### OVERVIEW

Diluted earnings per share from continuing operations were \$0.29 for the quarter ended June 30, 2004 compared to \$0.16 in 2003. Diluted earnings per share were \$0.28 in the second quarter of 2004 compared to \$0.16 in 2003. Earnings from continuing operations and net earnings were both increased in the second quarter of 2004 by a \$4.4 million (\$0.05 per share) foreign exchange gain on temporary bank borrowings incurred in connection with business acquisitions completed in the quarter.

During the quarter the Corporation completed the acquisition of Reeves Oilfield Services Limited ("Reeves") and the land drilling business of GlobalSantaFe Corporation ("GlobalSantaFe") for US \$164.9 and US \$316.5 respectively. The GlobalSantaFe acquisition added a drilling operation complete with experienced people, 31 well-maintained rigs and operating contracts in five countries, transforming Precision into the third largest player in the international market. Reeves' unique Compact(TM) wireline technology will allow Technology Services to service a broader market, particularly in the more mature oilfields throughout the world.

To finance these acquisitions, the Corporation completed in May a public offering of US \$300 million, 5.625% Notes due 2014 and in July a public offering of 4,000,000 common shares for gross proceeds of approximately US \$200 million. On August 10, 2004 an additional 400,000 common shares were issued in connection with the exercise of the underwriting group's over-allotment option, for gross proceeds of approximately US \$20 million. In conjunction with the Notes offering the Corporation sought and received a rating of Baa2 (positive outlook) from Moody's to complement its Standard & Poor's rating of BBB+ (stable outlook) and its Dominion Bond Rating Service rating of BBB (stable trend). With these transactions Precision maintains its strong balance sheet allowing the continuance of our internal growth initiatives and the exploration of acquisition opportunities as they arise.

(1) SEE EXPLANATION ON PAGE 8

Contract Drilling revenue increased by 31% in the second quarter compared to the same period last year while operating earnings increased by 114%. The increase in operating earnings as a percentage of revenue was driven primarily by year over year drilling and service rig rate increases in the Canadian market. Operating efficiency initiatives undertaken in the service rig operation have

## Edgar Filing: PRECISION DRILLING CORP - Form 6-K

also lead to cost savings.

International drilling operations contributed to the operating earnings increase. The acquisition of 31 rigs in May, 3 additional rigs in Mexico, and improving activity in Venezuela enabled the international fleet to generate a 47% increase in operating days.

The Canadian Drilling rig fleet achieved 5,297 operating days for a 26% utilization rate in the quarter compared to 5,605 operating days and a 27% utilization rate in the comparable quarter of the prior year. Activity was slowed by wet weather which rendered ground conditions unsuitable for well site construction and equipment transportation.

Service rig hours increased by 3,968 or 5% in the second quarter of 2004 compared to the same quarter of 2003. The increased activity occurred in the northwestern portion of our operating area where customers were more willing to transport rigs to complete work to take advantage of sustained high crude oil and natural gas prices. This was offset somewhat by lower activity in the southeastern portion of our operating area as a result of wet weather conditions.

(2) CONTROLLED PRESSURE DRILLING (CPD)

Technology Services revenue increased by 26% to \$179.6 million from \$142.7 million in the second quarter of 2003. The increase is attributable to improving activity levels in the US market, the commencement of new contracts in the Asia Pacific region, more wells being completed on the Burgos integrated services project and the acquisition of Reeves Wireline in May. These improvements were offset somewhat by reductions in Canada and the non-Burgos operations in Mexico.

Operating earnings, however, declined by \$2.8 million in the second quarter compared to the same period in 2003. Activity levels in Canada were curtailed by wet weather conditions and the operation was unable to maintain winter pricing levels. This operation has significant fixed costs that can not be quickly adjusted downward when revenue expectations are not met and when operating capability must be maintained to meet the high demand for service that is expected to return when weather permits. The region also incurred higher repair and maintenance costs in anticipation of a speedier pick up in activity. Non-Burgos operations in Mexico also suffered in comparison to the prior year as contracts for Testing/CPD and Drilling Services came to an end.

Elsewhere, there were encouraging signs especially in Burgos, Asia/Pacific and United States where revenue and operating earnings grew, compared to the prior year.

Research and engineering expense rose year over year as increased resources have been put towards completing the design, testing and build out of the Rotary Steerable tools in various hole sizes. R&E associated with the Reeves acquisition is also reflected for the first time. Depreciation increased in line with the continued build out of the logging-while-drilling (LWD), measurement-while-drilling (MWD) and rotary steerable fleets.

(1) SEE EXPLANATION ON PAGE 8

Rental and Production revenue declined by \$7.5 million or 12% in the second quarter compared to the second quarter of 2003. This decrease stemmed from the industrial plant maintenance business (carried out by CEDA, a wholly-owned subsidiary), which experienced a slowing of activity at the Fort McMurray area oilsands operations where several projects were delayed or cancelled. Activity in the rental operation was relatively consistent year over year with rental rates improving somewhat.

CEDA continues to be recognized by its customers and industry associations for its high safety standards and performance. The team recently received the Syncrude President's Award for "Most Innovative Environmental, Health and Safety Idea Implemented". This award was based on the introduction of Competency-Based Training, Safety Audits and the development of the SuperLance(TM) tool used to remove run limiting fouling in Syncrude's fluid cokers.

CORPORATE AND OTHER EXPENSES

The operating loss associated with the Corporate and Other segment declined from

\$9.8 million in the second quarter of 2003 to \$8.3 million in the second quarter of 2004. Expenses associated with these activities did increase year over year in conjunction with the Corporation's expanded world wide operations. This increase was offset by a foreign exchange gain on short-term US dollar denominated debt incurred to finance the business acquisitions completed during the quarter.

### OTHER ITEMS

Interest expense for the three months ended June 30, 2004 increased by \$1.8 million or 20% over the same period in 2003 due to the debt incurred to finance business acquisitions.

The effective tax rate on earnings from continuing operations before income taxes and non-controlling interest was 11% compared to a recovery of 69% in the prior year. The tax benefit derived from how the Corporation has structured its foreign operations is amplified in the second quarter when income is at a seasonal low.

During July the Corporation issued 122,200 shares on the exercise of stock options.

### LIQUIDITY AND CAPITAL RESOURCES

Cash provided by continuing operations for the six months ended June 30, 2004 was \$271.4 million up 80% from the prior year of \$151.0 million. The Corporation spent \$97.7 million on capital additions, net of proceeds of disposal in the six month period ended June 30, 2004. During this same period, the Corporation received \$40.7 million from the sale of Fleet Cementers and Polar Completions and \$36.8 million from the exercise of stock options. These items resulted in the repayment of long-term debt and bank indebtedness prior to the business acquisitions completed in the second quarter.

The acquisition of Reeves and the land drilling business of GlobalSantaFe for a combined purchase price of, including acquisition costs, \$670.3 million was initially financed by borrowing on its operating line and through a bridge financing facility with a Canadian chartered bank. These borrowings were partially repaid with the proceeds from US \$300 million public note issue completed in May, 2004. These unsecured notes bear interest at 5.625% and mature in 2014. The remainder of the acquisition borrowings has been repaid with proceeds from the public offering of 4,000,000 common shares completed in July 2004. Gross proceeds from this offering amounted to approximately US \$200 million. On August 10, 2004 an additional 400,000 common shares were issued in connection with the exercise of the underwriting group's over-allotment option, for gross proceeds of approximately US \$20 million.

The Corporation's long-term debt to long-term debt plus equity ratio moved from 0.19 at December 31, 2003 to 0.32 at June 30, 2004 as a result of the acquisition financing. Adjusting for the common share issue in July and the use of the proceeds to repay debt, this ratio would be approximately 0.24.

### (1) NON-GAAP MEASURE

Operating earnings is not a recognized measure under Canadian generally accepted accounting principles (GAAP). Management believes that in addition to net earnings, operating earnings is a useful supplemental measure as it provides an indication of the results generated by the Corporation's principal business activities prior to consideration of how those activities are financed or how the results are taxed in various jurisdictions. Investors should be cautioned, however, that operating earnings should not be construed as an alternative to net earnings determined in accordance with GAAP as an indicator of Precision's performance. Precision's method of calculating operating earnings may differ from other companies and, accordingly, operating earnings may not be comparable to measures used by other companies.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(TABULAR AMOUNTS STATED IN THOUSANDS OF DOLLARS)

1. BASIS OF PRESENTATION

These interim financial statements were prepared using accounting policies and methods of their application consistent with those used in the preparation of the Corporation's audited financial statements for the year ended December 31, 2003, except as noted below. These interim financial statements conform in all respects to the requirements of generally accepted accounting principles in Canada for annual financial statements with the exception of certain note disclosures regarding balance sheet items and transactions occurring prior to the current reporting period. As a result, these interim financial statements should be read in conjunction with the Corporation's audited financial statements for the year ended December 31, 2003 contained in the Corporation's

## Edgar Filing: PRECISION DRILLING CORP - Form 6-K

2003 annual report.

### 2. SIGNIFICANT ACCOUNTING POLICIES (A) FOREIGN CURRENCY TRANSLATION

Accounts of foreign operations which are considered financially and operationally integrated are translated to Canadian dollars using average exchange rates for the reporting period for revenue and expenses. Monetary assets and liabilities are translated at period end current exchange rate and non-monetary assets and liabilities are translated using historical rates of exchange. Gains or losses resulting from these translation adjustments are included in net earnings.

With the acquisitions completed in the second quarter of 2004 the Corporation has international operations which are considered financially and operationally independent. These self sustaining operations are translated to Canadian dollars using average rates for the reporting period for revenue and expenses and period end rates for all assets and liabilities. Gains and losses resulting from these translation adjustments are included as a component of shareholders' equity in the cumulative translation adjustment account.

Transactions in foreign currencies are translated at rates in effect at the time of the transaction. Monetary assets and liabilities are translated at current rates. Gains or losses are included in net earnings.

### (B) HEDGING

The Corporation has designated its US \$300 million, 5.625% long-term notes as a hedge of its investment in certain self sustaining foreign operations. Gains or losses resulting from the translation of these notes at period end exchange rates are included in the cumulative translation adjustment account.

### 3. SEASONALITY OF OPERATIONS

The majority of the Corporation's operations are carried on in Canada. The ability to move heavy equipment in the Canadian oil and natural gas fields is dependent on weather conditions. As warm weather returns in the spring, the winter's frost comes out of the ground rendering many secondary roads incapable of supporting the weight of heavy equipment until they have thoroughly dried out. The duration of this "spring breakup" has a direct impact on the Corporation's activity levels. In addition, many exploration and production areas in northern Canada are accessible only in winter months when the ground is frozen hard enough to support equipment. The timing of freeze up and spring breakup affects the ability to move equipment in and out of these areas. As a result, late March through May is traditionally the Corporation's slowest time.

### 4. DISPOSAL OF DISCONTINUED OPERATIONS

On February 12, 2004, the Corporation sold substantially all of the assets of Fleet Cementers, Inc. for proceeds of \$25.7 million. On May 7, 2004 the Corporation sold the assets of the Polar Completions division for proceeds of \$15 million, subject to working capital adjustments. These assets were disposed of as they were not a core component to the Corporation's energy services globalization strategy. Effective January 1, 2003, the Corporation sold Energy Industries Inc., a wholly-owned subsidiary included in the Rental and Production segment.

Effective May 2003, the Corporation sold its 50% interest in Energy Equipment Rentals General Partnership ("EER") and Oil Drilling Exploration (Argentina) SA ("OD&E"). Both entities were included in the Contract Drilling Segment.

Results of the operations of these businesses have been classified as results of discontinued operations. The following table provides additional information

5. STOCK-BASED COMPENSATION

Effective January 1, 2004, the Corporation adopted the revised Canadian accounting standards with respect to accounting for stock-based compensation. Under the new standard, the fair value of common share purchase options is calculated at the date of grant and that value is recorded as compensation expense over the vesting period of those grants. The Corporation has retroactively applied this standard, with restatement of prior years, to all common share purchase options granted since January 1, 2002. This has resulted in a charge to net earnings for the three and six months ended June 30, 2004 of \$1.9 million and \$3.9 million (2003 - \$2.2 million and \$4.0 million) respectively, and a reduction to opening retained earnings of \$14.5 million at January 1, 2004 (\$6.3 million at January 1, 2003).

Included in shareholders' equity at June 30, 2004 is \$1.2 million (December 31, 2003 - \$215,000) relating to stock-based compensation on options that were exercised.

\* EXCLUDES BUSINESS ACQUISITIONS

7. ACQUISITIONS

During the year the Corporation made several acquisitions, the most significant of which were:

On May 14, 2004 the Corporation purchased all of the issued and outstanding shares of Reeves Oilfield Services Limited ("Reeves"). Reeves provides open hole and cased hole logging to the oil and gas industry. It has established operations in Canada, the United States, Australia, Africa, Europe and the Middle East.

On May 21, 2004, the Corporation purchased all of the worldwide land drilling assets, located in Venezuela and the Middle East, from GlobalSantaFe Corporation ("GlobalSantaFe"). These acquisitions have been accounted for by the purchase method with the results of the acquired operations to be included in the financial statements from the effective date of acquisition. Details of the transactions are as follows:

8. LONG-TERM DEBT

On May 28, 2004 the Corporation issued US \$300 million of long-term notes, bearing interest at 5.625% and maturing on June 1, 2014. These notes are redeemable at any time by the Corporation upon paying a redemption price equal to the greater of an amount calculated with reference to the yield on a United States treasury security with the same maturity and par. Proceeds of the offering were used to pay down indebtedness incurred in connection with the acquisition of the worldwide land based drilling assets of GlobalSantaFe Corporation.

9. SUBSEQUENT EVENT

On July 26, 2004 the Corporation issued 4,000,000 common shares at US \$49.80 for proceeds of approximately US \$200 million. On August 10, 2004 the Corporation issued 400,000 common shares at US \$49.80 for proceeds of approximately US \$20 million. Proceeds of the offering were used to pay down indebtedness incurred in connection with the acquisition of all the issued and outstanding shares of Reeves Oilfield Services Limited.
