FORM 10-Q

(Mark One)

þ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2007

or

o **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from __________ to __________

Commission File Number: 1-11917

FBL Financial Group, Inc.

(Exact name of registrant as specified in its charter)

Iowa	42-1411715
(State of incorporation)	(I.R.S. Employer Identification No.)
5400 University Avenue, West Des Moines, Iowa	50266-5997
(Address of principal executive offices)	(Zip Code)

(515) 225-5400

(Registrant s telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. þ Yes o No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o Accelerated filer þ Non-accelerated filer o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). o Yes þ No

Indicate the number of shares outstanding of each of the issuer s classes of common stock, as of the latest practicable date:

Title of each class	Outstanding at July 31, 2007
Class A Common Stock, without par value	28,750,160
Class B Common Stock, without par value	1,192,990

Cautionary Statement Regarding Forward Looking Information

This Form 10-Q includes statements relating to anticipated financial performance, business prospects, new products, and similar matters. These statements and others, which include words such as expect , anticipate , believe , intend , a other similar expressions, constitute forward-looking statements under the Private Securities Litigation Reform Act of 1995. A variety of factors could cause our actual results and experiences to differ materially from the anticipated results or other expectations expressed in our forward-looking statements. The risks and uncertainties that may affect the operations, performance, development and results of our business include but are not limited to the following:

If we are unable to attract and retain agents and develop new distribution sources, sales of our products and services may be reduced.

Changing interest rates and market volatility, and general economic conditions, affect the risks and the returns on both our products and our investment portfolio.

Our investment portfolio is subject to credit quality risks which may diminish the value of our invested assets and affect our profitability and reported book value per share.

As a holding company, we depend on our subsidiaries for funds to meet our obligations, but our subsidiaries ability to make distributions to us is limited by law, and could be affected by risk based capital computations.

A significant ratings downgrade may have a material adverse effect on our business.

Our earnings are influenced by our claims experience, which is difficult to estimate. If our future claims experience does not match our pricing assumptions or past results, our earnings could be materially adversely affected.

Inaccuracies in assumptions regarding future persistency, mortality and interest rates used in calculating reserve, deferred policy acquisition expense and deferred sales inducement amounts and pricing our products could have a material impact on our net income.

Changes in federal tax laws may affect sales of our products and profitability.

All segments of our business are highly regulated and these regulations or changes in them could affect our profitability.

We face competition from companies having greater financial resources, broader arrays of products, higher ratings and stronger financial performance, which may impair our ability to retain existing customers, attract new customers and maintain our profitability and financial strength.

Our business is highly dependent on our relationships with Farm Bureau organizations and would be adversely affected if those relationships became impaired.

We assumed a significant amount of closed block business through coinsurance agreements and have only a limited ability to manage this business.

Our reinsurance program involves risks because we remain liable with respect to liabilities ceded to reinsurers if the reinsurers fail to meet the obligations assumed by them.

We may experience volatility in net income due to accounting standards for derivatives.

- We face risks relating to litigation, including the costs of such litigation, management distraction and the potential for damage awards, which may adversely impact our business.

See Part 1A, Risk Factors, of our annual report on Form 10-K for additional information.

FBL FINANCIAL GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
June 30, 2007

1. Significant Accounting Policies

Basis of Presentation

The accompanying unaudited consolidated financial statements of FBL Financial Group, Inc. (we or the Company) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. Our financial statements include all adjustments (consisting of normal recurring accruals) necessary for a fair presentation of our financial position and results of operations. Operating results for the three- and six-month periods ended June 30, 2007 are not necessarily indicative of the results that may be expected for the year ending December 31, 2007. We encourage you to refer to our consolidated financial statements and notes for the year ended December 31, 2006 included in our annual report on Form 10-K for a complete description of our material accounting policies. Also included in the Form 10-K is a description of areas of judgments and estimates and other information necessary to understand our financial position and results of operations.

Accounting Changes

Effective April 1, 2007, we adopted Statement of Financial Accounting Standards (Statement) 133 Implementation Issue No. G26, Cash Flow Hedges: Hedging Interest Cash Flows on Variable-Rate Assets and Liabilities That Are Not Based on a Benchmark Interest Rate, (DIG G26) which clarifies the accounting for a cash flow hedge of a variable-rate asset or liability, specifically addressing when an entity is permitted to hedge benchmark interest rate risk. DIG G26 indicates that the risk being hedged in a cash flow hedge of a variable-rate financial asset or liability cannot be designated as interest rate risk unless the cash flows of the hedged transaction are explicitly based on that same benchmark interest rate. In addition, DIG G26 clarifies that the only permitted benchmarks are the risk-free rate and rates based on the LIBOR swap curve. Hedging relationships that no longer qualify for cash flow hedge accounting based on this guidance must be undesignated prospectively. Changes in fair value of derivatives not subsequently re-designated to a new qualifying hedging relationship are recorded in earnings. Gains or losses previously included in accumulated other comprehensive income remain in accumulated other comprehensive income and are amortized to net income over the remaining term of the swaps as the hedged anticipated cash flows occur. If it becomes probable that the anticipated cash flows will not occur, the deferred gains or losses will be reclassified into earnings immediately. As a result of adopting DIG G26, we undesignated the hedging relationship for the interest rate swaps related to our flexible premium deferred annuity contracts as they are not explicitly based on one of the two permitted benchmarks. Net unrealized gains on these swaps included in accumulated other comprehensive income totaled $2.8 million at March 31, 2007 and are being amortized into income over the life of the individual swaps. Derivative income (loss) includes the change in fair value of these derivatives, which totaled $1.6 million for the second quarter of 2007. Amortization of the net unrealized gain totaled $0.7 million for the three-month period. This guidance does not impact the interest rate swap on our line of credit, as both the derivative instrument and hedged item are based on the three-month LIBOR rate.

Effective January 1, 2007, we adopted Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes. Interpretation No. 48 creates a single model to address uncertainty in tax positions and clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. Under the Interpretation, a tax position can be recognized in the financial statements if it is more likely than not that the position will be sustained upon examination by taxing authorities who have full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon settlement. Interpretation No. 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The impact of adopting Interpretation No. 48 was not material to our consolidated financial statements; therefore the cumulative effective of change in this accounting principle, totaling $0.3 million, is reflected as an increase to income tax expense in our 2007

consolidated income statement. We recognize interest accrued related to unrecognized tax

benefits in interest expense and penalties in other expenses. We are no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years prior to 2001.
Effective January 1, 2007, we adopted Statement of Position (SOP) 05-1, Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts issued by the Accounting Standards Executive Committee of the American Institute of Certified Public Accountants. The SOP provides guidance on the accounting for internal replacements of one insurance contract for another insurance contract. Under the SOP, an internal replacement that is determined to result in a replacement contract that is substantially changed from the replaced contract is accounted for as an extinguishment of the replaced contract. As an extinguishment, the unamortized deferred policy acquisition costs, deferred sales inducements, value of insurance in force acquired and unearned revenue reserve from the replaced contract are written off at the time of the extinguishment. An internal replacement that is determined to result in a replacement contract that is substantially unchanged from the replaced contract is accounted for as a continuation of the replaced contract. The impact of adopting SOP 05-1 was not material to our consolidated financial statements for the six months ended June 30, 2007 (estimated to be less than $0.1 million) as our previous accounting policy for internal replacements substantially conformed to current interpretations of the guidance in the SOP**.**
In April 2007, the FASB issued Staff Position FIN 39-1 (FSP FIN 39-1), which amends certain aspects of FASB Interpretation No. 39, Offsetting of Amounts Related to Certain Contracts an interpretation of APB Opinion No. 10 and FASB Statement No. 105. This FSP allows a reporting entity to offset fair value amounts recognized for the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) against fair value amounts recognized for derivative instruments executed with the same counterparty under the same master netting arrangement. The guidance in this FSP is effective for fiscal years beginning after November 15, 2007, with early application permitted. We intend to adopt FSP FIN 39-1 beginning in 2008. This FSP will have no impact on our consolidated statements of income. We have not yet determined the impact of adoption on our consolidated balance sheets. Net cash collateral at June 30, 2007 totaled $104.6 million.
In February 2007, the FASB issued Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, which permits certain financial assets and liabilities to be measured at fair value, with changes in fair value reported in earnings. This election is allowed on an instrument-by-instrument basis and requires additional reporting disclosures. This Statement is effective for fiscal years beginning after November 15, 2007. Early adoption is allowed provided the provisions of Statement No. 157 are also adopted. We are currently evaluating the requirements of this Statement and have not yet concluded if the fair value option will be adopted.
In September 2006, the FASB issued Statement No. 157, Fair Value Measurements, which defines fair value, establishes a framework for measuring fair value and expands the required disclosures about fair value measurements. This Statement is effective for fiscal years beginning after November 15, 2007. The impact of adoption is not expected to be material to our consolidated financial statements.
In September 2006, the FASB issued Statement No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R). While certain aspects of this Statement were adopted effective December 31, 2006, as described in our 2006 Form 10-K, the Statement also requires measurement of a plan s assets and benefit obligations as of the end of the employer s fiscal year, beginning with fiscal years ending after December 15, 2008. The impact of adopting this aspect of the Statement is not expected to be material to our consolidated financial statements.

Reclassifications

Certain amounts in the 2006 consolidated financial statements have been reclassified to conform to the 2007 financial statement presentation.

2. Credit Arrangements

On March 12, 2007, we issued $100.0 million of 5.875% Senior Notes (Senior Notes) due March 15, 2017. Interest on the Senior Notes will be paid semi-annually beginning September 15, 2007. The Senior Notes are redeemable in

whole or in part at any time at our option at a make-whole redemption price equal to the greater of 100% of their principal amount or the sum of the present values of the remaining scheduled payments of principal and interest on the Senior Notes, discounted to the redemption date on a semiannual basis at the treasury rate plus 20 basis points. We received net proceeds of approximately $98.5 million from the issuance of the Senior Notes after underwriting fees, offering expenses and original issue discount.

The Senior Notes offering would have caused us to violate the covenants of our revolving line of credit agreement with LaSalle Bank National Association and Bankers Trust Company, N.A. Therefore, on March 12, 2007, this agreement was amended to allow for the Senior Notes offering without violating the financial covenants of that agreement.

3. Defined Benefit Plans

We participate with several affiliates and an unaffiliated organization in various multiemployer defined benefit plans. Our share of net periodic pension cost for the plans recorded in our consolidated income statements for the second quarter totaled $1.5 million for 2007 and $1.6 million for 2006, and for the six months ended June 30 totaled $3.0 million for 2007 and $3.2 million for 2006. Components of net periodic pension cost for all employers in the multiemployer plans are as follows:

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Service cost	$ 2,341	$ 2,396	$ 4,682	$ 4,792
Interest cost	3,476	3,428	6,951	6,856
Expected return on assets	(3,087)	(2,746)	(6,174)	(5,492)
Amortization of prior service cost	193	201	387	402
Amortization of actuarial loss	1,119	1,398	2,239	2,796
Net periodic pension cost all employers	$ 4,042	$ 4,677	$ 8,085	$ 9,354

4. Commitments and Contingencies

In the normal course of business, we may be involved in litigation where amounts are alleged that are substantially in excess of contractual policy benefits or certain other agreements. At June 30, 2007, management is not aware of any claims for which a material loss is reasonably possible.

We seek to limit our exposure to loss on any single insured or event and to recover a portion of benefits paid by ceding a portion of our exposure to other insurance enterprises or reinsurers. Reinsurance contracts do not relieve us of our obligations to policyholders. To the extent that reinsuring companies are later unable to meet obligations under reinsurance agreements, our insurance subsidiaries would be liable for these obligations, and payment of these obligations could result in losses. To limit the possibility of such losses, we evaluate the financial condition of our reinsurers and monitor concentrations of credit risk. No allowance for uncollectible amounts has been established against our asset for reinsurance recoverable since none of our receivables are deemed to be uncollectible.

We participate in a reinsurance pool with various unaffiliated life insurance companies to mitigate the impact of a catastrophic event on our financial position and results of operations. Members of the pool share in the eligible catastrophic losses based on their size and contribution to the pool. Under the pool arrangement, we will be able to cede approximately 60% of catastrophic losses after other reinsurance and a deductible of $0.8 million. Pool losses are capped at $11.7 million per event and the maximum loss we could incur as a result of losses assumed from other pool members is $4.2 million per event.

We self-insure our employee health and dental claims. However, claims in excess of self-insurance levels are fully insured. We fund insurance claims through a self-insurance trust. Deposits to the trust are made at an amount equal to our best estimate of claims incurred during the period. Accordingly, no accruals are recorded on our financial

statements for unpaid claims and claims incurred but not reported. Adjustments, if any, resulting in changes in the estimate of claims incurred will be reflected in operations in the periods in which such adjustments are known.

In the second quarter of 2006, we incurred a pre-tax charge of $4.9 million relating to the settlement of a lawsuit with a husband and wife who had applied for life insurance policies. The settlement ended litigation regarding the process we followed in denying insurance coverage for medical reasons. Insurance claims have been filed under our professional liability and general liability insurance policies for reimbursement of the settlement amount, but coverage has been denied, and we have filed a claim against an insurance broker for breach of contractual duties. We have filed lawsuits against the insurer and the insurance broker to recover damages. While we have received an adverse ruling in the case against the insurer at the district court level, the adverse ruling has been appealed and we continue to believe both claims are valid. Recoveries from third parties are required to be accounted for as gain contingencies and not recorded in our financial statements until the lawsuits are resolved. Accordingly, any recoveries will be recorded in net income in the period the recovery is received.

5. Earnings Per Share

The following table sets forth the computation of earnings per common share and earnings per common share assuming dilution.

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands, except per share data)			
Numerator:				
Net income	$ 33,846	$ 17,702	$ 57,957	$ 45,436
Dividends on Series B preferred stock	(37)	(37)	(75)	(75)
Numerator for earnings per common share income available to common stockholders	$ 33,809	$ 17,665	$ 57,882	$ 45,361
Denominator:				
Weighted average shares	29,621,284	29,336,234	29,582,618	29,261,679
Deferred common stock units relating to deferred compensation plans	60,370	45,697	58,420	43,537
Denominator for earnings per common share weighted-average shares	29,681,654	29,381,931	29,641,038	29,305,216
Effect of dilutive securities stock-based compensation	603,538	473,666	626,403	505,343
Denominator for diluted earnings per common share adjusted weighted-average shares	30,285,192	29,855,597	30,267,441	29,810,559
Earnings per common share	$ 1.14	$ 0.60	$ 1.95	$ 1.55
Earnings per common share assuming dilution	$ 1.12	$ 0.59	$ 1.91	$ 1.52

6. Segment Information

We analyze operations by reviewing financial information regarding products that are aggregated into four product segments. The product segments are: (1) Traditional Annuity Exclusive Distribution (Exclusive Annuity), (2) Traditional Annuity Independent Distribution (Independent Annuity), (3) Traditional and Universal Life Insurance and (4) Variable. We also have various support operations and corporate capital that are aggregated into a Corporate and Other segment.

We analyze our segment results based on pre-tax operating income (loss). Accordingly, income taxes are not allocated to the segments. In addition, operating results are generally reported net of any transactions between the segments. Operating income (loss) represents net income excluding, as applicable, the impact of:

- realized and unrealized gains and losses on investments,
- changes in net unrealized gains and losses on derivatives,
- the cumulative effect of changes in accounting principles,
- a nonrecurring lawsuit settlement and
- discontinued operations.

We use operating income, in addition to net income, to measure our performance since realized and unrealized gains and losses on investments and the change in net unrealized gains and losses on derivatives can fluctuate greatly from quarter to quarter. Also, the cumulative effect of changes in accounting principles, discontinued operations and the lawsuit settlement in 2006 are nonrecurring items. These fluctuations make it difficult to analyze core operating trends. In addition, for derivatives not designated as hedges, there is a mismatch between the valuation of the asset and liability when deriving net income. Specifically, call options relating to our index business are one or two-year assets while the embedded derivative in the index contracts represents the rights of the contract holder to receive index credits over the entire period the index annuities are expected to be in force. For our other embedded derivatives in the product segments, the embedded derivatives are marked to market, but the associated insurance liabilities are not marked to market. A view of our operating performance without the impact of these mismatches and nonrecurring items enhances the analysis of our results. We use operating income for goal setting, determining company-wide bonuses and evaluating performance on a basis comparable to that used by many in the investment community.

Table of Contents

FBL Financial Group, Inc. June 30, 2007

Financial information concerning our operating segments is as follows:

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Operating revenues:				
Traditional Annuity Exclusive Distribution	$ 38,251	$ 35,960	$ 75,389	$ 72,053
Traditional Annuity Independent Distribution	94,376	57,487	165,549	102,750
Traditional and Universal Life Insurance	87,392	83,236	169,095	163,398
Variable	15,762	14,932	32,123	29,194
Corporate and Other	9,297	8,062	17,490	14,938
	245,078	199,677	459,646	382,333
Realized/unrealized gains on investments (A)	1,156	222	2,612	11,827
Change in net unrealized gains/losses on derivatives (A)	27,681	(24,703)	27,817	(2,897)
Consolidated revenues	$ 273,915	$ 175,196	$ 490,075	$ 391,263
Pre-tax operating income (loss):				
Traditional Annuity Exclusive Distribution	$ 8,458	$ 7,857	$ 17,575	$ 16,630
Traditional Annuity Independent Distribution	8,475	7,011	19,634	12,943
Traditional and Universal Life Insurance	16,217	15,673	27,611	26,623
Variable	3,773	454	6,031	3,270
Corporate and Other	(869)	(440)	(1,609)	(2,311)
	36,054	30,555	69,242	57,155
Income taxes on operating income	(11,851)	(10,244)	(22,942)	(19,258)
Realized/unrealized gains on investments, net (A)	1,365	88	2,319	7,781
Change in net unrealized gains/losses on derivatives (A)	8,278	475	9,621	2,930
Cumulative effect of change in accounting principle			(283)	
Lawsuit settlement (A)		(3,172)		(3,172)
Consolidated net income	$ 33,846	$ 17,702	$ 57,957	$ 45,436

(A) Amounts are net of adjustments, as applicable, to amortization of unearned revenue reserves, deferred policy

acquisition costs, deferred sales inducements, value of insurance in force acquired and income taxes attributable to these items.

Our investment in equity method investees, the related equity income and interest expense are attributable to the Corporate and Other segment. Expenditures for long-lived assets were not significant during the periods presented above. Goodwill at June 30, 2007 and December 31, 2006 is allocated among the segments as follows: Exclusive Annuity ($3.9 million), Traditional and Universal Life Insurance ($6.1 million) and Variable ($1.2 million).

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section includes a summary of FBL Financial Group, Inc. s consolidated results of operations, financial condition and where appropriate, factors that management believes may affect future performance. Unless noted otherwise, all references to FBL Financial Group, Inc. (we or the Company) include all of its direct and indirect subsidiaries, including its primary life insurance subsidiaries, Farm Bureau Life Insurance Company (Farm Bureau Life) and EquiTrust Life Insurance Company (EquiTrust Life) (collectively, the Life Companies). Please read this discussion in conjunction with the accompanying consolidated financial statements and related notes. In addition, we encourage you to refer to our 2006 Form 10-K for a complete description of our significant accounting policies and estimates. Familiarity with this information is important in understanding our financial position and results of operations.

Results of Operations for the Three and Six Months Ended June 30, 2007 Compared to Three and Six Months Ended June 30, 2006

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands, except per share data)			
Revenues	$ 273,915	$ 175,196	$ 490,075	$ 391,263
Benefits and expenses	223,323	149,027	403,330	323,104
	50,592	26,169	86,745	68,159
Income taxes	(16,940)	(8,684)	(29,347)	(23,065)
Minority interest and equity income	194	217	559	342
Net income	33,846	17,702	57,957	45,436
Less dividends on Series B preferred stock	(37)	(37)	(75)	(75)
Net income applicable to common stock	$ 33,809	$ 17,665	$ 57,882	$ 45,361
Earnings per common share	$ 1.14	$ 0.60	$ 1.95	$ 1.55
Earnings per common share assuming dilution	$ 1.12	$ 0.59	$ 1.91	$ 1.52
Other data				
Direct premiums collected, net of reinsurance ceded:				
Traditional Annuity Exclusive Distribution	$ 36,616	$ 37,432	$ 72,079	$ 79,312
Traditional Annuity Independent Distribution	279,352	441,713	575,412	718,916
Traditional and Universal Life Insurance	48,090	45,273	93,927	89,573
Variable Annuity and Variable Universal Life (1)	49,707	43,181	92,490	85,017

Reinsurance assumed and other	4,840	4,652	8,425	9,141
Total	$ 418,605	$ 572,251	$ 842,333	$ 981,959
Direct life insurance in force, end of quarter (in millions)			$ 39,724	$ 37,131
Life insurance lapse rates			6.0%	6.7%
Withdrawal rates individual traditional annuity:				
Exclusive Distribution			5.9%	5.8%
Independent Distribution			5.3%	5.0%

(1) Amounts are net of portion ceded to and include amounts assumed from alliance partners.

Premiums collected is not a measure used in financial statements prepared according to U.S. generally accepted accounting principles (GAAP). There is no comparable GAAP financial measure. We use premiums collected to measure the productivity of our exclusive and independent agents. Direct Traditional Annuity Independent Distribution premiums collected decreased for the 2007 periods as expected, reflecting the unusually high level of fixed rate annuity sales in 2006 as well as actions we took in 2007 to further increase the profitability of the products sold by our EquiTrust Life independent distribution channel.

Net income applicable to common stock increased 91.4% in the second quarter of 2007 to $33.8 million and increased 27.6% in the six months ended June 30, 2007 to $57.9 million. These increases are primarily due to net unrealized gains on derivatives, increases in net investment income and the volume of business in force and a decrease in other underwriting expenses. For the six-month periods these increases were partially offset by a decrease in realized/unrealized gains on investments. The increase in volume of business in force is quantified in the detailed discussion that follows by summarizing the face amount of insurance in force for life products or account values of contracts in force for interest sensitive products. The face amount of life insurance in force represents the gross death benefit payable to policyholders and account value represents the value of the contract to the contract holder before application of surrender charges or reduction for any policy loans outstanding.

The spreads earned on our universal life and individual traditional annuity products are as follows:

	Six months ended June 30,	
	2007	**2006**
Weighted average yield on cash and invested assets	6.10%	6.04%
Weighted average interest crediting rate/index cost	3.70	3.52
Spread	2.40%	2.52%

The weighted average yield on cash and invested assets represents the yield on cash and investments backing the universal life and individual traditional annuity products net of investment expenses. With respect to our index annuities, index costs represent the expenses we incur to fund the annual index credits through the purchase of options and minimum guaranteed interest credited on the index business. The weighted average crediting rate/index cost and spread are computed excluding the impact of the amortization of deferred sales inducements. See the Segment Information section that follows for a discussion of our spreads.

Premiums and product charges are as follows:

	Three months ended June 30,		Six months ended June 30,	
	2007	**2006**	**2007**	**2006**
	(Dollars in thousands)			
Premiums and product charges:				
Interest sensitive and index product charges	$ 27,930	$ 26,495	$ 54,916	$ 51,809
Traditional life insurance premiums	38,975	35,773	73,512	70,161
Total	$ 66,905	$ 62,268	$ 128,428	$ 121,970

Premiums and product charges increased 7.4% in the second quarter of 2007 to $66.9 million and 5.3% in the six months ended June 30, 2007 to $128.4 million. The increases in interest sensitive and index product charges are principally driven by surrender charges on annuity and universal life products, cost of insurance charges on variable universal life and universal life products and mortality and expense fees on variable products.

Surrender charges totaled $10.5 million in the six-month period ended June 30, 2007 compared to $8.8 million in the 2006 period. Surrender charges increased primarily due to an increase in surrenders relating to growth in the volume and aging of business in force. The average aggregate account value for annuity and universal life insurance in force, which increased due to premiums collected as summarized in the Other data table above, totaled $7,972.6 million for the six-month period in 2007 and $6,343.5 million for the 2006 period. We believe aging of the business in force is driving a portion of the increase in surrender charges relating to our annuity business as the surrender

charge rate decreases with the passage of time (at a rate generally equal to 1.0% per year). This makes a surrender later in the contract period more economical for the contract holder, which results in higher lapse rates as the business ages. We started assuming business under a coinsurance agreement with American Equity Investment Life Insurance Company in 2001 and started selling annuities directly through EquiTrust Life independent agents in the fourth quarter of 2003. Surrender charges on this coinsurance and direct business totaled $8.9 million for the six months ended June 30, 2007 and $7.3 million for the 2006 period.
Cost of insurance charges totaled $32.3 million in the six months ended June 30, 2007 and $31.7 million in the 2006 period. Cost of insurance charges increased primarily due to aging of the business in force as the cost of insurance charge rate per each $1,000 in force increases with the age of the insured. The average age of our universal life and variable universal life policyholders was 45.3 years at June 30, 2007 and 44.9 years at June 30, 2006.
Mortality and expense fees totaled $4.8 million in the six-month period ended June 30, 2007 and $3.9 million in the 2006 period. Mortality and expense fees increased due to an increase in the separate account balances on which fees are based. The average separate account balance increased to $795.9 million for the six-month period in 2007 from $669.4 million for the six-month period in 2006 due to the impact of new sales and favorable investment results. Transfers of premiums to the separate accounts totaled $73.7 million for the six months ended June 30, 2007 and $68.3 million for the 2006 period. Net investment income and net realized and unrealized gains on separate account assets totaled $53.5 million in the six-month period of 2007 and $16.2 million in the 2006 period.
Traditional premiums increased due to an increase in the volume of business in force, partially offset by an increase in reinsurance ceded. The increase in the business in force is primarily attributable to sales of traditional life products by our Farm Bureau Life agency force exceeding the loss of in force amounts through deaths, lapses and surrenders. Our average aggregate traditional life insurance in force, net of reinsurance ceded, totaled $19,544.2 million for the six-month period in 2007 and $17,883.0 million for the six-month period in 2006. The change in life insurance in force is not proportional to the change in premium income due to a shift in the composition of our traditional life block of business from whole life policies to term policies. The premium for a term policy per $1,000 face amount is less than that for a whole life policy.
Net investment income, which excludes investment income on separate account assets relating to variable products, increased 19.9% in the second quarter of 2007 to $154.6 million and 21.2% in the six months ended June 30, 2007 to $304.5 million, primarily due to an increase in average invested assets. Average invested assets in the six-month period of 2007 increased 19.8% to $10,036.8 million (based on securities at amortized cost) from $8,375.7 million in the 2006 period, principally due to net premium inflows from the Life Companies and proceeds from issuance of Senior Notes in March 2007. The annualized yield earned on average invested assets increased to 6.16% in the six months ended June 30, 2007 from 6.09% in the respective 2006 period. Fee income from bond calls, tender offers and mortgage loan prepayments totaled $6.6 million in the six months ended June 30, 2007 compared to $2.7 million in the respective 2006 period. Net investment income also includes ($1.0) million for the six-month periods in 2007 and ($1.1) million in 2006, representing the reversal of net discount accretion on mortgage and asset-backed securities resulting from changing prepayment speed assumptions as of the end of each respective period. See the Financial Condition Investments section that follows for a description of how changes in prepayment speeds impact net investment income.

Derivative income (loss) is as follows:

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Derivative income (loss):				
Components of derivative income (loss) from call options:				
Gains received at expiration	$ 41,459	$ 19,193	$ 62,033	$ 29,155
Change in the difference between fair value and remaining option cost at beginning and end of period	25,826	(24,313)	25,099	(2,424)
Cost of money for call options	(25,640)	(17,095)	(49,446)	(32,035)
	41,645	(22,215)	37,686	(5,304)
Other	3,181	(216)	3,263	(295)
Total	$ 44,826	$ (22,431)	$ 40,949	$ (5,599)

The increase in gains received at expiration is attributable to growth in the volume of index annuities in force and appreciation in the market indices on which our options are based. The average aggregate account value of index annuities in force, which has increased due to new sales, totaled $3,896.5 million for the six months ended June 30, 2007 compared to $2,954.6 million for the respective 2006 period. The changes in the difference between the fair value of the call options and the remaining option costs are caused primarily by the change in the S&P 500 Index® (upon which the majority of our options are based). The range of index appreciation for S&P 500 Index options for the period ended June 30 is as follows:

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
Annual point-to-point strategy	5.9%-24.4%	2.6%-15.0%	5.9%-24.4%	2.6%-15.0%
Monthly point-to-point strategy	5.6%-16.1%	0.0%-10.1%	4.4%-16.1%	0.0%-10.1%
Monthly average strategy one-year options	3.4%-14.1%	3.4%-9.1%	1.2%-14.1%	0.9%-9.1%
Monthly average strategy two-year options	9.5%-14.6%		9.3%-14.6%	
Daily average strategy	3.2%-10.9%	3.2%-8.7%	2.1%-10.9%	0.7%-8.7%

The change in fair value is also reduced by participation rates and caps, as applicable, on the underlying options. Furthermore, the change in fair value is impacted by options based on other underlying indices and the timing of option settlements. The cost of money for call options increased primarily due to the impact of growth in the volume of index annuities in force. Other derivative income (loss) is comprised of changes in the value of the conversion feature embedded in convertible fixed maturity securities and the embedded derivative included in our modified coinsurance contracts. In addition, beginning in the second quarter of 2007, other derivative income (loss) includes the change in fair value of the interest rate swaps related to our flexible premium deferred annuity contracts due to the adoption of Statement 133 Implementation Issue No. G26, Cash Flow Hedges: Hedging Interest Cash Flows on Variable Rate Assets and Liabilities That Are Not Based on a Benchmark Interest Rate. See Accounting Changes for additional details on this Issue. Derivative income (loss) will fluctuate based on market conditions.

Realized/unrealized gains on investments are as follows:

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Realized/unrealized gains (losses) on investments:				
Realized gains on sales	$ 3,571	$ 238	$ 5,015	$ 14,227
Realized losses on sales	(2)	(8)	(40)	(11)
Realized losses due to impairments	(2,436)		(2,436)	(2,340)
Unrealized gains (losses) on trading securities	23	(8)	73	(50)
Total	$ 1,156	$ 222	$ 2,612	$ 11,826

18

The level of realized/unrealized gains (losses) is subject to fluctuation from period to period depending on the prevailing interest rate and economic environment and the timing of the sale of investments. See Financial Condition Investments for details regarding our unrealized gains and losses on available-for-sale securities at June 30, 2007 and December 31, 2006. Gains on sales in the six-month period include $4.9 million in 2007 and $13.5 million in 2006 related to sales of a portion of our investment in American Equity Investment Life Holding Company (AEL) common stock.

We monitor the financial condition and operations of the issuers of securities rated below investment grade and of the issuers of certain investment grade securities on which we have concerns regarding credit quality. In determining whether or not an unrealized loss is other than temporary, we review factors such as:

- historical operating trends;
- business prospects;
- status of the industry in which the company operates;
- analyst ratings on the issuer and sector;
- quality of management;
- size of the unrealized loss;
- length of time the security has been in an unrealized loss position; and
- our intent and ability to hold the security.

If we determine that an unrealized loss is other than temporary, the security is written down to its fair value with the difference between amortized cost and fair value recognized as a realized loss. Details regarding investment impairments individually exceeding $0.5 million, for the six months ended June 30, 2007 and 2006, including the circumstances requiring the write downs, are summarized in the following table:

General Description	Impairment Loss (Dollars in thousands)	Circumstance
Six months ended June 30, 2007:		
Major printing and publishing company	$ 1,624	During the second quarter, the company announced that it would take the company private in a series of transactions tendering outstanding shares. In addition, rating declines and other adverse details regarding the financial status of the company became available. (A)
United States Military Base housing revenue bond	$ 812	During the second quarter, closed one military base

		leading to a restructuring and tender offer for the bonds. (A)
Six months ended June 30, 2006:		
Major United States credit company	$ 986	Valuation of this security is tied to the strength of its parent. During the first quarter, continued rating declines and other adverse details regarding the financial status of the parent company became available. (A)
Major United States automaker	$ 648	During the first quarter, continued rating declines and other adverse details regarding the financial status of the company became available. In addition, the company faces labor strikes and restated its financial statements during the quarter. (A)
Major United States automaker	$ 643	During the first quarter, continued rating declines and other adverse details regarding the financial status of the company became available. (A)

(A) Negative trends in this segment of the industry were considered in our analysis, which is done on an issue-by-issue basis. We concluded that there is no impact on other material investments in addition to amounts already written down.

Other income and **other expenses** include revenues and expenses, respectively, relating primarily to our non-insurance operations. Our non-insurance operations include management, advisory, marketing and distribution services and leasing activities. Fluctuations in these financial statement line items are generally attributable to fluctuations in the level of these services provided during the periods.

Interest sensitive and index product benefits are as follows:

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Interest sensitive and index product benefits:				
Interest credited	$ 58,307	$ 47,977	$ 116,402	$ 96,018
Index credits	41,038	20,625	61,344	30,494
Change in value of embedded derivative	276	(29,449)	(3,767)	(17,507)
Amortization of deferred sales inducements	11,301	6,312	16,199	12,775
Interest sensitive death benefits	9,923	9,213	21,455	19,600
Total	$ 120,845	$ 54,678	$ 211,633	$ 141,380

Interest sensitive and index product benefits increased 121.0% in the second quarter of 2007 to $120.8 million, and increased 49.7% in the six months ended June 30, 2007 to $211.6 million. These increases were primarily due to the impact of an increase in the volume of annuity business in force, the impact of market appreciation on the indices backing the index annuities and interest sensitive death benefits. Interest sensitive and index product benefits tend to fluctuate from period to period primarily as a result of changes in mortality experience and the impact of changes in the equity markets on index credits and the value of the embedded derivatives in our index annuities.

The average aggregate account value of annuity contracts in force, which increased due to additional premiums collected as summarized in the Other data table above, totaled $7,081.6 million for the six-month period in 2007 and $5,452.8 million for the 2006 period. These account values include values relating to index contracts in the second quarter totaling $3,896.5 million for 2007 and $2,954.6 million for 2006.

The weighted average interest crediting rate/index cost for universal life and individual traditional annuity products, excluding the impact of the amortization of deferred sales inducements, was 3.70% for the six-month period of 2007 and 3.52% for the respective 2006 period.

The change in the amount of index credits is impacted by growth in the volume of index annuities in force and the amount of appreciation/depreciation in the underlying equity market indices on which our options are based as discussed above under Derivative income (loss). The change in the value of the embedded derivative is impacted by the change in expected index credits on the next policy anniversary dates, which is related to the change in the fair value of the options acquired to fund these index credits as discussed above under Derivative income (loss). The value of the embedded derivative is also impacted by the timing of the posting of index credits and changes in reserve discount rates and assumptions used in estimating future call option costs.

The increases in amortization of deferred sales inducements are primarily due to additional capitalization of costs incurred with new sales, profitability in the underlying business and the impact of changes in unrealized gains and losses on derivatives. Deferred sales inducements on interest sensitive and index products totaled $279.1 million at June 30, 2007 and $188.3 million at June 30, 2006. The change in unrealized gains and losses on derivatives increased amortization by $6.8 million in the six-month period of 2007 and $4.9 million in the 2006 period. In addition, changes in assumptions (unlocking) used to calculate amortization of deferred sales inducements decreased amortization $1.1 million for the six-month period of 2007 and $0.1 million for the 2006 period. The impact of unlocking in 2007 is primarily due to decreasing lapse assumptions in the models for our direct index annuity business.

Table of Contents

FBL Financial Group, Inc. June 30, 2007

Traditional life insurance benefits are as follows:

	Three months ended June 30,		Six months ended June 30,	
	2007	**2006**	**2007**	**2006**
	(Dollars in thousands)			
Traditional life insurance policy benefits:				
Traditional life insurance benefits	$ 23,411	$ 22,523	$ 48,081	$ 45,130
Increase in traditional life future policy benefits	11,693	10,441	19,229	19,305
Distributions to participating policyholders	5,656	5,794	11,248	11,445
Total	$ 40,760	$ 38,758	$ 78,558	$ 75,880

Traditional life insurance benefits increased 5.2% in the second quarter of 2007 to $40.8 million and increased 3.5% in the six months ended June 30, 2007 to $78.6 million primarily due to an increase in traditional life insurance surrender benefits and the impact of an increase in the volume of traditional life business in force, partially offset by a decrease in death benefits. Surrender benefits increased 27.3% to $10.1 million in the second quarter of 2007 and 26.3% to $19.8 million for the six-month period while death benefits decreased 10.5% to $12.0 million for the quarter and 6.1% to $25.7 million for the six-month period. The change in traditional life future policy benefits may not be proportional to the change in traditional premiums and benefits as reserves on term policies are generally less than reserves on whole life policies. Traditional life insurance benefits can fluctuate from period to period primarily as a result of changes in mortality experience.

Underwriting, acquisition and insurance expenses are as follows:

	Three months ended June 30,		Six months ended June 30,	
	2007	**2006**	**2007**	**2006**
	(Dollars in thousands)			
Underwriting, acquisition and insurance expenses:				
Commission expense, net of deferrals	$ 3,648	$ 3,474	$ 7,054	$ 6,992
Amortization of deferred policy acquisition costs	28,897	20,401	48,581	39,170
Amortization of value of insurance in force acquired	1,090	691	2,002	1,094
Other underwriting, acquisition and insurance expenses, net of deferrals	17,899	22,580	36,007	41,685
Total	$ 51,534	$ 47,146	$ 93,644	$ 88,941

Underwriting, acquisition and insurance expenses increased 9.3% for the second quarter of 2007 to $51.5 million and 5.3% for the six months ended June 30, 2007 to $93.6 million. Amortization of deferred policy acquisition costs increased for the 2007 periods primarily due an increase in the profitability and volume of business in force resulting from new sales from our EquiTrust Life distribution channel and the impact of unrealized gains on derivative instruments, which increased amortization $10.0 million in the six-month period of 2007 and $5.3 million in the 2006 period. The increase for the six-month period was partially offset by the impact of the unlocking adjustments which decreased amortization $1.5 million in 2007 compared to an increase in amortization of less than $0.1 million in 2006. The changes for assumptions used to calculate deferred policy acquisition costs in 2007 are similar to those made for deferred sales inducements as discussed under Interest sensitive and index product benefits above.

Amortization of value of insurance in force acquired increased $0.4 million in the second quarter of 2007 and $0.9 million for the six months ended June 30, 2007 primarily due to increased profitability on the underlying business. The decreases in other underwriting, acquisition and insurance expenses are primarily due to a $4.9 million lawsuit settlement in the second quarter of 2006. See Note 4 of our notes to the consolidated financial statements for further details regarding this settlement and a related unrecorded gain contingency.

Interest expense increased 56.7% to $4.5 million in the second quarter of 2007 and 33.6% to $7.8 million for the six months ended June 30, 2007, due to an increase in our long-term debt. The average debt outstanding increased to $276.1 million for the six months ended June 30, 2007, compared to $218.4 million for the 2006 period due to the issuance of Senior Notes in March 2007.

Income taxes increased 95.1% in the second quarter of 2007 to $16.9 million and 27.2% for the six months ended June 30, 2007 to $29.3 million. The effective tax rate was 33.5% for the second quarter of 2007 and 33.2 % for the 2006 period. The effective tax rate was 33.8% for the six months ended June 30, 2007 and 2006. The effective tax rates were lower than the federal statutory rate of 35% primarily due to tax-exempt interest and tax-exempt dividend income.

Equity income net of related income taxes totaled $0.2 million for the second quarter of 2007 and $0.3 million in the 2006 period, and $0.6 million for the six months ended June 30, 2007 and $0.5 million in the 2006 period. Equity income includes our proportionate share of gains and losses attributable to our ownership interest in partnerships, joint ventures and certain companies where we exhibit some control but have a minority ownership interest. Given the timing of availability of financial information from our equity investees, we will consistently use information that is as much as three months in arrears for certain of these entities. Several of these entities are investment companies whose operating results are derived primarily from unrealized and realized gains and losses generated by their investment portfolios. As is normal with these types of entities, the level of these gains and losses is subject to fluctuation from period to period depending on the prevailing economic environment, changes in prices of equity securities held by the investment partnerships, timing and success of initial public offerings and other exit strategies, and the timing of the sale of investments held by the partnerships and joint ventures.

Segment Information

We analyze operations by reviewing financial information regarding products that are aggregated into four product segments. The product segments are: (1) Traditional Annuity Exclusive Distribution (Exclusive Annuity), (2) Traditional Annuity Independent Distribution (Independent Annuity), (3) Traditional and Universal Life Insurance and (4) Variable. We also have various support operations and corporate capital that are aggregated into a Corporate and Other segment.

We analyze our segment results based on pre-tax operating income (loss). Accordingly, income taxes are not allocated to the segments. In addition, operating results are generally reported net of any transactions between the segments. Operating income (loss) represents net income excluding, as applicable, the after tax impact of:

- realized and unrealized gains and losses on investments,
- changes in net unrealized gains and losses on derivatives,
- the cumulative effect of changes in accounting principles,
- a nonrecurring lawsuit settlement and
- discontinued operations.

The impact of realized and unrealized gains and losses on investments and unrealized gains and losses on derivatives also includes adjustments and that portion of amortization of deferred policy acquisition costs, deferred sales inducements, unearned revenue reserve and value of insurance in force acquired attributable to such gains or losses. Our rationale for using operating income, in addition to net income, to measure our performance is summarized in Note 6, Segment Information, to the consolidated financial statements.

FBL Financial Group, Inc. June 30, 2007

A reconciliation of net income to pre-tax operating income and a summary of pre-tax operating income (loss) by segment follow:

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Net income	$ 33,846	$ 17,702	$ 57,957	$ 45,436
Realized/unrealized gains on investments	(1,156)	(222)	(2,612)	(11,826)
Change in net unrealized gains/losses on derivatives	(27,417)	(4,745)	(31,597)	(14,610)
Change in amortization of:				
Deferred policy acquisition costs	8,209	1,824	9,381	5,125
Deferred sales inducements	5,525	2,272	6,455	4,907

FBL Financial Group, Inc. June 30, 2007

A discussion of our operating results, by segment, follows:

Traditional Annuity Exclusive Distribution Segment

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Pre-tax operating income				
Operating revenues:				
Interest sensitive and index product charges	$ 289	$ 318	$ 576	$ 601
Net investment income	36,932	35,704	73,742	71,548
Derivative income (loss)	1,030	(62)	1,071	(96)
	38,251	35,960	75,389	72,053
Benefits and expenses	29,793	28,103	57,814	55,423
Pre-tax operating income	$ 8,458	$ 7,857	$ 17,575	$ 16,630
Other data				
Annuity premiums collected, direct	$ 36,616	$ 37,432	$ 72,079	$ 79,312
Policy liabilities and accruals, end of period			2,217,083	2,218,706
Individual deferred annuity spread:				
Weighted average yield on cash and invested assets			6.36%	6.22%
Weighted average interest crediting rate/index costs			4.08%	3.99%
Spread			2.28%	2.23%
Individual traditional annuity withdrawal rate			5.9%	5.8%

Pre-tax operating income for the Exclusive Annuity segment increased 7.6% in the second quarter of 2007 to $8.5 million and 5.7% in the six months ended June 30, 2007 to $17.6 million primarily due to an increase in net investment income from fee income related to bond calls, tender offers and mortgage loan prepayments and the reversal of net discount accretion on mortgage and asset-backed securities which totaled $2.5 million in the six-month period of 2007 compared to $0.2 million in the 2006 period. This increase was partially offset by a $1.1 million increase in amortization of deferred policy acquisition costs and the value of insurance in force for the six-month period primarily due to additional capitalization of costs incurred with new sales and updating earned rate and spread assumptions on this business.

Premiums collected decreased 9.1% in the six-month period ended June 30, 2007 to $72.1 million. The amount of traditional annuity premiums collected is highly dependent upon the relationship between the current crediting rates on our products and the crediting rates available on competing products, including bank-offered certificates of deposit. We believe the decrease in annuity premiums in 2007 is due to a rise in short-term market interest rates during 2007 and 2006, making certificates of deposit and other short-term investments more attractive in relation to these traditional annuities. We also believe this competitive environment resulted in increased surrenders, therefore increasing the withdrawal rate for the six months ended June 30, 2007. To enhance our competitive position in the current interest rate environment, we introduced a new deferred annuity contract effective July 1, 2006 that has an

interest crediting rate based on current market investment rates.

The increase in the weighted average yield on cash and invested assets and spread is primarily due to the items impacting net investment income discussed above. In 2006 we increased the crediting rate on our primary flexible premium deferred annuity product ten basis points in response to increased income generated from interest rate swaps we utilize to hedge a portion of our annuity portfolio. Income from these swaps totaled $2.0 million in the six months ended June 30, 2007 compared to $1.6 million in the comparable 2006 period. Income from these swaps is netted against interest credited through March 31, 2007, but included in derivative income (loss) starting in the second quarter of 2007. See Accounting Changes for additional details regarding this change.

FBL Financial Group, Inc. June 30, 2007

Traditional Annuity Independent Distribution Segment

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Pre-tax operating income				
Operating revenues:				
Interest sensitive and index product charges	$ 4,829	$ 3,795	$ 8,934	$ 7,357
Net investment income	73,442	51,358	144,564	97,999
Derivative income (loss)	16,105	2,334	12,051	(2,606)
	94,376	57,487	165,549	102,750
Benefits and expenses	85,901	50,476	145,915	89,807
Pre-tax operating income	$ 8,475	$ 7,011	$ 19,634	$ 12,943
Other data				
Annuity premiums collected, independent channel				
Fixed rate annuities	$ 56,674	$ 102,153	$ 131,217	$ 231,064
Index annuities	222,678	339,560	444,195	487,852
Annuity premiums collected, assumed	1,311	1,539	2,066	2,819
Policy liabilities and accruals, end of period			5,892,628	4,240,640
Individual deferred annuity spread:				
Weighted average yield on cash and invested assets			5.88%	5.78%
Weighted average interest crediting rate/index cost			3.50%	3.16%
Spread			2.38%	2.62%
Individual traditional annuity withdrawal rate			5.3%	5.0%

Pre-tax operating income for the Independent Annuity segment increased 20.9% in the second quarter of 2007 to $8.5 million and increased 51.7% to $19.6 million in the six months ended June 30, 2007. These increases are primarily due to growth in the volume of business in force, partially offset by a decrease in spreads earned on individual deferred annuities. Revenues, benefits, expenses and the volume of business in force increased primarily due to the growth of our EquiTrust Life distribution channel. The number of licensed independent agents increased to 21,533 at June 30, 2007, from 14,479 at June 30, 2006. The average aggregate account value for annuity contracts in force in the Independent Annuity segment for the six-month period totaled $5,514.2 million for 2007 and $3,884.6 million for 2006.

The increases in interest sensitive and index product charges in the 2007 periods are due to an increase in surrender charges. Surrender charges increased due to increases in surrenders relating to growth in the volume and aging of business in force. The increases in net investment income are attributable to growth in invested assets, primarily due

to net premium inflows, and the impact of an increase in our investment yield. The increase in derivative income (loss) is due to increases in proceeds from call option settlements, partially offset by increases in the cost of money for options as discussed under Derivative income (loss) above. Call option settlements in 2007 increased $22.3 million for the second quarter and $32.0 million for the six-month period due to appreciation in the underlying indices and growth in the volume of business in force. The cost of money for call options increased $8.5 million in the second quarter of 2007 and $17.3 million for the six-month period, primarily due to an increase in the business in force.

Benefits and expenses for the 2007 periods increased due to growth in the volume of business in force. The timing of policy anniversary dates and the amount of appreciation in the underlying indices also contributed to increases in index credits totaling $20.3 million in the second quarter of 2007 and $30.6 million in the six months ended June 30, 2007. In addition, the impact of unlocking adjustments increased amortization of deferred policy acquisition costs and deferred sales inducements $0.7 million in the second quarter of 2007 and decreased amortization $1.9 million for the six-month period. The impact of unlocking adjustments totaled less than ($0.1) million for the 2006 periods.

Premiums collected from the independent channel decreased for the 2007 periods primarily due to actions we took to further increase the profitability of the products. The weighted average yield on cash and invested assets increased primarily due to an increase in market investment rates and additional fee income from bond calls, tender offers, mortgage loan prepayments and the reversal of net discount accretion on mortgage and asset-backed securities totaling $0.3 million for the six-month period in 2007 and less than ($0.1) million in the 2006 period. The weighted average crediting rate increased for the 2007 period due to increasing crediting rates and option costs. The decrease in spread is due primarily to a shift in business to our multi-year guaranteed annuity which has a lower spread target than other products in our portfolio

Traditional and Universal Life Insurance Segment

	Three months ended June 30,		Six months ended June 30,	
	2007	**2006**	**2007**	**2006**
	(Dollars in thousands)			
Pre-tax operating income				
Operating revenues:				
Interest sensitive product charges	$ 11,098	$ 11,346	$ 22,427	$ 22,448
Traditional life insurance premiums and other income	38,975	35,773	73,512	70,161
Net investment income	37,319	36,117	73,156	70,789
	87,392	83,236	169,095	163,398
Benefits and expenses	71,175	67,563	141,484	136,775
Pre-tax operating income	$ 16,217	$ 15,673	$ 27,611	$ 26,623
Other data				
Life premiums collected, net of reinsurance	$ 51,591	$ 48,354	$ 100,188	$ 95,793
Policy liabilities and accruals, end of period			2,146,925	2,114,369
Direct life insurance in force, end of period (in millions)			31,969	29,547
Interest sensitive life insurance spread:				
Weighted average yield on cash and invested assets			6.83%	6.72%
Weighted average interest crediting rate			4.42%	4.47%
Spread			2.41%	2.25%

Pre-tax operating income for the Traditional and Universal Life Insurance segment increased 3.5% in the second quarter of 2007 to $16.2 million and increased 3.7% in the six-month period of 2007 to $27.6 million. The increases for the 2007 periods are attributable to the impact of an increase in business in force and higher net investment income.

The increases in net investment income are primarily due to additional fee income from bond calls, tender offers, mortgage loan prepayments and the acceleration (reversal) of net discount accretion on mortgage and asset-backed securities which totaled $2.4 million for the six months ended June 30, 2007, compared to $0.9 million in the 2006 period. Death benefits decreased 0.3% to $19.0 million for the second quarter of 2007 and 0.2% to $40.9 million for

the six months ended June 30, 2007.

Premiums collected increased 6.7% to $51.6 million for the second quarter and 4.6% to $100.2 million for the six months ended June 30, 2007 primarily due to increased sales of whole life and term life business by our exclusive Farm Bureau agency force.

The changes in the weighted average yield on cash and invested assets are attributable to the items affecting net investment income noted above partially offset by the impact of market investment rates being lower than our

26

portfolio yield. The decrease in weighted average interest crediting rate is primarily due to a decrease in credited rates on assumed business.

Variable Segment

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Pre-tax operating income				
Operating revenues:				
Interest sensitive product charges	$ 11,724	$ 11,036	$ 22,989	$ 21,402
Net investment income	3,503	3,613	6,976	7,244
Other income	535	283	2,158	548
	15,762	14,932	32,123	29,194
Benefits and expenses	11,989	14,478	26,092	25,924
Pre-tax operating income	$ 3,773	$ 454	$ 6,031	$ 3,270
Other data				
Variable premiums collected, net of reinsurance	$ 49,707	$ 43,181	$ 92,490	$ 85,017
Policy liabilities and accruals, end of period			230,030	236,813
Separate account assets, end of period			838,190	685,750
Direct life insurance in force, end of period (in millions)			7,755	7,584

Pre-tax operating income for the Variable segment increased 731.1% to $3.8 million in the second quarter of 2007 and 84.4% to $6.0 million for the six-month period primarily due to an increase in the volume of business in force and other income. Interest sensitive product charges increased due to mortality and expense fee income and cost of insurance charges. For the six-month period of 2007, mortality and expense fee income increased 23.3% to $4.8 million due to an increase in separate account assets. Cost of insurance charges increased 5.4% to $13.9 million for the six-month period primarily due to the impact of the aging of business in force.

Other income for the six-month period increased $1.0 million due to the recognition of contingent administrative fee income from alliance partners in the first quarter of 2007. This is not expected to be a recurring source of income.

Amortization of deferred policy acquisition costs decreased $2.4 million in the second quarter of 2007 compared to the second quarter of 2006 due to the impact of unlocking adjustments and updating the amortization model for the current volume of business in force. The volume of business in force, as measured by the account value of the business, can vary quarter to quarter with the market performance of the assets included in the separate accounts. Unlocking resulted in a $0.3 million decrease to amortization for the second quarter of 2007 and a $0.6 million increase for the second quarter of 2006.

FBL Financial Group, Inc. June 30, 2007
Corporate and Other Segment

	Three months ended June 30,		Six months ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Pre-tax operating loss:				
Operating revenues:				
Net investment income	$ 3,386	$ 2,180	$ 6,106	$ 3,772
Other income	5,911	5,882	11,384	11,166
	9,297	8,062	17,490	14,938
Interest expense	4,511	2,878	7,799	5,839
Benefits and other expenses	5,951	5,996	12,163	12,004
	(1,165)	(812)	(2,472)	(2,905)
Minority interest	5	(71)	(5)	(126)
Equity income, before tax	291	443	868	720
Pre-tax operating loss	$ (869)	$ (440)	$ (1,609)	$ (2,311)

Pre-tax operating loss increased 97.5% to $0.9 million for the second quarter of 2007 and decreased 30.4% to $1.6 million for the six-month period. Net investment income increased due to an increase in invested assets from the proceeds of our Senior Notes offering as discussed in the Net investment income section above. This increase was partially offset by a decrease in fee income from bond calls, mortgage loan prepayments and the acceleration (reversal) of net discount accretion on mortgage and asset-backed securities which totaled less than ($0.1) million for the six months ended June 30, 2007 and $0.5 million for the 2006 period. Interest expense increased in the 2007 periods due an increase in our average debt outstanding resulting from the Senior Notes offering.

Accounting Changes

Effective April 1, 2007, we adopted Statement of Financial Accounting Standards (Statement) 133 Implementation Issue No. G26, Cash Flow Hedges: Hedging Interest Cash Flows on Variable-Rate Assets and Liabilities That Are Not Based on a Benchmark Interest Rate, (DIG G26) which clarifies the accounting for a cash flow hedge of a variable-rate asset or liability, specifically addressing when an entity is permitted to hedge benchmark interest rate risk. DIG G26 indicates that the risk being hedged in a cash flow hedge of a variable-rate financial asset or liability cannot be designated as interest rate risk unless the cash flows of the hedged transaction are explicitly based on that same benchmark interest rate. In addition, DIG G26 clarifies that the only permitted benchmarks are the risk-free rate and rates based on the LIBOR swap curve. Hedging relationships that no longer qualify for cash flow hedge accounting based on this guidance must be undesignated prospectively. Changes in fair value of derivatives not subsequently re-designated to a new qualifying hedging relationship are recorded in earnings. Gains or losses previously included in accumulated other comprehensive income remain in accumulated other comprehensive income and are amortized to net income over the remaining term of the swaps as the hedged anticipated cash flows occur. If it becomes probable that the anticipated cash flows will not occur, the deferred gains or losses will be reclassified into earnings immediately. As a result of adopting DIG G26, we undesignated the hedging relationship for the interest rate swaps related to our flexible premium deferred annuity contracts as they are not explicitly based on one of the two permitted benchmarks. Net unrealized gains on these swaps included in accumulated other comprehensive income totaled $2.8 million at March 31, 2007 and are being amortized into income over the life of the individual swaps. Derivative income (loss) includes the change in fair value of these derivatives, which totaled $1.6 million for the

second quarter of 2007. Amortization of the net unrealized gain totaled $0.7 million for the three-month period. This guidance does not impact the interest rate swap on our line of credit, as both the derivative instrument and hedged item are based on the three-month LIBOR rate.

Effective January 1, 2007, we adopted Financial Accounting Standards Board (FASB) Interpretation No. 48, *Accounting for Uncertainty in Income Taxes.* Interpretation No. 48 creates a single model to address uncertainty in tax positions and clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. Under the Interpretation, a tax position can be recognized in the financial statements if it is more likely than not that the position will be sustained upon examination by taxing authorities who have full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured at the largest amount of benefit that is greater than

50 percent likely of being realized upon settlement. Interpretation No. 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The impact of adopting Interpretation No. 48 was not material to our consolidated financial statements; therefore the cumulative effective of change in this accounting principle, totaling $0.3 million, is reflected as an increase to income tax expense in our 2007 consolidated income statement. We recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in other expenses. We are no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years prior to 2001.

Effective January 1, 2007, we adopted Statement of Position (SOP) 05-1, Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts issued by the Accounting Standards Executive Committee of the American Institute of Certified Public Accountants. The SOP provides guidance on the accounting for internal replacements of one insurance contract for another insurance contract. Under the SOP, an internal replacement that is determined to result in a replacement contract that is substantially changed from the replaced contract is accounted for as an extinguishment of the replaced contract. As an extinguishment, the unamortized deferred policy acquisition costs, deferred sales inducements, value of insurance in force acquired and unearned revenue reserve from the replaced contract are written off at the time of the extinguishment. An internal replacement that is determined to result in a replacement contract that is substantially unchanged from the replaced contract is accounted for as a continuation of the replaced contract. The impact of adopting SOP 05-1 was not material to our consolidated financial statements for the six months ended June 30, 2007 (estimated to be less than $0.1 million) as our previous accounting policy for internal replacements substantially conformed to current interpretations of the guidance in the SOP**.**

In April 2007, the FASB issued Staff Position FIN 39-1 (FSP FIN 39-1), which amends certain aspects of FASB Interpretation No. 39, Offsetting of Amounts Related to Certain Contracts an interpretation of APB Opinion No. 10 and FASB Statement No. 105. This FSP allows a reporting entity to offset fair value amounts recognized for the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) against fair value amounts recognized for derivative instruments executed with the same counterparty under the same master netting arrangement. The guidance in this FSP is effective for fiscal years beginning after November 15, 2007, with early application permitted. We intend to adopt FSP FIN 39-1 beginning in 2008. This FSP will have no impact on our consolidated statements of income. We have not yet determined the impact of adoption on our consolidated balance sheets. Net cash collateral at June 30, 2007 totaled $104.6 million.

In February 2007, the FASB issued Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, which permits certain financial assets and liabilities to be measured at fair value, with changes in fair value reported in earnings. This election is allowed on an instrument-by-instrument basis and requires additional reporting disclosures. This Statement is effective for fiscal years beginning after November 15, 2007. Early adoption is allowed provided the provisions of Statement No. 157 are also adopted. We are currently evaluating the requirements of this Statement and have not yet concluded if the fair value option will be adopted.

In September 2006, the FASB issued Statement No. 157, Fair Value Measurements, which defines fair value, establishes a framework for measuring fair value and expands the required disclosures about fair value measurements. This Statement is effective for fiscal years beginning after November 15, 2007. The impact of adoption is not expected to be material to our consolidated financial statements.

In September 2006, the FASB issued Statement No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R). While certain aspects of this Statement were adopted effective December 31, 2006, as described in our 2006 Form 10-K, the Statement also requires measurement of a plan s assets and benefit obligations as of the end of the employer s fiscal year, beginning with fiscal years ending after December 15, 2008. The impact of adopting this aspect of the Statement is not expected to be material to our consolidated financial statements.

FBL Financial Group, Inc. June 30, 2007

Financial Condition

Investments

Our total investment portfolio increased 4.8% to $10,250.2 million at June 30, 2007 compared to $9,782.6 million at December 31, 2006. This increase is primarily the result of net cash received from interest sensitive and index products and proceeds from our Senior Notes offering, partially offset by a decrease in net unrealized appreciation on fixed maturity securities classified as available for sale. Net unrealized appreciation of fixed maturity securities decreased $188.4 million during the six months of 2007 to a net unrealized loss of $167.2 million at June 30, 2007, due principally to the impact of an increase in market interest rates. As an example of the change in market interest rates, the yield on a 10-year U.S. Treasury note increased to 5.02% at June 30, 2007 from 4.70% at December 31, 2006.

Internal investment professionals manage our investment portfolio. The investment strategy is designed to achieve superior risk-adjusted returns consistent with the investment philosophy of maintaining a largely investment grade portfolio and providing adequate liquidity for obligations to policyholders and other requirements. We continually review the returns on invested assets and change the mix of invested assets as deemed prudent under the current market environment to help maximize current income.

Our investment portfolio is summarized in the table below:

	June 30, 2007		December 31, 2006	
	Carrying Value	Percent	Carrying Value	Percent
	(Dollars in thousands)			
Fixed maturities available for sale:				
Public	$ 7,120,165	69.5%	$ 6,859,169	70.1%
144A private placement	1,291,513	12.6	1,215,215	12.4
Private placement	308,427	3.0	301,412	3.1
Total fixed maturities available for sale	8,720,105	85.1	8,375,796	85.6
Fixed maturities trading			14,927	0.2
Equity securities	33,508	0.3	50,278	0.5
Mortgage loans on real estate	1,095,258	10.7	979,883	10.0
Derivative instruments	156,429	1.5	127,478	1.3
Investment real estate	8,674	0.1	8,711	0.1
Policy loans	179,250	1.8	179,899	1.8
Other long-term investments	1,300		1,300	
Short-term investments	55,666	0.5	44,354	0.5
Total investments	$ 10,250,190	100.0%	$ 9,782,626	100.0%

As of June 30, 2007, 95.8% (based on carrying value) of the available-for-sale fixed maturity securities were investment grade debt securities, defined as being in the highest two National Association of Insurance Commissioners (NAIC) designations. Non-investment grade debt securities generally provide higher yields and involve greater risks than investment grade debt securities because their issuers typically are more highly leveraged and more vulnerable to adverse economic conditions than investment grade issuers. In addition, the trading market for these securities is usually more limited than for investment grade debt securities. We regularly review the percentage of our portfolio that is invested in non-investment grade debt securities (NAIC designations 3 through 6). As of June 30, 2007, the investment in non-investment grade debt was 4.2% of available-for-sale fixed maturity securities. At that time, no single non-investment grade holding exceeded 0.2% of total investments.

Total	$ 6,248,390	$ (250,238)	$ 4,506,253	$ (122,400)

Included in the above table are 1,119 securities from 702 issuers at June 30, 2007 and 780 securities from 513 issuers at December 31, 2006. The following summarizes the details describing the more significant unrealized losses by investment category as of June 30, 2007.

Corporate securities: The unrealized losses on corporate securities totaled $117.8 million, or 47.1% of our total unrealized losses. The largest losses were in the financial services sector ($1,221.7 million carrying value and $49.4 million unrealized loss) and in the manufacturing sector ($608.1 million carrying value and $32.1 million unrealized loss). The largest unrealized losses in the manufacturing sector were in the paper and allied products sector ($97.6 million carrying value and $7.5 million unrealized loss) and the food and kindred products sector ($90.9 million carrying value and $4.5 million unrealized loss). The unrealized losses in the paper and allied products sector and the food and kindred products sector are due to a rise in market interest rates and spread widening that is the result of weaker operating results. In addition, we believe there are concerns that these sectors may experience increased equity enhancing activity by management, such as common stock buybacks, which could be detrimental to credit quality. The unrealized losses in the financial services sector and the remaining corporate sectors were caused primarily by a rise in market interest rates. Because we have the ability and intent to hold these investments until a recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at June 30, 2007.

Mortgage and asset-backed securities: The unrealized losses on mortgage and asset-backed securities totaled $60.2 million, or 24.0% of our total unrealized losses, and were caused primarily by increases in market interest rates. We purchased most of these investments at a discount to their face amount and the contractual cash flows of these investments are based on mortgages and other assets backing the securities. Because the decline in market value is attributable to changes in market interest rates and not credit quality, and because we have the ability and intent to hold these investments until a recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at June 30, 2007.

United States Government and agencies: The unrealized losses on U.S. Governments and agencies totaled $18.8 million, or 7.5% of our total unrealized losses, and were caused by increases in market interest rates. We purchased most of these investments at a discount to their face amount and the contractual cash flows of these investments are based on direct guarantees from the U.S. Government and by agencies of the U.S. Government. Because the decline in market value is attributable to changes in market interest rates and not credit quality, and because we have the ability and intent to hold these investments until a recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at June 30, 2007.

State municipal and other governments: The unrealized losses on state, municipal and other governments totaled $36.5 million, or 14.6% of our total unrealized losses, and were caused by increases in market interest rates. We purchased most of these investments at a discount to their face amount and the contractual cash flows of these

investments are based on the taxing authority of a municipality or the revenues of a municipal project. Because the decline in market value is attributable to changes in market interest rates and not credit quality, and because we have the ability and intent to hold these investments until a recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at June 30, 2007.

Public utilities: The unrealized losses on public utilities totaled $17.1 million, or 6.8% of our total unrealized losses, and were caused primarily by an increase in market interest rates. Because the decline in market value is attributable to changes in market interest rates and not credit quality, and because we have the ability and intent to hold these investments until recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at June 30, 2007.

Excluding mortgage and asset-backed securities, no securities from the same issuer had an aggregate unrealized loss in excess of $2.1 million at June 30, 2007. With respect to mortgage and asset-backed securities not backed by the United States Government, no securities from the same issuer had an aggregate unrealized loss in excess of $5.2 million at June 30, 2007. The $5.2 million unrealized loss from one issuer relates to six different securities that are backed by different pools of residential mortgage loans. All six securities are rated investment grade and the largest unrealized loss on any one security totaled $1.5 million at June 30, 2007.

Excluding mortgage and asset-backed securities, no securities from the same issuer had an aggregate unrealized loss in excess of $1.2 million at December 31, 2006. With respect to mortgage and asset-backed securities not backed by the United States Government, no securities from the same issuer had an aggregate unrealized loss in excess of $4.5 million at December 31, 2006. The $4.5 million unrealized loss from one issuer relates to five different securities that are backed by different pools of residential mortgage loans. All five securities are rated investment grade and the largest unrealized loss on any one security totaled $2.3 million at December 31, 2006.

The carrying value and estimated market value of our portfolio of available-for-sale fixed maturity securities, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Total	$ 8,887,293	$ 8,720,105	$ 8,354,564	$ 8,375,796

Mortgage and other asset-backed securities comprised 27.6% at June 30, 2007 and 28.0% at December 31, 2006 of our total available-for-sale fixed maturity securities. These securities are purchased when we believe these types of investments provide superior risk-adjusted returns compared to returns of more conventional investments such as corporate bonds and mortgage loans. These securities are diversified as to collateral types, cash flow characteristics and maturity.

The repayment pattern on mortgage and other asset-backed securities is more variable than that of more traditional fixed maturity securities because the repayment terms are tied to underlying debt obligations that are subject to prepayments. The prepayment speeds (e.g., the rate of individuals refinancing their home mortgages) can vary based on a number of economic factors that cannot be predicted with certainty. These factors include the prevailing interest rate environment and general status of the economy.

At each balance sheet date, we review and update our expectation of future prepayment speeds and the book value of the mortgage and other asset-backed securities purchased at a premium or discount is reset, if needed, to result in a constant effective yield over the life of the security. This effective yield is computed using historical principal payments and expected future principal payment patterns. Any adjustments to book value to derive the constant effective yield, which may include the reversal of premium or discount amounts previously amortized or accrued, are recorded in the current period as a component of net investment income. Accordingly, deviations in actual prepayment speeds from that originally expected or changes in expected prepayment speeds can cause a change in the yield earned on mortgage and asset-backed securities purchased at a premium or discount and may result in adjustments that have a material positive or negative impact on quarterly reported results. Increases in prepayment speeds, which typically occur in a decreasing interest rate environment, generally increase the rate at which discount is accrued and premium is amortized into income. Decreases in prepayment speeds, which typically occur in an increasing interest rate environment, generally slow down the rate these amounts are recorded into income.

The mortgage-backed portfolio includes pass-through and collateralized mortgage obligation (CMO) securities. With a pass-through security, we receive a pro rata share of principal payments as payments are made on the underlying mortgage loans. CMOs consist of pools of mortgages divided into sections or tranches which provide sequential retirement of the bonds. We invest in sequential tranches which provide cash flow stability in that principal payments do not occur until the previous tranches are paid off. In addition, to provide call protection and more stable average lives, we invest in CMOs such as planned amortization class (PAC) and targeted amortization class (TAC) securities. CMOs of these types provide more predictable cash flows within a range of prepayment speeds by shifting the prepayment risks to support tranches. We generally do not purchase certain types of CMOs that we believe would subject the investment portfolio to greater than average risk. These include, but are not limited to, principal only, floater, inverse floater, PAC II and support tranches.

Our exposure to the sub-prime home equity loan sector totaled $28.7 million, or 0.3% of our fixed maturity security portfolio, at June 30, 2007 and $29.4 million or 0.3% of that portfolio, at December 31, 2006. This exposure consists of three securities which are all AAA rated, senior tranches of fixed rate home equity collateral originated prior to 2006. We do not participate in the adjustable rate mortgage sector and do not have exposure to any adjustable rate collateral.

The following tables set forth the amortized cost, par value and carrying value of our mortgage and asset-backed securities summarized by type of security.

	June 30, 2007

Commercial mortgage-backed securities	400,946	399,438	402,271	4.8
Other asset-backed securities	225,773	226,263	226,076	2.7
Sub-prime asset-backed securities	30,159	30,190	29,395	0.4
Total mortgage and asset-backed securities	$ 2,358,263	$ 2,385,610	$ 2,344,986	28.0%

The commercial and other asset-backed securities are primarily sequential securities. Commercial mortgage-backed securities typically have cash flows that are less sensitive to interest rate changes than residential securities of similar types due principally to prepayment restrictions on many of the underlying commercial mortgage loans. The asset-backed securities, whose collateral is primarily home-equity loans, generally exhibit more stable cash flows relative to mortgage-backed issues.

Fixed maturity securities held for trading included of U.S. Treasury securities totaling $14.9 million at December 31, 2006. These securities, which matured during 2007, had an unrealized loss of $0.1 million at December 31, 2006.

Equity securities totaled $33.5 million at June 30, 2007 and $50.3 million at December 31, 2006. Gross unrealized gains totaled $8.6 million and gross unrealized losses totaled $0.2 million at June 30, 2007. At December 31, 2006, gross unrealized gains totaled $14.9 million and gross unrealized losses totaled $0.2 million on these securities. Included in equity securities is our investment in AEL which totaled $22.2 million at June 30, 2007 and $39.4 million at December 31, 2006.

Mortgage loans totaled $1,095.3 million at June 30, 2007 and $979.9 million at December 31, 2006. These mortgage loans are diversified as to property type, location and loan size, and are collateralized by the related properties. There were no mortgages more than 60 days delinquent at June 30, 2007. At December 31, 2006, mortgages more than 60 days delinquent accounted for less than 0.1% of the carrying value of the mortgage portfolio.

Our mortgage lending policies establish limits on the amount that can be loaned to one borrower and require diversification by geographic location and collateral type. Information regarding the collateral type and related geographic location within the United States follows:

Collateral Type	June 30, 2007 Mortgage Loan Carrying Value	June 30, 2007 Percent of Total	December 31, 2006 Mortgage Loan Carrying Value	December 31, 2006 Percent of Total

Our asset-liability management program includes (i) designing and developing products that encourage persistency and help ensure targeted spreads are earned and, as a result, create a stable liability structure, and (ii) structuring the investment portfolio with duration and cash flow characteristics consistent with the duration and cash flow characteristics of our insurance liabilities. The weighted average life of the fixed maturity and mortgage loan portfolio based on market values and excluding convertible bonds, was approximately 10.3 years at June 30, 2007 and 9.6 years at December 31, 2006. Based on calculations utilizing our fixed income analytical system, including our mortgage backed prepayment assumptions, the effective duration of our fixed maturity and mortgage loan portfolios was 6.4 at June 30, 2007 and 6.1 at December 31, 2006.

Other Assets

Deferred policy acquisition costs increased 11.3% to $921.6 million and deferred sales inducements increased 23.1% to $279.1 million at June 30, 2007 due primarily to capitalization of costs incurred with new sales. In addition, deferred policy acquisition costs increased $62.8 million and deferred sales inducements increased $24.9 million due to the impact of the change in unrealized appreciation/depreciation on fixed maturity securities.

Liabilities

Policy liabilities and accruals and other policyholders funds increased 5.2% to $10,557.6 million at June 30, 2007 primarily due to increases in the volume of business in force. Long-term debt increased 45.1% to $316.9 million due to the issuance of $100.0 million of Senior Notes as described in Note 2, Credit Arrangements, to the consolidated financial statements. Other liabilities increased 48.3% to $258.8 million primarily due to an increase in payables for securities purchases.

Stockholders Equity

Stockholders equity decreased 1.0%, to $871.7 million at June 30, 2007, compared to $880.7 million at December 31, 2006. This decrease is primarily attributable to the change in net unrealized investment gains/losses and dividends paid, partially offset by net income.

At June 30, 2007, common stockholders equity was $868.7 million, or $29.01 per share, compared to $877.7 million or $29.59 per share at December 31, 2006. Included in stockholders equity per common share is ($1.37) at June 30, 2007 and $0.95 at December 31, 2006 attributable to accumulated other comprehensive income (loss).

Liquidity and Capital Resources

FBL Financial Group, Inc.

Parent company cash inflows from operations consist primarily of (i) dividends from subsidiaries, if declared and paid, (ii) fees that it charges the various subsidiaries and affiliates for management of their operations, (iii) expense reimbursements from subsidiaries and affiliates, (iv) proceeds from the exercise of employee stock options, (v) proceeds from borrowings and (vi) tax settlements between the parent company and its subsidiaries. Cash outflows are principally for salaries, taxes and other expenses related to providing these management services, capital contributions to subsidiaries, dividends on outstanding stock and interest on our parent company debt.

On March 12, 2007, we issued $100.0 million of 5.875% Senior Notes (Senior Notes) due March 15, 2017. Interest on the Senior Notes will be paid semi-annually beginning September 15, 2007. The Senior Notes are redeemable in whole or in part at any time at our option at a make-whole redemption price equal to the greater of 100% of their principal amount or the sum of the present values of the remaining scheduled payments of principal and interest on the Senior Notes, discounted to the redemption date on a semiannual basis at the treasury rate plus 20 basis points. We received net proceeds of approximately $98.5 million from the issuance of the Senior Notes after underwriting fees, offering expenses and an original issue discount. We intend to use the net proceeds to fund the continued growth of EquiTrust Life.

We paid cash dividends on our common and preferred stock during the six-month period totaling $7.2 million in 2007 and $6.8 million in 2006. Interest payments on our debt totaled $6.1 million for the six months ended June 30, 2007 and $5.9 million for the 2006 period. It is anticipated quarterly cash dividend requirements for the remainder of 2007 will be $0.12 per common and $0.0075 per Series B redeemable preferred share or approximately $7.2 million. In addition, interest payments on our debt are estimated to be $9.0 million for the remainder of 2007.

The ability of the Life Companies to pay dividends to FBL Financial Group, Inc. is limited by law to earned profits (statutory unassigned surplus) as of the date the dividend is paid, as determined in accordance with accounting practices prescribed by insurance regulatory authorities of the State of Iowa. In addition, under the Iowa Insurance Holding Company Act, the Life Companies may not pay an extraordinary dividend without prior notice to and approval by the Iowa Insurance Commissioner. An extraordinary dividend is defined under the Iowa Insurance Holding Company Act as any dividend or distribution of cash or other property whose fair market value, together with that of other dividends or distributions made within the preceding 12 months, exceeds the greater of (i) 10% of policyholders surplus (total statutory capital stock and statutory surplus) as of December 31 of the preceding year, or (ii) the statutory net gain from operations of the insurer for the 12-month period ending December 31 of the preceding year. During 2007, the maximum amount legally available for distribution to FBL Financial Group, Inc. without further regulatory approval, from Farm Bureau Life is $38.3 million and from EquiTrust Life is $32.8 million. However, distributions from Farm Bureau Life are not available without prior approval until December 2007 due to the timing and amount of dividend payments made during 2006.

FBL Financial Group, Inc. expects to rely on available cash resources to make dividend payments to its stockholders and interest payments on its debt for the remainder of 2007. During the six-month period in 2007, Farm Bureau Life obtained regulatory approval and paid dividends totaling $5.0 million. It is anticipated that Farm Bureau Life will pay dividends totaling $10.0 million in 2007 ($2.5 million per quarter with the approval of the Iowa Insurance Commissioner).

We may from time to time review potential acquisition opportunities. It is anticipated that funding for any such acquisition would be provided from available cash resources, debt or equity financing. As of June 30, 2007, we had no material commitments for capital expenditures. The parent company had available cash and investments totaling $99.6 million at June 30, 2007.

Insurance Operations

The Life Companies cash inflows consist primarily of premium income, deposits to policyholder account balances, income from investments, sales, maturities and calls of investments, repayments of investment principal and proceeds from call option exercises. In addition, EquiTrust Life receives capital contributions from FBL Financial Group to help fund its growth. The Life Companies cash outflows are primarily related to withdrawals of policyholder account balances, investment purchases, payment of policy acquisition costs, policyholder benefits, income taxes, dividends and current operating expenses. Life insurance companies generally produce a positive cash flow which may be measured by the degree to which cash inflows are adequate to meet benefit obligations to policyholders and normal operating expenses as they are incurred. The remaining cash flow is generally used to increase the asset base to provide funds to meet the need for future policy benefit payments and for writing new business. The Life Companies liquidity positions continued to be favorable in the second quarter of 2007, with cash inflows at levels sufficient to provide the funds necessary to meet their obligations.

For the life insurance operations, cash outflow requirements for operations are typically met from normal premium and deposit cash inflows. This has been the case for all reported periods as the Life Companies continuing operations and financing activities relating to interest sensitive and index products provided funds totaling $512.7 million in the six months ended June 30, 2007 and $659.5 million in the 2006 period. Positive cash flow from operations is generally used to increase the insurance companies fixed maturity securities and other investment portfolios. In developing their investment strategy, the Life Companies establish a level of cash and securities which, combined with expected net cash inflows from operations, maturities of fixed maturity investments and principal payments on mortgage and asset-backed securities and mortgage loans, are believed adequate to meet anticipated short-term and long-term benefit and expense payment obligations.

We anticipate that funds to meet our short-term and long-term capital expenditures, cash dividends to stockholders and operating cash needs will come from existing capital and internally generated funds. We believe that the current level of cash, available-for-sale and short-term securities, combined with expected net cash inflows from operations, maturities of fixed maturity investments, principal payments on mortgage and asset-backed securities and mortgage loans and premiums and deposits on our insurance products, are adequate to meet our anticipated cash obligations for the foreseeable future. Our investment portfolio at June 30, 2007, included $55.7 million of short-term investments, $148.8 million of cash and $1,102.4 million in carrying value of U.S. Government and U.S. Government agency backed securities that could be readily converted to cash at or near carrying value.

Contractual Obligations

In the normal course of business, we enter into insurance contracts, financing transactions, lease agreements or other commitments which are necessary or beneficial to our operations. These commitments may obligate us to certain cash flows during future periods. As of December 31, 2006, we had contractual obligations totaling $19,926.8 million with payments due as follows: less than one year $928.2 million, one-to-three years $1,845.9 million, four-to-five years $1,959.2 million and after five years $15,193.5 million. On March 12, 2007, we completed our $100.0 million Senior Notes offering which is due March 15, 2017. There have been no other material changes to our total contractual obligations since December 31, 2006.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in the market risks of our financial instruments since December 31, 2006.

ITEM 4. CONTROLS AND PROCEDURES

At the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and

operation of our disclosure controls and procedures. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective. Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed or submitted under the Securities and Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Act is accumulated and communicated to the issuer s management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Our internal control over financial reporting changes from time-to-time as we modify and enhance our systems and processes to meet our dynamic needs. Changes are also made as we strive to be more efficient in how we conduct our business. Any significant changes in controls are evaluated prior to implementation to help ensure the continued effectiveness of our internal controls and internal control environment. While changes have taken place in our internal controls during the quarter ended June 30, 2007, there have been no changes that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

(a) The Company s annual shareholders meeting was held on May 16, 2007.

(b) and (c) (i) Election of the following Class A directors to the Company s Board of Directors:

	For	**Withheld**
Jerry L. Chicoine	37,520,519	204,984
Tim H. Gill	37,560,889	164,614
Robert H. Hanson	37,565,466	160,037
Paul E. Larson	37,562,966	162,537
Edward W. Mehrer	37,560,383	165,120
James W. Noyce	37,096,385	629,118
Kim M. Robak	37,442,749	282,754
John E. Walker	37,522,832	202,671

(ii) Election of the following Class B directors to the Company s Board of Directors:

	For	**Withheld**
Steve L. Baccus	1,192,990	
Craig D. Hill	1,192,990	
G. Steven Kouplen	1,192,990	
Craig A. Lang	1,192,990	
Keith R. Olsen	1,192,990	

(iii) Approval of amendment to the Directors Compensation Plan. Shareholders cast 38,278,255 votes for and 461,568 votes against the approval of this Plan. There were 178,670 abstentions and no broker non-votes.

(iv) Approval of the appointment of Ernst & Young LLP as independent auditors for the Company for the year 2007. Shareholders cast 38,853,866 votes for and 45,014 votes against the appointment of Ernst & Young LLP. There were 19,613 abstentions and no broker non-votes.
