Approximate date of commencement of proposed sale of securities to the public: As soon as practicable after the Registration Statement becomes effective.

If the securities being registered on this Form are being offered in connection with the formation of a holding company and there is compliance with General Instruction G, check the following. o_____

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective

registration statement for the same offering. o_____

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. o_____

CALCULATION OF REGISTRATION FEE

Title of each Class of Securities to be Registered	Amount to be Registered	Proposed Maximum Offering Price Per Unit(1)	Proposed Maximum Aggregate Offering Price(1)	Amount of Registration Fee
5.625% Senior Notes due 2013	\$200,000,000	100%	\$200,000,000	\$ 16,180

(1) Estimated solely for the purposes of calculating the registration fee pursuant to Rule 457(f) of the rules and regulations under the Securities Act of 1933, as amended.

The registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

The information contained in this prospectus is not complete and may be changed. We may not exchange these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED JANUARY 27, 2004

PRELIMINARY PROSPECTUS

Commercial Metals Company

OFFER TO EXCHANGE

**\$200,000,000 principal amount of its 5.625% Senior Notes due 2013
which have been registered under the Securities Act,
for any and all of its outstanding 5.625% Senior Notes due 2013**

The exchange offer expires at 5:00 p.m., Eastern Standard time, on _____, 2004, unless we extend the offer.

We will exchange all outstanding notes, which we refer to in this prospectus as the old notes, that are validly tendered and not validly withdrawn for an equal principal amount of new notes that are registered under the Securities Act, which we refer to in this prospectus as the new notes.

The exchange offer is not subject to any conditions other than that it not violate applicable law or any applicable interpretation of the staff of the SEC.

You may withdraw tenders of old notes at any time before the exchange offer expires.

The exchange of notes will not be a taxable event for U.S. federal income tax purposes.

We will not receive any proceeds from the exchange offer.

The terms of the new notes are substantially identical to the old notes, except for transfer restrictions, registration rights and the circumstances for the payment of additional interest relating to the old notes.

You may tender old notes only in denominations of \$1,000 and multiples of \$1,000.

Our affiliates may not participate in the exchange offer.

No public market exists for the old notes. We do not intend to list the new notes on any securities exchange and, therefore, no active public market is anticipated.

**Please refer to Risk Factors beginning on page 8 of this prospectus
for a description of the risks you should consider before investing in the new notes.**

We are not making this exchange offer in any state where it is not permitted.

Each broker-dealer that receives new notes pursuant to the exchange offer must acknowledge that it will deliver a prospectus in connection with any resale of such new notes. If the broker-dealer acquired the old notes as a result of market making or other trading activities, such broker-dealer may be a statutory underwriter and may use this prospectus for the exchange offer, as supplemented or amended, in connection with the resale of the new notes.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the new notes or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is _____, 2004.

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus and the documents incorporated by reference contain forward-looking statements with respect to our financial condition, results of operations, cash flows and business, and our expectations or beliefs concerning future events, including net earnings, product pricing and demand, production rates, energy expense, freight expense, interest rates, inventory levels, acquisitions and general market conditions. These forward-looking statements can generally be identified by phrases such as we or our management expects, anticipates, believes, plans to, ought, will, should, likely, appears, projects, forecasts or other similar words or phrases. There is inherent risk and uncertainty in any forward-looking statements. Variances will occur and some could be materially different from our current opinion. Developments that could impact our expectations include the following:

interest rate changes;

construction activity;

decisions by governments affecting the level of steel imports, including tariffs and duties;

litigation claims and settlements;

difficulties or delays in the execution of construction contracts resulting in cost overruns or contract disputes;

metals pricing over which we exert little influence;

increased capacity and product availability from competing steel minimills and other steel suppliers including import quantities and pricing;

court decisions;

industry consolidation or changes in production capacity or utilization;

global factors including credit availability;

currency fluctuations;

scrap, energy, freight and supply prices; and

the pace of overall economic activity.

See the section entitled Risk Factors in this prospectus for a more complete discussion of these risks and uncertainties and for other risks and uncertainties. In addition, see our filings with the Securities and Exchange Commission, or the SEC, including our Annual Report on Form 10-K for the year ended August 31, 2003, as amended, and our Quarterly Report on Form 10-Q for the quarter ended November 30, 2003. These factors and the other risk factors described in this prospectus are not necessarily all of the important factors that could cause actual results to differ materially from those expressed in any of our forward-looking statements. Other unknown or unpredictable factors also could harm our results. Consequently, we cannot assure you that the actual results or developments we anticipate will be realized or, even if substantially realized, that they will have the expected consequences to, or effects on, us. Given these uncertainties, we caution prospective investors not to place undue reliance on such forward-looking statements. We undertake no obligation to publicly update or revise any

forward-looking statements, whether as a result of new information, future events or otherwise.

Table of Contents

MARKET DATA

Market data used throughout this prospectus, including information relating to, and our relative position in, the industries we operate in, are based on the good faith estimates of management, which estimates are based upon their review of internal surveys, independent industry publications, reports or studies commissioned by companies in our industry (including us or our competitors) and other publicly available information. Although we believe that these sources are reliable, we do not guarantee the accuracy or completeness of this information, and we have not independently verified this information.

Table of Contents**PROSPECTUS SUMMARY**

The following summary highlights selected information about this exchange offer. It may not contain all the information that is important to you. For a more complete understanding of this exchange offer, we encourage you to read this entire document and the documents we incorporate by reference into this prospectus. Unless indicated otherwise, the term "notes" refers to both the old notes and the new notes.

Our Company

We manufacture, recycle, market and distribute steel and metal products and related materials and services through a network of locations located throughout the United States and internationally. Steel and steel-related products represent over 75% of our business. We consider our business to be organized into three segments: manufacturing, recycling and marketing and distribution. During the fiscal year ended August 31, 2003, we derived approximately 36% of our adjusted operating profit from our manufacturing segment, approximately 26% from our recycling segment and approximately 38% from our marketing and distribution segment.

Our management uses a non-GAAP measure, adjusted operating profit, to compare and evaluate the financial performance of our segments. Adjusted operating profit, as presented below and used in this prospectus, is the sum of our earnings before income taxes and financing costs. In the following table we are providing a reconciliation of the non-GAAP measure, adjusted operating profit (loss), to net earnings (loss) (in thousands):

Segment	Manufacturing	Recycling	Marketing and Distribution	Corporate and Eliminations	Total
Three months ended November 30, 2003:					
Net earnings (loss)	\$12,509	\$3,868	\$4,919	\$(8,668)	\$12,628
Income taxes	7,745	1,846	1,271	(3,477)	7,385
Interest expense	30	1	47	5,016	5,094
Discounts on sales of accounts receivable	41	19	30	26	116
Adjusted operating profit (loss)	<u>\$20,325</u>	<u>\$5,734</u>	<u>\$6,267</u>	<u>\$(7,103)</u>	<u>\$25,223</u>

Segment	Manufacturing	Recycling	Marketing and Distribution	Corporate and Eliminations	Total
Year ended August 31, 2003:					
Net earnings (loss)	\$13,557	\$10,006	\$15,529	\$(20,188)	\$18,904

Edgar Filing: COMMERCIAL METALS CO - Form S-4

Income taxes	6,477	5,104	4,753	(4,844)	11,490
Interest expense	130	5	1,313	13,890	15,338
Discounts on sales of accounts receivable	201	91	189	103	584
	<u> </u>	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Adjusted operating profit (loss)	\$20,365	\$15,206	\$21,784	\$(11,039)	\$46,316
	<u> </u>	<u> </u>	<u> </u>	<u> </u>	<u> </u>

We were incorporated in 1946 in the State of Delaware. Our predecessor company, a secondary metals recycling business, has existed since approximately 1915. We maintain our executive offices at 6565 N. MacArthur Boulevard, Suite 800, Irving, Texas 75039, telephone (214) 689-4300. Our website address is *www.commercialmetals.com*. The information on our website does not constitute part of this prospectus. Our fiscal year ends August 31 and all references to years in this prospectus refer to the fiscal year ended August 31 of that year unless otherwise noted.

Table of Contents

The Exchange Offer

The Exchange Offer	We are offering to exchange the new notes for the old notes that are properly tendered and accepted. You may tender old notes only in denominations of \$1,000 and multiples of \$1,000. We will issue the new notes on or promptly after the exchange offer expires. As of the date of this prospectus, \$200,000,000 principal amount of old notes is outstanding.
Expiration Date	The exchange offer will expire at 5:00 p.m., Eastern Standard time, on _____, 2004, unless extended, in which case the expiration date will mean the latest date and time to which we extend the exchange offer; provided, however, that the maximum period of time during which the exchange offer, including any extension thereof, may be in effect will not exceed 45 days.
Conditions to the Exchange Offer	The exchange offer is not subject to any condition other than that it not violate applicable law or any applicable interpretation of the staff of the SEC. The exchange offer is not conditioned upon any minimum principal amount of old notes being tendered for exchange.
Procedures for Tendering Old Notes	<p>If you wish to tender your old notes for new notes pursuant to the exchange offer, you must transmit to JP Morgan Chase Bank, as exchange agent, on or before the expiration date, either:</p> <ul style="list-style-type: none">a computer generated message transmitted through The Depository Trust Company's automated tender offer program system and received by the exchange agent and forming a part of a confirmation of book-entry transfer in which you acknowledge and agree to be bound by the terms of the letter of transmittal; ora properly completed and duly executed letter of transmittal, which accompanies this prospectus, or a facsimile of the letter of transmittal, together with your old notes (which may be delivered by book-entry transfer through the facilities of The Depository Trust Company) and any other required documentation, to the exchange agent at its address listed in this prospectus and on the front cover of the letter of transmittal. <p>If you cannot satisfy either of these procedures on a timely basis, then you should comply with the guaranteed delivery procedures described below. By executing the letter of transmittal, you will make the representations to us described under The Exchange Offer-Procedures for Tendering.</p>
Special Procedures for Beneficial Owners	If you are a beneficial owner whose old notes are registered in the name of a broker, dealer, commercial bank, trust company or other nominee and you wish to tender your old notes in the exchange offer, you should contact the registered

holder promptly and instruct the registered holder to tender on your behalf. If you wish to tender on your own behalf, you must either (1) make appropriate arrangements to register ownership of the old notes in your name or (2) obtain a properly completed bond power from the registered holder before completing and executing the letter of transmittal and delivering your old notes.

Table of Contents

Guaranteed Delivery Procedures	If you wish to tender your old notes and time will not permit the documents required by the letter of transmittal to reach the exchange agent before the expiration date, or the procedure for book-entry transfer cannot be completed on a timely basis, you must tender your old notes according to the guaranteed delivery procedures described in this prospectus under the heading The Exchange Offer-Guaranteed Delivery Procedures.
Acceptance of the Old Notes and Delivery of the New Notes	Subject to the satisfaction or waiver of the conditions to the exchange offer, we will accept for exchange any and all old notes which are validly tendered in the exchange offer and not withdrawn before 5:00 p.m., Eastern Standard time, on the expiration date. We will deliver the new notes on or promptly after the expiration date.
Withdrawal Rights	You may withdraw the tender of your old notes at any time before 5:00 p.m., Eastern Standard time, on the expiration date, by complying with the procedures for withdrawal described in this prospectus under the heading The Exchange Offer-Withdrawal of Tenders.
Material U.S. Federal Tax Considerations	The exchange of notes will not be a taxable event for United States federal income tax purposes. For a discussion of certain federal tax considerations relating to the exchange of notes, see Material U.S. Federal Income Tax Considerations.
Exchange Agent	JP Morgan Chase Bank, the trustee under the indenture governing the old notes and the new notes, is serving as the exchange agent.
Consequences of Failure to Exchange	If you do not exchange your old notes for new notes, you will continue to be subject to the restrictions on transfer provided in the old notes and in the indenture governing the old notes. In general, the old notes may not be offered or sold, unless registered under the Securities Act, except pursuant to an exemption from, or in a transaction not subject to, the Securities Act and applicable state securities laws. We do not currently plan to register the resale of the old notes under the Securities Act.
Registration Rights Agreement	We issued \$200,000,000 aggregate principal amount of the old notes on November 12, 2003 to Goldman, Sachs & Co., Banc of America Securities LLC, ABN AMRO Incorporated and Tokyo-Mitsubishi International plc, the initial purchasers. Simultaneously with the sale of the old notes, we entered into a registration rights agreement that provides for, among other things, this exchange offer. You are entitled to exchange your old notes for new notes with substantially identical terms. This exchange offer satisfies that right. After the exchange offer is completed, you will no longer be entitled to any exchange or registration rights with respect to your old notes.

Table of Contents**The New Notes**

The summary below describes the principal terms of the new notes. Certain of the terms and conditions described below are subject to important limitations and exceptions. The Description of Notes section of this prospectus contains a more detailed description of the terms of the new notes.

The form and terms of the new notes are the same as the form and terms of the old notes, except that the new notes will be registered under the Securities Act and, therefore, the new notes will not generally be subject to the transfer restrictions, registration rights and provisions providing for an increase in the interest rate applicable to the old notes. The new notes will evidence the same debt as the old notes and will be governed by the same indenture as the old notes.

Issuer	Commercial Metals Company.
Notes	\$200,000,000 of 5.625% Senior Notes due 2013.
Maturity	November 15, 2013.
Ranking	The notes are our senior unsecured obligations and rank equally in right of payment with all of our existing and future senior unsecured indebtedness and senior to all our existing and future subordinated debt. The notes rank junior to any of our secured debt to the extent of the assets securing such debt. In addition, the notes are structurally subordinated to all liabilities of our subsidiaries, including trade payables.
Interest Payment Dates	May 15 and November 15 of each year, beginning May 15, 2004.
Sinking Fund	None.
Optional Redemption	We may redeem the notes, in whole or in part, at any time and from time to time at the redemption price described under the heading Description of Notes-Optional Redemption.
Additional Issuances	We may from time to time, without notice to or the consent of the holders of any series of notes issued under the indenture, create and issue additional notes ranking equally and ratably with the notes of those series.
DTC Eligibility	The new notes will be issued in book-entry form and will be represented by one or more permanent global certificates deposited with a custodian for and registered in the name of a nominee of The Depository Trust Company, or DTC, in New York, New York. Beneficial interests in any such securities will be shown on, and transfers will be effected only through, records maintained by DTC and its direct and indirect participants. Any such interest may not be exchanged for certificated securities, except in limited circumstances. See Description of Notes-Book-Entry System.

Use of Proceeds

We will not receive any proceeds from the exchange offer.

Table of Contents

Risk Factors

We urge you to read the Risk Factors section beginning on page 8 of this prospectus so that you understand the risks associated with an investment in the new notes.

Table of Contents**Summary Consolidated Financial Information and Other Data**

The summary income statement data and balance sheet data presented below are for the three months ended November 30, 2003 and 2002 and for the years ended August 31, 2003, 2002, 2001, 2000 and 1999 and as of November 30, 2003 and August 31, 2003, 2002, 2001, 2000 and 1999. The per share amounts have been adjusted to reflect a two-for-one stock split in the form of a stock dividend on our common stock effective June 28, 2002. In 2002, as reported in our Annual Report on Form 10-K for the year ended August 31, 2002, as amended, we restated the financial statements. The following information should be read in conjunction with the section Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and related notes incorporated by reference in this prospectus.

	Three Months Ended November 30,		Year Ended August 31,				
	2003	2002	2003	2002	2001	2000	1999
	(in millions, except per share data)

Cash dividends paid per common share	\$0.08	\$0.08	\$ 0.32	\$0.275	\$ 0.26	\$ 0.26	\$ 0.26
--------------------------------------	--------	--------	---------	---------	---------	---------	---------

	Three Months Ended November 30,		Year Ended August 31,				
	2003	2002	2003	2002	2001	2000	1999
	(in millions, except ratios)						
Other Financial Data:							
EBITDA (1)	\$40.2	\$22.7	\$106.9	\$143.4	\$133.3	\$164.6	\$146.5
Ratio of earnings to fixed charges (2)	4.20	1.73	2.57	3.77	2.19	3.25	3.60
Ratio of EBITDA to interest expense	7.9	5.7	7.0	7.7	4.8	6.0	7.5
Ratio of total debt to EBITDA(3)	2.3	2.8	2.5	1.8	2.0	2.2	2.0

	November 30,	August 31,				
	2003	2003	2002	2001	2000	1999
	(in millions)					

Balance Sheet Data (at end of period):

Cash and cash equivalents (4)	\$ 133.5	\$ 75.1	\$ 124.4	\$ 56.0	\$ 20.1	\$ 44.7
Total assets	\$1,419.3	\$1,275.4	\$1,230.1	\$1,081.9	\$1,170.1	\$1,079.1
Long-term debt (5)	\$ 362.4	\$ 255.0	\$ 256.0	\$ 251.6	\$ 261.9	\$ 265.6
Total debt (5)	\$ 375.0	\$ 270.6	\$ 256.6	\$ 265.7	\$ 363.2	\$ 289.8
Stockholders equity	\$ 528.5	\$ 506.9	\$ 501.3	\$ 433.1	\$ 418.8	\$ 418.3

- (1) We have included a financial statement measure in the table above that was not derived in accordance with generally accepted accounting principles (GAAP). Earnings before interest expense, income taxes, depreciation and amortization, or EBITDA, is a non-GAAP liquidity measure. In calculating EBITDA, we exclude our largest recurring non-cash charge, depreciation and amortization. We use EBITDA as one guideline to assess our ability to pay our current debt obligations as they mature and a tool to calculate possible future levels of leverage capacity. Reconciliations to net earnings are provided below.

Table of Contents

	Three Months Ended November 30,		Year Ended August 31,				
	2003	2002	2003	2002	2001	2000	1999
	(in millions)						
Net earnings	\$ 12.6	\$ 2.2	\$ 18.9	\$ 40.5	\$ 23.8	\$ 44.6	\$ 47.0
Interest expense	5.1	4.0	15.3	18.7	27.6	27.3	19.6
Income taxes	7.4	1.3	11.5	22.6	14.6	26.1	27.8
Depreciation and amortization	15.1	15.2	61.2	61.6	67.3	66.6	52.1
EBITDA	<u>\$40.2</u>	<u>\$22.7</u>	<u>\$106.9</u>	<u>\$143.4</u>	<u>\$133.3</u>	<u>\$164.6</u>	<u>\$146.5</u>

- (2) For the purposes of calculating the ratio of earnings to fixed charges, earnings represents earnings before income taxes, interest expense, interest imputed on rent and amortization of capitalized interest. Fixed charges include interest expense, interest capitalized and the portion of operating rental expense that management believes is representative of the appropriate interest component of rent expense.
- (3) EBITDA for the quarters ended November 30, 2003 and 2002 has been annualized for purposes of calculating the ratio. Quarterly results are not necessarily indicative of results to be expected for the entire year.
- (4) Subsequent to November 30, 2003, we (a) used \$51.9 million cash to purchase 71.1% of the shares of Huta Zawiercie, (b) used \$48.8 million cash in connection with the Lofland acquisition and (c) acquired \$4.8 million in cash in connection with the Huta acquisition.
- (5) Subsequent to November 30, 2003, we assumed \$46.7 million in debt upon the acquisition of Huta Zawiercie SA.

Table of Contents

RISK FACTORS

There are many risks that may affect your investment in the new notes, including those described below. You should carefully consider these risk factors together with all of the other information included in this prospectus and the documents we have incorporated by reference into this prospectus, including our financial statements and related notes and schedules. The risks described below are not the only risks facing us. Additional risks and uncertainties not currently known to us or those we currently deem to be immaterial may also materially and adversely affect our business, financial condition, results of operations or cash flows and our ability to make payment obligations on the new notes. If any of these risks actually occur, our business, financial condition, results of operations or cash flows could be materially adversely affected and you may lose all or part of your investment.

Risks Related to Our Industry

Excess capacity in our industry adversely affects prices and margins.

Global steel-making capacity exceeds global demand for steel products. In many foreign countries steel production greatly exceeds domestic demand and these countries must export substantial amounts of steel in order to maintain high employment and production levels. Accordingly, steel manufacturers in these countries have traditionally exported steel at prices that are significantly below their home market prices. The high level of imports into the United States over the last few years has severely depressed domestic steel prices. Furthermore, this vast supply of imports can decrease the sensitivity of domestic steel prices to increases in demand. This surge of low priced imports, coupled with increases in the cost of ferrous scrap and the rise in energy prices, has resulted in an erosion of our gross margins.

In light of President Bush's decision to rescind duties and tariffs, steel imports into the U.S. may again rise or domestic prices may fall, which would adversely affect our sales, margins and profitability.

In recent history, the United States has been an importer of steel products. From 1987 until 1998, less than 20% of the domestic supply was imported. However, with the cumulative effect of various economic crises, including economic weakness in Asia, Russia and Latin America, foreign producers have looked to the United States as the country with the healthiest economy, the strongest currency and as the buyer of first resort. In addition, foreign governments that own steel production facilities have sought to increase output. Consequently, commencing in 1997 foreign steel products began to flood the domestic market. As a result, imports accounted for approximately 26% of domestic steel consumption in 1998 and remained above 20% through 2002.

In 2000, our mini-mills joined other steel manufacturers in an antidumping petition filed with the United States International Trade Commission, called the ITC. The ITC determined that there was a reasonable indication of material or threatened injury to U.S. rebar manufacturers, such as us, due to unfairly priced imports of rebar from several foreign countries. In the spring of 2001, the U.S. Department of Commerce determined that dumping of rebar from eight countries had occurred, and the ITC reached a final determination that dumped imports were causing material injury to our industry. As a result, penalty duties, initially ranging from 17% to 232%, were imposed. Although adjusted annually as a result of review investigations by the Department of Commerce, dumping duties are normally in effect for five years and may be extended if, after five years, the ITC determines that removal of the duties would lead to a recurrence of injury. We benefit from these duties. If these duties are subsequently modified or reduced by the Department of Commerce, our sales, margins and profitability may decrease.

In 2001, President Bush instituted an investigation under Section 201 of the Trade Act of 1974 to determine if increased imports of selected steel products into the United States were an actual or

Table of Contents

threatened cause of serious injury to domestic manufacturers of steel products. The ITC, in October 2001, found that U.S. steel producers had been seriously injured by these imports and, in December 2001, recommended remedies to President Bush. In March 2002, President Bush announced three-year safeguard tariffs that cover the majority of our mini-mills products, ranging from 15% to 30% for the first year and declining over the next two years. Excluded from the tariffs were imports from Mexico and Canada as well as imports from developing countries identified by the World Trade Organization. These tariffs, which were applied in addition to the antidumping duties, were further strengthened by an import licensing and monitoring system and an anti-surge mechanism that have been implemented to monitor foreign trade activities in the applicable products.

We benefited from President Bush's decision. However, several foreign governments appealed President Bush's decision to the World Trade Organization. In response, the World Trade Organization ruled against these tariffs. The United States government further appealed this adverse ruling; however, the World Trade Organization ruled against the U.S. appeal in November 2003. On December 4, 2003, President Bush rescinded the steel safeguard tariffs effective immediately. The rescission of the steel safeguard tariffs could result in a resurgence of steel imports, even though the antidumping duties on imports of rebar from several countries imposed by the ITC in 2001 were not changed by this decision. A surge in imports would put downward pressure on steel prices, which would have a negative impact on our sales, margins and profitability.

Our industry is affected by cyclical and regional factors.

Many of our products are commodities subject to cyclical fluctuations in supply and demand in metal consuming industries. Periods of economic slowdown or a recession in the United States, or the public perception that a slowdown or recession may occur, could decrease the demand for our products and adversely affect our business. Our overall financial results will be dependent substantially upon the extent to which conditions in both the United States and global economies improve. A slower than expected recovery or another recession will further adversely affect our financial results. Our geographic concentration in the southern and southwestern United States as well as areas of Europe, Australia and China exposes us to the local market conditions in these regions. Economic downturns in these areas or decisions by governments that have an impact on the level and pace of overall economic activity could adversely affect our sales and profitability.

Our business supports cyclical industries such as commercial and residential construction, energy, service center, petrochemical and original equipment manufacturing. These industries experience significant fluctuations in demand for our products based on economic conditions, energy prices, consumer demand and decisions by governments to fund infrastructure projects such as highways, schools, energy plants and airports. Many of these factors are beyond our control. As a result of the volatility in the industries we serve, we may have difficulty increasing or maintaining our level of sales or profitability. If the industries we serve suffer a prolonged downturn, then our business may be adversely affected.

Our industry is characterized by low backlogs, which means that our results of operations are promptly affected by short-term economic fluctuations.

Table of Contents

Compliance with and changes in various environmental requirements and environmental risks applicable to our industry may adversely affect our results of operations and financial condition.

Existing laws or regulations, as currently interpreted or reinterpreted in the future, or future laws or regulations, may have a material adverse effect on our results of operations and financial condition. Compliance with environmental laws and regulations is a significant factor in our business. We are subject to local, state, federal and international environmental laws and regulations concerning, among other matters, waste disposal, air emissions, waste and storm water effluent and disposal and employee health. Our manufacturing and recycling operations produce significant amounts of by-products, some of which are handled as industrial waste or hazardous waste. For example, our mini-mills generate electric arc furnace dust, or EAF dust, which the United States Environmental Protection Agency, or the EPA, and other regulatory authorities classify as hazardous waste. EAF dust requires special handling, recycling or disposal.

In addition, the primary feed materials for the eight shredders operated by our scrap metal recycling facilities are automobile hulks and obsolete household appliances. Approximately 20% of the weight of an automobile hulk consists of unrecyclable material known as shredder fluff. After the segregation of ferrous and saleable non-ferrous metals, shredder fluff remains. Federal and state environmental regulations require shredder fluff to pass a toxic leaching test to avoid classification as a hazardous waste. We endeavor to remove hazardous contaminants from the feed material prior to shredding. As a result, we believe the shredder fluff we generate is not hazardous waste. If the laws, regulations or testing methods change with regard to EAF dust or shredder fluff, we may incur additional significant expenditures.

Although we believe that we are in substantial compliance with all applicable laws and regulations, legal requirements are changing frequently and are subject to interpretation. New laws, regulations and changing interpretations by regulatory authorities, together with uncertainty regarding adequate pollution control levels, testing and sampling procedures, new pollution control technology and cost benefit analysis based on market conditions are all factors that may increase our future expenditures to comply with environmental requirements. Accordingly, we are unable to predict the ultimate cost of future compliance with these requirements or their effect on our operations. We cannot predict whether such costs can be passed on to customers through product price increases.

We may also be required to clean up additional sites than we already are or take certain remediation action with regard to sites formerly used in connection with our operations. We may be required to pay for a portion of the costs of clean up or remediation at sites we never owned or on which we never operated if we are found to have arranged for treatment or disposal of hazardous substances on the sites.

Risks Related to Our Company

We may have difficulty competing with companies that have a lower cost structure than ours.

We compete with regional, national and foreign manufacturers and traders. Some of these competitors are larger, have greater financial resources and more diverse businesses than us. Some of our foreign competitors may be able to pursue business opportunities without regard for the laws and regulations with which we must comply, such as environmental regulations. These companies may have a lower cost structure, more operating flexibility and consequently they may be able to offer better prices and more services than we can. We cannot assure you that we will be able to compete successfully with these companies.

Table of Contents

Furthermore, over the past few years, many integrated domestic steel producers and secondary metal recyclers have entered bankruptcy proceedings. While in bankruptcy proceedings, these companies can forgo certain costs, giving them a competitive advantage. The companies that reorganize and emerge from bankruptcy often have more competitive capital cost structures. In addition, asset sales by these companies during the reorganization process tend to be at depressed prices, which enable the purchasers to acquire greater capacity at lower cost.

Fluctuations in the value of the United States dollar and weakness in foreign economies may adversely affect our business.

Fluctuations in the value of the dollar can be expected to affect our business. The U.S. dollar, when strong, makes imported metal products less expensive, resulting in more imports of steel products into the U.S. by our foreign competitors. Weakness in foreign economies compared to the U.S., such as Eastern Europe, Asia and Latin America, may increase competition from foreign producers. Economic difficulties in these regions may result in lower local demand for steel products and may encourage greater steel exports to the U.S. at depressed prices. As a result, those of our products that are made in the U.S., may become relatively more expensive as compared to imported steel, which has had and in the future could have a negative impact on our sales, revenues and profitability.

The U.S. dollar, when strong, hampers our international marketing and distribution business. Weak local currencies limit the amount of U.S. dollar denominated products that we can import for our international operations and limits our ability to be competitive against local producers selling in local currencies.

Our steel mini-mill business requires continuous capital investments that we may not be able to sustain.

We must make regular substantial capital investments in our steel mini-mills to lower production costs and remain competitive. We cannot be certain that we will have sufficient internally generated cash or acceptable external financing to make necessary substantial capital expenditures in the future. The availability of external financing depends on many factors outside of our control, including capital market conditions and the overall performance of the economy. If funding is insufficient, we may be unable to develop or enhance our mini-mills, take advantage of business opportunities and respond to competitive pressures.

Scrap and other supplies for our businesses are subject to significant price fluctuations, which may adversely affect our business.

We depend on obsolete steel and non-ferrous metals, called scrap, and other supplies for our businesses. Although the scrap and other supplies may be sufficient to meet our future needs, the prices of scrap and other supplies have historically fluctuated greatly. Our future profitability will be adversely affected if we are unable to pass on higher material costs to our customers. We may not be able to adjust our product prices, especially in the short-term, to recover the costs of increases in material prices.

For example, we depend on the ready availability of scrap as feedstock for our mini-mills. Although we believe that the supply of scrap is adequate to meet future needs, the price of scrap has historically been subject to significant fluctuation. Also, the raw material used in manufacturing copper tubing is copper scrap, supplemented occasionally by virgin copper ingot. Copper scrap has generally been readily available, and a small portion of our copper scrap comes from our metal recycling yards. However, copper scrap is subject to rapid price fluctuations related to the price and supply of virgin copper. Price increases for high quality copper scrap could adversely affect our business. Finally, our Arkansas mill

Table of Contents

does not have melting capacity, so it is dependent on an adequate supply of competitively priced used rail. The availability of used rail fluctuates with the pace of railroad abandonments, rail replacement by railroads and demand for used rail from domestic and foreign rail rerolling mills. Price increases for used rail could adversely affect our business.

Our mini-mills consume large amounts of electricity and natural gas, and shortages or increases in the price of electricity and natural gas could adversely affect our business.

The successful operation of our mini-mills depends on an uninterrupted supply of electricity. Accordingly, we are at risk in the event of an energy disruption. The electricity industry recently has been adversely affected by shortages and price volatility in regions outside of the locations of our mini-mills. Prolonged black-outs or brown-outs would substantially disrupt our production. Any such disruptions could adversely affect our operating results. Electricity prices can be volatile and increases would have an adverse effect on the costs of operating our mini-mills.

Demand for natural gas depends primarily upon the worldwide number of natural gas wells being drilled, completed and re-worked and the depth and drilling conditions of these wells. The level of these activities is primarily dependent on current and anticipated natural gas prices. Many factors, such as the supply and demand for natural gas, general economic conditions, political instability or armed conflict in worldwide natural gas producing regions and global weather patterns affect these prices.

We purchase most of our electricity and natural gas requirements in local markets for relatively short periods of time. As a result, fluctuations in energy prices can have an adverse effect on the costs of operating our mini-mills.

Unexpected equipment failures may lead to production curtailments or shutdowns.

Interruptions in our production capabilities will adversely affect our production costs, steel available for sales and earnings for the affected period. In addition to equipment failures, our facilities are also subject to the risk of catastrophic loss due to unanticipated events such as fires, explosions or violent weather conditions. Our manufacturing processes are dependent upon critical pieces of steel-making equipment, such as our furnaces, continuous casters and rolling equipment, as well as electrical equipment, such as transformers, and this equipment may, on occasion, be out of service as a result of unanticipated failures. We have experienced and may in the future experience material plant shutdowns or periods of reduced production as a result of such equipment failures.

The availability of insurance coverage and increased cost may adversely affect profitability.

After the events of September 11, 2001, several high profile corporate bankruptcies and the downturn in the investment markets, insurance companies tightened coverages and dramatically increased premium costs. Many insurers no longer offer certain coverages and the remaining carriers have in many instances reduced the liability they are willing to insure while raising the cost. Our profitability could be adversely affected when we renew our insurance policies due to the additional insurance expense as well as the greater exposure to risk caused by reduced coverage.

Hedging transactions may limit our potential gains or expose us to loss.

Our product lines and worldwide operations expose us to risks associated with fluctuations in foreign currency exchange, commodity prices and interest rates. As part of our risk management program, we use financial instruments, including commodity futures or forwards, foreign currency exchange forward

Table of Contents

contracts and interest rate swaps. While intended to reduce the effects of the fluctuations, these transactions may limit our potential gains or expose us to loss.

We enter into foreign currency exchange forwards as economic hedges of trade commitments or anticipated commitments denominated in currencies other than the functional currency, to mitigate the effects of changes in currency rates. Although we do not enter into these instruments for trading purposes or speculation, and although our management believes all of these instruments are economically effective as hedges of underlying physical transactions, these foreign exchange commitments are dependent on timely performance by our counterparties. Their failure to perform could result in our having to close these hedges without the anticipated underlying transaction and could result in losses if foreign currency exchange rates have changed.

Rising interest rates may increase our borrowing costs and dampen economic activity resulting in lower sales, margins and profitability.

Our short-term financing sources include primarily the commercial paper market, the sale of certain of our accounts receivable and borrowings from banks. We also have swapped our fixed-rate interest obligation on \$100 million of debt due in 2005 for a floating rate obligation. If interest rates rise, our cost of short-term borrowing will increase and lower our profitability. Higher interest rates may also adversely affect some of the markets for our products, such as housing and commercial construction, resulting in a lower level of sales, margins and profitability.

We are involved and may in the future become involved in various environmental matters that may result in fines, penalties or judgments being assessed against us or liability imposed upon us which we cannot presently estimate or reasonably foresee and which may have a material impact on our earnings and cash flows.

Under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, called CERCLA, or similar state statutes, we may have obligations to conduct investigation and remediation activities associated with alleged releases of hazardous substances or to reimburse the EPA (or state agencies as applicable) for such activities and to pay for natural resource damages associated with alleged releases. We have been named a potentially responsible party at fourteen federal and state Superfund sites because the EPA or an equivalent state agency contends that we and other potentially responsible scrap metal suppliers are liable for the cleanup of those sites as a result of having sold scrap metal to unrelated manufacturers for recycling as a raw material in the manufacture of new products. We are involved in litigation or administrative proceedings with regard to several of these sites in which we are contesting, or at the appropriate time may contest, our liability at the sites. In addition, we have received information requests with regard to other sites which may be under consideration by the EPA as potential CERCLA sites.

Although we are unable to estimate precisely the ultimate dollar amount of exposure to loss in connection with various environmental matters or the effect on our consolidated financial position, we make accruals as warranted. Due to inherent uncertainties, including evolving remediation technology, changing regulations, possible third-party contributions, the inherent shortcomings of the estimation process, the uncertainties involved in litigation and other factors, the amounts we accrue could vary significantly from the amounts we ultimately are required to pay.

Table of Contents

An inability to fully and effectively integrate acquisitions, including the Huta Zawiercie S.A. and Lofland Company acquisitions, could result in increased costs while diverting management's attention from our core operations, and we cannot assure you that we will realize their full benefits or successfully manage our combined company, and future acquisitions may result in dilutive equity issuances or increases in debt.

On December 3, 2003, our subsidiary Commercial Metals (International) AG purchased 71.1% of the shares of Huta Zawiercie S.A., the third largest producer of steel in Poland, from Impexmetal S.A. of Warsaw, Poland. We used approximately \$47.1 million of the net proceeds (net of cash received) from the offering of the old notes to fund this acquisition. We also assumed approximately \$46.7 million in debt in connection with the acquisition. On December 23, 2003, we acquired 100% of the stock of Lofland Acquisition, Inc. (Lofland), the sole stockholder of the Lofland Company and subsidiaries, which operate steel reinforcing bar fabrication and construction-related products sales facilities from 11 locations in Texas, Arkansas, Louisiana, Oklahoma, New Mexico and Mississippi. We used approximately \$48.8 million of the net proceeds of the old notes to fund this acquisition. Also, as part of our ongoing business strategy we regularly evaluate and may pursue acquisitions of and investments in complementary companies. We cannot assure you that we will be able to fully or successfully integrate any pending or future acquisitions in a timely manner or at all. If we are unable to successfully integrate acquisitions, we may incur costs and delays or other operational, technical or financial problems, any of which could adversely affect our business. In addition, management's attention may be diverted from core operations which could harm our ability to timely meet the needs of our customers and damage our relationships with those customers. To finance future acquisitions, we may need to raise funds either by issuing equity securities or incurring or assuming debt. If we incur additional debt, the related interest expense may significantly reduce our profitability.

We are subject to litigation which could adversely affect our profitability.

We are involved in various litigation matters, including regulatory proceedings, administrative proceedings, governmental investigations, environmental matters and construction contract disputes. The nature of our operations also expose us to possible litigation claims in the future. Although we make every effort to avoid litigation, these matters are not totally within our control. We will contest these matters vigorously and have made insurance claims where appropriate, but because of the uncertain nature of litigation and coverage decisions, we cannot predict the outcome of these matters. These matters could have a material adverse effect on our financial condition and profitability. Litigation is very costly, and the costs associated with prosecuting and defending litigation matters could have a material adverse effect on our financial condition and profitability. Although we are unable to estimate precisely the ultimate dollar amount of exposure to loss in connection with litigation matters, we make accruals as warranted. However, the amounts that we accrue could vary significantly from the amounts we actually pay, due to inherent uncertainties and the inherent shortcomings of the estimation process, the uncertainties involved in litigation and other factors.

We depend on our senior management team and the loss of any member could adversely affect our operations.

Our success is dependent on the management and leadership skills of our senior management team, including Stanley A. Rabin, our chairman of the board. If we lose any of these individuals or fail to attract and retain equally qualified personnel, then we may not be able to implement our business strategy. We have not entered into employment agreements with any of our senior management personnel other than Murray R. McClean, president of our marketing and distribution division.

Table of Contents

Some of our customers may default on the debts they owe to us.

Economic conditions are not consistent in all the markets we serve. Some segments are still weak, and our customers may struggle to meet their obligations, especially if a significant customer of theirs defaults. We recorded a \$5.2 million provision in fiscal 2003 for losses on receivables due to weakness in the domestic and global economies, which increased our allowance for collection losses to \$9.3 million. Other factors such as management and accounting irregularities have forced some companies into bankruptcy. A weak economic recovery and corporate failures could result in higher bad debt costs.

Risks Related to Our Indebtedness

We have substantial debt and have the ability to incur additional debt. The principal and interest payment obligations of our debt may restrict our future operations and impair our ability to meet our obligations under the new notes.

As of November 30, 2003, we had approximately \$375 million of outstanding indebtedness, \$528 million in stockholders' equity, and our debt to equity ratio was 42%. Subsequent to November 30, 2003, we assumed \$46.7 million in debt upon the acquisition of Huta Zawiercie, SA. In addition, the indenture governing the new notes will permit us to incur additional debt. See Description of Notes.

The amount of our debt may have important consequences to you. For instance, it could:

make it more difficult for us to satisfy our financial obligations, including those relating to the new notes;

require us to dedicate a substantial portion of our cash flow from operations to the payment of interest and principal due under our debt, including the new notes, which will reduce funds available for other business purposes;

increase the risk of a ratings downgrade, increasing our cost of financing and limiting our access to capital markets;

increase the risk of a default of certain loan covenants, restricting our use of cash and financing alternatives;

increase our vulnerability to general adverse economic and industry conditions;

limit our flexibility in planning for, or reacting to, changes in our business and the industries in which we operate;

place us at a competitive disadvantage compared with some of our competitors that have less debt; and

limit our ability to obtain additional financing required to fund working capital and capital expenditures, mergers and acquisitions and for other general corporate purposes.

Our ability to satisfy our obligations and to reduce our total debt depends on our future operating performance and on economic, financial, competitive and other factors, many of which are beyond our control. Our business may not generate sufficient cash flow, and future financings may not be available to provide sufficient net proceeds, to meet these obligations or to successfully execute our business strategy.

Table of Contents

Credit ratings affect our ability to obtain financing and the cost of such financing.

Credit ratings affect our ability to obtain financing and the cost of such financing. Our commercial paper program is ranked in the second highest category by Moody's Investors Service (P-2) and Standard & Poor's Corporation (A-2). Our senior unsecured debt is investment grade rated by Standard & Poor's Corporation (BBB) and Moody's Investors Service (Baa2). On November 5, 2003, Moody's Investors Service downgraded our debt from Baa1 to Baa2 but changed its outlook from negative to stable. In determining our credit ratings, the rating agencies consider a number of both quantitative and qualitative factors. These factors include earnings, fixed charges such as interest, cash flows, total debt outstanding, off balance sheet obligations and other commitments, total capitalization and various ratios calculated from these factors. The rating agencies also consider predictability of cash flows, business strategy, industry conditions and contingencies. Lower ratings on our commercial paper program or our senior unsecured debt could impair our ability to obtain additional financing and will increase the cost of the financing that we do obtain.

The agreements governing the new notes and our other debt contain financial covenants and impose restrictions on our business.

The indenture governing our 7.20% notes due 2005, 6.80% notes due 2007, 6.75% notes due 2009 and the old notes contains restrictions on our ability to create liens, sell assets, enter into sale and leaseback transactions and consolidate or merge. The new notes will be issued under the same indenture and will also be subject to these covenants. In addition, our credit facility contains covenants that place restrictions on our ability to, among other things:

create liens;

enter into transactions with affiliates;

sell assets;

in the case of some of our subsidiaries, guarantee debt; and

consolidate or merge.

Our credit facility also requires us to meet certain financial tests and maintain certain financial ratios, including a maximum debt to capitalization and interest coverage ratios. Other agreements that we may enter into in the future may contain covenants imposing significant restrictions on our business that are similar to, or in addition to, the covenants under our existing agreements. These restrictions may affect our ability to operate our business and may limit our ability to take advantage of potential business opportunities as they arise.

Our ability to comply with these covenants may be affected by events beyond our control, including prevailing economic, financial and industry conditions. The breach of any of these restrictions could result in a default under the indenture governing the new notes or under our other debt agreements. An event of default under our debt agreements would permit some of our lenders to declare all amounts borrowed from them to be due and payable, together with accrued and unpaid interest. If we were unable to repay debt to our secured lenders if we incur secured debt in the future, these lenders could proceed against the collateral securing that debt. In addition, acceleration of our other indebtedness may cause us to be unable to make interest payments on the new notes.

Table of Contents

Risks Related to the New Notes

The new notes will be effectively subordinated to our secured debt.

Our obligations under the new notes are unsecured. As a result, the new notes will be effectively subordinated to any secured debt we incur in the future to the extent of the collateral securing that debt. As of November 30, 2003, we had no secured debt outstanding and our credit facilities were unsecured. We may, however, in the future issue secured debt. If we have secured debt in the future and are not able to repay amounts due under the terms of the secured debt, the holders of the secured debt could proceed against the collateral securing that indebtedness. In that event, any proceeds received upon a realization of the collateral securing that indebtedness would be applied first to amounts due under the terms of the secured debt before any proceeds would be available to make payments on the new notes. If we default under any secured debt, the value of the collateral on the secured debt may not be sufficient to repay both the holders of the secured debt and the holders of the new notes.

We depend in part on our subsidiaries to generate sufficient cash flow to meet our debt service obligations, including payments on the new notes.

Although Commercial Metals Company is an operating company, a substantial part of its assets consists of the capital stock or other equity interests of its subsidiaries. As a result, we depend in part on the earnings of our subsidiaries and the availability of their cash flows to us, or upon loans, advances or other payments made by these entities to us to service our debt obligations, including the new notes. The ability of these entities to pay dividends or make other payments or advances to us will depend upon their operating results and will be subject to restrictions under agreements to which we are a party and applicable laws.

Our ability and the ability of our subsidiaries to generate sufficient cash flow from operations to allow us to make scheduled payments on our debt, including the new notes, will depend on our and their future financial performance, which will be affected by a range of economic, competitive and business factors, many of which are outside of our control. If we and our subsidiaries do not generate sufficient cash flow from operations to satisfy our debt obligations, including payments on the new notes, we may have to undertake alternative financing plans, such as refinancing or restructuring our debt, selling assets, reducing or delaying capital investments or seeking to raise additional capital. We cannot assure you that any refinancing would be possible, that any assets could be sold, or, if sold, of the timing of the sales and the amount of proceeds realized from those sales, that additional financing could be obtained on acceptable terms, if at all, or that additional financing would be permitted under the terms of our various debt instruments then in effect. Our inability to generate sufficient cash flow to satisfy our debt obligations, or to refinance our obligations on commercially reasonable terms, would have an adverse effect on our business, financial condition and results of operations, as well as on our ability to satisfy our obligations on the new notes. The cash flows of our operating subsidiaries and the amount that is available to us, together with our cash flows, may not be adequate for us to service our debt obligations, including the new notes.

The new notes will be structurally subordinated to the debt and liabilities of our subsidiaries.

The new notes will not be guaranteed by our subsidiaries. Payments on the new notes are required to be made only by Commercial Metals Company. We may not have direct access to the assets of our subsidiaries unless those assets are transferred by dividend or otherwise to us. The ability of our subsidiaries to pay dividends or otherwise transfer assets to us is subject to various restrictions, including restrictions under other agreements to which we are a party and under applicable law. As a result, the

Table of Contents

new notes will be structurally subordinated to all existing and future debt and liabilities, including trade payables, of our subsidiaries.

There is no public market for the new notes, and we cannot be sure that a market for the new notes will develop.

The new notes are a new issue of securities for which there is no active trading market. If any of the new notes are traded, they may trade at a discount from the initial offering price of the old notes if the liquidity of the trading market in the new notes is limited. In addition, the liquidity of the trading market in the new notes and the market prices quoted for the new notes may be adversely affected by changes in the overall market for debt securities.

Volatile trading prices may require you to hold the new notes for an indefinite period of time.

If a market develops for the new notes, they might trade at prices higher or lower than the initial offering price of the old notes. The trading price would depend on many factors, including prevailing interest rates, the market for similar securities, general economic conditions and our financial condition, performance and prospects. Historically, the market for debt has been subject to disruptions that have caused substantial fluctuations in the prices of these securities. The market for the new notes may be subject to such fluctuations, which could have an adverse effect on the price of the new notes. You should be aware that you may be required to bear the financial risk of an investment in the new notes for an indefinite period of time.

Table of Contents

THE EXCHANGE OFFER

Purpose of the Exchange Offer

We issued \$200,000,000 aggregate principal amount of the old notes on November 12, 2003 to Goldman, Sachs & Co., Banc of America Securities LLC, ABN AMRO Incorporated and Tokyo-Mitsubishi International plc, the initial purchasers, pursuant to a purchase agreement. The initial purchasers subsequently sold the old notes to qualified institutional buyers, as defined in Rule 144A under the Securities Act, in reliance on Rule 144A. As a condition to the sale of the old notes, we entered into a registration rights agreement with the initial purchasers on November 12, 2003. Pursuant to the registration rights agreement, we agreed that we would:

- (1) file an exchange offer registration statement with the SEC on or prior to February 10, 2004;
- (2) use our reasonable best efforts to have the exchange offer registration statement declared effective by the SEC on or prior to June 9, 2004;
- (3) keep the exchange offer open for a period of not less than 30 days; and
- (4) consummate the exchange offer within 45 days after the exchange offer registration statement is declared effective.

This summary of the terms of the registration rights agreement does not contain all the information that you should consider, and we refer you to the provisions of the registration rights agreement, which has been filed as an exhibit to our Form 10-K for our fiscal year ended August 31, 2003, which is incorporated herein by reference.

Resale of the New Notes

Based upon an interpretation by the staff of the SEC contained in no-action letters issued to third parties, we believe that you may exchange your old notes for new notes in the ordinary course of business. For further information on the SEC's position, see *Exxon Capital Holdings Corporation*, available May 13, 1988, *Morgan Stanley & Co. Incorporated*, available June 5, 1991 and *Shearman & Sterling*, available July 2, 1993, and other interpretive letters to similar effect. You will be allowed to resell new notes to the public without further registration under the Securities Act and without delivering to purchasers of the new notes a prospectus that satisfies the requirements of Section 10 of the Securities Act so long as you do not participate, do not intend to participate, and have no arrangement with any person to participate, in a distribution of the new notes. However, the foregoing does not apply to you if you are a broker-dealer who purchased the new notes directly from us to resell pursuant to Rule 144A or any other available exemption under the Securities Act, or you are an affiliate of ours within the meaning of Rule 405 under the Securities Act.

In addition, if you are a broker-dealer, or you acquire new notes in the exchange offer for the purpose of distributing or participating in the distribution of the new notes, you cannot rely on the position of the staff of the SEC contained in the no-action letters mentioned above and must comply with the registration and prospectus delivery requirements of the Securities Act in connection with any resale transaction, unless an exemption from registration is otherwise available.

Each broker-dealer that receives new notes for its own account in exchange for old notes, which the broker-dealer acquired as a result of market-making activities or other trading activities, must

Table of Contents

acknowledge that it will deliver a prospectus in connection with any resale of the new notes. The letter of transmittal states that by so acknowledging and by delivering a prospectus, a broker-dealer will not be deemed to admit that it is an underwriter within the meaning of the Securities Act. A broker-dealer may use this prospectus, as it may be amended or supplemented from time to time, in connection with resales of new notes received in exchange for old notes which the broker-dealer acquired as a result of market-making or other trading activities.

Terms of the Exchange Offer

Upon the terms and subject to the conditions described in this prospectus and in the letter of transmittal, we will accept any and all old notes validly tendered and not withdrawn before the expiration date. We, through the exchange agent, will issue \$1,000 principal amount of new notes in exchange for each \$1,000 principal amount of outstanding old notes surrendered pursuant to the exchange offer. You may tender old notes only in integral multiples of \$1,000.

The form and terms of the new notes are the same as the form and terms of the old notes except that:

the new notes will be registered under the Securities Act and will not bear legends restricting their transfer;
and

holders of the new notes will not be entitled to any of the rights of holders of old notes under the registration rights agreement, which rights will terminate upon the completion of the exchange offer.

The new notes will evidence the same debt as the old notes and will be issued under the same indenture, so the new notes and the old notes will be treated as a single class of debt securities under the indenture.

As of the date of this prospectus, \$200,000,000 in aggregate principal amount of the old notes is outstanding and registered in the name of Cede & Co., as nominee for The Depository Trust Company. Only registered holders of the old notes, or their legal representatives or attorneys-in-fact, as reflected on the records of the trustee under the indenture, may participate in the exchange offer. We will not set a fixed record date for determining registered holders of the old notes entitled to participate in the exchange offer.

You do not have any appraisal or dissenters' rights under the indenture in connection with the exchange offer. We intend to conduct the exchange offer in accordance with the provisions of the registration rights agreement and the applicable requirements of the Securities Act, the Securities Exchange Act of 1934, as amended, and the rules and regulations of the SEC.

We will be deemed to have accepted validly tendered old notes when, as and if we have given oral or written notice of acceptance to the exchange agent. The exchange agent will act as your agent for the purposes of receiving the new notes from us.

If you tender old notes in the exchange offer, you will not be required to pay brokerage commissions or fees or, subject to the instructions in the letter of transmittal, transfer taxes with respect to the exchange of old notes pursuant to the exchange offer. We will pay all charges and expenses, other than the applicable taxes described below, in connection with the exchange offer.

Table of Contents

Expiration Date; Extensions; Amendments

The term expiration date will mean 5:00 p.m., Eastern Standard time, on _____, 2004, unless we, in our sole discretion, extend the exchange offer, in which case the term expiration date will mean the latest date and time to which we extend the exchange offer; provided, however, that the maximum period of time during which the exchange offer, including any extension thereof, may be in effect will not exceed 45 days. To extend the exchange offer, we will:

notify the exchange agent of any extension orally or in writing; and

mail to each registered holder an announcement that will include disclosure of the approximate number of old notes deposited to date, each before 9:00 a.m., Eastern Standard time, on the next business day after the previously scheduled expiration date. We reserve the right, in our reasonable discretion:

to delay accepting any old notes;

to extend the exchange offer; or

if any conditions listed below under -Conditions are not satisfied, to terminate the exchange offer by giving oral or written notice of the delay, extension or termination to the exchange agent.

We will follow any delay in acceptance, extension or termination as promptly as practicable by oral or written notice to the registered holders or by public announcement thereof. If we amend the exchange offer in a manner we determine constitutes a material change, we will promptly disclose the amendment in a prospectus supplement that we will distribute to the registered holders. Depending upon the significance of the amendment and the manner of disclosure, we will extend the exchange offer if the exchange offer would otherwise expire while we are disclosing the amendment to the registered holders.

Interest on the New Notes

The new notes will bear interest at the same rate and on the same terms as the old notes. Consequently, the new notes will bear interest at a rate equal to 5.625% per annum (based on a 360-day year). Interest will be payable semi-annually on each November 15 and May 15, commencing on May 15, 2004.

You will receive interest on May 15, 2004 from the date of initial issuance of the new notes, plus an amount equal to the accrued interest on the old notes from November 12, 2003 to the date of exchange. We will deem the right to receive any interest accrued on the old notes waived by you if we accept your old notes for exchange.

Procedures for Tendering

You may tender old notes in the exchange offer only if you are a registered holder of old notes. To tender in the exchange offer, a registered holder must either comply with the procedures for a manual tender or comply with the automated tender offer procedures of DTC described below under "Tendering Through DTC's Automated Tender Offer Program." To complete a manual tender, you must:

complete, sign and date the letter of transmittal or a facsimile of the letter of transmittal;

have the signatures guaranteed if required by the letter of transmittal; and

mail or otherwise deliver the letter of transmittal or the facsimile to the exchange agent at the address listed below under "Exchange Agent" for receipt before the expiration date.

Table of Contents

In addition, either:

the exchange agent must receive certificates for the old notes along with the letter of transmittal; or

the exchange agent must receive a timely confirmation of a book-entry transfer of the old notes into its account at DTC pursuant to the procedure for book-entry transfer described below before the expiration date.

If you wish to tender your old notes and cannot comply with the requirement to deliver the letter of transmittal and your old notes (including by book-entry transfer) or use the automated tender offer program of DTC before the expiration date, you must tender your old notes according to the guaranteed delivery procedures described below.

Your tender, if not withdrawn before the expiration date, will constitute an agreement between you and us in accordance with the terms and subject to the conditions described in this prospectus and in the letter of transmittal.

The method of delivery of old notes and the letter of transmittal and all other required documents to the exchange agent is at your election and risk. We recommend that instead of delivery by mail, you use an overnight or hand delivery service, properly insured. In all cases, you should allow sufficient time to assure delivery to the exchange agent before the expiration date. You should not send letters of transmittal or old notes to us. You may request your respective brokers, dealers, commercial banks, trust companies or nominees to effect the transactions described above for you.

If you are a beneficial owner of old notes whose old notes are registered in the name of a broker, dealer, commercial bank, trust company or other nominee and you wish to tender your old notes, you should contact the registered holder promptly and instruct the registered holder to tender on your behalf. If you wish to tender on your own behalf, before completing and executing the letter of transmittal and delivering the old notes you must either:

make appropriate arrangements to register ownership of the old notes in your name; or

obtain a properly completed bond power from the registered holder.

The transfer of registered ownership may take considerable time. Unless the old notes are tendered:

(1) by a registered holder who has not completed the box entitled Special Issuance Instructions or the box entitled Special Delivery Instructions on the letter of transmittal; or

(2) for the account of: a member firm of a registered national securities exchange or of the National Association of Securities Dealers, Inc.; a commercial bank or trust company having an office or correspondent in the United States; or an eligible guarantor institution within the meaning of Rule 17Ad-15 under the Exchange Act that is a member of one of the recognized signature guarantee programs identified in the letter of transmittal,

Table of Contents

an eligible guarantor institution must guarantee the signatures on a letter of transmittal or a notice of withdrawal described below under Withdrawal of Tenders.

If the letter of transmittal is signed by a person other than the registered holder, the old notes must be endorsed or accompanied by a properly completed bond power, signed by the registered holder as the registered holder's name appears on the old notes. If the letter of transmittal or any old notes or bond powers are signed by trustees, executors, administrators, guardians, attorneys-in-fact, officers of corporations or others acting in a fiduciary or representative capacity, they should so indicate when signing, and unless waived by us, they must submit evidence satisfactory to us of their authority to so act with the letter of transmittal.

The exchange agent and DTC have confirmed that any financial institution that is a participant in the depository's system may utilize DTC's automated tender offer program to tender notes. See Tendering Through DTC's Automated Tender Offer Program below.

We will determine in our sole discretion all questions as to the validity, form, eligibility, including time of receipt, acceptance and withdrawal of tendered old notes, which determination will be final and binding. We reserve the absolute right to reject any and all old notes not properly tendered or any old notes our acceptance of which would, in the opinion of our counsel, be unlawful. We also reserve the right to waive any defects, irregularities or conditions of tender as to particular old notes. Our interpretation of the terms and conditions of the exchange offer, including the instructions in the letter of transmittal, will be final and binding on all parties. Unless waived, you must cure any defects or irregularities in connection with tenders of old notes within the time we determine. Although we intend to notify you of defects or irregularities with respect to tenders of old notes, neither we, the exchange agent nor any other person will incur any liability for failure to give you that notification. Unless waived, we will not deem tenders of old notes to have been made until you cure the defects or irregularities.

While we have no present plan to acquire any old notes that are not tendered in the exchange offer or to file a registration statement to permit resales of any old notes that are not tendered in the exchange offer, we reserve the right in our sole discretion to purchase or make offers for any old notes that remain outstanding after the expiration date. We also reserve the right to terminate the exchange offer, as described below under -Conditions, and, to the extent permitted by applicable law, purchase old notes in the open market, in privately negotiated transactions or otherwise. The terms of any of those purchases or offers could differ from the terms of the exchange offer.

If you wish to tender old notes in exchange for new notes in the exchange offer, we will require you to represent that:

you are not an affiliate of ours;

you will acquire any new notes in the ordinary course of your business; and

at the time of completion of the exchange offer, you have no arrangement with any person to participate in the distribution of the new notes.

Return of Old Notes

If we do not accept any tendered old notes for any reason described in the terms and conditions of the exchange offer or if you withdraw or submit old notes for a greater principal amount than you desire to exchange, we will return the unaccepted, withdrawn or non-exchanged old notes without expense to you as promptly as practicable. In the case of old notes tendered by book-entry transfer into the exchange

Table of Contents

agent's account at DTC pursuant to the book-entry transfer procedures described below, we will credit the old notes to an account maintained with DTC as promptly as practicable.

Book-Entry Transfer

The exchange agent will make a request to establish an account with respect to the old notes at DTC for purposes of the exchange offer within two business days after the date of this prospectus, and any financial institution that is a participant in DTC's systems may make book-entry delivery of old notes by causing DTC to transfer the old notes into the exchange agent's account at the DTC in accordance with DTC's procedures for transfer. **However, although delivery of old notes may be effected through book-entry transfer at the DTC, you must transmit and the exchange agent must receive, the letter of transmittal or a facsimile of the letter of transmittal, with any required signature guarantees and any other required documents, at the address below under -Exchange Agent on or before the expiration date or pursuant to the guaranteed delivery procedures described below.**

Tendering Through DTC's Automated Tender Offer Program

The exchange agent and DTC have confirmed that any financial institution that is a participant in DTC's system may use DTC's automated tender offer program to tender its old notes. Participants in the program may transmit their acceptance of the exchange offer electronically instead of physically completing and signing the letter of transmittal and delivering it to the exchange agent. Tendering through the automated tender offer program causes DTC to transfer the old notes to the exchange agent according to its procedures for transfer. DTC will then send an agent's message to the exchange agent.

The term "agent's message" means a message transmitted by DTC to and received by the exchange agent and forming part of the book-entry confirmation, stating that:

DTC has received an express acknowledgment from a participant in DTC's automated tender offer program that is tendering old notes that are the subject of such book-entry confirmation;

the participant has received and agrees to be bound by the terms of the letter of transmittal or in the case of an agent's message relating to guaranteed delivery, that the participant has received and agrees to be bound by the applicable notice of guaranteed delivery; and

we may enforce the letter of transmittal or notice of guaranteed delivery, as applicable, against the participant.

Guaranteed Delivery Procedures

If you wish to tender your old notes and (1) your old notes are not immediately available or (2) you cannot deliver the old notes, the letter of transmittal or any other required documents to the exchange agent before the expiration date, you may effect a tender if:

(1) the tender is made through an eligible guarantor institution;

(2) before the expiration date, the exchange agent receives from the eligible guarantor institution a properly completed and duly executed notice of guaranteed delivery, substantially in the form provided by us, that states your name and address, the certificate number(s) of the old notes and the principal amount of old notes tendered, states that the tender is being made by that notice of guaranteed delivery, and guarantees that, within three New York Stock Exchange trading days after the expiration date, the eligible guarantor institution will deposit with the exchange agent

the letter of transmittal, together with

Table of Contents

the certificate(s) representing the old notes in proper form for transfer or a confirmation of a book-entry transfer, as the case may be, and any other documents required by the letter of transmittal; and

(3) within five New York Stock Exchange trading days after the expiration date, the exchange agent receives a properly executed letter of transmittal, as well as the certificate(s) representing all tendered old notes in proper form for transfer and all other documents required by the letter of transmittal.

Upon request, the exchange agent will send to you a notice of guaranteed delivery if you wish to tender your old notes according to the guaranteed delivery procedures described above.

Withdrawal of Tenders

Except as otherwise provided in this prospectus, you may withdraw tenders of old notes at any time before 5:00 p.m., Eastern Standard time, on the expiration date. To withdraw a tender of old notes in the exchange offer, the exchange agent must receive a written or facsimile transmission notice of withdrawal at its address listed in this prospectus before the expiration date or you must comply with the appropriate procedures of DTC's automated tender offer program system. Any notice of withdrawal must:

specify the name of the person who deposited the old notes to be withdrawn;

identify the old notes to be withdrawn, including the certificate number(s) and principal amount of the old notes; and

be signed in the same manner as the original signature on the letter of transmittal by which the old notes were tendered, including any required signature guarantees.

If the old notes have been tendered pursuant to the procedure for book-entry transfer described above, any notice of withdrawal must specify the name and number of the account at DTC to be credited with the withdrawn old notes and otherwise comply with the procedures of DTC.

We will determine in our sole discretion all questions as to the validity, form and eligibility of the notices, and our determination will be final and binding on all parties. We will not deem any properly withdrawn old notes to have been validly tendered for purposes of the exchange offer, and we will not issue new notes with respect to those old notes, unless you validly re-tender the withdrawn old notes. You may re-tender properly withdrawn old notes by following one of the procedures described above under "Procedures for Tendering" at any time before the expiration date.

Conditions

Notwithstanding any other term of the exchange offer, we will not be required to accept for exchange, or exchange the new notes for, any old notes, and may terminate the exchange offer as provided in this prospectus before the acceptance of the old notes, if, in our reasonable judgment, the exchange offer violates applicable law, rules or regulations or an applicable interpretation of the staff of the SEC.

If we determine in our reasonable discretion that any of these conditions are not satisfied, we may:

refuse to accept any old notes and return all tendered old notes to you;

extend the exchange offer and retain all old notes tendered before the exchange offer expires, subject, however, to your rights to withdraw the old notes; or

waive the unsatisfied conditions with respect to the exchange offer and accept all properly tendered old notes that have not been withdrawn.

Table of Contents

If the waiver constitutes a material change to the exchange offer, we will promptly disclose the waiver by means of a prospectus supplement that we will distribute to the registered holders of the old notes. Depending on the significance and the timing of the waiver, we may also decide to extend the exchange offer.

These conditions are for our sole benefit, and we may assert them or waive them in our sole discretion. If we fail at any time to exercise any of these rights, this failure will not mean that we have waived our rights. Each right will be deemed an ongoing right that we may assert at any time or at various times, in each case, prior to the expiration of the exchange offer. In addition, we will not accept for exchange any old notes tendered and will not issue new notes in exchange for any old note, if at that time any stop order has been threatened or is in effect with respect to the registration statement of which this prospectus constitutes a part or the qualification of the indenture under the Trust Indenture Act of 1939.

Termination of Registration Rights

All of your rights under the registration rights agreement will terminate upon consummation of the exchange offer except with respect to our continuing obligations:

to indemnify you and parties related to you against liabilities, including liabilities under the Securities Act; and

to provide, upon your request, the information required by Rule 144A(d)(4) under the Securities Act to permit resales of the old notes pursuant to Rule 144A.

Shelf Registration

If:

(1) the new notes received by holders other than certain restricted holders are not freely transferable under the Securities Act due to changes in existing SEC interpretations;

(2) the exchange offer has not been completed by July 24, 2004; or

(3) any holder of old notes is not eligible under interpretations of the SEC to participate in the exchange offer and the holder provides notice to us,

we will file, at our cost, with the SEC a shelf registration statement to cover resales of the old notes or the new notes, as the case may be, within the later of 90 days after the issuance of the old notes or 30 days after the time the obligation to file arises. We will use our reasonable best efforts to cause the shelf registration statement to be declared effective under the Securities Act within 120 days after the shelf registration statement is filed and use our reasonable best efforts to keep the shelf registration statement effective until two years after its effective date or such shorter period ending when all resales of old notes or new notes covered by the shelf registration statement have been made. A holder selling old notes or new notes pursuant to the shelf registration statement generally would be required to be named as a selling security holder in the related prospectus and to deliver a prospectus to purchasers, will be subject to certain of the civil liability provisions under the Securities Act in connection with such sales and will be bound by the provisions of the exchange and registration rights agreement which are applicable to such holder, including certain indemnification obligations.

Table of Contents

Liquidated Damages

If:

(1) we fail to file any of the registration statements required by the registration rights agreement on or before the date specified for such filing; or

(2) any of such registration statements is not declared effective by the SEC on or prior to the date specified for such effectiveness; or

(3) we fail to consummate the exchange offer within 45 days after the exchange offer registration statement is declared effective; or

(4) the shelf registration statement or the exchange offer registration statement is declared effective but thereafter is withdrawn by us or becomes subject to an effective stop order suspending its effectiveness in connection with resales or exchanges of transfer restricted securities during the periods specified in the registration rights agreement (each such event referred to in clauses (1) through (4) above, a registration default);

then we will pay to each holder of the outstanding old notes, as liquidated damages, additional penalty interest for the period from the occurrence of the registration default until such time as no registration default is in effect. The amount of penalty interest would be equal to 0.25% per annum during the first 90-day period following the occurrence of such registration default, and would increase by an additional 0.25% per annum during each subsequent 90-day period while the registration default remains in effect, up to a maximum of 1.00% per annum.

Exchange Agent

We have appointed JPMorgan Chase Bank as exchange agent for the exchange offer. You should direct questions and requests for assistance, requests for additional copies of this prospectus or the letter of transmittal and requests for a notice of guaranteed delivery to the exchange agent addressed as follows:

By Registered or Certified Mail:

JPMorgan Chase Bank
ITS Bond Events
2001 Bryan Street, 9th Floor
Dallas, TX 75201
Attention: Frank Ivins

By Hand Delivery:

JPMorgan Chase Bank
ITS Bond Events
2001 Bryan Street, 9th Floor
Dallas, TX 75201
Attention: Frank Ivins

By Overnight Delivery:

JPMorgan Chase Bank
ITS Bond Events
2001 Bryan Street, 9th Floor
Dallas, TX 75201
Attention: Frank Ivins

By Facsimile (*for eligible institutions only*):

(214) 468-6494
Attention: Frank Ivins

To Confirm Facsimile:
(214) 468-6464

Delivery to an address other than the one stated above or transmission via a facsimile number other than the one stated above will not constitute a valid delivery.

Table of Contents

Fees and Expenses

We will bear the expenses of soliciting tenders. We are making the principal solicitation by mail; however, our officers and regular employees may make additional solicitations by facsimile, telephone or in person.

We have not retained any dealer manager in connection with the exchange offer and will not make any payments to brokers, dealers or others soliciting acceptances of the exchange offer. We will, however, pay the exchange agent reasonable and customary fees for its services and will reimburse it for its reasonable out-of-pocket expenses.

We will pay the cash expenses incurred in connection with the exchange offer which we estimate to be approximately \$300,000. These expenses include registration fees, fees and expenses of the exchange agent and the trustee, accounting and legal fees and printing costs, among others.

We will pay all transfer taxes, if any, applicable to the exchange of notes pursuant to the exchange offer. If, however, a transfer tax is imposed for any reason other than the exchange of the old notes pursuant to the exchange offer, then you must pay the amount of the transfer taxes. If you do not submit satisfactory evidence of payment of the taxes or exemption from payment with the letter of transmittal, we will bill the amount of the transfer taxes directly to you.

Consequence of Failure to Exchange

Participation in the exchange offer is voluntary. We urge you to consult your financial and tax advisors in making your decisions on what action to take. Old notes that are not exchanged for new notes pursuant to the exchange offer will remain restricted securities. Accordingly, those old notes may be resold only:

to a person whom the seller reasonably believes is a qualified institutional buyer in a transaction meeting the requirements of Rule 144A;

in a transaction meeting the requirements of Rule 144 under the Securities Act;

outside the United States to a foreign person in a transaction meeting the requirements of Rule 903 or 904 of Regulation S under the Securities Act;

in accordance with another exemption from the registration requirements of the Securities Act and based upon an opinion of counsel if we so request;

to us; or

pursuant to an effective registration statement.

In each case, the old notes may be resold only in accordance with any applicable securities laws of any state of the United States or any other applicable jurisdiction.

Table of Contents

USE OF PROCEEDS

The exchange offer satisfies an obligation under the registration rights agreement. We will not receive any proceeds from the exchange offer. In consideration for issuing the new notes as contemplated by this prospectus, we will receive the old notes in like principal amount. The old notes surrendered in exchange for the new notes will be retired and cancelled and cannot be reissued. Accordingly, the issuance of the new notes will not result in any increase in our indebtedness or capital stock.

We used substantially all of the net proceeds from the offering of the old notes for (a) the purchase of our 7.20% notes due 2005 validly tendered and not withdrawn pursuant to the tender offer and (b) the acquisition of a 71.1% interest in Huta Zawiercie SA and the acquisition of the Lofland Company.

Table of Contents**CAPITALIZATION**

The following table sets forth our cash and cash equivalents, short-term debt and our consolidated capitalization at November 30, 2003. You should read this table in conjunction with the condensed consolidated financial statements and related notes that are incorporated by reference in this prospectus.

	November 30, 2003
	(dollars in thousands)
Cash and cash equivalents ⁽¹⁾	\$ 133,544
Short-term debt:	
Trade financing	\$ 12,000
Notes payable	
Current maturities of long-term debt	618
Total short-term debt	12,618
Long-term debt, net of current maturities: ⁽²⁾	
7.20% notes due 2005	11,566
6.80% notes due 2007	50,000
6.75% notes due 2009	100,000
5.625% notes due 2013	200,000
Other	799
Total long-term debt ⁽³⁾	362,365
Stockholders' equity:	
Preferred stock	
Common stock, \$5.00 par value, 40,000,000 shares authorized; 28,325,301 shares outstanding at November 30, 2003 ⁽⁴⁾	161,326
Additional paid-in capital	1,966
Accumulated other comprehensive income	7,841
Retained earnings	412,254
Less treasury stock, 3,939,865 shares	(54,906)
Total stockholders' equity	528,481
Total capitalization	\$ 903,464

-
- (1) Subsequent to November 30, 2003, we (a) used \$51.9 million cash to purchase 71.1% of the shares of Huta Zawiercie, (b) used \$48.8 million cash in connection with the Lofland acquisition and (c) acquired \$4.8 million in cash in connection with the Huta acquisition.
 - (2) See the notes to our condensed consolidated financial statements for additional information concerning long-term debt. The 7.20% notes due 2005 include the effect of an interest rate swap valued at \$566,000.
 - (3) Subsequent to November 30, 2003, we assumed \$46.7 million in debt upon the acquisition of Huta Zawiercie S.A.
 - (4) Does not include approximately 3,508,000 shares issuable upon the exercise of options outstanding at November 30, 2003.

Table of Contents**SELECTED FINANCIAL INFORMATION AND OTHER DATA**

The selected income statement data and balance sheet data presented below are for the three months ended November 30, 2003 and 2002 and for the years ended August 31, 2003, 2002, 2001, 2000 and 1999 and as of November 30, 2003 and August 31, 2003, 2002, 2001, 2000 and 1999. The per share amounts have been adjusted to reflect a two-for-one stock split in the form of a stock dividend on our common stock effective June 28, 2002. In 2002, as reported in our Annual Report on Form 10-K for the year ended August 31, 2002, as amended, we restated the financial statements. The following information should be read in conjunction with the section Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and related notes incorporated by reference in this prospectus.

Table of Contents

taxes, depreciation and amortization, or EBITDA, is a non-GAAP liquidity measure. In calculating EBITDA, we exclude our largest recurring non-cash charge, depreciation and amortization. We use EBITDA as one guideline to assess our ability to pay our current debt obligations as they mature and a tool to calculate possible future levels of leverage capacity. Reconciliations to net earnings are provided below.

	Three Months Ended November 30,		Year Ended August 31,				
	2003	2002	2003	2002	2001	2000	1999
	(in millions)						
Net earnings	\$12.6	\$ 2.2	\$ 18.9	\$ 40.5	\$ 23.8	\$ 44.6	\$ 47.0
Interest expense	5.1	4.0	15.3	18.7	27.6	27.3	19.6
Income taxes	7.4	1.3	11.5	22.6	14.6	26.1	27.8
Depreciation and amortization	15.1	15.2	61.2	61.6	67.3	66.6	52.1
EBITDA	\$40.2	\$22.7	\$106.9	\$143.4	\$133.3	\$164.6	\$146.5

- (2) For the purposes of calculating the ratio of earnings to fixed charges, earnings represents earnings before income taxes, interest expense, interest imputed on rent and amortization of capitalized interest. Fixed charges include interest expense, interest capitalized and the portion of operating rental expense that management believes is representative of the appropriate interest component of rent expense.
- (3) EBITDA for the quarters ended November 30, 2003 and 2002 has been annualized for purposes of calculating the ratio. Quarterly results are not necessarily indicative of results to be expected for the entire year.
- (4) Subsequent to November 30, 2003, we (a) used \$51.9 million cash to purchase 71.1% of the shares of Huta Zawiercie, (b) used \$48.8 million cash in connection with the Lofland acquisition and (c) acquired \$4.8 million in cash in connection with the Huta acquisition.
- (5) Subsequent to November 30, 2003, we assumed \$46.7 million in debt upon the acquisition of Huta Zawiercie SA.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

This Management's Discussion and Analysis of Financial Condition and Results of Operations is intended to assist in the understanding and assessment of the trends and significant changes in our results of operations and financial condition. Historical results may not indicate future performance. Our forward-looking statements are subject to a variety of factors that could cause actual results to differ materially from those contemplated by these statements. Factors that may cause such a difference include, but are not limited to, those discussed in Disclosure Regarding Forward-Looking Statements and Risk Factors. Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with our consolidated financial statements and the accompanying notes incorporated by reference in this prospectus.

We manufacture, recycle, market and distribute steel and metal products through a network of over 140 locations in the United States and internationally.

Manufacturing Operations

We conduct our manufacturing operations through a network of:

steel mills, commonly referred to as minimills, that produce reinforcing bar, angles, flats, small beams, rounds, fence post sections and other shapes;

steel fabrication and processing plants that bend, cut and fabricate steel, primarily reinforcing bar and angles;

a copper tube mill;

warehouses that sell or rent supplies for the installation of concrete;

plants that produce special sections for floors and ceiling support;

plants that produce steel fence posts;

a plant that treats steel with heat to strengthen and provide flexibility;

a plant that rebuilds railcars; and

a railroad salvage company.

Recycling Operations

We conduct our recycling operations through 44 metal processing plants located in the states of Texas, South Carolina, Florida, North Carolina, Oklahoma, Kansas, Missouri, Tennessee, Louisiana and Georgia.

Marketing and Distribution Operations

We market and distribute steel, copper and aluminum coil, sheet and tubing, ores, metal concentrates, industrial minerals, ferroalloys and chemicals through our network of 15 marketing and distribution

Table of Contents

offices, 4 processing facilities and joint ventures around the world. Our customers use these products in a variety of industries.

You should read this management's discussion and analysis in connection with your review of our consolidated audited financial statements and the accompanying footnotes that are incorporated by reference in this prospectus.

Critical Accounting Policies and Estimates

The following are important accounting policies, estimates and assumptions that you should understand as you review our financial statements. We apply these accounting policies and make these estimates and assumptions to prepare financial statements under generally accepted accounting principles. Our use of these accounting policies, estimates and assumptions affects our results of operations and our reported amounts of assets and liabilities. Where we have used estimates or assumptions, actual results could differ significantly from our estimates.

Revenue Recognition. Generally, we recognize sales when title passes. For a few of our steel fabrication operations, we recognize net sales and profits from certain long-term fixed price contracts by the percentage-of-completion method. In determining the amount of net sales to recognize, we estimate the total costs and profits expected to be recorded for the contract term and the recoverability of costs related to change orders. These estimates could change, resulting in changes in our earnings.

Contingencies. We make accruals as needed for litigation, administrative proceedings, government investigations (including environmental matters), and contract disputes. We base our environmental liabilities on estimates regarding the number of sites for which we will be responsible, the scope and cost of work to be performed at each site, the portion of costs that we expect we will share with other parties and the timing of the remediation. Where timing of expenditures can be reliably estimated, we discount amounts to reflect our cost of capital over time. We record these and other contingent liabilities when they are probable and when we can reasonably estimate the amount of loss. Where timing and amounts cannot be precisely estimated, we estimate a range, and we recognize the low end of the range without discounting. Also, see Note 9, Commitments and Contingencies, to our consolidated financial statements for the year ended August 31, 2003 incorporated by reference in this prospectus.

Inventory Cost. We determine inventory cost for most domestic inventories by the last-in, first-out method, or LIFO. At the end of each quarter, we estimate both inventory quantities and costs that we expect at the end of the fiscal year for these LIFO calculations, and we record an amount on a pro-rata basis. These estimates could vary substantially from the actual year-end results, causing an adjustment to cost of goods sold. See Note 14, Quarterly Financial Data, to our consolidated financial statements for the year ended August 31, 2003 incorporated by reference in this prospectus. We record all inventories at the lower of their cost or market value.

Property, Plant and Equipment. Our manufacturing and recycling businesses are capital intensive. We evaluate the value of these assets and other long-lived assets whenever a change in circumstances indicates that their carrying value may not be recoverable. Some of the estimated values for assets that we currently use in our operations utilize judgments and assumptions of future undiscounted cash flows that the assets will produce. If these assets were for sale, our estimates of their values could be significantly different because of market conditions, specific transaction terms and a buyer's different viewpoint of future cash flows. Also, we depreciate property, plant and equipment on a straight-line basis over the estimated useful lives of the assets. Depreciable lives are based on our estimate of the assets' economically useful lives. To the extent that an asset's actual life differs from our estimate, there could be

Table of Contents

an impact on depreciation expense or a gain/loss on the disposal of the asset in a later period. We expense major maintenance costs as incurred.

Other Accounting Policies and New Accounting Pronouncements. See Note 1, Summary of Significant Accounting Policies, to our consolidated financial statements for the year ended August 31, 2003 incorporated by reference in this prospectus.

Consolidated Results of Operations

Our management uses a non-GAAP measure, adjusted operating profit, to compare and evaluate the financial performance of our segments. See Note 13, Business Segments, to our consolidated financial statements for the year ended August 31, 2003 and Note J, Business Segments to our condensed consolidated financial statements for the three months ended November 30, 2003 incorporated by reference in this prospectus. We define adjusted operating profit as the sum of our earnings before income taxes and financing costs. Adjusted operating profit provides a core operational earnings measurement that compares segments without the need to adjust for federal, but more specifically, state taxes which have considerable variation between domestic jurisdictions. Tax regulations in international operations add additional complexity. Also, we exclude interest cost and discounts on the sales of accounts receivable in our calculation of adjusted operating profit. The results are, therefore, without consideration of financing alternatives of capital employed. In the following table we are providing a reconciliation of the non-GAAP measure, adjusted operating profit (loss) to net earnings (loss):

	Manufacturing	Recycling	Marketing and Distribution	Corporate and Eliminations	Total
	(in millions)				
Three months ended November 30, 2003:					
Net earnings (loss)	\$12.5	\$ 3.9	\$ 4.9	\$ (8.7)	\$12.6

Per diluted share	0.03	0.01	0.21	0.04	(0.04)

The following financial events were significant during the first quarter ended November 30, 2003:

The improved market conditions that we experienced during the fourth quarter of fiscal 2003 continued during our first quarter of fiscal 2004 for most of our businesses.

Steel group earnings increased primarily due to higher shipments, as realized product prices only kept up with the increases in input costs.

The copper tube division reported increased gross margins due to higher volumes and improved metal spreads.

The recycling segment continued to be very profitable primarily due to improvements in the ferrous scrap market over last year.

Marketing and distribution's adjusted operating profit was higher than last year's first quarter, with improvements in a number of products' prices.

On November 12, 2003, we issued \$200 million aggregate principal amount of 5.625% notes due 2013 following the purchase of \$89 million of notes otherwise due in 2005. We incurred a \$2.8 million pre-tax charge on this purchase.

Table of Contents

During the three months ended November 30, 2003, we realized a pre-tax gain of \$1.5 million in marketing and distribution related to the forward purchase of Polish Zlotys in connection with our December 3, 2003 acquisition of Huta Zawiercie, S.A.

Segments

Unless otherwise indicated, all dollars below are before income taxes. Financial results for our reportable segments are consistent with the basis and manner in which we internally disaggregate financial information for making operating decisions. We have three reportable segments: manufacturing, recycling, and marketing and distribution.

The following table shows net sales and adjusted operating profit (loss) by business segment:

	Three Months Ended November 30,		Year Ended August 31,		
	2003	2002	2003	2002	2001
	(in millions)				
Net sales:					
Manufacturing	\$ 379	\$296	\$1,340	\$1,366	\$1,350
Recycling	132	96	441	378	394
Marketing and distribution	340	256	1,150	777	771
Adjusted operating profit (loss):					
Manufacturing	\$20.3	\$ 3.7	\$ 20.4	\$ 71.4	\$ 56.7
Recycling	5.7	1.4	15.2	5.1	(2.3)
Marketing and distribution	6.3	4.4	21.8	14.2	7.8

Quarter Ended November 30, 2003 Compared to 2002

Manufacturing. We include our steel group and our copper tube division in our manufacturing segment. Adjusted operating profit is equal to earnings before income taxes for our four steel minimills, our copper tube mill and the steel group's fabrication operations. Our manufacturing segment's adjusted operating profit for the three months ended November 30, 2003 increased \$16.6 million (443%) as compared to 2002 on \$82.3 million (28%) more net sales. Our steel group's minimills and our copper tube mill reported higher adjusted operating profits due to higher selling prices and increased shipments, although higher scrap purchase and utility costs resulted in continued compressed gross margins. Our steel group's downstream fabrication operations were more profitable due to higher shipments with stable selling prices. Slower demand for commercial construction was more than offset by demand in other construction markets. Our downstream rebar fabrication, construction related products, steel post plants, steel joist manufacturing and structural steel fabrication businesses, were profitable for the three months ended November 30, 2003.

The table below reflects steel and scrap prices per ton:

**Three months ended
November 30,**

Edgar Filing: COMMERCIAL METALS CO - Form S-4

	<u>2003</u>	<u>2002</u>
Average mill selling price (total sales)	\$309	\$272
Average mill selling price (finished goods)	313	281
Average fabrication selling price	555	558
Average ferrous scrap purchase price	118	89

37

Table of Contents

Minimills. Adjusted operating profit for our four steel minimills increased 408% for the three months ended November 30, 2003 compared to 2002, due to higher selling prices and shipments. Adjusted operating profits at all four mills were significantly higher. The largest increases in profitability were at SMI Texas and SMI South Carolina. Adjusted operating profits at SMI Texas increased \$2.7 million (91%) for the three months ended November 30, 2003 as compared to 2002. SMI South Carolina reported \$1.7 million adjusted operating profit for the three months ended November 30, 2003 as compared to a \$2.3 million adjusted operating loss in 2002. The mills shipped 566,000 tons in the current quarter compared to 505,000 last year, an increase of 12%. Mill production increased as well, with tons rolled up 13% to 541,000. Tons melted increased 9% to 561,000. The average total mill selling price at \$309 per ton was \$37 (14%) above last year. Our mill selling price for finished goods increased \$32 per ton (11%). Average scrap purchase costs were \$29 per ton (33%) higher than last year. Utility expenses increased by \$1.8 million as compared to last year; both natural gas and electricity costs were higher. Consequently, the increases in our steel product prices were only enough to offset the increase in these input costs, resulting in continuing restricted mill product margins. However, our metal spread (the difference between our average total mill selling price and our average scrap purchase price) was \$8 per ton higher during the three months ended November 30, 2003 as compared to 2002.

Fabrication and Other Businesses. Adjusted operating profit in the steel group's fabrication and other businesses increased by \$6.6 million (472%) for the three months ended November 30, 2003 as compared to 2002. Fabrication plant shipments totaled 280,000 tons, 29% more than last year's first quarter shipments of 217,000 tons. The average fabrication selling price for the three months ended November 30, 2003 was approximately the same as compared to 2002. All of these lines of business were profitable for the three months ended November 30, 2003 including rebar and structural fabrication, construction-related products, steel post plants, and steel joist manufacturing. During the three months ended November 30, 2002, our structural steel fabrication and joist plants had reported adjusted operating losses. We are continuing to evaluate certain facilities which are performing under expectations or for which we are considering alternative uses. Our current estimates of cash flows do not indicate that the assets are impaired. However, these estimates and expected uses could change resulting in asset impairments.

On December 23, 2003, we acquired Lofland for \$48.8 million. Lofland is the sole stockholder of the Lofland Company and subsidiaries which operate steel reinforcing bar fabrication and construction-related products sales facilities from 11 locations in Texas, Arkansas, Louisiana, Oklahoma, New Mexico and Mississippi. The acquisition of Lofland complements our existing Texas rebar fabrication and construction-related product sales operations and expands our service areas in each of the neighboring states. See Note I, Acquisitions, to our condensed consolidated financial statements for the three months ended November 30, 2003 incorporated by reference in this prospectus.

Copper Tube. Our copper tube division's adjusted operating profit increased \$1.9 million (695%) to \$2.2 million on 32% higher net sales. Copper tube shipments increased 7% to 16.6 million pounds. Production increased 5% to 16.1 million pounds. The average selling price increased 26 cents per pound (24%) to \$1.36 for the three months ended November 30, 2003 as compared to \$1.10 for the three months ended November 30, 2002. The average copper scrap price increased 15 cents per pound (22%) during the three months ended November 30, 2003 as compared to 2002. Demand in our end use markets remained relatively strong, but selling prices remained constrained by over-supply of water and refrigeration tubing. Our metal spreads improved because the average copper scrap price increased less than the average product sales price.

Recycling. Our recycling segment reported an adjusted operating profit of \$5.7 million for the three months ended November 30, 2003 as compared with an adjusted operating profit of \$1.4 million in 2002.

Table of Contents

Net sales for the three months ended November 30, 2003 were 37% higher at \$132 million. Gross margins were 42% higher than the same period last year. The segment processed and shipped 430,000 tons of ferrous scrap during the three months ended November 30, 2003, 10% more than 2002. Ferrous sales prices were on average \$124 per ton, or \$35 (39%) higher than 2002. Nonferrous shipments were 2.5% lower at 54,000 tons. The average nonferrous scrap sales price of \$1,139 per ton for the three months ended November 30, 2003 was 18% higher than in 2002. The total volume of scrap processed, including the steel group's processing plants, was 734,000 tons, an increase of 10% from the 669,000 tons processed in 2002.

Marketing and Distribution. Net sales in the three months ended November 30, 2003 for our marketing and distribution segment increased 33% to \$340 million as compared to net sales of \$256 million in 2002. Adjusted operating profit for the three months ended November 30, 2003 was \$6.3 million, as compared to \$4.4 million in 2002, an increase of 42%. Markets were solid in several geographic regions and product lines. Sales to and within Asia, especially China, were up significantly. Also, the economy in Australia was still strong. Sales were level in Europe and imports into the United States were mixed. A number of product prices (as expressed in U.S. dollars) improved during the three months ended November 30, 2003. Gross margins were better for steel products and industrial raw materials, but were lower for nonferrous metal products. The increased profitability in marketing and distribution was largely due to our strategy in recent years to build up our regional business around the world and to increase our downstream presence.

On December 3, 2003, we purchased a 71.1% interest in Huta Zawiercie, S.A. in Zawiercie, Poland. Huta Zawiercie is a steel minimill, with annual capacity of about 1 million metric tons of primarily rebar and wire rod products. See Note I, Acquisitions, to our condensed consolidated financial statements for the three months ended November 30, 2003 incorporated by reference in this prospectus. During the three months ended November 30, 2003, we recognized a \$1.5 million gain on our forward purchases of Polish Zlotys related to this acquisition.

Other. During the three months ended November 30, 2003, we incurred a \$2.8 million charge from the purchase of \$89 million of our notes otherwise due in 2005.

2003 Compared to 2002

Manufacturing. We include our steel group and our copper tube division in our manufacturing segment.

Adjusted operating profit is equal to earnings before income taxes for our four steel minimills, our copper tube mill and the steel group's fabrication operations. Our manufacturing adjusted operating profit for the year ended August 31, 2003 decreased \$51.0 million as compared to 2002. The sale of SMI-Owen and a litigation settlement at the mills in 2002 accounted for \$10.6 million of the decrease. Excluding these items, adjusted operating profit decreased 66% in 2003 as compared to 2002. Net sales for the year ended August 31, 2003 decreased \$26.4 million (2%) as compared to 2002. Steel mill selling prices were at very low levels for much of 2003. However, scrap purchase prices were driven sharply higher by offshore demand and the weakening value of the U.S. dollar. Our steel minimills implemented higher selling prices that became partially effective during the second half of 2003. However, these price increases did not fully offset higher scrap and utility costs. Gross margins were significantly lower as a result of these conditions. Our copper tube mill's gross margins were also lower due to increased copper scrap purchase prices and lower selling prices for its products. Our steel group's fabrication operations were less profitable in 2003 as compared to 2002 primarily due to lower selling prices which more than offset the impact of higher shipments.

Table of Contents

The table below reflects steel and scrap prices per ton:

(dollars per ton)	August 31,	
	2003	2002
Average mill selling price-total sales	\$278	\$269
Average mill selling price-finished goods only	287	275
Average fabrication selling price	536	608
Average ferrous scrap purchase price	97	80

Minimills. Adjusted operating profit for our four steel minimills decreased \$18.2 million (52%) for the year ended August 31, 2003 as compared to 2002. The effect of valuing inventories under the LIFO method accounted for \$3.5 million (19%) of the decrease in adjusted operating profit for the year ended August 31, 2003 as compared to 2002. Also, during the year ended August 31, 2002, our steel minimills received \$2.5 million from a nonrecurring graphite electrode litigation settlement. Even excluding these items, adjusted operating profit in 2003 decreased as compared to 2002 because higher shipments and average selling prices were not enough to offset higher input costs, including scrap and utilities. Our adjusted operating profit at SMI Texas decreased 25% to \$19.3 million for the year ended August 31, 2003 as compared to an adjusted operating profit of \$25.8 million in 2002. SMI South Carolina lost \$7.1 million for the year ended August 31, 2003 as compared to a \$2.8 million adjusted operating profit in 2002. Higher scrap costs, higher energy costs and a weak demand for our products were the most significant reasons for SMI South Carolina's loss in 2003 although these factors were partially offset by price increases in the fourth quarter. SMI Arkansas reported a \$160 thousand adjusted operating profit in 2003 as compared to a \$3.5 million adjusted operating profit in 2002. Most of the decrease in adjusted operating profit at SMI Arkansas was attributable to LIFO expense caused by higher year end inventories of rerolling rail. However, adjusted operating profit at our SMI Alabama mill for the year ended August 31, 2003 increased 63% to \$4.2 million as compared to \$2.5 million in 2002. Cost reduction efforts, improved operating efficiencies, and better market conditions were the key factors in SMI Alabama's improved profitability. Our mills shipped 2,284,000 tons in 2003, an increase of 5% as compared to 2,171,000 tons shipped in 2002, due largely to higher billet sales. Our mills rolled 1,972,000 tons, a 3% decrease as compared to 2002. Our minimills melted 2,081,000 tons during the year ended August 31, 2003, which was a decrease of 1% as compared to 2002. Our average total mill selling price at \$278 per ton increased \$9 (3%) as compared to 2002. Our mill selling price for finished goods increased \$12 per ton (4%) in 2003 as compared to 2002. Our average scrap purchase costs in 2003 increased \$17 per ton (21%) as compared to 2002. Utility expenses increased by \$9.4 million for the year ended August 31, 2003 as compared to 2002. The increase in utility costs was mostly due to higher natural gas costs, although electricity expenses also increased.

Fabrication and Other Businesses. The steel group's fabrication and other businesses reported a combined adjusted operating profit of \$6.0 million for the year ended August 31, 2003 as compared to a profit of \$33.6 million in 2002. We recorded a \$5.2 million gain from the sale of SMI-Owen Steel Company in March 2002. Also, prior to its sale, SMI-Owen had an adjusted operating profit of \$2.9 million for the year ended August 31, 2002. Excluding these items, fabrication adjusted operating profits decreased by \$19.5 million (76%) for the year ended August 31, 2003 as compared to 2002. Our fabrication plants shipped 1,028,000 tons in 2003, 4% more than the 984,000 tons shipped during 2002. Our fabricated rebar shipments increased 104,000 tons (19%) as compared to 2002. Lower structural, joist and post plant shipments partially offset this increase. The average fabrication selling price for the year ended August 31, 2003 decreased \$72 per ton (12%) as compared to 2002. Our rebar fabrication, construction-related

products, post and heat treating plants were profitable during the year ended August 31, 2003. Our joist and structural steel fabrication operations recorded losses during 2003 due to lower selling prices and shipments. During the year ended August 31, 2003, the joist plants reduced certain inventory stock values by \$1.8 million to their estimated current market value. Also, during the year

Table of Contents

ended August 31, 2003, we wrote-down \$711 thousand of inventory at two of our other fabrication facilities, we recognized a \$998 thousand gain on the trade-in of rental forms in construction-related products, and we reduced our deferred insurance proceeds accrual by \$937 thousand (see Note 9, Commitments and Contingencies to our consolidated financial statements for the year ended August 31, 2003 incorporated by reference in this prospectus). During 2003, we acquired substantially all of the operating assets of the Denver, Colorado location of Symons Corporation, E.L. Wills in Fresno, California and Dunn Del Re Steel in Chandler, Arizona. The Symons location is a concrete formwork supplier, and E.L. Wills and Dunn Del Re Steel are rebar fabrication operations. The purchase prices for these businesses totaled \$14.0 million. No single one of these acquisitions was significant to our operations.

Copper Tube. Our copper tube division reported an adjusted operating profit of \$620 thousand for the year ended August 31, 2003 as compared to an adjusted operating profit of \$5.1 million in 2002. Net sales were 2% lower in 2003 as compared to 2002. Our copper tube shipments increased 4% to 61.9 million pounds during 2003 as compared to 2002. However, our average net selling price for plumbing and refrigeration tube decreased by 7 cents per pound (6%) to \$1.17 per pound as compared to \$1.24 per pound in 2002. We increased our production to 60.7 million pounds for the year ended August 31, 2003, which was 8% more than the 56.2 million pounds that we produced in 2002. Our average copper scrap price increased 4 cents per pound (6%) during the year ended August 31, 2003 as compared to 2002. The difference between the sales price (\$1.17 and \$1.24 in 2003 and 2002, respectively) and copper scrap purchase cost (\$0.72 and \$0.68 in 2003 and 2002, respectively) are commonly referred to as the metal spread. The metal spread declined 21% in 2003 as compared to 2002. Although single family residential construction held up relatively well, other market sectors were weaker which put pressure on selling prices.

Recycling. Our recycling segment reported an adjusted operating profit of \$15.2 million for the year ended August 31, 2003 as compared to an adjusted operating profit of \$5.1 million in 2002. All four of the geographic regions where the segment operates were substantially more profitable. Net sales for the year ended August 31, 2003 were \$441.4 million, an increase of 17% as compared to our net sales of \$378.1 million in 2002. Our gross margins were 24% higher in 2003 as compared to 2002, partially due to controls over costs. The segment processed and shipped 1,639,000 tons of ferrous scrap during the year ended August 31, 2003, an increase of 10% as compared to 2002. Ferrous sales prices were on average \$100 per ton, 23% higher than in 2002. Greater demand from overseas markets contributed to this increase, as well as the weaker U.S. dollar.

Nonferrous markets improved moderately during the year ended August 31, 2003. Our average nonferrous scrap sales price of \$1,021 per ton was 8% higher than in 2002, although shipments were 3% lower at 231,000 tons. The total volume of scrap processed, including the steel group's processing plants, was 2,811,000 tons, an increase of 9% from the 2,568,000 tons processed in 2002.

Marketing and Distribution. Net sales for the year ended August 31, 2003 for our marketing and distribution segment increased \$372.7 million (48%) to \$1.15 billion, as compared to 2002 net sales of \$777.0 million. Most of the increase related to sales outside of the United States. Adjusted operating profit for the year ended August 31, 2003 was \$21.8 million, an increase of 53% as compared to 2002, due mostly to better results from our international operations. International steel prices for flat-rolled products rose and then weakened, because of decreased demand from China, during the first three quarters of 2003. However, the prices for flat-rolled steel products rose again during the fourth quarter. Prices for long products slowly increased during 2003. Our steel shipments increased, except for imports into the U.S. Our business in the U.S. was reduced because of the weak economy and the weaker U.S. dollar. Due to these factors, volumes, prices and margins for nonferrous semi-finished products were lower in 2003 as compared to 2002. However, sales and margins for ores, minerals, ferroalloys and

Table of Contents

special metals were generally higher. Also, freight costs increased in 2003 as compared to 2002. Our marketing and distribution and service center operations in Australia were more profitable in 2003 as compared to 2002. Our joint venture Europickling facility in Belgium became profitable during 2003. Also, the joint venture arrangements with our 11% investee, Trinecke Zelezarny, a Czech mill, contributed to our sales in Central Europe. Sales into Asia, including China, were strong, especially during the first and second quarters of our fiscal 2003. In July 2003, our international subsidiary entered into a definitive agreement to purchase a controlling interest in Huta Zawiercie, a Polish steel minimill. This acquisition closed on December 3, 2003.

Other. Our employees' retirement plan expenses were 16% lower for the year ended August 31, 2003 as compared to 2002. Discretionary items such as contributions were lower for the year ended August 31, 2003 as compared to 2002. We committed less to these items because 2003 was less profitable. Interest expense for the year ended August 31, 2003 was lower as compared to 2002 due primarily to lower overall interest rates on short-term borrowings and two interest rate swaps on parts of our long-term debt which resulted in lower effective interest rates.

During 2002, we favorably resolved all issues for our federal income tax returns through 1999. Due to the lack of any material adjustments, we reevaluated the tax accruals and, consequently, reduced the net tax expense by \$1.0 million during 2002.

On August 8, 2003, we increased our commercial paper program to permit maximum borrowings of up to \$275 million, up from the prior year \$174.5 million level. Commercial paper capacity is reduced by any outstanding standby letters of credit under the 2003 program which totaled \$20.6 million at August 31, 2003.

Near-Term Outlook

We expect our fiscal year ending August 31, 2004 to be significantly more profitable than 2003, primarily due to market improvements, the weakened U.S. dollar, acquisitions, internal cost reductions and productivity improvements. We expect that our second quarter, which is typically our weakest, will be relatively strong. We estimate that our net earnings (excluding any impact of adjusting our inventory valuation to the LIFO method which we are unable to estimate) will be between \$7 million and \$10 million for the three months ending February 29, 2004. We have noted signs of increasing demand in the U.S. manufacturing sector, and some improvement in construction. However, office, lodging and industrial construction will be slower to recover. Also, orders for capital goods are higher. Asian markets are relatively strong and European markets are partially recovering. We anticipate that our overall results will be better in the second half of 2004 as compared to the first half.

We anticipate our profits will be higher in 2004 in our manufacturing segment as compared to 2003 because of higher metal spreads and increased production, shipments and prices. We have implemented several price increases on most of our steel minimill products. Manufacturing margins are likely to be squeezed in the short run because the benefits of higher volumes and improved pricing will be offset by continued increased raw material costs as well as higher energy and freight costs. We are expecting these price increases to become fully effective during the second half of fiscal 2004. As a result, gross margins at our steel minimills should increase. We expect the gross margins in our fabrication and other related businesses to continue at current levels during the second quarter of fiscal 2004. However, these margins should improve later this year. The weak U.S. dollar, high freight costs, and strong Asian demand will minimize the impact of the Section 201 tariff repeal.

We anticipate that our recycling segment will continue to report significant profits, due to strong demand for steel scrap and nonferrous metal scrap and the relatively weak U.S. dollar.

Table of Contents

Our marketing and distribution segment should remain consistently profitable during our fiscal 2004. We expect that our U.S. operations will be more profitable, but that our international operations will have lower profits in 2004 as compared to 2003. Overall prices and volumes should remain constant.

We anticipate that our capital spending for 2004 will be \$61 million, excluding acquisition costs for Huta Zawiercie and Lofland. Most of these expenditures will be in our manufacturing segment including a major improvement project at our SMI-Texas melt shop. We believe that our purchase of Huta Zawiercie, S.A. and Lofland will be accretive to our 2004 earnings.

Long-Term Outlook

We believe we are well-positioned to exploit long-term opportunities. We expect stronger demand for our products due to the increased possibility of a recovery in demand throughout the major global economies as well as continued growth in developing countries. Emerging countries often have a higher growth rate for steel and nonferrous metals consumption. We believe that the demand will increase in Asia, particularly in China, as well as in Central and Eastern Europe.

We believe that there will be further consolidation in the industries in which we participate, and we plan to continue to participate in a prudent way. The reasons for further consolidation include an inadequate return on capital for most companies, numerous bankruptcies, a high degree of fragmentation, the need to eliminate non-competitive capacity and more effective marketing.

2002 Compared To 2001

Manufacturing. We include our steel group and our copper tube division in our manufacturing segment.

Adjusted operating profit is equal to earnings before income taxes for our four steel minimills, our copper tube mill and the steel group's fabrication operations. Our manufacturing adjusted operating profit in 2002 increased \$14.7 million (26%) as compared to 2001 on marginally more (\$12 million) net sales. We achieved this increase in adjusted operating profit for two primary reasons in 2002: (i) the nonrecurrence of the prior year litigation accrual in the amount of \$8.3 million, and (ii) the current year gain on the sale of the steel group's heavy structural fabrication operation, SMI-Owen, in the amount of \$5.2 million. Excluding those items, our manufacturing segment's adjusted operating profit was slightly higher than last year.

Increased production and shipments at our steel group's minimills more than offset lower selling prices, increased scrap purchase costs and lower copper tube earnings. Also, we spent less in 2002 on utilities, and we recorded lower depreciation and amortization expense. However, fiscal 2002 adjusted operating profits decreased from fiscal 2001 in the steel group's downstream steel fabrication and related businesses due to lower profits in rebar fabrication and structural steel fabrication, excluding SMI-Owen.

The table below reflects steel and scrap prices per ton:

(dollars per ton)	August 31,	
	2002	2001

Edgar Filing: COMMERCIAL METALS CO - Form S-4

Average mill selling price-total sales	\$269	\$284
Average mill selling price-finished goods only	275	290
Average fabrication selling price	608	646
Average ferrous scrap purchase price	80	74

43

Table of Contents

Minimills. During 2002, adjusted operating profit for our four steel minimills rose 27% compared with 2001, despite lower selling prices. SMI South Carolina had a \$2.8 million adjusted operating profit in 2002 compared to a \$1.6 million loss in 2001. SMI Alabama turned around as well with a \$2.5 million adjusted operating profit in 2002 compared to a \$2.2 million loss in 2001. Adjusted operating profits at SMI Arkansas were up 4% in the current year period. These improvements more than offset a 7% decline in adjusted operating profits at SMI Texas as compared to 2001. A major reason for the minimills' improved profitability was a 14% increase in shipments because of continued public projects infrastructure construction. Shipments were 2,171,000 tons in 2002 compared to 1,903,000 in 2001. Mill production also increased over last year. Tons rolled were up 19% to 2,026,000 in 2002. Tons melted were up 17% to 2,100,000 in 2002. Even though demand was strong, the average total mill selling price at \$269 per ton was \$15 (5%) below last year. Also, in 2002, we sold more semi-finished billets, a product with a lower selling price than our average. Average scrap purchase costs were \$6 per ton (8%) higher than in 2001, resulting in smaller margins. Utility expenses declined by \$2.4 million as compared to 2001. Decreases in natural gas costs more than offset higher electricity costs. Also, depreciation and amortization expenses decreased by \$5.2 million in 2002, primarily because SMI-South Carolina fully depreciated its mill rolls and guides as well as certain melt shop equipment. The mills also received \$2.5 million from a nonrecurring graphite electrode litigation settlement in 2002.

Fabrication and Other Businesses. Adjusted operating profit in the steel group's fabrication and other businesses increased by \$12.1 million (57%) in 2002 as compared to 2001. Excluding the 2002 gain on the sale of SMI-Owen (\$5.2 million) and the 2001 litigation accrual (\$8.3 million), adjusted operating profits in 2002 decreased by \$1.3 million (4%) as compared to 2001.

Near the end of fiscal 2002, we discovered two significant, but unrelated events, requiring retroactive writedowns at two rebar fabrication operations. The total amount of the adjustments required to correct the August 31, 2002 balance sheets of these two facilities was \$4.6 million. These adjustments affected fiscal years from 1999 to 2002. In August 2002, we uncovered a theft and an accounting fraud which occurred over four years at a rebar fabrication plant in South Carolina. The total adjustment required to revert the accounting records to their proper balances was \$2.7 million. In September 2002, we discovered accounting errors related to losses on rebar fabrication and placement jobs at one facility in California, some of which date back to its acquisition in fiscal 2000. The resulting charge was \$1.9 million. The South Carolina incident resulted in a \$900 thousand expense in fiscal 2002. The remaining \$3.7 million for both instances was attributed \$885 thousand to fiscal 2001, \$2.6 million to fiscal 2000, and \$227 thousand to 1999, resulting in prior period adjustments to these previously reported financial statements. We took immediate action to strengthen compliance with our internal control policies in the areas of segregation of duties, personnel and management review and oversight. Controllers at both locations were replaced as well as the general manager of the rebar fabrication plant in South Carolina. The steel group has increased the level of detail, the frequency of submission and the amount of review of its operating locations' reporting. We have renewed emphasis on periodic and timely internal balance sheet audits at all operating locations and completed audits of all its operating locations in fiscal 2003. No major areas of noncompliance were noted. Senior management and area managers of all our locations attended internal meetings led by the CEO and CFO regarding management's responsibility for internal control, dealing with noncompliance issues and our commitment to only the highest of ethical standards of conduct.

Fabrication plant shipments totaled 984,000 tons, down fractionally from 986,000 tons shipped in 2001. The average fabrication selling price in 2002 decreased \$38 per ton (6%) as compared to 2001. Rebar fabrication markets were softer in 2002 as a result of intense competition, and several plants reported losses. During 2002, we acquired the real estate, equipment, inventory and work in process of Varmicon, Inc. in Harlingen, Texas. We now operate this rebar fabrication facility under the name of

Table of Contents

SMI-Valley Steel. The steel joist operations, which includes cellular and castellated beams, were break even in 2002, an improvement over the loss in 2001. Both prices and shipments decreased, but lower operating costs and shop efficiencies helped significantly. Also, in 2001 these operations incurred \$8.9 million in start-up costs. Structural steel fabrication profits, excluding SMI-Owen and the prior year litigation accrual, were down in 2002 compared to 2001. However, our concrete-related products operations were more profitable in 2002. We continued to expand this business through the acquisition of Dowel Assembly Manufacturing Company, or DAMCO, in Jackson, Mississippi. DAMCO manufactures dowel baskets and has an epoxy coating business. In 2002, the steel group started Spray Forming International, a stainless steel cladding operation located in South Carolina.

Copper Tube. Our copper tube division's adjusted operating profit decreased 59% with 7% less net sales as compared to 2001. Copper tube shipments increased 3% from 2001 to a record 59.3 million pounds, and production increased 5% from 2001 to a record 56.2 million pounds. However, average sales prices dropped 10% in 2002 to \$1.24 per pound as compared to the average sales price in 2001 of \$1.38. The biggest factor was lower apartment and hotel/motel construction. Consequently, demand for plumbing and refrigeration tube was not as strong. The 2002 product mix included increased quantities of HVAC products and line sets. In the marketplace, we continued to adapt to the consolidation among our buyers. The difference between sales price and copper scrap purchase cost (commonly referred to as the metal spread), declined 8% in 2002 compared to 2001. Lower raw material purchase costs did not fully compensate for the decline in selling prices.

Recycling. Our recycling segment reported an adjusted operating profit of \$5.1 million in 2002 compared with an adjusted operating loss of \$2.3 million in 2001. Net sales in 2002 were 4% lower at \$378 million as compared to 2001. However, gross margins were 11% above last year, primarily because we shipped 8% more total tons. Demand for ferrous scrap improved both in the U.S. and internationally. The segment processed and shipped 1,494,000 tons of ferrous scrap in 2002, 10% more than in 2001. Ferrous sales prices were on average \$81 per ton, an increase of \$6 from 2001. Nonferrous shipments were flat at 238,000 tons. The average 2002 nonferrous scrap sales price of \$947 per ton was 9% lower than in 2001. Increased productivity, higher asset turnover and reduced costs contributed to the improved 2002 results. The total volume of scrap processed, including the steel group's processing plants, was 2,568,000 tons, an increase of 11% from the 2,308,000 tons processed in 2001.

In 2002, we acquired most of the transportation assets of Sampson Steel Corporation in Beaumont, Texas. These assets were combined with our existing scrap processing facility in Beaumont. Also, we closed our Midland, Texas facility, resulting in a writedown of \$455,000 on certain equipment.

Marketing and Distribution. Net sales in 2002 for our marketing and distribution segment increased 1% to \$777 million as compared to 2001. Adjusted operating profit in 2002 increased 82% to \$14.2 million as compared to 2001, mostly due to better results from our Australian operations. International steel prices and volumes for steel and nonferrous semifinished products improved during the second half of 2002, primarily in the distribution and processing businesses. However, depressed economies, oversupply in most markets and intense competition from domestic suppliers in the respective markets caused compressed margins for numerous steel products, nonferrous metal products and industrial raw materials and products. The U.S. dollar weakened against major currencies, a beneficial development.

In September 2001, we completed our acquisition of Coil Steels Group, an Australian service center in which we already owned a 22% share. This acquisition provided \$2.2 million of additional profits and \$69.0 million in net sales during 2002. Sales and profits for the Company's pre-existing business in Australia also improved significantly. However, this increase in net sales was more than offset by decreased sales in our U.S. operations due to fewer imports into the United States.

Table of Contents

Operating profits for the U.S. divisions improved significantly due to Cometals which returned to more historical levels, and Dallas Trading which benefited from U.S. tariff legislation. Lower margins at Commonwealth on semi-finished products almost offset these improvements. Our European operations net sales decreased slightly in 2002 as compared to 2001, but profits improved significantly. The segment's recent strategy of growing its downstream marketing and distribution business offset the continuing very difficult trading conditions.

Other. Selling, general and administrative, as well as employees' retirement plans expenses, were higher in 2002 as compared to 2001, mostly due to our acquisition of Coil Steels Group, or CSG, in 2001 and discretionary items such as bonuses and profit sharing. This increase was consistent with the improvement in our operating profitability. Interest expense decreased by \$8.9 million (32%) from 2001 largely due to lower interest rates and much lower average short-term borrowings. Also, during 2002 we entered into two interest rate swaps which resulted in interest expense savings. During 2002, we favorably resolved all issues for our federal income tax returns through 1999. Due to the lack of any material adjustments, we reevaluated the tax accruals and, consequently, reduced the net tax expense by \$1.0 million during 2002.

2003 Liquidity and Capital Resources

We discuss liquidity and capital resources on a consolidated basis. Our discussion includes the sources and uses of our three operating segments and centralized corporate functions. We have a centralized treasury function and use inter-company loans to efficiently manage the short-term cash needs of our operating divisions. We invest any excess funds centrally.

We rely upon cash flows from operating activities, and to the extent necessary, external short-term financing sources for liquidity. Our short-term financing sources include the issuance of commercial paper, sales of certain accounts receivable, short-term trade financing arrangements and borrowing under our bank credit facilities. From time to time, we have issued long-term public debt and private debt placements. Our investment grade credit ratings and general business conditions affect our access to external financing on a cost-effective basis. Depending on the price of our common stock, we may realize significant cash flows from the exercise of stock options.

Moody's Investors Service (P-2) and Standard & Poor's Corporation (A-2) rate our \$275 million commercial paper program in the second highest category. To support our commercial paper program, we have an unsecured, contractually committed revolving credit agreement with a group of sixteen banks. Our \$275 million facility expires in August 2006. This agreement provides for borrowing in U.S. dollars with the interest rate indexed to LIBOR. The spread over LIBOR may vary between 33 basis points and 105 basis points based upon the rating of our non-credit enhanced senior unsecured long-term debt by Moody's Investors Service and Standard & Poor's Corporation. Actual borrowings are subject to a facility fee which may vary between 17 and 45 basis points based on the same debt ratings. In addition, if we borrow more than 33% of the authorized borrowings under the credit agreement, we will incur an additional 12.5 basis point fee on actual borrowings. No compensating balances are required. The credit agreement serves as a backup to our commercial paper program. We plan to continue our commercial paper program and the revolving credit agreements in comparable amounts to support the commercial paper program.

For added flexibility, we may secure financing through sales of certain accounts receivable in an amount not to exceed \$130 million and direct sales of accounts receivable. We may continually sell accounts receivable on an ongoing basis to replace those receivables that have been collected from our customers. Our long-term public debt was \$362 million at November 30, 2003 and is investment grade rated by Standard & Poor's Corporation (BBB) and by Moody's Investors Service (Baa2). We believe we

Table of Contents

will have access to the public markets for potential refinancing or the issuance of additional long-term debt. In November 2003, we purchased \$89 million of our 7.20% notes otherwise due in 2005 and issued \$200 million of our 5.625% notes due 2013. See Note E, Long-term Debt, to our condensed consolidated financial statements that are incorporated by reference in this prospectus. Also, we have numerous informal, uncommitted, non-binding, short-term credit facilities available from domestic and international banks. These credit facilities are priced at bankers acceptance rates on a cost of funds basis.

In order to facilitate certain trade transactions, especially international, we utilize bank letters of credit to provide assurance of payment to our suppliers. These letters of credit may be for prompt payment or for payment at a future date conditional upon the bank finding the documentation presented to be in strict compliance with all terms and conditions of the letter of credit. Our banks issue these letters of credit under informal, uncommitted, non-binding, short-term lines of credit which are in addition to the committed revolving credit agreement. In some cases, if our suppliers choose to discount the future dated obligation we may absorb the discount cost.

Credit ratings affect our ability to obtain short- and long-term financing and the cost of such financing. If the rating agencies were to reduce our credit ratings, we would pay higher financing costs and probably would have less availability of the informal, uncommitted facilities. In determining our credit ratings, the rating agencies consider a number of both quantitative and qualitative factors. These factors include earnings, fixed charges such as interest, cash flows, total debt outstanding, off balance sheet obligations and other commitments, total capitalization and various ratios calculated from these factors. The rating agencies also consider predictability of cash flows, business strategy, industry conditions and contingencies. Maintaining our investment grade ratings is a high priority for us.

Certain of our financing agreements include various covenants. The most restrictive of these covenants requires us to maintain an interest coverage ratio of greater than three times and a debt to capitalization ratio of 55%, as defined in the financing agreement. A few of the agreements provide that if we default on the terms of another financing agreement, it is considered a default under these agreements. We have complied with the requirements, including the covenants of our financing agreements, as of and for the three months ended November 30, 2003.

Our revolving credit and accounts receivable securitization agreements include ratings triggers. The trigger in the revolving credit agreement is solely a means to reset pricing for facility fees and, if a borrowing occurs, on loans. Within the accounts receivable securitization agreement, the ratings trigger is contained in a termination event, but the trigger requires a combination of ratings actions on behalf of two independent rating agencies and is set at levels six ratings categories below our current rating.

Our manufacturing and recycling businesses are capital intensive. Our capital requirements include construction, purchases of equipment and maintenance capital at existing facilities. We plan to invest in new operations, working capital to support the growth of our businesses, and pay dividends to our stockholders.

We continue to assess alternative means of raising capital, including potential dispositions of under-performing or non-strategic assets. Any potential future major acquisitions could require additional financing from external sources such as the issuance of common or preferred stock.

Cash Flows. Our cash flows from operating activities primarily result from sales of steel and related products, and to a lesser extent, sales of nonferrous metal products. We also sell and rent construction-related products and accessories. We have a diverse and generally stable customer base. We use futures or forward contracts as needed to mitigate the risks from fluctuations in foreign currency exchange rates and metals commodity prices. See Note G, Derivatives and Risk Management, to our condensed consolidated

Table of Contents

financial statements for the three months ended November 30, 2003 incorporated by reference in this prospectus.

The volume and pricing of orders from our U.S. customers in the construction sector affects our cash flows from operating activities. The pace of economic expansion and retraction of major industrialized markets outside of the United States also significantly affects our cash flows from operating activities. The weather can influence the volume of products we ship in any given period. Also, the general economy, the strength of the U.S. dollar, governmental action, and various other factors beyond our control influence our volume and prices. Periodic fluctuations in our prices and volumes can result in variations in cash flows from operations. Despite these fluctuations, we have historically relied on operating activities as a steady source of cash.

We used \$59.3 million of net cash flows in our operating activities for the three months ended November 30, 2003 as compared to the \$53.1 million of net cash flows used by our operating activities for the three months ended November 30, 2002. Net earnings were \$10.4 million higher for the three months ended November 30, 2003 as compared to 2002. Net working capital increased to \$540 million at November 30, 2003 from \$399 million at August 31, 2003 primarily because of increased accounts receivable (primarily in marketing and distribution) and inventories (primarily in manufacturing and marketing and distribution).

We invested \$7.1 million in property, plant and equipment during the three months ended November 30, 2003, which was less than during 2002. We expect our capital spending for fiscal 2004 to be \$61 million, excluding our acquisitions of Huta Zawiercie and Lofland. We assess our capital spending each quarter and reevaluate our requirements based upon current and expected results.

In November 2003, we issued \$200 million of long-term notes due in 2013. The proceeds from that offering were used in November 2003 to purchase \$89 million of our notes otherwise due in 2005, and finance our purchases of Huta Zawiercie and Lofland in December 2003.

At November 30, 2003, 28,325,301 common shares were issued and outstanding, with 3,939,865 held in our treasury. We paid dividends of \$2.2 million during the three months ended November 30, 2003, approximately the same amount paid during 2002. During the three months ended November 30, 2002, we purchased 100,000 shares of our common stock at an average price of \$16.13 per share. These shares were held in our treasury. We purchased no shares during the three months ended November 30, 2003.

We believe that we have sufficient liquidity for fiscal 2004.

Contractual Obligations

The following table represents our contractual obligations as of November 30, 2003 (dollars in thousands):

	Total	Payments Due Within*			After 5 Years
		1 Year	2-3 Years	4-5 Years	
Contractual Obligations:					
Long-term debt(1)	\$362,983	\$ 618	\$12,256	\$50,037	\$300,072
Operating leases(2)	32,852	8,151	10,771	5,811	8,119

Edgar Filing: COMMERCIAL METALS CO - Form S-4

Unconditional purchase obligations(3)	<u>176,858</u>	<u>98,040</u>	<u>51,913</u>	<u>12,834</u>	<u>14,071</u>
Total contractual cash obligations	\$572,693	\$106,809	\$74,940	\$68,682	\$322,262

48

Table of Contents

* Cash obligations herein are not discounted.

(1) Total amounts are included in the November 30, 2003 condensed consolidated balance sheet. See Note E, Long-Term Debt, to our condensed consolidated financial statements for the three months ended November 30, 2003 incorporated by reference in this prospectus.

(2) Includes minimum lease payment obligations for noncancelable equipment and real-estate leases in effect as of November 30, 2003.

(3) About 73% of these purchase obligations are for inventory items to be sold in the ordinary course of business; most of the remainder are for supplies associated with normal revenue-producing activities.

Other Commercial Commitments

We maintain stand-by letters of credit to provide support for certain transactions that our customers and suppliers request. At November 30, 2003, we had committed \$20.7 million under these arrangements. All of the commitments expire within one year.

At the request of a customer and its surety bond issuer, we have agreed to indemnify the surety against all costs the surety may incur should our customer fail to perform its obligations under construction contracts covered by payment and performance bonds issued by the surety. We are the customer's primary supplier of steel, and steel is a substantial portion of our customer's cost to perform the contracts. We believe we have adequate controls to monitor the customer's performance under the contracts including payment for the steel we supply. As of November 30, 2003, the surety had issued bonds in the total amount (without reduction for the work performed to date) of \$11.9 million which are subject to our guaranty obligation under the indemnity agreement.

Contingencies

In the ordinary course of conducting our business, we become involved in litigation, administrative proceedings, government investigations including environmental matters, and contract disputes. We may incur settlements, fines, penalties or judgments because of some of these matters. While we are unable to estimate precisely the ultimate dollar amount of exposure or loss in connection with these matters, we make accruals we deem necessary. The amounts we accrue could vary substantially from amounts we pay due to several factors including the following: evolving remediation technology, changing regulations, possible third-party contributions, the inherent shortcomings of the estimation process, and the uncertainties involved in litigation. Accordingly, we cannot always estimate a meaningful range of possible exposure. We believe that we have adequately provided in our financial statements for the estimable potential impact of these contingencies. We also believe that the outcomes will not significantly affect the long-term results of operations or our financial position. However, they may have a material impact on earnings for a particular period.

Construction Contract Disputes. See Note 9, Commitments and Contingencies, to our consolidated financial statements for the year ended August 31, 2003 that are incorporated by reference in this prospectus.

Table of Contents

Environmental and Other Matters

General. We are subject to federal, state and local pollution control laws and regulations. We anticipate that compliance with these laws and regulations will involve continuing capital expenditures and operating costs.

Our original business and one of our core businesses for over eight decades is metals recycling. In the present era of conservation of natural resources and ecological concerns, we are committed to sound ecological and business conduct. Certain governmental regulations regarding environmental concerns, however well intentioned, are contrary to the goal of greater recycling. Such regulations expose us and the industry to potentially significant risks.

We believe that recycled materials are commodities that are diverted by recyclers, such as us, from the solid waste streams because of their inherent value. Commodities are materials that are purchased and sold in public and private markets and commodities exchanges every day around the world. They are identified, purchased, sorted, processed and sold in accordance with carefully established industry specifications.

Environmental agencies at various federal and state levels classify certain recycled materials as hazardous substances and subject recyclers to material remediation costs, fines and penalties. Taken to extremes, such actions could cripple the recycling industry and undermine any national goal of material conservation. Enforcement, interpretation, and litigation involving these regulations are not well developed.

Solid and Hazardous Waste. We currently own or lease, and in the past owned or leased, properties that have been used in our operations. Although we used operating and disposal practices that were standard in the industry at the time, wastes may have been disposed or released on or under the properties or on or under locations where such wastes have been taken for disposal. We are currently involved in the investigation and remediation of several such properties. State and federal laws applicable to wastes and contaminated properties have gradually become stricter over time. Under new laws, we could be required to remediate properties impacted by previously disposed wastes. We have been named as a potentially responsible party at a number of contaminated sites.

We generate wastes, including hazardous wastes, that are subject to the federal Resource Conservation and Recovery Act (RCRA) and comparable state and/or local statutes where we operate. These statutes, regulations and laws may have limited disposal options for certain wastes.

Superfund. The U.S. Environmental Protection Agency, or EPA, or an equivalent state agency notified us that we are considered a potentially responsible party, or PRP, at fourteen sites, none owned by us. We may be obligated under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, or CERCLA, or a similar state statute to conduct remedial investigation, feasibility studies, remediation and/or removal of alleged releases of hazardous substances or to reimburse the EPA for such activities. We are involved in litigation or administrative proceedings with regard to several of these sites in which we are contesting, or at the appropriate time we may contest, our liability at the sites. In addition, we have received information requests with regard to other sites which may be under consideration by the EPA as potential CERCLA sites.

Clean Water Act. The Clean Water Act (CWA) imposes restrictions and strict controls regarding the discharge of wastes into waters of the United States, a term broadly defined. These controls have become more stringent over time and it is probable that additional restrictions will be imposed in the future. Permits must generally be obtained to discharge pollutants into federal waters; comparable permits

Table of Contents

may be required at the state level. The CWA and many state agencies provide for civil, criminal and administrative penalties for unauthorized discharges of pollutants. In addition, the EPA has promulgated regulations that may require us to obtain permits to discharge storm water runoff. In the event of an unauthorized discharge, we may be liable for penalties and costs.

Clean Air Act. Our operations are subject to regulations at the federal, state and local level for the control of emissions from sources of air pollution. New and modified sources of air pollutants are often required to obtain permits prior to commencing construction, modification and/or operations. Major sources of air pollutants are subject to more stringent requirements, including the potential need for additional permits and to increased scrutiny in the context of enforcement. The EPA has been implementing its stationary emission control program through expanded enforcement of the New Source Review Program. Under this program, new or modified sources are required to construct what is referred to as the Best Available Control Technology. Additionally, the EPA is implementing new, more stringent standards for ozone and fine particulate matter. The EPA recently has promulgated new national emission standards for hazardous air pollutants for steel mills which will require all major sources in this category to meet the standards by reflecting application of maximum achievable control technology. Compliance with the new standards could require additional expenditures.

In fiscal 2003, we incurred environmental expense of \$11.8 million. This expense included the cost of environmental personnel at various divisions, permit and license fees, accruals and payments for studies, tests, assessments, remediation, consultant fees, baghouse dust removal and various other expenses. Approximately \$4.2 million of our capital expenditures for 2003 related to costs directly associated with environmental compliance. At August 31, 2003, \$2.9 million was accrued for environmental liabilities of which \$1.3 million is classified as other long-term liabilities.

Dividends

We have paid quarterly cash dividends in each of the past 40 consecutive years. We paid dividends in the three months ended November 30, 2003 and for the year ended August 31, 2003 at the rate of 8 cents per share each quarter.

Table of Contents

COMPANY OVERVIEW

We manufacture, recycle, market and distribute steel and metal products and related materials and services through a network of locations located throughout the United States and internationally. Steel and steel-related products represent over 75% of our business. We consider our business to be organized into three segments: manufacturing, recycling, and marketing and distribution. During the fiscal year ended August 31, 2003, we derived approximately 36% of our adjusted operating profit from our manufacturing segment, approximately 26% from our recycling segment and approximately 38% from our marketing and distribution segment. For a reconciliation of adjusted operating profit (loss) to net earnings (loss), see Prospectus Summary-Our Company.

Manufacturing Segment

Our manufacturing segment is our dominant and most rapidly expanding segment. Our steel manufacturing capacity is approximately 2.3 million tons, and we produce reinforcing bars, light and mid-size structurals, angles, channels, beams, special bar quality rounds and flats, squares and special sections used in the construction, manufacturing, steel fabrication, warehousing and original equipment manufacturing industries. Our steel fabrication capacity is approximately 1.1 million tons. For a discussion of certain risks affecting our manufacturing business, see Risk Factors-Risks Related to Our Industry. Our copper tube mill has approximately 80.0 million pounds of capacity and manufactures copper water, air conditioning and refrigeration tubing.

Recycling Segment

Our recycling segment is one of the largest processors of scrap nonferrous metals and a major regional processor of ferrous metals in the Southeastern and Southwestern United States. Our recycling plants processed and shipped approximately 1.9 million tons of scrap metal in the year ended August 31, 2003, not including 900,000 tons processed by the manufacturing segment's plants. Recycling metals provides substantial savings in energy compared to producing metal from virgin raw materials. The recycling segment operates 34 secondary metal processing facilities in addition to the ten recycling facilities operated by our steel group as a part of our manufacturing segment.

Marketing and Distribution Segment

Our marketing and distribution segment buys and sells primary and secondary metals, fabricated metals and other industrial products through a global network of offices which also provide technical information, financing, chartering of vessels, storage, insurance and hedging for our customers. Although we do engage in hedging transactions to mitigate the risks associated with certain transactions, we do not, as a matter of policy, speculate on changes in the commodities markets. This segment sold approximately 2.1 million tons of steel products during the year ended August 31, 2003.

Table of Contents

DESCRIPTION OF NOTES

We issued the old notes, and will issue the new notes, under the Indenture, dated as of July 31, 1995 (the Original Indenture Date), between the Company and JPMorgan Chase Bank (formerly The Chase Manhattan Bank (successor to The Chase Manhattan Bank, N.A.)), as Trustee (the Trustee), as supplemented by the Supplemental Indenture, dated as of November 12, 2003 (as so supplemented, the Indenture). The new notes will evidence the same debt as the old notes, and the new notes and the old notes will be treated as a single class of debt securities under the Indenture. The terms of the notes include those stated in the Indenture and those made part of the Indenture by reference to the Trust Indenture Act of 1939. The Company has in the past issued, and may from time to time in the future issue, additional series of debt securities under the Indenture. Such other debt securities may have terms and conditions that are different from the terms and conditions of the notes.

The following description is only a summary of the material provisions of the Indenture and the notes. We urge you to read the Indenture because it, not this description, defines your rights as noteholders. You may request copies of the Indenture at our address set forth under the heading Incorporation By Reference. Capitalized terms not otherwise defined herein shall have the respective meanings given to them in the Indenture. In this description, the words Company, we, us and our refer only to Commercial Metals Company and not to any of its subsidiaries. In addition, the old notes are subject to restrictions on transfer as described more fully in the Indenture.

Title

5.625% Senior Notes due 2013.

Principal Amount of Notes

We will issue up to an aggregate principal amount of \$200,000,000 of new notes in the exchange offer. We will issue the new notes in integral multiples of \$1,000, through the facilities of The Depository Trust Company, and sales in book-entry form may be effected only through a participating member of DTC. See Book-Entry System. We may from time to time, without notice to or the consent of the noteholders, increase the aggregate principal amount of our debt under the Indenture by creating and issuing further notes under the Indenture on the same terms and conditions as the notes being offered hereby, except for issue date, issue price, preissuance accrued interest and first interest payment date. Any further notes will be consolidated and form a single series with the notes and will have the same terms as to status, redemption or otherwise as the notes. Any further notes will be issued by or pursuant to a resolution of our Board of Directors or a supplement to the Indenture.

Maturity of Notes

The notes will mature on November 15, 2013.

Interest Rate on Notes

The interest rate on the notes is 5.625% per annum, computed on the basis of a 360-day year consisting of twelve 30-day months.

Date Interest Begins to Accrue on New Notes

Interest on the new notes will accrue from the date of original issuance.

Table of Contents

Interest Payment Dates

We will pay interest on the notes semi-annually on each May 15 and November 15 (each an Interest Payment Date). Interest payable on each Interest Payment Date will include interest accrued from and including the date of original issuance, or from and including the most recent Interest Payment Date to which interest has been paid or duly provided for, to but excluding the applicable Interest Payment Date.

First Interest Payment Date

The first interest payment date for the notes will be May 15, 2004.

Regular Record Dates for Interest

We will pay interest payable on any Interest Payment Date to the person in whose name a note is registered at the close of business on May 1 or November 1, as the case may be, next preceding such Interest Payment Date.

Paying Agent

The Trustee will initially be the securities registrar and paying agent and will act as such only at its offices in New York, New York. We may at any time designate additional paying agents or rescind the designations or approve a change in the offices where they act.

Ranking

The notes are our senior unsecured obligations and rank equally in right of payment with all of our existing and future senior unsecured indebtedness. The notes rank junior to any of our secured debt to the extent of the assets securing such debt and are structurally subordinated to the indebtedness and other liabilities of our subsidiaries, including trade payables.

Optional Redemption

The notes are redeemable in whole or in part at any time and from time to time, at our option, at a redemption price equal to the greater of:

100% of the principal amount of the notes to be redeemed; or

the sum of the present values, calculated as of the redemption date, of the remaining scheduled payments of principal and interest on the notes to be redeemed (exclusive of interest accrued to the date of redemption) discounted to the date of redemption on a semiannual basis (assuming a 360-day year consisting of twelve 30-day months) at the then current Treasury Rate plus 20 basis points.

plus, in each case, we will pay accrued and unpaid interest on the principal amount being redeemed to the date of redemption.

Comparable Treasury Issue means the United States Treasury security selected by an Independent Investment Banker as having a maturity comparable to the remaining term (Remaining Life) of the notes to be redeemed that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of such notes.

Table of Contents

Comparable Treasury Price means, with respect to any redemption date, (1) the average of the Reference Treasury Dealer Quotations for such redemption date, after excluding the highest and lowest Reference Treasury Dealer Quotations, or (2) if the Trustee obtains fewer than four such Reference Treasury Dealer Quotations, the average of all such quotations.

Independent Investment Banker means one of the Reference Treasury Dealers that we appoint to act as the Independent Investment Banker from time to time.

Reference Treasury Dealer means each of Goldman, Sachs & Co. and Banc of America Securities LLC and their respective successors, and two other firms that are primary U.S. Government securities dealers (each a Primary Treasury Dealer) which we specify from time to time; provided, however, that if any of them ceases to be a Primary Treasury Dealer, we will substitute another Primary Treasury Dealer.

Reference Treasury Dealer Quotations means, with respect to each Reference Treasury Dealer and any redemption date, the average, as determined by the Trustee, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Trustee by such Reference Treasury Dealer at 5:00 p.m., Eastern Standard time, on the third business day preceding such redemption date.

Treasury Rate means, with respect to any redemption date, the rate per year equal to: (1) the yield, under the heading which represents the average for the immediately preceding week, appearing in the most recently published statistical release designated H.15(519) or any successor publication which is published weekly by the Board of Governors of the Federal Reserve System and which establishes yields on actively traded United States Treasury securities adjusted to constant maturity under the caption Treasury Constant Maturities, for the maturity corresponding to the Comparable Treasury Issue; provided that, if no maturity is within three months before or after the Remaining Life of the notes to be redeemed, yields for the two published maturities most closely corresponding to the Comparable Treasury Issue shall be determined and the Treasury Rate shall be interpolated or extrapolated from those yields on a straight line basis, rounding to the nearest month, or (2) if such release (or any successor release) is not published during the week preceding the calculation date or does not contain such yields, the rate per year equal to the semiannual equivalent yield to maturity of the Comparable Treasury Issue, calculated using a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such redemption date. The Treasury Rate shall be calculated on the third business day preceding the redemption date.

Notice of redemption will be mailed at least 30 but not more than 60 days before the redemption date to each holder of record of the notes to be redeemed at its registered address. The notice of redemption for the notes will state, among other things, the amount of notes to be redeemed, the redemption date, the manner of calculation of the redemption price and the place or places that payment will be made upon presentation and surrender of notes to be redeemed. Unless we default in the payment of the redemption price, interest will cease to accrue on any notes that have been called for redemption at the redemption date.

Limitation on Liens

The Indenture provides that we may not, and may not permit any Principal Subsidiary to, incur or suffer to exist any Lien upon any Principal Property, or upon any shares of stock of any Principal Subsidiary, whether such Principal Property or shares were owned as of the Original Indenture Date or thereafter acquired, to secure any Debt without making, or causing such Principal Subsidiary to make,

Table of Contents

effective provision for securing the notes and other debt securities issued under the Indenture equally and ratably with, or prior to, such Debt, unless after giving effect thereto, the sum of the following:

- (A) the principal amount of Debt secured by all Liens incurred after the Original Indenture Date and otherwise prohibited by the Indenture as in effect with respect to the notes or any other debt securities of the Company issued under the Indenture; and
- (B) the Attributable Debt of all Sale and Leaseback Transactions entered into after the Original Indenture Date and otherwise prohibited by the Indenture as in effect with respect to the notes or any other debt securities of the Company issued under the Indenture does not exceed 10% of Consolidated Net Tangible Assets.

The foregoing restrictions will not apply to Liens existing at the Original Indenture Date or to the following:

- (1) Liens securing only debt securities issued under the Indenture;
- (2) Liens in favor of only the Company;
- (3) Liens on property of a Person existing at the time such Person is merged into or consolidated with the Company or any Principal Subsidiary but only to the extent such Liens cover such property;
- (4) Liens on property existing immediately prior to the time of acquisition thereof and not in anticipation of the financing of such acquisition;
- (5) any Lien upon a Principal Property, including any property that becomes a Principal Property after acquisition thereof, to secure Debt incurred for the purpose of financing all or any part of the purchase price or the cost of construction or improvement thereof incurred within six months after the later of the purchase thereof and the completion of construction or improvements thereon;
- (6) Liens to secure Debt incurred to extend, renew, refinance or refund Debt secured by any Lien referred to in the foregoing clauses (1) to (5); and
- (7) any Lien securing Debt we owe to a wholly owned Principal Subsidiary.

Attributable Debt means the present value (discounted at the per annum rate of interest publicly announced by Bank of America National Trust & Savings Association as its Reference Rate or Prime Rate, provided, that if Bank of America National Trust & Savings Association is no longer announcing a Reference Rate or Prime Rate, the per annum rate of interest shall be the Prime Rate most recently published in The Wall Street Journal, in either case compounded monthly) of the obligations for rental payments required to be paid during the remaining term of any lease of more than 12 months.

Capital Lease Obligation of any Person means the obligation to pay rent or other payment amounts under a lease of, or other indebtedness arrangements conveying the right to use, real or personal property of such Person which is required to be classified and accounted for as a capital lease or a liability on the face of a balance sheet of such Person in accordance with generally accepted accounting principles. The stated maturity of such obligation, as of any date (the measurement date), shall be the date of the last payment of rent or any other amount due under such lease prior to the first date after the measurement date upon which such lease may be terminated by the lessee, at its sole option, without payment of a penalty.

Table of Contents

Consolidated Net Tangible Assets means the net book value of all assets of the Company and its Consolidated Subsidiaries, excluding any amounts carried as assets for shares of capital stock held in treasury, debt discount and expense, goodwill, patents, trademarks and other intangible assets, less all liabilities of the Company and its Consolidated Subsidiaries (except Funded Debt, minority interests in Consolidated Subsidiaries, deferred taxes and general contingency reserves of the Company and its Consolidated Subsidiaries), which in each case would be included on a consolidated balance sheet of the Company and its Consolidated Subsidiaries as of the date of determination, all as determined on a consolidated basis in accordance with generally accepted accounting principles.

Consolidated Tangible Net Worth means the total stockholders' equity of the Company and its Consolidated Subsidiaries, calculated in accordance with generally accepted accounting principles and reflected on the most recent balance sheet of the Company, excluding any amounts carried as assets for shares of capital stock held in treasury, debt discount and expense, goodwill, patents, trademarks and other intangible assets.

Debt means, without duplication, with respect to any Person the following:

- (1) every obligation of such Person for money borrowed;
- (2) every obligation of such Person evidenced by bonds, debentures, notes or other similar instruments;
- (3) every reimbursement obligation of such Person with respect to letters of credit, bankers' acceptances or similar facilities issued for the account of such Person; and
- (4) every obligation of the type referred to in clauses (1) through (3) of another Person the payment of which such Person has guaranteed or is responsible or liable for, directly or indirectly, as obligor, guarantor or otherwise, but only, in the case of clause (4), to the extent such Person has guaranteed or is responsible or liable for such obligations.

Funded Debt means the following:

- (1) all Debt of the Company and each Principal Subsidiary maturing on, or renewable or extendable at the option of the obligor to, a date more than one year from the date of the determination thereof;
- (2) Capital Lease Obligations payable on a date more than one year from the date of the determination thereof;
- (3) guarantees, direct or indirect, and other contingent obligations of the Company and each Principal Subsidiary in respect of, or to purchase or otherwise acquire or be responsible or liable for, through the investment of funds or otherwise, any obligations of the type described in the foregoing clauses (1) or (2) of others, but not including contingent liabilities on customers' receivables sold with recourse; and
- (4) amendments, renewals, extensions and refundings of any obligations of the type described in the foregoing clauses (1), (2) or (3).

Lien means, with respect to any property or assets, any mortgage or deed of trust, pledge, hypothecation, assignment, security interest, lien, encumbrance, or other security arrangement of any kind

Table of Contents

or nature whatsoever on or with respect to such property or assets, including any conditional sale or other title retention agreement having substantially the same economic effect as any of the foregoing.

Principal Property means any facility, together with the land on which it is erected and fixtures comprising a part thereof, used primarily for manufacturing, processing, research, warehousing or distribution, owned or leased by the Company or a Subsidiary of the Company and having a net book value in excess of 3% of Consolidated Net Tangible Assets, other than any such facility or portion thereof which is a pollution control facility financed by state or local government obligations or is not of material importance to the total business conducted or assets owned by the Company and its Subsidiaries as an entirety, or any assets or properties acquired with Net Available Proceeds (defined below) from a Sale and Leaseback Transaction that are irrevocably designated by the Company or a Subsidiary as a Principal Property, which designation shall be made in writing to the Trustee.

Principal Subsidiary means any Subsidiary of the Company that owns or leases a Principal Property or owns or controls stock which under ordinary circumstances has the voting power to elect a majority of the Board of Directors of a Principal Subsidiary.

Sale and Leaseback Transaction of any Person means an arrangement with any lender or investor or to which such lender or investor is a party providing for the leasing by such Person of any Principal Property that within 12 months of the start of such lease and after the Reference Date, has been or is being sold, conveyed, transferred or otherwise disposed of by such Person to such lender or investor or to any Person to whom funds have been or are to be advanced by such lender or investor on the security of such property. The term of such arrangement, as of any date (the measurement date), shall end on the date of the last payment of rent or any other amount due under such arrangement on or prior to the first date after the measurement date on which such arrangement may be terminated by the lessee, at its sole option, without payment of a penalty. *Sale Transaction* means any such sale, conveyance, transfer or other disposition. The *Reference Date* means, for any property that becomes a Principal Property, the last day of the sixth month after the date of the acquisition, completion of construction and commencement of operation of such property.

Subsidiary of the Company means any corporation of which the Company directly or indirectly owns or controls stock which under ordinary circumstances, not dependent upon the happening of a contingency, has the voting power to elect a majority of the board of directors of such corporation.

Limitation on Funded Debt of Principal Subsidiaries

The Indenture provides that we will not permit any Principal Subsidiary to incur or assume, directly or indirectly, any Funded Debt unless immediately after giving effect thereto and the receipt and application of the proceeds thereof, the aggregate principal amount of all outstanding Funded Debt of all Principal Subsidiaries other than Funded Debt owed to us or another directly or indirectly wholly-owned Subsidiary does not exceed 30% of Consolidated Tangible Net Worth. The provisions of this limitation will not prevent the following:

- (1) any Funded Debt of a Principal Subsidiary owed to us or another Principal Subsidiary;
- (2) any Funded Debt from a mortgage permitted under the provisions described in clauses (1) through (7) in the second paragraph under *Limitation on Liens*; or
- (3) any extension, renewal or refunding in whole or in part, without increase in amount, of any Funded Debt (a) of a Principal Subsidiary as aforementioned, (b) of a Principal Subsidiary

Table of Contents

outstanding at the Original Indenture Date or (c) of any corporation outstanding at the time it becomes a Principal Subsidiary.

Limitation on Sale and Leaseback Transactions

Neither the Company nor any Principal Subsidiary may enter into any Sale and Leaseback Transaction unless:

- (1) the Company or such Principal Subsidiary could incur a mortgage on such property under the restrictions described above under Limitations on Liens in an amount equal to the Attributable Debt with respect to the Sale and Leaseback Transaction without equally and ratably securing the notes; or
- (2) the Company or a Principal Subsidiary, within 270 days, applies the Net Available Proceeds from the Sale and Leaseback Transaction to any combination of the following:
 - (a) the retirement of its Funded Debt;
 - (b) the purchase of other property or assets which will (I) constitute Principal Property and (II) have an aggregate value of at least the consideration paid for such property or assets; or
 - (c) Capital Expenditures with respect to any existing Principal Property, subject to credits for certain voluntary retirements of Funded Debt.

This restriction will not apply to any Sale and Leaseback Transaction involving the taking back of a lease for a period of less than three years.

Net Available Proceeds from any Sale and Leaseback Transaction by any Person means cash or readily marketable cash equivalents received (including by way of sale or discounting of a note, installment receivable or other receivable, but excluding any other consideration received in the form of assumption by the acquirer of indebtedness or obligations relating to the properties or assets that are the subject of such Sale and Leaseback Transaction or received in any other noncash form) therefrom by such Person, net of the following:

- (1) all legal, title and recording tax expenses, commissions and other fees and expenses incurred and all federal, state, provincial, foreign and local taxes required to be accrued as a liability as a consequence of such Sale and Leaseback Transaction;
- (2) all payments made by such Person or its subsidiaries on any indebtedness which is secured in whole or in part by any such properties and assets in accordance with the terms of any Lien upon or with respect to any such properties and assets or which must, by the terms of such Lien or in order to obtain a necessary consent to such Sale and Leaseback Transaction or by applicable law, be repaid out of the proceeds from such Sale and Leaseback Transaction; and

- (3) all distributions and other payments made to minority interest holders in subsidiaries of such Person or joint ventures as a result of such Sale and Leaseback Transaction.

Restrictions on Merger and Sale of Assets

The Indenture provides that we may not consolidate with or merge into any other Person or convey, transfer or lease our properties and assets substantially as an entirety to any Person, and we may not

Table of Contents

permit any Person to consolidate with or merge into us or convey, transfer or lease its properties and assets substantially as an entirety to us, unless:

- (1) the Person, if other than the Company, formed by such consolidation or into which we are merged or the Person which acquires by conveyance or transfer, or which leases, the properties and assets of the Company substantially as an entirety shall expressly assume the due and punctual payment of the principal of and interest on all the notes and the performance or observance of every covenant of the Indenture on the part of the Company to be performed or observed;
- (2) immediately after giving effect to such transaction and treating any indebtedness which becomes our obligation or an obligation of any Principal Subsidiary as a result of such transaction as having been incurred by us or such Principal Subsidiary at the time of such transaction, no Event of Default under the Indenture, and no event which, after notice or lapse of time or both, would become an Event of Default under the Indenture, shall have happened and be continuing; and
- (3) if, as a result of any such transaction, property or assets of the Company or any Principal Subsidiary would become subject to a Lien which would not be permitted by the limitations on Liens contained in the Indenture, we or, if applicable, our successor, as the case may be, shall take such steps as shall be necessary to effectively secure the notes equally and ratably with, or prior to, the Debt secured by such Lien.

Events of Default

Each of the following is an Event of Default for the notes:

- (1) failure to pay principal of, or premium, if any, on the notes when due;
- (2) failure to pay any interest on the notes when due, continued for 30 days;
- (3) failure to perform any other covenant of the Company in the Indenture, other than a covenant the performance of which is dealt with specifically elsewhere in the Indenture or which has been included in the Indenture solely for the benefit of series of debt securities other than the notes, continuing for 60 days after written notice as provided in the Indenture;
- (4) failure to pay when due, after applicable grace periods as provided in the Indenture, the principal of, or the acceleration of, any indebtedness for money borrowed by the Company or any Principal Subsidiary having an aggregate principal amount outstanding in excess of an amount equal to 3% of Consolidated Net Tangible Assets, if such indebtedness is not discharged, or such acceleration is not annulled, within ten days after written notice as provided in the Indenture; and
- (5) certain events of bankruptcy, insolvency or reorganization.

The notice referred to in clauses (3) and (4) may be given by the Trustee under the Indenture or by the holders of at least 25% in aggregate principal amount of the Outstanding notes. In case an Event of Default under the Indenture occurs and is continuing, then, subject to the provisions of the Indenture and the Trust Indenture Act relating to the duties of the Trustee under the Indenture, the Trustee will be under no obligation to exercise any of its rights or powers under the Indenture at the request or direction of any of the noteholders, unless the noteholders shall have offered to the Trustee reasonable indemnity. The holders of a majority in aggregate principal amount of the notes Outstanding shall have the right, subject to such provisions for indemnification of the Trustee to direct the time, method and place of conducting

Table of Contents

any proceeding for any remedy available to the Trustee under the Indenture or exercising any trust or power conferred on the Trustee with respect to the notes.

If an Event of Default occurs and is continuing, the Trustee or the holders of not less than 25% in principal amount of the notes Outstanding may, by a notice in writing to us, and to the Trustee if given by noteholders, declare to be due and payable immediately the principal amount of the notes. However, at any time after such a declaration of acceleration of the notes has been made, but before a judgment or decree for payment of the money due has been obtained by the Trustee, the holders of a majority in the principal amount of the notes Outstanding may, subject to certain conditions, rescind and annul such acceleration. For information as to waiver of defaults, see **Modification and Waiver** herein.

No holder of any notes will have any right to institute any proceeding with respect to the Indenture or for any remedy thereunder, unless such holder of notes shall have previously given to the Trustee written notice of a continuing Event of Default and unless the holders of at least 25% in aggregate principal amount of the notes Outstanding shall have made written request, and offered reasonable indemnity, to the Trustee to institute such proceeding as trustee, and the Trustee shall not have received from the holders of a majority in aggregate principal amount of the notes Outstanding a direction inconsistent with such request and failed to institute such proceeding within 60 days. However, such limitations do not apply to a suit instituted by a holder of notes for enforcement of payment of the principal of, and premium, if any, and any interest on the notes on or after the respective due dates expressed in the notes.

We will be required to furnish to the Trustee annually a statement as to whether we are in default in the performance and observance of any of the terms, provisions and conditions of the Indenture. The Indenture provides that the Trustee may withhold notice to the noteholders of any default, except in payment of principal, any premium or interest, if it considers it in the interest of the noteholders to do so.

Modification and Waiver

Together with the Trustee, we may modify the Indenture without the consent of the noteholders for limited purposes, including but not limited to adding to our covenants or events of default, securing the notes, establishing terms of additional notes, appointing a substitute trustee, curing ambiguities and making other changes that do not adversely affect the rights of the noteholders in any material respect. In addition, we and the Trustee may make modifications and amendments to the Indenture with the consent of the holders of a majority in aggregate principal amount of the Outstanding debt securities of each series of notes affected by such modification; provided, however, that no such modification or amendment may, without the consent of the holder of each such Outstanding debt security affected thereby,

- (1) change the stated maturity of the principal of, or any installment of principal or interest on any note,
- (2) reduce the principal amount of or the rate of interest or the premium, if any, on any note,
- (3) change the place or currency of payment of principal of or interest or the premium, if any, on any note,
- (4) impair the right to institute suit for the enforcement of any payment with respect to the notes on or after the stated maturity thereof,
- (5)

reduce the above-stated percentage in principal amount of Outstanding notes the consent of whose holders is required for any such supplemental indenture or

Table of Contents

(6) reduce the above-stated percentage of Outstanding notes the consent of whose holders is required for waiver of compliance with certain provisions of the Indenture or for waiver of certain defaults thereunder.

We may, in the circumstances permitted by the Trust Indenture Act, set any day as the record date for the purpose of determining the noteholders entitled to give or take any request, demand, authorization, direction, notice, consent, waiver or other action as provided or permitted by the Indenture.

The holders of a majority in aggregate principal amount of the notes Outstanding may on behalf of the holders of all notes waive, insofar as the notes are concerned (but not as to any other series of debt securities issued under the Indenture) compliance by the Company with the covenants limiting Liens and Sale and Leaseback Transactions contained in the Indenture. The holders of a majority in aggregate principal amount of the notes Outstanding may on behalf of the holders of all notes waive any past default under the Indenture except a default in the payment of the principal of, or premium, if any, or any interest on the notes or in respect of a provision which under the Indenture cannot be modified or amended without the consent of the holder of each Outstanding note affected.

For purposes of the Indenture, the notes Outstanding thereunder are deemed to exclude those held by Persons that control, are controlled by or are under common control with the Company, provided that any Person who does not own, directly or indirectly, more than 5% of the outstanding voting securities of the Company will not be deemed to control the Company.

Defeasance

Defeasance and Discharge. The Indenture provides that the Company may elect to deposit or cause to be deposited with the Trustee as trust funds in trust, for the benefit of the holders of Outstanding notes, money and/or U.S. Government Obligations sufficient to pay and discharge the principal of, and premium, if any, and any interest on and any mandatory sinking fund payments in respect of the notes on the stated maturity of such payments in accordance with the terms of the Indenture and the notes, and thereby be discharged from its obligations with respect to Outstanding notes (hereinafter called *Defeasance*) on and after the date that, among other things, the Company provides to the Trustee certain evidence that (1) the Company has received from, or there has been published by, the Internal Revenue Service a ruling, or (2) there has been a change in the applicable Federal income tax law, in each case to the effect that the noteholders will not recognize gain or loss for Federal income tax purposes as a result of the deposit, Defeasance and discharge to be effected with respect to notes and will be subject to Federal income tax on the same amount, in the same manner and at the same times as would be the case if such deposit, Defeasance and discharge were not to occur. For this purpose, such Defeasance means that the Company will be deemed to have paid and discharged the entire Indebtedness represented by such Outstanding notes and to have satisfied all its other obligations under the notes and the Indenture insofar as the notes are concerned, except for certain continuing administrative responsibilities. In the event of any such Defeasance, noteholders would be able to look only to such trust for payment of principal of, and premium, if any, and any interest on and any mandatory sinking fund payments in respect of the notes.

Covenant Defeasance. The Indenture provides that the Company may elect to deposit or cause to be deposited with the Trustee as trust funds in trust, for the benefit of the holders of Outstanding notes, money and/or U.S. Government Obligations sufficient to pay and discharge the principal, and premium, if any, of and any interest on and any mandatory sinking fund payments in respect of the notes on the stated maturity of such payments in accordance with the terms of the Indenture and such notes, and thereby (1) be released from its obligations with respect to the notes under certain covenants in the Indenture, including the covenants relating to maintenance of properties, payment of taxes and other claims,

Table of Contents

limitation on Liens, limitation on Sale and Leaseback Transactions, and Merger and (2) have the occurrence of certain defaults in performance, or breach, of covenants and warranties under the Indenture and defaults under other obligations of the Company not be deemed to be or result in an Event of Default, in each case with respect to the Outstanding notes (hereinafter called *Covenant Defeasance*), on and after the date that, among other things, the Company provides to the Trustee certain evidence that the holders of Outstanding notes will not recognize gain or loss for Federal income tax purposes as a result of the deposit and *Covenant Defeasance* to be effected with respect to the notes and will be subject to Federal income tax on the same amount, in the same manner and at the same times as would be the case if such deposit and *Covenant Defeasance* were not to occur. For this purpose, such *Covenant Defeasance* means that the Company may omit to comply with and shall have no liability in respect of any term, condition or limitation set forth in any such specified Indenture provision, whether directly or indirectly by reason of any reference elsewhere in the Indenture to any such provision or by reason of any reference in any such provision to any other provision of the Indenture or in any other document, but the remainder of the Indenture and the notes shall be unaffected thereby. The obligations of the Company under the Indenture and the notes other than with respect to the covenants referred to above and the Events of Default other than the Events of Default referred to above shall remain in full force and effect.

The term *U.S. Government Obligations* means any security that is a direct obligation, or is subject to an unconditional guarantee, of the United States of America for the payment of which the full faith and credit of the United States of America is pledged.

Book-Entry System

The new notes will be evidenced by global securities, which will be deposited on behalf of DTC and registered in the name of a nominee of DTC.

The global securities are in this prospectus sometimes referred to individually as a *global security* and collectively as the *global securities*. Except as set forth below, the record ownership of the global securities may be transferred, in whole or in part, only to DTC, another nominee of DTC or to a successor of DTC or its nominee.

Except under circumstances described below, the new notes will not be issued in definitive form. See *Certificated Securities*. Upon the issuance of a global security, DTC will credit on its book-entry registration and transfer system the accounts of persons participating in the exchange offer with the respective principal amounts of the new notes represented by the global security. Ownership of beneficial interests in a global security will be limited to persons that have accounts with DTC or its nominee (*participants*) or persons that may hold interests through participants. Owners of beneficial interests in the new notes represented by the global securities will hold their interests pursuant to the procedures and practices of DTC. Ownership of beneficial interests in a global security will be shown on, and the transfer of that ownership will be effected only through, records maintained by DTC or its nominee. The laws of some states require that certain purchasers of securities take physical delivery of such securities in definitive form. Such limits and such laws may impair the ability to transfer beneficial interests in a global security. DTC will have no knowledge of the actual beneficial owners of the global securities; DTC's records reflect only the identity of the participants to whose accounts such global securities are credited, which may or may not be the beneficial owners of the global securities. The participants will remain responsible for keeping account of their holdings on behalf of their customers. Conveyance of notices and other communications by DTC to participants and by participants to the beneficial owners of the global securities will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Table of Contents

Persons participating in the exchange offer may hold their interest in the global securities directly through DTC if they are DTC participants, or indirectly through organizations which are participants in DTC. Transfers between participants will be effected in the ordinary way in accordance with DTC rules and will be settled in immediately available funds.

So long as DTC or its nominee is the registered owner of a global security, DTC or its nominee, as the case may be, will be considered the sole owner or holder of the new notes represented by that global security for all purposes under the Indenture. Except as provided below, owners of beneficial interests in a global security will not be entitled to have new notes represented by that global security registered in their names, will not receive or be entitled to receive physical delivery of new notes in definitive form and will not be considered the owners or holders thereof under the Indenture. Beneficial owners will not be holders and will not be entitled to any rights provided to the noteholders under the global securities or the Indenture. Principal payments, interest payments and liquidated damage payments, if any, on new notes registered in the name of DTC or its nominee will be made to DTC or its nominee, as the case may be, as the registered owner of the relevant global security. None of Commercial Metals Company, the Trustee or the registrar for the new notes will have any responsibility or liability for any aspect of the records relating to, or payments made on account of, beneficial interests in a global security or for maintaining, supervising or reviewing any records relating to such beneficial interests.

Payments of principal and interest to DTC will be the responsibility of the Company or the Trustee. The disbursement of such payments to participants shall be the responsibility of DTC. We expect that DTC or its nominee, upon receipt of any payment of principal or interest, if any, will credit immediately participants' accounts with payments in amounts proportionate to their respective beneficial interests in the principal amount of the relevant global security as shown on the records of DTC or its nominee. We also expect that payments by participants to owners of beneficial interests in a global security held through such participants will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in street name, and will be the responsibility of such participants and not DTC, the Company or the Trustee, subject to any statutory or regulatory requirements as may be in effect from time to time.

If we redeem less than all of the global security, we have been advised that it is DTC's practice to determine by lot the amount of the interest of each participant in the global security to be redeemed.

DTC has advised us that it is a limited-purpose trust company organized under the New York Banking Law, a banking organization within the meaning of the New York Banking Law, a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code, and a clearing agency registered pursuant to the provisions of Section 17A of the Exchange Act. DTC is owned by a number of its participants and by the New York Stock Exchange, Inc., the American Stock Exchange LLC, and the National Association of Securities Dealers, Inc.

DTC holds securities deposited with it by its participants and facilitates the settlement of transactions among its participants in such securities through electronic computerized book-entry changes in accounts of the participants, thereby eliminating the need for physical movement of securities certificates. DTC's participants include securities brokers and dealers (including the Initial Purchasers), banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own the depositary. Access to DTC's book-entry system is also available to others, such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a participant, either directly or indirectly. The rules applicable to DTC and its participants are on file with the SEC.

Table of Contents

According to DTC, the foregoing information with respect to DTC has been provided to the financial community for informational purposes only and is not intended to serve as a representation, warranty or contract modification of any kind, and we take no responsibility for the accuracy or completeness of such information.

Certificated Securities

If DTC is at any time unwilling or unable to continue as a depository and a successor depository is not appointed by us within 90 days or if an event of default will occur under the Indenture, we will issue new notes in definitive form in exchange for the entire global security for the new notes. In addition, we may at any time and in our sole discretion determine not to have new notes represented by a global security and, in such event, will issue new notes in definitive form in exchange for the entire global security relating to such new notes. In any such instance, an owner of a beneficial interest in a global security will be entitled to physical delivery in definitive form of new notes represented by such global security equal in principal amount to such beneficial interest and to have such new notes registered in its name. New notes so issued in definitive form will be issued as registered notes in denominations of \$1,000 principal amount and integral multiples thereof, unless otherwise specified by us. The holder of a certificated new note may transfer such note by surrendering it at (1) the office or agency maintained by us for such purpose in the Borough of Manhattan, The City of New York, which initially will be the office of the Trustee maintained for such purpose or (2) the office of any transfer agent we appoint.

Same-Day Settlement and Payment

Settlement for the new notes will be made in immediately available or same-day funds. So long as the new notes are represented by the global securities, we will make all payments of principal and interest in immediately available funds.

So long as the new notes are represented by the global securities registered in the name of DTC or its nominee, the new notes will trade in DTC's Same-Day Funds Settlement System. DTC will require secondary market trading activity in the new notes represented by the global securities to settle in immediately available or same-day funds on trading activity in the new notes.

Table of Contents

MATERIAL U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following is a summary of certain material United States federal income tax considerations relating to the exchange of old notes for new notes in the exchange offer. This summary is based on the Internal Revenue Code of 1986, as amended (the Code), existing and proposed Treasury Regulations, revenue rulings, administrative interpretations and judicial decisions now in effect, all of which are subject to change possibly with retroactive effect. Except as specifically set forth herein, this summary deals only with notes held as capital assets within the meaning of Section 1221 of the Code. This summary does not purport to address all federal income tax considerations that may be relevant to holders in light of their particular circumstances or to holders subject to special tax rules, such as banks, insurance companies or other financial institutions, dealers in securities or foreign currencies, tax-exempt investors, or persons holding the notes as part of a hedging transaction, straddle, conversion transaction, or other integrated transaction.

We have not sought any ruling from the Internal Revenue Service (the IRS) or an opinion of counsel with respect to the statements made and the conclusions reached in the following summary. As such, there can be no assurance that the IRS will agree with such statements and conclusions. Thus, all persons that exchange old notes for new notes in the exchange offer are urged to consult their own tax advisors with regard to the application of the U.S. federal income tax laws to their particular situations as well as any tax consequences arising under the laws of any state, local or foreign jurisdiction.

As used herein, the term U.S. Holder means a beneficial owner of the notes who or that is, for U.S. federal income tax purposes, (i) a citizen or resident (within the meaning of Section 7701(b) of the Code) of the United States, (ii) a corporation, partnership or other entity created or organized in or under the laws of the United States or of any political subdivision thereof, (iii) an estate the income of which is subject to U.S. federal income taxation regardless of its source, or (iv) a trust if a U.S. court is able to exercise primary supervision over the administration of the trust and one or more U.S. trustees or fiduciaries have the authority to control all substantial decisions of the trust. A Non-U.S. Holder means a holder of notes who or that is not, for U.S. federal income tax purposes, a U.S. Holder.

Consequences to U.S. Holders

The exchange of old notes for new notes will not be treated as an exchange for federal income tax purposes, but, instead, will be treated as a non-event because the new notes will not be considered to differ materially in kind or extent from the old notes. As a result, no material federal income tax consequences will result to you from exchanging old notes for new notes.

Consequences to Non-U.S. Holders

The exchange of old notes for new notes will not be treated as an exchange for federal income tax purposes, but, instead, will be treated as a non-event because the new notes will not be considered to differ materially in kind or extent from the old notes. As a result, no material federal income tax consequences will result to you from exchanging old notes for new notes.

Table of Contents

PLAN OF DISTRIBUTION

Each broker-dealer that receives new notes for its own account pursuant to the exchange offer must acknowledge that it will deliver a prospectus in connection with any resale of the new notes. Broker-dealers may use this prospectus, as it may be amended or supplemented from time to time, in connection with the resale of new notes received in exchange for old notes where the broker-dealer acquired the old notes as a result of market-making activities or other trading activities. We have agreed that after this registration statement is declared effective by the SEC and until the earlier of 180 days after the exchange offer has been completed or such time as broker-dealers no longer own any transfer restricted securities, we will make this prospectus, as amended or supplemented, available to any broker-dealer that requests it in the letter of transmittal for use in connection with any such resale.

We will not receive any proceeds from any sale of new notes by broker-dealers or any other persons. Broker-dealers may sell new notes received by broker-dealers for their own account pursuant to the exchange offer from time to time in one or more transactions in the over-the-counter market, in negotiated transactions, through the writing of options on the new notes or a combination of such methods of resale, at market prices prevailing at the time of resale, at prices related to the prevailing market prices or negotiated prices. Broker-dealers may resell new notes directly to purchasers or to or through brokers or dealers who may receive compensation in the form of commissions or concessions from any broker-dealer and/or the purchasers of the new notes. Any broker-dealer that resells new notes that were received by it for its own account pursuant to the exchange offer and any broker or dealer that participates in a distribution of the new notes may be deemed to be underwriters within the meaning of the Securities Act, and any profit on any resale of new notes and any commissions or concessions received by any such persons may be deemed to be underwriting compensation under the Securities Act. The letter of transmittal states that, by acknowledging that it will deliver and by delivering a prospectus, a broker-dealer will not be deemed to admit that it is an underwriter within the meaning of the Securities Act.

We have agreed to pay all expenses incident to our performance of, or compliance with, the registration rights agreement and will indemnify the holders of the notes (including any broker-dealers) against certain liabilities under the Securities Act.

By its acceptance of the exchange offer, any broker-dealer that receives new notes pursuant to the exchange offer agrees to notify us before using the prospectus in connection with the sale or transfer of new notes. The broker-dealer further acknowledges and agrees that, upon receipt of notice from us of the happening of any event which makes any statement in the prospectus untrue in any material respect or which requires the making of any changes in the prospectus to make the statements in the prospectus not misleading or which may impose upon us disclosure obligations that may have a material adverse effect on us, which notice we agree to deliver promptly to the broker-dealer, the broker-dealer will suspend use of the prospectus until we have notified the broker-dealer that delivery of the prospectus may resume and have furnished copies of any amendment or supplement to the prospectus to the broker-dealer.

LEGAL MATTERS

Certain legal matters with regard to the validity of the new notes will be passed upon for us by Haynes and Boone, LLP.

AVAILABLE INFORMATION

This prospectus is part of a registration statement on Form S-4 that we have filed with the SEC under the Securities Act. This prospectus does not contain all of the information set forth in the registration statement. For further information about us and the new notes, you should refer to the documents to which we refer you. Since this prospectus may not contain all of the information that you may find important, you should review the full text of these documents. We have filed these documents as exhibits to our registration statement.

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any document we file at the SEC's Public Reference Room at 450 Fifth Street, N.W., Washington, D.C. 20549. Please call the SEC at 1-888-SEC-0330 for further information on the public reference room. Our SEC filings are also available to the public from the SEC's web site at www.sec.gov or from our website at www.commercialmetals.com. However, the information on our website does not constitute a part of this prospectus.

INCORPORATION BY REFERENCE

In this document, we incorporate by reference certain information we file with the SEC, which means that we are disclosing important information to you by referring to that information. The information incorporated by reference is considered to be a part of this prospectus and later information filed with the SEC will update and supersede this information. We incorporate by reference the following information that we have filed with the SEC and any future filings that we make with the SEC under Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 on or after the date of this prospectus until this offering is completed:

Our Annual Report on Form 10-K for the fiscal year ended August 31, 2003 (including information specifically incorporated by reference into our Form 10-K from our definitive proxy statement for our 2004 Annual Meeting of Stockholders) filed on November 24, 2003, as amended by our Form 10-K/A filed on November 26, 2003;

Our Quarterly Report on Form 10-Q for the quarter ended November 30, 2003, filed on January 14, 2004;

Our Current Report on Form 8-K dated December 3, 2003; and

Our Current Report on Form 8-K dated December 23, 2003.

You may request a copy of these filings at no cost, by writing or telephoning us at: Commercial Metals Company, Attention: Corporate Secretary, 6565 N. MacArthur, Suite 800, Irving, Texas 75039, telephone: (214) 689-4300.

You should rely only on the information contained or incorporated by reference into this prospectus. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not offering the new notes in any jurisdiction where the offer is not permitted. You should assume that the information appearing in this prospectus is accurate as of the date hereof only. Our business, financial condition, results of operations, cash flows and prospects may change after that date.

PART II

INFORMATION NOT REQUIRED IN PROSPECTUS

Item 20. Indemnification of Directors and Officers

Section 145 of the Delaware General Corporation Law (Delaware Law) provides that a corporation may indemnify its directors, officers, employees and agents against expenses (including attorneys fees), judgments, fines and amounts paid in settlement in connection with certain actions, suits and proceedings (other than an action by or in the right of the corporation a derivative action), if the person acted in good faith and in a manner they reasonably believed to be in or not opposed to the best interests of the corporation. In the case of a criminal action, the person must have had no reasonable cause to believe his or her conduct was unlawful.

Section 145 also provides that a Delaware corporation may indemnify its directors and officers against expenses actually and reasonably incurred in connection with the defense or settlement of any derivative action if they acted in good faith and in a manner they reasonably believed to be in or not opposed to the best interests of the corporation. However, indemnification in derivative actions does not extend to expenses incurred with respect to any claim, issue or matter as to which the person has been found liable for negligence or misconduct, unless the court approves the indemnification. Section 145 also permits a Delaware corporation to grant its directors and officers additional rights of indemnification through bylaw provisions or other means, and to purchase indemnity insurance on behalf of its directors and officers. Indemnification is mandatory if a claim, issue or matter has been successfully defended.

Section 102(b)(7) of the Delaware Law permits a provision in the certificate of incorporation eliminating or limiting, with certain exceptions, the personal liability of a director to the corporation or its stockholders for monetary damages for breaches of directors fiduciary duties.

Our certificate of incorporation provides for indemnification of all directors, officers and agents in the manner permitted by Section 145 of Delaware Law. Our certificate of incorporation also eliminates the liability of directors to the fullest extent permitted by Delaware Law. Our directors and officers are currently covered by directors and officers liability insurance.

Item 21. Exhibits and Financial Statement Schedules.

A list of exhibits filed with this registration statement on Form S-4 is set forth on the Exhibit Index and is incorporated in this Item 21 by reference.

Item 22. Undertakings.

(a) The undersigned registrant hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

(i) To include any prospectus required by Section 10(a)(3) of the Securities Act of 1933;

(ii) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental

change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar

II-1

Table of Contents

value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20 percent change in the maximum aggregate offering price set forth in the Calculation of Registration Fee table in the effective registration statement; and

(iii) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.

(2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

(b) The undersigned registrant hereby undertakes that, for purposes of determining any liability under the Securities Act of 1933, each filing of the registrant's annual report pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Securities Exchange Act of 1934) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the bona fide offering thereof.

(c) Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrant pursuant to the provisions described under Item 20 above, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.

(d) The undersigned registrant hereby undertakes to respond to requests for information that is incorporated by reference into this prospectus pursuant to Items 4, 10(b), 11, or 13 of this Form, within one business day of receipt of such request, and to send the incorporated documents by first class mail or other equally prompt means. This includes information contained in documents filed subsequent to the effective date of the registration statement through the date of responding to the request.

(e) The undersigned registrant hereby undertakes to supply by means of a post-effective amendment all information concerning a transaction, and the company being acquired involved therein, that was not the subject of and included in the registration statement when it became effective.

Table of Contents

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, the registrant has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Irving, State of Texas, on the 27th day of January, 2004.

**COMMERCIAL METALS
COMPANY**

By: /s/ Stanley A. Rabin

Stanley A. Rabin,
Chairman of the Board, President
and
Chief Executive Officer

KNOW ALL MEN BY THESE PRESENTS, that the undersigned officers and directors of Commercial Metals Company, a Delaware corporation, do hereby constitute and appoint Stanley A. Rabin and David M. Sudbury, and each of them, their true and lawful attorneys-in-fact and agents or attorney-in-fact and agent, with power and authority to do any and all acts and things and to execute any and all instruments which said attorneys and agents, and any one of them, determine may be necessary or advisable or required to enable said corporation to comply with the Securities Act of 1933, as amended, and any rules and regulations or requirements of the Securities and Exchange Commission in connection with this registration statement. Without limiting the generality of the foregoing power and authority, the powers granted include the full power of substitution and resubstitution, for them and in their name, place and stead, in any and all capacities, the power and authority to sign the names of the undersigned officers and directors in the capacities indicated below to this registration statement, to any and all amendments (including any post-effective amendments) and supplements thereto, and to any and all instruments or documents filed as part or in connection with this registration statement with any regulatory authority, and each of the undersigned hereby ratifies and confirms all that said attorneys and agents, or any of them, shall do or cause to be done by virtue hereof. The Power of Attorney may be signed in several counterparts.

Pursuant to the requirements of the Securities Act of 1933, this registration statement has been signed below by the following persons and in the following capacities on the 27th day of January, 2004.
