ELECTRONIC ARTS INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) DESCRIPTION OF BUSINESS AND BASIS OF PRESENTATION

We develop, market, publish and distribute video game software and content that can be played by consumers on a variety of platforms, including video game consoles (such as the Sony PlayStation® 2 and PLAYSTATION® 3, Microsoft Xbox 360 and Nintendo Wii), personal computers, handheld game players (such as the PlayStation® Portable (PSP) and the Nintendo DS) and wireless devices. Some of our games are based on content that we license from others (e.g., Madden NFL Football, Harry Potter and FIFA Soccer), and some of our games are based on our own wholly-owned intellectual property (e.g., The Sims, Need for Speed and POGO). Our goal is to publish titles with global mass-market appeal, which often means translating and localizing them for sale in non-English speaking countries. In addition, we create software game franchises that allow us to publish new titles on a recurring basis that are based on the same property. Examples of this franchise approach are the annual iterations of our sports-based products (e.g., Madden NFL Football, NCAA® Football and FIFA Soccer), wholly-owned properties that can be successfully sequenced (e.g., The Sims, Need for Speed and Battlefield) and titles based on long-lived literary and/or movie properties (e.g., Lord of the Rings and Harry Potter).

The Condensed Consolidated Financial Statements are unaudited and reflect all adjustments (consisting only of normal recurring accruals unless otherwise indicated) that, in the opinion of management, are necessary for a fair presentation of the results for the interim periods presented. The preparation of these Condensed Consolidated Financial Statements requires management to make estimates and assumptions that affect the amounts reported in these Condensed Consolidated Financial Statements and accompanying notes. Actual results could differ materially from those estimates. The results of operations for the current interim periods are not necessarily indicative of results to be expected for the current year or any other period.

These Condensed Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and Notes thereto included in our Annual Report on Form 10-K for the fiscal year ended March 31, 2008, as filed with the United States Securities and Exchange Commission (SEC) on May 23, 2008.

(2) FISCAL YEAR AND FISCAL QUARTER

Our fiscal year is reported on a 52 or 53-week period that ends on the Saturday nearest March 31. Our results of operations for the fiscal years ended March 31, 2009 and 2008 contain 52 weeks and end on March 28, 2009 and March 29, 2008, respectively. Our results of operations for the three months ended September 30, 2008 and 2007 contain 13 weeks and ended on September 27, 2008 and September 29, 2007, respectively. Our results of operations for the six months ended September 30, 2008 and 2007 contain 26 weeks and ended on September 27, 2008 and September 29, 2007, respectively. For simplicity of disclosure, all fiscal periods are referred to as ending on a calendar month end.

(3) FAIR VALUE MEASUREMENTS

On April 1, 2008, we adopted Statement of Financial Accounting Standard (SFAS) No. 157, *Fair Value Measurements*, except as it applies to the nonfinancial assets and nonfinancial liabilities that are subject to Financial Accounting Standards Board (FASB) Staff Position (FSP) Financial Accounting Standard (FAS) 157-2, *Effective Date of FASB Statement No. 157* . These nonfinancial items include assets and liabilities such as a reporting unit measured at fair value in a goodwill impairment test and nonfinancial assets acquired and liabilities assumed in a business combination. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosure requirements regarding fair value measurements. SFAS No. 157 establishes a three-tier hierarchy that draws a distinction between market participant assumptions based on (1) observable quoted prices in active markets for identical assets or liabilities (Level 1), (2) inputs other than quoted prices in active markets that are observable either directly or indirectly (Level 2), and (3) unobservable inputs that require us to use other valuation techniques to determine fair value (Level 3).

Table of Contents

As of September 30, 2008, our financial assets and liabilities measured and recorded at fair value were as follows (in millions):

	As of September 30, 2008	Fair Value Measurements at Reporting Date Using			Balance Sheet Classification
		Quoted Prices in Active Markets for Identical Financial Instruments	Other Observable Inputs	Significant Unobservable Inputs	
		(Level 1)	(Level 2)	(Level 3)	
Assets					
Money market funds	\$ 920	\$ 920	\$	\$	Cash
Available-for-sale equity securities	640	640			Marketable equity securities
Available-for-sale fixed income securities	610	209	401		Short-term investments and cash equivalents
Other investments	8		8		Other assets
Foreign currency derivatives	4		4		Other current assets
Total assets at fair value	\$ 2,182	\$ 1,769	\$ 413	\$	

Our money market funds, available-for-sale fixed income and equity securities, and foreign currency derivatives are measured and recorded on a recurring basis. Other investments included in the table above were measured and recorded on a nonrecurring basis. During the three and six months ended September 30, 2008, we measured certain of our other investments at fair value due to various factors, including the extent and duration during which the fair value had been below cost.

Available-for-sale fixed income securities categorized as Level 1 consist of U.S. Treasury securities.

Available-for-sale fixed income securities categorized as Level 2 include \$158 million in corporate bonds, \$112 million in U.S. agency securities, \$96 million in commercial paper, and \$35 million in asset-backed securities.

Our Level 1 financial instruments are valued using quoted prices in active markets for identical instruments. Our Level 2 financial instruments, including derivative instruments, are valued using quoted prices for identical instruments in less active markets or using other observable market inputs for comparable instruments. As of September 30, 2008, our Level 3 financial instruments were less than \$1 million.

(4) FINANCIAL INSTRUMENTS***Marketable Equity Securities***

Our investments in marketable equity securities consist of investments in common stock of publicly traded companies. During the three and six months ended September 30, 2008, we recognized impairment charges of \$25 million and \$30 million, respectively, with respect to our marketable equity securities. Due to various factors, including the extent and duration during which the market price had been below cost, we concluded the decline in value was other-than-temporary as defined by SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities", as amended. The \$25 million and \$30 million impairments for the three and six months ended

September 30, 2008, respectively, are included in losses on strategic investments on our Condensed Consolidated Statements of Operations.

As of September 30, 2008 and March 31, 2008, we had gross unrealized gains of \$441 million and \$501 million and gross unrealized losses of \$3 million and \$4 million, respectively, in our marketable equity security investments.

Based on our review, we did not consider the investments with gross unrealized losses to be other-than-temporarily impaired as of September 30, 2008 or March 31, 2008. We evaluate our investments for impairment quarterly. If we conclude that an investment is other-than-temporarily impaired, we will recognize an impairment charge at that time.

Other Investments

Our other investments, included in other assets on our Condensed Consolidated Balance Sheets, consist principally of non-voting preferred shares in two publicly traded companies. We account for these investments under the cost method as prescribed by Accounting Principles Board Opinion (APB) No. 18, as amended, *The Equity Method of Accounting for Investments in Common Stock* .

Table of Contents

During the three and six months ended September 30, 2008, we recognized impairment charges of \$9 million and \$10 million, respectively, with respect to these investments. Due to various factors, including the extent and duration during which the fair value had been below cost, we concluded the decline in value was other-than-temporary. The \$9 million and \$10 million impairments for the three and six months ended September 30, 2008, respectively, are included in losses on strategic investments on our Condensed Consolidated Statements of Operations.

(5) BUSINESS COMBINATIONS

In May 2008, we acquired ThreeSF, Inc. Based in San Francisco, California, ThreeSF's Rupture service is an online social network for gamers. Separately, in May 2008, we acquired certain assets of Hands-On Mobile Inc. and its affiliates relating to its Korean Mobile games business based in Seoul, Korea. These business combinations were completed for total cash consideration of approximately \$45 million, including transaction costs. These acquisitions were not material to our Condensed Consolidated Balance Sheets and Statements of Operations. The results of operations and the preliminary estimated fair value of the acquired assets and assumed liabilities have been included in our Condensed Consolidated Financial Statements since the date of acquisition. See Note 6 for information regarding goodwill and other intangible assets.

(6) GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill information is as follows (in millions):

	As of March 31, 2008	Goodwill Acquired	Purchase Accounting Adjustments	Effects of Foreign Currency Translation	As of September 30, 2008
Goodwill	\$ 1,152	\$ 31	\$ 1	\$ (2)	\$ 1,182

Finite-lived intangibles consist of the following (in millions):

	As of September 30, 2008			As of March 31, 2008		
	Gross Carrying Amount	Accumulated Amortization	Other Intangibles, Net	Gross Carrying Amount	Accumulated Amortization	Other Intangibles, Net
Developed and Core Technology	\$ 238	\$ (111)	\$ 127	\$ 234	\$ (95)	\$ 139
Trade Name	86	(38)	48	86	(30)	56
Carrier Contracts and Related	85	(45)	40	85	(36)	49
Subscribers and Other Intangibles	46	(21)	25	38	(17)	21
Total	\$ 455	\$ (215)	\$ 240	\$ 443	\$ (178)	\$ 265

Amortization of intangibles for the three and six months ended September 30, 2008 was \$20 million (of which \$4 million was recognized as cost of goods sold) and \$37 million (of which \$7 million was recognized as cost of goods sold), respectively. Amortization of intangibles for the three and six months ended September 30, 2007 was \$14 million (of which \$7 million was recognized as cost of goods sold) and \$28 million (of which \$14 million was recognized as cost of goods sold), respectively. Finite-lived intangible assets are amortized using the straight-line method over the lesser of their estimated useful lives or the term of the related agreement, typically from two to

twelve years. As of September 30, 2008 and March 31, 2008, the weighted-average remaining useful life for finite-lived intangible assets was approximately 4.9 years and 5.2 years, respectively.

Table of Contents

As of September 30, 2008, future amortization of finite-lived intangibles that will be recorded in cost of goods sold and operating expenses is estimated as follows (in millions):

Fiscal Year Ending March 31, 2009 (remaining six months)	\$ 36
2010	66
2011	58
2012	28
2013	14
Thereafter	38
Total	\$ 240

(7) RESTRUCTURING

Restructuring information as of September 30, 2008 was as follows (in millions):

Charges settled in non-cash		(16)					(16)
Balances as of September 30, 2008	\$	\$	\$ 1	\$	\$ 8	\$	\$ 9

Fiscal 2008 Reorganization

In June 2007, we announced a plan to reorganize our business into several new divisions, including four new Labels : EA SPORTS , EA Games, EA Casual Entertainment and The Sims. Each Label operates with dedicated studio and product marketing teams focused on consumer-driven priorities. The new structure is designed to streamline decision-making, improve global focus, and speed new ideas to market. In October 2007, our Board of Directors approved a plan of reorganization (fiscal 2008 reorganization plan) in connection with the reorganization of our business into four new Labels.

Since the inception of the fiscal 2008 reorganization plan through September 30, 2008, we have incurred charges of approximately \$118 million, of which (1) \$12 million were for employee-related expenses, (2) \$74 million related to the closure of our Chertsey, England and Chicago, Illinois facilities, which included asset impairment and lease termination costs, and (3) \$32 million related to other costs including other contract terminations as well as IT and consulting costs to assist in the reorganization of our business support functions. During the fourth quarter of fiscal 2008, we completed the closure of our Chertsey facility and consolidated our Chertsey operations and employees into our Guildford, England facility. The restructuring accrual of \$1 million as of September 30, 2008 related to our fiscal 2008 reorganization is expected to be settled by December 31, 2008. This accrual is included in other accrued expenses presented in Note 9 of the Notes to Condensed Consolidated Financial Statements. In addition, over the next 12 months, we expect to incur IT and consulting costs in connection with the reorganization of our business support

functions.

During fiscal 2008, we commenced marketing our facility in Chertsey, England for sale and reclassified the estimated fair value of the Chertsey facility from property and equipment, net, to other current assets as an asset held for sale on our Condensed Consolidated Balance Sheets. Our reorganization charges include \$66 million to write our Chertsey facility down to its estimated fair value (less costs to sell the property), \$16 million of which was recognized in the six months ended September 30, 2008. Although we continue to market our facility in Chertsey, England for sale, for accounting purposes, based on current market conditions, we have reclassified the estimated fair value of the Chertsey facility from other current assets as an asset held for sale to property and equipment, net, on our Condensed Consolidated Balance Sheets as of September 30, 2008.

Table of Contents

During the remainder of fiscal 2009, we anticipate incurring between \$8 million and \$10 million of restructuring charges related to the fiscal 2008 reorganization. Overall, including charges incurred through September 30, 2008, we expect to incur cash and non-cash charges between \$130 million and \$135 million by fiscal 2010. These charges will consist primarily of employee-related costs (\$12 million), facility exit costs (approximately \$74 million), as well as other reorganization costs including other contract terminations and IT and consulting costs to assist in the reorganization of our business support functions (approximately \$45 million).

Fiscal 2006 International Publishing Reorganization

In November 2005, we announced plans to establish an international publishing headquarters in Geneva, Switzerland. Through the quarter ended September 30, 2006, we relocated certain employees to our new facility in Geneva, closed certain facilities in the United Kingdom, and made other related changes in our international publishing business. Since the inception of the restructuring plan through September 30, 2008, we have incurred charges of approximately \$37 million, of which (1) \$21 million were for employee-related expenses, (2) \$9 million related to the closure of certain United Kingdom facilities, and (3) \$7 million in other costs. The restructuring accrual of \$8 million as of September 30, 2008 related to our fiscal 2006 international publishing reorganization is expected to be utilized by March 2017. This accrual is included in other accrued expenses presented in Note 9 of the Notes to Condensed Consolidated Financial Statements.

During the remainder of fiscal 2009, we anticipate incurring approximately \$3 million of restructuring charges related to the fiscal 2006 international publishing reorganization. Overall, including the charges incurred through September 30, 2008, we expect to incur between \$50 million and \$55 million of restructuring charges in connection with our fiscal 2006 international publishing reorganization, substantially all of which will result in cash expenditures by 2017. These restructuring charges will consist primarily of employee-related relocation assistance (approximately \$30 million), facility exit costs (approximately \$15 million), as well as other reorganization costs (approximately \$7 million).

(8) ROYALTIES AND LICENSES

Our royalty expenses consist of payments to (1) content licensors, (2) independent software developers, and (3) co-publishing and distribution affiliates. License royalties consist of payments made to celebrities, professional sports organizations, movie studios and other organizations for our use of their trademarks, copyrights, personal publicity rights, content and/or other intellectual property. Royalty payments to independent software developers are payments for the development of intellectual property related to our games. Co-publishing and distribution royalties are payments made to third parties for the delivery of product.

Royalty-based obligations with content licensors and distribution affiliates are either paid in advance and capitalized as prepaid royalties or are accrued as incurred and subsequently paid. These royalty-based obligations are generally expensed to cost of goods sold generally at the greater of the contractual rate or an effective royalty rate based on the total projected net revenue. Prepayments made to thinly capitalized independent software developers and co-publishing affiliates are generally in connection with the development of a particular product and, therefore, we are generally subject to development risk prior to the release of the product. Accordingly, payments that are due prior to completion of a product are generally expensed to research and development over the development period as the services are incurred. Payments due after completion of the product (primarily royalty-based in nature) are generally expensed as cost of goods sold.

Our contracts with some licensors include minimum guaranteed royalty payments, which are initially recorded as an asset and as a liability at the contractual amount when no performance remains with the licensor. When performance remains with the licensor, we record guarantee payments as an asset when actually paid and as a liability when incurred, rather than recording the asset and liability upon execution of the contract. Minimum royalty payment obligations are classified as current liabilities to the extent such royalty payments are contractually due within the next twelve months. As of September 30, 2008 and March 31, 2008, approximately \$23 million and \$10 million, respectively, of minimum guaranteed royalty obligations are included in the royalty-related assets and liabilities tables below.

Each quarter, we also evaluate the future realization of our royalty-based assets, as well as any unrecognized minimum commitments not yet paid to determine amounts we deem unlikely to be realized through product sales.

Any impairments or losses determined before the launch of a product are charged to research and development expense. Impairments or losses determined post-launch are charged to cost of goods sold. In either case, we rely on estimated revenue to evaluate the future

Table of Contents

realization of prepaid royalties and commitments. If actual sales or revised revenue estimates fall below the initial revenue estimate, then the actual charge taken may be greater in any given quarter than anticipated. During the three and six months ended September 30, 2008, we recognized an impairment charge of \$5 million. We did not recognize any impairment charges during the three months ended September 30, 2007. During the six months ended September 30, 2007, we recognized impairment charges of less than \$1 million.

The current and long-term portions of prepaid royalties and minimum guaranteed royalty-related assets, included in other current assets and other assets, consisted of (in millions):

	As of September 30, 2008	As of March 31, 2008
Other current assets	\$ 104	\$ 54
Other assets	44	62
Royalty-related assets	\$ 148	\$ 116

At any given time, depending on the timing of our payments to our co-publishing and/or distribution affiliates, content licensors and/or independent software developers, we recognize unpaid royalty amounts owed to these parties as either accounts payable or accrued liabilities. The current and long-term portions of accrued royalties, included in accrued and other current liabilities, as well as other liabilities, consisted of (in millions):

	As of September 30, 2008	As of March 31, 2008
Accrued and other current liabilities	\$ 252	\$ 200
Other liabilities	15	3
Royalty-related liabilities	\$ 267	\$ 203

In addition, as of September 30, 2008, we were committed to pay approximately \$1,532 million to content licensors and co-publishing and/or distribution affiliates, but performance remained with the counterparty (*i.e.*, delivery of the product or content or other factors) and such commitments were therefore not recorded in our Condensed Consolidated Financial Statements. See Note 11 of the Notes to Condensed Consolidated Financial Statements.

(9) BALANCE SHEET DETAILS***Inventories***

Inventories as of September 30, 2008 and March 31, 2008 consisted of (in millions):

	As of September 30, 2008	As of March 31, 2008
Raw materials and work in process	\$ 7	\$ 4
In-transit inventory	28	43
Finished goods	293	121
Inventories	\$ 328	\$ 168

Table of Contents***Property and Equipment, Net***

Property and equipment, net, as of September 30, 2008 and March 31, 2008 consisted of (in millions):

	As of September 30, 2008	As of March 31, 2008
Computer equipment and software	\$ 680	\$ 643
Buildings	170	151
Leasehold improvements	131	131
Office equipment, furniture and fixtures	77	77
Land	20	11
Warehouse equipment and other	11	11
Construction in progress	14	14
	1,103	1,038
Less accumulated depreciation	(686)	(642)
Property and equipment, net	\$ 417	\$ 396

As of September 30, 2008, although we continue to market our facility in Chertsey, England for sale, for accounting purposes, based on current market conditions, we have reclassified the estimated fair value of the Chertsey facility from other current assets as an asset held for sale to property and equipment, net, on our Condensed Consolidated Balance Sheets.

Depreciation expense associated with property and equipment amounted to \$29 million and \$61 million for the three and six months ended September 30, 2008, respectively. Depreciation expense associated with property and equipment amounted to \$31 million and \$62 million for the three and six months ended September 30, 2007, respectively.

Accrued and Other Current Liabilities

Accrued and other current liabilities as of September 30, 2008 and March 31, 2008 consisted of (in millions):

	As of September 30, 2008	As of March 31, 2008
Accrued royalties	\$ 252	\$ 200
Other accrued expenses	240	188
Accrued compensation and benefits	157	189
Deferred net revenue (other)	80	73
Accrued value added taxes	41	11
Accrued income taxes	31	22
Accrued and other current liabilities	\$ 801	\$ 683

Deferred net revenue (other) includes the deferral of subscription revenue, deferrals related to our Switzerland distribution business, advertising revenue, licensing arrangements and other revenue for which revenue recognition criteria has not been met.

Deferred Net Revenue (Packaged Goods and Digital Content)

Deferred net revenue (packaged goods and digital content) was \$424 million as of September 30, 2008 and \$387 million as of March 31, 2008. Deferred net revenue (packaged goods and digital content) includes the deferral of (1) the total net revenue from the sale of certain online-enabled packaged goods and PC digital downloads for which we do not have vendor-specific objective evidence of fair value (VSOE) for the online service we provide in connection with the sale of the software, (2) revenue from certain packaged goods sales of massively-multiplayer online role-playing games, and (3) revenue from the sale of certain incremental content associated with our core subscription services that can only be played online, which are types of micro-transactions . We recognize revenue from sales of online-enabled packaged goods and PC digital downloads for which we do not have VSOE for the online service on a straight-line basis over an estimated six month period beginning in the month

Table of Contents

after shipment. However, we expense the cost of goods sold related to these transactions during the period in which the product is delivered (rather than on a deferred basis).

(10) INCOME TAXES

The tax rate reported for the three and six months ended September 30, 2008 is based on our actual year-to-date effective tax rate for the six months ended September 30, 2008. Our effective tax rates for the three and six months ended September 30, 2008 were a tax benefit of 20.6 percent and 15.3 percent, respectively, compared to a tax benefit of 19.3 percent and 17.6 percent for the same periods in fiscal 2008. Because relatively small changes in our forecasted profitability for fiscal 2009 can significantly affect our estimated annual effective tax rate, we believe our year-to-date tax benefit rate of 15.3 percent is the most reliable estimate of our annual effective tax rate as of September 30, 2008. However, it is likely that the final effective tax rate for the year and subsequent quarters will likely be different than this rate, depending on a number of factors, including our profitability. The effective tax rates for the three and six months ended September 30, 2008 differ from the statutory rate of 35.0 percent primarily due to the effect of non-U.S. operations, non-deductible stock-based compensation, tax benefits related to the resolution of examinations by taxing authorities, and certain tax charges related to our integration of VGH, which we acquired in our fourth quarter of fiscal 2008. The effective tax rate for the three and six months ended September 30, 2008 differ from the same periods in fiscal 2008 primarily due to the tax charges related to VGH and tax benefits related to the resolution of tax examinations.

During the three and six months ended September 30, 2008, we recorded a decrease of \$20 million and \$10 million in gross unrecognized tax benefits, respectively. The total gross unrecognized tax benefits as of September 30, 2008 is \$302 million, of which \$269 million would affect our effective tax rate if recognized upon resolution of the uncertain tax positions. During the three months ended September 30, 2008, we recorded additional tax expense for gross interest and penalties of \$4 million bringing the balance at September 30, 2008 to \$63 million.

The Internal Revenue Service (IRS) has completed its field examination of our federal income tax returns for the fiscal years ending 1997 through 2005. As of September 30, 2008, the IRS had proposed, and we had agreed to, certain adjustments to these tax returns. As a result of these agreements, we recorded approximately \$11 million of previously unrecognized tax benefits. The effects of these adjustments have been considered in estimating our future obligations for unrecognized tax benefits and are not expected to have a material impact on our future financial position or results of operations. As of September 30, 2008, we had not agreed to certain other proposed adjustments for fiscal years ending 1997 through 2005, and those issues are pending resolution by the Appeals division of the IRS. We are also under income tax examination in Canada for fiscal years 2004 and 2005. We remain subject to income tax examination in Canada for fiscal years after 1999, in France and the United Kingdom for fiscal years after 2004, in Germany for fiscal years after 2003, and in Switzerland for fiscal years after 2006.

The timing of the resolution of income tax examinations is highly uncertain, and the amounts ultimately paid, if any, upon resolution of the issues raised by the taxing authorities may differ materially from the amounts accrued for each year. While it is reasonably possible that some of the issues under review by the IRS and Canadian taxing authorities could be resolved in the next 12 months, at this stage of the process it is not practicable to estimate a range of the potential change in the underlying unrecognized tax benefits with respect to these examinations. With respect to our other tax positions, we expect our unrecognized tax benefits to increase over the next 12 months primarily for current year tax positions.

The Emergency Economic Stabilization Act of 2008 (EESA) was passed by Congress and signed by the President on October 3, 2008. As part of the EESA, the Research & Development (R&D) Tax Credit was extended through 2009. The R&D Tax Credit had previously expired at the end of calendar 2007. EESA was enacted after September 30, 2008, and therefore the R&D Tax Credit is not included in the tax benefit for the three and six months ended September 30, 2008. The reinstatement of this tax credit will reduce our fiscal 2009 tax expense by approximately \$12 million and will have a beneficial impact on our effective tax rate for the remainder of fiscal 2009.

(11) COMMITMENTS AND CONTINGENCIES***Lease Commitments and Residual Value Guarantees***

We lease certain of our current facilities, furniture and equipment under non-cancelable operating lease agreements. We are required to pay property taxes, insurance and normal maintenance costs for certain of these facilities and will

be required to pay any increases over the base year of these expenses on the remainder of our facilities.

Table of Contents

In February 1995, we entered into a build-to-suit lease (Phase One Lease) with a third-party lessor for our headquarters facilities in Redwood City, California (Phase One Facilities). The Phase One Facilities comprise a total of approximately 350,000 square feet and provide space for sales, marketing, administration and research and development functions. In July 2001, the lessor refinanced the Phase One Lease with KeyBank National Association through July 2006. The Phase One Lease expires in January 2039, subject to early termination in the event the underlying financing between the lessor and its lenders is not extended. Subject to certain terms and conditions, we may purchase the Phase One Facilities or arrange for the sale of the Phase One Facilities to a third party.

Pursuant to the terms of the Phase One Lease, we have an option to purchase the Phase One Facilities at any time for a purchase price of \$132 million. In the event of a sale to a third party, if the sale price is less than \$132 million, we will be obligated to reimburse the difference between the actual sale price and \$132 million, up to a maximum of \$117 million, subject to certain provisions of the Phase One Lease, as amended.

On May 26, 2006, the lessor extended its loan financing underlying the Phase One Lease with its lenders through July 2007, and on May 14, 2007, the lenders extended this financing again for an additional year through July 2008.

On April 14, 2008, the lenders extended the financing for another year through July 2009, and modified certain definitions used in the covenants. On June 9, 2008, the Phase One Lease was amended to further modify certain definitions used in the covenants. At any time prior to the expiration of the financing in July 2009, we may re-negotiate the lease and the related financing arrangement. We account for the Phase One Lease arrangement as an operating lease in accordance with SFAS No. 13, *Accounting for Leases*, as amended.

In December 2000, we entered into a second build-to-suit lease (Phase Two Lease) with KeyBank National Association for a five and one-half year term beginning in December 2000 to expand our Redwood City, California headquarters facilities and develop adjacent property (Phase Two Facilities). Construction of the Phase Two Facilities was completed in June 2002. The Phase Two Facilities comprise a total of approximately 310,000 square feet and provide space for sales, marketing, administration and research and development functions. Subject to certain terms and conditions, we may purchase the Phase Two Facilities or arrange for the sale of the Phase Two Facilities to a third party.

Pursuant to the terms of the Phase Two Lease, we have an option to purchase the Phase Two Facilities at any time for a purchase price of \$115 million. In the event of a sale to a third party, if the sale price is less than \$115 million, we will be obligated to reimburse the difference between the actual sale price and \$115 million, up to a maximum of \$105 million, subject to certain provisions of the Phase Two Lease, as amended.

On May 26, 2006, the lessor extended the Phase Two Lease through July 2009 subject to early termination in the event the underlying loan financing between the lessor and its lenders is not extended. Concurrently with the extension of the lease, the lessor extended the loan financing underlying the Phase Two Lease with its lenders through July 2007. On May 14, 2007, the lenders extended this financing again for an additional year through July 2008. On April 14, 2008, the lenders extended the financing for another year through July 2009, and modified certain definitions used in the covenants. On June 9, 2008, the Phase Two Lease was amended to further modify certain definitions used in the covenants. At any time prior to the expiration of the financing in July 2009, we may re-negotiate the lease and the related financing arrangement. We account for the Phase Two Lease arrangement as an operating lease in accordance with SFAS No. 13, as amended.

We believe that, as of September 30, 2008, the estimated fair values of both properties under these operating leases exceeded their respective guaranteed residual values.

The two lease agreements with KeyBank National Association described above require us to maintain certain financial covenants, as amended on June 9, 2008, shown below, all of which we were in compliance with as of September 30, 2008.

Financial Covenants	Requirement		Actual as of September 30, 2008
Consolidated Net Worth (in millions)	equal to or greater than	\$ 2,430	\$ 4,028
Fixed Charge Coverage Ratio	equal to or greater than	3.00	3.02

Edgar Filing: ELECTRONIC ARTS INC. - Form 10-Q

Total Consolidated Debt to Capital	equal to or less than	60%	5.8%
Quick Ratio	equal to or greater than	1.00	9.61

Table of Contents***Development, Celebrity, League and Content Licenses: Payments and Commitments***

The products we produce in our studios are designed and created by our employee designers, artists, software programmers and by non-employee software developers (independent artists or third-party developers). We typically advance development funds to the independent artists and third-party developers during development of our games, usually in installment payments made upon the completion of specified development milestones. Contractually, these payments are generally considered advances against subsequent royalties on the sales of the products. These terms are set forth in written agreements entered into with the independent artists and third-party developers.

In addition, we have certain celebrity, league and content license contracts that contain minimum guarantee payments and marketing commitments that may not be dependent on any deliverables. Celebrities and organizations with whom we have contracts include: FIFA, FIFPRO Foundation, and FAPL (Football Association Premier League Limited) (professional soccer); NASCAR (stock car racing); National Basketball Association (professional basketball); PGA TOUR and Tiger Woods (professional golf); National Hockey League and NHL Players Association (professional hockey); Warner Bros. (Harry Potter); New Line Productions and Saul Zaentz Company (The Lord of the Rings); Red Bear Inc. (John Madden); National Football League Properties and PLAYERS Inc. (professional football); Collegiate Licensing Company (collegiate football and basketball); Viacom Consumer Products (The Godfather); ESPN (content in EA SPORTS games); Twentieth Century Fox Licensing and Merchandising (The Simpsons); and Hasbro, Inc. (a wide array of Hasbro intellectual properties). These developer and content license commitments represent the sum of (1) the cash payments due under non-royalty-bearing licenses and services agreements, and (2) the minimum guaranteed payments and advances against royalties due under royalty-bearing licenses and services agreements, the majority of which are conditional upon performance by the counterparty. These minimum guarantee payments and any related marketing commitments are included in the table below. During the three months ended September 30, 2008, we declined to exercise our option to invest in the Arena Football League.

The following table summarizes our minimum contractual obligations and commercial commitments as of September 30, 2008 (in millions):

Fiscal Year	Contractual Obligations			Commercial Commitments	
	Leases (1)	Developer/ Licensor Commitments (2)	Marketing	Letter of Credit, Bank and Other Guarantees	Total
Ending March 31,					
2009 (remaining six months)	\$ 35	\$ 130	\$ 32	\$ 4	\$ 201
2010	57	240	47		344
2011	42	290	39		371
2012	31	148	38		217
2013	25	135	38		198
Thereafter	55	612	155		822
Total	\$ 245	\$ 1,555	\$ 349	\$ 4	\$ 2,153

(1) Lease commitments include contractual rental commitments of \$11 million under real estate leases for unutilized office space resulting from our restructuring activities. These amounts, net of estimated future sub-lease income, were expensed in the periods of the related restructuring and are included in our accrued and other current liabilities reported in our Condensed Consolidated Balance Sheets as of September 30, 2008.

(2) Developer/licensor commitments include \$23 million of commitments to developers or licensors that have been recorded in current and long-term liabilities and a corresponding amount in current and long-term assets in our Condensed Consolidated Balance Sheets as of September 30, 2008 because payment is not contingent upon

performance by the developer or licensor.

The amounts represented in the table above reflect our minimum cash obligations for the respective fiscal years, but do not necessarily represent the periods in which they will be expensed in our Condensed Consolidated Financial Statements.

In addition to what is included in the table above, as of September 30, 2008, we had a liability for unrecognized tax benefits and related interest totaling \$365 million, of which approximately \$69 million is offset by prior cash deposits to tax authorities for issues pending resolution. For the remaining liability, we are unable to make a reasonably reliable estimate of when cash settlement with a taxing authority will occur.

Table of Contents**Legal proceedings**

We are subject to claims and litigation arising in the ordinary course of business. We do not believe that any liability from any reasonably foreseeable disposition of such claims and litigation, individually or in the aggregate, would have a material adverse effect on our consolidated financial position or results of operations.

(12) STOCK-BASED COMPENSATION

We are required to estimate the fair value of share-based payment awards on the date of grant. We recognize compensation costs for stock-based payment transactions to employees based on their grant-date fair value over the service period for which such awards are expected to vest. The fair value of restricted stock units is determined based on the quoted price of our common stock on the date of grant. The fair value of stock options and stock purchase rights granted pursuant to our employee stock purchase plan (ESPP) is determined using the Black-Scholes valuation model. The determination of fair value is affected by our stock price, as well as assumptions regarding subjective and complex variables such as expected employee exercise behavior and our expected stock price volatility over the expected term of the award. Generally, our assumptions are based on historical information and judgment is required to determine if historical trends may be indicators of future outcomes. We estimated the following key assumptions for the Black-Scholes valuation calculation:

Risk-free interest rate. The risk-free interest rate is based on U.S. Treasury yields in effect at the time of grant for the expected term of the option.

Expected volatility. We use a combination of historical stock price volatility and implied volatility computed based on the price of options publicly traded on our common stock for our expected volatility assumption.

Expected term. The expected term represents the weighted-average period the stock options are expected to remain outstanding. The expected term is determined based on historical exercise behavior, post-vesting termination patterns, options outstanding and future expected exercise behavior.

Expected dividends.

The assumptions used in the Black-Scholes valuation model to value our option grants and ESPP were as follows:

	Stock Option Grants				Employee Stock Purchase Plan			
	Three Months Ended		Six Months Ended		Three Months Ended		Six Months Ended	
	September 30,		September 30,		September 30,		September 30,	
	2008	2007	2008	2007	2008	2007	2008	2007
Risk-free interest rate	2.1 - 2.9%	4.2 - 4.4%	2.1 - 3.8%	4.2 - 5.1%	1.9 - 2.1%	4.2%	1.9 - 2.1%	4.2%
Expected volatility	33 - 34%	32 - 35%	32 - 34%	31 - 37%	35%	32 - 33%	35%	32 - 33%
Weighted-average volatility	34%	33%	33%	32%	35%	33%	35%	33%
Expected term	4.2 years	4.2 years	4.3 years	4.4 years	6-12 months	6-12 months	6-12 months	6-12 months
Expected dividends	None	None	None	None	None	None	None	None

Employee stock-based compensation expense recognized during the three and six months ended September 30, 2008 and 2007 was calculated based on awards ultimately expected to vest and has been reduced for estimated forfeitures. In subsequent periods, if actual forfeitures differ from those estimates, an adjustment to stock-based compensation expense will be recognized at that time.

Table of Contents

The following table summarizes stock-based compensation expense resulting from stock options, restricted stock, restricted stock units and our employee stock purchase plan included in our Condensed Consolidated Statements of Operations (in millions):

	Three Months Ended September 30,		Six Months Ended September 30,	
	2008	2007	2008	2007
Cost of goods sold	\$	\$ 1	\$ 1	\$ 1
Marketing and sales	5	5	10	9
General and administrative	13	10	23	18
Research and development	35	22	69	39
Stock-based compensation expense	53	38	103	67
Benefit from income taxes	(12)	(8)	(21)	(13)
Stock-based compensation expense, net of tax	\$ 41	\$ 30	\$ 82	\$ 54

As of September 30, 2008, our total unrecognized compensation cost related to stock options was \$182 million and is expected to be recognized over a weighted-average service period of 2.5 years. As of September 30, 2008, our total unrecognized compensation cost related to restricted stock, restricted stock units and notes payable in shares of common stock (collectively referred to as restricted stock rights) was \$328 million and is expected to be recognized over a weighted-average service period of 2.1 years.

The following table summarizes our stock option activity for the six months ended September 30, 2008:

	Options (in thousands)	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in millions)
Outstanding as of March 31, 2008	36,077	\$ 43.32		
Activity for the six months ended September 30, 2008:				
Granted	2,664	47.63		
Exercised	(2,002)	24.60		
Forfeited, cancelled or expired	(1,452)	52.71		
Outstanding as of September 30, 2008	35,287	44.32	5.8	\$ 139
Exercisable as of September 30, 2008	23,157	40.95	4.6	\$ 136

The aggregate intrinsic value represents the total pre-tax intrinsic value based on our closing stock price as of September 30, 2008, which would have been received by the option holders had all option holders exercised their options as of that date. The weighted-average grant-date fair value of stock options granted during the three and six months ended September 30, 2008 was \$13.71 and \$15.41, respectively. The weighted-average grant-date fair value of stock options granted during the three and six months ended September 30, 2007 was \$17.17 and \$17.19, respectively. The following table summarizes our restricted stock rights activity, excluding performance-based restricted stock unit grants discussed below, for the six months ended September 30, 2008:

	Restricted Stock Rights	Weighted- Average Grant Date Fair Value
	(in thousands)	
Balance as of March 31, 2008	6,344	\$ 52.22
Activity for the six months ended September 30, 2008:		
Granted	1,919	47.30
Vested	(949)	51.12
Forfeited or cancelled	(336)	50.99
Balance as of September 30, 2008	6,978	51.08

Table of Contents

The weighted-average grant date fair value of restricted stock rights is based on the quoted market value of our common stock on the date of grant. The weighted-average fair value of restricted stock rights granted during the three and six months ended September 30, 2008 was \$45.52 and \$47.30, respectively. The weighted-average fair value of restricted stock rights granted during the three and six months ended September 30, 2007 was \$50.97 and \$50.58, respectively.

The following table summarizes our performance-based restricted stock unit activity for the six months ended September 30, 2008:

	Performance- Based Restricted Stock Units (in thousands)	Weighted- Average Grant Date Fair Value
Balance as of March 31, 2008	691	\$ 54.51
Activity for the six months ended September 30, 2008:		
Granted	2,354	49.38
Vested	(54)	54.51
Forfeited or cancelled	(13)	54.51
Balance as of September 30, 2008	2,978	50.45

The weighted-average grant date fair value of performance-based restricted stock units is based on the quoted market value of our common stock on the date of grant. The weighted-average fair value of performance-based restricted stock units granted during the three and six months ended September 30, 2008 was \$42.96 and \$49.38, respectively. There were no performance-based restricted stock units granted during the three and six months ended September 30, 2007.

During the six months ended September 30, 2008 and 2007, we issued 519 thousand and 494 thousand shares, respectively, under the ESPP with an exercise price for purchase rights of \$40.20 and \$42.86, respectively. The estimated weighted-average fair value of purchase rights during the six months ended September 30, 2008 and 2007 was \$12.20 and \$14.69, respectively.

At our Annual Meeting of Stockholders, held on July 31, 2008, our stockholders approved amendments to the 2000 Equity Incentive Plan (the "Equity Plan") to (a) increase the number of shares authorized for issuance under the Equity Plan by 2,185,000 shares, (b) replace the specific limitation on the number of shares that may be granted as restricted stock or restricted stock unit awards with an alternate method of calculating the number of shares remaining available for issuance under the Equity Plan, (c) add additional performance measurements for use in granting performance-based equity under the Equity Plan, and (d) extend the term of the Equity Plan for an additional ten years. Our stockholders also approved an amendment to the 2000 Employee Stock Purchase Plan (the "Purchase Plan") to (a) increase the number of shares authorized under the Purchase Plan by 1.5 million shares and (b) removed the ten-year term from the Purchase Plan.

(13) COMPREHENSIVE LOSS

We are required to classify items of other comprehensive income (loss) by their nature in a financial statement and display the accumulated balance of other comprehensive income separately from retained earnings and additional paid-in capital in the equity section of the balance sheet. Accumulated other comprehensive income primarily includes foreign currency translation adjustments, and the net-of-tax amounts for unrealized gains (losses) on investments and unrealized gains (losses) on derivatives designated as cash flow hedges.

Table of Contents

The components of comprehensive loss for the three and six months ended September 30, 2008 and 2007 are summarized as follows (in millions):

	Three Months Ended September 30,		Six Months Ended September 30,	
	2008	2007	2008	2007
Net loss	\$ (310)	\$ (195)	\$ (405)	\$ (328)
Other comprehensive income (loss):				
Change in unrealized gains (losses) on investments, net of tax expense (benefit) of \$0, \$(15), \$(3) and \$3, respectively	(92)	78	(94)	126
Reclassification adjustment for (gains) losses realized on investments in net loss, net of tax (expense) benefit of \$0, \$(1), \$0 and \$(1), respectively	25	(1)	30	(1)
Change in unrealized gains (losses) on derivative instruments, net of tax expense (benefit) of \$0, \$0, \$0 and \$1, respectively	5	(2)	4	(2)
Reclassification adjustment for (gains) losses realized on derivative instruments in net loss, net of tax (expense) benefit of \$0, \$0, \$0 and \$(1), respectively			1	(1)
Foreign currency translation adjustments	(17)	16	(17)	36
Total other comprehensive income (loss)	(79)	91	(76)	158
Total comprehensive loss	\$ (389)	\$ (104)	\$ (481)	\$ (170)

The foreign currency translation adjustments are not adjusted for income taxes as they relate to indefinite investments in non-U.S. subsidiaries.

(14) NET LOSS PER SHARE

As a result of our net loss for the three and six months ended September 30, 2008, we have excluded certain stock awards from the diluted loss per share calculation as their inclusion would have been antidilutive. Had we reported net income for these periods, an additional 6 million shares of common stock would have been included in the number of shares used to calculate diluted earnings per share in each of the three and six month periods ended September 30, 2008.

As a result of our net loss for the three and six months ended September 30, 2007, we have excluded certain stock awards from the diluted loss per share calculation as their inclusion would have been antidilutive. Had we reported net income for these periods, an additional 7 million shares of common stock would have been included in the number of shares used to calculate diluted earnings per share in each of the three and six month periods ended September 30, 2007.

Options to purchase 25 million and 23 million shares of common stock were excluded from the computation of diluted shares for the three and six months ended September 30, 2008, respectively, as their inclusion would have been antidilutive. For the three and six months ended September 30, 2008, the weighted-average exercise price of these shares was \$50.80 and \$52.43 per share, respectively.

Options to purchase 18 million and 17 million shares of common stock were excluded from the computation of diluted shares for the three and six months ended September 30, 2007, respectively, as their inclusion would have been antidilutive. For the three and six months ended September 30, 2007, the weighted-average exercise price of these shares was \$54.10 and \$54.41 per share, respectively.

(15) SEGMENT INFORMATION

Our reporting segments are based upon: our internal organizational structure; the manner in which our operations are managed; the criteria used by our Chief Executive Officer, our Chief Operating Decision Maker (CODM), to evaluate segment performance; the availability of separate financial information; and overall materiality considerations.

Table of Contents

Prior to the fourth quarter of fiscal 2008, we managed our business primarily based on geographical performance. Accordingly, our combined global publishing organizations represented our reportable segment, namely Publishing, due to their similar economic characteristics, products and distribution methods. Publishing refers to the manufacturing, marketing, advertising and distribution of products developed or co-developed by us, or distribution of certain third-party publishers' products through our co-publishing and distribution program.

During the fourth quarter of fiscal 2008, we updated our financial systems such that, in addition to providing geographic information, we provide our CODM financial information based upon management's new organizational structure (the "Label Structure"); that is, the EA Games, EA SPORTS, The Sims and EA Casual Entertainment businesses. In addition, our CODM now regularly receives separate financial information for four distinct businesses within the EA Casual Entertainment Label - EA Mobile, POGO, Hasbro and Casual Entertainment. Accordingly in assessing performance and allocating resources, our CODM reviews the results of seven operating segments: EA Games; EA SPORTS; The Sims; POGO; EA Mobile, and Hasbro and Casual Entertainment. Due to their similar economic characteristics, products and distribution methods, EA Games, EA SPORTS, The Sims, POGO, Hasbro and Casual Entertainment's results are aggregated into one Reportable Segment (the "Label segment") as shown below. The remaining operating segment's results are not material for separate disclosure and are included in the reconciliation of label segment profit to consolidated operating loss below. In addition to assessing performance and allocating resources based on our operating segments as described herein, to a lesser degree, our CODM also continues to review results based on geographic performance.

The following table summarizes the financial performance of the Label segment and a reconciliation of the Label segment's profit to our consolidated operating loss for the three and six months ended September 30, 2008 (in millions):

	Three Months Ended September 30, 2008	Six Months Ended September 30, 2008
Label segment:		
Net revenue	\$ 1,050	\$ 1,588
Depreciation and amortization	(17)	(35)
Other expenses	(890)	(1,470)
Label segment profit	143	83
Reconciliation to consolidated operating loss:		
Other:		
Change in deferred net revenue (packaged goods and digital content)	(232)	(37)
Other net revenue	76	147
Depreciation and amortization	(32)	(63)
Other expenses	(319)	(591)
Consolidated operating loss	\$ (364)	\$ (461)

Label segment profit differs from the consolidated operating loss primarily due to the exclusion of (1) certain corporate and other functional costs that are not allocated to the Labels, (2) the deferral of certain net revenue related to online-enabled packaged goods and digital content (see Note 9 of the Notes to Condensed Consolidated Financial Statements), and (3) the results of EA Mobile. Our CODM reviews assets on a consolidated basis and not on a segment basis. We have not provided our CODM comparable quarterly data for fiscal 2008 based on the new Label structure as it is not practical given our previous organizational structure nor are we able to make a reliable estimate of such quarterly information.

Table of Contents

The following table summarizes the financial performance of our previous Publishing structure segments and a reconciliation of our Publishing segment's profit to our consolidated operating loss for the three and six months ended September 30, 2007 (in millions):

	Three Months Ended September 30, 2007	Six Months Ended September 30, 2007
Publishing segment:		
Net revenue	\$ 875	\$ 1,248
Depreciation and amortization	(5)	(10)
Other expenses	(567)	(821)
Publishing segment profit	303	417
Reconciliation to consolidated operating loss:		
Other:		
Change in deferred net revenue (packaged goods and digital content)	(296)	(332)
Other net revenue	61	119
Depreciation and amortization	(40)	(80)
Other expenses	(302)	(580)
Consolidated operating loss	\$ (274)	\$ (456)

Publishing segment profit differs from consolidated operating loss primarily due to the exclusion of (1) substantially all of our research and development expense, as well as certain corporate functional costs that are not allocated to the publishing organizations and (2) the deferral of certain net revenue related to online-enabled packaged goods and digital content.

Information about our total net revenue by platform for the three and six months ended September 30, 2008 and 2007 is presented below (in millions):

	Three Months Ended September 30,		Six Months Ended September 30,	
	2008	2007	2008	2007
Consoles				
Xbox 360	\$ 224	\$ 218	\$ 305	\$ 265
PLAYSTATION 3	98	17	235	28
PlayStation 2	54	73	134	134
Wii	33	59	91	88
Xbox	1	12	1	15
Nintendo GameCube		3		5
Total Consoles	410	382	766	535
PC	88	79	173	169
Mobile Platforms				
Wireless	47	38	90	71
Nintendo DS	43	47	64	73

Co-publishing and Distribution	214	33	404	72
Internet Services, Licensing and Other				
Subscription Services	29	23	57	46
Licensing, Advertising and Other	27	13	49	22
Total Internet Services, Licensing and Other	56	36	106	68
Total Net Revenue	\$ 894	\$ 640	\$ 1,698	\$ 1,035

Table of Contents

Information about our operations in North America, Europe and Asia for the three and six months ended September 30, 2008 and 2007 is presented below (in millions):

	North America	Europe	Asia	Total
<u>Three months ended September 30, 2008</u>				
Net revenue from unaffiliated customers	\$ 555	\$ 301	\$ 38	\$ 894
Long-lived assets	1,607	204	28	1,839
<u>Three months ended September 30, 2007</u>				
Net revenue from unaffiliated customers	\$ 362	\$ 246	\$ 32	\$ 640
Long-lived assets	1,144	272	10	1,426
<u>Six months ended September 30, 2008</u>				
Net revenue from unaffiliated customers	\$ 984	\$ 630	\$ 84	\$ 1,698
<u>Six months ended September 30, 2007</u>				
Net revenue from unaffiliated customers	\$ 525	\$ 451	\$ 59	\$ 1,035

Our direct sales to GameStop Corp. represented approximately 17 percent and 15 percent of total net revenue for the three and six months ended September 30, 2008, respectively, and approximately 15 percent and 13 percent of total net revenue for the three and six months ended September 30, 2007, respectively. Our direct sales to Wal-Mart Stores, Inc. represented approximately 13 percent of total net revenue for each of the three and six months ended September 30, 2008 and approximately 12 percent and 11 percent of total net revenue for the three and six months ended September 30, 2007, respectively. Our direct sales to Best Buy Co., Inc. represented approximately 10 percent of total net revenue for the three months ended September 30, 2008.

(16) IMPACT OF RECENTLY ISSUED ACCOUNTING STANDARDS

In December 2007, the FASB issued SFAS No. 141 (Revised 2007) (SFAS No. 141(R)), *Business Combinations* , which requires the recognition of assets acquired, liabilities assumed, and any noncontrolling interest in an acquiree at the acquisition date fair value with limited exceptions. SFAS No. 141(R) will change the accounting treatment for certain specific items and includes a substantial number of new disclosure requirements. SFAS No. 141(R) applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The adoption of SFAS No. 141(R) will have a material impact on our Condensed Consolidated Financial Statements for material acquisitions consummated on or after March 29, 2009.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51* , which establishes new accounting and reporting standards for noncontrolling interests (e.g., minority interests) and for the deconsolidation of a subsidiary. SFAS No. 160 also includes expanded disclosure requirements regarding the interests of the parent and its noncontrolling interests. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. We do not expect the adoption of SFAS No. 160 to have a material impact on our Condensed Consolidated Financial Statements.

In December 2007, the FASB ratified Emerging Issues Task Force's (EITF) consensus conclusion on EITF 07-01, *Accounting for Collaborative Arrangements* . EITF 07-01 defines collaborative arrangements and establishes reporting requirements for transactions between participants in a collaborative arrangement and between participants in the arrangement and third parties. Under this conclusion, a participant to a collaborative arrangement should disclose information about the nature and purpose of its collaborative arrangements, the rights and obligations under the collaborative arrangements, the accounting policy for collaborative arrangements, and the income statement classification and amounts attributable to transactions arising from the collaborative arrangement between participants for each period an income statement is presented. EITF 07-01 is effective for interim or annual reporting periods in fiscal years beginning after December 15, 2008 and requires retrospective application to all prior periods presented for

all collaborative arrangements existing as of the effective date. While we have not yet completed our analysis, we do not anticipate the implementation of EITF 07-01 to have a material impact on our Condensed Consolidated Financial Statements.

Table of Contents

In February 2008, the FASB issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157*. FSP FAS 157-2 delays the effective date of SFAS No. 157, *Fair Value Measurements*, for certain nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). SFAS No. 157 establishes a framework for measuring fair value and expands disclosures about fair value measurements. FSP FAS 157-2 defers the effective date of certain provisions of SFAS No. 157 to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years, for items within the scope of this FSP. We do not expect the adoption of FSP FAS 157-2 to have a material impact on our Condensed Consolidated Financial Statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of SFAS No. 133. SFAS No. 161 requires enhanced disclosures about an entity's derivative and hedging activities, including how an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. The provisions of SFAS No. 161 are effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. We do not expect the adoption of SFAS No. 161 to have a material impact on our Condensed Consolidated Financial Statements.

In April 2008, the FASB issued FSP FAS 142-3, *Determination of the Useful Life of Intangible Assets*. FSP FAS 142-3 amends the factors an entity should consider in developing renewal or extension assumptions used in determining the useful life of recognized intangible assets under SFAS No. 142, *Goodwill and Other Intangible Assets*. This guidance for determining the useful life of a recognized intangible asset applies prospectively to intangible assets acquired individually or with a group of other assets in either an asset acquisition or business combination. FSP FAS 142-3 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2008, and early adoption is prohibited. We are currently evaluating the impact FSP FAS 142-3 will have on our Condensed Consolidated Financial Statements.

In September 2008, the FASB issued FSP FAS 133-1 and FASB Interpretation (FIN) 45-4, *Disclosures about Credit Derivatives and Certain Guarantees* An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and *Clarification of the Effective Date of FASB Statement No. 161*. FSP FAS 133-1 and FIN 45-4 amends SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, to require disclosures by sellers of credit derivatives, including credit derivatives embedded in hybrid instruments. FSP FAS 133-1 and FIN 45-4 also amend FIN No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness to Others*, to require additional disclosure about the current status of the payment/performance risk of a guarantee. The provisions of the FSP, which amend SFAS No. 133 and FIN No. 45, are effective for reporting periods (annual or interim) ending after November 15, 2008. FSP FAS 133-1 and FIN 45-4 also clarifies the effective date in SFAS No. 161. Disclosures required by SFAS No. 161 are effective for any reporting period (annual or interim) beginning after November 15, 2008. We do not expect the adoption of FSP FAS 133-1 and FIN 45-4 to have a material impact on our Condensed Consolidated Financial Statements.

(17) PROPOSED ACQUISITION OF TAKE-TWO INTERACTIVE SOFTWARE, INC. AND RELATED LINE OF CREDIT

On March 13, 2008, we commenced an unsolicited \$26.00 per share cash tender offer for all of the outstanding shares of Take-Two Interactive Software, Inc., a Delaware corporation (Take-Two), for a total purchase price of approximately \$2.1 billion. On April 18, 2008, we adjusted the purchase price in the cash tender offer to \$25.74 per share following the approval by Take-Two stockholders of amendments to Take-Two's Incentive Stock Plan, which would permit the issuance of additional shares of restricted stock to ZelnickMedia Corporation pursuant to its management agreement with Take-Two. The total aggregate purchase price for Take-Two did not change as a result of the adjustment to the per share purchase price in the tender offer. On May 9, 2008, we received a commitment from certain financial institutions to provide us with up to \$1.0 billion of senior unsecured term loan financing at any time until January 9, 2009, to be used to provide a portion of the funds for the offer and/or merger. On August 18, 2008, we allowed the tender offer to expire without purchasing any shares of Take-Two and, on September 14, 2008, we announced that we had terminated discussions with, and would not be making a proposal to acquire, Take-Two. On

September 26, 2008, pursuant to the terms of the funding, we received a notice from the financial institutions that had committed to provide us with the funding that, in light of our decision not to make a proposal to acquire Take-Two, their commitment to provide the funding had terminated. During the six months ended September 30, 2008, we incurred but had not yet recognized certain costs in our Condensed Consolidated Statements of Operations in connection with the abandoned acquisition of Take-Two. As a result of the terminated discussions, during the three months ended September 30, 2008, we recognized \$21 million in related costs consisting of legal, banking and other consulting fees.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Electronic Arts Inc.:

We have reviewed the accompanying condensed consolidated balance sheet of Electronic Arts Inc. and subsidiaries (the Company) as of September 27, 2008, and the related condensed consolidated statements of operations for the three-month and six-month periods ended September 27, 2008 and September 29, 2007, and the related condensed consolidated statement of cash flows for the six-month periods ended September 27, 2008 and September 29, 2007. These condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above in order for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Electronic Arts Inc. and subsidiaries as of March 29, 2008, and the related consolidated statements of operations, stockholders' equity and comprehensive income (loss), and cash flows for the year then ended (not presented herein); and in our report dated May 23, 2008, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of March 29, 2008, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations****CAUTIONARY NOTE ABOUT FORWARD-LOOKING STATEMENTS**

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, including statements regarding industry prospects and future results of operations or financial position, made in this Quarterly Report on Form 10-Q are forward looking. We use words such as anticipate, believe, expect, intend, estimate (and the negative of any of these terms), future and similar expressions to help identify forward-looking statements. These forward-looking statements are subject to business and economic risk and reflect management's current expectations, and involve subjects that are inherently uncertain and difficult to predict. Our actual results could differ materially. We will not necessarily update information if any forward-looking statement later turns out to be inaccurate. Risks and uncertainties that may affect our future results include, but are not limited to, those discussed in this report under the heading Risk Factors in Part II, Item 1A, as well as in our Annual Report on Form 10-K for the fiscal year ended March 31, 2008 as filed with the Securities and Exchange Commission (SEC) on May 23, 2008 and in other documents we have filed with the SEC.

OVERVIEW

The following overview is a top-level discussion of our operating results, as well as some of the trends and drivers that affect our business. Management believes that an understanding of these trends and drivers is important in order to understand our results for the three and six months ended September 30, 2008, as well as our future prospects. This summary is not intended to be exhaustive, nor is it intended to be a substitute for the detailed discussion and analysis provided elsewhere in this Form 10-Q, including in the remainder of Management's Discussion and Analysis of Financial Condition and Results of Operations, Risk Factors and the Condensed Consolidated Financial Statements and related notes. Additional information can be found in the Business section of our Annual Report on Form 10-K for the fiscal year ended March 31, 2008 as filed with the SEC on May 23, 2008 and in other documents we have filed with the SEC.

About Electronic Arts

We develop, market, publish and distribute video game software and content that can be played by consumers on a variety of platforms, including video game consoles (such as the Sony PlayStation[®] 2 and PLAYSTATION[®] 3, Microsoft Xbox 360 and Nintendo Wii), personal computers, handheld game players (such as the PlayStation[®] Portable (PSP) and the Nintendo DS[™]) and wireless devices. Some of our games are based on content that we license from others (e.g., Madden NFL Football, Harry Potter and FIFA Soccer), and some of our games are based on our own wholly-owned intellectual property (e.g., The Sims, Need for Speed and POGO). Our goal is to publish titles with global mass-market appeal, which often means translating and localizing them for sale in non-English speaking countries. In addition, we create software game franchises that allow us to publish new titles on a recurring basis that are based on the same property. Examples of this franchise approach are the annual iterations of our sports-based products (e.g., Madden NFL Football, NCAA[®] Football and FIFA Soccer), wholly-owned properties that can be successfully sequenced (e.g., The Sims, Need for Speed and Battlefield) and titles based on long-lived literary and/or movie properties (e.g., Lord of the Rings and Harry Potter).

Special Note Regarding Deferred Net Revenue

The ubiquity of high-speed Internet access and the integration of network connectivity into new generation game consoles are expected to continue to increase demand for games with online-enabled features. To address this demand, many of our software products are developed with the ability to be connected to, and played via, the Internet. In order for consumers to participate in online communities and play against one another via the Internet, we (either directly or through outsourced arrangements with third parties) maintain servers, which support an online service we offer to consumers for activities such as matchmaking. In situations where we do not separately sell this online service, we account for the sale of the software product as a bundle sale, or multiple element arrangement, in which we sell both the software product and the online service for one combined price.

Through fiscal 2007, for accounting purposes, vendor-specific objective evidence of fair value (VSOE) existed for the online service. Accordingly, we allocated the revenue collected from the sale of the software product between the

online service offered and the software product and recognized the amounts allocated to each element separately. However, starting in fiscal 2008, for accounting purposes, the required VSOE of fair value no longer existed for the online service related to certain of our online-enabled software products. This prevents us from allocating and separately recognizing revenue related to the software

Table of Contents

product and the online service. Accordingly, starting in fiscal 2008, we began to recognize all of the revenue from the sale of our online-enabled software products for the PC, PlayStation 2, PLAYSTATION 3, Wii and PSP on a deferred basis over an estimated online service period, which we estimate to be six months beginning in the month after shipment. On a quarterly basis, the deferral amount will vary significantly depending upon the number of titles we release, the timing of their release, sales volume, returns and price protection provided for these online-enabled software products. In addition, we expense the cost of goods sold related to these transactions during the period in which the product is delivered (rather than on a deferred basis), which inherently creates volatility in our reported gross profit percentages.

As of September 30, 2008 and March 31, 2008, we had an accumulated balance of \$424 million and \$387 million, respectively, of deferred net revenue related to online-enabled packaged goods and digital content, substantially all of which was driven by sales made during the six months ended September 30, 2008 and March 31, 2008, respectively.

Three Months Ended September 30, 2008

Total net revenue for the three months ended September 30, 2008 was \$894 million, up \$254 million as compared to the three months ended September 30, 2007. The impact of deferrals related to sales of online-enabled packaged goods and digital content for the three months ended September 30, 2008 decreased our reported net revenue by \$232 million as compared to a decrease of \$296 million for the three months ended September 30, 2007. Net revenue was driven by *Rock Band*, *Madden NFL 09*, and *NCAA Football 09*.

Net loss for the three months ended September 30, 2008 was \$310 million as compared to a net loss of \$195 million for the three months ended September 30, 2007. Diluted loss per share for the three months ended September 30, 2008 was \$0.97 as compared to diluted loss per share of \$0.62 for the three months ended September 30, 2007. Net loss increased during the three months ended September 30, 2008 as compared to the three months ended September 30, 2007 primarily as a result of (1) a \$162 million increase in cost of goods sold, (2) a \$92 million increase in personnel-related costs primarily as a result of increases in salaries, incentive-based compensation and stock-based compensation, (3) a \$37 million increase in external development costs due to a greater number of projects in development as compared to the prior year, (4) a \$34 million impairment charge related to our losses on strategic investments, (5) a decrease in interest and other income of \$25 million primarily resulting from lower yields on our cash, cash equivalent and short-term investments, and (6) a charge of \$21 million related to our decision not to pursue an acquisition of Take-Two. These were partially offset by (1) an increase of \$254 million in net revenue due to increased sales of our games and (2) a \$34 million higher income tax benefit.

During the six months ended September 30, 2008, we used \$415 million of cash in operating activities as compared to \$296 million for the six months ended September 30, 2007. The increase in cash used in operating activities for the six months ended September 30, 2008 as compared to the six months ended September 30, 2007 was primarily due to an increase in personnel-related expenses and advertising and marketing costs.

Management's Overview of Historical and Prospective Business Trends

Economic Environment. As a result of the recent national and global economic downturn, overall consumer spending has declined. Retailers globally, and particularly in North America, appear to be taking a more conservative stance in ordering game inventory, particularly for older catalog titles (*i.e.*, sales of games that were released in a previous quarter). Historically, our industry has been resilient to economic recessions with sales being significantly influenced by technology drivers such as the introduction and widespread consumer adoption of new video game consoles. While the installed base of the Xbox 360, the PLAYSTATION 3 and the Wii is expected to continue to grow significantly, we are cautious about our sales in the near term, and in particular, for the upcoming holiday season.

Transition to a New Generation of Consoles. Video game hardware systems have historically had a life cycle of four to six years, which causes the video game software market to be cyclical as well. The current cycle began with Microsoft's launch of the Xbox 360 in 2005, and continued in 2006 when Sony and Nintendo launched their next-generation systems, the PLAYSTATION 3 and the Wii, respectively. During the three months ended September 30, 2008, the installed base of each of these systems continued to expand and, as a result, sales of our products for these systems have also increased significantly. At the same time, however, demand for video games for prior-generation systems, particularly the original Xbox and the Nintendo GameCube, has declined significantly. In fiscal 2009, we expect to significantly reduce the number of titles we develop and market for the prior-generation

PlayStation 2, release only one title for the original Xbox and do not expect to release any titles for the Nintendo GameCube. As a result, we expect our sales of video games for prior-generation systems will continue to

26

Table of Contents

decline. The decline in prior-generation product sales, particularly the PlayStation 2, may be greater or faster than we anticipate, and sales of products for the new platforms may be lower or increase more slowly than we anticipate. Moreover, we expect development costs for the new video game systems to continue to be greater on a per-title basis than development costs for prior-generation video game systems. We expect research and development expenses to increase on an absolute basis in fiscal 2009 as compared to fiscal 2008 (although not necessarily as a percentage of net revenue).

Online. Today, we generate net revenue from a variety of online products and services, including casual games and downloadable content marketed under our Pogo brand, massively-multiplayer online role-playing games (such as *Warhammer® Online: Age of Reckoning*, *Ultima Online*, and *Dark Age of Camelot*), PC-based downloadable content and online-enabled packaged goods. We intend to make significant investments in online products, infrastructure and services and believe that online gameplay will become an increasingly important part of our business in the long term.

Mobile Platforms. Advances in mobile technology have resulted in a variety of new and evolving platforms for on-the-go interactive entertainment that appeal to a broader demographic of consumers. Our efforts in mobile interactive entertainment are focused in two broad areas – packaged goods games for handheld game systems and downloadable games for wireless devices. We expect sales of games for handhelds and wireless devices to continue to be an important part of our business worldwide.

Acquisitions and Investments. We have engaged in, evaluated, and expect to continue to engage in and evaluate, a wide array of potential strategic transactions, including acquisitions of companies, businesses, intellectual properties, and other assets. Since the beginning of fiscal 2008, we have announced and/or completed several acquisitions and investments, including:

In May 2008, we acquired ThreeSF, Inc. Based in San Francisco, California, ThreeSF's Rupture service is an online social network for gamers.

In May 2008, we acquired certain assets of Hands-On Mobile Inc. and its affiliates relating to its Korean Mobile games business based in Seoul, Korea.

In January 2008, we acquired VG Holding Corp. (VGH), owner of both BioWare Corp. and Pandemic Studios, LLC, which create action, adventure, and role-playing games. BioWare Corp. and Pandemic Studios are located in Edmonton, Canada; Los Angeles, California; Austin, Texas; and Brisbane, Australia. The development of the projects for which we incurred an acquired-in-process technology charge in connection with the acquisition continued to be in-progress at September 30, 2008.

In May 2007, we entered into a licensing agreement with and made a strategic equity investment in The9 Limited, a leading online game operator in China. The licensing agreement gives The9 exclusive publishing rights for *EA SPORTS FIFA Online* in mainland China.

In April 2007, we expanded our commercial agreements with and made strategic equity investments in Neowiz Corporation and a related online gaming company, Neowiz Games (we refer to Neowiz Corporation and Neowiz Games collectively as Neowiz). Based in Korea, Neowiz is an online media and gaming company with which we are currently partnering to launch *EA SPORTS NBA STREET Online* in Asia.

On March 13, 2008, we commenced an unsolicited \$26.00 per share cash tender offer for all of the outstanding shares of Take-Two Interactive Software, Inc., a Delaware corporation (Take-Two), for a total purchase price of approximately \$2.1 billion. On August 18, 2008, we allowed the tender offer to expire without purchasing any shares of Take-Two and, on September 14, 2008, we announced that we had terminated discussions with, and would not be making a proposal to acquire, Take-Two. During the six months ended September 30, 2008, we incurred but had not yet recognized certain costs in our Condensed Consolidated Statements of Operations in connection with the abandoned acquisition of Take-Two. As a result of the terminated discussions, during the three months ended September 30, 2008, we recognized \$21 million in related costs consisting of legal, banking and other consulting fees.

International Operations and Foreign Currency Exchange Impact. International sales are a fundamental part of our business. Net revenue from international sales accounted for approximately 42 percent of our total net revenue during the first six months of fiscal 2009 and approximately 49 percent of our total net revenue during the first six months of fiscal 2008. Our international net revenue was primarily driven by sales in Europe and, to a much lesser extent, in Asia. We believe that in order to succeed internationally, it is important to locally develop content that is specifically directed toward local cultures and consumers. Year-over-year, we estimate that foreign exchange rates had a favorable impact on our net revenue of \$59 million, or 6 percent, for

27

Table of Contents

the six months ended September 30, 2008. During October 2008, the U.S. dollar grew stronger against other currencies, including the Euro and the British pound sterling. If the U.S. dollar continues to strengthen against these currencies, then foreign exchange rates may have an unfavorable impact on our net revenue.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our Condensed Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these Condensed Consolidated Financial Statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, contingent assets and liabilities, and revenue and expenses during the reporting periods. The policies discussed below are considered by management to be critical because they are not only important to the portrayal of our financial condition and results of operations, but also because application and interpretation of these policies requires both judgment and estimates of matters that are inherently uncertain and unknown. As a result, actual results may differ materially from our estimates.

Revenue Recognition, Sales Returns, Allowances and Bad Debt Reserves

We derive revenue principally from sales of interactive software games designed for play on video game consoles (such as the PlayStation 2, PLAYSTATION 3, Xbox 360 and Wii), PCs and mobile platforms including handheld game players (such as the PSP and Nintendo DS), and wireless devices. We evaluate the recognition of revenue based on the criteria set forth in Statement of Position (SOP) 97-2, *Software Revenue Recognition* , as amended by SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions* and Staff Accounting Bulletin (SAB) No. 104, *Revenue Recognition* . We evaluate and recognize revenue when all four of the following criteria are met:

Evidence of an arrangement. Evidence of an agreement with the customer that reflects the terms and conditions to deliver products that must be present in order to recognize revenue.

Delivery. Delivery is considered to occur when a product is shipped and the risk of loss and rewards of ownership have been transferred to the customer. For online game services, delivery is considered to occur as the service is provided. For digital downloads that do not have an online service component, delivery is considered to occur generally when the download occurs.

Fixed or determinable fee. If a portion of the arrangement fee is not fixed or determinable, we recognize revenue as the amount becomes fixed or determinable.

Collection is deemed probable. We conduct a credit review of each customer involved in a significant transaction to determine the creditworthiness of the customer. Collection is deemed probable if we expect the customer to be able to pay amounts under the arrangement as those amounts become due. If we determine that collection is not probable, we recognize revenue when collection becomes probable (generally upon cash collection).

Determining whether and when some of these criteria have been satisfied often involves assumptions and judgments that can have a significant impact on the timing and amount of revenue we report in each period. For example, for multiple element arrangements, we must make assumptions and judgments in order to (1) determine whether and when each element has been delivered, (2) determine whether undelivered products or services are essential to the functionality of the delivered products and services, (3) determine whether VSOE exists for each undelivered element, and (4) allocate the total price among the various elements we must deliver. Changes to any of these assumptions or judgments, or changes to the elements in a software arrangement, could cause a material increase or decrease in the amount of revenue that we report in a particular period. For example, in connection with some of our packaged goods product sales, we offer an online service without an additional fee. Prior to fiscal 2008, we were able to determine VSOE for the online service to be delivered; therefore, we were able to allocate the total price received from the combined product and online service sale between these two elements and recognize the related revenue separately. However, starting in fiscal 2008, VSOE no longer existed for the online service to be delivered for certain platforms and all revenue from these transactions is recognized over the estimated online service period. More specifically,

starting in fiscal 2008, we began to recognize the revenue from sales of certain online-enabled packaged goods on a straight-line basis over a six month period beginning in the month after shipment. Accordingly, this relatively small change (from having VSOE for the online service to no longer having VSOE) has had a significant effect on our reported results.

Determining whether a transaction constitutes an online game service transaction or a download of a product requires judgment and can be difficult. The accounting for these transactions is significantly different. Revenue from product downloads is

Table of Contents

generally recognized when the download occurs (assuming all other recognition criteria are met). Revenue from an online game service is recognized as the service is rendered. If the service period is not defined, we recognize the revenue over the estimated service period. Determining the estimated service period is inherently subjective and is subject to regular revision based on historical online usage.

Product revenue, including sales to resellers and distributors (channel partners), is recognized when the above criteria are met. We reduce product revenue for estimated future returns, price protection, and other offerings, which may occur with our customers and channel partners. Price protection represents the right to receive a credit allowance in the event we lower our wholesale price on a particular product. The amount of the price protection is generally the difference between the old price and the new price. In certain countries, we have stock-balancing programs for our PC and video game system products, which allow for the exchange of these products by resellers under certain circumstances. It is our general practice to exchange products or give credits rather than to give cash refunds.

In certain countries, from time to time, we decide to provide price protection for our products. When evaluating the adequacy of sales returns and price protection allowances, we analyze historical returns, current sell-through of distributor and retailer inventory of our products, current trends in retail and the video game segment, changes in customer demand and acceptance of our products, and other related factors. In addition, we monitor the volume of sales to our channel partners and their inventories, as substantial overstocking in the distribution channel could result in high returns or higher price protection costs in subsequent periods.

In the future, actual returns and price protections may materially exceed our estimates as unsold products in the distribution channels are exposed to rapid changes in consumer preferences, market conditions or technological obsolescence due to new platforms, product updates or competing products. For example, the risk of product returns and/or price protection for our products may continue to increase as the PlayStation 2 console moves through its lifecycle. While we believe we can make reliable estimates regarding these matters, these estimates are inherently subjective. Accordingly, if our estimates changed, our returns and price protection reserves would change, which would impact the total net revenue we report. For example, if actual returns and/or price protection were significantly greater than the reserves we have established, our actual results would decrease our reported total net revenue.

Conversely, if actual returns and/or price protection were significantly less than our reserves, this would increase our reported total net revenue. In addition, if our estimates of returns and price protection related to online-enabled packaged goods products change, the amount of net deferred revenue we recognize in the future would change. Significant judgment is required to estimate our allowance for doubtful accounts in any accounting period. We determine our allowance for doubtful accounts by evaluating customer creditworthiness in the context of current economic trends and historical experience. Depending upon the overall economic climate and the financial condition of our customers, the amount and timing of our bad debt expense and cash collection could change significantly.

Fair Value Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States often requires us to determine the fair value of a particular item in order to fairly present our financial statements. Without an independent market or another representative transaction, determining the fair value of a particular item requires us to make several assumptions that are inherently difficult to predict and can have a material impact on the conclusion on the appropriate accounting.

There are various valuation techniques used to estimate fair value. These include (1) the market approach where market transactions for identical or comparable assets or liabilities are used to determine the fair value, (2) the income approach, which uses valuation techniques to convert future amounts (for example, future cash flows or future earnings) to a single present amount, and (3) the cost approach, which is based on the amount that would be required to replace an asset. For many of our fair value estimates, including our estimates of the fair value of acquired intangible assets, acquired in-process technology and equity instruments granted for services, we use the income approach. Using the income approach requires the use of financial models, which require us to make various estimates including, but not limited to (1) the potential future cash flows for the asset, liability or equity instrument being measured, (2) the timing of receipt or payment of those future cash flows, (3) the time value of money associated with the delayed receipt or payment of such cash flows, and (4) the inherent risk associated with the cash flows (risk premium). Making these cash flow estimates are inherently difficult and subjective, and, if any of the estimates used

to determine the fair value using the income approach turns out to be inaccurate, our financial results may be negatively impacted. Furthermore, relatively small changes in many of these estimates can have a significant impact to the estimated fair value resulting from the financial models or the related accounting conclusion reached. For example, a relatively small change

Table of Contents

in the estimated fair value of an asset may change a conclusion as to whether an asset is impaired.

While we are required to make certain fair value assessments associated with the accounting for several types of transactions, the following areas are the most sensitive to the assessments:

Business Combinations. We must estimate the fair value of assets acquired, liabilities assumed and acquired in-process technology in a business combination. Our assessment of the estimated fair value of each of these can have a material affect on our reported results as intangible assets are amortized over various lives and acquired in-process technology is expensed upon consummation. Furthermore, a change in the estimated fair value of an asset or liability often has a direct impact on the amount to recognize as goodwill, an asset that is not amortized. Often determining the fair value of these assets and liabilities assumed requires an assessment of expected use of the asset, the expected cost to extinguish the liability or our expectations related to the timing and the successful completion of development of an acquired in-process technology. Such estimates are inherently difficult and subjective and can have a material impact on our financial statements.

Assessment of Impairment of Assets. Current accounting standards require that we assess the recoverability of purchased intangible assets and other long-lived assets whenever events or changes in circumstances indicate the remaining value of the assets recorded on our Condensed Consolidated Balance Sheets is potentially impaired. In order to determine if a potential impairment has occurred, management must make various assumptions about the estimated fair value of the asset by evaluating future business prospects and estimated cash flows. For some assets, our estimated fair value is dependent upon predicting which of our products will be successful. This success is dependent upon several factors, which are beyond our control, such as which operating platforms will be successful in the marketplace. Also, our revenue and earnings are dependent on our ability to meet our product release schedules. Statement of Financial Accounting Standard (SFAS) No. 142, *Goodwill and Other Intangible Assets* requires at least an annual assessment for impairment of goodwill by applying a fair-value-based test. Application of the goodwill impairment test requires judgment, including identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to reporting units, and determination of the fair value of each reporting unit. Determining the estimated fair value for each reporting unit could be materially affected by changes in estimates and assumptions, which could trigger impairment.

Stock-Based Compensation. We are required to estimate the fair value of share-based payment awards on the date of grant. The estimated fair value of stock options and stock purchase rights granted pursuant to our employee stock purchase plan is determined using the Black-Scholes valuation model, which requires us to make certain assumptions about the future. Determining the estimated fair value is affected by our stock price, as well as assumptions regarding subjective and complex variables such as expected employee exercise behavior and our expected stock price volatility over the term of the award. We estimated the following key assumptions for the Black-Scholes valuation calculation:

Risk-free interest rate. The risk-free interest rate is based on U.S. Treasury yields in effect at the time of grant for the expected term of the option.

Expected volatility. We use a combination of historical stock price volatility and implied volatility computed based on the price of options publicly traded on our common stock for our expected volatility assumption.

Expected term. The expected term represents the weighted-average period the stock options are expected to remain outstanding. The expected term is determined based on historical exercise behavior, post-vesting termination patterns, options outstanding and future expected exercise behavior.

Expected dividends.

Changes to our underlying stock price, our assumptions used in the Black-Scholes option valuation calculation and our forfeiture rate, which is based on historical data, as well as future equity granted or assumed through acquisitions could significantly impact compensation expense to be recognized in future periods.

Royalties and Licenses

Our royalty expenses consist of payments to (1) content licensors, (2) independent software developers, and (3) co-publishing and distribution affiliates. License royalties consist of payments made to celebrities, professional

sports organizations, movie studios and other organizations for our use of their trademarks, copyrights, personal publicity rights, content and/or other

Table of Contents

intellectual property. Royalty payments to independent software developers are payments for the development of intellectual property related to our games. Co-publishing and distribution royalties are payments made to third parties for the delivery of product.

Royalty-based obligations with content licensors and distribution affiliates are either paid in advance and capitalized as prepaid royalties or are accrued as incurred and subsequently paid. These royalty-based obligations are generally expensed to cost of goods sold generally at the greater of the contractual rate or an effective royalty rate based on the total projected net revenue. Significant judgment is required to estimate the effective royalty rate for a particular contract. Because the computation of effective royalty rates requires us to project future revenue, it is inherently subjective as our future revenue projections must anticipate a number of factors, including (1) the total number of titles subject to the contract, (2) the timing of the release of these titles, (3) the number of software units we expect to sell, which can be impacted by a number of variables, including product quality and competition, and (4) future pricing. Determining the effective royalty rate for our titles is particularly challenging due to the inherent difficulty in predicting the popularity of entertainment products. Accordingly, if our future revenue projections change, our effective royalty rates would change, which could impact the royalty expense we recognize. Prepayments made to thinly capitalized independent software developers and co-publishing affiliates are generally made in connection with the development of a particular product and, therefore, we are generally subject to development risk prior to the release of the product. Accordingly, payments that are due prior to completion of a product are generally expensed to research and development over the development period as the services are incurred. Payments due after completion of the product (primarily royalty-based in nature) are generally expensed as cost of goods sold.

Our contracts with some licensors include minimum guaranteed royalty payments, which are initially recorded as an asset and as a liability at the contractual amount when no performance remains with the licensor. When performance remains with the licensor, we record guarantee payments as an asset when actually paid and as a liability when incurred, rather than recording the asset and liability upon execution of the contract. Minimum royalty payment obligations are classified as current liabilities to the extent such royalty payments are contractually due within the next twelve months. As of September 30, 2008 and March 31, 2008, approximately \$23 million and \$10 million, respectively, of minimum guaranteed royalty obligations had been recognized.

Each quarter, we also evaluate the future realization of our royalty-based assets, as well as any unrecognized minimum commitments not yet paid to determine amounts we deem unlikely to be realized through product sales. Any impairments or losses determined before the launch of a product are charged to research and development expense. Impairments or losses determined post-launch are charged to cost of goods sold. In either case, we rely on estimated revenue to evaluate the future realization of prepaid royalties and commitments. If actual sales or revised revenue estimates fall below the initial revenue estimate, then the actual charge taken may be greater in any given quarter than anticipated. During the three and six months ended September 30, 2008, we recognized an impairment charge of \$5 million. We did not recognize any impairment charges during the three months ended September 30, 2007. During the six months ended September 30, 2007, we recognized impairment charges of less than \$1 million.

Income Taxes

In the ordinary course of our business, there are many transactions and calculations where the tax law and ultimate tax determination is uncertain. As part of the process of preparing our Condensed Consolidated Financial Statements, we are required to estimate our income taxes in each of the jurisdictions in which we operate prior to the completion and filing of tax returns for such periods. This process requires estimating both our geographic mix of income and our uncertain tax positions in each jurisdiction where we operate. These estimates involve complex issues and require us to make judgments about the likely application of the tax law to our situation, as well as with respect to other matters, such as anticipating the positions that we will take on tax returns prior to our actually preparing the returns and the outcomes of disputes with tax authorities. The ultimate resolution of these issues may take extended periods of time due to examinations by tax authorities and statutes of limitations. We are also required to make determinations of the need to record deferred tax liabilities and the recoverability of deferred tax assets. A valuation allowance is established to the extent that it is more likely than not that certain deferred tax assets will not be realized based on our estimation of future taxable income in each jurisdiction.

In addition, changes in our business, including acquisitions, changes in our international corporate structure, changes in the geographic location of business functions or assets, changes in the geographic mix and amount of income, as well as changes in our agreements with tax authorities, valuation allowances, applicable accounting rules, applicable tax laws and regulations, rulings and interpretations thereof, developments in tax audit and other matters, and variations in the estimated and actual level of annual pre-tax income can affect the overall effective income tax rate.

Table of Contents

We historically have considered undistributed earnings of our foreign subsidiaries to be indefinitely reinvested outside of the United States and, accordingly, no U.S. taxes have been provided thereon. Although we repatriated funds under the American Jobs Creation Act of 2004 in fiscal 2006, we currently intend to continue to indefinitely reinvest the undistributed earnings of our foreign subsidiaries outside of the United States.

RESULTS OF OPERATIONS

Our fiscal year is reported on a 52 or 53-week period that ends on the Saturday nearest March 31. Our results of operations for the fiscal years ended March 31, 2009 and 2008 contain 52 weeks and end on March 28, 2009 and March 29, 2008, respectively. Our results of operations for the three months ended September 30, 2008 and 2007 contain 13 weeks and ended on September 27, 2008 and September 29, 2007, respectively. Our results of operations for the six months ended September 30, 2008 and 2007 contain 26 weeks and ended on September 27, 2008 and September 29, 2007, respectively. For simplicity of disclosure, all fiscal periods are referred to as ending on a calendar month end.

Net Revenue

Net revenue consists of sales generated from (1) video games sold as packaged goods and designed for play on hardware consoles (such as the PlayStation 2, PLAYSTATION 3, Xbox 360 and Wii), PCs and handheld game players (such as the Sony PSP, Nintendo DS and Nintendo Game Boy Advance), (2) video games for wireless devices, (3) interactive online-enabled packaged goods, digital content, and online services associated with these games, (4) services in connection with some of our online games, (5) programming third-party web sites with our game content, (6) allowing other companies to manufacture and sell our products in conjunction with other products, and (7) advertisements on our online web pages and in our games.

During the three and six months ended September 30, 2008, we recognized total net revenue of \$894 million and \$1,698 million, respectively. Our total net revenue during the three and six months ended September 30, 2008 includes \$171 million and \$480 million, respectively, recognized from sales of certain online-enabled packaged goods and digital content for which we were not able to objectively determine the fair value (as defined by U.S. Generally Accepted Accounting Principles for software sales) of a free online service that we provided in connection with the sale. When we refer to deferral of net revenue in this Net Revenue section, we mean the deferral of (1) the total net revenue from the sale of certain online-enabled packaged goods and PC digital downloads for which we do not have VSOE for the online service we provide in connection with the sale of the software, (2) revenue from certain packaged good sales of massively-multiplayer online role-playing games, and (3) revenue from the sale of certain incremental content associated with our core subscription services that can only be played online, which are types of micro-transactions . During the three and six months ended September 30, 2008, we deferred the recognition of \$232 million and \$37 million, respectively, of net revenue as compared to the deferral of \$296 million and \$332 million, respectively, of net revenue during the three and six months ended September 30, 2007.

Table of Contents

From a geographical perspective, our total net revenue for the three and six months ended September 30, 2008 and 2007 was as follows (in millions):

	Three Months Ended September 30,				Increase	% Change
	2008		2007			
North America	\$ 555	62%	\$ 362	57%	\$ 193	53%

Table of Contents**North America**

For the three months ended September 30, 2008, net revenue in North America was \$555 million, driven by *Madden NFL 09*, *Rock Band*, and *NCAA Football 09*.

Net revenue for the three months ended September 30, 2008 increased 53 percent, or \$193 million, as compared to the three months ended September 30, 2007. The deferral of net revenue, which will be recognized in future periods, decreased our reported net revenue by \$191 million during the three months ended September 30, 2008 as compared to a decrease in our reported net revenue of \$163 million for the three months ended September 30, 2007. From an operational perspective, the increase in net revenue was driven by (1) a \$126 million increase in net revenue from co-publishing and distribution titles, (2) a \$38 million increase in net revenue from sales of titles for the PLAYSTATION 3, and (3) a \$27 million increase in net revenue from sales of titles for the Xbox 360. These increases were partially offset by a decrease of \$11 million in net revenue from sales of titles for the Xbox.

The change in deferred net revenue for the three months ended September 30, 2008 and 2007 for North America was as follows (in millions):

	Three Months Ended September		Increase / (Decrease)
	2008	30, 2007	
PLAYSTATION 3	\$ (70)	\$ (57)	\$ (13)
PC	(64)	(10)	(54)
PlayStation 2	(24)	(73)	49

Co-Publishing and Distribution	(3)		(3)
PSP	(2)	(9)	7
Subscription Services	1		1
Other	(8)	(2)	(6)
Total Impact on Net Revenue	\$ (191)	\$ (163)	\$ (28)

For the six months ended September 30, 2008, net revenue in North America was \$984 million, driven by *Rock Band*, *Madden NFL 09*, and *NCAA Football 09*.

Net revenue for the six months ended September 30, 2008 increased 87 percent, or \$459 million, as compared to the six months ended September 30, 2007. The deferral of net revenue, which will be recognized in future periods, decreased our reported net revenue by \$102 million during the six months ended September 30, 2008 as compared to a decrease in our reported net revenue of \$171 million for the six months ended September 30, 2007. From an operational perspective, the increase in net revenue was driven by (1) a \$245 million increase in net revenue from co-publishing and distribution titles, (2) an \$89 million increase in net revenue from sales of titles for the PLAYSTATION 3, (3) a \$56 million increase in net revenue from sales of titles for the Xbox 360, and (4) a \$26 million increase in net revenue from sales of titles for the PSP.

Table of Contents

The change in deferred net revenue for the six months ended September 30, 2008 and 2007 for North America was as follows (in millions):

	Six Months Ended September		Increase / (Decrease)
	2008	30, 2007	
PC	\$ (60)	\$ (10)	\$ (50)
PLAYSTATION 3	(44)	(58)	14
Wii	(9)	(12)	3
Wireless		(1)	1
PlayStation 2		(74)	74
Subscription Services	3	1	2
Co-Publishing and Distribution	4		4
PSP	13	(12)	25
Other	(9)	(5)	(4)
Total Impact on Net Revenue	\$ (102)	\$ (171)	\$ 69

We continue to expect net revenue for North America to increase during fiscal 2009 as compared to fiscal 2008.

Europe

For the three months ended September 30, 2008, net revenue in Europe was \$301 million, driven by *Rock Band*, *Warhammer Online: Age of Reckoning*, and *Battlefield: Bad Company*. We estimate that foreign exchange rates (primarily the Euro and the British pound sterling) increased reported net revenue, including the foreign exchange impact from deferred net revenue, by approximately \$17 million, or 7 percent, for the three months ended September 30, 2008 as compared to the three months ended September 30, 2007. Excluding the effect of foreign exchange rates from net revenue, we estimate that net revenue increased by approximately \$38 million, or 15 percent, for the three months ended September 30, 2008 as compared to the three months ended September 30, 2007.

Net revenue for the three months ended September 30, 2008 increased 22 percent, or \$55 million, as compared to the three months ended September 30, 2007. The deferral of net revenue, which will be recognized in future periods, decreased our reported net revenue by \$37 million during the three months ended September 30, 2008 as compared to a decrease in our reported net revenue of \$129 million for the three months ended September 30, 2007. From an operational perspective the increase in net revenue was driven by (1) a \$51 million increase in net revenue from co-publishing and distribution titles, and (2) a \$37 million increase in net revenue from sales of titles for the PLAYSTATION 3. These increases were partially offset by (1) a \$20 million decrease in net revenue from sales of titles for the Xbox 360, and (2) a \$15 million decrease in net revenue from sales of titles for the Wii.

The change in deferred net revenue for the three months ended September 30, 2008 and 2007 for Europe was as follows (in millions):

	Three Months Ended September		Increase / (Decrease)
	2008	30, 2007	
PC	\$ (32)	\$ (26)	\$ (6)

Table of Contents

For the six months ended September 30, 2008, net revenue in Europe was \$630 million, driven by *Rock Band*, *FIFA 08*, and *Need for Speed ProStreet*. We estimate that foreign exchange rates (primarily the Euro and the British pound sterling) increased reported net revenue, including the foreign exchange impact from deferred net revenue, by approximately \$54 million, or 12 percent, for the six months ended September 30, 2008 as compared to the six months ended September 30, 2007. Excluding the effect of foreign exchange rates from net revenue, we estimate that net revenue increased by approximately \$125 million, or 28 percent, for the six months ended September 30, 2008 as compared to the six months ended September 30, 2007.

Net revenue for the six months ended September 30, 2008 increased 40 percent, or \$179 million, as compared to the six months ended September 30, 2007. The recognition of deferred net revenue increased our reported net revenue by \$57 million during the six months ended September 30, 2008 as compared to a decrease in our reported net revenue due to the deferral of \$148 million of net revenue for the six months ended September 30, 2007. From an operational perspective the increase in net revenue was driven by (1) a \$104 million increase in net revenue from sales of titles for the PLAYSTATION 3, (2) an \$82 million increase in net revenue from co-publishing and distribution titles, and (3) a \$24 million increase in net revenue from sales of titles related to the PSP. These increases were partially offset by a \$17 million decrease in net revenue from sales of titles for the Xbox 360.

The change in deferred net revenue for the six months ended September 30, 2008 and 2007 for Europe was as follows (in millions):

	Six Months Ended September		Increase / (Decrease)
	2008	2007	
PC	\$ (21)	\$ (30)	\$ 9
Wii	(1)	(12)	11
Co-Publishing and Distribution	8		8
PlayStation 2	14	(61)	75
PSP	18	(17)	35
PLAYSTATION 3	41	(27)	68
Other	(2)	(1)	(1)
Total Impact on Net Revenue	\$ 57	\$ (148)	\$ 205

We continue to expect net revenue for Europe to increase during fiscal 2009 as compared to fiscal 2008.

Asia

For the three months ended September 30, 2008, net revenue in Asia was \$38 million, driven by *Battlefield: Bad Company*, *EA SPORTS FIFA Online 2*, and *Need for Speed ProStreet*. We estimate that foreign exchange rates increased reported net revenue, including the foreign exchange impact from deferred net revenue, by approximately \$2 million, or 6 percent, for the three months ended September 30, 2008 as compared to the three months ended September 30, 2007. Excluding the effect of foreign exchange rates from net revenue, we estimate that net revenue increased by approximately \$4 million, or 13 percent, for the three months ended September 30, 2008 as compared to the three months ended September 30, 2007.

Net revenue for the three months ended September 30, 2008 increased 19 percent, or \$6 million, as compared to the three months ended September 30, 2007. The deferral of net revenue, which will be recognized in future periods, decreased our reported net revenue by \$4 million in both the three months ended September 30, 2008 and 2007. From an operational perspective, the increase in net revenue was driven primarily by a \$5 million increase in sales of titles for the PLAYSTATION 3.

Table of Contents

The change in deferred net revenue for the three months ended September 30, 2008 and 2007 for Asia was as follows (in millions):

	Three Months Ended		Increase / (Decrease)
	2008	September 30, 2007	
PC	\$ (5)	\$ (1)	\$ (4)
PlayStation 2		(2)	2
PLAYSTATION 3		(1)	1
PSP	1		1
Total Impact on Net Revenue	\$ (4)	\$ (4)	\$

For the six months ended September 30, 2008, net revenue in Asia was \$84 million, driven by *Need for Speed ProStreet*, *FIFA 08*, and *Battlefield: Bad Company*. We estimate that foreign exchange rates increased reported net revenue, including the foreign exchange impact from deferred net revenue, by approximately \$5 million, or 8 percent, for the six months ended September 30, 2008 as compared to the six months ended September 30, 2007. Excluding the effect of foreign exchange rates from net revenue, we estimate that net revenue increased by approximately \$20 million, or 34 percent, for the six months ended September 30, 2008 as compared to the six months ended September 30, 2007.

Net revenue for the six months ended September 30, 2008 increased 42 percent, or \$25 million, as compared to the six months ended September 30, 2007. The recognition of deferred net revenue increased our reported net revenue by \$8 million during the six months ended September 30, 2008 as compared to a decrease in our reported net revenue due to the deferral of \$13 million of net revenue for the six months ended September 30, 2007. From an operational perspective, the increase in net revenue was driven primarily by a \$14 million increase in sales of titles for the PLAYSTATION 3.

The change in deferred net revenue for the six months ended September 30, 2008 and 2007 for Asia was as follows (in millions):

	Six Months Ended September		Increase / (Decrease)
	2008	30, 2007	
PC	\$ (4)	\$ (3)	\$ (1)
Wii	1		1
Co-Publishing and Distribution	1		1
PlayStation 2	2	(4)	6
PSP	3	(2)	5
PLAYSTATION 3	5	(3)	8
Other		(1)	1
Total Impact on Net Revenue	\$ 8	\$ (13)	\$ 21

Cost of Goods Sold

Cost of goods sold for our packaged-goods business consists of (1) product costs, (2) certain royalty expenses for celebrities, professional sports and other organizations and independent software developers, (3) manufacturing royalties, net of volume discounts and other vendor reimbursements, (4) expenses for defective products, (5) write-offs of post-launch prepaid royalty costs, (6) amortization of certain intangible assets, (7) personnel-related

costs, and (8) distribution costs. We generally recognize volume discounts when they are earned from the manufacturer (typically in connection with the achievement of unit-based milestones), whereas other vendor reimbursements are generally recognized as the related revenue is recognized. Cost of goods sold for our online products consists primarily of data center and bandwidth costs associated with hosting our web sites, credit card fees and royalties for use of third-party properties. Cost of goods sold for our web site advertising business primarily consists of server costs.

Table of Contents

Cost of goods sold for the three and six months ended September 30, 2008 and 2007 were as follows (in millions):

	September 30, 2008	% of Net Revenue	September 30, 2007	% of Net Revenue	Change %	Change as a % of Net Revenue
Three months ended	\$ 557	62.3%	\$ 395	61.8%	41.0%	0.5%
Six months ended	\$ 853	50.2%	\$ 561	54.2%	52.0%	(4.0%)

During the three months ended September 30, 2008, cost of goods sold increased by 0.5 percent as a percentage of total net revenue as compared to the three months ended September 30, 2007. This increase was primarily due to higher sales of co-publishing and distribution products, which have a lower margin than our other products. This change in revenue mix increased our cost of goods sold as a percentage of net revenue by approximately 8 percentage points as compared to the prior-year period. The overall increase in cost of goods sold as a percentage of net revenue was mitigated by \$64 million of lower deferred net revenue related to certain online-enabled packaged goods and digital content during the three months ended September 30, 2008 as compared to the three months ended September 30, 2007, which positively impacted cost of goods sold as a percent of total net revenue by 7 percent. During the six months ended September 30, 2008, cost of goods sold decreased by 4.0 percent as a percentage of total net revenue as compared to the six months ended September 30, 2007. This decrease was primarily due to \$295 million lower deferred net revenue related to certain online-enabled packaged goods and digital content during the six months ended September 30, 2008 as compared to the six months ended September 30, 2007, which positively impacted cost of goods sold as a percent of total net revenue by 12 percent. The decrease in deferred net revenue related to certain online-enabled packaged goods and digital content was partially offset by higher sales of co-publishing and distribution products, which have a lower margin than our other products. This change in revenue mix increased our cost of goods sold as a percentage of net revenue by approximately 10 percentage points as compared to the prior-year period.

Although there can be no assurance, and our actual results could differ materially, in the short term we expect our gross margin to increase in fiscal 2009 as compared to fiscal 2008 primarily resulting from the recognition of a greater amount of deferred net revenue in fiscal 2009 from prior periods as compared to fiscal 2008.

Marketing and Sales

Marketing and sales expenses consist of personnel-related costs, related overhead costs and advertising, marketing and promotional expenses, net of qualified advertising cost reimbursements from third parties.

Marketing and sales expenses for the three and six months ended September 30, 2008 and 2007 were as follows (in millions):

	September 30, 2008	% of Net Revenue	September 30, 2007	% of Net Revenue	\$ Change	% Change
Three months ended	\$ 197	22%	\$ 164	26%	\$ 33	20%
Six months ended	\$ 325	19%	\$ 246	24%	\$ 79	32%

Marketing and sales expenses increased by \$33 million, or 20 percent, during the three months ended September 30, 2008, as compared to the three months ended September 30, 2007. The increase was primarily due to (1) an increase

of \$17 million in marketing, advertising and promotional expenses primarily to support our launch of new franchises and incremental spending on established franchises, as well as (2) a \$12 million increase in personnel-related costs primarily resulting from an increase in headcount and the timing of the recognition of incentive-based compensation under our new incentive-based bonus plan.

Marketing and sales expenses increased by \$79 million, or 32 percent, during the six months ended September 30, 2008, as compared to the six months ended September 30, 2007. The increase was primarily due to (1) an increase of \$50 million in marketing, advertising and promotional expenses primarily to support our launch of new franchises and incremental spending on established franchises, as well as (2) a \$28 million increase in personnel-related costs primarily resulting from an increase in headcount and the timing of the recognition of incentive-based compensation under our new incentive-based bonus plan.

We expect marketing and sales expenses to increase in absolute dollars in fiscal 2009 as compared to fiscal 2008 primarily due to higher advertising and marketing activity to support our titles.

Table of Contents**General and Administrative**

General and administrative expenses consist of personnel and related expenses of executive and administrative staff, related overhead costs, fees for professional services such as legal and accounting, and allowances for doubtful accounts.

General and administrative expenses for the three and six months ended September 30, 2008 and 2007 were as follows (in millions):

	September 30, 2008	% of Net Revenue	September 30, 2007	% of Net Revenue	\$ Change	% Change
Three months ended	\$ 92	10%	\$ 84	13%	\$ 8	10%
Six months ended	\$ 176	10%	\$ 155	15%	\$ 21	14%

General and administrative expenses increased by \$8 million, or 10 percent, during the three months ended September 30, 2008, as compared to the three months ended September 30, 2007. The increase was primarily due to an increase of \$9 million in personnel-related costs primarily resulting from the timing of the recognition of incentive-based compensation under our new incentive-based bonus plan, stock-based compensation and salaries.

General and administrative expenses increased by \$21 million, or 14 percent, during the six months ended September 30, 2008, as compared to the six months ended September 30, 2007 due to an increase in personnel-related costs primarily resulting from the timing of the recognition of incentive-based compensation under our new incentive-based bonus plan, salaries and stock-based compensation.

We expect general and administrative expenses to increase in absolute dollars in fiscal 2009 as compared to fiscal 2008 primarily due to an increase in personnel-related costs.

Research and Development

Research and development expenses consist of expenses incurred by our production studios for personnel-related costs, related overhead costs, contracted services, equipment depreciation and any impairment of prepaid royalties for pre-launch products. Research and development expenses for our online business include expenses incurred by our studios consisting of direct development and related overhead costs in connection with the development and production of our online games. Research and development expenses also include expenses associated with the development of web site content, software licenses and maintenance, network infrastructure and management overhead.

Research and development expenses for the three and six months ended September 30, 2008 and 2007 were as follows (in millions):

	September 30, 2008	% of Net Revenue	September 30, 2007	% of Net Revenue	\$ Change	% Change
Three months ended	\$ 372	42%	\$ 259	40%	\$ 113	44%
Six months ended	\$ 729	43%	\$ 508	49%	\$ 221	44%

Research and development expenses increased by \$113 million, or 44 percent, during the three months ended September 30, 2008, as compared to the three months ended September 30, 2007. The increase was primarily due to (1) an increase of \$39 million in additional personnel-related costs, partially resulting from our acquisition of VGH in

January 2008, (2) higher external development costs of \$37 million due to a greater number of projects in development as compared to the prior year, (3) an increase of \$20 million due to the timing of the recognition of incentive-based compensation under our new incentive-based bonus plan, and (4) an increase of \$13 million in stock-based compensation expense.

Research and development expenses increased by \$221 million, or 44 percent, during the six months ended September 30, 2008, as compared to the six months ended September 30, 2007. The increase was primarily due to (1) an increase of \$74 million in additional personnel-related costs, partially resulting from our acquisition of VGH in January 2008, (2) higher external development costs of \$65 million due to a greater number of projects in development as compared to the prior year, (3) an increase of \$37 million due to the timing of the recognition of incentive-based compensation under our new incentive-based bonus

Table of Contents

plan, (4) an increase of \$30 million in stock-based compensation expense, and (5) an increase in facilities-related expenses of \$11 million to support our research and development functions worldwide.

We expect research and development expenses to increase in absolute dollars in fiscal 2009 as compared to fiscal 2008 primarily due to an increase in personnel-related costs and a greater number of titles in development.

Amortization of Intangibles

Amortization of intangibles for the three and six months ended September 30, 2008 and 2007 was as follows (in millions):

	September 30, 2008	% of Net Revenue	September 30, 2007	% of Net Revenue	\$ Change	% Change
Three months ended	\$ 16	2%	\$ 7	1%	\$ 9	129%
Six months ended	\$ 30	2%	\$ 14	1%	\$ 16	114%

Amortization of intangibles increased by \$9 million, or 129 percent, during the three months ended September 30, 2008 as compared to the three months ended September 30, 2007, and by \$16 million, or 114 percent, during the six months ended September 30, 2008 as compared to the six months ended September 30, 2007, primarily due to the amortization of intangibles related to our acquisition of VGH.

We expect amortization of intangible expenses to increase in fiscal 2009 as compared to fiscal 2008 primarily due to the amortization of intangibles related to our recent acquisition of VGH.

Certain Abandoned Acquisition-Related Costs

Certain abandoned acquisition-related costs consist of costs we incurred but had not yet recognized in our Condensed Consolidated Statements of Operations in connection with the abandoned acquisition of Take-Two. On August 18, 2008, we allowed our tender offer for Take-Two shares to expire without purchasing any shares of Take-Two and, on September 14, 2008, we announced that we had terminated discussions with, and would not be making a proposal to acquire, Take-Two. As a result, during the three months ended September 30, 2008, we recognized \$21 million in related costs consisting of legal, banking and other consulting fees.

Restructuring Charges

Restructuring charges for the three and six months ended September 30, 2008 and 2007 were as follows (in millions):

	September 30, 2008	% of Net Revenue	September 30, 2007	% of Net Revenue	\$ Change	% Change
Three months ended	\$ 3		\$ 5	1%	\$ (2)	(40%)
Six months ended	\$ 23	1%	\$ 7	1%	\$ 16	229%

Restructuring charges increased by \$16 million, or 229 percent, during the six months ended September 30, 2008, as compared to the six months ended September 30, 2007 primarily as a result of a \$16 million facility-related impairment charge recognized during the six months ended September 30, 2008.

Table of Contents**Losses on Strategic Investments**

Losses on strategic investments for the three and six months ended September 30, 2008 and 2007 were as follows (in millions):

	September 30, 2008	% of Net Revenue	September 30, 2007	% of Net Revenue	\$ Change	% Change
Three months ended	\$ (34)	(4%)	\$		\$ (34)	N/A
Six months ended	\$ (40)	(2%)	\$		\$ (40)	N/A

During the three months ended September 30, 2008, we recognized a \$34 million impairment charge related to our losses on strategic investments due to (1) a \$25 million charge on our Neowiz common stock and (2) a \$9 million charge on our Neowiz preferred shares.

During the six months ended September 30, 2008, we recognized a \$40 million impairment charge related to our losses on strategic investments due to (1) a \$30 million charge on our Neowiz common stock and (2) a \$10 million charge on our Neowiz preferred shares.

Interest and Other Income, Net

Interest and other income, net, for the three and six months ended September 30, 2008 and 2007 were as follows (in millions):

	September 30, 2008	% of Net Revenue	September 30, 2007	% of Net Revenue	\$ Change	% Change
Three months ended	\$ 7	1%	\$ 32	5%	\$ (25)	(78%)
Six months ended	\$ 23	1%	\$ 58	6%	\$ (35)	(60%)

During the three and six months ended September 30, 2008, interest and other income, net, decreased by \$25 million, or 78 percent, and \$35 million, or 60 percent, respectively, as compared to the three and six months ended September 30, 2007, primarily due to a decrease in interest income resulting from lower yields on our cash, cash equivalent and short-term investment balances.

Income Taxes

Income tax benefit for the three and six months ended September 30, 2008 and 2007 were as follows (in millions):

	September 30, 2008	Effective Tax Rate	September 30, 2007	Effective Tax Rate	% Change
Three Months Ended	\$ (81)	20.6%	\$ (47)	19.3%	(72%)
Six Months Ended	\$ (73)	15.3%	\$ (70)	17.6%	(4%)

Our reported tax rate for the three and six months ended September 30, 2008 is based on our actual year-to-date effective tax rate for the six months ended September 30, 2008. Our effective tax rates for the three and six months

ended September 30, 2008 were a tax benefit of 20.6 percent and 15.3 percent, respectively, compared to a tax benefit of 19.3 percent and 17.6 percent for the same periods in fiscal 2008. The effective tax rates for the three and six months ended September 30, 2008 differ from the statutory rate of 35.0 percent primarily due to the effect of non-U.S. operations, non-deductible stock-based compensation, tax benefits related the resolution of examinations by taxing authorities, and certain tax charges related to our integration of VGH, which we acquired in our fourth quarter of fiscal 2008. The effective tax rate for the three and six months ended September 30, 2008 differ from the same periods in fiscal 2008 primarily due to the tax charges related to VGH and tax benefits related to the resolution of tax examinations.

We believe our year-to-date tax benefit rate of 15.3 percent is the most reliable estimate of our annual effective tax rate because our projected tax rate is unusually volatile and relatively small changes in our forecasted profitability for fiscal 2009 can significantly affect our projected annual effective tax rate. In addition, our effective tax rates for the remainder of fiscal 2009 and future periods will depend on a variety of factors, including changes in our business such as acquisitions and intercompany transactions, changes in our international structure, changes in the geographic location of business functions or assets, changes in the geographic mix of income, as well as changes in, or termination of, our agreements with tax authorities, valuation allowances, applicable accounting rules, applicable tax laws and regulations, rulings and interpretations thereof, developments in tax audit and other matters, and variations in the estimated and actual level of annual pre-tax income or loss. Accordingly, the

Table of Contents

effective income tax rate reflected in our financial statements for the three and six months ended September 30, 2008 reflects only our estimated tax benefits for the three and six months ended September 30, 2008. The final effective income tax rate for the fiscal year will likely be different from the tax rate in effect for the six months ended September 30, 2008 and could be considerably higher or potentially lower, as it will be particularly dependent on our profitability for the year.

The Emergency Economic Stabilization Act of 2008 (EESA) was passed by Congress and signed by the President on October 3, 2008. As part of the EESA, the Research & Development (R&D) Tax Credit was extended through 2009. The R&D Tax Credit had previously expired at the end of calendar 2007. EESA was enacted after September 30, 2008, and therefore the R&D Tax Credit is not included in the tax benefit for the three and six months ended September 30, 2008. The reinstatement of this tax credit will reduce our fiscal 2009 expense by approximately \$12 million and will have a beneficial impact on our effective tax rate for the remainder of fiscal 2009.

We historically have considered undistributed earnings of our foreign subsidiaries to be indefinitely reinvested outside of the United States and, accordingly, no U.S. taxes have been provided thereon. Although we repatriated funds under the American Jobs Creation Act of 2004 in fiscal 2006, we currently intend to continue to indefinitely reinvest the undistributed earnings of our foreign subsidiaries outside of the United States.

Impact of Recently Issued Accounting Standards

In December 2007, the Financial Accounting Standards Board (FASB) issued SFAS No. 141 (Revised 2007) (SFAS No. 141(R)), *Business Combinations* , which requires the recognition of assets acquired, liabilities assumed, and any noncontrolling interest in an acquiree at the acquisition date fair value with limited exceptions. SFAS No. 141(R) will change the accounting treatment for certain specific items and includes a substantial number of new disclosure requirements. SFAS No. 141(R) applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The adoption of SFAS No. 141(R) will have a material impact on our Condensed Consolidated Financial Statements for material acquisitions consummated on or after March 29, 2009.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51* , which establishes new accounting and reporting standards for noncontrolling interests (e.g., minority interests) and for the deconsolidation of a subsidiary. SFAS No. 160 also includes expanded disclosure requirements regarding the interests of the parent and its noncontrolling interests. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. We do not expect the adoption of SFAS No. 160 to have a material impact on our Condensed Consolidated Financial Statements.

In December 2007, the FASB ratified Emerging Issues Task Force s (EITF) consensus conclusion on EITF 07-01, *Accounting for Collaborative Arrangements* . EITF 07-01 defines collaborative arrangements and establishes reporting requirements for transactions between participants in a collaborative arrangement and between participants in the arrangement and third parties. Under this conclusion, a participant to a collaborative arrangement should disclose information about the nature and purpose of its collaborative arrangements, the rights and obligations under the collaborative arrangements, the accounting policy for collaborative arrangements, and the income statement classification and amounts attributable to transactions arising from the collaborative arrangement between participants for each period an income statement is presented. EITF 07-01 is effective for interim or annual reporting periods in fiscal years beginning after December 15, 2008 and requires retrospective application to all prior periods presented for all collaborative arrangements existing as of the effective date. While we have not yet completed our analysis, we do not anticipate the implementation of EITF 07-01 to have a material impact on our Condensed Consolidated Financial Statements.

In February 2008, the FASB issued Staff Position (FSP) Financial Accounting Standard (FAS) FAS 157-2, *Effective Date of FASB Statement No. 157* . FSP FAS 157-2 delays the effective date of SFAS No. 157, *Fair Value Measurements* , for certain nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). SFAS No. 157 establishes a framework for measuring fair value and expands disclosures about fair value measurements. FSP FAS 157-2 defers the effective date of certain provisions of SFAS No. 157 to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years, for items within the scope of this FSP. We do not expect the adoption of FSP

FAS 157-2 to have a material impact on our Condensed Consolidated Financial Statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of SFAS No. 133 . SFAS No. 161 requires enhanced disclosures about an entity s derivative and hedging activities,

Table of Contents

including how an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. The provisions of SFAS No. 161 are effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. We do not expect the adoption of SFAS No. 161 to have a material impact on our Condensed Consolidated Financial Statements.

In April 2008, the FASB issued FSP FAS 142-3, *Determination of the Useful Life of Intangible Assets*. FSP FAS 142-3 amends the factors an entity should consider in developing renewal or extension assumptions used in determining the useful life of recognized intangible assets under SFAS No. 142, *Goodwill and Other Intangible Assets*. This guidance for determining the useful life of a recognized intangible asset applies prospectively to intangible assets acquired individually or with a group of other assets in either an asset acquisition or business combination. FSP FAS 142-3 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2008, and early adoption is prohibited. We are currently evaluating the impact FSP FAS 142-3 will have on our Condensed Consolidated Financial Statements.

In September 2008, the FASB issued FSP FAS 133-1 and FASB Interpretation (FIN) 45-4, *Disclosures about Credit Derivatives and Certain Guarantees - An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161*. FSP FAS 133-1 and FIN 45-4 amends SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, to require disclosures by sellers of credit derivatives, including credit derivatives embedded in hybrid instruments. FSP FAS 133-1 and FIN 45-4 also amend FIN No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness to Others*, to require additional disclosure about the current status of the payment/performance risk of a guarantee. The provisions of the FSP, which amend SFAS No. 133 and FIN No. 45, are effective for reporting periods (annual or interim) ending after November 15, 2008. FSP FAS 133-1 and FIN 45-4 also clarifies the effective date in SFAS No. 161. Disclosures required by SFAS No. 161 are effective for any reporting period (annual or interim) beginning after November 15, 2008. We do not expect the adoption of FSP FAS 133-1 and FIN 45-4 to have a material impact on our Condensed Consolidated Financial Statements.

LIQUIDITY AND CAPITAL RESOURCES

Net decrease in cash and cash equivalents	\$ (256)	\$ (297)	\$ 41
---	----------	----------	-------

Changes in Cash Flow

During the six months ended September 30, 2008, we used \$415 million of cash in operating activities as compared to \$296 million for the six months ended September 30, 2007. The increase in cash used in operating activities for the six months ended September 30, 2008 as compared to the six months ended September 30, 2007 was primarily due to an increase in personnel-related expenses and advertising and marketing costs.

Table of Contents

For the six months ended September 30, 2008, we generated \$510 million of cash proceeds from maturities and sales of short-term investments and \$69 million in proceeds from sale of common stock through our stock-based compensation plans. Our primary use of cash in non-operating activities consisted of \$313 million used to purchase short-term investments, \$63 million in capital expenditures and \$42 million used for acquisitions.

Short-term investments and marketable equity securities

Due to our mix of fixed and variable rate securities, our short-term investment portfolio is susceptible to changes in short-term interest rates. As of September 30, 2008, our short-term investments had gross unrealized gains and losses of \$2 million each, or less than 1 percent of the total in short-term investments. From time to time, we may liquidate some or all of our short-term investments to fund operational needs or other activities, such as capital expenditures, business acquisitions or stock repurchase programs. Depending on which short-term investments we liquidate to fund these activities, we could recognize a portion, or all, of the gross unrealized gains or losses.

Marketable equity securities decreased to \$640 million as of September 30, 2008, from \$729 million as of March 31, 2008. This decrease was primarily due to (1) gross unrealized losses of \$60 million in the fair value of our investments, and (2) an impairment of \$30 million recognized on our Neowiz common stock investments.

Receivables, net

Our gross accounts receivable balances were \$715 million and \$544 million as of September 30, 2008 and March 31, 2008, respectively. The increase in our accounts receivable balance was primarily due to higher sales volumes in the second quarter of fiscal 2009 as compared to the fourth quarter of fiscal 2008, which was expected as we traditionally have higher sales during our second fiscal quarter as compared to our fourth fiscal quarter. We expect our accounts receivable balance to increase during the three months ending December 31, 2008 based on our seasonal product release schedule. Reserves for sales returns, pricing allowances and doubtful accounts decreased in absolute dollars from \$238 million as of March 31, 2008 to \$168 million as of September 30, 2008. As a percentage of trailing nine month net revenue, reserves decreased from 7 percent as of March 31, 2008, to 6 percent as of September 30, 2008. We believe these reserves are adequate based on historical experience and our current estimate of potential returns, pricing allowances and doubtful accounts.

Inventories

Inventories increased to \$328 million as of September 30, 2008, from \$168 million as of March 31, 2008, primarily as a result of an increase of (1) \$83 million of *Rock Band* and *Rock Band 2* inventory of which approximately \$28 million was in-transit as of September 30, 2008 and (2) \$43 million of *FIFA 09* inventory, which was not launched until October 2008.

Other current assets and other assets

Other current assets decreased to \$249 million as of September 30, 2008, from \$290 million as of March 31, 2008. Other assets decreased to \$109 million as of September 30, 2008, from \$157 million as of March 31, 2008. Other current assets and other assets combined, decreased by \$89 million primarily due to (1) a reclassification of an asset classified as an asset held for sale in other current assets to property and equipment, net, in the amount of \$32 million, (2) a decrease in prepaid taxes of \$32 million, (3) a \$16 million facility-related impairment charge for the facility that was reclassified to property and equipment, net, from other current assets, and (4) a decrease in Value-Added Tax receivables of \$13 million. These decreases were partially offset by an increase in prepaid royalties of \$18 million.

Accounts payable

Accounts payable increased to \$309 million as of September 30, 2008, from \$229 million as of March 31, 2008, primarily as result of our inventory build-up in anticipation of our third quarter sales.

Table of Contents***Accrued and other current liabilities***

Our accrued and other current liabilities increased to \$801 million as of September 30, 2008 from \$683 million as of March 31, 2008. The increase was primarily due to (1) a \$49 million increase in royalties payable, (2) a \$29 million increase in marketing and advertising accruals to support our current year releases, (3) an increase in Value-Added Tax payables of \$29 million, and (4) a \$21 million accrual related to third-party publishing and hosting services. These increases were partially offset by a \$32 million decrease in other accrued compensation and benefits.

Deferred income taxes, net

Our net deferred income tax asset position increased by \$117 million as of September 30, 2008 as compared to March 31, 2008 primarily due to (1) \$85 million in deferred tax assets resulting from the tax benefit we recognized related to our operating loss during the six months ended September 30, 2008, (2) \$34 million in deferred tax assets related to stock-based compensation, (3) approximately \$3 million in deferred tax assets related to FIN 48 reserves and adjustments during the six months ended September 30, 2008, and (4) \$3 million in deferred tax assets resulting from unrealized losses on investments, which is offset by a decrease of \$8 million in deferred tax assets related to our integration of VGH.

Financial Condition

We believe that cash, cash equivalents, short-term investments, marketable equity securities, cash generated from operations and available financing facilities will be sufficient to meet our operating requirements for at least the next twelve months, including working capital requirements, capital expenditures and, potentially, future acquisitions or strategic investments. We may choose at any time to raise additional capital to strengthen our financial position, facilitate expansion, pursue strategic acquisitions and investments or to take advantage of business opportunities as they arise. There can be no assurance, however, that such additional capital will be available to us on favorable terms, if at all, or that it will not result in substantial dilution to our existing stockholders.

On March 13, 2008, we commenced an unsolicited \$26.00 per share cash tender offer for all of the outstanding shares of Take-Two, for a total purchase price of approximately \$2.1 billion. On May 9, 2008, we received a commitment from certain financial institutions to provide us with up to \$1.0 billion of senior unsecured term loan financing (the funding) at any time until January 9, 2009, to be used to provide a portion of the funds for the offer and/or merger. On August 18, 2008, we allowed the tender offer to expire without purchasing any shares of Take-Two and, on September 14, 2008, we announced that we had terminated discussions with, and would not be making a proposal to acquire, Take-Two. On September 26, 2008, pursuant to the terms of the funding, we received a notice from the financial institutions that had committed to provide us with the funding that, in light of our decision not to make a proposal to acquire Take-Two, their commitment to provide the funding had terminated.

The loan financing arrangements supporting our Redwood City headquarters leases with KeyBank National Association, described in the Off-Balance Sheet Commitments section below, are scheduled to expire in July 2009. At any time prior to the expiration of the financing in July 2009, we may re-negotiate the lease and the related financing arrangement. Upon expiration of the leases, we may purchase the facilities for \$247 million, or arrange for a sale of the facilities to a third party. In the event of a sale to a third party, if the sale price is less than \$247 million, we will be obligated to reimburse the difference between the actual sale price and \$247 million, up to maximum of \$222 million, subject to certain provisions of the leases.

As of September 30, 2008, approximately \$990 million of our cash, cash equivalents, short-term investments and marketable equity securities that was generated from operations was domiciled in foreign tax jurisdictions. While we have no plans to repatriate these funds to the United States in the short term, if we choose to do so, we would accrue and pay additional taxes on any portion of the repatriation where no United States income tax had been previously provided.

We have a shelf registration statement on Form S-3 on file with the SEC. This shelf registration statement is due to expire on November 30, 2008. We anticipate filing a new shelf registration statement prior to November 30, 2008. The new shelf registration statement, which shall include a base prospectus, will allow us at any time to offer any combination of securities described in the prospectus in one or more offerings. Unless otherwise specified in a prospectus supplement accompanying the base prospectus, we would use the net proceeds from the sale of any securities offered pursuant to the shelf registration statement for general corporate purposes, including for working

capital, financing capital expenditures, research and development, marketing and distribution efforts and, if opportunities arise, for acquisitions or strategic alliances. Pending such uses, we may invest the net proceeds in interest-bearing securities. In addition, we may conduct concurrent or other financings at any time.

Table of Contents

Our ability to maintain sufficient liquidity could be affected by various risks and uncertainties including, but not limited to, those related to customer demand and acceptance of our products on new platforms and new versions of our products on existing platforms, our ability to collect our accounts receivable as they become due, successfully achieving our product release schedules and attaining our forecasted sales objectives, the impact of acquisitions and other strategic transactions in which we may engage, the impact of competition, economic conditions in the United States and abroad, the seasonal and cyclical nature of our business and operating results, risks of product returns and the other risks described in the Risk Factors section, included in Part II, Item 1A of this report.

Contractual Obligations and Commercial Commitments***Development, Celebrity, League and Content Licenses: Payments and Commitments***

The products we produce in our studios are designed and created by our employee designers, artists, software programmers and by non-employee software developers (independent artists or third-party developers). We typically advance development funds to the independent artists and third-party developers during development of our games, usually in installment payments made upon the completion of specified development milestones. Contractually, these payments are generally considered advances against subsequent royalties on the sales of the products. These terms are set forth in written agreements entered into with the independent artists and third-party developers.

In addition, we have certain celebrity, league and content license contracts that contain minimum guarantee payments and marketing commitments that may not be dependent on any deliverables. Celebrities and organizations with whom we have contracts include: FIFA, FIFPRO Foundation, and FAPL (Football Association Premier League Limited) (professional soccer); NASCAR (stock car racing); National Basketball Association (professional basketball); PGA TOUR and Tiger Woods (professional golf); National Hockey League and NHL Players Association (professional hockey); Warner Bros. (Harry Potter); New Line Productions and Saul Zaentz Company (The Lord of the Rings); Red Bear Inc. (John Madden); National Football League Properties and PLAYERS Inc. (professional football); Collegiate Licensing Company (collegiate football and basketball); Viacom Consumer Products (The Godfather); ESPN (content in EA SPORTS games); Twentieth Century Fox Licensing and Merchandising (The Simpsons); and Hasbro, Inc. (a wide array of Hasbro intellectual properties). These developer and content license commitments represent the sum of (1) the cash payments due under non-royalty-bearing licenses and services agreements, and (2) the minimum guaranteed payments and advances against royalties due under royalty-bearing licenses and services agreements, the majority of which are conditional upon performance by the counterparty. These minimum guarantee payments and any related marketing commitments are included in the table below. During the three months ended September 30, 2008, we declined to exercise our option to invest in the Arena Football League.

The following table summarizes our minimum contractual obligations and commercial commitments as of September 30, 2008, and the effect we expect them to have on our liquidity and cash flow in future periods (in millions):

Fiscal Year	Contractual Obligations			Commercial Commitments		Total
	Leases (1)	Developer/ Licensor Commitments (2)	Marketing	Letter of Credit, Bank and Other Guarantees		
Ending March 31,						
2009 (remaining six months)	\$ 35	\$ 130	\$ 32	\$ 4		\$ 201
2010	57	240	47			344
2011	42	290	39			371
2012	31	148	38			217
2013	25	135	38			198
Thereafter	55	612	155			822

Total	\$ 245	\$ 1,555	\$ 349	\$ 4	\$ 2,153
-------	--------	----------	--------	------	----------

- (1) See discussion on operating leases in the Off-Balance Sheet Commitments section below for additional information. Lease commitments include contractual rental commitments of \$11 million under real estate leases for unutilized office space resulting from our restructuring activities. These amounts, net of estimated future sub-lease income, were expensed in the periods of the related restructuring and are included in our accrued and other current liabilities reported in our Condensed Consolidated Balance Sheets as of September 30, 2008.

Table of Contents

- (2) Developer/licensor commitments include \$23 million of commitments to developers or licensors that have been recorded in current and long-term liabilities and a corresponding amount in current and long-term assets in our Condensed Consolidated Balance Sheets as of September 30, 2008 because payment is not contingent upon performance by the developer or licensor.

The amounts represented in the table above reflect our minimum cash obligations for the respective fiscal years, but do not necessarily represent the periods in which they will be expensed in our Condensed Consolidated Financial Statements.

In addition to what is included in the table above, as of September 30, 2008, we had a liability for unrecognized tax benefits and related interest totaling \$365 million, of which approximately \$69 million is offset by prior cash deposits to tax authorities for issues pending resolution. For the remaining liability, we are unable to make a reasonably reliable estimate of when cash settlement with a taxing authority will occur.

OFF-BALANCE SHEET COMMITMENTS***Lease Commitments and Residual Value Guarantees***

We lease certain of our current facilities, furniture and equipment under non-cancelable operating lease agreements. We are required to pay property taxes, insurance and normal maintenance costs for certain of these facilities and will be required to pay any increases over the base year of these expenses on the remainder of our facilities.

In February 1995, we entered into a build-to-suit lease (Phase One Lease) with a third-party lessor for our headquarters facilities in Redwood City, California (Phase One Facilities). The Phase One Facilities comprise a total of approximately 350,000 square feet and provide space for sales, marketing, administration and research and development functions. In July 2001, the lessor refinanced the Phase One Lease with KeyBank National Association through July 2006. The Phase One Lease expires in January 2039, subject to early termination in the event the underlying financing between the lessor and its lenders is not extended. Subject to certain terms and conditions, we may purchase the Phase One Facilities or arrange for the sale of the Phase One Facilities to a third party.

Pursuant to the terms of the Phase One Lease, we have an option to purchase the Phase One Facilities at any time for a purchase price of \$132 million. In the event of a sale to a third party, if the sale price is less than \$132 million, we will be obligated to reimburse the difference between the actual sale price and \$132 million, up to a maximum of \$117 million, subject to certain provisions of the Phase One Lease, as amended.

On May 26, 2006, the lessor extended its loan financing underlying the Phase One Lease with its lenders through July 2007, and on May 14, 2007, the lenders extended this financing again for an additional year through July 2008. On April 14, 2008, the lenders extended the financing for another year through July 2009, and modified certain definitions used in the covenants. On June 9, 2008, the Phase One Lease was amended to further modify certain definitions used in the covenants. At any time prior to the expiration of the financing in July 2009, we may re-negotiate the lease and the related financing arrangement. We account for the Phase One Lease arrangement as an operating lease in accordance with SFAS No. 13, *Accounting for Leases*, as amended.

In December 2000, we entered into a second build-to-suit lease (Phase Two Lease) with KeyBank National Association for a five and one-half year term beginning in December 2000 to expand our Redwood City, California headquarters facilities and develop adjacent property (Phase Two Facilities). Construction of the Phase Two Facilities was completed in June 2002. The Phase Two Facilities comprise a total of approximately 310,000 square feet and provide space for sales, marketing, administration and research and development functions. Subject to certain terms and conditions, we may purchase the Phase Two Facilities or arrange for the sale of the Phase Two Facilities to a third party.

Pursuant to the terms of the Phase Two Lease, we have an option to purchase the Phase Two Facilities at any time for a purchase price of \$115 million. In the event of a sale to a third party, if the sale price is less than \$115 million, we will be obligated to reimburse the difference between the actual sale price and \$115 million, up to a maximum of \$105 million, subject to certain provisions of the Phase Two Lease, as amended.

On May 26, 2006, the lessor extended the Phase Two Lease through July 2009 subject to early termination in the event the underlying loan financing between the lessor and its lenders is not extended. Concurrently with the extension of the lease, the

Table of Contents

lessor extended the loan financing underlying the Phase Two Lease with its lenders through July 2007. On May 14, 2007, the lenders extended this financing again for an additional year through July 2008. On April 14, 2008, the lenders extended the financing for another year through July 2009, and modified certain definitions used in the covenants. On June 9, 2008, the Phase Two Lease was amended to further modify certain definitions used in the covenants. At any time prior to the expiration of the financing in July 2009, we may re-negotiate the lease and the related financing arrangement. We account for the Phase Two Lease arrangement as an operating lease in accordance with SFAS No. 13, as amended.

We believe that, as of September 30, 2008, the estimated fair values of both properties under these operating leases exceeded their respective guaranteed residual values.

The two lease agreements with KeyBank National Association described above require us to maintain certain financial covenants, as amended on June 9, 2008, shown below, all of which we were in compliance with as of September 30, 2008.

Financial Covenants	Requirement		Actual as of September 30, 2008
Consolidated Net Worth (in millions)	equal to or greater than	\$ 2,430	\$ 4,028
Fixed Charge Coverage Ratio	equal to or greater than	3.00	3.02
Total Consolidated Debt to Capital	equal to or less than	60%	5.8%
Quick Ratio	equal to or greater than	1.00	9.61

Director Indemnity Agreements

We entered into indemnification agreements with each of the members of our Board of Directors at the time they joined the Board to indemnify them to the extent permitted by law against any and all liabilities, costs, expenses, amounts paid in settlement and damages incurred by the directors as a result of any lawsuit, or any judicial, administrative or investigative proceeding in which the directors are sued or charged as a result of their service as members of our Board of Directors.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk****MARKET RISK**

We are exposed to various market risks, including changes in foreign currency exchange rates, interest rates and market prices. Market risk is the potential loss arising from changes in market rates and market prices. We employ established policies and practices to manage these risks. Foreign exchange option and forward contracts are used to hedge anticipated exposures or mitigate some existing exposures subject to foreign exchange risk as discussed below. We have not historically, nor do we currently, hedge our short-term investment portfolio. We do not consider our cash and cash equivalents to be exposed to significant interest rate risk because our cash and cash equivalent portfolio consists of highly liquid investments with original maturities of three months or less. We also do not currently hedge our market price risk relating to our equity investments. Further, we do not enter into derivatives or other financial instruments for trading or speculative purposes.

Foreign Currency Exchange Rate Risk

Cash Flow Hedging Activities. From time to time, we hedge a portion of our foreign currency risk related to forecasted foreign-currency-denominated sales and expense transactions by purchasing option contracts that generally have maturities of 15 months or less. These transactions are designated and qualify as cash flow hedges. The derivative assets associated with our hedging activities are recorded at fair value in other current assets in our Condensed Consolidated Balance Sheets. The effective portion of gains or losses resulting from changes in fair value of these hedges is initially reported, net of tax, as a component of accumulated other comprehensive income in stockholders' equity and subsequently reclassified into net revenue or operating expenses, as appropriate in the period when the forecasted transaction is recorded. The ineffective portion of gains or losses resulting from changes in fair value, if any, is reported in each period in interest and other income, net, in our Condensed Consolidated Statements of Operations. Our hedging programs are designed to reduce, but do not entirely eliminate, the impact of currency exchange rate movements in revenue and operating expenses. As of September 30, 2008, we had foreign currency option contracts to sell approximately \$105 million of foreign currencies. As of September 30, 2008, these foreign currency option contracts outstanding had a total fair value of \$4 million, included in other current assets.

Balance Sheet Hedging Activities. We use foreign exchange forward contracts to mitigate foreign currency risk associated with foreign-currency-denominated assets and liabilities, primarily intercompany receivables and payables. The forward contracts generally have a contractual term of three months or less and are transacted near month-end. Our foreign exchange forward contracts are not designated as hedging instruments under SFAS No. 133 and are accounted for as derivatives whereby the fair value of the contracts are reported as other current assets or other current liabilities in our Condensed Consolidated Balance Sheets, and gains and losses from changes in fair value are reported in interest and other income, net. The gains and losses on these forward contracts generally offset the gains and losses on the underlying foreign-currency-denominated assets and liabilities, which are also reported in interest and other income, net, in our Condensed Consolidated Statements of Operations. In certain cases, the amount of such gains and losses will significantly differ from the amount of gains and losses recognized on the underlying foreign currency denominated asset or liability, in which case our results will be impacted. As of September 30, 2008, we had forward foreign exchange contracts to purchase and sell approximately \$208 million in foreign currencies. Of this amount, \$177 million represented contracts to sell foreign currencies in exchange for U.S. dollars, \$4 million to sell foreign currencies in exchange for British pounds sterling and \$27 million to purchase foreign currencies in exchange for U.S. dollars. The fair value of our forward contracts was immaterial as of September 30, 2008.

The counterparties to these forward and option contracts are creditworthy multinational commercial banks; therefore, the risk of counterparty nonperformance is not considered to be material.

Notwithstanding our efforts to mitigate some foreign currency exchange rate risks, there can be no assurance that our hedging activities will adequately protect us against the risks associated with foreign currency fluctuations. As of September 30, 2008, a hypothetical adverse foreign currency exchange rate movement of 10 percent or 15 percent would have resulted in a potential loss in fair value of our option contracts used in cash flow hedging of \$4 million in both scenarios. A hypothetical adverse foreign currency exchange rate movement of 10 percent or 15 percent would have resulted in potential losses on our forward contracts used in balance sheet hedging of \$20 million and \$31 million, respectively, as of September 30, 2008. This sensitivity analysis assumes a parallel adverse shift of all

foreign currency exchange rates against the U.S. dollar; however, all foreign currency exchange rates do not always move in the same direction. Actual results may differ materially.

Table of Contents**Interest Rate Risk**

Our exposure to market risk for changes in interest rates relates primarily to our short-term investment portfolio. We manage our interest rate risk by maintaining an investment portfolio generally consisting of debt instruments of high credit quality and relatively short maturities. However, because short-term securities mature relatively quickly and are required to be reinvested at the then current market rates, interest income on a portfolio consisting of short-term securities is more subject to market fluctuations than a portfolio of longer term securities. Additionally, the contractual terms of the securities do not permit the issuer to call, prepay or otherwise settle the securities at prices less than the stated par value of the securities. Our investments are held for purposes other than trading. Also, we do not use derivative financial instruments in our short-term investment portfolio.

As of September 30, 2008 and March 31, 2008, our short-term investments were classified as available-for-sale and, consequently, recorded at fair market value with unrealized gains or losses resulting from changes in fair value reported as a separate component of accumulated other comprehensive income, net of any tax effects, in stockholders equity. Our portfolio of short-term investments consisted of the following investment categories, summarized by fair value as of September 30, 2008 and March 31, 2008 (in millions):

	As of September 30, 2008	As of March 31, 2008
U.S. Treasury securities	\$ 178	\$ 161
Corporate bonds	158	231
U.S. agency securities	112	266
Commercial paper	45	12
Asset-backed securities	35	64
Total short-term investments	\$ 528	\$ 734

Notwithstanding our efforts to manage interest rate risks, there can be no assurance that we will be adequately protected against risks associated with interest rate fluctuations. At any time, a sharp change in interest rates could have a significant impact on the fair value of our investment portfolio. The following table presents the hypothetical changes in fair value in our short-term investment portfolio as of September 30, 2008, arising from potential changes in interest rates. The modeling technique estimates the change in fair value from immediate hypothetical parallel shifts in the yield curve of plus or minus 50 basis points (BPS), 100 BPS, and 150 BPS.

(In millions)	Valuation of Securities Given an Interest Rate			Fair Value as of September 30, 2008	Valuation of Securities Given an Interest Rate		
	Decrease of X Basis Points				Increase of X Basis Points		
	(150 BPS)	(100 BPS)	(50 BPS)		50 BPS	100 BPS	150 BPS
U.S. Treasury securities	\$ 183	\$ 181	\$ 180	\$ 178	\$ 176	\$ 175	\$ 173
Corporate bonds	161	160	159	158	157	156	155
U.S. agency securities	115	114	113	112	112	111	110
Commercial paper	45	45	45	45	45	45	45
Asset-backed securities	35	35	35	35	35	34	34
	\$ 539	\$ 535	\$ 532	\$ 528	\$ 525	\$ 521	\$ 517

Total short-term
investments

Market Price Risk

The value of our equity investments in publicly traded companies is subject to market price volatility and foreign currency risk for investments denominated in foreign currencies. As of September 30, 2008 and March 31, 2008, our marketable equity securities were classified as available-for-sale and, consequently, were recorded in our Condensed Consolidated Balance Sheets at fair market value with unrealized gains or losses reported as a separate component of accumulated other comprehensive income, net of any tax effects, in stockholders' equity. The fair value of our marketable equity securities was \$640 million and \$729 million as of September 30, 2008 and March 31, 2008, respectively. In the three and six months ended September 30,

50

Table of Contents

2008, we recognized other-than-temporary impairment losses on our marketable equity securities of \$25 million and \$30 million, respectively.

At any time, a sharp change in market prices in our investments in marketable equity securities could have a significant impact on the fair value of our investments. The following table presents hypothetical changes in the fair value of our marketable equity securities as of September 30, 2008, arising from changes in market prices plus or minus 25 percent, 50 percent and 75 percent.

(In millions)	Valuation of Securities Given an X Percentage Decrease			Fair Value as of September 30, 2008	Valuation of Securities Given an X Percentage Increase		
	in Each Stock's Market Price (75%)	in Each Stock's Market Price (50%)	in Each Stock's Market Price (25%)		in Each Stock's Market Price 25%	in Each Stock's Market Price 50%	in Each Stock's Market Price 75%
Marketable equity securities	\$ 160	\$ 320	\$ 480	\$ 640	\$ 800	\$ 960	\$ 1,120

Table of Contents

Item 4. Controls and Procedures

Definition and limitations of disclosure controls

Our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed under the Exchange Act, such as this report, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures are also designed to ensure that such information is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Our management evaluates these controls and procedures on an ongoing basis.

There are inherent limitations to the effectiveness of any system of disclosure controls and procedures. These limitations include the possibility of human error, the circumvention or overriding of the controls and procedures and reasonable resource constraints. In addition, because we have designed our system of controls based on certain assumptions, which we believe are reasonable, about the likelihood of future events, our system of controls may not achieve its desired purpose under all possible future conditions. Accordingly, our disclosure controls and procedures provide reasonable assurance, but not absolute assurance, of achieving their objectives.

Evaluation of disclosure controls and procedures

Our Chief Executive Officer and our Chief Financial Officer, after evaluating the effectiveness of our disclosure controls and procedures, believe that as of the end of the period covered by this report, our disclosure controls and procedures were effective in providing the requisite reasonable assurance that material information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding the required disclosure.

Changes in internal control over financial reporting

During the quarter ended September 30, 2008, no changes occurred in our internal control over financial reporting that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

Item 1. *Legal Proceedings*

We are subject to claims and litigation arising in the ordinary course of business. We do not believe that any liability from any reasonably foreseeable disposition of such claims and litigation, individually or in the aggregate, would have a material adverse effect on our consolidated financial position or results of operations.

Item 1A: *Risk Factors*

Our business is subject to many risks and uncertainties, which may affect our future financial performance. If any of the events or circumstances described below occurs, our business and financial performance could be harmed, our actual results could differ materially from our expectations and the market value of our stock could decline. The risks and uncertainties discussed below are not the only ones we face. There may be additional risks and uncertainties not currently known to us or that we currently do not believe are material that may harm our business and financial performance.

Our business is highly dependent on the success and availability of video game hardware systems manufactured by third parties, as well as our ability to develop commercially successful products for these systems.

We derive most of our revenue from the sale of products for play on video game hardware systems (which we also refer to as platforms) manufactured by third parties, such as Sony's PlayStation 2, PLAYSTATION 3 and PlayStation Portable, Microsoft's Xbox 360 and Nintendo's Wii and DS. The success of our business is driven in large part by the commercial success and adequate supply of these video game hardware systems, our ability to accurately predict which systems will be successful in the marketplace, and our ability to develop commercially successful products for these systems. We must make product development decisions and commit significant resources well in advance of anticipated product ship dates. A platform for which we are developing products may not succeed or may have a shorter life cycle than anticipated. If consumer demand for the systems for which we are developing products is lower than our expectations, our revenue will suffer, we may be unable to fully recover the investments we have made in developing our products, and our financial performance will be harmed. Alternatively, a system for which we have not devoted significant resources could be more successful than we had initially anticipated, causing us to miss out on meaningful revenue opportunities.

Our industry is cyclical, driven by the transition from older video game hardware systems to new ones. As we continue to move through the current cycle, our operating results may be volatile and difficult to predict.

Video game hardware systems have historically had a life cycle of four to six years, which causes the video game software market to be cyclical as well. The current cycle began with Microsoft's launch of the Xbox 360 in 2005, and continued in 2006 when Sony and Nintendo launched their next-generation systems, the PLAYSTATION 3 and the Wii, respectively. During fiscal 2008, the installed base of each of these systems continued to expand and, as a result, sales of our products for these systems have also increased significantly. At the same time, however, demand for video games for prior-generation systems, particularly the original Xbox and the Nintendo GameCube, has declined significantly. Although we expect to continue developing and marketing new titles for the prior-generation PlayStation 2 in fiscal 2009, we only expect to release one title for the original Xbox and no titles for the Nintendo GameCube. As a result, we expect our sales of video games for prior-generation systems to continue to decline. The decline in prior-generation product sales, particularly the PlayStation 2, may be greater or faster than we anticipate, and sales of products for the new platforms may be lower or increase more slowly than we anticipate. Moreover, we expect development costs for the new video game systems to continue to be greater on a per-title basis than development costs for prior-generation video game systems. As a result of these factors, during the next several quarters, we expect our operating results to be more volatile and difficult to predict, which could cause our stock price to fluctuate significantly.

If we do not consistently meet our product development schedules, our operating results will be adversely affected.

Our business is highly seasonal, with the highest levels of consumer demand and a significant percentage of our sales occurring in the December quarter. In addition, we seek to release many of our products in conjunction with specific events, such as the release of a related movie or the beginning of a sports season or major sporting event. If we miss

these key selling periods for any reason, including product delays or delayed introduction of a new platform for which we have developed products, our sales will suffer disproportionately. Likewise, if a key event to which our product release schedule is tied were to be delayed or cancelled, our sales would also suffer disproportionately. For example, we had initially planned to release an upcoming game,

Table of Contents

Harry Potter and the Half-Blood Prince, in November 2008 (during our fiscal year ending March 31, 2009). The game is now expected to be released in the summer of 2009 in conjunction with the release of the Warner Bros. Pictures film. Our ability to meet product development schedules is affected by a number of factors, including the creative processes involved, the coordination of large and sometimes geographically dispersed development teams required by the increasing complexity of our products and the platforms for which they are developed, and the need to fine-tune our products prior to their release. We have experienced development delays for our products in the past, which caused us to push back release dates. In the future, any failure to meet anticipated production or release schedules would likely result in a delay of revenue and/or possibly a significant shortfall in our revenue, increase our development expense, harm our profitability, and cause our operating results to be materially different than anticipated.

Our business is intensely competitive and hit driven. If we do not continue to deliver hit products and services or if consumers prefer our competitors products or services over our own, our operating results could suffer.

Competition in our industry is intense and we expect new competitors to continue to emerge in the United States and abroad. While many new products and services are regularly introduced, only a relatively small number of hit titles accounts for a significant portion of total revenue in our industry. Hit products or services offered by our competitors may take a larger share of consumer spending than we anticipate, which could cause revenue generated from our products and services to fall below expectations. If our competitors develop more successful products or services, offer competitive products or services at lower price points or based on payment models perceived as offering a better value proposition (such as pay-for-play or subscription-based models), or if we do not continue to develop consistently high-quality and well-received products and services, our revenue, margins, and profitability will decline.

Uncertainty and adverse changes in the economy could have a material adverse impact on our business and operating results.

Uncertainty or adverse changes in the economy could lead to a significant decline in discretionary consumer spending, which, in turn, could result in a decline in the demand for our products. As a result of the recent national and global economic downturn, overall consumer spending has declined. Retailers globally, and particularly in North America, appear to be taking a more conservative stance in ordering game inventory, particularly for older catalog titles (*i.e.*, sales of games that were released in a previous quarter). Any decrease in demand for our products, particularly during the critical holiday selling season or other key product launch windows, could have a material adverse impact on our operating results and financial condition. Uncertainty and adverse changes in the economy could also increase the risk of material losses on our investments, increase costs associated with developing and publishing our products, increase the cost and decrease the availability of potential sources of financing, and increase our exposure to material losses from bad debts, any of which could have a material adverse impact on our financial condition and operating results.

Technology changes rapidly in our business and if we fail to anticipate or successfully implement new technologies or the manner in which people play our games, the quality, timeliness and competitiveness of our products and services will suffer.

Rapid technology changes in our industry require us to anticipate, sometimes years in advance, which technologies we must implement and take advantage of in order to make our products and services competitive in the market.

Therefore, we usually start our product development with a range of technical development goals that we hope to be able to achieve. We may not be able to achieve these goals, or our competition may be able to achieve them more quickly and effectively than we can. In either case, our products and services may be technologically inferior to our competitors, less appealing to consumers, or both. If we cannot achieve our technology goals within the original development schedule of our products and services, then we may delay their release until these technology goals can be achieved, which may delay or reduce revenue and increase our development expenses. Alternatively, we may increase the resources employed in research and development in an attempt to accelerate our development of new technologies, either to preserve our product or service launch schedule or to keep up with our competition, which would increase our development expenses.

The video game hardware manufacturers set the royalty rates and other fees that we must pay to publish games for their platforms, and therefore have significant influence on our costs. If one or more of these manufacturers change their fee structure, our profitability will be materially impacted.

In order to publish products for a video game system such as the Xbox 360, PLAYSTATION 3 or Wii, we must take a license from the manufacturer, which gives it the opportunity to set the fee structure that we must pay in order to publish games for that platform. Similarly, certain manufacturers have retained the flexibility to change their fee structures, or adopt different fee structures for online gameplay and other new features for their consoles. The control that hardware manufacturers have over the fee structures for their platforms and online access could adversely impact our costs, profitability and margins. Because

Table of Contents

publishing products for video game systems is the largest portion of our business, any increase in fee structures would significantly harm our ability to generate revenues and/or profits.

The video game hardware manufacturers are among our chief competitors and frequently control the manufacturing of and/or access to our video game products. If they do not approve our products, we will be unable to ship to our customers.

Our agreements with hardware licensors (such as Sony for the PLAYSTATION 3, Microsoft for the Xbox 360, and Nintendo for the Wii) typically give significant control to the licensor over the approval and manufacturing of our products, which could, in certain circumstances, leave us unable to get our products approved, manufactured and shipped to customers. These hardware licensors are also among our chief competitors. Generally, control of the approval and manufacturing process by the hardware licensors increases both our manufacturing lead times and costs as compared to those we can achieve independently. While we believe that our relationships with our hardware licensors are currently good, the potential for these licensors to delay or refuse to approve or manufacture our products exists. Such occurrences would harm our business and our financial performance.

We also require compatibility code and the consent of Microsoft, Sony and Nintendo in order to include online capabilities in our products for their respective platforms. As online capabilities for video game systems become more significant, Microsoft, Sony and Nintendo could restrict the manner in which we provide online capabilities for our products. If Microsoft, Sony or Nintendo refused to approve our products with online capabilities or significantly impacted the financial terms on which these services are offered to our customers, our business could be harmed.

If we are unable to maintain or acquire licenses to include intellectual property owned by others in our games, or to maintain or acquire the rights to publish or distribute games developed by others, we will sell fewer hit titles and our revenue, profitability and cash flows will decline. Competition for these licenses may make them more expensive and reduce our profitability.

Many of our products are based on or incorporate intellectual property owned by others. For example, our EA SPORTS products include rights licensed from major sports leagues and players' associations. Similarly, many of our other hit franchises, such as The Godfather, Harry Potter and Lord of the Rings, are based on key film and literary licenses. In addition, one of our most successful products in fiscal 2008, *Rock Band*, was a game which we did not develop but for which we had acquired distribution rights. Competition for these licenses and rights is intense. If we are unable to maintain these licenses and rights or obtain additional licenses or rights with significant commercial value, our revenues and profitability will decline significantly. Competition for these licenses may also drive up the advances, guarantees and royalties that we must pay to licensors and developers, which could significantly increase our costs and reduce our profitability.

Our business is subject to risks generally associated with the entertainment industry, any of which could significantly harm our operating results.

Our business is subject to risks that are generally associated with the entertainment industry, many of which are beyond our control. These risks could negatively impact our operating results and include: the popularity, price and timing of our games and the platforms on which they are played; economic conditions that adversely affect discretionary consumer spending; changes in consumer demographics; the availability and popularity of other forms of entertainment; and critical reviews and public tastes and preferences, which may change rapidly and cannot necessarily be predicted.

If we do not continue to attract and retain key personnel, we will be unable to effectively conduct our business.

The market for technical, creative, marketing and other personnel essential to the development and marketing of our products and management of our businesses is extremely competitive. Our leading position within the interactive entertainment industry makes us a prime target for recruiting of executives and key creative talent. If we cannot successfully recruit and retain the employees we need, or replace key employees following their departure, our ability to develop and manage our business will be impaired.

Acquisitions, investments and other strategic transactions could result in operating difficulties, dilution to our investors and other negative consequences.

We have engaged in, evaluated, and expect to continue to engage in and evaluate, a wide array of potential strategic transactions, including (i) acquisitions of companies, businesses, intellectual properties, and other assets, (ii) minority

Table of Contents

investments in strategic partners, and (iii) investments in new interactive entertainment businesses (for example, online and mobile games). Any of these strategic transactions could be material to our financial condition and results of operations. Although we regularly search for opportunities to engage in strategic transactions, we may not be successful in identifying suitable opportunities. We may not be able to consummate potential acquisitions or investments or an acquisition or investment we do consummate may not enhance our business or may decrease rather than increase our earnings. The process of acquiring and integrating a company or business, or successfully exploiting acquired intellectual property or other assets, could divert a significant amount of resources, as well as our management's time and focus and may create unforeseen operating difficulties and expenditures, particularly for a large acquisition. Additional risks and variations of the foregoing risks we face include:

The need to implement or remediate controls, procedures and policies appropriate for a public company in an acquired company that, prior to the acquisition, lacked these controls, procedures and policies,

Cultural challenges associated with integrating employees from an acquired company or business into our organization,

Retaining key employees and maintaining the key business and customer relationships of the businesses we acquire,

The need to integrate an acquired company's accounting, management information, human resource and other administrative systems to permit effective management and timely reporting,

The possibility that we will not discover important facts during due diligence that could have a material adverse impact on the value of the businesses we acquire,

Potential impairment charges incurred to write down the carrying amount of intangible assets generated as a result of an acquisition,

Litigation or other claims in connection with, or inheritance of claims or litigation risks as a result of, an acquisition, including claims from terminated employees, customers or other third parties,

Significant accounting charges resulting from the completion and integration of a sizeable acquisition and increased capital expenditures,

Significant acquisition-related accounting adjustments, particularly relating to an acquired company's deferred revenue, that may cause reported revenue and profits of the combined company to be lower than the sum of their stand-alone revenue and profits,

The possibility that the combined company would not achieve the expected benefits, including any anticipated operating and product synergies, of the acquisition as quickly as anticipated,

The possibility that the costs of, or operational difficulties arising from, an acquisition would be greater than anticipated,

To the extent that we engage in strategic transactions outside of the United States, we face additional risks, including risks related to integration of operations across different cultures and languages, currency risks and the particular economic, political and regulatory risks associated with specific countries, and

The possibility that a change of control of a company we acquire triggers a termination of contractual or intellectual property rights important to the operation of its business.

Future acquisitions and investments could also involve the issuance of our equity and equity-linked securities (potentially diluting our existing stockholders), the incurrence of debt, contingent liabilities or amortization expenses, write-offs of goodwill, intangibles, or acquired in-process technology, or other increased cash and non-cash expenses, such as stock-based compensation. Any of the foregoing factors could harm our financial condition or prevent us from achieving improvements in our financial condition and operating performance that could have otherwise been achieved by us on a stand-alone basis. Our stockholders may not have the opportunity to review, vote on or evaluate future acquisitions or investments.

Table of Contents

If patent claims continue to be asserted against us, we may be unable to sustain our current business models or profits, or we may be precluded from pursuing new business opportunities in the future.

Many patents have been issued that may apply to widely-used game technologies, or to potential new modes of delivering, playing or monetizing game software products. For example, infringement claims under many issued patents are now being asserted against interactive software or online game sites. Several such claims have been asserted against us. We incur substantial expenses in evaluating and defending against such claims, regardless of the merits of the claims. In the event that there is a determination that we have infringed a third-party patent, we could incur significant monetary liability and be prevented from using the rights in the future, which could negatively impact our operating results. We may also discover that future opportunities to provide new and innovative modes of game play and game delivery to consumers may be precluded by existing patents that we are unable to license on reasonable terms.

Other intellectual property claims may increase our product costs or require us to cease selling affected products.

Many of our products include extremely realistic graphical images, and we expect that as technology continues to advance, images will become even more realistic. Some of the images and other content are based on real-world examples that may inadvertently infringe upon the intellectual property rights of others. Although we believe that we make reasonable efforts to ensure that our products do not violate the intellectual property rights of others, it is possible that third parties still may claim infringement. From time to time, we receive communications from third parties regarding such claims. Existing or future infringement claims against us, whether valid or not, may be time consuming and expensive to defend. Such claims or litigations could require us to stop selling the affected products, redesign those products to avoid infringement, or obtain a license, all of which would be costly and harm our business.

From time to time we may become involved in other legal proceedings, which could adversely affect us.

We are currently, and from time to time in the future may become, subject to legal proceedings, claims, litigation and government investigations or inquiries, which could be expensive, lengthy, and disruptive to normal business operations. In addition, the outcome of any legal proceedings, claims, litigation, investigations or inquiries may be difficult to predict and could have a material adverse effect on our business, operating results, or financial condition.

Our business, our products and our distribution are subject to increasing regulation of content, consumer privacy, distribution and online hosting and delivery in the key territories in which we conduct business. If we do not successfully respond to these regulations, our business may suffer.

Legislation is continually being introduced that may affect both the content of our products and their distribution. For example, data and consumer protection laws in the United States and Europe impose various restrictions on our web sites. Those rules vary by territory although the Internet recognizes no geographical boundaries. Other countries, such as Germany, have adopted laws regulating content both in packaged games and those transmitted over the Internet that are stricter than current United States laws. In the United States, the federal and several state governments are continually considering content restrictions on products such as ours, as well as restrictions on distribution of such products. For example, recent legislation has been adopted in several states, and could be proposed at the federal level, that prohibits the sale of certain games (*e.g.*, violent games or those with M (Mature) or AO (Adults Only) ratings) to minors. Any one or more of these factors could harm our business by limiting the products we are able to offer to our customers, by limiting the size of the potential market for our products, and by requiring costly additional differentiation between products for different territories to address varying regulations.

If one or more of our titles were found to contain hidden, objectionable content, our business could suffer.

Throughout the history of our industry, many video games have been designed to include certain hidden content and gameplay features that are accessible through the use of in-game cheat codes or other technological means that are intended to enhance the gameplay experience. However, in several recent cases, hidden content or features have been found to be included in other publishers' products by an employee who was not authorized to do so or by an outside developer without the knowledge of the publisher. From time to time, some hidden content and features have contained profanity, graphic violence and sexually explicit or otherwise objectionable material. In a few cases, the Entertainment Software Ratings Board (ESRB) has reacted to discoveries of hidden content and features by reviewing the rating that was originally assigned to the product, requiring the publisher to change the game packaging and/or

fining the publisher. Retailers have on occasion reacted to the discovery of such hidden content by removing these games from their shelves, refusing to sell them, and demanding that their publishers accept them as product returns. Likewise, consumers have reacted to the revelation of hidden content by refusing to purchase such games, demanding refunds for games they have already purchased, and refraining from buying other games published by the company whose game contained the objectionable material.

Table of Contents

We have implemented preventative measures designed to reduce the possibility of hidden, objectionable content from appearing in the video games we publish. Nonetheless, these preventative measures are subject to human error, circumvention, overriding, and reasonable resource constraints. In addition, to the extent we acquire a company without similar controls in place, the possibility of hidden, objectionable content appearing in video games developed by that company but for which we are ultimately responsible could increase. If a video game we published were found to contain hidden, objectionable content, the ESRB could demand that we recall a game and change its packaging to reflect a revised rating, retailers could refuse to sell it and demand we accept the return of any unsold copies or returns from customers, and consumers could refuse to buy it or demand that we refund their money. This could have a material negative impact on our operating results and financial condition. In addition, our reputation could be harmed, which could impact sales of other video games we sell. If any of these consequences were to occur, our business and financial performance could be significantly harmed.

If we ship defective products, our operating results could suffer.

Products such as ours are extremely complex software programs, and are difficult to develop, manufacture and distribute. We have quality controls in place to detect defects in the software, media and packaging of our products before they are released. Nonetheless, these quality controls are subject to human error, overriding, and reasonable resource constraints. Therefore, these quality controls and preventative measures may not be effective in detecting defects in our products before they have been reproduced and released into the marketplace. In such an event, we could be required to recall a product, or we may find it necessary to voluntarily recall a product, and/or scrap defective inventory, which could significantly harm our business and operating results.

Our international net revenue is subject to currency fluctuations.

For the six months ended September 30, 2008, international net revenue comprised 42 percent of our total net revenue. We expect foreign sales to continue to account for a significant portion of our total net revenue. Such sales may be subject to unexpected regulatory requirements, tariffs and other barriers. Additionally, foreign sales are primarily made in local currencies, which may fluctuate against the U.S. dollar. We use foreign exchange forward contracts to mitigate some foreign currency risk associated with foreign currency denominated assets and liabilities (primarily certain intercompany receivables and payables) and, from time to time, foreign currency option contracts to hedge foreign currency forecasted transactions (primarily related to a portion of the revenue and expenses denominated in foreign currency generated by our operational subsidiaries). However, these activities do not fully protect us from foreign currency fluctuations and, can themselves, result in losses. Accordingly, our results of operations, including our reported net revenue and net income, and financial condition can be adversely affected by unfavorable foreign currency fluctuations, particularly the Euro, British pound sterling and Canadian dollar.

Volatility in the capital markets may adversely impact the value of our investments and could cause us to recognize significant impairment charges in our operating results.

Our portfolio of short-term investments and marketable equity securities is subject to volatility in the capital markets and to national and international economic conditions. In particular, our international investments can be subject to fluctuations in foreign currency and our short-term investments are susceptible to changes in short-term interest rates. These investments are also impacted by declines in value attributable to the credit-worthiness of the issuer. From time to time, we may liquidate some or all of our short-term investments to fund operational needs or other activities, such as capital expenditures, strategic investments or business acquisitions. If we were to liquidate these short-term investments at a time when they were worth less than what we had originally purchased them for, or if the obligor were unable to pay the full amount at maturity, we could incur a significant loss. Similarly, we hold marketable equity securities, which have been and may continue to be adversely impacted by price and trading volume volatility in the public stock markets. For example, as of October 30, 2008, the aggregate fair market value of our investments in The9 and Neowiz had declined by approximately \$37 million since the end of September 2008. If we were to sell these marketable equity securities for a loss, or if we were to determine that their value had become other-than-temporarily impaired, we could be required to recognize significant impairment charges, which could have a material adverse effect on our financial condition and results of operations.

Changes in our tax rates or exposure to additional tax liabilities could adversely affect our earnings and financial condition.

We are subject to income taxes in the United States and in various foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes, and, in the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain.

Table of Contents

We are also required to estimate what our tax obligations will be in the future. Although we believe our tax estimates are reasonable, the estimation process and applicable laws are inherently uncertain, and our estimates are not binding on tax authorities. The tax laws' treatment of software and internet-based transactions is particularly uncertain and in some cases ill-suited to address these kinds of transactions. Apart from an adverse resolution of these uncertainties, our effective tax rate also could be adversely affected by our profit level, by changes in our business or changes in our structure resulting from the reorganization of our business and operating structure, changes in the mix of earnings in countries with differing statutory tax rates, changes in the elections we make, or changes in applicable tax laws, as well as other factors. Further, our tax determinations are regularly subject to audit by tax authorities and developments in those audits could adversely affect our income tax provision. Should our ultimate tax liability exceed our estimates, our income tax provision and net income or loss could be materially affected.

We incur certain tax expenses that do not decline proportionately with declines in our consolidated pre-tax income or loss. As a result, in absolute dollar terms, our tax expense will have a greater influence on our effective tax rate at lower levels of pre-tax income or loss than higher levels. In addition, at lower levels of pre-tax income or loss, our effective tax rate will be more volatile.

We are also required to pay taxes other than income taxes, such as payroll, sales, use, value-added, net worth, property and goods and services taxes, in both the United States and various foreign jurisdictions. We are regularly under examination by tax authorities with respect to these non-income taxes. There can be no assurance that the outcomes from these examinations, changes in our business or changes in applicable tax rules will not have an adverse effect on our earnings and financial condition.

Changes in our worldwide operating structure or the adoption of new products and distribution models could have adverse tax consequences.

As we expand our international operations, adopt new products and new distribution models, implement changes to our operating structure or undertake intercompany transactions in light of changing tax laws, expiring rulings, acquisitions and our current and anticipated business and operational requirements, our tax expense could increase. For example, in the fourth quarter of fiscal 2006, we repatriated \$375 million under the American Jobs Creation Act of 2004. As a result, we recognized an additional one-time tax expense in fiscal 2006 of \$17 million.

Our reported financial results could be adversely affected by changes in financial accounting standards or by the application of existing or future accounting standards to our business as it evolves.

As a result of the enactment of the Sarbanes-Oxley Act and the review of accounting policies by the SEC and national and international accounting standards bodies, the frequency of accounting policy changes may accelerate. For example, FASB Interpretations No. 48 has affected the way we account for income taxes and has had a material impact on our financial results. In addition, our adoption of SFAS No. 141(R) will have a material impact on our Condensed Consolidated Financial Statements for material acquisitions consummated after March 28, 2009. Similarly, changes in accounting standards relating to stock-based compensation require us to recognize significantly greater expense than we had been recognizing prior to the adoption of the new standard. Likewise, policies affecting software revenue recognition have and could further significantly affect the way we account for revenue related to our products and services. For example, we expect a more significant portion of our games will be online-enabled in the future and we could be required to recognize the related revenue over an extended period of time rather than at the time of sale. As we enhance, expand and diversify our business and product offerings, the application of existing or future financial accounting standards, particularly those relating to the way we account for revenue and taxes, could have a significant adverse effect on our reported results although not necessarily on our cash flows.

The majority of our sales are made to a relatively small number of key customers. If these customers reduce their purchases of our products or become unable to pay for them, our business could be harmed.

During the six months ended September 30, 2008, approximately 70 percent of our United States sales were made to seven key customers. In Europe, our top ten customers accounted for approximately 29 percent of our sales in that territory during the six months ended September 30, 2008. Worldwide, we had direct sales to two customers, GameStop Corp. and Wal-Mart Stores Inc., which represented approximately 15 percent and 13 percent, respectively, of total net revenue for the six months ended September 30, 2008. Though our products are available to consumers through a variety of retailers, the concentration of our sales in one, or a few, large customers could lead to a short-term

disruption in our sales if one or more of these customers

59

Table of Contents

significantly reduced their purchases or ceased to carry our products, and could make us more vulnerable to collection risk if one or more of these large customers became unable to pay for our products. Additionally, our receivables from these large customers increase significantly in the December quarter as they stock up for the holiday selling season. Also, having such a large portion of our total net revenue concentrated in a few customers could reduce our negotiating leverage with these customers.

Our products are subject to the threat of piracy and unauthorized copying, which could negatively impact our growth and future profitability.

Software piracy is a persistent problem, particularly in countries where laws are less protective of intellectual property rights. The global expansion of organized pirate operations, the proliferation of technology designed to circumvent the protection measures we use in our products, the availability of broadband access to the Internet and the ability to download pirated copies of our games from various Internet sites and through peer-to-peer channels, and the widespread proliferation of Internet cafes using pirated copies of our products, all have contributed to ongoing and expanding piracy. Though we take legal and technical steps to make the unauthorized copying and distribution of our products more difficult, as do the manufacturers of consoles on which our games are played, these efforts may not be successful in controlling the piracy of our products. These factors could have a negative effect on our growth and profitability in the future.

Our stock price has been volatile and may continue to fluctuate significantly.

The market price of our common stock historically has been, and we expect will continue to be, subject to significant fluctuations. These fluctuations may be due to factors specific to us (including those discussed in the risk factors above, as well as others not currently known to us or that we currently do not believe are material), to changes in securities analysts' earnings estimates or ratings, to our results or future financial guidance falling below our expectations and analysts' and investors' expectations, to factors affecting the entertainment, computer, software, Internet, media or electronics industries, to our ability to successfully integrate any acquisitions we may make, or to national or international economic conditions. In particular, economic downturns may contribute to the public stock markets experiencing extreme price and trading volume volatility. These broad market fluctuations have and could continue to adversely affect the market price of our common stock.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table reflects shares of restricted stock that were cancelled upon vesting as satisfaction for the payment of applicable withholding taxes (shares in thousands):

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number or Dollar Value of Shares that May Yet Be Purchased Under the Program (in millions)
July 1 31, 2008				
August 1 31, 2008	22	\$43.18		
September 1 30, 2008				

Item 4. Submission of Matters to a Vote of Security Holders

At our Annual Meeting of Stockholders, held on July 31, 2008, our stockholders elected the following individuals to the Board of Directors for one-year terms:

	For	%	Against	%	Withheld	%
Leonard S. Coleman	270,563,234	95.3%	11,395,156	4.0%	2,072,366	0.7%
Gary M. Kusin	278,795,966	98.2%	3,183,754	1.1%	2,051,036	0.7%
Gregory B. Maffei	277,422,027	97.7%	4,243,994	1.5%	2,364,735	0.8%
Vivek Paul	280,189,157	98.6%	1,849,842	0.7%	1,991,757	0.7%
Lawrence F. Probst III	275,447,846	97.0%	6,609,186	2.3%	1,973,724	0.7%
John S. Riccitiello	279,015,864	98.2%	3,021,757	1.1%	1,993,135	0.7%
Richard A. Simonson	270,474,880	95.3%	11,479,693	4.0%	2,076,183	0.7%
Linda J. Srere	270,678,812	95.3%	10,964,914	3.9%	2,387,030	0.8%

In addition, the following matters were voted on, received the number of votes indicated in the tables below, and approved by our stockholders:

- Amendments to our 2000 Equity Incentive Plan (the Equity Plan) to (a) increase the number of shares authorized for issuance thereunder by 2,185,000 shares, (b) replace the specific limitation on the number of shares that may be granted as restricted stock or restricted stock unit awards with an alternate method of calculating the number of shares remaining available for issuance under the Equity Plan, (c) add additional performance measurements for use in granting performance-based equity under the Equity Plan, and (d) extend the term of the Equity Plan for an additional ten years.
