ITEM 1.01. ENTRY INTO A MATERIAL DEFINITIVE AGREEMENT

On April 17, 2009, in connection with the closing of the Offering (as defined below), California Water Service Company (Cal Water), a wholly-owned subsidiary of California Water Service Group (the Registrant), entered into Amendment No. 2 to its Loan Agreement with Bank of America, N.A. (Lender) dated as of May 30, 2007, and the Registrant and four wholly-owned subsidiaries of the Registrant (CWS Utility Services, New Mexico Water Service Company, Washington Water Service Company and Hawaii Water Service Company, Inc.) entered into Amendment No. 1 to their Loan Agreement with the Lender dated as of May 30, 2007.

Pursuant to each amendment, (i) the availability period of the unsecured revolving line of credit under the applicable loan agreement ends 364 days after the date of such amendment rather than April 30, 2012, (ii) the interest rate payable in respect of borrowings under the line of credit under the applicable loan agreement has increased from the Lender's prime rate minus 1.5% to the Lender's prime rate minus 0.75%, (iii) the alternative interest rate payable in respect of borrowings under the line of credit under the applicable loan agreement has increased from LIBOR plus 0.25% to LIBOR plus 1.0% and (iv) the unused commitment fee payable under the applicable loan agreement changed from a flat rate of \$12,000 (in the case of Cal Water's loan agreement) or \$4,400 (in the case of the Registrant's loan agreement), payable annually, to a fee equal to 0.15% of the amount of unused available credit under the line of credit under the applicable loan agreement, payable quarterly.

Banc of America Securities LLC, an affiliate of the Lender, has in the past served as placement agent in connection with the Registrant's offerings of certain series of notes, including in connection with Cal Water's most recent private offering, issue and sale of notes issued August 31, 2006 and due August 31, 2031.

ITEM 1.02. TERMINATION OF A MATERIAL DEFINITIVE AGREEMENT

In connection with the Offering, Cal Water exercised its option to redeem the remaining \$3.0 million of 8.86% Series J First Mortgage Bonds due 2023, which Cal Water assumed in connection with its acquisition of Dominguez Water Corporation in 2000. The redemption was effected pursuant to the terms of the indenture and supplemental indentures governing the Series J bonds. The Series J bonds were redeemed at a redemption price equal to 100% of the outstanding principal amount of the Series J bonds plus a make-whole premium and accrued and unpaid interest to the date of redemption.

ITEM 2.03. CREATION OF A DIRECT FINANCIAL OBLIGATION OR AN OBLIGATION UNDER AN OFF-BALANCE SHEET ARRANGEMENT OF A REGISTRANT

On April 17, 2009, Cal Water completed the sale and issuance to the public (the Offering) of \$100 million aggregate principal amount of its 5.875% First Mortgage Bonds due 2019 (the Bonds), which are fully and unconditionally guaranteed by the Registrant. Robert W. Baird & Co. Incorporated acted as the sole underwriter for the Offering. The Bonds will mature on May 1, 2019, and interest on the Bonds will accrue and be payable semi-annually in arrears on May 1 and November 1 commencing on November 1, 2009, at the rate of 5.875% per annum. The Bonds are secured by the lien on substantially all of Cal Water's properties, subject to certain exceptions and permitted liens, and rank equally with all of Cal Water's other first mortgage bonds. There is no sinking fund for the Bonds.

Cal Water intends to use a portion of the net proceeds of the Offering to pay down outstanding short-term borrowings. Further, Cal Water plans to add the remainder of the net proceeds to its general funds to be used for general corporate purposes, including capital projects.

Prior to the Offering, Cal Water had outstanding fifteen series of unsecured senior notes (Series A, Series B, Series C, Series D, Series E, Series F, Series G, Series H, Series I, Series J, Series K, Series L, Series M, Series N and Series O) with an aggregate principal amount of \$260 million. Pursuant to the note purchase agreements and supplements thereto under which Cal Water's outstanding unsecured senior notes had been issued, in the event that

Table of Contents

Cal Water issued one or more additional series of first mortgage bonds under its mortgage indenture, Cal Water was required to issue a new series of first mortgage bonds in exchange for each outstanding series of unsecured senior notes with a like aggregate principal amount. The Offering triggered this exchange provision. Accordingly, upon the closing of the Offering, Cal Water was required to issue an additional series of first mortgage bonds under the mortgage indenture with a like aggregate principal amount to the holders of each series of its outstanding unsecured senior notes in exchange for each such series of notes.

Furthermore, in connection with the execution of the thirty-ninth supplemental indenture to Cal Water's mortgage indenture, upon the closing of the Offering Cal Water amended and restated its \$17.8 million in outstanding Series CC first mortgage bonds under its mortgage indenture. Concurrently with the closing of the Offering Cal Water also exchanged all \$2.9 million outstanding aggregate principal amount of its Series K first mortgage bonds under the indenture it assumed in connection with its acquisition of Dominguez Water Corporation for Series KK first mortgage bonds issued under the mortgage indenture.

Cal Water provided the Series CC first mortgage bonds, the Series KK first mortgage bonds, and four series of first mortgage bonds issued in connection with the exchange of unsecured senior notes, Series BBB, Series GGG, Series HHH and Series LLL, with certain rights and covenants in addition to those set forth in our mortgage indenture.

The disclosure required by this item in regard to the amendments to Cal Water and the Registrant's loan agreements is included in Item 1.01 and is incorporated herein by reference.

ITEM 9.01. FINANCIAL STATEMENTS AND EXHIBITS.
