DST SYSTEMS

Our Company

We are a leading provider of proprietary technology-based information processing and servicing solutions to many of the largest financial services and healthcare companies around the world. We serve clients in the asset management, brokerage, retirement, insurance, healthcare, telecommunications, utility and other markets. Our solutions help clients process, communicate and safeguard critical customer information. The services we provide include transaction processing, business process outsourcing, ancillary consulting and professional services, information technology services (such as data and software hosting), integrated print, mail and electronic customer communications solutions and data analytics. We provide these services using our deep industry knowledge, proprietary technology and scalable infrastructure for clients that operate in complex, highly regulated, and high-volume transactional business environments. Our business was established in 1969 and had operating revenues of \$1,960.6 million in 2013.

We manage our business through three primary operating segments: Financial Services, Healthcare Services and Customer Communications. Our investments in equity securities, private equity, real estate and other financial interests have been aggregated into our Investments and Other Segment.

Financial Services. The Financial Services Segment is our largest operating segment. Through this segment, we primarily provide investor services and asset distribution services. Investor services include the tracking of purchases, redemptions, exchanges and transfers of shares; maintaining investor identification and ownership records; reconciling cash and share activity; processing dividends; reporting sales; providing clearing services; performing tax and other compliance functions; and providing information for printing of investor trade confirmations, statements and year-end tax forms. In the United States, we provide investor services to mutual funds, brokerage firms, retirement plans and alternative investment funds such as real estate investment trusts, or REITs. We are the largest provider of third-party investor recordkeeping services to the U.S. mutual fund industry and there are over 100 million investor recordkeeping positions tracked by our systems. Our investor services are provided either under a software as a service, or SaaS, model or on a business process outsourcing, or BPO, basis by us or our domestic joint venture. Revenues are primarily based on the number of accounts, participants or transactions processed. Our investor BPO service offerings are enhanced by our proprietary workflow software, which is also licensed separately to clients. Internationally, in Australia and the United Kingdom, we license software solutions to funds and fund managers, who perform participant accounting and recordkeeping for the wealth management and retirement savings market. We also provide investor services on a SaaS and BPO basis internationally (United Kingdom, Canada, Ireland and Luxembourg) solely through our joint ventures with State Street Corporation.

In addition, we provide asset distribution services through the Financial Services Segment ranging from consulting to active wholesaling and marketing for open-end mutual funds, exchange-traded funds, or ETFs, closed-end funds and alternative investment funds. We also offer distribution support solutions. These include an aggregating website designed for financial advisors and broker/dealer back-office operations which provides access to consolidated account information across all of an investor's product relationships. In addition, we provide a centralized data delivery source for investor

account detail from mutual fund, variable annuity, and REIT companies that provides advisors and broker/dealer back offices transactional and position information. We also provide asset management services, through the utilization of sub-advisors and index providers and have approximately \$12.8 billion in assets under management as of March 31, 2014. The Financial Services Segment contributed approximately 49% of our consolidated operating revenue in 2013.

Healthcare Services. The Healthcare Services Segment is comprised of the Argus Health Systems and DST Health Solutions, or DSTHS, businesses. Through this segment, we provide solutions to health plans and managed care organizations, including claims adjudication, benefit management, care management, business intelligence and other ancillary services. We offer solutions to both the medical and pharmacy benefits components of a health plan or managed care organization's business.

Argus is a pharmacy benefit administrator with 444 million paid claims during 2013. Argus provides health care information management services supporting commercial, Medicaid and Medicare Part D plans to pharmacy benefit managers, managed care organizations, insurance companies, pharmaceutical manufacturers and distributors and third party administrators. Argus derives revenue from pharmacy claims processing services, and from the management of pharmacy networks, call center services, pharmaceutical rebate administration and clinical programs and management reporting for the benefit of their customers. Further, Argus' revenues include investment earnings related to client cash balances maintained in our bank accounts.

DSTHS is a medical claims benefit manager for approximately 23.9 million covered lives as of March 31, 2014. DSTHS provides processing systems, integrated care management applications, analytic solutions and BPO services for payors and providers in the U.S. healthcare industry. DSTHS' services are marketed to health insurance companies, health plans, benefits administrators, private physician practices and hospital-based physician groups. DSTHS processing services are offered on a BPO, SaaS or software license basis. Services are offered on a stand-alone basis to complement health plans, existing operations or systems, or as part of an integrated package of systems and comprehensive administrative solutions. The Healthcare Services Segment contributed approximately 17% of our consolidated operating revenue in 2013.

Customer Communications. The Customer Communications Segment offers a full range of integrated print, mail and electronic communications services to clients in the United States, Canada and the United Kingdom. Through this segment, we produce individualized communications for our client's customers such as investment fund statements, explanation of health benefit statements and monthly utility bills. We provide the formatting, printing, mailing, electronic presentment and archiving of these types of communications. The Customer Communications Segment also provides postal services to help clients optimize mail efficiencies and streamline postage expenses. Approximately 50% of the services provided by this segment are for clients in the financial services and healthcare services industries. Additionally, we provide services to the retail banking, insurance, consumer finance, video/broadband, telecommunications, utilities, retail and other service industries and are one of the largest first-class mailers in the United States. Revenues in this segment are derived from presentation and delivery (either print or digital), mailing fees and archiving of customer documents, and are based generally on the number of images or packages processed and the range of customization and personalization options chosen by the client. The Customer Communications Segment contributed approximately 33% of our consolidated operating revenue in 2013.

Investments and Other. The Investments and Other Segment is comprised of our investments in equity securities, private equity investments, real estate and other financial interests. The assets held in the Investments and Other Segment are primarily passive in nature. As of March 31, 2014, the segment holds investments in available-for-sale equity securities with a market value of approximately \$578.1 million, including approximately 6.4 million shares of State Street with a market value of \$446.8 million. At March 31, 2014, we had accumulated a deferred tax liability of approximately

\$173.6 million associated with our available-for-sale securities. We also have other equity investments held at cost of \$166.3 million. We also own and operate real estate mostly in North America and the United Kingdom, primarily for lease to our other business segments. We are a partner in real estate joint ventures that lease office space to us, other unconsolidated affiliates and unrelated third parties. The Investments and Other Segment contributed approximately 1% of our consolidated operating revenue in 2013.

Industry Trends

We operate in several segments of the diversified global processing services industry that are benefitting from significant demographic and industry trends, which we believe will enable long-term growth and demand for our services. We believe the key drivers of demand for our services include:

Aging population. The average age of the world's population is increasing. According to the United States Centers for Disease Control and Prevention, the average United States life expectancy has risen from 73.7 years in 1980, to 76.8 years in 2000, and to 78.7 years in 2010, and trends are similar in other developed countries around the world. Every day for the next 19 years, 10,000 baby boomers will turn 65, the traditional retirement age in the United States. On a global basis, the world's population of people over 65 years of age will have doubled to 1.3 billion by 2040. As demographics continue to shift around the world and the population ages, we believe there is more opportunity and potential demand for our services. In financial services, we maintain a leading retirement account processing solution alongside our variety of mutual, alternative investment and tax-advantaged fund processing solutions. Further, as one of the largest providers of Medicare Part D pharmacy claims processing and as one of the largest processors of medical claims, we believe we will experience increased demand for our services as populations age and have a greater need for healthcare.

Increased complexity and regulatory oversight. The continued expansion of regulation will favor specialized, third-party providers of recordkeeping and account processing. The two main industries in which we operate, financial services and healthcare, have seen an increase in legal and regulatory requirements, including regulations enacted by the Securities and Exchange Commission, Financial Industry Regulatory Authority, the Financial Crimes Enforcement Network and Office of Foreign Assets Control, as well as the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, the USA Patriot Act, the Patient Protection and Affordable Care Act, the Health Insurance Portability and Accountability Act of 1996, and various anti-money laundering regulations. We believe the burden and incremental cost of compliance and the ramifications of non-compliance with complex and changing regulations will likely compel asset managers, brokerage firms, and healthcare services providers towards experienced companies such as ourselves with the scale and specialization to handle their compliance needs, rather than keeping these processes in house. We believe this trend will continue to expand the available market for our services.

ETFs and non-traditional asset classes increasing in volume. Various types of investments such as ETFs, REITs, and master limited partnerships, or MLPs, in addition to traditional equity and debt mutual funds, have grown in popularity. Through recordkeeping, distribution and management capabilities for these assets, we expect to continue to take advantage of this trend. For example, through ALPS Holdings, Inc., we are the exclusive distributor for the Select Sector SPDR ETFs, which had \$79.6 billion in assets as of March 31, 2014. Additionally, we are the named advisor, administrator and distributor of the ALPS Alerian Master Limited Partnership ETF, which had \$7.8 billion in assets under management as of March 31, 2014.

Demand for top-tier data security. According to the Open Security Foundation, 267 million records were compromised globally in 2012 across 2,644 incidents, more than doubling from the prior year by number of breaches. In the United States, a survey by the Ponemon Institute found that the average organizational cost per event in 2012 was \$5.4 million, or the equivalent of \$194 per

Table of Contents

compromised record with breaches in the healthcare and financial services industries leading in volume. The data and records that we process in the financial and healthcare industries are considered highly sensitive. Our data system intrusion safeguards and detection capabilities help our clients protect their highly sensitive information and avoid costly data breaches. We believe that the rise in cyber-attacks and demand for top-tier data security is an important purchasing consideration in outsourcing and vendor selection for our current and potential clients.

Increasing demand for data analytics. The global market for data analytics is growing rapidly from a large base, and is projected to become a \$40.0 billion market in 2017, a compound annual growth rate of 12.7% from the 2013 market size of \$24.8 billion. Meanwhile, 55% of business leaders report that their organization plans to increase its use of big data analytics to support decision making. In our Healthcare Services Segment, The Johns Hopkins Adjusted Clinical Groups System, or ACG®, has been integrated into our predictive analytics solution, CareAnalyzer®, which is used by health plans and provider organizations nationally to solve complex healthcare quality, financial risk, and provider network challenges. As the demand for data analytics and insights continues to rise, we are developing additional capabilities to analyze the data that we already process for our clients and other client data to provide our clients with insights into their customers' needs and preferences.

Increasing willingness to outsource processing services. Companies that have traditionally relied on internal systems to record, manage, analyze and control company and customer data, may find it to be cumbersome, time-consuming and cost prohibitive. As a result, we believe there is a trend towards outsourcing a growing percentage of their business processes to benefit from specialized process execution and to reduce costs. We believe that companies in the industries we serve are increasingly looking to focus on core operations, expand into new markets, streamline organizations and handle increased transaction volumes. We believe the resulting increase in demand for independent processing and outsourcing vendor services will expand our market opportunity.

Our Competitive Strengths

As a leading global provider of technology-based business processing, data management, and customer communications solutions to our clients, we believe we are well positioned for continued growth due to our leadership and expertise in each of our respective lines of business along with the breadth and depth of our offerings. We believe the following are our competitive strengths:

Leadership position in industries served. We have leading positions in each of the markets our three operating segments serve. In the Financial Services Segment, we are the largest provider of third-party investor recordkeeping services, also known as transfer agency services, to the mutual fund industry. As of March 31, 2014, we provide these services for approximately 71.1 million registered accounts and 27.0 million subaccounts in the United States. We also serve 7.1 million defined contribution retirement participant accounts. We provide over 160,000 financial advisors access to approximately 475 participating investment product manufacturers through our DST Vision service.

Argus is a leading independent provider of pharmacy claims management services supporting commercial, Medicaid, and Medicare Part D plans. We are one of the largest Medicare Part D pharmacy claims processors. In 2013, Argus processed 444 million paid claims.

We believe we are one of the leading providers of transactional customer communications solutions. We are one of the largest first-class mailers in the United States and utilize sophisticated inkjet system printers coupled with high speed inserters and presort equipment, in large scale regional facilities in Canada, the United States and the United Kingdom. In 2013, our Customer Communications Segment produced over 11.4 billion images and mailed over 2.9 billion packages.

Longstanding customer relationships. We have a large and diverse global customer base that is comprised of many of the world's largest financial and healthcare companies. Our customer

Table of Contents

relationships generally span multiple years, and the length of our relationships with the top five customers have averaged 34 years in the Financial Services Segment, 17 years in the Healthcare Services Segment and 12 years in the Customer Communications Segment.

Scalable operating model. For each of our business segments, we have put in place technology and infrastructure that enable us to realize economies of scale. For our Financial Services Segment, we primarily utilize a common technology infrastructure and common proprietary platform in the United States that is scalable for our investor servicing. Within our Healthcare Services Segment, Argus' proprietary claims processing system is a highly scalable and comprehensive system for the administration of prescription claims adjudication, eligibility, pharmacy management, and related activities. In the Customer Communications Segment, we believe our investments in technology and infrastructure and other process improvement initiatives will improve operating leverage. We believe that our leading market positions and operating scale allow us to realize economy of scale advantages as we add more accounts and clients.

Robust technology platform and infrastructure. We have made and continue to make substantial investments in software, technology and infrastructure. We have developed robust platforms and use licensed software that provide advanced system intrusion and detection capabilities while enabling our clients convenient and secure access to critical information stored in the highly secure data centers that we own and operate, as the data and records we process are considered highly sensitive. These investments in technology and infrastructure, along with the trust earned from our clients through continued high levels of service, provide us a competitive advantage.

Deep regulatory compliance expertise. Over the past four decades, we have grown to be a leader in secure, compliant processing solutions for the financial services and healthcare services industries, two highly complex and regulated markets. We have maintained our market leadership and the trust of our clients over this period as we continue to adapt to a shifting and complex regulatory environment. We expect that increasing regulations will drive demand for our services and expertise.

Attractive business model with significant recurring and diversified sources of revenue. We derive our revenue through a diversified service offering across our Financial Services, Healthcare Services and Customer Communications Segments. In each of these operating segments, we provide a variety of services to a highly diversified global client base. Our services are integrated with the internal systems, processes, and database architecture of our clients, which can result in significant switching costs. Due to this high level of integration, and length of our relationships with clients, most of our revenue comes from providing products and services under contracts with long-term clients, which provides us significant revenue visibility.

Experienced management team with proven track record. We have a strong, highly experienced and committed team in each of our segments. Combined, our management team has an average of over 16 years of experience with us and an average of 30 years of experience in the industries we serve.

Our Business Strategy

To grow and achieve our strategic objectives, we are aggressively pursuing the following initiatives:

Strengthen and expand existing client relationships. We have developed longstanding relationships with many of the world's largest companies, particularly in the financial and healthcare sectors. In addition to gaining new clients, we intend to continue to strengthen and grow existing relationships in a manner which will also help our clients grow their own businesses.

Table of Contents

Develop new and innovative products and services. As a market leader, we help clients keep pace with the rapidly changing market dynamics by developing new and innovative products and services for the industries we serve to continue to meet the needs of our clients. We intend to continue to dedicate human resources and capital into staying on the cutting edge in all of the industries we serve.

Help our clients leverage data. We process large amounts of customer data that resides in our proprietary systems, which gives us the opportunity to offer a differentiated data analytics service. This customer data, such as brokerage and claims information together with public data, customer input and investments in technology, has positioned us to continue to develop a compelling and economically actionable data analytics platform. We plan to continue developing our data analytics platform to provide our clients with high value services that deliver concrete, prescriptive recommendations that enable them to better target campaigns to specific customers.

Monetize non-core assets. We hold various publicly traded and private investments in the form of available-for-sale securities, private investments and third-party occupied real estate. We intend to continue to prudently monetize these non-core assets to fund investment in our core businesses, finance opportunistic acquisitions, and return capital to shareholders.

Selectively pursue strategic acquisitions. We seek to continue to build scale and access new markets through opportunistic strategic acquisitions. We plan to pursue acquisitions that will enable us to expand the range of our service offerings to offer a broader product portfolio to our global client base. We follow a selective approach to acquisitions, focusing on quality businesses that are consistent with our strategy and that can further leverage our technology and infrastructure, distribution channels and management expertise.

Recent Developments

Concurrent Transactions with the Argyros Group

On March 23, 2014, we entered into a letter agreement with the Argyros Family Trust and certain of its affiliates (the "Argyros Group"), pursuant to which the Argyros Group withdrew their notice of director nominations and corporate governance proposals originally submitted to the Company on February 12, 2014 and agreed to vote all of the shares of our common stock beneficially owned by the Argyros Group in favor of each of our two nominees, John W. Clark and Lynn Dorsey Bleil, as well as support our recommendations with respect to voting for stockholder proposals, at our 2014 annual meeting. This agreement also provides that, if Mr. Clark, or his replacement, is unable to serve as a nominee for election as director at our 2014 annual meeting or unable to serve as a director during the three-year term for which Mr. Clark is elected, for any reason, the holder(s) of a majority of the shares held by the Argyros Group as of the date of the letter agreement will have the right to submit the name of a replacement to us for our reasonable approval.

In addition, we agreed to enter into a two-step process consisting of this offering and the Repurchase (as defined below) to help facilitate the disposition of a substantial portion of the Argyros Group's ownership of our common stock and to grant the Argyros Group certain registration rights with respect to their remaining shares of our common stock.

In furtherance of our agreement with the Argyros Group, on May 5, 2014, we entered into a stock repurchase and offering agreement with the Argyros Group pursuant to which we agreed to help facilitate a registered, secondary common stock offering of \$450 million (before any exercise by the underwriters of their option to purchase additional shares) of our common stock beneficially owned by the selling stockholders, which this offering is intended to satisfy. We also agreed to purchase an additional \$200 million of our common stock beneficially owned by the selling stockholders and not sold in this offering at the gross price per share at which the shares of common stock are sold to the public in this offering, less one half of the underwriting discount (the "Repurchase"). Our obligation to consummate the Repurchase is conditioned on the completion of this offering and the offering is at least \$450 million (before any exercise by the underwriters of their option to purchase additional shares). Pursuant to a registration rights agreement we entered into with the Argyros Group concurrently with this agreement, upon consummation of this offering and the Repurchase, or in the event we do not comply with our obligations with respect to this offering under the stock repurchase and offering agreement or we are unable for any reason to consummate the Repurchase, we will, among other things, grant the Argyros Group two (or three in the event we fail to meet certain of our obligations pursuant to the stock repurchase and offering agreement) demand registration rights with respect to their remaining shares of our common stock. Such demand registration rights would require at least \$50 million of our common stock beneficially owned by the Argyros Group to be offered per each registration and the right of the Argyros Group to such demand registrations would expire on April 24, 2019.

Concurrently with the stock repurchase and offering agreement, we entered into a governance and standstill agreement with the Argyros Group. The governance and standstill agreement provides for certain standstill provisions restricting the Argyros Group from certain actions as a holder of our common stock and outlines the ongoing rights of the Argyros Group to submit director nominees for election to our board of directors. The standstill provisions, among other things, restrict the Argyros Group from: acquiring shares of our securities; taking any steps to effect any merger involving us or the sale of our assets, engaging in any proxy contests or consent solicitations with regard to us; submitting any stockholder proposals to us and making any announcements inconsistent with any of the foregoing. In addition to the provisions described above, the governance and standstill agreement also prohibits the Argyros Group from selling shares representing beneficial ownership of more than 4.9% to any person or group unless such person or group agrees to be bound by the standstill and

Table of Contents

governance restrictions of the agreement. The governance provisions provide that, on the earlier of the consummation of this offering and the Repurchase, the first date on which the Argyros Group owns less than 10% of our outstanding common stock and the expiration of Mr. Brent L. Law's, or his replacement's, current term as a director, Mr. Law, or his replacement, will resign from our board of directors. In addition, Mr. Clark, as described above, has been nominated for election as a director at our 2014 annual meeting. For so long as the Argyros Group owns 5% or more of our outstanding common stock, the Argyros Group will have the right to nominate one director for election at our annual meeting unless a nominee named by the Argyros Group already sits on our board and is not up for election at such annual meeting. On the first date the Argyros Group beneficially owns less than 5% of our outstanding common stock, Mr. Clark, or his replacement, will resign from our board. As a result, upon the closing of this offering and the Repurchase, both Mr. Law and Mr. Clark will resign from our board. We do not currently intend to appoint replacement directors at this time.

Our board of directors has also authorized us to enter into indemnification agreements with our directors and executive officers, which agreements will provide our directors and executive officers additional contractual assurances regarding the scope of the indemnification set forth in our certificate, to provide additional procedural protection.

Risk factors

Investing in our common stock involves risks. See "Risk Factors" beginning on page S-11 of this prospectus supplement and the sections entitled "Risk Factors" beginning on page 19 of our most recent Annual Report on Form 10-K for the year ended December 31, 2013 and beginning on page 42 of our most recent Quarterly Report on Form 10-Q for the quarter ended March 31, 2014, each of which is incorporated by reference herein, for a discussion of certain risks you should consider before investing in our common stock.

Each share of common stock will be sold with an associated right, or Right, which entitles the holder, if such Right becomes exercisable, to purchase from the Company 1/1000th of a share of its Series A Preferred Stock for each share of common stock, or in some circumstances, shares of its common stock, other securities, cash or other assets. The Rights trade together with the common stock. The holders of our common stock are subject to our Rights Plan. See "Description of Capital Stock Rights Agreement" in the accompanying prospectus.

RISK FACTORS

Any investment in our common stock involves a high degree of risk. You should carefully consider the risks described below and all of the information contained in this prospectus supplement and the accompanying prospectus before deciding whether to purchase our common stock. In addition, you should carefully consider, among other things, the matters discussed under "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2013, our Quarterly Report on Form 10-Q for the quarter ended March 31, 2014, and other documents that we subsequently file with the SEC, all of which are incorporated by reference into this prospectus supplement and the accompanying prospectus. The risks and uncertainties described below, in our Annual Report on Form 10-K for the year ended December 31, 2013 and in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2014 are not the only risks and uncertainties we face. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business operations. If any such risks actually occur, our business, financial condition and results of operations would suffer. In that event, the trading price of our common stock could decline, and you may lose all or part of your investment in our common stock.

Risks Related to the Offering

Future sales of our common stock in the public market or the issuance of securities senior to our common stock could adversely affect the trading price of our common stock and our ability to raise funds in new stock offerings.

Sales by us or our stockholders of a substantial number of shares of our common stock in the public markets following this offering, or the perception that these sales might occur, could cause the market price of our common stock to decline or could impair our ability to raise capital through a future sale of, or pay for acquisitions using, our equity securities.

We may issue common stock or equity securities senior to our common stock in the future for a number of reasons, including to finance our operations and business strategy, to adjust our ratio of debt-to-equity, as consideration in acquisitions or for other reasons. To the extent we issue additional equity securities, the ownership of our existing stockholders would be diluted and our earnings per share could be reduced. In addition, the selling stockholders will continue to own a significant number of shares of our common stock that, subject to the lock-up described in "Underwriting," they may sell in the future. We cannot predict the effect, if any, that future sales or issuances of shares of our common stock or other equity securities, or the availability of shares of our common stock or any other equity securities for future sale or issuance, will have on the trading price of our common stock.

The price of our common stock may fluctuate significantly, which could negatively affect us and holders of our common stock.

The trading price of our common stock may fluctuate significantly in response to a number of factors, many of which are beyond our control. For instance, if our financial results are below the expectations of securities analysts and investors, the market price of our common stock could decrease, perhaps significantly. Other factors that may affect the market price of our common stock include announcements relating to significant corporate transactions; fluctuations in our quarterly and annual financial results; operating and stock price performance of companies that investors deem comparable to us; future sales by us or our subsidiaries of equity, equity-related or debt securities; the amount, if any, of dividends that we pay on our common stock; anticipated or pending investigations, proceedings or litigation that involve or affect us; changes in regional, national or global financial markets and economies and general market conditions, such as interest or foreign exchange rates, stock, commodity, credit or asset valuations or volatility; and changes in government regulation or proposals relating to us. In addition, the U.S. and global securities markets have experienced significant price and volume fluctuations. These fluctuations often have been unrelated to the operating performance of companies

Table of Contents

in these markets. Market fluctuations and broad market, economic and industry factors may negatively affect the price of our common stock, regardless of our operating performance. You may not be able to sell your shares of our common stock at or above the public offering price, or at all. Any volatility of or a significant decrease in the market price of our common stock could also negatively affect our ability to make acquisitions using our common stock.

We may not pay cash dividends on our common stock in the future.

Future cash dividends will depend upon our financial condition, earnings and other factors deemed relevant by our Board of Directors. Payment of dividends is subject to applicable laws and to restrictions in applicable debt agreements. This could adversely affect the market price of our common stock.

In 2010, we began paying cash dividends on our common stock. Future cash dividends will depend upon financial condition, earnings and other factors deemed relevant by our board of directors. Payment of dividends is subject to applicable laws and to restrictions in applicable debt agreements. Our board of directors unanimously determined to increase our dividend frequency from a semi-annual basis to a quarterly basis beginning in the first quarter of 2013. On January 29, 2014, our board of directors declared a quarterly cash dividend of \$0.30 per share on our common stock. The dividend was paid on March 14, 2014. We expect to declare our regular quarterly dividend for the second quarter in May, and pay such dividend to holders of record on the applicable record date in June 2014.

On January 29, 2014, our board of directors authorized a \$250 million share repurchase plan, which is separate from the Repurchase. The existing share repurchase plan allows, but does not require, the repurchase of common stock in open market and private transactions. We have not repurchased any shares under the existing share repurchase plan and currently do not intend to repurchase any shares under the existing share repurchase plan in the near term.

MATERIAL U.S. FEDERAL INCOME TAX CONSIDERATIONS TO NON-U.S. HOLDERS

The following is a summary of material U.S. federal income tax considerations applicable to a Non-U.S. Holder (defined below) with respect to the ownership and disposition of our common stock. This summary assumes that investors purchased our stock in this offering and hold our common stock as capital assets for U.S. federal income tax purposes, which generally means as property held for investment. As used in this discussion, a "Non-U.S. Holder" means a beneficial owner of our common stock that is, for U.S. federal income tax purposes, neither a partnership (nor an entity classified as a partnership for U.S. federal income tax purposes) nor a U.S. Holder, as defined below. A "U.S. Holder" means a beneficial owner of our common stock that is, for U.S. federal income tax purposes: (1) an individual who is a citizen or resident of the United States, (2) a corporation (or other entity treated as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States or of a political subdivision thereof, (3) an estate whose income is includible in gross income for U.S. federal income tax purposes regardless of its source, and (4) a trust, (i) if a court within the United States is able to exercise primary supervision over the administration of the trust and one or more U.S. persons have the authority to control all substantial decisions of the trust or (ii) if the trust has a valid election in effect under applicable Treasury regulations to be treated as a U.S. person. If a partnership (including for this purpose any entity treated as a partnership for U.S. federal income tax purposes) is a beneficial owner of our common stock, the treatment of a partner in the partnership will generally depend upon the status of the partner and upon the activities of the partnership. A holder of our common stock that is a partnership and partners in such partnership should consult their tax advisors regarding the U.S. federal income tax consequences of holding and disposing of our common stock, as the case may be. This discussion does not address all aspects of U.S. federal income taxation that may be relevant to particular Non-U.S. Holders in light of their individual circumstances or the U.S. federal income tax consequences applicable to holders that are subject to special rules, such as controlled foreign corporations, passive foreign investment companies, corporations that accumulate earnings to avoid U.S. federal income tax, banks or other financial institutions, insurance companies, tax-exempt organizations, United States expatriates, broker-dealers and traders in securities, and holders that hold our common stock as part of a "straddle," "hedge," "conversion transaction" or other integrated investment. Further, this summary does not include any description of any alternative minimum tax consequences, the Medicare contribution tax on net investment income, U.S. federal estate or gift tax laws or the tax laws of any state, local or foreign government that may be applicable to our common stock.

This discussion is based on the Internal Revenue Code of 1986, as amended, the Treasury regulations promulgated thereunder, rulings and other administrative pronouncements issued by the Internal Revenue Service (the "IRS") and judicial decisions, all as currently in effect, and all of which are subject to differing interpretations or to change, possibly on a retroactive basis. No assurance can be given that the IRS would not assert, or that a court would not sustain, a position contrary to any of the tax consequences described below. No ruling has been or will be sought from the IRS regarding any matter discussed in this prospectus supplement.

This summary is for general information only and is not tax advice. Accordingly, we urge prospective investors to consult their tax advisors with respect to the tax consequences to them of the ownership and disposition of our common stock in light of their own particular circumstances, including the tax considerations under state, local, foreign and other tax laws and the possible effects of changes in U.S. federal and other tax laws.

The rules governing U.S. federal income taxation of Non-U.S. Holders are complex and this section provides only a summary of such rules. Non-U.S. Holders should consult their tax advisors to determine the effect of U.S. federal, state, local and foreign income tax laws, as well as treaties, with regard to an investment in our common stock, including any reporting requirements.

Distributions on Common Stock

If we make distributions of cash or property on our common stock, such distributions will constitute dividends for U.S. federal income tax purposes to the extent paid from our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. Amounts not treated as dividends for U.S. federal income tax purposes will constitute a return of capital and first be applied against and reduce a Non-U.S. Holder's adjusted tax basis in its common stock, but not below zero. Any excess will be treated as capital gain and will generally be treated as described below under " Sale, Exchange or Other Disposition of Common Stock."

Dividends paid to a Non-U.S. Holder of our common stock generally will be subject to U.S. withholding tax at a 30% rate, subject to reduction under an applicable treaty. In order to obtain a reduced rate of withholding, a Non-U.S. Holder will be required to provide a properly executed IRS Form W-8BEN (or applicable successor form) certifying its entitlement to benefits under a treaty. A Non-U.S. Holder who is subject to withholding tax should consult its tax advisor as to whether it can obtain a refund for all or a portion of the withholding tax.

If a Non-U.S. Holder of our common stock is engaged in a trade or business in the United States, the Non-U.S. Holder will be subject to U.S. federal income tax at ordinary U.S. federal income tax rates (on a net basis in the same manner in which citizens and residents of the United States would be subject to U.S. federal income tax) on dividends that are effectively connected with the conduct of such trade or business or, if certain tax treaties apply, on dividends that are attributable to such holder's permanent establishment in the United States, and such dividends will not be subject to the withholding described above. In the case of such holder that is a non-U.S. corporation, such holder may also be subject to a 30% "branch profits tax" (unless the holder qualifies for a lower rate under an applicable U.S. income tax treaty) on such effectively connected dividends, as adjusted for certain items.

Generally, to claim the benefit of any applicable U.S. tax treaty or an exemption from withholding because the income is effectively connected with the conduct of a trade or business in the United States, a Non-U.S. Holder must provide a properly executed IRS Form W-8BEN for treaty benefits or IRS Form W-8ECI for effectively connected income (or such successor form as the IRS designates), before the distributions are made. These forms must be periodically updated. A Non-U.S. Holder may obtain a refund of any excess amounts withheld by timely filing an appropriate claim for refund with the IRS. Non-U.S. Holders should consult their tax advisers regarding their entitlement to benefits under an applicable income tax treaty and the specific manner of claiming the benefits of the treaty.

Sale, Exchange or Other Disposition of Common Stock

A Non-U.S. Holder will not generally be subject to U.S. federal income with respect to gain upon the sale, exchange or other disposition of our common stock, unless:

such Non-U.S. Holder is an individual who is present in the United States for 183 days or more in the taxable year of disposition and certain other conditions are met;

the income or gain is "U.S. trade or business income," which means income or gain that is effectively connected with the conduct by the Non-U.S. Holder of a trade or business in the United States and, in the case of certain tax treaties, the income or gain is attributable to a permanent establishment or a fixed base in the United States; or

our common stock constitutes a U.S. real property interest because we are or have been a "United States real property holding corporation" for U.S. federal income tax purposes at any time during the shorter of the five-year period ending on the date of disposition and the period that the Non-U.S. Holder held the common stock.

Table of Contents

We believe that we are currently not a United States real property holding corporation and will not become one in the future.

An individual Non-U.S. Holder described in the first bullet point immediately above is subject to U.S. federal income tax on the Non-U.S. Holder's gains (including gain from the sale of common stock, net of applicable United States source losses incurred on sales or exchanges of other capital assets during the year, provided the Non-U.S. Holder has timely filed U.S. federal income tax returns with respect to such losses) at a flat rate of 30% (or at a reduced rate set under an applicable tax treaty). U.S. trade or business income of a Non-U.S. Holder will generally be subject to U.S. federal income tax on a net basis in the same manner in which citizens or residents of the United States would be subject to U.S. federal income tax. A Non-U.S. Holder that realizes U.S. trade or business income with respect to our common stock should consult its tax advisors as to the treatment of such income or gain, including the possible imposition of a branch profits tax of 30% (or at a reduced rate set under an applicable tax treaty) for corporate Non-U.S. Holders.

Foreign Account Tax Compliance Act

Legislation enacted in 2010 and regulations and other guidance issued thereafter will require, after June 30, 2014, withholding at a rate of 30% on dividends in respect of, and after December 31, 2016, withholding at a rate of 30% on gross proceeds from the sale of shares of our stock held by or through certain foreign financial institutions (including investment funds), unless such institution undertakes certain diligence and reporting obligations and enters into an agreement with the Treasury to report, on an annual basis, information with respect to shares in, or accounts maintained by, the institution to the extent such shares are held by certain U.S. persons or by certain non-U.S. entities that are wholly or partially owned by U.S. persons and withhold 30% on certain payments to non-compliant foreign financial institutions, or such institution otherwise qualifies for an exemption under these rules. An intergovernmental agreement between the United States and an applicable foreign country, or future Treasury regulations or other guidance may modify these requirements. Accordingly, the entity through which our shares are held will affect the determination of whether such withholding is required. Similarly, dividends in respect of, and gross proceeds from the sale of, shares of our stock held by an investor that is a non-financial non-U.S. entity which does not qualify under certain exceptions will be subject to withholding at a rate of 30% beginning after the dates noted above, unless such entity either (i) certifies to us that such entity does not have any "substantial United States owners," (ii) provides certain information regarding the entity's "substantial United States owners," which we will in turn provide to the Secretary of the Treasury or (iii) otherwise qualifies for an exemption under these rules. We will not pay any additional amounts to stockholders in respect of any amounts withheld. Non-U.S. Holders are encouraged to consult with their tax advisors regarding the possible implications of these rules on their investment.

Information Reporting and Backup Withholding

A Non-U.S. Holder may be required to comply with certification procedures to establish that the holder is not a U.S. person in order to avoid backup withholding tax with respect to payments of dividends on our common stock, or the proceeds of the sale or other disposition of the common stock. In addition, information returns may be filed with the IRS in connection with payments on our common stock and the proceeds from a sale or other disposition of such common stock. Copies of these information returns may also be made available under the provisions of a specific treaty or agreement to the tax authorities of the country in which the Non-U.S. Holder resides or is established. Any amount withheld from a payment to a Non-U.S. Holder under backup withholding rules is allowable as a credit against the Non-U.S. Holder's federal income tax liability and may entitle such Non-U.S. Holder to a refund, provided that the required information is timely furnished to the IRS.

Subject to the terms and conditions set forth in the underwriting agreement, the underwriters have agreed, severally and not jointly, to purchase all of the shares sold under the underwriting agreement if any of these shares are purchased. If an underwriter defaults, the underwriting agreement provides that the purchase commitments of the nondefaulting underwriters may be increased or the underwriting agreement may be terminated.

We and the selling stockholders have agreed to indemnify the underwriters against certain liabilities, including liabilities under the Securities Act of 1933, or the Securities Act, or to contribute to payments the underwriters may be required to make in respect of those liabilities.

The underwriters are offering the shares, subject to prior sale, when, as and if issued to and accepted by them, subject to approval of legal matters by their counsel, including the validity of the shares, and other conditions contained in the underwriting agreement, such as the receipt by the underwriters of officer's certificates and legal opinions. The underwriters reserve the right to withdraw, cancel or modify offers to the public and to reject orders in whole or in part.

Commissions and Discounts

The representatives have advised us and the selling stockholders that the underwriters propose initially to offer the shares to the public at the public offering price set forth on the cover page of this prospectus and to dealers at that price less a concession not in excess of \$2.01 per share. After the initial offering, the public offering price, concession or any other term of the offering may be changed.

Edgar Filing: DST SYSTEMS INC - Form 424B5

Table of Contents

The following table shows the public offering price, underwriting discount and proceeds before expenses to the selling stockholders. The information assumes either no exercise or full exercise by the underwriters of their option to purchase additional shares.

	Per Share	Without Option	With Option
Public offering price	\$ 84.00	\$ 450,004,800	\$ 472,505,040
Underwriting discount	\$ 3.36	\$ 18,000,192	\$ 18,000,192
Proceeds, before expenses, to the selling stockholders	\$ 80.64	\$ 432,004,608	\$ 454,504,848

The expenses of the offering, not including the underwriting discount, are estimated at \$750,000 and are payable by us and the selling stockholders.

Option to Purchase Additional Shares

The selling stockholders have granted an option to the underwriters, exercisable for 30 days after the date of this prospectus, to purchase up to 267,860 additional shares at the public offering price. If the underwriters exercise this option, each underwriter will be obligated, subject to conditions contained in the underwriting agreement, to purchase a number of additional shares proportionate to that underwriter's initial amount reflected in the above table.

No Sales of Similar Securities

We, the selling stockholders and our executive officers and directors (other than our departing lead director) have agreed not to sell or transfer any common stock or securities convertible into, exchangeable for, exercisable for, or repayable with common stock, for 90 days after the date of this prospectus without first obtaining the written consent of Merrill Lynch and Morgan Stanley. Specifically, we and these other persons have agreed, with certain limited exceptions, not to directly or indirectly

offer, pledge, sell or contract to sell any common stock,

sell any option or contract to purchase any common stock,

purchase any option or contract to sell any common stock,

grant any option, right or warrant for the sale of any common stock,

lend or otherwise dispose of or transfer any common stock,

request or demand that we file a registration statement related to the common stock, or

enter into any swap or other agreement that transfers, in whole or in part, the economic consequence of ownership of any common stock whether any such swap or transaction is to be settled by delivery of shares or other securities, in cash or otherwise.

This lock-up provision applies to common stock and to securities convertible into or exchangeable or exercisable for or repayable with common stock. It also applies to common stock owned now or acquired later by the person executing the agreement or for which the person executing the agreement later acquires the power of disposition. Merrill Lynch and Morgan Stanley, in their sole discretion, may release the common stock and other securities subject to the lock-up agreements described above in whole or in part at any time with or without notice.

Price Stabilization, Short Positions

Until the distribution of the shares is completed, SEC rules may limit underwriters and selling group members from bidding for and purchasing our common stock. However, the representatives may engage in transactions that stabilize the price of the common stock, such as bids or purchases to peg, fix or maintain that price.

In connection with the offering, the underwriters may purchase and sell our common stock in the open market. These transactions may include short sales, purchases on the open market to cover positions created by short sales and stabilizing transactions. Short sales involve the sale by the underwriters of a greater number of shares than they are required to purchase in the offering. "Covered" short sales are sales made in an amount not greater than the underwriters' option to purchase additional shares described above. The underwriters may close out any covered short position by either exercising their option to purchase additional shares or purchasing shares in the open market. In determining the source of shares to close out the covered short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared to the price at which they may purchase shares through the option granted to them. "Naked" short sales are sales in excess of such option. The underwriters must close out any naked short position by purchasing shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of our common stock in the open market after pricing that could adversely affect investors who purchase in the offering. Stabilizing transactions consist of various bids for or purchases of shares of common stock made by the underwriters in the open market prior to the completion of the offering.

Similar to other purchase transactions, the underwriters' purchases to cover the syndicate short sales may have the effect of raising or maintaining the market price of our common stock or preventing or retarding a decline in the market price of our common stock. As a result, the price of our common stock may be higher than the price that might otherwise exist in the open market. The underwriters may conduct these transactions on the New York Stock Exchange, in the over-the-counter market or otherwise.

Neither we nor any of the underwriters make any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of our common stock. In addition, neither we nor any of the underwriters make any representation that the representatives will engage in these transactions or that these transactions, once commenced, will not be discontinued without notice.

Electronic Distribution

In connection with the offering, certain of the underwriters or securities dealers may distribute prospectuses by electronic means, such as e-mail.

Other Relationships

Some of the underwriters and their affiliates have engaged in, and may in the future engage in, investment banking and other commercial dealings in the ordinary course of business with us or our affiliates. They have received, or may in the future receive, customary fees and commissions for these transactions. An affiliate of Merrill Lynch acts as lender under our \$125 million term loan credit facility due 2014 and as bookrunner, co-lead arranger, administrative agent and lender under our \$630 million revolving credit facility due 2015, or our revolving credit facility. An affiliate of Wells Fargo Securities, LLC acts as bookrunner, co-lead arranger, syndication agent and lender under our revolving credit facility. Table of Contents

In addition, in the ordinary course of their business activities, the underwriters and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of ours or our affiliates. The underwriters and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

For the purpose of the above provisions, the expression "an offer to the public" in relation to any shares in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the shares to be offered so as to enable an investor

to decide to purchase or subscribe the shares, as the same may be varied in the Relevant Member State by any measure implementing the Prospectus Directive in the Relevant Member State and the expression "Prospectus Directive" means Directive 2003/71/EC (including the 2010 PD Amending Directive, to the extent implemented in the Relevant Member States) and includes any relevant implementing measure in the Relevant Member State and the expression "2010 PD Amending Directive" means Directive 2010/73/EU.

We may sell the debt securities, including original issue discount securities, at par or at a substantial discount below their stated principal amount. Unless we inform you otherwise in a prospectus supplement, we may issue additional debt securities of a particular series without the consent of the holders of the debt securities of such series or any other series outstanding at the time of issuance. We will describe in the applicable prospectus supplement any other special considerations for any debt securities we sell which are denominated in a currency or currency unit other than U.S. dollars. In addition, debt securities may be issued where the amount of principal and/or interest payable is determined by reference to one or more currency exchange rates, commodity prices, equity indices or other factors. Holders of such securities may receive a principal amount or a payment of interest that is greater than or less than the amount of principal or interest otherwise payable on such dates, depending upon the value of the applicable currencies, commodities, equity indices or other factors. We expect most debt securities to be issued in fully registered form without coupons and in denominations of U.S.\$2,000 and any integral multiples in excess thereof. Subject to the limitations provided in the indenture and in the prospectus supplement, debt securities that are issued in registered form may be transferred or exchanged at the designated corporate trust office of the trustee, without the payment of any service charge, other than any tax or other governmental charge payable in connection therewith.

Anti-Takeover Considerations

The Delaware General Corporation Law, our certificate of incorporation and our amended and restated bylaws contain provisions which could serve to discourage or to make more difficult a change in control of us without the support of our board of directors or without meeting various other conditions.

Extraordinary Corporate Transactions

Delaware law provides that the holders of a majority of the shares entitled to vote must approve any fundamental corporate transactions such as mergers, sales of all or substantially all of a corporation's assets, dissolutions, etc.

State Takeover Legislation

Section 203 of the Delaware General Corporation Law, in general, prohibits a business combination between a corporation and an interested stockholder within three years of the time such stockholder became an interested stockholder, unless (a) prior to such time, the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder, (b) upon consummation of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced, exclusive of shares owned by directors who are also officers and by certain employee stock plans or (c) at or subsequent to such time, the business combination is approved by the board of directors and authorized by the affirmative vote at a stockholders' meeting, and not by written consent, of at least 66²/₃% of the outstanding voting stock which is not owned by the interested stockholder. The restrictions of Section 203 of the Delaware General Corporation Law do not apply to certain business combinations or to corporations that have elected, in the manner provided therein, not to be subject to Section 203 of the Delaware General Corporation Law or, with certain exceptions, which do not have a class of voting stock that is listed on a national securities exchange or held of record by more than 2,000 stockholders. We have elected to be governed by Section 203 of the Delaware General Corporation Law.

Rights of Dissenting Stockholders

Delaware law does not afford appraisal rights in a merger transaction to holders of shares that are either listed on a national securities exchange or held of record by more than 2,000 stockholders, *provided* that such shares will be converted into stock of the surviving corporation or another corporation, which corporation in either case must also be listed on a national securities exchange or held of record by more than 2,000 stockholders. In addition, Delaware law denies appraisal rights to stockholders of the surviving corporation in a merger if the surviving corporation's stockholders weren't required to approve the merger.

Stockholder Action

Delaware law provides that, unless otherwise stated in the certificate of incorporation, any action which may be taken at an annual meeting or special meeting of stockholders may be taken without a meeting, if a consent in writing is signed by the holders of the outstanding stock having the minimum number of votes necessary to authorize the action at a meeting of stockholders. Our certificate of incorporation prohibits stockholder action by written consent.

Table of Contents

Meetings of Stockholders

Our certificate of incorporation provides that special meetings of the stockholders may be called at any time by a majority of the board of directors. No stockholder may call a special meeting.

Removal of Directors

Delaware law provides that, except in the case of a classified board of directors or where cumulative voting applies, a director, or the entire board of directors, of a corporation may be removed, with or without cause, by the affirmative vote of a majority of the shares of the corporation entitled to vote at an election of directors.

Our certificate of incorporation provides that any or all of the directors may be removed at any time, but only for cause by the affirmative vote of holders of at least 70% of then-outstanding shares of our capital stock entitled to vote in the election of our directors.

Vacancies

Delaware law provides that vacancies and newly created directorships resulting from a resignation or any increase in the authorized number of directors elected by all of the stockholders having the right to vote as a single class may be filled by a majority of the directors then in office, unless the governing documents of a corporation provide otherwise.

Our amended and restated bylaws provide that newly created directorships resulting from an increase in the number of directors and vacancies occurring in the board of directors for any reason, may be filled by vote of a majority of the directors then in office, although less than a quorum.

No Preemptive Rights

Holders of common stock do not have any preemptive rights to subscribe for any additional shares of capital stock or other obligations convertible into or exercisable for shares of capital stock that we may issue in the future.

Staggered Boards

Our certificate of incorporation provides that the number of directors shall not be fewer than three nor more than eleven and provides for a classified board of directors, consisting of three classes as nearly equal in size as reasonably possible. Each class holds office until the third annual stockholders' meeting for election of directors following the most recent election of such class.

Interested Stockholders

Our certificate of incorporation prohibits certain business combinations with Interested Stockholders, unless the holders of at least 70% of the outstanding shares of capital stock entitled to vote, voting together as a single class, vote in favor of any such business combination. Such business combinations include: (1) any merger or consolidation of the corporation or any subsidiary with (i) any Interested Stockholder or (ii) any other corporation (whether or not itself an Interested Stockholder) which is or after such merger or consolidation would be, an affiliate of an Interested Stockholder; (2) any sale lease, exchange mortgage, pledge transfer or other disposition to or with any Interested Stockholder, or any affiliate of any Interested Stockholder, of any assets of the corporation or any subsidiary having an aggregate fair market value equaling or exceeding 25% or more of the combined assets of the corporation and its subsidiaries; (3) the issuance or transfer by the corporation or any subsidiary of any securities of the corporation or any subsidiary to any Interested Stockholder or any affiliate of any Interested Stockholder in exchange for cash, securities or other property (or a combination thereof) having an aggregate fair market value equaling or exceeding 25% of the

combined assets of the corporation and its subsidiaries (except pursuant to an employee benefit plan of the corporation or any subsidiary thereof); (4) the adoption of any plan or proposal for the liquidation or dissolution of the corporation proposed by or on behalf of any Interested Stockholder or any affiliate of any Interested Stockholder; and (5) any reclassification of securities (including any reverse stock split), or recapitalization of the corporation, or any merger or consolidation of the corporation with any of its subsidiaries or any other transaction (whether or not with or into or otherwise involving an Interested Stockholder) which has the effect of increasing the proportionate share of the outstanding shares of any class of equity or convertible securities of the corporation or any subsidiary which is owned by any Interested Stockholder or any affiliate of any Interested Stockholder. Notwithstanding the foregoing, any business combination that is approved by a majority of the disinterested directors of the corporation, shall require only the affirmative vote of the majority of the outstanding shares of capital stock entitled to vote.

Our certificate of incorporation defines an "Interested Stockholder" as any person who or which: (a) is the beneficial owner of more than 10% of the voting power of the outstanding shares of capital stock entitled to vote; (b) is an affiliate of the corporation and at any time within the two-year period immediately prior to the date in question was the beneficial owner of 10% or more of the voting power of the then-outstanding shares of capital stock entitled to vote; or (c) is an assignee of or has otherwise succeeded to any shares of outstanding shares of capital stock entitled to vote which were at any time within the two-year period immediately prior to the date in question beneficially owned by any Interested Stockholder, if such assignment or succession shall have occurred in the course of a transaction or series of transactions not involving a public offering within the meaning of the Securities Act.

Rights Agreement

We are party to an amended and restated stockholders' rights agreement, or the Rights Plan, dated as of October 10, 2005 and amended and restated as of August 5, 2011. By its terms, the Rights Plan will expire on October 10, 2015. Pursuant to the terms of the Rights Plan, each share of our outstanding common stock has received one Right (as defined in the Rights Plan). Each Right entitles the registered holder to purchase from the Company 1/1000ths of a share of Series A Preferred Stock, or in some circumstances, shares of our Common Stock, other securities, cash or other assets, at a purchase price of \$225 per share, subject to certain adjustments. In the event a person or group becomes an Acquiring Person (as defined below), the Rights will entitle each holder of a Right to purchase, for the purchase price, that number of common shares equivalent to the number of common shares which at the time of the transaction would have a market value of twice the purchase price. Any Rights that are at any time beneficially owned by an Acquiring Person will be null and void and nontransferable and any holder of any such Right will be unable to exercise or transfer any such Right. At any time after any person or group becomes an Acquiring Person, but before a person or group becomes the beneficial owner of more than 50% of the outstanding common stock, our board of directors may elect to exchange each Right for consideration per Right consisting of one-half of the number of outstanding common stock that would be issuable at such time on the exercise of one Right and without payment of the purchase price. Under certain circumstances, we may redeem the rights in whole, but not in part, at a redemption price of \$0.0025 per Right.

"Acquiring Person" means any person (including its affiliates) who is the beneficial owner of 15% or more of the outstanding shares of stock, but not including (i) the Company or its subsidiaries, (ii) any employment benefit plan of the Company, (iii) a person and its affiliates who would become an Acquiring Person solely as a result of a reduction of the number of shares of outstanding common stock, including repurchases by the Company, until such person after becoming aware that he or she has become the beneficial owner of 15% or more of the outstanding common stock thereafter becomes the beneficial owner of additional shares of common stock, other than shares received directly from the

Company pursuant to the plan approved by the board of directors, representing 1% of more of the then outstanding common stock, (iv) George L. Argyros and his affiliates (the "Designated Holder") so long as they beneficially own 15% or more of the outstanding common stock, unless the Designated Holder thereafter becomes the beneficial owner of additional shares of common stock, other than shares received directly from the Company pursuant to the plan approved by the board of directors, representing 1% of more of the then outstanding common stock and (v) the trust created pursuant to the Rights Plan.

The Rights, which are automatically attached to common stock, are not exercisable or transferable separately from shares of common stock until upon the earlier of (i) ten business days following a public announcement that a person or group of affiliated or associated persons, together with any person acting in concert therewith, has acquired beneficial ownership of 15% or more of the then outstanding shares of common stock; or (ii) ten business days following the commencement of a tender offer or exchange offer that would result in a person or group becoming an Acquiring Person (as defined in the Rights Plan), unless the board of directors sets a later date in either event.

The Rights Plan is intended to encourage a potential acquiring person to negotiate directly with the board of directors, but may have certain anti-takeover effects. The Rights Plan could significantly dilute the interests in the Company of an Acquiring Person. The Rights Plan may therefore have the effect of delaying, deterring or preventing a change in control of the Company.

The description of the rights contained in this section does not describe every aspect of the rights. The Rights Plan contains the full legal text of the matters described in this section. For more information on how you can obtain a copy of the Rights Plan, see "Where You Can Find More Information."
