PROFILE TECHNOLOGIES, INC
September 30, 2001
Notes to Condensed Financial Statements

1. Description of Business

Profile Technologies, Inc. (the "Company") is in the business of developing and commercializing potential processes for the nondestructive, noninvasive testing of both above ground and buried pipelines for the effectiveness of pipeline cathodic protecting systems and coating integrity. The Company's future revenues are currently dependent upon the market's acceptance of its sole developed process.

2. Basis of Presentation

The unaudited interim condensed financial statements and related notes of the Company have been prepared pursuant to the instructions to Form 10-QSB. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted pursuant to such instructions. The condensed financial statements and related notes should be read in conjunction with the audited financial statements and notes thereto included in the Company's annual report on form 10-KSB for the year ended June 30, 2001 (filed September 28, 2001). The information furnished reflects, in the opinion of management, all adjustments, consisting of only normal recurring items, necessary for fair presentation of the results of the interim periods presented. Interim results are not necessarily indicative of results for a full year.

3. Net Loss Per Share

Basic loss per share is computed by dividing the net loss by the weighted average number of common shares outstanding during the period. Diluted loss per share is computed by dividing the net loss by the weighted average number of common and dilutive common equivalent shares outstanding during the period. As the Company had a net loss attributable to common shareholders in each of the periods presented, basic and diluted net loss per share are the same.

Excluded from the computation of diluted loss per share for the three months ended September 30, 2001 are options and warrants to acquire 1,870,167 shares of common stock with a weighted-average exercise price of \$3.49 because their

Edgar Filing: PROFILE TECHNOLOGIES INC - Form 10QSB

effect would be antidilutive. Excluded from the computation of diluted loss per share for the three months ended September 30, 2000 are options and warrants to acquire 1,331,000 shares of common stock with a weighted-average exercise price of \$4.12 because their effect would be antidilutive.

4. Sale of Common Stock

During the three months ended September 30, 2001, the Company raised gross proceeds of \$257,500 from the sale of 429,167 shares of common stock and issued one warrant in connection with each share of common stock sold. The warrants are exercisable at \$1.00 per share until September 18, 2006. Each share of common stock and warrant was sold for a total of \$0.60. The certificates for these shares have not been issued as of September 30, 2001 but are reflected as outstanding in the financial statements.

5. Liquidity

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. The Company incurred cumulative losses of \$6,988,622 through September 30, 2001 and has working capital of \$380,576 as of September 30, 2001. The Company has expended a significant amount of cash in developing its technology and patented processes. Management recognizes that in order to meet the Company's capital requirements, additional financing will be necessary. The Company is evaluating alternative sources of financing to improve its cash position and is undertaking efforts to raise capital. If the Company is unable to raise additional capital or secure additional revenue contracts and generate positive cash flow, there can be no assurance that the Company will be able to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

6. NASDAQ Delisting

On June 27, 2001, the Company announced that it received a Nasdaq Staff Determination on June 20, 2001,

indicating that the Company failed to comply with the minimum bid price and net tangible asset/shareholder equity requirements of the Nasdaq Marketplace Rules for continued listing set forth in Marketplace Rule 4310(c)(4), and that its securities were, therefore, subject to delisting from the Nasdaq SmallCap Market. On August 10, 2001, the Nasdaq Stock Market suspended trading in the Company's common stock. Effective Monday, August 13, 2001, the Company began trading on the Over the Counter Bulletin Board under the symbol PRTK.

7. New Accounting Pronouncements

In July 2001, the FASB issued Statement No. 141, "Business Combinations", and Statement No. 142, "Goodwill and Other Intangible Assets". Statement No. 141 requires business combinations initiated after June 30, 2001 to be accounted for using the purchase method of accounting, and specifies criteria for recognizing intangible assets acquired in a business combination. Statement No. 142 requires that goodwill and intangible assets with indefinite useful lives no longer be amortized, but instead be tested for impairment at least annually. Intangible assets with definite useful lives, such as the Company's patents which have a net book value of \$209,344 as of September 30, 2001, will continue to be amortized over their respective estimated useful lives. The Company is required to adopt the provisions of Statement No. 141 immediately and Statement No. 142 effective July 1, 2002. The impact of adopting Statement No. 141 was not

Edgar Filing: PROFILE TECHNOLOGIES INC - Form 10QSB

material. Because of the extensive effort needed to comply with adopting Statement No. 142, it is not practicable to reasonably estimate the impact of adopting this statement on the Company's financial statements at this time.

In October, 2001 the FASB issued FASB Statement No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets", which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. While Statement No. 144 supersedes FASB Statement No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of", it retains many of the fundamental provisions of that Statement. Statement No. 144 also supersedes the accounting and reporting provisions of APB Opinion No. 30, "Reporting the Results of Operations--Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions", for the disposal of a segment of a business. However, it retains the requirement in Opinion No. 30 to report separately discontinued operations and extends that reporting to a component of an entity that either has been disposed of (by sale, abandonment, or in a distribution to owners) or is classified as held for sale. The Company is required and plans to adopt the provisions of Statement No. 144 for the fiscal year beginning July 1, 2002. The adoption of this statement is not expected to have a material impact on the Company's financial statements.

Item 2. Management's Discussion and Analysis or Plan of Operation.

General

Since its inception in 1988, Profile Technologies, Inc. (the "Company"), a Delaware corporation, has been engaged in the business of researching and developing a high speed scanning process, which is nondestructive and noninvasive, to remotely test buried and insulated pipelines for corrosion. The Company's electromagnetic wave inspection process, referred to as EMW, is a patented process of analyzing the waveforms of electrical impulses in a way that extracts point-to-point information along a segment of pipeline to illustrate the integrity of the entire pipeline. This process involves sending an electrical pulse along the pipe being tested from each of two locations toward varying intersecting points between the two locations. At least one of the modified pulses is analyzed to determine whether an anomaly exists at the intersecting location.

This process is designed to detect external corrosion of pipelines without the need for taking the line out of service, physically removing the insulation, or uncovering the pipe, and then visually inspecting the outside of the pipe for corrosion. Often the Company can inspect the pipelines by using various access points to the pipeline that already exist for other reasons. Where such access is not already available, the Company's technology permits inspection of pipelines with only a very minimal amount of disturbance of the covering or insulation that is present on the pipeline. Finally, the Company's technology permits an inspection of the entire pipeline, as opposed to other technologies which only conduct inspections at the points selected for the testing.

Sales

We derive revenue from the sale of the EMW inspection service and from research and development activities that have been sponsored by large multinational oil companies and large utilities. The Company relies upon several employees, including the Chief Executive Officer, the Chief Operating Officer and the Vice President - Field Operations, for the Company's sales functions. The Company relies solely upon the employees of the Company to conduct its sales activities.

Edgar Filing: PROFILE TECHNOLOGIES INC - Form 10QSB

During the three months ended September 30, 2001, all of the Company's sales were attributable to three customers. Two of the Company's customers individually accounted for 57% and 40%, and 0% and 100% of its net sales during the three months ended September 30, 2001 and 2000, respectively.

Marketing

The Company's sales and marketing strategy includes positioning the Company's EMW as the method of choice to detect pipeline corrosion where the pipelines are either inaccessible to other inspection tools or much more costly to inspect with tools other than Profile's EMW inspection. The Company does not have a designated sales force, but currently relies upon several employees, including the Chief Executive Officer, the Chief Operating Officer and the Vice President - Field Operations, for the Company's sales functions.

Results of Operations

Revenues for the three months ended September 30, 2001 were \$341,208 which represented an increase of \$94,787 or 38% as compared to revenues of \$246,421 for the three months ended September 30, 2000. This increase was primarily due to additional work performed on the North Slope of Alaska.

Cost of revenues decreased 6% to \$141,608 for the three months ended September 30, 2001 compared to \$150,550 for the three months ended September 30, 2000. The decrease in cost of revenues is primarily due to the Company becoming more efficient in the delivery of its services.

Gross profit increased to \$199,600 for the three months ended September 30, 2001 from gross profit of \$95,871 for the three months ended September 30, 2000. The increase in gross profit for the three months ended September 30, 2001 as compared to the same quarter of the previous year resulted from efficiencies in the testing services performed and certain fixed costs that do not fluctuate based on revenue.

Research and development expenses for the three months ended September 30, 2001 increased 124% to \$72,843 from \$32,480 for the three months ended September 30, 2000, an increase of \$40,363. The increase is due to certain employees spending more time on research and development and less time on revenue generating contracts.

General and administrative expenses increased 16% to \$290,833 for the three months ended September 30, 2001 from \$250,245 for the three months ended September 30, 2000, an increase of \$40,588. The increase is due to additional administrative expenses as a result of increased operating activities.

Loss from operations decreased 12% to \$164,076 for the three months ended September 30, 2001 compared to \$186,854 for the three months ended September 30, 2000. The decrease is due to higher revenues, which were partially offset by higher operating costs.

Interest income decreased to \$816 for the three months ended September 30, 2001 down from \$22,164 for the three months ended September 30, 2000. This decrease was the result of declining cash and cash equivalent balances as the Company used such resources to sustain its commercial operations and research and development activities and lower rates of return on invested funds.

Net Loss decreased 1% to \$163,260 for the three months ended September 30, 2001 compared to \$164,690 for the three months ended September 30, 2000.

Liquidity and Capital Resources

Edgar Filing: PROFILE TECHNOLOGIES INC - Form 10QSB

Net cash used in operating activities was \$427,627 for the three months ended September 30, 2001 compared with \$419,851 for the three months ended September 30, 2000, primarily as a result of the Company's net loss and an increase in accounts receivable and contract work-in-progress.

Net cash used in investing activities was \$26,780 for the three months ended September 30, 2001 compared with \$8,957 for the three months ended September 30, 2000, as the Company increased its purchases of equipment.

Net cash from financing activities was \$217,258 for the three months ended September 30, 2001 compared to \$0 for the three months ended September 30, 2000. The net cash provided by financing activities was due to the sale of common stock during the quarter.

The Company's cash and cash equivalents as of September 30, 2001 were \$68,909 and the Company had no material long-term commitments or material commitments for capital expenditures.

Management is currently directing the Company's activities towards obtaining additional service contracts, which will necessitate the Company attracting, hiring, training and outfitting qualified technicians. The Company's intention is to purchase such equipment for its field crews for the foreseeable future, until such time as the scope of operations may require alternate sources of financing equipment. There can be no assurance that the Company's process will gain widespread commercial acceptance within any particular time frame, or at all. The Company will incur additional expenses as it hires and trains field crews and support personnel related to the successful receipt of commercial contracts. At the present time the Company anticipates that it may need one additional crew to service future contracts, but it cannot be certain until contract negotiations are complete.

The Company anticipates that capital will be expended to develop infrastructure to support anticipated future growth. As a result, it is expected that cash will be used in operations and to meet capital expenditure requirements. The Company expects that accounts receivable and contract work-in-progress will continue to increase to the extent revenues rise. Any such increase that occurs at the same time or at a greater rate than an increase in revenue can be expected to reduce cash and cash equivalents. The Company has incurred cumulative losses of \$6,988,622 through September 30, 2001 and had working capital of only \$380,576 as of September 30, 2001. Management recognizes that in order to meet the Company's capital requirements, additional financing, in addition to the net proceeds of \$217,258 raised from June 30, 2001 through September 30, 2001 will be necessary. The Company is evaluating alternative sources of financing to improve its cash position and is undertaking efforts to

raise capital. If the Company is unable to raise additional capital or secure additional revenue contracts and generate positive cash flow, there can be no assurance that the Company will be able to continue as a going concern.

FORWARD-LOOKING STATEMENTS

Some of the statements under "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this Report and in the Company's periodic filings with the Securities and Exchange Commission constitute forward-looking statements. These statements involve known and unknown risks, significant uncertainties and other factors that may cause actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements.

In some cases, you can identify forward-looking statements by terminology such

Edgar Filing: PROFILE TECHNOLOGIES INC - Form 10QSB

as "may," "will," "should," "could," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms or other comparable terminology.

The forward-looking statements herein are based on current expectations that involve a number of risks and uncertainties. Such forward-looking statements are based on assumptions that the Company will obtain or have access to adequate financing for each successive phase of its growth, that the Company will market and provide products and services on a timely basis, that there will be no material adverse competitive or technological change in condition of the Company's business, that demand for the Company's products and services will significantly increase, that the Company's executive officers will remain employed as such by the Company, that the Company's forecasts accurately anticipate market demand and that there will be no material adverse change in the Company's operations, business or governmental regulation affecting the Company or its customers. The foregoing assumptions are based on judgments with respect to, among other things, future economic, competitive and market conditions, and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond the Company's control.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of such statements.

PART II -- OTHER INFORMATION

Item 1. Legal Proceedings.

The Company is not a party to any pending or threatened legal proceedings.

Item 2. Changes in Securities.

In connection with a confidential offering memorandum dated July 9, 2001, as supplemented, the Company raised, up through September 30, 2001, \$257,500 through stock subscriptions for 429,167 shares of our common stock and warrants to acquire 429,167 shares of our common stock in a private placement of securities. The warrants have an exercise price of \$1.00 and can be exercised prior to September 18, 2006. The shares and the warrants were offered directly by the Company and by R.F. Lafferty. R.F. Lafferty did not place any of the shares and warrants. All of the investors were accredited investors. We relied on Section 4(2) of the Securities Act and on Rule 506 of Regulation D in selling the shares and warrants without registering the offering under the Securities Act.
