "Bank Holding Company Act"). As a bank holding company, the Corporation is subject to regulation by the Federal Reserve Board. The Corporation was organized on April 26, 1996, under the laws of the State of Michigan, and formed Community Central Bank (the "Bank") effective September 16, 1996. The Corporation exists primarily for the purpose of holding all the stock of the Bank, and of such other subsidiaries as it may acquire or establish.

The expenses of the Corporation have generally been paid using the proceeds of its two public stock offerings. The Corporation's principal source of future operating funds is expected to be dividends from the Bank.

THE BANK

The Bank is a state-banking corporation, which operates pursuant to a charter issued by the State of Michigan. The Bank's deposits are insured to the maximum extent allowed by the Federal Deposit Insurance Corporation.

The Bank, through its main branch in Mount Clemens, Michigan and its full service branch in Rochester Hills, Michigan, provides a wide variety of commercial banking services to individuals, businesses, governmental units, and other institutions. Its services include accepting time, demand and savings deposits, including regular checking accounts, NOW and money market accounts, and certificates of deposit. In addition, the Bank makes secured and unsecured commercial, construction, mortgage, and consumer loans, and provides safe deposit facilities. Community Central Mortgage Company, LLC a subsidiary of the Corporation and Bank, operates locations in Mount Clemens, Warren, Dearborn, Livonia and Anchorville. The ownership of the Mortgage Company consists of two members, the Bank and the Corporation owning 99% and 1% of the Mortgage Company, respectively. The Corporation's common shares trade on the Nasdaq National Market under the symbol "CCBD."

EFFECT OF GOVERNMENT MONETARY POLICIES

The earnings of the Corporation are affected by domestic economic conditions and the monetary and fiscal policies of the United States Government, its agencies, and the Federal Reserve Board. The Federal Reserve Board's

Edgar Filing: COMMUNITY CENTRAL BANK CORP - Form 10KSB

monetary policies have had, and will likely continue to have, an important impact on the operating results of commercial banks through its power to implement national monetary policy. Monetary policy is used to, among other things, attempt to curb inflation or combat a recession. The policies of the Federal Reserve Board have a major effect upon the levels of bank loans, investments and deposits through its open market operations in United States Government securities, and through its regulation of, among other things, the discount rate on borrowings of member banks and the reserve requirements against member bank deposits. It is not possible to predict the nature and impact of future changes in monetary and fiscal policies.

3

REGULATION AND SUPERVISION

Financial institutions and their holding companies are extensively regulated under federal and state law. Consequently, the growth and earnings performance of the Corporation and the Bank can be affected not only by management decisions and general economic conditions, but also by the statutes administered by, and the regulations and policies of, various governmental regulatory authorities. Those authorities include, but are not limited to, the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation (the "FDIC"), the Commissioner of the Financial Institutions Bureau of the State of Michigan, the Internal Revenue Service, and federal and state taxing authorities. The effect of such statutes, regulations and policies can be significant, and cannot be predicted with a high degree of certainty. There can be no assurance that future legislation or government policy will not adversely affect the banking industry or the operations of the Bank. Federal economic and monetary policy may affect the Bank's ability to attract deposits, make loans and achieve satisfactory interest spreads.

Federal and state laws and regulations generally applicable to financial institutions and their holding companies regulate, among other things, the scope of business, investments, reserves against deposits, capital levels relative to operations, lending activities and practices, the nature and amount of collateral for loans, the establishment of branches, mergers, consolidations and dividends. The system of supervision and regulation applicable to the Corporation and the Bank establishes a comprehensive framework for their respective operations and is intended primarily for the protection of the FDIC's deposit insurance funds, the depositors of the Bank, and the public, rather than shareholders of the Bank or the Corporation.

Federal law and regulations establish supervisory standards applicable to the lending activities of the Bank including internal controls, credit underwriting, loan documentation, and loan-to-value ratios for loans secured by real property. The Bank is in compliance with these requirements.

EMPLOYEES

As of December 31, 2003, the Corporation and its subsidiaries employed 85 persons (full time equivalent).

COMPETITION

All phases of the business of the Bank are highly competitive. The Bank competes with numerous financial institutions, including other commercial banks, in the Macomb County and metropolitan Detroit area. The Bank, along with other commercial banks, competes with respect to its lending activities, and competes in attracting demand deposits with savings banks, savings and loan associations,

Edgar Filing: COMMUNITY CENTRAL BANK CORP - Form 10KSB

insurance companies, small loan companies, credit unions and with the issuers of commercial paper and other securities, such as various mutual funds. Many of these institutions are substantially larger and have greater financial resources than the Bank.

The competitive factors among financial institutions can be classified into two categories; competitive rates and competitive services. Interest rates are widely advertised and thus competitive, especially in the area of time deposits. From a service standpoint, financial institutions compete against each other in types and quality of services. The Bank is generally competitive with other financial institutions in its area with respect to interest rates paid on time and savings deposits, fees charged on deposit accounts, and interest rates charged on loans. With respect to services, the Bank offers a customer service oriented atmosphere which management believes is better suited to its customers' needs than that which is offered by other institutions in the local market.
