ACQUISITIONS

Pending Acquisitions to be Completed During 2005:

On January 9, 2005, ALLTEL entered into an Agreement and Plan of Merger (the "Merger Agreement") with Western Wireless, Inc. On November 26, 2004, ALLTEL and Cingular Wireless LLC ("Cingular"), a joint venture between SBC Communications Inc. and Cingular Wireless, Inc. Following completion of the acquisitions discussed above, ALLTEL's domestic communications operations will serve approximately 100 million customers.

Acquisitions Completed During the Past Five Years:

On December 1, 2004, ALLTEL completed the purchase of certain wireless assets from United States Cellular Corporation. On August 29, 2003, the Company purchased for \$22.8 million in cash a wireless property with a potential service area of approximately 100,000 square miles.

In addition to these voice features, in early 2004, the Company launched Touch2Talk, which is a walkie-talkie service. In response to increasing demand, the Company continued to expand its various data solutions to its customers in 2004. ALLTEL also offers several prepaid alternatives designed to increase market penetration. One alternative, "Pay-As-You-Go," is primarily as a result of the increased sales of the Company's higher-yield local, regional and national calling plans and maintaining low postpay customer churn rates (average monthly rate of customer disconnects) is a primary goal of the Company.

MARKETING

ALLTEL's marketing strategy is to create and execute products, services and communications that drive growth while

DISTRIBUTION

ALLTEL utilizes four methods of distributing its wireless products and services in each of its markets: Company retail stores, independent franchisee retail stores, independent distributor retail stores and direct sales. ALLTEL currently conducts its retail operations in approximately 800 locations strategically located in neighborhood shopping centers. ALLTEL also contracts with large national retail stores to sell wireless products and services directly through its own kiosk units. The Company enters into dealer agreements with electronics retailers and discounters in its markets. These local dealers sell ALLTEL's products and services. ALLTEL's direct sales force focuses its efforts on business customers with high wireless telephone usage and multiple lines.

COMPETITION

Substantial and increasing competition exists within the wireless communications industry. Cellular, PCS and Enhance In the current wireless market, ALLTEL's ability to compete also depends on its ability to offer regional and national c

REGULATION (continued)

In phase two, CMRS carriers like ALLTEL have opted for a handset-based solution must determine, for originated calls. To ensure affordable access to telecommunications services throughout the United States, the FCC and many states continue to work on various regulatory issues. During 2004, the Company sought ETC certification by the FCC and various state commissions. In September 2004, the FCC, in conjunction with the Federal/State Joint Board on Universal Service, is considering changes to the USF program. 10

ALLTEL Corporation

WIRELESS OPERATIONS (continued)

REGULATION (continued)

for which the support is intended". If adopted, these changes would adversely affect the availability of USF to ALLTEL. The FCC mandated that, effective October 1, 2004, the Universal Service Administrative Company ("USAC") must be established. In October 2003, the FCC issued an order adopting rules that allow CMRS licensees to lease spectrum to others. The Federal Communications Assistance for Law Enforcement Act ("CALEA") requires wireless and wireline carriers to ensure the ability to intercept communications. Under FCC and Federal Aviation Administration regulations, wireless carriers must comply with certain regulations regarding the use of spectrum. 11

ALLTEL Corporation

Form 10-K, Part I

Item 1. Business

WIRELINE OPERATIONS

As previously noted, the Company's wireline segment consists of ALLTEL's ILEC, CLEC and Internet access operations. Local service operations provide lines from telephone exchange offices to customer premises for the origination and termination of local calls. Network access and interconnection services are provided by ALLTEL by connecting the equipment and facilities of its customers to the public switched telephone network.

COMPETITION

Many of the Company's ILEC operations have begun to experience competition in their local service areas. Sources of competition include other ILECs, CLECs and VoIP providers. To address competition, ALLTEL is focusing its efforts on marketing and selling additional products and services to its customers. Although DSL services have been a source of revenue and access line growth for the Company in 2004, 2003 and 2002, 12

WIRELINE OPERATIONS (continued)

COMPETITION (continued)

challenging existing regulatory definitions. As further discussed below under the caption "Network Access Services

LOCAL SERVICE REGULATION

Prior to 1996, ALLTEL's wireline subsidiaries provided local telephone service under exclusive franchises granted by the states. The 96 Act substantially modified certain aspects of the states' and the FCC's jurisdictions in the regulation of local exchange service. The 96 Act also requires all local exchange telephone companies to compensate one another for the transport and termination of long distance calls. Except for certain of its subsidiaries in Nebraska, Ohio and the recently acquired property in Kentucky, the Company's subsidiaries are subject to the 96 Act. In 1996, the FCC issued regulations implementing the local competition provisions of the 96 Act. These regulations established a framework for local competition. In June 2002, the U.S. Court of Appeals for the Second Circuit found that the 96 Act did not create an "implicit immunity" for local exchange carriers. 13

ALLTEL Corporation

Form 10-K, Part I

Item 1. Business

WIRELINE OPERATIONS (continued)

LOCAL SERVICE REGULATION (continued)

The federal universal service program is under legislative, regulatory and industry participant scrutiny as a result of the Telecommunications Act of 1996. In May 2001, the FCC adopted the Rural Task Force Order that established an interim universal service mechanism that would be subject to review. On November 8, 2002, the FCC requested that the Joint Board review certain of the FCC's rules relating to the high-cost program. As previously discussed under "Wireless Operations Regulation", the FCC mandated that, effective October 1, 2004, the high-cost program be terminated. On December 20, 2001, the FCC released a notice of proposed rulemaking initiating the first triennial review of the FCC's universal service program. On March 2, 2004, the D.C. Circuit Court overturned key portions of the FCC's Triennial Review Order. The D.C. Circuit Court's decision is currently on appeal. 14

ALLTEL Corporation

Form 10-K, Part I

Item 1. Business

WIRELINE OPERATIONS (continued)

LOCAL SERVICE REGULATION (continued)

On March 31, 2004, the FCC commissioners urged carriers to begin private commercial negotiations to resolve issues relating to the high-cost program. On September 13, 2004, the FCC released its Interim UNE Order requiring incumbent ILECs to maintain the status quo with respect to the high-cost program.

On September 15, 2003, the FCC launched its first comprehensive review of the rules that establish wholesale pricing of interstate long distance service. Section 251(b) of the Communications Act of 1934 (the "34 Act"), as amended, requires, in part, that local exchange carriers file their rates with the FCC. Periodically, the Company's local exchange subsidiaries receive requests from wireless communications providers for rates for use in their networks. Most states in which ALLTEL's ILEC subsidiaries operate have adopted alternatives to rate-of-return regulation, either by statute or by order of the state public utility commission.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Executive Summary

ALLTEL Corporation ("ALLTEL" or the "Company") is a customer-focused communications company providing wireless and wireline services.

Wireless customer growth was strong as ALLTEL added more than 600,000 net customers during the year, most of which were new customers.

Wireless service revenues increased 7 percent from 2003 driven by an 8 percent increase in retail revenues, reflecting growth in the prepaid segment.

Wireless segment income for 2004 increased 2 percent from a year ago, reflecting the growth in retail revenues not offset by an increase in network costs.

In its wireline business, ALLTEL added more than 90,000 high-speed data customers, increasing ALLTEL's DSL and broadband services.

ALLTEL maintained its strong financial position while returning more than \$1 billion in capital to shareholders. During 2004, the Company repurchased approximately \$1.1 billion of common stock.

As further discussed under "Pending Acquisitions to be Completed in 2005", ALLTEL positioned its wireless business for growth through strategic acquisitions.

During 2005, the Company will continue to face significant challenges resulting from competition in the telecommunications market.

F-2

ACQUISITIONS

Pending Acquisitions to be Completed During 2005

On January 9, 2005, ALLTEL entered into an Agreement and Plan of Merger (the "Merger Agreement") with Western Wireless, Inc. ("Western Wireless").

On November 26, 2004, ALLTEL and Cingular Wireless LLC ("Cingular"), a joint venture between SBC Communications Inc. and AT&T Knowledge Ventures, entered into an Agreement and Plan of Merger (the "Cingular Merger Agreement").

Acquisitions Completed During 2004, 2003 and 2002

On December 1, 2004, ALLTEL completed the purchase of certain wireless assets from United States Cellular Corporation. On August 29, 2003, ALLTEL purchased for \$22.8 million in cash a wireless property with a potential service area covering approximately 100,000 square miles. The accounts and results of operations of the acquired wireline and wireless properties discussed above are included in the following footnotes:

F-3

On August 1, 2002, ALLTEL completed its purchase of local telephone properties serving approximately 589,000 wireline customers. The accounts and results of operations of the acquired wireline and wireless properties discussed above are included in the following footnotes:

F-4

Service revenues increased \$218.2 million, or 3 percent, in 2004, primarily reflecting growth in ALLTEL's wireless customer base. The above increases in service revenues in 2004 were partially offset by lower wireless airtime, retail roaming and wireless equipment sales. Service revenues increased \$727.2 million, or 11 percent, in 2003. The acquisitions of wireless and wireline properties in 2003 increased service revenues by \$140.3 million, or 21 percent. Product sales increased \$48.0 million, or 6 percent, in 2004 and \$140.3 million, or 21 percent, in 2003. The increase in product sales in 2004 was primarily due to the acquisition of certain wireless assets from United States Cellular Corporation. The increase in product sales in 2003 was primarily due to the acquisition of certain wireless assets from United States Cellular Corporation. The increase in product sales in 2003 was primarily due to the acquisition of certain wireless assets from United States Cellular Corporation.

F-5

Cost of services increased \$100.6 million, or 4 percent, in 2004 and \$234.6 million, or 12 percent, in 2003. The increase in cost of services in 2004 was primarily due to higher wireless network-related costs and increased wireless regulatory fees. In addition to higher wireless network-related costs and increased wireless regulatory fees, cost of services for 2003 also included the acquisition of certain wireless assets from United States Cellular Corporation. Cost of products sold decreased \$32.0 million, or 3 percent, in 2004 and increased \$152.2 million, or 17 percent, in 2003. Selling, general, administrative and other operating expenses increased \$26.1 million, or 2 percent, in 2004 and \$201.1 million, or 17 percent, in 2003. Pension expense, which is included in both cost of services and selling, general, administrative and other expenses, decreased \$15.0 million, or 1 percent, in 2004 and \$152.2 million, or 14 percent, in 2003. Depreciation and amortization expense increased \$52.0 million, or 4 percent, in 2004 and \$152.2 million, or 14 percent, in 2003.

F-6

Operating income increased \$23.6 million, or 1 percent, in 2004 and \$178.3 million, or 10 percent, in 2003. The increase in operating income in 2003 primarily reflected the nonacquisition-related growth in revenues and sales discounts. Restructuring and Other Charges

A summary of the restructuring and other charges recorded in 2004 was as follows:
In January 2004, the Company announced its plans to reorganize its operations and support teams. During February 2004, the Company recorded a \$2.3 million reduction in the liabilities associated with various restructurings.
F-7

A summary of the restructuring and other charges recorded in 2003 was as follows:
During the second quarter of 2003, the Company recorded a restructuring charge of \$8.5 million consisting of severance and other charges. A summary of the restructuring and other charges recorded in 2002 was as follows:
During the evaluation of its existing CLEC operations, ALLTEL determined that a business model that relied heavily on leased lines was not sustainable. The \$12.6 million in lease and contract termination costs recorded in 2002 consisted of \$6.2 million, representing the estimated cost of terminating the leases, and \$6.4 million, representing the estimated cost of terminating the contracts.
F-8

In connection with the purchase of wireline properties in Kentucky from Verizon and wireless properties from CenturyLink, the Company recorded a non-operating expense of \$17.9 million. In conjunction with a product replacement program initiated by a vendor in 2001, the Company exchanged certain used equipment for new equipment. As of December 31, 2004, the remaining unpaid liability related to the Company's integration and restructuring activities was \$17.9 million. As indicated in the table above, non-operating income, net increased \$26.1 million, or 816 percent, in 2004 and non-operating income, net increased \$17.9 million, or 100 percent, in 2003. Equity earnings in unconsolidated partnerships in 2003 included \$17.9 million of additional income resulting from the sale of certain properties.

F-14

received FCC approval for five non-rural ETC applications and obtained approval of its petitions from state commissions. Service revenue growth in 2004 and 2003 attributable to increased access revenues from customer growth, additional revenue from new services. Primarily driven by growth in average monthly retail minutes of use, increased sales of higher-priced postpay rate plans. Product sales increased \$25.0 million, or 10 percent, in 2004 and \$100.9 million, or 63 percent, in 2003. The increase in product sales was primarily due to increased sales of higher-priced postpay rate plans. Cost of services increased \$175.8 million, or 13 percent, in 2004 and \$121.7 million, or 10 percent, in 2003. The increase in cost of services was primarily due to increased sales of higher-priced postpay rate plans. Cost of products sold increased \$37.0 million, or 7 percent, in 2004 and \$106.1 million, or 25 percent, in 2003. The increase in cost of products sold was primarily due to increased sales of higher-priced postpay rate plans.

customers to newer wireless technologies as part of ALLTEL's customer retention efforts, partially offset by the effects of increased sales of higher-priced postpay rate plans. Selling, general, administrative and other expenses increased \$46.9 million, or 4 percent, in 2004 and \$196.9 million, or 16 percent, in 2003. Depreciation and amortization expense increased \$67.8 million, or 10 percent, in 2004 and \$93.4 million, or 16 percent, in 2003. Primarily as a result of growth in revenues and sales discussed above, wireless segment income increased \$22.2 million, or 10 percent, in 2004 and \$196.9 million, or 16 percent, in 2003. Cost to acquire a new customer is used to measure the average cost of adding a new customer and represents sales, marketing and other expenses incurred in the process of acquiring a new customer.

Set forth below is a summary of the restructuring and other charges related to the wireless operations that were not included in the summary of charges.

Regulatory Matters-Wireless Operations

ALLTEL is subject to regulation by the FCC as a provider of Commercial Mobile Radio Services ("CMRS"). The Telecommunications Act of 1996 requires that CMRS providers in the top 100 markets were required by the FCC to implement by November 24, 2003 (and, for all other markets, by November 24, 2005). Wireless service providers are required by the FCC to provide enhanced 911 emergency service ("E-911") in a two-phase implementation. F-17

In phase two, CMRS carriers like ALLTEL have opted for a handset-based solution must determine, for originated calls, how to ensure affordable access to telecommunications services throughout the United States, the FCC and many state commissions. To ensure affordable access to telecommunications services throughout the United States, the FCC and many state commissions. During 2004, the Company sought ETC certification by the FCC and various state commissions. In September 2004, the FCC, in conjunction with the Federal/State Joint Board on Universal Service, is considering changes to the USF program. F-18

The FCC mandated that, effective October 1, 2004, the Universal Service Administrative Company ("USAC") must be established. In October 2003, the FCC issued an order adopting rules that allow CMRS licensees to lease spectrum to others. The Federal Communications Commission's Communications Assistance for Law Enforcement Act ("CALEA") requires wireless and wireline carriers to ensure that their networks are capable of providing law enforcement agencies with the ability to intercept communications. Notes:

(a) Average revenue per customer per month is calculated by dividing total wireline revenues by average access lines. Wireline operations consist of ALLTEL's Incumbent Local Exchange Carrier ("ILEC"), CLEC and Internet operations. F-19

The Company expects the number of access lines served by its wireline operations to continue to be adversely affected by the decline in access lines. To slow the decline of revenue during 2005, the Company will continue to emphasize sales of enhanced services and broadband services. Local service revenues decreased \$21.1 million, or 2 percent, in 2004 and increased \$118.9 million, or 12 percent, in 2005. Network access and long-distance revenues decreased \$7.6 million, or 1 percent, in 2004 and increased \$112.0 million, or 12 percent, in 2005. Miscellaneous revenues primarily consist of charges for Internet services, directory advertising, customer premise equipment and other services. F-20

F-20

In addition to the effects of the acquisition, miscellaneous revenues in 2003 also reflected growth in revenues derived from DSL services. Primarily due to the DSL customer growth and increased sales of enhanced products and services, average revenue per line increased \$1.2 million, or 14 percent, in 2003. Cost of services decreased \$32.9 million, or 4 percent, in 2004 and increased \$92.1 million, or 14 percent, in 2003. Cost of products sold decreased slightly in 2004 and increased \$4.3 million, or 17 percent, in 2003. The decrease in 2004 was due to the acquisition of the Kentucky properties. Selling, general, administrative and other expenses decreased \$15.1 million, or 6 percent, in 2004 and increased \$8.2 million, or 14 percent, in 2003. Depreciation and amortization expense decreased \$10.0 million, or 2 percent, in 2004 and increased \$60.9 million, or 14 percent, in 2003. Wireline segment income increased \$42.1 million, or 5 percent, in 2004 and \$90.9 million, or 11 percent, in 2003. The

F-21

Set forth below is a summary of the restructuring and other charges related to the wireline operations that were not included in the accompanying consolidated financial statements.

Regulatory Matters-Wireline Operations

Except for the Kentucky properties acquired in 2002 and the Nebraska operations acquired in 1999, ALLTEL's ILEC subsidiaries are subject to rate-of-return regulation. Although the Company believes that the application of SFAS No. 71 continues to be appropriate, it is possible that changes in regulatory requirements could affect the Company's financial results. Most states in which ALLTEL's ILEC subsidiaries operate have adopted alternatives to rate-of-return regulation, either cost-of-service or rate-of-return regulation. A number of carriers have begun offering voice telecommunications services utilizing Internet protocol as the underlying technology.

F-22

traditional telephony services, and the distinctions between different types of IP-enabled services. The FCC indicated that although the FCC's rulemaking regarding IP-enabled services remains pending, the FCC has adopted three orders establishing the federal universal service program. On October 8, 2004, the FCC granted in part and denied in part a petition filed by Core Communications requesting that the FCC adopt a new inter-carrier compensation rule. In April 2001, the FCC released a notice of proposed rulemaking addressing inter-carrier compensation. Under this rule, the federal universal service program is under legislative, regulatory and industry participant scrutiny as a result of the FCC's actions. In May 2001, the FCC adopted the Rural Task Force Order that established an interim universal service mechanism that will be replaced by a permanent rule. F-23

telephone companies and to determine what changes, if any, should be made to the existing high-cost support mechanism. On November 8, 2002, the FCC requested that the Joint Board review certain of the FCC's rules relating to the high-cost support mechanism. As previously discussed under "Regulatory Matters - Wireless Operations", the FCC mandated that, effective October 1, 2003, the Joint Board review certain of the FCC's rules relating to the high-cost support mechanism. On December 20, 2001, the FCC released a notice of proposed rulemaking initiating the first triennial review of the FCC's rules relating to the high-cost support mechanism. On March 2, 2004, the D.C. Circuit Court overturned key portions of the FCC's Triennial Review Order. The D.C. Circuit Court's decision was affirmed by the Supreme Court. On September 13, 2004, the FCC released its Interim UNE Order requiring incumbent ILECs to maintain the status quo until the Joint Board completes its review. F-24

Review proceeding and permanent UNE rules on ALLTEL's ILEC operations cannot be determined, however it is not expected that the review will result in a permanent rule. On September 15, 2003, the FCC launched its first comprehensive review of the rules that establish wholesale pricing of telecommunications services. During the first quarter of 2002, the FCC initiated a rulemaking to evaluate the appropriate framework for broadband access services. Section 251(b) of the Communications Act of 1934 (the "34 Act"), as amended, requires, in part, that local exchange carriers provide access to their networks for other carriers. Because certain of the regulatory matters discussed above are under FCC or judicial review, resolution of these matters will be determined by the FCC or the courts. F-25

Communications support services revenues and sales decreased \$35.2 million, or 4 percent, in 2004 and increased \$33. Sales of telecommunications and data products increased \$13.8 million in 2004, reflecting increased sales to non-affilia The increase in revenues and sales in 2003 primarily reflected growth in sales of telecommunications and data products. Primarily due to the decrease in revenues and sales noted above, communications support services segment income dec

F-29

Cash flows used in financing activities also included distributions to ALLTEL's minority investors in wireless markets.

Liquidity and Capital Resources

The Company believes it has sufficient cash and short-term investments on hand (\$484.9 million at December 31, 2004). ALLTEL's commercial paper and long-term credit ratings with Moody's Investors Service ("Moody's"), Standard & Poor's. Factors that could affect ALLTEL's short and long-term credit ratings would include, but not be limited to, a material default. The revolving credit agreement contains various covenants and restrictions including a requirement that, as of the end of each year. At December 31, 2004, current maturities of long-term debt were \$225.0 million and included a \$200.0 million, 6.75 percent.

Pension Plans

ALLTEL maintains a qualified defined benefit pension plan, which covers substantially all employees. Prior to January 1, 2004, F-30

Annual pension expense for 2005 was calculated based upon a number of actuarial assumptions, including an expected rate of return. The discount rate selected is based on a review of current market interest rates of high-quality, fixed-rate debt securities. As of December 31, 2004, ALLTEL had cumulative unrecognized actuarial losses of \$226.9 million, compared to \$18.0 million in 2003. ALLTEL made a \$100.0 million contribution to its qualified pension plan in December 2004. ALLTEL does not expect to make any contributions in 2005.

Other Postretirement Benefits

The Company provides postretirement healthcare and life insurance benefits for eligible employees. Retired employees are eligible for healthcare benefits. Annual postretirement expense for 2005 was calculated based upon a number of actuarial assumptions, including a healthcare cost trend rate. F-31

The healthcare cost trend rate is based on the Company's actual medical claims experience and future projections of medical costs. On December 8, 2003, the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the "Act") became law.

Off-Balance Sheet Arrangements

The Company does not use securitization of trade receivables, affiliation with special purpose entities, variable interest entities, or other off-balance sheet arrangements. As defined by the Securities and Exchange Commission's rules and regulations, the Company is a party to off-balance sheet arrangements.

Guarantees

As further discussed in Note 14 to the consolidated financial statements, in conjunction with the sale of the financial services assets to Convergys, ALLTEL agreed to indemnify Convergys for any damages resulting from the sale of assets to Convergys. F-32

Obligation to Sell Shares of ALLTEL Common Stock

As previously discussed, to fund the cost of the acquisitions completed in August 2002, ALLTEL sold 27.7 million equity shares.

Contractual Obligations and Commitments

Set forth below is a summary of ALLTEL's material contractual obligations and commitments as of December 31, 2004.

(a) Excludes \$(13.1) million of unamortized discounts and the fair value of interest rate swap agreements of \$67.1 million.

Under the Company's long-term debt borrowing agreements, acceleration of principal payments would occur upon payment of a default.

F-33

Market Risk

The Company is exposed to market risk from changes in marketable equity security prices, interest rates, and foreign exchange rates.

Equity Price Risk

Changes in equity prices primarily affect the fair value of ALLTEL's investments in marketable equity securities. Fair value is determined based on the closing price of the securities on the reporting date.

Interest Rate Risk

The Company's earnings are affected by changes in variable interest rates related to ALLTEL's issuance of short-term debt.

As of December 31, 2004 and 2003, the Company had no borrowings outstanding under its commercial paper program.

Foreign Exchange Risk

The Company's business operations in foreign countries are not material to the Company's consolidated operations, financial statements, or cash flows.

Critical Accounting Policies

ALLTEL prepares its consolidated financial statements in accordance with accounting principles generally accepted in the United States. Service revenues for the Company's communications business are recognized based upon minutes of use processed and billed to customers.

F-34

on historical minutes of use processed. Changes in estimates for revenues are recognized in the period in which they are realized. In evaluating the collectibility of its trade receivables, ALLTEL assesses a number of factors including a specific customer's creditworthiness. The calculation of the annual costs of providing pension and postretirement benefits are based on certain key actuarial assumptions. The calculation of depreciation and amortization expense is based on the estimated economic useful lives of the underlying assets. In accordance with SFAS No. 142, ALLTEL tests its goodwill and other indefinite-lived intangible assets for impairment annually. The Company's estimates of income taxes and the significant items resulting in the recognition of deferred tax assets and liabilities are based on current tax laws and regulations.

F-35

Legal Proceedings

ALLTEL is party to various legal proceedings arising in the ordinary course of business. Although the ultimate resolution of these matters cannot be predicted with certainty, management believes that the outcome of these proceedings will not have a material effect on the Company's financial position, results of operations, or cash flows.

Recently Issued Accounting Pronouncements

On December 16, 2004, the Financial Accounting Standards Board ("FASB") issued SFAS No. 123(R), "Share-Based Payment," which requires companies to measure the cost of equity-based awards at fair value at the time of grant and recognize that cost over the service period. The Company has adopted this standard and will begin recording the cost of equity-based awards as an expense starting in 2005.

Forward-Looking Statements

This Management's Discussion and Analysis of Financial Condition and Results of Operations includes, and future filings of the Company may include, forward-looking statements. Actual future events and results may differ materially from those expressed in these forward-looking statements as a result of various factors. In addition to these factors, actual future performance, outcomes and results may differ materially because of other, more fully discussed risks. See "Risk Factors" in the Company's 2004 Annual Report on Form 10-K.

F-36

SELECTED FINANCIAL DATA

The following table presents certain selected consolidated financial data as of and for the years ended December 31:

Notes to Selected Financial Information:

See Note 12 to the consolidated financial statements for a discussion of the Company's discontinued information services operations.

F-37

Notes to Selected Financial Information, Continued:

These transactions decreased net income \$11.5 million or \$.04 per share. (See Note 9 to the consolidated financial statements for a discussion of the Company's discontinued information services operations.)

D. Net income for 2001 included pretax gains of \$347.8 million from the sale of PCS licenses, a pretax gain of \$9.5 million from the sale of BellSouth common stock, and a pretax gain of \$1.2 million from the sale of WorldCom common stock.

E. Net income for 2000 included pretax gains of \$1,345.5 million from the exchange of wireless properties with BellSouth, a pretax gain of \$1.2 million from the sale of WorldCom common stock, and a pretax gain of \$1.2 million from the sale of BellSouth common stock.

F. Net income for 1999 included a pretax gain of \$43.1 million from the sale of WorldCom common stock. The gain was reduced by a pretax loss of \$1.2 million from the sale of BellSouth common stock.

F-38

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

ALLTEL Corporation's management is responsible for the integrity and objectivity of all financial information included in this report. PricewaterhouseCoopers LLP, an independent registered public accounting firm, has audited these consolidated financial statements. The Audit Committee of the Board of Directors, which oversees ALLTEL's financial reporting process on behalf of the Board, has reviewed and approved these financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies, Continued:

Investments in unconsolidated partnerships include the related excess of the purchase price paid over the underlying net assets.

Property, Plant and Equipment Property, plant and equipment are stated at original cost. Wireless plant consists of cellular towers, antennas, and related equipment. The Company capitalizes interest in connection with the acquisition or construction of plant assets. Capitalized interest is included in the cost of the asset.

Capitalized Software Development Costs Software development costs incurred in the application development stage of a new product are capitalized. Amortization begins when the product is available for sale.

Impairment of Long-Lived Assets Long-lived assets and intangible assets subject to amortization are reviewed for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable. If impairment is determined, the asset is written down to its fair value.

Derivative Instruments The Company uses derivative instruments to obtain a targeted mixture of variable and fixed-income investments.

F-49

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies, Continued:

Mandatorily Redeemable Financial Instruments At December 31, 2003, twelve of the Company's consolidated non-voting preferred shares were mandatorily redeemable.

Preferred Stock Cumulative preferred stock is issuable in series. The Board of Directors is authorized to designate the number of shares, the dividend rate, and the terms of the stock.

Unrealized Holding Gain on Investments Equity securities of certain publicly traded companies owned by ALLTEL are classified as available-for-sale. Unrealized holding gains or losses are reported in other comprehensive income.

Foreign Currency Translation Adjustment For the Company's foreign operations, assets and liabilities are translated at the current exchange rate, and income and expense are translated at the average exchange rate.

Revenue Recognition Communications revenues are primarily derived from usage of the Company's networks and facilities.

F-50

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies, Continued:

Costs in excess of the deferred activation revenues were expensed as incurred. Upon adoption of EITF Issue No. 00-2, ALLTEL Publishing recognizes directory publishing and advertising revenues and related directory costs when the directory is published. Telecommunications information services revenues are recognized in accordance with the American Institute of Certified Public Accountants' Revenue Recognition. For all other operations, revenue is recognized when products are delivered to and accepted by customers or when services are rendered. Stock-Based Compensation The Company's stock-based compensation plans are more fully discussed in Note 7. ALLTEL's pro forma amounts presented above may not be representative of the future effects on reported net income and earnings per share.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies, Continued:

Income Taxes Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for deferred tax assets and liabilities. Earnings Per Share Basic earnings per share of common stock was computed by dividing net income applicable to common stock by the weighted average number of shares outstanding. As more fully discussed in Note 5, the Company issued equity units in 2002, which obligates the holder to purchase ALLTEL common stock.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies, Continued:

except during periods when the average market price of a share of ALLTEL common stock is above the threshold applicable to the Company. Recently Issued Accounting Pronouncements On December 16, 2004, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 123R.

2. Accounting Changes:

Change in Accounting Estimate The Company is routinely audited by federal, state and foreign taxing authorities. Change in Accounting Principle Except for certain wireline subsidiaries as further discussed below, ALLTEL adopted the Financial Accounting Standards Board's Statement of Financial Accounting Standards No. 142. In accordance with federal and state regulations, depreciation expense for ALLTEL's wireline operations has historically been calculated on a straight-line basis.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

3. Acquisitions, Continued:

On August 1, 2002, ALLTEL purchased substantially all of the wireless assets owned by CenturyTel, Inc. ("CenturyTel"). On August 1, 2002, ALLTEL also completed the purchase of local telephone properties serving approximately 589,000 lines. During 2002, ALLTEL also purchased a wireline property in Georgia and acquired additional ownership interests in wireline properties. The following table summarizes the fair value of the assets acquired and liabilities assumed for the various business combinations. F-56

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

3. Acquisitions, Continued:

The purchase prices paid for each of the transactions discussed above were based on estimates of future cash flows of the acquired companies. Unaudited pro forma financial information related to the Company's 2004 and 2003 acquisitions has not been presented. The following unaudited pro forma consolidated results of operations of the Company for the year ended December 31, 2004 and 2003 are presented. The pro forma amounts represent the historical operating results of the properties acquired from CenturyTel and Verizon. F-57

8. Employee Benefit Plans and Postretirement Benefits Other Than Pensions:

The Company maintains a qualified defined benefit pension plan, which covers substantially all employees other than non-union employees. See Note 8 for more information.

F-62

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

8. Employee Benefit Plans and Postretirement Benefits Other Than Pensions, Continued:

As a component of determining its annual pension cost, ALLTEL amortizes unrecognized gains or losses that exceed a certain threshold. A summary of plan assets, projected benefit obligation and funded status of the plans were as follows at December 31: Employer contributions and benefits paid in the above table included amounts contributed directly to or paid directly from the plans. The accumulated benefit obligation for all defined benefit pension plans was \$916.2 million and \$802.0 million at December 31, 2004 and 2003, respectively.

F-63

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

8. Employee Benefit Plans and Postretirement Benefits Other Than Pensions, Continued:

Actuarial assumptions used to calculate the projected benefit obligations were as follows for the years ended December 31, 2004 and 2003: In developing the expected long-term rate of return assumption, ALLTEL evaluated historical investment performance. The asset allocation at December 31, 2004 and 2003 and target allocation for 2005 for the Company's qualified defined pension plan were as follows: Primarily due to cash contributions funded to the qualified pension plan by ALLTEL in late December of each year that the plan was not funded. Information regarding the healthcare cost trend rate was as follows for the years ended December 31: 2004, 2003, and 2002. For the year ended December 31, 2004, a one percent increase in the assumed healthcare cost trend rate would increase the projected benefit obligation by approximately \$1.5 million.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

8. Employee Benefit Plans and Postretirement Benefits Other Than Pensions, Continued:

Estimated future employer contributions and benefit payments were as follows as of December 31, 2004: The expected employer contribution for pension benefits consists solely of amounts necessary to fund the expected benefit payments. Under the Medicare Prescription Drug, Improvement and Modernization Act of 2003, (the "Act") beginning in 2006, the Company will be required to contribute to a Medicare Prescription Drug Benefit Plan. ALLTEL has a non-contributory defined contribution plan in the form of profit-sharing arrangements for eligible employees.
